The Klein College of Media and Communication Field Experience course introduces first-year students in the college to the variety of ways that those in the communication industry apply their skills. It will incorporate a number of field trips to nearby sites and guest speakers, giving students exposure to the city of Harrisburg and the many ways that communications is incorporated into a career, from the private and public sectors to entrepreneurs. We'll take advantage of the fact that you're studying in the state's capitol city to make several trips to the state Capitol. All but two destinations are a short walk away. The destinations or guests will be locked into each week by the first week of the semester.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Media & Comm, Klein College.

Repeatability: This course may not be repeated for additional credits.

KLN 2001. Klein College Experience. 1 Credit Hour.

The Klein College Experience class provides support during transfer students' transition to Temple University and planning for major and career. Included among many topics are discussions of academic skills, identity and diversity, academic integrity, and financial literacy. In addition students will become familiar with academic and career planning; emotional needs of transfer students; study away/abroad; Klein College and campus resources; and post-graduation options. NOTE: This course is for Klein College of Media and Communication students only.

College Restrictions: Must be enrolled in one of the following Colleges: Media & Comm, Klein College.

Repeatability: This course may not be repeated for additional credits.

KLN 3001. Klein Launch: Professional Development Seminar. 3 Credit Hours.

Klein Launch is a concentrated professional development class. Students research occupations or fields of study after graduation. Topics include mentor relationships, job seeking strategies, networking, personal brands, effective interviewing using various platforms, personal finances, and the onboarding process in the workplace.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

Repeatability: This course may not be repeated for additional credits.

KLN 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

KLN 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

KLN 4111. Interdisciplinary Approach to Communication Campaigns. 3 Credit Hours.

Drawing from across the media and communication disciplines, students from different communication and media-related majors will learn the knowledge and skills of working together to develop a carefully and thoughtfully designed communication campaign. Students will engage with people from neighborhoods near Temple University to address specific needs of the areas surrounding Temple University, learn their needs and perspectives about specific health needs, and work together in teams to design a communication campaign that will address those needs.

Repeatability: This course may not be repeated for additional credits.

Korean (KRN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

KRN 1001. Korean Elements I. 4 Credit Hours.

First semester level.

Repeatability: This course may not be repeated for additional credits.

KRN 1002. Korean Elements II. 4 Credit Hours.

Second semester level.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KRN 1001.

KRN 2001. Korean Intermediate I. 3 Credit Hours.

Third semester of Korean.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KRN 1002.

KRN 2002. Korean Intermediate II. 3 Credit Hours.

Fourth semester of Korean.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KRN 2001.

KRN 3001. Korean Advanced I. 3 Credit Hours.

Fifth semester of Korean.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KRN 2002.

KRN 3002. Korean Advanced II. 3 Credit Hours.

Sixth semester of Korean.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KRN 3001.

KRN 3183. Korean Directed Readings I. 3 Credit Hours.

Mentored reading/study between a faculty member and student.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in KRN 3002.

KRN 3283. Korean Directed Readings II. 3 Credit Hours.

Mentored reading/study between a faculty member and a student.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in KRN 3002.

Landscape Architecture (LARC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

LARC 0841. Sustainable Design. 3 Credit Hours.

What can you do about climate change, other global environmental problems, and their resultant social and economic inequity? You can be better informed about the basis of these problems and well-equipped with real-life tools to help solve them. These are the tools of sustainable design. Through the lens of scientific principles and the scientific method, you will learn the causes and effects of climate change and human impacts on the environment. You will examine the laws of matter and energy, biogeochemical cycles, and the concepts of biodiversity and explore how humans shape our environment through planning and design. You will explore physical design solutions and research existing and alternative green approaches to complex systems including agriculture, energy production, supply chains, transportation networks, landscape design, and architecture. Your research will allow you to critically compare the ecological, social, and economic impacts of these systems and work on a design project that proposes ethical, ecologically sound solutions. This course will inform and empower you to accurately articulate causes and challenges of climate change so that you can apply sustainable design strategies in your personal and professional lives, preparing you for global citizenship as an agent of change in real-world communities. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS, SE, SF

Repeatability: This course may not be repeated for additional credits.

LARC 0852. Green vs. Gray: Improving and Sustaining Urban Ecosystems. 3 Credit Hours.

Explores urban ecosystems and methods of improving and sustaining urban environments using the City of Philadelphia as a living laboratory. Students learn about urban ecology, urban field experiments, and the work required to sustain green infrastructure within a city landscape. As a Community-Based Learning (CBL) course, students engage in four to six hours of field work and environmental stewardship which can range from the Pennsylvania Horticultural Society's Tree Tender training, tree planting, restoring urban ecological systems and vacant lots, working in sustainable urban agriculture and/or greening school rooftops. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

LARC 1013. Natural and the Built Environment. 3 Credit Hours.

An introduction to the interrelated disciplines of Landscape Architecture, Horticulture, Planning, and Architecture. Explores existing and natural site conditions and their impact on influencing and shaping the built environment. Also examines key issues in the interrelationships and applications of these allied professions. NOTE: This course should not be taken by students who have successfully completed LARC 0841.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

LARC 1044. Landscape Architecture Foundation I. 3 Credit Hours.

This course is an introduction to fundamental design principles, drawing and graphic communication skills. Students learn to 'see' and 'express' the landscape around us in terms of a new language of form, mass, space, line and composition. Emphasis is placed on exploring 2D and 3D aspects of space making principles, combining plans, sections, 3D renderings and models to develop a comprehensive understanding of spatial forms.

Repeatability: This course may not be repeated for additional credits.

LARC 1111. Introduction to Green Careers in Landscape Architecture. 1 Credit Hour.

This entry level course provides an introduction to the discipline of landscape architecture and how it prepares students for careers in the growing green and sustainability fields. Students will learn how landscape architects, with their knowledge of natural systems, are at the forefront of creating new and innovative sustainable or green practices in the design of our environments.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

LARC 1144. Landscape Architecture Foundation II. 3 Credit Hours.

This course is a further exploration and understanding of the visual language, principles, and design elements and processes used in landscape architecture. Students will apply elements and principles introduced in Foundation I to the design of real and imaginary spaces using modes of 2D, 3D drawings and model making. Ideas of abstraction, experience and time will be introduced and explored in design exercises. Students will advance freehand drawing, graphic and model making skills while also learning some basic digital media applications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in LARC 1044.

LARC 1244. Surveying. 3 Credit Hours.

Focuses on the fundamentals of plane surveying: basic measurement of distance, angle and elevation; use of basic surveying equipment: total station, levels and tapes, field notes; and basic computations: traverse closure and determination of areas.

Repeatability: This course may not be repeated for additional credits.

LARC 1544. Landscape Architecture Computer Technology I. 3 Credit Hours.

An introduction to modeling, mapping, drafting, and representation software that is currently used in landscape architectural practice. Focuses on learning the basic commands for drawing, rendering, and formatting digital representations of work for presentations.

Repeatability: This course may not be repeated for additional credits.

LARC 1982. Honors Projects. 1 to 3 Credit Hour.

For exceptional students interested in pursuing independent, in-depth study. Credits are based on the quantity and quality of work fulfilling the established course outline.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

LARC 2143. Landscape Architecture Design Studio I. 6 Credit Hours.

Development of the student's comprehension of important elements in the ecologically based landscape design process. Projects lead students through typical design processes that include inventory and analysis, case studies, evaluation of opportunities and constraints, development of conceptual ideas, and detailed landscape designs. The design process is applied to a variety of small scale, urban and suburban site design projects. Using a combination of computer, mechanical and free hand presentation techniques, studio work typically includes: site inventory and research and analysis; program development; concept alternatives; master planning; and detail design studies.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (LARC 1142 or LARC 1144)

LARC 2144. Landscape Architecture Design Studio II. 6 Credit Hours.

The development of mixed use and sustainable communities within the natural, social, cultural and economic context of development or redevelopment. Investigations of large-scale land use and community planning projects in the urban or rural context. Real world projects range from preparing community based revitalization plans and designs for inner city neighborhoods or redeveloping a rural or suburban area.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 2143.

LARC 2241. Landscape Engineering I. 3 Credit Hours.

Emphasizes the basic concepts, ideas, and techniques that deal with the visual, functional, and ecological aspects of grading and landform manipulation.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture, Landscape Architecture.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (LARC 1142 or LARC 1144)

LARC 2243. Landscape Engineering II. 3 Credit Hours.

This landscape engineering course for landscape architects integrates technical skills, esthetics considerations and sustainability in the use and applications of the 'hardscape' elements of landscape architecture such as walls, paving, steps, etc., as well as advanced landform design and stormwater management.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 2241.

LARC 2457. American Traditions of Landscape Architecture. 3 Credit Hours.

Examination of ideas, needs, visions, and values that have shaped both the designed and the common landscapes of America from the colonial period until the early 1900s.

Repeatability: This course may not be repeated for additional credits.

LARC 2496. Landscape Traditions. 3 Credit Hours.

Presents a comprehensive overview of civilization's efforts to create useful, beautiful, and symbolic spaces and places from ancient times until the modern day. NOTE: This is a writing intensive class. Students are urged to complete English 0802 or equivalent prior to registering for this class.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

LARC 2551. Landscape Architecture Computer Technology II. 3 Credit Hours.

This course builds on the basic computer knowledge introduced in LA Computer Technology I. The focus of this course is on learning the Adobe Suite applications to aid in developing professional quality presentations and exploring how to select the most useful software for a particular project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in LARC 1544.

LARC 2553. Landscape Architectural Computer Graphics. 3 Credit Hours.

Focuses on the use of digital media for visual presentation. Exposes students to image editing, publishing, and/or computer-aided design programs. Students learn how to create illustrative and technical drawings and/or portfolio work. NOTE: Course may be repeated once for a maximum of six credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in LARC 1544.

LARC 2564. Landscape Architecture Computer Technology III. 3 Credit Hours.

Addresses more advanced concepts within and between drafting, rendering, modeling, mapping, and representation software that are commonly employed in landscape architectural practice. Products are project-based and prepare students for professional standards.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 1544.

LARC 2754. Water Design in the City. 2 Credit Hours.

Cities throughout history have thrived or failed because of water. Every society's ability to secure its water supply, clean stormwater, and address flooding issues impacts the quality of life of its citizens and the aesthetic dimension of the urban landscape. Learn about artistic strategies for dealing with urban stormwater and how cities throughout the U.S. and the world are redesigning their streets, parks, and buildings to more effectively manage urban water resources. Discover aspects of green infrastructure that address strategies for water filtration, conveyance, and storage. The City of Philadelphia is the laboratory for the case studies and for building an understanding of artful stormwater management strategies.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

LARC 2758. Summer Field Ecology. 3 Credit Hours.

Students learn to "read" the landscape through the exploration of the landscape provinces of the Delaware River Basin. Through visiting natural landscapes in each of the sub-regions, students see how the relationship of geology, soils, hydrology, plant communities, and land use history reveals an understanding of the visual characteristics, opportunities, and constraints of development inherent in the natural environment.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in BOT 1112.

LARC 2870. Special Topics. 1 to 3 Credit Hour.

Variable offerings from semester to semester of selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

LARC 2885. Internship. 1 Credit Hour.

This internship requires a minimum of one semester or 350 hours of employment with a landscape architecture firm, landscape contractor, or in a related field. During the internship, students should test concepts developed in class with real work experience. NOTE: Work should be completed between sophomore and junior years.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Landscape Architecture.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

LARC 3145. Landscape Architecture Design Studio III. 6 Credit Hours.

Addresses issues pertinent to the design of parks and open space. Students analyze the site context in terms of open space and recreational opportunities, study and discuss comparable park systems and park designs. and may work closely with community groups and elected officials in developing an appropriate design program. The goal is to apply an ecological design process to the design of a park appropriate for a particular neighborhood context.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 2144.

LARC 3146. Landscape Architecture Design Studio IV: Design/Build. 6 Credit Hours.

Provides individuals the opportunity to build and implement elements of their own design. Students prepare the necessary construction documentation and then actually construct their designs. Working with construction materials enables the student to learn the opportunities and limitations of these materials. This hands-on approach is vital to understanding the relationship between design and implementation processes.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 3145 and (LARC 2242 or LARC 2243)

LARC 3243. Landscape Engineering III. 3 Credit Hours.

Includes the principles, processes, and techniques of site engineering for the "hard" elements of landscape architecture such as walls, paving, steps, decks, etc. Based on the understanding and appreciation of ecological principles, functional requirements, and aesthetic considerations. Includes elements of design/engineering such as siting buildings, grading design of simple structures, understanding the nature of construction materials, and the preparation of working drawings.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 2242.

LARC 3345. Planting Design. 3 Credit Hours.

Considers the integration of plants into the design process and emphasizes scale, development density, natural site characteristics, natural plant associations, and individual plant characteristics. Planting design studies in a variety of contexts are included.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (LARC 1142 or LARC 1144), LARC 3146, and HORT 1212.

LARC 3644. Professional Practice. 3 Credit Hours.

This course focuses on codes of professional and environmental ethics, the requirements of professional licensure, current business practices, and current and emerging challenges in landscape architectural practice. The course emphasizes the leadership role of landscape architects on interdisciplinary design teams. Students gain an understanding of different professional avenues and opportunities.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Landscape Architecture.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Repeatability: This course may not be repeated for additional credits.

LARC 3665. Grant Writing. 3 Credit Hours.

Develop skills in researching grant funding possibilities, identifying and developing appropriate restoration projects with potential for grant funding, and writing grant proposals.

Repeatability: This course may not be repeated for additional credits.

LARC 3789. Landscape Restoration Workshop. 3 Credit Hours.

Students learn principles and practices of ecological restoration through hands-on experience. They visit restored landscapes, conduct field measurements in an old growth forest, and contribute to a restoration project on the Ambler Campus. An overnight camping trip is required. By the end of the course, students understand various technical strategies involved in restoration through drawing and writing their field observations, assessing proper techniques for restoration, and then implementing those techniques on a real site.

Repeatability: This course may not be repeated for additional credits.

LARC 3882. Independent Study. 1 to 3 Credit Hour.

Explorative study or research not met in any established course. Initiated by the student, the project must be sponsored by a faculty member with an approved agreement outlining the content and requirements, including readings, meetings, and papers. NOTE: Special authorization required for all students. Students must have the agreement of a faculty sponsor and must submit a formal proposal to this faculty member and Department before registering for the course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Landscape Architecture.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

LARC 4147. Landscape Architecture Design Studio V: Fall Senior Studio. 6 Credit Hours.

Focuses on large-scale, complex planning projects dealing with growth management issues and an understanding of all phases of the planning process. The scope of the project includes analysis and evaluation of existing conditions, programming, and creation of conceptual plans, master plans, and detail designs.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 3146.

LARC 4198. Landscape Architecture Design Studio VI: Spring Senior Studio. 6 Credit Hours.

The final senior studio deals with a variety of projects that may include landscape design projects involving fine arts, urban design, and town planning. Students are challenged to achieve a comprehensive understanding of the ideas, processes, and concepts. NOTE: Fulfills the capstone writing intensive requirement for the Landscape Architecture major.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in LARC 4147.

Latin (LAT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

LAT 1001. Latin 1. 4 Credit Hours.

Latin was the language of commerce, government, and the arts in much of Europe and the Mediterranean from antiquity until the early modern period. One year of Latin instruction will allow students to read the speeches, documents, and histories of the ancient Romans, from the grand oratory of the late Republic to the martyr accounts of early Christians. This course, combined with 1002, will introduce grammar, vocabulary, and word forms, and lead students through readings of increasing difficulty until they are prepared for authentic Latin texts. Through the textbook and the ancient authors, students will be introduced to the peoples and places of the Roman world.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

LAT 1002. Latin 2. 4 Credit Hours.

This course builds on LAT 1001, developing students' knowledge of the language with increasingly difficult readings, enriched with short excerpts of unadapted texts. By the end of the course, students are prepared to read a wide range of Latin authors.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (LAT 1001, 'C1002' in LCLA, 'B1002' in LCLA, or 'EXMPT' in LCLA)

LAT 2001. Latin 3. 3 Credit Hours.

In LAT 2001, students review and fortify their knowledge of the Latin language through close reading of authentic texts. This course concentrates on Latin prose, usually oratory (such as Cicero's often inflammatory speeches) or history (such as Julius Caesar's accounts of his own wars).

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (LAT 1002 or 'EXMPT' in LCLA)

LAT 2002. Latin 4. 3 Credit Hours.

Students move on from prose to selections from the wide world of Latin poetry. In this course, students will not only read works such as Ovid's *Metamorphoses* (our primary source for many myths) or Vergil's *Aeneid* (an epic about the foundation of Rome by a Trojan hero) but will learn about the history of such literature and the contexts in which it was composed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in LAT 2001.

LAT 3002. Readings in Latin Literature II. 3 Credit Hours.

In this course, students will read from a rotating selection of Latin genres, including epic, history, oratory, drama, love elegy, and the novel. Usually concentrating on a single author, this course prepares students for advanced critical study of Latin texts by expanding their knowledge of historical contexts and modern scholarship. After completion of this course, students may pursue graduate study or a career in Latin instruction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in LAT 2002.

LAT 3096. Readings in Latin Literature I. 3 Credit Hours.

In this course, students will read from a rotating selection of Latin genres, including epic, history, oratory, drama, love elegy, and the novel. Usually concentrating on a single author, this course prepares students for advanced critical study of Latin texts by expanding their knowledge of historical contexts and modern scholarship. After completion of this course, students may pursue graduate study or a career in Latin instruction. Latin 3096 is writing intensive and may be repeated for credit.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in LAT 2002.

LAT 4000. Special Topics. 3 Credit Hours.

In this course, students will read from a rotating selection of Latin genres, including epic, history, oratory, drama, love elegy, and the novel. Usually concentrating on a single author, this course prepares students for advanced critical study of Latin texts by expanding their knowledge of historical contexts and modern scholarship. After completion of this course, students may pursue graduate study or a career in Latin instruction.

Repeatability: This course may be repeated for additional credit.

LAT 4001. Cicero: Selections. 3 Credit Hours.

Readings in a range of the works of Cicero.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in LAT 3002.

LAT 4009. Roman Epic Poets. 3 Credit Hours.

Readings from the works of various Roman epic poets.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in LAT 3002.

LAT 4082. Independent Study. 1 to 6 Credit Hour.

Concentrated work at an advanced level on a topic chosen by student and teacher. Weekly sessions.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in LAT 2002.

Latin American Studies (LAS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

LAS 0833. Race & Poverty in the Americas. 3 Credit Hours.

The transatlantic slave trade was one of the most brutal and momentous experiences in human history. Attitudes toward Latino, Caribbean, African, and Asian immigrants in the United States today can only be fully understood in the contexts of slavery and the "structural racism," "symbolic violence" (not to mention outright physical violence), and social inequalities that slavery has spawned throughout the region. Although focusing primarily on the United States, we will also study the present entanglements of poverty and race in Brazil, Haiti, and other selected nations of "The New World," placing the U.S. (and Philadelphia in particular) experience in this historical context. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0833, LAS 0933, REL 0833/0933, or SOC 0833.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

LAS 0854. Latino Immigration. 3 Credit Hours.

In order to examine Latino immigration today, it is necessary to understand the long-term, complex relations between the USA and Latin America. From this perspective, we analyze past and present immigration laws and policies and their impact on immigrants and their countries of origin; the changing push/pull factors involved in immigration; the immigration history and situation of Latino immigrants in Philadelphia and beyond; reactions towards Latino immigrants; the impact of immigration on every aspect of daily life. Students will discuss, compare and evaluate USA and Latin American news sources on current, often controversial, topics each week and will have the opportunity to learn about Philadelphia agencies that work with Latino immigrants. Course materials include analytical documents, case histories, films and literature by and about Latin American immigrants. NOTE: Students cannot receive credit for this course if they have successfully completed SPAN 0854.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

LAS 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under the Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

LAS 0968. Honors World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

LAS 1001. Perspectives on Latin America. 3 Credit Hours.

Interdisciplinary examination of social change in Latin American societies. Provides historical context and includes changing approaches to economic development, class and ethnic issues, religious traditions, art, music, and literature. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

LAS 1022. Latin American Social Struggles. 3 Credit Hours.

An examination of Latin America's contemporary history from the Cuban Revolution in 1959 through the end of the Cold War to the present. The course explores such matters as revolution and counter-revolution; human rights and institutional accountability; city life and social change; the movement of people, narcotics, goods; and new forms of political and cultural conflict. Methods of instruction include paperback readings, the internet, and video clips. Note: Students will receive credit only once for either LAS 1022 or HIST 1022.

Repeatability: This course may not be repeated for additional credits.

LAS 1010. Topics in Latin American Studies I. 3 Credit Hours.

Course topics vary each semester and may include the media in Latin America, Latin American music, race and ethnicity, and social movements. NOTE: Students can obtain a description of the current version at the Latin American Studies Center.

Repeatability: This course may be repeated for additional credit.

LAS 2020. Topics in Latino Studies. 3 Credit Hours.

Course topics vary and may include the study of Latino migration to the United States, Latino communities in the United States, and Latino political and cultural movements. NOTE: Students can obtain a description of the current version at the Latin American Studies Center.

Repeatability: This course may be repeated for additional credit.

LAS 2030. Topics in Caribbean Studies. 3 Credit Hours.

Course topics vary each semester and may include the history of Puerto Rico, the history of the Hispanic Caribbean, culture and music of the Caribbean. NOTE: Students can obtain a description of the current version at the Latin American Studies Center.

Repeatability: This course may be repeated for additional credit.

LAS 2040. Special Topics. 4 Credit Hours.

Topics vary each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

LAS 2072. Puerto Ricans in Philadelphia. 3 Credit Hours.

This course looks at the migration of Puerto Ricans to the United States in the 20th century, a group that is the second largest Hispanic group in the country. It examines the specific community of Puerto Ricans in Philadelphia and its relationship with other racial and ethnic groups and the social, political, and economic situation of Puerto Ricans in the city. NOTE: Students will earn credit only once for either LAS 2072 or AMST 2072.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

LAS 2097. Writing Seminar I. 3 Credit Hours.

Course topics vary each semester and may include the media in Latin America, Latin American music, race and ethnicity, and social movements. NOTE: Students can obtain a description of the current version at the Latin American Studies Center.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

LAS 2098. The Legacy of Mesoamerica. 3 Credit Hours.

The course briefly reviews the nature of Prehispanic Mexico and Central America by examining its earliest manifestations in the Pre-Classic Period through the Late Post-Classic Period, right before European contact. Cultures examined will include the Maya, Nahuatl, Tarascan, and Mixtec among others. We will then study the Spanish Conquest of the region and how the indigenous peoples adapted to Spanish rule during the Colonial period. Following independence from Spain, indigenous peoples of Mesoamerica dealt with a new sort of adaptation. Specifically, that of integration into the new nation-states of Mexico and Guatemala will be examined. Modern Mesoamerica will also be discussed, particularly in terms of how the indigenous peoples have adapted to a new "globalized" world.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

LAS 2101. Latin America through Film and Fiction. 3 Credit Hours.

Economic and political change; role of institutional forces including the military and church. Cultural and intellectual traditions and trends, past and present. Multi-media approach.

Repeatability: This course may not be repeated for additional credits.

LAS 2169. Archaeology of South America. 3 Credit Hours.

A survey of prehistoric cultures of South America. Concentrates on (1) the initial entry and spread of human populations into South America and the West Indies, (2) origins of tropical and highland agriculture, (3) the rise of urbanism, civilization, and the state in the Andes, and (4) the impact of prehistoric cultures on the environment.

Repeatability: This course may not be repeated for additional credits.

LAS 2173. Ancient Mesoamerica. 3 Credit Hours.

Ancient Mesoamerica is a general survey of the pre-Columbian cultures of Mexico and Middle America before the Spanish Conquest of the Aztec Empire in A.D. 1521. In this course we will examine the long history of Mesoamerica beginning with the first peopling of the Americas at least 15,000 years ago and ending with the Spanish Conquest and the creation of "Latin America."

Repeatability: This course may not be repeated for additional credits.

LAS 2220. Special Topics - LASS Seminar. 2 to 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic. NOTE: Given in Spanish as part of the LASS program.

Repeatability: This course may be repeated for additional credit.

LAS 2231. Comparative Political Systems in Latin America. 3 Credit Hours.

A comparative consideration of selected Latin American political systems. NOTE: Students will receive credit only once for either LAS 2231 or POLS 2231.

Repeatability: This course may not be repeated for additional credits.

LAS 2361. Peoples of Latin America. 3 Credit Hours.

Starting in 1492, Native American isolation from Europe and Africa ended in the region of the Americas that became Latin America. Despite five hundred years of colonial and nation-state domination, indigenous peoples in Latin America continue to assert their basic human right to resist cultural hegemony. Not only have indigenous populations survived, they are also growing. Today they constitute a majority in Bolivia, Ecuador, Guatemala, and Peru and a substantial plurality in Brazil, Mexico, and Colombia. The focus here is on this remarkable struggle for physical and cultural survival. Attention will be given to the lived experiences of people struggling for human dignity on the lowest strata of regional class structures. Issues of land rights, environmental, health, political, and economic self-determination will be examined.

Repeatability: This course may not be repeated for additional credits.

LAS 2362. Peoples and Cultures of the Caribbean. 3 Credit Hours.

Shaped by conquest and colonial transnational desires, first of sugar and then of tourism, the Caribbean has been wrought since its very inception by the displacement of people, goods and ideas from Africa, Asia, Europe, and Latin America, presenting a challenge for the anthropological study of socio-cultural change through time and space. In this introductory course on the Caribbean we will critically examine "creolization" processes at social, religious, political, economic, and artistic levels as they were driven by various groups, from pirates, privateers, maroons, exiles, to tourists, in the context of colonialism, nation building, and globalization. Examining specific sites such as music, display events, folklore, and religion we will ponder about, for instance, the effects of European revolutions on the creation of elites in the Caribbean, and the impact of slave cultures and peasantries on the formation of creole religions. How has the image of the sensuous/threatening mulatta evolved since the plantation? On what kind of histories and emotions do "zombies" feed upon? Why did Reggae and Merenge succeed on the global stage? How does the display of national icons in Trinidadian carnival reflect on their socio-political conflicts? How is the colonial past re-packaged for global consumption? Format: Seminar with short lectures, class presentations, video screenings and class discussions.

Repeatability: This course may not be repeated for additional credits.

LAS 2502. Fundamentals of Latin American Business. 3 Credit Hours.

This course is designed to give students a solid basis to face a job assignment related to business in a Latin American country and to develop your ability to perceive the importance of cultural diversity and how it influences business activities across Latin American countries. Specifically, this course will help you understand the specific challenges of doing business in Latin America and enable you to perceive and understand the differences in the business environment, business customs, and business practices between countries of Latin America and of the rest of the world.

Repeatability: This course may not be repeated for additional credits.

LAS 2512. Mexican Migration to the United States. 3 Credit Hours.

Illegal immigration remains a volatile and divisive question for the United States. Most discussions in the political system and in the mass media ignore the extensive history of Mexican migration to the United States. We will examine the pervasive influence of that history upon the present as well as the tight connections that exist between Mexican labor migration and phenomena that most US citizens prize -- the spread of American culture and influence abroad, international political stability, reliable domestic economic growth, and the availability of inexpensive goods and services. Instruction takes place through discussion, lecture, film, and computer projection. Readings include both primary documents stemming from historical events themselves as well as secondary academic studies. Note: Students will receive credit only one time for either LAS 2512 or HIST 2512.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

LAS 2514. Historical Continuity and Social Change in Latin America. 3 Credit Hours.

Overview of Latin American history from a social change/social problems perspective. Some of the historical themes addressed include: social inequality and unequal exchange, cultural domination and resistance, racial minorities and indigenism, the role of women in Latin American societies, political imposition and democracy, and national independence.

Repeatability: This course may not be repeated for additional credits.

LAS 2515. Civilization and Modernity in the Caribbean. 3 Credit Hours.

This course surveys post-Emancipation Caribbean history, regarding it as a complex process dominated by notions of "civilizing" and "modernizing." We will address the significance of both terms, exploring what they have meant for the diverse peoples inhabiting the region. What did civilizing mean for the labor practices and religious expressions of free blacks and indentured Indians in the late 19th century? What did modernizing mean for concepts of peoplehood, cultural production and representation in the 20th century? Who have been the primary agents of "civility" and "modernity"? And how have others responded to - resisted, embraced, negotiated - their efforts and ambitions? In answering these questions, we will turn to a range of disciplines including history, anthropology, literature and political science. NOTE: Students will receive credit only once for either LAS 2515 or HIST 2515.

Repeatability: This course may not be repeated for additional credits.

LAS 2522. Spanish Conquest of the Americas. 3 Credit Hours.

In 1492, Columbus sailed the ocean blue and ... either discovered or destroyed America, depending on your point of view. By 1542, Spain had claimed most of the Americas and Lopez de Gomara, the private secretary of Hernan Cortes, wrote, "The greatest event since the creation of the world." Later, in the 18th and 19th centuries, both Adam Smith and Karl Marx would make the same claim in their writings. From the very beginning, not only the magnitude but also the meaning of the Conquest of the Americas has been a point of controversy and acclaim. In this class, we will examine the Indigenous societies of the Americas and the Iberian Peninsula on the eve of their cataclysmic encounter, the processes by which the Spanish Conquistadors overran Indigenous territories, the ways in which each of these distinct societies impacted one another, and the hybrid societies that emerged on the other side. DUPLICATE CREDIT WARNING: Students can receive credit only once for either HIST 2522, ANTH 2522, or LAS 2522.

Repeatability: This course may not be repeated for additional credits.

LAS 2525. Maya Language and Culture. 3 Credit Hours.

This course will introduce students to the language and cultures of the Maya area of Mesoamerica. Students will acquire basic conversational elements of one of the Maya languages, study Maya culture, including the indigenous literature of the area where applicable, and generally gain a deeper understanding of this diverse part of Latin America.

Repeatability: This course may not be repeated for additional credits.

LAS 3010. Topics in Latin American Studies II. 3 Credit Hours.

Course topics vary each semester and may include the media in Latin America, Latin American music, race and ethnicity, and social movements. NOTE: Students can obtain a description of the current version at the Latin American Studies Center.

Repeatability: This course may be repeated for additional credit.

LAS 3020. Topics in Latino Studies. 3 Credit Hours.

Course topics vary and may include the study of Latino migration to the United States, Latino communities in the United States, and Latino political and cultural movements. NOTE: (1) Students can obtain a description of the current version at the Latin American Studies Center. (2) This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may be repeated for additional credit.

LAS 3101. Latino Identity in the United States. 3 Credit Hours.

Latino Identity in the U.S. is a general survey of the cultural-historical experiences of Latinos in the United States from pre-colonization to the present with concentration on the time period of the civil rights movement to the present. The course will explore the impact of Latinos in U.S. cultural-history and artistic expressions, across all disciplines; specifically on how this impact has reflected itself in the development of Latino identity formation and how Latinos fit within race/ethnic/gender cultural politics in the United States. Note: Students will receive credit only once for either LAS 3101 or AMST 3101.

Repeatability: This course may not be repeated for additional credits.

LAS 3229. Latin American and Latinx Philosophy. 3 Credit Hours.

This course surveys central ideas and debates in the Latin American and Latinx philosophical traditions. We will pay special attention to the impact of European colonialism in the production and reception of philosophical ideas in Latin America and Latinx communities in the US. This survey ranges from pre-colonial indigenous philosophy to the present. We will discuss classical and contemporary Andean and Mesoamerican indigenous philosophies and why they are often not treated on par with Western forms of knowledge. We will also cover philosophical debates in colonial and post-colonial Latin America. We will examine how the colonial experience shaped Latin American philosophers' ideas around race, gender, nationhood, education, progress, and authenticity. We will also reflect on aspects of the lived experience of Latinxs in the United States, such as immigration and the controversies around Latinx identity. NOTE: This course is regularly cross-listed with PHIL 3229 and SPAN 3229. Students may receive credit for only one of the following: PHIL 3229, LAS 3229, or SPAN 3229.

Repeatability: This course may not be repeated for additional credits.

LAS 3267. Sociology of Music: Nation, Race, Class and Gender in Argentina and Brazil. 3 Credit Hours.

The initial developments of the sociology of music were linked to the work of scholars who played pivotal roles in the history of sociology, such as Max Weber and Theodor Adorno. The sociology of Latin American music usually followed the theoretical developments occurring in the industrialized countries of the West, but, at the same time, it was characterized by a peculiar twist in the way it understood the complex relationship between music and society. In this course we delve into this important literature and grapple with the social and cultural foundations of music, with particular emphasis on the relationship between music and society in Brazil and Argentina. Due to the complex social organization of these two countries in terms of race, ethnicity, regionalisms, class, gender and religion, the course will explore the articulation of that complexity in the way people use music in their everyday life to understand who they are and what to do in the context of an ever changing social reality.

Repeatability: This course may not be repeated for additional credits.

LAS 3561. History of Brazil. 3 Credit Hours.

Modern and contemporary Brazilian themes including democracy, globalization, and nationalism, cultural and ideological dissent, and popular social movements. Course materials include Brazilian writings, documents, and films. NOTE: Course title prior to fall 2009: "Contemporary Brazilian Scene."

Repeatability: This course may not be repeated for additional credits.

LAS 3562. Contemporary Mexico. 3 Credit Hours.

Over the past several years, Mexico has become increasingly integrated with the United States economically, socially, and culturally; a phenomenon that has presented new challenges to both countries to organize this irreversible process constructively. We will look at the present-day questions between the United States and Mexico through the experience of Mexico's history since 1940. This period includes decades of industrialization, city growth, labor migration to the United States, cultural flourishing, political restlessness, the emergence of narcotics trafficking, and incorporation into the North American Free Trade Agreement (NAFTA). This course concludes with some speculative considerations about the future. Instruction takes place through discussion, lecture, film, computer projection, and readings from the new historical scholarship that has emerged on post-1940 Mexico.

Repeatability: This course may not be repeated for additional credits.

LAS 3563. Puerto Rican History. 3 Credit Hours.

This course explores particular issues related to the political, economic, and social development of Puerto Rico with special emphasis given to the 19th and 20th centuries. The course will not only address historical paragons but also questions of interpretations. In each class a combination of readings, discussion, lectures, and videos will be used to view the various issues in a comprehensive manner.

Repeatability: This course may not be repeated for additional credits.

LAS 3566. Race, Gender, and Empire in the Iberian World. 3 Credit Hours.

Latin America is a culturally rich and diverse region. Its complex and fascinating history is the product of different worlds and cultures coming together in the 16th century. In this course we will analyze this encounter and its consequences by looking at two main topics: race and gender. Following a chronological order that starts with the conquest of the Americas by Spaniards and Portuguese in the 16th century and ends with the breakdown of the Spanish empire in the early 19th century, the course will explore the ways in which different peoples have interacted. We will discuss the various roles men and women assumed in these societies and the significance of race. In so doing, we will attempt a deeper analysis of the social dynamics of Latin America in the past that will give us a better understanding of its present and future. Note: For history majors, this course is in the "Global/Comparative" category.

Repeatability: This course may not be repeated for additional credits.

LAS 3601. "Other Voices" in Latin American Literature. 3 Credit Hours.

This course looks at race, color, and gender in Latin American creative literature. The literature explores key cultural dimensions of the Latin American society and psyche. Focus is on the presence of Afro-Latinos, the role of Indigenous peoples, and feminist perspectives in the different Latin American societies.

Repeatability: This course may not be repeated for additional credits.

LAS 3602. Caribbean Literature and Culture. 3 Credit Hours.

The Caribbean is an immensely rich, virtually untapped cultural matrix for most North American students. This confluence of many old world cultures really is the brave new world, home of four Nobel laureates and a vast multi-lingual literature that runs in deep currents through our own national psyche. This course will focus on Caribbean artists and social movements that have had a major impact on modern culture, especially in the United States.

Repeatability: This course may not be repeated for additional credits.

LAS 3801. African Culture in Brazil. 3 Credit Hours.

This course is an interdisciplinary examination of the cultural history of Africans and their descendents in Brazil. Particular attention will be paid to the northeastern state of Bahia - the earliest and most important point of entry for Africans transported to Brazil during the Atlantic slave trade. Special focus will be paid to Bantu-Kongo culture of West Central Africa and to the Yoruba and Fon cultures of Western Africa transferred to Brazil from the late 16th through the 19th centuries.

Repeatability: This course may not be repeated for additional credits.

LAS 4082. Independent Study. 1 to 9 Credit Hour.

Independent research on a specific topic related to Latin America. This course will enable undergraduate students the option of taking an independent study through the Latin American Studies Center.

Repeatability: This course may be repeated for additional credit.

LAS 4097. Latin American Studies Seminar. 3 Credit Hours.

This course serves as the capstone for the Latin American Studies major. Students write a substantial research paper (20-25 pages) dealing with the general theme selected for the semester. This course is open to non-LAS majors with permission of the Director of Latin American Studies. Should be taken in the fall of the senior year. NOTE: Fulfills the Capstone writing course requirement for the Latin American Studies major. Special Authorization required for all students.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Latin American Studies.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Law - Undergraduate Courses (LAWU)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

LAWU 0801. Border Crossings: Gendered Dimensions of Globalization. 3 Credit Hours.

Explore the ways in which gender "works" in different cultural and national contexts, and the impact globalization has on gender relations. "Gender" indicates the ways in which our social lives are organized around categories of male and female - in relation to work, family, sexuality, culture, and nation. "Globalization" describes the transfer of economic and cultural goods between nations and peoples. Questions we will ask include: What is globalization and how do women and men experience it differently? Do women and men work the same jobs in the global labor market, and do they get paid the same wages? How does immigration affect families? Does a growing connectedness between cultures and nations change traditional gender roles? How different are experiences of women in the "Third World" from those of women in the "First World," and why? NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed GSWS 0801 or WMST 0801.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

LAWU 0825. The United States Constitution and Popular Culture. 3 Credit Hours.

What does popular culture have to do with the U.S. Constitution? The relationship between them is a two-way street: constitutional law regulates and inspires popular culture, while popular culture parodies, dilutes, and reinforces constitutional law. We will discover how websites, internet mash-ups, comics, films, music, and comedy television intersect with constitutional principles. In class, students will watch and hear popular culture works, including full-length films, video parodies, cartoons, and music. We will identify parts of popular culture restricted by the Constitution as well as those parts the Constitution celebrates. Using the lens of popular culture, we will explore how the U.S. Supreme Court operates and how the Constitution protects rights such as free speech, criminal procedure protections, and other freedoms. The course will trace popular culture references to court decisions about medical marijuana, love triangles, violent video games, cross burning, abortion, homosexual conduct, interracial marriage, obscenity, gun rights, women's rights, and school desegregation.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

LAWU 0833. Law and Literature, Law in Fact. 3 Credit Hours.

Of what does fairness consist? One important component is, of course, decision according to rule, rendered by a neutral, impartial decision maker. But the rule of law ideal does not exhaust our conceptions of what is fair. Where strict application of rules seems unduly harsh, it may seem more fair to show mercy. Or sometimes we may prefer a decision maker who is not strictly impartial, but who can empathize with the person being judged. And sometimes it is important to focus on results rather than on procedure. This interdisciplinary course will use short stories (including Susan Glaspell's famous tale, A Jury of Her Peers), novels (including Herman Melville's Billy Budd), and a Shakespeare play (Measure for Measure) to examine different visions of fairness in the law. These materials present questions of enormous social and ethical relevance, such as whether and when we might "excuse" murder or whether and when it is permissible to lie in the service of truth. Through in-class discussions, a mock trial, and writing exercises, students will be asked to bring differing images of fairness to bear on an actual legal problem that arose right here in Philadelphia, in order to see how alternative ideas of fairness might affect the way in which we understand how to behave in morally complicated situations. Students will learn to think critically about ideas such as blame, responsibility and authority, to communicate those ideas both orally and in writing, and to consider how works of fiction can show us what is true about the world in which we live.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

LAWU 0834. Understanding Justice. 3 Credit Hours.

This course will explore the idea of justice, with particular emphasis on how justice might be achieved through law. That exploration will incorporate conceptualizations of justice in political philosophy (Aristotle, Hobbes, Hume, Mill, and Rawls), as well as presentations of themes of justice in literature (Bible stories, Greek tragedy, and modern fiction). In the core portion of the course we will use these philosophical and literary materials, together with distinctively legal materials (cases, statutes, constitutional provisions), to probe the relationship between justice and law by examining the idea of legal rights (What are they? Who has them? Where do they come from? How are they related to notions of liberty and equality?), by considering how justice can be achieved through the way law is administered (What are "due process" and "equal protection"?), and by identifying the responsibilities of judges and lawyers with respect to the realization of justice through the legal system (What does it mean for a judge to be impartial? What is the responsibility of lawyers for the impact of their advocacy and counseling on third parties and on the larger society?). We will do all this by focusing on specific contemporary legal issues that raise vital questions of justice, including affirmative action, same-sex marriage, vaccination of children, workers protection laws, access to contraception, and abortion, among others.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

LAWU 0854. Education in the Global City. 3 Credit Hours.

We are in the midst of vast global change. How does it impact cities like Philadelphia and the people who live here? In this course we focus mainly on education in the city, but this doesn't mean we look only at schools. Globalization is creating new possibilities for learning: we have instant access to vast networks of information, migration is bringing rich cultural diversity to our doorsteps, and we learn in many different types of schools and communities. But globalization is also creating new problems that education must address: new kinds of poverty, increasingly separate lives, mounting intolerance, a digital divide. This course explores what education in all its forms can do to support the American dream for people in the city, nation, and the world. Our exploration goes beyond the classroom, linking academic and community-based learning. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed URBE 0854.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

LAWU 0875. Law Beyond Borders. 3 Credit Hours.

Law Beyond Borders examines how law impacts world affairs and, in turn, how world affairs impact our understanding of law. We will examine high-profile and controversial current events ranging from U.S. cyber-operations in Iran to the Syrian civil war, asking what international law is, how it works, and how well it does so. We ask what makes a nation State and what powers it has. We'll explore why and how states collaborate on issues of mutual concern and resolve their differences. We will survey the human rights revolution and the international responses to globalization, including efforts to regulate international environmental issues and international trade. The course will be taught using law school teaching methods plus three experiential exercises where students will debate Palestinian Statehood, argue a case before the International Court of Justice that arises out of war-time atrocities, and discuss potential responses to ISIS. The class will give students the tools to know what international law "is" and to assess its ability to promote justice in an increasingly globalized world. Just as importantly, this course will enhance students' critical reasoning and writing skills, and their ability to create - and critique - different styles of argument.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

LAWU 1001. Law in Public Health and Health Care. 3 Credit Hours.

This course is aimed at undergraduate students interested in the intersection of law and health, including those pursuing degrees in public health, health professions, social work, political science, criminal justice and psychology. It is intended to provide students with the tools and competencies to deal with the legal issues they will encounter in their future health-related careers. The course will cover the fundamental of law as a form of regulation and health intervention, as medium of health advocacy and social change, and as a shaper of health in itself.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Legal Studies (LGLS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

LGLS 0803. African Americans, Equality and the Law: Weapon or Tool?. 3 Credit Hours.

Learn about the experience of African Americans through the lens of the U.S. legal system. U.S. law, which first defined African Americans as less than human, eventually declared discrimination illegal, and remains both an expression and an instrument of change at the intersection of race and equality. As you study this evolution, you will reflect on relevant current events, and explore your own responses to the kind of everyday encounters that continually arise in our pluralistic society. Can race be used as a factor in hiring, in college admissions? Is race a factor for you in dating, marriage, adoption? We explore issues like these on both broad social and personal dimensions. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students who have already successfully completed LGLS 0903 or LGLS 1002 (R050) cannot earn credit for this course. Students who are under Core and take this course in fall 2008 or after will ONLY fulfill the Race requirement for Core. This course will NOT fulfill the American Culture Core requirement.

Course Attributes: GD, SF

Repeatability: This course may not be repeated for additional credits.

LGLS 0805. Sexual Orientation, Gender Identity and the Law. 3 Credit Hours.

Transgender rights. Marriage equality. LGBT+ and the military. Hate crimes. Discrimination. From the decriminalization of sodomy to the legalization of same-sex marriage to the implications of gender reassignment, sexual orientation and gender identity are some of the most rapidly changing subjects in society today. The progression (and regression) of societal attitudes toward differences based on sexual orientation and gender identity have led to legal developments that affect the lives of individuals in larger communities (LGBT+ and otherwise). This course will look at the intersections of law, psychology, sexual orientation, and gender identity to develop your understandings of the relationships between individuals and communities. It aims to teach you how to interpret human behavior and articulate your own point of view by examining the social and legal regulation of sexual orientation and gender identity. This course will look at issues involving sexual orientation, gender identity, social skills to evaluate social and legal responses to gender identity and sexual orientation. This course will address specific topics including employment discrimination, marriage equality, family formation, LGBT + youth (identity formation, bullying), military service, immigration, and cross-national comparisons. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd. Students who have already successfully completed LGLS 0905 cannot earn credit for this course.

Course Attributes: GB, SF

Repeatability: This course may not be repeated for additional credits.

LGLS 0856. Law and American Society. 3 Credit Hours.

An intruder rushes into class, hits the professor in the face with a pie, and runs out. You are asked to provide a description of the assailant--and now you realize this was a demonstration of the faultiness of human memory in making eyewitness identification. Develop your understanding of the historical, socio-political and ethical context of the U.S. legal system as you follow the misadventures of a fictional family that gets caught up in various legal problems. Current events inform every assignment; you might analyze, for example, the case against McDonalds brought on behalf of obese children, and then research legislation known as the "Cheeseburger Bill," prohibiting such lawsuits. An exciting, multimedia environment makes learning vivid. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students who have already successfully completed LGLS 0956 or LGLS 1001 (C001) cannot earn credit for this course.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

LGLS 0903. Honors African Americans, Equality and the Law: Weapon or Tool?. 3 Credit Hours.

Learn about the experience of African Americans through the lens of the U.S. legal system. U.S. law, which first defined African Americans as less than human, eventually declared discrimination illegal, and remains both an expression and an instrument of change at the intersection of race and equality. As you study this evolution, you will reflect on relevant current events, and explore your own responses to the kind of everyday encounters that continually arise in our pluralistic society. Can race be used as a factor in hiring, in college admissions? Is race a factor for you in dating, marriage, adoption? We explore issues like these on both broad social and personal dimensions. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students who have already successfully completed LGLS 0803 or LGLS 1002 (R050) cannot earn credit for this course. Students who are under Core and take this course in fall 2008 or after will ONLY fulfill the Race requirement for Core. This course will NOT fulfill the American Culture Core requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SF

Repeatability: This course may not be repeated for additional credits.

LGLS 0905. Honors Sexual Orientation, Gender Identity and the Law. 3 Credit Hours.

Same-sex marriage. Gays in the military. Hate crimes. Chaz Bono and "Dancing with the Stars." From the decriminalization of sodomy to the legalization of same-sex marriage to the implications of gender reassignment, sexual orientation and gender identity are some of the most rapidly changing subjects in society today. The progression (and regression) of societal attitudes toward differences based on sexual orientation and gender identity have led to legal developments that affect the lives of individuals in larger communities (LGBT and otherwise). This course will look at the intersections of law, psychology, sexual orientation, and gender identity to develop your understandings of the relationships between individuals and communities. It aims to teach you how to interpret human behavior and articulate your own point of view by examining the social and legal regulation of sexual orientation and gender identity. This course will look at issues involving sexual orientation, gender identity, social stigma, discrimination and injustice from legal and psychological perspectives. You will develop your critical thinking skills to evaluate social and legal responses to gender identity and sexual orientation. This course will address specific topics including employment discrimination, same sex marriage, family formation, LGBT youth (identity formation, bullying), military service, immigration and cross-national comparisons. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd. Students who have already successfully completed LGLS 0805 cannot earn credit for this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO, SF

Repeatability: This course may not be repeated for additional credits.

LGLS 0956. Honors Law and American Society. 3 Credit Hours.

LGLS 1001. Law in Society. 3 Credit Hours.

The American legal system affects each of us on a daily basis. Educated citizens, no matter what career path they may choose, should be aware of the ways in which the law can impact their lives. This survey course introduces students to the essential aspects of law: its sources, organization, and evolution. They will learn the basic elements of constitutional, contract, criminal, tort, and administrative law. The political, social, and economic forces that affect change are also discussed thereby providing guidance as to the future direction of the law. NOTE: This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

LGLS 1101. Legal Environment of Business. 3 Credit Hours.

The legal system affects each of us on a daily basis. Educated citizens, no matter what career path they may choose, should be aware of the ways in which the law impacts their lives in a personal and business setting. This course will introduce students to the essential aspects of law with an emphasis on the legal environment of business. Students will learn the basics of contract, tort, property, and administrative law as well as international law. The law involving business would include a discussion of public policy and compliance, as well as employer and employee relations. The political, social and economic forces that affect change are also discussed thereby providing guidance as to the future direction of the law in both the United States and around the world. NOTE: This course is required for all Fox School freshmen admitted fall 2008 or later and transfers admitted fall 2010 or later.

Repeatability: This course may not be repeated for additional credits.

LGLS 1102. Law of Contracts. 3 Credit Hours.

When you buy a car, rent an apartment, or take out insurance, you are entering into a contract. Whether as consumers or business professionals, our lives are frequently affected by our agreements with others. In this course, students will learn the basics of contract law including how contracts are negotiated and created, how they are enforced, and what happens when contractual promises are breached. Using the case method, students will also become familiar with the relevant portions of the Uniform Commercial Code that deal with the sale of goods, products, and services.

Repeatability: This course may not be repeated for additional credits.

LGLS 1112. Law for Business. 3 Credit Hours.

Whether you plan to start a business or join one, this course provides practical legal basics applicable across business sectors. You will learn about the advantages and disadvantages of different business entities from formation through duration to dissolution from legal and managerial perspectives. You will also become familiar with consumer and environmental protection initiatives, creditor and debtor rights, as well as other legal topics that affect commerce and its stakeholders. NOTE: Transfer students who come in with the equivalent of LGLS 1102 will receive credit and be waived from the LGLS 1112 course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 1103, BA 1903, LGLS 1101, or LGLS 1901)

LGLS 1901. Honors Legal Environment of Business. 3 Credit Hours.

The legal system affects each of us on a daily basis. Educated citizens, no matter what career path they may choose, should be aware of the ways in which the law impacts their lives in a personal and business setting. This course will introduce students to the essential aspects of law with an emphasis on the legal environment of business. Students will learn the basics of contract, tort, property, and administrative law as well as international law. The law involving business would include a discussion of the types of legal entities, as well as employer and employee relations. The political, social and economic forces that affect change are also discussed thereby providing guidance as to the future direction of the law in both the United States and around the world.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

LGLS 3501. Introduction to Corporate Compliance. 3 Credit Hours.

Compliance refers to the relationship between a business and the governing institutions under which it operates. A business is a legal entity that is endowed with certain rights and responsibilities under the law. As such, it is required to comply with certain policies and laws as stipulated by state and federal government entities. In this course, we will examine the development of this relationship between businesses and the government, endeavoring to identify the lines between smart ethical decision making and high-risk choices that may lead to legal and financial repercussions. By the end of the course, we will understand key statutes and regulations that affect most business entities, penalties for non-compliance, major cases highlighting the risks of careless behavior, and better understand how to put into place an effective code of compliance and ethics.

Repeatability: This course may not be repeated for additional credits.

LGLS 3504. Sports and the Law. 3 Credit Hours.

The sports industry is a multi-billion dollar enterprise where athletes command millions of dollars in salaries and sports enthusiasts spend countless hours following their favorite teams. This course will explore the landmark decisions and social environment, which has transformed these games of fun into a very powerful industry enjoying special protection under the law. Topics will include sports franchise rights, league issues, antitrust laws, sports agents, injuries to athletes, intercollegiate sports, collective bargaining issues, the powers of the Commissioner and gender equity.

Repeatability: This course may not be repeated for additional credits.

LGLS 3506. Law, Technology and E-Commerce. 3 Credit Hours.

New technology has revolutionized the way we do business - from electronic banking to Internet commerce - and has raised a host of new legal issues. This course will increase students' awareness of the rights and problems that arise with the development of new products and services. Topics include trade secrets, patents, copyrights, and trademarks. Special attention will be devoted to the legal protection and unique problems faced by the computer industry in the development of new products and online services.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

LGLS 3507. Business Law for Accountants. 3 Credit Hours.

The legal environment in which businesses operate requires the accounting professional to possess a basic understanding of the law. The course is designed to provide an overview of the legal topics that Certified Public Accountants and other accounting professionals need in their practices. The course will also satisfy the requirements of the Pennsylvania CPA statute, which requires a course in business law. Topics will include the law of Contracts, Business Organizations, the Uniform Commercial Code, Government Regulations, and Debtor/Creditor relationships.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

LGLS 3509. Entertainment Law. 3 Credit Hours.

This course provides a survey of the legal, commercial and financial elements of the entertainment industry, including film, television, and music production and distribution. It highlights intellectual property, corporate, international and other law domains within this field. Students will practice critical thinking methods to analyze current, practical issues in the entertainment industry from a legal perspective.

Repeatability: This course may not be repeated for additional credits.

LGLS 3511. Environmental Law and Sustainability. 3 Credit Hours.

Water and air pollution. Hazardous waste. Loss of species. Climate change. This course begins with an historical overview of the legal response to environmental harm, looking at the transition from a common law approach to the creation, since the 1970's, of a network of federal statutes and regulations. It looks at questions like these: What are the different regulatory strategies for controlling pollution, and how do they compare? To what extent can market forces be harnessed to improve environmental outcomes? Can the law effectively provide incentives to prevent pollution from happening? What is environmental justice? What should be the response of environmental law to scientific uncertainty? You will learn about the interactions among the courts, Congress, the executive branch and industry interests as environmental law and policy have developed. You will also learn about efforts to address global climate change, and examine the role the U.S. has played in these negotiations.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

LGLS 3513. Public Policy. 3 Credit Hours.

Product safety. Financial accountability. Environmental preservation. Protection from workplace discrimination. Government regulations - expressions of "public policy," are everywhere in the world of business. This course will introduce you to the way in which these laws are created. You will learn how administrative agencies, legislatures, the courts, interest groups, political parties, lobbyists, and the media all interact, shaping the policy-making process. As we explore these issues we will be addressing questions like these: Why do we need public policies? What kinds of problems are not likely to be solved in the private marketplace, and more appropriate for government intervention? How are public policy priorities decided? How can we determine whether public policies accomplish their goals? This course is designed to hone your writing, research and analytical skills.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

LGLS 3519. Tax, Estate and Trust Planning. 3 Credit Hours.

This course shows you how to properly inventory assets, tax and estate planning techniques such as how to properly plan for funding a college education, retirement, the future distribution of your assets, the requirements to establish a power of attorney, a Last Will and Testament, various Trust Instruments and an advanced Health Care Directive. This course will also cover life insurance funds, gifts and charitable donations. We will also examine the fiduciary duties of personal representatives of estates, lawyers and accountants and financial advisors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

LGLS 3521. Corporate Governance. 3 Credit Hours.

The modern corporation operates within an ever-expanding framework of federal, state and local laws and regulations. Governed by its board of directors, the corporation must ensure that it adheres to the law while it simultaneously ensures that it sets and implements strategies for short and long term success. In order to thrive in a rigorous marketplace, corporate boards, executive management, and business units must achieve a balance and alignment among external and internal controls, risk management and competitive behavior. This course will inform students' understanding of the fundamental corporate governance principles and the responsibilities of the board of directors and other corporate actors, and it will develop the skills and strategic insight needed to become a more effective leader. Students will also learn frameworks that can move boards and executives beyond simple compliance to the creation of opportunities for long-term value.

Repeatability: This course may not be repeated for additional credits.

LGLS 3522. Technology, Privacy and Intellectual Property Law. 3 Credit Hours.

Who owns your genes? Who owns your memes? Is ownership affected by the fact that you express your ideas publicly on a social network that sells your personal data, or via private emails through an online service that you get for free? If your creative collaborators are around the world, working with you through an Internet service that resides in the "cloud," what does the law say about who owns the results? Which law should apply? This course explores the different mechanisms for protecting intellectual property in the U.S.--patents, copyrights, trade secrets, and trademarks--and the policy and ethical concerns as technological progress generates tectonic shifts in the global marketplace. It traces the evolution of privacy as expressed in philosophy, common law, Constitutional law, government policy, and modern practice in the digital age. We will look specifically at cyber-security and hacking, personal health and financial information, and surveillance, as well as the implications of international law upon your privacy rights.

Repeatability: This course may not be repeated for additional credits.

LGLS 3523. Detecting Financial Crimes. 3 Credit Hours.

From cuff-links to handcuffs, business executives face potentially harsh prison sentences for conducting business that violates federal and state laws. This course investigates white-collar crimes, their perpetrators, their punishment, and their impact upon business sectors and the larger community. White-collar crime refers to financially motivated nonviolent crime committed by business and government professionals. This course explores a vast array of these types of criminal offenses while examining government and judicial regulations of financial institutions, commercial entities, and their agents and employees in relation to economic and business crimes. The course will also address constitutional issues pertaining to investigations conducted by governmental and corporate entities.

Repeatability: This course may not be repeated for additional credits.

LGLS 3524. Legal and Policy Issues in the Workplace. 3 Credit Hours.

Social media and privacy rights. Trade secrets. Pay equity. Family-work conflict. Non-Compete Agreements. This course will explore the rights and responsibilities of workers and managers alike by examining the laws, regulations, court cases, and policies that govern the employer-employee relationship. It aims to teach you the basic principles of workplace law and policy while challenging you to question existing approaches to the employment relationship. The course will use cases and questions currently in the news and in the courts to examine the U.S. approach to the workplace: Should employers control employees' access to birth control or other medical care? Can a company perform criminal background or credit checks on applicants without violating race discrimination prohibitions? How would a mandate of paid time off to care for a new child or ill family member impact a business's bottom line? What role should the government play in setting a minimum wage and how does it affect workers and their employers? This course will ask questions like these to help you understand the way in which workplace laws and policy impact society in general and to help you articulate your own view of the employer-employee relationship. Note: Students who have taken HRM 3512 should not take this course.

Repeatability: This course may not be repeated for additional credits.

LGLS 3562. Legal Aspects of Global Business. 3 Credit Hours.

Today's economy is more globally connected than at any time in history. Transportation costs are a fraction of what they were in the recent past. Communication through email, chat services, and social networks has become seamless across borders. And of course, commerce has opened doors to products and services from all corners of the Earth. Businesses large and small are taking advantage of the cost savings of "going global" by outsourcing manufacturing, importing components, and exporting finished goods. Companies that fail to go global may instead go out of business. But going global is risky. And the risks that a company faces in concluding international contracts, export agreements, or joint ventures with foreign partners are unlike most risks faced in domestic transactions. This course introduces students to the world of global commerce, covering essential topics such as international sales, import and export regulations, dispute resolution on a global scale, and the public policy aspects of international trade, including multilateral institutions such as the World Trade Organization.

Repeatability: This course may not be repeated for additional credits.

LGLS 3580. Special Topics - Law. 3 Credit Hours.

Special topics in current developments in the field of legal studies.

Repeatability: This course may be repeated for additional credit.

LGLS 3581. Pre-Law Internship and Seminar. 2 to 3 Credit Hours.

Sit in on a trial, help prepare legal documents or observe a real estate closing. The first part of this course will provide classroom instruction on the practical side of the law. This internship will then provide students with the opportunity to see the law in action by providing an opportunity of working in a law firm, governmental agency or nonprofit entity offering counseling and legal advice.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Legal Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

LGLS 3582. Independent Study. 1 to 6 Credit Hour.

This course is limited to Legal Studies majors and requires the approval of the department chair with the sponsorship of a faculty member from the department. The course requires a comprehensive legal analysis of a legal topic that culminates in the writing of a substantial research paper.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Legal Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

LGLS 3682. Independent Study. 1 to 6 Credit Hour.

This course is limited to Legal Studies majors and requires the approval of the department chair with the sponsorship of a faculty member from the department. The course requires a comprehensive legal analysis of a legal topic that culminates in the writing of a substantial research paper.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Legal Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

LGLS 3900. Honors Special Topics. 3 Credit Hours.

This Honors course covers special topics in current developments in the field of legal studies.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

LGLS 3999. Honors Thesis I. 1.5 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Legal Studies department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Legal Studies 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

LGLS 4596. Legal Reasoning in Action. 3 Credit Hours.

A corporate employee is fired after speaking up about what she thought were accounting irregularities. A big-box store must decide how to respond to reports that its subsidiary in Mexico has been paying bribes to hasten expansion. The religious beliefs of a company's CEO are violated by a federal law requiring that company to pay for employee birth control. As we discuss, research, and critically examine business law case scenarios like these, you will have several opportunities to practice legal discourse in both written and spoken form. Building on the knowledge and skills you have gained in prior Legal Studies courses, this capstone delivers hands-on learning at a deeper level. It is "Writing Intensive;" you will complete a series of assignments of increasing complexity involving case and statutory analysis. In addition, as part of a team, you will be actively involved in mock trials.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Legal Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 2196 or BA 2996)

LGLS 4999. Honors Thesis II. 1.5 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Legal Studies Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Legal Studies 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Legal Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in LGLS 3999.

Lesbian, Gay, Bisexual and Transgender Studies (LGBT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

LGBT 2002. Religion and Human Sexuality. 3 Credit Hours.

The goal of this course is to examine the attitudes and practices of the major world religions regarding human sexuality. Topics to be covered will include marriage and procreation, and such controversial issues as abortion, homosexuality and sexual activity outside of marriage. Note: Religion and Human Sexuality is taught as a cross-listed course in Religion; Gender, Sexuality & Women's Studies; and LGBT Studies. Students may receive credit for only one of the following courses: REL 2002, LGBT 2002, GSWS 2202, WMST 2202.

Repeatability: This course may not be repeated for additional credits.

LGBT 2003. Gender in the Cinema. 3 Credit Hours.

This course uses feminist and queer film theories to critically explore how gender, queer and trans identities are depicted in Hollywood, independent, documentary, international, and experimental films. The course examines feminism's relationship to racial, class, sexuality, gender identity and other differences through the medium of film. NOTE: Students who earned credit for "Sexual Differences in the Cinema" will not receive additional credits for "Gender in the Cinema." Additionally, students who completed GSWS 2002 will not receive credit for LGBT 2003.

Repeatability: This course may not be repeated for additional credits.

LGBT 2007. Creative Writing: Fiction: LGBTQ Lives. 3 Credit Hours.

In this course, students will grapple with all areas essential to the craft of writing fiction, especially as they are used to tell LGBTQ-centered stories. As LGBTQ identities have not always been accepted in the mainstream, we will also examine the use of subtext to inform plot and/or character development. Through the use of class discussion, individual and group writing activities, and workshopping peer drafts, students will hone their writing tools. By class' end, students will achieve stronger reading and writing skills as well as develop a deeper appreciation and understanding of how to apply elements of fiction to LGBTQ subject matter. Last: this classroom is a brave space, in which writers - regardless of how they identify in terms of gender or sexuality - should feel welcome to work with material that speaks their truth; as such, as peers, we will listen and respond without judgment to the various work we discuss. NOTE: Students can receive credit only once for either GSWS 2007 or LGBT 2007.

Repeatability: This course may not be repeated for additional credits.

LGBT 2128. Men and Masculinities. 3 Credit Hours.

This course examines and interrogates masculinity by drawing upon the diverse voices and experiences of men and boys across age, race, ethnicity, class, sexuality, ability and religion. This course will explore the social and personal meanings of "manhood" and its impact on relationships, institutions and in our public and private lives.

Repeatability: This course may not be repeated for additional credits.

LGBT 2207. Creative Writing: Non-Fiction: Queer Lives. 3 Credit Hours.

For people who identify as members of the LGBTQIA community, queer stories carry a particular significance. In part, these stories allow members of the community to process how their sexuality has influenced their lives but also how these stories have influenced the degree to which they accept and express their sexuality. To people outside the LGBTQIA community, these stories offer a glimpse into what queer individuals have experienced. Because writing about queer lives is inherently political, these stories have often been fashioned into confining structures, such as the "coming out" story. And although this particular approach to telling these stories is important, queer lives often extend well beyond this particular moment in the development of their sexual identity - and some individuals even lack such a "moment" to serve as the core of their story. This course examines a variety of ways to approach telling these stories, for both people without and within the LGBTQIA community. NOTE: Students can receive credit only once for either LGBT 2207 or GSWS 2207.

Repeatability: This course may not be repeated for additional credits.

LGBT 2305. LGBTQ Film: The Coming of Age Genre. 3 Credit Hours.

A number of films examine how queer youth do grapple with their LGBTQIA identity in their adolescent years, thus representing the typical sociological understanding of "coming-of-age." But a number of films instead explore how members of the LGBTQIA community explore their queer identity later in life. These films focus on the more psychological understanding of "coming-of-age", a point when people, mentally, fully accept who they are, inclusive of their sexual identity. Regardless of the timing in a person's life, this life stage focuses on a shift from innocence to a more "adult" or "realistic" take on the world around us. This course explores how the queer coming of age genre renders the often-unique approach queer individuals face as they come of age. NOTE: Students can receive credit only once for either GSWS 2305 or LGBT 2305.

Repeatability: This course may not be repeated for additional credits.

LGBT 2306. LGBTQ Film: Queer Representation. 3 Credit Hours.

This course explores the way in which film has portrayed LGBTQ individuals. Drawing from a diverse slate of films, the class examines not just the various ways in which LGBTQ sexual expression has been rendered but also the political and sociological implications of this depiction over various decades. In addition, the class explores the ways in which those who have fought for LGBTQ visibility and equal rights have been framed through various films, whether they are recognizable figures in LGBTQ history or not. The class explores the ways in which these films have accomplished their goals and discusses the ways in which these films have been received. NOTE: Students can receive credit only once for either GSWS 2306 or LGBT 2306.

Repeatability: This course may not be repeated for additional credits.

LGBT 2400. Topics in LGBT Studies. 3 Credit Hours.

Specific cultural or social studies in LGBT issues with an emphasis on interdisciplinary analysis.

Repeatability: This course may be repeated for additional credit.

LGBT 2405. Queer Lives. 3 Credit Hours.

In this course we will read autobiographical accounts (memoirs, essays, diaries, and poems) in which a significant portion of the narrative focuses on same-sex erotic attraction and/or gender difference, identified in contemporary society by the label Lesbian/Gay/Bisexual/Transgender/Intersex or the generic (and contested) Queer. The works were selected both to examine how gay and lesbian lives have been defined and altered over the course of the last sixty years and to provide a perspective of national, ethnic, religious, and racial diversity. Our main focus in the classroom will be discussion of these texts and their contexts. The classroom will be augmented by a research assignment focused on a gay or lesbian life we have not examined together in class. NOTE: This course was previously titled "Gay and Lesbian Lives." Students can earn credit only once for either "Queer Lives" or "Gay and Lesbian Lives."

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

LGBT 2406. LGBTQ Social Movements. 3 Credit Hours.

Starting in the 1950s forward, using a social science lens, this class examines the collective experience of LGBTQ-identifying lives. Focusing on various LGBTQ social movements, the course explores the various perspectives, targets, strategies, and goals of these various movements. The course also examines issues impacting the various factions within the LGBTQ community and how these factions have employed various tactics to effect social change. Starting with a basic foundation in social movement theory, class readings will explore the various targets addressed by social movements - such as science (medicine), culture, courts (legal), and states (not physical states, per se). The course will also address various ideologies (such as assimilation versus liberation). Students will leave the class with a clear sense of how to define a social movement, understand how it coalesces as a movement, how it operates, how it effects change, as the lasting impact of these various changes within society. Because not every moment that happens within the LGBTQ community happens as a consequence of one prior, the various movements we explore will not be examined chronologically. NOTE: Students can receive credit only once for either GSWS 2406 or LGBT 2406.

Repeatability: This course may not be repeated for additional credits.

LGBT 2815. Love, Marriage, and Family. 3 Credit Hours.

It is easy to assume that love, marriage, and family go together, but this has not always been the case. These concepts have a history. This course is a comparative examination of love, marriage, and family and the related themes of gender and sexuality in different historical periods and geographical areas. It includes ancient, medieval, and modern texts and materials and covers both western (European and American) and non-western (Asian, African, and perhaps Middle Eastern and Latin American) case studies. NOTE: Each instructor may place a different emphasis among those topics and regions. Please be advised that students who have earned credit for GSWS 2815 will not receive duplicate credit for LGBT 2815.

Repeatability: This course may not be repeated for additional credits.

LGBT 3015. Sexuality and Disability. 3 Credit Hours.

This course explores the relationship between sexuality and disability, both visible and invisible. It focuses on gender identity, sexual orientation, wellness, pleasure, technology, inequality, and sexual and erotic agency in relation to the sexual lives of persons living with disabilities. Drawing on critical disability and critical sexuality studies, the course examines historical and modern approaches to understanding how sexuality and disability intersect to impact everyone, both disabled and able-bodied.

Repeatability: This course may not be repeated for additional credits.

LGBT 3016. Sexuality Education. 3 Credit Hours.

When, where and how do we learn about sex? How does what we know about sex shape the way we understand ourselves and our relationship with others? This course explores current and historical approaches to sexuality education and its impact on constructing individual and societal sociosexual and gendered scripts and norms. We will analyze and critique formal K-12 and adult sex education programs as well as the informal ways we learn about sexuality from family, friends and the media. Students will have the opportunity to examine a range of sexuality education curricula that are in use within and outside of the United States as well as to develop their own sexuality education curriculum.

Repeatability: This course may not be repeated for additional credits.

LGBT 3017. Social Perspectives on Digital Pornography: The Other Sex Ed. 3 Credit Hours.

In the 2003 hit Broadway musical, Avenue Q, characters excitedly sing, "The Internet is for Porn!" Over the last 20 years, despite the proliferation and increasing availability of digital pornography, or pornography accessed via the internet, little is known about its impact on sociosexual and gender scripts, gender-based violence, relationships, and sexual pleasure. Using an intersectional, feminist framework, this course explores how and what pornography teaches us about, for example, gender, sexual orientation, consent, and sexual behavior. Additionally, it examines and critiques the newly emerging fields of pornography literacy and pornography studies as well as the rapidly changing legal landscape of digital privacy and censorship and their effect on consumers, creators, and distributors. Note: This course is regularly cross-listed with GSWS 3017; please be advised students can receive credit only one time for either LGBT 3017 or GSWS 3017.

Repeatability: This course may not be repeated for additional credits.

LGBT 3124. Politics of Sexual Orientation and Gender Identity. 3 Credit Hours.

This course examines the emergence and development of the movement to secure rights for gays, lesbians and bisexuals; how gays, lesbians and bisexuals are socially constructed and the influence this has on political discourse; how political issues that are relevant to the lives of gays and lesbians reach the political agenda; and the patterns of conflict and cooperation that exist among actors in and outside of government over issues such as employment discrimination, marriage, child adoption, and military service. Note: Prior to Summer 2019, this course was offered as "Politics, Rights, and Sexual Orientation." Students who earned credit for this course number under that title will not earn additional credits under the new title "Politics of Sexual Orientation and Gender Identity." This course is cross-listed with Political Science and LGBT Studies; students may only receive credit for one of the following course numbers: POLS 3124, GSWS 3124, LGBT 3124.

Repeatability: This course may not be repeated for additional credits.

LGBT 3205. Queer Novels of the 20th Century. 3 Credit Hours.

In this course, we will investigate what LGBT-themed novels of the 20th century convey about gender identity, how individuals form this identity, how an understanding (both conscious and unconscious) of this identity impacts individuals, and how the expression of sexuality dictates behavior, particularly in the LGBTQIA community. Beginning with a foundation in queer theory and various literary devices, students will build a theoretical vocabulary and lens through which to analyze a series of novels from both the US and International. The chosen novels reflect authors or works considered part of the literary LGBT "canon." Note: Students can receive credit only once for either GSWS 3205 or LGBT 3205.

Repeatability: This course may not be repeated for additional credits.

LGBT 3206. Queer Novels of the 21st Century. 3 Credit Hours.

In this course, we will investigate what various LGBTQ-themed novels tell us about LGBTQ life in the 21st Century. Starting with a historical approach of how LGBTQ novels were shaped by attitudes about LGBTQ life in the 20th century, we will determine how the representation of LGBTQ lives have evolved in novels. Our novels will explore the lives of people from across the LGBTQ spectrum. A number of the protagonists' identities also represent important intersectional identities as well, such as nationality, religion, and race. Beginning with a foundation in LGBTQ theory and various literary devices, students will build a theoretical vocabulary and lens through which to analyze a series of contemporary LGBTQ novels. NOTE: Students can receive credit only once for either GSWS 3206 or LGBT 3206.

Repeatability: This course may not be repeated for additional credits.

LGBT 3400. Topics in LGBT Studies. 3 Credit Hours.

Specific cultural or social studies in LGBT issues with an emphasis on interdisciplinary analysis.

Repeatability: This course may be repeated for additional credit.

LGBT 3548. Intimate Partner Violence: Gender and Social Justice. 3 Credit Hours.

This course addresses gender-based violence, in particular, intimate partner violence. We will use intersectionality as a feminist tool in understanding how violence is mediated through the nexus of social power and control in which race, ability, sexuality, class, and other variables play a big part. Students will learn the impact of this gender-based violence on young girls, immigrants, women of color, elderly women, trans populations, lesbians and other marginalized groups within the U.S. NOTE: Students can receive credit only once for either LGBT 3548 or GSWS 3548.

Repeatability: This course may not be repeated for additional credits.

LGBT 4082. Independent Study. 3 Credit Hours.

For students who would like to pursue topics not offered within existing courses. Original research and projects encouraged. Students will work closely with faculty in designing and carrying out the independent study. NOTE: Students must have selected a faculty advisor and submitted a formal proposal approved by the LGBT Studies faculty advisor before registering for the course.

Repeatability: This course may be repeated for additional credit.

LGBT 4489. Field Work in LGBT Studies. 3 Credit Hours.

The opportunity to work in a public or private agency whose mission includes advocacy for the LGBT community. Available to students minoring in LGBT Studies and throughout the College of Liberal Arts. A paper or project related to the area of the field study is also required. NOTE: Placement and faculty advisors arranged prior to registration (call 215-204-6953). Requires a designated supervisor at the field placement (minimum of 7 1/2 hours per week) and a faculty advisor within the College.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

Management Information Systems (MIS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MIS 0855. Data Science. 3 Credit Hours.

We are all drowning in data, and so is your future employer. Data pour in from sources as diverse as social media, customer loyalty programs, weather stations, smartphones, and credit card purchases. How can you make sense of it all? Those that can turn raw data into insight will be tomorrow's decision-makers; those that can solve problems and communicate using data will be tomorrow's leaders. This course will teach you how to harness the power of data by mastering the ways it is stored, organized, and analyzed to enable better decisions. You will get hands-on experience by solving problems using a variety of powerful, computer-based data tools virtually every organization uses. You will also learn to make more impactful and persuasive presentations by learning the key principles of presenting data visually. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

MIS 0955. Honors Data Science. 3 Credit Hours.

We are all drowning in data, and so is your future employer. Data pour in from sources as diverse as social media, customer loyalty programs, weather stations, smartphones, and credit card purchases. How can you make sense of it all? Those that can turn raw data into insight will be tomorrow's decision-makers; those that can solve problems and communicate using data will be tomorrow's leaders. This course will teach you how to harness the power of data by mastering the ways it is stored, organized, and analyzed to enable better decisions. You will get hands-on experience by solving problems using a variety of powerful, computer-based data tools virtually every organization uses. You will also learn to make more impactful and persuasive presentations by learning the key principles of presenting data visually. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO

Repeatability: This course may not be repeated for additional credits.

MIS 2101. Digital Systems. 3 Credit Hours.

Learn the role of information systems and digital platforms in business and how digital products are conceived, designed, secured and deployed. Understand component-based software architectures and APIs. Build simple software applications.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Career and Technical Education, Digital Marketing, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Management Consulting, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

MIS 2402. Web Application Development. 3 Credit Hours.

Create web-based applications that carry out a business process and integrate web-based services. Learn loops, arrays, conditional statements, data validation, responsive web design, and making API calls.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04) and (MIS 2502 (may be taken concurrently) or 'Y' in CRMI03)

MIS 2502. Data and Analytics. 3 Credit Hours.

Navigate and query relational and NoSQL databases to support applications. Combine multiple sources of data using extract, transform, load for data cleansing. Discover insights from data using analytics software.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Digital Marketing, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 2901. Honors Digital Systems. 3 Credit Hours.

Learn the role of information systems and digital platforms in business and how digital products are conceived, designed, secured and deployed. Understand component-based software architectures and APIs. Build simple software applications.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Career and Technical Education, Digital Marketing, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

MIS 3406. Cloud Architecture. 3 Credit Hours.

Learn to design and build cloud-based network infrastructures for deploying applications securely at scale. Create and deploy a simple RESTful API for consumption with fault-tolerance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2402 or 'Y' in CRMI02) and (MIS 2502 or 'Y' in CRMI03)

MIS 3502. Web Service Programming. 3 Credit Hours.

Create and deploy a complete, end-to-end web-based application. Design and build complex RESTful APIs. Create single-page applications that consume and integrate multiple APIs to create a seamless user experience.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 3406 or 'Y' in CRMI05) and (MIS 3506 or 'Y' in CRMI07)

MIS 3504. Digital Design and Innovation. 3 Credit Hours.

Learn business process analysis including requirements analysis, feasibility, and data and process modeling. Develop the skills required to create innovative, technology enabled, corporate and consumer products and services. Apply information gathering techniques to elicit requirements. Compose business and technical requirements. Work in teams to design and recommend information systems solutions to improve or transform business processes. Lead the "make vs. buy" decisions. Justify proposed process improvements and proposed information systems solutions. Learn how to implement and negotiate changes to requirements.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Management Information Systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2502 or 'Y' in CRMI03)

MIS 3505. Scripting for Data Science/Analytics. 3 Credit Hours.

This course gives students the applied, hands-on experience necessary to derive patterns and insight from data. Students will learn how to utilize technology to process data, visualize (plot) data, perform data assembly, data cleansing, data munging, and how to leverage statistical methods to gain insight from data. Students will have hands-on experience with current, cutting-edge tools. NOTE: Prior to Fall 2023, this course was titled "Applied Predictive Analytics."

Repeatability: This course may not be repeated for additional credits.

MIS 3506. User Experience Design. 3 Credit Hours.

Describe, scope, and build a complete user experience. Understand the role of usability and design principles. Build innovative and pleasurable user interfaces that achieve human, social, organizational, and business model goals.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2402 or 'Y' in CRMI02)

MIS 3507. Defending Against Cyber Crime. 3 Credit Hours.

In this course you will learn the importance of Information Security through modern case studies and pragmatic approach to evaluating security as an executive.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 3534. Strategic Management of Information Technology. 3 Credit Hours.

This course prepares students to be effective exploiters and managers of information technology. The management of information technology is addressed by considering the contemporary issues faced by general managers, e.g., globalization, time compression, and technology integration. Strategic approaches for dealing with these issues are explored. An integrative class project is used to pull together operational concepts from lower level information system and business courses as they apply to the management of information technology.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

MIS 3535. Lead Global Digital Projects. 3 Credit Hours.

Learn how to lead, plan and manage global technology-enabled, process-centric information systems projects by focusing on initiating, planning, executing, controlling and closing projects in the context of topics such as integration, scope, timing, cost, quality, human resource, technology, communications, and risk and procurement. Explore the impact of the human element as it relates to the success and failure of information systems projects. Learn how to monitor project plans and communicate status reports to clients, and create and respond to request for proposals.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 3536. Information Systems Innovation. 3 Credit Hours.

This course provides the knowledge and skills to leverage emerging and innovative information technology to create business opportunities for both new entrepreneurial ventures and traditional firms. As we move into the digital world, the ways by which companies create value is fundamentally shifting from products to experiences. The rapid convergence to digital technology opens up new opportunities to offer novel products and services that did not exist before. In this course, students will be asked to think how entrepreneurs and companies produce radically new products and services in the increasingly digital world. The course focuses on how organizations can design novel and desirable products and services. Through applied projects, student teams will learn how to evaluate and apply new innovative technologies to create new digital experiences, products, and services.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 3537. Internet Enabled Supply Chains. 3 Credit Hours.

This course provides an understanding of how smart companies are revolutionizing their supply chains through the use of the Internet. Topics include e-business models, network-ready businesses, information hubs, collaboration in supply chains, eMarketplaces and eAuctions, supply chain visibility and security. The course draws from a host of real-world case studies and computer simulations to reinforce learning and understanding of Internet-enabled supply chains.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 3538. Social Media Innovation. 3 Credit Hours.

In this course we review concepts and principles related to new business models supported by innovative use of Web 2.0 and social media. Through a combination of readings, discussion, presentations, and hands-on projects we examine (i) the organizational use of key media technologies such as web sites, blogs, web analytics, and search engine optimization, (ii) the business models underlying successful innovative new media organizations including Wikipedia, Craigslist, YouTube, and Facebook, and (iii) the role of centralized, decentralized, and crowd-sourced information resources in online media innovation.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Digital Marketing, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

MIS 3580. Special Topics. 3 Credit Hours.

Special topics in current developments in the field of information systems.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 3581. Co-operative Experience in Management Information Systems. 3 Credit Hours.

Students undertake a research project that integrates their current work experience with their classroom experience at Temple University. The results are reported in a series of status reports, blogs and a PowerPoint presentation prepared under the supervision of a faculty member. NOTE: Arrangements are made through the Management Information Systems Department and this course is open to ALL Fox business students. A 2.7 cumulative GPA or higher is recommended. <http://ibit.temple.edu/industryexperience/>

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (MIS 2101, MIS 2901, 'Y' in CRMI01, or 'Y' in CRMI04)

MIS 3582. Independent Study. 1 to 6 Credit Hour.

Students will prepare research papers under supervision of a faculty member. NOTE: None of the required MIS courses can be taken as an independent study.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

MIS 3682. Independent Study. 1 to 6 Credit Hour.

Students will prepare research papers under supervision of a faculty member. NOTE: None of the required MIS courses can be taken as an independent study.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

Repeatability: This course may be repeated for additional credit.

MIS 3999. Honors Thesis I. 1 to 3 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the MIS department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of MIS 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

MIS 4596. Managing Enterprise Cybersecurity. 3 Credit Hours.

Learn how to secure systems and the enterprise using cryptography, authentication, and ethical hacking. In this writing-intensive course for MIS, you will also identify and communicate cybersecurity risks facing businesses through risk assessment reports that support management decisions.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MIS 3406 (C or higher) or 'Y' in CRMI05) and (BA 2196 or BA 2996)

MIS 4999. Honors Senior Thesis II. 1 to 3 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the MIS Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in MIS 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Management Information Systems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Management Science/Operations Management (MSOM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MSOM 3101. Operations Management. 3 Credit Hours.

An examination of the activities necessary for the provision of the organization's product or service. Planning and scheduling of operations, allocation of resources, including staffing requirements and equipment decisions, inventory control and production planning, waiting line problems, and quality.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Construction Engr Tech, Construction Mgt Tech, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Industrial + Sys Engineering, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2103, STAT 2903, STAT 2104, STAT 2102, STAT 2902, STAT 2512 (may be taken concurrently), AS 2505 (may be taken concurrently), MATH 3031, or ISE 2101)

MSOM 3682. Independent Study. 3 Credit Hours.

Readings and/or papers under supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

MSOM 3901. Honors Operations Management. 3 Credit Hours.

An examination of the activities necessary for the provision of the organization's product or service. Planning and scheduling of operations, allocation of resources, including staffing requirements and equipment decisions, inventory control and production planning, waiting line problems, and quality. Open only to business designated Honors students (or with special permission). May be used to fulfill the operations management requirement of the Fox School of Business and Management. NOTE: The Honors version of MSOM 3101 (0105).

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2103, STAT 2903, STAT 2104, STAT 2102, STAT 2902, STAT 2512 (may be taken concurrently), AS 2505 (may be taken concurrently), MATH 3031, or ISE 2101)

Marketing (MKTG)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MKTG 2101. Marketing Management. 3 Credit Hours.

Explains the role of marketing in the U.S. economy and within the firm, including the interaction of marketing with other business functions, as well as with society. The course introduces students to the concepts, methods, and activities that comprise modern marketing management and provides examples as well as experiences analyzing and addressing marketing issues. Marketing Management focuses on the components of marketing strategy which comprises analyzing what markets and needs the firm will serve; deciding when, where, and how the firm will meet those needs; and understanding why (i.e. a compelling business reason) the firm should implement such a strategy. Includes the study of marketing-mix development issues, such as product development and management; pricing; distribution, logistics and supply-chain management; integrated marketing communications and promotion; plus other decisions involved in this process. Note: Marketing majors must earn a grade of C or better in this course.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Business Plus, Construction Engr Tech, Construction Mgt Tech, Career and Technical Education, Digital Marketing, Economics, Economics - Management Career, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Event and Entertainment Mgmt, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Sport & Recreation Management, Statistical Sci + Data Analyt, Tourism and Hospitality Mgmt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, ECON 1102, or ECON 1902)

MKTG 2511. Marketing for the Sustainable Enterprise. 3 Credit Hours.

Sustainable marketing extends the boundaries of traditional marketing. This course focuses on how both for-profit and not-for-profit organizations learn to innovate, develop, produce, promote, distribute and reclaim products and services in new ways that reduce waste and pollution and benefit all stakeholders. Within the triple bottom line framework this course applies an experiential learning method to put you to task, applying these concepts to real life situations. In addition to modifications of marketing activities to reduce environmental impact, the course considers marketing's role in corporate social responsibility (including ethical considerations) and social marketing agendas (such as health and community issues). Note: Marketing Majors and Minors can take this course as an upper-level major/minor elective.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Corporate Social Responsibility, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

MKTG 2901. Honors Marketing Management. 3 Credit Hours.

Introduction to the discipline of marketing. The nature of marketing activities in contemporary society and the firm. Study of marketing mix variables and decision processes involved in corporations and public agencies. Concepts from economics, behavioral sciences, and modern systems theory are incorporated. NOTE: Open only to business designated honors students or with special permission. May be used to meet the marketing requirement of the Fox School of Business and Management. A Marketing Major or Minor must earn a C in the course.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Construction Mgt Tech, Career and Technical Education, Digital Marketing, Economics, Economics - Management Career, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Sport & Recreation Management, Statistical Sci + Data Analyt, Tourism and Hospitality Mgmt, Undeclared-Business & Mngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901)

MKTG 3501. Integrated Marketing Communications. 3 Credit Hours.

Marketing 3501 is an intermediate level undergraduate marketing course which introduces students to the field of advertising by taking an integrated marketing communications (IMC) perspective. While advertising is the major focus of the course, IMC also plays a critical role as the course develops perspectives on the process of advertising, promotions, and media working together as a part of the overall marketing strategy. Topics include setting advertising objectives and budgets, client-agency-media relations, demand stimulation, media selection and evaluation, and the social responsibilities and regulation of advertising at the level of the firm and of the industry. NOTE: Prior to Spring 2009, this course was titled "Advertising."

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

MKTG 3502. Data Management for Business Strategies. 3 Credit Hours.

With significant advances in technology, most organizations collect enormous amounts of data, ranging from markets to customers. Managing data on this scale and converting it into knowledge to facilitate decision making presents exciting new challenges. The underlying principles of data management are often similar, whether used in data analytics and business intelligence, enterprise resource planning (ERP), customer relationship management (CRM) or other aspects of marketing. This course aims to facilitate transformation of everyday business activities into a relational database system, from which information can be extracted in a systematic manner. In particular, students will learn how to organize and manage data with emphasis on maintaining data consistency, and minimizing data redundancy. Students will be introduced formally to conceptual modeling and data normalization in relational databases. In the second part, students will learn how to write queries in SQL and Microsoft Access to extract data that is relevant for answering marketing questions and developing marketing strategy. Finally, students will apply each of these skills in developing a database solution for a real-world business problem, using Microsoft Access. Note: Marketing Majors must earn a grade of C or better for this course to count towards the major requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MKTG 2101 (C or higher), MKTG 2901 (C or higher), 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02) and (STAT 2103, STAT 2903, STAT 2104, (STAT 2101 and STAT 2102), (STAT 2901 and STAT 2902), STAT 2512, or MATH 3031)

MKTG 3504. Professional Selling and Sales Management. 3 Credit Hours.

This course provides an introduction to the behavioral aspects of personal selling and introduces frameworks for sales management. Course topics include: recruitment, selection, training, motivation, compensation, control and the strategy of matching the sales effort to the sales task. This course not only reflects a more analytical and scientific approach but also presents current and future challenges, opportunities, and proposed solutions to critical sales and sales management issues. Sales and sales management principles learned here can be applied to any industry that employs sales forces of any size. NOTE: Prior to Fall 2023, this course was titled "Sales and Sales Management".

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

MKTG 3505. Entrepreneurial Marketing. 3 Credit Hours.

This course provides aspiring entrepreneurs with an understanding of marketing for new and small enterprises. It addresses marketing strategies particularly relevant for entrepreneurial enterprises, whether in a small company, large company, or non-profit organization. This class is a combination of academic lectures and "real world" activity. Students learn entrepreneurial techniques such as opportunity assessment, proactive marketing, innovative marketing communication, resource management, and value creation with an emphasis on digital marketing techniques. During the course, teams assist these organizations to raise money, build awareness, improve social media, create marketing plans or actually volunteer with the organization.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

MKTG 3506. Retail Management. 3 Credit Hours.

The course involves a study of retailing as a marketing institution from the standpoint of management. Topics covered include the store location, layout and facilities, policy formulation in the areas of procurement and outsourcing, merchandising, warehousing, pricing, inventory planning and controlling, transportation, sales promotion, customer service, and general management problems. Retail Management covers the role of intermediaries and strategies, as well as how firms use the Internet and other digital platforms to expand markets, service customers, and increase sales. Marketing majors must earn a grade of C or better for this course to count towards the major requirements. NOTE: Prior to Fall 2023, the course title was "Value Delivery Networks in Marketing."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 2101, MKTG 2901, 'Y' in CRMK01, or 'Y' in CRMK02)

MKTG 3507. Direct Marketing. 3 Credit Hours.

This course introduces student to the scope of direct marketing including mail order, lead generation, circulation, relationship/loyalty programs, store traffic/site traffic building, fundraising, pre-selling, selling (cross-selling as well as selling-up), post-selling and research. The course addresses how direct marketing varies from other forms of marketing and where its practice is most appropriate, as well as the practical challenges firms face as they seek to develop direct marketing programs for direct sale, lead generation or traffic generation using various direct marketing media. Various approaches for stimulating action and the measureability and accountability of direct marketing and its relationship to the total marketing mix are stressed. Marketing majors must earn a grade of C or better for this course to count towards the major requirements.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 2101, MKTG 2901, 'Y' in CRMK01, or 'Y' in CRMK02)

MKTG 3508. Digital Marketing. 3 Credit Hours.

Digital technologies are an integral component of daily life for firms and consumers. Although digital marketing is an important part of business strategy, the dynamic nature of technology and consumer culture raises many strategic and societal challenges. This course examines the theories and concepts underlying the use of information and communication technology by firms and consumers, and challenges students to critique and utilize digital tools, including social media platforms, online reviews, inbound marketing and blogs, paid search, digital and programmatic advertising, search engine optimization, email marketing, mobile marketing and online promotions. The identification of critical success factors and best practices are central to the course, as are digital analytics and other methods for analyzing market effectiveness. The course examines the theory and realities of digital marketing in both business-to-consumer (B2C) and business-to-business (B2B) markets.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Digital Marketing, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

MKTG 3509. Customer Data Analytics. 3 Credit Hours.

This course teaches students how to model customer data to more profitably target the organization's marketing efforts. Includes the collection, analysis, and utilization of data for the development of marketing strategies. The course includes the study of customer lifetime value and customer relationship management. Particular attention is paid to the interpretation and modeling of quantitative data (e.g., RFM models, decision trees and logistic regression). Students build and develop skills in IBM's SPSS platform. Note: Marketing majors must earn a grade of C or better for this course to count towards the major requirement.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MKTG 2101 (C or higher), MKTG 2901 (C or higher), 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02) and (STAT 2103, STAT 2903, STAT 2104, (STAT 2101 and STAT 2102), (STAT 2901 and STAT 2902), STAT 2512, or MATH 3031)

MKTG 3511. Marketing Research. 3 Credit Hours.

This course covers methods for collecting, analyzing and interpreting data relevant to the marketing decision-making process. The course focuses on structuring marketing problems in terms of specific research questions, understanding primary and secondary sources of marketing research data (including issues in data collection), using specific techniques (including Qualtrics and SPSS) for analyzing marketing research data, and using analyses to make better marketing management decisions. Note: Marketing majors must earn a grade of C or better for this course to be eligible to take the capstone Marketing course 4501.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MKTG 2101 (C or higher), MKTG 2901 (C or higher), 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02) and (STAT 2103, STAT 2903, STAT 2104, (STAT 2101 and STAT 2102), (STAT 2901 and STAT 2902), STAT 2512, or MATH 3031)

MKTG 3512. Professional Selling. 3 Credit Hours.

Professional selling introduces and develops student understanding of and application of professional selling practices and philosophies at an introductory level. The course takes an in-depth look into the professional sales process and its application in a sales career across various industries as well as in daily life. Sales ethics, account relationship management and basic professional networking are also included. Note: A Marketing Major or Minor must earn a C in the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 2101, MKTG 2901, 'Y' in CRMK01, or 'Y' in CRMK02)

MKTG 3513. Service Marketing. 3 Credit Hours.

This course aims to help students understand the practical implications of the unique characteristics of services and service provision and to develop their skills to cope with the challenges of marketing and managing a service. Building upon, and expanding marketing management concepts and models, this course demonstrates how they apply to the services sector. This course focuses on the distinctive characteristics and problems of marketing in service organizations and for any organization developing and marketing services as part of its business portfolio. It helps students understand why and how services require a distinctive approach to marketing strategy - both in its development and in its execution. This course uses problem solving techniques by examining cases from commercial and not-for-profit organizations such as banking, transportation, hotels, tourism, hospitals, education and professional services such as accountancy, engineering, and management consultancy. This course is appropriate for any student seeking a follow-up course to the basic marketing course, and particularly relevant for those planning in marketing careers with service firms or organizations with a strong commitment to customer service.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 2101 or MKTG 2901)

MKTG 3514. Sustainable Consumer Centric Innovation. 3 Credit Hours.

Sustainable marketing is at the forefront of management in organizations throughout the world and extends the boundaries of traditional marketing with an increased focus on a firm's responsibilities, its impact on society and the environment. This course evaluates the role of marketing in sustainability by examining how firms create value, reduce risk, and build sustainable thinking and processes into marketing activities and strategies. Marketing plays a key role in how an organization responds to opportunities and threats that arise from social, economic and environmental change. In addition to reviewing marketing activities designed to address environmental impact, the course considers the role of marketing in addressing corporate social responsibility (including ethical considerations) and social marketing priorities (such as health and community issues).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 2101 or MKTG 2901)

MKTG 3553. International Marketing. 3 Credit Hours.

This course identifies and addresses the challenges of marketing and analysis of the internal marketing system of countries with various types of political-economic structures. The strategic impact of economic, cultural, political, and legal differences on marketing are emphasized while issues of international product, price, promotion, and distribution issues are also considered. NOTE: Marketing Majors must earn a grade of C or better in this course to be eligible to take the capstone Marketing course 4501.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 2101, MKTG 2901, 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02)

MKTG 3580. Special Topics - Marketing. 3 Credit Hours.

Special topics in current developments in the field of marketing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

MKTG 3581. Marketing Internship/Co-Operative Experience. 3 Credit Hours.

This course - not offered every semester and only offered at the discretion of the department - is designed for students who have a Marketing Internship or Co-Op Experience which has been reviewed and approved by the department. Note: Arrangements must be made through the Marketing Department; this course is for Marketing majors only. Students must have completed the Marketing Core (MKTG 3511 and MKTG 3596) prior to this course. Students must earn a grade of C or better for this course to count towards the major requirements.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Marketing.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (MKTG 3596 or 'Y' in CRMK06) and (MKTG 3511 (may be taken concurrently) or 'Y' in CRMK04)

MKTG 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under supervision of a faculty member. NOTE: Arrangements must be made through the Marketing Department; this course is for Marketing majors only. Students must have completed the Marketing Core (MKTG 3511, 3596) prior to this course. Students must earn a grade of C or better for this course to count towards the major requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (MKTG 2101, MKTG 2901, 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02), (MKTG 3511 or 'Y' in CRMK04), and (MKTG 3596 or 'Y' in CRMK06)

MKTG 3596. Consumer and Buyer Behavior. 3 Credit Hours.

This course provides a survey and integration of concepts, theories, and frameworks that help explain the behavior of consumers. Topics include: perception, product knowledge and involvement, decision making, learning, conditioning, and social influences such as culture, micro-culture, and social class. The course emphasizes the use of these concepts in developing marketing strategies. NOTE: Marketing Majors must earn a grade of C or better in this course to be eligible to take the capstone Marketing course 4501. Students must earn a grade of C in this course if they are using it to fill the writing intensive course requirement for their degree.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MKTG 2101, MKTG 2901, 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02) and (BA 2196 (C- or higher; may be taken concurrently) or BA 2996 (C- or higher; may be taken concurrently))

MKTG 3682. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under supervision of a faculty member. NOTE: Arrangements must be made through the Marketing Department; this course is for Marketing majors only. Students must have completed the Marketing Core (MKTG 3511, 3596) prior to this course. Students must earn a grade of C or better for this course to count towards the major requirements.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (MKTG 2101, MKTG 2901, 'Y' in MK01, 'Y' in CRMK01, or 'Y' in CRMK02)

MKTG 3999. Honors Thesis I. 1 to 3 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Marketing department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Marketing 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Marketing.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

MKTG 4501. Marketing Strategy. 3 Credit Hours.

This course provides an opportunity for students to integrate and apply material introduced and reinforced in Marketing and other business courses. This course explores how firms develop and implement marketing strategies to ensure long-term survival and growth. This is an applications course and active student participation is required to demonstrate ability to understand and solve complex marketing problems. NOTE: This is the capstone course for Marketing majors. It is strongly recommended for students in their senior year. As suggested by the curriculum path, students should take MKTG 4501 in their final semester; ideally after (or with) BA 4101 as it makes heavy use of core management strategy theories and tools. This course MAY NOT be taken in the same semester as any Marketing CORE (3509, 3511, 3553, 3596) course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Marketing.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MKTG 3596 or 'Y' in CRMK06), (MKTG 3509 or 'Y' in CRMK03), and (MKTG 3511 or 'Y' in CRMK04)

MKTG 4999. Honors Senior Thesis II. 1 to 3 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Marketing Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Marketing 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Marketing.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MKTG 3999.

Math Education (Elementary) (MAEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MAEE 3141. Teaching of Mathematics N-6. 3 Credit Hours.

The purpose of this course is to prepare prospective teachers to teach reform-based mathematics in elementary and middle school settings as suggested in the Principles and Standards for School Mathematics (NCTM, 2000). The objectives of the course include integration of mathematics concepts and methods in order to focus on misconceptions in mathematics among preservice teachers as well as learning theories and standards-based instruction. The intent of the course is to enable students to enhance their mathematical skills and develop pedagogical knowledge. Furthermore, issues of equity and social justice will be discussed. Throughout the term, we will explore classroom materials, models, and technologies appropriate for teaching mathematics to all children, including those with learning disabilities.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ELED 3387, SCEE 3151.

Repeatability: This course may not be repeated for additional credits.

Math Education (Secondary) (MAES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MAES 2189. Classroom Interactions. 3 Credit Hours.

This course continues the process of preparing students to teach mathematics and science in upper elementary and secondary settings. The specific objectives of this course are to: 1) demonstrate to students how learning theories (from the "Knowing and Learning" course) manifest themselves in instructional settings (usually classrooms), allow students to design and implement instructional activities from their own understanding of knowing and learning mathematics and science, and evaluate the outcomes of those activities based on evidence from student artifacts, and 2) provide students with frameworks for thinking about equity issues in the classroom and larger school setting and their effects on learning and provide students with strategies for teaching diverse students equitably. The culminating activities of the course are the opportunities for students to teach in a high school and to learn whether they enjoy and are good at it. While in "Knowing and Learning" students study the meaning behind understanding a particular content area from an individual perspective, in "Classroom Interactions" the perspective shifts to studying how classroom events might promote or discourage learning mathematics and science and student equity. A major component of the "Classroom Interactions" course is the opportunity for students to reflect on and evaluate their own work as teachers.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in EDUC 2179 (may be taken concurrently) and (SCTC 1289 or SCTC 1389)

MAES 3145. Teaching and Learning Mathematics in the Middle Grades. 3 Credit Hours.

This course examines methods of teaching and assessing mathematics in the middle grades. Special attention is paid to understanding the conceptual difficulties students have in moving from whole numbers to rational numbers, additive thinking to multiplicative thinking, and arithmetic to algebra. Problem-solving, connections, and concrete models are emphasized.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

MAES 3146. Methods and Materials in Secondary Mathematics. 3 Credit Hours.

This course will explore problems in algebra, trigonometry, analytic geometry, calculus, Euclidean geometry, probability, statistics, and discrete mathematics. This course is intended as a capstone study for prospective secondary mathematics teachers. The objectives of this course are as follows: (1) connect ideas within and between mathematical concepts, (2) develop mathematical thinking and reasoning, and (3) develop problem solving skills. Technology will be a vital part of this course. Technology will be used to demonstrate and encourage conjecturing and problem solving with an emphasis on applications. The goals of this course are to help you as prospective or beginning secondary mathematics teachers to: (1) develop a deep understanding of the mathematics you will be teaching by connecting mathematical concepts to instruction and (2) acquire the skills, knowledge, and reflective practice necessary for successful teaching.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MAES 3147. Geometry and its Classroom Implications. 3 Credit Hours.

The class stresses the topics found in a standard high school geometry course from an advanced point of view. In addition, important plane geometry theorems such as Ceva's Theorem, and Menelaus' Theorem are examined. Special attention is paid to the concept of proof, and different kinds of proofs are examined. Non-Euclidean geometry is investigated, as are the constructions of college geometry.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Repeatability: This course may not be repeated for additional credits.

MAES 3278. Professional Subject Matter: Statistics. 1 to 3 Credit Hour.

This course addresses the statistics curriculum found in most high school advanced placement courses. In addition, students will test hypotheses using appropriate sampling strategies, and interpret the results in terms of confidence intervals and significance. The course will also examine interpreting the results of statistical tests, (including z-test, t-test, paired t-test, matched t-test). In addition, special consideration will be given to developing strategies for modeling data, making predictions from these models, and considering issues relating to population, random samples, and proportions.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Repeatability: This course may not be repeated for additional credits.

MAES 4146. Teaching and Learning Mathematics in High School. 3 Credit Hours.

This course will explore problems in algebra, trigonometry, analytic geometry, calculus, Euclidean geometry, probability, statistics, and discrete mathematics. This course is intended as a capstone study for prospective secondary mathematics teachers. The objectives of this course are as follows: (1) connect ideas within and between mathematical concepts, (2) develop mathematical thinking and reasoning, and (3) develop problem solving skills. Technology will be a vital part of this course. Technology will be used to demonstrate and encourage conjecturing and problem solving with an emphasis on applications. The goals of this course are to help you as prospective or beginning secondary mathematics teachers to: (1) develop a deep understanding of the mathematics you will be teaching by connecting mathematical concepts to instruction and (2) acquire the skills, knowledge, and reflective practice necessary for successful teaching.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

MAES 4189. Project-Based Instruction. 3 Credit Hours.

"Project-Based Instruction" (PBI) is the capstone course in the sequence of required education courses and is required before TUteach students take Education 4688: "Student Teaching in Secondary Education." PBI is the course in which the major themes of the TUteach program - integrated content of mathematics and science learning, infusion of technology in representation, analysis, modeling, assessment and contextualization of the content, field-based experiences, and equity - converge into an exciting and intellectually challenging culminating experience. When students complete PBI, they are fully prepared for Student Teaching. Whereas in "Classroom Interactions," students gain experience designing a sequence of several lessons that they teach to a high school class, in PBI, students design full units of connected lessons - a skill that is required in Student Teaching. PBI also provides students with the experience of managing lessons and students outside a classroom, in a field setting. Despite its name, PBI emphasizes choosing from a variety of appropriate teaching styles, depending on the type of material and the learning objective, with project-based instruction being just one possible alternative. In addition, PBI requires students to incorporate various technologies into the units they plan.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MAES 2189 and '100' in PRAX) and minimum GPA of 3 in: courses numbered 0700 to 4999.

MAES 4366. The Teaching of Problem Solving. 3 Credit Hours.

This course is designed for the in-service as well as the pre-service teacher. Topics to be discussed will be the role of problem solving and reasoning in the mathematics curriculum, developing techniques for improving problem solving and reasoning abilities of students on mathematics. Emphasis will be on how to teach problem solving as opposed to merely solving problems.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MAES 2189.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MAES 2189 (may be taken concurrently)

MAES 4371. History of Mathematics. 3 Credit Hours.

The course will consider the mathematical ideas of particular significance in elementary and secondary school curricula: the development and introduction of Hindu-Arabic numerals, early computing devices, Euclidean and non-Euclidean geometries, etc. Ways in which the history of mathematics may be used to enhance the learning of mathematical concepts by students in the schools will also be examined.

Repeatability: This course may not be repeated for additional credits.

Mathematics (MATH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MATH 0701. Basic Mathematics for Today's World. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course surveys a variety of mathematical topics. Topics include numeracy with an emphasis on estimation and fluency with large numbers, evaluating expressions and formulas, rates, ratios, proportions, and percentages, solving equations, linear models, data interpretations including graphs and tables, verbal, algebraic and graphical representations of functions, exponential models. The course will help students develop conceptual understanding and acquire multiple strategies for solving problems. It will prepare students for success in future quantitative courses and will help them develop skills for the workplace and for everyday life. Please note that Math 0701 is no longer a prerequisite for MATH 1021, College Algebra, or STAT 1001, Quantitative Methods for Business I. Students whose program of studies requires one of these two courses must complete MATH 0702, Intermediate Algebra, instead.

Repeatability: This course may not be repeated for additional credits.

MATH 0702. Intermediate Algebra. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

This course is designed as an intermediate algebra course that prepares students for the topics covered in Math 1021. This course covers the real number system, basic properties of real numbers, operations with fractional expressions, simplifying complex fractions, powers and roots, operations with radicals, graphing linear equations and inequalities, and factoring of polynomials.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 1021, 'Y' in MC2, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC2A, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC2D, 'Y' in MC2T, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 0823. Math for a Digital World. 4 Credit Hours.

This course is not offered every year.

This course is about becoming an "informed user" of quantitative information. Do numbers make us more or less rational? What does "free" really mean? What's the difference between "correlation" and "cause"? How can we be misled by numbers? How can we make better decisions and have more effective discussions by understanding mathematics? Does it make sense to play the lottery? What are your chances of drawing the card you need in a poker game? How long will it take you to save a million dollars assuming interest is earned but you keep spending? How does math play into the digital world that surrounds us, whether it is email, online tools or the creation of passwords, IDs or serial numbers? These and many other questions will be explored and answered throughout the course. NOTE: (1) This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. (2) Duplicate Course: Students cannot receive credit for CIS 0823/0923 if they have successfully completed MATH 0823/0923.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0822 (may be taken concurrently), any MATH course numbered 0824 to 0922 (may be taken concurrently), any MATH course numbered 0924 to 1041 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 0824. Mathematical Patterns. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course will convey the essence of mathematics and its current breadth. It sets out to describe mathematics as a rich and living part of human culture, and is intended for the general student with minimal mathematical knowledge. Exposure to this subject matter will contribute to students' educational breadth and intellectual development by sharpening their problem-solving skills, enhancing their understanding of logical reasoning and analysis, and strengthening their ability to use language and symbolic expression in a disciplined manner. The course will consist of a series of vignettes. Topics may include problem solving, voting theory, graph theory, finance, mathematical models, cryptography, statistics and probability. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for MATH 0824 if they have successfully completed MATH 0924.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0823 (may be taken concurrently), any MATH course numbered 0825 to 0923 (may be taken concurrently), any MATH course numbered 0925 to 1041 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 0828. Critical Reasoning and Problem Solving. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

The course teaches students how to deal with and solve complex problems by confronting them with critical analysis. We look at these problems both from an historical perspective and the practical view of how and when these types of problems affect the students' everyday lives. The course takes students through several key mathematical disciplines, including probability and statistics, including the hallmark of probability - reasoning under uncertainty - as well as set theory and counting techniques and graphing, especially with Venn diagrams, a skill they will find beneficial as the world turns to technology and graphics. For example, when we introduce probability, we cover the first dramatic application of the discipline, Mendel's discovery of the centuries-old problem of explaining the scientific laws of heredity as he gives birth to genetics. We also cover Mendel's use of statistics. This leads us to study modern uses of the same concepts in areas such as medicine - how to evaluate statistical studies and how to analyze topics such as false positives - as well as the application of DNA in areas such as how it has significantly changed our justice system.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0827 (may be taken concurrently), any MATH course numbered 0829 to 0927 (may be taken concurrently), any MATH course numbered 0929 to 1041 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 0923. Honors Math for a Digital World. 4 Credit Hours.

This course is not offered every year. This course is about becoming an "informed user" of quantitative information. Do numbers make us more or less rational? What does "free" really mean? What's the difference between "correlation" and "cause"? How can we be misled by numbers? How can we make better decisions and have more effective discussions by understanding mathematics? Does it make sense to play the lottery? What are your chances of drawing the card you need in a poker game? How long will it take you to save a million dollars assuming interest is earned but you keep spending? How does math play into the digital world that surrounds us, whether it is email, online tools or the creation of passwords, IDs or serial numbers? These and many other questions will be explored and answered throughout the course. NOTE: (1) This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. (2) Duplicate Course: Students cannot receive credit for CIS 0823/0923 if they have successfully completed MATH 0823/0923.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0822 (may be taken concurrently), any MATH course numbered 0824 to 0922 (may be taken concurrently), any MATH course numbered 0924 to 1041 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 0924. Honors Mathematical Patterns. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course will convey the essence of mathematics and its current breadth. It sets out to describe mathematics as a rich and living part of human culture, and is intended for the general student with minimal mathematical knowledge. Exposure to this subject matter will contribute to students' educational breadth and intellectual development by sharpening their problem-solving skills, enhancing their understanding of logical reasoning and analysis, and strengthening their ability to use language and symbolic expression in a disciplined manner. The course will consist of a series of vignettes. Topics may include problem solving, voting theory, graph theory, finance, mathematical models, cryptography, statistics and probability. (This is an Honors course.) NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for MATH 0924 if they have successfully completed MATH 0824.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0823 (may be taken concurrently), any MATH course numbered 0825 to 0923 (may be taken concurrently), any MATH course numbered 0925 to 1041 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 0928. Honors Critical Reasoning and Problem Solving. 4 Credit Hours.

The course teaches students how to deal with and solve complex problems by confronting them with critical analysis. We look at these problems both from an historical perspective and the practical view of how and when these types of problems affect the students' everyday lives. The course takes students through several key mathematical disciplines, including probability and statistics, including the hallmark of probability - reasoning under uncertainty - as well as set theory and counting techniques and graphing, especially with Venn diagrams, a skill they will find beneficial as the world turns to technology and graphics. For example, when we introduce probability, we cover the first dramatic application of the discipline, Mendel's discovery of the centuries-old problem of explaining the scientific laws of heredity as he gives birth to genetics. We also cover Mendel's use of statistics. This leads us to study modern uses of the same concepts in areas such as medicine - how to evaluate statistical studies and how to analyze topics such as false positives - as well as the application of DNA in areas such as how it has significantly changed our justice system.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0827 (may be taken concurrently), any MATH course numbered 0829 to 0927 (may be taken concurrently), any MATH course numbered 0929 to 1041 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 1013. Elements of Statistics. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer II.

This course provides a firm foundation for the study of statistics in other fields. Although no one field is emphasized to the exclusion of others, applications are drawn from psychology, political science, exercise science, and other areas. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (any MATH course numbered 0701 to 0702 (C or higher), any MATH course numbered 0800 to 1012 (may be taken concurrently), any MATH course numbered 1014 to 1021 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3S, 'Y' in CRMA18, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 1015. Introduction to Numbers & Figures. 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

This is a course intended for students wishing to familiarize themselves with basic arithmetic and geometric concepts. Subjects include the real numbers, the decimal system, and fractions, elementary number theory (primes, gcd, lcm, rational and irrational numbers), and geometry (angles, triangles, polygons, polyhedra, circles, spheres, symmetry, congruence, and similarity).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, MATH 1021 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 1018. Mathematics for Business. 3 Credit Hours.

This course is not offered every year.

Fundamentals of finite mathematics necessary for a business student to pursue statistics and other quantitatively oriented business courses. Topics and illustrations are specifically directed to applications in business and economics. Topics include algebraic concepts; linear, quadratic, polynomial and rational functions; logarithm and exponential functions; elementary matrix manipulations. Fitting of curves, interest rate calculations, present and future values of annuities are some of the specific applications. Use of a graphing calculator. NOTE: (1) Duplicate Course: Students cannot receive credit for Math 1018 if they have successfully completed Statistics 1001. (2) This course can be used to satisfy the university Core Quantitative Reasoning A (QA) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (any MATH course numbered 0701 to 0702 (C or higher), any MATH course numbered 1021 to 1022 (D or higher; may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3S, 'Y' in CRMA18, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

MATH 1019. Lab for College Algebra. 2 Credit Hours.

This 2-credit course is intended as a supplement to MATH 1021 College Algebra for students with a Math GQ/1015 ALEKS math placement. The course will cover the particular intermediate algebra concepts that are necessary background for success in College Algebra.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, 'Y' in MC3, or 'Y' in MC4)

MATH 1021. College Algebra. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course covers polynomial, rational and algebraic expressions, equations and inequalities. It also includes some topics in graphing, an introduction to the concept of a function, and a brief introduction to the exponential and logarithmic functions. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning A (QA) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 0702 (C or higher), MATH 1015 (C or higher), MATH 1022 (D or higher), 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MA01, 'Y' in MA02, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), (MATH 0702 and MATH 1019 (CR or higher; may be taken concurrently)), ('Y' in MC3 and MATH 1019 (CR or higher; may be taken concurrently)), 'Y' in CRMA01, 'Y' in CRMA03, or 'Y' in MC6T)

MATH 1022. Precalculus. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course is designed to prepare students for the calculus courses. Topics include functions and function operations, one-to-one and inverse functions, exponential and logarithmic functions, trigonometric functions, inverse trigonometric functions, basic trigonometric identities, polar coordinates, and an introduction to vectors. The course also contains a brief review of basic algebra. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning A (QA) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D (except where noted) in (MATH 1021 (C or higher), (MATH 1021 (C- or higher) and MATH 1023 (CR or higher; may be taken concurrently)), MATH 1041, MATH 1038, 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA04, or 'Y' in MC6T)

MATH 1023. Lab for Precalculus. 1 Credit Hour.

This is a 1-credit course to be taken as a supplement to Math 1022: Precalculus for students with a C- in the prerequisite Math 1021: College Algebra. The course supplements Precalculus by giving an in-depth review of the College Algebra concepts, in the context of Precalculus, that are necessary background for success in Precalculus.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 1021.

MATH 1031. Differential and Integral Calculus. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This is a calculus course in the reform style that will introduce students to the basic concepts of differential and integral calculus. The emphasis of the course will be on understanding the concepts (intuitively rather than rigorously). However, the course will also cover the basic techniques of differentiation and some techniques of integration. NOTE: (1) This is the course appropriate for those students who are taking calculus in order to fulfill the quantitative core requirements. (2) This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement or the GenEd Quantitative Literacy (GQ) requirement.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1021, 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, 'Y' in MC6A, 'Y' in CRMA04, or 'Y' in MC6T)

MATH 1033. Computing in MATLAB. 1.5 Credit Hour.

This course is designed as an introduction to MATLAB and as preparation for computing in undergraduate applied mathematics courses. Topics include computer arithmetic, vectors and matrices, graphics, loops, functions, and conditional operators. No prior programming or MATLAB skills are required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1022, MATH 1039 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in CRMA05, 'Y' in CRMA07, or 'Y' in MC6T)

MATH 1034. Applications in MATLAB. 1.5 Credit Hour.

This course is designed as a supplement to MATH 1033 Computing in MATLAB and will introduce students to some particular applications using MATLAB. Topics covered will require students to reinforce their programming skills while exposing them to a variety of problems where computation is useful and necessary. After completing the course, students will be better prepared for the use of computing in more advanced undergraduate courses, research projects, and future internships/employment.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1022, MATH 1039 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in CRMA05, 'Y' in CRMA07, or 'Y' in MC6T) and MATH 1033 (C- or higher)

MATH 1039. Lab for Calculus I. 1 Credit Hour.

This course is typically offered in Fall and Spring.

This is the lab component of MATH 1041, a first semester calculus course that involves both theory and applications. MATH 1039 is required for students who earned a grade of C- in MATH 1022 Precalculus. Students with no previous calculus experience or those needing extra review of algebra and precalculus topics are strongly encouraged to register for MATH 1039. Topics include algebra and precalculus in the context of the topics covered in MATH 1041.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D (except where noted) in (MATH 1022 (C- or higher), MATH 1041, MATH 1042, MATH 1044, MATH 1941, MATH 1942, MATH 1951, 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

MATH 1041. Calculus I. 4 Credit Hours.

This is a first semester calculus course primarily for students with some calculus background or strong precalculus skills. It involves both theory and applications. Students who earned a grade of C- in MATH 1022 must register for MATH 1039 simultaneously with MATH 1041. Students with no previous calculus experience or those needing extra review of precalculus topics are strongly encouraged to register for MATH 1039. Topics include functions, limits and continuity, differentiation of algebraic, trigonometric, exponential and logarithmic functions, curve sketching, optimization and L'Hospital's rule. NOTE: (1) Students may not get credit for more than one of MATH 1041 and MATH 1941. (2) This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement or the GenEd Quantitative Literacy (GQ) requirement. However, this course is not appropriate for students whose sole purpose is to fulfill the quantitative core requirements. They should take MATH 1031 instead.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D (except where noted) in (MATH 1022 (C or higher), (MATH 1022 (C- or higher) and MATH 1039 (C or higher; may be taken concurrently)), MATH 1042, MATH 1044, MATH 1942, MATH 1951, 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA05, or 'Y' in MC6T)

MATH 1042. Calculus II. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This is a second semester calculus course that involves both theory and applications. Topics include the definite integral and the Fundamental Theorem of Calculus, applications of the definite integral, techniques of integration, improper integrals and sequences and series, including power and Taylor series.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1041, MATH 1941, MATH 1038, MATH 2043 (D or higher), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

MATH 1044. Introduction to Probability and Statistics for the Life Sciences. 4 Credit Hours.

A one-semester course at the freshman level to follow Calculus I for majors in Biology and Earth and Environmental Sciences (EES). Probabilistic and statistical methods needed for empirical modeling and associated data analysis, with examples primarily taken from the life sciences. This course does not serve as a prerequisite to Calculus III. Primarily for majors in Biology and EES.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1038, MATH 1941, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA06, or 'Y' in MATW)

MATH 1941. Honors Calculus I. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This is a first semester calculus course that involves both theory and applications. Topics include functions, limits and continuity, differentiation of algebraic, trigonometric, exponential and logarithmic functions, curve sketching, optimization and L'Hospital's Rule. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement or the GenEd Quantitative Literacy (GQ) requirement. However, this course is not appropriate for students whose sole purpose is to fulfill the quantitative core requirements. They should take Math 1031 instead.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D (except where noted) in (MATH 1022 (C or higher), MATH 1042, MATH 1044, MATH 1942, MATH 1951, 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA05, or 'Y' in MC6T)

MATH 1942. Honors Calculus II. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This is a second semester calculus course that involves both theory and applications. Topics include the definite integral and the Fundamental Theorem of Calculus, applications of the definite integral, techniques of integration, improper integrals and sequences and series, including power and Taylor series.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1041, MATH 1941, MATH 1038, MATH 2043 (D or higher), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

MATH 1951. Honors Accelerated Calculus I & II. 4 Credit Hours.

This course is typically offered in Fall.

This is a course for students who have had a year of calculus in high school. Its purpose is two-fold: to present a more theoretical treatment of calculus than is usually seen in an American high school and to prepare students for Math 2043, Calculus III. Topics covered will include some or all of the following: limits and continuity, derivatives and rules of differentiation, the Mean Value Theorem, L'Hospital's rule, optimization, graphing, the definite integral and the Fundamental Theorem of Calculus, u-substitution and integration by parts, limits of sequences, infinite series, convergence tests, power series, and Taylor series. NOTE: Prior to summer 2010, the course title was "Honors Differential & Integral Calculus."

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21) and (MATH 1042, MATH 1942, 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2021. Functions and Modeling. 3 Credit Hours.

This course is typically offered in Spring.

In this course, required for TUTEACH Mathematics with Teaching majors, students will give presentations and work in small groups to engage in explorations and lab activities designed to strengthen and expand their knowledge of the topics found in secondary mathematics; illuminate the connections between secondary and college mathematics and between various areas of mathematics; and illustrate productive uses of technology in teaching. Students will engage in non-routine problem solving, problem-based learning, and applications of mathematics. The course consists of four units: 1) Functions, 2) Modeling, 3) Overlooked Topics and Explorations, and 4) Geometry of Complex Numbers. Specific topics of investigation include function properties and patterns, complex numbers, parametric equations, polar equations, vectors, and exponential growth and decay. Explorations involve the use of multiple representations, transformations, data analysis techniques (such as curve fitting) and interconnections among topics in algebra, analytic geometry, statistics, trigonometry, and calculus. The lab investigations include use of various technologies including computers, calculators, and computer graphing software.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1951, or 'Y' in MATW) and (SCTC 1189, SCTC 1289, SCTC 1389, or MGRE 3111)

MATH 2031. Probability and Statistics. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This course presents basic principles of statistical reasoning and the concepts from probability theory that give the student an understanding of the logic behind statistical techniques. Topics covered include rules of probability, discrete probability distributions, normal distribution, sampling distributions, the central limit theorem, point estimation, interval estimation, tests concerning means, tests based on count data, correlation and regression, and nonparametric statistics. NOTE: This course cannot be credited towards graduation if taken after Math 3031.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1031, MATH 1041, MATH 1042, MATH 1044, MATH 1942, any MATH course numbered 2043 to 3080 (may be taken concurrently), STAT 1102, STAT 1902, or 'Y' in MATW)

MATH 2041. Differential Equations I. 3 Credit Hours.

This is a course in ordinary differential equations. Topics include first order ordinary differential equations, linear second order ordinary differential equations, systems of differential equations, numerical methods and the Laplace transform.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, 'Y' in MATW, 'Y' in MA07, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2043. Calculus III. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This is a third semester calculus course that involves both theory and applications. Topics include vectors in two or three dimensions, lines and planes in space, parametric equations, vector functions and their derivatives, functions of several variables, partial derivatives, multiple integrals, line integrals, and Green's, Divergence and Stokes' theorems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, MATH 1951, 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2045. Differential Equations with Linear Algebra. 4 Credit Hours.

This course is typically offered in Fall.

This is a course in ordinary differential equations that emphasizes the use of linear algebra. It has two objectives: 1) to teach students how to solve linear differential equations and systems of linear differential equations, and 2) to introduce students to the linear algebra concepts such as vector spaces, dimension, basis, matrices, eigenvalues and eigenvectors, that play a key role in the theory of linear differential equations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 2043 (may be taken concurrently), MATH 2943 (may be taken concurrently), 'Y' in MA08, 'Y' in CRMA12, or 'Y' in CRMA15)

MATH 2061. Euclidean Geometry. 3 Credit Hours.

This course is typically offered in Spring.

Students will be introduced to mathematical proofs and reasoning in the context of Euclidean geometry. The course will provide a foundation for more advanced courses in geometry and other proof-based mathematics courses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1042, MATH 1942, MATH 1951, MATH 2043 (may be taken concurrently), any MATH course numbered 2100 to 3080 (C- or higher; may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, 'Y' in CRMA11, or 'Y' in CRMA12)

MATH 2082. Sophomore Directed Study. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

Intensive study in a specific area. This course does not count for a mathematics related major elective credit. Prerequisites are MATH 1042 and a GPA of 3.5 or higher.

Repeatability: This course may not be repeated for additional credits.

MATH 2101. Linear Algebra. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course covers vectors and vector spaces, matrices, determinants, systems of linear equations, linear transformations, inner products and orthogonality, and eigenvectors and eigenvalues. NOTE: Only one course, Math 2101 or Math 2103, can be credited towards graduation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, MATH 1951, 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2103. Linear Algebra with Computer Lab. 4 Credit Hours.

This course is typically offered in Fall.

Topics in this course include: systems of linear equations; matrix algebra; determinants; fundamental subspaces; linear transformations; eigenvalues and eigenvectors; inner products; orthogonality; and spectral theory. Included is a computational lab component that uses activities and applications designed to promote understanding of the basic concepts from algebraic, symbolic, and geometric viewpoints. NOTE: Only one course, Math 2101 or Math 2103, can be credited towards graduation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, MATH 1951, 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11) and MATH 1033.

MATH 2111. Basic Concepts of Math. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

This is a course designed to introduce students to mathematical abstraction and the language of mathematical proof. Topics include logic, sets, relations, integers, induction and modular arithmetic, functions, and cardinality. This course is highly recommended for students who have not been exposed to mathematical proof and intend to take advanced math courses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 2110 (C- or higher; may be taken concurrently), any MATH course numbered 2112 to 3080 (C- or higher; may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2121. Mathematical Modeling and Simulation. 3 Credit Hours.

This course exposes students to first-principles models of real-world processes, simulations on computers, and the proper interpretation of simulation results and data. The course focuses on applications in which first-principles modeling and simulation are not yet standard toolsets, such as: bacterial motion, disease spread, traffic flow, animal swarming/flocking/herding, crowd dynamics, ecology, economic markets, and social networks. However, the fundamental concepts and techniques apply equally to fields in which simulation is more commonplace, such as computational physics and engineering. In the course, students are provided with suitable software and high-level programming environments that enable them to engage right away in devising, modifying, and simulating models of interacting agents that describe real-world phenomena. In addition to homework problems that involve mathematical modeling and programming, the course also involves course projects, including final project reports and presentations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1034, CIS 1051, CIS 1057, CIS 1068, CIS 1951, CIS 1968, 'Y' in CRCI01, 'Y' in CRCI04, 'Y' in CRCI05, or 'Y' in CRCI06) and (MATH 1042, MATH 1942, 'Y' in MATW, 'Y' in MA07, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2941. Honors Differential Equations I. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This is a course in ordinary differential equations. Topics include first order ordinary differential equations, linear second order ordinary differential equations, systems of differential equations, numerical methods and the Laplace transform. Additional topics may include series solutions to differential equations, the matrix exponential, and various applications.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, 'Y' in MATW, 'Y' in MA07, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 2943. Honors Calculus III. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This is a third semester calculus course that involves both theory and applications. Topics include vectors in two or three dimensions, lines and planes in space, parametric equations, vector functions and their derivatives, functions of several variables, partial derivatives, multiple integrals, line integrals, and Green's, Divergence and Stokes' theorems.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, MATH 1951, 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 3003. Theory of Numbers. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Divisibility properties of integers, prime factorization, distribution of primes, linear and quadratic congruences, primitive roots, quadratic residues, quadratic reciprocity, simple Diophantine equations, cryptography.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2111.

MATH 3031. Probability Theory I. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Counting techniques, axiomatic definition of probability, conditional probability, independence of events, Bayes Theorem, random variables, discrete and continuous probability distributions, expected values, moments and moment generating functions, joint probability distributions, functions of random variables, covariance and correlation. NOTE: Prior to summer 2010, the course title was "Introduction to Probability Theory."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1042, MATH 1942, MATH 1951, MATH 2043 (C- or higher; may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 3032. Mathematical Statistics. 3 Credit Hours.

This course is typically offered in Spring.

Random sampling, sampling distributions, Student's t, chi-squared and F distributions, unbiasedness, minimum variance unbiased estimators, confidence intervals, tests of hypothesis, Neyman-Pearson Lemma, and uniformly most powerful tests. NOTE: Prior to summer 2010, the course title was "Introduction to Mathematical Statistics."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3031 or AS 2101)

MATH 3041. Differential Equations I. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This is a course in ordinary differential equations. Topics include first order ordinary differential equations, linear second order ordinary differential equations, systems of differential equations, numerical methods and the Laplace transform.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2043 (may be taken concurrently)

MATH 3042. Differential Equations II. 4 Credit Hours.

This course is not offered every year.

This is a second course in differential equations. Topics include orthogonal polynomials, including Legendre and Chebyshev polynomials, Fourier series, partial differential equations, the boundary value problems and other topics of the instructor's choice. NOTE: This course is offered only in odd-numbered years.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3041 or MATH 3045)

MATH 3043. Numerical Analysis I. 4 Credit Hours.

This course is typically offered in Fall.

Computer arithmetic, pitfalls of computation, iterative methods for the solution of a single nonlinear equation, interpolation, least squares, numerical differentiation, numerical integration, and solutions of linear systems by direct and iterative methods.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2043, (MATH 2101, MATH 2103, or MATH 2045), and (CIS 1053, CIS 1057, CIS 1068, or PHYS 2501)

MATH 3044. Numerical Analysis II. 3 Credit Hours.

This course is typically offered in Spring.

Solution of systems of nonlinear equations, solution of initial value problems, matrix norms and the analysis of iterative solutions, numerical solution of boundary value problems and partial differential equations, and introduction to the finite element method. NOTE: Offered in even-numbered years only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 3043.

MATH 3045. Differential Equations with Linear Algebra. 4 Credit Hours.

This course is typically offered in Fall.

This is a course in ordinary differential equations that emphasizes the use of linear algebra. It has two objectives: 1) to teach students how to solve linear differential equations and systems of linear differential equations, and 2) to introduce students to the linear algebra concepts such as vector spaces, dimension, basis, matrices, eigenvalues and eigenvectors, that play a key role in the theory of linear differential equations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 2043 (may be taken concurrently), 'Y' in MA08, or 'Y' in CRMA12)

MATH 3046. Differential Equations with Computer Lab. 4 Credit Hours.

This course is typically offered in Spring.

This course combines traditional material with a modern systems approach. It presents a thorough introduction to differential equations, tempering a classic "pure math" approach with more practical applied aspects. The course covers key topics such as first order equations, matrix algebra, systems, and phase plane portraits. The focus is on interpreting and solving problems through the use of software support and technology projects. Using software tools graphics will be used to display the ideas in ODEs; modeling and applications; and projects. An objective is to provide students with the opportunity to bring together much of what they have learned, including analytical, computational, and interpretative skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 2043 (may be taken concurrently), 'Y' in MA08, or 'Y' in CRMA12) and MATH 1033.

MATH 3051. Theoretical Linear Algebra. 4 Credit Hours.

This course is typically offered in Spring.

This is a course in linear algebra with a higher degree of abstraction than a traditional undergraduate linear algebra course. Topics include vector spaces, linear transformations, determinants, eigenvalues and eigenvectors, canonical forms, inner product spaces, and bilinear forms.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 2111 (C or higher) or 'Y' in CRMA14) and (MATH 3045, MATH 2045, MATH 2101, or MATH 2103)

MATH 3061. Modern Geometry I. 3 Credit Hours.

This course is typically offered in Fall.

An introduction to Euclidean and Noneuclidean geometries with a particular emphasis on theory and proofs.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2061 or MATH 2111) and (MATH 2045, MATH 2101, MATH 2103, or MATH 3051)

MATH 3082. Junior Individual Study. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Intensive study in a specific area. NOTE: May be taken in either semester.

Repeatability: This course may be repeated for additional credit.

MATH 3083. Junior Directed Reading. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II. Intensive study in a specific area. NOTE: May be taken in either semester.

Repeatability: This course may be repeated for additional credit.

MATH 3096. Introduction to Modern Algebra. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This is a one-semester course in modern algebra that covers topics from group, ring, and field theory. Topics include groups and their basic properties, subgroups, normal subgroups and quotient groups, group homomorphisms, rings, rings of integers and polynomial rings, congruences in the rings of integers and polynomial rings, ideals and quotient rings, ring homomorphism, fields and field extensions, Galois theory.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2111.

MATH 3098. Modern Algebra. 3 Credit Hours.

This course is typically offered in Fall.

This is the first semester in a year-long modern algebra sequence Math 3098 - Math 3101. It is a thorough introduction to the theory of groups and rings. NOTE: Students who have had limited exposure to proofs should consider taking Math 2111 first.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 2111 or 'Y' in CRMA14) and (MATH 2101, MATH 2103, MATH 2045, MATH 3045 (C- or higher), 'Y' in MA09, 'Y' in MA10, or 'Y' in CRMA13)

MATH 3101. Topics in Modern Algebra. 3 Credit Hours.

This course is typically offered in Spring.

This is the second semester of a year-long modern algebra course. Topics come from theory of rings, fields and modules and from Galois theory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 3098.

MATH 3137. Real & Complex Analysis I. 3 Credit Hours.

This course is typically offered in Fall.

Real and complex number systems, completeness. Sequences and series and their limits. Continuity of real and complex functions. Derivative. Analytic functions. Power series.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 2043, 'Y' in MA08, or 'Y' in CRMA12) and MATH 2111 (C- or higher)

MATH 3138. Real & Complex Analysis II. 3 Credit Hours.

This course is typically offered in Spring.

The Riemann-Stieltjes integral. Cauchy integral theorem. Cauchy integral formula and its consequences. The calculus of residues.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3137 or MATH 3141)

MATH 3141. Advanced Calculus I. 3 Credit Hours.

This course is typically offered in Fall.

This is a first semester course in real analysis. Topics include the real number system and the completeness property, sequences and their limits, limits of real-valued functions and continuity and point-set topology of Euclidean spaces. NOTE: Students who have had limited exposure to proofs should consider taking Math 2111 first.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 2043, 'Y' in CRMA12, or 'Y' in MA08), (MATH 2111, 'Y' in MA11, or 'Y' in CRMA14), and (MATH 2101, MATH 2103, MATH 2045, MATH 3045, 'Y' in MA09, 'Y' in MA10, or 'Y' in CRMA13)

MATH 3142. Advanced Calculus II. 3 Credit Hours.

This course is typically offered in Spring.

This is a second semester course in real analysis. Topics include the derivative and differentiable functions, the Riemann integral, infinite series and convergence tests, power and Taylor series and operations with them, and topics from calculus of several variables.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 3141.

MATH 3500. Topics in Contemporary Mathematics. 3 Credit Hours.

This course provides an in depth exposure to selected topics in advanced mathematics.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1042, MATH 1942, MATH 2043 (C- or higher; may be taken concurrently), MATH 2943 (C- or higher; may be taken concurrently), 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

MATH 3941. Honors Differential Equations I. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This is a course in ordinary differential equations. Topics include first order ordinary differential equations, linear second order ordinary differential equations, systems of differential equations, numerical methods and the Laplace transform. Additional topics may include series solutions to differential equations, the matrix exponential, and various applications.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2043 (may be taken concurrently) or MATH 2943 (may be taken concurrently))

MATH 4001. History of Mathematics. 3 Credit Hours.

This course is not offered every year.

The development of the major mathematical concepts from ancient times to the present, emphasizing topics in the standard undergraduate curriculum. Special attention will be paid to the history of mathematics and mathematics education in the United States. NOTE: Offered in even-numbered years only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (any MATH course numbered 3001 to 4999 or 'Y' in CRMA20)

MATH 4003. Combinatorics. 3 Credit Hours.

This course is not offered every year.

Basic theorems and applications of combinatorial analysis, including generating functions, difference equations, Polya's theory of counting, graph theory, matching, and block diagrams. NOTE: Offered in odd-numbered years only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2111, MATH 2196, or MATH 3003)

MATH 4033. Probability Theory II. 3 Credit Hours.

This course is typically offered in Fall.

Markov chains, exponential distribution, Poisson process, continuous time Markov chains, Brownian motion, stationary processes. NOTE: Prior to summer 2010, the course title was "Introduction to Probability Theory."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3031 or AS 2101) and (MATH 2101, MATH 3045, or MATH 2045)

MATH 4041. Partial Differential Equations. 3 Credit Hours.

This course is typically offered in Spring.

The solution and properties of first and second order equations; heat and wave equation. Elliptic boundary value problems and Green's functions. Hyperbolic problems and the theory of characteristics. Finite difference methods. The equations of mathematical physics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2101, MATH 2103, or MATH 3051) and (MATH 2041, MATH 2045, MATH 3041, or MATH 3045)

MATH 4043. Applied Mathematics. 3 Credit Hours.

This course is typically offered in Fall.

The construction and study of mathematical models for physical, economic, and social processes. NOTE: Offered in odd-numbered years only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2045, MATH 3045, or Completed the following: (MATH 2101, MATH 2103, or MATH 3051) and (MATH 2041, MATH 3041, or MATH 3046))

MATH 4051. Complex Analysis. 3 Credit Hours.

This course is typically offered in Fall.

Complex numbers, analytic functions, harmonic functions, power and Laurent series, Cauchy's theorem, calculus of residues, and conformal mappings.

NOTE: Prior to summer 2010, the course title was "Introduction to Functions of a Complex Variable."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 3138, MATH 3142 (C- or higher), 'Y' in MA12, or 'Y' in CRMA17)

MATH 4061. Differential Geometry. 3 Credit Hours.

This course is typically offered in Spring of even years.

This course is an introduction to differential geometry starting with concepts learned in Calculus III. A particular emphasis will be placed on the study of curves and surfaces in 3-space and their generalizations. The course will revolve around Riemannian geometry, but, time permitting, it will also include a brief introduction to one or more of the following: symplectic geometry and its relation to classical mechanics, general connections and their relation with field theory and pseudoriemannian manifolds, and general relativity.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 2043 (C or higher), 'Y' in MA08, or 'Y' in CRMA12) and (MATH 2045, MATH 2101, MATH 2103, or MATH 3051)

MATH 4063. Topology I. 3 Credit Hours.

This course is typically offered in Spring of odd years.

Topological and metric spaces. Continuity, compactness, connectedness, convergence. Introduction to algebraic and combinatorial topology.

Classification of compact surfaces, fundamental groups and covering spaces.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3137 or MATH 3141) and (MATH 3096 or MATH 3098)

MATH 4082. Senior Individual Study. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Intensive individual study at a senior or graduate level. Arranged each semester. Please consult with the instructor. NOTE: Can be taken in either semester.

Repeatability: This course may be repeated for additional credit.

MATH 4083. Senior Directed Reading. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Intensive individual study at a senior or graduate level. Arranged each semester. Please consult with the instructor. NOTE: Can be taken in either semester.

Repeatability: This course may be repeated for additional credit.

MATH 4096. Senior Problem Solving. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This is a course in mathematical discovery through problem solving. Students will be expected to develop two or three areas of mathematics by solving problems, assigned by the instructor. Problems will be solved both individually and in groups. (Capstone writing course.)

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3138 (may be taken concurrently), MATH 3142 (may be taken concurrently), or MATH 3044 (may be taken concurrently)) and (MATH 3051, MATH 3096, or MATH 3098)

Mechanical Engineering (MEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MEE 0843. Technology Transformations. 3 Credit Hours.

Learn about science and technology through the history of discovery, inventions, and innovations. The course expands your knowledge of innovations in science and technology, and their inherent disruptive quality in altering society, economy, and politics. You will learn of key ingredients within a socio-political-economic milieu that is the sine qua non for innovation to germinate and flourish. The goal is to prepare you for a lifelong journey as innovators in your chosen field. The course dissects "case studies" centered around innovators and original thinkers who metamorphized scientific phenomena from a mere curiosity into key technologies (electricity, automobiles, airplanes, telephones, bridges, highways, electronics, computers, and information technology), and in the process, transformed the world around us. At the end of the course, students will become discerning citizens able to judge the pros and cons of modern technologies and surf new waves of technologies without anxiety. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

MEE 1001. Introduction to Mechanical Engineering. 2 Credit Hours.

Provides an understanding of the study and practice associated with mechanical engineering and technology disciplines. Understand the importance of good communications and teamwork skills in a successful engineering and technology career. Understand the basics of problem solving and design. Discipline-specific labs.

Repeatability: This course may not be repeated for additional credits.

MEE 1019. Automotive Design I. 1 Credit Hour.

Design of automotive chassis, suspension, and drive train for participation in Society of Automotive Engineers competitions. Grade based on participation (50%) and/or design report (50%).

Repeatability: This course may not be repeated for additional credits.

MEE 1029. Automotive Design II. 1 Credit Hour.

Continuation of MEE 1019 (0180). Grade based on participation (50%) and/or design report (50%).

Repeatability: This course may not be repeated for additional credits.

MEE 1039. Automotive Design III. 1 Credit Hour.

Continuation of MEE 1029 (0181). Grade based on participation (50%) and/or design report (50%).

Repeatability: This course may not be repeated for additional credits.

MEE 1117. Fundamentals of Mechanical Engineering Design. 2 Credit Hours.

An introduction to the art of communicating design ideas in two and three dimensions with a combination of hand sketching and computer modelling. Specific topics include: isometric, orthographic and perspective hand sketching; computer-aided design (CAD) modeling - part model, assembly and mechanism synthesis; CAD drawings - orthographic, auxiliary and sectional views, dimensioning and annotations. A culminating team project will facilitate introduction of rapid prototyping techniques necessary to convert a design intent into a functional product.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

MEE 1305. Machine Shop Laboratory. 1 Credit Hour.

This machine-shop lab experience provides practical, hands-on training on the machine-shop tools that BS ME students will use in their subsequent course work. Students will fabricate specific parts using the principal machine tools and using 3D Printing. Particular emphasis will be placed on safety procedures, on precise manufacture of parts, on using the right machine tool for a particular application, and for the judicious, least wasteful use of stock material.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MEE 1117 or ENGR 1117)

MEE 2011. Linear Systems. 3 Credit Hours.

This course introduces junior-level engineering students to linear-systems analysis and numerical methods in engineering. Numerical-analysis procedures typically encountered in the upper-level mechanical-engineering curriculum are considered and include: linear matrix equations and their solutions, eigenvalue problems, numerical interpolation, differentiation and integration, and the numerical solution of differential equations.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Bioengineering, Civil Engineering, Mechanical Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW), (MATH 2043 (may be taken concurrently), MATH 2943 (may be taken concurrently), or 'Y' in METW), and (MATH 3041, MATH 3941, MATH 2041, MATH 2941, or 'Y' in METW)

MEE 2305. Instrumentation and Data Acquisition Lab. 1 Credit Hour.

Students will learn the instrumentation of basic static and dynamic mechanical systems. Students will use data-acquisition hardware and software. Students will carry out statistical analysis of results, evaluate error propagation, and provide written lab reports.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2332 (may be taken concurrently) or ENGT 3323 (may be taken concurrently)), ECE 2112 (may be taken concurrently), ECE 2113 (may be taken concurrently), and ENGR 1102.

MEE 3011. Analysis and Computation of Linear Systems in Mechanical Engineering. 3 Credit Hours.

Many types of mechanical-engineering situations are modeled as systems of coupled linear equations, or as systems of coupled linear differential equations. Modern computing techniques offer very powerful functionality for calculating linear-equation systems and will be used extensively in this course. Upon completion of this course students will attain: proficiency in coding, a conceptual foundation for core linear algebra and eigenfunction analysis, and insight for both numerical and exact solution strategies applicable to a wide range of problems encountered in mechanical engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2332 or BIOE 3312), (MATH 2043, MATH 2943, or 'Y' in METW), and (MATH 3041, MATH 3941, MATH 2041, MATH 2941, or 'Y' in METW)

MEE 3117. Computer-Aided Mechanical Design. 3 Credit Hours.

An introduction to the mathematical and computational fundamentals of finite element method and the use of an industry standard Computer Aided Design (CAD) package to analyze failure. It is expected that before taking this course, students have a fundamental understanding of concepts from statics, dynamics, solid mechanics and design of machine elements. A culminating design project will help students understand the design and assembly of complex machines by analysis of individual components and the interaction between them, from the prime mover to the load.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bach of Science in Mech Eng.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in MEE 3011 (may be taken concurrently) and MEE 3301.

MEE 3185. Mechanical Engineering Summer Work Experience. 3 Credit Hours.

This course is for an approved, full-time, full-summer (ten weeks or more) work experience in industry or a government agency. The full-time work experience must be carried out during the summer between a full, regular spring semester and full, regular fall semester. The summer employment must entail rigorous engineering analysis at a level comparable to an approved technical elective course in the BS ME program.

Repeatability: This course may not be repeated for additional credits.

MEE 3301. Machine Theory and Design. 3 Credit Hours.

The course includes design process and consideration of materials, reliability, stress and deflection, failure criteria from static and dynamic loadings. Topics also include analysis of mechanical components including rotating shafts, screws, welded parts, bearings, gears, and belts. There will be individual and team design projects with written reports and presentations.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bach of Science in Mech Eng.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 1117 or MEE 1117), ENGR 2332, (ENGR 2333 or ENGR 2933), and MEE 3305 (may be taken concurrently)

MEE 3302. Kinematics of Mechanisms. 3 Credit Hours.

This course builds on the concepts of kinematics first presented in sophomore level Dynamics and explores its application to mechanical design. Starting with an introduction to links, joints and kinematic chains, students will learn the analysis and design of spatial mechanisms with an emphasis on position, velocity and acceleration of linkages. In addition to graphical and numerical analysis, computer aided mechanism design will be performed using SolidWorks Motion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2332.

MEE 3304. Mechanical Design and Fabrication. 3 Credit Hours.

This course builds on the theoretical foundation of MEE 3301 Machine Theory and Design and MEE 3117 Computer-Aided Mechanical Design. Students will learn to incorporate design constraints associated with the practical fabrication and assembly of a mechanism. In this machine-shop-intensive course, student teams will be trained in precision machining and assembly techniques. A significant portion of the grade will rely on the quality of workmanship and accuracy of output.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in MEE 2305 (C- or higher), (ENGR 3117 (may be taken concurrently) or MEE 3117 (may be taken concurrently)), and MEE 3301.

MEE 3305. Materials Laboratory. 1 Credit Hour.

Laboratory experiments related to the nature and properties of materials, including: stress, strain, fractures, microstructure, metallography, and nondestructive testing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2333, ENGR 2933, or ENGT 2322) and MEE 2305.

MEE 3421. Dynamic Systems. 3 Credit Hours.

A study of the dynamic response of physical systems, concentrating on mechanical systems in translation, rotation, and combined motion. Mathematical models are developed using interacting elements, inter-connecting laws, and physical laws. Both the state variable and input-output analysis are considered. Solutions for the model response include using the following techniques: analytical, Laplace Transform, transfer function, matrix methods, and numerical analysis. Design project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3011.

MEE 3422. Modeling and Control of Electromechanical Systems. 3 Credit Hours.

Control systems are integral parts of our modern life. This course introduces the control of electromechanical systems with an emphasis on linear systems. Analyzing systems using transfer functions and Laplace transforms is studied, and the stability of control systems and their transient response is covered. In addition, frequency-domain techniques and the design of feedback-control systems will be discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3011.

MEE 3506. Fluid Mechanics Laboratory. 1 Credit Hour.

This laboratory aims to familiarize the students with different data acquisition techniques and devices to measure and control the behavior of various fluid systems. Experiments will include pressure and velocity measurements as well as modern transducers and pressure/flow regulators.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ENGR 3553 (may be taken concurrently) or ENGT 2521 (D- or higher; may be taken concurrently))

MEE 4040. Special Topics. 1 to 4 Credit Hour.

A course designed to present new and emerging areas of engineering. The course may also be used to present areas not normally taught in the College. Course requirements vary with the topic and instructor. Offered as needed or as appropriate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

MEE 4172. High-Speed Imaging and Analysis for Engineering Applications. 3 Credit Hours.

This course will introduce students to high-speed imaging and analysis techniques widely used in academia, industry, and government to solve complex engineering problems. Students will first learn key digital imaging concepts, followed by the fundamentals of optics, lensing and lighting. Then, they will learn how to process images to track and quantify the motion of points. This will naturally evolve into discussions on techniques including 3D point tracking, Digital Image Correlation (DIC), and Particle Image Velocity (PIV). Students will also be introduced to non-invasive imaging techniques for characterizing transparent flows, namely shadowgraphy and schlieren imaging. Finally, students will utilize software packages to perform digital processing steps such as filtering, pyrometry, correlations, tracking and more.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3011.

MEE 4173. Data Acquisition and Analysis for Engineers. 3 Credit Hours.

Course content includes the use of microcomputers for automated data acquisition, process control, and data analysis. The principles and applications of sensors, transducers, recording instruments, signal conditioning, and control instrumentation, and sampling theory. Data analysis using Fourier transform and least squares method. Computer software development for interfacing and graphics. Hands-on lab and design project required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3011, MEE 2305, and (ECE 2112, ECE 2332, or ECE 2312)

MEE 4177. Design and Realization of a Mechanical System. 2 Credit Hours.

In this project-based course, student teams will design, fabricate, and test a mechanical assemblage that achieves a specific performance goal. Each student team will consider the same design problem, which may be either thermal-fluid or mechanical in nature depending on the course-section instructor. A significant portion of the grade will rely on the quality of workmanship and the team's success in achieving the design objectives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in MEE 1305 (may be taken concurrently), MEE 2305, ENGR 3001 (D- or higher), ENGR 3571, (ENGR 3553 or ENGR 3953), MEE 3301 (D- or higher), and MEE 3117 (D- or higher; may be taken concurrently)

MEE 4191. Independent Research in Mechanical Engineering. 2 to 5 Credit Hours.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

MEE 4212. Tribology and Surface Engineering. 3 Credit Hours.

Tribology encompasses the interdisciplinary science and engineering of interacting surfaces in relative motion. Tribology is in every aspect of our lives and has a tremendous impact on manufacturing, energy production and use, transportation vehicles, health care, mining safety and reliability, and space exploration. This course introduces the nature of engineering surfaces, methods of surface characterization, modes of friction and wear, theories of contacts, and lubrication.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ENGR 3201.

MEE 4311. Mechanics of Composite Materials. 3 Credit Hours.

Introduction to the behavior of composite materials and their use in engineering structures: behavior and properties of the constituent fibers and matrices, micromechanical predictions of composite properties, anisotropic elasticity, behavior of composite laminae, classical lamination theory; fracture mechanisms, failure theories; behavior of composite plates and beams.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ENGR 2333 or ENGR 2933), ENGR 3201 (D- or higher), and MEE 3011.

MEE 4314. Impact and Crashworthiness. 3 Credit Hours.

This course is an advanced course on impact mechanics, impact biomechanics, as well as vehicle crashworthiness standards and accident data analysis. Students will learn about FMVSS and NCAP crash tests, FARS and NASS real world accident databases, and methods to analyze crash and accident data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2332 and (ENGR 2333 or ENGR 2933)

MEE 4382. Independent Study in Mechanical Engineering. 1 to 6 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

MEE 4405. Vibrations Laboratory. 1 Credit Hour.

This course covers instrumentation and data acquisition of single degree of freedom, multi-degree of freedom, and continuous vibratory systems. It also covers data analysis software in time domain and frequency domain, simulation of basic vibratory systems, and statistical analysis of results.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in MEE 4422 (may be taken concurrently) and MEE 2305 (C- or higher)

MEE 4411. Introduction to Mobile Robotics. 3 Credit Hours.

Introduction to Mobile Robotics will teach you, through the use of project-based learning, fundamental concepts in mapping, planning, control, and dynamics that are used in mobile robotics. By the end of this course you will be able to program both a ground and aerial robot to autonomously and safely navigate through an obstacle-filled environment. You will work with both simulated and real robots and use both off-the-shelf software and write code from scratch using ROS.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (MEE 4412 or MEE 5412)

MEE 4412. Modern Dynamics for Robotics. 3 Credit Hours.

This course focuses on the algebraic and differential equations governing the static and dynamic 3D motion of rigid bodies, including vectors, vector differentiation, and dyads. The equations of motion for multibody systems will be derived using Newton-Euler, Lagrange, and Kane's methods. Computational tools for 3D force and motion analysis will be used to simulate physical systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MEE 3011 or Complete the following: ENGR 2332, MEE 2011, and (MATH 3041, MATH 3941, MATH 2041, MATH 2941, or 'Y' in METW))

MEE 4413. Robotic Manipulation. 3 Credit Hours.

This course is an introduction to the design, modeling and control of robot manipulators, using modern dynamic formulations for multi-degree of freedom, 3D rigid body systems. This course covers 3D spatial transformations, forward and inverse kinematics, Jacobians, joint space and operational space control, and force control. This course also introduces ROS for communication and control of 2 6 axis robotic arms.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (MEE 4412 or MEE 5412)

MEE 4414. Optimization and Control of Mechanical Systems. 3 Credit Hours.

From the everyday commute to flight control, optimization and optimal control play an important role. This course covers topics related to optimization and designing optimal controllers for mechanical systems. Topics include optimization, introduction to calculus of variations, finding optimal paths and route planning for autonomous vehicles, dynamic programming, linear optimal control, and model predictive control. Applications of the course concepts in robotics and modern mechanical systems will be discussed through several examples.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MEE 3422 or ECE 3412)

MEE 4422. Mechanical Vibrations. 3 Credit Hours.

The study of single degree, two degrees, and multi-degrees of freedom systems, harmonic and non-harmonic excitation, damped and undamped response, free, forced, transient, and random vibrations, resonance beating, force transmission, isolation, base, and self excitation. Term design project. Computer numerical methods.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3011.

MEE 4506. Energy Conversion Laboratory. 1 Credit Hour.

This laboratory will emphasize advanced measurement techniques in energy systems. Computer based data acquisition and statistics are integral parts of the course. Experiments will include: gas and liquid measurements, heat and mass transfer, and engine measurements.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ENGR 3553 or ENGR 3953), ENGR 3571, MEE 2305, MEE 3506, MEE 4571 (D- or higher; may be taken concurrently), and MEE 4572 (D- or higher; may be taken concurrently)

MEE 4512. Compressible Fluid Dynamics. 3 Credit Hours.

This course will introduce students to the subject of high speed gas dynamics. Compressible flows exhibit fundamentally different behavior from that observed in low speed, constant density fluids. Such flows are found in aerodynamics, combustors, turbines, jets, gas pipelines, and wind tunnel test facilities. Students will study phenomena associated with supersonic flows, including normal and oblique shocks, expansion fans, and compressible flows with friction and/or heat transfer. An introduction to high temperature and rarefied gas dynamics will also be included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 3553 or ENGR 3953) and ENGR 3571.

MEE 4513. Aerodynamics. 3 Credit Hours.

The forces and moments exerted by moving fluids on solid bodies are of concern in numerous applications. While the performance of flight vehicles is of particular interest, aerodynamics is also a subject of importance in passenger and race car design, wind turbines, structures, sea vessels, etc. Students will study various topics in low speed aerodynamics, including thin airfoil theory and airfoil nomenclature, finite wing theory, high lift and drag reduction devices, separated and vortical flows, and rotating blades. An introduction to transonic flows and computational aerodynamics will also be included.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Civil Engineering, Mechanical Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 3553 or ENGR 3953)

MEE 4571. Advanced Thermodynamics and Combustion. 3 Credit Hours.

Review of basic concepts, first and second laws, entropy (statistical and classical), power and refrigeration cycles, thermodynamic relationships, mixtures, chemical reactions and equilibrium, introduction to combustion process. Term design project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 3571.

MEE 4572. Heat and Mass Transfer. 3 Credit Hours.

Principles and applications of heat transfer by conduction, convection, and radiation processes. Combined modes of heat transfer. Graphic and numerical solutions. Steady and unsteady as well as multi-dimensional conduction heat transfer. Forced and free convection. Heat exchanger theory. Introduction to radiation. Term design project. Computer Numerical methods.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 3041, MATH 3941, MATH 2041, MATH 2941, or 'Y' in METW), ENGR 3571, and (ENGR 3553 or ENGR 3953)

MEE 4573. Internal Combustion Engines. 1 Credit Hour.

Types of engines, design considerations, combustion, friction, emission.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in MEE 4571 (may be taken concurrently)

MEE 4574. Heating, Ventilating, and Air Conditioning. 3 Credit Hours.

Course content includes human comfort criteria, heating and cooling loads, HVAC system types, room air distribution, terminal unit selection, fans and ducts, pumps and piping, computer-aided design; term design project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 3571 and (ENGR 3553 or ENGR 3953)

MEE 4575. Renewable and Alternative Energy. 3 Credit Hours.

This survey course considers current technologies for renewable and alternative energy, including: different scenarios of producing energy, mechanical heat engines, ocean thermal energy converters, thermoelectricity, solar radiation, biomass, photovoltaic converters, wind energy, and ocean engines. The course will also consider the design of hydrogen-powered systems and of polymer electrolyte-membrane fuel cells.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 3571 and (ENGR 3553 or ENGR 3953)

MEE 4577. Power Generation and Storage Technologies. 3 Credit Hours.

This course will give an overview of electric power generation technologies including coal, gas, and nuclear power plants, as well as some emerging technologies such as photovoltaic. This course will also discuss technologies used in power transmission and distribution such as overhead power line conductors. Power storage technologies will also be introduced, including compressed air, flywheel, hydrogen, and batteries.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 3571, ENGR 3201 (may be taken concurrently), and (ENGR 3553 or ENGR 3953)

MEE 4578. Fundamentals of Combustion. 3 Credit Hours.

This course is focused on concepts and applications of chemically reacting systems. Topics include heat of reaction, chemical equilibrium, chemical kinetics, chemical mechanisms, coupling chemical and thermal analyses of reacting systems, laminar premixed and diffusion flames, turbulent flames and pollutant emissions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ENGR 3571, (ENGR 3553 or ENGR 3953), and MEE 4572 (D- or higher; may be taken concurrently)

MEE 4643. Manufacturing Engineering. 3 Credit Hours.

This course will provide an overview of existing and emerging manufacturing technologies in the modern society. Topics include state-of-the-art processing methods for metals and alloys, ceramics and powder metallurgy, polymers and composites, additive manufacturing of a wide range of solid materials, as well as micro- and nano- fabrications.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Mechanical Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3301 and ENGR 3201.

MEE 4731. Cardiovascular Fluid Dynamics. 3 Credit Hours.

Mechanics of blood circulation, fluid mechanics of the heart, blood flow in arteries, unsteady flow in veins, current concepts in circulatory assist devices, biofluidics, and other selected topics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 3553 or ENGR 3953)

Mechanical Engineering Technology (MET)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MET 4671. Computer Integrated Manufacturing Systems. 3 Credit Hours.

CAD/CAM in practice: flexible systems, operations, and performance. The course also considers communication and the integration of robots and computerized machines. Laboratory and demonstrations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGT 3651 and ENGT 3652)

Media Studies & Production (MSP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MSP 0821. The Future of Your TV. 3 Credit Hours.

What is the future of your TV and what kinds of programming will you see in the next two years? Television is not going away but how, where and when we interact with TV changes constantly. What roles do blogs, podcasts, YouTube, Netflix and new digital technologies have in furthering television into a medium where consumers drive content? In large lecture you will learn about these changes; in small groups, you will take the driver's seat as a critic and creator of content. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

MSP 0823. Latin American Media. 3 Credit Hours.

From the music of Shakira and Pitbull to Bart Simpson's bad Spanish (no problemo!) and the cross-over appeal of Modern Family's Sofia Vergara, Latin American influences are increasingly evident in U.S. media and culture. The influence goes both ways: U.S. media and culture have had great impact in Latin America. This class focuses on Latin American media as key institutions within the region and also as they interact with the United States. Media systems are so intertwined with society that understanding them requires understanding where they come from, so we will look at Latin America itself first - Where is it? What are its characteristics? The class will then examine Latin American media and the ways that Latin American people have reacted to U.S. influence. We will also explore the growing presence of Latino media in the U.S. and in Philadelphia. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

MSP 1001. Video Production for Non-Majors. 3 Credit Hours.

In the contemporary, multi-mediated world, video production skills constitute a core 21st Century communication competency. This entry-level course offers non-majors an introduction to basic video and audio production that will equip students from across campus with the ability to produce meaningful and aesthetically sound video content. The goal of the course is for individual students to develop their ability to conceptualize video projects, capture quality images and sound, and edit those elements together in coherent and communicative ways.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Media Studies and Production.

Repeatability: This course may not be repeated for additional credits.

MSP 1011. Introduction to Media Theory. 3 Credit Hours.

This class provides a broad survey of key theoretical approaches to the understanding of human communicative behavior with an emphasis on those theoretical frameworks associated with mediated communication. The course helps students develop an appreciation for the role theory plays in our society, including the relationship of theory to research and the application of theoretical models to contemporary phenomena. NOTE: For MSP majors and Communication Studies majors; must be taken during first 45 credit hours in degree program.

Repeatability: This course may not be repeated for additional credits.

MSP 1021. Introduction to Media Analysis. 3 Credit Hours.

Media analysis is the project of turning critical scholarly attention to the people, processes, and institutions that shape media texts and the ways media audiences interact with these texts. This class presents students with an introductory sampler of the ways media influence cultural, social, and political spheres. The course places these topics in a historical frame and introduces the foundations for different approaches to media analysis. Students will develop critical skills as they engage in their own analyses of media.

Repeatability: This course may not be repeated for additional credits.

MSP 1251. The Children's Media Industry. 3 Credit Hours.

This course will introduce students to the business and entrepreneurship aspects of the children's media industry. Combining case studies, current news reports, analysis of industry trends, and audience research, students will deepen their understanding of the business decisions and revenue focus that drives the industry. Topics to be addressed include the massive migration of kids from television to streaming and YouTube; why diversity of voices and characters makes good business sense; and the ups and downs of government regulations. The course will explore the unique concerns of leading a media company in which the target audience is children; young, impressionable, and endlessly fickle.

Repeatability: This course may not be repeated for additional credits.

MSP 1655. Introduction to Media Business. 3 Credit Hours.

This course is an introduction to the business decisions, challenges, creative approaches and ethical responsibilities dealt with by media institutions and media creators in the digital age. The course places these topics in a historical time frame to provide context for industry growth over time. Topics include an analysis of media organizations and institutions, roles and responsibilities of media managers, history of media industries, financial decision-making, the differing missions of for-profit and non-profit media, the influence of government regulations, and media as a global industry. Course topics are set within four broad areas influencing the industry: institutional structures, monetization strategies (revenue models), content and audience development, trends and global perspective. The course focuses on electronic and digital media industries, including radio, television, cable, satellite, online and mobile.

Repeatability: This course may not be repeated for additional credits.

MSP 1701. Introduction to Media Production. 3 Credit Hours.

An introduction to visual aesthetics, communication design and other concepts relevant to the world of digital media. Students are introduced to various multimedia applications and learn how to construct effective media projects including web sites, graphics, and audio and video work.

Repeatability: This course may not be repeated for additional credits.

MSP 2011. Introduction to Media Theory. 3 Credit Hours.

This class provides a broad survey of key theoretical approaches to the understanding of human communicative behavior with an emphasis on those theoretical frameworks associated with mediated communication. The course helps students develop an appreciation for the role theory plays in our society, including the relationship of theory to research and the application of theoretical models to contemporary phenomena.

Repeatability: This course may not be repeated for additional credits.

MSP 2141. Media Research. 3 Credit Hours.

This class is an introduction to research, focusing on media communication. Topics include the research process itself - identifying a research question, selecting a research method, defining terms, sampling, data collection, presentation of results - and research settings - institutional, academic, journalistic. The focus is on media research, including preproduction research, ratings and other types of audience measurement.

Repeatability: This course may not be repeated for additional credits.

MSP 2421. Media Popular Culture. 3 Credit Hours.

This course critically examines the relationship of the media to a cultural form that has been both dismissed as trivial and condemned as debasing: popular culture. Of particular interest is the media's role in the production and consumption of this cultural form. This course introduces students to some of the most important critiques of popular culture from the 20th and early 21st centuries in an effort to understand the aesthetics, politics, and economics of popular culture texts, including movies, television shows, songs, novels, magazines, comics, web pages, online videos and social media. Through these critiques, the class will trace the historical development of this cultural form in America and Europe, its relationship to high culture and folk culture, its globalization during the 20th century, and the influences on it from non-European cultural formations such as anime from Japan, Bollywood films from India, and Latin pop music from Central and South America.

Repeatability: This course may not be repeated for additional credits.

MSP 2451. The Influence of Media on Children. 3 Credit Hours.

How are children affected by the media they consume? This course will explore the key areas in which media affect children, including consumerism, violence, sexuality, representation of body image, gender, race, ethnicity, etc. The course will analyze the research on how media affects children and will include basic child development. This course will incorporate a production assignment to introduce students to production for children as an audience.

Repeatability: This course may not be repeated for additional credits.

MSP 2663. The Recording Industry and Music Business. 3 Credit Hours.

This course provides an examination of the business and legal structures of the Recording Industry in the context of the wider Music Business. The economic underpinnings and organizational configuration of the industry will be examined, along with the functioning of the various roles and job positions involved in the industry. Significant time is spent analyzing copyright law, the publishing process, and consumer trends in music consumption and purchase.

Repeatability: This course may not be repeated for additional credits.

MSP 2701. Intermediate Video Production. 4 Credit Hours.

This is an intermediate level production course in which students study the various techniques and practices involved with creating and understanding media production. Students become familiar with all of the basic aspects of television production in its three stages: pre-production, production and post-production. Student will be required to work both individually and in groups to complete various studio and field projects throughout the semester. Students will also gain an understanding of the ethical issues faced in creating such media.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 2721. Voice-Over Techniques for Media. 4 Credit Hours.

This is an intermediate course that focuses on vocal development and performance in a variety of styles. Students will work to identify their own regional accents and accents and vocal issues in others. Students will also work to create accents and characters for various projects. Students will experiment with a variety of voice-over areas such as DJ work, commercials, PSA's, podcasts for public service, anime, children's programming, and narration of books on tape.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 2741. Introduction to Internet Studies and Web Authoring. 3 Credit Hours.

The purpose of this course is to develop a deeper understanding of online media and the social, legal and cultural issues of the Internet. This is an introductory course to web design and digital media that explores the practical applications and the theoretical implications of the Internet and how it compares to "traditional" media. It examines several Internet developments and topics such as media convergence and web 2.0 applications, and explores their economic, social, and cultural implications. Students design their own web sites using web authoring software.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 2751. Audio for Media. 4 Credit Hours.

An introduction to sound design principles and recording techniques for multitrack audio production in all media production settings. As students examine design theory and technical practices, they learn the basic functioning and operation of microphones, mixing consoles, loudspeakers, digital audio workstations, and field recording devices, as well as rudimentary acoustical physics. Considerable time is also spent on critical listening skills and design aesthetics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 2889. Field Experience in Youth Media and Media Literacy. 3 Credit Hours.

This course provides students with a community learning experience helping children and teens build their communication, media production and critical thinking skills. Students spend time each week in a school or after school setting, providing assistance to teachers and students. They reflect on the role of media and technology in the lives of youth and gain experience through direct engagement with teaching, learning and exploring the creativity and skills inherent in the practice of media literacy education.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 2900. Honors MSP Special Topics. 3 Credit Hours.

Topics vary.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

MSP 3153. Media Criticism. 3 Credit Hours.

This upper level course examines the multiple ways in which media have been analyzed and critiqued by the social sciences, the humanities, and media theorists. Students are exposed to different theories about media's intellectual, cultural, and socio-economic functions in society. Students are challenged to expand their understanding of how mass media shape the way we understand our world and ourselves. The course explores issues of media's role in a democratic society, media and representation (aesthetics and "voice" as well as issues of race, ethnicity, gender, sexuality), media and violence, media and science, media and ecology, and media and consumer culture.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3196. Writing Workshop. 3 Credit Hours.

An intensive course that stresses writing fundamentals while encouraging students to express themselves in many forms of writing from blogs, to essays, to scripts and more, with a special emphasis on writing for broadcast and other forms of production. Students read their work in class, work in groups, and meet with the instructor for personal critiques.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MSP 3225. Educational Multimedia Production. 3 Credit Hours.

Examination of the educational media industry. Students create multimedia productions for education clients. Each semester, students may produce videos, websites, or online games that support the practice of teaching and learning.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 1011 and MSP 1701)

MSP 3296. Travel Writing. 3 Credit Hours.

This course explores international communication, intercultural competence, and the nature of travel (why and how we travel, and what we can learn from it) through a travel writing curriculum.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MSP 3297. History of Electronic Media. 3 Credit Hours.

Examines the origins, development and current status of electronic, mass and interpersonal media. From the invention of the telephone and the advent of radio and television to the creation of advanced digital devices and wireless systems, the course explores the media technology that changed the world and our lives. This class focuses on the social, economic, organizational, regulatory, creative and ethical issues that have challenged media practitioners, and the consumers they serve, in historical and political contexts. Students learn about the innovative figures whose manifold contributions have shaped the current media environment. The creation of content for these platforms is also covered, as well as a topical and critical look at events and issues in media history as they happen. The very notion of mass media is being redefined on a daily basis. This class is designed to help you develop the tools required for you to formulate your personal and professional vision for the future of media.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3324. The Video Game Industry and Game Culture. 3 Credit Hours.

With sales reaching in the billions, an ever-expanding market, and player demographics that span age, race, and gender, it is increasingly important to examine the intersection of communication and culture within the video game industry. This course pursues this task by introducing students to the field of Video Game Studies, exploring video games and the video game industry from its origins as a marginal entertainment medium - the pre-occupation of young males mostly - to its status today as a popular-culture phenomenon. We will discuss the theories developed in recent years to understand the impact of this new media on society, the cultures that have arisen around its consumption and production, and a critical analysis of content. During this course you will also be asked to play a game of your choosing, join/observe the online communities associated with that game, and write a term paper based on your readings and experience.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3421. Technology and Culture. 3 Credit Hours.

This course critically examines the nature, role, and significance of new communication technologies in contemporary U.S. culture. It considers how these technologies impact our ideas on work, leisure, art, knowledge, identity, and environment and thus provides a foundation for understanding the nature, role, and significance of new communication technologies as a dynamic factor in society. We will examine socio-cultural imperatives that shape the development of new information/ communication technologies in addition to the socio-cultural influences of those technologies. We will explore the nature of technology in general to understand what it is and how it is linked closely with cultural change. The course also addresses the social history of technology in terms of the philosophies, politics, and economics surrounding the creation of new technologies.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3445. Media Images and Analysis. 3 Credit Hours.

This upper division course focuses on the critical analysis of media images in society, from television programs to advertising to films to social media. Students are exposed to multiple ways of analyzing the production and consumption of media images and how these images shape our understanding of gender, identity, ethnicity, production, consumption, technology, ideology, ecology, sports, body image, and many other topics. Students are challenged to examine the role of media images in shaping the organization of society and culture, including the very nature of what we think is true, real, and desirable.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3471. Media and Cultural Differences. 3 Credit Hours.

This course critically examines the way media construct difference in a variety of ways. It introduces students to the many ways forms of difference have been analyzed in media and cultural studies. It addresses how diverse cultural groups incorporate media into their negotiation of everyday life and formation of identities. In the course, particular attention is given to the social and political implications of mainstream media representations of nationality, race, ethnicity, religion, gender, sexuality, physical ability, and class. This course also examines the ways different groups employ media technologies to construct alternative representations to those found in the mainstream commercial media.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3473. Media and the Environment. 3 Credit Hours.

This course provides students with an understanding of how people's relationship with the environment is shaped by media messages. By addressing questions of media ownership, content and global flow, the course examines how ideas and issues regarding the environment are bound and circulated through communication channels and networks in a variety of interrelated narrative and imaginistic forms. At the heart of this examination are the interplay between corporate agendas, national policies, commodity hunger, the materialism of class conflict, issues of waste management and environmental risk, and community activism. Of central interest is how historically media's representation of environmental issues have influenced public perceptions of natural resource exploitation and sustainability, and framed modern lifestyles.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3572. Communication and Development. 3 Credit Hours.

The purpose of this course is to develop an understanding of the relationship between communication and development in different political, social, and cultural settings. We will read about historical trends, economic structures, culture, and communication development models and theories in different parts of the world - Asia, Africa and Latin America, as well as in our hometown of Philadelphia.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((MSP 1021, MSP 1655, and MSP 1701) or CMST 2111)

MSP 3590. Intermediate Topics in Media. 3 or 4 Credit Hours.

Specific topic varies each semester. Please view course subtitle or consult with instructor for details.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MSP 1011, MSP 1021, and MSP 1701)

MSP 3611. Media Advertising. 3 Credit Hours.

This course is intended to provide an overview of the principles and practices of advertising in broadcast media, including psychological and creative factors, media research, rate structure, and campaign strategy. It examines advertising from the perspectives of marketing and social role of advertising, audience and consumer behavior, creative and management concepts, strategy, planning, advertising media, and effectiveness evaluation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1011.

MSP 3631. Media Sales. 3 Credit Hours.

This course introduces students to the advanced strategies of media sales and related theories. Students will learn fundamental concepts related to media buying, planning, planning tools, advertising, and problem solving research skills, measurement techniques, and audience factors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1655.

MSP 3663. Marketing Music and Media. 3 Credit Hours.

An examination of general marketing principles focusing on practices, techniques, and theories specific to media with an emphasis on music product. The use of multiple media in the music marketing process will be discussed in the context of developing and guiding an entertainment project to success, highlighting the opportunities and challenges of doing so in the digital age. Topics include publicity, promotion, the roles of radio, grass-roots efforts, social networking and other "new media" in the process of bringing entertainment products to market. Students, working in groups, will apply this theoretical knowledge in a semester-long project in which they will design a full marketing plan for a music or media product.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2663.

MSP 3701. Genres of Media Production. 4 Credit Hours.

This intermediate level production course will build on the fundamental theories and practices learned in MSP 2701. Sections will be dedicated to specific genres, and the genres covered will vary from semester to semester. Students are advised to consult the section subtitles prior to registering. NOTES: Prior to registration, students should consult the course schedule for the term in question to learn which genres are offered that term. Students may only repeat this course for credit if the genre is different from their previous enrollment and if they submit an MSP Petition Form to ensure that the credits are counted and applied correctly toward the proper major/degree requirements. The Petition Form and further details are available in the "Forms and Links" section of the Klein tab on the TUPortal.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 3705. Sound for Visual Media. 4 Credit Hours.

Students will engage in the advanced methods and systems used for optimizing the quality of audio content for distribution in visual media formats. This course focuses on the process and techniques involved in producing and finalizing the audio content of television programs, video, film or video games. Time code, synchronization, ADR, field recording and mixing are covered. Digital formats are examined in the context of audio-for-video post-production. The student will bring together all elements of sound for a final production. Once all the sound is collected and edited the student will mix down to the final format. The final project's format can be surround sound, or stereo. The final project will be presented in a professional industry standard format.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2701 or MSP 2751)

MSP 3709. Advanced Editing. 4 Credit Hours.

This course concentrates on the principles and skills of digital editing for image and sound and provides students with the critical, technical and aesthetic framework needed to create and critique polished, edited work.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 3711. Lighting For Media. 4 Credit Hours.

This intermediate-level production course will focus on media lighting techniques for a range of media including still photography, videography, and television production. From small market, low-budget production to high-end TV studio production, lighting directs attention, creates depth, and sets the mood for all visual media. The goal of this course is to strengthen students' abilities to visually enhance their media production work.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 3721. Media Performance. 4 Credit Hours.

Students will learn advanced on-camera performance techniques and get practical experience in various television performance specialties. Students will use studio, field, and computer technologies. Students will increase competencies in on-camera performance, producing, and writing for television. Students will study techniques for effective on-camera presentation and will critically evaluate themselves, their classmates, and media professionals.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 3751. Studio Music Recording Techniques. 4 Credit Hours.

This course is an in-depth examination of recording and editing techniques in a larger format Digital Audio Workstation. Emphasis is placed on running actual sessions in a variety of settings during the recording and overdubbing phases of production. Students engage in a variety of miking, editing and processing techniques for a variety of acoustic and electronic musical instruments and other sound sources. Much attention is also paid to developing best practices regarding file management, session organization and planning strategies, and developing skill in navigating the complex interpersonal interactions that are required for successful management of a creative project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2751 or MUST 4713)

MSP 3755. Live Sound Production. 4 Credit Hours.

Students will design, set up, and operate sound reinforcement systems for a variety of event settings, including small "coffeehouse" style rooms, nightclubs, and larger halls. Concepts and skills from earlier courses such as signal flow, acoustics, signal processing, microphone selection and placement, console operation, amplification, loudspeaker systems, and so on will be applied in the context of live events, planned to take place during class meeting periods.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2751 or MUST 4713)

MSP 3771. Podcast and Radio Production. 4 Credit Hours.

In all media, stories are primarily told in the sound; and large audiences will continue to desire information and entertainment content with which to engage when their eyes are otherwise occupied... we stream music while surfing the web, we listen to podcasts while cooking dinner, and listen to the radio when driving. In this course, students will apply sound design and technical skills gained in Audio for Media to the creation of podcast episodes, documentaries, news reports, and ad spots for use in radio programs and streaming services. Note: Prior to fall 2017, the course title was "Radio."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2751.

MSP 3890. Intermediate Topics in Media Production. 2 to 4 Credit Hours.

Specific topic varies each semester. Please view course subtitle or consult with instructor for details.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 4039. Senior Seminar. 3 Credit Hours.

Professional development seminar designed to prepare students to enter the media workforce. Discussions of media occupations, resume writing, organizing a job search, networking, interviewing, and job preparedness. Guest lectures.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Broadcasting/Telecom/Mass Medi, Media Studies and Production.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4182. Independent Study. 1 to 4 Credit Hour.

Available for students who wish to take on the study of a special topic that goes beyond those available through the regular curriculum of the major.

NOTE: Topic must be proposed to a MSP faculty member who will supervise the study and approved by that faculty member and the department chair.

Proposal forms are obtained through the MSP department office. May be taken once or repeatedly for up to 8 s.h.

Repeatability: This course may be repeated for additional credit.

MSP 4221. Information Technology Policy. 3 Credit Hours.

As business and everyday practices become increasingly mediated by communication and information technologies it is important that we critically examine technologies and policies that work in tandem to regulate human behavior. Policy and law form part of the social infrastructure that enables information and communication technologies to work in certain ways and prevents them from working in other. The course explores key policy and legal issues surrounding information and communication technology. These issues include privacy, digital copyright, and internet governance.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4226. Public Media. 3 Credit Hours.

In a media-saturated world filled with hundreds of cable channels, satellite radio, broadband networks and user-generated content, what is the role of public media? What role should public media play in providing educational content, if any? Should public media concern itself with entertainment and competition with commercial media-outlets? Should it be responsible for creating the "public square" of diverse voices so important for a democratic society? This course will explore the evolution of public media, from the Habermas' notion of a "public sphere," to the start of public broadcasting in the late-1960's, to its contemporary term, public media. The course will consider the original purpose of public broadcasting (as stated in the Carnegie Commission report) and debate the best purpose for its future.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4252. Law and Ethics of Digital Media. 3 Credit Hours.

This course is intended to introduce students to American law and regulation as it pertains to digital media (Internet, mobile, multimedia, satellite, digital communication). Because legal issues permeate society, it is important for potential communication professionals to understand the principles of media law, both as observers of the judicial process and as potential participants in legal matters stemming from professional activities. As the new communication technologies become more integrated into our media landscape, new legal and ethical issues are being debated and new law is made every day. Historical perspectives will be discussed, but the primary focus of the class is on the current status of communicators' legal rights and the theoretical underpinnings on which they're based. This course will help you both as citizens and as prospective media professionals.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4259. Capstone in Children's Media. 1 Credit Hour.

This course serves as the capstone for the Children's Media Certificate. The student's capstone project must reflect the learning objectives and core themes of the children's media certificate. The capstone should be a project or research that will position the student positively in their career search.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1251, (MSP 2451 or ADV 2451), and ADV 3006.

MSP 4275. #ourmedia: Community, Activist, Citizens' and Radical Media. 3 Credit Hours.

All over the world, people are taking media technologies out of the hands of corporations and using them in their own unique ways: neighbors in Germantown, Philadelphia run their own radio station; the Maori of New Zealand write, direct, and produce films and TV series that reflect their realities and dreams; young women and men in Egypt and Tunisia use social media to mobilize against authoritarian regimes; and indigenous people in rural Mexico developed their own cell phone network. This course will take you on a journey around the world, exploring indigenous media in Mexico, New Zealand and Canada; radical media in Egypt and Tunisia; citizens' media in Colombia, Chile, Brazil, and Argentina; and immigrant media in Europe and the U.S. We will consider what it means for communities to create new narratives about and for themselves, outside of dominant corporate media structures. Along the way, the course will introduce issues of production, funding, regulation, technology, and design relevant to community/alternative/citizens' media.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4390. Advanced Topics in Institution Study. 1 to 4 Credit Hour.

Specific topic; varies each semester. Please view course subtitle or consult with instructor for details.

Repeatability: This course may be repeated for additional credit.

MSP 4425. Lesbian, Gay, Bisexual and Transgender Representation in Popular Media. 3 Credit Hours.

This class investigates the history of LGBT representation in a range of popular media since the 1960s—in news, film, television, marketing, comics, video games, and on the Internet. How have LGBT people been represented in popular media? What negative—and positive—stereotypes have characterized them? How have these images changed over time in different media? How can we account for these changes? This course introduces students to some of the major debates about LGBT representation in the United States, including how gender, race, class, and economic factors shape how we understand sexuality and its representation. We will look at both mainstream and alternative media to consider the role of LGBT producers and audiences in shaping queer images. We will consider on-going debates about visibility, stereotypes, camp, and the value and limits of "positive images." The class includes a strong emphasis on independent research: students will learn how to develop and carry out an original qualitative research project throughout the semester. NOTE: To request this course to count toward the Analysis concentration or the Critical Topics in Media content area, you must submit an MSP Petition Form. The Petition Form and further details are available in the "Forms and Links" section of the Klein tab on the TUPortal.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

MSP 4446. Psychological Processing of Media. 3 Credit Hours.

This is an advanced media analysis course in which students learn about research and theory concerning the contemporary psychological significance of media and mediated experience. Topics include attention, memory, comprehension, emotional response, arousal, picture perception, unconscious processing, and person perception as they relate to traditional media (e.g., print, radio, TV, film) as well as emerging media (e.g., telepresence, teleconferencing, virtual reality, virtual worlds).

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4453. Information Society. 3 Credit Hours.

This course examines tensions, policies, issues, and theories relating to the global information society, also referred to as the knowledge society, the post-industrial society, or the post-modern society. The term "information society" points to the increasing influence of the role of information and communication technology (ICT) in our society. Students will explore the historical development of the information society, and develop a critical understanding of the contemporary debates surrounding the global information society tied to economics, ownership and regulation.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4454. Public Information Media Campaigns. 3 Credit Hours.

This is an advanced course about the use of theory and research in the design, implementation and evaluation of public information campaigns conducted via mass and other media. Students learn about key theories and research techniques regarding campaigns to affect knowledge, attitudes and behaviors on issues related to the individual and social good such as smoking, drug abuse, safe sex, recycling, animal welfare, disaster relief and many others. They then apply this knowledge by creating, conducting and evaluating a complete campaign conducted on campus.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4455. New Media Literacies. 3 Credit Hours.

Examines intersection of education and participatory culture, literacy and technology change, the knowledge gap, informal learning and knowledge communities, emerging social skills and cultural competencies.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4487. TUTV Practicum. 3 Credit Hours.

This course exposes students to a wide range of skills and protocols required to manage, sustain and grow a public, educational, commercial, broadcast or cable television station. It examines scheduling, promotion, marketing, sales, content development, rights and clearances, standards and practices, partnership management, talent management and collective bargaining agreements. Students enrolled play a key role in the operation of Temple University Television (TUTV), and will work with the course instructor, engineering staffers and others to schedule the station, produce original content (variety, sports, reality, talk, & mini-doc's, etc.), re-version existing, historically relevant programs, create station promotion, develop marketing plans, as well as interact with guests from respected local, regional and national media organizations. The class will also concentrate on managing the collateral, new media platforms that operate in association with the television service. NOTE: This course requires instructor permission to register. Students should contact the instructor directly via email, and then, if approved to register, forward that approval to msp@temple.edu at which point the MSP department will register you and send you a confirmation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 4496. Global Media. 3 Credit Hours.

This course explores questions of media ownership, content, flow, cultural values, political power and technological impact in relation to one of today's most used but least understood terms: globalization. Lectures, discussions, class activities, videos/films and course readings focus on how history (colonialism, imperialism, international relations), industrialization (industrial vs. "developing"), political systems (communism vs. democracy), economics (public vs. private) and culture (religion, language & world view) have shaped communication systems in Africa, Asia, Canada, Europe and Latin America. To do so, the course surveys media systems in industrialized, newly industrialized and developing countries and examines the interrelationship between "global culture" & local culture as related to mass media.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MSP 4497. Media and Children. 3 Credit Hours.

This is an advanced, writing intensive analysis course in which students learn about the history, economics, structure and regulation of media industries catering to a young audience and the evolving role of media in children's and families' lives. The possible effects of television, video games, comics and the Internet on children and youth are examined, including issues of gender, racial identity, violence, social learning, and consumerism.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MSP 4533. Media, Ecology and Technology. 3 Credit Hours.

Offered through Klein Global Opportunities (Klein GO!), this course is a living model for the merger of ecology, technology and the principles of sustainable design for cities. This course provides students with an understanding of the complex relations between media, ecology and technology, concentrating on the ecological impact of technology and consumer society, and how media shape our visions of nature, ecology, wilderness and technological civilization.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

MSP 4540. Advanced Topics in Media Studies and Production. 3 Credit Hours.

Topic varies.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

MSP 4541. Mobile Media. 3 Credit Hours.

Mobile technology is an increasingly important tool for modern communication. This course will take a critical exploration of the role of mobile communication in public life, in part by having students design their own mobile media. Throughout the course, we will explore the societal impact of mobile communication so that students can gain a deeper intellectual understanding of mobile communication in public life and its impact on issues such as social interaction, identity, privacy, sense of place, and surveillance. During the class examples of mobile media applications and services will be introduced. The course consists of conceptual and theoretical teachings, but also includes many practical and hands-on elements in the form of demonstrations of real-life mobile applications, conducted studies and projects. To teach preliminary practical mobile media production skills there will be exercises in mobile application concept design and in mobile application research.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4571. International Studies in Media and Communication. 1 to 6 Credit Hour.

Offered through Klein Global Opportunities (Klein GO) and taught outside of the U.S. This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. NOTE: Available only to student participating in a Klein GO! Program. For more information and an application: students should visit the Klein GO! web site at <https://temple-smcsa.terradotta.com>.

Repeatability: This course may be repeated for additional credit.

MSP 4572. British Media and Telecommunication. 3 to 6 Credit Hours.

Offered through Klein Global Opportunities (Klein GO) and taught on site in London. Students study British Mass Media and Culture while living in a city founded in 43 A.D. NOTE: Offered only through Klein GO. For more information and an application, students should visit the Klein GO web site at <https://klein.temple.edu/study-away/apply>.

Repeatability: This course may be repeated for additional credit.

MSP 4596. TV News Production Practicum - Temple Update. 4 Credit Hours.

This practicum exposes students to the skills and protocols required to conceptualize, produce and deliver television news. It is an intensive, hands-on production course simulating a newsroom operation in which students will learn to research and propose story ideas, conduct interviews, write, report and edit news stories and fill control room and studio positions including producer, director, audio, computer graphics, floor manager, studio camera operator and web producer. Students produce a weekly broadcast news show, Temple Update, created in cooperation with student volunteers. Note: Digital video editing is a skill students should know prior to taking this course. They should also be familiar with digital video cameras, tripods, and microphones for field production. Prior volunteer experience with Temple Update is strongly recommended. In addition, this course requires instructor permission to register. Students should contact the instructor directly via email, and then, if approved to register, forward that approval to msp@temple.edu at which point the MSP department will register you and send you a confirmation.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 4597. Sports Production Practicum. 4 Credit Hours.

This OwlSports Update capstone class is a specialized course for students interested in a career in the writing, producing, and directing of sports programming. The class will be structured in a similar fashion to Temple Update or Comcast SportsNet's Sportsnite. Students will create a weekly 30-minute sportscast aimed at informing viewers of important sports news, with an emphasis on the local professional and college teams, including Temple athletics. This is an intensive hands-on production course where students will experience the real-world feel of a real sports programming environment that includes researching, writing and reporting, shooting, editing, producing and directing. Students will learn, firsthand, the realities of enterprising their own stories, working a locker room, handling deadline pressure and writing in a clear and unique style specifically required to communicate effectively in the sports world. NOTE: This course requires instructor permission to register. Students should contact the instructor directly via email, and then, if approved to register, forward that approval to msp@temple.edu at which point the MSP department will register you and send you a confirmation.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 4614. Creating a Media Business. 3 Credit Hours.

This is an advanced level course that focuses on understanding the risks and rewards of starting a media-related small business. The course explores the general business strategies and tactics that are employed by successful small businesses, along with the particular requirements for creative media entrepreneurship.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4641. Programming for Multiplatform Media. 3 Credit Hours.

This course will explain the principles of programming and explore the fundamentals of scheduling content for distribution on broadcasting and cable television, video on demand, web pages, and emerging digital video platforms. We will investigate the protocols and cost of content acquisition, program placement, strategic promotions, and audience development. We will assess the influence of new audience measurement technology and qualitative research in structuring a schedule.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 4657. Current Issues in Media Management. 3 Credit Hours.

Changes in the media business, including technology, distribution, content platforms, business models, even in styles of managing people and teams require a new perspective and approach. This course combines lecture, vibrant class discussion, student presentations, personal reflection and guest speakers to explore and clarify these media business areas. The course will focus on three core questions: 1) What are the skills and behaviors reflected in successful media managers today with respect to technology, entrepreneurship, innovation, communication and content development? 2) What are your own managerial preferences & skills and how can you build upon them? 3) What is the relationship between media business trends and the changing role of the media manager?

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

MSP 4663. Art and Business of Recording. 3 Credit Hours.

An examination of the creative, business, and legal issues involved in the process of a music recording project from the perspective of the Record Producer. Students develop skills related to the understanding of music industry contracts, project budgeting and financing, copyright and publishing. Significant time is also spent analyzing current industry trends, developing leadership skills, and individual growth of a unique production style within an historical perspective.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 1701.

MSP 4682. Independent Projects. 1 to 4 Credit Hour.

Available for students who wish to create a special project that goes beyond those available through the regular curriculum of the major. Topic must be proposed to and approved by an MSP faculty member who will supervise the study. Proposal forms are obtained through the MSP department office. NOTE: Topic must be proposed to an MSP faculty member who will supervise the study and approved by that faculty member and the department chair. Proposal forms are obtained through the MSP department office. May be taken once or repeatedly for up to 8 s.h.

Repeatability: This course may be repeated for additional credit.

MSP 4687. Recording Industry Practicum. 4 Credit Hours.

An intensive, practical course that involves students in the day-to-day operation of a functioning, commercial record label. Students, working in teams by department, will be responsible for all facets of label operation: talent scouting and development, production, marketing and management of a growing catalogue. Students will be responsible for identifying musical acts for the label to feature, producing an album or EP release, and developing and delivering marketing plans, press releases, and other marketing and promotional materials as needed for both current projects and back catalogue. To serve those efforts, students will also produce a podcast series, a live music television program, and periodic live events.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 3663, MSP 3751, or STHM 3425)

MSP 4690. Advanced Topics in Organizational Management. 2 to 8 Credit Hours.

Specific topic; varies each semester. Please view course subtitle or consult with instructor for details.

Repeatability: This course may be repeated for additional credit.

MSP 4696. Communication in Media Organizations. 3 Credit Hours.

Whether managing the department of a television station or network, a broadband content site, a radio station or other media company, understanding how to work and lead within media organizations means understanding how to be an effective communicator for this unique field. This course is designed to blend the scholarship and foundational research on communication to explore communication skills within today's media organizations. It focuses on communication from leader to worker(s), from worker to leader(s), from peer to peer, within teams, inside the structures and outside. It also covers differences in communication styles and their effectiveness in large organizations, moderate and small businesses, team settings, cyber teams and when working independently. Topics include conflict resolution, managing cross-cultural workplaces, the impact of technology, online communication, emotions in the workplace, and current global trends. As an online class, work will consist of independent readings, weekly postings to a course online discussion board, online live chats, writing video commentaries, content review exams and a final project on a related topic.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MSP 4701. Producing and Directing. 4 Credit Hours.

Capstone Course in theory and practice of television producing and directing techniques. Students will pitch original project ideas and work in small groups as a production company, focusing on longform works of TV/video production and will produce a quality television program from inception to completion. Students will also engage in writing for TV, casting, and editing in order to develop a professional and creative portfolio piece.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 3701.

MSP 4703. Multimedia Production for Corporations and Non-Profits. 4 Credit Hours.

This is an advanced level production course in which students study the various techniques and practices involved in the production media for corporations and non-profit organizations. Students work through the three phases of production: pre-production, production and post-production. Students will be required to work both individually and in groups to complete video, audio, mixed media and web projects. Students may have the opportunity to produce projects for clients within the University or the community.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2701 and MSP 2741)

MSP 4741. Emergent Media Production. 4 Credit Hours.

MSP 4741 is a hands-on production studio/theory course in which students use new and emerging software and technologies to create web-based and mobile productions. The course involves lecture, discussion, demos, weekly blogs and project critiques. Mode: Hybrid (half online).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2701, MSP 2741, or MSP 2751)

MSP 4751. Audio Mixing. 4 Credit Hours.

An intensive, hands-on examination of advanced music mixing and signal processing techniques, including mix automation and preparation of files for export to various media formats. Students will create both small-format, manual analog and large-format, fully automated digital mixes of music from various genres for both stereo and multichannel surround formats.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2751 or MUST 4713)

MSP 4753. Audio Mastering. 4 Credit Hours.

Students will engage in the advanced methods and systems used for optimizing the quality of audio content for distribution in various media formats. They will study gain structure, compression, equalization and other techniques as applied to the audio mastering process. Students will gain a functional understanding of preparation of audio files that are compliant with contemporary delivery standards, optimum working levels for the various delivery methods of audio, and methods to navigate the various problems that are addressed in the mastering process. Processes of editing music, or "editing on the beat" will also be discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSP 2751 or MUST 4713)

MSP 4785. Internship. 3 or 4 Credit Hours.

Students undertake paid or unpaid internships at compatible media organizations which provide experience in an industry or business setting, increase awareness of business principles and practices and provide insight into the professional arena. Supervised by MSP Internship Directors. Goals/objectives statement, two papers, and an evaluation of the supervisor by student plus two evaluations of the intern by the site supervisor are required. NOTE: To be registered for this internship, you must apply using the MSP Verification Form. In addition, you must be an MSP major of at least junior or senior standing; have completed (with a minimum grade of C-) MSP 1021, MSP 1655, and MSP 1701; and have at least a cumulative GPA of 3.00. For further details and registration request instructions/forms, review the "MSP Internship" documents in the "Forms and Links" section of the Klein tab on the TUPortal.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Media Studies and Production.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (Complete 3 of the following: (MSP 1021 or JRN 1111), MSP 1655, and MSP 1701 or CMST 2111)

MSP 4786. Internship. 1 to 3 Credit Hour.

As an elective, students undertake paid or unpaid internships at compatible media organizations which provide experience in an industry or business setting, increase awareness of business principles and practices, and provide insight into the professional arena. Goals/objectives statement, two papers, and evaluation of the supervisor by student plus two evaluations of the intern by site supervisor are required. NOTE: To be registered for this internship, you must apply using the MSP Verification Form. In addition, you must be an MSP major of at least junior or senior standing, have completed (with a minimum grade of C-) MSP 4785, and have at least a cumulative GPA average of 3.00. For further details and registration request instructions/forms, review the "MSP Internship" documents in the "Forms and Links" section of the Klein tab on the TUPortal.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Media Studies and Production.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 4785.

MSP 4787. Television Production Workshop Practicum. 3 Credit Hours.

Students develop and produce programs ranging from weekly long-form programs that are primarily shot in the field to studio-based productions. The focus is on the production team: students pitch story ideas and the class functions as a management team, making decisions on which programs will be produced during the term. NOTE: This course requires instructor permission to register. Students should contact the instructor directly via email, and then, if approved to register, forward that approval to msp@temple.edu at which point the MSP department will register you and send you a confirmation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2701.

MSP 4796. Creative Scriptwriting. 3 Credit Hours.

This course is designed to introduce students to the fundamentals of developing and writing original scripts for television and media. The course emphasizes proper scriptwriting formats, exploration of themes, the development of story, plot, dialogue, and character development, as well as theories, methods, and practices in writing and developing original scripts.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 3196.

MSP 4887. Radio Production Practicum. 3 Credit Hours.

Provides hands-on experience in various aspects of radio operations; takes place at the WRFT Internet Radio, located at Temple's Ambler campus. Serves as a training ground for future radio journalists, producers, programmers, managers, and on-air talent. Students will work individually and in teams on various assignments. These assignments will be based in part on individual backgrounds and skill sets.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 3771.

MSP 4890. Advanced Topics in Media. 2 to 8 Credit Hours.

Specific topic; varies each semester. Please view course subtitle or consult with instructor for details.

Repeatability: This course may be repeated for additional credit.

MSP 4990. Honors Special Topics. 4 Credit Hours.

Networking and individual career guidance for honors students. Variable topics. For information on this course, contact the MSP office.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Medicine Undergraduate Courses (MEDU)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MEDU 1001. Major Breakthroughs in Biomedicine and Biotechnology. 3 Credit Hours.

Science and medicine are advancing at an ever faster rate. Fortunately, it turns out that one can keep up with this dizzying pace by following a few journals--the American general science journal *Science*, its British counterpart *Nature*, and the *New England Journal of Medicine*--along with reports of major breakthroughs from other journals as covered in the media. These discoveries have important implications not only for science and medicine, but also society, business and even culture in general. In this class first by lectures, but then by listening to podcasts, reading news stories, then commentaries and summaries of the papers, students will learn to identify and appreciate major medical and scientific advances. This is a crucial skill to have whatever field of endeavor one chooses to pursue in life.

Repeatability: This course may not be repeated for additional credits.

Middle Grades & Secondary Education (MGSE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MGSE 2111. Applications of Teaching and Learning Theories to Classroom Practice (grades 4-12). 3 Credit Hours.

This course will introduce students to the structure and philosophy of middle level schools, curriculum, and instruction by examining their relationship to aspects of young adolescent development and theories of learning. Emphasis will be placed on current understandings of how early adolescents learn and how these understandings inform instructional practices. The class will explore issues of motivating, engaging, and managing diverse, early adolescent students. NOTE: Background clearances are required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Co-requisites: EDUC 2296.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2109 (may be taken concurrently)

MGSE 2189. Classroom Interactions. 3 Credit Hours.

This course continues the process of preparing students to teach mathematics and science in upper elementary and secondary settings. The specific objectives of this course are to: 1) demonstrate to students how learning theories (from the "Knowing and Learning" course) manifest themselves in instructional settings (usually classrooms), allow students to design and implement instructional activities from their own understanding of knowing and learning mathematics and science, and evaluate the outcomes of those activities based on evidence from student artifacts, and 2) provide students with frameworks for thinking about equity issues in the classroom and larger school setting and their effects on learning and provide students with strategies for teaching diverse students equitably. The culminating activities of the course are the opportunities for students to teach in a high school and to learn whether they enjoy and are good at it. While in "Knowing and Learning" students study the meaning behind understanding a particular content area from an individual perspective, in "Classroom Interactions" the perspective shifts to studying how classroom events might promote or discourage learning mathematics and science and student equity. A major component of the "Classroom Interactions" course is the opportunity for students to reflect on and evaluate their own work as teachers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2179 (may be taken concurrently) and (SCTC 1289 or SCTC 1389)

MGSE 3196. Teaching and Learning Literacy in the Middle Grades. 3 Credit Hours.

The purpose of this writing intensive course is to prepare pre-service students to teach reading and English/language arts in the upper elementary and middle level settings. Students will be introduced to theories and current views of practice in the literacy field. The areas of language, listening, reading and writing are presented throughout this course as interrelated and integrated processes. Emphasis will be on providing pre-service teachers with the competencies to implement engaging literacy instructional practices while providing ongoing assessment for a diverse middle grades population.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3187.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MGSE 3404. Teaching and Learning Math in the Middle Grades. 3 Credit Hours.

This course examines methods of teaching and assessing mathematics in the middle grades. Special attention is paid to understanding the conceptual difficulties students have in moving from whole numbers to rational numbers, additive thinking to multiplicative thinking, and arithmetic to algebra. Problem-solving, connections, and concrete models are emphasized.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 3405. Teaching and Learning Science in the Middle Grades. 3 Credit Hours.

The purpose of this course is to prepare pre-service teachers to teach science in the upper elementary and middle-level settings. The course will be based on the "Big Ideas" in the field of science and science education and will focus heavily on scientific inquiry as a pedagogical approach and a learning goal. The Big Ideas in Biology, Chemistry, Physics and Earth/Space Sciences will be integrated into the various classes along with themes, such as motivating students, assessing and moving student's ideas toward science conceptions through inquiry, using questioning and flexible teaching methods (based on how children learn), and integrating science with other disciplines. Students will apply, evaluate, and reflect upon science teaching methods through class and lab activities, case studies, field experience assignments, and instructional technology (e.g., science web sites and videos). Assignments for the course will use the foundation fostered in the course to examine (a) science content, (b) student conceptions, (c) the meeting of theory and practice, (d) instructional resources (e.g., websites), and (e) lesson planning.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3187.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2296 and MGRE 2111.

MGSE 3466. Methods and Materials in Secondary Social Studies. 3 Credit Hours.

This course focuses on applied social studies methods; the course objectives are (1) that pre-service social studies teachers will learn about the rich resources found at museums, archives, and historic sites and (2) that they will have an opportunity to apply what they have learned in the program to developing curricular materials. There is a required field experience for which students are placed at Philadelphia area cultural institutions. Students will be developing collections and curriculum materials for schools and teachers in general and for National History Day. Class time will be devoted to strengthening and supporting the field experience.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 3796. Differentiated Literacy Instruction in the Disciplines (grades 7-12). 3 Credit Hours.

This course examines ways in which secondary teachers can support students' struggles with reading and writing in the disciplines, including Mathematics, History (Social Studies), the Sciences, Foreign Language, and English. How can we teach all students the concepts, facts, and skills that they need to do well in our discipline? What kinds of reading and writing issues can inhibit students' progress? How do we identify the kinds of difficulties that different text organizations may pose for students? What must a high school student learn to do to read and write appropriately in English, History, Science, and so on? How can we address these issues without taking time away from teaching our discipline? What kinds of reading and writing tasks can we use as resources for helping students to learn in our discipline? How do the current state and national emphases on standards and teacher accountability affect our responsibilities in the classroom? The answers to these questions have deep implications for the instructional activities that we will develop to enable all children to use reading and writing as tools for learning in our fields. This is also the Capstone Writing-Intensive Course in the Major. The course immerses you in the kinds of literate activities practiced in our profession. It examines the ways that reading and writing vary across the disciplines included in this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MGSE 4189. Project-Based Instruction. 3 Credit Hours.

Project-Based Instruction (PBI) engages learners in exploring authentic, important, and meaningful questions of real concern to students. Through a dynamic process of investigation and collaboration and using the same processes and technologies that scientists, mathematicians, and engineers use, students work in teams to formulate questions, make predictions, design investigations, collect and analyze data, make products and share ideas. Students learn fundamental science and mathematical concepts and principles that they apply to their daily lives. PBI promotes equitable and diverse participation and engages students in learning. The PBI course supports your continued development as a teacher, building on your previous courses. PBI provides opportunities for you to observe and teach in the secondary science or mathematics classroom. This course will also provide opportunities for you to generate artifacts for a professional portfolio to meet requirements for certification. This course aims to help close the research-practice gap by developing your capacity to identify and evaluate best teaching practices as presented in research literature.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999 and '100' in PRAX.

MGSE 4296. Cultures, Communities, and Families. 3 Credit Hours.

This writing intensive course seeks to help students answer the following questions: What is social studies and why do we study it? What is my place within history and/or social studies and how does this impact my instruction? How do we facilitate the study of history? When investigating these questions, students will examine how the practices of families, cultures, and communities impact teaching and learning. That is, students will discuss the influence of people, places, events, and ideas, and more specifically, look at race relations, gender, class, citizenship and democratic values, and global interdependence. From there, students will take these issues and develop units of study using the Teaching for Understanding framework.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2296 and MGSE 2111.

MGSE 4427. Curriculum and Methods of Foreign Language Education. 3 Credit Hours.

This course is focused on methods of teaching foreign languages to young learners. The course is also focused on the American Council of Foreign Language Teachers (ACTFL) proficiency guidelines and content standards. There will be a theoretical component to the course, investigating issues related to child and adolescent language learning, and how it differs from post-adolescent language learning. There will also be a very practical component to the course, in which students will have numerous opportunities to apply their learning by creating foreign language lesson units, lesson plans, and assessments for in K-8 grade language learners. There will also be a very strong assessment component to the course, focusing on how teachers can integrate authentic, formative assessments to help guide instructional planning. The overall goals of the course are to deepen students' understanding of how foreign language instruction affects child and adolescent language learning.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 4428. Innovations in Foreign Language Education. 3 Credit Hours.

This course seeks to allow foreign language teachers in training to examine methods and techniques of teaching language for communicative competence, and acquire practical knowledge of teaching. Featured are lesson and unit planning, teaching tasks, teaching strategies, materials development, teaching observations, and assessment based upon standards and learner performance guidelines. The course is also focused on the American Council of Foreign Language Teachers proficiency guidelines and Pennsylvania Department of Education World Languages content standards. The Intermediate Performance Assessment is also a focus of the course, and thus the 6 Temple University Teacher Education Program Performance Standards will be examined and applied extensively to foreign language teaching. Finally, a review of second language acquisition in relation to FL pedagogy is given. The goal of the course is to allow students to apply their pedagogical and content knowledge to a middle or high school foreign language teaching context.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 4465. Teaching for Understanding in Secondary Social Studies. 3 Credit Hours.

The purpose of this course is to develop an understanding of teaching the four major content areas of the social studies (history, geography, economics, and civics and government). The goal is to help prepare candidates to teach these areas in terms of designing curriculum and assessment; adapting strategies from the field; and considering innovative ways to teach by drawing on available resources. The course will cover the important theories of social education and the developmental course of learning history, economics, civics, geography, psychology, sociology, and anthropology.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 4641. Teaching Literature and Reading: 7-12. 3 Credit Hours.

An investigation of what texts ought to be taught in secondary schools, of how to teach them most effectively, and of the extent to which different student populations require different approaches. NOTE: As part of the course, students spend 2-3 hours each week assisting in a language arts classroom. Background Clearances are required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 4642. Teaching Written Composition: 7-12. 3 Credit Hours.

An examination of the knowledge that writers employ when they compose different kinds of texts, of the instructional contexts that are most effective in helping secondary students develop that knowledge, and of the extent to which different student populations require different approaches. NOTE: As part of the course, students spend 2-3 hours each week assisting in a language arts classroom. Background clearances are required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGSE 4801. Senior Seminar and Performance Assessment in Grades 4-12 Education. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting, and engage in activities that foster professionalism in school and community settings. The senior performance assessment, a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the student teaching semester.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MGSE 4888.

Repeatability: This course may not be repeated for additional credits.

MGSE 4888. Student Teaching in Grades 4-12. 9 Credit Hours.

The student teaching experience is the last course taken before completion of a teacher preparation program and graduation. Students are provided with an opportunity to be in a classroom for an extended period of time and to put into practice what they have learned in their Middle Grades / Secondary Education Program. Over the course of the semester, students will experience, in depth, the full role and meaning of teaching in a middle or secondary grades classroom. Experiences include planning and organizing for instruction, developing classroom teaching competencies and skills, evaluating pupil progress, participating in extra-class activities, working with special school personnel, and utilizing school and community resources in the instructional program. NOTE: Background clearances required. All coursework must be completed before taking this course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MGSE 4801.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

Middle Grades Education (MGRE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MGRE 3109. Cognitive Development in the Content Areas. 3 Credit Hours.

The primary goal of this course is to present contemporary theories and research on cognitive development that has relevance for educators of students in the middle grades. Foci include (a) theories of learning, development, motivation, expertise, and intelligence, (b) development of concepts and skills within the domains of math, science, social studies, reading, writing, (c) individual, gender, and ethnic differences in achievement; and (d) using cognitive developmental theories and research to understand learning challenges faced by special education and ELL students. By learning this information, students will gain the knowledge they need to make good instructional decisions in the middle-level classroom. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Co-requisites: MGRE 3111.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2109 (may be taken concurrently)

MGRE 3111. Applications of Learning Theory to Middle Grades Education. 3 Credit Hours.

This course will introduce students to the structure and philosophy of middle level schools, curriculum, and instruction by examining their relationship to aspects of young adolescent development and theories of learning. Emphasis will be placed on current understandings of how early adolescents learn and how these understandings inform instructional practices. Issues of motivating, engaging, and managing diverse, young adolescent students will be explored. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Co-requisites: MGRE 3109.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2109 (may be taken concurrently)

MGRE 3145. Teaching and Learning Math in the Middle Grades. 3 Credit Hours.

This course examines methods of teaching and assessing mathematics in the middle grades. Special attention is paid to understanding the conceptual difficulties students have in moving from whole numbers to rational numbers, additive thinking to multiplicative thinking, and arithmetic to algebra. Problem-solving, connections, and concrete models are emphasized.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

MGRE 3196. Teaching and Learning Literacy in the Middle Grades. 3 Credit Hours.

The purpose of this writing intensive course is to prepare pre-service students to teach reading and English/language arts in the upper elementary and middle level settings. Students will be introduced to theories and current views of practice in the literacy field. The areas of language, listening, reading and writing are presented throughout this course as interrelated and integrated processes. Emphasis will be on providing pre-service teachers with the competencies to implement engaging literacy instructional practices while providing ongoing assessment for a diverse middle grades population.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MGRE 3296, SPED 3187.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MGRE 3109 and MGRE 3111)

MGRE 3296. Cultures, Communities, and Families. 3 Credit Hours.

This course examines the ways practices of cultures, communities and families impact teaching and learning. Using the social studies disciplines and pedagogical frames, special attention is paid to the areas of multicultural and citizenship education as well as other compelling topics that influence the "public or common good" in a diverse society such as race relations, gender socialization, immigration, religious freedom, equality of economic and social opportunities as well as global interdependence.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MGRE 3196, SPED 3187.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MGRE 3109 and MGRE 3111)

MGRE 4108. Teaching and Learning Science in the Middle Grades. 3 Credit Hours.

The purpose of this course is to prepare pre-service teachers to teach science in the upper elementary and middle level settings. The course will be based on the "Big Ideas" in the field of science and science education and will focus heavily on scientific inquiry as a pedagogical approach and a learning goal. The Big Ideas in Biology, Chemistry, Physics and Earth/Space Sciences will be integrated into the various classes along with themes, such as motivating students, assessing & moving student's ideas toward science conceptions through inquiry, using questioning and flexible teaching methods (based on how children learn), and integrating science with other disciplines. Students will apply, evaluate, and reflect upon science teaching methods through class and lab activities, case studies, field experience assignments, and instructional technology (e.g., science web sites and videos). Assignments for the course will use the foundation fostered in the course to examine (a) science content, (b) student conceptions, (c) the meeting of theory and practice, (d) instructional resources (e.g., websites), and (e) lesson planning.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 4109.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MGRE 3109 and MGRE 3111)

MGRE 4801. Senior Seminar and Performance Assessment in Middle Grades Education. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting, and engage in activities that foster professionalism in school and community settings. The senior performance assessment, a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the student teaching semester.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MGRE 4888.

Repeatability: This course may not be repeated for additional credits.

MGRE 4888. Student Teaching in the Middle Grades. 9 Credit Hours.

The student teaching experience is the last course taken before completion of a teacher preparation program and graduation. Students are provided with an opportunity to be in a classroom for an extended period of time and to put into practice what they have learned in their Middle Grades Program. Over the course of the semester, students will experience, in depth, the full role and meaning of teaching in a middle grades classroom. Experiences include planning and organizing for instruction, developing classroom teaching competencies and skills, evaluating pupil progress, participating in extra-class activities, working with special school personnel, and utilizing school and community resources in the instructional program. NOTE: Background clearances required. All coursework must be completed before taking this course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MGRE 4801.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

Military Science - Army ROTC (MLSC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MLSC 1001. Introduction to Military Science I. 1 Credit Hour.

This course introduces the roles and mission of the Army, Army customs and traditions, and the personal challenges and competencies that are critical for effective leadership. You will learn how the personal development of life skills such as goal setting, time management, physical fitness and stress management relate to leadership, officership and the Army profession. The focus is on developing basic knowledge and comprehension of Army leadership dimensions while gaining a big picture understanding of the ROTC program, its purpose in the Army, and its advantages for the student. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students must participate in one weekend exercise. Leadership lab (MLSC 4003) is required for Army ROTC students.

Repeatability: This course may not be repeated for additional credits.

MLSC 1002. Introduction to Military Science II. 1 Credit Hour.

This course introduces cadets to the Army tactical concepts such as map reading, land navigation, marksmanship, small unit tactics and general operations. It also focuses on the Army Leadership model and explores these dimensions in more detail. Cadets will focus on basic knowledge and skills needed for personal leadership competence in the Army. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students must participate in one weekend exercise. Leadership lab (MLSC 4003) is required for Army ROTC students.

Repeatability: This course may not be repeated for additional credits.

MLSC 2001. Small Unit Operations and Leadership I. 1 Credit Hour.

This course examines leadership fundamentals and the application of leadership principles in both theory and practice. Historical examples of military leadership are used as case studies. Emphasis is on the formulation of military values, principles and leadership styles. It explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership framework. The focus continues to build on developing knowledge of the leadership values and attributes through understanding Army rank, structure and duties as well as broadening knowledge of land navigation and squad tactics. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students participate in one weekend field exercise. Leadership lab (MLSC 4003) is required for Army ROTC students.

Repeatability: This course may not be repeated for additional credits.

MLSC 2002. Small Unit Operations and Leadership II. 1 Credit Hour.

This course focuses on how to build teams, how to influence, how to communicate, how and when to make decisions, how to engage in problem solving, and how to plan and organize. This instruction will be conducted simultaneously with the leadership development instruction and will consist of physical fitness and training, giving military briefings, map reading and land navigation, duty positions, squad formations, battle drills, troop leading procedures, and operations orders. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students participate in one weekend field exercise. Leadership lab (MLSC 4003) is required for Army ROTC students.

Repeatability: This course may not be repeated for additional credits.

MLSC 3001. Applied Leadership and Management I. 2 Credit Hours.

You are challenged to study, practice and evaluate adaptive team leadership skills as you are presented with the demands of the ROTC Leader Development and Assessment Course (LDAC). Challenging scenarios related to small unit tactical operations are used to develop self-awareness and critical thinking skills. Classroom discussion will focus on land navigation, military orders, troop leading procedures and advanced small unit tactics. Classroom discussion is then applied during military leadership laboratories, which the cadets plan and conduct. Cadets will have their leadership potential assessed while they rotate through platoon leadership positions. The first course in our Advanced Course, this is also one of four semesters of coursework essential to earning a commission as an Army Officer. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students participate in one weekend field exercise. Leadership lab (MLSC 4003) is required for Army ROTC students. Credits will count toward GenEd or General Electives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in MLSC 2002 (may be taken concurrently)

MLSC 3002. Applied Leadership and Management II. 2 Credit Hours.

MLSC 3002 uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading and motivating team members when "under fire" are explored, evaluated, and developed. Aspects of military operations are reviewed as a means of preparing for the ROTC Leader Development and Assessment Course (LDAC). Cadets are expected to apply basic principles of the Law of Land Warfare, Army training, and motivation to troop leading procedures. Emphasis is also placed on conducting military briefings and developing proficiency in Garrison operation orders. MLSC 3002 Cadets are evaluated on what they know and do as leaders. At the completion of this course Cadets have completed half of the minimum coursework needed for a commission and are prepared for their 30 day attendance at the Leadership Development and Assessment Camp (LDAC) during the summer of their junior year. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students participate in one weekend field exercise. Leadership lab (MLSC 4003) is required for Army ROTC students. Credits will count toward GenEd or General Electives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MLSC 3001 (may be taken concurrently) or 'Y' in CRML02)

MLSC 4001. Advanced Leadership and Management I. 2 Credit Hours.

MLSC 4001 develops student proficiency in planning, executing, and assessing complex operations, functioning as a member of a staff, and providing performance feedback to subordinates. You are given situational opportunities to assess risk, make ethical decisions, and lead fellow ROTC Cadets. Lessons on military justice and personnel processes prepare you to make the transition to becoming an Army officer. During your Military Science Level IV year you will lead Cadets at lower levels. Both your classroom and battalion leadership experiences are designed to prepare you for your first unit of assignment. You will identify responsibilities of key staff, coordinate staff roles, and use battalion operations situations to teach, train, and develop subordinates. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students participate in one weekend field exercise. Leadership lab (MLSC 4003) is required for Army ROTC students. Credits will count towards GenEd or General Electives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MLSC 3002 (may be taken concurrently) or 'Y' in CRML01)

MLSC 4002. Advanced Leadership and Management II. 2 Credit Hours.

MLSC 4002 explores the dynamics of leading in the complex situations of current military operations in the contemporary operating environment (COE). Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. They also explore aspects of interacting with non-government organizations, civilians on the battlefield, and host nation support. The course places significant emphasis on preparing Cadets for their first unit of assignment. It uses case studies, scenarios, and "What Now, Lieutenant?" exercises to prepare Cadets to face the complex ethical and practical demands of leading as commissioned officers in the United States Army. This course is designed in coordination with MLSC 4001 to complete your Cadet pre-commissioning training and education as required in the Army's Basic Officer Leadership Course Phase I (BOLC I) in order to ensure your success at BOLC Phases II and III. Cadets enrolled in this course will gain practical leadership experience in positions of responsibility as they plan, coordinate, execute and evaluate Army ROTC activities. While this class is available for open enrollment, students that have formally contracted into the ROTC program must maintain a minimum aggregate GPA of 2.0. Contracted Cadets failing to maintain a minimum aggregate GPA of 2.0 in all Military Science courses are subject to adverse action or dismissal from the program. Contracted Cadets who do not earn at least a C grade in a Military Science course must gain approval from the instructor to register for additional Military Science courses. Students registering for courses for which they have previously received academic credit are advised that repeat courses will not result in additional academic credit. NOTE: Students participate in one weekend field exercise. Leadership lab (MLSC 4003) is required for Army ROTC students. Credits will count toward GenEd or General Electives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in MLSC 4001 (may be taken concurrently)

MLSC 4003. Leadership Lab. 0 Credit Hours.

Leadership lab is required for Army ROTC students. Students perform hands on training in drill and ceremonies, field craft, individual movement techniques, squad tactics, map reading and land navigation, first aid, and other basic military activities.

Repeatability: This course may be repeated for additional credit.

Music (MUSC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MUSC 1000. Recital/Concert Credit. 0 Credit Hours.

College recital and concert attendance requirement. Of the eight required recitals attended, one must be an official Boyer College World Music Recital or Multicultural Music Lecture-Performance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 1201. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1202. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1201.

MUSC 1203. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1204. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1203.

MUSC 1211. Voice Class. 1 Credit Hour.

Voice class for music majors as specified for curriculum. NOTE: Class meets two hours per week.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1212. Voice Class. 1 Credit Hour.

Voice class for music majors as specified for curriculum. NOTE: Class meets two hours per week.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1211.

MUSC 1223. Class Voice for Non-Majors I. 1 Credit Hour.

Voice class for non-music majors. NOTE: Class meets two hours per week.

Repeatability: This course may be repeated for additional credit.

MUSC 1224. Class Voice for Non-Majors II. 1 Credit Hour.

Voice class for non-music majors. NOTE: Class meets two hours per week.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 1223.

MUSC 1225. English Diction. 1 Credit Hour.

Diction for singing in the English language. Introduction to the International Phonetic Alphabet. NOTE: Singing is required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1226. German Diction. 1 Credit Hour.

Diction for singing in the German language. Introduction to the International Phonetic Alphabet. NOTE: Singing is required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1227. Italian Diction. 1 Credit Hour.

Diction for singing in the Italian language. Introduction to the International Phonetic Alphabet. NOTE: Singing is required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1228. French Diction. 1 Credit Hour.

Diction for singing in the French language. NOTE: Singing is required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1256. Private Voice for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Section 001 - Classical only; Section 002 - Jazz only. Additional fee required.

Repeatability: This course may be repeated for additional credit.

MUSC 1257. Private Voice for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Section 001 - Classical only; Section 002 - Jazz only. Additional fee required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 1256.

MUSC 1258. Private Voice for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Section 001 - Classical only; Section 002 - Jazz only. Additional fee required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 1257.

MUSC 1259. Private Voice for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Section 001 - Classical only; Section 002 - Jazz only. Additional fee required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 1258.

MUSC 1401. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1402. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1401.

MUSC 1403. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1404. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1403.

MUSC 1405. Secondary Piano for Music Majors. 1 Credit Hour.

Fulfills piano requirements for students in programs of study other than piano major or piano concentration.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1406. Secondary Piano for Music Majors. 1 Credit Hour.

Fulfills piano requirements for students in programs of study other than piano major or piano concentration.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1405.

MUSC 1407. Piano for Non-Music Majors I. 1 Credit Hour.

For the beginner. Instruction in groups (piano laboratory). Chords, transposition, sight reading, improvisation, elementary jazz, ensemble playing.

Repeatability: This course may not be repeated for additional credits.

MUSC 1408. Piano for Non-Music Majors II. 1 Credit Hour.

A sequel to Music 1407 (0030) with increased emphasis on playing by ear, development of technique, repertoire, improvisation, and ensemble playing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1407.

MUSC 1411. Private Piano for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Lab fee required.

Repeatability: This course may be repeated for additional credit.

MUSC 1412. Private Piano for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Lab fee required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 1411.

MUSC 1415. Introduction to Piano Pedagogy. 2 Credit Hours.

A general survey course. Key practical and pedagogical aspects of the piano teaching profession.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1428. Accompanying and Piano Ensemble. 1 Credit Hour.

Training in both vocal and instrumental accompanying; two-piano and four-hand repertory. Senior piano majors should accompany two recitals per semester. NOTE: This class is for all applied piano majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 1429. Accompanying and Piano Ensemble. 1 Credit Hour.

Training in both vocal and instrumental accompanying, two-piano and four-hand repertory. Senior piano majors should accompany two recitals per semester. NOTE: This class is for all applied piano majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 1446. Private Keyboard for Music Majors. 1 Credit Hour.

Private keyboard instruction.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1447. Private Keyboard for Music Majors. 1 Credit Hour.

Private keyboard instruction.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1446.

MUSC 1448. Private Keyboard for Music Majors. 1 Credit Hour.

Private keyboard instruction.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1447.

MUSC 1449. Private Keyboard for Music Majors. 1 Credit Hour.

Private keyboard instruction.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1448.

MUSC 1501. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1502. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1501.

MUSC 1503. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

Repeatability: This course may not be repeated for additional credits.

MUSC 1504. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1503.

MUSC 1529. Guitar for Non-Music Majors. 1 Credit Hour.

For beginning guitarists. Students will develop functional guitar skills for playing songs, including: basic chords, picking and strumming methods, and understanding the musical elements needed to play from a song sheet.

Repeatability: This course may not be repeated for additional credits.

MUSC 1531. Guitar for Non-Music Majors II. 1 Credit Hour.

This course is designed for students who have successfully completed MUSC 1529 or already have a basic proficiency on the instrument. Students will continue to develop guitar skills for playing songs and solo guitar pieces with an emphasis on right hand finger style technique (section 001) or plectrum technique (section 002). Reading standard musical notation for the guitar as well as chord tablature will be included. Some introductory elements of music theory will be introduced.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1529.

MUSC 1603. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 1604. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1603.

MUSC 1764. Popular Music and Social Change in the United States. 3 Credit Hours.

Popular music has become a defining feature of modern cultural existence. Not only do people listen (how could we avoid it if we even wanted to?) but we also engage in heated debates about controversies in this music. Why are people angry about Miley Cyrus and Iggy Azalea's performances of black musical styles? Is Kanye West a compelling presidential candidate? Why was the first Billboard topping hip hop album by a white group? How has country music become so important to patriotism and why does it focus on white performers? Why do artists like Beyoncé and Lady Gaga draw heated debates from both feminists and also sexists? In this course we will explore what these conversations reveal about our values and the social, economic, and technological forces shaping our lives. We will engage with songs; we'll read selections from journalism, artists' autobiographies, and scholarship; you'll observe a concert of your choice and interview a listener of your choice; and you will craft a playlist about a social issue that's important to you. In the process, you'll learn ways to approach these materials critically and engage with the tension between listener expectations of authenticity from our favorite musicians and the music industry's desire to make as much money as possible. The materials span several genres of music listened to in the United States in the last 100 years. No musical experience is required. The course will include short writing and creative assignments, a midterm, and a final exam.

Repeatability: This course may not be repeated for additional credits.

MUSC 2123. Class Voice for Non-Majors: Jazz. 1 Credit Hour.

Introduction to the concepts and techniques of modern vocal jazz culminating in the application and demonstration of skills including various scales, melodies, and improvisational techniques utilized in the standard jazz repertoire.

Repeatability: This course may be repeated for additional credit.

MUSC 2124. Class Voice for Non-Majors: Jazz. 1 Credit Hour.

Development of the concepts and techniques of modern vocal jazz culminating in the application and demonstration of skills including various scales, melodies, and improvisational techniques utilized in the standard vocal jazz repertoire.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 2123.

MUSC 2133. Class Guitar for Non-Majors: Jazz. 1 Credit Hour.

Introduction of concepts and techniques of modern jazz guitar culminating in the application and demonstration of fundamental skills including various scales, melodies, harmonic progressions, and improvisation found in the standard jazz guitar repertoire.

Repeatability: This course may be repeated for additional credit.

MUSC 2134. Class Guitar for Non-Majors: Jazz. 1 Credit Hour.

Further development of concepts and techniques of modern jazz guitar culminating in the application and demonstration of skills including various scales, melodies, harmonic progressions, and improvisation found in the standard jazz guitar repertoire.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 2133.

MUSC 2143. Class Piano for Non-Majors: Jazz. 1 Credit Hour.

Introduction of concepts and techniques of modern jazz on the piano culminating in the application and demonstration of fundamental jazz piano skills including various scales, melodies, improvisation, and harmonic progressions found in the standard repertoire.

Repeatability: This course may be repeated for additional credit.

MUSC 2144. Class Piano for Non-Majors: Jazz. 1 Credit Hour.

Further development of the concepts and techniques of modern jazz piano culminating in the application and demonstration of skills including various scales, melodies, harmonic progressions, and improvisational techniques utilized in the standard jazz repertoire.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 2143.

MUSC 2201. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1202.

MUSC 2202. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2201.

MUSC 2203. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1204.

MUSC 2204. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2203.

MUSC 2211. Voice Class. 1 Credit Hour.

Voice class for music majors as specified for curriculum. NOTE: Class meets two hours per week.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1212.

MUSC 2212. Voice Class. 1 Credit Hour.

Voice class for music majors as specified for curriculum. NOTE: Class meets two hours per week.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2211.

MUSC 2323. Basic Conducting. 1 Credit Hour.

Fundamentals of conducting technique for both choral and instrumental organizations; musical terminology; basic conducting patterns, etc. NOTE: Although the conducting course sequence [Music 2323 (0123), Music 2324 (0124), Music 4323 (0330)] is intended primarily for music majors, it is possible for other students to enroll if they have evidence of a background in music theory. Non-music majors must obtain permission from the instructor before they register for a conducting class.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1711.

MUSC 2324. Conducting Intermediate. 1 Credit Hour.

Further development of conducting techniques including irregular and changing meters; involvement with more complex scores emphasizing interpretive conducting and stylistic awareness.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2323.

MUSC 2401. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1402.

MUSC 2402. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2401.

MUSC 2403. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1404.

MUSC 2404. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2403.

MUSC 2405. Secondary Piano for Music Majors. 1 Credit Hour.

Fulfills piano requirements for students in programs of study other than piano major or piano concentration.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1406.

MUSC 2406. Secondary Piano for Music Majors. 1 Credit Hour.

Fulfills piano requirements for students in programs of study other than piano major or piano concentration.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2405.

MUSC 2407. Piano for Non-Music Majors III. 1 Credit Hour.

A continuation of class piano study in small groups.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1408.

MUSC 2408. Piano for Non-Music Majors IV. 1 Credit Hour.

A continuation of class piano study in small groups.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2407.

MUSC 2411. Private Piano for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Lab fee required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1412.

MUSC 2412. Private Piano for Non-Music Majors. 1 Credit Hour.

Individual half-hour private lesson for students outside the College of Music who have reached at least an intermediate level of achievement. NOTE: Lab fee required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2411.

MUSC 2415. Pedagogy of Technique. 2 Credit Hours.

Various technical approaches developed since the 18th century. Pedagogical schools will be examined and students will have an opportunity to test their abilities through the actual teaching of technique to peers.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 2416. Creative Activities for the Piano Teacher. 2 Credit Hours.

Objectives include the encouragement of keyboard exploration at various levels of development through a multitude of musical activities and games, devised by the members of the class; translation from theory to practical procedures.

Repeatability: This course may not be repeated for additional credits.

MUSC 2500. Collegiate Band Lesson. 1 Credit Hour.

Supplemental instruction for non-music major, Collegiate Band participants.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 3510.

MUSC 2501. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1502.

MUSC 2502. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2501.

MUSC 2503. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1504.

MUSC 2504. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2503.

MUSC 2603. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1604.

MUSC 2604. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2603.

MUSC 3100. Small Jazz Ensemble. 1 Credit Hour.

Various workshops may be offered focusing on rhythm sections, brass, saxophone, guitar, percussion, bass, and vocalizing.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3110. Large Jazz Ensemble. 1 Credit Hour.

Emphasis on reading and stylization. Arrangements are used. NOTE: Weekly rehearsals.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3120. Vocal Jazz Ensemble. 1 Credit Hour.

Performing group with a focus on new and standard jazz literature for large ensemble made up primarily of vocalists with a small accompanying group. This course will provide regular and consistent exposure to and experience with standard and new vocal jazz literature.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Studies.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Jazz Studies Performance.

Repeatability: This course may be repeated for additional credit.

MUSC 3201. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2202.

MUSC 3202. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3201.

MUSC 3203. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2204.

MUSC 3204. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3203.

MUSC 3231. Musical Theater Scene Study. 2 Credit Hours.

Practical work in the application of performance techniques to specific scenes from the American Musical Theater provides further development for the student of Musical Theater. Vocal and acting skills are combined with the development of character in musical play scene-work including both song and dialogue. Students spend the semester in collaboration with fellow students on notable and challenging scenes from the musical theater.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

MUSC 3232. Musical Theater Voice & Acting. 2 Credit Hours.

Practical work in the application of performance techniques to specific songs from the American Musical Theater of the first half of the 20th century. The incorporation of truthful acting with attention to given circumstances and objectives is blended with principles of healthy, supported singing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

MUSC 3251. Applied Lesson - Vocal. 2 to 4 Credit Hours.

Additional applied voice lesson for music students. NOTE: Additional private lesson fee.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3267. Vocal Repertoire. 2 Credit Hours.

A survey of solo vocal literature of various periods and styles. Performance and analysis.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3268. Vocal Repertoire. 2 Credit Hours.

A survey of solo vocal literature of various periods and styles. Performance and analysis.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3300. Choral Ensemble. 0 or 1 Credit Hours.

Performance of standard choral literature. At least one public performance per semester. NOTE: This ensemble is available to any undergraduate or graduate student enrolled in the University.

Repeatability: This course may be repeated for additional credit.

MUSC 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

MUSC 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

MUSC 3401. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2402.

MUSC 3402. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3401.

MUSC 3403. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2404.

MUSC 3404. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3403.

MUSC 3405. Secondary Piano for Music Majors. 1 Credit Hour.

Fulfills piano requirements for students in programs of study other than piano major or piano concentration.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2406.

MUSC 3406. Secondary Piano for Music Majors. 1 Credit Hour.

Fulfills piano requirements for students in programs of study other than piano major or piano concentration.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3405.

MUSC 3415. Pedagogy of Children. 2 Credit Hours.

A survey of available teaching methods and pedagogical approaches to be used with children in individual or group instruction, including an introduction to the basic Suzuki philosophy.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3416. Pedagogy of the College Non-Music Major. 2 Credit Hours.

Designed to prepare pianists to teach college students who are not music majors, either in groups or privately, by providing them with methods and materials of instruction, and understanding of group dynamics, and techniques for eliciting creative activities. NOTE: One hour practice teaching required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3421. Suzuki for Pianists. 2 Credit Hours.

For experienced piano teachers as well as college-level piano students seeking in-depth knowledge of the Suzuki method.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3422. Keyboard Literature. 3 Credit Hours.

A survey of keyboard literature of various periods and styles. Performance and analysis.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3423. Keyboard Literature. 3 Credit Hours.

A survey of keyboard literature of various periods and styles. Performance and analysis.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3443. Listening & Learning Skills for Pianists I. 3 Credit Hours.

Basic techniques to improve sight reading, learning facility, and aural/tactile relationships at the keyboard.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3444. Listening & Learning Skills for Pianists II. 3 Credit Hours.

Advanced techniques to improve sight reading, learning facility, and aural/tactile relationships at the keyboard.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3451. Applied Lesson - Keyboard. 2 to 4 Credit Hours.

Additional applied keyboard lesson for music students. NOTE: Additional private lesson fee.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3500. Collegiate Band. 0 to 1 Credit Hours.

Performance in all-University concert band.

Repeatability: This course may be repeated for additional credit.

MUSC 3501. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2502.

MUSC 3502. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3501.

MUSC 3503. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Weekly instrumental private lesson with major teacher. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations. NOTE: This course is for majors only.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2504.

MUSC 3504. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Weekly instrumental private lesson with major teacher. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations. NOTE: This course is for majors only.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3503.

MUSC 3510. Marching Band. 0 or 1 Credit Hours.

Performance in Temple University Marching Band at home university football games, select away trips, and other special events. NOTE: Attendance at pre-season band camp one week prior to the beginning of classes is required.

Repeatability: This course may be repeated for additional credit.

MUSC 3551. Applied Lesson - Instrumental. 2 to 4 Credit Hours.

Additional applied instrumental lessons for music students. NOTE: Additional private lesson fee.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3561. Multi-Percussion in Orchestra. 1 to 2 Credit Hour.

Course will enable students to develop the complex skills necessary to perform multi-percussion and drum set parts in the symphony orchestra.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 3571. International Exchange Applied Instrumental Lesson. 2 to 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to International Exchange students. Students are required to perform outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

Repeatability: This course may be repeated for additional credit.

MUSC 3572. International Exchange Applied Voice Lesson. 2 to 4 Credit Hours.

Weekly voice private lesson with major teacher. Open only to International Exchange students. Students are required to perform outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

Repeatability: This course may be repeated for additional credit.

MUSC 3573. International Exchange Large Ensemble. 1 Credit Hour.

Large ensemble with scheduled rehearsals and public performances. May include: symphony orchestra, wind symphony, symphonic band, choral ensembles, jazz band, and jazz lab band.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3574. International Exchange Small Ensemble. 1 Credit Hour.

Small ensembles with scheduled rehearsals and public performances. May include: chamber ensembles, percussion ensemble, new music ensemble, choral ensembles, and jazz ensembles.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3579. Orchestra Audition Prep. 1 Credit Hour.

Analysis of standard orchestral repertoire with emphasis upon the development of audition strategies and techniques.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3582. Independent Study. 1 to 4 Credit Hour.

The area of concentration may be selected by the student with the approval of his or her supervising teacher and the Associate Dean.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 3603. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2604.

MUSC 3604. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3403.

MUSC 3611. Harpsichord for Pianists. 3 Credit Hours.

A practical introduction to performance on the harpsichord for pianists with little or no experience with historical keyboards. Topics include history, technique and repertoire from ca. 1500-present.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Performance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4120. Special Topics. 1 to 4 Credit Hour.

Performance or scholarship-based topics with an emphasis upon advanced analysis and execution.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4152. Swing Owls Campus Community Jazz Band. 1 Credit Hour.

The Swing Owls is a jazz band comprised of Temple University students (majors and non-majors) and members of the Greater Philadelphia Community. No audition is required for membership. The ensemble meets one evening per week, totaling two hours of rehearsal, and performs a concert at the end of each semester. NOTE: Ability to read music is required; personally owned instrument or rental needed.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

MUSC 4201. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3202.

MUSC 4202. Voice Concentration. 2 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 4201.

MUSC 4203. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3204.

MUSC 4210. Opera Ensemble. 0 or 1 Credit Hours.

Required for singers cast in Temple University Opera Theater productions.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Vocal Arts.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4223. Vocal Coaching. 1 Credit Hour.

Emphasis on style, diction, phrasing, and performance traditions. Preparation for senior recital. NOTE: Open only to Voice Majors. One hour per week.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4224. Vocal Coaching. 1 Credit Hour.

Emphasis on style, diction, phrasing, and performance traditions. Preparation for senior recital. NOTE: Open only to Voice Majors. One hour per week.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 4223.

MUSC 4225. Vocal Pedagogy. 2 Credit Hours.

Basic principles and techniques of training the solo voice. NOTE: Open only to Voice Majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4226. Diction Skills. 1 Credit Hour.

Study of the phonetic rules and sounds of the classical pronunciations of Italian and French as found in Art Song and Opera. The International Phonetic Alphabet is utilized. NOTE: Singing is required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4227. Diction Skills. 1 Credit Hour.

Study of the phonetic rules and sounds of the classical pronunciations of French, Latin and German as found in Art Song and Opera. The International Phonetic Alphabet is utilized. NOTE: Singing is required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 4226.

MUSC 4228. Opera Workshop. 3 Credit Hours.

Opera Workshop is designed to give singers the opportunity to develop and refine singing/acting skills through the study of operatic literature. NOTE: Open only to Voice Majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4229. Opera Workshop. 2 Credit Hours.

Opera Workshop is designed to give singers the opportunity to develop and refine singing/acting skills through the study of operatic literature. NOTE: Open only to Voice Majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 4228.

MUSC 4233. Musical Theater: Dress Rehearsal. 2 Credit Hours.

The Musical Theater Concentration culminates in MUSC 4233, an intensive audition and performance seminar specially designed to prepare students for the rigorous demands of auditioning for and performing in professional musical theater. Throughout the semester, visiting guest professionals from Philadelphia and New York City provide valuable insight into the realities of acting in the musical theater as a profession.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

MUSC 4258. Performing Musical Theater. 2 Credit Hours.

Music Theater Performance Class offers the student the opportunity to develop and refine singing/acting skills through the preparation and presentation of solos, duets, ensembles and dialogues from American Music Theater repertoire.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4284. Voice Major. 3 Credit Hours.

Weekly private lesson and voice class with major teacher. Recital, partial or full, only with recommendation of voice faculty.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 4203.

MUSC 4296. Vocal Pedagogy. 3 Credit Hours.

Basic principles and techniques of training the solo voice with related writing assignments. NOTE: This is a writing-intensive course.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Voice & Opera.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3204.

MUSC 4300. Concert Choir. 0 to 1 Credit Hours.

Auditions are held during the final week of fall semester for the spring semester, and at the end of spring semester and during August for fall semester. Auditions will be granted based on previous choral experience. Performance of a wide range of choral literature. NOTE: Active performance schedule on and off campus. Contact the office manager at 215-204-8304 for specific audition dates.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4310. Graduate Conductors Choir. 0 to 1 Credit Hours.

Two hours of rehearsal each week; two performances each semester.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Co-requisites: MUSC 4300.

Repeatability: This course may be repeated for additional credit.

MUSC 4323. Conducting (Choral). 2 Credit Hours.

Problems correlating vocal and choral idioms; analysis and interpretation of choral literature appropriate for use in school and community. NOTE: Although the conducting course sequence [Music 2323 (0123), Music 2324 (0124), Music 4323 (0330)] is intended primarily for music majors, it is possible for other students to enroll if they have evidence of a background in music theory.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2324.

MUSC 4324. Conducting (Instrumental). 2 Credit Hours.

Advanced instrumental conducting techniques including asymmetrical time patterns, multi-meters, phrasing and rehearsal techniques. Instrumental score study and preparation. Conducting of band and orchestra repertoire of varying levels of difficulty with ensembles.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 2324.

MUSC 4352. Singing Owls Campus/Community Choir. 0 to 1 Credit Hours.

The Singing Owls is a chorus comprised of Temple University students and members of the Greater Philadelphia community, and is open to all without audition. The ensemble rehearses once weekly and performs once per semester. Repertoire is varied and diverse. Members may elect to participate for Temple University academic credit or pay a nominal fee to join as a community member.

Repeatability: This course may be repeated for additional credit.

MUSC 4353. Teaching Choral Music. 2 Credit Hours.

For the prospective teacher of vocal music; practical solutions to problems of audition procedures, development of musical skills within the choral rehearsal, repertoire and programming, voice classes, performance planning and execution, the changing voice, etc. NOTE: Required of music education majors with concentrations in voice and keyboard instruments.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 4323.

MUSC 4401. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3402.

MUSC 4402. Piano Concentration. 2 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. With instructor's permission, student may present either half or full senior recital.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 4401.

MUSC 4403. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3404.

MUSC 4431. Introduction to the Alexander Technique. 1 Credit Hour.

This course offers a basic understanding of the history and principles of the Alexander Technique. It is designed to enable the student to enhance expression and performance skills, prevent injuries, and develop healthy practice and rehearsal techniques. The technique offers a practical solution to on-going issues with pain and fatigue, effective expression and intonation, breath support and stage presence. The principles can be applied to all areas of creative expression, from instrumental, vocal and dance technique, to acting, writing, painting and sculpting.

Repeatability: This course may not be repeated for additional credits.

MUSC 4484. Piano Major. 4 Credit Hours.

Weekly private lesson and regularly scheduled master classes with major teacher. Culminates in full recital during final semester of study. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 4403.

MUSC 4500. Instrumental Ensemble. 1 Credit Hour.

Large or small instrumental ensemble. Ensemble may include symphony orchestra, wind symphony, chamber music ensembles, percussion ensemble, brass ensembles, and other small instrumental ensembles.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4501. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher for music education/jazz and jazz arranging curricula.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3502.

MUSC 4502. Instrumental Concentration. 2 Credit Hours.

Weekly instrumental private lesson with major teacher for music education/jazz and jazz arranging curricula. With instructor's permission, student may present either half or full recital during this final semester of study.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 4501.

MUSC 4503. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Weekly instrumental private lesson with major teacher. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses or obligations. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3504.

MUSC 4510. Instrumental Ensemble. 1 Credit Hour.

Large or small instrumental ensemble. Ensemble may include symphony orchestra, wind symphony, chamber music ensembles, percussion ensemble, brass ensembles, and other small instrumental ensembles.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4520. Ensemble. 1 Credit Hour.

For students performing in more than two ensembles with the same number or of the same type. Could be a large or small ensemble.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4521. Large Ensemble. 1 Credit Hour.

Large instrumental or vocal ensemble. Ensemble may include symphony orchestra, wind symphony, percussion ensemble, brass ensembles, musical theater orchestra, and choir.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4539. Instrumental Conducting Seminar: Score Analysis, Programming & Interpretation of Wind Ensemble Lit. 2 Credit Hours.

Focus on score study, programming, rehearsal techniques and advancement of personal interpretation specifically related to the wind ensemble and its literature.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MUSC 4323 or MUSC 4324)

MUSC 4541. History of Wind & Brass Chamber Music. 2 Credit Hours.

Traces the development of small wind and brass chamber ensembles from circa 1000 to the present. Examines quintets, the Vienna octet school, harmoniemusik, and works for various combinations of instruments with emphasis on their literature.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4544. Wind Repertory in History: European Antiquity through the 21st Century. 2 Credit Hours.

This course will survey the development and repertory of wind-band music from European Antiquity through the present day. Course topics will include the examination and analysis of the development of instruments, cornerstone pieces in each period, performance practice considerations, commissioning projects, current state of wind-band performance opportunities, varied styles of concert programming, audio identification, and developing strategies to determine quality repertory for the medium.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MUSC 3201, MUSC 3203, MUSC 3401, MUSC 3403, MUSC 3501, or MUSC 3503)

MUSC 4552. Samba Owls. 1 Credit Hour.

A fun, high-energy musical ensemble exploring the rhythms, sounds, and movement of Brazil's samba schools. Participants will learn actively as a performing member of a *batucada*, the traditional percussion ensemble of the samba groups. Students are involved in rhythm, drumming, movement, and singing/vocalization. There are no musical prerequisites - anyone is welcome to join.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

MUSC 4556. Afro-Cuban Percussion Techniques. 2 Credit Hours.

A practical study in the musical language and percussive traditions of Afro-Cuban and Latin American music. The goal is to equip the learner with greater knowledge, understanding, and practical performance skills with regard to percussion instruments of the Afro-Cuban musical traditions. Students will engage in group performance and improvisation and will hone ensemble and presentation skills. The course experience is largely a "hands-on" lab; therefore, students are required to attend the weekly meetings.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4560. Seminar in Guitar Performance and Literature. 1 to 2 Credit Hour.

Exploration of issues related to performance. Analysis of representative works. Attention to problems of transcription and performance practice. Performance of representative guitar chamber and ensemble literature.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4561. Percussion Pedagogy. 2 to 3 Credit Hours.

Course designed to enable students to develop the necessary knowledge and skills to make intelligent and informed decisions about the teaching of percussion instruments. Students will analyze, compare and critique curricula, teaching modalities, performance practices, methods, materials, and literature.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1651.

MUSC 4563. Upper String Pedagogy. 2 Credit Hours.

Problems and teaching techniques; solo and ensemble literature; available teaching materials at beginning through advanced levels.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4567. Viola for Violinists. 1 Credit Hour.

Performance-oriented course for violin performance majors or music education majors whose main instrument is violin. Focus is on the differences between violin playing and viola playing, including clef reading, vibrato, and bowing techniques. Orchestral excerpts, short solos, and chamber music from the baroque to the present are performed in class. Students are asked to bring their own viola if possible.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUSC 4570. Orchestral Repertoire. 1 to 2 Credit Hour.

Reading workshop to acquaint players with standard orchestral repertoire and playing techniques. NOTE: Separate sections offered for woodwinds, brasses, and string instruments.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUSC 4584. Instrumental Major. 4 Credit Hours.

Weekly instrumental private lesson with major teacher. Student is required to present a full recital during this semester of study. Open only to candidates for a Bachelor of Music degree with a major in instrumental performance. Weekly instrumental private lesson with major teacher. Students are required to perform or teach private lessons outside the university, subject to availability and/or scheduling conflicts with other Boyer courses. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 4503.

MUSC 4603. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 3604.

MUSC 4652. Owlchestra Campus Community String Orchestra. 1 Credit Hour.

The Owlchestra is a string orchestra comprised of Temple University students (majors and non-majors) and members of the Greater Philadelphia Community. No audition is required for membership. The ensemble meets one evening per week, totaling two hours of rehearsal, and performs a concert at the end of each semester. Members may elect to participate for Temple University academic credit or pay a nominal fee to join as a community member (course credit is not transcribed in the latter choice).

Repeatability: This course may be repeated for additional credit.

MUSC 4684. Harpsichord Major. 4 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUSC 4603.

Music Education (MUED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MUED 1651. Percussion. 1 Credit Hour.

Methods for teaching percussion skills to students in a school setting. Topics may include but are not limited to: literature selection, various instrument performance idiosyncrasies, hand position and posture, maintenance, repair, proactive teaching and troubleshooting, methods and materials; instrument makes, accessories. Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1652. Woodwinds I. 1 Credit Hour.

Methods for teaching woodwind skills to students in a school setting. Topics may include but are not limited to: literature selection, instrument assembly, hand position and posture, maintenance, assembling, embouchure, tone production, transposition, fingerings, range; proactive teaching and troubleshooting, methods and materials; instrument makes, and accessories. Students are required to develop a fundamental playing knowledge of instruments. NOTE: Required of all music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1653. Upper Strings. 1 Credit Hour.

Students with voice, piano, or guitar performance concentration may take either Music Education 1653 (0052) or Music Education 1654 (0053) [Music Education 1653 (0052) is recommended]. Methods for teaching string skills to students in a school setting. Topics may include but are not limited to: literature selection, fingering and bowing patterns, shifting, vibrato, hand position and posture, maintenance, tone production, proactive teaching and troubleshooting, methods and materials; instrument makes, and accessories. Students are required to develop a fundamental playing knowledge of instruments. NOTE: Required of all music education majors with band or orchestra emphasis.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1654. Lower Strings. 1 Credit Hour.

Students with voice, piano, or guitar performance concentration may take either Music Education 1653 (0052) or Music Education 1654 (0053) [Music Education 1653 (0052) is recommended]. Methods for teaching string skills to students in a school setting. Topics may include but are not limited to: literature selection, fingering and bowing patterns, shifting, vibrato, hand position and posture, maintenance, tone production, proactive teaching and troubleshooting, methods and materials; instrument makes, accessories. Students are required to develop a fundamental playing knowledge of instruments. NOTE: Required of all music education majors with band or orchestra emphasis.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1655. Brass I. 1 Credit Hour.

Methods for teaching brass skills to students in a school setting. Topics may include but are not limited to: literature selection, instrument assembly, hand position and posture, maintenance, embouchure, tone production, transposition, fingerings, range; proactive teaching and troubleshooting, methods and materials; instrument makes, accessories. Students are required to develop a fundamental playing knowledge of instruments. NOTE: Required of all music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1656. Brass II. 1 Credit Hour.

Advanced methods for teaching brass skills to students in a school setting. Topics may include but are not limited to: literature selection, instrument assembly, hand position and posture, maintenance, embouchure, tone production, transposition, fingerings, range; proactive teaching and troubleshooting, methods and materials; instrument makes, accessories, and repairs. Students are required to develop a fundamental playing knowledge of instruments. NOTE: Required of all music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1657. Woodwinds II. 1 Credit Hour.

Methods for teaching double reed skills to students in a school setting. Topics may include but are not limited to: literature selection, instrument assembly, hand position and posture, maintenance, embouchure, tone production, transposition, fingerings, range; proactive teaching and troubleshooting, methods and materials; instrument makes, and accessories. Students are required to develop a fundamental playing knowledge of instruments. NOTE: Required of all music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 1658. Guitar I. 1 Credit Hour.

Carefully sequenced developmental technical exercises designed to achieve competency with basic chord formations in all keys.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 1659. Guitar II. 1 Credit Hour.

A continuation of Music Education 1658 (0058) in which skills are further developed to include positions and more advanced folk and popular accompaniment techniques.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUED 1658.

MUED 1671. Collaboration & Creativity in the New Music Community. 3 Credit Hours.

This is an experiential course for students in the major. Its focus is on teaching music as a collaborative pursuit involving free and creative personal expression among all people in learning communities. Topics will include (but not be limited to) awareness and development of community music, roles of music industry and music institutions as resources in music instruction, organizing and leading collaborative musical experiences, social and cultural aspects of music involvement, the value of informal music making, improvisation, and composing. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in minimum GPA of 3 in: (MUED 2665, MUED 4666, MUED 3661, and MUED 2696)

MUED 2665. Music Learning & Development. 3 Credit Hours.

Understanding how learners develop and how individual learners' needs affect music learning can inform teachers how to teach. In this course, preservice music teachers study music development from the learners' perspective and begin to process ways in which music learning theories, approaches, processes, and methods can guide learners' development. NOTE: Includes field observations. This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUED 3661 and MUED 4666)

MUED 2671. School Choral Ensembles. 2 Credit Hours.

In this course, preservice music teachers increase their understanding of vocal development, inclusive vocal settings, diverse music repertoire and transfer of music across in-school and out-of-school settings. Preservice music teachers consider a variety of approaches to ensemble formations (e.g.: non-select/select-implications of inclusion/exclusion; curricular/extra-curricular) and ways in which types of school ensembles (e.g.: Jazz, Show Choir, Barbershop, Gospel, Women's Chorus, Men's Chorus, Mixed Chorus) have traditionally been established and maintained. Contemporary research and practice, with implications for new types of vocal and choral ensembles in Pre-K-12 school settings, also will be considered. Emphasis is on building a course of study for choral music in schools. NOTE: Special authorization only. In-class performances and peer evaluations, and observations (in-class) required. This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 2672. Diction Using Choral Repertoire. 2 Credit Hours.

Orientation to the International Phonetic Alphabet and its application to literature appropriate for solo and choral literature in English, Italian, German, and French. NOTE: Special authorization only. In-class performances of literature in the language required. This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 2673. Jazz Education - Instrumental. 2 Credit Hours.

This course surveys strategies for the development of the instrumental jazz ensemble in secondary school settings. Topics will include (but not be limited to): instrumentation, rehearsal techniques, literature, listening, improvisation, styles, rhythm, articulation, rhythm section, and programming. NOTE: Special authorization only. Required of all music education majors with band or orchestra emphasis.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 2674. Jazz Education - Vocal. 2 Credit Hours.

This course surveys strategies for the development of the vocal jazz ensemble in secondary school settings. Topics will include (but not be limited to): Swing and show choirs, balancing voices, rehearsal techniques, literature, listening, improvisation, styles, rhythm, articulation, rhythm section, and programming. NOTE: Special authorization only; required for all music education majors with choral or general emphasis.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 2675. Inclusive Vocal Development: Pre-Kindergarten - Secondary. 2 Credit Hours.

In this course, preservice music teachers learn to guide their future students through stages of vocal development. Emphases include presentation of an exemplary vocal model for one's students, voice care for choral musicians and teachers, and considerations for selecting repertoire appropriate for Pre-Kindergarten, elementary, and secondary school choral musicians. NOTE: Special authorization only. In-class performances and peer evaluations, and observations (in-class) required. This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 2696. Teaching General Music to Inclusive Populations (TGMIP). 3 Credit Hours.

The principles, practices, and materials central to the general music program in elementary and secondary education. NOTE: Special authorization only. Required for all music education majors. Includes Field Experience.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUED 2665, MUED 4666, and MUED 3661)

MUED 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

MUED 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

MUED 3631. Functional Voice I. 1 Credit Hour.

Students will learn how to use their voices appropriately and safely in clinical situations; how to sing standard clinical repertoire by memory. NOTE: A two-semester sequence for Music Therapy majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 3632. Functional Voice II. 1 Credit Hour.

A continued development of skills learned in Functional Voice I, where students will learn techniques on eliciting singing responses from various client populations. NOTE: A two-semester sequence for Music Therapy majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUED 3631.

MUED 3633. Functional Piano I. 1 Credit Hour.

Students will develop functional skills and repertoire for leading and accompanying vocal and instrumental activities in the music therapy setting.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 3634. Functional Piano II. 1 Credit Hour.

A continued development of skills learned in Functional Piano I, where students continue to learn functional skills for accompanying therapy sessions.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUED 3633.

MUED 3635. Functional Guitar I. 1 Credit Hour.

Students will develop functional singing and accompanying skills on guitar using the music therapy song literature. Second semester is a continuation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 3636. Functional Guitar II. 1 Credit Hour.

A continuation of skills learned in Functional Guitar I, where students continue to learn various techniques and accompanying skills on guitar.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUED 3635.

MUED 3651. Music Education Lab Ensemble. 0 or 1 Credit Hours.

This is an experiential course with a focus on either concert band or Choral Ensemble Literature selection and rehearsal techniques appropriate for beginning and intermediate level ensembles. Students will participate through performance on primary and secondary instruments or by singing various choral parts as well as conducting and rehearsing.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in minimum GPA of 3 in: (MUED 2323 and MUED 2324)

MUED 3661. Introduction to Teaching Students with Special Needs. 3 Credit Hours.

A foundation for understanding the characteristics of exceptional children and the implications of these characteristics to music education. A variety of music materials especially designed or adaptable for teaching music to handicapped children discussed in terms of their practical use for classroom instruction.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 3662. Keyboard Harmony - Music Education. 3 Credit Hours.

Skills development in use of the keyboard as a classroom tool. Focus on chord progressions, sequences, modulations, harmonizations of small forms, transposition, extemporization, score reading. NOTE: Special authorization only. Required for all music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUSC 2406 or MUST 2106)

MUED 3680. Music Therapy: Special Topics. 2 Credit Hours.

An in-depth examination of a particular topic in Music Therapy practice, research or theory.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (MUED 3689, MUED 3789, MUED 3889, or 'Y' in CRME01)

MUED 3689. Fieldwork in Music Therapy. 1 to 3 Credit Hour.

Supervised field placements where students learn how to plan and conduct music therapy sessions with different client populations.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUED 3789. Fieldwork in Music Therapy II. 1 to 3 Credit Hour.

Supervised field placements where students learn how to plan and conduct music therapy sessions with different client populations.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUED 3889. Fieldwork in Music Therapy III. 1 to 3 Credit Hour.

Supervised field placements where students learn how to plan and conduct music therapy sessions with different client populations.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUED 4611. Music Therapy Overview. 3 Credit Hours.

An introduction to music therapy theory and practice. Clinical case studies will be used to illustrate general principles of assessment, goal planning, treatment and evaluation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4613. Music Therapy Foundations. 3 Credit Hours.

An examination of philosophical, psychological, biological and sociological foundations for the use of music as therapy.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4614. Psychiatric Music Therapy. 3 Credit Hours.

An examination of music therapy practice with psychiatric populations (e.g., schizophrenia, affective disorders, PTSD), with laboratory training in how to design and implement music experiences to meet therapeutic goals.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4615. Rehabilitative Music Therapy. 3 Credit Hours.

A survey of music therapy literature based on physical rehabilitation (e.g., brain injury, stroke, cerebral palsy, neuromotor disease), with laboratory training in how to design and implement music experiences to meet therapeutic goals.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4616. Developmental Music Therapy. 3 Credit Hours.

An examination of music therapy methods used with children who have developmental problems (e.g., mental retardation, learning disabilities, behavior problems, sensory disorders) with laboratory training in how to design and implement music experiences to meet therapeutic needs.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in MUED 4611.

MUED 4617. Medical Music Therapy. 3 Credit Hours.

A survey of music therapy literature based on medical applications (e.g., general hospital, surgery, chronic and terminal illness), with laboratory training in how to design and implement music experiences to meet therapeutic goals. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4618. Music Therapy Ethics. 1 to 2 Credit Hour.

An examination of ethical issues in music therapy practice, research, education, and supervision.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUED 4619. Medical/Rehabilitative Music Therapy. 3 Credit Hours.

An examination of music therapy treatment in physical rehabilitation treatment (e.g., brain injury, stroke, cerebral palsy, neuromotor disease) and medical issues (surgery, diabetes, cancer, AIDS) with laboratory training in how to design and implement music experiences to meet therapeutic goals. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4641. Music Therapy Experiences I: Creative Methods. 1 Credit Hour.

Students experience creative methods of Music Therapy and explore their therapeutic potential. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4642. Music Therapy Experiences II: Recreative Methods. 1 Credit Hour.

Students experience recreative methods of Music Therapy and explore their therapeutic potential. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in MUED 4611.

MUED 4643. Music Therapy Experiences III: Receptive Methods. 1 Credit Hour.

Students experience receptive methods of Music Therapy and explore their therapeutic potential. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in MUED 4611.

MUED 4646. Music Therapy Research. 3 Credit Hours.

A survey of music therapy research provides a foundation for developing skills in formulating research questions, reviewing the literature, designing a study, analyzing and interpreting data, and writing reports. Ethical issues are considered.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4650. Contemporary Problems in Music Education. 1 to 3 Credit Hour.

Study of recent trends and issues in Music Education through critical examination of research and practical application of selected techniques.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

MUED 4652. Night Owls Campus/Community Band. 0 or 1 Credit Hours.

The Night Owls Campus/Community Band is a large concert wind band that is comprised of Temple University students (majors and non-majors) and community members from the Greater Philadelphia area. No audition is required for membership. The ensemble meets one evening per week, totaling two hours of rehearsal, and performs a concert at the end of each semester. Repertory performed includes standard wind literature and crowd-pleasing favorites. Members may elect to participate for Temple University academic credit or pay a nominal fee to join as a community member (course credit is not transcribed in the latter choice). NOTE: Ability to read music is required; personally owned instrument or rental needed.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

MUED 4661. Curricular Options in Secondary School Music. 3 Credit Hours.

Training in effective and ethical music teaching, pedagogy, systematic observation skills, classroom management, and diverse populations. Classroom activities and assignments call on the synthesis of musical knowledge and skills acquired throughout the degree program in preparation for a successful Student Teaching experience.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUED 2665.

MUED 4663. Interactive Multimedia I. 3 Credit Hours.

This course is designed to teach students how to create interactive multimedia applications using authoring software, multimedia hardware, and multimedia elements such as sound files, digital video, standard MIDI files, and clip art. Students will complete a final project demonstrating their ability to effectively use the hardware and software in creating a useful interactive multimedia application for education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUED 4664. Interactive Multimedia II. 3 Credit Hours.

Students will be able to create multimedia objects using graphics, digital audio, digital video, and MIDI hardware and software. Each student will complete a final project demonstrating his or her ability to effectively use multimedia hardware and software in creating a useful application for education. The final project will be deployed on the World Wide Web.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUED 4663.

MUED 4666. Assessment of Music Learning. 3 Credit Hours.

Students learn to measure music learning (achievement), skill-based and cognitive-based, and to measure music potential (aptitude) across a range of ages. They write achievement tests, which they evaluate subjectively and statistically, and learn to evaluate the quality and appropriateness of standardized tests of music achievement and music aptitude. NOTE: Special authorization only. Required for all music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 4667. Teaching Instrumental Music to Inclusive Populations. 3 Credit Hours.

For the prospective teacher of instrumental music in the elementary and secondary schools. A synthesis of all previous work in instrumental music courses. Emphasis on efficient rehearsal and teaching techniques for small and large group settings; developing musical and technical skills of instrumental music students; recruiting; repertoire; programming; performance issues; evaluation; administration. NOTE: Required of music education majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUED 1651, MUED 1652, MUED 1653, MUED 1654, MUED 1655, MUED 1656, MUED 1657, and MUED 2665)

MUED 4668. Senior Student Teaching Seminar. 1 to 3 Credit Hour.

Seminar for senior music education majors enrolled in Music Education 4689 (0351) and/or Music Education 4789 (0352). NOTE: Special authorization only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

MUED 4669. Teaching Choral Music to Inclusive Populations. 2 to 3 Credit Hours.

For the prospective teacher of vocal music; practical solutions to problems of audition procedures, development of musical skills within the choral rehearsal, repertoire and programming, voice classes, performance planning and execution, the changing voice, and needs of special learners. NOTE: Required for all music education majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in minimum GPA of 3 in: (MUED 2665, MUED 4666, and MUED 3661)

MUED 4670. Special Problems in Music Education. 1 to 4 Credit Hour.

Registration by special course authorization. NOTE: Arranged by semester, please consult with the instructor.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may be repeated for additional credit.

MUED 4680. Music Therapy: Special Topics. 1 to 4 Credit Hour.

An in-depth examination of a particular topic in Music Therapy practice, research, or theory.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Music Therapy, Music Therapy Jazz.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUED 4685. Music Therapy Clinical Internship. 1 to 6 Credit Hour.

Academic supervision of clinical experiences in music therapy with various client populations. NOTE: Weekly seminars with other interns are required. This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Therapy, Music Therapy Jazz.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUED 4689. Student Teaching-Elementary. 3 Credit Hours.

Field experience in elementary grades for senior music education majors. NOTE: Special authorization only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may be repeated for additional credit.

MUED 4696. Music Therapy Research. 3 Credit Hours.

A survey of music therapy research provides a foundation for developing skills in formulating research questions, reviewing the literature, designing a study, analyzing and interpreting data, and writing reports. Ethical issues are considered.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MUED 4697. Music Therapy Foundations. 3 Credit Hours.

This writing intensive course involves a critical examination of music therapy theory, focusing on philosophical, psychological, biological, and socio-cultural foundations for the practice of music therapy.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in MUED 4611, (MUED 4614 or 'Y' in CRME02), (MUED 4616 or 'Y' in CRME04), (MUED 4619 or 'Y' in CRME03), MUED 3689, (MUED 3789 or 'Y' in CRME01), and MUED 3889.

MUED 4789. Student Teaching - Secondary. 3 Credit Hours.

Field experience in secondary grades for senior music education majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Education.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may be repeated for additional credit.

Music Studies (MUST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

MUST 0802. The Art of Listening. 4 Credit Hours.

Experience Philadelphia's riveting arts scene through its awesome music performance groups. In The Art of Listening, you don't have to read music or play an instrument to discover how music of all kinds can be both edifying and entertaining. Class members will go on four field trips visiting Philadelphia's leading music halls to hear world-renowned performers playing a variety of music including Classical, Jazz, Broadway and World Music. Additionally, professional musicians active in the field will visit the classroom for demonstrations. Guided listening exercises will enable you to listen with increased clarity. Learning musical elements will empower you to acquire a skill set that can be applied to all of your listening preferences. Equally important, practicing open-minded listening may reveal new portals for greater appreciation of the arts and humanities and prompt you to ponder the importance of music in your life and to society. NOTE: This course fulfills the Arts (GA) GenEd requirement. Students cannot receive credit for this course if they have successfully completed MUST 0902.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

MUST 0804. Shakespeare and Music. 3 Credit Hours.

What is it about the Bard of Stratford-on-Avon? From the concert hall to the stage and silver screen, no other author's works have inspired more adaptations than those of William Shakespeare. In this new century, as the "cult of originality" continues to grow at an exponential rate and celebrity is sought as an end in itself (see Hilton, Paris), why have the works of a man whose very identity is shrouded in mystery remained so popular? This course will explore "Macbeth," "A Midsummer Night's Dream" and "Romeo and Juliet," and their adaptation by composers and choreographers. Students will then get a chance to "bend the Bard" on their own! NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

MUST 0808. The Sounds of Philadelphia. 3 Credit Hours.

Often called "The Birthplace of the United States," Philadelphia has an extraordinarily rich and important musical history that is emblematic of the diverse populations that created this nation. From the late eighteenth century to the present day, Philadelphia has cultivated innovative musical styles that are as varied as the city's population itself. This course will explore the history of music in Philadelphia, using music as a gateway to understand and challenge assumptions regarding issues of race, gender, sexuality, class, ethnicity, and identity. In this course, students will learn about composers, musical artists, and institutions with deep roots in Philadelphia in the framework of issues related to race and diversity. They will be asked to critically reflect on experiences in their own lives that influenced their musical tastes and to explore the connections between musical preference and identity. NOTE: This course fulfills the Race and Diversity (GD) GenEd requirement.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

MUST 0809. World Musics & Cultures. 3 Credit Hours.

Have you ever wondered why musical compositions from different parts of the world sound so dissimilar? Discover how an artist's creative imagination is molded by the cultural values of the society at large. Listen to guest musicians demonstrate different styles of playing and attend a live concert. Examine folk, art and popular music from around the world and discuss the wonderful sounds that are produced. NOTE: This course fulfills the Arts (GA) GenEd requirement. Students cannot receive credit for this course if they have successfully completed MUST 0909.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

MUST 0812. Exploring Music. 3 Credit Hours.

Exploring Music is designed to be an enjoyable and engaging introduction to some of the most recognized and influential compositions and composers in Western music past and present. In this course, you will learn how to listen to music on deeper and more nuanced levels and explore its roles within the wider contexts of historical and contemporary societies. Throughout the course, you will be involved in the process of exploring music through viewing video recordings of concerts, operas, ballets, films, and/or staged productions, participating in active listening exercises, engaging in discussions about music, and attending at least one live concert. No musical background or training is assumed or required. NOTE: This course fulfills the Arts (GA) GenEd requirement.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

MUST 0902. Honors: The Art of Listening. 4 Credit Hours.

Are you an active or passive listener? What kind of music do you enjoy? How do you compare different musical styles, and what qualities make one performance different from another? Be challenged to rethink your entire conception of music by focusing on how to listen to music to deepen your appreciation of what you are hearing, and to ponder the importance of music in your life and to society. You will not be required to become a performer yourself, but you will become a more discriminating consumer of music through attendance at live concerts in the local area, by observation of in-class performances, rehearsals, and music lessons, and through guided listening exercises in and outside of class. Repertoire selected from Classical, Jazz, Broadway, and World Music will engage your intellectual and emotional response as a concert-goer, listener, researcher, critic, and communicator. (This is an Honors course.) NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed MUST 0802.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

MUST 0909. Honors World Musics & Cultures. 3 Credit Hours.

Have you ever wondered why musical compositions from different parts of the world sound so dissimilar? Why does Japanese music employ silence as a structural element and Chinese melodies use only five notes? Discover how an artist's creative imagination is molded by the cultural values of the society at large. Listen to guest musicians demonstrate different styles of playing and attend a live concert. Examine folk, art and popular music from around the world and discuss the wonderful and strange sounds that are produced. (This is an Honors course.) NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed MUST 0809.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

MUST 1045. Introduction to Music Theory and Literature. 2 Credit Hours.

Introduction to basic theoretical concepts of music. A wide range of musical compositions, drawn from different musical cultures and various periods of music history.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1106. Jazz Secondary Piano. 1 Credit Hour.

Introduction to voicing techniques, sight reading, comping, improvisation, and advanced jazz voicings

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUSC 1405.

MUST 1118. Business of Music I. 2 Credit Hours.

Business fundamentals for the Performing Artist.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1131. Aural Skills I Jazz-Comm. 2 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1132. Aural Skills II Jazz. 2 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1133. Harmony I: Jazz. 3 Credit Hours.

Basic jazz theory with emphasis upon standard melodic and harmonic structures in jazz practice, diatonic intervals, seventh chords, modulation, inversions, secondary dominant chords, tritone substitutions, melodic and harmonic analysis.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1134. Harmony II: Jazz. 4 Credit Hours.

Intermediate jazz theory with emphasis upon intermediate rhythmic and melodic transcription, chord-scale relationship, harmonic analysis, extended voicings, modal harmony.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1133.

MUST 1701. Music Theory for Non-Music Majors. 2 Credit Hours.

Basic musical theory. Basic scales, intervals, rhythm and chord structures, simple harmonization, rudimentary aural theory. Some previous training is helpful, but not necessary. NOTE: For non-music majors.

Repeatability: This course may not be repeated for additional credits.

MUST 1702. Introduction to Music. 1 Credit Hour.

A companion course to Music Studies 1761 (C061) for first-term freshmen. This course provides guidance with the assignments of the core course. Emphasis is on reading, listening, speaking, and writing within the context of the core course. Assistance is also given in the continued development of English-language skills, especially academic reading and the acquisition of a general academic vocabulary. NOTE: Offered at Temple University Japan only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1701.

MUST 1703. Introduction to World Music. 3 Credit Hours.

Exposes students to the diversity of music cultures existing in the world today and also to the particular instruments, genres, and musical contexts with which they are associated. Students become acquainted with research topics of interest to ethnomusicologists in recent years. NOTE: (1) Open to non-music majors only. No prior musical experience or coursework is necessary. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

MUST 1704. Music in American Society. 3 Credit Hours.

Using a historical framework, this course will survey various styles of music found in the United States. Folk, fine art, and popular music examples will be examined on the basis of their intrinsic qualities, as well as in connection with their social, economic, and political milieu. Issues of racism in American society's musical life will be an ongoing theme. NOTE: (1) No prior musical experience or course work is necessary. (2) This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

MUST 1705. Music Theory for Non-Music Majors II. 3 Credit Hours.

"Music Theory for Non-Majors II" is a continuation of "Music Theory for Non-Majors I." It is a partly theoretical, partly skills-based approach to learning the basics of music theory. In addition to covering more advanced rudiments (all diatonic 7th chords, all common types of cadences and phrase structures, simple chromaticism, larger forms, etc.), students will complete counterpoint and part-writing exercises, do rhythmic and solfège exercises in class and write short compositions. For the final exam, students will be expected to do some or all of the following: write a two-part melodic dictation; complete a simple harmonic dictation; sing melodies with solfège (prepared and at sight); analyze form (either aurally or visually); analyze phrase structures, cadences, Roman Numerals, and non-chord tones; realize a figured bass; and harmonize a soprano line (SATB).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1701.

MUST 1711. Theory I. 4 Credit Hours.

Introduction to melody, modal counterpoint, all species of two-part writing and basic voice leading, along with simple diatonic harmony and figured bass. Exercises include writing original second parts to given melodies, four-part harmonization of diatonic melodies, and analysis of music literature excerpts. NOTE: (1) Special authorization required for non-music majors. (2) This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: 'Y' in MTPT.

MUST 1712. Theory II. 4 Credit Hours.

Continuation of the study of tonal harmony; introduction of chromaticism, diatonic modulation, and expanded forms such as sonata allegro and rondo through analysis of larger works and composition of short pieces. NOTE: Special authorization required for non-music majors. Section 005 - Jazz Majors only. Jazz Harmony I & Aural Skills I-- Basic jazz musicianship with emphasis upon sight-singing, interval recognition, jazz syncopation, triads, seventh and ninth chords, basic chord progressions, melodic and harmonic dictation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 1711 or MUST 3770)

MUST 1741. Aural Theory I. 2 Credit Hours.

A basic course in the aural perception and singing of intervals, scales, and triads. Special attention to application of these concepts as well as other musical parameters in the aural perception of a wide variety of literature. NOTE: Remedial section available.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1742. Aural Theory II. 2 Credit Hours.

Further study of intervals, scales, and triads, with special attention given to tonal music; developing the power to visualize, sing, and write music from dictation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1741.

MUST 1758. Composition Lesson I. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 1759. Composition Lesson II. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1758.

MUST 1761. Introduction to Music. 3 Credit Hours.

An introduction to the elements of music and the evolution of musical styles in representative masterpieces from the baroque to the contemporary periods. To broaden knowledge of music and enhance listening enjoyment. NOTE: (1) For non-music majors. (2) This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

MUST 1762. Music in Movie Epics. 3 Credit Hours.

This course begins by developing concepts to discuss cinematic techniques, narrative ideas, musical ideas, and the use of sound in movies. After this foundation, the course turns to contemporary movie epics, such as *The Lord of the Rings*, *Star Wars*, and the *Harry Potter* movies to show how this genre shapes our understanding of heroism, struggle, good and evil, narrative trajectory, etc. Students will interpret individual scenes and the ways that music and sound create an aura of suspense, psychology, power, failure, success, etc. as these movies respond to and create a culture of the heroic.

Repeatability: This course may not be repeated for additional credits.

MUST 1763. American Popular Music. 2 Credit Hours.

Survey of all styles of twentieth century American Popular music. NOTE: For non-music majors.

Repeatability: This course may not be repeated for additional credits.

MUST 1911. Honors Theory I. 4 Credit Hours.

Introduction to melody, modal counterpoint, all species of two-part writing and basic voice leading, along with simple diatonic harmony and figured bass. Exercises include writing original second parts to given melodies, four-part harmonization of diatonic melodies, and analysis of music literature excerpts.

NOTE: (1) Special authorization required for non-music majors. (2) This course can be used to satisfy the university Core Arts (AR) requirement.

Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. All students must receive department and deans office permission to enroll.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: 'Y' in MTPT.

MUST 1912. Honors Theory II. 4 Credit Hours.

Continuation of the study of tonal harmony; introduction of chromaticism, diatonic modulation, and expanded forms such as sonata allegro and rondo through analysis of larger works and composition of short pieces. NOTE: This is an honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1911.

MUST 1961. Honors Introduction to Music. 3 Credit Hours.

An introduction to the elements of music and the evolution of musical styles in representative masterpieces, from early music to the contemporary periods. The course is intended to broaden students' knowledge of music and to enhance listening enjoyment. NOTE: (1) This is an Honors course for non-music majors. (2) This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

MUST 2105. Jazz Secondary Piano. 1 Credit Hour.

Continuation of voicing techniques, sight reading, comping, improvisation, and advanced jazz voicings.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1106.

MUST 2106. Jazz Secondary Piano. 1 Credit Hour.

Continuation of voicing techniques, sight reading, comping, improvisation, and advanced jazz voicings.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2105.

MUST 2111. Music in Advertising and Marketing. 2 Credit Hours.

The study of music as it relates to the advertising and marketing industries. Topics discussed will include composition and lyric writing for broadcast, advertising, marketing films and videos, and multi-image presentations. NOTE: Designed for music majors with a theory background.

Repeatability: This course may not be repeated for additional credits.

MUST 2112. Pop Song Writing. 2 Credit Hours.

Composing songs in pop idiom. Emphasis on chord progression, melody, and lyrics, as well as actual performance in class of student compositions.

NOTE: A thorough understanding of jazz harmony is essential.

Repeatability: This course may not be repeated for additional credits.

MUST 2113. History of Pop. 3 Credit Hours.

Popular song styles of the 20th century from a variety of idioms: blues, folk, pop groups, rock, film, etc. Listening, analysis, and criticism.

Repeatability: This course may not be repeated for additional credits.

MUST 2114. History of Jazz. 3 Credit Hours.

Survey of jazz practice in the 20th century with emphasis upon the major styles and the major artists.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 2131. Aural Skills III: Jazz. 2 Credit Hours.

Advanced musicianship with emphasis upon advanced sight singing, advanced interval recognition, advanced chord progressions, modal applications, transcription. NOTE: Open only to Jazz Studies/Music Majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1132.

MUST 2133. Harmony III: Jazz. 3 Credit Hours.

Advanced jazz theory with emphasis upon advanced melodic and rhythmic transcription, reharmonization, non-functional harmony.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1134.

MUST 2703. Music in History. 3 Credit Hours.

The history, style, and musical forms from antiquity through the Renaissance. Musical analysis and individual assignments. NOTE: Open only to music majors; others by permission.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 1712 or MUST 3770)

MUST 2704. Music in History. 3 Credit Hours.

The history, style, and musical forms of the Baroque period. Musical analysis and individual assignments. NOTE: Open only to music majors; others by permission.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 1712 or MUST 3770)

MUST 2711. Theory III. 4 Credit Hours.

This course seeks to develop visual, aural and written skills in the formal analysis of tonal music by combining written and aural theory. Materials covered in Theory I and II are carried forward to study the tonal language of literature from Baroque, Classical, and Romantic styles that include examples of basic phrase structures, binary and ternary forms, variation, rondo, sonata-allegro and concerto forms, Lieder, and the contrapuntal procedures in canon and fugue. Students will learn to separate a whole into its melodic, harmonic and rhythmic parts, to explore the relationship of these parts to the whole and to each other, and to compose original phrases possessing similar relationships. Students will also develop aural skills in the sight-singing and dictation of chromatic and modulating material, and the performance of rhythms utilizing small subdivisions and changing meters. Students must demonstrate mastery in both written and aural theory skills to pass the course.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1712.

MUST 2712. Theory IV. 4 Credit Hours.

Theory IV entails the study of contemporary music. Topics include the study of modality, atonality, twelve-tone, and other techniques of modern music. The aim is to learn the musical vocabulary of contemporary music through reading, analysis and basic composition exercises, and to gain a better understanding of musical style, structure and form through the analysis of pieces from the repertoire. The course involves both aural and written components. In the aural component, students learn to sight sing melodies in contemporary music and recognize common harmonic and motivic procedures. NOTE: Special authorization required for non-music majors. Section 5--Jazz Majors only. Jazz Harmony III & Aural Skills III--Advanced musicianship with emphasis upon advanced sight singing, advanced interval recognition, advanced chord progressions, modal applications, transcription.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2711.

MUST 2733. American Musical Theater. 3 Credit Hours.

A look at the changing forms and styles of the musical theater in America from the nineteenth-century extravaganza to contemporary Sweeney Todd. Emphasizes such significant Broadway shows as "Show Boat," "Oklahoma," "My Fair Lady," and "West Side Story" and the contributions of composers, lyricists, and other artists responsible for the success of those shows.

Repeatability: This course may not be repeated for additional credits.

MUST 2741. Aural Theory III. 2 Credit Hours.

Continuation of aural perception of tonal music with concentration on modulation and chromaticism; aural analysis of smaller forms.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1742.

MUST 2742. Aural Theory IV. 2 Credit Hours.

Continuation of aural perception with an emphasis on 20th century literature and techniques.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2741.

MUST 2748. Composition I. 2 Credit Hours.

Original composition. Development of inventive ability. Required for theory majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 2749. Composition II. 2 Credit Hours.

Original composition. Development of inventive ability.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 2758. Composition Lesson III. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1759.

MUST 2759. Composition Lesson IV. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2758.

MUST 2900. Honors Music Studies Special Topics. 3 to 4 Credit Hours.

Contingent on the special topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

MUST 2911. Honors Theory III. 4 Credit Hours.

This course seeks to develop visual, aural and written skills in the formal analysis of tonal music by combining written and aural theory. Materials covered in Theory I and II are carried forward to study the tonal language of literature from Baroque, Classical, and Romantic styles that include examples of basic phrase structures, binary and ternary forms, variation, rondo, sonata-allegro and concerto forms, Lieder, and the contrapuntal procedures in canon and fugue. Students will learn to separate a whole into its melodic, harmonic and rhythmic parts, to explore the relationship of these parts to the whole and to each other, and to compose original phrases possessing similar relationships. Students will also develop aural skills in the sight-singing and dictation of chromatic and modulating material, and the performance of rhythms utilizing small subdivisions and changing meters. Students must demonstrate mastery in both written and aural theory skills to pass the course. Students must receive departmental and dean's office approval to enroll.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 1712 or MUST 1912)

MUST 2912. Honors Theory IV. 4 Credit Hours.

Theory IV entails the study of contemporary music. Topics include the study of modality, atonality, twelve-tone, and other techniques of modern music. The aim is to learn the musical vocabulary of contemporary music through reading, analysis and basic composition exercises, and to gain a better understanding of musical style, structure and form through the analysis of pieces from the repertoire. The course involves both aural and written components. In the aural component, students learn to sight sing melodies in contemporary music and recognize common harmonic and motivic procedures. NOTE: Special authorization required for non-music majors. Section 5 - Jazz Majors only. Jazz Harmony III and Aural Skills III - Advanced musicianship with emphasis upon advanced sight singing, advanced interval recognition, advanced chord progressions, modal applications, transcription. Students must receive department and dean's office approval to enroll.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2711 or MUST 2911)

MUST 2962. Honors History of American Popular Music. 3 Credit Hours.

Popular song styles of the 20th century from a variety of idioms: blues, folk, pop groups, rock, film, etc. Listening, analysis, and criticism.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

MUST 3105. Jazz Class Piano. 1 Credit Hour.

Arranged each semester, please consult with the instructor. NOTE: Course required for 1) all undergraduate music therapy majors with a piano concentration and 2) graduate music therapy majors who failed the diagnostic piano test and have the necessary piano technique.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2106.

MUST 3106. Jazz Class Piano. 1 Credit Hour.

Arranged each semester. Please consult with the instructor. NOTE: Course required for 1) all undergraduate music therapy majors with a piano concentration and 2) graduate music therapy majors who failed the diagnostic piano test and have the necessary piano technique.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3105.

MUST 3196. History of Pop. 3 Credit Hours.

This writing-intensive course focuses on popular song styles of the 20th and 21st centuries from a variety of idioms: blues, folk, pop groups, rock, film, etc. Listening, analysis, and criticism.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

MUST 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 3696. Music in History. 3 Credit Hours.

The history, style, and musical forms from the preclassic to the early romantic. Music analysis, essay exams, listening assignments, and research paper.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2703 or MUST 2704)

MUST 3710. Theory Seminar. 1 to 3 Credit Hour.

Practical application of current pedagogical principles with outside projects. Weekly seminar designed for and required of all theory majors in the junior and senior years. NOTE: Four semesters required.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUST 2712.

MUST 3713. Orchestration. 3 Credit Hours.

Instrumental characteristics and potential. Varied problems in sectional, ensemble, and orchestral scoring. Laboratory work possible in connection with practice orchestra.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2712.

MUST 3714. Contemporary Music. 3 Credit Hours.

Late 19th century orchestral practices; theories of Sessions, Hindemith, Bartok, Wuorinen; concentration on neoclassic style. NOTE: Labs included.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 3741. Keyboard Harmony. 3 Credit Hours.

The playing of chord progressions, sequences, modulations, and harmonization of small forms. Transposition, extemporization, reading from open score. NOTE: Music Education students take Mus Ed 3662 (0245).

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUSC 2406 or MUST 2106)

MUST 3748. Composition Junior Seminar I. 2 Credit Hours.

A one-hour composition lesson every second week for composition majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2749.

MUST 3749. Composition Junior Seminar II. 2 Credit Hours.

A one-hour composition lesson every second week for composition majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3748.

MUST 3758. Composition Lesson V. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2759.

MUST 3759. Composition Lesson VI. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3758.

MUST 3763. Analog and Modular Sound Synthesis. 3 Credit Hours.

This class examines the history and techniques of making music with analog and modular synthesizers. Students gain sound sculpting and composition skills using several analog and modular synthesizers. Skills include learning how the modules in an analog synthesizer work and can be linked together into a larger system to produce a vast palette of timbres. Students also develop an ability to recognize different analog synthesis techniques by ear, and compose several short pieces of music using sounds they create. Students acquire an understanding of how analog synthesizers are used in and have shaped many musical genres.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 3764. Scoring for Film and Digital Media. 3 Credit Hours.

Students will learn the aesthetics, terminology, procedures, and technical aspects of scoring for the visual medium. They will develop an understanding of the software used to synchronize original music to film and video, including MIDI, sample libraries, and sequencing. Students will complete projects that focus on a broad range of techniques, such as spotting, click tracks, understanding dramatic narrative, and scoring under dialogue. Further understanding of scoring techniques will occur through analysis of significant examples from the film music literature. Students will gain a fundamental understanding of the film industry, including how to identify and secure opportunities for scoring, the basics of how to approach the logistics of a feature length film, budgeting, and the personnel involved in projects large and small. The role of music in other visual media, such as video games, theatrical production, and interactive media, will be briefly explored.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 3765. Scoring and Audio Design for Video Games. 3 Credit Hours.

Students gain a basic understanding of composing interactive music and designing audio for video games. Students will become proficient in the software involved in this process, including a DAW, middleware, and game distribution. The vocabulary and technology of audio production are taught, as well as an understanding of the function of music in interactive media. The business skills necessary to enter and develop a successful career in game audio will be explored. The course contains a laboratory component in which students develop sequencing skills and work with synchronized animation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 3770. Topics in Music Theory. 1 to 3 Credit Hour.

Survey of advanced written and aural concepts in music theory.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 3780. Topics in Music History. 1 to 3 Credit Hour.

Survey of advanced concepts in music history.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 3796. Music in History. 3 Credit Hours.

The history, style, and musical forms from the late romantic through the contemporary periods. Music analysis, essay exams, listening assignments, and research paper.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2703 or MUST 2704)

MUST 3896. Theory Seminar II. 2 to 3 Credit Hours.

Practical application of current pedagogical principles with outside projects. Required weekly writing intensive seminar for theory majors, emphasizing critical writing and discussion.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUST 2712.

MUST 3900. Honors Music Studies Special Topics. 3 or 4 Credit Hours.

Contingent on the special topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

MUST 4110. Seminar in Jazz Composition and Arranging. 2 Credit Hours.

Current and past trends in jazz and pop composition. Students compose and perform original music. Class analysis of works. NOTE: Weekly seminar meetings.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MUST 2712 or MUST 3770)

MUST 4111. Jazz Style and Analysis. 2 Credit Hours.

In-depth examination of the music of one or two artists with an emphasis upon style, melodic and harmonic content, and importance of the artist(s) to the jazz canon.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2712 or MUST 3770)

MUST 4112. Jazz Arranging I. 3 Credit Hours.

Writing for various small and large jazz groups. Emphasis upon jazz orchestration and chord substitutions.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2712 or MUST 3770)

MUST 4113. Jazz Improvisation: Theory and Practice I. 2 Credit Hours.

Application of melodic and harmonic improvisational concepts and devices to standard jazz repertoire. Emphasis upon melodic stylistic development.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2711 or MUST 3770)

MUST 4114. Jazz Improvisation: Theory and Practice II. 2 Credit Hours.

More advanced melodic and harmonic improvisational concepts applied to standard jazz repertoire with an emphasis upon stylistic development.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4113.

MUST 4115. Jazz Arranging II. 3 Credit Hours.

Advanced arranging concepts for small and large jazz ensembles.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4112.

MUST 4120. Seminar in Advanced Jazz Composition and Arranging. 2 Credit Hours.

Advanced composition in the jazz idiom.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MUST 4110.

MUST 4700. Latin Amer Mus Ensemble. 0 to 1 Credit Hours.

Repeatability: This course may be repeated for additional credit.

MUST 4701. Music in Global Cultures. 3 Credit Hours.

Course to provide a foundational knowledge of global musics and to enable further study in this area. The degree program includes significant elective credits so that students can pursue advanced study if desired. While the content can vary from semester to semester depending upon the expertise and research interests of the instructor, the course's overall goal is to engage music both beyond the canon and from diverse cultural origins.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 2712.

MUST 4706. Live Recording and Mixing for Broadcast. 3 Credit Hours.

This course explores fundamental planning and procedures for capturing live music for video broadcast. Topics include planning, staging, preparation and execution of a live performance recording, followed by procedures for effective and cohesive mixing for broadcast. We will initiate and complete a typical "real world" music performance broadcast delivery project. This course has a prerequisite that students must have already taken MUST 4713 (Sound Recording) and MUST 4714 (Sound Editing).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MUST 4713 or 'Y' in CRMU01) and (MUST 4714 or 'Y' in CRMU02)

MUST 4707. Computer Programming for Musicians. 3 Credit Hours.

This course is an introduction to computer programming specifically designed to enable making music with a computer. Through a combination of creative activities and projects using the Python programming language, one of the most common languages used today for making music with computers, students learn foundational pedagogical concepts of computer programming and computational thinking, all within a musical context.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music Technology.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4711 and MUST 4712 (may be taken concurrently)

MUST 4710. Early Music Ensemble. 1 Credit Hour.

An opportunity to perform music from medieval through preclassical times. Reproduction of original instruments, principles of performance practice in original form and as they emerge through modern efforts at reconstruction. NOTE: Limited to 20 singers and instrumentalists.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 4711. Computers in Musical Applications. 3 Credit Hours.

Introduction to theory and practice of digital synthesis of musical sound. Sampling theory, additive synthesis, and modulation synthesis are examined using models. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

MUST 4712. Computer Synthesis of Music. 3 Credit Hours.

Advanced study of software synthesis methods building on Music Studies 4711 (C315). Subtractive synthesis and reverberation techniques are examined. Synthesis algorithms are implemented using the C Sound language.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4711.

MUST 4713. Sound Recording. 3 Credit Hours.

A course in concert hall recording of live music including topics such as room acoustics, electrical signals, microphones, recording decks and editing systems. A quantitative approach to theory will be balanced by practical laboratory instruction. NOTE: The course is required for students who have elected the Music Technology Component.

Repeatability: This course may not be repeated for additional credits.

MUST 4714. Sound Editing. 3 Credit Hours.

A course in digital audio editing that applies principles and techniques learned in Sound Recording. Students work with ProTools software and complete a series of projects to develop listening and editing skills.

Repeatability: This course may not be repeated for additional credits.

MUST 4715. World Music. 3 Credit Hours.

How do different cultures hear music? What meanings does music have in society? This course will address these questions in traditional, popular, and Western-style musics around the world, with focus on the Caribbean, Japan, India, Indonesia, Latin America, and the Mediterranean. Discussions of concepts in ethnomusicology and contemporary social issues will be combined with hands-on performance.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance, Music Education, Music, Musical Theater.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 4716. Composing Music for Films. 3 Credit Hours.

Students learn to use MIDI equipment and software to compose music for synchronization to film and video. The vocabulary and technology of film production are taught, as well as an understanding of the function of music in documentary and experimental film and video. The course contains a laboratory component in which students develop sequencing skills and work with synchronized videotape.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4711.

MUST 4717. Counterpoint. 3 Credit Hours.

The principles of two- and three-part counterpoint and practical application in the form of the invention and three-part imitative writing of the 18th century.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 1712 or MUST 3770)

MUST 4718. Analysis. 3 Credit Hours.

A supplement and sequel to the analysis introduced in Music Studies 2703 (0160), Music Studies 3796 (W261) and Music Studies 2711 (C243). Development of aural perception techniques. NOTE: Individual assignments.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 2711 or MUST 3770)

MUST 4719. MIDI. 3 Credit Hours.

An introduction to the use of MIDI Technology, including basic synthesis, sound design, sequencing, and sampling.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4711.

MUST 4720. New Music Seminar. 1 Credit Hour.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 4721. Computer Music Studio. 3 Credit Hours.

Independent composition study following completion of either Music Studies 4719 (0346), Music Studies 4712 (0316), or Music Studies 4716 (0335).

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MUST 4712, MUST 4716, or MUST 4719)

MUST 4722. Advanced Orchestration. 2 Credit Hours.

Full scoring for orchestra and band, ranging from monody to complex texture.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3713.

MUST 4723. Score Reading. 3 Credit Hours.

A continuation of Music Studies 3741 (0241). Emphasis on reading from open score with the alto, tenor, and soprano clefs in addition to the G and F clefs. Also, modulation to remote keys, varied sequences.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3741.

MUST 4724. Printing Music Scores and Parts. 3 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

MUST 4725. Advanced Audio Production. 3 Credit Hours.

The class will focus on advanced skills of audio production based on skills learned in both Sound Recording (MUST 4713) and Sound Editing (MUST 4714). Work will be done on the most common Digital Audio Workstation, Pro Tools, but is applicable to all DAWs. Prerequisites are both Sound Recording (MUST 4713) and Sound Editing (MUST 4714).

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4713 and MUST 4714.

MUST 4727. Electronic Music Composition: Practice, History, Theory. 3 Credit Hours.

The history of electro-acoustic music, which is essential to music in the 20th century. Composers who wrote for electronic instruments include Edgard Varèse, Olivier Messaien and Paul Hindemith, the "musique concrète" school (Pierre Schaeffer, Pierre Henry, Edgard Varèse, etc.), Karlheinz Stockhausen, Gyorgi Ligeti, Luciano Berio, Milton Babbitt, John Cage, Iannis Xenakis, and Mario Davidovsky. These composers used unique and varied technologies in their music. New technologies soon crossed over into pop music, and now dominate commercial music and film. A dialogue between composers and engineers is now crucial in order to make all aspects of sound available to composers. This is available to composers, theorists, historians, and instrumentalists, who must master the extended techniques that are now an essential part of new music performance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 1711, MUST 1712, MUST 2711, and MUST 2712.

MUST 4730. Electronic Music Ensemble. 1 Credit Hour.

An opportunity to perform electro-acoustic and digital music using laptops, tablets, various sensors, controllers, synths and multi-channel speakers. Members act as performers, researchers, composers and software developers.

Repeatability: This course may be repeated for additional credit.

MUST 4731. Arts Enterprise. 3 Credit Hours.

Through this course, emerging arts professionals will understand and be able to plan for the economic impact of working as a freelance artist on their personal finances. Understanding fiscal principles and vocabulary will enable budget planning and long term personal economic impact assessments. Business fundamentals and the relationship between effective personal finance management and best business practices are explored.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College, Theater, Film & Media Arts.

Repeatability: This course may not be repeated for additional credits.

MUST 4732. Programming in Max. 3 Credit Hours.

This course will use the visual programming language Max to explore and implement various topics in electro-acoustic music and digital media. Topics covered will include digital sound synthesis (additive, subtractive and modulation synthesis), signal processing and sequencing. Students will learn mathematical and programming techniques for expressive digital audio signal processing and software design. Topics covered will include spectral audio programming, algorithmic synthesis, compiling, MIDI, OSC, mobile applications, live processing, and software architecture. Students will create their own interactive programs and algorithms modeled after course concepts and use these to compose a series of "études". Additionally, a working history of electronic music will complement course topics.

Repeatability: This course may not be repeated for additional credits.

MUST 4748. Composition Senior Seminar I. 3 Credit Hours.

A one-hour composition lesson every week for composition majors. NOTE: Attendance required for departmental concerts and special events.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3749.

MUST 4749. Composition Senior Seminar II. 3 Credit Hours.

A one-hour composition lesson every week for composition majors. NOTE: Attendance required for departmental concerts and special events.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4748.

MUST 4758. Composition Lesson VII. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 3759.

MUST 4759. Composition Lesson VIII. 3 Credit Hours.

Weekly composition lesson under supervision of the private teacher. The student is expected to create original work in acceptable professional notation. Works created during the semester will be reviewed by the composition faculty at the end of the term in a brief interview with the student.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MUST 4758.

MUST 4762. Introduction to Music Technology for Non-Majors. 3 Credit Hours.

Introduction to the ways in which computer software and hardware can be used to create, edit, and produce audio, music, and multimedia files. Various music styles and genres, such as hip hop, house, techno, ambient, drum and bass, EDM, experimental, and trap, will be explored through lectures, demonstrations, and hands-on individual and group projects. Additional topics will include working with loops, mixing audio, and the differences between various file formats. A final project is required that demonstrates the student's ability to create a complete musical project using a variety of audio software and file formats. The course is open to all students at Temple with the exception of Music Technology majors. A basic knowledge of music notation and the ability to read music are strongly recommended, though not required.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Music Technology.

Repeatability: This course may not be repeated for additional credits.

MUST 4780. Special Topics Music Studies. 1 to 4 Credit Hour.

Advanced focus upon a specific aspect of music studies.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Film and Media Arts, Music Studies, Music Education, Music, Theater.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College, Theater, Film & Media Arts.

Repeatability: This course may be repeated for additional credit.

MUST 4782. Independent Study. 1 to 4 Credit Hour.

The area of concentration selected by the student with the approval of the supervising teacher and Associate Dean.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 4785. Music Industry Internship. 3 to 4 Credit Hours.

This course is an intensive internship program designed to help students gain hands-on field experience in some aspect of the music industry of the student's choice. During the internship, students will learn how to polish their resumes and cover letters, make a business card, interview, network, and acquire job skills in their internship positions.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 4786. Music Industry Internship. 3 Credit Hours.

This course is an intensive internship program designed to help students gain hands-on field experience in some aspect of the music industry of the student's choice. During the internship, students will learn how to polish their resumes and cover letters, make a business card, interview, network, and acquire job skills in their internship positions.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

MUST 4799. Music History: Final Project. 3 Credit Hours.

This course will serve as a capstone project designed to help students synthesize experiences from their 3-plus years of coursework, while also preparing them for further study or employment after graduation. The student will choose an advisor and will work one-on-one with that mentor to design and complete this project. The nature and content of the final project will be up to the student, in consultation with the advisor, so that there is some flexibility based on the skills and interests of the student. Possible projects include: a research paper; a paper or presentation on pedagogy; a lecture/recital; an edition of an existing composition; transcription and analysis of jazz, non-western music, or contemporary music; an internship. Evaluation of the student's work will be based on the quality and originality of the final document, performance, or presentation.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Studies.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Music History.

Repeatability: This course may not be repeated for additional credits.

MUST 4882. Project in Music Technology. 3 Credit Hours.

This course is taken during the senior year. Under faculty approval and supervision, MUST 4882 will culminate in a significant capstone project. The project will require that students demonstrate an ability to integrate and synthesize basic musical and technological knowledge and skills in the conceptualization and creation of the final outcome, such as a piece of software, hardware, media product, or multimedia product. Student projects will be showcased and discussed by each student as a capstone event, open to the public. A written project proposal is due to the Program Director 4 weeks prior to registration.

Repeatability: This course may be repeated for additional credit.

Naval Science - Navy ROTC (NAVS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

NAVS 1001. Naval Orientation. 3 Credit Hours.

A three-hour course designed to familiarize the student with the history, characteristics and present employment of sea power. Particular emphasis is placed upon our naval forces and their capability in achieving and maintaining national objectives. Naval organization and operational functions are discussed in conjunction with sea power concepts. Additionally, the student is given an insight into the Naval Service, shipboard organization and safety, time-management skills and study techniques. NOTE: Fall only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 1002. Sea Power and Maritime Affairs. 3 Credit Hours.

A three-hour course providing a broad survey of naval history designed to add historical perspective to current defense problems. Topics include: naval power as an aspect of national defense policy, navies as an instrument of foreign policy, strategy selection, resource control, technology, and personnel management. NOTE: Spring only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 1003. Naval Science Drill. 0 Credit Hours.

A no-credit laboratory promoting naval leadership and professional development. While emphasis is given to military drill, leadership development, and physical fitness, the course also includes lectures from sources in and out of the Navy. Guest speakers cover topics on leadership, Navy career paths, equal opportunity, rights and responsibilities, AIDS awareness, terrorism/counter-terrorism, naval warfare doctrine, employment of naval forces, ethics and values, operations security, and safety. NOTE: This course is taken at the University of Pennsylvania.

Repeatability: This course may be repeated for additional credit.

NAVS 2001. Leadership & Management. 3 Credit Hours.

This three-hour course emphasizes principles of leadership, personnel and material management, and subordinate development in the context of the naval organization. Practical applications are explored through experiential exercises and case studies. NOTE: Fall only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 2002. Navigation. 3 Credit Hours.

A three-hour course, with comprehensive study of the theory and practice of terrestrial, celestial, and electronic navigation and the laws of vessel operations. Topics include fundamentals of coastal and harbor piloting, nautical astronomy, electronic navigation, and means of navigating without reference to land. International and inland nautical Rules of the Road are studied. Case studies and practical exercises are used to reinforce the fundamentals of marine navigation. NOTE: Spring only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 3001. Naval Ships Systems I: Engineering. 3 Credit Hours.

A three-hour course designed to familiarize the student with the engineering concepts necessary for an understanding of the structural design and mechanical operation of naval vessels. Emphasis is placed on: understanding the methods used for propulsion, including nuclear, internal combustion and gas turbine engines; understanding the generation and distribution of electrical power; analyzing various shipboard support systems used (such as distillation and air conditioning); and, basic considerations and techniques for hull design of naval vessels, including the concepts of buoyancy, equilibrium, stability, and the effects of flooding on the design characteristics. NOTE: Fall only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 3002. Naval Ships Systems II: Weapons. 3 Credit Hours.

A three-hour course on the theory and concepts of weapon systems are examined using the systems approach. Topics include: sensors and detection systems, tracking systems, computational systems, weapon delivery systems, the fire control problem, and systems integration. This course provides preliminary insight into the basic principles that lead to further development and comprehension of the technology underlying all modern weapon systems. Case studies used to illustrate and reinforce concepts introduced in the course. NOTE: Spring only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 3003. Evolution of Warfare. 3 Credit Hours.

This three-hour course is designed to add broad historical perspective to understanding military power. Treating war and the military as an integral part of society, the course deals with such topics as: war as an instrument of foreign policy, military influences on foreign policy, the military as a reflection of society, budgetary operations, personnel management and strategy selection. NOTE: Offered in even-numbered years. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 4001. Naval Operations and Seamanship. 3 Credit Hours.

Three-hour course on modern naval operations including relative motion analysis pertaining to ships at sea, underway replenishment, naval meteorology, ship handling, and tactical communications. The process of command and control and leadership is examined through case studies of actual incidents at sea. NOTE: Fall only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 4002. Leadership and Ethics. 3 Credit Hours.

The capstone, three-hour course of the NROTC curriculum provides the ethical foundation and basic leadership tools to be effective Navy/Marine Corps officers. The topics of responsibility, accountability, ethics, the law of armed conflict, military law, division organization and training, and discipline are introduced through practical exercises, group discussion, and case studies. NOTE: Spring only. This course is taken at the University of Pennsylvania.

Repeatability: This course may not be repeated for additional credits.

NAVS 4003. Fundamentals of Maneuver Warfare. 3 Credit Hours.

This course prepares future military officers and other leaders for service by studying modern tactical principles, current military developments, and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine. There is a specific focus on the United States Marine Corps as the premier maneuver warfighting organization. Study also includes historical influences on tactical, operational, and strategic levels of maneuver warfare practices in the current and future operating environments.

Repeatability: This course may not be repeated for additional credits.

Neuroscience - CLA (NSCI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

NSCI 0817. Brain Matters. 3 Credit Hours.

One of the last frontiers in science is the brain. We know a great deal about the structure and function of the brain and nervous system, but it is challenging to comprehend fully the complexity of a system made up of 100 billion components that are interacting with one another using tens of trillions of connections that can change and rewire during development and aging. Neuroscience is the multidisciplinary field in which brain research falls.

Neuroscience is one of the fastest growing domains in all of science - and good bet for a future career path. Neuroscientists investigate brain function from the level of molecular genetics, to cellular dynamics, to brain anatomy and physiology, to relations between brain, behavior, and cognition, to brain development and aging, to diseases of the brain. In this course, we will touch on knowledge about the brain at all these levels, and more. We will also discuss case studies of brain impairment. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed Psychology 0817.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

NSCI 1002. Careers in Neuroscience. 1 Credit Hour.

This course will cover the wide range career options available in Neuroscience, focusing on what is possible with an undergraduate and graduate degree. Traditional career paths will be discussed, such as medicine and research, as well as "non-traditional" paths in clinical/science administration. We will then focus on professional development. Topics covered will include inviting guest speakers that can provide information about where to find research/volunteering/job opportunities, workshops on resumes and personal statements, and practice with public speaking in various science-specific formats (science presentations and job/school interviews). By the end of this course, you will be well versed in what a degree in Neuroscience can provide you, and you will have the professional skills and application materials to prepare for this career. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

NSCI 1051. Fundamentals of Neuroscience. 3 Credit Hours.

One of the last frontiers in science is the brain. Neuroscience is one of the fastest growing domains in all of science - and a good bet for a future career path. Neuroscientists investigate brain function from the level of molecular genetics, to cellular dynamics, to brain anatomy and physiology, to relations between brain, behavior and cognition, to brain development and aging, to diseases of the brain. In this course, we will touch on knowledge about the brain at all of these levels. The major course goal is to introduce you to neuroscience and its multidisciplinary dimensions.

Repeatability: This course may not be repeated for additional credits.

NSCI 1951. Honors Fundamentals of Neuroscience. 3 Credit Hours.

One of the last frontiers in science is the brain. Neuroscience is one of the fastest growing domains in all of science - and a good bet for a future career path. Neuroscientists investigate brain function from the level of molecular genetics, to cellular dynamics, to brain anatomy and physiology, to relations between brain, behavior and cognition, to brain development and aging, to diseases of the brain. In this course, we will touch on knowledge about the brain at all of these levels. The major course goal is to introduce you to neuroscience and its multidisciplinary dimensions. Note: Students who have received credit for NSCI 1051 will not receive additional credit for this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

NSCI 2001. Functional Neuroanatomy. 3 Credit Hours.

This course provides a broad overview of the structures of the brain and their function. Gross anatomy of the central nervous system will be covered. The organization of the major neural systems underlying sensory, motor, and cognitive function will be emphasized.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951)

NSCI 2121. Development/Plasticity/Repair. 3 Credit Hours.

The major aim of this course is to present the neurobiology of development from conception to birth and neurological and behavioral development in infancy and childhood. The initial emphasis is on embryonic and fetal development of the central nervous system and emergent behavioral plasticity. Sensory and motor developments in the fetus are examined. Postnatal development of the cerebral cortex and behavioral outcomes are explored in the context of environmental effects that can amplify or inhibit adaptive capacity. Biological (e.g., genetic) and environmental (e.g., parenting) influences on brain development of emotion and cognition are addressed. The tremendous plasticity of the brain is emphasized. Plasticity is the ability of the nervous system to respond to change. Neural malleability is maximal in early development, but the capacity for change and repair in the nervous system is maintained throughout life.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951) and (NSCI 2122 or BIOL 1012)

NSCI 2122. Cellular Neuroscience. 3 Credit Hours.

An exciting scientific frontier is the molecular genetics and cellular dynamics of brain function. This course addresses phenomena at a cellular and molecular level that underlie brain plasticity and function. The cellular basis of the nervous system, some genetic factors involved in neural cell division and proliferation, proteins enabling neural receptor function, and molecules that comprise neurotransmitters will be covered. The molecular cascade that is initiated by glutamate release and responses of AMPA and NMDA receptors that results in genetic changes and structural formation of synapses is one example of molecular mechanisms to be addressed in this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951)

NSCI 2222. The Neurobiology of Disease. 3 Credit Hours.

Advances in basic neuroscience research have the potential to lead to understanding, treatment, and even cures for major nervous system disease. This course will provide students with state-of-the-art knowledge about applied neuroscience - the causes and treatment of some major diseases of the central nervous system. There is an emphasis on neuropathologies at all points of the life span - from diseases in infancy such as Phenylketonuria and Tay Sachs disease, to diseases in adulthood such as Multiple Sclerosis, AIDS and forms of demyelination caused by the JC virus, to neurodegenerative diseases of old age such as Alzheimer's disease and Parkinson's disease.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951) and NSCI 2001.

NSCI 3000. Current Topics in Neuroscience. 3 Credit Hours.

The goal of this class is to explore in depth a current topic in neuroscience. Potential topics include addiction, schizophrenia, Alzheimer's disease, memory reconsolidation, and more. Note: A semester's course will cover one topic in depth and not cover multiple topics. In addition, students will also read primary literature (research articles), lead a 10 minute discussion on an article, write a review on a related topic, and present slides with their view. These exercises are intended to promote scientific analysis and the development of public speaking and writing skills.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951), PSY 1003, and NSCI 2001.

NSCI 3002. Neurobiology of Pain and the Opioid Epidemic. 3 Credit Hours.

This course will investigate the neural and psychological perspectives on pain and the opioid epidemic. We will begin with an evolutionary and historical view of why pain exists and how it was treated before the advent of modern medicine. Next, we will discuss the neurological underpinnings of both acute and chronic pain, focusing on pain pathways at the peripheral level and the role of the limbic system in pain at the central level. Next, we will address the pharmacology of pain treatments and the disorders they treat, with heavy focus on opioids and the current epidemic. This discussion will be facilitated using the book "Dreamland" that details the origins and impact of the opioid epidemic. Our reading and discussions of "Dreamland" will help provide historical context for the opioid epidemic, and allow us to explore the societal implications of addiction. Furthermore, the book will allow us to critically look at the major institutions and groups that played a role in the epidemic, from the dealers to pharmaceutical companies to physicians. By the end of the course, you will have an in-depth knowledge of the basic science of pain processing, pathways involved in addiction, and the broader origins of opioid addiction in the United States.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in NSCI 2001.

NSCI 3005. Affective Neuroscience. 3 Credit Hours.

The brain is not just a thinking machine; it is also a feeling machine. This course explores the neural substrates behind emotions such as love, trust, fear, and pleasure. We will also discuss the relationship between emotions and cognition, the effect of emotions on animal and human behavior, and the biological basis of affective disorders such as anxiety and depression.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and PSY 1003.

NSCI 3006. Stress and the Brain. 3 Credit Hours.

Stress, in some form or other, is part of our everyday lives. How we respond to stress can either ensure our immediate survival or threaten long-term physical and mental well-being. This course will survey the clinical and preclinical research to understand how the brain initiates stress responses, and how stress, in turn, impacts the brain to alter behavior. The role that stress plays in the development of disorders, such as depression and post-traumatic stress disorder, will also be explored.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and PSY 1003.

NSCI 3007. Neuropharmacology of Drugs of Abuse. 3 Credit Hours.

This course will explore how drugs of abuse act within the brain. We will discuss the acute and longterm effects of selected drugs of abuse on behavior, mood, cognition and neuronal function and material from studies with humans is integrated with basic studies on the neurobiological basis of drug action and drug abuse -- including detailed coverage of synaptic transmission and the distribution, regulation and integration of brain neurotransmitter systems. The focus is on addictive or illicit drugs, and all the major classes are discussed, including: opiates (heroin, morphine, opium), sedative - hypnotics (alcohol, barbiturates, chloral hydrate), anxiolytics (benzodiazepines), psychomotor stimulants (amphetamine, cocaine), marijuana, hallucinogens (LSD, mescaline), hallucinogenic-stimulants (MDA, MDMA), and dissociative anesthetics (PCP).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and PSY 1003.

NSCI 3008. Decision Neuroscience. 3 Credit Hours.

How do we make decisions in social and economic contexts? What factors influence our decisions? How can neuroscience be used to better understand our decisions? To answer these questions, this course focuses on how new research in neuroscience, psychology, and behavioral economics shapes our broader understanding of decision making. The topics covered in the course include functional organization of key brain systems, approaches to measuring and interpreting neuroscience data, methods for measuring decision-making behavior, economic and cognitive modeling, and impact of neuroscience on real-world decision-making. Emerging topics will include applications in policy, marketing, and finance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 1003 and (PSY 2104, PSY 2501, PSY 2502, or NSCI 2001)

NSCI 3013. Behavioral Epigenetics. 3 Credit Hours.

In the broadest sense, the term epigenetics refers to the study of environmental influences on gene expression. These processes encompass a multitude of mechanisms by which DNA is regulated, all of which are independent of DNA mutation. Epigenetic modifications are highly dynamic and respond quickly to environmental changes, such as diet or stress. Epigenetic marks represent concrete mechanisms for the long-held idea that biology and behavior are shaped by complex interactions between genetic and environmental factors. Some of these epigenetic marks are passed on to future generations via the germline and influence neuroprogramming in the next generation offspring. In the brain, where most neurons are post-mitotic, epigenetic processes play a critical role in regulating gene expression and synaptic plasticity, which are pivotal events for the regulation of behavior.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in NSCI 1051.

NSCI 3087. Techniques in Neuroscience. 3 Credit Hours.

A major reason that neuroscience is such a dynamic and rapidly advancing field is that it relies on cutting edge technology. Throughout the history of neuroscience, advances have come with the development of new techniques. In this course, students will learn about a variety of traditional techniques in basic and clinical neuroscience as well as newly developed techniques driving the field to new insights. Methods to be discussed will be selected from among: genetic assays, genotyping, histology, immunohistochemistry, stereotaxic surgery, electrophysiology (patch clamping, single and multiple unit recording, EEG), behavioral assessment of animals, neuropsychological assessment in humans, human electrophysiology, transcranial magnetic stimulation, MRI and fMRI. From among identified neuroscience techniques, students will select one and prepare a demonstration or video.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951) and NSCI 2122.

NSCI 3096. Conducting Neuroscience Research. 3 Credit Hours.

The objective of this writing intensive course is to develop critical thinking and analytical skills necessary for applying the scientific method in neuroscience. In the course, students will complete readings of primary sources, discuss literature, and participate in activities to strengthen research abilities. This experience will reinforce key methodological and statistical concepts that were taught earlier in the curriculum, while stimulating growth in understanding neuroscience and research processes in general. Students will present reports in writing and in class presentations.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951), PSY 1003, and (NSCI 2001 or NSCI 2122)

NSCI 3602. Clinical Neuropsychology. 3 Credit Hours.

This course will provide background on basic functional anatomy of the central nervous system and neuropsychological theories and methods. The primary focus of the course will be the clinical assessment and treatment of neuropsychological disorders, such as aphasia, agnosia, dementia, and others. NOTE: This course is cross-listed with PSY 3602; students will receive credit for only one of these two courses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

NSCI 3604. Food on the Brain. 3 Credit Hours.

This course is about food and eating from a variety of perspectives including from a neuroscience, developmental, and an individual differences perspective. We will review the neurobiology of tasting and consuming food; examine lifespan and gender differences. We will examine eating in healthy individuals but also will cover health and clinical psychology topics such as eating and weight disorders. We will review the current understanding of food as an addictive substance and consider food and eating occurs within a social and environmental context.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 1003 and (PSY 2601, HRPR 2103, or NSCI 2001)

NSCI 3900. Honors Special Topics. 3 Credit Hours.

The goal of this Honors class is to explore in depth a current topic in neuroscience. Potential topics include addiction, schizophrenia, Alzheimer's disease, memory reconsolidation, and more. Note: A semester's course will cover one topic in depth and not cover multiple topics.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

NSCI 4182. Independent Study in Neuroscience 1. 1 to 4 Credit Hour.

Neuroscience majors are encouraged to gain first-hand experience with research as provided by Independent Study. This course is available in the laboratories of neuroscience faculty members at Temple University listed on the Neuroscience web site: www.temple.edu/cla/neuroscience. Students will carry out supervised neuroscience research by observing and participating in ongoing research in the laboratory. This course requires the student to spend 3-4 hours per credit per week of a 14-week semester in the lab.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Neuroscience.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951)

NSCI 4191. Collaborative Research I. 1 to 4 Credit Hour.

Faculty advisor needed for research in a particular area. For projects outside Temple University, approval must be obtained through a faculty member who will handle the liaison with the outside institution and ensure uniformity of requirements.

Repeatability: This course may be repeated for additional credit.

NSCI 4197. Capstone in Neuroscience. 4 Credit Hours.

The focus of this capstone is a topic important to many domains in neuroscience. Different topics will be covered in different semesters. This course has two major components: (1) instruction and practice on scientific writing of research papers and proposals, and instruction and practice on oral presentations; (2) Integration of content in basic and clinical neuroscience. The course will allow students to follow issues in neuroscience from cellular and molecular levels to translation and application in human life. The emphasis is on synthesis and application of material learned in the neuroscience major. NOTE: This course is limited to neuroscience majors in their senior year.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Neuroscience.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in NSCI 3087.

NSCI 4282. Independent Study in Neuroscience 2. 1 to 4 Credit Hour.

Neuroscience majors are encouraged to gain first-hand experience with research as provided by Independent Study and may take up to 8 independent study credits. Independent Study in Neuroscience 2 follows Neuroscience 4182, Independent Study in Neuroscience 1, and can be taken in the same laboratory or in another lab of a neuroscience faculty member at Temple University. Faculty members sponsoring this course are listed on the Neuroscience web site: www.temple.edu/cla/neuroscience. Students will carry out supervised neuroscience research by observing and participating in ongoing research. This course requires the student to spend 3-4 hours per credit per week of a 14-week semester in the lab.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Neuroscience.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (NSCI 1051 or NSCI 1951)

NSCI 4291. Collaborative Research II. 1 to 4 Credit Hour.

Faculty advisor needed for research in a particular area. For projects outside Temple University, approval must be obtained through a faculty member who will handle the liaison with the outside institution and ensure uniformity of requirements.

Repeatability: This course may be repeated for additional credit.

New Media Interdisciplinary (NMIC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

NMIC 1451. Survey of New Media. 3 Credit Hours.

This lecture course introduces the history and theory of computer/telecommunications media and new media arts. Today's convergence of computational, telecommunications and audiovisual media is transforming human interaction at personal, local and global levels. Paradoxically it has introduced new modes of alienation while creating new means of contact. Simulation and interactivity suggest new kinds of realism. Random-access databases offer both greater control of information and the emergence of hypermedia narratives that allow the reader to get lost in information. Readings include the commentaries and works of philosophers, theorists, writers and artists and draw on theoretical and historical texts, fiction, interactive multimedia, audiovisual media and the internet.

Repeatability: This course may not be repeated for additional credits.

NMIC 2002. Introduction to Interdisciplinary New Media 2. 3 Credit Hours.

Designing for a public community. The class will investigate both the technological and theoretical issues associated with public space, installation, information design and accessibility. The class assignment is to design an interactive experience in public space.

Repeatability: This course may not be repeated for additional credits.

NMIC 3001. Design and Visual Language. 4 Credit Hours.

An introduction to creating, planning and producing visual communication design for the screen and print. Examining composition, typography as an element of information design and the interaction of color and form, text and image. Exploring the computer in relation to print animation, web and interactivity.

Repeatability: This course may not be repeated for additional credits.

NMIC 3002. Physical Computing. 4 Credit Hours.

Physical Computing is an approach to learning how humans communicate through computers that starts by considering how humans express themselves physically. Students spend a lot of time building circuits, soldering, writing programs, building structures to hold sensors and controls, and figuring out how best to make all of these things relate to a person's expression.

Repeatability: This course may not be repeated for additional credits.

NMIC 3010. Special Topics in Production. 4 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 3020. Special Topics. 4 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 3030. Special Topics in New Media. 4 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 3040. Special Topics. 4 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 4001. New Media Synthesis. 4 Credit Hours.

A capstone course in the New Media Interdisciplinary Concentration. A studio and critique based class for the development of a portfolio project suitable for grant and school applications. Projects will be conceptualized, prototyped and written about in a proposal format.

Repeatability: This course may not be repeated for additional credits.

NMIC 4002. Neighborhood Narratives. 4 Credit Hours.

Neighborhood Narratives is an out-of-the-classroom New Media interdisciplinary education project. It introduces students to the concept of locative media, where all types of media (analogue, digital, text, sound, image, etc.) are applied to real places and thus trigger real social interactions. The class researches the relationship between the self and place, the reciprocal action between what we carry with us and how we find our way through an urban landscape. Students design their own projects, using alternative methods that tie their stories to the environment at hand. The class provides a context within which to explore new and old models of communication, community and exchange. Neighborhood Narratives links the Philadelphia main campus of Temple University with its international campuses in London, Tokyo and Rome. The international network of classes videochats with each other throughout the semester, sharing their experiences and projects. All the location-based stories from each site are connected and archived using the web and mobile telephones. The final assignments are presented on location in the city.

Repeatability: This course may be repeated for additional credit.

NMIC 4003. Game of Life. 4 Credit Hours.

How can observation and participation in everyday life be translated into gaming structures? The class will review a broad sample of both traditional and electronic games. Students will be given assignments and readings to provoke analysis of digital environments, to explore interactive narrative, and to inspire the creation of an interactive universe of their own construction.

Repeatability: This course may not be repeated for additional credits.

NMIC 4010. Special Topics. 3 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 4020. Special Topics. 3 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 4030. Special Topics. 3 Credit Hours.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 4040. Special Topics. 1 to 4 Credit Hour.

Rotating class in New Media. Please check www.temple.edu/nmic for details or contact h.iverson@temple.edu.

Repeatability: This course may be repeated for additional credit.

NMIC 4082. Independent Study. 1 Credit Hour.

Directed projects and independent study in interdisciplinary new media. Topics will vary.

Repeatability: This course may be repeated for additional credit.

Nursing (NURS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

NURS 1001. Introduction to Professional Nursing. 3 Credit Hours.

This course begins with an introduction to professional nursing, exploring its past, present, and future. It examines the role of the nurse in community and acute care settings. Essential concepts such as health and illness, therapeutic communication, and ethics are explored as they relate to the role of the nurse in the delivery of health care. The application of mathematics in safe medication administration is introduced.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Repeatability: This course may not be repeated for additional credits.

NURS 1003. Introduction to the Nursing Profession. 1 Credit Hour.

This course begins with an introduction to professional nursing, exploring its past, present and future. It examines the role of the nurse in community and acute care settings. Essential concepts such as health and illness, therapeutic communication and ethics are explored as they relate to the role of the nurse in the delivery of health care.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Repeatability: This course may not be repeated for additional credits.

NURS 1089. Nursing and Healthy Lifestyles Management. 3 Credit Hours.

This course focuses on the role of the nurse in health promotion and disease prevention for individuals in the community through the use of interventions that support lifestyle changes. The links between lifestyle issues such as nutrition, stress management and physical activity, and disease prevention are explored. Specific topics will include: key trends in the US diet; diet-related disease; weight management approaches; food sources, policies and their implications; physical activity and other behaviors; supporting therapeutic lifestyle changes; physiological stress factors; and life expectancy and quality issues. A fieldwork experience provides an opportunity for students to practice communication techniques and apply theoretical concepts within a community setting focusing on education for health promotion, risk reduction, and disease prevention across the lifespan.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (NURS 1001 or 'Y' in CRNU02)

NURS 2001. Ethical, Legal and Social Implications of Genetics and Genomics. 3 Credit Hours.

This course explores genetic concepts and principles as major determinants of population health, with the definition of population, such as the food supply and other ecosystems, extended beyond humanity, when applicable. Genetic and genomic (G and G) theory and research are discussed, with an emphasis on how genes interact with each other and the environment in ways that create problems or predispose individuals and other biological organisms to common health-threatening conditions such as heart disease, arthritis, diabetes, cancer, immune-pathologies or genome alteration, including germline gene alteration. Translation of G and G principles into clinical practice and other scientific applications are considered, including recognition of disease patterns among genetically related groups. Theories of ethical and legal principles and their extension to current genetic applications, especially human clinical practice situations, are examined. Completion of first year science courses is highly recommended. For example, a first-year introductory biology course or Anatomy and Physiology are recommended prerequisites, as well as appropriate courses covering basic genetic theory. This course is offered to nursing students and others in the Temple University College of Public Health (CPH), the Honors Program or even interested undergraduates beyond CPH.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

NURS 2144. Health Assessment. 3 Credit Hours.

An introductory course to health assessment is presented with emphasis on understanding the range of normal and common abnormal findings. The focus is on individuals across the lifespan including newborn, pediatric, adult, and geriatric populations. Theory and practice focus on effective interviewing for the health history, health assessment techniques, and systematic method of recording data. Defining characteristics of nursing diagnoses are identified. Principles of therapeutic communication and critical thinking are emphasized.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 2189, NURS 2261.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CHEM 1021, 'Y' in CHM4, or 'Y' in CRCH08), (CHEM 1023, 'Y' in CHM5, or 'Y' in CRCH09), (KINS 1224, 'Y' in KIN2, or 'Y' in CRKI03), and (NURS 1089 or 'Y' in CRNU06)

NURS 2189. Nursing Community Home I. 1 Credit Hour.

This course is the first of five courses in the major that situates the student in a selected community with a focus on the underserved and service learning. The role of the generalist practice nurse in the care of the community is emphasized. The student primarily engages in health promotion and teaching (primary prevention) within a framework of collaborative community engagement and decision-making that is data-driven and integrates community norms and practices.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 2144, NURS 2261.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CHEM 1021, 'Y' in CHM4, or 'Y' in CRCH08), (CHEM 1023, 'Y' in CHM5, or 'Y' in CRCH09), (KINS 1224, 'Y' in KIN2, or 'Y' in CRKI03), and (NURS 1089 or 'Y' in CRNU06)

NURS 2261. Pharmacology for Generalist Nursing Practice. 3 Credit Hours.

The major classifications of drugs are examined with particular attention to principles of pharmacokinetics, pharmacodynamics, and pharmacotherapeutics. The role of the generalist practice nurse in the management of client care as it relates to medication therapy is delineated. Particular emphasis is placed on teaching individuals and community groups about medications and the nurse's responsibilities in preventing medication errors.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CHEM 1021, 'Y' in CHM4, or 'Y' in CRCH08), (CHEM 1023, 'Y' in CHM5, or 'Y' in CRCH09), (KINS 1224, 'Y' in KIN2, or 'Y' in CRKI03), and (NURS 1089 or 'Y' in CRNU06)

NURS 2289. Community Home II. 1 Credit Hour.

This course is the second of 5 courses in the major that situates the student in the community with a focus on the underserved and service learning. Primary prevention is explored further. Education, health care trends and accessibility and availability of resources that promote health and well-being will be considered and will inform design and evaluation of meaningful nursing interventions.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 2589.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 2189, (NURS 2261 or 'Y' in CRNU04), (NURS 2144 or 'Y' in CRNU03), and (BIOL 2001, 'Y' in BIO9, or 'Y' in CRBI09)

NURS 2589. Generalist Nursing Practice I: Principles of Care and Clinical Decision Making. 5 Credit Hours.

Through a combination of classroom, laboratory and fieldwork activities students learn how to develop the plan of care and implement essential therapeutic interventions for common health problems from a theoretical research base. Students are challenged to engage in clinical decision-making in the management of client care and the application of integrated nursing therapeutics for clients experiencing common health alterations.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 2289.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 2189, (NURS 2261 or 'Y' in CRNU04), (NURS 2144 or 'Y' in CRNU03), and (BIOL 2001, 'Y' in BIO9, or 'Y' in CRBI09)

NURS 2901. Honors Ethical, Legal and Social Implications of Genetics and Genomics. 3 Credit Hours.

This course explores genetic concepts and principles as major determinants of population health, with the definition of population, such as the food supply and other ecosystems, extended beyond humanity, when applicable. Genetic and genomic (G & G) theory and research are discussed, with an emphasis on how genes interact with each other and the environment in ways that create problems or predispose individuals and other biological organisms to common health-threatening conditions such as heart disease, arthritis, diabetes, cancer, immune-pathologies or genome alteration, including germline gene alteration. Translation of G & G principles into clinical practice and other scientific applications are considered, including recognition of disease patterns among genetically related groups. Theories of ethical and legal principles and their extension to current genetic applications, especially human clinical practice situations, are examined. Completion of first year science courses is highly recommended. For example, a first-year introductory biology course or Anatomy and Physiology are recommended prerequisites, as well as appropriate courses covering basic genetic theory. This course is offered to nursing students and others in the Temple University College of Public Health (CPH), the Honors Program or even interested undergraduates beyond CPH.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

NURS 3089. Generalist Nursing Practice II: Medical Surgical and Psychiatric Nursing. 6 Credit Hours.

This course focuses on the application of theories, concepts, research, and issues related to the care of clients, across the lifespan, with identified chronic health problems in need of secondary health care services. Concepts of disability, rehabilitation, mental illness, cancer, and other chronic illnesses are explored. Students will engage in the management of care for clients with chronic diseases and/or disabilities. Related issues of development, diagnosis, treatment, and family concerns are included. Fieldwork experiences will include sites along the continuum of care including acute inpatient, rehabilitation, long-term care and hospice facilities, as well as clients' homes. Involvement of the client, family and community as integral members of the health care team is emphasized. End of life issues and hospice care are also addressed.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 3289.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (NURS 2589 or 'Y' in CRNU01), NURS 2289, (PSY 2301 or 'Y' in CRPS04), and (SBS 1104 or 'Y' in CRSB01)

NURS 3189. Generalist Nursing Practice III: Maternal Child Health Nursing. 6 Credit Hours.

This course focuses on the application of theories, concepts, research, genetics, and issues related to the primary and secondary management of reproductive health and the primary care of children. The student will provide nursing care to the new family, explore normal growth and development of the child from the embryonic stage through adolescence, and engage in interventions aimed at supporting women's and men's reproductive health throughout the lifespan. Health promotion, health maintenance, major health concerns, common illnesses, cultural practices, and their influences on each developmental stage will be explored.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Co-requisites: NURS 3305, NURS 3489.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (NURS 3089 or NURS 3789), NURS 3289, and (EPBI 2219 or 'Y' in CREP01)

NURS 3204. Perspectives on Health I: Thinking Globally. 3 Credit Hours.

This is the first part of a two course sequence that examines social determinants of health. Epidemiological concepts provide foundational tools needed to compare and contrast the health status of persons living in developing and developed societies. Students delve into the social, political, behavioral, environmental, and occupational determinants of health at the global level through resources commonly used in international health. Disparities in health and access to health care will be examined. The independent role that nurses play in the promotion, restoration, maintenance and advocacy of health in the global arena is highlighted. Students will be introduced to professional international nursing communities and a variety of organizations involved in global health.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Co-requisites: NURS 3305, NURS 3489, NURS 3789.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3289, NURS 3689, NURS 4296, and (EPBI 2219, 'Y' in STT6, or 'Y' in CREP01)

NURS 3289. Nursing Community Home III. 1 Credit Hour.

This course is the third of five courses in the major that situates the student in a selected community with a focus on the underserved and service learning. The role of the generalist practice nurse in the care of the community is further developed, with a focus on the decision-making team, the emerging role of the nurse as a leader and health advocate in the community setting and the design, implementation and evaluation of nursing interventions to meet community need that address primary and secondary prevention.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 3089.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 2289, (NURS 2589 or 'Y' in CRNU01), (SBS 1104 or 'Y' in CRSB01), and (PSY 2301, 'Y' in PSY3, or 'Y' in CRPS04)

NURS 3296. Perspectives on Health, Thinking Globally. 3 Credit Hours.

This course examines social determinants of health and epidemiological concepts, providing foundational tools needed to compare and contrast the health status of persons living in developing and developed countries. Students delve into the social, political, behavioral, environmental, and occupational determinants of health at the global level through resources commonly used in global health. Disparities in health and access to health care will be examined. The integral role that nurses play in the promotion, maintenance, restoration and advocacy of health in the global arena is highlighted. Throughout the semester, students will work on developing a program planning proposal for a specific health-related concern and will be provided with instructor feedback on multiple drafts. Students will be introduced to global nursing communities.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3089 and NURS 3289.

NURS 3305. Evidence Based Practice and Nursing Research: Analysis and Critical Appraisal. 3 Credit Hours.

This course serves to cultivate a foundational understanding of the research process and the practice of evidence-based care. Translation of research findings into the clinical practice environment will be emphasized. The interaction of theory, research, and clinical expertise in the development of evidence-based practice is examined. Strategies for critically reviewing, integrating, and disseminating findings from clinical research will be discussed as well as the implications of findings for nursing practice. Through the development of evidence-based practice projects, confidence with evaluating studies using informatics and understanding research and research implementation processes is gained. The conduct of research in an ethical context is explored.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3089, NURS 3289, and (EPBI 2219 or 'Y' in CREP01)

NURS 3389. Perspectives on Health II: Acting Locally. 3 Credit Hours.

This course is the second half of a two-course sequence concerned with the determinants of health. Application of theoretical knowledge attained from prior courses is emphasized. In collaboration with a previously selected oppressed community, a fieldwork project aimed at promoting health in the selected community is carried out. The design, implementation, and critical evaluation of the project are essential components.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (NURS 4889 or 'Y' in CRNU05), NURS 4589, and NURS 4198.

NURS 3489. Community Home IV. 1 Credit Hour.

This course is the fourth of five courses in the major that situates the student in a selected community with a focus on the underserved and service learning. The role of the generalist practice nurse in the care of the community is expanded to include nursing interventions that address tertiary prevention and chronic disease management, while maintaining interventions that promote health (primary prevention) and prevent progression and support remission of risk conditions (secondary prevention).

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 3189.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3289, NURS 3089, and (EPBI 2219 or 'Y' in CREP01)

NURS 4000. Special Topics. 1 Credit Hour.

Topics may vary semester to semester. Please check Class Schedule in Self Service Banner for specific topic.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 4889.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in NURS 3489, NURS 3789, NURS 3204, and (NURS 3305 or 'Y' in CRNU07)

NURS 4198. Health Policy and Economics. 3 Credit Hours.

This writing-intensive course focuses on the roles of economics, policy, legislation, and regulation in regard to health care and public health services in the U.S. Emphasis is placed on social, cultural, economic, and demographic factors that have had an impact on health care policy, with particular focus on distributive justice in health care. Students explore relationships between broad societal constructs and the evolution of nursing legislation from generalist to advanced practice licensure and certification. Basic principles of access, equity, quality care, and health promotion and prevention are discussed and debated within the broad context of health insurance in the U.S. Students explore the effects of federal health care and social welfare programs on the quality and quantity of nursing care delivered.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3189, NURS 3489, NURS 3296, and (NURS 3305 or 'Y' in CRNU07)

NURS 4489. Senior Seminar: Evidence Based Practice Fieldwork Experience. 3 Credit Hours.

This is sequentially the final course in the nursing major. In collaboration with partner agencies, a relevant practice issue is identified and an evidence-based practice project is produced. Emphasis is placed on the critique and synthesis of relevant literature and other sources of evidence. Formulation of recommendations for practice, planning for implementation, and the development of evaluation strategies are key components. Awareness of the effect of cultural beliefs, values, and practices of individuals, families, and communities on healthcare preferences is an essential element. Systems of structural power, social justice, and ethics are integrated into practice.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Co-requisites: NURS 4885.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 4198, NURS 4589, and (NURS 4889 or 'Y' in CRNU05)

NURS 4589. Community Home V. 1 Credit Hour.

This course is the final of five courses in the major that situates the student in a selected community with a focus on the underserved and service learning. Integration of the many roles of the generalist practice nurse in the care of the community occurs, which includes interventionist, leader, health advocate and informed member of the health team. Benefit and necessity of a holistic review that incorporates an understanding of the social determinants of health, the cultural and current normative practices of the population of interest, timely surveillance data and collaboration with a range of professional and community stakeholders is recognized as foundational to designing, implementing and evaluating meaningful and sustainable interventions to meet community need and improve health outcomes.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 4889.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3189, NURS 3489, NURS 3296, and (NURS 3305 or 'Y' in CRNU07)

NURS 4882. Independent Study in Nursing. 1 to 6 Credit Hour.

Individual study of a theoretical or clinical nursing problem or topic. Student-initiated focus under the guidance of appropriate faculty.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing.

Repeatability: This course may be repeated for additional credit.

NURS 4885. Generalist Nursing Practice Internship. 3 Credit Hours.

The internship experience is designed to prepare the student to function as a graduate nurse and focuses on the integration and synthesis of scientific knowledge with clinical nursing practice and the development of the professional nursing role. During this course the student is paired with a professional nurse. Students select a practice area from a variety of options in primary, secondary, or tertiary care settings. Students provide the full range of direct and indirect nursing care and evaluate the outcomes of care. Principles of leadership, accountability, and self-regulation will be applied to clinical practice as the student operationalizes the professional nursing role.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Co-requisites: NURS 3389, NURS 4489.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (NURS 4889 or 'Y' in CRNU05), NURS 4589, and NURS 4198.

NURS 4889. Generalist Nursing Practice IV: Tertiary Care Across the Lifespan. 6 Credit Hours.

This course focuses on the application of theories, concepts, research, and issues related to acute illness requiring specialized nursing care across the lifespan in tertiary care settings. Concepts such as high risk pregnancy, critical care, trauma, burns, and organ transplants will be addressed. The synthesis of core nursing knowledge in the management of clients across the lifespan with potentially life-threatening, unstable, and complex health problems is emphasized.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Nursing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Nursing 4 Year.

Co-requisites: NURS 4589.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in NURS 3189, NURS 3489, NURS 3296, and (NURS 3305 or 'Y' in CRNU07)

Nutrition (NUTR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

NUTR 1000. Special Topics in Nutrition. 1 to 2 Credit Hour.

The focus of this course is a topic relevant to the discipline of nutrition or a closely related sub-discipline that is not covered by regular departmental course offerings. The specific topics may vary from semester to semester. Please check under Class Schedule in Self-Service Banner for the specific topic of this course.

Repeatability: This course may be repeated for additional credit.

Occupational Therapy (OTHR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

OTHR 1001. Exploring Occupational Therapy. 2 Credit Hours.

This course, designed for non-majors, serves as an overview and introduction to occupational therapy (OT). Socio-historical influences leading to the establishment of the profession will be explored, as well as the philosophical foundation of "occupation" as therapeutic intervention. Experiential learning includes guided observation of a clinical setting as well as hands-on activities. Weekly readings from multiple sources inform students of professional issues and first-hand experiences of individuals adapting to disability and rehabilitation.

Repeatability: This course may not be repeated for additional credits.

Philosophy (PHIL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PHIL 0824. Landscape of American Thought. 3 Credit Hours.

America once was envisioned by its colonizers as a new world, as a city upon a hill beckoning to humanity. After centuries of conquest, enslavement, immigration, and political struggle, conditions for sustaining this early vision continue to evolve. Explore the emergence of some of the most distinctive and influential American voices to inform our national debate about freedom, the individual, race, democracy, and oppression, as it has unfolded over the past two centuries. Through consideration of selected works of some of the most renowned figures to shape the landscape of American public discourse, we return to face the question of the promise of America, as it plays out today in the thought of some of the leading public intellectuals of our time. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed Philosophy 0924.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

PHIL 0839. Philosophy of the Human. 3 Credit Hours.

What is it to be human? To have human experiences and values? What is it like to walk in the shoes of others who may not share our experiences and values? In what ways, if any, do we treat others unequally in the social and political spheres, and are these unequal treatments justified? This course examines a range of answers to these questions and more. Potential topics include, but are not limited to: different historical and cultural perspectives on being human; issues related to the human self, justice, morality, and the socio-cultural; and the relationships between the human condition and broader facets of contemporary life. Traditional historical and contemporary philosophical works, as well as influential literary, empirical, and cinematic pieces, will be used to explore, analyze, and propose answers to what it is to be human. Philosophy of the Human is a 3 credit hour Human Behavior General Education course. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed PHIL 0939.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

PHIL 0847. The Meaning of the Arts. 3 Credit Hours.

As we blend philosophical inquiry into the nature of several of the arts and the roles they play in society with analyses of particular artistic practices, we shall critically examine questions like these: Is the main goal of art to imitate or represent the world? If so, do painting, sculpture, architecture, photography, movies, music, dance, theater, performance art, literature, handicrafts, fashion, bodily ornamentation and the like, provide knowledge about ourselves and the world around us? What is - or should be - the relationship between art and some of the other great domains of human thought, action, and concerns such as religion or the realm of social and political relations, especially matters concerning gender, sexuality, class, race, morality, and community? Do the arts or artistic institutions have specific social functions? For example, is there a connection between museums, imperialism, and nationalism? Are films embedded in networks of commodity production? Are there specifically urban or global dimension to these questions? NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed Philosophy 0947.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

PHIL 0859. The Making of American Society: Melting Pot or Culture Wars?. 3 Credit Hours.

Terrorism, illegal immigration, gay marriage, religious conflict, political in-fighting, corporate corruption, racial animosities, civil liberties assaults, media conglomeration, Wal-Mart goes to China and the rich get richer. America in the 21st century is a contentious society. How did we get to this place in time? Examine what makes American society distinctive from other advanced industrial democracies as we study the philosophical origins of America, the development of social and economic relationships over time, and the political disputes dominating contemporary American life. The course relies heavily on perspectives from History, Sociology and Political Science to explain the challenges facing contemporary American society. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: AMST 0859, History 0859, POLS 0859, or SOC 0859.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

PHIL 0863. Religion in the World. 3 Credit Hours.

Learn about the major religious traditions found worldwide today: Hinduism, Buddhism, Judaism, Christianity, Islam, and several indigenous traditions. Examine the beliefs, practices, and values of these groups in order to understand the worldviews and ways of life of the people who practice them. Our interdisciplinary analysis and interpretation of specific examples of religious experience will help shed light on the overall meaning of religion and human existence. We will carefully consider examples while also focusing on particular thematic issues, like cosmology and ritual. Develop appreciation for the religious vibrancy and diversity that exist in human cultures while you actively engage in the learning process through class presentation, class participation, paper-writing, and a self-selected field trip. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Religion 0863, 0963, 1101, C053, Asian Studies 0863, Critical Languages 0863, or Philosophy 0863.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

PHIL 0877. Climate Change and Climate Justice. 3 Credit Hours.

The impacts of climate change fall disproportionately on frontline communities, including the Global South, communities of color, the poor, women, and the young, including college students. How should the impacts and burdens of climate change be distributed? How do environmental loss, damage, and danger transform issues of diversity and oppression in the 21st century? What kind of response to climate change would be fair? How much must each of us change in order to make a fair response possible? This course offers an accessible, in depth introduction to ethical problems about climate justice, with attention to environmental racism, indigenous rights, gender, age, and other aspects of diversity, and to the role of individuals and institutions in climate change. Students cannot receive credit for this course if they have successfully completed PHIL 0977.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

PHIL 0878. Asians, Asian Americans, and Pacific Islanders in the United States: Race, Diversity, and Identity. 3 Credit Hours.

Who are Asians, Asian Americans, and Pacific Islanders (APIs) in the American context? How have APIs shaped the making of state and society in the United States in terms of culture, law, economics, and politics? What major crises and historical events have generated racism and racialized stereotyping against API communities? How have API minorities mobilized against exclusion, racism, and marginalization to advance new interests and goals, especially when juxtaposed with other minority groups and social forces? What is the future of APIs in America? This course introduces students to the tapestry of API experiences in America. It recovers their importance through lectures and discussions, based upon careful analysis of written texts and creative materials.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

PHIL 0939. Honors Philosophy of the Human. 3 Credit Hours.

What is it to be human? To have human experiences and values? What is it like to walk in the shoes of others who may not share our experiences and values? In what ways, if any, do we treat others unequally in the social and political spheres, and are these unequal treatments justified? This course examines a range of answers to these questions and more. Potential topics include, but are not limited to: different historical and cultural perspectives on being human; issues related to the human self, justice, morality, and the socio-cultural; and the relationships between the human condition and broader facets of contemporary life. Traditional historical and contemporary philosophical works, as well as influential literary, empirical, and cinematic pieces, will be used to explore, analyze, and propose answers to what it is to be human. Philosophy of the Human is a 3 credit hour Human Behavior General Education course. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed PHIL 0839.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

PHIL 0947. Honors The Meaning of the Arts. 3 Credit Hours.

As we blend philosophical inquiry into the nature of several of the arts and the roles they play in society with analyses of particular artistic practices, we shall critically examine questions like these: Is the main goal of art to imitate or represent the world? If so, do painting, sculpture, architecture, photography, movies, music, dance, theater, performance art, literature, handicrafts, fashion, bodily ornamentation and the like, provide knowledge about ourselves and the world around us? What is - or should be - the relationship between art and some of the other great domains of human thought, action, and concerns such as religion or the realm of social and political relations, especially matters concerning gender, sexuality, class, race, morality, and community? Do the arts or artistic institutions have specific social functions? For example, is there a connection between museums, imperialism, and nationalism? Are films embedded in networks of commodity production? Are there specifically urban or global dimension to these questions? (This is an Honors course.) NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed Philosophy 0847.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

PHIL 0977. Honors Climate Change and Climate Justice. 3 Credit Hours.

The impacts of climate change fall disproportionately on frontline communities, including the Global South, communities of color, the poor, women, and the young, including college students. How should the impacts and burdens of climate change be distributed? How do environmental loss, damage, and danger transform issues of diversity and oppression in the 21st century? What kind of response to climate change would be fair? How much must each of us change in order to make a fair response possible? This course offers an accessible, in depth introduction to ethical problems about climate justice, with attention to environmental racism, indigenous rights, gender, age, and other aspects of diversity, and to the role of individuals and institutions in climate change. Students cannot receive credit for this course if they have successfully completed PHIL 0877.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

PHIL 1001. Philosophical Challenges to the Individual. 3 Credit Hours.

This course combines historical and contemporary sources to study individuals and their social settings. Thus it introduces the basic issues of ethics, and social and political philosophy. It serves as the entry course not only for further study of these fields, but also for the study of business and professional ethics and philosophy of law. NOTE: (1) Philosophy majors or minors who have taken 1101 (0100), Introduction to Philosophy, should not take this course. (2) This course can be used to satisfy the university Core Individual & Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

PHIL 1055. Critical Thinking. 3 Credit Hours.

A course in reasoning well: logically and critically. Increase your ability to read something and decide if it should persuade or be rejected. How to back up what you say with evidence and/or good arguments. While the course is not a "prep" for the LSAT's, and other exams that test critical abilities, it focuses directly on the skills necessary to do well in them. NOTE: Philosophy majors or minors who have taken 1066 (C066), Introduction to Logic should not take this course.

Repeatability: This course may not be repeated for additional credits.

PHIL 1061. Art and Society. 3 Credit Hours.

Besides treating the major issues internal to the arts and their criticism (e.g., definitions of art and aesthetic experience, artistic expression, form, representation, critical interpretation and evaluation), the course also deals with wider questions of the social function and value of the arts, several of which relate to current issues of gender, race, and ethnicity. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

PHIL 1062. Morality and the Law. 3 Credit Hours.

Recommended for pre-law and pre-social administration students. The course provides a basic grounding in moral and legal philosophy, and addresses issues on which both touch, such as capital punishment, affirmative action, sexual behavior, and the right to welfare. NOTE: This course can be used to satisfy the university Core Individual & Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

PHIL 1063. American Thinkers. 3 Credit Hours.

The major figures and central problems of American philosophy will be surveyed historically, with a view to examining what is distinctive in American thought and how American philosophy relates to its natural cultural context. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

PHIL 1066. Introduction to Logic. 3 Credit Hours.

The meaning of such logical notions as the validity of arguments, the equivalence of statements, and the inconsistency of sets of statements. Symbolization of the logically relevant features of statements and testing of arguments for validity, sets for inconsistency, etc. Development of logical theory in connection with these notions and techniques. NOTE: (1) Students who have taken Philosophy 1055 (0055), Critical Thinking, should consult with an advisor before taking this course. (2) This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

PHIL 1076. Philosophy East and West. 3 Credit Hours.

Systematic and comparative study of representative philosophies of India, China, Japan, and Western Europe. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

PHIL 1077. Science in Context. 3 Credit Hours.

A study of scientific method by critical examination of cases of scientific work in their social, political, and psychological context. Attention to the values and ethical concerns in scientific inquiry. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

PHIL 1101. Introduction to Philosophy. 3 Credit Hours.

Philosophical problems in the works of great thinkers from ancient times to present. Selected questions concern the nature of reality, human freedom, the foundations of knowledge, standards of value, and the existence of God. NOTE: Students who have taken 1001 (C050), Challenges to the Individual should consult with an advisor before taking this course.

Repeatability: This course may not be repeated for additional credits.

PHIL 1196. Introduction to Philosophy. 3 Credit Hours.

This course is an introduction to philosophy that focuses on the reading, thinking, and writing skills needed for the study of philosophy. The course concentrates on close readings of a few texts rather than a broad survey of the philosophical tradition. NOTE: This course fulfills one of the two writing requirements for the major.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

PHIL 1861. Art and Society. 3 Credit Hours.

Besides treating the major issues internal to the arts and their criticism (e.g., definitions of art and aesthetic experience, artistic expression, form, representation, critical interpretation and evaluation), the course also deals with wider questions of the social function and value of the arts, several of which relate to current issues of gender, race, and ethnicity.

Repeatability: This course may not be repeated for additional credits.

PHIL 1955. Honors Critical Thinking. 3 Credit Hours.

Honors version of 1055 (0055).

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PHIL 1962. Honors Morality & the Law. 3 Credit Hours.

Honors version of 1062 (C062). NOTE: This course can be used to satisfy the university Core Individual & Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IN

Repeatability: This course may not be repeated for additional credits.

PHIL 1966. Honors Introduction to Logic. 3 Credit Hours.

Honors version of 1066 (C066). NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, QB

Repeatability: This course may not be repeated for additional credits.

PHIL 1977. Honors Science in Context. 3 Credit Hours.

A study of scientific method by critical examination of cases of scientific work in their social, political, and psychological context. Attention to the values and ethical concerns in scientific inquiry. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

PHIL 2100. Special Topics. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

PHIL 2121. Introduction to Ethical Theory. 3 Credit Hours.

An introduction to major schools of ethical theory such as utilitarian ethics, deontological ethics, virtue ethics, and the ethics of care. Specific problems from metaethics and applied ethics may also be treated.

Repeatability: This course may not be repeated for additional credits.

PHIL 2125. Philosophy of African-American Experiences. 3 Credit Hours.

An introduction to African-American philosophy and the issues around which it has developed: the meaning of racial identity, concepts of personhood, the nature of racial oppression and its relation to gender and class oppression, strategies for black liberation. We will pay close attention to the ways in which African American philosophy is simultaneously a development of and a radical critique of Anglo-European philosophy. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

PHIL 2126. Contemporary Social Philosophy. 3 Credit Hours.

An overview of recent and current thinking about philosophically relevant problems of and in the present-day world. Normally a few key texts will be focused upon, drawn from writing of the late 20th and early 21st centuries. Environment, racial tension, globalization, economy, the nature of power, generational conflict, and the persistence of war are some typical topics.

Repeatability: This course may not be repeated for additional credits.

PHIL 2131. Introduction to Aesthetics. 3 Credit Hours.

This course addresses major issues internal to the arts and their criticism such as definitions of art and aesthetic experience, artistic expression, form, representation, critical interpretation and evaluation. The course may also address more specific issues such as the relationship of art and race, art and freedom of expression, art and morality. NOTE: Students who have taken PHIL 2931 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

PHIL 2141. Philosophy of Biology. 3 Credit Hours.

This course explores a range of philosophical questions about biology, such as: What is the nature of biological explanation? Are there laws of biology? Is the current debate about creationism and intelligent design a scientific debate? Is there a unique taxonomy of biological organisms? Has human nature evolved? What is genetic determinism and is there any evidence for it? This course is geared toward scientifically-minded philosophers, philosophically-minded scientists, and everyone in between. Duplicate credit warning: Students who have taken PHIL 2941 will not receive credit for taking PHIL 2141.

Repeatability: This course may not be repeated for additional credits.

PHIL 2143. Introduction to Theory of Knowledge. 3 Credit Hours.

This class is concerned with the study of knowledge, otherwise known as epistemology. What is knowledge? How do we come to know things? Do we really know anything? What are the limits of human knowledge? In this course we will explore these questions. More specifically, we will examine the traditional theory of knowledge, influential counterexamples to the traditional theory of knowledge, evidentialist theories of justification, nonevidentialist theories of justification, skepticism about our knowledge of the world, and how certain social factors play a role in the acquisition of knowledge.

Repeatability: This course may not be repeated for additional credits.

PHIL 2144. Introduction to the Philosophy of Mind. 3 Credit Hours.

An introductory overview of the most important issues in contemporary philosophy of mind and cognitive studies. Especially aimed at students of Psychology.

Repeatability: This course may not be repeated for additional credits.

PHIL 2152. Introduction to Feminist Philosophy. 3 Credit Hours.

This course covers major themes in feminist philosophy through canonical and recent texts. Themes include the sex/gender distinction; oppression, equality and justice; work and family; feminist care ethics; pornography and prostitution; sex-positivity and sex-negativity; feminist epistemology and feminist critiques of science. Throughout the course, discussions will consider the intersection of gender with race, class, disability, global location, sexuality, and age.

Repeatability: This course may not be repeated for additional credits.

PHIL 2154. Political Philosophy. 3 Credit Hours.

An examination of such issues as the source of obligation to obey the state, natural rights, the limits of governmental authority, and the justification of various forms of government. Readings drawn from classical and contemporary sources.

Repeatability: This course may not be repeated for additional credits.

PHIL 2157. Environmental Ethics. 3 Credit Hours.

A study of the ethical dimensions of several contemporary environmental controversies. The course examines the major theoretical approaches to environmental ethics, including human-centered (anthropocentric), animal-centered (zoocentric), and nature-centered (biocentric and ecocentric) value systems, as well as the most important critiques of these ethical approaches. The course will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. NOTE: Students will receive credit only one time for any of the following course numbers: ENST 2157, ENST 2957, PHIL 2157, or PHIL 2957.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

PHIL 2161. History of Philosophy: Greek. 3 Credit Hours.

A survey of ancient Greek philosophy from the Presocratics through the Hellenistic Period. Primary and secondary materials used.

Repeatability: This course may not be repeated for additional credits.

PHIL 2172. History of Philosophy: Modern. 3 Credit Hours.

A historical and critical study of the thought of selected philosophers from Descartes to Hume emphasizing their treatment of such topics as perception, the mind/body relationship, the structure of knowledge, and personal identity.

Repeatability: This course may not be repeated for additional credits.

PHIL 2900. Honors Topics in Philosophy. 3 to 4 Credit Hours.

Arranged each semester; please consult with the instructor or department for the topic offered.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

PHIL 2921. Honors Introduction to Ethical Theory. 3 Credit Hours.

Honors version of Philosophy 2121 (0121).

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PHIL 2925. Honors Philosophy of African-American Experiences. 3 Credit Hours.

Honors version of 2125 (R125). NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, RS

Repeatability: This course may not be repeated for additional credits.

PHIL 2931. Honors Introduction to Aesthetics. 3 Credit Hours.

This course addresses major issues internal to the arts and their criticism such as definitions of art and aesthetic experience, artistic expression, form, representation, critical interpretation and evaluation. The course may also address more specific issues such as the relationship of art and race, art and freedom of expression, art and morality. NOTE: Students who have taken PHIL 2131 will not earn additional credits for this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PHIL 2941. Honors Philosophy of Biology. 3 Credit Hours.

This course explores a range of philosophical questions about biology, such as: What is the nature of biological explanation? Are there laws of biology? Is the current debate about creationism and intelligent design a scientific debate? Is there a unique taxonomy of biological organisms? Has human nature evolved? What is genetic determinism and is there any evidence for it? This course is geared toward scientifically-minded philosophers, philosophically minded scientists, and everyone in between. Duplicate credit warning: Students who have taken PHIL 2141 will not receive credit for taking PHIL 2941.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PHIL 2957. Honors Environmental Ethics. 3 Credit Hours.

A study of the ethical dimensions of several contemporary environmental controversies. The course examines the major theoretical approaches to environmental ethics, including human-centered (anthropocentric), animal-centered (zoocentric), and nature-centered (biocentric and ecocentric) value systems, as well as the most important critiques of these ethical approaches. The course will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SF, SS

Repeatability: This course may not be repeated for additional credits.

PHIL 3002. Philosophy of Religion. 3 Credit Hours.

Issues in philosophy of religion, including the nature of religion, the relation between reason and faith, concepts of God and proofs of the existence of God, religious and mystical experience, the nature of religious language, the problem of evil, the relation of religion to morality, concepts of death and immortality, conflicting truth-claims of different religions, and interreligious dialogue. NOTE: This course is equivalent to REL 3002; students can receive credits only one time for either course.

Repeatability: This course may not be repeated for additional credits.

PHIL 3075. Pre-Law Seminar. 3 Credit Hours.

The course deals with issues related to lawyers and the practice of law such as professional ethics, legal reasoning and the nature of legal education. NOTE: Requires permission of instructor to register. Students must consult with the instructor in the Fall to arrange an internship placement.

Repeatability: This course may not be repeated for additional credits.

PHIL 3085. Pre-Law Internship. 3 Credit Hours.

Internship with a legal office or law-related office in the Philadelphia area. NOTE: Must consult course instructor in the Fall to arrange placement.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

PHIL 3123. The Ethics of War and Peace. 3 Credit Hours.

Wars cause tremendous and unconscionable damage, yet according to just war theory, they can be justified, either as a form of self-defense (and the defense of others), or as a means of securing the conditions for a future peace. In this course, we will undertake a critical examination of just war theory and consider some of the moral complexities surrounding the issues of war and peace. Related issues may be discussed, such as the moral status of terrorism, torture, drone combat, and nonviolent resistance.

Repeatability: This course may not be repeated for additional credits.

PHIL 3168. Themes in Existentialism. 3 Credit Hours.

The meaning of life and death, freedom and anxiety, joy and suffering, faith and despair -- these and other dimensions of the human condition will be explored. The course covers existential philosophers such as Kierkegaard, Nietzsche, Camus, and Sartre, though it may also focus on existentialism in film, existentialism in theater and literature, or non-Western philosophies of existence.

Repeatability: This course may not be repeated for additional credits.

PHIL 3210. Special Topics in Philosophy. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

PHIL 3211. Intermediate Logic. 3 Credit Hours.

An introduction to the meta theory of the elementary logic of predicates and quantifiers (familiarity with which is presupposed). Proofs that a standard derivation system is sound and complete are central.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHIL 1066 or PHIL 1966)

PHIL 3216. Philosophy of Science. 3 Credit Hours.

Basic issues in the current philosophy of science, and particularly various accounts of such key notions of science as hypotheses, confirmation, laws, causation, explanation, and theories.

Repeatability: This course may not be repeated for additional credits.

PHIL 3217. Feminist Epistemology and Philosophy of Science. 3 Credit Hours.

Human knowledge is influenced by gender ideologies. This course examines the pervasiveness of these influences, and the resultant implications for the possibility of attaining objectivity and truth in inquiry. Scientific knowledge and philosophical theories of the nature of knowledge are special focuses of attention in this course. Scientific knowledge is considered through detailed discussion of cases in empirical science. The complex relations between gender, race, and class are also discussed in relation to these epistemological issues.

Repeatability: This course may not be repeated for additional credits.

PHIL 3218. Philosophy of Medicine. 3 Credit Hours.

Philosophy of Medicine is a new and growing field in philosophy of science and the medical humanities, which looks at the specific characteristics of theories in medicine and ways of knowing in medicine. It asks questions such as: What is the meaning of illness and of health? Are some diseases (e.g. end stage renal disease, chronic fatigue syndrome, ADHD) partly or wholly socially constructed? What are the differences between conventional and alternative or non-Western approaches to illness and healing? What is "evidence based medicine," and what are its limitations? What is the new technique of "narrative medicine?" What is meant by claiming that medicine is an "art" as well as a science? We will learn about the "biopsychosocial" model of clinical care, causation and genetic disease, the classification of diseases and phenomenological accounts of illness.

Repeatability: This course may not be repeated for additional credits.

PHIL 3220. Special Topics in Philosophy. 4 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

PHIL 3222. Contemporary Ethical Theory. 3 Credit Hours.

Issues in ethical theory that have come to prominence since the 20th century. Both meta-ethical issues (about the meaning and justification of ethical statements) and normative issues (about obligation, responsibility, and goodness) will be examined.

Repeatability: This course may not be repeated for additional credits.

PHIL 3223. Feminist Ethics and Political Philosophy. 3 Credit Hours.

An examination of feminism's contribution to ethics, political philosophy, and legal theory. Issues may include: the role of care versus that of justice in determining moral obligations; the nature and causes of women's oppression (including the difference between the sexual oppression experienced by white women and the additional forms of oppression to which women of color/third-world women are subject); pornography and prostitution; equality and difference; essentialism as it pertains to gender and race; feminist jurisprudence; postmodern feminism.

Repeatability: This course may not be repeated for additional credits.

PHIL 3225. Good & Bad, Right & Wrong. 3 Credit Hours.

This course focuses on basic concepts in ethics. For example, good and bad, right and wrong are among the most basic ethical concepts. Other basic ethical concepts include: freedom, justice, morality, practical reason, happiness, obligation, duty, rights, value, conscience, care, trust, and friendship. From semester to semester the course will select one or more of these concepts and examine them in depth. The standard method of examination in philosophy is conceptual analysis, that is, the analysis of concepts. But depending on the concepts chosen, the examination will be informed or supplemented by the study of language, psychology, or history.

Repeatability: This course may not be repeated for additional credits.

PHIL 3226. Classics in Moral Philosophy. 3 Credit Hours.

A study of the major works in the history of moral philosophy selected from among the writings of such philosophers as Plato, Aristotle, Hobbes, Spinoza, Hume, Kant, Mill, Nietzsche, Moore.

Repeatability: This course may not be repeated for additional credits.

PHIL 3229. Latin American and Latinx Philosophy. 3 Credit Hours.

This course surveys central ideas and debates in the Latin American and Latinx philosophical traditions. We will pay special attention to the impact of European colonialism in the production and reception of philosophical ideas in Latin America and Latinx communities in the US. This survey ranges from pre-colonial indigenous philosophy to the present. We will discuss classical and contemporary Andean and Mesoamerican indigenous philosophies and why they are often not treated on par with Western forms of knowledge. We will also cover philosophical debates in colonial and post-colonial Latin America. We will examine how the colonial experience shaped Latin American philosophers' ideas around race, gender, nationhood, education, progress, and authenticity. We will also reflect on aspects of the lived experience of Latinxs in the United States, such as immigration and the controversies around Latinx identity. NOTE: This course is regularly cross-listed with LAS 3229 and SPAN 3229. Students may receive credit for only one of the following: PHIL 3229, LAS 3229, or SPAN 3229.

Repeatability: This course may not be repeated for additional credits.

PHIL 3232. History of Aesthetics. 3 Credit Hours.

A study of major works in the history of aesthetics selected from such philosophers as Plato, Aristotle, Hume, Kant, Schopenhauer, Hegel, Dewey, Bell, Collingwood, Beardsley, Langer, Dickie, Danto, and contemporary figures.

Repeatability: This course may not be repeated for additional credits.

PHIL 3235. Classics in Moral Philosophy. 3 Credit Hours.

A study of the major works in the history of moral philosophy. This course will generally focus on figures and schools from classical Greek and Roman moral philosophy.

Repeatability: This course may not be repeated for additional credits.

PHIL 3240. Special Topics. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

PHIL 3243. Philosophy of Law. 3 Credit Hours.

An introduction to philosophical problems arising in the examination of legal systems, including questions and theories about the nature of law itself, about legal responsibility and legal punishment, and about standards of fairness in settling legal disputes.

Repeatability: This course may not be repeated for additional credits.

PHIL 3245. Philosophical Psychology. 3 Credit Hours.

Formerly known as Philosophy of Psychology; students may not receive additional credits under the new title. Throughout its history, philosophy has taken an interest in psychology. In the theory of knowledge, philosophers have been concerned with cognition and its particular forms and components: perception, belief, concepts, and reasoning. In ethics, philosophers have been concerned with action and emotion. And in metaphysics, they have been interested in the nature of the mind itself and consciousness. Central to this course are topics and questions at the intersection of philosophy and contemporary empirical psychology. The choice of topics varies from semester to semester.

Repeatability: This course may not be repeated for additional credits.

PHIL 3249. Ethics in Medicine. 3 Credit Hours.

Exploration of ethical issues generated by the application of scientific and technological advances to the preservation, destruction, and programming of human life. Topics may include: ethics of medical research, abortion, euthanasia, behavior control, allocation of scarce medical resources, and the ethics of patient-physician interaction. NOTE: Students who have taken PHIL 3949 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

PHIL 3280. Special Topics. 3 Credit Hours.

Arranged each semester; please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

PHIL 3283. Undergraduate Tutorial. 3 Credit Hours.

Independent study for undergraduates with one of the professors in the department. NOTE: Arrangements with that professor must be made before signing up for the course.

Repeatability: This course may be repeated for additional credit.

PHIL 3910. Honors Special Topics in Philosophy. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

PHIL 3949. Honors Ethics in Medicine. 3 Credit Hours.

This course is an exploration of ethical issues generated by the application of scientific and technological advances to the preservation, destruction, and programming of human life. Topics may include: ethics of medical research, abortion, euthanasia, behavior control, allocation of scarce medical resources, and the ethics of patient-physician interaction. NOTE: Students who have taken PHIL 3249 will not earn additional credits for this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PHIL 3968. Honors Themes in Existentialism. 3 Credit Hours.

Honors version of 3168 (0186).

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PHIL 4221. Social and Political Philosophy. 3 Credit Hours.

This course studies the major value questions that are addressed in contemporary theories of the nature of society and the state, including the requirements of justice in the distribution of benefits and burdens within a political society, and the justification of democracy as not only processes of majority rule but as involving participation and deliberation among citizens. The recognition of cultural identities and the role of gender and race are considered, and proposed norms of inclusiveness and diversity are analyzed. The course goes on to take up the challenge posed for philosophical theory by globalization in its economic and ecological impacts, and analyzes the norms of human rights and solidarity across borders that may be relevant in this new context. An emphasis will be placed on alternative philosophical frameworks within contemporary social and political philosophy, such as contractarianism, consequentialism, and care ethics. Readings will include such philosophers as John Rawls, Jurgen Habermas, Thomas Pogge, Iris Marion Young, and Nancy Fraser.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any PHIL course numbered 2000 to 4999 or POLS 2496)

PHIL 4229. Philosophy in Literature. 3 Credit Hours.

Selected philosophical themes as they appear in classical and modern literature. Frequently the themes concern the "enlightenment project," "modernism," and their critics.

Repeatability: This course may not be repeated for additional credits.

PHIL 4233. Problems in Aesthetics. 3 Credit Hours.

An examination of the philosophical issues concerning the nature and importance of the arts and artistic practice, including questions about the nature of aesthetic experience, the definition of art, representation and expression in art, the ontological status of artworks, truth and reference in art, and the values of art.

Repeatability: This course may not be repeated for additional credits.

PHIL 4240. Topics in the Philosophy of Psychology. 3 Credit Hours.

Selected topics - varies according to the expertise of the instructor.

Repeatability: This course may be repeated for additional credit.

PHIL 4241. Theory of Knowledge. 3 Credit Hours.

An examination of knowledge and belief. The specific subtopics involving them include truth, perception, innate ideas, justification, induction, the a priori, mathematical knowledge and rationalism versus empiricism.

Repeatability: This course may not be repeated for additional credits.

PHIL 4242. Metaphysics. 3 Credit Hours.

An examination of the most general features of the universe. Topics include the character of truth, the existence of abstract entities, the nature of persons, free will, the existence or non-existence of God, ontological commitment, the relation of philosophy to science, causation, modal properties, reality and appearance, and various forms of realism and anti-realism.

Repeatability: This course may not be repeated for additional credits.

PHIL 4244. Philosophy of Mind. 3 Credit Hours.

An examination of the character of mental and psychological states. Specific issues may include the nature of persons, relations between natural and psychological sciences, action, mental content and its relation to language.

Repeatability: This course may not be repeated for additional credits.

PHIL 4251. Philosophy of Language. 3 Credit Hours.

The study of theories of meaning and meaningfulness. Selected topics may include reference, vagueness, speech act theory, and metaphor. NOTE: Students who have taken PHIL 4951 will not earn additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

PHIL 4253. Philosophy of History. 3 Credit Hours.

Problems of historical knowledge, e.g., problems about the historian's claim to explain historical events (causation in history, reasons for actions, challenges to the objectivity of history) and problems about historical interpretation (including global interpretations of the historical process, such as Augustine's, Kant's, and Hegel's).

Repeatability: This course may not be repeated for additional credits.

PHIL 4269. Contemporary British and American Philosophy. 3 Credit Hours.

Selected topics in 20th and 21st century English-speaking philosophy, varying according to instructor and semester.

Repeatability: This course may not be repeated for additional credits.

PHIL 4271. 19th Century Philosophy. 3 Credit Hours.

Selected European philosophers from Hegel to Bradley.

Repeatability: This course may not be repeated for additional credits.

PHIL 4273. Greek Philosophy. 3 Credit Hours.

Interpretation and critical examination of the dialogues of Plato and the works of Aristotle.

Repeatability: This course may not be repeated for additional credits.

PHIL 4274. Pragmatism and American Thought. 3 Credit Hours.

American pragmatism and naturalism, with emphasis on Emerson, James, Peirce, Mead, Dewey, and contemporary pragmatists.

Repeatability: This course may not be repeated for additional credits.

PHIL 4275. British Empiricism. 3 Credit Hours.

Selected topics in 17th and 18th century philosophers such as Locke, Berkeley, Hume and Reid.

Repeatability: This course may not be repeated for additional credits.

PHIL 4276. Contemporary Continental Philosophy. 3 Credit Hours.

Phenomenology and existentialism, with emphasis on such 20th century philosophers as Husserl, Heidegger, Sartre, Merleau-Ponty, Foucault, Derrida, and other post-structuralists.

Repeatability: This course may not be repeated for additional credits.

PHIL 4277. Continental Rationalism. 3 Credit Hours.

This course is devoted to selected topics in 17th and 18th century philosophers in the Rationalist tradition such as Descartes, Spinoza, Malebranche and Leibniz.

Repeatability: This course may not be repeated for additional credits.

PHIL 4278. Philosophy of Culture. 3 Credit Hours.

This course addresses central themes in philosophy of culture such as philosophical problems raised by the notion of cultural conditions of possibility, the relation of mythic knowledge to scientific and philosophical knowledge, the role of signs and symbols in the theories of culture, and the distinction between a philosophical anthropology and anthropological theory.

Repeatability: This course may not be repeated for additional credits.

PHIL 4279. Kant. 3 Credit Hours.

In depth study of some of the major critical writings of Kant.

Repeatability: This course may not be repeated for additional credits.

PHIL 4282. Undergraduate Tutorial. 3 Credit Hours.

Independent study for undergraduates with one of the professors in the department. NOTE: Arrangements with that professor must be made before signing up for the course.

Repeatability: This course may be repeated for additional credit.

PHIL 4297. Pre-Law Tutorial. 3 Credit Hours.

An alternative capstone course for majors headed toward the legal profession.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Philosophy.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

PHIL 4298. Senior Seminar. 3 Credit Hours.

The normal capstone course for philosophy majors.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Philosophy.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

PHIL 4999. Honors Senior Thesis. 3 Credit Hours.

The writing of the thesis required for graduation with distinction in philosophy.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Physical Activity (ACTV)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ACTV 1000. Special Topics in Fitness. 1 or 2 Credit Hour.

The Kinesiology Physical Activity Program (KPAP) Special Topics courses are designed to educate students on how to become, and stay, physically fit through proper fitness- and health-related practices. Student learning outcomes include learning, developing and demonstrating the components of health-related fitness skills, while participating in a safe and healthy environment. Course topics vary from one semester to another and may include topics such as: advanced yoga, bodyweight training, advanced Pilates, dance and suspension training. Please contact the KPAP Director for upcoming course offerings.

Repeatability: This course may be repeated for additional credit.

ACTV 1001. Introduction to Fitness. 1 Credit Hour.

Introduction to Fitness is designed to help students learn about the health-related fitness components of muscular strength, muscular endurance, flexibility, aerobic capacity and body composition. Students will gain knowledge and develop skills needed to participate at a beginning level of fitness activity. Students will learn to set personal fitness goals and create their own fitness/physical activity plan. Students will be introduced to various forms of physical activity used in both group and/or individual settings. Students will also be introduced to equipment and instructed on proper usage. Fitness activities include weight training, aerobics, running, walking, etc. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1002. Cardiovascular Fitness for a Healthy Lifestyle. 2 Credit Hours.

Cardiovascular Fitness for a Healthy Lifestyle is an introductory course focused on the promotion of health and fitness through physical activity. The course will develop and enhance students' knowledge and understanding of the scientific basis of the relationship between physical activity, health and fitness. Through activities designed for the development and maintenance of the circulatory and respiratory systems, students will learn how to develop and assess their own personal fitness and discover the benefits of fitness in combating cardiovascular risk factors and other chronic diseases. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1003. Fitness for Life. 2 Credit Hours.

Fitness for Life introduces students to the principles related to the health-related components of physical fitness, aerobic capacity, muscular strength and endurance, flexibility, and body composition. Students will learn to apply these principles to lifelong activities. Students will assess their current fitness level, develop an activity program commensurate with personal goals, and research current findings concerning exercise, fitness, and nutrition. Lifetime activities will be explored including weight training, individual sports, endurance sports and recreational activity. Physical and psychological preparation and values of the activity are included. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1004. Walking/Jogging/Running. 2 Credit Hours.

Walking/Jogging/Running focuses on the physical, cognitive and social skills necessary to safely transport your body from one place to another, under your own muscle power. Students will learn about cardiovascular and respiratory endurance that can be enjoyed throughout a person's lifetime. Students will learn to create and use various strategies for aerobic fitness improvement, identifying proper techniques, training methods, appropriate stride, pace, rhythmic breathing, energy cost and muscle load. Other areas of emphasis include, but are not limited to environment, safety, equipment, perceived exertion, nutrition, weight management and record keeping. An optional activity may include one or two local jogging/running event(s).

Repeatability: This course may not be repeated for additional credits.

ACTV 1006. Strength Training for Women. 2 Credit Hours.

Strength Training for Women is an introductory course of progressive resistance exercise. Students will learn the knowledge and skills needed to practice and apply weight training principles in sport, fitness and recreation. Muscular strength and muscular endurance will be studied, along with muscular structure and muscular function. Basic training techniques such as overload principle, specificity of training, progression and various types of exercise training programs are taught. Students will develop personal goals for a beginning weight training program and learn how to participate in and enjoy lifelong weight training activities. Students will also examine the psychological preparation and values related specifically to women that accompany weight training. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1007. Bodyweight Training. 2 Credit Hours.

Bodyweight Training is an introductory course in which students learn effective resistance exercises using their own body weight and simple items around the home environment. This course covers the basics of movement, concepts of muscular strength and endurance, and body composition. Various training techniques, calisthenics exercises, compound exercises, and body control are also taught. Students will learn how to apply these skills in a safe and responsible manner, develop personal goals for their own bodyweight training program, and gain experience incorporating muscular strengthening activities as a lifelong practice.

Repeatability: This course may not be repeated for additional credits.

ACTV 1008. Beginning Weight Training. 2 Credit Hours.

Beginning Weight Training is an introductory course involving progressive resistance exercise. Students will use both external weights and bodyweight while learning weight training principles for participation in sports, recreation, or to improve their general fitness. Muscular strength and muscular endurance will be studied, along with muscular structure and muscular function. Students will learn various training techniques, such as the overload principle, specificity of training, and progression. Students will examine the psychological preparation and values that accompany weight training. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1009. Intermediate Weight Training. 2 Credit Hours.

Intermediate Weight Training builds upon the basic principles covered in Beginning Weight Training. Students will increase their knowledge and skills needed to improve individual weight training performance for sport, recreation and fitness. Advanced forms of muscular contraction, progressive overload, specificity of training, exercise intensity, and various types of exercise programs are taught. Students will also examine the components of psychological preparation and values that accompany the sports of weightlifting and powerlifting. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (KINS 1062, KINS 1106, ACTV 1006, or ACTV 1008)

ACTV 1011. ZUMBA from Around the World. 2 Credit Hours.

ZUMBA from Around the World combines fitness and cultural diversity in an easy-to-follow, interactive course that encompasses three components of culture - music, history and dance. Students will engage in activities that develop and improve muscular strength, aerobic capacity and flexibility, while advancing the practical knowledge and application of choreography, dance skills and physical health from a global perspective. Zumba introduces various cultural dances so that students will be able to understand how human movement influences cultural interaction, inform diversity and enhance physical activity. Additionally, the societal and psychological benefits of physical activity through aerobic fitness and dance will be investigated. Students will apply these activities and skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1013. Introduction to Yoga. 2 Credit Hours.

Introduction to Yoga develops whole-person health and fitness for the reduction of stress. Students are introduced to the basic principles of yoga and will learn and apply methods and knowledge to increase body awareness and self-understanding. Students will also practice fundamental skills and movements, along with critical thinking strategies that make yoga a safe, daily practice. Physical and psychological preparation and values of the activity are required to fully understand course material. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1014. Intermediate Yoga. 2 Credit Hours.

Intermediate Yoga expands upon principles and postures covered in ACTV 1013 Introduction to Yoga. Intermediate Yoga provides students with more knowledge of yoga and offers more time to explore advanced movements. Students will learn the physiology and movements of yoga and apply them to individual practice. The ethics of yoga, history, principles in anatomy, motor development and biomechanics are expanded upon from Introduction to Yoga. Individual practice will include asana (posture), pranayama (breathing), and meditation led by the instructor and by fellow students.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ACTV 1013 or KINS 1064)

ACTV 1015. Yin Yoga: The Other Half of Yoga. 2 Credit Hours.

Yin Yoga is a complementary yoga practice to the more dynamic vinyasa (Yang) style that is predominant in today's western culture. In Yin Yoga, "the other half of yoga", students will learn to perform long-holds and supportive poses influencing the nervous system and deeper connective tissues. A deceptively simple practice, Yin Yoga transforms an asana (posture) into a deeper experience of meditation, reducing stress and anxiety. Students will learn to stretch and lengthen muscles and tissues, how to breathe through discomfort, fully relax, and find stillness. This course provides life-long usable techniques in the management of pain, caregiver fatigue, burnout, and chronic health conditions. This course will be a combination of yin yoga and vinyasa flow practices.

Repeatability: This course may not be repeated for additional credits.

ACTV 1018. Introduction to Pilates. 2 Credit Hours.

In Introduction to Pilates students will gain the basic knowledge and skills necessary to enhance their well-being and experience everyday health benefits. As a form of physical therapy, students will learn this holistic approach to well-being by improving balance, concentration, lowering stress, coordination, posture, core strength and flexibility. Students will learn to focus on the mind-body connection, helping the mind to maintain awareness of deep breathing and functional body movement. Students will develop and obtain the ability to apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1023. Martial Arts - Capoeira Angola (Brazilian Martial Arts). 2 Credit Hours.

Capoeira Angola can be described as a combination of art, dance, fight and game, incorporating corporal expression in diverse movements with music, instruments and song. It is a dialogue of bodies in motion, questions and answers through bodily improvisation to musical rhythms that are unique to its appearance. To gain an authentic understanding of Capoeira's philosophy and practice, students will engage in physical training and music instruction, while also discussing books, articles and films that illuminate the cultural legacy of Africa and Brazil. Students will immerse themselves in a living lineage of tradition, history and legendary masters. Special attention will be paid to the lineage of Mestre Pastinha, regarded by many as the guardian of Capoeira Angola.

Repeatability: This course may not be repeated for additional credits.

ACTV 1024. Beginning Tae Kwon Do. 2 Credit Hours.

Beginning Tae Kwon Do introduces students to the skills and knowledge for using the hands, arms, legs and feet to attack and defend oneself. Students will learn breathing and muscle control, competitive rules, the ranking system, safety, fitness, history, values, and etiquette. Tae Kwon Do is a Korean form of martial arts and is taught from a traditional perspective and supplemented by modern scientific principles. Students will learn how to apply physical and psychological preparation and values of participation in the activity. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1026. Beginning Aikido. 2 Credit Hours.

Beginning Aikido introduces students to the art of self-defense based on non-resistance, rather than strength. Aikido, "the way of harmony", is a unique art which can be practiced by people of all ages and levels of physical fitness. The study of Aikido techniques teaches smooth, balanced and coordinated movement in a non-competitive, cooperative atmosphere. Students strive with one another to refine their movements and further their understanding of Aikido principles. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1028. Beginning Karate. 2 Credit Hours.

Beginning Karate introduces students to the principles and techniques of this weaponless self-defense of Karate. Students will learn the fundamentals of self-defense against multiple opponents while employing the basic kinesthetics of blocking, kicking and striking. Students will be introduced to the code of ethics, history and the rules of formal competition. Students will learn the significant fitness and mental benefits of lifelong karate training. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1031. Judo. 2 Credit Hours.

Judo introduces the principles and techniques of grappling, throwing, falling, groundwork, as well as the rules and customs of the sport. Students will develop fitness, confidence and discipline while learning the moral values of Judo. Students will learn to use their opponent's own strength to put them off balance, using minimum effort for maximum efficiency, to throw the opponent to the ground or mat and immobilize them with a pin. Physical conditioning and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1033. Wrestling. 2 Credit Hours.

Wrestling introduces students to the knowledge and movement skills necessary to participate in scholastic (folkstyle) wrestling. Students will gain an overall understanding of the sport through demonstration and experiential learning. Various techniques, positions, and holds are discussed and practiced. Students will learn about wrestling styles, rules, strategies and best practices. Students will apply practice and skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1034. Introduction to Fencing. 2 Credit Hours.

Introduction to Fencing provides students with a basic understanding of the fundamental skills and knowledge necessary for fencing. Students learn fencing skills such as retreat, advance, lunge, parry and feint. Students will also practice defensive and offensive strategies, while learning proper care and selection of equipment, rules of the sport, and injury prevention. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1035. Personal Defense for Women. 2 Credit Hours.

Personal Defense for Women introduces a five-stage approach to personal protection (awareness, avoidance, prevention, physical action and follow up). Physical defensive skills involve "live" simulations while focusing on the concerns and needs of women. Personal Defense for Women is based on the foundations of the R.A.D. (Rape Aggression Defense) system. Students will learn personal protection and safety skills which can be practiced within a comfortable learning environment. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1039. Pickleball. 2 Credit Hours.

Pickleball is a fun paddle sport that combines the elements of tennis, badminton and ping-pong. Pickleball may be played indoors or outdoors, as doubles or singles. Students will learn the skills, basic strategies, etiquette and rules of this exciting game. Pickleball is a simple game that is easy to learn, but can develop into a quick, fast-paced, competitive game for all players. How to select proper equipment, as well as finding opportunities for further participation in Pickleball will be addressed. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1041. Badminton. 2 Credit Hours.

This course introduces students to the skills, etiquette and rules of badminton. Students will learn how to develop appropriate strategies for both singles and doubles play. The sport will help students develop aerobic stamina, agility, strength and precision. Students will improve their fitness and the motor coordination necessary for recreational life-long play. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1042. Beginning Tennis. 2 Credit Hours.

Beginning Tennis introduces students to the fundamental skills, strategies and etiquette of the sport of tennis. Students will become acquainted with a basic knowledge of the rules and will practice fundamental skills to become lifelong tennis participants. The emphasis of this course will be the development of movement skills and a progression from hitting to rallying. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1043. Intermediate Tennis. 2 Credit Hours.

Intermediate Tennis builds upon the skills learned in Beginning Tennis by improving footwork, focusing on stroke refinement, consistent ball placement, improved shot execution, and developing advanced strategies. Knowledge of the rules and court positioning will be enhanced to assist the student as they perform on an advanced recreational level and for a lifetime. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (KINS 1054 or ACTV 1042)

ACTV 1044. Beginning Golf. 2 Credit Hours.

Beginning Golf introduces students to the skills, strategies, etiquette, rules and selection of proper equipment, as well as opportunities for participation in golf. This introductory course is designed with the intent of teaching students the basic skills necessary to walk onto a golf course and play a knowledgeable, competent and enjoyable round of golf. Physical and psychological preparation and values of the sport are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1045. Intermediate Golf. 2 Credit Hours.

The Intermediate Golf course advances the skills learned in Beginning Golf. Advanced strategies, etiquette, knowledge of the rules and proper equipment selection will be taught, including current technological advances in the sport. This course has been designed with the intent of assisting students with the advanced skills necessary to play a knowledgeable, competent and competitive round of golf on a local golf course or recreational tournament. Physical and psychological preparation and values of the sport are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (KINS 1019 or ACTV 1044)

ACTV 1047. Gymnastics. 2 Credit Hours.

This introductory course will introduce students to the skills of floor exercise, tumbling, trampoline, and vaulting (for men and women); rings, horizontal bar, parallel bars, and side horse (for men); balance beam and uneven bars (for women). Students will gain the knowledge and skills needed to safely participate in beginning gymnastics. Students will be introduced to competition skill judging and gym equipment/apparatus. Physical and psychological preparation and values of the sport are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1048. Lifetime Indoor Games and Sports. 1 Credit Hour.

In Lifetime Indoor Games and Sports students are exposed to several indoor games and sports. Students will learn skills, rules and strategies needed to participate at beginning levels of selected lifetime indoor activities. Depending on the instructor, the indoor activities may include spikeball, floorball, futsal, dodgeball, net games and racquet sports. Historical and cultural influences will also be taught. Physical and psychological preparation and sportsmanship of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1049. Lifetime Outdoor Games and Sports. 1 Credit Hour.

In Lifetime Outdoor Games and Sports students are exposed to several outdoor games and sports. Students will learn skills, rules and strategies needed to participate at beginning levels of selected lifetime outdoor activities. Depending on the instructor, the outdoor activities may include bocce, disc golf, ultimate, softball, rugby and flag football. Historical and cultural influences will also be taught. Physical and psychological preparation and sportsmanship of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1051. Volleyball. 2 Credit Hours.

This course introduces students to the skills, etiquette and rules of volleyball. Volleyball can help students improve muscle strength in arms, shoulders and legs. Students will improve their hand-eye coordination, reflexes and balance necessary for recreational life-long play. As a non-contact and mixed gender sport, students will get to know other students, practice teamwork, improve communication and have fun. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1052. Soccer. 2 Credit Hours.

This course introduces students to the playing skills, strategies, history, etiquette and rules necessary for participation in soccer as a lifetime recreational sport. The course will utilize both indoor and outdoor playing/practice spaces. When indoors, the course will give attention to the international sport of Futsal, a game played on a hard-court emphasizing control, improvisation and technique. When on the outdoor field, emphasis will be on skills required for a traditional larger playing space. Physical, psychosocial factors and values of participation in the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1053. Basketball. 2 Credit Hours.

Basketball introduces the skills, strategies, etiquette, knowledge of the rules, and how to prepare for opportunities for participation in basketball as a lifetime recreational sport. Physical and psychological preparation and values of participation in the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1057. Adventure Climbing. 2 Credit Hours.

Adventure Climbing focuses on the physical, cognitive and social skills necessary to safely participate in climbing at ropes courses, rock climbing, aerial adventure parks and related settings. Students will learn safety and spotting techniques, selection of climbing equipment, knot tying, Prusik climbing, belaying and rappelling. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1058. Outdoor Activities and Leadership Skills. 2 Credit Hours.

This outdoor leadership course will lead students to explore the outdoors safely, with good self-care practices, and engaging in the environmental principles put forth by Leave No Trace. Students will learn and apply leadership skills through outdoor activities, gain awareness and sensitivity to the environment, and expand their knowledge and understanding of environmental challenges. Students will focus on building self-confidence and leadership qualities through various experiential and collaborative learning activities. Activities and skills will include risk management in the outdoors, learning to facilitate a low ropes challenge course, problem solving activities and team building activities. The class will include two, half-day graded field labs to demonstrate these skills.

Repeatability: This course may not be repeated for additional credits.

ACTV 1061. Introduction to Backpacking and Camping. 2 Credit Hours.

The Introduction to Backpacking and Camping course focuses on the physical, cognitive and social skills necessary to safely participate and enjoy outdoor wilderness experiences as a lifelong activity. This introductory course acquaints the student with the concepts of Leave No Trace, all-weather and low impact backpacking and camping, the selection and care of equipment, expedition planning and behavior, outdoor navigation, cooking methods, engaging the environment, safety in the outdoors, and basic survival techniques. The course includes at least two (2) overnight campouts and one (1) day hike along with instructional and planning meetings on campus. Physical and psychological preparation and values of the activity is included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

ACTV 1063. Outdoor Activity Workshop. 1 Credit Hour.

The Outdoor Activity Workshop is designed to introduce students to basic outdoor knowledge and skills needed to participate in outdoor adventure activities. Students will engage in outdoor fitness activities such as day hiking, basic wilderness first aid practices, and basic survival skills. Students will also be introduced to the Leave No Trace principles, mindfulness in nature, various outdoor activities, and basic navigational skills. The Outdoor Activity Workshop will require students to participate in two weekend lab(s) off-campus to experience nature and to practice learned skills. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

Physics (PHYS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PHYS 0834. Exploring the Cosmos. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

This GenEd course will use the fascinating science surrounding the makeup, origin, and future of our Universe to teach the methods by which scientists study nature. The course will also explore the (sometimes controversial) history of the subject, including the intersections of ethics and science as well as the role of different cultures. Note: Students may not receive credit for both PHYS 0846 (The Universe As We Know It) and PHYS 0834 (Exploring the Cosmos).

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

PHYS 0839. Powering the Future. 3 Credit Hours.

This course is typically offered in Fall and Spring.

How can we provide inexpensive, safe, environmentally clean energy supplies for the United States and the world as a whole despite rising population and increasing affluence? Study problems of our conventional fossil and nuclear fuel use, and how they might be relieved; explore the physical and technological possibilities for using energy much more efficiently; investigate various renewable-energy sources (such as solar, hydrogen cells, hydropower, and biofuels) that significantly reduce effects on the environment. In the course lab projects, you will research and develop a sustainable energy proposal for your own home, campus, or community. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot get credit for this course if they have successfully completed Physics 0939.

Course Attributes: GS, SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

PHYS 0847. How Things Work: The Physics of Everyday Life. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

How does a computer store information? Do humans and other animals see color the same way? What is stopping terrorists from developing nuclear weapons? What makes certain musical notes sound good together? What are the facts about global warming? Does the radiation from cell phones cause cancer? A basic knowledge of science is essential to being a smart consumer, an informed voter, and a full participant in society. How Things Work will survey a variety of important, topical questions relevant to technology, the natural world, and current events using lectures combined with illustrative in-class demonstrations such as a rocket powered by water, a magnet made to levitate using superconductors and liquid nitrogen, a crank-operated electric generator, a CT scan machine, and an engine fueled by ice. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

PHYS 0872. The Science of Sound. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

For living things the ability to hear sounds is an essential tool for survival, and sound is central to speech and languages. In the arts sound also plays a fundamental role, above all in music. The close connection between music, mathematics, and physics has long fascinated scientists. Advances in electronics and computing are revolutionizing the composition, production, and recording of sound. Science of Sound is an interdisciplinary course involving elements of physics, physiology, psychology, music, and engineering. After a four-week introduction to the fundamental physics of sound waves, we will consider human hearing and the human voice; scales, harmony, and sound production by musical instruments; architectural acoustics; and the electronic reproduction of sound. The course includes many in-class demonstrations. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot get credit for this course if they have completed Physics 1003: Acoustics.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

PHYS 0939. Honors Powering the Future. 3 Credit Hours.

This course is typically offered in Spring.

How can we provide inexpensive, safe, environmentally clean energy supplies for the United States and the world as a whole despite rising population and increasing affluence? Study problems of our conventional fossil and nuclear fuel use, and how they might be relieved; explore the physical and technological possibilities for using energy much more efficiently; investigate various renewable-energy sources (such as solar, hydrogen cells, hydropower, and biofuels) that significantly reduce effects on the environment. In the course lab projects, you will research and develop a sustainable energy proposal for your own home, campus, or community. (This is an Honors course.) NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot get credit for this course if they have successfully completed Physics 0839.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO, SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

PHYS 1001. Physics: Matter and Motion. 4 Credit Hours.

This course is typically offered in Fall and Spring.

An introduction to the ideas and techniques used in the study of motion. Application to a wide variety of physical systems ranging from air molecules to footballs to black holes. Mostly descriptive using photographic techniques, films, and demonstrations. NOTE: (1) No laboratory. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor. (3) Students who have taken a higher number introductory physics sequence cannot take this course for credit.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

PHYS 1004. Introduction to Astronomy. 3 Credit Hours.

This course is typically offered in Fall.

After a description of local space which includes the universe of galaxies, red shift, and the big bang will be discussed. White dwarfs, red giants, pulsars, black holes, and quasars will be covered. The treatment will be mostly descriptive, utilizing slides, NASA films, and several trips to our planetarium. NOTE: (1) No laboratory. (2) This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1021, any MATH course numbered 1022 to 3080 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, or 'Y' in MC6T)

PHYS 1005. Light, Art, and Nature. 4 Credit Hours.

This course is typically offered in Spring.

An introduction to the properties of light, whether interpreted as rays, waves, or photons. Discussion of the basic ideas of geometric and wave optics, with application to the analysis of photography, color, vision, and modern physics. Emphasis is on factors that permit the artist and observer to understand and more fully control the design and interpretation of images of all kinds. Demonstrations, experiments, and video and computer simulations to analyze signals received by the eyes or instruments. NOTE: (1) Course is primarily designed for students interested in the visual arts, but is open to anyone. Minimal mathematics. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

PHYS 1006. Medical Physics. 3 Credit Hours.

This course is not offered every year.

Medical Physics is an introductory science elective course that is open to students with little exposure to science or mathematics. With nominal (high school level) mathematics preparation, students can learn how basic principles of physics are utilized in medical processes. Topics to be examined include: the nature of radiation, radiation exposure, nuclear medicine, CT and MR imaging, and ultrasound techniques.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1021, any MATH course numbered 1022 to 3080 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, or 'Y' in MC6T)

PHYS 1007. Science & Science Fiction in Film. 3 Credit Hours.

This course is typically offered in Spring.

This course takes a captivating look at physical phenomena depicted in a collection of popular science fiction films. These include Deep Impact (1998) in which Earth is threatened by a giant comet, The Peacemaker (1998) where a terrorist's atomic bomb is planted in New York City, I Robot (2007) with a detective fighting to prevent a takeover of the human race by robots, and Contact (1997) featuring an astronomer who discovers the first real message from an alien civilization. Other films deal with global warming, astronomy, electricity and magnetism.

There are no in-person meetings of this class. Students discuss films on the course web site and submit answers to weekly questions via the Internet at times that are individually convenient for each student. E-Mail the course instructor, Dr. Dubeck, at ldubeck@temple.edu for access to the course web site.

Repeatability: This course may not be repeated for additional credits.

PHYS 1008. Physics Seminar I. 1 Credit Hour.

This course is typically offered in Fall.

Physics Seminar I serves as a survey introduction to physics of the 21st century and the numerous, diverse career paths followed by those with a physics degree. The intent of this course is to build a community of physics majors while they are at the beginning of their typical course of study, with the introductory physics courses providing common points of discussion. Students will attend talks, lab tours and open-ended question-and-answer roundtable discussions given by physics degree holders. One section of the class will focus on speakers from across the spectrum of physics related research at Temple University, including solid state, optical, nuclear, medical and chemical physics. The course will also provide a venue for those from non-academic sectors where the physics degree is highly valued, such as national laboratories, industrial research, patent law, finance and others. This is a required course for BS and BA in Physics and BS in Physics with Teaching majors and is recommended for other physics related majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1021 (may be taken concurrently), PHYS 1061 (may be taken concurrently), PHYS 1961 (may be taken concurrently), PHYS 2021 (may be taken concurrently), or PHYS 2921 (may be taken concurrently))

PHYS 1021. Introduction to General Physics I. 0 or 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

This course is an algebra-based introduction to physics. Topics covered in this course include mechanics, waves and oscillations, and elements of thermodynamics. Biological applications discussed where appropriate.

NOTE:

(1) Completing a 2 semester physics sequence will satisfy your Science and Technology (GS) GenEd requirements. (2) Two sections are required for this course: a 0.0 credit Laboratory section and the 4.0 credit Lecture & Recitation section. The course number for the Lecture & Recitation are the same for the Laboratory, but have unique section numbers. (3) Some pre-professional health programs require a calculus-based course such as Physics 1061.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1021, any MATH course numbered 1022 to 3080 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, or 'Y' in MC6T)

PHYS 1022. Introduction to General Physics II. 0 or 4 Credit Hours.

This course is typically offered in the Fall, Spring, and Summer II.

This second semester algebra-based introductory physics course is a follow-up to Physics 1021. Topics covered in this course include electricity and magnetism, optics, atomic, molecular, and nuclear physics. Biological applications discussed where appropriate.

NOTE:

(1) Completing a 2 semester physics sequence will satisfy your Science and Technology (GS) GenEd requirements. (2) Two sections are required for this course: a 0.0 credit Laboratory section and the 4.0 credit Lecture & Recitation section. The course numbers for the Lecture & Recitation are the same for the Laboratory, but have unique section numbers. (3) Some pre-professional health programs require a calculus-based course such as Physics 1062.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1011, PHYS 1021, PHYS 1061, PHYS 2021, or PHYS 2921)

PHYS 1031. Physics I for Pre-Health Postbaccalaureates. 0 or 4 Credit Hours.

This course is typically offered in Fall.

This is the first semester of general physics for post-baccalaureate students. It includes a quantitative introduction to kinematics, dynamics, work, energy, momentum, static equilibrium, fluids, vibrations, waves, sound, temperature, kinetic theory, heat, and the laws of thermodynamics. Special emphasis is given to applications of these topics to health sciences.

Repeatability: This course may not be repeated for additional credits.

PHYS 1032. Physics II for Pre-Health Postbaccalaureates. 0 or 4 Credit Hours.

This course is typically offered in Spring.

This is the second semester of general physics for post-baccalaureate students. It includes a quantitative introduction to electricity and magnetism, optics, atomic, molecular, and nuclear physics. Special emphasis is given to applications of these topics to health sciences. Note: To register for this course, students must satisfy the prerequisite or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in PHYS 1031.

PHYS 1061. Elementary Classical Physics I. 0 or 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

Calculus-based introductory physics focused on developing algorithmic problem-solving skills and intended as a preparation for advanced courses in physics as well as preparation for further study in upper division science and engineering. Topics include elementary vector algebra, one-dimensional motion, particle dynamics, work and energy, conservation of energy, conservation of linear momentum, collisions, rotational kinematics and dynamics, conservation of angular momentum, oscillations, waves, and gravitation.

NOTE:

(1) By completing a 2 semester physics sequence you will satisfy your Science and Technology (GS) GenEd requirements. (2) Students cannot receive credits for both Physics 1061 and 2021. (3) Two sections are required for this course: a 0.0 credit Laboratory section and the 4.0 credit Lecture & Recitation section. The course numbers for the Lecture & Recitation are the same for the Laboratory, but have unique section numbers. (4) Some pre-health programs require a calculus-based course such as this course, Physics 1061.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher; may be taken concurrently), MATH 1941 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

PHYS 1062. Elementary Classical Physics II. 0 or 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer II.

This second semester calculus-based introductory physics course is a follow-up to Physics 1061. The course focuses on developing algorithmic problem-solving skills and is intended as a preparation for advanced courses in physics as well as preparation for further study in upper division science and engineering. Topics include temperature, heat and the first law of thermodynamics, kinetic theory of gases, entropy and the second law of thermodynamics, electrical charges, the electric field, Gauss's Law, electrostatic potential, capacitors and dielectrics, current, resistance, Kirchhoff's laws, the magnetic field, Ampere's Law, Faraday's Law, inductance, geometrical optics, and interference and diffraction of light.

NOTE:

(1) By completing a 2 semester physics sequence you will satisfy your Science and Technology (GS) GenEd requirements. (2) Students cannot receive credit for both Physics 1062 and 2022. (3) Two sections are required for this course: a 0.0 credit Laboratory section and the 4.0 credit Lecture & Recitation section. The course numbers for the Lecture & Recitation are the same for the Laboratory, but have unique section numbers. (4) Some pre-health programs require a calculus-based course such as this course, Physics 1062.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1061, PHYS 2021, or PHYS 2921) and (MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW)

PHYS 1083. Directed Reading/Study. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, and Summer I.

Independent study in physics. NOTE: This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

PHYS 1454. Observational Astronomy Through Design. 4 Credit Hours.

This course studies astronomy through direct measurements made by students through devices they design and produce through the Temple University Lorretta C. Duckworth makerspace. Weekly classroom meetings will verse students in basic astronomy, use of the makerspace, and transition to active discussions as observations accumulate. Students will become familiar with basic instrument design, data acquisition, and data analysis as they observe the Sun, Moon, bright stars, planets (when visible) and time-sensitive targets of opportunity. Students will be able to propose their own observational targets as well. Note: This course is 2 semesters long to allow for enough observations to make conclusions about astronomical motions, and regular observations will need to be made at regular intervals outside of class time.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1021, any MATH course numbered 1022 to 3080 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, or 'Y' in MC6T)

PHYS 1961. Honors Elementary Classical Physics I. 0 or 4 Credit Hours.

This course is typically offered in Fall.

This undergraduate level course is intended for Honors students majoring in physics and related fields. Physics 1961 is the first part of a two-semester course in classical physics starting with classical mechanics for Physics 1961 and electricity and magnetism for Physics 1962. Topics for Physics 1961 include one- and two-dimensional motion; forces and particle dynamics, work and energy, conservation of energy, linear momentum, and angular momentum; collisions, rotational kinematics and dynamics, gravitation, oscillations, waves, and fluid dynamics. This course differs from the Physics 1061 course in the number of topics and a more mathematical treatment and discussion. A strong background in algebra and trigonometry and some understanding of vector algebra is required. A math review will take place during the first week of classes including basic elements of algebra, trigonometry, vector algebra and some calculus. This course is taught in the Studio Physics format combining elements of lecturing and recitation supplemented with a separate, but integrated lab. Each student is assigned to a certain lecture section (Lecture plus Recitation) and lab section. This course requires registration for a 0.0 credit Laboratory section in addition to the 4.0 credit Lecture and Recitation section. The Laboratory sections corresponding to a course are listed under the same course number as the Lecture and Recitation sections, but have unique section numbers.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1941 (C or higher; may be taken concurrently), MATH 1041 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

PHYS 1962. Honors Elementary Classical Physics II. 0 or 4 Credit Hours.

This course is typically offered in Spring.

This undergraduate level course is intended for Honors students majoring in physics and related fields. Physics 1962 is the second part of a two semester course in classical physics starting with classical mechanics for Physics 1961 and electricity and magnetism for Physics 1962. Topics for Physics 1962 include temperature, heat and the first law of thermodynamics, kinetic theory of gases, entropy and the second law of thermodynamics, electrical charges, the electric field, Gauss's Law, electrostatic potential, capacitors and dielectrics, current, resistance, the magnetic field, Ampere's Law, Faraday's Law, inductance, geometrical optics, and interference and diffraction of light. This course differs from Physics 1062 in the number of topics and a more mathematical treatment and discussion. A strong background in algebra and trigonometry along with elementary understanding of vector algebra is required. Basic understanding of calculus is helpful. A math review will take place during the first week of classes including basic elements of vector algebra and calculus, in particular vector calculus. This course is taught in the Studio Physics format combining elements of lecturing and recitation supplemented with a separate, but integrated lab. Each student is assigned to a certain lecture section (Lecture plus Recitation) and lab section. This course requires registration for a 0.0 credit Laboratory section in addition to the 4.0 credit Lecture and Recitation section.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1942 (may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (PHYS 1961, PHYS 1061, PHYS 2921, or PHYS 2922)

PHYS 2021. General Physics I. 0 or 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

Calculus-based introductory physics. Topics include mechanics, gravitation, energy conservation, fluids and waves. Biological applications discussed where appropriate. NOTE: By completing a 2 semester physics sequence you will satisfy your Science and Technology (GS) GenEd requirements. Students cannot receive credits for both Physics 1061 and 2021. This course is an option for pre-health, neuroscience and genomic medicine majors.

Two sections are required for this course. This course requires registration for a 0.0 credit Laboratory section in addition to the 4.0 credit Lecture & Recitation section. The Laboratory sections corresponding to a course are listed under the same course number as the Lecture & Recitation sections, but have unique section numbers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1042 (may be taken concurrently), MATH 1044 (C or higher; may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MATW, or 'Y' in CRMA10)

PHYS 2022. General Physics II. 0 or 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer II.

Normally follows Physics 2021. Calculus-based introductory physics. Topics include electricity and magnetism, optics, atomic, molecular, and nuclear physics. Biological applications discussed where appropriate. NOTE: By completing a 2 semester physics sequence you will satisfy your Science and Technology (GS) GenEd requirements. Students cannot receive credits for both Physics 1062 and 2022. This course is an option for pre-health, neuroscience and genomic medicine majors.

Two sections are required for this course. This course requires registration for a 0.0 credit Laboratory section in addition to the 4.0 credit Lecture & Recitation section. The Laboratory sections corresponding to a course are listed under the same course number as the Lecture & Recitation sections, but have unique section numbers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (PHYS 1061, PHYS 2021, or PHYS 2921) and (MATH 1042 (may be taken concurrently), MATH 1044 (C or higher; may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MATW, or 'Y' in CRMA10)

PHYS 2063. Wave Physics. 3 Credit Hours.

This course is typically offered in Fall.

This course uses oscillatory phenomena to form a bridge from first year physics and mathematics to more complex physics topics. A thorough mathematical treatment of mechanical vibrations and alternating current circuits is followed by a description of waves propagating in one dimension. This treatment will include techniques for solving linear ordinary and partial differential equations. Strings and sound waves are used to illustrate transverse and longitudinal wave phenomena. Next, this is extended into electromagnetic waves in three dimensions, as well as transmission lines. Fourier methods are introduced, followed by waves and interference phenomena in optical systems. Applications to geometrical and physical optics are described and analyzed. The end of the course contains introductions to quantum mechanical waves and also to nonlinear phenomena.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (PHYS 1062, PHYS 1962, PHYS 2022, PHYS 2922 (C or higher), or 'Y' in CRPH01) and (MATH 1042 (C or higher), MATH 1942 (C or higher), MATH 1951 (C or higher), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

PHYS 2083. Directed Reading/Study. 2 to 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Undergraduate independent study in physics. NOTE: This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

PHYS 2101. Classical Mechanics. 3 Credit Hours.

This course is typically offered in Spring.

Newton's laws of motion, one-dimensional motion, second order differential equations, harmonic oscillators (damped, forced), vector analysis, conservation laws, three-dimensional motion, central forces, motion in electromagnetic fields, collisions, center-of-mass transformations, two-body problem, numerical/computer solutions, coupled oscillators. Rigid body rotation, statics, elasticity, fluid equilibrium, gravitation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 2043 or MATH 2943)

PHYS 2502. Mathematical Physics. 4 Credit Hours.

This course is typically offered in Spring.

Infinite series, determinants and matrices, ordinary differential equations, vector analysis, curvilinear coordinate systems, Fourier series, properties of Legendre and Bessel functions, partial differential equations. Laboratory portion of course provides training in use of Mathematica, an integrated environment for technical computing, to solve problems in mathematical physics. NOTE: No prior computer experience is necessary.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 2043 or MATH 2943)

PHYS 2511. Scientific Computing I. 1.5 Credit Hour.

This course is typically offered in Spring.

An introduction to computing as a tool for solving scientific problems. No previous programming experience is assumed. Students completing this course will be able to write their own computer programs to solve introductory science problems, and will be prepared to understand more advanced techniques. Topics include the basic computer science needed to understand hardware and software processes, program organization and debugging, spreadsheet programs (Excel), interpreted programming languages (Python), compiled programming languages (C++), basic numerical methods for solving physics problems, basic error analysis, and information visualization techniques.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1021, PHYS 1061, PHYS 1961, PHYS 2021, or PHYS 2921) and (MATH 1021, any MATH course numbered 1022 to 3080, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MA03, 'Y' in MATW, or 'Y' in MC6T)

PHYS 2796. Introduction to Modern Physics. 4 Credit Hours.

This course is typically offered in Spring.

The course will provide an introduction to the special theory of relativity and quantum mechanics, with emphasis of their applications to atomic, molecular and solid state physics. The course is calculus based and writing intensive; it relies heavily on problem solving and technical writing.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 2043 (may be taken concurrently) or MATH 2943 (may be taken concurrently))

PHYS 2921. Honors General Physics I. 0 or 4 Credit Hours.

This course is typically offered in Fall.

This is the honors version of Physics 2021. Topics include mechanics, gravitation, energy conservation, fluids and waves. Biological applications discussed where appropriate.

Two sections are required for this course. This course requires registration for a 0.0 credit Laboratory section in addition to the 4.0 credit Lecture & Recitation section. The Laboratory sections corresponding to a course are listed under the same course number as the Lecture & Recitation sections, but have unique section numbers.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1042 (may be taken concurrently), MATH 1044 (C or higher; may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MATW, or 'Y' in CRMA10)

PHYS 2922. Honors General Physics II. 0 or 4 Credit Hours.

This course is typically offered in Spring.

This is the honors version of Physics 2022 and normally follows Physics 2921. Topics include electricity and magnetism, optics, atomic, molecular, and nuclear physics. Biological applications discussed where appropriate.

Two sections are required for this course. This course requires registration for a 0.0 credit Laboratory section in addition to the 4.0 credit Lecture & Recitation section. The Laboratory sections corresponding to a course are listed under the same course number as the Lecture & Recitation sections, but have unique section numbers.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (PHYS 1061, PHYS 2021, or PHYS 2921) and (MATH 1042 (may be taken concurrently), MATH 1044 (C or higher; may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MATW, or 'Y' in CRMA10)

PHYS 3000. Contemporary Physics. 1 or 2 Credit Hour.

This course is not offered every year.

This introduces students to an active research area in Physics, in particular an area currently represented in the Temple Physics Department. This includes both theoretical and experimental physics topics. Examples would include computationally intensive techniques, research connected with national facilities used by the faculty, and emerging new fields based on the recent discoveries. The format will reflect the specific outcomes of the course syllabus as offered. As this is a low-credit course, the course may NOT be used to fulfill a Physics or Science elective in any major. Students must have completed PHYS 2511 and PHYS 2796. Other prerequisites will depend on the particular topic.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in PHYS 2511 and PHYS 2796.

PHYS 3083. Directed Reading/Study. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course offers the opportunity for more advanced independent study. NOTE: This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

PHYS 3091. Research Methods. 3 Credit Hours.

This course is typically offered in Spring.

Research Methods is required for all of the TUteach with Teaching majors. It is one of several content courses specially designed to meet the needs of future teachers. Sections meet two hours per week for non-traditional, interactive lectures and two hours per week for lab. The course is cross-listed in Biology, Chemistry, Earth and Environmental Science, and Physics. The goals of the course are (1) to provide students with the tools that scientists use to solve scientific problems; (2) to give students the opportunity to use these tools in a laboratory setting; (3) to make students aware of how scientists communicate with each other through peer-reviewed scientific literature; and (4) to enable students to understand how scientists develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in conventional science classes. Students design and carry out four independent inquiries, which they write up and present in the manner that is common in the scientific community. The inquiries incorporate mathematics and the various science disciplines, thus the team of instructors teaching this course have expertise in different disciplines and are available to supervise all students as they work on their inquiries in the lab. The combination of Research Methods and the TUteach course "Perspectives on Science and Mathematics" (Philosophy 2196) provides prospective science and mathematics teachers with an in-depth understanding of how the scientific enterprise works. NOTE: Physics 3091 is only available for major credit in the Physics with Teaching BS program.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SCTC 1289 or SCTC 1389)

PHYS 3101. Analytical Mechanics. 3 Credit Hours.

This course is typically offered in Fall.

Moving coordinate systems, three-body problems, partial differential equations, wave propagation (strings, membranes, fluids), boundary value problems, normal modes, fluid equations of motion, viscosity; virtual work, Lagrange's equations, Hamilton's equations; angular momentum of a rigid body, inertia tensor, Euler's equations, Euler angles, tops and gyroscopes, small vibrations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 2101.

PHYS 3301. Electricity and Magnetism. 4 Credit Hours.

This course is typically offered in Fall.

Electrostatics, magnetostatics, microscopic interpretation of polarization P and magnetization M , electrostatic and magnetostatic energy, Faraday's Law, self and mutual inductance, magnetic circuits; integral and differential forms of Gauss, Ampere, and Faraday laws; AC circuits; introduction to the displacement current and Maxwell's equations. Laboratory portion of the course provides investigation on DC and AC circuits, bridge circuits, sources of emf, Hall effect, and operational amplifier circuits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 2043 or MATH 2943)

PHYS 3302. Classical Electromagnetism. 3 Credit Hours.

This course is typically offered in Spring.

Solutions to the equations of Poisson and Laplace; multipole expansions; electrostatic and magnetostatic energy, forces, and torques; Maxwell's equations; the wave equation; radiation fields, Poynting's Theorem, microwave and optical waveguides.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 3301 and (PHYS 2502 or MATH 4041)

PHYS 3424. Introduction to Astrophysics. 3 Credit Hours.

This course will cover details of basic astronomy, introductory stellar physics (including stellar structure, fusion processes, stellar evolution, and stellar remnants), the properties of galaxies and dark matter, introductory cosmology and general relativity.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 2796 and (MATH 2043, MATH 2943, 'Y' in MA08, or 'Y' in CRMA12)

PHYS 3511. Scientific Computing II. 1.5 Credit Hour.

This course is typically offered in Fall.

This course in computational techniques for solving physical problems is for students who have taken PHYS 2511 Scientific Computing I or had previous programming experience. Topics include iterative solutions such as Runge-Kutta, solutions to coupled differential equations, common problems and algorithms in physics, Monte Carlo techniques, Stochastic methods, and Object Oriented Programming (C++).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (PHYS 1022, PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 1042, MATH 1044 (C or higher), MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080, 'Y' in MATW, or 'Y' in CRMA10)

PHYS 3701. Introduction to Quantum Mechanics I. 3 Credit Hours.

This course is typically offered in Spring.

Introduction to the formalism of Quantum Mechanics. Schrodinger equation and its solutions in one-, two-, and three-dimensions. Hermitian operators, eigenfunctions and eigenvalues. Angular momentum and Spin. Approximation methods including the variational principle and perturbation theory. Time-dependent potentials and transition rate. Theory of scattering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 2701 or PHYS 2796) and (PHYS 2502 or MATH 4041)

PHYS 3702. Optical and Electronic Properties of Materials, Including Thin Films and Nanomaterials. 4 Credit Hours.

This course is typically offered in the Fall.

Primarily for B.S. in Materials Science and Physics students, but open to others.

This course will introduce the basic theory behind and examine the process/ structure/property/performance relationships that dictate the optical and electronic properties of materials with an emphasis on nanoparticles, thin films and materials for energy production. The classroom component will also describe the techniques commonly used in research and industrial settings to characterize these material properties, as well as their relationship to mechanical and thermal properties. Students will gain significant hands-on experience with these materials characterization techniques in the laboratory component of the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2043 or MATH 2943) and PHYS 2796.

PHYS 3703. Quantum Materials: Properties, Characterization and Application. 4 Credit Hours.

This course is typically offered in the Spring.

Primarily for B.S. in Materials Science and Physics students, but open to others.

This course introduces exotic properties occurring in so-called quantum materials that can offer opportunities for applications in information and clean energy technology. The materials that host such properties are therefore at the forefront of solid state research. The goal is building a phenomenological understanding of topics including the origin of magnetism and superconductivity, interactions and long range order, graphene and two-dimensional systems and heterostructures and their applications. The course will have a lab component aimed at providing hands-on experience with fabrication and characterization of quantum materials.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 3702.

PHYS 4000. Special Topics in Physics. 3 or 4 Credit Hours.

This course is not offered every year.

This course covers an active research area in Physics, in particular an area currently represented in the Temple Physics Department. This includes both theoretical and experimental physics topics. Examples would include computationally intensive techniques, research connected with national facilities used by the faculty, and emerging new fields based on the recent discoveries. The format will reflect the specific outcomes of the course syllabus as offered. Students must have completed PHYS 2502 and PHYS 2796. Other prerequisites will depend on the particular topic.

Repeatability: This course may be repeated for additional credit.

PHYS 4091. Undergraduate Research. 2 to 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course offers the opportunity for undergraduate research in physics.

Repeatability: This course may be repeated for additional credit.

PHYS 4101. Thermal Physics. 3 Credit Hours.

This course is typically offered in Fall.

The three laws of thermodynamics; thermodynamic potentials; ideal and non-ideal gases; phase transitions; chemical equilibrium. Introduction to equilibrium statistical mechanics; statistical definition of entropy; applications to fluids, magnetic systems, the ideal quantum gas. Prior to Fall 2017, this course was named "Thermodynamics and Kinetic Theory". Students may only earn credit once for PHYS 4101.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 2043 or MATH 2943)

PHYS 4301. Electronics. 3 Credit Hours.

This course is typically offered in Spring of odd years.

Basic circuit ideas, Thevenin/Norton theorems, input/output impedance, diodes, transistors, feedback, operational amplifiers, elements of digital electronics, transducers for physical measurements. NOTE: Course offered on odd-numbered years.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 3301.

PHYS 4302. Optics. 3 Credit Hours.

This course is typically offered in Fall.

The emphasis of this course is on physical and laser optics. Topics include review of geometric optics, matrix methods in paraxial optics, fiber optics, wave equations, superposition and interference of light, diffraction, polarization of light, coherence, laser operation, characteristics of laser beams and selected modern optics applications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 2701, PHYS 2796, CHEM 3301, or CHEM 3302)

PHYS 4501. Computational Design of Novel and Quantum Materials. 3 Credit Hours.

This course is typically offered in the Fall.

Primarily for B.S. in Materials Science and Physics students, but open to others.

The course provides state-of-the-art computational and data-driven approaches for accelerating the discovery, synthesis, and development of novel functional materials and solid-state materials with exotic quantum phases. It begins with a brief overview of current practical computational tools for materials design in the field. Data-driven approaches, such as machine learning and materials database, will be introduced as complementary tools to discover and design novel materials. The course will describe ways to utilize both computational and data-centric approaches to enable the "virtual design" of functional materials. Applications based on both molecule systems and solid-state materials will be discussed. Machine learning and computational practices will be provided through Python-based weekly projects. Topics that will be covered in the course: computational methods for molecules and solid-state materials, data-driven material design approaches (database query, simulation input/output management, workflows), shallow and deep machine learning models for material property predictions, design of quantum materials for quantum information science and technologies.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SCTC 1013 and PHYS 3703.

PHYS 4502. Theoretical/Computational Materials Science. 3 Credit Hours.

This course is typically offered in the Spring.

Primarily for B.S. in Materials Science and Physics students, but open to others.

The course explains how quantum mechanics can predict what materials can exist, and with what properties, and thus can be used to design useful new materials on the computer. It begins with a summary of the quantum mechanics of one-electron and of interacting many-electron systems. This leads up to the Kohn-Sham density functional theory, which describes the ground-state energy and density of a many-electron system in a way that is formally exact, by solving a set of self-consistent one-electron Schrodinger equations. The computational efficiency and predictive accuracy of approximations to the exact density functional for the exchange-correlation energy have made this approach the most widely used method in physics or chemistry. Simple approximations are explained, and their successes and failures for materials prediction are summarized. Briefly described are methods that can be more accurate but more computationally expensive, including correlated wavefunction methods like quantum Monte Carlo and quasi-particle methods like GW.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 3703.

PHYS 4511. Scientific Computing III. 1.5 Credit Hour.

This course is typically offered in Spring.

This course in computational techniques for solving physical problems is for students who have taken PHYS 3511 Scientific Computing II or had extensive previous programming experience. This course covers advanced topics in computational problem solving such as machine learning, probability density function optimization, and Bayesian statistical methods, GPU programming. The instructor may add additional topics of interest.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (PHYS 1022, PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922) and (MATH 1042, MATH 1044 (C or higher), MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080, 'Y' in MATW, or 'Y' in CRMA10)

PHYS 4701. Introduction to Solid State Physics. 3 Credit Hours.

This course is typically offered in Spring of even years.

Elementary theory of the solid state. Survey of mechanical, thermal, optical, electrical, and magnetic properties of solids. NOTE: Course offered on even-numbered years.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 3701.

PHYS 4702. Introduction to Quantum Mechanics II. 3 Credit Hours.

This course is typically offered in Fall.

Applications of Quantum Mechanics to physical systems. Atomic and molecular structure, spectra, and selection rules. Condensed matter systems including periodic solids. Quantum statistical phenomena. Properties of atomic nuclei, radioactive decays, and nuclear reactions. Elementary particles and their interactions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 3701.

PHYS 4796. Experimental Physics. 3 Credit Hours.

This course is typically offered in Spring.

An intermediate laboratory course with an introduction to data analysis and error estimation. Students independently perform two or three experiments, with suitable reports. NOTE: Capstone writing course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 2701 or PHYS 2796)

PHYS 4801. Atomic, Molecular and Optical Physics. 4 Credit Hours.

This course on Atomic, Molecular and Optical (AMO) Physics will provide upper level undergraduate students a preparation for research in AMO science through building a solid foundation for interaction of light with atoms and molecules. The course includes a review of atomic structure, interaction of atoms and molecules with external fields, semiclassical theory of light-matter interaction, introduction to dressed quantum states by laser radiation, experimental techniques of laser spectroscopy, cooling and trapping of atoms, Bose-Einstein condensation, nonlinear phenomena with light and ultrafast laser science. The computational component of the course involves using molecular potential energy functions to solve the radial Schroedinger equation for diatomic molecules. This component of the course is introduced in the context of labs in the laser laboratory of the AMO Physics group in SERC. The resulting wavefunctions can be used with theoretical electronic transition dipole moments to calculate fundamental parameters in the interaction of light with matter such as Einstein's coefficients for absorption of light, stimulated and spontaneous emission of light as well as Rabi frequencies. Note: Graduate students taking this course should have completed PHYS 5301 instead of PHYS 3301. Similarly Graduate students should have completed PHYS 5701 or CHEM 5301 instead of PHYS 3701.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 2796, CHEM 3301, or CHEM 3302), (PHYS 3301 or PHYS 4302), and PHYS 3701 (may be taken concurrently)

Political Science (POLS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

POLS 0825. Quantitative Methods in the Social Sciences. 4 Credit Hours.

Psychological, political, social, and economic arguments and knowledge frequently depend on the use of numerical data. A psychologist might hypothesize that I.Q. is attributable to environmental or genetic factors; a politician might claim that hand gun control legislation will reduce crime; a sociologist might assert that social mobility is more limited in the United States than in other countries, and an economist might declare that globalization lowers the incomes of U.S. workers. How can we evaluate these arguments? Using examples from psychology, sociology, political science, and economics, students will examine how social science methods and statistics help us understand the social world. The goal is to become critical consumers of quantitative material that appears in scholarship, the media, and everyday life. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed SOC 0825, SOC 0925, POLS 0925, PSY 0825, or ANTH 0825.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

POLS 0829. The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0832. Politics of Identity in America. 3 Credit Hours.

Gay or straight. Black or white. Male or female. What do these different group identities mean to Americans? How do they influence our politics? Should we celebrate or downplay our diversity? This course explores how we think about others and ourselves as members of different groups and what consequences it has for how we treat one another. Our fundamental social identities can be a source of power or of powerlessness, a justification for inequality or for bold social reform. Students learn about the importance of race, class, gender and sexual orientation across a variety of important contexts, such as the family, workplace, schools, and popular culture and the implications these identities have on our daily lives. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed Gender, Sexuality & Women's Studies 0832/0932, History 0832, Political Science 0932, Sociology 0832 or Women's Studies 0832/0932.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0859. The Making of American Society: Melting Pot or Culture Wars?. 3 Credit Hours.

Terrorism, illegal immigration, gay marriage, religious conflict, political in-fighting, corporate corruption, racial animosities, civil liberties assaults, media conglomeration, Wal-Mart goes to China and the rich get richer. America in the 21st century is a contentious society. How did we get to this place in time? Examine what makes American society distinctive from other advanced industrial democracies as we study the philosophical origins of America, the development of social and economic relationships over time, and the political disputes dominating contemporary American life. The course relies heavily on perspectives from History, Sociology and Political Science to explain the challenges facing contemporary American society. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: AMST 0859, History 0859, PHIL 0859, or SOC 0859.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0862. Development & Globalization. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: History 0862, GUS 0862, POLS 0962, or SOC 0862/0962.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0864. War and Peace. 3 Credit Hours.

Total war, weapons of mass destruction, genocide. These were not solely inventions of the 20th century nor are they the natural consequences of a violent human nature. Leaders, armies, and the strategies they pursue are rooted in their social and political context. Weapons are the products of not merely technological but also historical and cultural development. Battles occur on a political and historical terrain. Learn how ancient ideology, medieval technology, modern propaganda, and more have changed how humans wage war and make peace. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed History 0864/0964.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

POLS 0866. World Affairs. 3 Credit Hours.

We live in a global age when events beyond our borders significantly affect our lives. Sharpen your understanding of international developments, including wars, economic globalization, wealth and poverty, the spread of democracy, environmental degradation, and global pandemics. This course offers an introduction to the study of world affairs that gives you the conceptual tools to deepen your understanding of how major historical and current trends in the world affect your life and that of others around the globe. Readings include historical documents, classic texts in the study of international relations, and current perspectives on the state of the world from multiple disciplinary perspectives. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: History 0866, GUS 0866 or POLS 0966.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

POLS 0868. World Society in Literature and Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

POLS 0878. Asians, Asian Americans, and Pacific Islanders in the United States: Race, Diversity, and Identity. 3 Credit Hours.

Who are Asians, Asian Americans, and Pacific Islanders (AAPIs) in the American context? How have AAPIs shaped the making of state and society in the United States in terms of culture, law, economics, and politics? What major crises and historical events have generated racism and racialized stereotyping against AAPI communities? How have AAPI minorities mobilized against exclusion, racism, and marginalization to advance new interests and goals, especially when juxtaposed with other minority groups and social forces? What is the future of AAPIs in America? This course introduces students to the tapestry of AAPI experiences in America. It recovers their importance through lectures and discussions, based upon careful analysis of written texts and creative materials.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

POLS 0925. Honors Quantitative Methods in the Social Sciences. 4 Credit Hours.

Psychological, political, social, and economic arguments and knowledge frequently depend on the use of numerical data. A psychologist might hypothesize that I.Q. is attributable to environmental or genetic factors; a politician might claim that hand gun control legislation will reduce crime; a sociologist might assert that social mobility is more limited in the United States than in other countries, and an economist might declare that globalization lowers the incomes of U.S. workers. How can we evaluate these arguments? Using examples from psychology, sociology, political science, and economics, students will examine how social science methods and statistics help us understand the social world. The goal is to become critical consumers of quantitative material that appears in scholarship, the media, and in everyday life. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed SOC 0825, SOC 0925, POLS 0825, PSY 0825, or ANTH 0825.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

POLS 0929. Honors: The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0932. Honors Politics of Identity in America. 3 Credit Hours.

Gay or straight. Black or white. Male or female. What do these different group identities mean to Americans? How do they influence our politics? Should we celebrate or downplay our diversity? This course explores how we think about others and ourselves as members of different groups and what consequences it has for how we treat one another. Our fundamental social identities can be a source of power or powerlessness, a justification for inequality or for bold social reform. Students learn about the importance of race, class, gender and sexual orientation across a variety of important contexts, such as the family, workplace, schools, and popular culture and the implications these identities have on our daily lives. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed Gender, Sexuality & Women's Studies 0832/0932, History 0832, Political Science 0832, Sociology 0832, or Women's Studies 0832/0932.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0962. Honors Fate, Hope, and Action: Globalization Today. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: SOC 0862/0962, History 0862, POLS 0862, or GUS 0862.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO, SI

Repeatability: This course may not be repeated for additional credits.

POLS 0966. Honors World Affairs. 3 Credit Hours.

We live in a global age when events beyond our borders significantly affect our lives. Sharpen your understanding of international developments, including wars, economic globalization, wealth and poverty, the spread of democracy, environmental degradation, and global pandemics. This course offers an introduction to the study of world affairs that gives you the conceptual tools to deepen your understanding of how major historical and current trends in the world affect your life and that of others around the globe. Readings include historical documents, classic texts in the study of international relations, and current perspectives on the state of the world from multiple disciplinary perspectives. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: GUS 0866, History 0866 or POLS 0866.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

POLS 1002. Careers in Political Science. 1 Credit Hour.

This course is designed to introduce Political Science students to the wide range of career options available to them, as well as to provide them the information, tools, and resources needed to help them succeed after graduation. Students will be introduced to both the skillsets every student needs to succeed (resumes, interviewing, networking and the job hunt), as well as introduction to the various post-graduation paths available to the political science major. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

POLS 1101. The American Political System. 3 Credit Hours.

An introduction to American politics. Focuses on the values, institutions, and processes of politics and government in the United States. Introduces the concepts and techniques of political science. NOTE: (1) This course is required of all Political Science majors. (2) This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

POLS 1201. Foreign Governments and Politics. 3 Credit Hours.

This course considers the values, institutions and processes of politics and government in selected developing and developed countries in Europe, Asia, Africa, and Latin America. NOTE: (1) For both non-majors and majors. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

POLS 1301. International Politics. 3 Credit Hours.

This course is an introduction to the nature of the international system, the determinants and instruments of foreign policy, and the problems of international conflict and cooperation. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

POLS 1911. Honors Introduction to American Politics. 3 Credit Hours.

An introduction to American politics. Focuses on the values, institutions, and processes of politics and government in the United States. Introduces the concepts and techniques of political science. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AC, HO

Repeatability: This course may not be repeated for additional credits.

POLS 1921. Honors Foreign Governments and Politics. 3 Credit Hours.

This course considers the values, institutions and processes of politics and government in selected developing and developed countries in Europe, Asia, Africa, and Latin America. NOTE: (1) For both non-majors and majors. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

POLS 1931. Honors International Politics. 3 Credit Hours.

This course is an introduction to the nature of the international system, the determinants and instruments of foreign policy, and the problems of international conflict and cooperation. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

POLS 1996. Honors Introduction to Political Philosophy. 3 Credit Hours.

Honors seminar focusing on an introduction to the ideas and arguments of several political philosophers, such as Aristotle, Plato, Hobbes, and Marx, as well as an exploration of how such ideas relate to the contemporary world.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

POLS 2000. Special Topics. 3 Credit Hours.

Topics vary from semester to semester. Please check with the faculty advisor for a course description and topic.

Repeatability: This course may be repeated for additional credit.

POLS 2101. American Federalism. 3 Credit Hours.

Federalism in its modern form is perhaps the single most important theoretical contribution the American system of government has made to the history of political thought. This course will examine this concept, its manifestation, and the effect this federal practice has had on the American political system.

Repeatability: This course may not be repeated for additional credits.

POLS 2102. American State and Local Politics. 3 Credit Hours.

This course considers government and politics of subnational units including states, counties, cities, towns, and townships in urban, suburban, and rural areas. Further topics include the relationship of state and local policy to citizens, other governmental units, and the American political system.

Repeatability: This course may not be repeated for additional credits.

POLS 2103. Making Public Policy. 3 Credit Hours.

This course examines selected policy areas in a variety of national settings and the relationship of political cultures and policymaking structures to policy outputs. NOTE: Students will receive credit only once for either POLS 2103 or PLCY 2103. This course was previously titled "U.S. Public Policy Making"; students who received credit under the former title will not earn additional credit.

Repeatability: This course may not be repeated for additional credits.

POLS 2107. Capital Internship Seminar. 3 Credit Hours.

This is a required course for students accepted into the Pennsylvania Capital Semester program. Class lectures and readings will focus on the larger private and governmental context for organizations where interns are placed, specifically the interaction between the state executive branch; legislature and the legislative process; news media, nonprofits, advocacy organizations, lobbying or trade associations; and local economic development organizations. Guest lecturers, who are experts in their fields, will be invited to speak on course topics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in POLS 1101.

POLS 2108. Local Government and Community Advocacy. 3 Credit Hours.

Philadelphia is utilized as a case study to understand the nature of government and community advocacy and conflict. The class opens with an introduction to the different issues of local government, transitions to a discussion of the organization of Philadelphia local government and its politics, and ends with an analysis of the legislative and budget processes. At the conclusion of the semester, students will engage in an active learning project that illustrates Philadelphia's public policy process.

Repeatability: This course may not be repeated for additional credits.

POLS 2140. Special Topics in Urban Politics. 3 Credit Hours.

Specific topics rotate from semester to semester. See Political Science faculty advisor (and notation on the Course Schedule) for specific information.

Repeatability: This course may be repeated for additional credit.

POLS 2201. Comparative Politics: Developing Nations. 3 Credit Hours.

This course describes and analyzes political patterns in the Third World. It provides a descriptive overview, analyzes domestic political trends within the context of the global system, and reviews current trends.

Repeatability: This course may not be repeated for additional credits.

POLS 2211. Contemporary Politics of Europe. 3 Credit Hours.

This course explores the institutions established in West European nations intended to preserve social stability, produce economic prosperity, and guarantee democracy, asking whether these goals are complementary or contradictory. A country-by-country examination of post-war political development in Britain, France, Germany, Italy, and Sweden. Emphasis on the political problems of the present. Accordingly, the course closes with an examination of the European integration process and the sweeping changes of East Europe affecting all of Europe.

Repeatability: This course may not be repeated for additional credits.

POLS 2212. Eastern Europe, Russia and the West. 3 Credit Hours.

Study of the relationships between western nations and the changing politics of Eastern European nations.

Repeatability: This course may not be repeated for additional credits.

POLS 2231. Comparative Political Systems in Latin America. 3 Credit Hours.

A comparative consideration of selected Latin American political systems. Note: Students will receive credit only once for either POLS 2231 or LAS 2231.

Repeatability: This course may not be repeated for additional credits.

POLS 2232. Cyberpolitics. 3 Credit Hours.

New information and communication technologies allow for unlimited and unprecedented access to people and information all over the world. In this course we will study whether or not these new technologies (Internet, mobile social media, etc.) are also a tool for: 1) the revitalization or weakening of democracy in the developed world; 2) regime change, namely, transitions to or from democracy; 3) economic development; and 4) waging wars. We will be studying Internet and mobile technology usage in the U.S., Mexico, Egypt, Russia, the EU and Kenya, among others. Formerly known as "The Politics of New Information Technologies"; students who took this course under that title will not earn additional credit for "Cyberpolitics."

Repeatability: This course may not be repeated for additional credits.

POLS 2255. Comparative Public Policy. 3 Credit Hours.

The seminar will focus on the factors that explain political outcomes and their consequences in comparative perspective. Three basic issues we explore are: 1) How do policies differ?; 2) Why do policies differ?; and 3) What impact do the different policies have? Scholars have divergent views regarding which factors account for different policies and analyses of their impact is regularly colored by ideological position that may or may not have anything to do with the real policy goals. The topics that we will study include: What is the role of political leaders during transitions to democracy or during the passage of difficult legislation in democratic polities? Under what circumstances can a corrupt polity be prosperous and an honest one poor? Is there a relationship between religion and a country's economic success? Are diamonds and oil a blessing or a curse for a country's economy? Why did some mature economies respond differently to the global financial crisis of 2007-2009? Some of the countries we will be studying include: Chile, England, France, Spain, Singapore, United States, and Venezuela.

Repeatability: This course may not be repeated for additional credits.

POLS 2301. Theories of War and Peace. 3 Credit Hours.

This course explores the problem of war and peace from both empirical and theoretical perspectives. Sources of war and peace studied include: the balance of power, deterrence, arms races, misperception, hegemony, nationalism, international institutions, democracy, law, and economic interdependence.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1301 or POLS 1931)

POLS 2311. Post-Cold War Security. 3 Credit Hours.

This course examines the debate over the changing meaning of security and the contemporary international security environment. Topics include: the nature of security, the international environment, postmodern terrorism, information warfare, global economic instability, the persistence of American hegemony, quasi-states, and the possible demise of the nation-state.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1301 or POLS 1931)

POLS 2314. Politics of International Law. 3 Credit Hours.

Formerly known as POLS 3396, International Legal Order. Students who have received credit for POLS 3396 will not earn additional credits for this course.

The historical development of international law in its relation to the evolution of the world political system, with analysis of issues of the contemporary world order such as warfare, political and economic development, human rights, and the environment.

Repeatability: This course may not be repeated for additional credits.

POLS 2321. Politics of the Global Economy. 3 Credit Hours.

This course studies competing explanations for the evolution and operations of the international political economy from the origins of the industrial era in the late 18th century through the "information economy" of the 21st. It focuses on four functional areas: international trade in goods and services, the management of currency exchange and international monetary policy, the pattern and flow of investment capital, and the pattern and structure of global production.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1301 or POLS 1931)

POLS 2331. International Organization. 3 Credit Hours.

This course considers the development and current roles of regional and universal international organizations with an emphasis on the United Nations. The major international conflicts of recent decades in the organizational context will also be examined.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1301 or POLS 1931)

POLS 2341. U.S. Foreign Policy. 3 Credit Hours.

Analysis of U.S. foreign policy from three perspectives: (1) competing explanations for patterns, tendencies and events in U.S. foreign policy; (2) history of U.S. foreign policy from independence to the end of the Cold War, (3) issues in contemporary U.S. foreign policy in light of the first and second-hand perspectives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1301 or POLS 1931)

POLS 2351. Japan and the Changing World Order. 3 Credit Hours.

This course looks at Japanese politics from a variety of perspectives within the comparative framework of other nations and their political development within a changing global order. Note: This course is cross-listed with Asian Studies 2351. Students may only receive credit once for these courses: ASST 2351 or POLS 2351.

Repeatability: This course may not be repeated for additional credits.

POLS 2431. Modern Political Philosophy. 3 Credit Hours.

Close study of works by one or more modern political philosophers, stressing their relevance to an understanding of contemporary politics.

Repeatability: This course may not be repeated for additional credits.

POLS 2432. American Political Thought. 3 Credit Hours.

This course examines significant political ideas from the American colonial period to the present and the influences of these ideas on contemporary American political institutions.

Repeatability: This course may not be repeated for additional credits.

POLS 2441. Democracy, Capitalism, and Socialism. 3 Credit Hours.

An examination of some of the major political ideologies dominant in the 20th century and of the tensions and points of convergence between and among them.

Repeatability: This course may not be repeated for additional credits.

POLS 2496. Introduction to Political Philosophy. 3 Credit Hours.

Reading of selected works by several classical and modern political philosophers, such as Aristotle, Hobbes, and Marx; study of their relevance to contemporary political issues. NOTE: Capstone writing course in the major.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

POLS 2503. Evidence and Knowledge. 3 Credit Hours.

This course introduces students to the fundamental concepts that underlie the evaluation of empirical evidence. The focus will be on the design of research, rather than the analysis of data. Major themes covered in the course include: measurement, causality, uncertainty, the scientific method, and the methodological debates that animate political science research.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1101, POLS 1911, POLS 1201, POLS 1921, POLS 1301, POLS 1931, or POLS 1102)

POLS 2996. Honors: Introduction to Political Philosophy. 3 Credit Hours.

Honors seminar focusing on an introduction to the ideas and arguments of several political philosophers, such as Aristotle, Plato, Hobbes, and Marx, as well as an exploration of how such ideas relate to the contemporary world.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

POLS 3082. Independent Study. 3 Credit Hours.

Students must make arrangements to work with a political science faculty member, and seek the approval of the undergraduate chair before enrolling under this course number.

Repeatability: This course may be repeated for additional credit.

POLS 3101. The American Presidency. 3 Credit Hours.

The role of the chief executive, the American presidency, in the political process.

Repeatability: This course may not be repeated for additional credits.

POLS 3102. The Legislative Process. 3 Credit Hours.

Covers the legislative process of both the U.S. Congress and state legislatures. Includes the lawmaking process, legislative organization, leadership and policymaking, lobbying and elections, and the careers and characteristics of legislators.

Repeatability: This course may not be repeated for additional credits.

POLS 3103. The American Supreme Court. 3 Credit Hours.

An examination of judicial decision making and the interrelationships between the Court and other aspects of the political process.

Repeatability: This course may not be repeated for additional credits.

POLS 3105. American Party System. 3 Credit Hours.

The evolution and organization of political parties in the United States, including nominating systems, campaigns, election laws, types of ballots, and electoral reform techniques.

Repeatability: This course may not be repeated for additional credits.

POLS 3107. State Politics and Policy. 3 Credit Hours.

This course examines the American states from a comparative and historical perspective. The role of the states in relation to the federal government will also be an important theme. The class will consider the central institutions of the states, including governors, legislatures and courts, as well as political parties, interest groups and the media. The course will also focus on several areas of public policy in which the states play a pivotal role.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in POLS 1101.

POLS 3111. Media and the Political Process. 3 Credit Hours.

This course considers the relationship between the mass media and American politics, government regulation of the mass media, media coverage of public affairs, political effects of entertainment programming, and the uses and influence of the media in the election process. Both print and broadcast media will be considered.

Repeatability: This course may not be repeated for additional credits.

POLS 3112. American Public Opinion. 3 Credit Hours.

Topics for study include: development of public opinion and political ideology in the U.S.; the social psychology of political attitudes; the role of the mass media and the news in the formation of political opinion; and the influence of public opinion upon government policy.

Repeatability: This course may not be repeated for additional credits.

POLS 3113. Campaigns, Elections, and the Media. 3 Credit Hours.

Role of elections in contemporary American society. Special attention to parties and mass media as participants in campaigns and to factors affecting voting behavior of the mass public and the linkages voting provides between the public and policy formation.

Repeatability: This course may not be repeated for additional credits.

POLS 3121. American Constitutional Principles I. 3 Credit Hours.

Constitutional bases of American system of government as interpreted primarily by reading and analyzing Supreme Court opinions and understanding them in their political, economic, and historic context. Course focuses largely on how constitutional meaning is determined, and judicial development of national powers of judicial review, the power to regulate commerce, separation of powers, federalism, taxation, powers of the President, and foreign affairs and war powers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in POLS 1101.

POLS 3123. American Constitutional Principles II: Civil Rights in America. 3 Credit Hours.

Civil rights in America, including the Constitutional protections of freedom of speech, press, assembly, and religion.

Repeatability: This course may not be repeated for additional credits.

POLS 3124. Politics of Sexual Orientation and Gender Identity. 3 Credit Hours.

This course examines the emergence and development of the movement to secure rights for gays, lesbians and bisexuals; how gays, lesbians and bisexuals are socially constructed and the influence this has on political discourse; how political issues that are relevant to the lives of gays and lesbians reach the political agenda; and the patterns of conflict and cooperation that exist among actors in and outside of government over issues such as employment discrimination, marriage, child adoption, and military service. Note: Prior to Summer 2019, this course was offered as "Politics, Rights, and Sexual Orientation." Students who earned credit for this course number under that title will not earn additional credits under the new title "Politics of Sexual Orientation and Gender Identity."

Repeatability: This course may not be repeated for additional credits.

POLS 3125. Interest Group Politics. 3 Credit Hours.

Over the past 30 years, the system of interest group representation in Washington has witnessed a rapid expansion. Conventional wisdom views these groups as obstructions to American democracy, but limiting their freedoms threatens "government by the people." Cases to be studied may include: senior citizen groups, the farm lobby, the Christian Coalition, the unemployment workers movement, and the power of business in America.

Repeatability: This course may not be repeated for additional credits.

POLS 3131. Urban Politics and Problems. 3 Credit Hours.

This course presents an overview of the politics of urban areas: electoral politics, government structure, race, finance, education, housing, neighborhoods, and economic and historical forces on politics in urban areas.

Repeatability: This course may not be repeated for additional credits.

POLS 3133. Popular Culture and the City. 3 Credit Hours.

This course will examine how the city is depicted in films and literature, exploring such prominent political topics as anti-urbanism; political machines, corruption, and reform; industrialization and immigrant life; post-industrialism and urban decline. Attention will also be given to the physical city and spatial use as expressions of dominant political and cultural values.

Repeatability: This course may not be repeated for additional credits.

POLS 3134. The Politics of Inequality. 3 Credit Hours.

Who are the poor? Should they be helped? Who should help them? These questions are complicated because people are more aware of the individual costs of taxation than they are of the collective benefits of an educated work force. This course will evaluate how the U.S. government has traditionally divided the poor between the deserving and the undeserving poor and which groups have been left out and why.

Repeatability: This course may not be repeated for additional credits.

POLS 3151. Public Policy Analysis. 3 Credit Hours.

This course considers selected contemporary public policy issues. The course begins with an examination of the national political-economic context within which major policy issues arise and then turns to the analysis of the roots and policy alternatives on several major issues. Issues may concern health, energy, education, employment, welfare, and the regulation of business. NOTE: Students will receive credit only once for either POLS 3151 or PLCY 3151.

Repeatability: This course may not be repeated for additional credits.

POLS 3152. U.S. Environmental Policy. 3 Credit Hours.

An analytical examination of the development and execution of governmental policies in such areas as air and water pollution control, control of atomic energy, and planning of space exploration program.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

POLS 3153. The Politics of Poverty. 3 Credit Hours.

This course examines the nature and causes of poverty, the impact of public opinion and racial attitudes on poverty and welfare, the role of government officials in shaping anti-poverty and welfare reform policies, and welfare claiming as a form of political participation. The course evaluates the effectiveness of existing policies to combat poverty and whether proposed policies might be effective.

Repeatability: This course may not be repeated for additional credits.

POLS 3154. Health Policy. 3 Credit Hours.

Surveys major public health problems and policy interventions in the United States with an emphasis on their normative, political and economic dimensions. Examines the interplay of governmental institutions, business, and organized interests in formulating and implementing health policy.

Repeatability: This course may not be repeated for additional credits.

POLS 3155. Business and Public Policy. 3 Credit Hours.

Reviews history of U.S. government and business, and the major governmental institutions dealing with business, with special attention paid to monetary policy and the Federal Reserve, fiscal policy, the federal budget, and particular issues connected with it such as deficits, Social Security, the tax structure, overall inequality, and other current issues. Also looks at the World Trade Organization and NAFTA, their structure and overall advantages and disadvantages to the U.S.

Repeatability: This course may not be repeated for additional credits.

POLS 3161. Public Administration. 3 Credit Hours.

This course studies basic concepts and approaches to public management and public policymaking in public administration.

Repeatability: This course may not be repeated for additional credits.

POLS 3197. Political Fiction. 3 Credit Hours.

Moral dilemmas and unintended burlesques, flawed heroes and vainglorious fools, ambitious men and seductive women are the stuff of both literature and politics. These elements are brought to life in novels about American politics and political thought. Students in this writing intensive course will write brief essays and a course paper on novels by authors that include Henry Adams, Mark Twain, Herman Melville, Henry James, Robert Penn Warren, Graham Greene, Ward Just, and William Kennedy.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

POLS 3201. Nationalism, Ethnicity, and Politics. 3 Credit Hours.

When the U.S. was founded as the first modern nation-state, it set in motion a global transformation of the state system that has still to run its course. The class will study, with the aid of film, the causes, theories, and projections of this development.

Repeatability: This course may not be repeated for additional credits.

POLS 3202. Politics & Religion. 3 Credit Hours.

What sorts of relationships exist between the world of politics and that of religious beliefs and practices that co-exist and often compete for dominance in various political systems?

Repeatability: This course may not be repeated for additional credits.

POLS 3203. Comparative Politics of Democratization. 3 Credit Hours.

Democracy is among the oldest concepts in politics, yet it is also one of the most elusive. This course surveys some of the classic debates over the meanings of democracy, and explores the contemporary processes of democratization that have swept the globe since the 1970s. While particular geographical emphasis will be placed on Europe, Latin America, and Africa, no prior familiarity with these regions is necessary to successfully complete this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1201 or POLS 1921)

POLS 3206. Politics of Modern Capitalism. 3 Credit Hours.

Since the early 1970s, all advanced industrial democracies have faced challenges in adjusting to a changing international economy. We will examine how different countries, including the United States, Japan, Britain, France, and Germany, have tried to meet these challenges. The main question guiding the course is: why do countries respond to roughly similar problems in different ways, and what do these responses reveal about politics in these countries? Topics covered will include macroeconomic policy, trade and industrial policies, industrial relations, business-government relations, and the welfare state. This course was formerly taught as POLS 3296. Students who have earned credit for POLS 3296 may not register for this class.

Repeatability: This course may not be repeated for additional credits.

POLS 3211. Politics & Society in Modern Italy. 3 Credit Hours.

An examination of Italy's political development in a historical framework, and in comparison to other nations, especially those of Europe.

Repeatability: This course may not be repeated for additional credits.

POLS 3212. British Government and Politics. 3 Credit Hours.

This course combines historical and thematic approaches to British politics. We begin with an overview of the post-imperial, capitalist state before discussing key institutions: constitution, Parliament, executive, parties, and European Union. To help understand change in popular politics we compare the 1983 and 2005 general election campaigns. Finally, we consider key issues: economic inequality, ethnic conflict, social order, and democratic accountability.

Repeatability: This course may not be repeated for additional credits.

POLS 3213. Post-Communist Politics. 3 Credit Hours.

This course examines core themes in the study of post-Communist politics in Russia and Eastern Europe. The course begins by exploring the nature of socialism, why it fell, and the various legacies of this system. The rest of the course covers issues of democratic transformation, economic reform, state and nation building, and the role of international influences.

Repeatability: This course may not be repeated for additional credits.

POLS 3231. Politics of India. 3 Credit Hours.

This course introduces the politics of India, a country that is large, complex, and full of contradictions. Nearly one out of every six people in the world resides in India. The country is one of the oldest democracies in the developing world, yet corruption is rife and the number of accused criminals elected to office is staggering. Despite India's growing economic and political clout, riots, insurgencies, and terrorism persist. The country is also one of the world's most ethnically diverse, divided along linguistic, regional, caste, tribal, and religious lines. The course begins by briefly discussing India's contemporary political institutions. Next, the course provides a historical overview of India's modern history, before turning to a variety of issues of contemporary relevance: ethnicity, violence, corruption, elections, and democracy.

Repeatability: This course may not be repeated for additional credits.

POLS 3241. Mideast Politics. 3 Credit Hours.

This course will introduce students to the various political systems in the region we now call the Middle East. Of particular concern will be historical roots of the political tensions that exist in our contemporary world.

Repeatability: This course may not be repeated for additional credits.

POLS 3251. China: State and Society. 3 Credit Hours.

This course surveys contemporary Chinese politics and political economy, recognizing the roots in China's long history. The emphasis is on the process of converting the Maoist socialist system into a modern market system, integrated into the global system, and the political implications of these changes. Note: Prior to fall 2010, the course title was "China: Politics and Revolution." This course is typically cross-listed with ASST 3251. Students may only earn credit for one course from ASST 3251 and POLS 3251.

Repeatability: This course may not be repeated for additional credits.

POLS 3252. East Asia and the United States. 3 Credit Hours.

This course introduces Japan and its distinctive model of political economy. The course then reviews how this model has been copied by many other countries in Asia. The course also includes an analysis of Asia's international economic and political relations, especially with the United States. This course is typically cross-listed with ASST 3252. Students may only earn credit for one course from ASST 3252 and POLS 3252.

Repeatability: This course may not be repeated for additional credits.

POLS 3265. International Environmental Policy. 3 Credit Hours.

International negotiations and agreements on environmental problems, and comparisons of domestic environmental policymaking among selected countries. Special attention to negotiations on atmospheric and oceanic policies, international regulation of nuclear materials, and environmental aspects of international trade agreements. NOTE: Students will receive credit only once for either POLS 3265 or ENST 3265.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

POLS 3331. Politics of the European Union. 3 Credit Hours.

The European Union is perhaps the most remarkable experiment in international governance of the past century. This course examines the EU in its dual aspects: as a process of international or regional integration, tying existing nation-states into an "ever-closer Union of peoples"; and as a polity or political system with its own institutions, policies, and policy processes.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1201 or POLS 1921) and (POLS 1301 or POLS 1931)

POLS 3332. Globalization: Politics and Political Economy. 3 Credit Hours.

The course examines the origins and consequences of the modern period (1990-present) of globalization, including its political, economic, social, and cultural dimensions. Central issues to be examined will be the status of the sovereign state, global governance, and patterns of global mobility in production, people, and information.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 1301 or POLS 1931)

POLS 3363. Russia: Revolution, State, and Empire. 3 Credit Hours.

This course focuses on the rise and fall of the Soviet Union, from the Russian Revolution of 1917 until the collapse of the Soviet Union in 1991. It deals with major factors and events, including Communism, two world wars, and the Cold War, that shaped Soviet history. The course explores Soviet impact on European and world developments, and Soviet motives in confrontation with the United States. Reading and lectures are complimented with multi-media and Internet sources, discussions and individual presentations. Cross-Listed with HIST 3363. Students will receive credit for one course from: HIST 3363 or POLS 3363.

Repeatability: This course may not be repeated for additional credits.

POLS 3411. Classical Political Philosophy. 3 Credit Hours.

Close study of works by one or more political philosophers, stressing their relevance to an understanding of contemporary politics.

Repeatability: This course may not be repeated for additional credits.

POLS 3421. Theories of Justice. 3 Credit Hours.

This course examines both analytical and historical perspectives of some of the major theories of justice that have been propounded throughout the course of Western history.

Repeatability: This course may not be repeated for additional credits.

POLS 3422. Marxism and Politics. 3 Credit Hours.

A theoretical and historical examination of the role of Marxism in the development of 20th and 21st century political regimes, including West European social democracy, former and present Communist states, and post-colonial societies. Particular focus will be placed on debates within the Marxist tradition and between Marxism and its critics in regard to issues of equality, liberty, and democracy. An attempt will be made to see what aspects (if any) of Marxism remain relevant to the prospect of radical democratic change and to an analysis of the crisis of contemporary global capitalism.

Repeatability: This course may not be repeated for additional credits.

POLS 3441. African American Political Theory. 3 Credit Hours.

This course is an intensive introduction to African American Political Theory. Our goal will be to explicate and evaluate the theoretical claims that have shaped, and continue to shape, black political practice in the United States. The structure of the course is both historical and thematic.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (POLS 2496 or POLS 2996)

POLS 3451. Personality and Politics. 3 Credit Hours.

The democratic and authoritarian personalities and their impact on political behavior.

Repeatability: This course may not be repeated for additional credits.

POLS 3452. Theory and Uses of Power. 3 Credit Hours.

This course considers concepts and major models of power and their applications to American politics.

Repeatability: This course may not be repeated for additional credits.

POLS 3500. Special Topics: Research Preparation Seminar. 3 Credit Hours.

Research preparation courses develop research skills and prepare students for the capstone seminar. The course topics vary depending on the instructor's expertise.

Repeatability: This course may be repeated for additional credit.

POLS 3510. Special Topics: Research Preparation Seminar. 3 Credit Hours.

Research preparation courses develop research skills and prepare students for the capstone seminar. The course topics vary depending on the instructor's expertise.

Repeatability: This course may be repeated for additional credit.

POLS 3520. Special Topics: Research Preparation Seminar. 3 Credit Hours.

Research preparation courses develop research skills and prepare students for the capstone seminar. The course topics vary depending on the instructor's expertise.

Repeatability: This course may be repeated for additional credit.

POLS 3530. Special Topics: Research Preparation Seminar. 3 Credit Hours.

Research preparation courses develop research skills and prepare students for the capstone seminar. The course topics vary depending on the instructor's expertise.

Repeatability: This course may be repeated for additional credit.

POLS 3540. Special Topics: Research Preparation Seminar. 3 Credit Hours.

Research preparation courses develop research skills and prepare students for the capstone seminar. The course topics vary depending on the instructor's expertise.

Repeatability: This course may be repeated for additional credit.

POLS 3550. Special Topics: Research Preparation Seminar. 3 Credit Hours.

Research preparation courses develop research skills and prepare students for the capstone seminar. The course topics vary depending on the instructor's expertise.

Repeatability: This course may be repeated for additional credit.

POLS 3910. Honors Special Topics. 3 Credit Hours.

The focus of this Honors course varies from semester to semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

POLS 3911. Honors Politics in Film and Literature. 3 Credit Hours.

This course examines diverse topics in world politics using three forms of political commentary - film, literature, and academic writings - on each topic. Topics covered may include war, terrorism, development, globalization and workers, political corruption, immigration, racial politics, revolution, and ethnic violence.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

POLS 3996. Honors Capstone Seminar I. 3 Credit Hours.

Only students enrolled in the Honors Certificate or Honors Scholars Programs may register for this seminar. Please check the Political Science Department web site for information about how to apply for the Honors Scholar Program in Political Science (<https://www.cla.temple.edu/political-science/undergraduate/>). This seminar (taught as a combined semester with Political Science 4996) will rotate among selected advanced topics in one of the major fields of Political Science (international relations, American government, political theory, comparative politics, and public policy). The seminar will focus on a close analysis and discussion of assigned readings and a final research paper (as well as other short written assignments). NOTE: Check with the course schedule for the topic and instructor for a specific semester. Please be advised that students who took this course under the old name, "Junior Honors Capstone Seminar" will receive credit only one time for POLS 3996.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

POLS 3997. Junior Honors Capstone Seminar. 3 Credit Hours.

Only students enrolled in the Honors Certificate or Honors Scholars Programs may register for this seminar. Please check the Political Science Department web site for information about how to apply for the Honors Scholar Program in Political Science (www.temple.edu/polsci/undergraduate/honors/index.htm). This seminar (taught as a combined semester with Political Science 4997) will rotate among selected advanced topics in one of the major fields of Political Science (international relations, American government, political theory, comparative politics, and public policy). The seminar will focus on a close analysis and discussion of assigned readings and a final research paper (as well as other short written assignments). NOTE: Check with the course schedule for the topic and instructor for a specific semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

POLS 4110. Seminar in American Government. 3 Credit Hours.

The focus of this seminar varies from semester to semester, but always considers some aspect of U.S. politics in depth.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (POLS 1101 or POLS 1911)

POLS 4121. Women and Politics. 3 Credit Hours.

The goal of this course is to broaden with a comparative perspective our understanding of women's political experiences. We examine a variety of issues concerning the lives of women worldwide, including their economic, political and social contributions, familial roles and status in society. Initially, the course focuses on the evolution of the political, economic, and social status of American women paying particular attention to issues of race, ethnicity, and class that inform but also complicate women's political behavior. We then search for similarities and differences in women's lives that are usually obscured by the status of their countries as either industrialized or non-industrialized, either democratic or non-democratic.

Repeatability: This course may not be repeated for additional credits.

POLS 4131. Seminar in Campaign Politics. 3 Credit Hours.

This special seminar is the academic component for experiential learning and is usually offered in the fall of an election year. Students learn about the structure and organization of campaigns, the motivations of candidates, and the consequences of campaign activities by other political actors such as interest groups and political parties. Students will use their internships to identify a thematic subject for research projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in POLS 1101.

POLS 4140. Seminar in Urban, State & Local Politics. 3 Credit Hours.

A seminar focusing on various aspects of the political relationships that exist between state and local levels of government.

Repeatability: This course may be repeated for additional credit.

POLS 4150. Seminar in Law & Society. 3 Credit Hours.

Experiential Learning. Students must also register for 4581 (0371). Permission of Instructor or Experiential Learning Coordinator required.

Repeatability: This course may be repeated for additional credit.

POLS 4160. Seminar in Public Administration. 3 Credit Hours.

Examines a topic of contemporary interest in public administration.

Repeatability: This course may be repeated for additional credit.

POLS 4185. Internship I. 1 to 12 Credit Hour.

This internship course offers students the opportunity to gain practical experience in an area of interest. The course is designed to combine general academic experience with practical experience in fields such as public policy, local, state and federal government agencies, interest advocacy, campaigns and elections, law firms, government affairs, and NGOs, among others. The course does not have formal meeting times, but will meet several times during the semester of registration in a classroom/small setting. Students are responsible for working on their own to complete the required assignments.

Repeatability: This course may not be repeated for additional credits.

POLS 4210. Seminar in Comparative Politics. 3 Credit Hours.

Examines a topic of contemporary interest in comparative politics.

Repeatability: This course may be repeated for additional credit.

POLS 4220. Seminar in Comparative Politics. 3 Credit Hours.

Seminar focusing on comparative politics. Topic determined by the instructor.

Repeatability: This course may be repeated for additional credit.

POLS 4285. Internship II. 1 to 12 Credit Hour.

This internship course offers students the opportunity to gain practical experience in an area of interest. The course is designed to combine general academic experience with practical experience in fields such as public policy, local, state and federal government agencies, interest advocacy, campaigns and elections, law firms, government affairs, and NGOs, among others. The course does not have formal meeting times, but will meet several times during the semester of registration in a classroom/small setting. Students are responsible for working on their own to complete the required assignments.

Repeatability: This course may not be repeated for additional credits.

POLS 4310. Seminar in International Politics. 3 Credit Hours.

Seminar focusing on the politics of international relations. Topic determined by the instructor.

Repeatability: This course may be repeated for additional credit.

POLS 4320. Seminar in International Politics. 3 Credit Hours.

Examines a topic of contemporary interest in international politics.

Repeatability: This course may be repeated for additional credit.

POLS 4385. Internship III. 1 to 12 Credit Hour.

This internship course offers students the opportunity to gain practical experience in an area of interest. The course is designed to combine general academic experience with practical experience in fields such as public policy, local, state and federal government agencies, interest advocacy, campaigns and elections, law firms, government affairs, and NGOs, among others. The course does not have formal meeting times, but will meet several times during the semester of registration in a classroom/small setting. Students are responsible for working on their own to complete the required assignments.

Repeatability: This course may not be repeated for additional credits.

POLS 4410. Seminar in Political Philosophy. 3 Credit Hours.

Examines a topic of contemporary interest in political philosophy.

Repeatability: This course may be repeated for additional credit.

POLS 4485. Campaign Internship. 1 to 12 Credit Hour.

This internship course offers students the opportunity to gain practical experience in political campaigns. Campaign placements may be for any type of campaign at any level of government. The course does not have formal meeting times, but students will meet with the instructor several times during the semester of registration in a classroom setting for discussions. Students are responsible for working on their own to complete the required written and work assignments.

Repeatability: This course may not be repeated for additional credits.

POLS 4591. Directed Research and Field Study. 1 Credit Hour.

Supervised individual readings, research projects, and field work. NOTE: Students may not enroll for more than one Directed Research & Field Study course in a single semester. Students are to arrange study with a faculty member in the department of Political Science.

Repeatability: This course may be repeated for additional credit.

POLS 4691. Directed Research and Field Study. 2 Credit Hours.

Supervised individual readings, research projects, and field work. NOTE: Students may not enroll for more than one Directed Research & Field Study course in a single semester. Students are to arrange study with a faculty member in the department of Political Science.

Repeatability: This course may be repeated for additional credit.

POLS 4896. Capstone Seminar in Political Science. 3 Credit Hours.

This topical seminar focuses on a broad theme of theoretical, substantive, or practical interest within a subfield of political science. The specific content will vary with individual instructors. This is a writing-intensive course designed to integrate all the skills learned in the major. Each seminar will focus upon close oral and written analysis of major readings in a particular area of political science. Such analyses will take students beyond basic exegesis of analytic arguments towards critical evaluation of contrasting forms of social science investigation and argument. A research project is required. Required of all majors. To be taken during the senior year.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

POLS 4904. Honors Seminar in Campaign Politics. 3 Credit Hours.

Permission of political science Honors Director required. A seminar focusing on political election campaigns in the United States.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

POLS 4920. University Honors Seminar in Comparative Politics. 3 Credit Hours.

Honors version of Political Science 4210 (0310). Open only to University Honors students.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

POLS 4940. University Honors Seminar in Political Philosophy. 3 Credit Hours.

Honors version of Political Science 4410 (0321). Open only to University Honors students.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

POLS 4996. Senior Honors Capstone Seminar. 3 Credit Hours.

Only students enrolled in the Honors Certificate or Honors Scholars Programs may register for this seminar. Please check the Political Science Department web site for information about how to apply for the Honors Scholar Program in Political Science (www.temple.edu/polsci/undergraduate/honors/index.htm). This seminar (taught as a combined semester with Political Science 3996) will rotate among selected advanced topics in one of the major fields of Political Science (international relations, American government, political theory, comparative politics, and public policy). The seminar will focus on a close analysis and discussion of assigned readings and a final research paper (as well as other short written assignments). This course satisfies the capstone requirement for the major. NOTE: Check with the course schedule for the topic and instructor for a specific semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

POLS 4997. Senior Honors Capstone Seminar. 3 Credit Hours.

Only students enrolled in the Honors Certificate or Honors Scholars Programs may register for this seminar. Please check the Political Science Department web site for information about how to apply for the Honors Scholar Program in Political Science (www.temple.edu/polsci/undergraduate/honors/index.htm). This seminar (taught as a combined semester with Political Science 3997) will rotate among selected advanced topics in one of the major fields of Political Science (international relations, American government, political theory, comparative politics, and public policy). The seminar will focus on a close analysis and discussion of assigned readings and a final research paper (as well as other short written assignments). NOTE: Check with the course schedule for the topic and instructor for a specific semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Portuguese (PORT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PORT 1001. Basic I. 4 Credit Hours.

Basic Portuguese I is an introductory Portuguese course for students with little or no previous Portuguese experience. The course will develop basic skills for speaking, listening, reading, and writing as well as introduce students to the richness and diversity of Luso-Brazilian cultures. It combines regular classroom instruction and practice with Language Lab sessions dedicated to the use of instructional technology. NOTE: Prior to fall 2009, course title was "Elements I."

Repeatability: This course may not be repeated for additional credits.

PORT 1002. Basic II. 4 Credit Hours.

Basic Portuguese II is a continuation of the work begun in Basic I. The course further develops basic skills for speaking, listening, reading, and writing, and it continues the introduction to the richness and diversity of Luso-Brazilian cultures. It combines regular classroom instruction and practice with Language Lab sessions dedicated to the use of instructional technology. NOTE: Prior to fall 2009, course title was "Elements II."

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PORT 1001.

PORT 1003. Intermediate. 3 Credit Hours.

This is a communicative intermediate Portuguese course. More sophisticated grammar will be introduced and students will continue to develop speaking, listening, reading, and writing competencies. Class work will include discussions, videos, and writing. Students will take a more active role in their own learning process by using computer technology out of class to hone grammar skills and explore the multi-faceted world of Luso-Brazilian culture.

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PORT 1002.

PORT 1021. Portuguese for Spanish Speakers. 3 Credit Hours.

An intensive Portuguese course intended for students who have completed four semesters of instructional Spanish or have a native or native-like command of the language. There is emphasis on all basic skills for speaking, listening, reading, and writing, in addition to introducing the richness and diversity of Luso-Brazilian cultures. It combines regular classroom instruction and practice with Language Lab sessions dedicated to the use of instructional technology. This course meets the instructional objectives equivalent to Portuguese 1003. NOTE: Prior to fall 2009, course title was "Concentrated Elements."

Repeatability: This course may not be repeated for additional credits.

PORT 2001. Composition and Conversation. 3 Credit Hours.

The course devotes time to reading comprehension and oral expression, but the main thrust of the course is written expression using appropriate Portuguese grammar.

Repeatability: This course may not be repeated for additional credits.

PORT 2002. Readings in Portuguese. 3 Credit Hours.

This course devotes time to speaking and writing skills, but the main emphasis is reading comprehension and interpretation of texts in Portuguese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PORT 2001.

PORT 2101. Conversational Review. 3 Credit Hours.

Portuguese 2101 is an intermediate conversation and grammar course that strengthens listening, speaking, reading, and writing skills, and reviews important grammar points. The main objective is to enhance proficiency in Portuguese in the four basic language skills, and to foster cultural literacy of the Portuguese speaking world. To achieve these ends, there will be grammar review, assigned homework, readings, and daily oral participation, as well as interactive presentations, videos and dialogues. The majority of class time will be dedicated to conversation in Portuguese through pair work, individual and group presentations, and classroom discussion. Students will also read short chronicles, stories, newspaper articles and poems written in Portuguese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PORT 1002 or PORT 1021)

PORT 2104. Portuguese for Business Professions. 3 Credit Hours.

Students will acquire the foundational knowledge of the language used in Portuguese-language business interactions, as well as business practices in the Portuguese-speaking world. Students will write business letters, participate in role-plays, and explore the nuances of doing business in Portuguese-speaking countries, in particular in Brazil.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PORT 1002 or PORT 1021)

PORT 3101. Readings in Luso-Brazilian Literature. 3 Credit Hours.

Themes in Luso-Brazilian culture in the context of short prose readings, including the short story and the short novel. Emphasis on tools for advanced reading: vocabulary recognition, comprehension of idiomatic expressions, and knowledge of advanced grammar. Includes writing and oral discussion.

Repeatability: This course may not be repeated for additional credits.

PORT 3201. Portuguese-Speaking Cultures. 3 Credit Hours.

Diverse subjects in Brazilian and Portuguese studies fall under this rubric. In addition to readings of original texts, this course incorporates discussions on the central history, politics, society, and cultural aspects related to the foundation and development of both Portugal and Brazil. NOTE: Prior to summer 2015, the course title was "Portuguese and Brazilian Culture and Civilization."

Repeatability: This course may not be repeated for additional credits.

PORT 4000. Special Topics in Portuguese. 3 Credit Hours.

This course examines specific topics in contemporary Brazilian and/or Portuguese culture, literature, or linguistics. Course content varies each semester to offer optimum exposure to new areas of study.

Repeatability: This course may be repeated for additional credit.

PORT 4083. Directed Reading. 1 to 3 Credit Hour.

Special readings of Portuguese by arrangement with a Portuguese faculty member.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in any 3000-level PORT course.

PORT 4101. Brazilian Short Story. 3 Credit Hours.

An overview of Brazilian short stories from 1900 to the present. Selected texts introduce students to the work of major Brazilian writers of the genre. While focusing primarily on literary texts, the course will also draw attention to literary movements and major themes.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in any 3000-level PORT course.

PORT 4102. Contemporary Portuguese and/or Brazilian Literature. 3 Credit Hours.

A survey of twentieth-century literary movements in Portuguese and/or Brazilian prose and poetry, such as pre-modernism, modernism, and regionalism with an emphasis on contemporary writers.

Repeatability: This course may not be repeated for additional credits.

ProRanger Program (PRAN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PRAN 1085. ProRanger Internship 1. 3 to 9 Credit Hours.

Field training is provided with law enforcement and other areas related to park service management as a seasonal National Park Service Park Ranger. Allows a student to clarify career interests, synthesize prior knowledge from the classroom with direct experience, critically examine the national park system in operation, and sharpen analytic and observational skills. NOTE: Students may register for 3, 6 or 9 credits. Permission required. See <http://www.temple.edu/provost/careercenter/proranger/ProrangerPhiladelphia.html>.

Repeatability: This course may be repeated for additional credit.

PRAN 1577. Introduction to the ProRanger Program. 2 Credit Hours.

The ProRanger Internship is designed to provide students with first-hand experience working in a national park. While the emphasis of the course is oriented towards gaining practical experience, students are expected to complete a number of academic assignments to complement their work experience and help provide them with a deeper understanding of the larger context regarding their employment. Permission required.

Repeatability: This course may not be repeated for additional credits.

PRAN 2085. ProRanger Internship 2. 3 to 9 Credit Hours.

Field training is provided with law enforcement and other areas related to park service management as a seasonal National Park Service Park Ranger. Allows a student to clarify career interests, synthesize prior knowledge from the classroom with direct experience, critically examine the national park system in operation, and sharpen analytic and observational skills. NOTE: Students may register for 3, 6 or 9 credits. Permission required. See <http://www.temple.edu/provost/careercenter/proranger/ProrangerPhiladelphia.html>.

Repeatability: This course may be repeated for additional credit.

PRAN 3001. Professional Preparation Seminar for the ProRanger. 1 Credit Hour.

This is a one-credit optional course that will provide students preparing for summer internships with the National Park Service the opportunity to learn and develop professional skills necessary for working in the National Park Service and other federal agencies. It will focus specifically on preparation for summer internships at national park sites and post-graduation employment with the National Park Service.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: ProRanger- Natl Park Svc Mgt.

Repeatability: This course may not be repeated for additional credits.

PRAN 3002. Leadership and Communication in Law Enforcement. 3 Credit Hours.

Law enforcement today faces many challenges which impact missions. Park rangers in the National Park Service (NPS) face encounters and challenges unique to their roles in protecting our national parks as well as dealing with the public. Oftentimes, park rangers are the first line of defense to protect these priceless assets. The role of a park ranger is ever changing and evolving as more parks face real-world crime problems. Students will participate in exercises and assessments to develop cognizance of land management agency policies and procedures while developing professional acumen as a federal law enforcement officer.

Repeatability: This course may not be repeated for additional credits.

PRAN 3085. ProRanger Internship 3. 1 to 3 Credit Hour.

Field training is provided with law enforcement and other areas related to park service management as a seasonal National Park Service Park Ranger. Allows a student to clarify career interests, synthesize prior knowledge from the classroom with direct experience, critically examine the national park system in operation, and sharpen analytic and observational skills. NOTE: Students may register for 1, 2 or 3 credits. Permission required. See <http://www.temple.edu/provost/careercenter/proranger/ProrangerPhiladelphia.html>.

Repeatability: This course may be repeated for additional credit.

Psychology (PSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PSY 0816. Workings of the Mind. 3 Credit Hours.

In this course we will discuss conscious and unconscious mental processes. We will start by considering the nature of the unconscious mind and will examine evidence for the existence of unconscious processes in memory, problem solving, behavior in social settings, and our attitudes, beliefs, and opinions. We will then study the nature of consciousness from psychological and philosophical perspectives, with a focus on trying to answer the questions of: what is consciousness, what does consciousness do, and why does consciousness exist. For many of the issues we will discuss, there is no scientific consensus regarding the right answer or the most correct theory. Be prepared to think critically and to tolerate perplexity. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed Psychology 0916.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

PSY 0817. Brain Matters. 3 Credit Hours.

One of the last frontiers in science is the brain. We know a great deal about the structure and function of the brain and nervous system, but it is challenging to comprehend fully the complexity of a system made up of 100 billion components that are interacting with one another using tens of trillions of connections that can change and rewire during development and aging. Neuroscience is the multidisciplinary field in which brain research falls. Neuroscience is one of the fastest growing domains in all of science - and good bet for a future career path. Neuroscientists investigate brain function from the level of molecular genetics, to cellular dynamics, to brain anatomy and physiology, to relations between brain, behavior, and cognition, to brain development and aging, to diseases of the brain. In this course, we will touch on knowledge about the brain at all these levels, and more. We will also discuss case studies of brain impairment. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed Neuroscience 0817.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

PSY 0818. Human Sexuality. 3 Credit Hours.

We often think about sexuality in terms of the physical and reproductive aspects of sex. But our sexuality is complex and dynamic. We will address this dynamic complexity as we explore the biological, psychological, relational, and cultural aspects of sexuality. The goal of this course is to broaden your perspective of human sexuality, and deepen your understanding and awareness of your own sexuality. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: SOC 0818/0918, PSY 0918.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

PSY 0825. Quantitative Methods in the Social Sciences. 4 Credit Hours.

Psychological, political, social, and economic arguments and knowledge frequently depend on the use of numerical data. A psychologist might hypothesize that I.Q. is attributable to environmental or genetic factors; a politician might claim that hand gun control legislation will reduce crime; a sociologist might assert that social mobility is more limited in the United States than in other countries, and an economist might declare that globalization lowers the incomes of U.S. workers. How can we evaluate these arguments? Using examples from psychology, sociology, political science, and economics, students will examine how social science methods and statistics help us understand the social world. The goal is to become critical consumers of quantitative material that appears in scholarship, the media, and everyday life. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed SOC 0825, SOC 0925, POLS 0825, POLS 0825, or ANTH 0825.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

PSY 0846. Cyberpsychology and Behavior. 3 Credit Hours.

So many of our social interactions take place online. How are our behaviors different online compared to offline? How do online interactions affect our sense of self? Our sense of community? Our mental health? This course will explore the field of Cyberpsychology, which attempts to answer questions about how digital technology affects human interaction, as well as how we think and behave. Through the course, students will also investigate how evolving technology, such as virtual reality, robots, and digital assistants, might influence human interactions going forward.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

PSY 0916. Honors Workings of the Mind. 3 Credit Hours.

In this course we will discuss conscious and unconscious mental processes. We will start by considering the nature of the unconscious mind and will examine evidence for the existence of unconscious processes in memory, problem solving, behavior in social settings, and our attitudes, beliefs, and opinions. We will then study the nature of consciousness from psychological and philosophical perspectives, with a focus on trying to answer the questions of: what is consciousness, what does consciousness do, and why does consciousness exist. For many of the issues we will discuss, there is no scientific consensus regarding the right answer or the most correct theory. Be prepared to think critically and to tolerate perplexity. (This is an Honors course.) NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed Psychology 0816.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

PSY 0918. Honors Human Sexuality. 3 Credit Hours.

We often think about sexuality in terms of the physical and reproductive aspects of sex. But our sexuality is complex and dynamic. We will address this dynamic complexity as we explore the biological, psychological, relational, and cultural aspects of sexuality. The goal of this course is to broaden your perspective of human sexuality, and deepen your understanding and awareness of your own sexuality. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: SOC 0818/0918, PSY 0818.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

PSY 1001. Introduction to Psychology. 3 Credit Hours.

How do scientists study human behavior? How do others influence our behavior? What is a psychological disorder? These questions and more are reviewed in this course, which covers the basic concepts, methods, theories, and findings in Psychology. Topics include research methods, the nervous system, human development, social psychology, personality, and psychopathology. Duplicate credit warning: Students who have earned credits for PSY 1061 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

PSY 1002. Careers in Psychology. 1 Credit Hour.

This course explores the numerous career pathways open to psychology graduates. Pathways that involve entering the workforce directly are discussed alongside more specialized career paths that typically require graduate study. Students will also identify and develop professional skills to help them meet their career goals, and will learn about resources within and outside Temple that they can use to meet these goals. After completing the course, students will have an application-ready resume (or curriculum vitae) and will have the knowledge and information to find and apply for internships, opportunities to gain research experience, and employment after graduation. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

PSY 1003. Statistics for Psychology. 3 Credit Hours.

The purpose of this course is to provide an introduction to statistics in psychology. We will spend the semester learning the concepts and corresponding methods that will allow us to ask the question, "But how do you know that is true?" Statistics are essential in allowing us to assess whether or not an observed phenomenon might have occurred by chance alone. Additionally, we will read psychological journal articles that utilize the statistics we are learning so that we can see how psychologists use and write about statistics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

PSY 1004. Critical Thinking in Psychology. 3 Credit Hours.

How do you evaluate the strength of a claim made in a magazine, news program, or research article? This course will provide you with basic skills and information to systematically critique claims and research in the popular press and research literature. You will be introduced to basic research concepts, such as correlation vs. causation, common biases, hypotheses, dependent/independent variables, validity, and reliability. You will apply this knowledge to evaluating a wide range of ideas and research in psychology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1901, PSY 1061, or PSY 1996)

PSY 1110. Topics in Psychology I. 3 Credit Hours.

Individual treatment of issues regarding the inner workings of human behavior. Each offering deals with a specific aspect of behavior and motivation pertaining to life in today's society. Previous topics: women and therapy, exploring human nature, and drugs and the mind. NOTE: Check class schedule for semesters offered.

Repeatability: This course may be repeated for additional credit.

PSY 1901. Honors: Introduction to Psychology. 3 Credit Hours.

How do scientists study human behavior? How do others influence our behavior? What is a psychological disorder? These questions and more are reviewed in this course, which covers the basic concepts, methods, theories, and findings in Psychology. Topics include research methods, the nervous system, human development, social psychology, personality, and psychopathology.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PSY 2101. Foundations of Cognitive Psychology. 3 Credit Hours.

Survey of recent research and theory in the areas of verbal learning and cognitive processes. Learning and retention of verbal materials, thinking and problem solving, and the relationship between language and thought.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1071, PSY 1901, PSY 1996, or PSY 1061)

PSY 2103. Foundations of Learning and Behavior Analysis. 3 Credit Hours.

This course begins with introduction to a system of principles that account for the acquisition and maintenance of both normal and problematic behavior. Building upon this, applied behavior analysis will be illustrated with examples such as useful parenting techniques, the combining of simple into complex skills, interventions for severely problematic behavior, and early interventions for autism. The basics of Pavlovian conditioning will also be included, emphasizing their role in clinical phenomena and in drug addiction. The concluding phase of the course will be concerned with functional analyses of verbal behavior in typical human interactions, as well as in the origins of awareness and self-control.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1071, PSY 1901, PSY 1996, PSY 1061, or ABA 3302)

PSY 2104. Foundations of Sensation and Perception. 3 Credit Hours.

This course will describe how we experience the world. It will describe the biological sensors we use to gather information about the world and the psychological processes involved in interpreting that information. By the end of the course, students should be able to give an answer to the question: How do we see the world? The class will be lecture format with frequent opportunities to ask questions of the immediate material as well as broader questions about how the material may apply to other areas of psychology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1071, PSY 1901, PSY 1996, or PSY 1061)

PSY 2201. Foundations of Psychopathology. 3 Credit Hours.

A survey of the principal forms of emotional and behavioral disorders; their causes, symptoms, course, assessment, and treatment. Topics include childhood disturbances, schizophrenia, depression, anxiety, and substance use disorders.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071)

PSY 2301. Foundations of Developmental Psychology. 3 Credit Hours.

Human development across the life span. The role of genetic factors, maturation, learning and socio-cultural factors on the development of motivation, cognitive functions, social and emotional adjustment.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071)

PSY 2401. Foundations of Social Psychology. 3 Credit Hours.

This course will introduce you to the theoretical perspectives, research methods, and empirical findings of social psychology. Social psychology is the scientific study of how people's thoughts, feelings, and behaviors are affected by the real or imagined presence of others. More specifically, the four main goals of this course are for you to learn: the major concepts, research findings, and issues in the field of social psychology; how social psychologists derive and test their theories and hypotheses through research; how subtle situational factors affect behavior; and how social psychology applies to your own life.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071)

PSY 2402. Foundations of Industrial and Organizational Psychology. 3 Credit Hours.

A survey of the application of psychological theory, techniques, and research to industry. Selection, training, motivation, job satisfaction, job evaluation, performance measurements, leadership, and other topics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071)

PSY 2501. Foundations of Behavioral Neuroscience. 3 Credit Hours.

This course examines the neurobiology of behavior from the level of neuron to complex neural system interactions. Topics range from the neurobiology of sensory perception and movement to the neurobiology of learning and mental illness.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1071, PSY 1901, PSY 1061, or PSY 1996)

PSY 2502. Foundations of Cognitive Neuroscience. 3 Credit Hours.

The role of the brain in cognition. Neural basis of perception, language, learning, memory, thinking, and creativity. Neural pathology and the consequences for behavior. Neuropsychological assessment techniques.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1071, PSY 1901, PSY 1061, or PSY 1996)

PSY 2601. Foundations of Health Psychology. 3 Credit Hours.

This course is an overview of the field of health psychology, which focuses on the links between behavior and mental processes and health status and health behaviors. Health psychology is concerned with the promotion and maintenance of health, the prevention of illness, as well as the treatment of illness. Emphasis will be placed on theoretical analysis of health psychology (e.g., theory of planned behavior/reasoned action, health belief model, general adaptation syndrome, locus of control). Clinical applications may include smoking cessation programs, alcohol use interventions, weight control and eating disorders treatment, management of chronic pain and terminal illnesses, improvement of health care utilization and adherence, stress management, and the increasing social support to improve health outcomes.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071)

PSY 2901. Honors: Foundations of Cognitive Psychology. 3 Credit Hours.

Survey of recent research and theory in the areas of verbal learning and cognitive processes. Learning and retention of verbal materials, thinking and problem solving, and the relationship between language and thought.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PSY 2931. Honors: Foundations of Developmental Psychology. 3 Credit Hours.

Human development across the life span. The role of genetic factors, maturation, learning and socio-cultural factors on the development of motivation, cognitive functions, social and emotional adjustment.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PSY 2991. Honors Research I. 4 Credit Hours.

Topics arranged by student and instructor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

PSY 3002. Evolutionary and Comparative Psychology. 3 Credit Hours.

The course introduces the student to cognition and social behavior from an evolutionary and comparative perspective. The comparative psychology (i.e., animal cognition) portion of the course presents the methods employed and results obtained during field observations and laboratory experiments on animal cognitive processes. Evolutionary theory, especially as it applies to social behavior, will be presented. The social behavior portion of the course will focus on social behaviors found in wild animals with special attention to those also seen in humans. The course will survey the methods and findings of the field called evolutionary psychology, which investigates selected aspects of human cognition and social behavior. The student can expect to obtain basic familiarity with the concepts and findings of those closely-related fields. Duplicate credit warning: Students who have earned credits for PSY 2102 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and any 2000-level PSY course.

PSY 3003. Advanced Undergraduate Statistics. 3 Credit Hours.

This course is meant to give psychology majors who have already taken a basic course in inferential statistics (e.g., Statistics for Psychology; PSY 1003) exposure to more advanced techniques commonly used in psychological research and to bridge the gap between basic and graduate level statistics for those considering a post-graduate degree in psychology. Topics will include linear regression, repeated-measures ANOVA, multi-factorial ANOVA, and several nonparametric alternatives to "standard" inferential tests. In addition to significance testing, this course will focus on the measurement and interpretation of effect size and power. Students will also learn how to perform data analysis using the SPSS statistical software package.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

PSY 3004. Positive Psychology. 3 Credit Hours.

Positive psychology encompasses the study of positive experiences, positive character strengths, positive relationships, and the institutions and practices that facilitate their development. Positive experiences include the mental states of flow and mindfulness and emotions about the present (pleasure, contentment, laughter), past (e.g., nostalgia, satisfaction, pride), and future (e.g., hope, optimism). The distinction among the pleasant life, the good life, and the meaningful life will be drawn. The positive character traits include wisdom, courage, compassion, love, humanity, justice, temperance, self-efficacy, resilience, grit, imagination, creativity, and spirituality/transcendence. The classification of these virtues is explored. Positive relationships include the factors that enhance meaning and well-being among couples, family, friends, co-workers, and the community. Positive institutions are exemplified by positive education, positive work environments, healthy families, human leadership, and the development of civic virtues. This course also reviews the history of positive psychology and the contributions this new field has made to several traditional research areas in psychology. Consideration will be given to conflicting viewpoints, and their respective empirical support, including the benefits of balancing positive with negative emotions, the measurement and development of happiness, and the attempting to increase it. Throughout the course we will also engage in experiential learning and practical exercises to increase well-being, which will inform our theoretical and empirical understanding of important questions in positive psychology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

PSY 3005. Affective Neuroscience. 3 Credit Hours.

The brain is not just a thinking machine; it is also a feeling machine. This course explores the neural substrates behind emotions such as love, trust, fear, and pleasure. We will also discuss the relationship between emotions and cognition, the effect of emotions on animal and human behavior, and the biological basis of affective disorders such as anxiety and depression.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3006. Stress and the Brain. 3 Credit Hours.

Stress, in some form or other, is part of our everyday lives. How we respond to stress can either ensure our immediate survival or threaten long-term physical and mental well-being. This course will survey the clinical and preclinical research to understand how the brain initiates stress responses, and how stress, in turn, impacts the brain to alter behavior. The role that stress plays in the development of disorders, such as depression and post-traumatic stress disorder, will also be explored.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3007. Neuropharmacology of Drugs of Abuse. 3 Credit Hours.

This course will explore how drugs of abuse act within the brain. We will discuss the acute and longterm effects of selected drugs of abuse on behavior, mood, cognition and neuronal function and material from studies with humans is integrated with basic studies on the neurobiological basis of drug action and drug abuse -- including detailed coverage of synaptic transmission and the distribution, regulation and integration of brain neurotransmitter systems. The focus is on addictive or illicit drugs, and all the major classes are discussed, including: opiates (heroin, morphine, opium), sedative - hypnotics (alcohol, barbiturates, chloral hydrate), anxiolytics (benzodiazepines), psychomotor stimulants (amphetamine, cocaine), marijuana, hallucinogens (LSD, mescaline), hallucinogenic-stimulants (MDA, MDMA), and dissociative anesthetics (PCP).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and PSY 1003.

PSY 3008. Decision Neuroscience. 3 Credit Hours.

How do we make decisions in social and economic contexts? What factors influence our decisions? How can neuroscience be used to better understand our decisions? To answer these questions, this course focuses on how new research in neuroscience, psychology, and behavioral economics shapes our broader understanding of decision making. The topics covered in the course include functional organization of key brain systems, approaches to measuring and interpreting neuroscience data, methods for measuring decision-making behavior, economic and cognitive modeling, and impact of neuroscience on real-world decision-making. Emerging topics will include applications in policy, marketing, and finance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 1003 and (PSY 2104, PSY 2501, PSY 2502, or NSCI 2001)

PSY 3009. Current Perspectives on Parenting. 3 Credit Hours.

This course will provide an overview of the field's current understanding of parenting and the role of parenting in child development. The course focuses on understanding theoretical and research approaches to the study of parenting. Topics covered will include historical perspectives on parenting, the importance influence of parents on their children's development, parenting throughout developmental periods (e.g., infancy, toddlerhood, middle childhood, adolescence), and contemporary issues in parenting (e.g., parenting in non-traditional families, parents at risk, child maltreatment, public policy issues, multicultural perspectives on parenting). Students will also be exposed to the multiple research methods available to study parenting and parental influence, and be able to review and critically evaluate current research related to parenting and youth development.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

PSY 3012. Self-Regulation in Health Behaviors. 3 Credit Hours.

This course will discuss self-regulation as a potent predictor of healthful behaviors such as exercise and vegetable consumption. We will also explore why non-addicted people compromise healthy long-term goals for less valued, health-risk behaviors such as alcohol use, overeating, and cigarette smoking. We will examine how certain risk behaviors can evolve into addictions if they persist over time. Multiple psychological theories that integrate cognitive, emotional, and social predictors underlying self-regulation in health behaviors will also be discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 1003, PSY 1004, and any 2000-level PSY course.

PSY 3013. Psychological Resilience. 3 Credit Hours.

Stress, adversities and trauma are ordinary parts of life. We naturally adapt to a remarkable variety of challenges throughout our lives, yet occasionally get stuck. Scientific psychology offers evidence-based methods to help us prepare for and adjust to challenging circumstances. This course will examine the theories and science of psychological resilience; the biology of stress; cognitive mediation; and social and community factors that contribute to risk and resilience. You will sample experiential coping skills and techniques, and investigate the role of social and electronic media in the maintenance of stress.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

PSY 3096. Conducting Psychological Research. 3 Credit Hours.

This writing intensive course offers a practical introduction to research methods and the process of conducting research in psychology. Students will perform all of the steps involved in a research study, from formulating an idea and hypothesis to presenting results in a paper and presentation. Ethical considerations relevant to research will be emphasized in the course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1001, PSY 1901, PSY 1061, PSY 1071, or PSY 1996), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and any 2000-level PSY course.

PSY 3100. Topics: Brain, Behavior and Cognition. 3 Credit Hours.

Advanced level topics course; topics vary by instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PSY 2101, PSY 2103, PSY 2501, PSY 2502, PSY 2104, or PSY 2901), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3121. Cognitive Enhancement and Superior Cognition. 3 Credit Hours.

This seminar-style course will evaluate "cognitive enhancement" techniques - the different ways in which people have tried to strengthen cognitive abilities. It will consider competing ideas about whether the human mind can be enhanced, and will discuss these ideas in relation to plasticity in the human brain. The course will delve into research on the development of "expertise", and on the potential to hone specific cognitive abilities through deliberate practice. Students in the course will learn about, and debate, claims regarding the improvement of cognitive capabilities in healthy young adults, through techniques like mental training, video game play, meditation, brain stimulation, physical exercise, and neuropharmacology ("smart drugs"). Along the way, students will consider what can be learned from individual cases of exceptional cognitive ability, which might represent the outer limits of what the human mind is capable of achieving.

Repeatability: This course may not be repeated for additional credits.

PSY 3131. Problem Solving and Creative Thinking. 3 Credit Hours.

This course will begin with a historical survey of approaches to the study of creativity, concentrating on questions of definition and issues concerning how creativity can be measured. The relationship between creative thinking and problem solving will be discussed. The next section will examine different perspectives that researchers have taken toward the study of creativity. Examples are: (1) genius and madness; (2) developing tests of creative thinking and studying the creative personality; (3) the cognitive view, which considers creative thinking to be a straightforward extension of ordinary problem solving. We will then examine a number of case studies of creative advances, from the areas of invention (Edison, the Wright brothers), the arts (painting, sculpture, literature, poetry, and music), and science, to acquire a database to use to test the theories of the creative process developed earlier. The material in this course will go beyond that ordinarily covered in a psychology course - we will read research in art history, musicology, history and philosophy of science, and history of technology, as well as literature from the psychological study of giftedness, personality and mental testing, and cognitive processes. Course requirements will include written comments on each week's assigned readings, and a case study of a creative advance in any area of interest to the student. NOTE: Check class schedule for semesters offered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2101, PSY 2901, PSY 2501, or PSY 2502), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3132. Human Memory. 3 Credit Hours.

This course provides an in-depth view of human memory. It focuses on the different approaches to research on human memory, including cognitive approaches, experimental approaches, neuroscientific approaches, and developmental (childhood to old age) approaches. Course topics include basic memory processes, the neuropsychology of memory and amnesia, and applied topics in memory research. NOTE: Check class schedule for semesters offered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2101, PSY 2501, PSY 2502, or PSY 2901), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3151. Direct Applications of Behavioral Principles. 3 Credit Hours.

Direct hands-on experience, in the shaping and maintaining of novel behavior patterns in the laboratory, will be supplemented by related readings and field trips to educational and social-service agencies where behavioral principles are applied. These experiences will introduce students to functional analysis and its underlying principles, and to the graphical techniques that enable the tracking of skill acquisition of individuals, as well as evaluating their problematic behavior. In addition, each student will carry out an individual project by selecting, analyzing, and arranging for improvement in some behavior that impacts his or her own quality of life.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 2103, (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3172. The Science of Sleep. 3 Credit Hours.

Why do we sleep? How does sleep affect memory, learning, physical health, and emotional regulation? How much sleep do we need, and why? How does sleep change with age? How are sleeping, eating, and obesity related? How can we get more sleep? In this advanced undergraduate seminar, we examine all these questions, and more, from a neurological developmental perspective. This course is targeted to students interested in developmental neuroscience, health psychology, clinical psychology, developmental psychology, and learning and memory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((PSY 1003 and PSY 2101), PSY 2501, or PSY 2502)

PSY 3200. Topics: Clinical. 3 Credit Hours.

Advanced level topics course; clinical topics vary by instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and any 2000-level PSY course.

PSY 3221. Clinical Psychology: Research and Practice. 3 Credit Hours.

In this class the student will learn about one subspecialty within psychology, that of clinical psychology. The course will focus on how clinical psychology emerged as a field of mental health research and practice, what clinical psychologists do and the theory behind those activities. Special attention will be paid to psychological assessment and psychotherapy, two of the main activities that clinical psychologists undertake. Students will learn about the purpose of psychological assessment, some examples of the more commonly used psychological assessment instruments, and how psychological assessment guides service provision. Students will also learn about different theoretical orientations in the practice of psychotherapy. Additional topics covered include ethics in this clinical science, contemporary issues in clinical practice (e.g., innovative treatments for mental illness, the impact of managed care, working with special populations), and career opportunities in the field.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and PSY 2201.

PSY 3223. Child Psychopathology and Treatment. 3 Credit Hours.

This course provides an overview of the major psychological, behavioral, and emotional problems experienced in childhood and adolescence. Organized around - but not limited to - the diagnostic framework of the DSM, the course focuses on current views concerning the phenomenology, etiology (causes), and treatment and prevention of these problems. The major theoretical positions are covered, but the major emphasis is on current empirical findings relevant to the various disorders and problems. Covered issues include conduct problems and delinquency, attention deficit problems, depression and suicide, childhood anxiety problems, developmental disabilities, learning problems, child maltreatment and abuse, and children's adjustment to family problems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and PSY 2201.

PSY 3301. Phases of Development: Infancy. 3 Credit Hours.

Within this course, students focus on a particular phase of development, infancy, for an entire semester. This phase of development presents unique changes and challenges for the developing person. For the scientist, the phase poses unique theoretical perspectives and special methodological challenges. Up-to-date information and directions for future study, application and research are emphasized.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (PSY 2301 or PSY 2931)

PSY 3303. Psychological Testing: Measuring IQ, Thoughts, Feelings, and Attitudes. 3 Credit Hours.

How do we measure intelligence, thoughts, feelings, and attitudes? This course will provide an overview of psychometric theory, methods, and statistics. Test construction and the psychometric evaluation of tests (e.g., validity, reliability) will be covered in detail. Students also will learn the history of psychometrics, and legal, ethical, and cultural diversity issues related to this topic will be discussed. This course will introduce assessment concepts and methods that will be useful in a wide range of settings, including graduate school and careers in clinical settings, marketing, personnel selection, job performance evaluations, treatment evaluations, forensic applications, and others.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

PSY 3304. Personality, Social and Emotional Development. 3 Credit Hours.

How do we develop as unique individuals? How do we come to relate to others and ourselves? How do we come to feel the way we do about the people we know and the many important things in our lives? Using contemporary research and theory, these core questions are examined. Among the topics to be studied are the development and significance of early attachment relationships, the development of a sense of self, changing family relations, the progression from external to internal self-control, the emergence of prosocial and anti-social behavior, moral development, the development of romantic relationships, and the nature of changing relationships with peers and loved ones. Students will acquire an understanding of the role of early experiences in development, the nature of emotional vulnerability and personality resilience, and the extent to which some behaviors are continuous or discontinuous over time. NOTE: Check class schedule for semesters offered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (PSY 2301 or PSY 2931)

PSY 3305. Cognitive and Language Development. 3 Credit Hours.

This class will discuss theory and evidence concerning how children acquire adult competence in thinking and language. Development is covered from infancy to adolescence. We will consider a wide array of domains and processes in cognitive development, including number, space, theory of mind, reasoning, perception, attention, and memory. Educational and applied implications may be touched on, as well as neuroscience approaches.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (PSY 2101, PSY 2301, PSY 2901, or PSY 2931)

PSY 3306. Neuroscience of Development and Aging. 3 Credit Hours.

This course will integrate students' knowledge of behavioral and cognitive relationships between young adult neuroanatomy and behavior that they studied in prerequisite courses (Psychology 2501 (0260) - Foundations of Behavioral Neuroscience or Psychology 2502 (0265) - Foundations of Cognitive Neuroscience) with information about the development and aging of behavior, cognition and neuroanatomy and neurophysiology. The initial emphasis in the course will be on embryonic and fetal development of the central nervous system and emergent behavioral plasticity. Sensory and motor development in the fetus will be examined. Postnatal development of the cerebral cortex and developmental outcomes will be explored in the context of environmental phenomena that can amplify or inhibit the organism's adaptive capacity. Normal aging of the brain will be contrasted to neurodegenerative diseases of old age, and the cognitive and behavioral consequences of both normal and non-normal aging will be presented.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (NSCI 2001, PSY 2501, or PSY 2502)

PSY 3411. Social Cognition. 3 Credit Hours.

This class provides an overview of social cognition, the study of the cognitive representations and processes that people use to try to make sense of the social world. Topics covered will include social attitudes, the social self, stereotypes, attributions, and social decision-making. Readings, lectures, and discussions will focus on the key research findings, the unique methods, and the implications and applications of social cognition research. NOTE: Check class schedule for semesters offered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and PSY 2401.

PSY 3413. Psychology of Power, Oppression, and Privilege. 3 Credit Hours.

Psychology of Power, Oppression, and Privilege is designed to be a specialized course to focus on diversity, equity and inclusion within the Psychology major. This course provides an in-depth coverage of psychology topics, including stereotyping, prejudice and privilege, discrimination and advantage, oppression and the impact of oppression on the individual's mental health and well being. In addition, this course provides further opportunities for students to develop their writing, speaking, and presentation skills.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in any 2000-level PSY course.

PSY 3417. Personnel Psychology. 3 Credit Hours.

This course focuses on the application of psychological theories and principles to issues in personnel selection. Topics include job analysis, recruitment and selection techniques, selection fairness, utility analysis, affirmative action, training and development, and performance appraisal.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 2402, (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3418. Human Performance Improvement. 3 Credit Hours.

This course is an introduction to Human Performance Technology, a rapidly growing field that applies the principles, methods, and empirical generalizations of Behavior Analysis to improving human performance in organizations. Working from a theoretical basis, students will learn how to diagnose performance discrepancies in organizational settings, design and evaluate appropriate behavior-based solutions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and PSY 2402.

PSY 3501. Investigation of Addiction Disorders. 3 Credit Hours.

What is addiction? How can it be defined? This course will explore the psychological, neurobiological, and pharmacological perspectives of addiction and addiction disorders. Students will learn the basic neurobiology of addiction, an overview of experimental techniques investigating addiction, and discuss the societal impacts. Several addiction disorders will be covered, ranging from gambling to drugs of abuse. Students will be encouraged to provide their viewpoints and participate in class discussions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), PSY 1004, and any 2000-level PSY course.

PSY 3561. Psychopharmacology. 3 Credit Hours.

This course will focus on how the brain works on a chemical level. It examines how behavior and environment can change functions of the brain, and how medications and drugs alter brain function. NOTE: Check class schedule for semesters offered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2122) and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3566. Neurobiology of Learning and Memory. 3 Credit Hours.

This course examines the neuroanatomy and neurophysiology underlying the many diverse forms of learning and memory. The course begins with an overview of the structure and function of neural areas responsible for learning, before progressing to an examination of the different processes involved in the acquisition, consolidation, and forgetting of habits, skills, and cognition. Additional topics may include the relation between pharmacology and learning, the impact of disease or trauma, and the neurobiology of social behavior.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2001) and (PSY 1003, PSY 2168, STAT 2102, or STAT 2103)

PSY 3600. Advanced Topics in Health Psychology. 3 Credit Hours.

Special Topics course - topic varies by semester and/or by instructor. Topics offered are all specifically related to Health Psychology. NOTE: Check class schedule for topics offered each semester.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PSY 2601, HRPR 2103, or SBS 2103), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101)

PSY 3601. Social Health Psychology. 3 Credit Hours.

Health psychology is concerned with the promotion and maintenance of health, the prevention of illness, as well as the treatment of illness. This course will focus on how social psychological factors affect one's general health, health behaviors, and well-being. Emphasis will be placed on theoretical analysis of social psychological phenomena as they apply to health psychology (e.g., social support and intimate relationships; stigma, prejudice, and discrimination; issues of race, gender, class; health attitudes and persuasion; and the self).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2601, HRPR 2103, or SBS 2103), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101)

PSY 3602. Clinical Neuropsychology. 3 Credit Hours.

This course will provide background on basic functional anatomy of the central nervous system and neuropsychological theories and methods. The primary focus of the course will be the clinical assessment and treatment of neuropsychological disorders, such as aphasia, agnosia, dementia, and others. NOTE: This course is regularly cross-listed with NSCI 3602; students will receive credit for only one course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and any 2000-level PSY course.

PSY 3603. Clinical Applications of Health Psychology. 3 Credit Hours.

Health psychology is a subfield of psychology that applies psychological theories and techniques to health and wellness and the prevention and treatment of illness and disabling conditions. This advanced undergraduate course will provide an introduction to the clinical applications of health psychology using an interdisciplinary model. Readings, review of research, discussions and an interdisciplinary project will focus on integrating knowledge of the biological, behavioral, emotional, social and cognitive influences on health and health behaviors with the goal of understanding psychological approaches to the prevention and treatment of physical problems and enhancing overall wellness.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2201, PSY 2601, HRPR 2103, or SBS 2103), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101)

PSY 3604. Food on the Brain. 3 Credit Hours.

This course is about food and eating from a variety of perspectives including from a neuroscience, developmental, and an individual differences perspective. We will review the neurobiology of tasting and consuming food; examine lifespan and gender differences. We will examine eating in healthy individuals but also will cover health and clinical psychology topics such as eating and weight disorders. We will review the current understanding of food as an addictive substance and consider food and eating occurs within a social and environmental context.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PSY 1003 and (PSY 2501, PSY 2502, PSY 2601, HRPR 2103, or NSCI 2001)

PSY 3615. History and Systems of Psychology. 3 Credit Hours.

The development of psychology from its origins to present. The conceptual bases of the current major psychological systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and any 2000-level PSY course.

PSY 3620. Topics in Psychology. 3 Credit Hours.

Special Topics course - topic varies by semester and/or by instructor. Topics offered are all from the major divisions of psychology; clinical, developmental, social and BBC (Brain, Behavior & Cognition). NOTE: Check class schedule for topics offered each semester.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), and any 2000-level PSY course.

PSY 3785. Psychology Internship. 1 to 12 Credit Hour.

Work experience in clinical and industrial settings where psychologists are employed eight hours a week under the guidance of an on-site supervisor. Students meet for seminars, and write a paper under the guidance of a Temple coordinator.

Repeatability: This course may be repeated for additional credit.

PSY 3787. Practicum. 1 to 12 Credit Hour.

Work experience in clinical and industrial settings where psychologists are employed eight hours a week under the guidance of an on-site supervisor. Students meet for seminars, and write a paper under the guidance of a Temple coordinator.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), (PSY 1003, PSY 2168, STAT 2102, or STAT 2103), (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071), and any 2000-level PSY course.

PSY 3791. Collaborative Research I. 1 to 4 Credit Hour.

Faculty advisor needed for research in a particular area. For projects outside Temple University, approval must be obtained through a faculty member who will handle the liaison with the outside institution and ensure uniformity of requirements.

Repeatability: This course may be repeated for additional credit.

PSY 3891. Collaborative Research II. 1 to 4 Credit Hour.

Faculty advisor needed for research in a particular area. For projects outside Temple University, approval must be obtained through a faculty member who will handle the liaison with the outside institution and ensure uniformity of requirements.

Repeatability: This course may be repeated for additional credit.

PSY 3920. Honors Topics in Psychology. 3 Credit Hours.

Topic varies by semester and/or by instructor. Check course schedule for topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PSY 2168, PSY 1003, STAT 2102, or STAT 2103), (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101), and (PSY 1001, PSY 1061, PSY 1901, PSY 1996, or PSY 1071)

PSY 3921. Honors Cognitive Enhancement and Superior Cognition. 3 Credit Hours.

This seminar-style course will evaluate "cognitive enhancement" techniques - the different ways in which people have tried to strengthen cognitive abilities. It will consider competing ideas about whether the human mind can be enhanced, and will discuss these ideas in relation to plasticity in the human brain. The course will delve into research on the development of "expertise", and on the potential to hone specific cognitive abilities through deliberate practice. Students in the course will learn about, and debate, claims regarding the improvement of cognitive capabilities in healthy young adults, through techniques like mental training, video game play, meditation, brain stimulation, physical exercise, and neuropharmacology ("smart drugs"). Along the way, students will consider what can be learned from individual cases of exceptional cognitive ability, which might represent the outer limits of what the human mind is capable of achieving.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

PSY 3961. Honors Psychopharmacology. 3 Credit Hours.

This course will focus on how the brain works on a chemical level. It examines how behavior and environment can change functions of the brain, and how medications and drugs alter brain function.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 2501, PSY 2502, or NSCI 2122) and (PSY 2168, PSY 1003, STAT 2102, or STAT 2103)

PSY 3991. Honors Research II. 3 Credit Hours.

Topics arranged by student and instructor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in PSY 2991, (PSY 2168, PSY 1003, STAT 2102, or STAT 2103), and (PSY 1004, PSY 1167, SOC 1167, MATH 1013, or STAT 2101)

PSY 4182. Independent Study in Cognitive Neuroscience I. 3 Credit Hours.

Students do cognitive neuroscience research in the laboratory.

Repeatability: This course may be repeated for additional credit.

PSY 4282. Independent Study in Cognitive Neuroscience II. 3 Credit Hours.

Students do cognitive neuroscience research in the laboratory.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in PSY 4182.

PSY 4696. Capstone in Psychology. 3 Credit Hours.

The focus of this capstone is a topic important to many fields in psychology. Different topics will be covered in different semesters. The course will allow students to see the linkages between concepts and theories from very different fields and to see how psychology can be applied to problems in many spheres of life. The emphasis on synthesis and application makes this capstone particularly useful for students planning graduate work in psychology and those unsure of the direction they would like to take in psychology. NOTE: This course is limited to psychology majors in their senior year.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 3096 or PSY 2196)

PSY 4791. Collaborative Research III. 1 to 4 Credit Hour.

Faculty advisor needed for research in a particular area. For projects outside Temple University, approval must be obtained through a faculty member who will handle the liaison with the outside institution and ensure uniformity of requirements.

Repeatability: This course may be repeated for additional credit.

PSY 4891. Collaborative Research IV. 1 to 4 Credit Hour.

Faculty advisor needed for research in a particular area. For projects outside Temple University, approval must be obtained through a faculty member who will handle the liaison with the outside institution and ensure uniformity of requirements.

Repeatability: This course may be repeated for additional credit.

PSY 4991. Honors Research III. 3 Credit Hours.

Topics arranged by student and instructor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

PSY 4996. Honors Capstone. 4 Credit Hours.

This capstone is the final class of a four semester honors program in psychology. At this point students have designed a research project and collected and analyzed their data. Here the students write their research in APA style and prepare to submit these manuscripts for publication. Each student participates in a poster session attended by the psychology faculty and other invited guests. NOTE: This course is limited to psychology majors in their senior year who have completed the first three semesters of the psychology honors program.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Public Policy (PLCY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PLCY 2000. Special Topics I. 3 Credit Hours.

Topics vary from semester to semester. Please check with the faculty advisor for a course description and topic.

Repeatability: This course may be repeated for additional credit.

PLCY 2103. Making Public Policy. 3 Credit Hours.

This course examines selected policy areas in a variety of national settings and the relationship of political cultures and policymaking structures to policy outputs. NOTE: Students will receive credit only once for either POLS 2103 or PLCY 2103. This course was previously titled "U.S. Public Policy Making"; students who received credit under the former title will not earn additional credit.

Repeatability: This course may not be repeated for additional credits.

PLCY 3000. Special Topics II. 3 Credit Hours.

Topics vary from semester to semester. Please check with the faculty advisor for a course description and topic.

Repeatability: This course may be repeated for additional credit.

PLCY 3151. Public Policy Analysis. 3 Credit Hours.

This course considers selected contemporary public policy issues. The course begins with an examination of the national political-economic context within which major policy issues arise and then turns to the analysis of the roots and policy alternatives on several major issues. Issues may concern health, energy, education, employment, welfare, and the regulation of business.

Repeatability: This course may not be repeated for additional credits.

PLCY 3185. Internship I. 1 to 12 Credit Hour.

This internship course offers students the opportunity to gain practical experience in an area of interest. The course is designed to combine general academic experience with practical experience in fields such as public policy, local, state and federal government agencies, interest advocacy, campaigns and elections, law firms, government affairs, and NGOs, among others. The course does not have formal meeting times but will meet several times during the semester of registration in a classroom/small setting. Students are responsible for working on their own to complete the required assignments.

Repeatability: This course may be repeated for additional credit.

Public Relations (PR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

PR 1101. PRactical Grammar for Public Communications. 3 Credit Hours.

In this course, students are taught the basics of grammar, sentence structure, punctuation and word usage; these basic skills are foundational to majoring in pursuits that involve extensive writing, such as public relations, journalism and other communications studies. By the end of this course, a proficiency in the mechanics of writing will provide students with the skills to perform well in the more advanced level writing required throughout their collegiate career.

Repeatability: This course may not be repeated for additional credits.

PR 1112. Communicating Leadership. 3 Credit Hours.

This course will introduce you to leadership studies from a communication perspective. Through all course activities (e.g., readings, discussion, and case studies) you will gain a broad understanding of how leadership emerges and is enacted on a daily basis through communication. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 1112.

Repeatability: This course may not be repeated for additional credits.

PR 1496. News Writing and Media Relations. 3 Credit Hours.

This writing-intensive course focuses on the fundamentals of writing for various forms of news media, including print and electronic. Use of AP Style is taught and required. NOTE: Required course for all students in the Public Relations major. A grade of C or higher is required in order to take upper-level PR courses. WI designated.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

PR 1552. Introduction to Public Relations. 3 Credit Hours.

Overview of public relations careers, skills and responsibilities. Intended for both those who are considering a PR career and those planning to enter any field that deals with the public. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2552.

Repeatability: This course may not be repeated for additional credits.

PR 2440. Special Topics in Public Relations. 3 Credit Hours.

This course focuses on subject matter not covered by regular departmental courses. Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

PR 2551. Research Methods. 3 Credit Hours.

This is a basic course in applied research for planning and evaluating communication campaigns.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in PR 1552.

PR 2661. Communicating Organizational Change. 3 Credit Hours.

In this course, we will analyze the forces that drive individuals, teams, and organizations to change. We will examine a range of theoretical concepts and practices of leading change in organizational, community, political and global contexts. We will examine impediments to change. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2661.

Repeatability: This course may not be repeated for additional credits.

PR 2662. Leading Groups and Team Building. 3 Credit Hours.

Teams, and small groups, are an essential element of work and social life; we are constantly asked to cooperate, coordinate, and collaborate. While teamwork can be a productive, immensely satisfying and rewarding experience, too often it falls short of meeting our expectations. This class introduces students to the small group communication theories and principles that provide the basis for both understanding team building and becoming a productive group member and leader. Through (1) the study of small group communication theory, (2) the evaluation of teams in practice (from mountain climbing to virtual work teams), and (3) analyzing students' own group experiences, students will develop the communication and analytic skills necessary to make teamwork work for you. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2662.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (Complete the following: (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), and (PR 1552 or 'Y' in CRPR04) or CMST 2111 (C- or higher))

PR 2672. Global Communication and Leadership. 3 Credit Hours.

This course focuses on communication processes and issues that arise in multinational and global organizations. This course explores the relationship among culture, communication, technology, and ways of organizing across national contexts and in different types of organizations (nonprofit, voluntary, civic, governmental, small business and corporate systems). The communicative and ethical dimensions of international organizing are addressed.

NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2672.

Repeatability: This course may not be repeated for additional credits.

PR 2701. Public Relations Theory. 3 Credit Hours.

Using a critical lens, this course shall enable students to explore practical public relations problems and opportunities influencing the field through application of public relations theory.

Repeatability: This course may not be repeated for additional credits.

PR 3096. Public Relations Writing. 3 Credit Hours.

This designated Writing-Intensive course explores all aspects of writing for public relations, including news releases, newsletter and brochure copy, speech writing, writing for websites and digital media, writing for internal audiences, understanding campaign planning and evaluation, and more.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), and (PR 1101 or 'Y' in CRPR01)

PR 3101. Digital Media, Social Media, Audience Analytics for Public Relations. 3 Credit Hours.

One of the most critical skills in modern public relations is a strong understanding of the tools measuring digital marketing performance, the key metrics and their meaning. You will need to know how to analyze the data, find the story in the data and present the data story in a compelling way. This course will provide students with the basics of digital tools and the key metrics analyzed for communication disciplines. Students will learn some of the most common digital tools in the industry, and become better prepared for the modern communication world.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), and (PR 2551, STRC 2551, or 'Y' in CRPR05)

PR 3201. Law and Ethics in Public Relations. 3 Credit Hours.

Law and ethics are crucial components of public relations practice. This course explores and supplies you with critical knowledge of these areas through theoretical perspectives; examination of essential and relevant law impacting professional communicators; analyses of ethical issues public relations professionals and organizational and community leaders confront; exploration of guidelines for remaining in compliance with the law; discussions and case studies of ethical reasoning and practical, philosophical and theoretical concerns affecting everyday matters of moral choice and of moral judgment; and current trends on these topics in the media and public relations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), (PR 2551 (may be taken concurrently) or 'Y' in CRPR05), (PR 2662 (may be taken concurrently) or 'Y' in CRPR06), and (PR 2701 (may be taken concurrently) or 'Y' in CRPR07)

PR 3202. Diversity and Public Relations. 3 Credit Hours.

The growing importance of issues surrounding diversity and the ever-changing media landscape have become imperative in the practice of public relations. This course explores and supplies you with critical knowledge of these areas through analyses of diversity and media issues public relations professionals and firms confront; theoretical perspectives on the various dimensions of diversity and its value in public relations; practical application of strategies to manage the shifting media landscape; and both discussions and case studies of current trends on these topics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), (PR 2551 (may be taken concurrently) or 'Y' in CRPR05), (PR 2662 (may be taken concurrently) or 'Y' in CRPR06), and (PR 2701 (may be taken concurrently) or 'Y' in CRPR07)

PR 3301. Industry Essentials for Public Relations. 1.5 or 2 Credit Hour.

This intense seven-week course is designed to provide a foundational knowledge on essential business topics from a strategic public relations perspective including economics and economic indicators, financial statements, the law and corporate disclosure, corporate social responsibility, and corporate reputation, among others. Please note this is a required course. If students take it for 2 credits, they will need to take a 1 credit elective or add 1 credit to the Field Experience course to fulfill graduation requirements.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), (PR 2551 or 'Y' in CRPR05), (PR 2662 (may be taken concurrently) or 'Y' in CRPR06), and (PR 2701 (may be taken concurrently) or 'Y' in CRPR07)

PR 3302. Crisis Communication. 1.5 or 3 Credit Hour.

This course is designed to provide a foundational knowledge on essential crisis communication practices and techniques from a strategic public relations perspective including understanding the differences between a crisis and an emergency, risk assessment, legal restrictions and implications, and how a crisis can affect operations, employee morale and productivity, business relationships, stock price and corporate reputation, among others. Both the perspectives of practitioners and academics will be presented.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), (PR 2551 (may be taken concurrently) or 'Y' in CRPR05), (PR 2662 (may be taken concurrently) or 'Y' in CRPR06), (PR 2701 (may be taken concurrently) or 'Y' in CRPR07), and (PR 3096 or 'Y' in CRPR08)

PR 3401. Sports Media Relations. 3 Credit Hours.

This course teaches all aspects of media interaction, specifically public relations and advertising, in the sports industry. Students explore careers in sports media relations, learning the writing, statistical and communication skills needed to work for a sports agency, sports public relations agency, a sports organization or institution. The course focuses on the cultural, business, and audience issues involving professional representation and sports coverage, including race, gender, and ethics.

Repeatability: This course may not be repeated for additional credits.

PR 3440. Special Topics in Public Relations. 3 Credit Hours.

Subject matter not covered by regular departmental course offerings. Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

PR 3483. Directed Readings in Public Relations. 3 Credit Hours.

Advanced reading in Public Relations topics. NOTE: Hours arranged.

Repeatability: This course may be repeated for additional credit.

PR 3582. Independent Study in Public Relations. 1 to 3 Credit Hour.

Arranged each semester. Arrange through the Director of the Public Relations major.

Repeatability: This course may be repeated for additional credit.

PR 3587. Public Relations Field Experience. 1 to 3 Credit Hour.

The Public Relations Field Experience complements the PR student's formal education. For many students, the Field Experience is the first opportunity to gain experience in a communication career path. The Field Experience should acquaint students with actual professional practices in their disciplines. The Field Experience offers students the first on-site opportunity to learn about some of the realities of working in the communications field they are planning to pursue as a possible career path. The Field Experience will occur before the internship (PR 4285).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSI 1111 or 'Y' in CRCO01), (PR 1112 or 'Y' in CRPR02), (PR 1101 or 'Y' in CRPR01), (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), (PR 2551 or 'Y' in CRPR05), (PR 2662 or 'Y' in CRPR06), and (PR 2701 (may be taken concurrently) or 'Y' in CRPR07)

PR 4102. Public Relations Portfolio. 3 Credit Hours.

Public Relations Portfolio is a course in which students develop and complete their portfolios to position them for career opportunities following graduation. The course is intended to take all of the student's work in the public relations field (including previous internships, freelance work and relevant employment) to produce professional-level public relations portfolios that reflect mastery of public relations strategy and tactical execution. Work is prepared and evaluated against the highest industry standards. Professional presentation beyond the portfolio, such as the resume, job search, and interview, will also be addressed along with social media positioning strategies and developing a working knowledge of technical presentation tools.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

PR 4202. PR-Driven Corporate Sponsorship. 3 Credit Hours.

This course will examine elements of corporate sponsorship and sponsorship marketing, including understanding how sponsorship supports organizational and business goals, evaluating sponsorship proposals, leveraging sponsorships to internal and external audiences, and working with the media.

Repeatability: This course may not be repeated for additional credits.

PR 4285. Internship in Public Relations. 1 to 3 Credit Hour.

Organized professional work under supervision in public relations organization. NOTE: To register for this internship, you must be a major in Public Relations, have Junior or Senior status and permission of the PR Internship Director. Minimum GPA of 3.0 in the major. A grade of C or higher is required in order to count toward graduation.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Relations.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

PR 4440. Special Topics in Public Relations. 3 Credit Hours.

Subject matter not covered by regular departmental course offerings. Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

PR 4501. Public Relations Capstone. 3 Credit Hours.

Public relations management principles are applied to solve organizational problems and maximize opportunities. Study of trends in public relations and issues management. An applied project will enable students to use the skills taught in this course in order to address a variety of audiences, including investors, employees, the community, government, and consumers. Use of AP Style is required. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 4859.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Relations.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (PR 1496 or 'Y' in CRPR03), (PR 1552 or 'Y' in CRPR04), and (PR 3096 or 'Y' in CRPR08)

PR 4502. Innovations in Public Relations. 3 Credit Hours.

Innovations in Public Relations examines how technological advancements and issues associated with them are impacting the field and communication with publics. The course focuses on potential significant changes in the way public relations professionals create messages and use storytelling to influence attitudes and behaviors. These changes include areas such as artificial intelligence, deep fake technology, social media and disinformation. This course also addresses the ethical issues related to these changes.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (PR 3096 or 'Y' in CRPR08), (PR 3101 or 'Y' in CRPR09), (PR 3201 or 'Y' in CRPR10), (PR 3202 or 'Y' in CRPR11), PR 3301, (PR 3302 or 'Y' in CRPR12), and PR 3587 (may be taken concurrently)

PR 4571. International Studies in Media and Communication. 1 to 6 Credit Hour.

This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. Available only to student participating in a Klein GO! Program.

Repeatability: This course may be repeated for additional credit.

Real Estate (RE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

RE 3501. Real Estate Fundamentals. 3 Credit Hours.

A survey of real estate transactions, financing, marketing, land use control, and theories of urban development. Designed to acquaint the student with the language, principles, and laws that govern the real estate enterprise. The underlying concepts of land, property rights and the means, methods, and laws that govern the conveyance of these rights. NOTE: This course is required for the Real Estate Licensing examination.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Community Development, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

RE 3502. Real Estate Practice. 3 Credit Hours.

Required for the Real Estate Licensing examination, this course will explore the laws relating to the creation and transfer of interests in land including the Agreement of Sale, deeds and leases. It will also discuss the recording system for deeds, mortgages, title searches and title insurance, financing, the appraisal process, closing procedures for residential and commercial real estate, the Real Estate Settlement Procedures Act, listing agreements, and the licensing law for real estate brokers and salespersons. NOTE: This course is required for the Real Estate Licensing examination.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Community Development, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

RE 3524. Residential Property Management. 3 Credit Hours.

Residential real estate management refers to the process and procedures that are designed to generate income for its owners and preserve and increase the value of the owner's investment. This process requires a plethora of activities that includes drafting and implementing a Property Management Plan, and securing and interacting with tenants. The value of the investment is protected not only by insurance, maintenance procedures and high occupancy rates but by avoiding legal controversies and costly litigation. Engaging in these activities requires a working knowledge of the law relating to advertising the property, a knowledge of the many rights and duties of the owner, manager, and tenants that are found in landlord-tenant law and various anti-discrimination statutes, regulations and judicial opinions that are found at the federal, state and local levels. A significant percentage of Americans today reside in common interest communities, homeowner and condominium owner associations, and every association is ordinarily managed by a residential property manager.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

RE 3525. Management of Corporate Real Estate Assets. 3 Credit Hours.

Corporate real estate refers to the real property facilities that house the business activities of corporate and other business organizations. Business organizations may own or lease such real property facilities. These facilities support the business function of the organization, whether those functions be industrial production, warehousing, retail, or other functions that form the nature of the organization. The management of corporate real estate assets involves not only acquiring, maintaining, and disposing of the facilities, but also adding value to the business through efficient planning and utilization of worksites, control of operating expenses, enactment of sustainability measures, and compliance with local, state, and federal statutes and regulations including, for example, the Americans with Disabilities Act, the Fair Housing Act, the Clean Water Act, and the Clean Air Act. The management of corporate real estate assets should also include appropriate planning for natural disasters such as fire, earthquake, tornado, and flood. Corporate real estate is an investment on its own, and it needs to be understood as a distinct part of a business enterprise the management of which requires an independent management function.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

Recreational Therapy (RCTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

RCTH 0813. Disability Identity in Contemporary Society. 3 Credit Hours.

The purpose of the course is to examine the individual, social, and environmental structures (e.g., family, school, government, community) that help to shape the identity of persons with various types of disability in contemporary society. Concomitantly, the course will explore how the behavior of persons with a disability influences these structures through individual contributions or participation in self-advocacy and activism (e.g., disability rights legislation, technology development, media portrayal). By considering disability identity as a function of continuous (and changing) interactions among various individual, social, and environmental forces, the course will encourage students to question stereotypes, to develop a critical understanding of the factors that influence the experiences of disability, to acknowledge the rich contributions of the disability community, and to identify the mechanisms that empower rather than confine people. This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

RCTH 1102. Inclusive Recreation and Sports Services. 3 Credit Hours.

This course focuses on the organization and delivery of recreation and sport services to individuals with disabilities. Content includes principles and procedures for promoting inclusive community leisure services. Hands-on learning through volunteer experience is required. NOTE: Required of all students majoring in Recreational Therapy (recommended for other majors involved in human services; in particular, services to persons with disabilities or health limitations).

Repeatability: This course may not be repeated for additional credits.

RCTH 1902. Honors Inclusive Recreation and Sports Services. 3 Credit Hours.

This course focuses on the organization and delivery of recreation and sport services to individuals with disabilities. Content includes principles and procedures for promoting inclusive community recreation services. In addition to class expectations, students must complete 15 professional development hours supporting people with disabilities in recreation/sports events. Opportunities will be posted on Canvas and announced in class. Five hours are required before midpoint and the additional ten are required during the second half of the semester. This course is required of all students majoring in recreational therapy and open for students who are not majoring in recreational therapy. This course may not be repeated for additional credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

RCTH 2103. Foundations of Recreational Therapy Practice. 3 Credit Hours.

This course is an introduction to the historical and conceptual roots of recreational therapy (RT) and its contemporary status as a profession. Content includes the understanding and application of recreation and leisure to improve health and well-being, introduction to recreational therapy service delivery models and theories, knowledge of where recreational therapy is practiced, RT standards of practice, ethics and professional organizations, fieldwork requirements, and credentialing procedures.

Repeatability: This course may not be repeated for additional credits.

RCTH 2104. Recreational Therapy Modalities. 3 Credit Hours.

In this experiential course, students are exposed to an assortment of activity-based interventions used in recreational therapy practice. Modalities to which students are introduced include but are not limited to animal-assisted therapy, reminiscence, humor, sports, expressive arts, anger management, social skills, and stress management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HRPR 1001 or 'Y' in CRHR01), (SBS 2103 or 'Y' in CRSB05), and (PSY 1061, PSY 1001, 'Y' in PSY1, or 'Y' in CRPS01)

RCTH 2201. Recreational Therapy and Developmental Disabilities. 3 Credit Hours.

This course allows students to explore the role of recreation in the habilitation, rehabilitation and inclusive community life of individuals with developmental disabilities. Students are introduced to the principles and methods of service delivery based on person-centered planning, transitional life skills, community reintegration and inclusion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 1102, THRC 1102, or 'Y' in CRRC01) and (RCTH 3096, THRC 3096, or 'Y' in CRRC02)

RCTH 2203. Assistive Technology in Recreation. 3 Credit Hours.

This course introduces students to the range of assistive devices used by persons with disabilities to support active involvement in preferred recreation and leisure pursuits. The course reviews the physical, cognitive, social and environmental barriers to participation and how AT devices and services can empower participation. Students learn to create and adapt activity materials to accommodate varying functional abilities and how to use assistive devices, including adaptive sports equipment, tools that support daily living, devices for computer access, hearing and vision loss devices and communication strategies. The course is hands-on, and project based. NOTE: Course is open to all majors and is appropriate for those students interested in working with individuals with disabilities.

Repeatability: This course may not be repeated for additional credits.

RCTH 2205. Adventure Challenge/Programming. 3 Credit Hours.

This course will benefit all students interested in developing experiential leadership skills and is open to all majors. The course introduces students to theoretical and practical approaches to using experiential learning and adventure therapy techniques in various professional settings. Students move through a progression of team-building activities and are taught core leadership skills required when facilitating adventure-based activities for persons of all abilities. Instruction will take place at indoor and outdoor facilities, including the Ambler Challenge Course Lab. Upon successful completion of the course, students will receive 20 training hours and 10 facilitation hours that they may use towards advanced training/certification. More details regarding the development and maintenance of a facilitator portfolio will be provided in the course.

Repeatability: This course may not be repeated for additional credits.

RCTH 3096. Assessment and Documentation in Recreational Therapy. 3 Credit Hours.

In this course, students learn the clinical process used by healthcare professionals when working in health and human service agencies with particular emphasis on assessment and documentation as it relates to the discipline of recreational therapy. Students learn clinical skills related to client intake and assessment, treatment planning, and documentation. NOTE: Special authorization is required for non-majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Recreational Therapy, Therapeutic Recreation.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223, 'Y' in KIN1, or 'Y' in CRKI02) and (RCTH 2103 or THRC 2103)

RCTH 3111. Health Promotion through Leisure Education. 3 Credit Hours.

In this course, students examine the relationship between health promotion and leisure behavior for individuals with disabilities. Students learn to design programs for health promotion and leisure education. The use of technology to develop health promotion teaching materials is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 2103 or THRC 2103) and (RCTH 2104, THRC 2104, or 'Y' in CRRC03)

RCTH 3185. Internship I in Recreational Therapy. 3 Credit Hours.

This course involves a 150-hour field placement experience at a health and/or human service agency in which students are involved with ongoing recreational and therapeutic programs and services. NOTE: Students are required to obtain child abuse and criminal clearance background checks and complete the College of Public Health's health screenings by the deadline date set by the level I internship fieldwork coordinator PRIOR to beginning field placement experience.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Recreational Therapy.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (HRPR 1001 or 'Y' in CRHR01), HRPR 2103, (KINS 1223 or 'Y' in CRKI02), (PSY 1001 or 'Y' in CRPS01), (SOC 1167 or 'Y' in CRSO02), (PSY 2201 or 'Y' in CRPS03), and (PSY 2301 or 'Y' in CRPS04)

RCTH 3201. Health, Activity, and Aging. 3 Credit Hours.

This course examines the concept of healthy aging and how to utilize a variety of physical, cognitive, social and emotion-based activities to maintain health throughout the lifetime. Students will also take a deep look at current issues and trends in senior care settings, with an emphasis placed on community-based care and the concept of "aging in place."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Recreational Therapy, Therapeutic Recreation.

Repeatability: This course may not be repeated for additional credits.

RCTH 3202. Recreational Therapy and Mental Health. 3 Credit Hours.

Students examine the role of recreational therapy in behavioral healthcare in this course. Content includes terminology, etiology, and care of individuals with acute and chronic mental illnesses and the importance of recreation as a coping resource and component of life quality. Issues associated with relapse prevention and the role and function of recreational therapists within the healthcare team are discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 3096, THRC 3096, THRC 3101, or 'Y' in CRRC02)

RCTH 3282. Independent Study. 1 to 3 Credit Hour.

In this course, students undertake supervised independent projects on issues related to health, leisure, and disabilities.

Repeatability: This course may be repeated for additional credit.

RCTH 3801. Physical and Neurological Health Conditions Across the Lifespan. 3 Credit Hours.

This course examines the prevalence, etiology, pathology, prognosis, characteristics, and complications of various physical and neurological health conditions across the lifespan. Common assessment findings and approaches to recreational therapy client-centered evidence-based treatment for each health condition will be reviewed within an application format.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in RCTH 2103.

RCTH 3802. Developmental Disabilities and Mental Health Conditions Across the Lifespan. 3 Credit Hours.

This 3-credit course allows students to explore the prevalence, etiology, prognosis, characteristics and complications of various developmental disabilities and mental health conditions. In addition, students will analyze the role of habilitation, rehabilitation and inclusive community life of individuals with developmental disabilities and mental health challenges. Students are introduced to the principles and methods of services delivery based on person-centered planning, transitional life skills, and community integration/reintegration, and inclusion. Knowledge and skills acquired will prepare students to deliver recreational therapy to these populations in in-patient and community-based settings.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in RCTH 2103.

RCTH 4000. Special Topics in Disabilities, Recreation and Leisure. 3 Credit Hours.

The Recreational Therapy Special Topics course is designed for students studying any major and is designed to emphasize current trends and contemporary topics of interest regarding individuals with varying disabilities and their engagement in recreation and leisure. Topics will vary by semester.

Repeatability: This course may be repeated for additional credit.

RCTH 4102. Research and Evaluation in Recreational Therapy. 3 Credit Hours.

This is the capstone course for Recreational Therapy majors. It is designed to enable students to evaluate and interpret research and to apply the results of these interpretations to recreational therapy practice in the form of evidence-based practice. Students learn fundamental research terminology and procedures including the strengths and limitation of both naturalistic and positivistic research methods utilized in field-based settings. Extensive reading and critiquing of empirical research is required for successful completion.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Recreational Therapy, Therapeutic Recreation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in RCTH 3185 and (RCTH 3096, THRC 3096, THRC 3101, or 'Y' in CRRC02)

RCTH 4103. Professional Issues in Recreational Therapy. 3 Credit Hours.

This is a seminar course designed to allow students to explore personal and professional issues related to completing their academic experience. Students evaluate their readiness to begin practicing as recreational therapists. Topics include certification, professional ethics, liability and law, finance and fiscal accountability, safety and risk management issues, professional involvement and responsibilities, and client advocacy. Students review and refine their professional portfolios, practice interviewing skills, and discuss issues related to continuing education and growth as a healthcare provider.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in RCTH 3185.

RCTH 4111. Administration of Recreational Therapy. 3 Credit Hours.

This course provides students in recreational therapy an opportunity to explore the dimensions of managing recreational therapy services within health care and human services agencies. Students will investigate basic theories of management and organizational behavior and relate them to the criteria established by different regulating agencies. The processes of recruitment, hiring, and retention will be addressed with emphasis on interviewing skills and orientation planning. Students will explore issues related to operational management including fiscal concerns and marketing. In addition, consumer management concerns and clinical supervision tasks will be identified and connected to all other aspects of management. Finally, ethics and evaluation processes will be discussed. NOTE: This course is for majors only.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Co-requisites: RCTH 4185.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 3196 or THRC 3196) and (RCTH 4196 or THRC 4196)

RCTH 4185. Internship II in Recreational Therapy. 12 Credit Hours.

This course is a semester-long, 600-hour field placement where students apply academic learning to demonstrate competencies associated with entry-level practice in recreational therapy. NOTE: Requires current certification in first aid and CPR. Pre-placement health screening, child abuse and criminal clearances are also required prior to the start of the internship experience by the deadline date set by the senior internship coordinator. See the senior internship coordinator for details.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Co-requisites: RCTH 4111.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (RCTH 3196 or THRC 3196) and (RCTH 4196 or THRC 4196)

RCTH 4196. Recreational Therapy Clinical Procedures. 3 Credit Hours.

This course allows students to further their understanding of clinical practice in recreational therapy through an examination of how recreation therapists use activity-based interventions, the environment, and therapeutic relationships to facilitate individual and group behavioral change. Students design protocols for intervention groups and simulate leadership techniques used by recreational therapists in clinical practice. Field-based application of group planning and leadership is required.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 3096, THRC 3096, or 'Y' in CRRC02)

RCTH 4205. Recreational Therapy in Geriatric Service Settings. 3 Credit Hours.

This course is designed to provide an overview of settings that provide services for the geriatric population. The course examines current techniques and philosophies toward recreational therapy programming for individuals utilizing such services. The students are required to visit, observe, and complete assignments with elders in geriatric service settings throughout the semester. The observation and hands-on experience support student learning and create opportunities to interact with elders. The course examines techniques, issues, and best practices related to conducting innovative and effective programs for elders in a variety of settings, as well as discussing the current trends and obstacles for delivery of services.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 3096, THRC 3096, THRC 3101, or 'Y' in CRRC02)

RCTH 4211. Recreational Therapy and Physical Disabilities. 3 Credit Hours.

This course provides the student with an opportunity to become familiar with the etiology, characteristics, and complications of various disabling conditions. Common assessment findings and approaches to treatment for each disability will be reviewed, as well as the role of the recreational therapist within the rehabilitation and health promotion process. Issues associated with independent living and the implications for the role and function of recreational therapists within the rehabilitation team are addressed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RCTH 3096, THRC 3096, THRC 3101, or 'Y' in CRRC02)

RCTH 4213. Therapeutic Play, Recreation and Children's Health. 3 Credit Hours.

This course examines the range of organized and structured play and recreation services used by multidisciplinary professionals to promote the health, holistic well-being, and social inclusion of children. Using the social model of disability (ICF) as the conceptual framework, students will examine the influence of the physical and social environment (family, peers) on health and well-being, as well as varied therapeutic uses of play and recreation that foster resilience and recovery and promote social-emotional development and community inclusion. The course is used to link developmental needs of children with services provided in varied service delivery settings, including hospitals, residential treatment centers, schools, camps, public parks, and recreation departments. The psychosocial needs and experiences of children resulting from trauma, abuse, and varied chronic illnesses and disabling conditions (e.g., cerebral palsy, autism spectrum disorders, conduct disorders, and ADHD) are reviewed. Note: Prior to Spring 2024, the course title was "Recreational Therapy and Pediatric Healthcare."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (PSY 2301, 'Y' in PSY3, EDUC 1322, or 'Y' in CRPS04)

Religion (REL)

REL 0802. Race & Identity in Judaism. 3 Credit Hours.

Investigate the relationship between race and Judaism from Judaism's early period through today, looking both at how Jews have understood their own racial identity and how others have understood Jews' racial identity. You will explore the idea of racial identity in Judaism in order to examine the complex network of connections between racism and anti-Semitism, as you read primary and secondary texts in Jewish philosophy and history and in the study of race and racism. We hope to illuminate these complex issues as well as to engage with them on a personal and political level, examining the relationship between issues of race, religion, identity, and social justice and injustice, and inquiring into how we, as informed citizens in a global society, can affect change for the better. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Jewish Studies 0802/0902 or Religion 0902.

Course Attributes: GD, SF

Repeatability: This course may not be repeated for additional credits.

REL 0811. Asian Behavior & Thought. 3 Credit Hours.

This course is an introduction to some of the major philosophical and religious traditions of Asia, and their roles in Asia and the world today. You will learn about some of the dominant features of these traditions and be exposed to several important ideas, institutions, and practices. How do these ideas influence the behavior of individuals and communities? How do individual and communal behaviors and beliefs differ regionally and historically? We will read and discuss selections from primary works as well as secondary scholarship, while surveying key doctrines and historical developments. Note: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ASST 0811, CRIT 0811, PHIL 0811, CHI 0811, JPNS 0811 or REL 0911.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

REL 0833. Race & Poverty in the Americas. 3 Credit Hours.

The transatlantic slave trade was one of the most brutal and momentous experiences in human history. Attitudes toward Latino, Caribbean, African, and Asian immigrants in the United States today can only be fully understood in the contexts of slavery and the "structural racism," "symbolic violence" (not to mention outright physical violence), and social inequalities that slavery has spawned throughout the region. Although focusing primarily on the United States, we will also study the present entanglements of poverty and race in Brazil, Haiti, and other selected nations of "The New World," placing the U.S. (and Philadelphia in particular) experience in this historical context. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed REL 0933, LAS 0833/0933, ANTH 0833, or SOC 0833.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

REL 0863. Religion in the World. 3 Credit Hours.

Learn about the major religious traditions found worldwide today: Hinduism, Buddhism, Judaism, Christianity, Islam, and several indigenous traditions. Examine the beliefs, practices, and values of these groups in order to understand the worldviews and ways of life of the people who practice them. Our interdisciplinary analysis and interpretation of specific examples of religious experience will help shed light on the overall meaning of religion and human existence. We will carefully consider examples while also focusing on particular thematic issues, like cosmology and ritual. Develop appreciation for the religious vibrancy and diversity that exist in human cultures while you actively engage in the learning process through class presentation, class participation, paper-writing, and a self-selected field trip. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Religion 0863, 0963, 1101, C053, Asian Studies 0863, Critical Languages 0863, or Philosophy 0863.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

REL 0876. Religion in Philadelphia. 3 Credit Hours.

The argument is sometimes made that religion in dense urban spaces is characteristically very different from religion as it appears elsewhere. A study of religion in Philadelphia provides numerous ways to explore that idea, especially since the city encompasses a variety of ethnic and immigrant groups, encouraging the generation of new and hybrid forms of religious life that are less possible in smaller populations. Learn how ideas of toleration and freedom, the urban environment, and immigration helped to define the role of religion in the life of this city. Study various religious traditions as they are manifested in the greater Philadelphia area and look at the influences religion has had on the fabric of Philadelphia's history and cultural life including politics, art, education, journalism and popular culture. You will visit and write about various religious sites and institutions. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Duplicate Credit Warning: Students cannot receive credit for Religion 0876 if they have successfully completed Religion 0976, 1003, 1903, C052, H092, History 0876 or 0976.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

REL 0902. Honors Race & Identity in Judaism. 3 Credit Hours.

Investigate the relationship between race and Judaism from Judaism's early period through today, looking both at how Jews have understood their own racial identity and how others have understood Jews' racial identity. You will explore the idea of racial identity in Judaism in order to examine the complex network of connections between racism and anti-Semitism, as you read primary and secondary texts in Jewish philosophy and history and in the study of race and racism. We hope to illuminate these complex issues as well as to engage with them on a personal and political level, examining the relationship between issues of race, religion, identity, and social justice and injustice, and inquiring into how we, as informed citizens in a global society, can affect change for the better. (This is an Honors course.) NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Jewish Studies 0802/0902 or Religion 0802.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SF

Repeatability: This course may not be repeated for additional credits.

REL 0911. Honors Asian Behavior & Thought: Four Asian Models Shaping Your Action. 3 Credit Hours.

We incessantly engage ourselves in doing things. We are beings-at-doing. We define ourselves by the kind of actions we perform. How we act or conduct ourselves is shaped by the kind of self we construct for ourselves. And that self is shaped by the society into which we happen to be born. Self-identity, which is socially and culturally constructed by our experiences and interactions with others, carries a personal as well as an interpersonal meaning. Learn the four Asian paradigmatic cases of self-identity and examine your self in light of them. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ASST 0811, CRIT 0811, PHIL 0811, Chinese 0811, Japanese 0811 or Religion 0811.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

REL 0933. Honors Race & Poverty in the Americas. 3 Credit Hours.

The transatlantic slave trade was one of the most brutal and momentous experiences in human history. Attitudes toward Latino, Caribbean, African, and Asian immigrants in the United States today can only be fully understood in the contexts of slavery and the "structural racism," "symbolic violence" (not to mention outright physical violence), and social inequalities that slavery has spawned throughout the region. Although focusing primarily on the United States, we will also study the present entanglements of poverty and race in Brazil, Haiti, and other selected nations of "The New World," placing the U.S. (and Philadelphia in particular) experience in this historical context. (This is an Honors course.) NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed REL 0833, LAS 0833/0933, ANTH 0833, or SOC 0833.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

REL 0957. Honors Sport & Leisure in American Society. 3 Credit Hours.

In this course, we explore the complexity and diversity of American society through the study of sport and leisure. How does the way we play or watch sports reflect, and contribute to, American values? We will also pay careful attention to the globalization of sport and the role of U.S. sports in the world today. Issues of religion, race, ethnicity, gender, age, disability, and socio-economic class will be prominently featured. There will also be a primary focus on raising ethical questions through a discussion of case studies based on real events. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AAAS 0857, AAS 0857, SOC 0857 or STHM 0857.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

REL 0963. Honors Religion in the World. 3 Credit Hours.

Learn about the major religious traditions found worldwide today: Hinduism, Buddhism, Judaism, Christianity, Islam, and several indigenous traditions. Examine the beliefs, practices, and values of these groups in order to understand the worldviews and ways of life of the people who practice them. Our interdisciplinary analysis and interpretation of specific examples of religious experience will help shed light on the overall meaning of religion and human existence. We will carefully consider examples while also focusing on particular thematic issues, like cosmology and ritual. Develop appreciation for the religious vibrancy and diversity that exist in human cultures while you actively engage in the learning process through class presentation, class participation, paper-writing, and a self-selected field trip. Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

REL 1001. Religion and Society. 3 Credit Hours.

Religion and Society serves as the introductory course that all majors and minors in Religion must take. This course deals with such issues as: What is the nature of religion? What impact does it have on personal identity, social life, and political structures? What ethical issues arise out of the tensions between religion and society? Emphasis on contemporary Western society and forms of religion. Some historical background provided. NOTE: This course can be used to satisfy the university Core Individual & Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

REL 1002. Racial Justice: A Religious Mandate for Obedience and Revolt. 3 Credit Hours.

This introductory course on race and religion examines the emergence and development of religious faith and social protest thought, in order to propose critical options that foster emancipatory practices in the contemporary struggle for racial justice. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

REL 1003. Religion in America. 3 Credit Hours.

A historical and sociological study of practices and beliefs of various religious groups that have shaped American culture, with special attention to ethnic and racial minorities, and to women, as well as to traditional main-line groups and newer movements. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

REL 1101. Introduction to World Religions. 3 Credit Hours.

Introduction to the major world religions (Hinduism, Buddhism, Taoism, Confucianism, Judaism, Christianity, Islam) as a way of coming to know and appreciate the world-views of other cultures. Attention to beliefs, values, and practices of these religions as ways of dealing with the issues basic to human life. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

REL 1102. Introduction to Asian Religions. 3 Credit Hours.

Introduction to the major Asian religious, philosophical, and cultural traditions (Hinduism, Buddhism, Confucianism, Taoism, Shinto) with emphasis on the cultural roots of each religious tradition, the analysis of its principal teachings and practices, and the major cultural expressions in religious art, ritual, poetry, music, and scriptures. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

REL 1902. Honors Introduction to Asian Religions. 3 Credit Hours.

Introduction to the major Asian religious, philosophical, and cultural traditions (Hinduism, Buddhism, Confucianism, Taoism, Shinto) with emphasis on the cultural roots of each religious tradition, the analysis of its principal teachings and practices, and the major cultural expressions in religious art, ritual, poetry, music, and scriptures. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

REL 1903. Honors Religion in America. 3 Credit Hours.

A historical and sociological study of practices and beliefs of various religious groups that have shaped American culture, with special attention to ethnic and racial minorities, and to women, as well as to traditional main-line groups and newer movements. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AC, HO

Repeatability: This course may not be repeated for additional credits.

REL 2000. Topics in Religious Studies I. 3 Credit Hours.

The topic for this course changes each semester. Consult the instructor or an advisor in the Religion Department for specific details.

Repeatability: This course may be repeated for additional credit.

REL 2001. Women in Religion and Society. 3 Credit Hours.

A study of both the roles and understanding of women in major premodern and modern religious traditions, particularly of the West, including an investigation of the authoritative writings and practices of the various traditions.

Repeatability: This course may not be repeated for additional credits.

REL 2002. Religion and Human Sexuality. 3 Credit Hours.

The goal of this course is to examine the attitudes and practices of the major world religions regarding human sexuality. Topics to be covered will include marriage and procreation, and such controversial issues as abortion, homosexuality and sexual activity outside of marriage. Note: Religion and Human Sexuality is taught as a cross-listed course in Religion; Gender, Sexuality & Women's Studies; and LGBT Studies. Students may receive credit for only one of the following courses: REL 2002, LGBT 2002, GSWS 2202, WMST 2202.

Repeatability: This course may not be repeated for additional credits.

REL 2003. Religion and the Arts. 3 Credit Hours.

This course is designed to explore the nexus of Religion and Art both philosophically and aesthetically. Various theories of aesthetics will be analyzed and compared. Focuses on the artistic expression of theological themes in a given religious tradition. Students explore the varieties of art in that tradition, learning to recognize the plastic (architecture, sculpture, metal), visual (painting, glass, fabric), and musical art forms. Analyzing how these forms function in prayer, liturgy, and theology is of primary importance. In addition, the fundamental questions of how the religion deals with the tension between iconic/aniconic, eternal/finite, and divine/human are covered. Course also deals with what religious art "means" in a secular context. [Duplicate Credit Warning: The prior number for this course was Religion 4002; students who successfully completed that version of the course will not earn additional credit for this version.]

Repeatability: This course may not be repeated for additional credits.

REL 2005. Religion and Sports. 3 Credit Hours.

This course is an introduction to religion and sport that explores whether sport is a kind of religion, how different religious traditions have both connected to and conflicted with sports, and religious responses to ethical dilemmas in sports. It approaches these questions through an examination of case studies. Students will be expected to attend and participate in class, do weekly readings and activities based on the cases, and research and create cases of their own. There will be a final take-home examination. Note: Students who have already taken REL 2905 will not receive duplicate credit for REL 2005.

Repeatability: This course may not be repeated for additional credits.

REL 2006. Death and Dying. 3 Credit Hours.

This course focuses upon dying and bereavement in today's cultural and medical environment, and then on death, mourning and immortality from the perspectives of the world's religious traditions. We will examine psychological, ethical and philosophical perspectives on the process of dying, care for the dying, and issues of mourning. What are the principle beliefs and practices about personal identity, the nature of God or ultimate reality, death and post-death existence?

Repeatability: This course may not be repeated for additional credits.

REL 2007. Religion in Film. 3 Credit Hours.

This course will approach the features and problems of Religion in Eastern and Western societies through the medium of film and/or film as a medium for performing religion. The course, depending on who teaches, will ask students to consider the relationships among and between film, ritual, belief, myth, and communal engagement even as it looks at how specific traditions are depicted on screen. Students will view works by filmmakers representing a global spectrum and examine how these films provide insights into these larger issues regarding popular culture, art, performance and specific religious traditions and societies. Students will be required to watch one film per week (on their own time; films will be made available via DVD on reserve or through special internet streaming resources); this will be accompanied by two regular class sessions where the film, assigned readings and the range of critical issues regarding the film's connection to world religious traditions will be discussed. The goal of the course is to provide students with the intellectual tools to "read" films as vehicles for social and religious expressions, and to come to a more thorough understanding of how experiences and perceptions cross various cultural and religious boundaries.

Repeatability: This course may not be repeated for additional credits.

REL 2008. Religion in America. 3 Credit Hours.

A historical and sociological study of practices and beliefs of various religious groups that have shaped American culture, with special attention to ethnic and racial minorities, and to women, as well as to traditional main-line groups and newer movements.

Repeatability: This course may not be repeated for additional credits.

REL 2101. Indian Philosophies and Religions. 3 Credit Hours.

An introduction to the foundations, the nature, and the principles of classical Hinduism. An introduction to the fundamentals of Buddhism and Jainism. (Formerly known as Religions of India.) Note: This course is cross-listed with Asian Studies 2101. Students may only receive credit for one of these courses: ASST 2101 or REL 2101.

Repeatability: This course may not be repeated for additional credits.

REL 2102. Introduction to Buddhism. 3 Credit Hours.

Introduction to the historical development of Buddhism in relation to other East Asian religions. Topics include the Four Noble Truths of basic Buddhism and the Hinayana-Mahayana controversy over the Buddhist Dharma and practice, as well as the development of Buddhist thought throughout Asia. Note: This course is cross-listed with Asian Studies 2102. Students may only receive credit for one of these courses: ASST 2102 or REL 2102.

Repeatability: This course may not be repeated for additional credits.

REL 2201. Chinese Religions - Confucius to Mao. 3 Credit Hours.

Critical study of the development of Chinese religions from the time of Confucius to Mao, including the problem of ideological continuity in contemporary China (Maoist Marxism versus Confucianism). Note: This course is cross-listed with Asian Studies 2201. Students may only receive credit for one of these courses: ASST 2201 or REL 2201.

Repeatability: This course may not be repeated for additional credits.

REL 2301. Zen Buddhism. 3 Credit Hours.

This course surveys the historical development of Zen Buddhism as it unfolds in India, China, and Japan, and focuses on the examination of the nature of satori experience. It analyzes its existential meaning from perspectives of therapy, Zen practice, and philosophy. NOTE: Formerly titled "Introduction to Zen Buddhism." Students who earned credit under its original title will not receive additional credits for this course. Also, this course is cross-listed and students will earn credit only once for either REL 2301 or ASST 2301.

Repeatability: This course may not be repeated for additional credits.

REL 2401. Religion in the Ancient Near East. 3 Credit Hours.

This course will explore the religion of the pre-Biblical Near East. We will read texts from Akkadian, Egyptian, Ugaritic, Phoenician, and Mesopotamian cultures and civilizations. Special emphasis will be put on the differences and competing aspects of these religions with Israelite religion.

Repeatability: This course may not be repeated for additional credits.

REL 2403. Introduction to Judaism. 3 Credit Hours.

Introduction to the variety of rituals, customs, and practices of the Jewish people in a historical context. Compares and contrasts liberal and traditional Jewish religion with Zionism. Contemporary Jewish novels, poetry, and drama. Note: Formerly titled "What is Judaism." Students who earned credit under the prior title will not receive additional credits for this course. This course is equivalent to JST 2403; students may receive credit for either JST 2403 or REL 2403.

Repeatability: This course may not be repeated for additional credits.

REL 2407. The Body and The Bible. 3 Credit Hours.

This course will explore how the Hebrew Bible and other ancient Near Eastern literature use the body to conceptualize issues of ethnicity, gender, sexuality, age, disability, social class, religious expression and so on. Other issues considered in this course include the portrayal of divine bodies, the social, cultic, and literary significance of bodily changes and practices, the costuming of the body, disguising one's appearance, and passing as a member of another identity group. We will examine a number of these issues both in their ancient Near Eastern context and throughout the history of biblical interpretation. The course will be structured around readings of both recent biblical scholarship on these topics and the biblical texts discussed in this scholarship.

Repeatability: This course may not be repeated for additional credits.

REL 2447. Kabbalah and Mysticism. 3 Credit Hours.

Introduction to the basic concepts, worldview and psychology of the Kabbalah. Mystical experiences and spiritual practices of the Kabbalists are situated within the context of comparative mysticism.

Repeatability: This course may not be repeated for additional credits.

REL 2496. Introduction to the Bible. 3 Credit Hours.

Introduction to the Hebrew Bible (Old Testament). What is the Bible? Where did it come from? How can there be so many different interpretations of the Bible? This course provides an examination of the historical, archeological, literary, and religious backgrounds of the Old Testament. This course is designed as a Writing Course for the University, so the assignments will reflect the writing requirements.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

REL 2501. Early Christian Literature: New Testament, Gnostic Tracts, and Early Fathers. 3 Credit Hours.

This class explores the rich and diverse literature of Early Christianity, as Christianity emerged in the social/religious context of second Temple Judaism in the Roman Empire and in Palestine in the first century, when Jesus was born. Students will study the entire spectrum of early Christian literature, including the New Testament as well as other views of Jesus in Gnostic tracts. We will also talk about various writings of first century Fathers of the Church that did not make it into the New Testament, such as the letters of Clement and Barnabas. As such the class covers both literary and historical topics of the first and early second century when Christianity emerged in the Roman world. (Former course title: Introduction to New Testament)

Repeatability: This course may not be repeated for additional credits.

REL 2502. Jesus in the Media. 3 Credit Hours.

This class will explore the ever-changing identity of Jesus in both academic and popular culture. The class will study Jesus in the Gospels first, as a foundation for further analysis. The class then moves to the images of Jesus in various media today: award-winning novels, academic "Jesus" books, and films. We shall address these questions: who is Jesus for each one? why does each author/director emphasize different teachings or aspects of Jesus? what is their ultimate purpose? (Former course title: Jesus in the Gospels)

Repeatability: This course may not be repeated for additional credits.

REL 2596. What Is Christianity?. 3 Credit Hours.

The development of the Christian religion from the Bible to today. What are the principal beliefs of Christianity? How did they come to be so? What have been the major criticisms of Christianity? How can we understand the variety of Christian churches as they face the modern world?

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

REL 2602. Islam in America. 3 Credit Hours.

This course deals with Islam in the United States, including the history, practice, lifestyles, and experiences of American Muslims. Islam in America is presented in all its variety, with special attention to Philadelphia, which is a major center of American Islam. The contribution of both African American Muslim movements and recent immigrant Muslim groups is covered.

Repeatability: This course may not be repeated for additional credits.

REL 2606. Introduction to Islam. 3 Credit Hours.

A general survey of the religion of Islam, including history, beliefs, sacred texts (Qur'ân and Hadîth) and their interpretation, religious law, Sûfism, philosophy, art, and science. Particular attention also is given to actual Muslim practice and to Islam as a way of life.

Repeatability: This course may not be repeated for additional credits.

REL 2666. Zombie Apocalypse: Holy Land, Haiti, and Hollywood. 3 Credit Hours.

This course combines several academic disciplinary approaches to explore the intellectual and cultural histories of two highly influential and essentially religious ideas, that of the zombie and that of the apocalypse, and to critically trace their relatively recent merger in popular culture and imagination - as of 1968 - and to investigate that merger's significations about the human condition. The former is a rather modern idea rooted in Haitian Vodou and its African and European religious antecedents, while the latter is an ancient one rooted in Zoroastrianism and the Bible and widely expanded in Judaism, Christianity, and Islam, and is arguably one of the most influential ideas in world history. In the interim, the zombie has eclipsed the vampire and Frankenstein as the most prolific monster in popular American culture and consciousness, pervading video games, novels, novelties, the silver screen, and the touch screen. As such, the first two-thirds of the course will be comprised of biblical studies, African studies, Caribbean studies, and the sociology and history of religion, while the final third will trace the merger of the two ideas and their manifestation in popular culture, drawing upon readings in cultural studies, literary analysis, critical race theory, and cinema studies.

Repeatability: This course may not be repeated for additional credits.

REL 2701. Introduction to African American Religion. 3 Credit Hours.

Examines African American religion in the context of four periods of African American history: the exercise of slave religious leadership in the "invisible church"; during the post-Emancipation period (1863-1900), the development of institutionalized Black religion, that is, the Black church; in the period of northern immigration (1916-1945), the evolution of many aspects of Black liturgy - especially Black gospel music; and the civil rights struggle of the 1960s and '70s.

Repeatability: This course may not be repeated for additional credits.

REL 2702. Religion in Contemporary Africa. 3 Credit Hours.

This course draws upon leading scholarly literature on religion in post-colonial Sub-Saharan Africa. Substantive examples will be drawn from South Africa, Ghana, Senegal, Uganda, Rwanda, and Congo to understand the role of religion in the creation of and the struggle against poverty, political turmoil, civil war, and the AIDS epidemic.

Repeatability: This course may not be repeated for additional credits.

REL 2705. Anti-Semitism/Holocaust/Racism. 3 Credit Hours.

This course examines the history of antisemitism with a focus on the Holocaust and racism. It investigates the development and implementation of racial antisemitism in Germany and compares Nazi antisemitism with other forms of racism and antisemitism in Europe and America. The course also explores the social construction of race, the connection between antisemitism and anti-Zionism, the growth of neo-Nazism, the complex relationship between American Jews and African Americans, and racism in the world today. Be advised that students will only receive credit once for JST 2705, REL 2705, or HIST 2705.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

REL 2900. Honors Topics in Religious Studies I. 3 Credit Hours.

For description, see the Honors section of the course schedule of the semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

REL 2905. Honors Religion and Sports. 3 Credit Hours.

This course is an introduction to religion and sport that explores whether sport is a kind of religion, how different religious traditions have both connected to and conflicted with sports, and religious responses to ethical dilemmas in sports. It approaches these questions through an examination of case studies. Students will be expected to attend and participate in class, do weekly readings and activities based on the cases, and research and create cases of their own. There will be a final take-home examination. Note: Students who have already taken REL 2005 will not receive duplicate credit for the honors version.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

REL 2996. Honors Death and Dying. 3 Credit Hours.

Concepts, attitudes, and practices associated with death and dying in the major religious traditions and in literature, philosophy, and psychology. Contemporary implications for related fields such as medicine, psychiatry, social work, and education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

REL 3000. Topics in Religious Studies II. 3 Credit Hours.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

REL 3001. Earth Ethics. 3 Credit Hours.

What ethical relationship do human beings have to the natural world? What cultural and religious values, conceptions, and assumptions have shaped human interactions with the environment? Through also examining practical issues such as sustainability, technology, and urban living, students will assess individual life-styles and alternative visions of the good life on planet Earth. Note: This course is cross-listed with Environmental Studies 3001 and Asian Studies 3001. Students may only receive credit once for these courses: ASST 3001, ASST 3904, ENST 3001, ENST 3904, REL 3001, or REL 3904.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

REL 3002. Philosophy of Religion. 3 Credit Hours.

Issues in philosophy of religion, including the nature of religion, the relation between reason and faith, concepts of God and proofs of the existence of God, religious and mystical experience, the nature of religious language, the problem of evil, the relation of religion to morality, concepts of death and immortality, conflicting truth-claims of different religions, and interreligious dialogue.

Repeatability: This course may not be repeated for additional credits.

REL 3003. Religion and Psychology. 3 Credit Hours.

Course examines major psychological thinkers' views on religion's origins, functions, and meanings. What personality factors create and sustain religiousness? Some attention to the formation of new religious groups as well as individual spiritual life.

Repeatability: This course may not be repeated for additional credits.

REL 3004. Religion and Science. 3 Credit Hours.

This course offers a historical examination of the relationship of religion and science, leading up to current debates. A variety of views are considered, ranging from those who have viewed the relationship in terms of conflict, to those who see the two as operating in separate spheres, to those who believe that each influences the other in important and often beneficial ways.

Repeatability: This course may not be repeated for additional credits.

REL 3005. Martyrs and Suicides: Religion and Self-Chosen Death. 3 Credit Hours.

This course investigates the way religious traditions have both extolled and condemned self-chosen deaths, and how they have drawn lines that carefully distinguish the honorable and heroic from the cowardly, sinful, and crazy among those who choose their own deaths. This topic will be examined from within a variety of traditions, using a range of methods: theological, philosophical, historical, social scientific.

Repeatability: This course may not be repeated for additional credits.

REL 3011. Monks, Masters, and Magicians: Religion in Premodern Chinese Literature. 3 Credit Hours.

This course offers an introduction into the rich heritage of Chinese literature before 1911 with a focus on religious culture. We will follow Buddhist nuns and monks, Daoist masters and Confucian scholars on their adventures through 2000 years of Chinese history. Thematically, the class will focus on texts that show how Chinese religious traditions (Confucianism, Daoism, and Buddhism) were depicted in secular literature, but will also include narrative religious texts. From 3rd century miracle tales, to the classical novels of the Ming and Qing dynasty, we will look at Chinese religion through the lens of literature. Next to the readings themselves, we will cover more general aspects such as the relationship of literature to historical facts and notions of genre and motif as they apply to China. NOTE: Students will receive credit only once for either REL 3011 or ASST 3011.

Repeatability: This course may not be repeated for additional credits.

REL 3082. Independent Study. 3 Credit Hours.

Individual research project with a specific faculty member. Permission of the professor the student wishes to work with must be given in writing, and registration is completed in the Religion Department.

Repeatability: This course may be repeated for additional credit.

REL 3101. Yoga & Tantric Mysticism. 3 Credit Hours.

This course introduces the students to the history, philosophy, literature, and culture of Classical Indian Yoga and Tantra traditions. Note: This course is cross-listed with Asian Studies 3101. Students may only receive credit once for these courses: ASST 3101 or REL 3101.

Repeatability: This course may not be repeated for additional credits.

REL 3102. Buddhist Philosophy. 3 Credit Hours.

This course surveys philosophical dimensions of Buddhism. We will discuss several important issues that are raised in Buddhist texts and analyze their logic, implications, and relevance. Among the topics we will discuss are ontology (what is), epistemology (how we know), and normative ethics (what we should do), which in Buddhist terms gets expressed as: view, meditation, and action. Although there is no prerequisite for this course, this class will be demanding: you will be required to read and analyze primary texts in translation that are challenging and foreign (linguistically, conceptually, and philosophically). Since this course is thematically-driven, the readings draw from across time and space (i.e., the spectrum of the Buddhist world, historically and geographically). At the end of the course, we will do a close reading of a polemical twentieth-century text in order to look deeper into a single Buddhist philosophical tradition within a particular cultural and historical context. Active participation in this course will give you a general knowledge of Buddhist philosophy, as well as a taste of the complexity and diversity of Buddhist philosophical traditions.

Repeatability: This course may not be repeated for additional credits.

REL 3201. I-Ching, Tao, and Ch'an/Zen. 3 Credit Hours.

This course covers selected topics in the history of Taoist ideas and religious practice, which have broadly influenced China for two and a half millennia. Discussion topics include: symbols and divination; the philosophy of Lao-tzu and Chuang-tzu; the interaction between Taoism and Ch'an/Zen Buddhism; the Taoist/Ch'an influence on the Chinese literary tradition and ideals of beauty; the Taoist view on ch'i energy, meditation, sexuality, and the good life; and Taoism/Zen in America today. Note: This course is cross-listed with Asian Studies 3201. Students may only receive credit once for these courses: ASST 3201 or REL 3201.

Repeatability: This course may not be repeated for additional credits.

REL 3222. Sociology of Religion. 3 Credit Hours.

This course examines the role of religion in constructing human realities. It emphasizes how human understandings of the world and of reality are constructed socially through collective action with religion playing a prominent role. It looks at how religion influences individual and collective action; the intersection of religion with politics and media; religion's connection to race, gender, class, and sexual orientation; and the connection between religion and science.

Repeatability: This course may not be repeated for additional credits.

REL 3301. Japanese Religions. 3 Credit Hours.

An introduction to Japanese religions, their origins and development in the social, cultural, and intellectual history of Japan. Religions covered are: Shinto, Japanese Buddhism, folk religions, Japanese Confucianism, and the New Religions. Some attention to the expression of Japanese spirituality in the fine arts, martial arts, festivals, and rituals.

Repeatability: This course may not be repeated for additional credits.

REL 3302. Japanese Buddhism. 3 Credit Hours.

This course is an introduction to Japanese Buddhism, covering some of the major Buddhist figures including Kukai, Dogen, Shinran, Hakuin, Takuan, and Myoe. In order to understand how Japanese Buddhism accepted Indian and Chinese Mahayana Buddhism, the course traces some of the prominent conceptual frameworks of Mahayana Buddhism which were developed in India and China. The methodological orientation of the course is philosophical or intellectual. NOTE: Students will receive credit only once for either REL 3302 or ASST 3302.

Repeatability: This course may not be repeated for additional credits.

REL 3403. Biblical Archaeology. 3 Credit Hours.

An introduction to the history, theory, and methods of Near Eastern Archaeology and its relation to Biblical Studies. Tracing the history of Biblical Archaeology from its roots in the treasure hunters of the 18th century down to the present, we will examine the changing philosophy of archaeology, and the evolving techniques of excavation, by studying several sites and archaeologists.

Repeatability: This course may not be repeated for additional credits.

REL 3405. Judaism and Literature. 3 Credit Hours.

Readings of various Jewish literatures focusing on America and issues of immigration and cultural assimilation.

Repeatability: This course may not be repeated for additional credits.

REL 3411. The Philosophies of Judaism. 3 Credit Hours.

Close study of works by one or more Jewish and political philosophers, stressing their relevance to an understanding of contemporary politics and issues of Jewish identity, culture, and religion.

Repeatability: This course may not be repeated for additional credits.

REL 3502. Global Pentecostalism. 3 Credit Hours.

The meteoric rise of Pentecostalism throughout the world in the twentieth and twenty-first centuries has been so impressive that some scholars speak of it as a "new Reformation." This course is a comparative historical and anthropological investigation of this important development in world Christianity, with specific substantive units of analysis drawn globally and locally; i.e., from Africa, Asia, and Latin American and from Philadelphia.

Repeatability: This course may not be repeated for additional credits.

REL 3601. The Islamic State. 3 Credit Hours.

This course examines both the classical theory and modern theory and practice of self-described Islamic states in the modern world. Main focus is on the Middle Eastern area.

Repeatability: This course may not be repeated for additional credits.

REL 3602. Women in Islam. 3 Credit Hours.

This course will explore the issues confronting women in the religion of Islam and how the surrounding cultures, Indian, Arab, Egyptian, American, Eastern European, Indonesian, African (to name a few) react to these issues. Topics of Feminism, Imperialism, Westernization, and endemic religious culture will organize the course. The syllabus will include Islamic female and male authors on these topics.

Repeatability: This course may not be repeated for additional credits.

REL 3603. Islamic Mysticism. 3 Credit Hours.

Introduction to the doctrines, practices, and history of Sufism. Analysis of the nature of mystical experience and Sufi principles. The course also includes a survey of Sufi literature and will discuss the brotherhoods, their relationship with orthodoxy, and al-Ghazali's synthesis.

Repeatability: This course may not be repeated for additional credits.

REL 3702. African Religions and New World Culture. 3 Credit Hours.

African religion and culture continues to exist in the religious and cultural life of African Americans. Using an interdisciplinary approach, we will examine African American religion, folklore, literature, music, and communication in order to assess the continuation and transformation of African culture in the world-view of African Americans.

Repeatability: This course may not be repeated for additional credits.

REL 3882. Independent Study. 2 Credit Hours.

Individual research project with a specific faculty member.

Repeatability: This course may be repeated for additional credit.

REL 3900. Honors Topics in Religious Studies. 3 Credit Hours.

The topic of this course changes each semester that it is taught, since different professors teach it. Check the course offerings online each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

REL 3901. Honors Contemporary Religious Thinkers. 3 Credit Hours.

This course explores work of various thinkers from different World Religions organized around themes of cosmology, theology, ethics, mysticism, and global politics. NOTE: Students who received credit for REL 3801, the non-honors version of this course, may not receive additional credit for 3901.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

REL 3904. Honors Earth Ethics. 3 Credit Hours.

What is, or should be, our relation to the natural world? Especially since we are presently living in a modern urban environment, have we perhaps outgrown nature? Is it something we have mastered? Is it primarily a luxury of sorts that we can go to for periodic enjoyment or relaxation? On the other hand, why do we seem to be in a burgeoning environmental crisis? Is it just greed? Too many people? Insufficient technology? How did we get to where we are? Or more immediately--and perhaps deeply--what fundamental beliefs, attitudes, and values shape our everyday actions, how we perceive and use (or misuse) the earth? What creative alternatives can we find, and how can we apply them? In addressing these kinds of questions we will explore both Western and Asian ways of conceiving and interacting with the natural world, past and present. Our approach will also be interdisciplinary, including materials from art, film and literature, as well a range of academic disciplines. NOTE: This is an University Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SF, SS

Repeatability: This course may not be repeated for additional credits.

REL 4000. Topics in Religious Studies I. 2 Credit Hours.

The topic for this course changes each semester. Consult the instructor or an advisor in the Religion Department for specific details.

Repeatability: This course may be repeated for additional credit.

REL 4003. Comparative Mysticism East and West. 3 Credit Hours.

In this class the students will be introduced to the mysticism of certain eastern religions and certain western religions, which will be determined by the instructor. They will be chosen from Japanese Buddhism, Hinduism, Eastern Orthodoxy, Catholicism, Judaism, Islam. The students will read primary texts from these traditions. Understanding the practice of mysticism in these traditions, as well as the theoretical systems that support these practices -- in a comparative framework -- will organize the readings and the lectures for the semester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in any REL course numbered 0802 to 4002.

REL 4010. Topics in Religious Studies. 3 Credit Hours.

The topic changes each semester. See the course schedule for the topic in a specific semester.

Repeatability: This course may be repeated for additional credit.

REL 4082. Independent Study. 3 Credit Hours.

Individual research project with a specific faculty member. Permission of the professor the student wishes to work with must be given in writing, and registration is completed in the Religion Department.

Repeatability: This course may be repeated for additional credit.

REL 4096. Capstone Seminar in Religion. 3 Credit Hours.

This course is designed to be the final culminating class experience for undergraduate Religion majors at Temple. The topic of the course is: "Theories of Religion and Secularism." The course first will consider the history of the terminology, ideology, and underlying theories about religion and those concepts that religion has been defined against from ancient times to the present, but mainly concentrating on modern western discourses, which are those that have primarily informed the prevailing definitions. Second, we will consider various theories currently challenging or seeking to modify this received tradition of religious studies. In doing this, we will also consider the relations of the field of religious studies with other academic fields as well as with current public discourses, especially those in our country, but also to some extent those in the rest of the world. NOTE: Capstone course in major. Typically offered only in Spring semester. Students must have completed at least 5 major courses prior to taking this course.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

REL 4406. Ancient Judaism. 3 Credit Hours.

Ancient Jewish history is usually narrated as if Jews went directly from Torah to Talmud, with nothing in between. Such an account privileges the authoritative religious developments and the leadership first, of the priests who collated the core of the Torah, and second, of the early Rabbis, who collated the Mishnah, the earliest strata of the Talmud. This course explores the explosive and intriguing history between these two religious moments, and in doing so, rejects the religious chronology as the basis of historiography. The history and textual materials from these periods in Jewish History raise many of the perennial themes that have come to inform Jewish social life over the centuries. In fact, during this period in which Jews first become Jews, these issues arise for the first time: exile, political decentralization, disagreements between Jews about what constitutes the parameters of the Jewish community; peoplehood, nation, and the boundaries of group identity, intermarriage, conversion, and the movement of Jewish identity from a territory-based definition to an ethnic definition, to a definition based in piety. Note: Prior to summer 1, 2016, the course title was "Secular Study of Ancient Jewish History: Between the Torah and the Talmud." Duplicate credit warning: Students who took REL 4406 or JST 4406 under the previous title will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

REL 4411. Secularism: Jewish and Muslim Women. 3 Credit Hours.

In its three-hundred-year history as a Western concept, secularism is often defined as the opposite of religion. Religious women have alternately found western secularism to be a source of liberation (as it grants them greater civil rights) and a source of oppression (as it putatively shrinks the religious sphere). In creating feminisms through Jewish and Muslim experience, feminisms that are both secular and religious, these religious women have complicated the meanings of secularism. They have also challenged the notion that feminism is necessarily secular. This course looks at examples of Jewish and Muslim women's lives and feminist thought in the US, Europe, and the Middle East. The course will compare and contrast the feminism of these two groups of religious women, in order to more fully understand the role of concepts like secularism, feminism, and religion. NOTE: Students will receive credit only once for either REL 4411, GSWS 4411, or JST 4411.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

REL 4882. Independent Study. 1 to 4 Credit Hour.

Individual study with a specific faculty member. Permission of the professor the student wishes to work with must be given in writing, and registration is completed in the Religion Department.

Repeatability: This course may be repeated for additional credit.

REL 4900. Honors Topics in Religious Studies II. 3 Credit Hours.

For description, see the Honors section of the course schedule of the semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

REL 4901. Honors Comparative Philosophy of Religion. 3 Credit Hours.

An introduction to comparative philosophy of religion, Asian and Western. After asking what is meant by "comparative philosophy of religion," we will focus on comparative philosophical study of basic concepts and issues in Western and Asian religious traditions. For example: concepts of divine or ultimate reality; arguments for the existence of an ultimate reality; the relation of faith and reason; critiques of religion; the problem of evil; concepts of personal destiny and immortality; the relation of religion to morality; religious and mystical experience; the nature of religious language; the problem of conflicting truth-claims and religious pluralism.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Risk Management and Insurance (RMI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

RMI 2101. Introduction to Risk Management. 3 Credit Hours.

Introduction to the study of risk management and insurance. Principal casualty risks to which organizations are exposed, including those involved in employee benefits. Means of identification, evaluation, and treatment of these risks are analyzed, with the methods of treatment including insurance, risk retention, self-insurance, and loss control.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Business Plus, Construction Engr Tech, Construction Mgt Tech, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Environmental Science, Environmental Prof Training, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, ECON 1102, or ECON 1902) and (STAT 1001, 'Y' in STA2, 'Y' in STT2, STAT 1102, STAT 1902, MATH 1022, MATH 1031, MATH 1041, MATH 1941, MATH 1038, 'Y' in STT3, 'Y' in ST2A, or 'Y' in MATW)

RMI 2102. Professional Development in Risk Management and Insurance. 1 Credit Hour.

This course is a continuation of the skills that were learned in Business Administration 2101. The class will further prepare students for internships and permanent placement in the areas of Risk Management and Actuarial Science. Emphasis on networking, career planning, interview preparation, and job search strategies. Students will attend the department's corporate seminar series as well. NOTE: This course can only be taken by students in the Risk Management and Insurance or Actuarial Science majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Actuarial Science, Risk Management and Insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02) and BA 2101 (C- or higher)

RMI 2501. Fundamentals of Personal Financial Planning. 3 Credit Hours.

Managing your finances is an important and needed skill in society today. This course explores the areas needed to manage household and personal finances. This non-technical course will prepare students to make more informed decisions in a complicated financial world, enabling them to reach their financial goals. Some of the topics explored will include but are not limited to: creating and managing budgets, taxes, savings, estate planning, retirement goals, major purchases, risk management and insurance planning, credit cards, loans, investments, and interest rates.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

RMI 2901. Honors Introduction to Risk Management. 3 Credit Hours.

This is the Honors version of Risk Management and Insurance 2101. NOTE: Open only to business-designated Honors students, or with special permission of the Program Director. May be used to satisfy the risk management and insurance requirement of the Fox School of Business and Management.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Construction Mgt Tech, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, ECON 1102, or ECON 1902) and (STAT 1001, 'Y' in STA2, 'Y' in STT2, MATH 1022, MATH 1031, MATH 1041, MATH 1941, MATH 1038, STAT 1102, STAT 1902, 'Y' in STT3, 'Y' in ST2A, or 'Y' in MATW)

RMI 3501. Managing Human Capital Risk. 3 Credit Hours.

Analysis of the major areas in other-than-retirement employee benefits. Considerations in benefit plan design, group insurance and the group technique, state and federal regulation, health and miscellaneous types of benefits offered. Issues include managed care plans, CDHPs, the ACA, ERISA, funding issues, tax implications and health care cost containment. This course is required of all RMI majors.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02)

RMI 3502. Managing Property Liability Risk I. 3 Credit Hours.

This course examines the basic operational functions of a property-liability insurer and how the market and regulatory environments affect insurer operations. Key topics addressed in the course include industry structure, regulation, distribution systems, underwriting, ratemaking and insurance pricing, reinsurance, loss control and solvency. Throughout the course current issues affecting insurer options are examined. This course is required of all RMI majors.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Science & Technology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02)

RMI 3503. Retirement Plans. 3 Credit Hours.

Contemporary fundamentals of pension plans. Major subject areas covered include history and development, plan design, actuarial aspects (costs and funding), investment of plan assets, and plan termination insurance. Provides an understanding of the types of individual account retirement plans available. Discussed are profit-sharing plans, thrift and savings plan, cash or deferred arrangements, employee stock ownership and stock bonus plans, individual retirement accounts, simplified employee pensions, tax-deferred annuities, and executive retirement arrangements. Certain functional areas applicable to all types of retirement plans such as taxation, plan installation, disclosure, and fiduciary aspects are also discussed. NOTE: This course is one of two courses satisfying the Technology Requirement for Risk Management & Insurance majors.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 3501 or 'Y' in CRRM03) and (FIN 3101, FIN 3901, AS 2503, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRAS04)

RMI 3504. Managing Property Liability Risk II. 3 Credit Hours.

This course evaluates property, net income, cyber, environmental, and liability loss exposures, analysis of insurance contracts and specific insurance coverages designed to handle the above exposures.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Science & Technology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 3501 or 'Y' in CRRM03) and (RMI 3502 or 'Y' in CRRM04)

RMI 3505. Risk Financing. 3 Credit Hours.

This course is designed to provide students with a sound foundation in the financial characteristics of the U.S. property-liability insurance industry as well as noninsurance financing techniques available to corporations. U.S. property-liability fundamental statistics and ratio analysis are studied. Loss reserve forecasting and reinsurance types and techniques are reviewed in the course. Noninsurance financing techniques, also called alternative risk transfer (ART), discussed in the course include captives, securitization, and finite risk reinsurance. The course is designed to provide students a "hands-on" feel in the discussion, as calculations are involved with the topics studied. Excel applications of the topics discussed are included in the course as well.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 3501 or 'Y' in CRRM03), (RMI 3502 or 'Y' in CRRM04), and (FIN 3101, FIN 3901, AS 2503, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRAS04)

RMI 3506. Risk Analytics. 3 Credit Hours.

This course will focus on the modern use of data and analytical tools in the insurance industry. We will begin by developing a set of tools for presenting, handling, and analyzing data and developing predictive models. In particular, we will focus on "big" data. We will briefly review traditional analysis techniques before moving onto more modern approaches such as classification trees, cluster analysis, and neural networks. We will then apply these techniques to problems unique to the risk and insurance industry such as underwriting, risk modeling, ratemaking, loss reserving, and risk control. The course is separated into Three Modules. The first module is a general introduction to modern data analytics. The second module takes the first module and applies the techniques learned to applications in risk management such as risk modeling, analyzing loss exposures, and risk control. The third module takes the first module and applies the techniques learned to applications in the insurance industry such as underwriting, loss reserving, and ratemaking.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Science & Technology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (RMI 3501 or 'Y' in CRRM03), (RMI 3502 or 'Y' in CRRM04), and (STAT 2103 (C- or higher) or AS 2505 (C- or higher))

RMI 3511. Social Insurance and Public Policy. 3 Credit Hours.

This course will introduce you to the fundamentals of economic and insurance theories related to government intervention in insurance markets. In the first part of the course we will use basic microeconomic principles to analyze concepts such as scarcity of resources, tools of positive and normative analysis, supply and demand for insurance, requirements of an insurable risk and their violations as well as the economic view of government and reasons for government intervention in private markets. This part of the course will cover theories related to both the supply and demand for insurance. In addition we will explore the nature of economic security and insecurity, the basic principles of social insurance and comparisons of social verses private insurance. We will also learn and analyze, health, healthcare, and alternative theories of the demand for health insurance in order to compare and contrast private and national health insurance. We will then evaluate various social insurance programs using the tools of analysis we have developed in the course. In particular we will focus on OASDI (Social Security), Medicare, Medicaid and National Healthcare.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

RMI 3519. Insurance, Benefits and Retirement Planning. 3 Credit Hours.

This course equips you with an understanding of personal insurance products to promote your understanding of individual risk management in the process of wealth protection and retirement planning and strategies. Additionally, time will also be devoted to insurance products available through the traditional employee benefits offerings. Finally, the tools for retirement planning are introduced and strategies to meet individual goals are incorporated including employer sponsored, government, and individual plans.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in CRRM01, or 'Y' in CRRM02)

RMI 3567. Managing International Risk. 3 Credit Hours.

This course is designed to provide an in-depth understanding of risk management and insurance from an international perspective. Enterprise risk management is examined in a global economy, with an emphasis on risk management for multinational corporations. Topics covered in this course also include an extensive review and comparison of life insurance, non-life insurance and reinsurance markets throughout the world, and the financial service integration globally.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Science & Technology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in CRRM01, or 'Y' in CRRM02) and ((RMI 3501 and RMI 3502), AS 3596 (may be taken concurrently), AS 3597 (may be taken concurrently), (RMI 3501 and 'Y' in CRRM04), (RMI 3502 and 'Y' in CRRM03), ('Y' in CRRM03 and 'Y' in CRRM04), 'Y' in CRAS06, or 'Y' in CRAS07)

RMI 3580. Special Topics - Risk Management & Insurance. 3 Credit Hours.

Special topics in current developments in the field of risk management and insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02)

RMI 3581. Field Experience in Risk Management and Insurance. 3 Credit Hours.

Students undertake a research project that integrates their current work experience with their classroom experience at Temple University. The results are reported in a paper prepared under the supervision of a faculty member. NOTE: Arrangements are made through the Department of Risk Management and Insurance. This course is open to Risk Management & Insurance and Actuarial Science majors only. This course may NOT be used as a course toward the Risk Management & Insurance or Actuarial Science major.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02) and minimum GPA of 3 in: courses numbered 0700 to 4999.

RMI 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under the supervision of a faculty member. Individually arranged each semester.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Actuarial Science, Risk Management and Insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02)

RMI 3682. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under the supervision of a faculty member. Individually arranged each semester.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Actuarial Science, Risk Management and Insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02)

RMI 3999. Honors Thesis I. 1.5 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Risk Management & Insurance department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Risk Management & Insurance 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

RMI 4596. Advanced Topics in Managing Human Capital Risk. 3 Credit Hours.

The goals of this course are to expose students to certain advanced topics in the design of health and welfare employee benefit plans; to improve the ability of students to work in groups and teams on common projects; to improve the writing ability of students through the use of a term paper completed by each student and the completion of a case study written with a group; and to improve the oral presentation skills of students through a presentation of the results of their particular case study. We will examine several major advanced issues in the operation and design of health and welfare employee benefit plans. These include the design and use of group term and permanent life insurance products, group disability income insurance, advanced alternative funding arrangements such as experience rating and minimum premium arrangements, cafeteria and flexible benefit plans under Section 125, benefits provided under the Transportation Equity Act (TEA) and miscellaneous benefits such as leave benefits such as FMLA and PTO. NOTE: This course is one of two capstone courses for Risk Management & Insurance majors. Students must earn a grade of C- or higher in this course if they are using it to fill the writing intensive course requirement for their degree.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Risk Management and Insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (RMI 3501 or 'Y' in CRRM03), (RMI 3502 or 'Y' in CRRM04), and (BA 2196 (C- or higher) or BA 2996 (C- or higher))

RMI 4597. Managing Risk Across the Enterprise. 3 Credit Hours.

This course examines the management of risk within a complex global organization. It introduces Strategic and Enterprise Risk Management (SRM and ERM). Discussions will include the strategic and administrative aspects of global corporate risk management including the examination of how a risk manager and Chief Risk Officer operates within a complex organization. The course also applies holistic risk identification techniques (pure and speculative risk) employing a group project and case competition to enhance the understanding and application of these techniques. The course also explores how the firm identifies and manages emerging risks. Advanced alternative risk financing and transfer including the use of reinsurance and capital markets within a captive insurance company based global risk financing program structure addressing risk domestically and internationally will also be explored. Finally, the course will apply sophisticated and cutting edge risk management tools such as the application of: key risk indicators, risk registers, and risk maps; forecasting loss contingencies and expected losses including data management; integrated risk financing; financial reinsurance; captives/risk retention groups; and, benchmarking, to name a few.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Risk Management and Insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (RMI 3502 or 'Y' in CRRM04), (RMI 3504 or 'Y' in CRRM05), and (BA 2196 (C- or higher) or BA 2996 (C- or higher))

RMI 4999. Honors Thesis II. 1.5 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Risk Management & Insurance Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Risk Management 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Risk Management and Insurance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in RMI 3999.

Russian (RUS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

RUS 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815/0915, English 0815, Italian 0815, PSY 0815, or Spanish 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

RUS 0831. Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? With an historical and sociological framework as a basis, we will take an in-depth and more personal look at the immigrant experience as expressed through the immigrants' own voices in literature and film. Topics explored include: assimilation, cultural identity and Americanization, exploitation and the American Dream, ethnic communities, gender, discrimination and stereotyping. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0831, CRIT 0831, History 0831, Italian 0831/0931, SOC 0831, or SPAN 0831/0931.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

RUS 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture by taking a guided tour of its literature and film. In this course, you'll learn about contemporary Russia. You don't need to speak Russian to take this exciting course, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film include family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. Each course section focuses on a specific country or culture. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

RUS 0871. Arts in Cultural Context. 4 Credit Hours.

View the arts as an expression of cultural identity as it occurs across the globe. Each semester, we will focus on a particular world region or country, including but not limited to Russia, Japan, and Latin America. The exploration of cultural identity begins with an overview of the region or country's historical and religious influences and then studies the culture's arts, including the visual arts (painting, sculpture), musical traditions, literature (folktales, national mythology), the vernacular arts (crafts, storytelling), film and theater. You will take field trips or have experiences that will allow you to encounter the region's arts firsthand, and to develop a blended understanding of a people's cultural identity and the larger world. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0871, Asian Studies 0871 or Hebrew 0871.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

RUS 0968. Honors World Society in Literature & Film. 3 Credit Hours.

Learn about contemporary Russia by taking a guided tour of its literature and film. You don't need to speak Russian to take this course, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868, or Spanish 0868/0968.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

RUS 1001. First-Year Russian I. 4 Credit Hours.

Students acquire skills to communicate in Russian on a variety of topics in predictable situations. Classroom work focuses on listening, speaking, reading and writing as students build their mastery of vocabulary and grammar. Emphasis is on communication in a cultural context. This course is not appropriate for students who speak or spoke Russian in their home environments; students with family background in Russian are directed to take Russian 3003 (Heritage Russian I) or Russian 3004 (Heritage Russian II). Students who can speak Russian comfortably, but cannot read or write in Russian take Russian 3003; students with some literacy skills in Russian may be prepared to take Russian 3004.

Repeatability: This course may not be repeated for additional credits.

RUS 1002. First-Year Russian II. 4 Credit Hours.

This course focuses on communication in a cultural context. Students will improve listening, reading, speaking and writing skills while expanding their vocabulary.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 1001, 'C1002' in LCRU, 'B1002' in LCRU, or 'EXMPT' in LCRU)

RUS 1004. Intensive First-Year Russian. 10 Credit Hours.

This is an intensive course for those students who wish to take first-year Russian but missed the fall semester option of Russian 1001 (0051). This course meets 10 hours per week and students have 3-4 hours of homework per night. By the end of the semester, students complete the entire sequence of first-year Russian (equivalent to Russian 1001-1002 / 0051-0052) and are prepared to enter second-year Russian in the following fall semester.

Repeatability: This course may not be repeated for additional credits.

RUS 1082. Independent Study in Russian Language. 1 to 5 Credit Hour.

This course is an independent study in Russian language for students not yet ready to take on the more advanced independent study of Russian 3082. It is designed to provide a bridge for students who transfer in to Temple and need some work to improve their Russian to be able to join an existing Russian language course. This course is NOT available to students who can be placed into an existing course and is NOT open to enrollment except by consent of the instructor.

Repeatability: This course may be repeated for additional credit.

RUS 1201. Russian Culture. 3 Credit Hours.

Students in this course will study the historical origins of Russian culture and the modern manifestations of this rich culture. At the beginning of the 19th century, Russian culture had not established itself in the world canon in music or literature and had made only a tiny impression in the canon of world art. By the beginning of the 20th century, Russian masters had gained world renown in music, literature, dance, theater, painting, and in the newest art form, film. This course will describe the historical origins of this remarkable cultural transformation and explain how Russian culture has become an inextricably integral part of human culture. Students may not earn credit for both Russian 0871 and Russian 1201.

Repeatability: This course may not be repeated for additional credits.

RUS 2001. Second-Year Russian I. 4 Credit Hours.

Students completing this course acquire skills they need to communicate with native speakers of Russian on a variety of topics in predictable situations. Students in this course work on listening, speaking, reading, and writing skills as they improve their mastery of Russian vocabulary and grammar. Classroom and homework activities emphasize contemporary standard Russian in its cultural and historical contexts. Materials from the Internet supplement textbook-based activities. NOTE: Students who took Russian 0051/0052 prior to the 2006-2007 academic year should see an advisor before registering for this course.

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 1002, RUS 1004, or 'EXMPT' in LCRU)

RUS 2002. Second-Year Russian II. 4 Credit Hours.

Students completing the 2nd semester of this 2-semester sequence (Russian 2001/2002) acquire the skills they need to communicate with native speakers of Russian on a variety of topics in predictable situations. In this course students continue to work on listening, speaking, reading, and writing skills as they improve mastery of Russian vocabulary and grammar. Classroom and homework activities emphasize contemporary standard Russian in its cultural and historical contexts. Materials from the Internet, especially news articles from the Russian press, supplement textbook-based activities. NOTE: Students who took Russian C061 (2001) before fall 2007 should consult with an advisor before registering for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2001.

RUS 2101. Contemporary Russia in Literature and Film. 3 Credit Hours.

Students read short stories and novels and watch recent Russian films to understand the cultural and historical context in which Russia finds itself today. NOTE: This course is taught in English and includes required film screenings. All readings are in translation; all films are shown with English subtitles.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 2102. Russian Short Story in English. 2 Credit Hours.

Readings of selected masterpieces by authors such as Tolstoy, Dostoevsky, Turgenev, Pushkin, Leskov, Chekhov, Gorky, and Bunin. Analysis and discussion.

Repeatability: This course may not be repeated for additional credits.

RUS 2103. The Power and the Poet. 3 Credit Hours.

Students in this course read controversial Russian literary texts, written from the late 18th century through the beginning of the 21st century, which brought upon their authors political or social censure from the Russian or Soviet state. As we read and discuss these texts in their cultural and historical contexts, we consider the stylistic, narrative and other features of each text that may have attracted such unfavorable attention. The course concludes with a comparative discussion of the place of the writer in society. NOTE: The course includes readings both of poetry and prose fiction; the word poet in the course title is designed to evoke the broader image of the writer in Russian society.

Repeatability: This course may not be repeated for additional credits.

RUS 2105. Echoes of Terror in Russian Culture. 3 Credit Hours.

Students will read and study literary works (novels, short stories, poetry), memoirs and feature and documentary films depicting Stalin's terror (from the murder of Kirov in 1934 to the death of Stalin in 1953) and its impact on Russian and Soviet society after that period. Students will come to understand the enormity of these historical events by reading, discussing, and analyzing the texts and the films, drawing connections between the Soviet historical and cultural contexts and historical events elsewhere in the world (e.g., Nazi Germany, Apartheid South Africa, Cambodia, Rwanda, Darfur) about the legacy of totalitarian rule. Note: This course is equivalent to SOC 2105; students may receive credit for either RUS 2105 or SOC 2105.

Repeatability: This course may not be repeated for additional credits.

RUS 2106. Russian Comedy. 3 Credit Hours.

Students will apply a theoretical framework of comedy to exploring Russian works of fiction, drama and film, as well as to other performances (e.g., folk songs and dances, stand-up comedians' monologues) to gain a deeper understanding of the Russian sense of humor and its place in Russian culture.

Repeatability: This course may not be repeated for additional credits.

RUS 2107. History of Russian Film. 3 Credit Hours.

Students will study the history of the Russian cinema, viewing nearly 30 films spanning the period from 1900 to the present day.

Repeatability: This course may not be repeated for additional credits.

RUS 2108. Women's Voices in Russian Culture. 3 Credit Hours.

In this course we will study the depiction of women's voices in Russian culture (memoirs, fiction, feature and documentary films, research in both anthropology and sociology), by female and male authors, researchers, and filmmakers in the context of a larger study of women in Russian culture. Our course will start with an historical survey, but focus most closely on Russian women in the 20th century. No knowledge of Russian is required; all works are read in translation or viewed with subtitles. Note: This course is equivalent to GSWS 2108; students may receive credit for either RUS 2108 or GSWS 2108.

Repeatability: This course may not be repeated for additional credits.

RUS 2109. Jewish Voices in Russian Culture. 3 Credit Hours.

In this course we will study the Jewish experience in the Russian Empire, the Soviet Union, and Post-Soviet Russia, with an emphasis on the 20th century, debunking many of the myths with which many students may have been familiar from the film "Fiddler on the Roof." We will read, in translation, excerpts from memoirs, works of literature and history, and view films, with subtitles by Jewish and non-Jewish scholars, authors, poets, and filmmakers about what Russians have called "The Jewish Question" for more than two centuries. We will also take up issues of anti-Semitism and xenophobia and consider them in the context of European and American history. This course requires no knowledge of Russian, Yiddish, or Hebrew; all works are read in translation or viewed with subtitles.

Repeatability: This course may not be repeated for additional credits.

RUS 2111. 19th Century Slavic Literature in English. 3 Credit Hours.

Survey of Slavic literature; reading of representative works from Bulgarian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian literature.

Repeatability: This course may not be repeated for additional credits.

RUS 2112. Modern Slavic Literature in English. 3 Credit Hours.

Survey of East, West, and South Slavic literature; reading of representative works from Bulgarian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian literature.

Repeatability: This course may not be repeated for additional credits.

RUS 2114. Social and Economic Transformation in Russia. 3 Credit Hours.

Students will study the transformation of Russian society and the Russian economy, focusing on the 20th and 21st centuries. We will closely examine Russian economic transitions from a market to a planned economy (in the 1920s and 1930s) and from a planned economy back to a market economy (after 1991), as well as analyses of the Russian economy and society in periods of great stress (civil war, collectivization, famine, terror, war and occupation, arms race). We will also read memoirs and works of prose fiction and watch films in order to learn about the consequences of economic decisions on the lives of actual Russian citizens. The course will culminate with interviews with Russian businessmen visiting the United States. No knowledge of Russian required; all works read in translation or viewed with subtitles.

Repeatability: This course may not be repeated for additional credits.

RUS 2121. Russian Cities. 3 Credit Hours.

In this course we will study the Russian city, analyzing the nexus of physical geography, climate, natural resources, ethnography, history, commerce, politics and culture on the development of urban centers in Russia. The study of Moscow and St. Petersburg will occupy much of our attention in this course, but we will also examine Russia's medieval cities ("the Golden Ring"), as well as cities in Siberia and the Far East. We will read works from the disciplines of geography, history, anthropology, and sociology, as well as works of fiction; we will also view Russian films in which a city (or the city) plays an important role. No knowledge of Russian is required; all works will be read in translation or viewed with subtitles.

Repeatability: This course may not be repeated for additional credits.

RUS 2415. Russian History in Literature and Film. 3 Credit Hours.

Students will read and study a short history of Russia and then read literary works and watch films depicting various periods, topics, events, figures, and issues in Russian history. No knowledge of Russian is required; all works are read in translation or viewed with subtitles.

Repeatability: This course may not be repeated for additional credits.

RUS 2901. Honors Modern Russia in Literature and Film. 3 Credit Hours.

Students in this course will read a wide range of literary and critical texts and view films from before, during (1985-1991) and after (1991-present) the Perestroika Era in Russia in order to gain an understanding of Russian cultural history and trends during and after the collapse of the Soviet Union. This is an HONORS course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

RUS 2915. Honors Russian History in Literature and Film. 3 Credit Hours.

In this honors course, students read and study a short history of Russia and then read literary works and watch films depicting various periods, topics, events, figures, and issues in Russian history. Students in the course develop an understanding of the depiction of history in literature and film as contingent on the ideological perspective of the storyteller; students also learn to identify ideological perspective through attention to symbol, metaphor, and theme in both literature and film and, in addition, in film, through attention to lighting, sound and other filmic devices.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

RUS 3001. Third-Year Russian I. 4 Credit Hours.

Students completing Russian 3001 will improve their listening, speaking and writing skills (the latter in the context of both formal and informal letter writing). Upon completion of this course, they will be prepared to function in predictable situations in Russia on study abroad or tourist travel. Perhaps most importantly, students completing this course will improve their understanding of Russian cultural perspectives on the world. In this course students will read important Russian cultural texts (e.g., poetry by Pushkin), newspaper articles, and popular Russian fiction, analyzing both for cultural and linguistic patterns. Students will be graded on their performance on quizzes, oral and written tests, written papers, and presentations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 3002. Third-Year Russian II. 4 Credit Hours.

Students completing Russian 3002 will build on skills gained in listening, speaking and writing skills (the latter in the context of both formal and informal letter writing) in Russian 3001. In this course we will pay special attention to syntactical structures typically found in written discourse. Upon completion of this course, they will be prepared to function in predictable situations in Russia on study abroad or tourist travel. Perhaps most importantly, students completing this course will improve their understanding of Russian cultural perspectives on the world. In this course students will read important Russian cultural texts (e.g., poetry by Akhmatova), newspaper articles, and popular Russian fiction, analyzing both for cultural and linguistic patterns. Students will be graded on their performance on quizzes, oral and written tests, written papers, and presentations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 3001.

RUS 3003. Heritage Russian I. 3 Credit Hours.

This course is the first of two for students who speak or spoke Russian in their homes but do not know how to read and/or write in Russian. Students taking this course learn how to read and write in Russian; the course assumes no literacy skills in Russian. The course will help students build on their oral fluency in Russian to develop literacy in Russian. The focus is on the acquisition of contemporary standard Russian (CSR) in the Moscow dialect. Students who speak other dialects in their home environments will be encouraged to recognize the difference between their home dialect and CSR and acquire CSR in order to use it in professional settings. One of the most important aspects of this work is to develop sensitivity towards informal and formal speech and writing styles, since students without a formal educational experience in Russian may have little training to speak and write in formal (professional) contexts. NOTE: This course is for students who grew up speaking Russian in their home environment.

Repeatability: This course may not be repeated for additional credits.

RUS 3004. Heritage Russian II. 3 Credit Hours.

This course is the second of two designed for students who grew up in a Russian-speaking home and may have had some or much of their primary education in a Russian-language school. The course will help these students build on their oral fluency in Russian to develop literacy in Russian. The focus is on the acquisition of contemporary standard Russian (Moscow dialect). Students who speak other dialects in their home environments will be encouraged to recognize the difference between their home dialect and CSR and acquire CSR in order to use it in professional settings. One of the most important aspects of this work is to develop sensitivity towards informal and formal speech and writing styles, since students without a formal educational experience in Russian may have little training to speak and write in formal (professional) contexts. NOTE: This course is for native Russian speakers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 3003.

RUS 3082. Independent Study. 1 to 3 Credit Hour.

Arranged each semester. Please consult with the instructor. NOTE: Permission of instructor required. Considered only for extraordinary reasons.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 3201. Service Learning in Russian I. 2 Credit Hours.

Students spend 3 hours a week interacting in Russian with Russian speakers in the Philadelphia community in a service learning placement through agencies such as Lutheran Child and Family Services or Jewish Social Services. Course requires vocabulary quizzes, reflection in electronic diary and course forum, course meetings, oral presentations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 3001.

RUS 3202. Service Learning in Russian II. 2 Credit Hours.

Students who have completed one service learning course may take this course and spend 3 hours a week interacting in Russian with Russian speakers in the Philadelphia community in a service learning placement. Heritage speakers of Russian majoring in Russian are required to take this course as part of their major curriculum. This course requires two reflection papers in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 3201.

RUS 3285. Internship in Russian. 1 to 4 Credit Hour.

Students will be placed in an internship setting in which they will use their Russian in the workplace. This course will provide students with extended exposure to authentic Russian in professional contexts. Students will listen to, read, and write authentic Russian business communications and enhance their understanding of the styles characteristic of such communications. Students are graded on their attendance at the internship site, their electronic reflections (journal), a midterm reflective essay, a final presentation, and a portfolio of samples of their work from the internship site. In some cases, students may be assigned grammar and syntax exercises to help them master structures necessary for written communications at their internship site. NOTE: By special authorization only.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Russian.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 3501. Russian for Business and Travel. 3 Credit Hours.

Intensive work in spoken and written Russian needed by business executives and other travelers. Vocabulary, idiomatic usage and special terminology for professional needs. Cultural aspects, practice in personal contact and letter writing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4001. Fourth-Year Russian I. 3 Credit Hours.

Students will acquire the skills they need to communicate with native speakers of Russian on a variety of topics in predictable situations. In this course, students will work on listening, speaking, reading, and writing skills as they build their mastery of Russian vocabulary and grammar. Classroom and homework activities will emphasize contemporary standard Russian in its cultural and historical contexts. Materials from the internet will supplement textbook-based activities. NOTE: Students majoring in Russian are required to take Russian 4097 instead of Russian 4001.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3002) and (RUS 3003 or RUS 3004)

RUS 4002. Fourth-Year Russian II. 3 Credit Hours.

Survey of Russian culture and civilization from its beginnings to the present.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 4001.

RUS 4101. Contemporary Russia in Literature and Film: Russian Trailer Section. 4 Credit Hours.

This course meets with the English-language lecture Contemporary Russia in Literature and Film. Students taking the Russian trailer section of this course must attend the English-language lectures 3 hours per week, but also have a fourth hour in Russian with the instructor. Students in this Russian trailer section read all the texts for this course in Russian and discuss them in Russian with one another and the instructor. They also write two papers of 7-10 pages in length in Russian on short stories or films they have read or watched that were not presented to the larger lecture course in translation. Students who took either Russian 2101 or Russian 0868 are not eligible to take Russian 4101 due to overlap in content. NOTE: Fourth hour conducted in Russian; all readings are to be done in Russian; all papers and tests are in Russian.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Russian.

Repeatability: This course may not be repeated for additional credits.

RUS 4103. The Power and the Poet (in Russian). 4 Credit Hours.

Students in this course will read controversial Russian literary texts, written from the late 18th century through the beginning of the 21st century, which brought upon their authors political or social censure from the Russian or Soviet state. As we read and discuss these texts in their cultural and historical contexts, we will consider the stylistic, narrative and other features of each text that may have attracted such unfavorable attention. The course will conclude with a comparative discussion of the place of the writer in society. NOTE: The course includes readings both of poetry and prose fiction; the word poet in the course title is designed to evoke the broader image of the writer in Russian society. Students who took either Russian 2103 or Political Science 2202 are not eligible to take Russian 4101 due to overlap in content. NOTE: Fourth hour conducted in Russian; all readings are to be done in Russian; all papers and tests are in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 3001.

RUS 4104. Russian History in Literature and Film (in Russian). 4 Credit Hours.

Students will read and study a short history of Russia and then read literary works and watch films depicting various periods, topics, events, figures, and issues in Russian history. The fourth class hour of this course will be conducted in Russian; most readings and all papers will be assigned in Russian. Students who took either Russian 2415, Russian 2915, History 2415, or History 2915 are not eligible to take Russian 4104 due to overlap in content. NOTE: Fourth hour conducted in Russian; all readings are to be done in Russian; all tests and papers are administered in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4105. Echoes of Terror in Russian Culture (in Russian). 4 Credit Hours.

Students will read novels, short stories, memoirs, and historical essays and view films about Stalin's terror (1934-1941 and again 1946-1953) and its impact in Russia and the Soviet Union. NOTE: Fourth hour conducted in Russian; all readings in Russian; all tests and papers in Russian. Students who took Russian 2105 or Sociology 2105 are not eligible to take Russian 4105 due to overlap in content.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4106. Russian Comedy (in Russian). 4 Credit Hours.

Students will apply a theoretical framework of comedy to exploring Russian works of fiction, drama and film, as well as to other performances (e.g., folk songs and dances, stand-up comedians' monologues) to gain a deeper understanding of the Russian sense of humor and its place in Russian culture. Readings of texts will be in Russian. NOTE: Fourth hour conducted in Russian; all readings in Russian; all tests and papers in Russian. Students who took Russian 2106 are not eligible to take Russian 4106 due to overlap in content.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4107. History of Russian Film (in Russian). 4 Credit Hours.

Students will study the history of the Russian cinema, viewing nearly 30 films spanning the period from 1900 to the present day. Students enrolled in this course will be assigned readings in Russian, will write papers and exams in Russian, and will have one class meeting per week in Russian. NOTE: Class conducted in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4108. Women's Voices in Russian Culture (in Russian). 4 Credit Hours.

In this course we will study the depiction of women's voices in Russian culture (memoirs, fiction, feature and documentary films, research in both anthropology and sociology), by female and male authors, researchers, and filmmakers in the context of a larger study of women in Russian culture. Our course will start with an historical survey, but focus most closely on Russian women in the 20th century. This course meets with Russian 2108: three hours in class will be conducted in English for students in both Russian 2108 and Russian 4108; the fourth class hour, for Russian 4108 alone, will be conducted in Russian. Students will do substantial reading in Russian and will write an extended paper in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4109. Jewish Voices in Russian Culture (in Russian). 4 Credit Hours.

In this course we will study the Jewish experience in the Russian Empire, the Soviet Union, and Post-Soviet Russia, with an emphasis on the 20th century, debunking many of the myths with which many students may have been familiar from the film "Fiddler on the Roof." We will read, in Russian, excerpts from memoirs, works of literature and history, and view films, with subtitles by Jewish and non-Jewish scholars, authors, poets, and filmmakers about what Russians have called "The Jewish Question" for more than two centuries. We will also take up issues of anti-Semitism and xenophobia and consider them in the context of European and American history. NOTE: Class conducted in Russian. Readings, papers and tests in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4111. Pushkin. 3 Credit Hours.

Reading and analysis of selected major works.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4112. Tolstoy. 3 Credit Hours.

Study and analysis of selected major works.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4113. Dostoevsky. 3 Credit Hours.

Reading and analysis of selected major works.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4114. Russian Novel. 3 Credit Hours.

Reading and analysis of selected major works.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4115. Russian Drama. 3 Credit Hours.

Reading and analysis of selected Russian plays.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4116. Russian Poetry. 3 Credit Hours.

Analysis of the major works of Russian poets.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in RUS 2002.

RUS 4121. Russian Cities (in Russian). 4 Credit Hours.

In this course we will study the Russian city, analyzing the nexus of physical geography, climate, natural resources, ethnography, history, commerce, politics and culture on the development of urban centers in Russia. The study of Moscow and St. Petersburg will occupy much of our attention in this course, but we will also examine Russia's medieval cities ("the Golden Ring"), as well as cities in Siberia and the Far East. We will read works from the disciplines of geography, history, anthropology, and sociology, as well as works of fiction; we will also view Russian films in which a city (or the city) plays an important role. NOTE: Class conducted in Russian. Readings, papers and tests in Russian.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (RUS 3001 or RUS 3003)

RUS 4182. Advanced Independent Study in Russian Literature. 1 to 3 Credit Hour.

Supervised reading, research, and reports on an advanced level in Russian language, literature or civilization. NOTE: Considered only for extraordinary reasons.

Repeatability: This course may be repeated for additional credit.

RUS 4282. Advanced Independent Study in Russian Literature. 1 to 3 Credit Hour.

Supervised reading, research, and reports on an advanced level in Russian language, literature or civilization. NOTE: Considered only for extraordinary reasons.

Repeatability: This course may be repeated for additional credit.

RUS 4382. Advanced Independent Study in Russian Area Studies. 1 to 3 Credit Hour.

This course, available only by consent of the instructor, is for students who want to do advanced-level research in Russian studies (e.g., history, politics, society). To be eligible for this course, students must demonstrate advanced Russian language skills typical of those demonstrated by students in 4000-level Russian language courses.

Repeatability: This course may be repeated for additional credit.

RUS 4483. Advanced Directed Readings in Russian Area Studies. 1 to 3 Credit Hour.

Students enroll in this course only with special permission from the instructor. In this course, students do advanced directed readings in Russian area studies, using Russian press and other Russian-language sources to explore Russia through disciplines such as anthropology, geography, history, political science, sociology, as well as contemporary business.

Repeatability: This course may be repeated for additional credit.

School of Business and Management (SBM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SBM 0880. GenEd Limited Edition GU. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd U.S. Society requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

SBM 0980. Honors GenEd Limited Edition GU. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd U.S. Society requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

SBM 3585. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

SBM 3586. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

School of Sport, Tourism & Hospitality Management (STHA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

STHA 0850. GenEd Limited Edition GQ. 4 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Quantitative Literacy requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

STHA 0950. Honors GenEd Limited Edition GQ. 4 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Quantitative Literacy requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

STHA 3485. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

STHA 3486. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

School Psychology (SPSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SPSY 0828. The Meaning of Madness. 3 Credit Hours.

What is madness? Insanity? Mental illness? Who decides where the line between madness and normalcy is drawn? How have ideas about madness changed over time? Can the same behaviors be considered "insane" in one culture but "normal" in another? What is "stigma" and how does it affect individuals with mental illnesses? This course will explore biological, social, and cultural factors that influence mental illness, perceptions of individuals with mental illness, and treatments of mental illness over time and across cultural groups. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed SPSY 0928.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SPSY 0928. Honors The Meaning of Madness. 3 Credit Hours.

What is madness? Insanity? Mental illness? Who decides where the line between madness and normalcy is drawn? How have ideas about madness changed over time? Can the same behaviors be considered "insane" in one culture but "normal" in another? What is "stigma" and how does it affect individuals with mental illnesses? This course will explore biological, social, and cultural factors that influence mental illness, perceptions of individuals with mental illness, and treatments of mental illness over time and across cultural groups. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed SPSY 0828.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

SPSY 2271. Introduction to School Psychology. 3 Credit Hours.

This course serves as an introduction to the discipline of school psychology. As such, a primary focus of this course will be to learn about the field of school psychology, particularly the role and function of a school psychologist. We will explore a scientist-practitioner model of practice that is based on the current best practice model in the field. As such, a focus will be on the application of psychological principles to improve learning for all students. Emphasis will be placed on research-based models of prevention that help to improve outcomes for individual students and classrooms as well as overall schools and school districts. This course will focus on the role and function of school psychologists, paying particular attention to the three main pillars of practice: assessment, intervention, and consultation. Core topics will include systems-based service delivery, assessment, learning theory, effective interventions (academic, behavioral, and social), culturally competent practice, effective instruction, data-based decision making, and collaborative consultation.

Repeatability: This course may not be repeated for additional credits.

SPSY 2303. The Impact of Trauma on the Individual and Society. 3 Credit Hours.

The purpose of this course is to provide a theoretical and practical understanding of the impact of psychological trauma at the individual and societal level. Students will become familiar with the impact and nature of a wide variety of traumas on the individual including: childhood abuse, violent crimes in adulthood, domestic violence, accidents, traumatic deaths, natural disasters, and war and genocide. Students will also focus on the impact of trauma on society by studying the economic and social costs of trauma. In addition, students will explore issues related to resiliency and prevention of trauma.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

SPSY 3000. Topics in School Psychology I. 3 Credit Hours.

This course covers special topics of interest to students in a broad range of educational contexts. The topics will vary each semester depending on the population being served.

Repeatability: This course may be repeated for additional credit.

Science Education (Elementary) (SCEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SCEE 3151. Teaching Science: N-6. 3 Credit Hours.

An introductory, activity-oriented approach to materials and methodology appropriate to teaching science in kindergarten through sixth grade. Emphasis on development of inquiry techniques and the constructivist theory of learning stressed in most of the newer early childhood and elementary science programs. Practical application through experiences with children.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ELED 3387, MAEE 3141.

Repeatability: This course may not be repeated for additional credits.

Science Education (Secondary) (SCES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SCES 2189. Classroom Interactions. 3 Credit Hours.

This course continues the process of preparing students to teach mathematics and science in upper elementary and secondary settings. The specific objectives of this course are to: 1) demonstrate to students how learning theories (from the "Knowing and Learning" course) manifest themselves in instructional settings (usually classrooms), allow students to design and implement instructional activities from their own understanding of knowing and learning mathematics and science, and evaluate the outcomes of those activities based on evidence from student artifacts, and 2) provide students with frameworks for thinking about equity issues in the classroom and larger school setting and their effects on learning and provide students with strategies for teaching diverse students equitably. The culminating activities of the course are the opportunities for students to teach in a high school and to learn whether they enjoy and are good at it. While in "Knowing and Learning" students study the meaning behind understanding a particular content area from an individual perspective, in "Classroom Interactions" the perspective shifts to studying how classroom events might promote or discourage learning mathematics and science and student equity. A major component of the "Classroom Interactions" course is the opportunity for students to reflect on and evaluate their own work as teachers.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in EDUC 2179 (may be taken concurrently) and (SCTC 1289 or SCTC 1389)

SCES 3146. The Teaching of Science in Secondary Schools. 3 Credit Hours.

For students beginning their classes in science teaching at the secondary level. This course must be taken before student teaching. Role of science education in the secondary curriculum, and sources of material and content for teaching physical, biological, earth sciences and environmental sciences are covered.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

SCES 4146. Teaching Science in Secondary Schools II. 3 Credit Hours.

This course serves as the second science education course. In this course, we will continue to use ideas generated in SCES 3146, such as meaningful understanding, how children's ideas progress as they become more sophisticated, and designing instruction around inquiry experiences, in order to take a deeper look at curriculum, instruction and learning at the secondary level. In addition, we will cover the following ideas: (1) units of instruction, as well as the relationships among units, (2) connections to other fields, specifically math and models as a way to understand more sophisticated science ideas, (3) relationships among big ideas in science (and across science courses), (4) the learning environment (i.e. level of task, management-motivation-instruction connections), and (5) accounting for language, culture and social backgrounds in science teaching/learning. Throughout the semester, we will examine and reflect on science content, field experiences, unit planning and curricula, video vignettes, connections to help us meet the objectives. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

SCES 4189. Project-Based Instruction. 3 Credit Hours.

"Project-Based Instruction" (PBI) is the capstone course in the sequence of required education courses and is required before TUteach students take Education 4688: "Student Teaching in Secondary Education." PBI is the course in which the major themes of the TUteach program - integrated content of mathematics and science learning, infusion of technology in representation, analysis, modeling, assessment and contextualization of the content, field-based experiences, and equity - converge into an exciting and intellectually challenging culminating experience. When students complete PBI, they are fully prepared for Student Teaching. Whereas in "Classroom Interactions," students gain experience designing a sequence of several lessons that they teach to a high school class, in PBI, students design full units of connected lessons - a skill that is required in Student Teaching. PBI also provides students with the experience of managing lessons and students outside a classroom, in a field setting. Despite its name, PBI emphasizes choosing from a variety of appropriate teaching styles, depending on the type of material and the learning objective, with project-based instruction being just one possible alternative. In addition, PBI requires students to incorporate various technologies into the units they plan.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SCES 2189 and '100' in PRAX) and minimum GPA of 3 in: courses numbered 0700 to 4999.

Science, Secondary Education (SCSE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SCSE 3147. The Scientific Industry for Teachers. 3 Credit Hours.

This course exposes science teachers to industry and industrial related operations in situ where teachers can see and learn how science and scientific principles that they teach in their classrooms are applied in non-academic settings and how our economy is affected by these industries. Teachers will meet and talk with non-academic scientists, to observe them "at the bench," in action to learn the importance of the use of the laboratory and modern technology in applying the very principles that they, the teachers, teach in their classes.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

Secondary Education (SECE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SECE 3796. Differentiated Literacy Instruction in the Disciplines, 7-12. 3 Credit Hours.

This course examines ways in which secondary teachers can support students' struggles with reading and writing in the disciplines, including Mathematics, History (Social Studies), the Sciences, Foreign Language, and English. How can we teach all students the concepts, facts, and skills that they need to do well in our discipline? What kinds of reading and writing issues can inhibit students' progress? How do we identify the kinds of difficulties that different text organizations may pose for students? What must a high school student learn to do to read and write appropriately in English, History, Science, and so on? How can we address these issues without taking time away from teaching our discipline? What kinds of reading and writing tasks can we use as resources for helping students to learn in our discipline? How do the current state and national emphases on standards and teacher accountability affect our responsibilities in the classroom? The answers to these questions have deep implications for the instructional activities that we will develop to enable all children to use reading and writing as tools for learning in our fields. This is also the Capstone Writing-Intensive Course in the Major. The course immerses you in the kinds of literate activities practiced in our profession. It examines the ways that reading and writing vary across the disciplines included in this course. NOTE: This course was previously called "Reading Problems in the Secondary School."

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

SECE 4688. Student Teaching in Secondary Education. 9 to 11 Credit Hours.

Involves a school placement where students demonstrate their knowledge of and competence in teaching. Students work with a certified cooperating teacher and are supervised by a Temple University faculty member. NOTE: All coursework must be completed before taking this course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SECE 4801.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

SECE 4801. Senior Seminar and Performance Assessment in Secondary Education. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting, and engage in activities that foster professionalism in school and community settings. The senior performance assessment, a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the student teaching semester.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SECE 4688.

Repeatability: This course may not be repeated for additional credits.

Slavic Languages & Literature (SLVC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SLVC 2111. 19th Century Slavic Literature in English. 3 Credit Hours.

Survey of Slavic literature; reading of representative works from Bulgarian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian literature.

Repeatability: This course may not be repeated for additional credits.

SLVC 2112. Modern Slavic Literature in English. 3 Credit Hours.

Survey of East, West, and South Slavic literature; reading of representative works from Bulgarian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian literature.

Repeatability: This course may not be repeated for additional credits.

SLVC 3182. Independent Study. 1 to 3 Credit Hour.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Social and Behavioral Sciences (SBS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SBS 1003. Public Health Careers. 1 Credit Hour.

What can I do with an undergraduate degree in public health? There is a growing demand for public health professionals in various sectors in the United States and across the globe. However, because of the wide range of career options, it can be difficult for students to answer this question concisely. Public Health Careers will take you on a journey where you explore a diverse range of career opportunities in public health. You will reflect on your skills and experiences thus far and compare these to the competencies and transferable skills needed as an entry level public health professional. You will also participate in a series of professional development activities specifically targeted towards your areas of growth and development. A professional development plan will be created to use and adapt for your remaining time in the program. This course should be taken during your first year in the public health major.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

SBS 1104. Nutrition and Health. 3 Credit Hours.

This course is an introduction to nutrition and its impact on health. We will explore the various classes of nutrients and their food sources, dietary guidelines and meal planning considerations across the lifespan, the impact of energy (calorie) balance on health and weight management, and the basics of digestion. We will examine the importance of sustainable food systems, the dangers of hunger, and the social and economic factors that affect food production and consumption. We will also consider nutrition marketing, diet or other nutrition fads, and dietary assessment. Nursing, Health Professions, and Public Health majors and Public Health and Nutrition minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SBS 1105. Substance Use and Society. 3 Credit Hours.

This introductory, discussion-based course explores the use of psychoactive substances in the United States. It will cover motivations behind substance use; policies and laws that relate to substance use, harm reduction, prevention and treatment; a range of substance categories and their physiological, psychological and social effects; and the general concepts of substance use stigma, education, prevention, harm reduction and treatment. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 1106. Human Sexuality. 3 Credit Hours.

This introductory course explores the biological, psychological, and socio-cultural aspects of human sexuality. Students will have the opportunity to explore human sexuality as it relates to relationships, identities, and lifespan development. Students are encouraged to apply their own knowledge and experiences to this class to facilitate discussion. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 1114. Cultural Nutrition. 3 Credit Hours.

This course explores the central role of food in defining, unifying, and sustaining culture and religious expression around the world. It will also survey the traditional health beliefs and practices, especially as they relate to diet, of cultural groups before and after immigration to the United States. Students will investigate health concerns and counseling strategies associated with nutritional intake of the various cultural groups. Students will examine the role of preserving traditional cultural cuisines and related practices as a way of maintaining overall health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 1124. Cooking and Presenting Food Fundamentals. 4 Credit Hours.

This course covers the basic concepts of cooking food successfully. It includes the chemistry, biology, sensory qualities, and nutritional aspects of food preparation and delivery. The majority of lab will be spent applying what we learn in the textbook to actual food preparation. Labs that are spent cooking will end in eating and critiquing the recipes prepared. All students are required to adhere to proper sanitation and food safety guidelines, which will be discussed throughout the semester. If you have a food allergy, you are responsible to inform the instructor and strictly abide by your related medical care plan (such as avoidance of the food item). In addition, the course will cover the importance of incorporating aesthetic principles in the presentation of food to the public for wellness and customer satisfaction. These principles will include various themes from the selection of proper garnishes to event-appropriate tableware and plate selection. Each lab will practice aesthetics in the presentation of the day's cooked item.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 1201. Contemporary Health Issues. 3 Credit Hours.

This undergraduate-level lecture oriented course introduces students to a variety of contemporary health issues. These topics can change from semester to semester but typically will include: understanding stress and change, mental illness and psychosomatic disease, human sexuality, sexually related diseases, infections and HIV, and health eating and exercise. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2001. Biological Foundations of Population Health. 3 Credit Hours.

Biological Foundations for Population Health will focus on the human body in health and disease. This course will provide an overview of the biological mechanisms of disease at the cellular and individual level through human anatomy and physiology terminology and processes. Students will also apply pathophysiology concepts to population health issues including pertinent chronic and infectious diseases.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2003. Introduction to Public Health Writing. 1 Credit Hour.

This course will build on concepts developed in your Analytical Reading and Writing GenEd requirement and introduce discipline specific writing skills. This course will review the stages of the writing process which will provide a framework upon which to build the skills needed to become an effective writer in public health. In this course you will learn basic research and academic writing skills including identifying and evaluating sources, paraphrasing, and APA style. The course will also reinforce general writing skills such as paper and paragraph structure, grammar, and mechanics. This course is designed to help you assess the writing skills that you possess and identify areas of improvement/growth to be successful in upper level and writing intensive coursework.

Repeatability: This course may not be repeated for additional credits.

SBS 2101. Disease Prevention and Control. 3 Credit Hours.

This course will focus on the public health study of the nature, prevention, treatment and control of common communicable and non-communicable human diseases, with an examination of the cultural, social, behavioral, biological, and environmental factors involved in promoting health and preventing disease. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2103. Health Psychology and Human Behavior. 3 Credit Hours.

This course provides a comprehensive introduction to the field of health psychology. The intent is to familiarize students with a breadth of information linking biological, psychological, and social factors with overall health and illness, health risks and health behaviors. Emphasis will be on theoretical and evidence-based behavioral and social science approaches to health and wellness. Applications to individual, family, social, and wider societal situations will be explored.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2104. Nutrition in the Lifecycle. 3 Credit Hours.

This course explores the specific common health conditions and appropriate corresponding nutrition interventions for each stage of the lifecycle, from preconception to older adults. The course will begin with a brief overview of basic nutrition concepts. It will end with group presentations of an assigned case study involving an individual at one stage of the lifecycle, in which students will provide their nutrition assessment and a proper nutrition intervention plan.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2105. Nutrition and the Community. 3 Credit Hours.

This course discusses the importance of translating evidence-based nutrition research into effective programs that support health and prevent chronic disease at the population level. Students will investigate the framework of community based nutrition programs in the context of, and in relation with, other sectors of public health. Students will also gain insight in the challenges involved with designing, implementing, and evaluating nutrition programs, especially those targeting vulnerable subgroups. This course will contain a community service component, such as assisting with local community garden or food pantry activities, which will be the primary pedagogical vehicle to solidify the principles discussed in the course.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2106. Perspectives on Lifecycle Nutrition. 2 Credit Hours.

This course is designed to teach students how nutrition principles are adapted to meet the needs and health conditions that occur during each phase in the life course. The course will cover 1) nutrition during preconception, pregnancy and lactation; 2) infant, child, and adolescent nutrition; and 3) nutrition assessment and intervention for adults and older adults (65+). By participating in this class, students will develop the skills to 1) recognize what nutrition-related challenges might occur during each phase in the life cycle, and 2) make age-appropriate recommendations to meet requirements, improve health, and reduce disease risk. This course uniquely encourages students to solve case studies with "patients".

Field of Study Restrictions: Must be enrolled in one of the following Majors: Nursing 4 Year.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2201. Health Communication. 3 Credit Hours.

This course will provide a broad overview and exploration of health communication theory and practice, examining the powerful influences of communication on the promotion of health. Health Communication includes the study of efforts to change personal and social behaviors through community interventions and interpersonal means. These interventions can occur through the use of media (including advertising, news, social media, and entertainment content), community based education and communication, provider-patient communication, social support, media and health policy, patient disclosure and compliance, and health information-seeking, among others. The course will thus cover multiple levels, channels, media, and communication technologies, but will focus on the nature of persuasive communications and how communication can be used effectively to persuade people to adopt and maintain health behavior. As the course evolves, students will apply and extend the course concepts to situations observed in their own lives, and in public health contexts, and review past health communication efforts to learn how best to apply lessons learned to future communication efforts. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2203. AIDS and Society. 3 Credit Hours.

This course offers the student the opportunity for an in-depth study of one of the most critical public health issues facing society today. Topics include: current HIV/AIDS information as well as exploration of related issues including sexuality, homophobia, and discrimination, research, international/political implications, and worldwide economic effects. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2204. Diet and Weight Management. 3 Credit Hours.

Fundamentals of weight management, including a basic understanding of the role of behavior changes, exercise, and food choices in attaining and maintaining a healthy weight. Emphasis is on a healthy lifestyle; diets don't work. The student should be able, at the conclusion of the course, to recognize what constitutes a healthy diet and lifestyle and have the tools to make the changes needed to attain it. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2205. Coping with Life Stress Workshop. 3 Credit Hours.

This course focuses on the impact of poorly managed stress on physical and emotional health. Coping skills and strategies for effective stress management are reviewed. Individual stress profiles are developed, emphasizing a holistic view of the individual in a rapidly changing society. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: Lab fee required.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2216. Ethnicity, Culture and Health. 3 Credit Hours.

One of the goals of Healthy People 2020, the nation's health agenda, is to "achieve health equity, eliminate disparities, and improve health of all groups." This course seeks to encourage students to critically examine how ethnicity and culture impacts health and explore the individual and structural factors that contribute to health disparities. Students will become familiar with the key concepts in the public health literature on race and ethnicity and health disparities. We will also examine how prejudice and discrimination, neighborhood and community context may contribute to health disparities. While global health disparities exist, this course deals with the health issues among urban minority populations in the USA. Students are encouraged to apply their own knowledge and experience to this class to facilitate discussion. Public Health majors and minors must complete this course with a C or better.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Kinesiology, Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SBS 2301. Contemporary Slavery and Public Health. 3 Credit Hours.

Modern-day slavery exists in the margins of western consciousness, somehow removed from the cell phones, cars, jewelry, and foods we covet and consume. However, the forced free labor used to produce the materials for these and other commodities around the world perpetuates a devastating legacy that destroys individuals, families, communities, and the Earth itself. This 3 credit hour course will engage undergraduate students in an exploration and analysis of contemporary forms of slavery and human trafficking in order to understand the systems and behaviors driving the issue, the public health implications of trafficking on individual and community health, evidence of the environmental degradation associated with modern slavery, and possibilities for advocacy and intervention. This course aims to enhance critical thinking regarding the intersectionality of global citizenship, consumerism, public health, environmental sustainability, ethics, disparities, power and privilege, and the role of the field of public health in advocating for systematic change on all ecological levels.

Course Attributes: SI, SS

Repeatability: This course may not be repeated for additional credits.

SBS 2302. Maternal and Child Health. 3 Credit Hours.

Reproduction, childbirth, infancy, and development throughout childhood involve specific health needs that many students will address throughout their careers as public health and healthcare professionals. This 3-credit course will apply a social-ecological approach that considers multiple factors that influence maternal, child, and family health, including biological, psychological, social, economic, and environmental factors. Specific topics will include family planning, pregnancy and birth, infant health, and healthcare needs of children. For each topic, the course will identify factors that impact risk, health disparities, and access to care, including disparities related to race/ethnicity and experiences of LGBTQIA+ families, and identify public health programs that address these factors. It aims to foster students' critical thinking about intersectionality and social justice as they relate to maternal and child health (MCH), as well as an examination of associated structural and individual factors.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SBS 2303. Adolescent Health. 3 Credit Hours.

Physical, social-emotional, and cognitive development throughout adolescence involves specific public health needs that many students will address throughout their careers as public health and healthcare professionals. This 3-credit course will apply a social-ecological approach to adolescent development and public health, which includes biological, psychological, social, economic, and environmental factors. Specific topics include sexual and reproductive health, family and peer relationships, nutrition, violence, substance use, and the role of schools and healthcare. For each topic, the course will identify factors that impact risk and access to equitable care, particularly as they impact populations of different races/ethnicities, LGBTQIA+ youth, and adolescents with special healthcare needs. It aims to foster students' critical thinking about intersectionality and social justice as they relate to adolescent health.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SBS 2304. HEART Peer Educator Training. 3 Credit Hours.

HEART Peer Educators are Temple University students who focus on promoting campus social and educational environments consisting of lower-risk choices, which reflect the attitudes, behaviors and values of healthy lifestyles. They are dynamic students who are ready to make a significant contribution to the campus community. Peer educators believe in their ability to stimulate personal growth in others as well as in themselves. HEART peer educators have the passion and skills to create programs, find an audience and facilitate discussions. They are trained to facilitate on-campus workshops and programs that focus on sexual health, mental well-being, stress management, sexual assault, alcohol and other drug use, and other general wellness issues. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: This course is for HEART Peer Educators only.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 2903. Honors Health Psychology and Human Behavior. 3 Credit Hours.

This course provides a comprehensive introduction to the field of health psychology. The intent is to familiarize students with a breadth of information linking biological, psychological, and social factors with overall health and illness, health risks and health behaviors. Emphasis will be on theoretical and evidence-based behavioral and social science approaches to health and wellness. Applications to individual, family, social, and wider societal situations will be explored.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

SBS 3001. Community-Based Participatory Research I. 3 Credit Hours.

This course introduces community-based participatory research (CBPR). CBPR is a collaborative approach that addresses social injustices and public health inequities, particularly at the intersections of class, racial ethnic, indigenous, gender, immigrant, religious, and ability identities. In this course, students will (1) utilize the principles and theoretical foundations of CBPR to discuss and reflect on central concepts, including citizen participation, community development, and collective power; (2) engage in interactive CBPR activities, including identifying community needs and assets, and taking systematic action to resolve community identified problems; and (3) conduct a small-scale project that will generate critical thinking about CBPR approaches and the shifting "locations of power" during various stages of the CBPR process.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SBS 3103. Counseling Techniques for Health Professionals. 3 Credit Hours.

This course introduces counseling techniques used by health professionals working with individuals and groups. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

SBS 3104. Professional Seminar. 2 Credit Hours.

This course is designed as a professional development course for Public Health majors. This course will help you prepare for your public health internships by developing new and strengthening existing professional skills necessary for entry into the workforce. You will develop and refine necessary marketing materials for your internship and job search including a resume, cover letter, LinkedIn profile and effective interview skills. We will explore and analyze pertinent topics related to population health and professionalism such as effective communication, emotional intelligence, health literacy, and unconscious bias in the workplace.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SBS 3496 (may be taken concurrently) or 'Y' in CRSB07)

SBS 3105. Fundamentals of Health Education. 3 Credit Hours.

This course explores the science and art of teaching. Included in this course are the beginning skills of becoming an effective facilitator, teacher, and presenter of health education in a variety of settings. Formulating goals and objectives, planning, teaching, evaluating lessons and instructional materials are necessary skills for health education specialists. This course focuses on learning and applying various teaching methods and strategies and practicing these skills in a controlled environment.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SBS 2103 or 'Y' in CRSB05), (SBS 2101 or 'Y' in CRSB04), and Complete 2 of the following: (SBS 1104 or 'Y' in CRSB01), (SBS 1105 or 'Y' in CRSB02), and (SBS 1106 or 'Y' in CRSB03)

SBS 3382. Independent Study in Public Health. 1 to 6 Credit Hour.

Students in this course pursue supervised independent projects on issues related to public health. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: Registration must be preapproved by faculty before registration.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

SBS 3496. Community-Based Health Program Planning I. 3 Credit Hours.

Community-Based Program Planning I will prepare students to begin to develop skills to create innovative and lasting public health education programs and interventions. Linked to SBS 3596, these two semesters will provide an opportunity to develop all materials needed to plan, implement and evaluate an intervention, including needs assessment, objective development, intervention development and evaluation. This will be done through the mechanism of writing a grant proposal to a fictitious foundation. Public Health majors and minors must complete this course with a C or better. NOTE: This course is the first part of a two-semester, writing intensive capstone. Precedes SBS 3596.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (EPBI 2219 or 'Y' in CREP01), (SBS 2101 or 'Y' in CRSB04), (SBS 2103 (may be taken concurrently) or 'Y' in CRSB05), and Completed 2 of the following: (SBS 1104 or 'Y' in CRSB01), (SBS 1105 or 'Y' in CRSB02), and (SBS 1106 or 'Y' in CRSB03)

SBS 3596. Community-Based Health Program Planning II. 3 Credit Hours.

Community-Based Health Program Planning II will prepare students to finalize the development of a public health education program through the mechanism of writing a grant proposal to a fictitious foundation. This semester will further define the student's public health intervention, developed in SBS 3496, including developing specific goals and objectives and intervention components, critiquing existing programs as well as developing thorough evaluation, marketing and promotion plans and a program budget and budget justification. Public Health majors and minors must complete this course with a C or better.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SBS 3496 or 'Y' in CRSB07)

SBS 4185. Public Health Internship. 6 Credit Hours.

The Public Health Internship course is designed to be a practical experience that provides an opportunity for students to use the concepts, techniques and theories learned in the classroom. This course is among one of the most crucial components of the Public Health curriculum. It is designed to be a valuable and rewarding experience for both the intern and the agency involved. Public Health Internship helps prepare the intern for a career in Public Health and is intended to give the intern an opportunity to observe, learn, and participate in the various activities of health agencies. Interns are expected to be diligent, thorough, responsible and professional with all assigned tasks during their internships. As a result of their commitment, it is hoped that invaluable knowledge, insight, and professional growth will occur. What you will take away from this experience will depend primarily on what you put into it. A positive attitude and dedication will lead to a positive experience that will be invaluable. Interns are required to complete 300 hours at their fieldwork site over a minimum of twelve (12) weeks. On average, interns should plan to spend 20-25 hours per week at their internship site this semester.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (SBS 3496 or 'Y' in CRSB07), SBS 3104, SBS 3105, and (SBS 3596 (may be taken concurrently) or 'Y' in CRSB06)

SBS 4991. Honors Directed Research: Prevention Research in Public Health. 3 Credit Hours.

This course is designed to provide students with an opportunity to participate in a project carried out by a research team as a research assistant. Students participate in a range of activities on the project, depending on their schedules, their aptitude with particular tasks, and the project needs at various times. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: Registration must be preapproved by faculty.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Social Studies Education (Elementary) (SSEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SSEE 3161. Teaching of Social Studies: N-6. 3 Credit Hours.

This course addresses issues and methods in teaching social studies at the elementary level. The emphasis is on teaching for understanding, social justice, and investigating resources and curriculum in social studies.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

Social Studies Education (Secondary) (SSES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SSES 3278. Methods and Materials in Secondary Social Studies. 3 Credit Hours.

The course focuses on instructional materials and teaching strategies for teaching history and secondary social studies. There is an emphasis on social justice and teaching with documents. Students are required to complete a resource file, unit of study, and several short papers. Also, students will complete the Intermediate Performance assessment in this course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

SSES 4278. Teaching for Understanding in Secondary Social Studies. 3 Credit Hours.

This course builds on the foundation prepared in SSES 3278: Issues Teaching Secondary Social Studies. The purpose is to develop an understanding of teaching the four major content areas of the social studies (history, geography, economics, and civics and government). The goal is to help prepare candidates to teach these areas in terms of designing curriculum and assessment; adapting strategies from the field; and considering innovative ways to teach by drawing on available resources. The course will cover the important theories of social education and the developmental course of learning history, economics, civics, geography, psychology, sociology, and anthropology. Woven throughout the class will be a discussion of culture and diversity as adolescents encounter the world and prepare for full citizenship and to enter the workforce. SSES 4278 includes a 1-credit field experience. Students are expected to participate in level two fieldwork in a school setting for 30 hours that addresses one or more of the content areas of social studies (history, geography, economics, civics, psychology, anthropology, and/or sociology). Through field experiences, readings, projects and papers, and class discussions the following questions will be addressed: How will we prepare adolescents for a world in which respect for the environment, diversity, and the principles of democracy have become increasingly important? How can activities be developed that embody the principles of adolescents' concept development in the social studies? How can we create learning experiences that include and value all students' backgrounds? NOTE: Clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

Social Work - Undergraduate (SSWU)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SSWU 0822. Human Behavior and the Photographic Image. 3 Credit Hours.

How do photographs become more than just a pile of disparate images? Is there more to photography than that single "decisive moment" in the hunt and capture of an image? How do photographers comment on issues that are important to them? How can photographs tell a story? Is there a way one can use the art of photography to elicit change? In this class, students will use their digital cameras to investigate individual photographs, as well as series of photographs. We will look at photography in its historical context -- at the advent of documentary photography and photojournalism, and at narrative photography in its more contemporary form, as photographers use it to chronicle their own lives and to tell a story. Through the exercises of looking at and making photographic images, several core concepts of social work, along with theories of human behavior in the social environment, will be introduced. Students will learn not only about the place photography holds in our culture, but our culture itself, and the students' place in that culture. Students will critically analyze published photographs, as well as photographs made during the class. The semester will culminate in a class exhibition where students will be given the opportunity to present their photographs to the public, demonstrating their understanding of human behavior in the social environment. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed ART 0822, GAD 0822 or PHOT 0822.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SSWU 1002. Communication in Social Work Practice. 3 Credit Hours.

Communication is a major component of all social work practice across all systems levels. This course provides students with opportunities to develop knowledge, values, and skills necessary for effective communication in social work practice with individuals, families, groups, communities, organizations, and in policy arenas. Verbal, nonverbal, and written communication skills are essential for effective social work practice. Understanding and application of these communication skills are stressed in this course. NOTE: Open to majors and minors.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Repeatability: This course may not be repeated for additional credits.

SSWU 2003. The History and Values of Social Welfare. 3 Credit Hours.

This course provides an overview of the events that have influenced the provision of social services to people in the United States. The course considers the historical, political, economic, and cultural contexts in which social work and social welfare policy have evolved. Important historical events include the Elizabethan Poor Laws, the Progressive Era, the Great Depression, New Deal, Social Security Act, Civil Rights Movement, War on Poverty, the Reagan Revolution, and the policies of the Clinton, Bush and Obama administrations. The course considers the unique characteristics of the welfare system in the United States and compares it to systems in other countries. It also identifies current dilemmas facing the welfare state and efforts to further decrease the role of the federal government in social welfare programs. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work - Undergraduate.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

SSWU 2004. Social Welfare in the United States. 3 Credit Hours.

This course is the second half of a two-course sequence concerned with social welfare policy. The course is centered on the analysis of social problems and social policies in the United States. It addresses competing values, interest groups, conceptual approaches and processes involved in policymaking including implementation and evaluation. The course considers the ways in which policymakers have addressed human needs in specific areas. Topics include: different ways of defining poverty; the two major forms of income maintenance in the United States (social insurance and public assistance); health (both biomedical and social); substance abuse, hunger, and the service needs of children, older people, and those with disordered mental states.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Social Work.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SSWU 2003.

SSWU 2005. Introduction to the Social Work Profession I. 3 Credit Hours.

Introduction to the Social Work Profession I is the first of two 3-credit required courses in the BSW Program for social work majors. As an introductory social work course, SSWU 2005 introduces students to the BSW curriculum, the National Association of Social Workers (NASW) Code of Ethics, the Council for Social Work Education (CSWE) Educational Policy & Accreditation Standards (EPAS), and generalist social work practice. Additionally, because communication is a major component of all social work practice across all systems levels, this course provides students with opportunities to develop knowledge, values and skills necessary for effective communication in social work practice with individuals, families, groups, communities, and organizations. While this course focuses on individual, family, and group practice it is with the understanding social work professionals acknowledge individuals are a part of a larger environment. This course will emphasize this relationship between individuals and their environment. As such, this course will enable students to develop an understanding of various forms of oppression and injustice that are prevalent in U.S. society and their impact on individuals, families, and groups. There is a focus on populations at risk, diversity, issues of social and economic justice, and human rights as they relate to work with people in client status, the social service delivery system, and society as a whole.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (HRPR 1001 (C or higher; may be taken concurrently) or 'Y' in CRHR01), SOC 1176 (may be taken concurrently), PSY 1001 (may be taken concurrently), and (STRC 1111 (may be taken concurrently) or CSI 1111 (may be taken concurrently))

SSWU 2006. Introduction to the Social Work Profession II. 3 Credit Hours.

Introduction to the Social Work Profession II is the second introductory course in the Intro to the Social Work Profession two-course sequence. This course is taken after successful completion of Introduction to the Social Work Profession I, and is offered in the spring semester, as well as summer session II. Introduction to the Social Work Profession II builds on Introduction to the Social Work Profession I continuing to emphasize the interplay between the individual and the social environment. Theory, skills, values, and professional self-development related to community are covered. Content includes issues that affect service delivery such as racism, sexism, heterosexism, and classism. Populations at risk, diversity, and issues of social and economic justice will continue to be highlighted. Communication remains a major component of social work practice at all levels. This course provides students with additional opportunities to develop knowledge, values and skills necessary for effective communication in social work practice with individuals, families, groups, communities, and organizations. Basic communication skills are revisited, while advanced skills are introduced.

Co-requisites: SSWU 2089.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 2005 or 'Y' in CRSW05)

SSWU 2089. Service Learning in the Social Work Profession. 2 Credit Hours.

In this course students will arrange a 60-hour service learning experience, or a series of experiences totaling 60 hours. Through this experience students will develop an understanding of the social service delivery system at multiple levels, as they engage in and reflect in selected service tasks and test their own suitability for social work as a career. The purpose of this lab is to engage students in a service learning experience where they will have the opportunity to apply the skills, values, and principals discussed in SSWU 2005 and SSWU 2006. Students' academic learning will be enriched and meaningful civic learning will take place as they integrate textbook concepts with community needs. Assignments will require students to utilize critical thinking while they combine course themes and text content with experience, analysis, and action.

Co-requisites: SSWU 2006.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 2005 or 'Y' in CRSW05)

SSWU 3000. Special Topics in Social Work. 1 to 3 Credit Hour.

This course is designed to explore contemporary issues in social work practice. The design of this course provides students with an opportunity to develop knowledge of specific emerging and current social work issues or specific social work practice topics. The variable course credit allows instructors to design a wide range of courses that focus on diverse topics relevant for social work students.

Repeatability: This course may be repeated for additional credit.

SSWU 3003. History and Values of Social Welfare. 3 Credit Hours.

The History and Values of Social Welfare provides an overview of social welfare policies and institutions and introduces the basic skills in social problem and policy analysis that will be further developed in the second policy course that follows (SSWU 3004/ formerly 2004).

Field of Study Restrictions: Must be enrolled in one of the following Majors: Social Work - Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 2005 (may be taken concurrently) or 'Y' in CRSW05)

SSWU 3004. Social Welfare in the US. 3 Credit Hours.

This course is the second half of a two-course sequence focused on social welfare policy. The purpose of the course is to introduce students to the arena of social policy analysis, policy practice, and advocacy. The course explores the influence of competing values, theories, and interest groups on policy making. We also consider federal and state budget basics and policy advocacy as well as the role of the judiciary. Special attention is given to the influence of demographic characteristics in social policy formation. Additionally, the course gives students practice writing a policy brief and in organizing and presenting a policy analysis that addresses the legislative history, implementation, and evaluation of a social policy. This conceptual approach to policy practice can be used effectively in many situations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Social Work - Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 3003 or 'Y' in CRSW03) and (SSWU 2006 (may be taken concurrently) or 'Y' in CRSW01)

SSWU 3005. Helping Processes in Social Work I. 3 Credit Hours.

In this course, students are introduced to the value base, knowledge and skills of the social work profession as well as the importance of the interplay between the individual and the social environment. The course introduces students to the generalist model of social work practice, which includes practice with individuals, families, groups, communities, and organizations. It explores theories, skills, values, and professional self development in community practice and issues that affect service delivery, such as racism, sexism, heterosexism, and classism. Focus is placed on populations at risk, diversity, and issues of social and economic justice as they relate to work with clients, the social service delivery system, and society as a whole. Students begin to examine their own abilities for social work as a discipline and a career and also engage in community and agency experiences outside of class.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work - Undergraduate.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Co-requisites: SSWU 3015.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1061 or PSY 1001) and SOC 1176.

SSWU 3006. Helping Processes in Social Work II. 3 Credit Hours.

This course builds upon the beginning foundation of professional social work introduced in Social Work 3005. The focus of this continuing course, however, is on individual, family, and group practice. The course continues to examine the forms of oppression and injustice, populations at risk, diversity, and human rights as they relate to work with people in client status, the social service delivery system, and society as a whole.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Co-requisites: SSWU 3016.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SSWU 3005.

SSWU 3007. Human Behavior in the Social Environment. 3 Credit Hours.

This course is designed to explore the theoretical knowledge-base of social work in relation to human behavior and human development within the context of the social environment. Theories of human behavior are identified as undergirding the practice of social work. The course begins with an exploration of the role of human behavior theory, its limitations and strengths, and proceeds to draw from theories to provide knowledge of human development and human behavior throughout the life course from a person-in-environment perspective. The mutual influence of transactions between individuals, families, communities, social institutions and societies are explored using a social systems perspective. Interrelationships among biological, psychological, social and cultural systems as they affect and are affected by human behavior are studied using a number of interdisciplinary theoretical approaches.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any BIOL course numbered 1000 to 4999 (may be taken concurrently) or any KINS course numbered 1000 to 4999 (may be taken concurrently)), (PSY 1061 (may be taken concurrently) or PSY 1001 (may be taken concurrently)), SOC 1176 (may be taken concurrently), and (any STAT course numbered 1000 to 4999 (may be taken concurrently), MATH 1013 (may be taken concurrently), PSY 1003 (may be taken concurrently), PSY 1167 (may be taken concurrently), SOC 1167 (may be taken concurrently), or SOC 1967 (may be taken concurrently))

SSWU 3009. Human Behavior and the Social Environment: Communities and Organizations. 3 Credit Hours.

This course examines the practice of social service delivery within its organizational and environmental contexts. Social services are delivered within organizations that have varying degrees of economic, political and cultural complexity. Professional and organizational values and expectations are constantly in dynamic tension with each other. The course explores the impact of these tensions on the quality and quantity of services and addresses the professional social worker's role as a proactive force partnering with clients to advocate for services and systems improvement.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 3007 or 'Y' in CRSW04)

SSWU 3010. Special Topics in Social Work. 1 to 3 Credit Hour.

This course is designed to explore contemporary issues in social work practice. The design of this course provides students with an opportunity to develop knowledge of specific emerging and current social work issues or specific social work practice topics. The variable course credit allows instructors to design a wide range of courses that focus on diverse topics relevant for social work students.

Repeatability: This course may be repeated for additional credit.

SSWU 3011. The Social Worker in the Group. 3 Credit Hours.

The purpose of this course is to introduce students to the important and prevalent role of groups in generalist social work practice and to provide the knowledge, experience, and skills necessary for group leadership, participation, and evaluation at the BSW level. Students will study, experience, and identify the impact of personal, interpersonal, cultural, and environmental factors on group dynamics and their personal reactions to a group process. Students will also learn content to prepare them for undertaking assessments for group membership; designing and conducting task and educational groups; anticipating practice challenges; and grounding group planning and implementation in research.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 2006 (may be taken concurrently) or 'Y' in CRSW01)

SSWU 3015. Lab for Helping Processes in Social Work I. 1 Credit Hour.

Students will experience several field experiences through which they can engage in selective service tasks, develop an understanding of human service organizations and of the social service delivery system. Through these experiences they will have the opportunity to test their own suitability for social work as a career.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Co-requisites: SSWU 3005.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PSY 1061 or PSY 1001) and SOC 1176.

SSWU 3016. Lab for Helping Processes in Social Work II. 1 Credit Hour.

Students will arrange a service learning experience through Temple University's Office of Community Service. Through this experience students will begin to develop an understanding of the social service delivery system at multiple levels, as they engage in selected service tasks and continue to assess their own suitability for social work as a career.

Co-requisites: SSWU 3006.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SSWU 3005.

SSWU 3096. Institutional Racism. 3 Credit Hours.

This course is designed to introduce and sensitize students to the forms, practices, and effects of racism. The course examines the historical foundations of racism as an ideology, various racial theories and theories of racism, and the practices that perpetuate institutional systems which continue to limit the opportunities afforded to persons of color. Specifically, it emphasizes the role of institutional racism in education, human services, housing, law, business, and prisons. The complex interplay among racism and other institutionalized systems of oppression (e.g., sexism, ageism, heterosexism, ethnocentrism, and anti-Semitism) are explored throughout the semester. NOTE: This is a Writing Intensive course.

Course Attributes: SF, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 3007 (may be taken concurrently) or 'Y' in CRSW04)

SSWU 4000. Special Topics in Social Work. 1 to 3 Credit Hour.

This special topics course can explore a range of issue areas of importance to social work and give students an opportunity to study topics that are not a standard part of the curriculum. Each semester, an instructor can create a course in an area they see as particularly relevant. This course may meet the Social Work Elective requirement. Students who are seriously interested in the content must meet with the instructor to obtain authorization to register.

Repeatability: This course may be repeated for additional credit.

SSWU 4001. Seminar in Social Work Practice. 3 Credit Hours.

This course is the first semester of a two-semester integrative practice course for senior Social Work majors. Students use the seminar format to learn empowerment based social work practice skills and to apply the social work curricular areas of human behavior in the social environment, social welfare policy, and research. The background acquired from the Core or General Education curriculum and the content of the professionally related courses are used to inform social work practice. An important focus of the senior seminar is the agency environment in which the students practice. The formal and informal systems in which students do their fieldwork comprise the foci of the senior seminar classes. The classroom instructor is the liaison for the students' fieldwork agencies. This maximizes the opportunity to create an intense, supportive, and integrative educational experience. Students stay in the same section and field agency throughout both fall and spring semesters. Previously acquired skills are enhanced while new skills are developed so that students acquire the competencies for beginning generalist social work practice at all levels with systems of all sizes. NOTE: It is recommended that students take SSWU 3096, Institutional Racism, before entering this Senior Seminar, but if this is not possible, it may be taken in the fall semester of senior year.

Co-requisites: SSWU 4396.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 3004, SSWU 2004, or 'Y' in CRSW06)

SSWU 4002. Seminar in Social Work Practice. 3 Credit Hours.

This course is the second semester of a two-semester integrative practice course for senior social work majors. Students use the seminar format to learn empowerment based social work practice skills and to apply the social work curricular areas of human behavior in the social environment, social welfare policy, and research. The background acquired from the Core or General Education curriculum and the content of the professionally related courses are used to inform social work practice. An important focus of both the Social Work 4001 and Social Work 3009 is the agency environment in which the students practice. The realities of the formal and informal systems in which students do their fieldwork are constant foci of the senior seminar classes. The classroom instructor is the liaison for the students' fieldwork agencies. This maximizes the opportunity to create an intense, supportive and integrative educational experience. Students stay in the same section and field agency throughout both fall and spring semesters. Previously acquired skills are enhanced while new skills are developed so that students acquire the competencies for beginning generalist social work practice at all levels with systems of all sizes.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Social Work - Undergraduate.

Co-requisites: SSWU 4287, SSWU 4407.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SSWU 4001.

SSWU 4107. BSW Field Seminar I. 2 Credit Hours.

Field Seminar is designed to integrate the knowledge, values, and skills presented in the classroom with the field practicum experience. Students will utilize field seminar for placement agency exploration and problem-solving, including but not limited to ethical dilemmas, supervision, client interventions, and project development, with assistance from peers and course instructor/s.

Co-requisites: SSWU 4187.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 3009 or 'Y' in CRSW02)

SSWU 4187. Social Work Field Practicum I. 5 Credit Hours.

This first semester of a two-semester practicum offers the opportunity to practice social work in selected social agencies. The student spends 200 supervised hours in the field. This generalist experience provides students the opportunity to apply the knowledge, skills, and values learned in research, policy, human behavior, and practice classes. It allows them to connect social work theory with practice and to develop increasing depth in knowledge and skills. These include the development of communication, problem-solving, and networking skills within various focal systems and demonstration of purposeful use of self within a culturally competent empowerment model of practice. NOTE: For details on the field placement process, refer to the Field Education Manual available from the Field Education Office.

Co-requisites: SSWU 4001, SSWU 4396.

Repeatability: This course may be repeated for additional credit.

SSWU 4207. BSW Field Seminar II. 2 Credit Hours.

Field Seminar is designed to integrate the knowledge, values, and skills presented in the classroom with the field practicum experience. Students will utilize field seminar for placement agency exploration and problem-solving, including but not limited to ethical dilemmas, supervision, client interventions, and project development, with assistance from peers and course instructor/s.

Department Restrictions: Must be enrolled in one of the following Departments: CPHSW: Social Work.

Co-requisites: SSWU 4287.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in SSWU 4107.

SSWU 4287. Social Work Field Practicum II. 5 Credit Hours.

This second semester of a two-semester practicum offers the opportunity to practice social work in selected social agencies. The student spends 200 supervised hours in the field. This generalist experience provides students the opportunity to apply the knowledge, skills, and values learned in Research, Policy, Human Behavior, and Practice classes. It allows them to connect social work theory with practice and to develop increasing depth in knowledge and skills. These include the development of communication, problem-solving, and networking skills within various focal systems and demonstration of purposeful use of self within a culturally competent empowerment model of practice.

Co-requisites: SSWU 4002, SSWU 4407.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SSWU 4001, SSWU 4187, and SSWU 4396)

SSWU 4301. Women and Social Policy. 3 Credit Hours.

This course examines policy issues that have a major influence on the agency and well-being of women. It identifies values, attitudes, and belief systems about females that have contributed both to the problems women and girls experience and to the conceptualization and implementation of related policy responses in political, social, and economic areas. Policy areas covered include economic status, labor force participation, family, caregiving, reproduction, substance abuse, violence, health, mental health, and international issues affecting women.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4302. Emotional Disorders in Children and Adolescents. 3 Credit Hours.

This course provides students with a knowledge base in emotional and behavioral difficulties of children and adolescents from the perspective of social work. Students become familiar with the current literature in the field of child mental health. This includes knowledge about specific emotional and behavioral problems, theoretical perspectives for understanding child mental health and populations at risk, and current practices with children and families.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4303. Social Work with the Homeless. 3 Credit Hours.

This course provides a framework for the analysis of social policies and programs related to the social problems of homelessness in the United States. Although the focus of the course is on contemporary issues of homelessness, the approach includes an historical perspective in order to explore the enduring legacy of early interventions and approaches to the relief and social control of marginalized populations. The implications of differing viewpoints and alternative problem definitions for policy and service delivery are considered. The course explores shifts in housing policies. Additionally, employment programs are discussed in some detail to demonstrate their impact on the increasing numbers of Americans who are homeless.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4304. HIV/AIDS and Social Work: Prevention and Practice. 3 Credit Hours.

This course provides a comprehensive overview of HIV/AIDS, including biomedical, psychological, sociological, and global considerations for prevention and care. The course is intended to familiarize students with current knowledge for culturally competent direct social work practice with HIV-positive individuals and their families. In addition, attention is focused on organizational, community, and policy-level responses to AIDS. Specific topics include medical and cultural origins of HIV; multilevel prevention strategies and barriers to their enactment, including stigma; legal and ethical aspects of prevention, testing, and treatment; psychosocial issues for families of HIV-positive persons, including the implications of grieving, death, and dying; clinical skills in assisting HIV-positive clients/patients; ways to assess comprehensiveness of services offered in and for varying communities; social workers' varying roles in responding to AIDS as a social and health problem; and current research and policy implications of the illness. NOTE: Includes a minimum of 12 hours of volunteer work related to HIV/AIDS.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4305. Health Care Policy. 3 Credit Hours.

This course traces the evolution of health care policy in the United States and the changing roles of social workers in health care over time. A range of specific issues are discussed including access to care, quality of care, cost and financing of care as well as specific topics such as health disparities, AIDS, homelessness, and health care in prisons. The course also considers the way selected other countries have organized their health systems, the values that have informed their decisions, and the trade-offs reflected.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4306. Child Welfare Policy. 3 Credit Hours.

This course will explore the historical, philosophical, legal, social, political, and economic influences on the development of child welfare services. Selected aspects of children's lives will be examined to understand and analyze the state of children in the United States and the effects of state intervention in the lives of children and their families. A range of services from family supports to foster care, kinship care, adoption, and family preservation will be examined. Issues of access and equity, gender, differential needs and treatment of children based on race, socioeconomic status, and family type will frame the analyses. Comparisons between the U.S. and other countries will be made to address changes for the future.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4307. Alcohol and Substance Abuse. 3 Credit Hours.

This course provides students with current information about alcohol and other substance abuse. Using ecosystems and family systems frameworks, information is presented regarding the bio-psycho-social impact of alcohol and other substance abuse on individual and family functioning. Particular attention is given to treatment options and resources for change.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4308. Social Transformation. 3 Credit Hours.

This is an exploration of theories of social transformation with particular focus on analyzing and addressing societal oppression and injustice. Course topics include dynamics of empowerment and self-determination, social movements and collective action, and the risks and rewards of being a change agent. Emphasis is on participatory learning and practical application in social work and human service settings.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4309. Societal Responses to Aging. 3 Credit Hours.

This course explores public and private resources, the need for social and political action, the network of services to meet the needs of individuals and their families, present policies and practice in income maintenance, health, housing, safety, and social status. Public-private sponsorship, cost, accountability, benefit levels and administration are also explored. Student social action projects are completed and expanded.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4311. Law and Practice of Human Services. 3 Credit Hours.

This course provides an introduction to the law as it affects the human services professional and the practice of social work. The course provides an overview of major areas of the law as they relate to juveniles, families, and the elderly. It also includes a review of professional responsibilities including informed consent, privileged communication, malpractice laws and the building of effective social work/legal terms.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SSWU 4312. Loss and Grief. 3 Credit Hours.

This course examines the dynamics of loss, the stress of grief and mourning, societal attitudes about death, and cultural variations in dealing with loss and bereavement practices. The course aims to help students explore and examine personal meanings about loss and to prepare them to be responsive and helpful as social workers working with those experiencing loss and grief. Class sessions combine cognitive and experiential material.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Repeatability: This course may not be repeated for additional credits.

SSWU 4314. Beyond the Binary: Intersections of Gender, Sexuality, and Health. 3 Credit Hours.

Gender and sexuality health and identity are important aspects of the overall human experience. This course will provide an opportunity to explore the influence of social construction on development of gender and sexual identities, roles, expectations, and behavior. The intersection of body image, trauma, lived experiences, beliefs, values and expectations and how these may affect expressions of gender and sexuality will be discussed. The intersection of socioeconomic status, race, culture, religion, and geographical location will be examined in regards to gender and sexuality as a whole and access to reproductive healthcare specifically. Sexuality education policy will be considered on their priorities, assumptions, and potential effectiveness. Students will reflect on readings, class discussions, personal beliefs/values and how these may affect their future professional lives in the helping professions of social work, public health, nursing, education, and others. Note that the subject matter in this course may be considered sensitive to many, and respectful, mature engagement throughout the work is expected.

Repeatability: This course may not be repeated for additional credits.

SSWU 4396. Introduction to Social Research. 3 Credit Hours.

An introduction to the philosophy, concepts, principles, and methods of empirical research in the social and behavioral sciences. Characteristic stages and formats of social research are reviewed, with the primary aim of developing beginning competence in the critical assessment of published research and use of research techniques.

Co-requisites: SSWU 4001.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SSWU 3004 or 'Y' in CRSW06)

SSWU 4407. Evaluating Programs and Practice in Social Work. 3 Credit Hours.

This course is designed to introduce students to the range of activities and methods included in program evaluation. These are examined in the larger context within which programs exist, the specific stage of program development, and the ends to which information is to be used. Students will learn the historical context of accountability and development of program evaluation; the nature, substance and role of evaluation research; the inherent and contextual constraints and potentialities of program evaluation; the role and use of program evaluation in relation to planning, administration, and social policy; the relationship between program evaluation and practice at the individual and program levels; and the options available in doing program evaluation.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Social Work.

Co-requisites: SSWU 4002, SSWU 4287.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SSWU 3009, SSWU 4001, SSWU 4396, and SSWU 4187.

SSWU 4482. Independent Study in Social Work. 1 to 6 Credit Hour.

In this course, a program is developed by instructor and student to permit the study of issues of interest to the student and relevant to social welfare and social work. Students must meet with the faculty member within the first week of the term and agree on the topic area(s), readings, graded assignments, and due dates. NOTE: Registration for this course requires prior consent from the faculty member with whom the student wishes to study. An academic advisor will register the student once the instructor has agreed and the student communicates this information to the advisor. Also, a study plan must be submitted and preapproved by the instructor and the director of the BSW program.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Social Work, Social Work - Undergraduate.

Repeatability: This course may be repeated for additional credit.

Sociology (SOC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SOC 0817. Youth Cultures. 3 Credit Hours.

Do you listen to hip hop, spend all your time in Second Life, dress up like a cartoon character and go to anime fairs, or go skateboarding every day with your friends? Then you're part of the phenomenon called youth culture. Often related to gender, race, class and socio-economic circumstances, youth cultures enable young people to try on identities as they work their way to a clearer sense of self. Empowered by new technology tools and with the luxury of infinite virtual space, young people today can explore identities in ways not available to previous generations. Students in this class will investigate several youth cultures, looking closely at what it means to belong. They will also come to appreciate how the media and marketing construct youth identities and define youth cultures around the world. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed ANTH 0817, ASST 0817 or EDUC 0817/0917.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SOC 0818. Human Sexuality. 3 Credit Hours.

We often think about sexuality in terms of the physical and reproductive aspects of sex. But our sexuality is complex and dynamic. We will address this dynamic complexity as we explore the biological, psychological, relational, and cultural aspects of sexuality. The goal of this course is to broaden your perspective of human sexuality, and deepen your understanding and awareness of your own sexuality. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: PSY 0818/0918, SOC 0918.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SOC 0825. Quantitative Methods in the Social Sciences. 4 Credit Hours.

Psychological, political, social, and economic arguments and knowledge frequently depend on the use of numerical data. A psychologist might hypothesize that I.Q. is attributable to environmental or genetic factors; a politician might claim that hand gun control legislation will reduce crime; a sociologist might assert that social mobility is more limited in the United States than in other countries, and an economist might declare that globalization lowers the incomes of U.S. workers. How can we evaluate these arguments? Using examples from psychology, sociology, political science, and economics, students will examine how social science methods and statistics help us understand the social world. The goal is to become critical consumers of quantitative material that appears in scholarship, the media, and everyday life. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed SOC 0925, POLS 0825, POLS 0925, PSY 0825, or ANTH 0825.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

SOC 0829. The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0831. Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? With an historical and sociological framework as a basis, we will take an in-depth and more personal look at the immigrant experience as expressed through the immigrants' own voices in literature and film. Topics explored include: assimilation, cultural identity and Americanization, exploitation and the American Dream, ethnic communities, gender, discrimination and stereotyping. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0831, CRIT 0831, History 0831, Italian 0831/0931, Russian 0831, or SPAN 0831/0931.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0832. Politics of Identity in America. 3 Credit Hours.

Gay or straight. Black or white. Male or female. What do these different group identities mean to Americans? How do they influence our politics? Should we celebrate or downplay our diversity? This course explores how we think about others and ourselves as members of different groups and what consequences it has for how we treat one another. Our fundamental social identities can be a source of power or of powerlessness, a justification for inequality or for bold social reform. Students learn about the importance of race, class, gender and sexual orientation across a variety of important contexts, such as the family, workplace, schools, and popular culture and the implications these identities have on our daily lives. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed Gender, Sexuality & Women's Studies 0832/0932, History 0832, Political Science 0832/0932, or Women's Studies 0832/0932.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0833. Race & Poverty in the Americas. 3 Credit Hours.

The transatlantic slave trade was one of the most brutal and momentous experiences in human history. Attitudes toward Latino, Caribbean, African, and Asian immigrants in the United States today can only be fully understood in the contexts of slavery and the "structural racism," "symbolic violence" (not to mention outright physical violence), and social inequalities that slavery has spawned throughout the region. Although focusing primarily on the United States, we will also study the present entanglements of poverty and race in Brazil, Haiti, and other selected nations of "The New World," placing the U.S. (and Philadelphia in particular) experience in this historical context. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed REL 0833/0933, ANTH 0833, or LAS 0833/0933.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0835. Ethnicity and the Immigrant Experience in the U.S.. 3 Credit Hours.

How do immigrants learn to become American? How does living an ethnic identity vary for different groups? When does ethnicity become a chosen identity or an unwanted label? How do we learn to value some aspects of ethnicity but not others? What are markers of ethnicity? How do language, food, music, family and community work to provide authenticity to the American immigrant experience? What happens to ethnicity with assimilation to the American way of life? Can ethnicity combat the tidal social expectations to conform to the dominant culture? Using a variety of written materials including novels that explore the ethnic identity of different groups, this course raises questions about how ethnicity and American identity are connected. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Sociology 0835, 0935, 1476, 1496, R064, X064.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

SOC 0845. Deadly Contagions: Past, Present, and Future Pandemics. 3 Credit Hours.

Over the course of recorded history, infectious diseases have been responsible for the deaths of hundreds of millions of humans. Hundreds of millions - perhaps billions - more suffered terrible and sometimes lasting illness due to their encounters with pathogens. What drives deadly contagions? Can they be stopped, and if so, how? What if anything can be learned from past pandemics to guide us in the present and the future? This course combines sociological, historical, and epidemiological perspectives on infectious diseases. We will consider contagions as biological and medical events, but also as products - and producers - of social, political, and economic systems and inequalities. We will explore the concept of social contagions (for example, the spread of fears, misinformation, behaviors, and attitudes) as well. Special emphasis is placed on understanding how the centuries-long processes of globalization and urbanization have shaped epidemics and pandemics in the past and the present, and how these and other forces, like climate change and mass migrations, are likely to affect the nature of infectious diseases in the future. A basic goal of our scholarly explorations is understanding how to prevent needless deaths during the epidemics and pandemics to come.

Course Attributes: GB, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0851. Gender in America. 3 Credit Hours.

Being a man or a woman means feeling like a man or a woman. People display gender by learning the routines and expectations associated with being male or female. How do people learn gender? How does living in a gendered society lead to differences in power and opportunities between men and women? How do race, ethnicity and sexuality affect the way gender is experienced for these different groups? How does gender acquire such important meaning in terms of identity and behavior? Using a variety of written materials including novels that explore gender identity construction, this course looks at how gender has become such a prominent feature of life in America. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Gender, Sexuality & Women's Studies 0851; Sociology 0851, 1676, 1696, C081, X081; Women's Studies 0851, 1676, 1696, C081, X081.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0857. Sport & Leisure in American Society. 3 Credit Hours.

Explore the complexity and diversity of American society through the study of sport and leisure. To what extent does the way we play or spectate sports, the way we plan or experience leisure time, reflect American values? As we trace a brief history of the United States through the lens of sport and leisure, we will observe how concepts of freedom, democracy and equality are tested through time. Issues of race, ethnicity, gender, age, disability, and socio-economic class will be prominent as we observe American ideals both upheld and contradicted in the context of the way Americans recreate. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AAAS 0857, AAS 0857, STHM 0857 or REL 0957.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

SOC 0861. Urban Dynamics: Global, Regional, and Local Connections. 3 Credit Hours.

Cities are a study in contrast - both a source of opportunity and a place where great wealth and poverty coincide. U.S. cities face enormous challenges as globalization has sparked a new era of urban innovation, yet has also intensified inequality and spurred new technologies of social control. This course asks: How have U.S. cities changed over the last century? How is globalization impacting the lives and opportunities of city dwellers? How do gender, age, race/ethnicity, class, and citizenship affect urban residents' experiences? How do urban policies and social movements advance or impede social justice across groups and places? Course topics include the social, economic, and political forces restructuring cities, inequality and diversity in the city, cities in the global economy, and the future of cities. Students cannot receive credit for this course if they have successfully completed CTRP 0861, CRP 0861 or SOC 0861.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0862. Development & Globalization. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: SOC 0962, History 0862, POLS 0862/0962, or GUS 0862.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0918. Honors Human Sexuality. 3 Credit Hours.

Our sexuality is a core part of being human. We often think about sexuality in terms of the physical and reproductive aspects of sex. But our sexuality is complex and dynamic. We will address this dynamic complexity as we explore the physical, psychological, relational, and cultural aspects of sexuality. The goal of this course is to broaden your perspective of human sexuality, and deepen your understanding and awareness of your own sexuality and the many influences on this essential part of yourself. (This is an Honors course.) NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: PSY 0818/0918, SOC 0818.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

SOC 0925. Honors Quantitative Methods in the Social Sciences. 4 Credit Hours.

Psychological, political, social, and economic arguments and knowledge frequently depend on the use of numerical data. A psychologist might hypothesize that I.Q. is attributable to environmental or genetic factors; a politician might claim that hand gun control legislation will reduce crime; a sociologist might assert that social mobility is more limited in the United States than in other countries, and an economist might declare that globalization lowers the incomes of U.S. workers. How can we evaluate these arguments? Using examples from psychology, sociology, political science, and economics, students will examine how social science methods and statistics help us understand the social world. The goal is to become critical consumers of quantitative material that appears in scholarship, the media, and everyday life. (This is an Honors course.) NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: SOC 0825, POLS 0825, POLS 0925, PSY 0825, or ANTH 0825.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

SOC 0929. Honors: The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

SOC 0935. Honors Ethnicity and the Immigrant Experience in the U.S.. 3 Credit Hours.

How do immigrants learn to become American? How does living an ethnic identity vary for different groups? When does ethnicity become a chosen identity or an unwanted label? How do we learn to value some aspects of ethnicity but not others? What are markers of ethnicity? How do language, food, music, family and community work to provide authenticity to the American immigrant experience? What happens to ethnicity with assimilation to the American way of life? Can ethnicity combat the tidal social expectations to conform to the dominant culture? Using a variety of written materials including novels that explore the ethnic identity of different groups, this course raises questions about how ethnicity and American identity are connected. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Sociology 0835, 0935, 1476, 1496, R064, X064.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

SOC 0962. Honors Fate, Hope, and Action: Globalization Today. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: SOC 0862, History 0862, POLS 0862/0962, or GUS 0862.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO, SI

Repeatability: This course may not be repeated for additional credits.

SOC 1002. Professional Development for Sociology Majors. 1 Credit Hour.

Did you know that the American Sociological Association recognizes over 50 different specialized areas of sociological study? Did you know that Temple sociology graduates pursue careers in a range of fields including law, medicine and health, business, non-profit organizations, community planning, housing, market research, and education? In this professional development seminar, faculty and alumni from the department will help you navigate your options to help you maximize your sociological studies for impact in the real world. During the semester, you will discover sociology internship opportunities and courses, you will meet and network with recent graduates who are putting their sociology degree to work, and you will begin to assemble a sociology portfolio that can be used to present your sociological knowledge and skillset to current and future employers. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

SOC 1167. Social Statistics. 3 Credit Hours.

The objective of this course is to enhance data comprehension and explain statistical information. The emphasis is on applications, with examples taken from a variety of sources including the mass media. The course covers the uses and interpretation of descriptive statistics, the requirements of valid statistical sampling, the bases of statistical inference, and the analysis of cross-tabular data. NOTE: (1) This course is not open to students who have taken Mathematics 1013 (C067) or Psychology 1167 (C067). (2) This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

SOC 1176. Introduction to Sociology. 3 Credit Hours.

This course introduces students to the discipline of sociology, which offers distinctive concepts and methods to understand human behavior and the societies we all inhabit. How do societies evolve and change? What can be learned from comparing them? How do they make us into the kinds of people we are, and which facts either sustain or shatter everyday life? What do culture, power, bureaucracy, racial discrimination, inequality, sexual and social conflict have in common? In this course, students will learn about themselves by exploring the hidden patterns in the world around them. By the end of the semester, students will have a firm grasp of the sociological imagination and how to use it to understand our increasingly diverse and complex world. Note: Students may only earn credit for one of the following: SOC 1176, 1576, or 1976.

Course Attributes: IN, SI

Repeatability: This course may not be repeated for additional credits.

SOC 1576. Introduction to Sociology for Health Professions. 3 Credit Hours.

This course offers an introduction to the discipline of sociology. Focused on a systematic study of social life, the discipline of sociology offers distinctive concepts and methods to understand human beings and the societies they inhabit. The primary operating principle of sociology is to shift analytic emphasis--common to the health professions--from individual characteristics to the characteristics of broader social contexts, groups, and institutions. This Introduction to Sociology is specifically intended for those with interests in the health professions. We apply each topic we study to issues in health and medicine, pairing general sociology readings with readings specifically on health and medicine. Students preparing for the revised MCAT (2015) are especially encouraged to take this course.

Duplicate credit warning: Students who have received credit for SOC 1176 or SOC 1976 Introduction to Sociology (or its equivalent in transfer) may not receive additional credits for this course.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SOC 1967. Honors Social Statistics. 3 Credit Hours.

The objective of the course is on understanding data and explaining statistical information. The emphasis is on applications, with examples taken from a variety of sources including the mass media. The course covers the uses and interpretation of descriptive statistics, the requirements of valid statistical sampling, the bases of statistical inference, and the analysis of cross-tabular data. NOTE: (1) This course is not open to students who have taken Mathematics 1013 (C067) or Psychology 1167 (C067). (2) This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, QB

Repeatability: This course may not be repeated for additional credits.

SOC 1976. Honors Introduction to Sociology. 3 Credit Hours.

This course introduces students to the discipline of sociology, which offers distinctive concepts and methods to understand human behavior and the societies we all inhabit. How do societies evolve and change? What can be learned from comparing them? How do they make us into the kinds of people we are, and which facts either sustain or shatter everyday life? What do culture, power, bureaucracy, racial discrimination, inequality, sexual and social conflict have in common? In this course, students will learn about themselves by exploring the hidden patterns in the world around them. By the end of the semester, students will have a firm grasp of the sociological imagination and how to use it to understand our increasingly diverse and complex world. Note: Students may only earn credit for one of the following: SOC 1176, 1576, or 1976.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IN, SI

Repeatability: This course may not be repeated for additional credits.

SOC 2002. Leadership for Social Change. 3 Credit Hours.

Leadership for social change, sometimes called social entrepreneurship, is the process of community-based collaborative change-making. It is the application of both critical thinking and critical action strategies to targeted social problems. For individuals, it is found in the movement from criticism to leadership. For communities, it is found in the claiming of self-efficacy. This course is rooted in sociology, but the readings and assignments extend from sociological analysis to social activism, community engagement, business, and art.

Repeatability: This course may not be repeated for additional credits.

SOC 2111. Sociology of Sports. 3 Credit Hours.

This course analyzes sports as a socializing agent and as a set of cultural, social, economic and political institutions. The course will begin with a distinction between play, sports, and organized sports. We will then look at the role of sports in childhood and adolescence, with a particular emphasis on gender and sports. Next, we examine the role of sports in collegiate life and finally at the professional level. As a course in sociology, this class will examine the connections between sports and race, gender, social class, politics, and the economy.

Repeatability: This course may not be repeated for additional credits.

SOC 2122. Global Sports. 3 Credit Hours.

This course centers on the globalization of sports. It views sports as a set of cultural, social, economic and political institutions and practices and asks the following orienting questions: 1) "How have forces of globalization changed the world of sport?" and 2) "What do the changes in sport teach us about globalization processes more generally?" The course will cover the structure, organization, and culture of globalized sport. Topics include: the business of global sports, the flow of labor and capital in global sports, the impact of culture on sport and sport on culture, the role of communication, transportation, and technology in the globalization of sport.

Repeatability: This course may not be repeated for additional credits.

SOC 2128. Men and Masculinities. 3 Credit Hours.

This course examines and interrogates masculinity by drawing upon the diverse voices and experiences of men and boys across age, race, ethnicity, class, sexuality, ability and religion. This course will explore the social and personal meanings of "manhood" and its impact on relationships, institutions and in our public and private lives.

Repeatability: This course may not be repeated for additional credits.

SOC 2130. Selected Topics in Sociology. 3 Credit Hours.

The topics will vary and cover areas not covered by the current roster of classes. Students should consult with the instructor for details.

Repeatability: This course may be repeated for additional credit.

SOC 2163. Area Studies: Latin American Development. 3 Credit Hours.

This course examines patterns of socioeconomic and political development in different parts of Latin America. Topics to be studied include: agrarian reforms, patterns of industrialization and urbanization, financial dependency, military regimes, revolutionary movements, and transitions to democracy. NOTE: This course is taught in Spanish for the LASS program.

Repeatability: This course may not be repeated for additional credits.

SOC 2166. Money: Who Has It, Who Doesn't, Why It Matters. 3 Credit Hours.

This course looks at the sociological issues surrounding money as a mechanism and medium of exchange. The course covers history of money and the development of finance. The course also explores the role of money in shaping lives: friendship patterns, life chances, educational opportunities, and health and well-being. Students will learn about structural changes in the economy that stem from the globalization of money. Students who have earned credit for Sociology 1166 will not earn additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

SOC 2168. Sociology of Popular Culture. 3 Credit Hours.

Popular culture is ubiquitous in contemporary life, in the forms of television, books, radio, internet, music, video games, and film. It has been accused of making us more violent and less healthy, more biased and less participatory in society. Popular culture has also been celebrated for making art democratic and giving voice to a wider range of people. This course surveys what we know about the social effects of popular culture including issues like representations and stereotypes, media consolidation, and the impact of new technologies.

Repeatability: This course may not be repeated for additional credits.

SOC 2171. Sociology of Law. 3 Credit Hours.

This class looks at what is both special and ordinary about legal systems. The law's features and the scope of its functions in society are examined and compared with other institutions, and with legal systems in societies and periods other than our own. It considers legal institutions as a product of actions and interactions of both specialists and ordinary citizens. Additionally, it examines the role of the law as a potential vehicle and agent of change. It gives a practical sociological introduction to the professional study of law.

Repeatability: This course may not be repeated for additional credits.

SOC 2176. Is College Worth It? Student Debt and Student Gain. 3 Credit Hours.

This course offers a sociological take on the costs and benefits of colleges. The first three quarters are about the college experience and how it affects students and alumni. We will look at what students get out of college in terms of learning, careers, extra-curricular activities, and socializing. We will look at the current state of research on whether or not the financial benefits of college are worth the costs. In the remaining time we will look at the political and organizational aspects of colleges, including why college costs have risen so much, why student indebtedness has increased, the rise of the for-profit sector in higher education, and the future of higher education.

Repeatability: This course may not be repeated for additional credits.

SOC 2179. Racial and Ethnic Stratification. 3 Credit Hours.

This course focuses on the elements of racial and ethnic stratification as they appear in the United States and other nations. It outlines the concepts that shape the sub-field of race and ethnic relations, in addition to examining how sociologists have theorized about racial and ethnic hierarchies and their role in the organization and distribution of social resources. Through an analysis of the historical and contemporary circumstances of selected communities in the United States, it seeks to reveal which theory best explains the experience of particular communities and which best explains societal patterns of inequality. Additionally, the course examines racial and ethnic relations in other nations and as a global phenomenon in an effort to reveal the common elements of racial inequality regardless of national identity. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

SOC 2333. Creative in the City: Bohemians, Hipsters, Punks, and Creatives. 3 Credit Hours.

This course will provide required readings, short lectures and class discussions that will enable students to address the following questions: What are the cultural practices and ideologies of urban dwellers that have viewed themselves or have been viewed by others to be relatively "creative," "hip," or "bohemian"? What types of contemporary urban enclaves have they created? To what extent have those living within these enclaves maintained continuity with their historic counterparts (e.g., nineteenth century French bohemians, twentieth century American hipsters, 1980's Punks, the pseudo bohemian "posers" of numerous eras)? How do these enclaves affect, and get affected by their contemporary global, neo-liberal urban context?

Repeatability: This course may not be repeated for additional credits.

SOC 2522. Sociology of the Self. 3 Credit Hours.

What is the self? Where does the self come from? And why does the self matter? In this course, we seek to answer these questions from the standpoint of symbolic interactionism - a sociological perspective that explains human action in terms of the meanings that things have for the actors. Meanings are not regarded as inherent in objects but rather as emerging from interactions among humans and between humans and their environments. The self, which plays a pivotal role in human interaction, is both a product and a force of social life. This course is divided into three parts. In Part 1, we conceptualize the self as a symbolic object that emerges from social interaction. In Part 2, we examine the origin of the self, the "true self," identity construction, self and autism, as well as other related issues. And in Part 3, we analyze the impact of the self on mental health and interpersonal relations. The ultimate goal of this course is to promote a deeper self-understanding and a better relationship with others.

Repeatability: This course may not be repeated for additional credits.

SOC 2530. Selected Topics in Medical Sociology. 3 Credit Hours.

The topics will vary and cover medical topics not in the current roster of classes. Please consult with the instructor for details. Health Track students can use this course to fulfill the requirement for four health-related courses.

Repeatability: This course may be repeated for additional credit.

SOC 2545. Food for Thought: Sociological Thinking About Food. 3 Credit Hours.

Are we what we eat? How have our choices about what (and how much) to eat been shaped by society, and by our social and cultural identities? How and why are our culinary choices associated with social pleasures, social anxieties, negative public health outcomes, and the changing environment? Can we make alternative food choices and support food-oriented social change that help create a more equitable, sustainable, healthy and delicious world? This course raises these and other sociological questions about food and food systems, critically examining some of the answers that sociologists and other social scientists have provided. The focus will be on the U.S., but a range of relevant global issues and case studies will be addressed.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SOC 2552. Health and Disease in American Society. 3 Credit Hours.

In this course, students research health and disease in the United States, placing special emphasis on the historical changes in the ideas of health and disease and the nature of the responses to illness in society. We examine social/political influences on morbidity and mortality and the experiences of subgroups of the population with illness and with the medical systems they must confront. Finally, we discuss the problems associated with financing health care, with making and implementing health policy, and the issues raised by the growing field of bio-ethics. The course contains instruction in several research methods including the calculation of rates, standardization, and the construction and reading of tables. We also focus throughout the course on how the authors of the readings know what they report: for example, what methods did they use. Finally, students do a small well-defined research project for their semester paper.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SOC 2555. Sociology on Drugs. 3 Credit Hours.

This course focuses on the use and abuse of drugs as a common social and cultural practice rather than as a moral, medical, legal, or epidemiological problem. While conventional wisdom considers drug use and abuse to be a social problem, we will consider drug use and abuse as a response to economic, political, and cultural problems. Recurring course themes include the relationship between drug use and racial and class conflict; various perspectives on the origins of drug use and abuse; the pros and cons of harm reduction versus legal interventions; the nature and extent of drug using subcultures; the individual and community-level effects of drug policy, legislation, and enforcement; and depictions of drug use in the media.

Repeatability: This course may not be repeated for additional credits.

SOC 2565. Race, Science, Health, and Medicine. 3 Credit Hours.

Race and scientific medicine are powerful forces shaping the modern world. This course charts the origins and emergence of these two forces in the 17th century and explores how they have informed each other and continue to form each other in the 21st century. Topics include slavery and medicine, eugenics and racial science, genocide and the rise of medical ethics, disease and distinctiveness, racial disparities in health, and the status of race in the era of genomics.

Repeatability: This course may not be repeated for additional credits.

SOC 2572. Sex & Society. 3 Credit Hours.

Sex is at the forefront of many legislative, cultural and personal debates. This course uses sociological perspectives to examine several key areas of conflict in the sexual culture war, including sex education in American schools, global public health policies and contraception, changing definitions of marriage and family, abortion rights, the personal and national impact of prenatal testing and reproductive technologies, and the growing concern over issues such as sexual violence on college campuses, child pornography, and sex trafficking.

Repeatability: This course may not be repeated for additional credits.

SOC 2575. Science, Technology & Society. 3 Credit Hours.

This course examines the relationships between science, technology, and society, and focuses on the social, historical, and cultural contexts that shape these relationships. Students are introduced to the history of human technological development, how it has been shaped by historical and cultural contexts, and how it has, in turn, influenced the social world. The course will also examine the ways in which scientific facts are established among the public. This course is intended for sociology students interested in better understanding the technological and scientific dimensions of the social world. It is also intended for students in physical and natural sciences and engineering fields interested in the social dimension and implications of their work.

Repeatability: This course may not be repeated for additional credits.

SOC 2922. Honors Global Sports. 3 Credit Hours.

This course centers on the globalization of sports. It views sports as a set of cultural, social, economic and political institutions and practices and asks the following orienting questions: 1) "How have forces of globalization changed the world of sport?" and 2) "What do the changes in sport teach us about globalization processes more generally?" The course will cover the structure, organization, and culture of globalized sport. Topics include: the business of global sports, the flow of labor and capital in global sports, the impact of culture on sport and sport on culture, the role of communication, transportation, and technology in the globalization of sport.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

SOC 3082. Independent Study. 1 to 4 Credit Hour.

This course involves an intensive study in a specific area of sociology. The proposal outlining the work to be completed must be filed in the department office and with the undergraduate chair before the end of the first two weeks of the semester. NOTE: This class may not be used as a substitute for required sociology courses.

Repeatability: This course may be repeated for additional credit.

SOC 3176. Sociology of Education. 3 Credit Hours.

Did you know that SAT scores, and other standardized tests, vary by parents' education? In this course we examine the many ways students' social positions shape educational experiences and educational outcomes. We learn about the ways in which students' race, gender, and social class origins shape school experiences. We also examine an important question: how much does education provide a pathway for social mobility for American children? We will also address a number of other topics including current proposals for improving American education. Students will engage with a local high school by aiding high school seniors with senior graduation projects.

Repeatability: This course may not be repeated for additional credits.

SOC 3185. Internship in Sociology. 1 to 4 Credit Hour.

Students spend a semester working in a public or private agency or organization where they gain sociologically relevant experience and participate in applied sociological research. Interns will learn about a substantive sociological issue through reading, writing, and hands-on experience. Students will be required to write a term paper that includes a review of the sociological literature relevant to the internship and an analysis of the data they gathered.

Repeatability: This course may be repeated for additional credit.

SOC 3201. Statistical Methods in Sociology. 4 Credit Hours.

Duplicate Course: This course is not open to students who have taken Psychology 2168 (0122). This course introduces students to the basics of social statistics. It covers how to describe data, how to generalize from a tiny sample to an extremely large population, and how to make comparisons. It addresses three major questions for every statistical procedure introduced in this course: What is the basic logic of this procedure? What is this procedure for? How to use this procedure? The lecture part of this course focuses on the first two questions and the lab part of the course on the third question. By the end of the semester, students will develop a repertoire of statistical techniques so they know what situations will call for what analysis (t-tests, chi-square, regression) and how to carry out those analyses using statistical software. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

SOC 3208. Globalization, Development, and Labor in East Asia. 3 Credit Hours.

This undergraduate course will introduce students to the major perspectives and debates in social sciences on globalization, development, and labor in East Asia, primarily focusing on China, Japan, South Korea, and Taiwan. We will examine: What is globalization and how is it affecting countries in East Asia? What are different development strategies and paths pursued in those countries? How have workplaces changed and how have workers fared in East Asia under globalization? What roles have different kinds of labor unions played? How have workers responded, economically and politically? We will also discuss the social and political origins of "East Asian Miracle" and the impact of the rise of China on the region and the world. Through lectures, discussions, small group projects, and documentary films, students will be engaged with key theoretical debates and develop their own perspectives and research skills on these themes.

Repeatability: This course may not be repeated for additional credits.

SOC 3209. Immigrant America: Belonging and Integration. 3 Credit Hours.

This course addresses central questions relating to the new immigrants entering the United States since the 1960s. It examines: 1) why people move and the policies by which foreign "outsiders" become integrated; 2) what determines the economic, political, cultural, linguistic and psychological adaptation processes of different types of immigrants and refugees, and of their children; 3) the changing ethnic and generational composition of the American population; 4) the influence of gender and race on immigrant identities; 5) the struggle of second-generation youth with their backgrounds; and 6) new meanings around sexuality and romance emerging in transnational families that straddle generations and international borders.

Repeatability: This course may not be repeated for additional credits.

SOC 3217. The Sociology of Affect and Emotions. 3 Credit Hours.

This course offers students the opportunity for specialized study of one of the most debated issues in sociology and cultural studies nowadays: affect and emotions; while dealing with the latest developments in the sociology of emotions, the cultural study of feelings, and the proposals advanced by the "affective turn." In this course, we will spend a good amount of time on understanding affect and emotions as lived experience in the daily lives of individuals, by exploring the social side of affect and emotions. An important part of the course is dedicated to the so called "affective turn," which refers to a "wilder," more encompassing conceptualization of affect, highlighting difference, process and force in more general terms (affect as "intensities"). While the approach that emphasizes emotions relates affects entirely to human bodies, the so-called "affect studies" tends to address the conceivable relevance of any kind of bodies (organic, inorganic, artificial, imaginary, discursive, etc.). Another major theme of the course is the relationship between race and emotions, and music and emotions.

Repeatability: This course may not be repeated for additional credits.

SOC 3219. Understanding Globalization. 3 Credit Hours.

We will explore the debates on the economic, political, cultural, social, and environmental aspects of globalization and the accelerating increase in worldwide social connections. We will pay particular attention to the relationships between globalization and global inequalities by place, social class, race and ethnicity, and gender. Other topics include neoliberal and critical perspectives on globalization, global networks of production and distribution, global capitalism, globalization and the environmental crisis, and resistance to the current form of globalization through global social movements. Note: SOC 3219 was previously taught with the title "Globalization: Causes, Promises and Discontents." Students who have already received credit for this course number under the prior title will not be able to repeat this course for additional credit.

Repeatability: This course may not be repeated for additional credits.

SOC 3221. Global Development. 3 Credit Hours.

This course is an introduction to the sociology of economic development and social, political, and cultural change. We will study the concepts, theories, historical processes, and issues regarding the interrelations and transformations of the social groups, economies, political systems, and cultures of developing societies - and their relationships with developed countries - over time. Thus, our focus will be on developing countries, our scope will be global and long-term, our perspective will be sociological but interdisciplinary, and our methodology will be historical-comparative. The primary questions we will address are: What is development? How do "developing societies" differ from "developed societies"? What are the relationships of "developing" and "developed" societies? How can we best approach an understanding of why the historical experiences of "developing" countries seem to differ so much from those of "developed" countries? In the first half of the course, we will focus on understanding, largely through case studies, the main theories of development: modernization theory, dependency, world-system analysis, and neoliberalism. In the second half of the course, we will expand our empirical and theoretical understanding by examining development and globalization, gender, ethnicity, ecology, and global social movements. NOTE: Course formerly called "Sociology of International Development."

Repeatability: This course may not be repeated for additional credits.

SOC 3222. Sociology of Religion. 3 Credit Hours.

This course examines the role of religion in constructing human realities. It emphasizes how human understandings of the world and of reality are constructed socially through collective action with religion playing a prominent role. It looks at how religion influences individual and collective action; the intersection of religion with politics and media; religion's connection to race, gender, class, and sexual orientation; and the connection between religion and science.

Repeatability: This course may not be repeated for additional credits.

SOC 3223. East to America: The Sociology of Asian Americans. 3 Credit Hours.

The purpose of this course is to explore contemporary issues for Asian Americans through a sociological lens. To do so, we will place contemporary Asian American experiences within the larger social context by examining the social, political, and economic institutions that have shaped the Asian American experience. As such, students will explore sociological concepts of immigration, adaptation, and assimilation while also examining issues of race, ethnic conflict, education, gender, sexuality, social movements, and media representations. Note: This course is cross-listed with Asian Studies 2107, History 2107, and American Studies 2107. Students may only receive credit for one of these courses: ASST 2107, AMST 2107, HIST 2107, or SOC 3223.

Repeatability: This course may not be repeated for additional credits.

SOC 3230. Selected Topic in Sociology. 3 Credit Hours.

The topics will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

Repeatability: This course may be repeated for additional credit.

SOC 3240. Selected Topic in Sociology. 3 Credit Hours.

The topics will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

Repeatability: This course may be repeated for additional credit.

SOC 3242. Constructing Race and Ethnicity. 3 Credit Hours.

This course examines the social construction of race and ethnicity in the United States. It investigates the use of race and ethnicity as institutionalized, official categories that shape individual identity and experience, as well as opportunities and resource distribution. The course will analyze the formal procedures and informal interactions that define race and ethnicity as socially meaningful categories for individuals and groups. The course seeks to make the connections between the macro social organization of race and ethnic categories and the micro social interactions that shape race and ethnic experience.

Repeatability: This course may not be repeated for additional credits.

SOC 3243. Social Movements and Conflict. 3 Credit Hours.

The central theme of the course is conflict as a basic social process and the organization of mass movements to alter political and social conditions. A variety of social movements are studied: reformist and revolutionary movements; nationalist, messianic, and populist movements; identity politics and issue-oriented movements. Organizational strategies and ideological orientations of the movements are also examined.

Repeatability: This course may not be repeated for additional credits.

SOC 3246. Theories of Identity. 3 Credit Hours.

Various developments within the twentieth-century social thought have forced an attention to identity. Particular theoretical developments such as Marxism, psychoanalysis, structuralism, feminism and the "linguistic turn" have not simply highlighted issues of identity, but, more importantly, they have problematized identity as a contingent construction process. In that regard, the theoretical impulse, in general, has moved from a conception of identity as something people have, to processes of identification that people constantly perform. This course offers students the opportunity for specialized study of one of the most debated issues in contemporary sociology: social and cultural identities.

Repeatability: This course may not be repeated for additional credits.

SOC 3247. Ideology and Social Change in Japan. 3 Credit Hours.

A sociological look at the conditions which have contributed to Japan's emergence as a world economic force. How do culture, social organization, life style, ideology, and global politics affect Japan's rapid rise to power? Is Japan a closed society? What significance do factors such as racism, religion, education, family, the military, class, and population changes hold for understanding what has happened in Japan and in Japan's relations with outsiders, particularly the U.S.? What significance does this analysis have for the future of Sociology in the U.S.? Duplicate credit warning: This course is regularly cross-listed with ASST 3247. Students may receive credit for only one course from: ASST 3247, ASST 3947, SOC 3247, or SOC 3947.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SOC 3249. Social Inequality. 3 Credit Hours.

In this course, we examine a number of the fundamental dimensions of inequality in our society. Among the questions raised are: 1) How great are the inequalities by class, race and ethnicity, and gender? 2) What is the nature of this inequality? Where does it come from? How deeply does it affect the lives of individuals? 3) How do these dimensions of equality interact? This course stresses participation, group work, and personal research on topics of interest to the student.

Repeatability: This course may not be repeated for additional credits.

SOC 3250. Selected Topic in Sociology. 3 Credit Hours.

The topics will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

Repeatability: This course may be repeated for additional credit.

SOC 3251. Urban Sociology. 3 Credit Hours.

Urban sociology asks how the physical and built environments, technology, population growth and shifts, governmental policy, and cultural and social organization shape the location and course of the development of urban areas. It focuses on urban America, although there is frequent reference to the development of urban areas elsewhere in the world in order to highlight commonalities and differences in the forces which structure urban life. Students research and write a sociological history of a block and census tract in the Philadelphia metropolitan area. It may be a history of the one in which they grew up, in which they now live, or another in which they have an interest. The objective is to combine quantitative and qualitative data to trace how and why the selected area developed as it did. A student will typically combine data drawn from several censuses with archival records to depict how the area changed in the context of the larger evolution of the community in which it is located.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SOC 3256. Political Sociology. 3 Credit Hours.

This course analyzes the social basis of political institutions and political action, stressing the importance of both in the life of communities and individuals. Our emphasis is on the influence of social classes, professional and occupational groups, political parties, social movement organizations, and other notable interest groups have on the political system. We discuss the formation and organization of political activity and its varied outcomes.

Repeatability: This course may not be repeated for additional credits.

SOC 3258. Women and Work. 3 Credit Hours.

Women's work will be defined in the fullest sense. We will examine the gender division of labor in society and changes in women's paid and unpaid work from both historical and cross-cultural perspectives. We will discuss trends in women's employment and the rewards of women's work by race, marital status, etc., and trends in household work and child care. Reasons for women's expanded opportunities and persistent barriers will be explored.

Repeatability: This course may not be repeated for additional credits.

SOC 3259. Women and Poverty. 3 Credit Hours.

This course focuses on women's poverty in the U.S. and the social welfare policies designed to address it. We begin with an overview of poverty in the U.S., ways to measure poverty, and how to read census tables on poverty and income. We then dive into the history of the welfare state in America, starting with the Poorhouse Era and moving through 1996's welfare reform legislation. The second part of the course addresses major issues and themes in poverty scholarship: the culture of poverty thesis, low-wage work, teenage motherhood effects, marriage and single motherhood, social capital, and neighborhood effects. We conclude with a comparative analysis of U.S. and international welfare states.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

SOC 3261. Research Design and Methods. 4 Credit Hours.

This course is an introduction to the logic and methods of social research. We examine the issues, including internal, external, and construct validity, that arise in doing and evaluating both quantitative and qualitative research. The laboratory time involves both computer applications and instruction in the use of the library for research.

Repeatability: This course may not be repeated for additional credits.

SOC 3301. Philadelphia as a Social Laboratory. 3 Credit Hours.

This course uses a community-engaged learning approach that enables direct interaction with the city of Philadelphia and familiarity with Philadelphia-based organizations, activists, and institutions. Each week students are expected to participate in hands-on activities, including site visits and panel discussions, to witness the way various social issues play out in Philadelphia. This includes issues like racial inequality, history and memory, public arts and social justice, neighborhood change, education, public space, homelessness, incarceration and criminal justice, health, and housing. We consider various ways to approach complex social challenges by critically assessing the relationship between "problems" - as they are defined - and "solutions" - as they are developed. The course provides an opportunity for students to familiarize themselves with organizations and institutions working to address the social challenges that face the city of Philadelphia, its people, and its communities.

Repeatability: This course may not be repeated for additional credits.

SOC 3396. Development of Sociological Thought. 3 Credit Hours.

Theory is the narrative account, the explanatory framework, that underlies and grounds all knowledge. Sociological theories are accounts of the fundamental principles and relationships that organize society. This course focuses on the most successful sociological theories, emphasizing the work of scholars, mostly European and American, who contributed the most influential ideas to modern sociology. Attention is also paid to the social and historical context in which the major theories emerged.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

SOC 3430. Selected Topics in Sociology. 3 Credit Hours.

The topics will vary and cover areas not covered by the current roster of classes. Please consult with the instructor for details.

Repeatability: This course may be repeated for additional credit.

SOC 3511. Environmental Sociology: The End of the World as We Know It?. 3 Credit Hours.

This course will introduce you to the sociology of the environment - the study of the interrelationships of human social systems and ecosystems - with a primary focus on their social aspects. We will focus on how social systems can be rearranged to ensure environmental justice, sustainability, and human and planetary well-being. Topics may include the ecological footprint, pollution and toxins, and climate change; the limits to growth; the treadmill of production vs. ecological modernization; technology and productivity; corporations, the media and the politics of climate change denial; unequal ecological exchange between developed and developing countries; and the nature and impacts of environmental movements. Duplicate credit warning: This course was previously offered as "Sociology of the Environment"; students who have earned credits under this title will not earn additional credits for this course.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

SOC 3525. Urban Health. 3 Credit Hours.

Cities are home to half the world's population and urban populations are rapidly growing. Yet we know too little about why some urban populations are quite healthy and others quite sick and why some live long and others die young. This course blends medical sociology with population health science to explore these and other important questions in urban health. The focus is on U.S. cities with additional examples drawn from global cities. Attention will also be given to rural and urban and suburban differences in health, disease, and mortality. The goal is to better understand if and how cities might become places where people can live longer, healthier, and happier lives.

Repeatability: This course may not be repeated for additional credits.

SOC 3530. Selected Topics in Medical Sociology. 3 Credit Hours.

The topics will vary and cover medical topics not in the current roster of classes. Please consult with the instructor for details. Health Track students can use this course to fulfill the requirement for four health-related courses.

Repeatability: This course may be repeated for additional credit.

SOC 3551. Critical Race Feminist Theory. 3 Credit Hours.

Building from the groundbreaking critical race theory texts that emerged within legal academia during the early 1990s this course will consider the historical underpinnings of this literature and its implications for future feminist theory and practice. The course will investigate the limits of liberal legal remedies in addressing the severe social realities faced by many women, men, trans and non-binary people of color of various sexual identities. We will pay particular attention to the persistence of structural, institutional and everyday racism despite the rejection of race as a viable biological human concept, and its intersection with gender, gender identity and sexuality. The course will also consider how core concepts from critical race theory are deployed within transnational feminist thought and activism. Note: Students who earned credit for "Critical Race Theory and Feminist Implications" will not receive additional credits for "Critical Race Feminist Theory." This course was formerly known as GSWS 2051; students who have received credit for GSWS 2051 will not receive additional credits for GSWS 3551. Please also be aware that students who have already completed GSWS 3551 will not receive duplicate credit for taking SOC 3551.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GSWS 1301 and (GSWS 3097 or ENG 3097)

SOC 3559. Health and Reproduction. 3 Credit Hours.

The course will focus on health and human reproduction in the United States. We will view reproduction as both a biological and social event and will be particularly concerned with the medical and health aspects of reproduction. Decisions about child bearing, the medicalization of child bearing, fecundity, birth control, fetal and neonatal health, maternal health and new reproductive technologies are among the topics that will be considered in this research-intensive course. The course will also cover technical, methodological and statistical issues arising in the study of reproduction.

Repeatability: This course may not be repeated for additional credits.

SOC 3565. Sociology of the Body. 3 Credit Hours.

What do bodies tell us about ourselves and about others? Does our speaking voice show our class background? Why might someone who is "black" or "white" in the United States not be considered so in another country? Who decides what a healthy body is? In this course, we will look at the body, not simply as a physical object, but as a physical medium that is molded by social forces and interpreted through a cultural lens. Our bodies are simultaneously sites of personal embodiment and subject to external classification and social control. We will examine some of the ways bodies are significant markers of social categories, analyzing the link between the body and personal identity, and consider how identity is enacted through bodily practices and modification.

Repeatability: This course may not be repeated for additional credits.

SOC 3571. Methods in Program Evaluation. 3 Credit Hours.

Evaluation research uses standard social science methods to help judge the effectiveness of social programs and policies. The purpose of this course is to develop students' abilities to use evaluation methods to describe real world situations. Students will also learn to make inferences based on evaluations in order to improve policy decisions and service delivery programs in public health and social services. Previous knowledge of social science methods is not required.

Repeatability: This course may not be repeated for additional credits.

SOC 3575. Population Studies. 3 Credit Hours.

This course tackles a large and important question: What impact does population growth and change have on our lives? In this class, we examine how populations across the world are studied using censuses and surveys. The class explores three basic demographic processes: fertility, mortality, and migration, and how these processes vary internationally. Further, we focus on how the structure and characteristics of particular populations impact individual members. Finally, we uncover the demographic foundations of international contemporary social issues like the aging of the population in North America, Europe, and Japan, the AIDS epidemic in Thailand and Africa, as well as the U.S., changing household structures in the U.S. and Europe, and environmental change across the globe. Students learn both important concepts in demography and the methods used to study international populations.

Repeatability: This course may not be repeated for additional credits.

SOC 3582. Independent Study in Medical Sociology. 1 to 4 Credit Hour.

This course involves an intensive study in a specific area of sociology. The proposal outlining the work to be completed must be filed in the department office and with the undergraduate chair before the end of the first two weeks of the semester. NOTE: This class may not be used as a substitute for required sociology courses.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

SOC 3585. Internship in Medical Sociology. 1 to 4 Credit Hour.

This course will give students an opportunity to experience working in a health-related setting. Students taking this internship course will be expected to use their sociological skills in understanding and analyzing the setting in which the experiential learning takes place. An internship requires an individual contract with a faculty member in the Department of Sociology.

Repeatability: This course may be repeated for additional credit.

SOC 3930. Honors Special Topics. 3 Credit Hours.

The topics will vary and cover areas not covered by the current roster of classes. Students should consult with the instructor for details.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

SOC 4001. Qualitative Research. 4 Credit Hours.

This course provides students with skills to evaluate qualitative research studies, which deal with the meanings and values that people assign to things in the social world. More importantly, this class teaches students to conduct their own research using a variety of techniques, including participant observation, in-depth interviewing, focus groups, and the careful analysis of text and documents. Each student carries out a qualitative research project during the semester under the direction of the instructor. By the end of the semester, students will have gained skills in qualitative research that will make them competitive for jobs in a variety of different settings, from marketing and research firms to non-profit organizations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SOC 3201 and SOC 3261)

SOC 4002. Data Analysis. 4 Credit Hours.

This course gives students practical experience with the statistical analysis of data. Students will learn how to develop research questions based on a literature review; how to turn research problems into testable hypotheses; how to test hypotheses through statistical analysis; and how to present research findings in oral as well as written form. Statistical topics include: analysis of variance, bivariate and tri-variate cross-tabulation, χ^2 , γ , and Pearson's r .

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SOC 3201 and SOC 3261)

SOC 4096. Senior Seminar. 3 Credit Hours.

The goal of this course is to teach you how to use the sociological skills you have learned to make the transition to the next steps of your life. This will involve making decisions about your occupational goals, and collecting evidence on how realistic these are and how you might go about achieving them. We will learn about global and local trends in the economy and the labor market. As part of this, each of you will collect data on the occupation in which you have a particular interest. We will then learn how to do a self-assessment of skills and interests and you will learn how to advertise these on a web site. Finally, you will interview persons working in the occupation of your choice and match your skills with the ones they brought to their job. NOTE: This is the capstone writing intensive course. This course is taken in the semester before graduation, and is open to sociology majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Sociology.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Spanish (SPAN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SPAN 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815/0915, English 0815, Italian 0815, PSY 0815, or Russian 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SPAN 0826. Bilingual Communities. 3 Credit Hours.

What is the relationship between language and identity? How do bilinguals sort between their two languages and cultures to form their identity? In bilingual cultures, is one language always dominant? What happens when a language or dialect is distinct from the dominant language or dialect of the greater society? Why did language resurgence efforts fail in Ireland but succeed in Catalonia, Spain? Why does Guarani enjoy greater protection in Paraguay than Mayan dialects in Guatemala? Is it possible to legislate language behavior? The course explores issues of power and solidarity where two languages or dialects are in contact: How are these cultural identities expressed through choice of language? The geographical areas studied include the US, Canada, Latin America, Europe, and Africa. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed Spanish 0926.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SPAN 0831. Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? With an historical and sociological framework as a basis, we will take an in-depth and more personal look at the immigrant experience as expressed through the immigrants' own voices in literature and film. Topics explored include: assimilation, cultural identity and Americanization, exploitation and the American Dream, ethnic communities, gender, discrimination and stereotyping. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0831, CRIT 0831, History 0831, Italian 0831/0931, Russian 0831, SOC 0831, or SPAN 0931.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

SPAN 0837. Eating Cultures. 3 Credit Hours.

You are what you eat, they say, but what, precisely, determines our eating habits and what, exactly, do they say about us? How do these habits influence our relations with others in our communities and beyond? Eating is an activity common to all human beings, but how do the particularities and meanings attributed to this activity vary across different times and places? Using literature, visual media, cookbooks, food-based art, and advertisements as our starting point, we will examine how food perception, production, preparation, consumption, exchange, and representation structure individual and communal identities, as well as relations among individuals and communities around the globe. Our focus on this most basic of needs will allow us to analyze how food conveys and limits self-expression and creates relationships as well as delimits boundaries between individuals and groups. Materials will be drawn from a wide range of disciplines including, but not limited to, literary and gender studies, psychology, anthropology, history, sociology, and economics. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed English 0837 or Spanish 0937.

Course Attributes: GB, SI

Repeatability: This course may not be repeated for additional credits.

SPAN 0854. Latino Immigration. 3 Credit Hours.

In order to examine Latino immigration today, it is necessary to understand the long-term, complex relations between the USA and Latin America. From this perspective, we analyze past and present immigration laws and policies and their impact on immigrants and their countries of origin; the changing push/pull factors involved in immigration; the immigration history and situation of Latino immigrants in Philadelphia and beyond; reactions towards Latino immigrants; the impact of immigration on every aspect of daily life. Students will discuss, compare and evaluate USA and Latin American news sources on current, often controversial, topics each week and will have the opportunity to learn about Philadelphia agencies that work with Latino immigrants. Course materials include analytical documents, case histories, films and literature by and about Latin American immigrants. NOTE: Students cannot receive credit for this course if they have successfully completed LAS 0854.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

SPAN 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, Spanish, Latin American, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Spanish, Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

SPAN 0926. Honors Bilingual Communities. 3 Credit Hours.

What is the relationship between language and identity? How do bilinguals sort between their two languages and cultures to form their identity? In bilingual cultures, is one language always dominant? What happens when a language or dialect is distinct from the dominant language or dialect of the greater society? Why did language resurgence efforts fail in Ireland but succeed in Catalonia, Spain? Why does Guarani enjoy greater protection in Paraguay than Mayan dialects in Guatemala? Is it possible to legislate language behavior? The course explores issues of power and solidarity where two languages or dialects are in contact: How are these cultural identities expressed through choice of language? The geographical areas studied include the US, Canada, Latin America, Europe, and Africa. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed Spanish 0826.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

SPAN 0931. Honors Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

SPAN 1001. Basic I. 4 Credit Hours.

Basic Spanish I is an introductory Spanish course for students with little or no previous Spanish experience. The course will develop basic skills for speaking, listening, reading, and writing as well as introduce students to the richness and diversity of Spanish-speaking cultures. Note: Daytime sections on Main Campus will meet in-person for the lecture component of class for three contact hours and all students must participate in an additional contact hour of asynchronous online work including videos, voice recording activities, dialogues and other assignments. These sections and the fully online sections require access to high-speed internet and a webcam. Other sections (offered in the evening, and/or at Ambler or Center City campus) will provide all instruction in a traditional classroom setting.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

SPAN 1002. Basic II. 4 Credit Hours.

Basic Spanish II is a continuation of the work begun in Basic I. The course further develops basic skills for speaking, listening, reading, and writing, and it continues the introduction to the richness and diversity of Spanish-speaking cultures. Note: Daytime sections on Main Campus will meet in-person for the lecture component of class for three contact hours and all students must participate in an additional contact hour of asynchronous online work including videos, voice recording activities, dialogues and other assignments. These sections and the fully online sections require access to high-speed internet and a webcam. Other sections (offered in the evening, and/or at Ambler or Center City campus) will provide all instruction in a traditional classroom setting.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1001, SPAN 1901, 'C1002' in LCSP, 'B1002' in LCSP, 'C1003' in LCSP, 'B1003' in LCSP, or 'EXMPT' in LCSP)

SPAN 1003. Intermediate. 3 Credit Hours.

Intermediate Spanish is a communicative course. More sophisticated grammatical concepts will be introduced and students will continue to develop speaking, listening, reading, and writing competencies. Class work will include discussions, videos, and writing. Students will take a more active role in their own learning process by using computer technology out of class to hone grammar skills and explore the multi-faceted world of Hispanic culture.

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1002, SPAN 1902, 'C1003' in LCSP, 'B1003' in LCSP, or 'EXMPT' in LCSP)

SPAN 1011. Heritage Spanish I. 3 Credit Hours.

Designed for the needs of heritage speakers of Spanish with little or no formal training in Spanish. Spelling, accentuation, and standard sentence-level grammar plus opportunities for Spanish conversation. NOTE: Prior to summer 2015, the course title was "Language Skills for Spanish Speakers."

Repeatability: This course may not be repeated for additional credits.

SPAN 1076. Intensive Practice in the Four Skills. 9 Credit Hours.

Intensive practice in Spanish. Methods, materials, and small class sections are tailored to the varied linguistic needs of the students. Given in conjunction with Latin American Studies 2101 (0100), Latin America through Film and Fiction; and Sociology 2163 (0163), Area Studies. This combination of language study, area study (taught in Spanish), and a field trip opportunity to use Spanish in a total-immersion atmosphere affords a unique opportunity for personal enrichment and language acquisition.

Repeatability: This course may not be repeated for additional credits.

SPAN 1901. Honors Basic I. 4 Credit Hours.

Basic Spanish I is an introductory Spanish course for students with little or no previous Spanish experience. The course will develop basic skills for speaking, listening, reading, and writing as well as introduce students to the richness and diversity of Spanish-speaking cultures. Daytime sections on Main Campus will meet in-person for the 3-credit, lecture component of class, while the lab component (the 4th credit) will be earned through asynchronous online work including videos, voice recording activities, dialogues and additional assignments. These sections and the fully online sections require access to high-speed internet and a webcam. Other sections provide all instruction in the regular classroom.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, LA

Repeatability: This course may not be repeated for additional credits.

SPAN 1902. Honors Basic II. 4 Credit Hours.

Basic Spanish II is a continuation of the work begun in Basic I. The course further develops basic skills for speaking, listening, reading, and writing, and it continues the introduction to the richness and diversity of Spanish-speaking cultures. Daytime sections on Main Campus will meet in-person for the 3-credit, lecture component of class, while the lab component (the 4th credit) will be earned through asynchronous online work including videos, voice recording activities, dialogues and additional assignments. These sections and the fully online sections require access to high-speed internet and a webcam. Other sections provide all instruction in the regular classroom.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1001, SPAN 1901, 'C1002' in LCSP, 'B1002' in LCSP, 'C1003' in LCSP, 'B1003' in LCSP, or 'EXMPT' in LCSP)

SPAN 1903. Honors Intermediate. 3 Credit Hours.

Intermediate Spanish is a communicative course. More sophisticated grammatical concepts will be introduced and students will continue to develop speaking, listening, reading, and writing competencies. Class work will include discussions, videos, and writing. Students will take a more active role in their own learning process by using computer technology out of class to hone grammar skills and explore the multi-faceted world of Hispanic culture.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1002, SPAN 1902, 'C1003' in LCSP, 'B1003' in LCSP, or 'EXMPT' in LCSP)

SPAN 2001. Conversational Review. 3 Credit Hours.

The main thrust of this course is oral practice with grammar review for the purpose of improving the non-native student's oral communication skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003, SPAN 1903, or 'EXMPT' in LCSP)

SPAN 2002. Hispanic Readings. 3 Credit Hours.

This course devotes time to speaking and writing skills, but the main emphasis is reading comprehension and interpretation of texts in Spanish.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003, SPAN 1903, or 'EXMPT' in LCSP)

SPAN 2011. Spanish for Heritage and Bilingual Speakers. 3 Credit Hours.

This course is designed for heritage/bilingual speakers of Spanish, that is, for students who grew up speaking Spanish at home or in non-academic environments, and whose schooling has been primarily in English. The main aim of this course is the development of students' bilingual range to achieve communicative, linguistic, and sociolinguistic competence, with a focus on Spanish reading, writing, and grammar. Emphasis will be given to the development of Spanish skills for formal, academic, and professional contexts. Students will expand their biliteracy skills through the study of relevant sociopolitical and cultural issues pertaining to Spanish-speaking communities in the US. Note: There are no prerequisites for this course. NOTE: Prior to summer 2015, the course title was "Advanced Skills for Spanish Speakers". Prior to spring 2019, the course title was "Spanish Heritage II." Students who took this course under those titles will not receive additional credits. **Repeatability:** This course may not be repeated for additional credits.

Repeatability: This course may not be repeated for additional credits.

SPAN 2096. Composition. 3 Credit Hours.

This course devotes time to reading comprehension and oral expression, but the main thrust of the course is written expression using appropriate Spanish grammar and orthography. NOTE: Prior to fall 2009, the course title was "Composition and Conversation."

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2001, SPAN 2901, SPAN 2002, or SPAN 2902)

SPAN 2098. Advanced Intensive Practice in the Four Skills. 9 Credit Hours.

The nine-credit Advanced Intensive Practice in the Four Skills course of the Latin American Studies Semester (LASS) is designed to help students develop writing skills through a variety of analytical and creative assignments. To accomplish this goal the course reviews grammatical structures previously studied and introduces other new structures. Students will work on strategies for correcting errors, and on improving the organization and clarity of their own writing. Oral participation in this class is very important: we will discuss the texts we read in order to analyze their content, structure, and aesthetics. These texts will also help students to expand their vocabulary and improve their spelling. Only Spanish will be spoken in class. Duplicate Credit warning: Previously known as Spanish 2076.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

SPAN 2201. Catalan Language for Spanish Speakers. 3 Credit Hours.

This course is devoted to the study of Catalan language. The goal of the course is to introduce students to the vocabulary, grammar and language usage of Catalan. It is a comprehensive overview of Catalan grammar, in combination with the development of listening, reading, writing and oral communication skills. Moreover, it introduces students to the richness and diversity of Catalan culture. It is intended for students with a background in Spanish (i.e., they have completed four semesters of instructional Spanish or have native or native-like command of the language). Thus, it is a transition course between the two languages.

Repeatability: This course may not be repeated for additional credits.

SPAN 2222. Salsa, Samba, Selena. 3 Credit Hours.

What can Salsa, Samba and Selena teach us about relationships between the Global South and Global North? How do these case studies illustrate the impact socio-political events have on cultural products? How do cultural practices evolve and change in relation to their surroundings? To answer these questions, this course weaves concert clips, music videos, television series, musical examples, and embodied practice to study topics ranging from how the Cuban Revolution led to Latin Jazz to enjoying PhillyBlanco's batucadas to how TikTok and Instagram keep Selena alive.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003 or SPAN 1903)

SPAN 2901. Honors Conversational Review. 3 Credit Hours.

The main thrust of this course is oral practice with grammar review for the purpose of improving the non-native student's oral communication skills.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003, SPAN 1903, or 'EXMPT' in LCSP)

SPAN 2902. Honors Hispanic Readings. 3 Credit Hours.

This course devotes time to speaking and writing skills, but the main emphasis is reading comprehension and interpretation of texts in Spanish.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003, SPAN 1903, or 'EXMPT' in LCSP)

SPAN 3001. Advanced Composition & Conversation. 3 Credit Hours.

Continued development of conversation and writing skills. Special attention is given to advanced areas of Spanish grammar appropriate for oral argumentation and expository writing and also to distinctions between formal and informal usage.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3002. Hispanic Readings II. 3 Credit Hours.

Themes in Hispanic culture in the context of short prose readings, including the short story and the short novel. Emphasis on tools for advanced reading: vocabulary recognition, comprehension of idiomatic expressions, and knowledge of advanced grammar. Includes writing and oral discussion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3003. Advanced Grammar for Communication. 3 Credit Hours.

Emphasizes advanced grammar (including distinctions of tense, aspect and mood; reflexive and passive usage; and pronoun selection). Attention is paid to Spanish/English contrasts. Grammar skills are developed in conversation and in reading and writing. Students are also introduced to linguistic concepts that will help them make their own judgments about grammar and pronunciation. NOTE: Prior to summer 2015, the course title was "Advanced Grammar and Linguistic Concepts."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3096. Advanced Analysis and Writing Skills. 3 Credit Hours.

Students read short stories and other brief narrative texts, plays, poems and essays in order to facilitate their acquisition of critical skills and to identify basic ideological and formalistic issues within the texts being studied. This course teaches how to become a careful reader and writer. Reading comprehension and writing are its essential aspects. Compositions are written and revised. The course is a prerequisite for most advanced Spanish offerings. This is a critical thinking course and a capstone writing course. NOTE: Cornerstone to the Spanish major and capstone writing course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098) and any SPAN course numbered 3000 to 4999.

SPAN 3121. Introduction to the Literature of Spain. 3 Credit Hours.

Examination of major works of Spanish literature. NOTE: Prior to fall 2009, the course title was "Introduction to Spanish Literature." Prior to summer 2015, the course title was "Masterpieces of Spanish Literature."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3141. Introduction to the Literature of Latin America. 3 Credit Hours.

Examination of major works of Spanish American literature. NOTE: Prior to fall 2009, the course title was "Introduction to Spanish American Literature." Prior to summer 2015, the course title was "Masterpieces of Spanish American Literature."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3142. Puerto Rican Readings. 3 Credit Hours.

This course entails the study of selected works by major Puerto Rican writers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3160. Special Topics I. 3 Credit Hours.

A study of language, literature, culture or other areas of special interest in the Hispanic world. NOTE: Prior to summer 2015, the course title was "Special Topics in Spanish and/or Spanish American Literature."

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3201. Catalan Culture and Civilization. 3 Credit Hours.

This course is devoted to the study of Catalan culture. The term "Catalan culture" in the strictest sense refers to the various artistic, intellectual and popular manifestations of the social interactions encountered in those geographical lands populated by Catalan-speaking peoples (located on the eastern part of the Iberian Peninsula and parts of France and Italy). Through the analysis of original texts, films and visual artifacts, the course will incorporate discussions on the history, politics, society, cinema, anthropology and the arts of the Catalan-speaking regions. The course is intended to strengthen the students' reading skills, to broaden their vocabulary, and to increase cultural and literary awareness by reading, discussing and writing about the various cultural topics introduced in class. The course will be taught in Catalan.

Repeatability: This course may not be repeated for additional credits.

SPAN 3204. Latin America through Film. 3 Credit Hours.

This course is designed to present a multicultural view of Latin American life through Latin American film. It includes the artistic appreciation and the critical analysis of the films viewed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3221. The Cultures of Spain. 3 Credit Hours.

The Spanish character as revealed in its language, literature, architecture, history, art, music, and ethnic traditions. Geography and sociology of Spain. Lectures, readings, and discussions. NOTE: Prior to summer 2015, the course title was "Spanish Culture and Civilization."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3222. Spain through Film. 3 Credit Hours.

This course develops Spanish-language skills in their application to the study of the culture of Spain through film. It includes the artistic appreciation and analysis of the films viewed. NOTE: Prior to fall 2009, the course title was "Contemporary Spain through Film."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3229. Latin American and Latinx Philosophy. 3 Credit Hours.

This course surveys central ideas and debates in the Latin American and Latinx philosophical traditions. We will pay special attention to the impact of European colonialism in the production and reception of philosophical ideas in Latin America and Latinx communities in the US. This survey ranges from pre-colonial indigenous philosophy to the present. We will discuss classical and contemporary Andean and Mesoamerican indigenous philosophies and why they are often not treated on par with Western forms of knowledge. We will also cover philosophical debates in colonial and post-colonial Latin America. We will examine how the colonial experience shaped Latin American philosophers' ideas around race, gender, nationhood, education, progress, and authenticity. We will also reflect on aspects of the lived experience of Latinxs in the United States, such as immigration and the controversies around Latinx identity. NOTE: This course is regularly cross-listed with LAS 3229 and PHIL 3229. Students may receive credit for only one of the following: PHIL 3229, LAS 3229, or SPAN 3229.

Repeatability: This course may not be repeated for additional credits.

SPAN 3241. The Cultures of Latin America. 3 Credit Hours.

Study of the Spanish-American people through their literature, history, architecture, art, music, and European/indigenous traditions and institutions. NOTE: Prior to summer 2015, the course title was "Spanish-American Culture and Civilization."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3243. The Culture of Puerto Rico. 3 Credit Hours.

An examination of topics and themes of Puerto Rican culture and civilization in the context of literary and non-literary texts. NOTE: Prior to summer 2015, the course title was "Puerto Rican Culture and Civilization."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3261. The Hispanic World. 3 Credit Hours.

This course examines what is different about Hispanic society and its multifaceted mentality. To address these questions, it focuses on topics including ethnic struggle, linguistic diversity, and intellectual and artistic creativity, as well as on the relationship between Spain, Latin America, and Latino society in the U.S. Spanish language skills are developed through conversation and writing. NOTE: Prior to summer 2015, the course title was "The Hispanic Mind."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3401. Translation Skills. 3 Credit Hours.

Translation skills through familiarity with different types of language taken mainly from Spanish newspapers: reporting, sports, columns, advertisements, correspondence, etc. Models of each and their inherent problems in translation. Essays on translation to examine theories of translation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098) and any SPAN course numbered 3000 to 4999.

SPAN 3402. Interpretation Skills in Translation. 3 Credit Hours.

Style, techniques, and mechanics of translation focusing on texts relating to the subject areas of law, business, social issues, public health, and education. NOTE: Prior to fall 2009, the course title was "Translation Skills II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098) and any SPAN course numbered 3000 to 4999.

SPAN 3501. Spanish for Business Professions. 3 Credit Hours.

An introduction to aspects of the Spanish language and Hispanic culture for business students and business professionals. Emphasis on the development of vocabulary and conversation skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003, SPAN 1903, or 'EXMPT' in LCSP)

SPAN 3502. Business Spanish I. 3 Credit Hours.

An introduction in Spanish to basic business concepts (relating to company structure, accounting, banking, etc.) with a focus on Spanish vocabulary and writing skills for business. Attention to applications in Spanish-speaking countries.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3601. Spanish for Health Professions. 3 Credit Hours.

This course assists medical and related human-services personnel and students in interacting and communicating effectively with Spanish-speaking people. Conversation skills, cultural information, and medical and social-services terminology are integrated as they apply to real situations. Students practice verbal and non-verbal skills in simulated role-playing situations. Moreover, the course is designed to assist medical personnel in the acquisition of Spanish medical vocabulary. The delivery of services to the Hispanic community is of foremost importance. NOTE: Prior to summer 2015, the course title was "Spanish for Health and Human Services."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 1003 or 'EXMPT' in LCSP)

SPAN 3602. Medical Spanish. 3 Credit Hours.

This course is designed to assist medical personnel in the acquisition of Spanish medical vocabulary, strategies of communication and cultural knowledge to assist in the delivery of services to the Hispanic community.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3701. Spanish for the Legal Professions. 3 Credit Hours.

This course provides students and legal professionals with technical vocabulary and communicative skills in a legal context. Special emphasis is paid to oral and written communication, and aural comprehension in a variety of legal contexts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SPAN 1003.

SPAN 3801. Spanish for Professionals in Criminal Justice and Social Services. 3 Credit Hours.

This course will address the diverse language needs of personnel working with Spanish-speaking clients in the criminal justice system. Practical and relevant vocabulary will be acquired through simulation and real world activities such as role-plays, case studies and basic translation / interpretation tasks, increasing students' oral skills and word accuracy. Readings, videos and interviews will enable students to acquire an understanding of the linguistic and cultural diversity of the Spanish-speaking community and to observe, understand and interpret norms within it.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 3960. Honors Special Topics. 3 Credit Hours.

A study of language, literature, culture or other areas of special interest in the Hispanic world. NOTE: Prior to summer 2015, the course title was "Honors Special Topics in Spanish Literature."

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

SPAN 3996. Honors Advanced Analysis and Writing Skills. 3 Credit Hours.

Students read short stories and other brief narrative texts, plays, poems and essays in order to facilitate their acquisition of critical skills and to identify basic ideological and formalistic issues within the texts being studied. This course teaches how to become a careful reader and writer. Reading comprehension and writing are its essential aspects. Compositions are written and revised. This is a critical thinking course and an honors writing course. (This course is the honors version of Spanish 3096.)

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098) and any SPAN course numbered 3000 to 4999.

SPAN 4060. Special Topics. 3 Credit Hours.

A comprehensive study of language, literature, culture or other areas of special interest in the Hispanic world.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4121. Survey of Spanish Literature. 3 Credit Hours.

Survey of selected periods and themes in Spanish literature.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4123. 16th & 17th Century Spanish Literature. 3 Credit Hours.

This course is devoted to the study of the literature produced during what has been called the Golden Age of Spanish Literature. Although there is special emphasis on the genre of prose, emblematic texts from various genres will be included: chivalric and pastoral novels, Renaissance dialogues, picaresque treatises, and women's texts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4126. Cervantes. 3 Credit Hours.

An in-depth study of Miguel de Cervantes' life and selected works. NOTE: Prior to fall 2009, the course title was "Cervantes' Don Quijote."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4127. 18th and/or 19th Century Spanish Literature. 3 Credit Hours.

This course is devoted to the study of Spanish literature during the 18th and/or 19th century. NOTE: Prior to fall 2009, the course title was "Poetry and Drama of the 19th Century."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4128. Hispanic Modernism. 3 Credit Hours.

Using significant works by leading authors (i.e., Martí, Unamuno, Valle-Inclán, Casal, Gutiérrez Nájera, Machado and/or Jiménez), this course explores aspects of Modernity in Spain and/or Spanish America. NOTE: Prior to fall 2009, the course title was "Generation of 1898."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4132. 20th &/or 21st Century Spanish Literature. 3 Credit Hours.

This course is devoted to the study of Spanish literature during the 20th and/or 21st century. NOTE: Prior to fall 2009, the course title was "Contemporary Spanish Novel."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4133. Hispanic Women in Literature. 3 Credit Hours.

The study of the presence of women as authors and/or characters in Spanish and/or Spanish American literature. NOTE: Prior to fall 2009, the course title was "The Female Presence in Peninsular Literature."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4141. Survey of Spanish American Literature. 3 Credit Hours.

Survey of selected periods and themes in Spanish American literature.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4142. Spanish American Short Story. 3 Credit Hours.

The evolution of the Spanish American short story.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4143. Spanish American Novel. 3 Credit Hours.

This course explores aspects of the Spanish American novel across time, and highlights trends introduced and developed in different texts. NOTE: Prior to fall 2009, the course title was "Latin American Novel."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4144. Spanish American Poetry. 3 Credit Hours.

Trends in Spanish American poetry through representative poems and poets. NOTE: Prior to fall 2009, the course title was "Latin American Poetry."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4146. National Literatures of Spanish America. 3 Credit Hours.

The study of literature in its cultural context focusing on texts from a selected country or countries of Spanish America. NOTE: The country of choice will vary according to the instructor's preference.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4148. Latin American Literature of Social Conflict. 3 Credit Hours.

The study of class, ethnic, gender, and other social conflicts in Latin American literature.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4149. Literature of Colonial Spanish America. 3 Credit Hours.

The study of the literature of Colonial Spanish America. NOTE: Prior to fall 2009, the course title was "Literature of Colonial America."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4151. Literature of the Caribbean. 3 Credit Hours.

A comparative study of representative literary works from Cuba, the Dominican Republic, Puerto Rico and non-Spanish-speaking nations of the Caribbean. NOTE: Prior to summer 2015, the course title was "Comparative Caribbean Literature."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4152. U.S. Latino/a Studies. 3 Credit Hours.

An exploration of literature, history, race, ethnicity, gender and language among Latinos/as in the United States. NOTE: Prior to summer 2015, the course title was "U.S. Latino Literature."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4161. Hispanic Literature through Art. 3 Credit Hours.

Comparative study of Hispanic literature in the context of trends and styles in the history of Art.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4182. Independent Study. 1 to 4 Credit Hour.

An independent-study course arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4183. Directed Readings. 3 to 6 Credit Hours.

Guided readings in Spanish, at the 4000 level, focusing on themes and topics in Hispanic culture, literature and/or linguistics. NOTE: By arrangement with appropriate professor and special permission of department chair.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4221. The Art of Spain. 3 Credit Hours.

A panoramic view of the art of Spain from two perspectives: the chronological and the geographic. The chronological perspective includes artistic and architectural work from the paleolithic period (the Caves of Altamira) to the present time. The geographic perspective examines work from Asturias, in the north, to Sevilla and Granada in the south and Barcelona on the Mediterranean coast of Spain.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

SPAN 4240. Topics in Hispanic Popular Cultures. 3 Credit Hours.

The study of manifestations of Hispanic popular culture.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4242. Hispanic Influences in the U.S.. 3 Credit Hours.

This course examines contemporary U.S. Latino literature and writers. Students will examine the evolution of Latino literature and its themes, and examine the experiences of Latino writers and their impact on U.S. culture. Coursework will include lectures, readings, films, papers and class discussions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4301. The Sounds of Spanish. 3 Credit Hours.

An articulatory study of the sounds of Spanish with attention to regional variation and comparisons with English. NOTE: Prior to summer 2015, the course title was "Spanish Phonetics."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4302. Introduction to Spanish Linguistics. 3 Credit Hours.

Concepts and procedures of linguistic description applied to sounds, words, and sentence patterns of the Spanish language.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4303. Spanish/English Bilingualism. 3 Credit Hours.

A contrastive linguistic study of Spanish and English sound and grammatical systems. Appropriate for students and teachers of Spanish in the context of the U.S. NOTE: Prior to summer 2015, the course title was "Spanish / English Contrasts."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4304. Spanish Applied Linguistics. 3 Credit Hours.

This course will explore a number of theories accounting for language learning from classical times to the present. Students will examine not only the teaching of Spanish in accordance with these theories, but also the acquisition of Spanish by the second language learner.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4305. Evolution of the Spanish Language. 3 Credit Hours.

A study of chronological developments in the linguistic and social history of Spanish. NOTE: Prior to summer 2015, the course title was "History of the Spanish Language."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4306. Spanish Sociolinguistics. 3 Credit Hours.

This course will provide an introduction to the study of language in society as represented in sociolinguistic research from Spain, Latin America, and the United States. Emphasis is on linguistic variation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4307. Language and Gender. 3 Credit Hours.

An examination of the relationship between language use and social gender, i.e., of women's and men's speech. Language is examined from the perspectives of sounds, grammatical structures, semantic positioning, and conversational strategies with illustrations based on the use of Spanish and other languages.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4401. Advanced Translation and Interpretation. 3 Credit Hours.

Advanced specialized textual translation and interpretation. NOTE: Prior to summer 2015, the course title was "The Art of Translation."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4449. Medieval Spanish Literature. 3 Credit Hours.

Analysis of Spanish texts written during the Middle Ages. NOTE: Prior to fall 2009, the course title was "Medieval Spanish Text."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 3096 or SPAN 3996)

SPAN 4885. Internship. 3 Credit Hours.

Work on site in the Spanish-speaking community combined with in-class discussion of the work experience and of readings focusing on the Spanish language in the U.S. and Latino culture. NOTE: This course was previously named "Service Learning" - students who received credit under this title will not earn additional credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SPAN 2096 or SPAN 2098)

Special Education (SPED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SPED 2128. Assistive Technology and Universal Design for Learning. 3 Credit Hours.

This course will provide students with an extensive background regarding the various types and uses of assistive and accessible technology and how the principles of Universal Design for Learning apply to the inherent flexibility of technology as a pathway toward attainment of educational goals.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

SPED 2201. Language Development and Communication Strategies. 3 Credit Hours.

With an emphasis on the connection between language and literacy, we will explore language development and language disorders within the context of specific disabilities. The course is designed to help pre-service teachers to acquire knowledge about language, language development, language disorders, and evidence-based practices for enhancing language skills that will enable them to become more effective teachers. Student vignettes, teacher perspectives, activities, and literacy sections foster the application of concepts to real classroom situations. The Response to Intervention (RtI) model is used as the framework for classroom-based language assessment and instructional methods related to language development and instructional strategies to support communication development. Expanded discussions of emerging teaching technologies and the latest research literature are included.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

SPED 2231. Introduction to Special Education. 3 Credit Hours.

This course examines Special Education practices in relation to both the history of the field and current laws governing the education and employment of individuals with disabilities. A focus on the categories of disabilities will include an examination of teaching strategies and accommodations that are used in meeting the needs of diverse learners.

Repeatability: This course may not be repeated for additional credits.

SPED 3187. Integrated Literacy and Special Education Practicum. 3 Credit Hours.

This integrated practicum experience will provide opportunities for students to apply theoretical models and research-based instructional strategies in the area of literacy to middle grades students in inclusive classrooms. Focus will be placed on developmental, cognitive, physical, social, behavioral, processing and learning needs of students and how these needs relate to comprehending written text, specifically for students having disabilities. Particular emphasis will be focused on ways to connect information from the co-requisite literacy methods course and apply this knowledge to students with disabilities in the middle grades classroom. Differentiated instruction, response to intervention, appropriate curricular modification, and authentic assessment related to appropriate instructional decision-making are themes that run throughout this learning experience. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

SPED 3201. Effective Instructional Strategies for Students with Moderate to Significant Disabilities. 3 Credit Hours.

This course is an introduction to effective instruction and strategies for teaching students with moderate to significant disabilities from pre-kindergarten through twelfth grade. The purpose of this course is to identify and understand specific evidence-based strategies that will positively impact student success particularly in the inclusive setting and across additional educational settings.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3287.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SPED 2231.

SPED 3211. Effective Instructional Strategies for Students with Disabilities. 3 Credit Hours.

This course is an introduction to effective instruction and strategies for teaching young students with disabilities from pre-kindergarten through twelfth grade. The purpose of this course is to identify and understand specific evidence-based strategies that will positively impact student success in the inclusive setting. Emphasis will be placed on strategies and activities specific to young learners, collaboration and communication strategies among professionals, technology in the classroom, and ways to address family participation and diversity in today's classroom.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SPED 2231.

SPED 3287. Practicum for Diverse Learners. 3 Credit Hours.

Practicum experience that provides opportunities for students to apply theories of learning and development.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3201.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in SPED 2231.

SPED 3304. Effective Teaching Strategies and Academic Interventions. 3 Credit Hours.

This course overviews assessment and intervention strategies for learners with skill deficits. Learners with a diverse set of needs will be discussed in the course (e.g., neurotypical, autism, intellectual disability, emotional and behavioral disturbance, among others). The link between assessment and intervention will be emphasized throughout the course, with attention to effective practices for learners with diverse needs. Students enrolled in the course will learn how to select, administer, score, interpret, and report results for a variety of behavioral assessment methods that will be related to selecting interventions, monitoring student progress, and making decisions based upon data.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

SPED 3312. Methods and Curriculum for Students with Moderate to Severe Disabilities. 3 Credit Hours.

An examination of the assessment and remediation processes required in the education of individuals with moderate to severe disabilities. A special focus is the developmental and ecological assessment of this population and how this information can be used to develop instructional programs. NOTE: Students must register concurrently for SPED 3312, 3332, and 3487.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3332, SPED 3487.

Repeatability: This course may not be repeated for additional credits.

SPED 3332. Assessing and Teaching Students with Mild Disabilities. 3 Credit Hours.

This course will examine the assessment and intervention in the academic subject areas of students with mild learning problems. An emphasis will be on the understanding of learning differences and how to teach learning strategies that can accommodate those with learning differences. NOTE: Students must register concurrently for SPED 3312, 3332, and 3487.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3312, SPED 3487.

Repeatability: This course may not be repeated for additional credits.

SPED 3487. Practicum in Special Education. 3 Credit Hours.

Prerequisite for Special Education students with no background in education. Practicum meets half days during the regular semesters and full days in the summer. Must be admitted to the Certification program. NOTE: Students must register concurrently for SPED 3312, 3332, and 3487.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 3312, SPED 3332.

Repeatability: This course may be repeated for additional credit.

SPED 4103. Classroom Management and Positive Behavior Support. 3 Credit Hours.

This course provides an in-depth presentation of Positive Behavior Support (PBS) and its application in classroom systems to prevent challenging behavior and academic failure. Infused throughout the course will be intervention strategies that will allow for the accommodation of all children in the general-education system. The emphasis of the course will be proactive, constructive strategies that prevent, rather than react to, classroom difficulties.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SPED 2231.

SPED 4105. Assessment in Special Education. 3 Credit Hours.

This course is designed to provide students with an understanding of assessment theory, the purposes of assessment and specific assessment techniques as they relate to the education of struggling students and students with disabilities. Emphasis is placed both on how assessment is used to identify students with disabilities and how assessment can be used to plan and monitor the effectiveness of instructional practices related to student learning and development in the classroom. We use a problem-solving approach in this course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

SPED 4106. Literacy Instruction for Young Children with Disabilities. 3 Credit Hours.

The focus of this course is to provide an understanding of how to identify and provide interventions for children who are having difficulty learning to read. This course begins with focusing on problems that may arise with the development of foundational literacy skills that include oral language development, phonological sensitivity, recognition and discrimination of print, and knowledge of letters. The course then focuses on problems that arise as children begin to learn to crack the code and begin identifying words. Finally issues regarding fluency and comprehension are addressed. The goal of the class is provide classroom teachers with strategies to understand a) the types of reading difficulties that children with special needs may experience and b) the various research-based intervention strategies that could be used to facilitate children's learning to read. Emphasis will be placed on understanding theories and interventions that surround literacy development for children in Pre-Kindergarten to grade 4 settings, with an additional exploration of how language and literacy are impacted by diversity, various disabilities and atypical behaviors. An equally important theme will be how to actually implement this knowledge in inclusive classrooms through appropriate assessment practices, research validated literacy interventions, developmental reading programs, evidence-based instructional practices, and content area materials. Other integral parts of literacy and language development, and writing, such as text production, spelling, and composition, co-teaching, collaboration with paraprofessionals and other related support staff, spoken language, communication skill development through assistive technology, and universal design in inclusive classrooms will be examined at the instructor's discretion. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 4105.

Repeatability: This course may not be repeated for additional credits.

SPED 4109. Educating Students with Disabilities in Inclusive Settings. 3 Credit Hours.

This course is an introduction to effective strategies for teaching students with disabilities across age levels and content areas. Additional skills (e.g, study skills and self-determination) will be thoroughly discussed to demonstrate how these critical skills could be taught across content areas. The purpose of this course is to identify specific strategies that will aid in student success in the inclusive setting. Emphasis will be placed on evidence-based strategies and activities specific to elementary students, technology in the classroom, and ways in which to address diversity in today's classroom. This course has a field-based component which is designed to provide students with an understanding of assessment theory, the purposes of assessment and specific assessment techniques as they relate to the education of children with special needs. Emphasis will be placed both on how assessment is used to identify children with disabilities as well as how assessment can be used to plan and monitor the effectiveness of instructional practices as they relate to student learning and development in the classroom. A problem-solving approach will be employed. Students will be provided with the opportunity to apply the knowledge learned in the course in the classroom. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

SPED 4196. Literacy Instruction for Students with Disabilities. 3 Credit Hours.

The focus of this course is to provide knowledge of a developmental language framework for pre-service early childhood, elementary grade, and special education teachers that will be the foundation for effective literacy instruction for struggling readers in inclusive settings including students with a wide range of abilities and disabilities. Emphasis is placed on understanding theories and interventions that surround language acquisition and literacy development for students in pre-kindergarten to grade 8 settings, with an additional exploration of how language and literacy are impacted by diversity and various disabilities.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 4105.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

SPED 4198. Literacy Instruction and Assessment in Special Education. 3 Credit Hours.

This course is designed to provide students with an understanding of reading and assessment theory and skills. The skills and techniques from this class will help students develop the foundation for assessment of effective literacy instruction for struggling readers in inclusive settings including students with a wide range of abilities and disabilities. Emphasis is placed both on how assessment is used to identify students with disabilities in reading and other areas and how assessment can be used to plan and monitor the effectiveness of instructional practices related to student learning and development in the classroom. Moreover, students will learn how to use effective reading techniques and strategies to help struggling readers and students with other disabilities. In addition, this course has been designated as a writing intensive course. This means that the course has a specific instructional focus on professional writing related to teaching and assessing literacy of students with disabilities. Specifically, in this course students will learn how to (a) organize their writing for clear and professional communication; (b) incorporate technical terminology into their writing to describe students' current levels of performance, assessment results, and recommendations for instruction; and (c) write for varying audiences, including teachers, related services providers, administrators, and parents of children with disabilities. The writing assignments in the course are designed to teach students writing skills they will need to be successful as teachers who support students with disabilities in their development of literacy skills.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 4187, ECED 4802, SPED 4103.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

SPED 4201. Effective Transition for Students with Disabilities. 3 Credit Hours.

The focus of this course is to provide knowledge and skill development in the areas of transition planning, self-determination, and collaboration among professionals, families, and students with disabilities in academic, vocational, and community settings. Emphasis will be placed on evidence-based practices in transition to enhance post-school outcomes, including assessment, instructional strategies, and identified predictors of post-school outcomes. Special attention will be given to knowledge about pre-K, elementary, middle school, and secondary transition to postsecondary education and employment, along with information on such important topics as transition-related legislation; local, state, and national resources; inclusive secondary education; self-determination, family involvement, interagency collaboration, and transition Individualized Education Programs (IEPs).

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

SPED 4331. Family and Interdisciplinary Collaborative/Consultation Skills. 3 Credit Hours.

This course will focus on the context, processes, and content for collaboration and consultation. The course will focus on the roles and responsibilities of special educators in collaborative and inclusion settings. The main theme of "teacher as decision maker" serves as the framework for teachers as they learn new skills/content to become effective collaborators and consultants. The core of the course will focus on building communication and partnerships skills so that educators can become better collaborators, team-teachers, and consultants. This includes serving as an advocate for students with disabilities and culturally diverse students in educational settings. Various components will also focus on how teachers can become more effective in their communication with parents/legal guardians.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

SPED 4801. Senior Seminar and Performance Assessment in Special Education. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting, and engage in activities that foster professionalism in school and community settings. The senior performance assessment, a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the student teaching semester.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 4888.

Repeatability: This course may not be repeated for additional credits.

SPED 4888. Student Teaching in Special Education. 9 Credit Hours.

The special education student teaching experience is taken during the final semester of study before completion of the special education teacher preparation program requirements. Eligibility for graduation and recommendation for PreK-12 Special Education certification is contingent on the successful completion of this practicum. Students are provided with an opportunity to be in a classroom for 12 weeks full time and to put into practice what they have learned in their special education courses. Over the course of the semester, students will experience, in depth, the full role and meaning of teaching in special education and/or an inclusive classroom. Experiences include planning and organizing for instruction, developing classroom teaching competencies and skills, evaluating pupil progress, participating in extra-class activities, participating in the development of IEPs, working collaboratively with other school personnel, and utilizing school and community resources in the instructional program.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: SPED 4801.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

Sport and Recreation Management (SRM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SRM 1115. Student Athlete Development and Professionalism. 3 Credit Hours.

Student Athlete Development and Professionalism is a three-credit course that introduces first-year students to the opportunities and rigors of higher education, as well as to the skills needed to use academic resources successfully in college. Many of the topics covered in this course not only apply to your growth as a student, but also to your social and professional development. The course further provides an introduction to the personal brand development of athletes. Students will learn about the importance of personal brand development, associated brands, personal finance, and compliance in relation to monetizing student athlete name, image, and likeness. Overall, the goal of this course is to provide students with an understanding of the importance of professionalism and personal development.

Repeatability: This course may not be repeated for additional credits.

SRM 1211. Sport, Entertainment and Society. 3 Credit Hours.

This course is an introduction to the sociological dimensions of sport and entertainment by addressing the ways ideology is immersed into our industries, as well as analyzing relevant historic and current issues in sport and entertainment. Through interrogating sociological topics such as gender, race, social class, age, ability, religion, and sexuality in relation to their interconnectedness within sport and entertainment, students will obtain the critical thinking skills and cultural competence tendencies to become forward-thinkers in our industries of sport and entertainment. Note: Prior to Fall 2023, this course was titled "Sport and Society."

Class Restrictions: May not be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 1220. Special Topics in Sport and Recreation Management. 3 Credit Hours.

Variable content course. See the course schedule for specific topics offered in a given semester.

Repeatability: This course may be repeated for additional credit.

SRM 2212. Law and Ethics in Sport and Recreation. 3 Credit Hours.

This course is designed to address the legal and ethical aspects of sport, recreation, park resources, and leisure services. The course will address legal foundations and the legislative process; contracts and tort law; regulatory agents and methods of compliance; the principles and practices of safety, emergency, and risk management related to sport, recreation, park resources, and leisure services; ethical principles and professionalism in sport and recreation management; environmental ethics; legal issues and trends; and professional competence and professional development related to law and ethics in sport and recreation management.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

SRM 2213. Budget and Finance Systems in Sport and Recreation. 3 Credit Hours.

Accounting trends as they relate to the sport and recreation industries will be covered. Financial decision-making, including cash management; ratio analysis; asset management; leverage; short, intermediate, and long-term financing will be the course focus. Economic theory will be applied to sport and recreation settings/organizations. Current trends in revenue production, including sponsorships, will be noted. Different types of budgets will be reviewed and students will learn the budget preparation and approval process.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 2104 or STHM 1115) and (ACCT 2101, ACCT 2501, or ACCT 2901)

SRM 2217. Research in Sport and Recreation. 3 Credit Hours.

This course will examine ways that research helps solve practical industry problems in recreation and sports. Topics will include problem identification, the logic of research, research designs, information search strategies, questionnaire development, and data analysis. Written and oral communication skills, as well as the use of data analysis software, will be stressed.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 2104 or STHM 1115)

SRM 3211. Management in Sport and Recreation. 3 Credit Hours.

Provides the knowledge required to formulate and manage effectively the resources in a sport or recreation operation. Human resource administration will be a major focus; managerial history, organizational needs, job designs, recruitment process, hiring/firing process, discipline and grievance procedures, motivation and performance appraisals are included. The course will expose the students to the additional associated management functions of budgets and accounting, facility management, risk management, customer service, community relations, and fund raising.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

SRM 3214. Marketing Management in Sport and Recreation. 3 Credit Hours.

An analysis of essential marketing, promotion and sales principles as currently applied in the sport and recreation industries. Guidelines for formulating marketing goals and strategies, inclusive of target marketing, will be included. The marketing mix will be evaluated in terms of specific applications set in both industry segments. Trends, issues and problems influencing the industry will also be examined. Principles of salesmanship, sales techniques, sales strategies, and evaluation of sales performance in light of goal planning and objectives will be covered.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3215. Stadium/Arena Design and Management. 3 Credit Hours.

The Stadium/Arena Design and Management course will require that students closely examine, condense, and digest information on planning, design, construction, and maintenance of stadiums and arenas which may be employed in athletics, leisure, sport, entertainment, recreation, and physical education. The students will prepare materials for class presentations, topics, and problems for discussion and analysis. The class will visit representative facility sites within the area.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3216. Economics of Sport and Recreation. 3 Credit Hours.

This course examines the sport and recreation industries using microeconomic theory for analysis. The topics include league structure, organizational decision making, labor relations, incentive structures and facility financing.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901)

SRM 3218. Organizational Strategy in Sport and Recreation. 3 Credit Hours.

This course focuses on the strategic challenges confronting firms that compete in the global economy within the sport and recreation industries. It provides students a forum in which to apply and integrate business theories, practices and skills in a global environment. The course examines opportunities for entrepreneurs in the industry through business plan development.

Repeatability: This course may not be repeated for additional credits.

SRM 3220. Special Topics in Sport and Recreation Management. 3 Credit Hours.

Variable content course. See the course schedule for specific topics offered in a given semester.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

SRM 3221. Athletics Administration. 3 Credit Hours.

The course covers the organization and implementation of college athletics. Theory, principles, and problem areas will be addressed. Goals and policies associated with the administration of college athletics will also be covered, along with the approaches to planning, organizing, directing, controlling, budgeting, and evaluating college athletic programs.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3222. Global Sport Management. 3 Credit Hours.

This course will cover the various governance structures of international sport with an emphasis on sport structures and governance models in areas other than the United States of America including how sport is organized, managed, funded, and governed globally. Students will gain a global perspective through the study of sport and its economic, cultural, sociological, and political role in Canada, Mexico, Central and South America, Asia, Australia/Oceania, Europe, the Middle East, and Africa.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3223. Applied Sport Analytics. 3 Credit Hours.

Sports analytics applies data and quantitative methods to measure performance and make decision within the sport industry. This course will analyze various components, such as measuring and predicting team and player performance, recruitment and decision-making strategy, and sports betting and fantasy sports. As such, you will be learning common analytic concepts standard in the sports industry as well as the tools to help analyze these concepts.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3224. Media and Communications in Sport and Recreation. 3 Credit Hours.

The purpose of this class is to give an overview of sports information and media relations as they pertain to collegiate and professional sports. The class will go into detail on how professional teams and institutions deal with the media, including: strategic planning, placement of stories, holding media conferences, writing press releases, oversight of web sites, handling sensitive situations, and game operations.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Sport Management, Sport & Recreation Management.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3225. Recreation and Leisure Service Management. 3 Credit Hours.

This course will provide the knowledge required to formulate and manage effectively the resources in a public or private recreation or leisure service operation. Coordination of resources, inclusive of human, financial, physical, and technological, will be discussed. The course will expose the students to the typical programs and services provided by recreation and leisure service agencies. Emphasis will be placed on career opportunities and professional development.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3226. Consumer Behavior in Sport and Recreation. 3 Credit Hours.

Marketing strategies designed to increase and sustain consumer demand for sport and recreation products and services rely upon an understanding of the individual consumer. This course will examine a variety of personal, psychological and socio-environmental factors that influence attendance and participation in sport and recreation and related consumption behaviors of media usage, purchase of merchandise, and travel. The course will also explore processes that operate within the consumer to understand how individuals make decisions to spend available resources of time and money on sport and recreation consumption activities.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3227. Advanced Marketing for Sport and Recreation. 3 Credit Hours.

Sport marketing has changed dramatically as the result of increasing competition and environmental change. This course takes a system approach and is designed to extend students' knowledge and experience in marketing of sport and athletic events by first understanding the nature of competition within the industry; second, by understanding the role of information technology; and third, by developing extensive analytic skills. NOTE: SRM 3296 (formerly STHM 3296): Marketing Management in Sport and Recreation is strongly recommended prior to taking this course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

SRM 3228. Sales Management in Sport and Recreation. 3 Credit Hours.

This course will examine the diverse and complex nature of sales within sport and recreation settings. We will introduce basic sales and customer satisfaction concepts and techniques, and then see how they are applied in sport and recreation organizations. Students will be exposed to the sales process through lectures, readings, and assignments.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3231. Leadership in Sport and Recreation. 3 Credit Hours.

This interactive course aims to develop and enhance students' leadership skills. Using a comprehensive perspective of leadership, students will engage in a review of leadership theory, and explore common leadership approaches within sport. Through this combination of theory and leadership lessons with "real world" application, students will develop their own leadership philosophy and work to effectively communicate with their team and community members.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3233. Esports Management and Industry Trends. 3 Credit Hours.

This course is an introduction to the nature, scope, and significance of the esports industry. In this course we will examine vital components of the esports ecosystem including key publishers, titles, teams, platforms, technology, and revenue sources. In addition, students will learn a variety of topics relevant to the business of esports, including esports consumers, professional and collegiate esports, legal and ethical concerns, as well as careers and future directions in the industry. The goal of this course is to give students a better understanding of the overall esports ecosystem, its trends, drivers of change, key stakeholders, and monetization.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

SRM 3234. Esports: Legal and Ethical Challenges. 3 Credit Hours.

This course is an introduction to the legal and ethical challenges of the esports industry. In this course, we will examine legal issues related to intellectual property, governance and regulatory frameworks, negotiating player contracts, and investment strategies. In addition, the course will explore ethical issues relevant to the business of esports, including legalized gambling, violence in video games, sexual discrimination, gaming addiction, and cheating. The goal of the course is to expose students to legal and ethical issues faced by those who operate in the esports industry and how to anticipate and address issues that present themselves in practice. The course will emphasize classroom participation.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3235. Esports Social Media Management and Fan Engagement. 3 Credit Hours.

This course is designed to give students a foundation on the various digital media platforms, fan engagement strategies, and content production and management practices relevant to esports organizations and consumers. The skills learned in this course will enable students to create and develop relevant esports social media engagement strategies and related content creation and management strategies to engage esports consumers and optimize for each social media platform. This course contains an overview of (1) esports digital media management and consumer engagement; (2) esports fan engagement strategy and planning; (3) esports content management: image and video creation and management; (4) esports gaming content distribution platforms and fan engagement strategies: Twitch, Facebook Gaming, and YouTube Gaming; (5) esports communication and online community platforms and fan engagement strategies: Discord, TeamSpeak, Reddit, and Twitter; (6) customizing content for platforms and social media sharing sites: Instagram, Snap Chat, and Twitter; and (7) measuring social media engagement.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3236. Esports Revenue Production. 3 Credit Hours.

One of the fastest growing forms of entertainment in the world is esports, which are simply video game competitions. With over 2 billion video game players in the world, the video game industry is already bigger than the North America film and sports industries combined. Several esports professional teams have valuations like teams in the major pro sports. The esports industry needs revenue to flourish. Many of esports' revenue sources mirror traditional sports, while some are unique. We will examine current revenue sources, as well as spotlight emerging and potential future sources of income. Many traditional sports are beloved for keeping change to a bare minimum, whereas esports is in a constant state of evolution, expansion, and reaction to the exponentially changing media consumption habits of today's tech-thirsty younger generations.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3237. Personal Branding of Athletes: Name, Image, and Likeness. 3 Credit Hours.

This course provides an introduction to the personal brand development of athletes. Students will learn about the process of developing a unique and powerful personal brand for athletes in relation to associated brands within the sport brand ecosystem. Students will learn about the role of digital media and technology in the branding process, as well as how to monetize personal brands in compliance with regulations. Therefore, the course is relevant to student athletes, athletes, agents, and those who are interested in careers working directly with athletes or organizations that employ athletes. Overall, the goal of this course is to give students a better understanding of the sport brand ecosystem with a specific focus on athlete branding and monetization.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SRM 3296. Marketing Management in Sport and Recreation. 3 Credit Hours.

An analysis of essential marketing, promotion and sales principles as currently applied in the sport and recreation industries. Guidelines for formulating marketing goals and strategies, inclusive of target marketing, will be included. The marketing mix will be evaluated in terms of specific applications set in both industry segments. Trends, issues and problems influencing the industry will also be examined. Principles of salesmanship, sales techniques, sales strategies, and evaluation of sales performance in light of goal planning and objectives will be covered.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

SRM 4220. Special Topics in Sport and Recreation Management. 3 Credit Hours.

Variable content course. See the course schedule for specific topics offered in a given semester.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

SRM 4222. Current and Ethical Issues in Sport Management. 3 Credit Hours.

This course is designed to provide students with an in-depth analysis of the current and ethical issues facing sport and recreation management. The course will address some of the major issues facing sport and recreation managers in the areas of youth sports, interscholastic athletics, intercollegiate athletics, amateur sports, and professional sports. In addition, the course will address the major issues facing sport and recreation managers in public, private, commercial, and voluntary agencies providing sport and recreation programs; and in specialized agencies providing campus recreation, military recreation, industrial recreation, and residence-connected sport and recreation programs. The course will build on the competencies students have already developed in their earlier courses, which introduced them to current issues; professional ethics, rights, and responsibilities; concepts of morality; theories of ethics; ethical behavior; and ethical codes. Given their working knowledge, students will be called upon in class to identify solutions to current issues and to make ethical decisions when confronted with ethical dilemmas.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Co-requisites: STHM 4112.

Repeatability: This course may not be repeated for additional credits.

SRM 4296. Current and Ethical Issues in Sport and Recreation Management. 3 Credit Hours.

The purpose of this course is to examine current issues that are of concern to sport and recreation administrators. The student will gain a basic understanding of these issues and develop appropriate strategies for effectively dealing with these issues/problems. Students will be encouraged to take advocacy positions on certain issues that are addressed. The course will build on the competencies students have already developed in their earlier courses, which introduced them to current issues; professional ethics, rights, and responsibilities; concepts of morality; theories of ethics; ethical behavior; and ethical codes. Given their working knowledge, students will be called upon in class to identify solutions to current issues and to make ethical decisions when confronted with ethical dilemmas.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Co-requisites: STHM 4112.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SRM 3296.

Sport, Tourism and Hospitality Management (STHM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

STHM 0827. Dimensions of Diversity: What's Brewing in the Melting Pot?. 3 Credit Hours.

Are we really living in a melting pot? How important are the differences and similarities among individuals? The purpose of this course will be to focus on a variety of issues related to the nature of personal and cultural identity within a diverse American society. Specifically, this course will explore critical factors that shape one's place or standing in society (e.g., race, disability, age, gender, and sexuality). The meaning and significance of these dimensions will be explored as they relate to the societal and technological complexities of the 21st Century. The best practice and research in racism, inequality, and social injustice in industries such as sport, leisure, tourism and healthcare will be explored. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

STHM 0857. Sport & Leisure in American Society. 3 Credit Hours.

Explore the complexity and diversity of American society through the study of sport and leisure. To what extent does the way we play or spectate sports, the way we plan or experience leisure time, reflect American values? As we trace a brief history of the United States through the lens of sport and leisure, we will observe how concepts of freedom, democracy and equality are tested through time. Issues of race, ethnicity, gender, age, disability, and socio-economic class will be prominent as we observe American ideals both upheld and contradicted in the context of the way Americans recreate. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Student cannot receive credit for STHM 0857 if they have successfully completed AAAS 0857, AAS 0857, SOC 0857 or REL 0957.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

STHM 1001. STHM First Year Seminar. 1 Credit Hour.

The first few weeks of college can feel overwhelming with new responsibilities to manage. This course will assist new students in transitioning to the college learning environment by providing access to experts, resources and important skill sets. This course is designed as an intensive, seven-week course that meets weekly with a focus on student self-reflection, awareness and discussion.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

STHM 1113. Foundations of Experience Design and Management. 3 Credit Hours.

This course is an introduction to the nature, scope, and significance of the experience industries and design through the context of sport, hospitality, events, tourism, and related industries. The course will address the conceptual foundations, basic analytical tools, economic significance, current trends, and socio-cultural impacts of the experience economy. Students will be introduced to and learn how to use basic experience design techniques in sport, hospitality, events, tourism, and related contexts. Note: Prior to Fall 2023, this course was titled "The Business of Leisure."

Repeatability: This course may not be repeated for additional credits.

STHM 1115. Foundations of Excel for Sport and Tourism. 1 Credit Hour.

The purpose of this course is to provide a foundational understanding of Excel. This course will prepare students to utilize the tools and features of Excel for their sport, recreation, tourism, hospitality, events, and entertainment courses, internships, and careers. Specifically, students will learn how to use Excel's calculation/computation capabilities, graphing tools/pivot tables, and advanced statistical capabilities with data from the sport, recreation, tourism, hospitality, events, and entertainment industries.

Repeatability: This course may not be repeated for additional credits.

STHM 1220. Special Topics. 1 to 3 Credit Hour.

Variable content course with course titles and description subject to change.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

STHM 2001. Career Exploration and Development Seminar. 1 Credit Hour.

The Career Exploration and Development course will prepare students to search and apply for their Internship I course, develop skills and readiness for the professional workplace, and explore career possibilities in the fields related to sport, recreation, tourism, and hospitality management.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in STHM 1113.

STHM 2114. Leisure and Tourism for a Diverse Society. 3 Credit Hours.

This course emphasizes leisure, sport, recreation, tourism, and hospitality services for a multi-cultural, multi-racial, multi-ethnic society, as well as for persons with disabilities. As the course explores the significance of play, recreation, and leisure throughout the life span, it will focus on the impact of leisure delivery systems on diverse populations within our society. Implications of personal biases will be a thread throughout the course.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

STHM 2401. Foundations of Event and Entertainment Management. 3 Credit Hours.

This course provides an in-depth and comprehensive analysis of the global events and entertainment industries. Topics will include the feasibility, viability and sustainability of the event process, the strategic planning process, business development, human resource management, finance and budgeting, event creation and event orchestration, communications, and career development aspects of event leaders.

Repeatability: This course may not be repeated for additional credits.

STHM 3185. Internship I. 3 Credit Hours.

Internship I is a part-time practical work experience that STHM students complete after reaching sixty (60) credits. The minimum 180-hour internship is a supervised industry-specific (i.e. sport, recreation, events, tourism and/or hospitality) experience that coincides with the full length of the academic semester. The experience provides students the opportunity to apply classroom learning theory to a practical workplace setting related to their major; to immerse themselves in a professional work environment; and gain valuable industry experience that will prepare them for entry into their senior internship and beyond. Internships are coordinated and approved in collaboration with the STHM Center for Industry Engagement (CIE). Students must gain approval from the CIE prior to beginning the internship process.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in STHM 2001 and (BA 2104 or STHM 1115)

STHM 3411. Program and Special Event Planning. 3 Credit Hours.

This course presents a sequential model of the program and event planning process with particular focus upon the role of the servant leader. The course includes a strong theoretical foundation, formulation of philosophy and goals; needs assessment; selection and design of special program and/or one-time event elements; implementation; and evaluation. Different program and special event formats, including fairs, family reunions, festivals, recreation events, sporting events, meetings, conferences, social events, and grand openings, with different levels of leadership involvement will be discussed.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

STHM 3420. International/Domestic Travel Immersion Experience. 3 Credit Hours.

This is a specially designed course that includes educational/experiential trips to sport and tourism destinations. It offers students a unique opportunity to study characteristics and issues specific to the international aspects of the local tourism and hospitality, sport and recreation management industries and destination marketing associations. While abroad, students will visit businesses, companies, and universities; meet leading executives and government/tourism officials; visit sport and recreation facilities; and participate in cultural tours (to museums, theaters, dance performances, the performing arts, and historic parks, trade and art/craft exhibitions). In addition to entertainment, it would indulge students to experience the cultural heritage, ambiance, hospitality, leisure lifestyles, and excitement of the world's great countries and cities globally. The course will help students to develop a better understanding of the global marketplace environments, local cultures, and their identities. (The ideal student would draw upon the body of knowledge based on the concepts of sustainability, global issues and cultural awareness, as well as management and marketing.)

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

STHM 3424. Business of Social Events and Weddings. 3 Credit Hours.

In the Global Event Industry, over 7 million social events and weddings take place every year. While event operations remain consistent, the success of these events relies heavily on the creative and design process. This course, through a creative and designer lens, will focus on the planning and cultural significance of social life-cycle events (graduations, engagement parties, etc.), social events (galas, golf outings), and weddings.

Repeatability: This course may not be repeated for additional credits.

STHM 3425. Event and Entertainment Operations. 3 Credit Hours.

The execution of events follows a very complex model with many moving parts. This course analyzes the process for executing an event from concept and pre-production to implementation and onsite logistics management and measurability. The course content builds on a planning and project management framework and considers elements of logistics, risk management and sustainability.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in STHM 2401.

STHM 3426. Entrepreneurship in Sport, Recreation, Tourism, and Hospitality. 3 Credit Hours.

Examines the management of private business ventures, including an in-depth examination of commercial enterprises as a profit-making business and a survey of small business components. A completed business proposal will be required.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

STHM 3428. Event and Entertainment Revenues. 3 Credit Hours.

The financial sustainability of an event requires the adoption of a complex revenue model that extends beyond traditional sources of income (e.g., ticket sales). Consideration of alternate revenue sources such as sponsorship, fundraising and ancillary incomes are a requirement for successful event execution. This course will educate and apply principles of alternate revenue development. Revenue sources including sponsorship, fundraising and ancillary income will be presented and discussed. Throughout this course, students will learn through practical scenarios from real-life case studies, readings, lectures, discussions and industry professionals as guest speakers.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

STHM 3429. Entertainment Management. 3 Credit Hours.

For many events, live performances (e.g. orchestra, band, dance, theater, etc.) are a core or key element of the event program. Event planners need to understand aspects of live performance production and the skills needed for success. The primary focus of this course, therefore, will be agency negotiations, contract and rider management, staff management as well as audiovisual management.

Repeatability: This course may not be repeated for additional credits.

STHM 3482. Independent Study. 1 to 3 Credit Hour.

This course provides an opportunity for students to engage in systematic investigations, under the direction of a faculty advisor.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may be repeated for additional credit.

STHM 4112. Senior Professional Development Seminar. 3 Credit Hours.

Senior Professional Development Seminar leverages previous professional development experiences in personal skill assessment, networking, industry hours, and Internship I. In this course students will critically analyze advance workplace issues, evaluate skill sets for diverse career options, and strategically utilize and apply career technology tools. Other course topics include the importance of group dynamics, emotional intelligence, and creativity and innovation in the workplace.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in STHM 3185.

STHM 4185. Internship II. 3 to 12 Credit Hours.

Internship II is the second internship requirement completed as a culminating practical experience. Students complete a full-time, school-supervised, and industry-specific internship (i.e. sport, recreation, event, tourism and/or hospitality) that aligns with the full length of the semester. This experiential learning component links classroom theory through the acquisition of knowledge in an applied work environment. The internship must provide, at minimum, an entry-level, managerial-preferred, career-specific experience that develops workplace competencies sought by employers when hiring and recruiting talent. Internships are coordinated and approved in collaboration with the STHM Center for Industry Engagement (CIE). Students must gain approval from the CIE prior to beginning the internship process.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in STHM 3185.

STHM 4191. Senior Project. 3 Credit Hours.

The culminating written project agreed upon by the University and agency supervisors.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Co-requisites: STHM 4185.

Repeatability: This course may not be repeated for additional credits.

STHM 4401. Digital Portfolio Creation. 3 Credit Hours.

Students will create an online digital portfolio. A portfolio showcases both student achievement and student learning over their time at STHM. The Digital Portfolios will provide a window into student learning of both theory and experiential projects.

Repeatability: This course may not be repeated for additional credits.

STHM 4415. The Event Experience. 3 Credit Hours.

This experience-based course will implement the principles of event and entertainment management. This course will provide students comprehensive insight into the facilitation of hands on event management. The experience course provides an experiential learning opportunity as students will develop, plan and execute an official STHM school event.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in STHM 2401 and STHM 3425.

Statistics (STAT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

STAT 0826. Statistics in the News. 4 Credit Hours.

Ever feel overwhelmed by the amount of information we have access to? Not sure whom to believe? This course provides students with the skills and knowledge to discern truth from fiction (and what lies in between) as they engage in rich discussions on current events. Students learn how to understand, evaluate, and criticize information from surveys and scientific studies encountered in newspapers, magazines, textbooks, and scholarly journals. They learn how to distinguish between informative and misleading uses of statistics and make informed decisions in the face of complexity and uncertainty. The focus is on understanding statistics and statistical ideas, not on statistical methodology (although this is also part of the course). Numerous supportive examples taken from a variety of fields in the social, behavioral, and natural sciences accompany each method and concept. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

STAT 0827. Statistical Reasoning & Games of Chance. 4 Credit Hours.

This is a beginning course in probability and statistics with special emphasis on the critical analysis of games of chance. The objectives of the course are to introduce several quantitative concepts with real-life applications. These applications are related to situations that involve fallacies in reasoning, equity markets and games of chance. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

STAT 1001. Quantitative Methods for Business I. 3 Credit Hours.

Fundamentals of mathematics and Excel are necessary for a student to pursue their degree at the Fox School of Business and Management. Topics and illustrations are specifically directed to applications in business and economics throughout this course. The overarching theme of this class is to solidify foundational quantitative and Excel skills and use those skills to solve relevant business applications.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business Basics, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Horticulture, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt, Undeclared-University Studies.

Course Attributes: QA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, 'Y' in STA1, 'Y' in STA2, MATH 1011, MATH 1021, 'Y' in ST1A, 'Y' in ST2A, or SCTC 1021)

STAT 1102. Quantitative Methods for Business II. 4 Credit Hours.

Fundamentals of mathematics and Excel are necessary for a student to pursue their degree at the Fox School of Business and Management. Topics and illustrations are specifically directed to applications in business and economics throughout this course. The overarching theme of this class is to prepare students to be proficient in areas of quantitative analysis, and to use those skills to solve relevant business applications. The course will also include broader and deeper applications of the topics from STAT 1001. Excel will be used to reinforce topics and present solutions.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt, Undeclared-University Studies.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1022, STAT 1001, 'Y' in STA2, 'Y' in STT2, or 'Y' in ST2A)

STAT 1902. Honors Quantitative Methods for Business II. 4 Credit Hours.

Fundamentals of mathematics and Excel are necessary for a student to pursue their degree at the Fox School of Business and Management. Topics and illustrations are specifically directed to applications in business and economics throughout this course. The overarching theme of this class is to prepare students to be proficient in areas of quantitative analysis, and to use those skills to solve relevant business applications. The course will also include broader and deeper applications of the topics from STAT 1001. Excel will be used to reinforce topics and present solutions.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt, Undeclared-University Studies.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1022, STAT 1001, 'Y' in STA2, 'Y' in STT2, or 'Y' in ST2A)

STAT 2103. Statistical Business Analytics. 4 Credit Hours.

This course will cover the fundamentals of data description, data analysis, and graphical methods with applications to business problems. Topics include random variables, discrete and continuous distributions, estimation of parameters, and hypothesis testing. Students will gain proficiency in simple and multiple regression models and forecasting. Excel will be used for data analysis and to reinforce topics taught in class.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Business, Construction Engr Tech, Construction Mgt Tech, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1022, STAT 1001, 'Y' in STA2, 'Y' in STT2, MATH 1021, or 'Y' in ST2A) and (STAT 1102, STAT 1902, MATH 1031, MATH 1041, MATH 1941, MATH 1038, 'Y' in STT3, or 'Y' in MATW)

STAT 2104. Selected Topics in Statistical Business Analytics. 1 Credit Hour.

Statistics 2104 is a one credit hour course that covers probability rules, joint and conditional probability, inference, confidence intervals, hypothesis tests, two sample design, simple linear regression, inference for regression, and multiple regression. NOTE: This course is designed for transfer students who have successfully completed a 3 credit hour introductory statistics course. This one credit hour course will bridge the gap between a 3 credit hour introductory statistics course taken at another institution, and the 4 credit hour Statistics 2103 (Business Statistics) course at Fox. Prior to fall 2014, the title of STAT 2104 was "Selected Topics in Business Statistics."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2101, STAT 2901, MATH 1013, CEE 3048, PSY 1167, SOC 1167, STAT 2512, PSY 2168, or ECE 3522)

STAT 2501. Quantitative Foundations for Data Science. 3 Credit Hours.

This course will cover topics in probability, statistics, and other quantitative concepts for data science. This course will allow students to acquire knowledge necessary in understanding concepts in statistical theory and methods. Students will apply quantitative analysis, critical thinking and interpretation to real-life problems in diverse areas, like business, engineering, healthcare, etc.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1041, 'Y' in MATW, or 'Y' in CRMA08) and (MATH 1042, 'Y' in MATW, or 'Y' in CRMA09)

STAT 2512. Intermediate Statistics. 3 Credit Hours.

This course covers the basics of statistical estimation theory, in preparation for further study in regression, time series analysis, and forecasting (as tested on the SOA/CAS Course 4 professional examination). Topics include: classical point estimation methods; construction of confidence intervals; tests of statistical hypotheses; and basic analysis of categorical data. NOTE: This course replaces the Statistics 2102 (0022) Business Core requirement for Actuarial Science majors.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (AS 2101, AS 2505, MATH 3031, STAT 2103, STAT 2903, or STAT 2104)

STAT 2521. Data Analysis and Statistical Computing. 3 Credit Hours.

This course presents practical applications of statistical methods using software. The emphasis is on giving students experience in solving real life problems using appropriate statistical methods. Statistical techniques studied include organization and presentation of data, statistical testing, multiple regression, Chi-Square tests and logistic regression. Case studies and projects, with applications, are used to show the application of statistical methods to business problems. Through this course students should be able to select, utilize and apply quantitative statistical methods to real life problems, and get familiar with data analysis using statistical software. The main statistical software we use is SPSS. Students will also be exposed to other packages, such as Excel and R.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistics + Data Science, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05)

STAT 2522. Survey Design and Sampling. 3 Credit Hours.

This course presents the principal applications of sample surveys, survey design, criteria of a good sample design, and characteristics of simple random sampling, stratified random sampling, and cluster sampling. Case studies are used where appropriate to illustrate applications of survey sampling. Emphasis will be placed on both the theory and methodology of surveying and include sampling principles, sample design, questionnaire construction, and response problems.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistics + Data Science, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05)

STAT 2523. Design of Experiments and Quality Control. 3 Credit Hours.

The first part of this course provides students with insight into statistically designed experiments and related topics. The course covers the fundamental statistical concepts required for designing efficient experiments to answer real questions. The fundamental concepts of replication, blocking, and randomization are examined. Topics covered include block designs, balanced incomplete block designs, and Latin Square designs. Additional topics include factorial experiments, fractional factorial designs, and orthogonal arrays. The course also introduces students to response surface methodology, mixture designs, and conjoint analysis. Quality improvement can be accomplished using experimental design principles. The second part of the course covers the core principles of the management of quality in the production of goods and services. Statistical quality control techniques are used in the implementation of these principles. Topics covered include control charts, cusum procedures, and Taguchi methods.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistics + Data Science, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, AS 2101, AS 2505, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05)

STAT 2903. Honors Statistical Business Analytics. 4 Credit Hours.

This course provides students with the fundamental concepts and tools needed to understand the role of statistics and business analytics in organizations. It covers basic descriptive statistics, probability, and statistical inference. Topics include probability distributions, random sampling and sampling distributions, point and interval estimation, and hypothesis testing. The course also covers hypothesis testing for several populations, correlation, simple linear regression, multiple regression, and an introduction to data mining. Use of Excel for data analysis and inference. NOTE: This course is a four credit hour course which will substitute for Statistics 2101 (C021) and 2102 (0022) for Fox School students. Prior to fall 2014, the title of STAT 2903 was "Honors Business Statistics."

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Business, Construction Mgt Tech, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mnngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1022, STAT 1001, 'Y' in STA2, 'Y' in STT2, MATH 1021, or 'Y' in ST2A) and (STAT 1102, STAT 1902, MATH 1031, MATH 1041, MATH 1941, MATH 1038, 'Y' in STT3, or 'Y' in MATW)

STAT 3501. Statistics for Engineers. 3 Credit Hours.

Not to be taken by School of Business and Management students; open only to Engineering students. Descriptive statistics, inference, regression and correlation, and experimental design. Engineering applications.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, or 'Y' in MATW)

STAT 3502. Regression and Predictive Analytics. 3 Credit Hours.

The course covers a variety of statistical methods useful in interdisciplinary research, such as simple and multiple regression analysis, ANOVA, analysis of covariance, logistic regression, and predictive models. Emphases are placed on rationales, assumptions, techniques, and interpretation of results from computer packages.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05) and (STAT 2501 or 'Y' in CRST09)

STAT 3503. Applied Statistics and Data Science. 3 Credit Hours.

The course will provide a sound treatment on core topics in applied statistics using modern data science techniques. Some basic theory will be reviewed, but the course will emphasize applications. R will be used as the main statistical software package for this course. Upon completing this course, students should be able to demonstrate the knowledge of fundamental concepts and properties in applied statistics such as multiple linear regression, hypothesis testing, model diagnostic and selection and the ability to select proper statistical tools and justify different needs.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistics + Data Science, Statistical Sci + Data Analyt, Statistics, Undeclared-Business & Mnngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, AS 2505, SOC 1167, CEE 3048, PSY 1167, PSY 2168, SOC 3201, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRSO03, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05)

STAT 3504. Time Series and Forecasting Models. 3 Credit Hours.

This time series analysis and forecasting models course with interdisciplinary applications covers important univariate and multivariate time series methods, including ARIMA models, further forecasting methods (logistic regression, ARIMA), centered and training Moving Average (MA). Students will apply the body of theoretical knowledge to analyzing real-life data sets.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, or 'Y' in CRST08) and (STAT 2501 or 'Y' in CRST09)

STAT 3505. Introduction to SAS for Data Analytics. 3 Credit Hours.

This course is an introduction to programming for statistical analysis using the SAS Software System. Students will learn data set creation by data transformation to/from SAS using Import and Export functions. Concatenation, merging and subsetting data, as well as data restructuring and new variable construction using arrays and SAS functions will be taught. Simple procedures to clean and perform quality control of data, as well as procedures for calculating descriptive statistics, plots, and print outs will be covered. Laboratory exercises and homework assignments include brief exercises as well as manipulation and analysis of real data sets.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, SOC 3201, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRSO03, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05)

STAT 3506. Nonparametric and Categorical Data Analysis. 3 Credit Hours.

This course covers estimation and testing of hypotheses when the functional form of the population distribution is not completely specified. The topics also include sampling models and analyses for discrete data: Fisher's exact test, logistic regression, ROC analysis, log-linear models and Poisson regression, conditional logistic regression, Cochran-Mantel-Haenszel test, measures of agreement between observers, quasi-independence, multinomial logit models, proportional odds model, association models, generalized estimating equations (GEE). Students work with R and SAS throughout the semester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRST08, or 'Y' in CRPS05) and (STAT 2501 or 'Y' in CRST09)

STAT 3507. Intermediate Statistics. 3 Credit Hours.

This course covers the basics of statistical estimation theory, in preparation for further study in regression, time series analysis, and forecasting (as tested on the SOA/CAS Course 4 professional examination). Topics include: classical point estimation methods; construction of confidence intervals; tests of statistical hypotheses; and basic analysis of categorical data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (AS 2101, AS 2505, MATH 3031, STAT 2103, STAT 2903, or STAT 2104)

STAT 3508. Data Management, Missing Data, and Outlier Analysis. 3 Credit Hours.

Significant advances in technology have resulted in most organizations collecting enormous amounts of data both deliberately and incidentally in the course of doing business. Managing data on this scale and converting it into knowledge to facilitate decision making presents exciting new challenges. Although data is ubiquitous, real data is also often "dirty", corrupted with various forms of errors, or missing. Regardless of whether data is "clean", it may not be in the proper format for analysis, or data from multiple places may need to be merged in order for analysis to take place. Thus, the first step in generating good information from data is almost always to clean, process, and validate the data. The goal of this course is to explore tools and techniques for managing data, cleaning data (fixing errors, identifying outliers, etc.), extracting subsets or samples of data, merging and combining datasets, summarizing data, and dealing with the most common problems that may arise with data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2103, STAT 2903, MATH 3031, STAT 2104, SOC 1167, CEE 3048, PSY 1167, PSY 2168, AS 2101, AS 2505, ECE 3522, SOC 0825, ANTH 0825, POLS 0825, PSY 0825, SOC 3201, PSY 1003, 'Y' in CRST03, 'Y' in CRST06, 'Y' in CRMA16, 'Y' in CRSO02, 'Y' in CRCE01, 'Y' in CRAS02, 'Y' in CREE01, 'Y' in CRSO01, 'Y' in CRPO01, 'Y' in CRSO03, 'Y' in CRPS02, 'Y' in CRST08, or 'Y' in CRPS05)

STAT 3580. Special Topics - Statistics. 3 Credit Hours.

Special topics in current developments in the field of statistics.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

STAT 3582. Independent Study. 1 to 6 Credit Hour.

Readings, papers and/or laboratory work under supervision of a faculty member.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

STAT 4596. Capstone: Statistical Science and Data Analytics. 3 Credit Hours.

The purpose of the capstone project is for the students to apply theoretical knowledge acquired during the program to a real project involving actual data in a realistic setting. During the project, students engage in the entire process of solving a real-world data science project: from collecting and processing actual data, to applying a suitable and appropriate analytic method to the problem. Both the problem statements for the project assignments and the datasets originate from real-world domains similar to those that students might typically encounter within industry, government, NGO, or academic research. The project will culminate with both an in-class presentation and final research paper.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (STAT 2521 (C or higher) or 'Y' in CRST05) and (BA 2196 or BA 2996)

Strategic Management (SGM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SGM 0827. Creativity and Organizational Innovation. 3 Credit Hours.

Being creative is about solving problems or approaching opportunities in novel and valuable ways. This course is designed to help ALL students better harness their full creative potential - whether you think: "I am not creative" or "I already have more ideas than I can handle", this class will help you come up with more creative ideas that offer more value and have greater impact on the world. Although creativity has been studied by nearly every professional domain, this course focuses on creativity as a driver of organizational innovation - from non-profits to small businesses and large corporations to students' own entrepreneurial startups, creativity and innovation are critical to providing value and ensuring long-term survival. Throughout this course students will develop important life skills while learning to creatively solve problems through a number of real-world innovation challenges. No matter what career or profession you are going into, being more creative and appreciating how and why modern organizations function the way that they do will help you to be more valuable, more employable, more innovative, and more entrepreneurial.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

SGM 2525. Management Consulting: Principles and Practices. 3 Credit Hours.

Whether your goal as a management consultant is to join a dedicated firm, operate in-house, or launch your own practice, the factors for success are similar. This course focuses on the skills (hard and soft), methods, and practices of successful consultants. Consulting is highly practical; therefore, the course includes many practical exercises with content from experts in the field. Research projects and project simulations will be evaluated by senior practitioners from industry, including the course instructor. A personal assessment and individual development plan will help you identify and map the best path to a career in consulting. [Note: This course would also benefit aspiring entrepreneurs and students preparing for the capstone.]

Repeatability: This course may not be repeated for additional credits.

SGM 3001. Leading and Managing Small Businesses and New Ventures (for non-business students). 3 Credit Hours.

This course is designed to introduce students with limited or no business background to the critical business leadership, management, and strategy tools and perspectives needed to run a small business, enterprise, or organization as well as to launch a new venture and become a successful entrepreneur. Whether you want to move into leadership/management roles, build a consulting or freelance business, start a new for-profit or non-profit venture, or simply want to be more successful working in any organization, understanding the fundamentals of management and strategy will help you achieve these goals. NOTE: Business students are not eligible to register for this course and should consider SGM 3503 Lean Startup instead.

College Restrictions: May not be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

SGM 3002. Planning to Start Your Own Business. 3 Credit Hours.

It's a fact: Entrepreneurs report greater satisfaction with their work. Chief among the reasons for this is the freedom to determine their own destiny and the appreciation of having a direct impact with their work. In the current economic climate, more and more students are finding entrepreneurial career paths offer them better or complementary options to traditional employment. This course provides students with an understanding of how to research, write, and present effective business plans. The business plan is a critical strategic document used to plan the launch, pivot, or growth of an enterprise. Students will learn about the interrelationship among the various aspects of the plan including the industry, target market, competition, marketing strategy, human resources, financial resources, and management team among others. Students will also learn about presenting the business plan as they engage in mock presentations to local entrepreneurs and venture capital investors.

NOTE: We recommend that students already have an idea for a new venture prior to enrolling in this course. Student who do not yet have an idea should consider taking SGM 3501. Students cannot receive credit for both SGM 3002 and SGM 4596; Fox Entrepreneurship Majors should take SGM 4596 instead of this course.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Entrprnrship & Innovation Mgt, Entrepreneurship.

Repeatability: This course may not be repeated for additional credits.

SGM 3501. Entrepreneurial and Innovative Thinking. 3 Credit Hours.

Thinking like an entrepreneur is about seeing opportunities and passionately pursuing them. Anyone can be entrepreneurial -- whether you start the next Facebook, take control of your work-life balance with a lifestyle business, have an impact on the world with a social venture, or drive change and innovation in an existing company. The goal of this course is not to teach students to start a venture nor to manage a business (this is covered in later courses) but to help you understand the hidden value of your ideas. By highlighting the impact of various types of innovation in driving the development of industries and technological fields, we demonstrate the importance of strategy, competitive advantage, core competencies, and value chains to organizations and industries. By training students to identify opportunities and creatively solve problems, we help develop invaluable skills and perspectives that will make anyone more successful in their professional life. Finally, by showing students all the options that entrepreneurship offers as a potential career path, we begin the process of training you to become a successful entrepreneur.

Repeatability: This course may not be repeated for additional credits.

SGM 3503. Lean Startup: Fast and Inexpensive Ways to Test and Launch Your Ideas. 3 Credit Hours.

Have an idea for a new product or service? Want to start your own business, non-profit, or social-impact venture? Ready to innovate in existing organizations? Creating something new doesn't have to require months or years of planning and development. This hands-on course will teach you fast and economical ways to get out of the classroom to test your ideas and launch your business. The Lean Startup or Lean Launchpad approach has transformed the way that entrepreneurship is taught and practiced and has even changed how the most innovative organizations in the world invent new products and services or reinvent themselves via innovation. This course will help you become a more proactive and successful entrepreneur and innovator. No previous experience or courses in business or entrepreneurship required. NOTE: Prior to fall 2018, the course title was "Lean Startup: Fast and Frugal Approaches to High-Impact New Ventures, Product Invention, and Innovation."

Repeatability: This course may not be repeated for additional credits.

SGM 3504. Launch a New Venture in 100 Days. 3 Credit Hours.

Successful entrepreneurs need to adapt to changing circumstances and pivot as they launch, sustain, and grow their ventures. This reality is captured in the mantra--ready, fire, aim--which summarizes a fail-fast, learn, adapt, and succeed model that is taking over nearly all domains of entrepreneurship and innovation (from new venture launch to new product development). This course takes this idea to the streets as students identify an opportunity and work alone or in small teams to launch a business, pivot, and adapt to real-time evidence gathered, and become profitable all during a single semester. Although not all students will launch their dream venture in this short time, you may be able to create a business that provides a primary or secondary income, take part in the growing gig economy, make some money by selling a profitable venture, or save money to start your next venture. However, more than anything the real learning (and fun) begins once you get out of your head and the classroom to actually launch your business.

Repeatability: This course may not be repeated for additional credits.

SGM 3511. Doing Well by Doing Good: Where Innovation and Entrepreneurship Meet Social Impact. 3 Credit Hours.

These days the boundary between for-profit and social entrepreneurial ventures is increasingly becoming blurred. Every company, large and small, is making the multi bottom line of people-planet-profit an all-important goal. If you work in any organization or want to start a new venture of your own it is critical that you prioritize "purpose" or create "meaning." Organizations that ignore their impact on society and the world miss out on opportunities for innovation as well as the immense competitive advantage to having a positive social impact (i.e., doing good) while you do well. If you make meaning you will make people want to write stories about you, want to work for you, and want to buy from you. This course will explore the various ways the emerging U.S. social enterprise sector is evolving. More broadly, this class examines the ways in which entrepreneurship and business in general is embedded in--and affects--larger social, cultural, ecological, and economic relationships.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

SGM 3521. Pitching and Funding Entrepreneurial Ventures. 3 Credit Hours.

In this course you will learn to tell your story in a compelling way so you can pitch a venture concept to funding sources. This course discusses a range of equity and non-equity financing options available to organizations today. Students will meet real angel and VC investors who will speak as guests in the class and will have a chance to look at the actual pitches that have recently been funded (or not) in the Philadelphia new venture scene. One of the biggest problems for Temple entrepreneurs is financing their ideas. Although securing funding is always difficult, this course helps you appreciate several options you have and the implications for each. A special focus will be paid to the investment decision (i.e., what does it take to persuade an investor to part with their hard earned money) and students will gain insights into factors that influence the viability and financial health of a business as well as the steps that can be taken to increase venture valuation.

Repeatability: This course may not be repeated for additional credits.

SGM 3525. The Consulting Engagement: Managing Projects and Change. 3 Credit Hours.

In management consulting, project management and change management are two sides of the same coin. This course presents both the tools and practices successful consultants use to manage both the process and the people. The engagement management component of the course focuses three critical activities: 1) From RFP to scope to exit interview, managing the client, 2) Project panning across the boundaries that divide consultant and client, and 3) How to analyze, manage and report upon the financial components of a project, including project ROI. The second half of the course addresses the need for leaders to manage employees and other key stakeholders through transformational change, and the role the consultant plays in the process. By understanding the challenges of managing people through complex change, as well as the methodologies, tools and proven approaches of successful consultants, students can ensure enterprise-wide understanding, buy-in and collaboration throughout the transformation process.

Repeatability: This course may not be repeated for additional credits.

SGM 3580. Special Topics - Strategic Management. 3 Credit Hours.

Special topics in current developments in the field of general and strategic management.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

SGM 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under supervision of a faculty member.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

SGM 3585. Social Impact Internship - Work with Benefit/B-corps, Non-profits, or Multi-bottom-line Ventures. 3 Credit Hours.

Modern organizations increasingly care about their impact - whether they are focused 100% on addressing a social issue or on balancing profit motives with creating a positive impacts on other stakeholders. Multi-bottom-line, benefit or B-corps, non-profits, and other social impact organizations still need a viable strategy, need to be successfully managed, and need to create value in the world (often for multiple stakeholder groups simultaneously). In this internship course students will have the opportunity to work in a Social Impact organization so that they can leverage their energy and expertise to create a positive impact in the world while gaining real-world work experience, building their resume, and networking with social impact professionals. Every semester we have dozens of internships available and students can bring their own opportunities to the class. Please check Banner and contact faculty for more details on available internships.

Course Attributes: SF

Repeatability: This course may be repeated for additional credit.

SGM 3682. Independent Study. 3 Credit Hours.

Readings and/or papers under supervision of a faculty member.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

SGM 3685. New Venture Internship: Learning to be a High-Value Employee, Manager, or Founder. 3 Credit Hours.

During this semester long course, students will work on a specific high-value project in an entrepreneurial new venture or entrepreneurial support organization (e.g., accelerator, incubator, investment group). In coursework, students will learn practical management approaches necessary for dynamic entrepreneurial settings. Emphasis is placed on helping students understand how they create value for the organization while making sure they learn practical professional skills and approaches to managing themselves, their supervisors, and the projects they are running. Every semester we have dozens of internships available and students can bring their own opportunities to the class. The best internships are typically with smaller, high-growth entrepreneurial companies and organizations - not with large, traditional organizations (and rarely with family or friends or organizations you are already familiar with). Please check Banner and contact faculty for more details on available internships.

Repeatability: This course may be repeated for additional credit.

SGM 4596. Strategic Business Planning: Feasibility Assessment / Business Planning for Entrepreneurial Ventures. 3 Credit Hours.

The business plan is frequently misunderstood and assumed to be most relevant when entrepreneurs seek external funding. In reality, business plans encourage entrepreneurs and managers alike to invest some thought, time, and ink before they risk a great deal more time and resources launching an ill-conceived new venture. In addition, business plans are frequently underappreciated as a vital instrument for existing businesses. When evaluating a new product launch, modified offering, market entry, or making other changes to existing business models, a business plan can help convince internal stakeholders as well as external partners to support the new venture. This course teaches students some very practical skills including how to do a complete market and financial feasibility analysis of a new venture idea as well as how to flesh-out a business concept via a business plan. In addition, all students will present their ideas to experienced entrepreneurs for feedback and have the opportunity to submit their ventures to the Be Your Own Boss Bowl (BYOBB) competition.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SGM 3501 or SGM 3504), SGM 3503, and (BA 2196 or BA 2996)

Study Away Non-TU Program (STAW)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

STAW 3011. Non-TU Domestic Program. 1 to 12 Credit Hour.

Repeatability: This course may be repeated for additional credit.

STAW 3021. Non-TU Study Abroad. 1 to 12 Credit Hour.

Repeatability: This course may be repeated for additional credit.

STAW 3031. TU Exchange Program. 1 to 12 Credit Hour.

Repeatability: This course may be repeated for additional credit.

STAW 3041. Study Abroad Insurance. 0 Credit Hours.

Repeatability: This course may be repeated for additional credit.

Supply Chain Management (SCM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SCM 3505. Lean Six Sigma in Supply Chain Management. 3 Credit Hours.

This course develops students' knowledge and application of different methodologies, systems and tools, to address the managers' drive for efficiency, effectiveness, and quality. By identifying, examining, and improving these gaps through root-cause analysis and continuous improvement methodologies, the supply chain - or any other process - can correct current issues and position itself for future successes. This course introduces students to these critical skills and tools and demonstrates appropriate application to real-world challenges. This course is ideal for any FOX undergraduate student (but especially HRM, Risk, Health Care, Marketing, SCM) and non-Fox students (prerequisite is a 2000-level statistics class) as it applies basic management decision tools to a variety of challenges.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (any 2000-level STAT course or 'Y' in CRST07)

SCM 3506. Project Management. 3 Credit Hours.

This course delivers a strategic overview of Project Management tools, approaches and concepts. It covers both the top-down and detailed practitioner points-of-view by following the life-cycle approach to managing projects. The course progresses through the Phases of Initiation, Planning, Execution, Monitoring and Control, and Closure. (I-P-E-M&C-C). Each phase will be examined to understand its purpose, deliverables, and relevant tools to ensure successful project progression. The focus is to gain an understanding of project management basics, challenges, and solutions for both project and business leaders. A group research project is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSOM 3101 (may be taken concurrently) or MSOM 3901 (may be taken concurrently))

SCM 3507. Data Management and Analytics for Business Strategies. 3 Credit Hours.

With significant advances in technology, most organizations collect enormous amounts of data, ranging from markets to customers. Managing data on this scale and converting it into knowledge to facilitate decision making presents exciting new challenges. The underlying principles of data management are often similar, whether used in data analytics and business intelligence, enterprise resource planning (ERP), customer relationship management (CRM), supply chain management (SCM), and other aspects of business. This course provides a practical introduction to the fundamental principles of data management in the context of business strategy. The course focuses first on how to store, extract, and manipulate data in order to answer questions and gain insights from it. Then, in part two, the emphasis shifts to practical, applied, forecasting techniques that begin with realistic types of data, beginning with ETL (extract, transform, load) and move on to produce accurate forecasts from the data that have been obtained.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MSOM 3101 (may be taken concurrently) or MSOM 3901 (may be taken concurrently))

SCM 3515. Principles of Supply Chain Management. 3 Credit Hours.

Operations and Supply Chain Management is the art and science of integrating the flow of products, information and money through the pipeline from the sources to the end customers. The goal of the course is to provide an understanding of the fundamental principles and activities occurring in the supply chain and to prepare students with a basic knowledge of activities within the supply chain.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MSOM 3101 (may be taken concurrently), MSOM 3901 (may be taken concurrently), 'Y' in CRMO01, or 'Y' in CRMO02)

SCM 3516. Transportation and Logistics Management. 3 Credit Hours.

Transportation, distribution, logistics, or supply chain management all refer to the process by which companies move material, parts, and products to their customers. Proper planning and scheduling are crucial to efficient operations and customer satisfaction. Transportation management encompasses planning goods movements across its different modes – truck, rail, water, air and pipeline. This course provides students with a basic familiarity to the important issues, concepts and models for analyzing different transportation functions. The focus will be on presenting information about, and providing access to, available tools and techniques that ensure a smooth flow and distribution of goods in the industry today. The course uses both quantitative and spatial techniques for proper decision making – specifying how, when and where to transport goods; selection of appropriate location of warehouses and distribution points; selection of route and carriers; and understanding of logistics and distribution costs.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MSOM 3101, MSOM 3901, 'Y' in CRMO01, or 'Y' in CRMO02)

SCM 3517. Inventory and Warehouse Management. 3 Credit Hours.

A key decision in manufacturing, retail and some service industry businesses is how much inventory to keep on hand satisfying the customer needs. Inventory is often a business's largest asset and not having enough inventories means losing sales, while holding too much inventory is expensive; therefore an efficient inventory control system is very important in any business. This course develops students' skills for quantitative and analytical thinking in the general areas of Operations, Logistics, Supply Chain Management, and Managing Global and Service Operations by developing analytical skills and an ability to make "data-driven" decisions. This course is a required course for the SCM Major and SCM Minor.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MSOM 3101, MSOM 3901, 'Y' in CRMO01, or 'Y' in CRMO02)

SCM 3518. Sourcing and Procurement. 3 Credit Hours.

This course introduces students to the fundamental concepts, tools and techniques in purchasing that will make them aware of the demands placed on supply chain managers, understand the strategic nature of purchasing, understand the impact of purchasing on the competitive success and profitability of modern organizations and finally, secure better job prospects and superior on-the-job performance. This course develops students' skills for quantitative and analytical thinking and ability to make "data-driven" decisions. This course is the capstone course for the SCM Major and is required as part of the SCM Minor.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Supply Chain Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SCM 3515 or 'Y' in CRSC01) and (SCM 3516 or 'Y' in CRSC02)

SCM 3580. Special Topics in Supply Chain Management. 3 Credit Hours.

Course addresses current topics in the field of supply chain management.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (MSOM 3101 or MSOM 3901)

SCM 3581. SCM Internship/Co-Operative Experience. 3 Credit Hours.

This internship or co-operative experience is reserved for Supply Chain Management (SCM) majors, having at least a Junior Level Status (completion of core), with 3.0 GPA or better. The course counts as a SCM elective; therefore, a supply-chain focus (as evidenced in the final deliverable) is required. At a minimum, students should have taken SCM 3515 and SCM 3516.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Supply Chain Management.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in SCM 3515 and SCM 3516.

SCM 3582. SCM Independent Study. 1 to 6 Credit Hour.

Independent studies allow students the opportunity to work with an individual professor to take on advanced study in the Supply Chain Management major. Typically, students take independent study(ies) as juniors or seniors after they have completed the majority of the requirements for the major; students should demonstrate a drive for academic excellence (evidenced in a GPA above 3.0). Students need to find a professor who is willing to work with them on the independent study.

Pre-requisites: Minimum grade of C in SCM 3515 and SCM 3516.

SCM 3596. Sourcing and Procurement. 3 Credit Hours.

Globalization and increased competition with fluctuating price and availability of raw materials have increased the need for better supplier management. A company's supply chain consists of various entities, including suppliers, manufacturers, distributors, logistics providers, and retailers to fulfill a customer's demand. Sourcing is identifying potential suppliers or manufacturers for a specific product or service, while procurement involves validating, negotiating, finalizing, and purchasing from the source. Both sourcing and procurement are important activities for any organization as it helps in significantly reducing the overall costs, improving the product quality, and shortening the product time to market.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in SCM 3515 and SCM 3516.

Teaching English to Speakers of Other Languages (TESL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

TESL 3613. Understanding Multilingual Students' Language and Literacy Development. 3 Credit Hours.

This course focuses specifically on the academic language and literacy skills needed for English learners (ELs) to be successful in U.S. classrooms and beyond. The course includes a thorough review of key theories and principles in first and second language acquisition, with an emphasis on foundational knowledge of language structures (i.e., English phonology, morphology, and syntax). The course also looks at the literacy challenges faced by students at different points in their educations (K through 12 as well as adult education) and the role of disciplinary literacies. With this, students will understand the complexities of reading and writing development in more than one language. The practicum component of the course will give students an opportunity to apply this theoretical knowledge to practice and to conduct hands-on analyses and diagnostic assessments of a learner's reading and writing strengths and needs. Students will use these analyses to address learner needs with instructional methods, strategies, and targeted activities. These experiences will allow students to deepen their understanding of the structure of English, the processes involved in reading and writing development, and the most effective practices in teaching English reading, writing, and grammar.

Repeatability: This course may not be repeated for additional credits.

TESL 3631. Principles and Practice for Teaching English Learners. 3 Credit Hours.

This course provides an introduction to theory, research, and best practices in teaching English Learners (ELs) in the elementary, middle, and secondary grades. The course begins with an overview of sociocultural characteristics of ELs, legal responsibilities, and educational and language policies in the United States. Students will also learn the basic theories and principles associated with second language acquisition. Students will be introduced to state-of-the-art approaches for teaching ELs to meet Common Core Standards. Students also will explore the philosophies of bilingual and ESL education as well as different program models that address the education of linguistically diverse students. As a result, students will gain an understanding of how to design and adapt lessons and assessments for English learners. Students will also develop cross-cultural competence through interactions with ELs, parents, teachers, and school staff. Through a practicum component, students will learn to design lessons and assessments for small-group and whole-class differentiated instruction. Students will also develop cross-cultural competence through interactions with ELs, teachers and school staff.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

TESL 4442. Strategies for Teaching English as an Additional Language. 3 Credit Hours.

This course introduces students to the most current approaches to teaching English as a second language. Drawing on contemporary research, the course will focus on creating optimal learning environments that engage, motivate, and support English language learners through meaningful and age/level appropriate activities. This hands-on course provides practical strategies and ideas for designing and teaching effective language lessons that integrate reading, writing, listening and speaking. Additionally, by participating in the required field experience, students will have multiple opportunities to apply and reflect upon particular approaches, building essential skills as a (future) language educator.

Repeatability: This course may not be repeated for additional credits.

TESL 4443. Teaching English World-Wide. 3 Credit Hours.

This course explores language as a social form, focusing on the connections between language, culture, perception and linguistic globalization. Against a sociolinguistic backdrop, the course aims to raise students' consciousness to the political, socio-cultural and ethical aspects of the global spread of English. The topics covered will equip students with the basic, critical concepts needed to examine the pros and cons of the internationalization of English worldwide. At a practical level, students will be guided to reflect on and incorporate these concepts in their approaches to teaching English in the US and abroad. Through readings, discussions, international conversation partners, and reflection assignments, students will (re)conceptualize how English is taught as an international language, problematizing the issues related to "Standard English" and "NES/NNES dichotomy." Individually and collectively, the class will deconstruct notions of "one-size fits all" approach to teaching (i.e. English language as a standardized language) and explore pedagogies that take into consideration multiple varieties of Englishes. From start to finish, students will be encouraged to draw on their own experiences, link theory to practice, and collect resources to support their future careers.

Repeatability: This course may not be repeated for additional credits.

TESL 4444. English Language Teaching: Curriculum and Assessment. 3 Credit Hours.

This course will guide you in understanding and applying principles of curriculum design and teacher-based assessment. Course readings, assignments and class discussions will guide you through thinking about how to best teach English language learners by adapting a curriculum that has been handed to you (i.e. a mandated curriculum), by building upon existing curricula in your instructional setting, or by creating a curriculum from scratch. In this course, curriculum is conceived of as an instructional process which includes planning, instructing and assessing. A foundational principle of this course is assessment can and should be integrated into instruction. As such, you will learn how to sequence interrelated lessons in response to students' performance on a variety of authentic assessments. You will also learn approaches to environment and needs analysis and will experience how these analyses can inform teaching and curriculum design. Toward the end of the course, the Continua of Biliteracy will be used as an organizing framework that will guide you toward taking a critical stance when reflecting upon the curriculum you have created.

Repeatability: This course may not be repeated for additional credits.

Temple University Japan (TUJ)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

TUJ 0879. The History of Japanese Design: Anonymity, Desire, Shadows and Sports. 3 Credit Hours.

This course will examine Japanese design as an expression of both local and global manifestations of cultural identity. Each semester, focus will be on aspects of how Japanese design emerged in the Modern period out of Japanese arts and crafts, as well as the influence of other cultures on Japanese design. Exploration of cultural identity will begin with an overview of modern design, and modernity itself, as a utopian social and cultural project. Attention will then shift to the birth of design in Japan through the Meiji (1868-1912), Taisho (1912-1926), Showa (1926-1989) and Heisei (1989-2019) eras; how each era's political, social, and cultural climate affected the designed output of Japanese society; and what these historical factors mean for the contemporary Reiwa (2019-present) era. Field trips to museums dedicated to design and crafts will be included to further illustrate the philosophical and theoretical aspects of the class, helping to connect the theory and practice of design in Tokyo today. Additionally, coursework will include readings designed to help students understand modernity and postmodernity; how Japanese literature approaches materials and design; the study of visual and material culture; how gender norms are in large part designed; and the import and export of aesthetics from Japan to the world via fashion, the Olympics, objects, and attitudes. The class will help students develop a robust understanding of design within the Japanese cultural context and an enhanced sense of design history and theory from both a Japan-centric and globally-oriented perspective.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

TUJ 1001. TUJ Bridge Seminar 1. 1 Credit Hour.

This one-credit course introduces Bridge Program students to the opportunities and rigors of higher education, as well as to the skills needed to use academic resources successfully in college. This course is designed to help students make a successful transition to university life and learn to function as members of their academic community.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUJ Bridge Program.

Repeatability: This course may not be repeated for additional credits.

TUJ 1002. Bridge Seminar 2: Academic Research. 2 Credit Hours.

This two-credit course introduces TUJ Bridge Program students to university-level research skills. Students will learn about the purpose and processes of academic research in different areas of study, and plan, develop, and complete an independent research project during the semester. This course aims to develop information literacy skills students need in General Education and major courses at an American university. Course is restricted to TUJ Bridge Students only.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUJ Bridge Program.

Repeatability: This course may not be repeated for additional credits.

Theater (THTR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

THTR 0805. Dramatic Imagination: The Performing Arts in Society. 3 Credit Hours.

Theater is a universal form of human expression - found in almost every society throughout history. We use it not only for entertainment, but also to explore the deepest questions about ourselves and our society. But do we know how it works? Can we identify the techniques that playwrights, actors, directors and designers use to create meaning on the stage? And what is unique about experiencing a performance live? In this class, you will take advantage of Philadelphia's rich theater community to see professional productions - as well as those on our own campus - and hear from theater artists talking about their work. At the end of the semester, you will have a richer understanding and appreciation of this universal art form. This course fulfills the Arts (GA) requirement for students under GenEd and the Arts (AR) requirement for students under Core. If you have previously completed Theater C110/1002, The Collaborative Art, you cannot get duplicate credit for this course.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

THTR 0807. The Creative Spirit: A Multidisciplinary View. 4 Credit Hours.

Man is the animal who creates, but why and how? What is happiness? Whether we are making art or making dinner, creativity ultimately makes a difference in our lives and the lives of others. In this course we will view Creativity through the lens of the Arts and investigate the primary relationship of the creative process to the pursuit of happiness. Students will master the fundamental concepts of creativity and engage with artists, performers and working professionals to discover the central role creativity plays in their work and in their daily lives. Apply your personal creativity in weekly hands-on group workshop sessions. Embark upon field assignments to experience Philadelphia's finest theater, dance and music events and the visual arts. Follow your bliss; discover the importance of intrinsic motivation as a key to developing a passion for life-long learning. NOTE: This course fulfills the Arts (GA) requirement for students under Gen Ed and the Arts (AR) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed Theater 0907.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

THTR 0813. From Page to Stage. 3 Credit Hours.

Learn how a theatrical play progresses from a concept to a fully-realized production. Students begin by learning how theater, movies and television reflect human psychology and society, move on to analyzing scripts, and finally explore how storytelling artists bring those scripts to life. In this asynchronous on-line course, students will learn about set, light, costume and sound design as well as script writing and directing by creating fun, hands-on, assignments to help them understand the work behind the theater, film and television they love! NOTE: This course fulfills the Arts (GA) requirement for students under GenEd.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

THTR 0825. The Art of Acting. 3 Credit Hours.

Whether you have some or no experience in theater, this course will open new doors and provide a firm understanding of the actor's craft. We will start with improvisatory exercises to explore basic principles of acting, which will help you expand your expressive capabilities, imagination and spontaneity, and give you greater confidence on stage and in front of people. At the same time, you will use your growing knowledge of the craft to analyze the work of actors on stage and film. Finally, you will work on assigned scenes from dramatic literature, giving you the basic tools of text analysis, the principal tool with which an actor figures out a text. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed Theater 0925, 1201 or C025.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

THTR 0841. Classics of African American Theater. 3 Credit Hours.

In part because of its development, initially, as a consequence of enslavement, African American theater is both entertaining and potentially volatile. We will look at some of the most important African American plays from the late 1700's through to the present, and explore the problems, contestations and the nature of race, class, and gender as exemplified in these dramatic texts. From Ira Aldridge's "The Black Doctor" in 1847, through to August Wilson's "Radio Golf" (2007), we will investigate the historical emergence and institutionalization of race thinking and practice on the American stage. As we consider this span of performance literature, we will analyze debates about race and social justice, investigate the collaborative nature of theater and develop oratory skills in provocative discussions. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

THTR 0842. Race on the Stage. 3 Credit Hours.

A unique taste of artistic diversity, this course combines traditional and interdisciplinary content with the rich experience of "live art." Learn how conventions of the past contribute to arts production and the dramatic presentation of race, gender, sexuality, class and disability today, and how those presentations continue to inform notions of identity. As you read classic and contemporary dramatic texts and critically analyze actual performances, you will be looking at diversity from multiple perspectives and acquiring the kind of understanding of "difference" and "tolerance" that will prepare you to live and work in a global world. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

THTR 0852. World Performances. 3 Credit Hours.

Dance, puppetry, theater, opera - these are performance forms that are part of the cultures of the world. From the earliest religious rituals to modern interpretations of ancient traditions, performances are as varied and diverse as the cultures from which they arise. You are probably familiar with performances arising from western cultures, but the Noh Drama of Japan, the Water Puppetry of Viet Nam, the Koothu Patari folk performances of India, the Beijing Opera in China, the Capoeira Martial Arts performances of Brazil--these might be new to you. Explore world performances through live class presentations, lectures, video and attendance at international performances in Philadelphia. You might also have the chance to perform yourself! NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed Theater 0952.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

THTR 0907. Honors The Creative Spirit: A Multidisciplinary View. 4 Credit Hours.

Man is the animal who creates, but why and how? Whether we are making art or making dinner, creativity ultimately makes a difference in our lives and the lives of others. In this course we will view creativity through the lens of the arts and explore the broader manifestations of the creative spirit in a variety of related fields and disciplines. Students will learn the fundamental concepts of creativity and engage with artists, performers and working professionals exploring the central role creativity plays in their work. Explore your creativity in weekly hands-on group sessions augmented by periodic field visits to see performances, concerts, galleries, etc. Be creative, follow your bliss and develop a passion for life-long learning! NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and the Arts (AR) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed Theater 0807.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

THTR 0925. Honors Art of Acting. 3 Credit Hours.

Whether you have some or no experience in theater, this course will open new doors and provide a firm understanding of the actor's craft. We will start with improvisatory exercises to explore basic principles of acting, which will help you expand your expressive capabilities, imagination and spontaneity, and give you greater confidence on stage and in front of people. At the same time, you will use your growing knowledge of the craft to analyze the work of actors on stage and film. Finally, you will work on assigned scenes from dramatic literature, giving you the basic tools of text analysis, the principal tool with which an actor figures out a text. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed Theater 0825, 1201 or C025.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

THTR 0952. Honors World Performances. 3 Credit Hours.

Dance, puppetry, theater, opera - these are performance forms that are part of the cultures of the world. From the earliest religious rituals to modern interpretations of ancient traditions, performances are as varied and diverse as the cultures from which they arise. You are probably familiar with performances arising from western cultures, but the Noh Drama of Japan, the Water Puppetry of Viet Nam, the Koothu Patari folk performances of India, the Beijing Opera in China, the Capoeira Martial Arts performances of Brazil--these might be new to you. Explore world performances through live class presentations, lectures, video and attendance at international performances in Philadelphia. You might also have the chance to perform yourself! NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed Theater 0852.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

THTR 1002. Theater: The Collaborative Art. 3 Credit Hours.

Live professional theater performances serve as the basis for the study of contemporary theater: its elements, its ideas, and its creators. Lecture/demonstrations of the elements of theater art presented by the artists/teachers of the theater faculty. If you have previously completed Theater 0805: Dramatic Imagination, you cannot get duplicate credit for this course. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. If you have previously completed Theater 0805: The Dramatic Imagination, you cannot get duplicate credit for this course.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

THTR 1003. Creativity: Basic. 3 Credit Hours.

The introductory course to creativity in theater. Techniques to encourage creative self-expression and ways of presenting ideas and materials. NOTE: Restricted to majors, Creativity is the matrix course for all theater students and leads to the various emphasis programs.

Repeatability: This course may not be repeated for additional credits.

THTR 1008. Poetry as Performance. 3 Credit Hours.

This theater course takes the poem off of the printed page, from mere recitation to performance. It teaches theater tips and helpful techniques used in one of the hottest mediums in performance art today, rekindling love of poetry, from Robert Frost, to T.S. Eliot, to Ezra Pound, from Sterling Brown, to Langston Hughes to Sonia Sanchez.

Repeatability: This course may not be repeated for additional credits.

THTR 1087. Production Practicum. 1 Credit Hour.

Participation required in at least one departmental production activity, by fulfilling a production contract. It is preferred that students do at least one contract in each area of the four production areas. NOTE: For theater majors only. Theater 1087 is required every semester the student is a full-time major. If Theater 1087 is not successfully completed, Theater 1187 must be taken concurrently with Theater 1087 the following semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Acting, Musical Theater, Stage Management, Theater and Comm Engagement, Theater Education, Theater, Tech Prod + Mgmt, Voice and Speech for the Actor.

Repeatability: This course may be repeated for additional credit.

THTR 1096. Introduction to Theater Process. 3 Credit Hours.

Methods of study of dramatic text. Principles of dramatic form; cultural context of modern realistic drama; readings and projects. NOTE: Required of all majors. Recommended to non-majors who intend to work with drama professionally in television or film, or as critics. Theater majors must pass Theater 1096 with a grade of C or better.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater, Tech Prod + Mgmt.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

THTR 1141. Voice I for Musical Theater. 1 Credit Hour.

A beginning study of audition methods including material selection, role preparation, and musical, dramatic and vocal analysis and presentation. The course will address facets of auditioning including: how to work with a pianist, working with a mike, how to mark musical audition selections, monologue/song selection and analysis, and audition etiquette and decorum. Students will work in both instructional and mock audition settings. The class will align itself with the learning outcomes of the voice department to prepare each student to participate and succeed in their jury performance at the end of the Spring semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 1142. Voice II for Musical Theater. 1 Credit Hour.

A continued study of audition, performance and interpretive methods including material selection, role preparation, and musical, dramatic, vocal analysis and presentation. The course will continue to address facets of auditioning/performance including: how to work with a pianist, working with a mike, how to mark musical audition selections, monologue/song selection and analysis, and audition/performance etiquette and decorum. Students will work in both instructional and mock audition settings. This class will also focus on interpretive, historical and stylistic elements of performance/process. The class will align itself with the learning outcomes of the voice department to prepare each student to participate and succeed in their jury performance at the end of the semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 1141.

THTR 1187. Production Practicum. 1 Credit Hour.

Same as Theater 1087. Theater 1187 and Theater 1087 must be taken concurrently the semester following receipt of the grade F for Theater 1087. NOTE: Required in the event that a student is unsuccessful in the completion of Theater 1087.

Repeatability: This course may be repeated for additional credit.

THTR 1202. Fundamentals of Voice and Movement. 3 Credit Hours.

This course is designed to teach the basics of the human form and how that form inhabits space. The course will increase the students' awareness of their own bodies and will teach the fundamentals of their bodies' anatomy. As the students move their bodies through space, and begin to explore various movement patterns and shapes, they will also engage their voices in order to learn how physical postures change the quality, the tone, and/or the emotional expression of the vocal instrument. In addition, the course will ask each student to analyze his/her movement and vocal patterns and habits through a series of in-class exercises, and the students will explore variations of movement and voice in an effort to expand upon these habitual practices. In order to teach the often-complicated concepts discussed in this course, the instructor will use anatomical vocabulary, in-class exercises focusing on breath, body and movement, performance movement theory, and the student's own self-designed movement project.

Repeatability: This course may not be repeated for additional credits.

THTR 1211. Fundamentals of Acting. 3 Credit Hours.

This course is intended for the student who wants more than a basic introduction to acting but may not be able to major in theater. Exercises, scene study, script analysis. NOTE: Ideally this course would be a continuation of work done in Theater 0825: The Art of Acting. Prior to spring 2009, the course title was "Basic Acting II."

Repeatability: This course may not be repeated for additional credits.

THTR 1231. Acting I. 3 Credit Hours.

The actor explores techniques in relaxation, improvisation, and concentration using Uta Hagen's Basic Object exercises as a foundation. These techniques will be applied to one scene and one monologue taken from contemporary American dramatic literature. Prior to fall 2009, the course title was "Introduction to Acting."

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Acting, Musical Theater, Stage Management, Theater and Comm Engagement, Theater Education, Theater, Tech Prod + Mgmt, Voice and Speech for the Actor.

Repeatability: This course may not be repeated for additional credits.

THTR 1232. Jacques Lecoq Technique Part 1. 3 Credit Hours.

This course introduces students to the Jacques Lecoq technique, which uses the body as a starting point for performance. Using the body to create space, characters, emotions and relationships among others, the class will use improvisation and ensemble work as key tools to create physical theater rather than psychological. This course is the first part of a longer journey, which goes from the Neutral Mask to Clown and an approach to various European classical styles.

Repeatability: This course may not be repeated for additional credits.

THTR 1411. Welcome Backstage. 3 Credit Hours.

This course is an introduction to all things technical in theater. Students will learn the vocabulary of the theater, where it relates to techniques, materials, equipment and the machinery that make theater a physical reality. NOTE: Theater majors must pass Theater 1411 with a grade of C or better. Prior to spring 2009, the course title was "Technical Theater Production."

Repeatability: This course may not be repeated for additional credits.

THTR 1511. Stagecraft. 3 Credit Hours.

In this course, students will develop their skills in various areas of theater production. They will be trained in scenic carpentry and scene shop operations, lighting technology, sound technology, projections technology, sewing and costume shop operations, and theater rigging. The focus in this class will be on safety, 'industry best practices', efficiency, as well as craft.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 2001. Introduction to Hip Hop Theater. 3 Credit Hours.

This course is designed to introduce students to the principles and techniques characteristic of Hip Hop theater and dance. Students will examine the impact Hip Hop is having on the professional theater in the United States, study the genesis and history of Hip Hop culture, and become acquainted with and execute Hip Hop movement combinations. Emphasis will be placed on Hip Hop's growing influence on American Theater. Through lecture and performance opportunities, students will gain an appreciation for the contributions of the art form to theater and become familiar with the demands of Hip Hop in performance. Movement fundamentals of alignment, flexibility, endurance, dynamic range, and strength will be addressed.

Repeatability: This course may not be repeated for additional credits.

THTR 2003. Stage to Screen. 3 Credit Hours.

Stage to Screen is a study of plays that have been made into films, some successfully, others not so. This course will focus on similarities and differences between plays and films and what is gained or lost when a play is adapted to film.

Repeatability: This course may not be repeated for additional credits.

THTR 2008. Poetic Ethnography. 3 Credit Hours.

"Poetic Ethnography" is a second level Theater Literature and Performance course meant as a companion to "Poetry as Performance" (Theater 1008). As a performance technique, the choreopoem is a genre of narrative theater that has increased in popularity alongside Hip Hop and Spoken Word. As an advanced compliment to "Poetry as Performance," this class creates a space for social engagement. "Poetic Ethnography" seeks to further develop our understanding of the use of choreopoem.

Repeatability: This course may not be repeated for additional credits.

THTR 2085. Theater Internship. 3 or 6 Credit Hours.

This course offers hands-on, organized, professional work under supervision in a professional theater or a leader in the entertainment industry. Permission of the instructor is necessary. Course registration must occur prior to actual internship work.

Repeatability: This course may be repeated for additional credit.

THTR 2101. Ballet I for Musical Theater. 1 Credit Hour.

Development of technical skills in ballet, including safe, efficient alignment and clear articulation of movement vocabulary is a necessity for a musical theater actor to excel in the professional world. This course is the Musical Theater student's first in a series of semesters of dance training.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 2121. Ballet II for Musical Theater. 1 Credit Hour.

Further development of technical ballet skills increases students' core strength and provides a basic skill set that will be added to in succeeding semesters. Ballet is the primary building block of dance training and the Temple Musical Theater student benefits from continuous study of the discipline.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 2131. Music Theory/Sightsinging: Basic. 2 Credit Hours.

Basic fundamentals of music theory, including key signatures, rhythm, melody, harmony, and dynamics, are examined in order to strengthen the actor's ability to learn music, and prepare music for auditions and performance. The course includes the study of sight singing, basic keyboard skills, rhythm in simple meters, accidentals, major scales, key signatures, major and perfect intervals, solfege and rhythmic reading drills. These fundamentals are obligatory for success for Musical Theater Concentration students.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 2141. Voice III for Musical Theater. 1 Credit Hour.

A continued/advanced study of audition, performance and interpretive methods including material selection, role preparation, and musical, dramatic, vocal analysis and presentation. The course will address facets of auditioning/performance including: how to work with a pianist, how to mark musical audition selections, monologue/song selection and analysis, and audition/performance etiquette and decorum. Students will work in both instructional and mock audition settings. This class will also focus on interpretive, historical and stylistic elements of performance/process. The class will align itself with the learning outcomes of the voice department to prepare each student to participate and succeed in their jury performance at the end of the semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 1142.

THTR 2142. Voice IV for Musical Theater. 1 Credit Hour.

A continued/advanced study of audition, performance and interpretive methods including material selection, role preparation, and musical, dramatic, vocal analysis and presentation. The course will address facets of auditioning/performance including: how to work with a pianist, how to mark musical audition selections, monologue/song selection and analysis, and audition/performance etiquette and decorum. Students will work in both instructional and mock audition settings. This class will also focus on interpretive, historical and stylistic elements of performance/process, on-camera audition techniques, new work, sight reading, and additional music skills. The class will align itself with the learning outcomes of the voice department to prepare each student to participate and succeed in their jury performance at the end of the semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 2141.

THTR 2150. Ballet for Musical Theater. 1 Credit Hour.

Ballet is the primary building block of dance training and provides a basic skill set and vocabulary that will be utilized throughout various styles and in choreography. This course is designed to broaden and accelerate student's understanding of classical ballet vocabulary, movement principles, and to improve and develop technical skills and artistry. In each class, students participate in movement exercises and dance phrases (consisting of a full and dynamic ballet barre; center floor, adage, pirouette combinations, across-the-floor exercises, petite and grand allegro) which will evolve from simple to more complex as the semester progresses.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may be repeated for additional credit.

THTR 2201. Acting Styles. 3 Credit Hours.

The objective of this course is to undertake the challenges of heightened language and period style while maintaining commitment to objectives, detailed given circumstances and truthful listening and reacting. This is the third and final acting course available to students who are not enrolled in the Acting Concentration.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1211, THTR 1231, 'Y' in CRTH02, or 'Y' in CRTH12)

THTR 2210. Special Topics. 2 to 3 Credit Hours.

This course is reserved for intensive study of a particular aspect of theater. NOTE: For Majors only. Permission of the instructor is necessary.

Repeatability: This course may be repeated for additional credit.

THTR 2221. Voice for the Actor. 3 Credit Hours.

Fitzmaurice Technique applied to increase the power, range and expressivity of the voice. Through Yoga and bioenergetics the actor achieves relaxation. Through rib, diaphragmatic and abdominal exercises, the actor finds the freedom of the voice possible in strength and structure. NOTE: Required for Acting Concentration.

Repeatability: This course may be repeated for additional credit.

THTR 2231. Speech for the Actor. 3 Credit Hours.

In this course students will learn the fundamentals of speech for the performer. Students will learn how to read and interpret the chart of the International Phonetic Alphabet (IPA) and will be taught the IPA symbols associated with the English language. Utilizing both play and practice students will learn the anatomy of articulation in order to understand where and how language sounds are formed. Through this course of study students will improve their ability to hear and speak a variety of language sounds in order to broaden their own vocal flexibility and clarity for use both on and off the stage.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 2232. Jacques Lecoq Technique Part 2. 3 Credit Hours.

This class is the next step to the Lecoq method. We will be using the tools acquired from Theater 1232 to create performance pieces inspired by different, very specific theatrical styles such as melodrama, bande mimee, Commedia Dell' Arte, and clown.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 1232.

THTR 2233. Advanced Speech for the Actor. 3 Credit Hours.

In Advanced Speech for the Actor, students are encouraged to apply the skills they have learned in Speech for the Actor to a wider variety of texts. They will hone their ability to hear and create a range of language sounds through warm-ups and spoken exercises at the top of each class, and they will practice their versatility in speaking and creating characters by working on scripts from different eras and styles for graded performances.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 2231 or 'Y' in CRTH04)

THTR 2241. Basic Movement. 3 Credit Hours.

Introduces the student actor to basic skills, concepts and techniques of movement for the actor. Modern dance, improvisation and physicalization of dramatic text are integral parts of the course. NOTE: Required for Acting Concentration.

Repeatability: This course may be repeated for additional credit.

THTR 2251. Dance for the Actor. 3 Credit Hours.

Experience in various dance idioms including modern, social, jazz, and character choreodram especially designed for the actor.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 2241 or 'Y' in CRTH05)

THTR 2252. Alexander Technique. 3 Credit Hours.

The goal of this class is to teach actors to recognize when they interfere with the natural functioning of their physical and vocal instruments and to introduce them to a practical method of working with themselves that they can apply to their performance activities. NOTE: Prior to spring 2009, the course title was "Movement for the Actor II."

Repeatability: This course may not be repeated for additional credits.

THTR 2261. Acting II. 3 Credit Hours.

The actor applies techniques gained in Theater 1231 to scene work. Exploration of scenes from 20th and 21st century American dramatic literature with particular focus on defining beats and playing objectives. NOTE: Required for Acting, Directing, and Musical Theater Concentrations. Prior to fall 2009, the course title was "Basic Acting Technique."

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 1231 or 'Y' in CRTH02), (THTR 2221, MUSC 1201, or 'Y' in CRTH13), and (THTR 2231 or 'Y' in CRTH04)

THTR 2262. Improvisation. 3 Credit Hours.

This course is designed to develop spontaneity and increase listening skills. It will begin with exercises in trust building, listening and ensemble building. You will then progress to short form scenes to increase skill, and by the end of the semester you will learn to do long form work that may include a performance.

Repeatability: This course may not be repeated for additional credits.

THTR 2271. Dialects for the Actor. 3 Credit Hours.

The study of dialects most commonly used in the American theater. Each student has the opportunity to work with an additional dialect of particular interest. Application of the International Phonetic Alphabet, as well as ear-training are fundamental to learning new dialects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 2231 or 'Y' in CRTH04)

THTR 2411. Introduction to Design. 3 Credit Hours.

A project oriented class covering the language of basic composition and how it translates into the language of theatrical design. Script analysis of a play is realized in a series of projects in costume, lighting and set design. NOTE: Theater Majors must pass 2411 with a grade of C or better.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2421. Creative Sound Technique. 3 Credit Hours.

Practical techniques for theater sound design.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater, Tech Prod + Mgmt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03) and (THTR 2411 (may be taken concurrently) or 'Y' in CRTH08)

THTR 2431. Lighting and Sound Technology. 3 Credit Hours.

This class is a hands-on skills based course in the study of the technology and equipment used in Lighting and Sound Design. Topics covered include paperwork, troubleshooting and problem solving, maintenance, and budgeting. Skills can be applied to careers as Master Electricians and Sound Engineers.

Repeatability: This course may not be repeated for additional credits.

THTR 2441. Stage Management I. 3 Credit Hours.

This course will be a thorough analysis of the technical and organizational aspects as well as the typical responsibilities of stage management. The focus of the course is the stage manager's and/or assistant stage manager's process. Topics include, but are not limited to: preparing for and running rehearsals, communication and paperwork skills, and leadership and team building methods. Work on a Temple Theaters production, serving in a stage manager or Assistant Stage Manager capacity is not required, but strongly encouraged.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2442. Propcraft. 3 Credit Hours.

This course explores the theory and practice of properties design and prop-mastery. Students will learn the process involved in properties research, organization, design, and construction and will gain practical experience by working on specific projects within the Department Production season. Students will learn how to communicate and collaborate with a design team, production staff and stage management. The course could lead to becoming a props master on an upcoming production.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2501. Theater Safety and Management. 3 Credit Hours.

This class will cover the workplace safety and health for the theater industry and federal and state OSHA guidelines. Students will receive their 30 hour General Industry Safety and Health Training Card from OSHA at the successful completion of the course. All students will investigate safety issues in and around the theater, and present their findings for industry-specific hazards. They will also develop an industry-specific accident prevention program. The knowledge learned can be used in present and future employment and will provide technical directors and managers with a safe workplace for their staff, actors, and crews.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Theater-Design, Theater, Tech Prod + Mgmt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2512. Lighting Design I. 3 Credit Hours.

The basics of Lighting Design for the theater are introduced and explored. Students will work with theatrical lighting equipment in the light lab. Projects range from recreating paintings with light, to lighting staged scenes from three different scripts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03) and (THTR 2411 or 'Y' in CRTH08)

THTR 2611. Make-Up. 3 Credit Hours.

This course will meet once a week for three hours in the theater's Make-Up lab. This course will cover basic skincare, light and shadow relating to the face, the basics of theatrical make-up application, "glamour" make-up, period make-up styles, prosthetics, and specialty make-up such as scars, bruises and blood. A hands-on studio class, students will learn to create make-up designs on themselves and others.

Repeatability: This course may not be repeated for additional credits.

THTR 2612. Costume Design I. 3 Credit Hours.

This one semester course is an introduction to Costume Design for the stage. Students begin by learning how to read a play script looking for clues to character. Students discover how to explore character through a series of exercises including character/scene breakdowns, research of period costume, collage and sketching techniques as well as developing costume design through the exploration of line, form, color and texture. NOTE: Graphic projects required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03) and (THTR 2411 or 'Y' in CRTH08)

THTR 2711. Drawing and Rendering for the Theater I. 3 Credit Hours.

This course introduces students to a wide variety of drawing, painting and mixed media techniques in a hands-on studio environment. The Fall semester will be an exploration of all types of drawing media, including graphite pencil, charcoal, conte crayon, pastel, India ink and fiber tipped pens. The Spring semester will build upon what was learned in the fall and will introduce students to a wide variety of painting techniques and mixed media including watercolor, gouache, collage and acrylics. NOTE: This is a drawing course, and students will be expected to purchase art supplies during the semester.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2712. Drawing and Rendering for the Theater II. 3 Credit Hours.

This Painting laboratory empowers set, costume and lighting designers by providing them with a deeper understanding of the manipulation of color for the stage. Students learn color theory and color palettes as well as how to render a variety of surfaces including costumes, properties and architecture. Painting exercises are completed in and out of doors, from life and from research. Media includes watercolor, gouache, pastel, acrylic, markers, pencil, airbrush and collage. NOTE: This is a drawing course, and students will be expected to purchase art supplies during the semester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2713. Design Drafting. 3 Credit Hours.

By learning the mechanical and conceptual methods of drafting, students develop the skills needed to produce graphic representation of scenic and lighting design for the theater. Students learn to draft precise, attractive, and thorough drawings based upon industry standards. Utilizing skills acquired through written texts, lecture, and class discussion, students complete, inside and outside of class, drafting projects (ground plans, elevations, sections, isometrics, etc.) based on samples given by the instructor. Students present projects in class for critique and discussion, and the course culminates in final project presentations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 2721. Scene Design I. 3 Credit Hours.

This course continues the development begun in Basic Design and Technical Theater classes. It is project oriented with the class time devoted to discussion and presentation. The focus is on interpretation of script, basic research, development of visual metaphor with an emphasis on the power and manipulation of space. The course begins with design of sculpture and moves through increasingly complex solutions to the creation of stage environments. Drafting, rendering and model building skills are developed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03) and (THTR 2411 or 'Y' in CRTH08)

THTR 3001. History of the Theater I. 3 Credit Hours.

This course studies the development of theatrical modes of presentation, playwrights, plays, architecture, actors, producing agents, and audiences from the beginnings of theater to 1800. Relationships are drawn between the developing theater and the political and social history of the times.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater, Tech Prod + Mgmt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1096 or 'Y' in CRTH01) and (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 3002. History of the Theater II. 3 Credit Hours.

This course studies the development of theatrical modes of presentation, playwrights, plays, architecture, actors, producing agents, and audiences from 1800 to today. Relationships are drawn between the developing theater and the political and social history of the times.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater, Tech Prod + Mgmt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1096 or 'Y' in CRTH01) and (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 3011. Methods of Teaching Artistry. 3 Credit Hours.

An exploration of the theory and practice of teaching artistry, students will examine how to engage young people, in partnership with a classroom teacher, in and through theater. A hands-on course, students will acquire practical methods, strategies, and a repertoire of exercises, through which theater can be used as a teaching and learning tool in K-12 classroom settings. Students will learn from each other through observation and discussion of the Teaching Artist methods implemented in class. Students will also learn from professional Teaching Artists and Education Directors from Philadelphia's many professional theaters who will share their work and experience in the field. NOTE: This is a required course for students in the Theater Education Concentration within the Department of Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 3012. American Musical Theater. 3 Credit Hours.

The course examines the history of the American Musical Theater, including the many entertainment genres influential to its creation. A study of musicals ranging from the late 19th century to the present as well as significant composers, lyricists, choreographers and other contributors to the art form. NOTE: Theater majors must pass Theater 3012 with a grade of C or better.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 3013. Methods of Teaching Theater. 3 Credit Hours.

An exploration of the theory and practice of teaching, students will examine how to engage young people in and through theater classes in the public school setting. Students will learn practical methods, classroom management strategies, a repertoire of exercises, and be guided through curricular development and implementation of lessons in K-12 classroom settings. Throughout the course, students will apply the methods learned in their Temple classroom and during observations in school district classrooms. NOTE: This is a required course for students in the Theater Education Concentration within the Department of Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 3031. Lighting, Sound and Video Technology. 3 Credit Hours.

The class will acquaint students with a broad range of techniques, processes, and technologies as they relate to lighting, audio and video for live events. Through lectures, class discussions, projects, and hands on applications of this information, students will be introduced to lighting, audio, and video control technology, signal flow, system networking, and trouble shooting.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 3051. Modern Directions. 3 Credit Hours.

The dramatic literature, criticism, and theater history of the modern period studied in appropriate cultural contexts. NOTE: Theater majors must pass Theater 3051 with a grade of C or better.

Repeatability: This course may not be repeated for additional credits.

THTR 3052. Theater of Protest. 3 Credit Hours.

Behind nearly every successful social movement, thwarted military coup or insurgent political revolution, there has always been the Theater of Protest. A unique, cross-culturally distinct genre, the plays, the performers and oftentimes, even the playwrights themselves, that have added their political bent to the discourse on the Theater of Protest, have put their lives on the line as resistance warriors in cultural movements, sometimes even paying the ultimate price for their art.

Repeatability: This course may not be repeated for additional credits.

THTR 3053. Women in Theater. 3 Credit Hours.

This course examines the contribution of women in the theater from the renaissance to the present. Playwrights, actors, directors and designers are considered.

Repeatability: This course may not be repeated for additional credits.

THTR 3054. African-American Theater. 3 Credit Hours.

This course examines thematic concerns and dramatic techniques of African American theater from the Harlem Renaissance to the present.

Repeatability: This course may not be repeated for additional credits.

THTR 3055. Performance Art. 3 Credit Hours.

An introduction to performance art. Lecture and discussion of the history and aesthetics of the form. Students will create projects that may combine music, art, dance and theater. The course culminates in an original performance piece presented to the Theater Department at the end of the semester.

Repeatability: This course may not be repeated for additional credits.

THTR 3056. Shakespeare on Film. 3 Credit Hours.

"Shakespeare on Film" provides students the opportunity to develop an historical perspective of how the plays of William Shakespeare have been adapted to film. Students become familiar with the important 20th century figures who have been instrumental in the adaptation of Shakespeare to film, develop a critical understanding and appreciation of the film adaptations of Shakespeare's plays, and gain an appreciation of the breadth and influence of Shakespeare as seen in films of the last two decades.

Repeatability: This course may not be repeated for additional credits.

THTR 3057. Queer Theater. 3 Credit Hours.

Through the examination of seminal queer plays of the 20th and 21st centuries, from Sholom Asch's "God of Vengeance" to Mart Crowley's "The Boys in the Band" to Douglas Carter Beane's "The Little Dog Laughed," the students obtain an appreciation of the contribution of theater on the emergence of a visible and viable queer presence in society.

Repeatability: This course may not be repeated for additional credits.

THTR 3058. Community Engaged Theater. 3 Credit Hours.

This course will look at the use of theater and performance to examine and combat institutional, social, cultural, interpersonal, and personal oppressions. We will look at the various definitions of Theater for Social Change/Community Engaged Theater by reading essays and articles about the history of such work. We will engage in discussions about the ethical and practical challenges to doing this kind of work and develop our own ethical philosophies as practitioners. We will primarily use the work of Augusto Boal, founder of Theatre of the Oppressed, to develop our own performances that respond to local (expanding out to global) issues which most interest the members of the course. The course will combine theory and practice. This is a PRACTICAL course that will involve theater games, class participation and performance.

Repeatability: This course may not be repeated for additional credits.

THTR 3070. Seminar in Drama. 3 Credit Hours.

Intensive research into a specialized topic in dramatic literature, criticism, or theater history. Written and/or oral presentation required.

Repeatability: This course may be repeated for additional credit.

THTR 3080. Special Topics. 2 to 4 Credit Hours.

Advanced study in special topic areas under the direction of an area specialist. NOTE: Theater majors only. Permission of a faculty member.

Repeatability: This course may be repeated for additional credit.

THTR 3082. General Study. 1 to 3 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

THTR 3085. Practice Teaching in Theater I. 1 to 3 Credit Hour.

This course is intended for upperclassmen Theater Education majors or Theater Education Certificate students who arrange a teaching position for grades seven through twelve in the public or private school setting. Placement in a school outside of official student teaching (arranged through the College of Education and Human Development) must be approved by Head of Theater Education prior to registering for this course. NOTE: This is an elective course for students in the Theater Education +1 Program within the Department of Theater, and requires permission from Head of Theater Education.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Theater Education.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in THTR 3011.

THTR 3086. Practice Teaching in Theater II. 3 Credit Hours.

Active internships in the Education Department of a regional theater designed to edify the Theater Education Concentration student in the artistry and mechanics of the Education Department of a professional theater's activities. NOTE: This is a required course for students in the Theater Education Concentration within the Department of Theater.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Theater Education.

Repeatability: This course may be repeated for additional credit.

THTR 3096. Classical Tradition. 3 Credit Hours.

The dramatic literature, criticism, and theater history of ancient Greece and Rome and their influence on Western theatrical development, studied in appropriate cultural contexts. NOTE: Theater majors must pass Theater 3096 with a grade of C or better.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

THTR 3097. Romantic Tradition. 3 Credit Hours.

The dramatic literature, criticism, and theater history of the Renaissance in England and subsequent developments in Europe in the late 18th and early 19th centuries studied in appropriate cultural contexts. NOTE: Theater majors must pass Theater 3097 with a grade of C or better.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

THTR 3101. Jazz I for Musical Theater. 1 Credit Hour.

This course is designed to introduce the student to principles and techniques characteristic of Jazz dance. Students will execute movement combinations in a variety of jazz styles. Emphasis will be placed on movement fundamentals of alignment, flexibility, endurance, dynamic range, and strength. Offerings in Jazz dance are essential to the Temple Musical Theater student's development.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 3121. Jazz II for Musical Theater. 1 Credit Hour.

An intermediate level dance technique course designed to continue the student's development in the techniques of Jazz dance and acquaint the student with the origins and evolution of Jazz dance technique in America.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 3130. Jazz for Musical Theater. 1 Credit Hour.

This course is designed to further the principles and techniques characteristic of Jazz dance. Students will learn and execute: a technical warm-up based on jazz, ballet, and modern techniques, physical conditioning and anatomy exploration, center and across the floor sequences and movement combinations in a variety of jazz styles. Emphasis will be placed on fundamentals of alignment, mind-body awareness, use of space, flexibility, endurance, dynamic range, strength, poise, musicality, style and expressive presentation.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may be repeated for additional credit.

THTR 3131. Advanced Jazz for Musical Theater. 1 to 3 Credit Hour.

An intermediate/advanced dance level technique course designed to continue the musical theater student's development in the technique of jazz dance. Combinations, leaps, and turning sequences become more complex with emphasis on technical proficiency, alignment fundamentals, use of space, strength, agility, endurance, weight placement, musicality, terminology, etiquette, and expression.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (THTR 2101, THTR 2121, THTR 3101, and THTR 3121)

THTR 3132. Musical Theater Voice & Acting. 3 Credit Hours.

Advanced work in the application of performance techniques to specific songs from the American Musical Theater. Through exercises, analysis, critique and performance of musical theater compositions, students strengthen vocal technique and performance skills. Accordingly, the examination of composers, genres and styles provides a greater appreciation for the development of American musical theater. The incorporation of truthful acting with attention to given circumstances and objectives is blended with principles of healthy singing.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 3151. Ballet III for Musical Theater. 1 Credit Hour.

The development of ballet techniques learned in Ballet I and II is continued. Barre combinations move faster and become more complex. Center exercises are longer and require more memorization and stamina. Different rhythms are introduced. Turnout based on individual ability and strength continues to be emphasized along with posture and core strength. More types of pirouettes and jumps are learned and embellished (multiple turns, beats). Proper placement is reinforced by students applying those concepts to the exercises and movements they learn. Head and arm movements are coordinated and synchronized. Memorization of steps and musicality are further developed. Precision of movement is stressed. The historical and social context of specific ballet movements is explained. Prerequisites are Ballet I and II, or by permission of instructor.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 2101 and THTR 2121.

THTR 3191. Research. 1 to 3 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

THTR 3210. Theater Workshop. 3 Credit Hours.

Special Topics in Acting: Intensive study of a specific theater discipline as it applies to acting, voice, speech, singing and/or movement.

Repeatability: This course may be repeated for additional credit.

THTR 3220. Theater Workshop. 3 Credit Hours.

Special Topics in Acting: Intensive study of a specific theater discipline as it applies to acting, voice, speech, singing and/or movement. A continuation of Theater 3210.

Repeatability: This course may be repeated for additional credit.

THTR 3221. Advanced Voice for the Actor. 3 Credit Hours.

Focus on structuring the voice while maintaining relaxation and centeredness acquired in destructuring. Use rib-reserve and abdominal support/transverse measures. Apply to monologues, poetry and scenes. NOTE: For majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Theater.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 2221 or 'Y' in CRTH13) and (THTR 2231 or 'Y' in CRTH04)

THTR 3230. Theater Workshop. 3 Credit Hours.

Special Topics in Acting: Intensive study of a specific theater discipline as it applies to acting, voice, speech, singing and/or movement.

Repeatability: This course may be repeated for additional credit.

THTR 3231. Acting for Commercials, Industrials and Voice-Overs. 3 Credit Hours.

This course is intended to introduce students to multiple aspects of different commercial markets within the acting profession. Through hands-on exposure to various commercial, industrial, and voice over copy, audition techniques, and prompting tools, this course will train students in the proficiency of how to successfully audition, self tape, and use their acting skills within this medium, while also navigating the business side of the profession.

Repeatability: This course may not be repeated for additional credits.

THTR 3241. Combat & Stunts for the Actor. 3 Credit Hours.

These classes will focus on the art and skill of stage and stunt violence. The actors will be trained in unarmed fake fighting so that they will be able to perform violence for film, television or stage with safety and precision. From punches and slaps, blocks and kicks or just falling safely, these classes help keep the actor safe long after the class is over. NOTE: Prior to spring 2009, the course title was "Stage Combat."

Repeatability: This course may not be repeated for additional credits.

THTR 3261. The Job Market. 1 to 3 Credit Hour.

This course will prepare Theater students from all areas of study to better market and brand themselves both in person and digitally through activities, exercises, and projects based on industry standards and aesthetically pleasing products. Students will identify strategies and trends in elements of portfolio creation and presentation, successfully gather and organize materials highlighting their work, and create a brand unique to their identity and skillsets. The course will focus not only on establishing, but also maintaining, a career in the entertainment industry.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03) and (THTR 2411 or 'Y' in CRTH08)

THTR 3262. Improvisation 2. 3 Credit Hours.

This course builds on the foundational skills explored in Improvisation, and continues the exploration of Actor's Improv. Short-form games and exercises are revisited to review and build skills in listening, being present and adaptable, and creating successful scene work. Students continue to develop skills as simultaneous playwright/director/actors in creating realistic, relationship-based scenes with a variety of emotionally-grounded truth-inspired characters. Several long-form formats and devices are explored. Students work with Instructor to create a trusting ensemble of spontaneous actors able to perform a variety of improvised forms in both comic and dramatic tone. End of semester includes a performance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 2262 or 'Y' in CRTH07)

THTR 3278. Acting for the Camera. 3 Credit Hours.

This course is a technique-based class designed to develop approach and skills for acting for the camera. Students work from actual Television and Film scripts, past and present, analyzing texts and applying a specific technical approach of intention, circumstance, listening and discovery-all in the experience of the moment of cinematic acting. The goal is to prepare students for auditions and for work in all media platforms in front of the camera. Individual exercises in how to self-tape, vulnerability and sense memory are also explored.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Theater.

Repeatability: This course may be repeated for additional credit.

THTR 3279. Acting III. 3 Credit Hours.

The goal of this course is to assist the actor in negotiating the challenges of heightened language and period style while maintaining a commitment to objectives, detailed given circumstances, and truthful listening and reacting. The content of this course will focus on such writers as Shakespeare, Moliere, the Greeks, and Restoration. Requires intensive outside preparation of exercises and scenes for presentation in class. NOTE: Required for Acting Concentration and BFA Musical Theater.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1231 or 'Y' in CRTH02), (THTR 2221, MUSC 1201, or 'Y' in CRTH13), (THTR 2231 or 'Y' in CRTH04), (THTR 2261 or 'Y' in CRTH06), and (THTR 1202, THTR 2241, THTR 2251, or 'Y' in CRTH05)

THTR 3301. Introduction to the Director's Art. 3 Credit Hours.

A comprehensive introduction to the art and craft of directing in the spirit of the Collaborative process. Emphasis is on responsibility first to how we tell a story, and creating an approach to telling that story through the specifics of the scene event, the actor's relationship to the director's process, the importance of communication with a creative team, and visual leadership. Students will direct two scenes working with actors, and explore the fundamental process and tools of directing, including text and character analysis, staging techniques and composition theory; core rehearsal methods, status, and the relationship between language and active choices.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1096 or 'Y' in CRTH01), (THTR 1231 or 'Y' in CRTH02), (THTR 1411, THTR 1511, or 'Y' in CRTH03), and (THTR 2411 or 'Y' in CRTH08)

THTR 3321. Rehearsal & Performance. 2 to 4 Credit Hours.

The focus of this class will be on advancing the actor's storytelling techniques of script analysis and concept work by working with directors and culminating in the presentation of a one-act play or one act of a full-length play. Awareness of design elements as well as application of voice and movement techniques allow the actor to fully realize the character in the physical world of the play. This prepares the actor for the audition and rehearsal process in which the actor makes choices, brings something to the table and learns to collaborate with the director.

Repeatability: This course may be repeated for additional credit.

THTR 3385. Diamond Peer Teachers – Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Theater.

Repeatability: This course may be repeated for additional credit.

THTR 3386. Diamond Peer Teachers – Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Theater.

Repeatability: This course may be repeated for additional credit.

THTR 3421. Technical Direction for the Theater. 3 Credit Hours.

This course is designed to give students a solid introduction to the processes involved in successful technical direction. The technical director is part engineer, part manager, part designer and full-time problem solver. We'll delve into problem solving (making the magic happen), budgeting (of time, money and talent), structural design (how to make things not fall down, unless you want them to), drafting (it's different for technical directors) and project management (how to plan an effective build, load-in and strike). Student will serve as Assistant Technical Directors for our mainstage shows, and some production work will be involved. This class will serve as a production contract for students enrolled in THTR 1087.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 2713.

THTR 3422. Structural Design for the Stage. 3 Credit Hours.

"Structural Design for the Stage" is a scenery engineering course. The scope of this one-semester course is appropriate for undergraduate Technical Directors, Stage Managers, and Production Managers to help them understand forces, stresses, and structures they interact with every day working backstage. It will cover the basics of beam and column design, truss design, geometric properties, plywood design, and rigging mathematics.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 3421.

THTR 3431. Scene Painting I. 3 Credit Hours.

This course introduces the basics of scene painting for the theater including the varieties of media. Projects will develop an understanding of executing painter's elevations, layout techniques, color mixing and traditional "old world" methods of application. This hands-on course meets for a three hour session once a week. Some class projects will include scenic painting for realized productions for the Theater Department season.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03)

THTR 3432. Scene Painting II. 3 Credit Hours.

While continuing the development of traditional skill sets, this course focuses on various means of application and materials which new technology has made available. Real textures, controlled accident, chemical processes and non-traditional means of application are investigated. This hands-on course meets for a three hour session once a week. Some class projects will include scenic painting for realized productions for the Theater Department season.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in THTR 3431.

THTR 3442. Theater Management I. 3 Credit Hours.

This introductory course provides the opportunity to examine the key role of management and the manager in theater, and the skills, knowledge, and relationships necessary to successfully manage. Students will explore, discuss, and practice areas of theater management including Company, Stage and House Management, Production Management and Shop Management; Finance, Budgeting, and Logistics; Resource Development; and Leadership.

Repeatability: This course may not be repeated for additional credits.

THTR 3613. History of Decor. 3 Credit Hours.

This is a survey course, examining the trends in architecture, furniture, and period motifs and how they can be interpreted in theatrical design. Lectures include discussions of the decorative arts in relation to political and socioeconomic developments. The goal is to give a general understanding and a greater appreciation of the historical periods and how they relate to each other. The successful student will be able to differentiate general periods and have an understanding of the western civilization's historic timeline.

Repeatability: This course may not be repeated for additional credits.

THTR 3621. Costume Production. 3 Credit Hours.

This course is an introduction to the process of costume construction from the designer's sketch to the finished garment. This course will cover basic skills necessary to construct a garment and create costume props and accessories. Sewing skills, fabric identification and basic pattern layout are some of the topics included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 2612.

THTR 3622. Draping and Flat Pattern Drafting. 3 Credit Hours.

This course entails the development of a pattern using "slopers," draping and flat pattern drafting. The course is geared for patterning and construction period costumes for theatrical use. Topics include methods to achieve a period silhouette, where to go for pattern resources, how to fit period garments and construction techniques specific to theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 3621.

THTR 3623. Costume Crafts. 3 Credit Hours.

This class covers materials, techniques and alternative applications used in creating costume pieces that are crafted rather than sewn. Projects will include mask making, millinery and other costume accessories used in theatrical productions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 2411.

THTR 3624. Draping and Flat Pattern Drafting 2. 3 Credit Hours.

This course entails advanced flat pattern drafting and draping techniques needed to construct period garments for theatrical productions. The focus of the projects will be on period men's garments, tailoring techniques and advance pattern drafting.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 3622.

THTR 3625. History of Fashion. 3 Credit Hours.

This is a survey course, examining the global history of dress from the Ancient Middle East to present day western cultures. The course focuses on what is worn, and why it is worn, correlating socioeconomic, religious and political influences on dress and fashion. The goal is to give a general understanding and a greater appreciation of the historical periods and how they relate to each other. The successful student will be able to differentiate general periods of dress and have an understanding of the western civilization's fashion timeline.

Repeatability: This course may not be repeated for additional credits.

THTR 3641. Theatrical Model Making. 3 Credit Hours.

Model building skills are used in theatrical design, architecture, interior design and the film and television industry. This is a skills based studio course, with a concentration on skills, and individual progress as opposed to finished design and concept work. Concepts covered include construction materials and techniques; surface finishes and paint techniques; and research duplication.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03) and (THTR 2411 or 'Y' in CRTH08)

THTR 3741. Design for TV and Film. 3 Credit Hours.

This is a design based studio course with highlighted components in research and presentation. Topics covered include the camera; production nomenclature; survival tactics and the market; production visuals; and a brief history of art directors and production design. Major design projects are based in an original film script, multi camera sitcom, and non-fiction informational programming.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411 or 'Y' in CRTH03) and (THTR 2411 or 'Y' in CRTH08)

THTR 3801. Playwriting. 3 Credit Hours.

This course is designed to introduce basic playwriting, in particular elements of the playwright's craft: dramatic action, plot, characterization and theatricality. The course functions as a playwriting workshop with students presenting exercises in class to be discussed by their peers. Utilizing techniques learned, students will complete a draft of a one-act play.

Repeatability: This course may not be repeated for additional credits.

THTR 4003. Production Dramaturgy. 2 to 4 Credit Hours.

This course engages the student in the process of providing comprehensive production dramaturgy to better enhance and support the creative process of mounting and marketing a theatrical production.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 4097, CMST 2111, 'Y' in CRTH11, or 'Y' in CRCM02)

THTR 4097. World of the Play. 3 Credit Hours.

This course is intended to provide an overview of the dramaturgical research process. It is the prerequisite for an advanced elective course in Production Dramaturgy, where the students will be assigned to serve as actual production dramaturges for our six main stage productions, providing research materials for the cast, the creative team, and for publicity/marketing purposes. Included will be approaches to creating study guides for both audiences and for educational purposes.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater, Tech Prod + Mgmt.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

THTR 4101. Tap for Musical Theater. 1 Credit Hour.

This course develops knowledge and skill in the fundamental techniques of tap dance. Tap is a dance form consistently utilized by choreographers and training in the form is a requirement for Musical Theater students.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may be repeated for additional credit.

THTR 4121. Musical Theater Dance Techniques. 1 Credit Hour.

An intensive study of dance vocabulary, styles, and combinations utilized in auditions and performances for the professional musical theater stage. This course is designed to explore the unique principles and techniques characteristic of Theater Dance, as well as an approach to the audition process, storytelling, characterization, and self-expression through movement. This course also explores the significance and historical/cultural impact of the art form of musical theater, focusing on the choreographic element. Prior dance experience and fundamentals of dance technique are required. Students will execute a ballet and jazz based warm-up, conditioning, technical skills, and various combinations drawing from the musical theater repertoire of the 1920's through today.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may be repeated for additional credit.

THTR 4131. Musical Theater Scene Study. 3 Credit Hours.

Practical work in the application of performance techniques to specific scenes from the American Musical Theater. Vocal and acting skills are combined with the development of character in musical play scene-work including both song and dialogue. Students spend the semester in collaboration with fellow students on notable and challenging scenes from the musical theater.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College, Theater, Film & Media Arts.

Repeatability: This course may not be repeated for additional credits.

THTR 4132. Senior Cabaret Workshop. 3 Credit Hours.

A semester-long study of, and practice in, the art of cabaret singing enhances the training of Musical Theater students as individual performers. The course culminates in a performance showcase highlighting the students' efforts. Students accomplish extensive song repertoire study and collaborate with the instructor and accompanist to create specific medleys and/or song arrangements that complement their vocal abilities. A semester-long examination of contemporary cabaret artists also occurs as well as weekly in-class performance opportunities. NOTE: Graduating seniors only - May or December.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

THTR 4133. Musical Theater: Dress Rehearsal. 3 Credit Hours.

An intensive audition, role study and performance workshop specially designed to prepare students for the rigorous demands of auditioning for and performing in professional musical theater. Throughout the semester, visiting guest professionals also provide valuable insight into the realities of acting in the musical theater as a profession.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 4134. Directing for the Musical Stage. 2 to 4 Credit Hours.

The focus of this class will be on advancing the student director's skill as pertains to the American Musical Theater repertoire. The course will address the myriad challenges of directing a musical work: including heightened stakes and storytelling techniques, intensified scheduling and management requirements of musical productions, and collaboration with musical directors and choreographers. Students will also apply and enhance acquired skills in script analysis, concept work, staging, working with actors and design elements by applying them to a challenging variety of material from the American Musical Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 3301.

THTR 4173. Writing Lyrics. 3 Credit Hours.

Students examine classic and contemporary examples of musical theater pieces, as well as works from other genres, and write their own scenes and lyrics. Students learn how to make jokes "land," how to incorporate a turn, and how to write in the present tense and "in the moment." They also are familiarized with various musical styles and learn to communicate with future collaborators. This course serves the Temple Theater student interested in the creation and writing of musical theater.

Repeatability: This course may not be repeated for additional credits.

THTR 4212. Acting IV. 3 Credit Hours.

Exploration of the physical life of the character using psycho-physical techniques derived from the acting teacher Michael Chekhov. The actor is introduced to the concepts of the Invisible Body, the Center, Psychological Gesture, and Atmospheres, among others. These concepts are applied to scenes from 20th- and 21st-century dramatic literature. NOTE: Required for Acting Concentration.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1231 or 'Y' in CRTH02), (THTR 2221, MUSC 2201, or 'Y' in CRTH13), (THTR 2231 or 'Y' in CRTH04), (THTR 2261 or 'Y' in CRTH06), (THTR 3279 or 'Y' in CRTH16), and (THTR 1202, THTR 2241, THTR 2251, or 'Y' in CRTH05)

THTR 4221. Theater as a Profession. 3 Credit Hours.

This course is designed for Theater majors who have completed most of their theater requirements and expect to work in the profession. The course provides information about the business of show business as well as instruction in auditioning, resume preparation, business expenses, showcase preparation and artistic longevity. Projects for students in all areas will be included.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater-Directing, Theater-Design, Theater Education, Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1231 or 'Y' in CRTH02) and (THTR 2261 or 'Y' in CRTH06)

THTR 4222. Acting V. 3 Credit Hours.

This course is intended for students in the Acting Concentration who have completed the full Acting sequence. The student will apply all of the acting techniques and craft skills learned in their studies to carefully chosen monologues and/or scenes. In addition, the student will gain experience with the skill of cold-readings essential for the audition process. NOTE: Prior to fall 2009, the course title was "URTA Preparation Class."

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Musical Theater, Theater-Acting, Theater.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1231 or 'Y' in CRTH02), (THTR 2221 or 'Y' in CRTH13), (THTR 2231 or 'Y' in CRTH04), (THTR 2261 or 'Y' in CRTH06), (THTR 3279 or 'Y' in CRTH16), (THTR 4212 or 'Y' in CRTH15), and (THTR 2241, THTR 2251, or 'Y' in CRTH05)

THTR 4241. Swordplay for the Actor. 3 Credit Hours.

Fighting with the sword is one of most exciting and rewarding skills that the actor can have in his bag of tricks. The ending of "Hamlet," "King Lear" and "Pirates of the Caribbean" conclude with a fight scene. The student will be exercised in the sword and work towards its perfection. An emphasis on fencing with the foil, epee and sabre may become part of the student's regimen to teach better coordination and focus as well as the practical applications thereof. The second half of the semester will be spent working on sword technique in rehearsal style classes. The students will perform two fight scenes. One will be for the mid-term and the other for the final/adjudication. Certification with the Society of American Fight Directors is possible at the end of the semester. NOTE: Prior to spring 2009, the course title was "Advanced Stage Combat."

Repeatability: This course may not be repeated for additional credits.

THTR 4282. Acting. 1 to 3 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

THTR 4299. Thesis for Acting Emphasis. 4 Credit Hours.

Selection, preparation, and performance of one-act plays. Focus on characterization, scene analysis, and a deeper understanding of acting technique as applied to the dramatic structure of the one-act. Plays are presented at the end of the semester in a Festival of One-Acts. This opportunity enables the actor to grow and develop in a way that only a major performance challenge can provide. Requires intensive outside rehearsal for presentation in class.

Co-requisites: THTR 1087.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in THTR 4222.

THTR 4301. Advanced Directing. 4 Credit Hours.

The focus of this process-oriented class will be on advancing the director's storytelling techniques of script analysis, concept work, staging and working with actors and design elements by applying them to a challenging variety of material, through in depth scene study, including analysis of heightened texts from the works of Anton Chekhov to William Shakespeare, and longer forms beyond the single scene, culminating in the presentation of the work.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 3301, THTR 3241, and (THTR 2261 or 'Y' in CRTH06)

THTR 4401. Theater Management Capstone. 3 Credit Hours.

The capstone course is an opportunity for a BFA candidate to serve as a technical director, production manager, stage manager, or production stage manager for a main stage production in the Temple Theaters season. Under the mentorship of an industry professional, the student will follow a production from beginning to end, and make this the centerpiece of their portfolio moving forward. It will provide invaluable experience in the students' chosen field of study.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Theater.

Repeatability: This course may not be repeated for additional credits.

THTR 4482. Technical Production. 1 to 3 Credit Hour.

This course will explore techniques and practices in technical theater production and technical direction for theater. Topics will include advanced carpentry, metalwork, theater rigging, structural design, drafting, budgeting and theater safety with a focus on proper technique, craftsmanship and efficiency. The class will consist of both lecture and hands-on work. Students will complete a series of projects relevant to the topics covered.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (THTR 1411 or 'Y' in CRTH03)

THTR 4511. Lighting Design II. 3 Credit Hours.

To provide a clear understanding and strong basis of language analysis and its application in lighting design. Various techniques in text interpretation will be used and explored. These techniques will then be used to the design process. There will also be a research project in the direct application of contemporary scientific developments. Throughout this course, the design process for the current Temple productions will continually be examined. Note: Prior to fall 2016, this course was called "Creativity in Lighting."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03), (THTR 2411 or 'Y' in CRTH08), and (THTR 2512 or 'Y' in CRTH09)

THTR 4582. Lighting Design. 1 to 3 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

THTR 4611. Costume Design II. 3 Credit Hours.

A continuation of Costume Design I, this course will explore the process of taking a costume from the page to the stage. We will learn to read scripts, do script analysis from a costume designer's point of view, create character and budget breakdowns, and research costume, hair, make-up and accessories for a variety of time periods. Hand-on projects will include the creation of character collages, "thumbnail" sketches, fabric swatching and painted costume renderings for a variety of plays, musicals, operas, films and commercials. NOTE: Graphic projects required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03), (THTR 2411 or 'Y' in CRTH08), and THTR 2612.

THTR 4721. Scene Design II. 3 Credit Hours.

A project oriented course which deals with a wide variety of theatrical genre and with increasing degrees of complexity. The content is determined both by the needs of the students and by their particular interests. Students continue to develop drafting, rendering and model building skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (THTR 1411, THTR 1511, or 'Y' in CRTH03), (THTR 2411 or 'Y' in CRTH08), and (THTR 2721 or 'Y' in CRTH10)

THTR 4782. Scene Design. 1 to 3 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

THTR 4801. Advanced Playwriting. 3 Credit Hours.

The course is designed to build upon skills and techniques learned in a basic playwriting class to create longer work. The course functions as a playwriting workshop, with students presenting in-class exercises and their play-in-progress to be discussed by their peers. We will also look at contemporary plays to understand their subjects and style. By the end of the semester, each student will complete a first draft of a full-length play.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 3801.

THTR 4841. Advanced Swordplay. 3 Credit Hours.

Advanced Swordplay covers the more advanced weaponry of stage combat and prepares the student for fighting on stage on a more advanced level. Weapons forms include: Rapier and Dagger and Longsword. Students will perform fight scenes, one with each weapons discipline. All disciplines will ultimately be rehearsed and performed as scenes.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in THTR 4241.

THTR 4997. Honors World of the Play. 3 Credit Hours.

This course is intended to provide an overview of the dramaturgical research process. It is the prerequisite for an advanced elective course in Production Dramaturgy, where the students will be assigned to serve as actual production dramaturges for our six main stage productions, providing research materials for the cast, the creative team, and for publicity/marketing purposes. Included will be approaches to creating study guides for both audiences and for educational purposes. NOTE: This is an Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Theater, Film and Media Arts (TFMA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

TFMA 0810. GenEd Limited Edition GA. 3 or 4 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Arts requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

TFMA 0910. Honors GenEd Limited Edition GA. 3 or 4 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Arts requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

Topical Studies (TS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

TS 1185. Field Study - Extern. 2 to 3 Credit Hours.

Students participate in a field experience that varies according to interests and the number of credits the student wishes to pursue. Students in some colleges (SCT, for example) receive no credits for this experience. In the classroom component, students participate in discussions regarding career selection, search skills, resume writing and critiques, and interviewing skills. The field study may take place during a specific time period (Spring Break, the first two weeks of January, during an entire term) which is noted on the course at the time of registration.

Repeatability: This course may be repeated for additional credit.

TS 1285. Field Study - Extern. 2 to 3 Credit Hours.

Students who take Topical Studies 1185 (0084) may not take Topical Studies 1285 (0085). Course only available to those with an extern placement. Students participate in a field experience that varies according to interests and the number of credits the student wishes to pursue. Students in some colleges (SCT, for example) receive no credits for this experience. In the classroom component, students participate in discussions regarding career selection, search skills, resume writing and critiques, and interviewing skills. The field study may take place during a specific time period (Spring Break, the first two weeks of January, during an entire term) which is noted on the course at the time of registration.

Repeatability: This course may be repeated for additional credit.

TS 3082. Independent Study. 3 Credit Hours.

Students make arrangements with faculty in their departments to take an individual program of study. Course is by arrangement. Contact department chair for information.

Repeatability: This course may be repeated for additional credit.

TS 4082. Independent Study. 16 Credit Hours.

Students make arrangements with faculty in their departments to take an individual program of study. Course is by arrangement. Contact department chair for information.

Repeatability: This course may be repeated for additional credit.

Tourism and Hospitality Management (THM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

THM 0877. Using Cultural Intelligence in a Globalized World. 3 Credit Hours.

Google "Cultural Intelligence" and you will see a common theme for all the search outcomes. Cultural Intelligence (CQ) is now considered the key intelligence to have in the rapidly globalizing and shrinking world! With technology pulling us all closer, cross-cultural communication is now the normal in both business and our leisure time. Accommodating those cultural differences is more challenging than it may seem, as culture is similar to an iceberg. Most of it exists under the surface, thus it is hard to comprehend if not impossible. How then can we succeed in these situations? One potential answer lies in the development and usage of our cultural intelligence. To truly become culturally intelligent, students of this course will come to first understand what culture is, and how unique social and geographical contexts spur the rise of cultural traits. Students will study and utilize Geert Hofstede's four cultural dimensions to further comprehend how culture colors our behaviors and perceptions of the world. With this foundational knowledge, students will then begin developing their understanding of the concept of cultural intelligence, how to train this skill and ultimately use it. Students will engage with numerous popular media and academic articles, as well as exciting educational approaches in their pursuit of developing their knowledge of cultural intelligence.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

THM 1311. The Business of Tourism and Hospitality. 3 Credit Hours.

The nature, scope and significance of the total field of tourism and hospitality; history and development, philosophies and theories, analysis of trends, issues and challenges.

Class Restrictions: May not be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

THM 2311. Global Issues in Travel. 3 Credit Hours.

This course concentrates on international and global issues in travel. Problems and characteristics specific to the international aspects of the travel industry will be examined. By the end of the course students will develop a comprehensive understanding of the factors influencing international travel and through global travel patterns, the influence of politics, the impact of globalization, the role of sustainability, and the influence of culture. Students will improve their knowledge of world geography and international players through the exploration of developed and potential tourist areas. Contemporary issues, as they relate to social, cultural and economic trends, are also explored.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

THM 2312. Tourism and Hospitality Sales. 3 Credit Hours.

The main objective of the course is to give a general overview of sales management discipline and its leadership role in the tourism and hospitality industry. The student will be exposed to the overall nature and dimensions of sales and sales management as it is relevant to and practiced by the tourism and hospitality industry. The student will be going through readings, assignments, interaction in group discussions and role-play, and a practical hands-on project that provides them with an opportunity to practice what they learn during the course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 2313. Financial Issues in Tourism and Hospitality. 3 Credit Hours.

This course is designed to provide students with knowledge of the fundamental concepts and tools that represent the core of financial management. The course will particularly emphasize the financial function and issues in a hospitality organization and will provide the student with applications of financial concepts in the context of hospitality financial management.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 2104 or STHM 1115), (ACCT 2101, ACCT 2501, or ACCT 2901), and (ECON 1101 or ECON 1901)

THM 3311. Organization Management in Tourism and Hospitality. 3 Credit Hours.

This course provides the knowledge required to formulate and effectively manage the unique work context of tourism or hospitality operations. This course will take an organizational behavior approach, focusing on the individual, team, and organizational needs. Topics that will be covered include job performance and satisfaction; organizational commitment; attitudes, emotions, moods, and stress; motivation; personality; cultural value and diversity; leadership; organizational structure and culture. The goal of this course is to build transferable skills, promote critical thinking and strategic application of theories, and equip innovative leaders to transform the industry.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

THM 3312. Strategic Decision Making in Tourism and Hospitality Management. 3 Credit Hours.

This course will focus on how to make good decisions to solve practical industry problems in tourism and hospitality settings. Topics will include understanding the processes, tools, data, and organizational environments necessary for effective decision making. The overall goal will be to help students understand how to make a system (whether a collection of employees, customers, equipment and technology, or business locations) work more effectively. Written and oral communication skills, as well as the use of data analysis software, will be stressed.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BA 2104.

THM 3314. Legal Issues in Tourism and Hospitality. 3 Credit Hours.

A comprehensive overview of laws and regulatory agencies governing the tourism and hospitality industry. Legal implications of civil laws, areas of tort and contract will be discussed, along with the law and legal relationships that exist in the business context. Hospitality law, especially when dealing with customers and business contracts, will be the main focus. Issues will be discussed from the points of view of innkeepers, restaurateurs, travel agents, and event planners. Attention will be given to labor relations laws, the Americans with Disabilities Act, risk management, zoning, and unions.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3320. Special Topics in Hospitality Management. 3 Credit Hours.

This course is designed to provide students with an in-depth analysis of the current issues facing hospitality management. The course will address some of the major issues currently facing tourism and hospitality managers in the areas of advertising, public relations, information technology, and management systems. The course will build on the competencies students have already developed in their earlier courses, which introduced them to the basics of marketing, management, and finance. Given their working knowledge, students will be called upon in class to identify potential solutions to current issues.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

THM 3321. Tourism Planning and Development. 3 Credit Hours.

An analysis of the socioeconomic planning process involved in developing tourism destinations in global, community, metropolitan, urban, and rural settings. Emphasis will be on policy and product development, regeneration and enhancement of facilities and services to meet the needs of tourists. Includes the adjustment process involved in integrating tourism into a developing economy, and the project management skills inherent in steering a development from inception to fruition. Extensive use is made of concepts from sociology, economics, political science, and business disciplines. Special readings from the current literature, case studies, guest speakers, and video cases will form an integral part of this course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3322. Destination Management Organizations. 3 Credit Hours.

This course is designed to provide a comprehensive understanding of the role, the scope and the business of destination marketing organizations. The course will also provide an overview on the history, development and future of destination marketing organizations in the United States and around the world. Trends, issues and challenges are discussed. Current and past managers of destination marketing organizations will be invited to provide first hand examples and deeper insights into destination marketing organizations, such as politics that govern relationships, funding, and marketing strategies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3324. Hospitality Operations. 3 Credit Hours.

Hospitality Operations will focus on an integration and application of planning, implementation, operation, and maintenance of accommodations, including hotels, motels, and resorts. The physical aspects, capital investments, layout, and design will be included with the operational component. The course will also provide students with guided learning and hands-on experience in using a property management system.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3325. Food and Beverage Management. 3 Credit Hours.

A survey course in commercial food and beverage management. Key financial, marketing, and managerial metrics that underscore effective food service management are prioritized. Topics include designing a cost-efficient menu, menu psychology, cost control and basic financial analysis, beverage control, customer service, food and beverage marketing, and employee management. Wine appreciation techniques and current food and beverage trends will be explored.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3327. Advanced Destination Marketing Systems. 3 Credit Hours.

Destination marketing has changed dramatically as the result of increasing competition and environmental change. This course takes a system approach and is designed to extend students' knowledge and experience in marketing to tourism and hospitality by first understanding the nature of competition within the tourism industry; second, by understanding the role of information technology; and third, by developing extensive analytical skills. NOTE: THM 3396 (formerly STHM 3396): Marketing in Tourism and Hospitality is strongly recommended prior to taking this course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3328. Gaming and Casino Management. 3 Credit Hours.

This course is an overview of the role gambling plays in today's society. The course's goal is to provide students with the background necessary to understand the gaming industry and its relationship to tourism, hospitality, recreation, and sports. Topics include the evolution of legal gaming, its management and regulation, the structure of the various gaming industries, and key terminology. Analysis of participation patterns and impacts of gambling, both positive and negative, on society will be addressed. An introduction to game rules and basic concepts from probability and statistics necessary to understand gambling operations will be discussed.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3329. Revenue Management in Tourism and Hospitality Management. 3 Credit Hours.

In this course students will learn to identify and exploit opportunities for revenue optimization in different business contexts. Students will review the main methodologies that are used in each of these areas, discuss issues associated with different pricing strategies, and survey current practices in the industry. Within the broader area of pricing theory, the course places particular emphasis on tactical optimization of pricing and capacity allocation decisions, tackled using quantitative models of consumer behavior, demand forecasts and market segmentation.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

THM 3330. Special Topics in Destination and Event Management. 3 Credit Hours.

This course is designed to provide students with an in-depth analysis of the current issues facing destination and event management. The course will address some of the major issues currently facing tourism and event managers in the areas of advertising, public relations, information technology, and management systems. The course will build on the competencies students have already developed in their earlier courses, which introduced them to the basics of marketing, management, and finance. Given their working knowledge, students will be called upon in class to identify solutions to current issues.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may be repeated for additional credit.

THM 3396. Marketing in Tourism and Hospitality. 3 Credit Hours.

An analysis of essential marketing principles as currently applied in the tourism and hospitality industries. Concepts and tools in marketing research will be emphasized and practiced. The marketing mix will be evaluated in terms of specific applications set in both industry segments. Trends, issues and problems influencing tourism and hospitality marketing will also be examined. This writing-intensive course requires writing a marketing plan for a tourism or hospitality company.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

THM 4321. Hospitality Management Systems. 3 Credit Hours.

The hospitality organization's use a variety of information technologies to facilitate various business activities such as reservation, marketing, operations, and management, with a direct impact on revenues and market share. A perfect synergy between information systems and the hospitality industry requires decision-makers to not only understand the functionalities of advanced systems, but also be able to successfully interpret systems' analyses for their current management practices (e.g., yield management). Using an advanced lodging management system as an effective instructional tool, this course focuses on the fundamentals of management systems within the today's hospitality organizations in general and lodging operations in particular. Students will be exposed to industry examples, in-depth discussions, and simulation projects about how to strategically integrate system applications such as property management, reservation management, sales & marketing management, point of sales systems, and meeting space rentals, etc. within a hotel setting, as well as their impacts on organizations and the industry as a whole.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Co-requisites: STHM 4112.

Repeatability: This course may not be repeated for additional credits.

THM 4322. Designing Tourism Experiences. 3 Credit Hours.

This course presents an overview of the process of designing effective tourism hardware (attractions, etc.) and software (programs, special events, etc.). Students will learn how to define effective tourism experiences that add value to the visitor experience and how to measure and evaluate these experiences using both qualitative and quantitative methods. Furthermore, students will learn customer experience marketing and management principles to promote affinity and loyalty among tourism consumer groups.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Repeatability: This course may not be repeated for additional credits.

THM 4396. Hospitality Management Systems. 3 Credit Hours.

Hospitality organizations use a variety of information technologies to facilitate various business activities such as reservation, marketing, operations, and management, with a direct impact on the firm's financial outcomes such as revenues and market share. Effective implementation requires decision-makers to not only understand the functionalities of these advanced systems, but also be able to successfully interpret the systems' output (e.g., relying on daily reports to make pricing decisions). Using an advanced lodging management system as an instructional tool, this course explores the fundamentals of hospitality and lodging management systems. Through multiple industry examples and in-depth discussions, this writing intensive course requires students to work on several simulation projects focusing on strategically integrate system applications such as property management, reservation management, sales & marketing management, point of sales systems, and meeting space rentals within a hotel setting. The impact of these advanced systems on hospitality organizations and on the hospitality industry will be discussed as well.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Co-requisites: STHM 4112.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

THM 4397. Designing Tourism Experience. 3 Credit Hours.

This course presents an overview of the process of designing effective tourism hardware (attractions, etc.) and software (programs, special events, etc.). Students will learn how to define effective tourism experiences that add value to the visitor experience and how to measure and evaluate these experiences using both qualitative and quantitative methods. Furthermore, students will learn customer experience marketing and management principles to promote affinity and loyalty among tourism consumer groups. This writing intensive course requires the development of an experience design concept.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

THM 4398. Contemporary Issues in Tourism, Hospitality and Event Management. 3 Credit Hours.

The nature, scope and significance of this capstone course is to review, discuss and analyze current issues in tourism, hospitality and event management. Students will utilize their knowledge and understanding from previous courses to address present-day topics that have various impact within the industry. Students will work in a variety of platforms to identify, address and potentially resolve these issues. Daily and weekly news sources serve as primary references for the content of this course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Sport Tourism Hospitality Mgt.

Co-requisites: STHM 4112.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STHM 3396 or THM 3396)

TUJ International Business Studies (JIBS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

JIBS 3101. Introduction to Global Finance. 3 Credit Hours.

This course addresses corporate financing issues in the global financial environment relevant for international corporations or MNCs/MNEs. Topics to be discussed in the course will include: BOP accounts; foreign exchange-rate determination and markets; foreign exchange risk management; corporate strategy for foreign direct investment; valuation of foreign investments; global debt and equity financing, and project finance; international capital budgeting decision process associated with political, sovereign (country) and inflation risks. The perspective of cash versus equity purchases; mergers and acquisitions; comparisons of corporate governance practices around the world; and international taxation will also be touched upon and explored.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ACCT 2102 or ACCT 2902)

JIBS 3102. Global Operations and Supply Chain Management. 3 Credit Hours.

This course is designed to present and discuss concepts, issues and problems critical to global operations, with some emphasis on global supply chains. The course seeks to provide an understanding of the importance of individual components (suppliers, manufacturers, distributors, and customers) in the operation of the supply chain. Coverage will include successful approaches in the areas of product and service design, global sourcing and logistics management, sales and operations planning, scheduling, resources planning, inventory management, and project management, among others, which have led to dramatic improvements in global business performance. Important recent developments and approaches for the effective and efficient operation of global supply chains will be identified and discussed. Also, in this course, a software package used for project management, such as MS Project, will be introduced.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2103, STAT 2903, or MATH 2031)

JIBS 3501. Marketing in a Global Environment. 3 Credit Hours.

This course takes a culturally driven approach to International Marketing. It will examine how multinational companies adapt to international opportunity and constraints. Marketing topics covered include global marketing; government regulations; organizational structure; product, price, promotion, and credit policies and methods. The course will combine cases, discussions, and readings to provide a mix of integrating concepts and hands-on problem solving.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

JIBS 4197. Global Business Overview. 3 Credit Hours.

This course is about making business decisions in international environment. It takes the perspective of a general manager and will focus on the theme of valuation. Students will be challenged to evaluate the capital structure and business models of international enterprises in order to assess strategic options.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

JIBS 4596. International Business Capstone. 3 Credit Hours.

This is an integrated course that focuses on strategic management and decision making in international enterprises. Students are challenged to design real-time solutions through the use of comprehensive live case studies. The course is designed to help you develop state-of-the-art business writing skills that are appropriate in both academic and professional contexts. Other important objectives include: (1) Information literacy: To provide students with opportunities to search for outside sources and with instruction related to searching for, evaluating, and/or using sources; (2) Cross-functional (capstone) perspective: To integrate the knowledge accumulated in various functional areas such as accounting, finance, marketing, human resources management and operations management; (3) Hypothesis-driven, fact-based, and action-oriented case work: To provide students with meaningful experience in analyzing strategic problems through the use of the real-time case method. At the end of the course, students should be able to write a basic strategic report that meets the professional standards of an international management consulting firm on junior associate level.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 1101 and (JIBS 3501 (may be taken concurrently) or JIBS 3102 (may be taken concurrently))

Tyler School of Art (TYLE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

TYLE 0805. Race, Identity and Experience in American Art. 3 Credit Hours.

How might investigating one's identity be a rich source of inspiration for artistic expression? And how can art and artists of the Americas assist in our understanding about identity, race, diversity, and ourselves? Arts of the Americas and United States are the focus of this course which achieves the race and diversity GenEd credit. Learning centers art forms and practices from the 1400s to today which highlight how race and racism are dynamic concepts intersecting with other group identifications such as gender, class, ethnicity, religion, age, sexual orientation, or ability. This course offers opportunities to explore, converse, and learn about racial identity, lived experience, and diversity through art history, and topics range from colonial contact in the Americas, to Civil Rights and disability activism of the 20th century, to LGBTQIA2+ art histories, to contemporary Indigenous art and Afrofuturism. Active learning will be engaged as we develop art analysis skills through visits to archives and art exhibitions. Note: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed TYLE 0905.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

TYLE 0810. GenEd Limited Edition GA. 3 or 4 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Arts requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

TYLE 0905. Honors Race, Identity and Experience in American Art. 3 Credit Hours.

Please refer to the Honors Course Guide for a more specific description of TYLE 0905 written by the professor who will be teaching it. The generic description is as follows: How might investigating one's identity be a rich source of inspiration for artistic expression? And how can art and artists of the Americas assist in our understanding about identity, race, diversity, and ourselves? Arts of the Americas and United States are the focus of this course which achieves the race and diversity GenEd credit. Learning centers art forms and practices from the 1400s to today which highlight how race and racism are dynamic concepts intersecting with other group identifications such as gender, class, ethnicity, religion, age, sexual orientation, or ability. This course offers opportunities to explore, converse, and learn about racial identity, lived experience, and diversity through art history, and topics range from colonial contact in the Americas, to Civil Rights and disability activism of the 20th century, to LGBTQIA2+ art histories, to contemporary Indigenous art and Afrofuturism. Active learning will be engaged as we develop art analysis skills through visits to archives and art exhibitions. Note: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed TYLE 0805.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

TYLE 0910. Honors GenEd Limited Edition GA. 3 or 4 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Arts requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

TYLE 1071. Visual Studies 1 Introduction to Visual Studies: History, Theory, Practice. 3 Credit Hours.

This course introduces students to the field of Visual Studies. Students will be introduced to histories and theories of analyzing visual communication from a variety of aesthetic, theoretical, sociological, and historical viewpoints. Students learn to think about representations of knowledge through visual imagery, will consider the impact of medium on the image and message of a piece, and will learn to think critically about visual culture's social and cultural context. Topics covered in class include but are not limited to: human vision and embodied experience; forms of art production including considerations of craft, concept, medium, and social practice; the viewers role in producing meaning; images as representations of social power; and the role of images in the social and material production of space. Critical reading, writing, and seeing will be taught through a base lecture format, in-class exercises, and discussion.

Repeatability: This course may not be repeated for additional credits.

TYLE 1111. Visualizing Urgency. 2 Credit Hours.

Tyler School of Art is offering a two-credit course through its art gallery Temple Contemporary that addresses urgent issues of local relevance and international significance. The content of this course will be shaped through the study of exhibitions, workshops, and guest lectures held in the gallery.

Repeatability: This course may be repeated for additional credit.

TYLE 1911. Honors Visualizing Urgency. 2 Credit Hours.

Tyler School of Art is offering a two-credit course through its art gallery Temple Contemporary that addresses urgent issues of local relevance and international significance. The content of this course will be shaped through the study of exhibitions, workshops, and guest lectures held in the gallery.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

TYLE 1971. Honors Visual Studies 1 Introduction to Visual Studies: History, Theory, Practice. 3 Credit Hours.

This course introduces students to the field of Visual Studies. Students will be introduced to histories and theories of analyzing visual communication from a variety of aesthetic, theoretical, sociological, and historical viewpoints. Students learn to think about representations of knowledge through visual imagery, will consider the impact of medium on the image and message of a piece, and will learn to think critically about visual culture's social and cultural context. Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

TYLE 2468. Search and Destroy: Punk's DIY Rebellion. 3 Credit Hours.

This course examines the far-reaching phenomena of punk music, fashion, and DIY culture that originated in the late 1970s, and its influential effects in later decades. Punk embodied an in-your-face class-consciousness mixed with the anti-aesthetics of negation and unbridled creativity. This class examines the formal manifestations of punk in music, fashion, graphics, and publishing, while attending to the ways that punk broke down the raced, classed and gendered barriers associated with traditional notions of beauty and form. Topics covered will include the shift away from 1960s idealism into 1970s nihilism; the performance of gender in Punk and New Wave, DIY publishing; the relationship of 1970s culture to class conflict and politics; the implications of unskilled production; critical theory of subcultures; and the influence of philosophy and theory on punk practice (Marquis de Sade, Marx, Nietzsche, Bataille, Brecht, Debord, and others).

Repeatability: This course may not be repeated for additional credits.

TYLE 2968. Honors Search and Destroy: Punk's DIY Rebellion. 3 Credit Hours.

This course examines the far-reaching phenomena of punk music, fashion, and DIY culture that originated in the late 1970s, and its influential effects in later decades. Punk embodied an in-your-face class-consciousness mixed with the anti-aesthetics of negation and unbridled creativity. This class examines the formal manifestations of punk in music, fashion, graphics, and publishing, while attending to the ways that punk broke down the raced, classed and gendered barriers associated with traditional notions of beauty and form. Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

TYLE 3211. Creative Cottage Industrialist. 3 Credit Hours.

Creative Cottage Industrialist is a three-credit course designed to teach artists the skills they will need to effectively match their creative interests with the developing marketplace. Through a series of case studies, guest lectures, and presentations, students will be encouraged to work collaboratively and individually to develop venture cottage industry plans designed to support and expand their artistic capacity.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

TYLE 3349. Tyler School Japan Art, Media and Design Workshop. 6 Credit Hours.

A workshop designed to provide art students with study-abroad experience in Japan. Individual sections offered by departments or areas of the Tyler School introduce different specific topics, so that students may choose the area in which they wish to work. A Tyler faculty member will teach the studio. In addition to the studio component, there will be art history related lectures on topics in Japanese art, guest lectures and workshops by contemporary Japanese artists, field trips, and a multimedia interdisciplinary lab for all students. The goal of the workshop is to give art students a firm grounding in the social, cultural, historical, and practical facets of art in Japan.

Repeatability: This course may not be repeated for additional credits.

TYLE 3385. Field Internship. 3 Credit Hours.

A field internship must provide practical experience in a setting which is relevant to the student's course of study, such as in a gallery, museum or community art center, etc. A comprehensive paper must be written.

Repeatability: This course may be repeated for additional credit.

TYLE 3585. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

TYLE 3586. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

TYLE 4285. Rome Internship. 3 Credit Hours.

The objective of this course is to enable students to gain practical professional experience with Italian and multinational companies (publishing companies, film and media agencies, tourism companies), law firms, nonprofit organizations and government agencies, galleries, museums, artists' studios, schools, and a variety of other institutions in different fields. The internship program provides an excellent opportunity to gain a direct and deeper understanding of cultural business practices, build your resume, and experience another side of Italian life, while continuing regular coursework.

Repeatability: This course may be repeated for additional credit.

Undergraduate Studies Merit Scholar (USMS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

USMS 4082. Independent Study: Internship. 0 to 1 Credit Hours.

Independent Study for Temple University Merit Scholars.

Repeatability: This course may be repeated for additional credit.

USMS 4182. Independent Study: Research. 0 to 1 Credit Hours.

Independent Study for Temple University Merit Scholars.

Repeatability: This course may be repeated for additional credit.

USMS 4282. Independent Study: Study Abroad. 0 to 1 Credit Hours.

Independent Study for Temple University Merit Scholars.

Repeatability: This course may be repeated for additional credit.

USMS 4382. Independent Study: Volunteer. 0 to 1 Credit Hours.

Independent Study for Temple University Merit Scholars.

Repeatability: This course may be repeated for additional credit.

University College (UC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

UC 0701. Computer Literacy Workshop. 0 Credit Hours.

The intent of this workshop is to provide students with the basic computing skills necessary for success in the Fox School of Business. This workshop will provide students with instruction on how to utilize Microsoft Office tools, as well as basic computer and Internet navigation skills. This workshop will allow students to practice these skills in a lab setting.

Repeatability: This course may not be repeated for additional credits.

UC 3101. Sustainability in Action. 3 Credit Hours.

This class provides a deep dive into sustainability in action. Students will move from considering sustainability in action at Temple to thinking about it in the context of the city of Philadelphia and then zooming out even further to global conversations. Students will have the opportunity to bring together your interdisciplinary studies to date as you work on a final project of your choice, addressing a topic or question related to any aspect of sustainability at Temple or in the wider Temple community. Examples of projects may include final papers, art installations, film or other visual media, performance, building model, mapping tools, etc. (These projects can re-purpose and build upon ideas explored in prior coursework but cannot re-use work that was previously submitted to fulfill a course requirement.) All final projects must address the three pillars of sustainability - environmental, economic, and social. This course is the final requirement for the undergraduate Certificate in Sustainability.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

UC 4096. General Studies Integrative Seminar. 3 Credit Hours.

The General Studies Integrative Seminar is a culminating capstone experience for the Bachelor of General Studies (BGS) program. In this course, students will undertake a semester-long individually-defined project. The project will serve as an opportunity for students to synthesize and expand upon the interdisciplinary ideas and skills learned in their selected academic concentrations. The course will also provide students an opportunity to reflect on their development as learners, and to plan for and explore how their BGS degree will support their future professional and personal pathways. The BGS Integrative Seminar is a writing-intensive course. Students will have an opportunity to work closely with a Temple faculty member to understand the requirements of writing and communicating in their fields, and to develop their ability to communicate effectively. This course is limited to students in their final semester of the Bachelor of General Studies major.

College Restrictions: Must be enrolled in one of the following Colleges: University College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CLA 2096.

University Seminar (UNVS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

UNVS 1001. First Year Seminar I. 1 Credit Hour.

This course introduces first-year students to the opportunities and rigors of higher education, as well as to the skills needed to use academic resources successfully in college. The topics covered in the seminar help first year students articulate and reach their academic goals. There are no prerequisites or co-requisites for this course.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

UNVS 1002. First Year Seminar II. 1 Credit Hour.

This is a one-credit course that introduces first-year students to the opportunities to discover major interests through applied learning and other career-oriented experiences. The course exposes students to career paths and encourages major exploration through discussions with faculty, informational interviews, readings, and opportunities to practice skills needed to be a more effective student.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

UNVS 1003. Academic Bridge for International Students. 3 Credit Hours.

Academic Bridge for International Students is a three-credit course that includes instruction in all four language skills (reading, writing, speaking, and listening). It also focuses on additional academic skills and strategies necessary for students to succeed in undergraduate courses. Critical thinking and independent research will be emphasized along with the introduction to technologies that support course requirements. There are no prerequisites or co-requisites for this course. To take this course you must be an international student whose native language is not English.

Repeatability: This course may not be repeated for additional credits.

UNVS 1004. President's Seminar I: Organizational Change at Temple University. 1 Credit Hour.

Students will address key questions that focus on factors and issues that impact organizational change at Temple University. Conversations with guest faculty, a series of directed readings, group discussion and individual writing assignments will promote the development of students' understanding of the central questions and their practical implications. Through this course students will learn how to identify the need for change, approaches for implementation, the importance of goal setting, and a greater understanding of how these issues affect an organization like Temple.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

UNVS 1005. President's Seminar II: Organizational Change at Temple University. 0 or 1 Credit Hours.

Students will address key questions that focus on factors and issues that impact organizational change at Temple University. Conversations with guest faculty, a series of directed readings, group discussion and individual writing assignments will promote the development of students' understanding of the central questions and their practical implications. Students will work on implementing change on selected issues discussed in UNVS 1004, President's Seminar I.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

UNVS 1006. Academic Success Strategies. 1 Credit Hour.

Academic Success Strategies provides an opportunity for explicit instruction in critical thinking skills. Through the study of historical and contemporary learning theories and research-based cognitive strategies, students will be able to meaningfully reflect upon their learning. In addition to these opportunities in metacognitive practice, students will develop and implement techniques to improve their efficacy as students.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

UNVS 1007. Cecil B. Moore Scholars Summer Seminar. 2 Credit Hours.

This two-credit course introduces first-year students, who are also Cecil B. Moore scholarship recipients, to resources and strategies that contribute to a successful transition into college. Students will learn about the academic and social resources available at Temple University and how to utilize them throughout their undergraduate careers. Students will have opportunities to develop a network of peer and University support staff prior to their first Fall semester on campus. Topics include: academic strategies, campus involvement, major exploration, diversity and equity, financial literacy and goal setting.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

UNVS 1111. Success Strategies for Black, Latino, and Native-American First-Year Male-Identified Students. 1 Credit Hour.

This first-year seminar is a one-credit course which introduces Black, Latino, and Native American male-identified students to the opportunities and rigors of Temple University. The main topics will include developing the academic, social, professional, financial, and cultural capital of these students; health and well-being will be prioritized and infused into every unit. This course is taught by Black and Latino instructors, and students will connect with staff and student mentors who have experience as underrepresented students at Temple. Discussion-based class periods will be supplemented by hands-on activities, guest speakers, and in-depth conversations. Most requirements for the course will be completed during class periods, although students will be required to reflect on class themes via a video journal and end-of-semester presentation. Wide ranging topics will include tips for developing relationships with faculty, social identity, paths to lucrative careers, understanding taxes, overcoming trauma, and volunteering. There are no prerequisites or co-requisites for this course.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

UNVS 2001. Sophomore Seminar: Planning for Success. 1 Credit Hour.

Sophomore Seminar is a one-credit course that provides sophomore students an opportunity to work on career planning and development. Topics covered in this course will span the career development process from exploring individual strengths, academic majors, potential career paths, how to get an internship, explore research opportunities, how to get involved on campus, and preparing for graduate school.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

UNVS 2002. Transfer Seminar: Planning for Success. 1 Credit Hour.

This is a one-credit optional course that introduces new transfer students to the opportunities and resources at Temple University. This course would count as elective credit. Topics will include exploring individual strengths, academic majors, potential career paths, how to get an internship, research opportunities, getting involved on campus, and graduate school preparation. Additionally, we will familiarize students with the Temple community and offices. The topics covered in this seminar will help transfer students develop and meet short- and long-term career goals.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

UNVS 2003. Global Citizenship. 1 Credit Hour.

In our increasingly globalized society, the development of global perspectives and competencies are important for successful navigation of the world. This course explores topics and themes related to helping students prepare to move forward as global citizens.

Repeatability: This course may not be repeated for additional credits.

UNVS 2004. Tale of Two Cities: Paris & Rome - Histories, Legends, Imaginations. 3 Credit Hours.

Students will explore the multifaceted cultural, historical and artistic development of Paris and Rome. Students will engage in pre-departure sessions on the historical and political realities that shaped the often turbulent life of these cities. Students will learn to identify the many artistic/architectural movements as represented in Paris, as well as the roughly seven-layered historical/artistic strata that are visible in the "Eternal City." Students will learn about the diverse people that populate these two cultural capitals, and also the habits that make Parisians and Romans unique in the world. No previous experience with art, architecture, or cultural anthropology is required. No previous knowledge of France or Italy is needed. Students must be able to participate in both the pre-departure as well as in-country session. This course will require additional travel expenses.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

UNVS 2005. Writing About the Self: Exploring Opportunities and Communicating Strengths. 1 Credit Hour.

You have high aspirations, but how do you get there? What opportunities are most valuable? How can you successfully navigate the application process for graduate and professional school, and major awards? And how can you write about your accomplishments without bragging or rolling out tired clichés? In this course you will explore and clarify your strengths and goals, learn how to identify and assess opportunities relevant to those goals, and practice the art of writing about yourself. Over the course of the semester, you will be exposed to a variety of examples or autobiographical writing and will think about, and practice writing about your experiences.

Repeatability: This course may not be repeated for additional credits.

UNVS 3001. Junior Seminar: Pre-Professional Preparation. 1 Credit Hour.

This is a one-credit optional course that will provide junior level students with an opportunity to work on pre-professional planning and development. It will focus specifically on preparation for post-graduate educational opportunities and entrance exams for graduate and professional programs. This course will count toward graduation as elective credit.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits.

Repeatability: This course may not be repeated for additional credits.

UNVS 3002. Peer Mentor Development. 0 to 1 Credit Hours.

Peer Mentor Development is a course that introduces students to content and communication skills identified as integral to serving as a peer mentor in the college setting. Through this course, students will become proficient guides to Temple and community resources, well-versed in college and academic success strategies, and equipped with interpersonal communication skills to deliver their message and reach fellow students.

Repeatability: This course may not be repeated for additional credits.

UNVS 3003. Student Staff Development Seminar. 0 or 1 Credit Hours.

The Student Staff Development Seminar introduces students to Leadership Models and Theory to prepare them to serve as leaders in their Student Staff Roles in University Housing and Residential Life and beyond. In addition, this seminar encourages students to explore key competencies connected to Student Staff Leadership roles (e.g. Supervision, Crisis Management, Confrontation/Mediation, Critical Thinking, Administrative Resources, Professional Development, Inclusivity, and Student and Community Engagement).

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

Upper Division Honors Program (HONS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HONS 3991. Honors Scholars Research/Creative Project Design. 3 Credit Hours.

This course focuses on design and development of an independent research/creative arts project developed with the guidance of a faculty mentor. While some topics covered in the seminar will be specific to the seminar participants, common topics will include project specific research or design methodology, discipline appropriate theoretical readings, and the development of project specific theoretical/secondary bibliography. For University Honors Scholars only. Junior standing required. Fulfills University Honors Scholars requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Urban Education (URBE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

URBE 0855. Education for Liberation Here and Abroad. 3 Credit Hours.

This course explores educational issues in urban America and indigenous educational traditions in the "Third World." The course focuses on the connections between education and politics, cultural diversity and economics, and the existence and persistence of poverty in developing nations. Students will critically analyze international films, course readings, and presentations from guest speakers. Culturally responsive, post-modern, and comparative approaches are used to investigate the impact of culture, poverty and development, and the goals of education in each societal context. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

URBE 1006. Schooling and Development in Third World Societies. 3 Credit Hours.

Development in Third World Societies has been defined primarily in terms of economic growth. Schools have been designed largely to support this process and serve the primary function of developing human capital. Similar patterns can also be seen in the United States. The course presents these and alternative definitions of development and the functions of schooling, and compares the experience of third world societies to that of poor people in the cities in the United States. While journeying through different countries, school systems, and cultures, the course also focuses on the "Third World" inside the United States. Here we explore how knowledge of Third World economic and cultural issues can help us understand the life and challenges of urban students from minority, working class, and immigrant backgrounds. Students also learn from experiences with urban and Third World groups with whom they are involved in service learning activities. NOTE: (1) Must complete 20 hours of community-based service learning activities. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

URBE 1909. Honors Schooling and Development in Third World Societies. 3 Credit Hours.

The Honors version of Urban Education 1006 (C060). NOTE: (1) Course requirements include the completion of 20 hours of community-based service learning activities. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

URBE 2320. Special Seminar in Urban Education. 3 Credit Hours.

A special topics course. Topic varies each semester.

Repeatability: This course may be repeated for additional credit.

URBE 3990. Honors Special Seminar in Urban Education. 3 Credit Hours.

An honors special topics course. Topic varies each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

URBE 4301. Partnerships between Schools and Communities. 3 Credit Hours.

This course focuses on the theory and practice of education-related collaborations and partnerships that cross social and professional divides. Partnerships and collaborations in pursuit of social (rather than economic) goals have become increasingly prominent since the 1980s. This is true internationally as well as in the United States, and in many fields besides education. While we explore what these collaborations entail and why they represent an important trend, a major emphasis will be on learning how to become a partner and how to support and facilitate collaborations in settings that bring together participants from different organizations, professional orientations, and social backgrounds. In other words, part of the work of this class is for you to focus on yourself as a partnership practitioner, learning from your practice and experiences. In this class you will learn in multiple ways, but especially by moving between practice and theory, and experiential and academic learning. You will analyze written cases as well as develop your own by being involved in a collaboration/partnership. Do expect to do a fair bit of critical reflection on your own positionality, assumptions and experiences as they relate to the course. The class will be conducted as a collaborative seminar and you are expected to bring your individual and collective interests to the table. The urban educational landscape has also experienced a growth in community organizing around such educational issues as funding, governance, etc. The final part of the course will look at these types of partnerships. This course requires fieldwork. In order to register for this course, students must submit full clearances to the Office of Field Placement.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

URBE 4496. Understanding Urban Communities. 3 Credit Hours.

This course will introduce students to key issues in urban education, focusing on both formal schooling and informal educational settings. It will use readings from history, sociology, and political science - as well as the popular media - to provide students with a deeper understanding of the larger social and political processes that shape cities and their schools. The course will also cover such key issues as the achievement gap, funding inequalities, high school dropout, school violence, and various approaches to school reform. A key focus of the course will be identifying strengths and assets within urban communities and countering the "deficit" narrative that dominates popular perceptions of urban education. Another key focus will be on identifying promising practices within schools and other organizations that serve urban youth. For this reason, students will conduct research on possible policy interventions, study a particular intervention in depth, and write about that intervention. As a Writing Intensive course, this class will provide students with significant instruction and support in the following areas: conducting research on social policy interventions, evaluating sources, using research to craft an argument, and writing one argument-focused social science research paper and one policy brief. Students will be encouraged to make connections between theory and research on urban education and the challenges and opportunities they may face as practitioners.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

Virtual Media Management (VMM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

VMM 1111. Introduction to Virtual Media Management. 3 Credit Hours.

This course is designed to introduce students to various theories and abilities that come from the study of organizational and mediated communication. These abilities include independent learning, working constructively with others toward achieving shared goals, managing workplace conflict constructively, and thinking critically and clearly about emerging problems and their solutions. Collaborative learning is used to practice and improve productivity, problem-solving skills, and social relationships in virtual environments.

Repeatability: This course may not be repeated for additional credits.

VMM 1112. Challenges of Virtual Media Management. 3 Credit Hours.

This course will review the major trends in virtual media management and will identify the challenges that are unique to virtual environments. This course will prepare students to view the broader landscape of media through a critical lens and to use a variety of tools to develop effective decision-making skills. Students will work collaboratively to create an in-depth analysis of one particular challenge and will generate recommendations based on research.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in VMM 1111.

VMM 3112. Experiential Learning in Virtual Media Management. 3 Credit Hours.

This course provides a structure for you to learn by doing in environments or organizations that make use of virtual media to accomplish their work and their goals. The work that you undertake in this experiential learning course can involve an internship, community service learning, or other capstone experience. The course provides you with the opportunity to reflect critically and analytically on culture and communication in virtual spaces and apply what you have learned to your own academic, professional, and personal goals.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in VMM 1111 and VMM 1112.

VMM 3890. Special Topics in Virtual Media Management. 3 Credit Hours.

Special topics course to cover subject matter not covered by regular courses offered in the major.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in VMM 1111 and VMM 1112.

VMM 4571. International Studies in Media and Communication. 3 Credit Hours.

This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, and in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. Available only to students participating in a Klein GO! Program.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in VMM 1111 and VMM 1112.

Visual Studies (VS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

VS 1058. Visual Studies 1: Interdisciplinary Studio Seminar 1. 3 Credit Hours.

This introductory studio seminar introduces students to the concept of art production from the basis of self-examination. This introductory seminar course instills an understanding of creating art as a response to their cultural upbringing, which questions experiences of gender, ethnicity, politics, culture, religion, aesthetic preferences, and socioeconomic status. First year seminar students are expected to develop the appropriate skills to connect to current tendencies and phenomena in the contemporary art world. Students attend visiting artist series lectures and do research on contemporary artists whose practice is centered on identity. Seminar readings include topics addressing theories of post-identity, class, culture, sexuality and hyphenated identities. The primary focus of the class is on the production of an independent body of interdisciplinary studio artwork.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 1151. Visual Studies 1 Foundation: Drawing. 3 Credit Hours.

An introductory black and white drawing course that emphasizes the development of perceptual, analytical, and structural drawing skills in responses to various problems. Issues of identity and its cultural, historic and aesthetic influence on art making and critical analysis will be explored through various drawing assignments, readings, and discussions. Students will work from life as well as imagination. Value, line, composition, space, and the manipulation of the different media will be among the topics covered. Field trips may be taken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 1351. Visual Studies 1 Foundation: 3D. 3 Credit Hours.

3D Design introduces the fundamentals of constructing and conceptualizing three-dimensional art forms by examining the theme of identity. The course emphasizes the utilization of a variety of basic materials and includes an intensive introduction to the woodshop.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 1451. Visual Studies 1 Foundation: Composition and Color. 2 Credit Hours.

Students study the visual language of art, particularly the concepts and vocabulary in the elements and principles of visual language, stressing composition, color, and pattern. Through personal art-making and art-viewing, students will strengthen skills of perception, arrangement, spatial choices, knowledge of technical and scientific aspects of color, along with color's role in a cultural and linguistic context. This course offers opportunities to make and interpret art in a socially meaningful way, while investigating the visual decision-making process in constructing compositions.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 1651. Visual Studies 1 Foundation: Digital Imaging. 3 Credit Hours.

This course introduces students to basic tools and ideas essential to digital art making. Students will learn technological skills as they bring them to bear to address questions of identity. The class will address the ways that virtual space and digital techniques change traditional notions of art and inform postmodern ideas of identity through discussions, readings, field trips, and, primarily, art making.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 2001. VS Seminar: Identities. 3 Credit Hours.

This interdisciplinary studio seminar is oriented around the theme of personal identities. Art and visual culture are examined as creative responses to individuals' experiences of race, gender, ethnicity, politics, culture, religion, aesthetic preferences, and socioeconomic status. Given that art and visual culture do not just reflect already existing social identities, but help to form them over time, students will consider how their creative work might contribute to new social understandings of personal identities. The primary focus of the class is on the production of an independent body of studio artwork or visual culture that is informed by scholarly research. Students will engage in focused discussions, field trips, studio critiques, and one-on-one instruction with faculty.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (TYLE 1071 or 'Y' in CRTY01), (FDPR 1511 or 'Y' in CRFD01), (FDPR 1521 or 'Y' in CRFD05), and (FDPR 1531, FDPR 1532, 'Y' in CRFD03, or 'Y' in CRFD04)

VS 2002. VS Seminar: Narratives. 3 Credit Hours.

This interdisciplinary studio seminar is oriented around the theme of narratives. Art and visual culture are examined as individuals' constructions of narratives including mythological, biographical, autobiographical, communal, and fictional. The class explores ways of organizing narratives, including linearity, non-linearity and layering of disparate content in visual art or other modes of artistic expression and communication. Students may draw upon personal, sociological, cultural and/or imaginary history to construct artist books, time-based artwork, internet imaging or some other form of collected or multiple imagery and will research the work of relevant contemporary artists, writers, designers, and scholars. The primary focus of the class is on the production of an independent body of interdisciplinary studio artwork.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (TYLE 1071 or 'Y' in CRTY01), (FDPR 1511 or 'Y' in CRFD01), (FDPR 1521 or 'Y' in CRFD05), and (FDPR 1531, FDPR 1532, 'Y' in CRFD03, or 'Y' in CRFD04)

VS 2003. VS Seminar: Sites. 3 Credit Hours.

This interdisciplinary studio seminar is oriented around the theme of site and place. Students expand their individual studio practice through the exploration of site and place as a context for making and understanding art. This course includes ideas of public/private space, site-specificity, and geographical, institutional and discursive sites. Students will work to create interdisciplinary site based artworks or projects. Research includes the work of historical and contemporary artists who address diverse concepts of site and place. Writing, readings, exercises, critique and discussion inform and support their studio investigations. The seminar may include visits to site-specific artworks, public art organizations and/or talks by guest artists. The primary focus of the class is on the production of an independent body of interdisciplinary work that addresses site and place.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (TYLE 1071 or 'Y' in CRTY01), (FDPR 1511 or 'Y' in CRFD01), (FDPR 1521 or 'Y' in CRFD05), and (FDPR 1531, FDPR 1532, 'Y' in CRFD03, or 'Y' in CRFD04)

VS 2004. VS Seminar: Global Citizens. 3 Credit Hours.

This interdisciplinary studio seminar is oriented around the theme of global citizens. Art and visual culture are examined as creative responses to individuals' experiences of nation states, politics, law, the environment, exile, and language in 21st century life. Students are exposed to learning how to situate themselves in a global context, and how artwork can reflect empathy and commitment towards other people sharing the globe. The seminar may include visits to galleries and museums, non-profit institutions and organizations, and/or talks by guest speakers. The primary focus of the class is on the production of an independent body of interdisciplinary work that addresses global citizenry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (TYLE 1071 or 'Y' in CRTY01), (FDPR 1511 or 'Y' in CRFD01), (FDPR 1521 or 'Y' in CRFD05), and (FDPR 1531, FDPR 1532, 'Y' in CRFD03, or 'Y' in CRFD04)

VS 2058. Visual Studies 2: Interdisciplinary Studio Seminar 2. 3 Credit Hours.

Students continue their development of individual studio practice by investigating ideas of story/history. The class explores ways of organizing narratives, including linearity, non-linearity and layering of disparate content in visual art or other modes of artistic expression and communication. Students may draw upon personal, sociological, cultural and/or imaginary history to construct artist books, time-based artwork, internet imaging or some other form of collected or multiple imagery. Students research the work of contemporary artists who deal with creative non-fiction, fiction, myth, etc. from the autobiographical to the communal. The primary focus of the class is on the production of an independent body of interdisciplinary studio artwork.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151 (may be taken concurrently), VS 1351 (may be taken concurrently), and VS 1651 (may be taken concurrently)

VS 2152. Visual Studies 2 Concept Studio: Drawing. 3 Credit Hours.

An intermediate level drawing course continuing the development begun in the introductory level drawing course. Models and still life are among the subjects considered although not exclusively. A variety of dry and wet media are used with an emphasis on the student finding her own voice through various drawing problems. Topics covered include color, composition, and space as well as the manipulation of the media. Emphasis is on exploring and developing narrative themes through readings, discussions, and various studio assignments. Field trips may be taken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151, VS 1351 (may be taken concurrently), and VS 1651 (may be taken concurrently)

VS 2252. Visual Studies 2 Concept Studio: Painting. 3 Credit Hours.

An introductory level painting course that emphasizes the development of objective and subjective responses to a variety of studio problems. Students work from life and imagination. Among the concepts covered in the course are color theory, color and light, composition, the creation of space, and the manipulation of the medium. The theme of narrative is explored through various studio problems, readings, and discussions. Field trips may be taken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151, VS 1351 (may be taken concurrently), and VS 1651 (may be taken concurrently)

VS 2352. Visual Studies 2 Concept Studio: 3D Structures. 3 Credit Hours.

This 3D Structures class builds on the principles taught in the 3D Foundations course to provide more in depth exploration of three-dimensional art in contemporary practice by investigating the element of space. An expanded palette of materials, construction techniques, design principles and aesthetic concepts is utilized. Studio projects are supplemented by readings, lectures and field trips. Installation is introduced as a presentation medium. The development of a personal body of work is evaluated through peer critique.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151 (may be taken concurrently), VS 1351, and VS 1651 (may be taken concurrently)

VS 2452. Visual Studies 2 Studio: Making Democracy: Visual Tactics. 3 Credit Hours.

This studio-based course explores art-making practices in relation to the histories of political and socially engaged movements of the 19th, 20th and 21st centuries, with the aim of fostering political engagement through creative practice. Students will be exposed to and taught historic and contemporary techniques of socially engaged art making such as printmaking, banner and sign making, pamphleteering, puppetry, performance, and historical reenactment. These techniques, in conjunction with reading primary historical texts and contemporary theory, writing, and conducting archival research, will serve as the foundation for the development of a research-based practice that generates new socially engaged artworks. The latter will culminate in a focused research project that students will present to each other at the end of the semester.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, and VS 1651.

VS 2552. Visual Studies 2 Concept Studio: Print Imaging. 3 Credit Hours.

Print Imaging (Focus: Screen Printing) introduces a broad range of historic and contemporary concepts and technologies and encourages a multi-disciplinary approach to fine art printmaking. Studio projects, supplemented by readings, lectures and field trips, focus upon the printed image and the impact it has upon the development of story/history: personal, political, social and cultural thought and communication. Initial projects are very structured and involve the more traditional concepts, skills and processes. As students become more comfortable with the fundamentals of the medium, they are encouraged to develop a more personal approach to concept, subject, scale, material and process.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 2652. Visual Studies 2 Concept Studio: Digital Imaging. 3 Credit Hours.

This course focuses on the use of the computer as a tool with which to create and explore the uses of narrative in art. Students develop technological competency as they create artworks that examine the structures of narrative. Readings, lectures and field trips augment the development of a sense of personal, social and art historical narrative. Students work in time based and non-time based media to create artwork that investigates their own artistic relationship to narrative.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151 (may be taken concurrently), VS 1351 (may be taken concurrently), and VS 1651.

VS 2852. Visual Studies 2 Concept Studio: Photo Imaging / Digital. 3 Credit Hours.

An introduction to the basic principles of digital photography, including shooting with a digital camera, manipulating images within the computer, toning and printing with inkjet printers. Various types of alternative cameras and unorthodox digital processing methods are explored to expand the range of expression. The course focuses on monochromatic photography, including duotones, as a fine art medium. Emphasis is placed on technical expertise, creative development, an understanding of the potential of imaging software and the development of the subjective use of story/history based on a clear understanding of personal identity. The effect of image on audience is evaluated through peer critique.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151 (may be taken concurrently), VS 1351 (may be taken concurrently), and VS 1651.

VS 2862. Visual Studies 2 Concept Studio: Photo Imaging / Darkroom. 3 Credit Hours.

An introduction to the basic principles of darkroom photography, including shooting with a film camera, developing film in the darkroom, and printing on silver gelatin paper. This course then goes beyond the usual photography course to introduce the use of various types of alternative cameras, unorthodox chemical processing methods and the use of different types of materials to expand the range of expression. The course focuses on black & white photography as a fine art medium. Emphasis is placed on technical expertise, creative development, and the subjective use of story/history based on a clear understanding of personal identity. The effect of image on audience is evaluated through peer critique.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058 (may be taken concurrently), VS 1151 (may be taken concurrently), VS 1351 (may be taken concurrently), and VS 1651.

VS 3058. Visual Studies 3 Interdisciplinary Studio Seminar 3. 3 Credit Hours.

Students expand their individual studio practice through the exploration of site and place as a context for making and understanding art. This course includes ideas of interior/exterior space, natural, constructed and virtual environments. Students will also work to create interdisciplinary site based installations. Research includes the work of historical and contemporary artists who address diverse concepts of site and place. Writing, readings, exercises, critique and discussion inform and support their studio investigations. The seminar may include visits to site-specific artworks, public art organizations and/or talks by guest artists. The primary focus of the class is on the production of an independent body of interdisciplinary work that addresses site and place.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, and VS 2058 (may be taken concurrently)

VS 3100. Visual Studies 3 Studio: Special Topics. 3 Credit Hours.

This studio-based course explores a special topic or theme deemed especially relevant to contemporary visual culture. Material techniques and Tyler studio facilities that relate to the topic will be taught and utilized.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, and VS 2058.

VS 3253. Visual Studies 3 Concept Studio: Hybrid Painting. 3 Credit Hours.

An intermediate level painting course that builds on the conceptual and technical skills learned in Art 2252. An expanded palette of materials and techniques are utilized. This course considers the painting studio and the painting canvas as a laboratory space and metaphorical territory. It investigates notions of border, home, landscape, ecology, etc. Studio projects explore these themes in figurative and abstract modes, and are supplemented by lectures and research into artists who share these concerns in content and form. Students are encouraged to develop their own voice through a variety of painting problems. The theme of narrative is explored through readings, discussions, and a variety of studio assignments. Field trips may be taken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, VS 2058 (may be taken concurrently), and VS 2252 (may be taken concurrently)

VS 3553. Visual Studies 3 Concept Studio: Hybrid Print Imaging. 3 Credit Hours.

Students continue to develop personal approaches to the concepts, materials, and processes of traditional and digital fine art printmaking. Studio projects, supplemented by readings, lectures and field trips, focus upon the print medium as a multidisciplinary means of creative expression and communication. Special emphasis will be placed upon printed images as unique, large-scale multiples in site-specific installations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, (VS 1151 or FDPR 1511), (VS 1351, FDPR 1531, or FDPR 1532), (VS 1651 or ARTU 2601), and VS 2058 (may be taken concurrently)

VS 3653. Visual Studies 3 Concept Studio: Hybrid Digital Imaging. 3 Credit Hours.

The theme of site/place is explored in relation to technology. This class explores ideas of virtual sites, the relationship between digital images and real sites, and how technology and media produce and interact with non-virtual sites. Students gain technological competencies in relation to readings, lectures and field trips that explore site/place as a theme.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, (VS 1151 or FDPR 1511), (VS 1351, FDPR 1531, or FDPR 1532), (VS 1651 or ARTU 2601), and VS 2058 (may be taken concurrently)

VS 3863. Visual Studies 3 Concept Studio: Hybrid Photo Imaging/Darkroom. 3 Credit Hours.

This course introduces students to numerous aesthetics and techniques that are both traditional and non-traditional to create images that break the boundaries of traditional Darkroom Photography. The course begins with demonstrations in basic darkroom techniques and expands into extended developing, processing and printing techniques. The course then introduces processes that utilize techniques from the worlds of Painting, Printmaking, Fibers and 3D to make hybridized photo art pieces. The results can be original prints or 'photo objects' on surfaces other than paper, but still all made with film and chemicals. The development of a personal aesthetic is pursued through the use of sophisticated shooting, processing and printing techniques, supported by professional level presentation. Research into conceptual means of working is employed to consider the context of the image as related to site/place. The effect of image on audience is evaluated through peer critique.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, (VS 1151 or FDPR 1511), (VS 1351, FDPR 1531, or FDPR 1532), and (VS 1651 or ARTU 2601)

VS 4096. Visual Studies Thesis Seminar. 3 Credit Hours.

This course facilitates senior Visual Studies students' completion of original research and study towards the development of a qualifying practice-based project or written paper. Completing an undergraduate thesis helps students hone their creative vision and more clearly articulate their academic and studio interests, which ultimately makes them more competitive for further academic study and careers in diverse arts professions. Through regular meetings with faculty and peers, students will learn how to develop the language and writing skills needed to discuss, strengthen, and promote their creative and scholarly pursuits. Students work closely with the course instructor, another faculty advisor, and fellow students to complete a written proposal, a bibliography, and a final written or project-based work that is ready for public presentation.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in VS 1071, (VS 1651 or 'Y' in CRVS03), (VS 2001 (may be taken concurrently) or 'Y' in CRVS01), (VS 2002 (may be taken concurrently) or 'Y' in CRVS04), (VS 2003 (may be taken concurrently) or 'Y' in CRVS02), VS 2004 (may be taken concurrently), (FDPR 1511, FDPR 1512, 'Y' in CRFD01, or 'Y' in CRFD02), (FDPR 1531, FDPR 1532, 'Y' in CRFD03, or 'Y' in CRFD04), and (FDPR 1521 or 'Y' in CRFD05)

VS 4098. Visual Studies 4 Interdisciplinary Studio Seminar 4. 3 Credit Hours.

The purpose of this writing intensive studio course is to help students begin the process of translating the themes of the Visual Studies curriculum (Identity, Stories, Site/Place) into work that reflects a personal voice and vision, and to familiarize students with the ways that writing is used in fine arts and visual culture. This class brings together students working across all media. You will be responsible for your own research, and for finding a place to create the work. While pursuing studio projects you will also be completing writing assignments. The writing projects are designed to make you aware of different approaches to writing in the visual arts. You will create a proposal for your studio projects and a research paper. The challenge to writing about art is to clearly define the artist's choices, techniques, medium and personal vision. You are translating the visual into language. Details are a critical part of the descriptive process, using the vocabulary of the discipline of art making. Clarity, organization and a command of grammar and style will be key to creating a successful research paper.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, VS 2058, and VS 3058 (may be taken concurrently)

VS 4485. Field Internship. 1 to 3 Credit Hour.

This course offers experiential learning and hands-on training relevant to the student's course of study.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, and VS 2058.

VS 4511. Curatorial Lab. 3 Credit Hours.

This class provides students with hands-on experience curating an exhibition as a team, from initial idea to final installation. We will explore traditional museums and other kinds of exhibition spaces from small galleries to artist-run coops. Visits and conversations with local curators and museum professionals in Philadelphia will offer some practical insights into the challenges of creating exhibitions within a complex institution. Philadelphia's robust contemporary art community and its rich historical landscape provide opportunities to explore and reflect on a variety of curatorial practices in different contexts. Although this course focuses on contemporary work, we will learn about the goals and techniques of museum and gallery displays in centuries past in order to place current strategies in context.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College, Theater, Film & Media Arts, Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

VS 4554. Visual Studies 4 Concept Studio: Interdisciplinary Print Imaging. 3 Credit Hours.

Advanced Printmaking students approach contemporary printmaking as a vital, interdisciplinary art form that maintains its important traditions and incorporates new technological methods, such as photographic and digital imaging, for producing, translating and disseminating visual information to a broadly diverse, global audience. Emphasis is on creative growth, individual instruction and the preparation of analog and digital print portfolios. Intermediate-level printmaking experience is required and basic computer imaging experience is recommended.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, VS 2058, and VS 3553.

VS 4654. Visual Studies 4 Concept Studio: Interdisciplinary Digital Imaging. 3 Credit Hours.

An upper-level class that deals with the relationships between digital and non-digital art materials. Students make work that approaches ideas of translation in terms of materials, as well as discussing ideas of translating ideas to an audience, notions of originality in the digital realm, and art as a medium for communication. Digital images will be integrated with other media to create interdisciplinary work.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Art Education, Visual Studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, VS 1651, VS 2058, and VS 3653.

VS 4754. Visual Studies 4 Interdisciplinary Moving Image. 3 Credit Hours.

This course provides an introduction to basic principles of digital animation and onscreen interactivity for artists. Students will experiment with traditional and nontraditional digital animation techniques and learn to use interactivity to broaden and articulate their relationships with viewers. The course will build upon digital techniques taught in "Visual Studies 1 Foundation: Digital Imaging" as well as on each student's interests in terms of content and studio techniques. We will explore ideas of translation in terms of virtual and fictional space.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in VS 1058, VS 1151, VS 1351, and VS 1651.

Academic Calendar

The Temple University Academic Calendar is maintained by the Office of the University Registrar.

Fall 2023

Wednesday, August 9 - Sunday, August 27	Early Term Start (ETS) Courses
Monday, August 28	Full Term 16-week Courses (1) and 7-week Courses (7A) begin
Monday, September 4	Labor Day (no classes held)
Tuesday, September 5	Last day to add or <u>drop</u> a 7-week (7A) course
Monday, September 11	Last day to add or <u>drop</u> a Full Term 16-week (1) course
Monday, October 2	Undergraduate midterm progress ratings for Full Term 16-week Courses (1) begin
Monday, October 9	Last day to <u>withdraw</u> from a 7-week (7A) course
Friday, October 13	Fall Wellness Day (no classes held)
Monday, October 16	7-week Courses (7A) end; Undergraduate midterm progress ratings for Full Term 16-week Courses (1) end
Tuesday, October 17	7-week Courses (7B) begin
Thursday, October 19 at 11:59 p.m. (ET)	Final grading for 7-week Courses (7A) ends
Monday, October 23	Last day to add or <u>drop</u> a 7-week (7B) course
Monday, October 30	Priority registration for Spring 2024 begins
Monday, November 20 - Wednesday, November 22	Fall Break (no classes held)
Thursday, November 23 - Sunday, November 26	Thanksgiving holiday (no classes held)
Monday, December 4	Last day to <u>withdraw</u> from a 7-week (7B) course
Monday, December 11	Full Term 16-week Courses (1), 7-week Courses (7B), and Short Duration Courses (SDC) end; Last day to <u>withdraw</u> from a Full Term 16-week course
Tuesday, December 12	Study Day (no exams held)
Wednesday, December 13 - Friday, December 15	Days 1-3 of Final Exams for Full Term 16-week Courses (1)
Thursday, December 14 at 11:59 p.m. (ET)	Final grading for 7-week Courses (7B) and Short Duration Courses (SDC) ends
Saturday, December 16 - Sunday, December 17	Study Days (no exams held)
Monday, December 18 - Tuesday, December 19	Days 4 & 5 of Final Exams for Full Term 16-week Courses (1)
Wednesday, December 20	Diploma date (effective)
Friday, December 22 at 11:59 p.m. (ET)	Final grading for Full Term 16-week Courses (1) ends

Dates may be subject to change. Updated on September 14, 2023.

Spring 2024

Wednesday, December 20 - Sunday, January 14	Early Term Start (ETS) Courses
Monday, January 15	Dr. Martin Luther King, Jr. Day (no classes held)
Tuesday, January 16	Full Term 16-week Courses (1) and 7-week Courses (7A) begin
Monday, January 22	Last day to add or <u>drop</u> a 7-week (7A) course
Monday, January 29	Last day to add or <u>drop</u> a Full Term 16-week (1) course
Monday, February 19	Undergraduate midterm progress ratings for Full Term 16-week Courses (1) begin
Monday, March 4	Last day to <u>withdraw</u> from a 7-week (7A) course
Monday, March 4 - Sunday, March 10	Spring Break (no classes held)
Monday, March 11	7-week Courses (7A) end; Undergraduate midterm progress ratings for Full Term 16-week Courses (1) end
Tuesday, March 12	7-week Courses (7B) begin
Thursday, March 14 at 11:59 p.m. (ET)	<u>Final grading for 7-week Courses (7A)</u> ends
Monday, March 18	Last day to add or <u>drop</u> a 7-week (7B) course
Monday, March 25	Priority registration for Summer 2024 begins
Monday, April 1	Priority registration for Fall 2024 begins
Monday, April 22	Last day to <u>withdraw</u> from a 7-week (7B) course
Monday, April 29	Full Term 16-week Courses (1), 7-week Courses (7B), and Short Duration Courses (SDC) end; Last day to <u>withdraw</u> from a Full Term 16-week (1) course
Tuesday, April 30	Study Day (no exams held)
Wednesday, May 1 - Friday, May 3	Days 1-3 of Final Exams for Full Term 16-week Courses (1)
Thursday, May 2 at 11:59 p.m. (ET)	<u>Final grading for 7-week Courses (7B) and Short Duration Courses (SDC)</u> ends
Saturday, May 4 - Sunday, May 5	Study Days (no exams held)
Monday, May 6 - Tuesday, May 7	Days 4 & 5 of Final Exams for Full Term 16-week Courses (1)
Wednesday, May 8	<u>University Commencement</u> and <u>Diploma date</u> (effective)
Friday, May 10 at 11:59 p.m. (ET)	<u>Final grading for Full Term 16-week Courses (1)</u> ends

Dates may be subject to change. Updated on September 14, 2023.

Summer I 2024

Monday, May 13	Full Term 6-week Courses (1), 4-week Courses (4A), 12-week Courses (12A), and Short Duration Courses (SDC) begin
Thursday, May 16	Last day to add or drop a 4-week (4A) course
Friday, May 17	Last day to add or drop a Full Term 6-week (1) course
Wednesday, May 22	Last day to add or drop a 12-week (12A) course
Monday, May 27	Memorial Day (no classes held)
Monday, June 3	Last day to withdraw from a 4-week (4A) course
Monday, June 10	4-week Courses (4A) end
Thursday, June 13	4-week Courses (4B) begin
Thursday, June 13 at 11:59 p.m. (ET)	Final grading for 4-week Courses (4A) ends
Friday, June 14	Last day to add or drop a 4-week (4B) course
Monday, June 17	Last day to withdraw from a Full Term 6-week (1) course
Wednesday, June 19	Juneteenth (no classes held -- students in the schools of Dentistry, Pharmacy, Medicine, Law, and Podiatric Medicine should consult their respective school calendars regarding classes and clinical activity)
Monday, June 24	Full Term 6-week Courses (1) end
Tuesday, June 25	Diploma date (effective; Summer I Full Term Courses only)
Thursday, June 27 at 11:59 p.m. (ET)	Final grading for Full Term 6-week Courses (1) ends
Thursday, July 4	Independence Day (no classes held)
Friday, July 5	Last day to withdraw from a 4-week (4B) course
Thursday, July 11	4-week Courses (4B) end
Sunday, July 14 at 11:59 p.m. (ET)	Final grading for 4-week Courses (4B) ends
Thursday, August 1	Last day to withdraw from a 12-week (12A) course
Thursday, August 8	12-week Courses (12A) and Short Duration Courses (SDC) end
Sunday, August 11 at 11:59 p.m. (ET)	Final grading for 12-week Courses (12A) and Short Duration Courses (SDC) ends

Dates may be subject to change. Updated on September 14, 2023.

Summer II 2024

Thursday, June 27	Full Term 6-week Courses (1) and Short Duration Courses (SDC) begin
Monday, July 1	Last day to add or drop a Full Term 6-week (1) course
Thursday, July 4	Independence Day (no classes held)
Friday, July 12	4-week Courses (4A) begin
Monday, July 15	Last day to add or drop a 4-week (4A) course
Thursday, August 1	Last day to withdraw from a Full Term 6-week (1) or 4-week (4A) course
Thursday, August 8	Full Term 6-week Courses (1), 4-week Courses (4A), and Short Duration Courses (SDC) end
Friday, August 9	Diploma date (effective; Summer II and Summer I 4B and 12A)
Sunday, August 11 at 11:59 p.m. (ET)	Final grading for Full Term 6-week Courses (1), 4-week Courses (4A), and Short Duration Courses (SDC) ends

Dates may be subject to change. Updated on September 14, 2023.

Academic Programs List

Temple University's Board of Trustees meets regularly to consider recommendations to establish, terminate or change academic programs. To see the full list of academic programs by school and college, including programs that have been terminated, please read Temple's Policy on Establishing, Restructuring and Terminating Academic Programs.

The following Academic Programs Chart lists Temple University's active degrees, majors, minors and certificates alphabetically, along with the school or college that grants each degree, major, minor and certificate.

Students should be aware that, while all programs cannot be completed on all campuses, courses in many programs are offered on multiple campuses. To learn what specific courses are offered on which campuses in a given semester, refer to the Class Schedule.

Major	A cohesive combination of courses including introductory, intermediate, and advanced coursework that designates a student's primary area of study. Academic programs may include required or optional concentrations. An undergraduate major is typically 36-76 credit hours of the total degree. Majors are designated on university transcripts when the degree is awarded.
Minor	A designated combination of courses in a discipline or area of study. Like the major, it is expected to have coherence and increasing sophistication. A minor is typically 18-24 credit hours (or approximately half of the major) and is outside of, but may complement, the discipline of a student's major. A school/college can determine if a minor is restricted to students in specific schools, colleges or majors and can include rules as to how certain courses can be used to meet requirements. Minors are designated on university transcripts when the degree is awarded.
Concentration	A coordinated grouping of courses, typically 18-24 credits in an undergraduate program of study and 6-12 credits in a graduate program, representing a sub-specialization or emphasis within a major field available for students majoring in that discipline. Concentrations may be offered at the undergraduate, graduate, or professional level and can be required or optional. Concentrations are designated on university transcripts when the degree is awarded.
Certificate	A designated combination of courses in an area of study, typically requiring 9-15 credits. A certificate is outside of, but may complement, the discipline of a student's major. It may also be offered to non-degree seeking students. Certificates can be established at the undergraduate, graduate or professional level. A school/college can determine if a certificate is restricted to students in specific schools, colleges or majors and can include rules as to how certain courses can be used to meet requirements. For matriculated undergraduates, a certificate is designated on university transcripts when the degree is awarded. For graduate students, a certificate may be conferred upon completion and prior to degree conferral. For nonmatriculated students, the certificate is designated on university transcripts and conferred upon completion.

Academic Programs Chart: Degrees, Majors, Minors, Certificates

Asterisks (*) and carets (^) denote multiple option areas (emphasis/concentration) within a program.

Degree Programs (emphasis)	Undergraduate	Graduate	Professional	School/College
Accomplished Teaching		MSEd		ED
Accountancy		MAcc		BU
Accounting	BBA (p. 807), Minor (p. 816)			BU
Accounting (Data Analytics)	BBA (p. 812)			BU
Accounting and Financial Management		MS		BU
Acting	Cert. (p. 489)			CA
Actuarial Science	BBA (p. 817)	MS		BU
Adult and Organizational Development	BA (p. 565), Minor (p. 569)			ED
Advanced Biotherapeutics: Manufacturing and Regulatory Affairs		MS		PH
Advanced Core Science Studies	Postbacc. Cert. (p. 1448)			ST
Advanced Education in General Dentistry			Cert.	DN
Advanced Manufacturing and Robotics		Cert.		EN

Advanced Regulatory Affairs and Quality Assurance		Post-Master's Cert.	PH
Advertising (Account Management, International Communication*)	BA (p. 1189), Conc.* (p. 1193)		CO
Advertising (Art Direction, International Communication*)	BA (p. 1196), Conc.* (p. 1200)		CO
Advertising (Brand Strategy and Research, International Communication*)	BA (p. 1204), Conc.* (p. 1208)		CO
Advertising (Copywriting, International Communication*)	BA (p. 1212), Conc.* (p. 1216)		CO
Advertising (Media Planning, International Communication*)	BA (p. 1219), Conc.* (p. 1223)		CO
Advocacy and Organizational Development		MEd	ED
Africology and African American Studies	BA (p. 959), Minor (p. 963)	MA, PhD	LA
American Legal Studies (TU Japan)		Cert.	LW
American Sign Language	Cert. (p. 1360)		HP
American Studies	BA (p. 963), Minor (p. 967)		LA
American and International Law		LLM	LW
American and International Law - China		LLM	LW
Ancient Mediterranean Studies	Minor (p. 969)		LA
Anthropology	BA (p. 970), Minor (p. 973)	MA (not currently accepting applications), PhD (not currently accepting applications)	LA
Applied Behavior Analysis	Cert. (p. 569)	MSEd, Cert.	ED
Applied Biostatistics		MPH	HP
Applied Epidemiology	Minor (p. 1361)		HP
Applied Mathematics	BS (p. 1449)		ST
Applied Physical Activity and Health Promotion		MS (not currently accepting applications)	HP
Applied Research and Evaluation		PSM	ED
Applied Sociology		PSM (not currently accepting applications)	LA
Arabic	Cert. (p. 974), Minor (p. 975)		LA
Architecture (Advanced Technologies and Design*, Health and Design*, Urban Ecologies and Design*)	BSArch (p. 117)	MArch, MS*	TA
Art	BA (active in Japan) (p. 122), Minor (p. 136)		TA
Art Education	BSEd (p. 125)	MEd	TA
Art History	BA (p. 130), Minor (p. 135)	MA, PhD	TA
Art Therapy	BA (p. 137)		TA
Asian Business and Society	Cert. (p. 975)		LA

Asian Law		LLM	LW
Asian Studies	BA (p. 976), Minor (p. 980)		LA
Astrophysics	Cert. (p. 1454), Minor (p. 1455)		ST
Athletic Training		MSAT, DAT	HP
Audio and Live Entertainment	BA (p. 1227)		CO
Autism Endorsement		Cert.	ED
Basic Core Science Studies	Postbacc. Cert. (p. 1455)		ST
Basic Pharmaceutical Development		Cert.	PH
Biochemistry	BS (p. 1457)		ST
Bioengineering		MSBioe, PhD	EN

Middle Grades Education/ Science	BSEd (p. 619)	MEd	ED
Middle Grades Education/ Science and Language Arts	BSEd (p. 614)	MEd	ED

Middle Grades Education/ Social Studies	BSEd (p. 624)	MEd	ED
Middle Grades Education/ Social Studies and Language Arts		MEd	ED
Middle Grades Education/ Social Studies and Mathematics		MEd	ED
Middle Grades Education/ Social Studies and Science		MEd	ED
Mobile Application Development	Cert. (p. 1676)		ST
Music (Composition*, Music Studies*, Music Theory*, Musicology*)	BS (p. 371), Minor (p. 424), Cert. (p. 374)	MA, MS, PhD*	BC
Music Composition	BM (p. 336), Cert. (p. 376)	MM	BC
Music Education (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM* (p. 377)	MM, PhD	BC
Music Education/Jazz (Bassoon, Cello, Clarinet, Double Bass, Euphonium, Flute, French Horn, Guitar, Harp, Oboe, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, Voice)	BM (p. 395)		BC
Music History (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM* (p. 417), Cert. (p. 423)	MM	BC
Music Performance (Bassoon, Cello, Clarinet, Classical Guitar, Double Bass, Euphonium, Flute, French Horn, Harp, Harpsichord, Oboe, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, Voice)	BM (p. 450), Cert. (p. 425), Diploma		BC
Music Performance (Classical Guitar)	BM (p. 458)		BC
Music Performance (Harpsichord)	BM (p. 464)		BC
Music Performance (Piano)	BM (p. 467)		BC
Music Performance (Voice)	BM (p. 471)		BC
Music Performance/Bassoon		MM, DMA	BC

Music Performance/Cello		MM, DMA	BC
Music Performance/Clarinet		MM, DMA	BC
Music Performance/Classical Guitar		MM	BC
Music Performance/Double Bass		MM, DMA	BC
Music Performance/ Euphonium		MM, DMA	BC
Music Performance/Flute		MM, DMA	BC
Music Performance/French Horn		MM, DMA	BC
Music Performance/Harp		MM, DMA	BC
Music Performance/ Harpsichord		MM	BC
Music Performance/Historical Keyboard		DMA	BC
Music Performance/Oboe		MM, DMA	BC
Music Performance/ Percussion		MM, DMA	BC
Music Performance/Piano		MM, DMA	BC
Music Performance/ Saxophone		MM	BC
Music Performance/ Trombone		MM, DMA	BC
Music Performance/Trumpet		MM, DMA	BC
Music Performance/Tuba		MM, DMA	BC
Music Performance/Viola		MM, DMA	BC
Music Performance/Violin		MM, DMA	BC
Music Performance/Voice		MM, DMA	BC
Music Teaching		Cert.	BC
Music Technology	BS (p. 426), Cert. (p. 435)	MS	BC
Music Technology (Interdisciplinary Studies)	BS (p. 431)		BC
Music Theory (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM* (p. 478)	MM	BC
Music Theory (Jazz)	Cert. (p. 436)		BC
Music Theory (Traditional)	Cert. (p. 437)		BC
Music Therapy (Bassoon*, Cello*, Clarinet*, Classical Guitar*, Double Bass*, Euphonium*, Flute*, French Horn*, Harp*, Harpsichord*, Oboe*, Percussion*, Piano*, Saxophone*, Trombone*, Trumpet*, Tuba*, Viola*, Violin*, Voice*)	BM* (p. 438)	MMT, PhD	BC

Music Therapy/Jazz (Bassoon, Cello, Clarinet, Double Bass, Euphonium, Flute, French Horn, Guitar, Oboe, Percussion, Piano, Saxophone, Trombone, Trumpet, Tuba, Viola, Violin, Voice)	BM (p. 444)		BC
Musical Theater	BFA (p. 527)		CA
Musical Theater Collaboration (Bookwriting, Composing/Lyricist, Directing)		MFA (applications accepted every 3 years with next admission for Fall 2025)	CA
Narrative Medicine		Cert.	ME
Native Perennial Garden Design	Cert. (p. 252)		TA
Natural Sciences	Minor		ST
Natural Sciences (Biology)	BA (p. 1677), BS (p. 1699)		ST
Natural Sciences (Chemistry)	BA (p. 1682), BS (p. 1705)		ST
Natural Sciences (Earth and Environmental Sciences)	BA (p. 1688), BS (p. 1711)		ST
Natural Sciences (Physics)	BA (p. 1694), BS (p. 1716)		ST
Neuromotor Science		MS, PhD	HP
Neuroscience		Cert.	LA
Neuroscience Research	Minor (p. 1116)		LA
Neuroscience: Cellular and Molecular	BS (p. 1723)		ST
Neuroscience: Systems, Behavior and Plasticity	BS (p. 1117)	MS	LA
New Product Development		Cert.	EN
Non-Profit Management		Cert.	LA
Nursing (Adult-Gerontology Primary Care Nurse Practitioner*, Family and Individual Across the Lifespan Nurse Practitioner*, Health Systems Leadership*)	BSN (p. 1383)	DNP*	HP
Nutrition	Minor (p. 1387)	MPH, Cert.	HP
Occupational Therapy		OTD	HP
Occupational Therapy Transitional Program		OTD	HP
Opera		MM	BC
Oral Health Sciences		MS	DN
Oral and Maxillofacial Surgery		Cert.	DN
Orchestral Music	Cert. (p. 449)		BC
Organizational Leadership	Minor (p. 905)	Cert.	BU
Orthodontics			Cert. DN
Painting (Art Education*)	BFA (p. 253), Conc.*	MFA	TA
Painting with Entrepreneurial Studies	BFA (p. 262)		TA
Performing Arts	Cert. (p. 475)		BC
Periodontics			Cert. DN
Pharmaceutical Labeling, Advertising and Promotions		Cert., Post-Master's Cert.	PH

Pharmaceutical Manufacturing: Process Development and Analysis		Cert., Post-Master's Cert.	PH
Pharmaceutical Regulatory Sciences		MS	PH
Pharmaceutical Sciences	BS (p. 1729)		ST
Pharmaceutical Sciences/ Medicinal Chemistry		MS, PhD	PH
Pharmaceutical Sciences/ Pharmaceutics		MS, PhD	PH
Pharmaceutical Sciences/ Pharmacodynamics		MS, PhD	PH
Pharmaceutical Sciences/ Regulatory Affairs and Quality Assurance		PhD	PH
Pharmacy		PharmD	PH
Philosophy	BA (p. 1121), Minor (p. 1127)	MA, PhD	LA
Photography (Art Education*)	BFA (p. 268), Conc.*	MFA	TA
Photography with Entrepreneurial Studies	BFA (p. 275)		TA
Physical Therapy		DPT	HP
Physician Assistant		MMS	ME
Physics	BA (p. 1734), BS (p. 1738), BA/MS (p. 1446), BS/MS (p. 1447), Minor (p. 1742)	MS, PhD	ST
Physics with Teaching	BS (p. 1743)		ST
Piano Pedagogy	BM (not currently open for enrollment) (p. 476)	MM	BC
Piano Performance and Music Theory		MM	BC
Piano Performance/ Collaborative Piano and Chamber Music		MM	BC
Piano Performance/Piano Pedagogy		MM	BC
Play Therapy		Cert.	UC
Podiatric Medicine		DPM	PM
Police Leadership		Cert. (not currently open for enrollment)	LA
Policy and Organizational Studies (Adult and Organizational Development, Higher Education, Urban Education)		PhD	ED
Political Economy	Cert. (p. 1127)		LA
Political Science	BA (p. 1129), Minor (p. 1135)	MA, PhD	LA
Portuguese	Minor (p. 1136)		LA
Printmaking (Art Education*)	BFA (p. 280), Conc.*	MFA	TA
Printmaking with Entrepreneurial Studies	BFA (p. 287)		TA
Professional Health Education (The Scholarship of Teaching and Learning in Health-Based Instruction*)		MSEd*, Cert.	ED

Professional Studies (Brass, Cello, Classical Guitar, Double Bass, Historical Keyboard Instruments, Opera, Percussion, Piano, Viola, Violin, Voice, Woodwinds)		Cert.	BC
Professional Writing	Cert. (p. 1136)		LA
Prosthodontics		Cert.	DN
Psychological Research		MS	LA
Psychological Studies (active in Japan)	BA (p. 1137), Minor		LA
Psychology (Quantitative Methods*)	BA (p. 1140), Minor (p. 1147)	MA (not open for direct admission), PhD*	LA
Psychology/Neuroscience		PhD	LA
Public Health	BS (p. 1388), Minor (p. 1393)		HP
Public Health Data Science		MS	HP
Public Health Law Research		Cert.	HP
Public Health Preparedness and Response		Cert.	HP
Public Policy	Minor (p. 1148)	MPP, Cert.	LA
Public Relations (International Communication*)	BA (p. 1338), Conc.* (p. 1341), Minor (p. 1344)	Cert.	CO
Quantitative Finance and Risk Management		MS	BU
Real Estate	BBA (p. 906), Minor (p. 910)	MS (not currently accepting applications), Cert. (not currently open for enrollment)	BU
Recreational Therapy	BS (p. 1394)	MS	HP
Regulatory Affairs and Quality Assurance		MS	PH
Religion	BA (p. 1150), Minor (p. 1154)	MA, PhD (not currently accepting applications)	LA
Risk Management and Insurance (Healthcare Risk Management)	BBA (p. 911)		BU
Risk Management and Insurance (Human Capital Risk)	BBA (p. 917)	MS (not currently accepting applications)	BU
Risk Management and Insurance (Managing Corporate Risk)	BBA (p. 914)		BU
Sales	Minor (p. 921)		BU
School Psychology		MEd (not open for direct admission), EdS, PhD	ED
Science Education/7-12		Cert. (not currently open for enrollment)	ED
Science and Technology Writing	Cert. (p. 1748)		ST
Scientific Writing		PSM, Cert.	ST
Screen Studies	Cert. (p. 531), Minor (p. 531)		CA
Sculpture (Art Education*)	BFA (p. 292), Conc.*	MFA	TA
Sculpture with Entrepreneurial Studies	BFA (p. 300)		TA

Secondary Education/English Education	BSEd (p. 629)	MEd	ED
Secondary Education/Mathematics Education	BSEd (p. 632)	MEd	ED
Secondary Education/Science Education		MEd	ED
Secondary Education/Social Studies Education	BSEd (p. 636)	MEd	ED
Secondary Education/World Languages Education	BSEd (p. 640)		ED
Secondary Education/World/Foreign Languages Education		MEd	ED
Service Excellence		Cert.	TH
Social Science Research	Cert. (p. 1154)		LA
Social Studies Education/7-12		Cert. (not currently open for enrollment)	ED
Social Work	BSW (p. 1407)	MSW	SW
Social and Behavioral Sciences		MPH, PhD	HP
Sociology	BA (p. 1155), Minor (p. 1163)	MA, PhD	LA
Sociology of Health	Minor (p. 1163)		LA
Spanish	BA (p. 1166), Minor (p. 1177), Cert. (p. 1177)	MA, PhD	LA
Spanish and Latin American Studies for Business	Cert. (p. 1164)		LA
Spanish and Latinx Studies for Health and Human Services Professions	Cert. (p. 1165)		LA
Spanish for Health Professions		Cert.	LA
Special Education		MEd	ED
Special Education (Pre-K-12)	BSEd (p. 643)		ED
Specialized Studies in Science and Mathematics	Post-Secondary Cert. (p. 1782)		UC
Speech, Language and Hearing Science	BA (p. 1399)	MA	HP
Sport Business (Athletics Administration, Recreation and Event Management, Sport Analytics, Sport Marketing and Promotions)		MS	TH
Sport Business Executive Program		MS (not currently accepting applications)	TH
Sport Management	Cert. (p. 1769), Minor (p. 1770)		TH
Sport Marketing	Cert. (p. 1771)		TH
Sport and Recreation Management (Esports*, Event Management*, Governance and Policy*, Sport and Recreation Promotion*)	BS* (p. 1764)		TH
Sports Media	Cert. (p. 1345)		CO
Sports and Society	Cert. (p. 1178)		LA
Stage Management	Cert. (p. 532)		CA

Statistical Science and Data Analytics	BS (p. 922), Minor (p. 926)		BU
Statistics		MS (not open for direct admission), PhD	BU
Statistics and Data Science		MS (not currently accepting applications)	BU
Sterile Process Manufacturing		Cert., Post-Master's Cert.	PH
Stormwater Management		Cert.	EN
Strategic Communication and Cross-Cultural Leadership		Cert.	CO
String Pedagogy		MM	BC
Student Affairs Leadership		Cert.	ED
Superintendency		Cert.	ED
Supply Chain Management	BBA (p. 927), Minor (p. 930)		BU
Sustainability	Cert. (p. 1783)		UC
Sustainable Community Planning		Cert.	TA
Sustainable Food Systems	Cert. (p. 305), Minor (p. 307)		TA
Taxation		MS LLM	LW
Teaching Art Education		Post-Master's Cert.	TA
Teaching English to Speakers of Other Languages		MSEd	ED
Teaching in Higher Education		Cert.	ED
Teaching in Higher Education for the Creative Disciplines		Cert.	ED
Technical Production and Management	BFA (p. 533)		CA
Theater (Acting*, Design and Production*, Directing*)	BA* (p. 537), Minor (p. 549)		CA
Theater Education	Cert. (p. 548)		CA
Theater Instruction		MA, Cert.	CA
Theater and Community Engagement	Cert. (p. 537)		CA
Theater/Acting		MFA (applications accepted every 3 years with next admission for Fall 2025)	CA
Theater/Design		MFA	CA
Theater/Directing		MFA (applications accepted every 3 years with next admission for Fall 2025)	CA
Theater/Playwriting		MFA (applications accepted every 3 years with next admission for Fall 2025)	CA
Tourism Analytics		Cert.	TH
Tourism and Hospitality Management (2+2 program, active in Japan)	BS		TH
Tourism and Hospitality Management (Destination Management*, Event Management*, Hospitality Operations*)	BS* (p. 1772), Cert. (p. 1776), Minor (p. 1777)		TH
Transnational Law		LLM	LW
Transportation Planning		Cert.	TA

Travel and Tourism		MS (not currently accepting applications)	TH
Trial Advocacy		LLM	LW
Trial Advocacy and Litigation		Juris Doctor Cert.	LW
Urban Bioethics		MA, Cert.	ME
Urban Education		Cert.	ED
Validation Sciences		Cert., Post-Master's Cert.	PH
Virtual Media Management	BA (p. 1346)		CO
Visual Anthropology	Minor (p. 1179)		LA
Visual Studies	BA (p. 308)		TA
Vocal Arts		MM	BC
Voice and Speech for the Actor	Cert. (p. 551)		CA
World/Foreign Languages Education/K-12		Cert. (not currently open for enrollment)	ED

Key for Schools and Colleges

BC	Esther Boyer College of Music & Dance in the Center for the Performing & Cinematic Arts
BU	Fox School of Business & Management
CA	School of Theater, Film & Media Arts in the Center for the Performing & Cinematic Arts
CO	Lew Klein College of Media & Communication
DN	Maurice H. Kornberg School of Dentistry
ED	College of Education & Human Development
EN	College of Engineering
HP	College of Public Health
LA	College of Liberal Arts
LW	Beasley School of Law
ME	Lewis Katz School of Medicine
PH	School of Pharmacy
PM	School of Podiatric Medicine
ST	College of Science & Technology
SW	School of Social Work
TA	Tyler School of Art & Architecture
TH	School of Sport, Tourism & Hospitality Management
UC	University College
US	University Studies

Degree Symbols and Classifications

AA	Associate in Arts
AS	Associate in Science
BA	Bachelor of Arts
BA/MA	Five-year Bachelor's and Master's Program
BA/MS	Five-year Bachelor's and Master's Program
BBA	Bachelor of Business Administration
BFA	Bachelor of Fine Arts
BGS	Bachelor of General Studies
BM	Bachelor of Music
BS	Bachelor of Science
BS/MA	Five-year Bachelor's and Master's Program
BS/MS	Five-year Bachelor's and Master's Program
BSArch	Bachelor of Science in Architecture
BSBioe	Bachelor of Science in Bioengineering
BSCE	Bachelor of Science in Civil Engineering

BSCET	Bachelor of Science in Construction Engineering Technology
BSEng	Bachelor of Science in Engineering
BSEd	Bachelor of Science in Education
BSEnvE	Bachelor of Science in Environmental Engineering
BSEE	Bachelor of Science in Electrical Engineering
BSET	Bachelor of Science in Engineering Technology
BSHIM	Bachelor of Science in Health Information Management
BSISE	Bachelor of Science in Industrial and Systems Engineering
BSME	Bachelor of Science in Mechanical Engineering
BSMET	Bachelor of Science in Mechanical Engineering Technology
BSN	Bachelor of Science in Nursing
BSW	Bachelor of Science in Social Work
DAT	Doctor of Athletic Training
DBA	Doctor of Business Administration
DMA	Doctor of Musical Arts
DMD	Doctor of Dental Medicine
DNP	Doctor of Nursing Practice
DPM	Doctor of Podiatric Medicine
DPT	Doctor of Physical Therapy
DS	Doctor of Science
EdD	Doctor of Education
EdS	Education Specialist
JD	Juris Doctor (first professional degree for law)
LLM	Master of Laws (further specialization after J.D. degree)
MA	Master of Arts
MAcc	Master of Accountancy
MArch	Master of Architecture
MBA	Master of Business Administration
MD	Doctor of Medicine
MEd	Master of Education
MEng	Master of Engineering
METM	Master of Engineering Technology Management
MFA	Master of Fine Arts
MHA	Master of Health Administration
MiM	Master in Management
MJ	Master of Journalism
MLA	Master of Liberal Arts
MLArch	Master of Landscape Architecture
MM	Master of Music
MMS	Master of Medical Science
MMT	Master of Music Therapy
MOT	Master of Occupational Therapy
MPH	Master of Public Health
MPP	Master of Public Policy
MS	Master of Science
MSAT	Master of Science in Athletic Training
MSBioe	Master of Science in Bioengineering
MSCE	Master of Science in Civil Engineering
MSEd	Master of Science in Education
MSEE	Master of Science in Electrical Engineering
MSEnvE	Master of Science in Environmental Engineering
MSME	Master of Science in Mechanical Engineering

MSW	Master of Social Work
MTHM	Master of Tourism and Hospitality Management
OTD	Clinical Doctorate in Occupational Therapy
PhD	Doctor of Philosophy
PharmD	Doctor of Pharmacy
PSM	Professional Science Master's
SJD	Doctor of Juridical Science

Faculty

Beasley School of Law

Alice G. Abreu, The Honorable Nelson A. Diaz Professor of Law, Department of Law; JD, Cornell Law School.

Olufunmilayo B. Arewa, Murray H. Shusterman Professor in Transactional and Business Law, Department of Law; JD, Harvard Law School.

Gilat Juli Bachar, Assistant Professor, Department of Law; JSD, Stanford Law School.

Jane B. Baron, Professor, Department of Law; JD, Harvard Law School.

Robert J. Bartow, Laura H. Carnell Professor, Department of Law; LLM, Yale Law School.

Edith Beerdsen, Assistant Professor, Department of Law; JD, Columbia Law School.

Zamir Ben-Dan, Assistant Professor, Department of Law; JD, The City University of New York School of Law.

Marian G. Braccia, Practice Professor, Department of Law; JD, Temple University Beasley School of Law.

Scott C. Burris, Professor, Department of Law; JD, Yale Law School.

Amy J. Cohen, Professor and the Robert J. Reinstein Endowed Chair in Law, Department of Law; JD, Harvard Law School.

Susan L. De Jarnatt, Professor of Legal Research and Writing, Department of Law; JD, Temple University Beasley School of Law.

Margaret M. Deguzman, James E. Beasley Professor of Law, Department of Law; PhD, National University of Ireland.

Michael A. Donnelly, Practice Professor, Department of Law; JD, University of Chicago Law School.

Erika M. Douglas, Assistant Professor, Department of Law; LLM, Stanford University.

Jeffrey L. Dunoff, Laura H. Carnell Professor, Department of Law; LLM, Georgetown University Law Center.

JoAnne A. Epps, Professor, Department of Law; JD, Yale Law School.

Jules M. Epstein, Professor, Department of Law; JD, University of Pennsylvania School of Law.

Gabriela Femenia, Associate Professor of Instruction, Department of Law; JD, University of Pennsylvania Carey Law School.

Roger C. Green, Professor, Department of Law; PhD, Princeton University.

Paul R. Gugliuzza, Professor, Department of Law; JD, Tulane University School of Law.

Donald P. Harris, Professor, Department of Law; LLM, University of Wisconsin Law School.

J. Benton Heath, Assistant Professor, Department of Law; LLM, New York University School of Law.

Duncan B. Hollis, Laura H. Carnell Professor, Department of Law; JD, Boston College Law School.

Kenneth A. Jacobsen, Practice Professor, Department of Law; JD, Villanova University Charles Widger School of Law.

Sarah R. Katz, Professor of Law, Department of Law; JD, University of Pennsylvania Carey Law School.

Nancy J. Knauer, Sheller Professor of Public Interest Law, Department of Law; JD, University of Pennsylvania Carey Law School.

Jennifer J. Lee, Associate Professor, Department of Law; JD, Columbia Law School.

Mary E. Levy, Practice Professor, Department of Law; JD, Temple University Beasley School of Law.

Tom C.W. Lin, Jack E. Feinberg Professor in Litigation, Department of Law; JD, University of Pennsylvania Carey Law School.

Elizabeth L. Lippy, Practice Professor, Department of Law; JD, Temple University Beasley School of Law.

Jonathan C. Lipson, Professor and the Harold E. Kohn Chair in Law, Department of Law; JD, University of Wisconsin Law School.

Laura E. Little, James G. Schmidt Professor of Law, Department of Law; JD, Temple University Beasley School of Law.

Gregory N. Mandel, Professor, Department of Law; JD, Stanford Law School.

Kathy C. Mandelbaum, Practice Professor, Department of Law; JD, Harvard Law School.

Jane Manners, Assistant Professor, Department of Law; PhD, Princeton University.

Ellie Margolis, Professor of Legal Research and Writing, Department of Law; JD, Northeastern University School of Law.

Finbarr McCarthy, Associate Professor, Department of Law; JD, Tulane University School of Law.

Salil K. Mehra, Charles B. Klein Professor of Law, Department of Law; JD, University of Chicago Law School.

Andrea Monroe, Professor, Department of Law; LLM, New York University School of Law.

Dennis W. Morrow, Visiting Professor, Department of Law; JD, Temple University Beasley School of Law.

Kristen E. Murray, Professor, Department of Law; JD, Georgetown University Law Center.

Trang (Mae) Nguyen, Assistant Professor, Department of Law; JD, New York University School of Law.

Lauren M. Ouziel, Professor, Department of Law; JD, Columbia Law School.

Rafael A. Porrata-Doria, Professor, Department of Law; JD, Yale Law School.

Mark C. Rahdert, Professor, Department of Law; JD, Yale Law School.

Jaya E. Ramji-Nogales, I. Herman Stern Professor of Law for Research, Department of Law; LLM, Georgetown University Law Center.

Spencer F. Rand, Clinical Professor, Department of Law; JD, Case Western Reserve University School of Law.

Evelyn M. Rangel-Medina, Assistant Professor, Department of Law; JD, University of California, Berkeley Law.

Rachel D. Rebouche, Professor, Department of Law; LLM, Queen's University, Belfast.

Harvey Rishikof, Visiting Professor of Law, Department of Law; JD, New York University School of Law.

Tina Saunders, Associate Professor of Instruction in Law, Department of Law; JD, University of Maryland School of Law.

James A. Shellenberger, Professor, Department of Law; JD, Villanova University Charles Widger School of Law.

Rahshanda K. Sibley, Assistant Clinical Professor, Department of Law; JD, New York University School of Law.

Amy Sinden, Professor, Department of Law; JD, University of Pennsylvania Carey Law School.

Patty Skuster, Visiting Professor and the Phyllis W. Beck Chair in Law, Department of Law; JD, University of Michigan.

Peter J. Spiro, Charles R. Weiner Professor of Law, Department of Law; JD, University of Virginia School of Law.

Bonny L. Tavares, Associate Professor of Legal Research and Writing, Department of Law; JD, Howard University School of Law.

Erol Gökhan Tolay, Assistant Practice Professor, Department of Law; SJD, Temple University Beasley School of Law.

Andrew M. Weiner, Practice Professor, Department of Law; LLM, Georgetown University Law Center.

Harwell Wells, I. Herman Stern Professor of Law for Teaching, Department of Law; PhD, University of Virginia.

Mo Zhang, James E. Beasley Professor of Law, Department of Law; SJD, University of Pennsylvania Carey Law School.

Boyer College of Music and Dance

Charles Abramovic, Professor, Department of Keyboard Studies; DMA, Temple University.

Mitos Andaya Hart, Associate Professor, Department of Vocal Arts; DMA, University of Kansas.

Christine L. Anderson, Associate Professor, Department of Vocal Arts; DMA, University of Cincinnati College-Conservatory of Music.

Beth Bolton, Associate Professor, Department of Music Education and Music Therapy; PhD, Temple University.

Karen E. Bond, Associate Professor, Department of Dance; PhD, La Trobe University.

Darlene M. Brooks, Associate Professor, Department of Music Education and Music Therapy; PhD, Temple University.

Matthew Brunner, Assistant Professor of Instruction, Department of Instrumental Studies; DMA, Indiana University.

Sara Buechner, Professor, Department of Keyboard Studies; DMA, Manhattan School of Music.

Nathan Buonviri, Associate Professor, Department of Music Education and Music Therapy; PhD, Temple University.

David B. Cannata, Associate Professor, Department of Music Studies; PhD, New York University.

Dustin Cates, Assistant Professor, Department of Music Education and Music Therapy; PhD, University of Missouri-Kansas City Conservatory of Music and Dance.

Deborah A. Confredo, Professor, Department of Music Education and Music Therapy; PhD, Florida State University.

Patricia Cornett, Assistant Professor, Department of Instrumental Studies; DMA, University of Michigan.

Marcus DeLoach, Associate Professor, Department of Vocal Arts; DMA, Rice University.

Alexander deVaron, Associate Professor of Instruction, Department of Music Studies; DMA, Temple University.

Rollo A. Dilworth, Professor, Department of Music Education and Music Therapy; DMA, Northwestern University.

Sherril Dodds, Professor, Department of Dance; PhD, University of Surrey.

Stephanie Doktor, Assistant Professor, Department of Music Studies; PhD, University of Virginia.

Lillian Eyre, Visiting Professor, Department of Music Education and Music Therapy; PhD, Temple University.

Edward Flanagan, Associate Professor, Department of Music Studies; PhD, Temple University.

Rachelle Fleming, Associate Professor, Department of Vocal Arts; DMA, University of Miami.

Mark Franko, Laura H. Carnell Professor, Department of Dance; PhD, Columbia University.

Shana Goldin-Perschbacher, Associate Professor, Department of Music Studies; PhD, University of Virginia.

Lorie A. Gratis Harris, Assistant Professor of Instruction, Department of Vocal Arts; DMA, Temple University.

Matthew J. Greenbaum, Professor, Department of Music Studies; PhD, City University of New York.

Suzanne Hall, Associate Professor, Department of Music Education and Music Therapy; PhD, University of Memphis.

Jillian Harris, Associate Professor, Department of Dance; MFA, New York University Tisch School of the Arts.

yaTande Whitney V. Hunter, Assistant Professor, Department of Dance; PhD, Institute for Doctoral Studies in the Visual Arts.

Lawrence R. Indik, Associate Professor of Practice, Department of Vocal Arts; DMA, Manhattan School of Music.

Laura E. Katz Rizzo, Associate Professor, Department of Dance; PhD, Temple University.

Gregory S. Kettinger, Instructor, Department of Music Studies; BM, Temple University.

Joann M. Kirchner, Assistant Professor of Instruction, Department of Keyboard Studies; PhD, University of Oklahoma.

Michael Klein, Professor, Department of Music Studies; PhD, State University of New York at Buffalo.

Jan L. Krzywicki, Professor, Department of Music Studies; MM, Philadelphia Musical Academy.

Edward D. Latham, Associate Professor, Department of Music Studies; PhD, Yale University.

Kathryn Leemhuis, Assistant Professor, Department of Vocal Arts; DMA, University of Cincinnati College-Conservatory of Music.

Joyce Z. Lindorff, Professor, Department of Keyboard Studies; DMA, The Juilliard School.

Wendy Magee, Professor, Department of Music Education and Music Therapy; PhD, University of Sheffield.

Noriko Manabe, Associate Professor, Department of Music Studies; PhD, Graduate Center, City University of New York.

David McDonnell, Assistant Professor of Instruction, Department of Music Studies; DMA, University of Cincinnati College-Conservatory of Music.

Alisha C. Nypaver, Instructor, Department of Music Studies; MM, Temple University.

Phillip R. O'Banion, Associate Professor, Department of Instrumental Studies; MM, University of Colorado.

Richard D. Oatts, Professor, Department of Music Studies.

Lambert T. Orkis, Professor, Department of Keyboard Studies; MM, Temple University.

Elizabeth C. Parker, Associate Professor, Department of Music Education and Music Therapy; PhD, University of Nebraska-Lincoln.

David Pasbrig, Associate Professor of Instruction, Department of Music Studies; DMA, Temple University.

Paul Rardin, Elaine Brown Chair in Choral Music and Associate Professor, Department of Vocal Arts; DMA, University of Michigan.

Alison M. Reynolds, Professor, Department of Music Education and Music Therapy; PhD, Temple University.

Eduard Schmieder, Laura H. Carnell Professor, Department of Instrumental Studies; DMA equiv., Gneissen Russian Academy of Music.

Helen Shoemark, Professor, Department of Music Education and Music Therapy; PhD, University of Melbourne.

Jeffrey G. Solow, Professor, Department of Instrumental Studies; BA, University of California Los Angeles.

Merián Soto, Professor, Department of Dance; MA, Columbia University.

Terell L. Stafford, Laura H. Carnell Professor, Department of Music Studies; MM, Rutgers University.

Robert T. Stroker, Professor, Department of Music Education and Music Therapy; PhD, Michigan State University.

Christopher Turbessi, Instructor, Department of Vocal Arts; MM, University of Michigan.

Adam Vidiksis, Assistant Professor, Department of Music Studies; DMA, Temple University.

Timothy Warfield, Visiting Professor, Department of Music Studies.

Lindsay Weightman, Associate Professor of Instruction, Department of Music Studies; DMA, Manhattan School of Music.

Samuel Wells, Assistant Professor of Instruction, Department of Music Studies; DMA, California Institute of the Arts.

Maurice W. Wright, Laura H. Carnell Professor, Department of Music Studies; DMA, Columbia University.

Xiang Xu, Assistant Professor, Department of Dance; MFA, New York University Tisch School of the Arts.

Michael L. Zanders, Assistant Professor, Department of Music Education and Music Therapy; PhD, Temple University.

Steven D. Zohn, Laura H. Carnell Professor, Department of Music Studies; PhD, Cornell University.

College of Education and Human Development

Gregory Anderson, Professor, Department of Policy, Organizational and Leadership Studies; PhD, City University of New York.

Crystal L. Austin, Assistant Professor of Instruction, Department of Psychological Studies in Education; PhD, University at Albany, State University of New York.

Janelle M. Bailey, Associate Professor, Department of Teaching and Learning; PhD, University of Arizona.

Julie L. Booth, Professor, Department of Teaching and Learning; PhD, Carnegie Mellon University.

Jean A. Boyer, Assistant Professor of Instruction, Department of Teaching and Learning; PhD, University of Cincinnati.

Joseph Boyle, Associate Professor, Department of Teaching and Learning; PhD, University of Kansas.

Carol B. Brandt, Associate Professor, Department of Teaching and Learning; PhD, University of New Mexico.

Wanda M. Brooks, Professor, Department of Teaching and Learning; EdD, University of Pennsylvania.

Kathryn Burke, Research Assistant Professor, Department of Teaching and Learning; PhD, University of Kansas.

James P. Byrnes, Professor, Department of Psychological Studies in Education; PhD, Temple University.

Sarah A. Cordes, Associate Professor, Department of Policy, Organizational and Leadership Studies; PhD, New York University.

Maia Bloomfield Cucchiara, Associate Professor, Department of Teaching and Learning; PhD, University of Pennsylvania.

James Earl Davis, Professor, Department of Policy, Organizational and Leadership Studies; PhD, Cornell University.

Sarah Elizabeth Diamond, Associate Professor of Practice, Department of Teaching and Learning; PhD, Auburn University.

Meixia Ding, Associate Professor, Department of Teaching and Learning; PhD, Texas A and M University.

Arthur G. Dowdy, Assistant Professor, Department of Teaching and Learning; PhD, Temple University.

Joseph P. DuCette, Professor, Department of Psychological Studies in Education; PhD, Cornell University.

Richard M. Englert, Professor and Chancellor, Department of Policy, Organizational and Leadership Studies; EdD, University of California Los Angeles.

Armando X. Estrada, Associate Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of Texas at El Paso.

Frank H. Farley, Professor Emeritus, Department of Psychological Studies in Education; PhD, University of London.

Catherine A. Fiorello, Professor, Department of Psychological Studies in Education; PhD, University of Kentucky.

Judith Flanigan, Associate Professor of Instruction, Department of Teaching and Learning; PhD, Temple University.

Timothy P. Fukawa-Connelly, Professor, Department of Teaching and Learning; PhD, University of Maryland.

Allison Gilmour, Assistant Professor, Department of Teaching and Learning; PhD, Vanderbilt University.

Sally A. Gould-Taylor, Research Associate Professor, Department of Teaching and Learning; PhD, Temple University.

John Hall, Assistant Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of California Berkeley.

Insook Han, Associate Professor, Department of Teaching and Learning; EdD, Columbia University, Teachers College.

Shanta Hattikudur, Associate Professor of Instruction, Department of Policy, Organizational and Leadership Studies; PhD, University of Wisconsin-Madison.

Annemarie H. Hindman, Professor, Department of Teaching and Learning; PhD, University of Michigan.

Heidi Hutman, Assistant Professor of Instruction, Department of Psychological Studies in Education; PhD, University of Albany.

Xu (Lilya) Jiang, Assistant Professor, Department of Psychological Studies in Education; PhD, University of South Carolina.

Jennifer Johnson, Assistant Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of Maryland College Park.

Paul Jones, Assistant Professor, Department of Psychological Studies in Education; PhD, Temple University.

Avshalom Kaplan, Professor, Department of Psychological Studies in Education; PhD, University of Michigan.

Suzanne Kelley, Clinical Assistant Professor, Department of Teaching and Learning; PhD, Temple University.

Julie Beth Kessler, Associate Professor of Instruction, Department of Teaching and Learning; PhD, Temple University.

Janice H. Laurence, Professor, Department of Psychological Studies in Education; PhD, George Mason University.

Di Liu, Assistant Professor of Instruction, Department of Teaching and Learning; EdD, Boston University.

Christopher W. McGinley, Professor of Practice, Department of Policy, Organizational and Leadership Studies; EdD, University of Pennsylvania.

Kelly M. McGinn, Assistant Professor, Department of Psychological Studies in Education; PhD, Temple University.

Sabina Neugebauer, Associate Professor, Department of Teaching and Learning; EdD, Harvard University.

Kristie Jones Newton, Professor, Department of Teaching and Learning; PhD, University of Maryland College Park.

Beth Olanoff, Associate Professor of Instruction, Department of Policy, Organizational and Leadership Studies; JD, University of Pennsylvania.

Timothy J. Patterson, Assistant Professor, Department of Teaching and Learning; PhD, Columbia University, Teachers College.

Laura Pendergast, Associate Professor, Department of Psychological Studies in Education; PhD, The Pennsylvania State University.

Charles Price, Associate Professor, Department of Policy, Organizational and Leadership Studies; PhD, Graduate Center, City University of New York.

M. Meghan Raisch, Assistant Professor of Instruction, Department of Policy, Organizational and Leadership Studies; PhD, Temple University.

Jessica Reinhardt, Associate Professor of Practice, Department of Psychological Studies in Education; PhD, University of Denver.

Jayminn S. Sanford-DeShields, Associate Professor, Department of Teaching and Learning; EdD, Harvard University.

W. Joel Schneider, Professor, Department of Policy, Organizational and Leadership Studies; PhD, Texas A and M University.

Lori A. Shorr, Associate Professor of Instruction, Department of Psychological Studies in Education; PhD, University of Pittsburgh.

Michael W. Smith, Professor, Department of Teaching and Learning; PhD, University of Chicago.

Judith C. Stull, Research Professor, Department of Policy, Organizational and Leadership Studies; PhD, Boston College.

Jill May Swavely, Professor of Instruction, Department of Teaching and Learning; EdD, Temple University.

Matthew J. Tincani, Professor, Department of Teaching and Learning; PhD, The Ohio State University.

Renee M. Tobin, Professor, Department of Psychological Studies in Education; PhD, Texas A and M University.

Benjamin Torsney, Assistant Professor of Instruction, Department of Policy, Organizational and Leadership Studies; PhD, Temple University.

Jason C. Travers, Associate Professor, Department of Teaching and Learning; PhD, University of Nevada, Las Vegas.

Matthew J. Elvis Wagner, Associate Professor, Department of Teaching and Learning; EdD, Columbia University, Teachers College.

Daniel Walinsky, Associate Professor of Instruction, Department of Psychological Studies in Education; PhD, University of North Dakota.

Barbara A. Wasik, Professor and the PNC Chair in Early Childhood Education, Department of Teaching and Learning; PhD, Temple University.

Diana L. Wildermuth, Associate Professor of Practice, Department of Psychological Studies in Education; PhD, Temple University.

Jason Wingard, Professor, Department of Policy, Organizational and Leadership Studies; PhD, University of Pennsylvania.

Christine A. Woyshner, Professor, Department of Teaching and Learning; EdD, Harvard University.

College of Engineering

Bechara E. Abboud, Associate Professor, Department of Civil and Environmental Engineering; PhD, Drexel University.

Fauzia Ahmad, Associate Professor, Department of Electrical and Computer Engineering; PhD, University of Pennsylvania.

Mohammad Ali Al-Adaileh, Assistant Professor of Instruction, Department of Engineering, Technology, and Management; PhD, Ohio University.

Maryam Alibeik, Assistant Professor of Instruction, Department of Electrical and Computer Engineering; PhD, Purdue University.

Gangadhar Andaluri, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Temple University.

Berk Ayranci, Instructor, Department of Engineering, Technology, and Management; MSME, Temple University.

Li Bai, Professor, Department of Electrical and Computer Engineering; PhD, Drexel University.

Evangelia Bellas, Assistant Professor, Department of Bioengineering; PhD, Tufts University.

Saroj K. Biswas, Professor, Department of Electrical and Computer Engineering; PhD, University of Ottawa.

Achinta Bordoloi, Research Assistant Professor, Department of Civil and Environmental Engineering; PhD, University of Canterbury.

Robert M. Brooks, Associate Professor, Department of Civil and Environmental Engineering; PhD, Indian Institute of Technology.

Cory Budischak, Associate Professor of Instruction, Department of Electrical and Computer Engineering; PhD, University of Delaware.

Shih-Jiun Chen, Professor, Department of Mechanical Engineering; PhD, Drexel University.

Harsh Deep Chopra, Professor, Department of Mechanical Engineering; PhD, University of Maryland College Park.

Joseph Thomas Coe Jr., Associate Professor, Department of Civil and Environmental Engineering; PhD, University of California Los Angeles.

Richard S. Cohen, Associate Professor, Department of Mechanical Engineering; PhD, Princeton University.

Philip Dames, Assistant Professor, Department of Mechanical Engineering; PhD, University of Pennsylvania.

Kurosh Darvish, Professor, Department of Mechanical Engineering; PhD, University of Virginia.

Zdenka J. Delalic, Associate Professor, Department of Electrical and Computer Engineering; PhD, University of Pennsylvania.

Yasir Demiryurek, Assistant Professor of Instruction, Department of Mechanical Engineering; MS, Rutgers University.

Dmitriy A. Dikin, Research Associate Professor, Department of Mechanical Engineering; PhD, National Academy of Sciences of Ukraine, Institute for Low Temperature Physics and Engineering.

Julie Drzymalski, Professor of Instruction, Department of Engineering, Technology, and Management; PhD, Lehigh University.

Liang Du, Assistant Professor, Department of Electrical and Computer Engineering; PhD, Georgia Institute of Technology.

Thomas V. Edwards, Associate Professor of Instruction, Department of Engineering, Technology, and Management; DPS, Pace University.

Ahmed Faheem, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of Wisconsin.

James A. Fumato, Assistant Professor of Instruction, Department of Bioengineering; PhD, Drexel University.

Jonathan Arye Gerstenhaber, Assistant Professor of Instruction, Department of Bioengineering; PhD, Temple University.

Bojana Gligorijevic, Associate Professor, Department of Bioengineering; PhD, Georgetown University.

Yah-el Har-el, Associate Professor of Instruction, Department of Bioengineering; PhD, Johns Hopkins University.

John J. Helferty, Associate Professor, Department of Electrical and Computer Engineering; PhD, Drexel University.

Hamid Heravi, Assistant Professor of Instruction, Department of Mechanical Engineering; PhD, University of Cardiff.

Parsaoran Hutapea, Professor, Department of Mechanical Engineering; PhD, North Carolina State University.

Daniel A. Jacobs, Assistant Professor, Department of Mechanical Engineering; PhD, Stanford University.

Dimitri Karagiannis, Assistant Professor of Instruction, Department of Mechanical Engineering; PhD, Villanova University.

Mehdi Khanzadeh Moradillo, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Oklahoma State University.

Mohammad F. Kiani, Professor, Department of Mechanical Engineering; PhD, Louisiana Tech University.

Sanghun Kim, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Syracuse University.

Paul A. Laviola, Instructor, Department of Engineering, Technology, and Management; MS, Widener University.

Peter Lelkes, Laura H. Carnell Professor, Department of Bioengineering; PhD, RWTH Aachen University.

Michel Lemay, Professor, Department of Bioengineering; PhD, Case Western Reserve University.

Haijun Liu, Associate Professor, Department of Mechanical Engineering; PhD, University of Maryland College Park.

Ling Liu, Associate Professor, Department of Mechanical Engineering; PhD, Columbia University.

Erica R. McKenzie, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of California Davis.

Iyad Obeid, Associate Professor, Department of Electrical and Computer Engineering; PhD, Duke University.

Ruth Ochia, Professor of Instruction, Department of Bioengineering; PhD, University of Washington.

Chetan A. Patil, Assistant Professor, Department of Bioengineering; PhD, Vanderbilt University.

Vallorie J. Peridier, Associate Professor, Department of Mechanical Engineering; PhD, Lehigh University.

Joseph Picone, Professor, Department of Electrical and Computer Engineering; PhD, Illinois Institute of Technology.

Alex Pillapakkam, Associate Professor of Instruction, Department of Mechanical Engineering; PhD, New Jersey Institute of Technology.

Nancy Pleshko, Laura H. Carnell Professor, Department of Bioengineering; PhD, Rutgers University.

William Querido Maciel, Research Assistant Professor, Department of Bioengineering; PhD, Université de Haute-Alsace Mulhouse-Colmar.

Fei Ren, Associate Professor, Department of Mechanical Engineering; PhD, Michigan State University.

Laura D. Riggio, Assistant Professor of Instruction, Department of Mechanical Engineering; PhD, Lehigh University.

Robert J. Ryan, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Drexel University.

Keyanoush Sadeghipour, Professor, Department of Mechanical Engineering; PhD, University of Manchester Institute of Science and Technology.

Elham Sahraei, Assistant Professor, Department of Mechanical Engineering; PhD, George Washington University.

Liliana Schwartz, Associate Professor of Instruction, Department of Engineering, Technology, and Management; PhD, Ben-Gurion University of the Negev.

Anita Singh, Associate Professor, Department of Bioengineering; PhD, Wayne State University.

Damoon Soudbakhsh, Assistant Professor, Department of Mechanical Engineering; PhD, George Washington University.

Andrew Spence, Associate Professor, Department of Bioengineering; PhD, Cornell University.

Rominder Suri, Professor, Department of Civil and Environmental Engineering; PhD, Michigan Technological University.

Rouzbeh Tehrani, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Temple University.

Brian F. Thomson, Associate Professor of Instruction, Department of Electrical and Computer Engineering; PhD, The Pennsylvania State University.

Erkan Tüzel, Associate Professor, Department of Bioengineering; PhD, University of Minnesota.

Philip D. Udo-Inyang, Associate Professor, Department of Civil and Environmental Engineering; PhD, University of Missouri-Columbia.

Felix F. Udoeyo, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Abubakar Tafawa Balewa University.

Evelyn Walters, Associate Professor of Instruction, Department of Civil and Environmental Engineering; PhD, Technische Universität München.

Han Wang, Assistant Professor, Department of Electrical and Computer Engineering.

Karin Wang, Assistant Professor, Department of Bioengineering; PhD, Cornell University.

Chang-Hee Won, Professor, Department of Electrical and Computer Engineering; PhD, University of Notre Dame.

Heyang Yuan, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Virginia Polytechnic Institute and State University.

Yimin Daniel Zhang, Associate Professor, Department of Electrical and Computer Engineering; PhD, University of Tsukuba.

Yichuan Zhu, Assistant Professor, Department of Civil and Environmental Engineering; PhD, Texas A and M University.

College of Liberal Arts

Casarae Abdul-Ghani, Assistant Professor, Department of English; PhD, Purdue University.

Zain Abdullah, Associate Professor, Department of Religion; PhD, The New School for Social Research.

Elizabeth Adams, Instructor, Department of Criminal Justice; PhD, Michigan State University.

Hiram Aldarondo, Associate Professor, Department of Spanish and Portuguese; PhD, University of Chicago.

Lauren B. Alloy, Laura H. Carnell Professor, Department of Psychology and Neuroscience; PhD, University of Pennsylvania.

Cate Almon, Associate Professor of Instruction, Department of First Year Writing Program; EdD, Temple University.

Rebecca T. Alpert, Professor Emerita, Department of Religion; PhD, Temple University.

Eli Alshanetsky, Assistant Professor, Department of Philosophy; PhD, New York University.

Michael Altimore, Professor of Instruction, Department of Sociology; PhD, University of Iowa.

Elizabeth Alvarez, Associate Professor of Instruction, Department of Religion; PhD, University of Chicago Divinity School.

Nilgün Anadolu-Okur, Professor, Department of Africology and African American Studies; PhD, Hacettepe University.

Reynaldo Anderson, Associate Professor, Department of Africology and African American Studies; PhD, University of Nebraska-Lincoln.

Max Andrucki, Associate Professor of Instruction, Department of Geography and Urban Studies; PhD, University of Leeds.

Molefi Kete Asante, Professor, Department of Africology and African American Studies; PhD, University of California Los Angeles.

Philip Atkins, Associate Professor of Instruction, Department of Philosophy; PhD, University of California Santa Barbara.

Melissa Auerbach, Assistant Professor of Instruction, Department of Psychology and Neuroscience; PhD, State University of New York at Stony Brook.

Kathleen Auerhahn, Associate Professor, Department of Criminal Justice; PhD, University of California Riverside.

James D. Bachmeier, Associate Professor, Department of Sociology; PhD, University of California Irvine.

Marcia B. Bailey, Associate Professor of Instruction, Department of Intellectual Heritage Program; PhD, Colgate Rochester Crozer Divinity.

Chloé Bakalar, Assistant Professor, Department of Political Science; PhD, University of Pennsylvania.

Christina Baker, Assistant Professor, Department of Spanish and Portuguese; PhD, University of Wisconsin-Madison.

Debra Bangasser, Associate Professor, Department of Psychology and Neuroscience; PhD, Rutgers University.

Alison Baren, Assistant Professor of Instruction, Department of Psychology and Neuroscience; PhD, Graduate Center, City University of New York.

Austin B. Bean, Assistant Professor, Department of Economics; PhD, University of Texas at Austin.

Steven R. Belenko, Professor, Department of Criminal Justice; PhD, Columbia University.

Jamal Benin, Assistant Professor of Instruction, Department of Intellectual Heritage Program; PhD, Temple University.

Stefania Benini, Assistant Professor of Instruction, Department of French, German, Italian and Slavic; PhD, Stanford University.

Daniel W. Berman, Professor, Department of Greek and Roman Classics; PhD, Yale University.

Lila Corwin Berman, Professor, Department of History; PhD, Yale University.

Susan Bertolino, Instructor, Department of Intellectual Heritage Program; MA, University of Chicago.

Abhit Bhandari, Assistant Professor, Department of Political Science; PhD, Columbia University.

Marcus Bingenheimer, Associate Professor, Department of Religion; Dr.Phil., Wurzburg University.

Erwin A. Blackstone, Professor, Department of Economics; PhD, University of Michigan.

Khalid Y. Blankinship, Professor, Department of Religion; PhD, University of Washington.

Michael L. Bognanno, Professor, Department of Economics; PhD, Cornell University.

Aryeh I. Botwinick, Professor, Department of Religion; PhD, Princeton University.

Lucy Bregman, Professor Emerita, Department of Religion; PhD, University of Chicago Divinity School.

Mary K. Brennan, Assistant Professor of Instruction, Department of Philosophy; PhD, Temple University.

Lisa A. Briand, Associate Professor, Department of Psychology and Neuroscience; PhD, University of Michigan.

Seth C. Bruggeman, Associate Professor, Department of History; PhD, College of William and Mary.

Gregory Byala, Associate Professor of Instruction, Department of First Year Writing Program; PhD, Yale University.

César Cabezas, Assistant Professor, Department of Philosophy; PhD, Columbia University.

Nicholaos Catsis, Assistant Professor of Instruction, Department of Political Science; PhD, Temple University.

Lee-Ann Chae, Assistant Professor, Department of Philosophy; PhD, University of California Los Angeles.

Sanjoy Chakravorty, Professor, Department of Geography and Urban Studies; PhD, University of Southern California.

Colin Chamberlain, Associate Professor, Department of Philosophy; PhD, Harvard University.

Isabelle Chang, Assistant Professor of Instruction, Department of Psychology and Neuroscience; PhD, Temple University.

Jason M. Chein, Professor, Department of Psychology and Neuroscience; PhD, University of Pittsburgh.

Eunice Y. Chen, Associate Professor, Department of Psychology and Neuroscience; PhD, University of Sydney.

Eugene Chislenko, Assistant Professor, Department of Philosophy; PhD, University of California Berkeley.

Fletcher Chmara-Huff, Assistant Professor of Instruction, Department of Geography and Urban Studies; PhD, The Ohio State University.

Yongjin Choi, Assistant Professor of Instruction, Department of Economics; PhD, University of North Carolina at Chapel Hill.

Elise Chor, Assistant Professor, Department of Political Science; PhD, University of Chicago.

Bettye Collier-Thomas, Professor, Department of History; PhD, George Washington University.

Gretchen A. Condran, Associate Professor Emerita, Department of Sociology; PhD, University of Pennsylvania.

Whitley Cooke, Professor of Instruction, Department of First Year Writing Program; PhD, University of Oklahoma.

Norma Corrales-Martin, Associate Professor of Instruction, Department of Spanish and Portuguese; PhD, Ohio University.

Nyron Crawford, Assistant Professor, Department of Political Science; PhD, The Ohio State University.

Paul Crowe, Professor of Instruction, Department of Philosophy; PhD, Catholic University of Louvain.

Beth K. Curran, Professor of Instruction, Department of French, German, Italian and Slavic; PhD, Rutgers University.

Amanda Czerniawski, Professor of Instruction, Department of Sociology; PhD, Columbia University.

Khila Dahal, Assistant Professor of Instruction, Department of Geography and Urban Studies; PhD, Texas State University.

Shreyasee Das, Assistant Professor of Instruction, Department of Economics; PhD, University of Houston.

Heath Fogg Davis, Professor, Department of Political Science; PhD, Princeton University.

Richard E. Deeg, Professor, Department of Political Science; PhD, Massachusetts Institute of Technology.

Kevin J. Delaney, Professor, Department of Sociology; PhD, State University of New York Stony Brook.

James Michael DeLise, Associate Professor of Instruction, Department of Intellectual Heritage Program; PhD, Temple University.

John A. Dern, Professor of Instruction, Department of Intellectual Heritage Program; PhD, Lehigh University.

Dimitrios I. Diamantaras, Associate Professor, Department of Economics; PhD, University of Rochester.

Nah D. Dove, Assistant Professor, Department of Africology and African American Studies; PhD, State University of New York.

Deborah A. G. Drabick, Associate Professor, Department of Psychology and Neuroscience; PhD, State University of New York at Stony Brook.

Douglas Duckworth, Professor, Department of Religion; PhD, University of Virginia.

Amelia Duffy-Tumasz, Assistant Professor of Instruction, Department of Geography and Urban Studies; PhD, Rutgers University-New Brunswick.

Jaime Duran, Associate Professor of Instruction, Department of Spanish and Portuguese; PhD, Temple University.

Lauren Ellman, Professor, Department of Psychology and Neuroscience; PhD, University of California Los Angeles.

Jamie J. Fader, Associate Professor, Department of Criminal Justice; PhD, University of Pennsylvania.

Mohsen Fardmanesh, Associate Professor, Department of Economics; PhD, Yale University.

Lauren A. Farmer, Assistant Professor of Instruction, Department of Political Science; PhD, Temple University.

Paul Farnsworth, Professor, Department of Anthropology; PhD, University of California Los Angeles.

Robert L. Fauber Jr., Associate Professor, Department of Psychology and Neuroscience; PhD, University of Georgia.

Robert Faunce, Assistant Professor of Instruction, Department of First Year Writing Program; PhD, Graduate Center, City University of New York.

Barbara Ferman, Professor, Department of Political Science; PhD, Brandeis University.

Kenneth Finkel, Professor of Instruction, Department of History; MA, Temple University.

K. Orfeo Fioretos, Professor, Department of Political Science; PhD, Columbia University.

Alexa Firat, Assistant Professor of Instruction, Department of Asian and Middle Eastern Languages and Studies; PhD, University of Pennsylvania.

Ariane Fischer, Professor of Instruction, Department of Intellectual Heritage Program; PhD, George Washington University.

Ifetayo M. Flannery, Assistant Professor, Department of Africology and African American Studies; PhD, Temple University.

Fernando Fonseca Pacheco, Assistant Professor of Instruction, Department of Spanish and Portuguese; PhD, The Pennsylvania State University.

Talissa Ford, Associate Professor, Department of English; PhD, University of California Berkeley.

Joseph S. Foster, Assistant Professor of Instruction, Department of Intellectual Heritage Program; PhD, Temple University.

Amy L. Friedman, Professor of Instruction, Department of First Year Writing Program; PhD, University of London.

Joseph Friedman, Professor, Department of Economics; PhD, University of California Berkeley.

Justin I. Fugo, Assistant Professor of Instruction, Department of Intellectual Heritage Program; PhD, Temple University.

Yukari Fujiwara, Instructor, Department of Asian and Middle Eastern Languages and Studies; MA, Eastern Michigan University.

Akim Gabriel, Instructor, Department of French, German, Italian and Slavic; MA, Temple University.

Margaret M. Foley, Associate Professor of Instruction, Department of Health Services Administration and Policy; PhD, Temple University.

Anne Frankel, Associate Professor of Instruction, Department of Social and Behavioral Sciences; PhD, Florida International University.

Kathryn Fritz, Assistant Professor of Instruction, Department of Kinesiology; PhD, University of Georgia.

Felicidad M. Garcia, Assistant Professor of Instruction, Department of Communication Sciences and Disorders; MS, Columbia University.

Lina-Maria Garcia, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Temple University.

Heather M. Gardiner, Associate Professor, Department of Social and Behavioral Sciences; PhD, State University of New York at Buffalo.

Jeffrey Gehris, Associate Professor of Instruction, Department of Kinesiology; PhD, Temple University.

Catherine Gibbs, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; BSN, Thomas Jefferson University.

Letitia Gill Gembala, Associate Professor of Instruction, Department of Nursing; DNP, Duquesne University.

Susan Gresko, Assistant Professor of Instruction, Department of Nursing; MSN, University of Pennsylvania.

Matthew Hall, Assistant Professor, Department of Communication Sciences and Disorders; PhD, University of California San Diego.

Inkyu Han, Associate Professor, Department of Epidemiology and Biostatistics; PhD, Rutgers, The State University of New Jersey.

Joelle D. Hargraves, Associate Professor of Instruction, Department of Nursing; DNP, Chatham University.

Kyle Harris, Instructor, Department of Kinesiology; MS, Temple University.

Chantelle Hart, Professor, Department of Social and Behavioral Sciences; PhD, Case Western Reserve University.

Jonathan M. Hartmann, Instructor, Department of Communication Sciences and Disorders; MA, Gallaudet University.

DaVonti' DeAngelo Haynes, Assistant Professor of Instruction, Department of Social Work; PhD, The Ohio State University.

Kathryn A. Helland, Clinical Instructor, Department of Communication Sciences and Disorders; MS, William Paterson University of New Jersey.

Elizabeth Heller Murray, Assistant Professor, Department of Communication Sciences and Disorders; PhD, Boston University.

Kaitlyn Heron, Clinical Instructor, Department of Nursing; MSN, Drexel University.

Beth Heuer, Associate Professor of Instruction, Department of Nursing; DNP, Robert Morris University.

Shivayogi V. Hiremath, Assistant Professor, Department of Health and Rehabilitation Sciences; PhD, University of Pittsburgh.

Ilene L. Hollin, Assistant Professor, Department of Health Services Administration and Policy; PhD, Johns Hopkins University.

Cheryl A. Hyde, Associate Professor, Department of Social Work; PhD, University of Michigan.

Jennifer K. Ibrahim, Associate Professor, Department of Health Services Administration and Policy; PhD, University of California Berkeley.

Graciela Jaschek, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, University of Maryland.

Laura Johnson, Assistant Professor, Department of Social Work; PhD, Rutgers, The State University of New Jersey.

Lauren Gabrielle Johnson, Assistant Professor of Instruction, Department of Nursing; PhD, University of Pennsylvania.

Lisa A. Johnson, Associate Professor of Instruction, Department of Nursing; DrNP, Drexel University.

Resa M. Jones, Associate Professor, Department of Epidemiology and Biostatistics; PhD, University of Minnesota.

Hoda Jradi, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, The Ohio State University.

Zebulon V. Kendrick, Professor, Department of Kinesiology; PhD, Temple University.

Emily Keshner, Professor Emerita, Department of Health and Rehabilitation Sciences; EdD, Columbia University.

Julia Kobulsky, Assistant Professor, Department of Social Work; PhD, Case Western Reserve University.

Sara J. Kovacs, Associate Professor of Instruction, Department of Kinesiology; PhD, University of Pittsburgh.

Rena A. Krakow, Associate Professor, Department of Communication Sciences and Disorders; PhD, Yale University.

Erin R. Kulick, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, Columbia University.

Joseph A. Kumi, Instructor, Department of Social Work; MSW, Florida State University.

Yanda Lang, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Western Michigan University.

Margorie H. Lehigh, Clinical Instructor, Department of Nursing; MSN, American Sentinel University.

Stephen J. Lepore, Professor, Department of Social and Behavioral Sciences; PhD, University of California Irvine.

Beth A. Levine, Instructor, Department of Communication Sciences and Disorders; MS, Boston University.

Wenxue Lin, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, The Pennsylvania State University.

Barbara A. Little, Clinical Instructor, Department of Nursing; MS, La Salle University.

Jialiang Liu, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, University of North Texas.

Amy Lynch, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of Delaware.

Raven E. Lynch, Assistant Professor of Instruction, Department of Social Work; PhD, The Ohio State University.

Edwin Maas, Associate Professor, Department of Communication Sciences and Disorders; PhD, San Diego State University.

Jamie Mansell, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

Nadine Martin, Laura H. Carnell Professor, Department of Communication Sciences and Disorders; PhD, Temple University.

Bettyanne Matase, Assistant Professor, Department of Nursing; DNP, Walden University.

Karen McBride, Assistant Professor of Instruction, Department of Health Services Administration and Policy; MS, Philadelphia University.

Philip McCallion, Professor, Department of Social Work; PhD, University at Albany, State University of New York.

Bryan P. McCormick, Professor, Department of Health and Rehabilitation Sciences; PhD, Clemson University.

Jane McDevitt, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

Brian D. McHugh, Associate Professor, Department of Communication Sciences and Disorders; PhD, University of California Los Angeles.

Gabriella M. McLoughlin, Assistant Professor, Department of Kinesiology; PhD, University of Illinois at Urbana-Champaign.

Nicholas S. Mirabito, Instructor, Department of Kinesiology; MS, Temple University.

C. Daniel Moser, Assistant Professor of Instruction, Department of Kinesiology; PhD, Temple University.

Pricila Mullachery, Assistant Professor, Department of Health Services Administration and Policy; PhD, New York University.

Kavya Sukumaran Nair, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of Florida.

Elizabeth Neil, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Indiana State University.

Bernie Sue Newman, Associate Professor, Department of Social Work; PhD, University of Pittsburgh.

Emeka Nwadiora, Associate Professor, Department of Social Work; JD, Hofstra University School of Law.

Michael C. O'Hara, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Temple University.

Lindsey Oakes, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, University of North Carolina at Greensboro.

Rebecca A. Operacz, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, University of Colorado and Health Sciences Center.

Kimberly Pachik, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Chatham University.

Aimee J. Palumbo, Associate Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Drexel University.

Carolyn Parks, Associate Professor of Instruction, Department of Social and Behavioral Sciences; PhD, University of Tennessee at Knoxville.

Paige Pastalove, Assistant Professor of Instruction, Department of Communication Sciences and Disorders; AuD, West Virginia University.

Jay S. Patel, Assistant Professor, Department of Health Services Administration and Policy; PhD, Indiana University - Purdue University Indianapolis.

Elizabeth A. Pfeiffer, Associate Professor, Department of Health and Rehabilitation Sciences; PhD, Nova Southeastern University.

Jacqueline Phillips, Associate Professor of Instruction, Department of Kinesiology; PhD, Temple University.

Heather Porter, Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

Kseniia Power, Assistant Professor of Instruction, Department of Kinesiology; PhD, Temple University.

Erica A. Pugh, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; OTD, Temple University.

Gillian A. Rai, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DOT, Temple University.

Laura Rauth, Clinical Instructor, Department of Nursing; MSN, Yale University.

Jodi Reich, Associate Professor of Instruction, Department of Communication Sciences and Disorders; PhD, Yale University.

James J. Reilly, Professor, Department of Communication Sciences and Disorders; PhD, University of Pennsylvania.

Daniel M. Rosney, Assistant Professor of Instruction, Department of Kinesiology; PhD, State University of New York at Buffalo.

Nancy L. Rothman, Professor, Department of Nursing; EdD, Temple University.

Abby Rudolph, Associate Professor, Department of Epidemiology and Biostatistics; PhD, Johns Hopkins University.

Anne C. Russ, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

Mark Salzer, Professor, Department of Social and Behavioral Sciences; PhD, University of Illinois at Urbana-Champaign.

Mayra C. Santiago, Associate Professor, Department of Kinesiology; PhD, University of Minnesota.

David B. Sarwer, Professor, Department of Social and Behavioral Sciences; PhD, Loyola University Chicago.

Michelle C. Scarpulla, Instructor, Department of Social and Behavioral Sciences; MPH, Temple University.

Krista Schroeder, Assistant Professor, Department of Nursing; PhD, Columbia University.

Brittany Schuler, Assistant Professor, Department of Social Work; PhD, University of Maryland Baltimore.

Leah M. Schumacher, Assistant Professor, Department of Kinesiology; PhD, Drexel University.

Jack V. Sears, Assistant Professor of Instruction, Department of Kinesiology; PhD, University of Texas at Austin.

Jay S. Segal, Professor, Department of Social and Behavioral Sciences; PhD, The Ohio State University.

Jing Shen, Assistant Professor, Department of Communication Sciences and Disorders; PhD, University of California San Diego.

Laura Siminoff, Professor, Department of Social and Behavioral Sciences; PhD, Johns Hopkins University.

Laura Sinko, Assistant Professor, Department of Nursing; PhD, University of Michigan.

Melody J. Slashinski, Associate Professor of Instruction, Department of Social and Behavioral Sciences; PhD, University of Texas.

Alissa Smethers, Assistant Professor, Department of Kinesiology; PhD, The Pennsylvania State University.

Brandon S. Snead, Instructor, Department of Health and Rehabilitation Sciences; MS, Temple University.

Gretchen A. Snethen, Associate Professor, Department of Health and Rehabilitation Sciences; PhD, Indiana University.

Tulay G. Soylu, Assistant Professor of Instruction, Department of Health Services Administration and Policy; PhD, George Mason University.

Alesya Starayeva, Instructor, Department of Communication Sciences and Disorders; BA, Gallaudet University.

Elizabeth Steele, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, Arcadia University.

Gerry A. Stefanatos, Associate Professor, Department of Communication Sciences and Disorders; DPhil, Oxford University.

Ashley E. Stewart, Assistant Professor of Instruction, Department of Social Work; PhD, Ohio State University.

Amy Stolarick, Instructor, Department of Nursing; MSN, Wilmington University.

Mark Stoutenberg, Associate Professor, Department of Kinesiology; PhD, University of Miami.

Chang Su, Assistant Professor, Department of Health Services Administration and Policy; PhD, Xi'an Jiaotong University.

Gabriel Tajeu, Assistant Professor, Department of Health Services Administration and Policy; DrPH, University of Alabama at Birmingham.

Monica Taylor, Associate Professor of Instruction, Department of Kinesiology; PhD, University of Pittsburgh.

Brenda Teichman, Clinical Instructor, Department of Nursing; MS, Western Governors University.

Elizabeth Tenison, Assistant Professor of Instruction, Department of Kinesiology; PhD, Northern Illinois University.

Mary Terhaar, Professor, Department of Nursing; PhD, The Catholic University of America.

Elizabeth Thomas, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of Nebraska-Lincoln.

Christopher Thompson, Assistant Professor, Department of Health and Rehabilitation Sciences; PhD, University of Illinois.

Ryan T. Tierney, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Temple University.

Jasmine M. Tooles, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; DPT, University of Delaware.

Gina Tripicchio, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of North Carolina at Chapel Hill.

Elizabeth Van Nostrand, Associate Professor, Department of Health Services Administration and Policy; JD, Tulane University.

Gena B. Vargas, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Clemson University.

Aurora J. Verlin, Instructor, Department of Health and Rehabilitation Sciences; MS, Temple University.

Carolina Villamil Grest, Assistant Professor, Department of Social Work; PhD, University of Southern California.

Christopher Wheldon, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of South Florida.

Kirsten Wiens, Assistant Professor, Department of Epidemiology and Biostatistics; PhD, New York University.

Robin T. Wilson, Associate Professor, Department of Epidemiology and Biostatistics; PhD, University of Iowa.

Caitlin N. Wolak, Instructor, Department of Social and Behavioral Sciences; MPH, Temple University.

Andrea Wolf, Associate Professor of Instruction, Department of Nursing; DNP, Case Western Reserve University.

W. Geoffrey Wright, Professor, Department of Health and Rehabilitation Sciences; PhD, Brandeis University.

Huanmei Wu, Professor, Department of Health Services Administration and Policy; PhD, Northeastern University.

Jingwei Wu, Associate Professor of Instruction, Department of Epidemiology and Biostatistics; PhD, Indiana University.

Andrew Yannaccone, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences; PhD, Virginia Commonwealth University School of Medicine.

Recai Yucef, Professor, Department of Epidemiology and Biostatistics; PhD, The Pennsylvania State University.

Dana Zeuggin, Instructor, Department of Communication Sciences and Disorders; MS, Bloomsburg University.

Yaara Zisman-Ilani, Assistant Professor, Department of Social and Behavioral Sciences; PhD, University of Haifa.

College of Science and Technology

Stephen Blair Hedges, Laura H. Carnell Professor, Department of Biology; PhD, University of Maryland.

Meredith M. Hegg, Associate Professor of Instruction, Department of Mathematics; PhD, Temple University.

Matthew Richard Helmus, Assistant Professor, Department of Biology; PhD, University of Wisconsin-Madison.

Emanuel B. Hey, Professor, Department of Biology; PhD, State University of New York at Stony Brook.

Tonia Hsieh, Associate Professor, Department of Biology; PhD, Harvard University.

Anthony Hughes, Professor of Instruction, Department of Computer and Information Sciences; PhD, University of Illinois.

Maria Iavarone, Professor, Department of Physics; PhD, University of Napoli Federico II.

Mihaela Ignatova, Selma Lee Bloch Brown Assistant Professor in Mathematics, Department of Mathematics; PhD, University of Southern California.

Susan A. Jansen-Varnum, Professor, Department of Chemistry; PhD, University of Missouri-St. Louis.

Serge Jasmin, Associate Professor of Instruction, Department of Chemistry; BS, Temple University.

Rob Jennings, Assistant Professor of Instruction, Department of Biology; PhD, Massachusetts Institute of Technology.

Donald Jones, Research Assistant Professor, Department of Physics; PhD, University of Virginia.

Kelli Shepard El Jones, Instructor, Department of Mathematics; MS, Temple University.

Krishna Kant, Professor, Department of Computer and Information Sciences; PhD, University of Texas at Dallas.

Gurpreet Kaur, Assistant Professor of Instruction, Department of Biology; PhD, Temple University.

Jaskiran Kaur, Assistant Professor of Instruction, Department of Chemistry; MS, University of Pennsylvania.

Vince Kelly, Associate Professor of Instruction, Department of Computer and Information Sciences; MS, Temple University.

Roy A. Keyer, Professor of Instruction, Department of Chemistry; PhD, University of California Irvine.

Bojeong Kim, Associate Professor, Department of Earth and Environmental Science; PhD, Cornell University.

Daniel Kim, Assistant Professor, Department of Chemistry; PhD, University of California.

Isaac Klapper, Professor, Department of Mathematics; PhD, New York University Courant Institute of Mathematical Sciences.

Michael L. Klein, Professor, Department of Chemistry; PhD, University of Bristol.

Dominique M. Kliger, Assistant Professor of Practice, Department of Computer and Information Sciences; PhD, Temple University.

James F. Korsh, Professor Emeritus, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

Svetlana Kotochigova, Research Professor, Department of Physics; PhD, St. Petersburg State University.

Rob J. Kulathinal, Associate Professor, Department of Biology; PhD, McMaster University.

Sudhir Kumar, Laura H. Carnell Professor, Department of Biology; PhD, The Pennsylvania State University.

Eugene Kwatny, Professor, Department of Computer and Information Sciences; PhD, Drexel University.

Sally Kyvernitis, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, Indiana University.

Paul S. LaFollette Jr., Associate Professor, Department of Computer and Information Sciences; MD, Temple University.

Jaclyn Lang, Assistant Professor, Department of Mathematics; PhD, University of California Los Angeles.

Longin Jan Latecki, Professor, Department of Computer and Information Sciences; PhD, University of Hamburg.

Dominic Letarte, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Ecole Polytechnique Montreal.

Edward S. Letzter, Professor, Department of Mathematics; PhD, University of Washington.

Robert J. Levis, Professor, Department of Chemistry; PhD, The Pennsylvania State University.

Ronald M. Levy, Laura H. Carnell Professor, Department of Chemistry; PhD, Harvard University.

Stephanie Lewkiewicz, Research Assistant Professor, Department of Mathematics; PhD, University of California Los Angeles.

Xiuqi Li, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Florida Atlantic University.

David A. Liberles, Professor, Department of Biology; PhD, California Institute of Technology.

Chyanlong Lin, Associate Professor, Department of Physics; PhD, Temple University.

Maria E. Lorenz, Professor of Instruction, Department of Mathematics; PhD, University of Southern California.

Martin W. Lorenz, Professor, Department of Mathematics; PhD, Universität Giessen.

Sheryl L. Love, Associate Professor of Instruction, Department of Biology; PhD, Temple University.

Mia Luehrmann, Associate Professor of Instruction, Department of Physics; PhD, University of Illinois at Urbana-Champaign.

Jay Lunden, Assistant Professor of Instruction, Department of Biology; PhD, Temple University.

A. Marjatta Lyyra, Professor, Department of Physics; PhD, University of Stockholm.

Marcella Macaluso, Associate Professor of Instruction, Department of Biology; PhD, University of Palermo.

Stephen MacNeil, Assistant Professor, Department of Computer and Information Sciences; PhD, University of North Carolina at Charlotte.

Carol M. Manhart, Assistant Professor, Department of Chemistry; PhD, University of Colorado Boulder.

C. Jeffrey Martoff, Professor, Department of Physics; PhD, University of California Berkeley.

Spiridoula Matsika, Professor, Department of Chemistry; PhD, The Ohio State University.

Kathleen E. Mc Kinley, Instructor of Practice, Department of Mathematics; MS, Saint Joseph's University.

Rose Marie McGinnis, Assistant Professor of Instruction, Department of Computer and Information Sciences; MBA, Temple University.

Michelle Hedwig McGowan, Associate Professor of Instruction, Department of Biology; PhD, Rutgers University.

George Mehler, Assistant Professor of Practice, Department of Biology; PhD, Temple University.

Gerardo A. Mendoza, Professor, Department of Mathematics; PhD, Massachusetts Institute of Technology.

Andreas Metz, Professor, Department of Physics; PhD, Institut Für Kernphysik Universität Mainz.

Olena Mishchuk, Assistant Professor of Instruction, Department of Biology; PhD, Yuriy Fedkovych Chernivtsi National University.

Irina Mitrea, Laura H. Carnell Professor, Department of Mathematics; PhD, University of Minnesota.

Sayaka Miura, Research Associate Professor, Department of Biology; PhD, The Pennsylvania State University.

Anna Moore, Assistant Professor, Department of Biology; PhD, University of Connecticut Health Center.

Andrea Morrione, Research Associate Professor, Department of Biology; PhD, University of Milan.

Karl Morris, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Florida International University.

Atsuhiko Muto, Associate Professor, Department of Earth and Environmental Science; PhD, University of Colorado.

Manal A. Nael, Research Assistant Professor, Department of Chemistry; PhD, University of Mississippi.

James Napolitano, Professor, Department of Physics; PhD, Stanford University.

Frank E. Nelson, Assistant Professor of Instruction, Department of Biology; PhD, Oregon State University.

Matthew Newby, Assistant Professor of Instruction, Department of Physics; PhD, Rensselaer Polytechnic Institute.

Allen W. Nicholson, Professor, Department of Biology; PhD, University of Pennsylvania.

Rhonda H. Nicholson, Associate Professor of Instruction, Department of Biology; PhD, Wayne State University.

John Noel, Associate Professor of Instruction, Department of Physics; PhD, Texas A and M University.

Jonathan Nyquist, Professor, Department of Earth and Environmental Science; PhD, University of Wisconsin.

Zoran Obradovic, Laura H. Carnell Professor, Department of Computer and Information Sciences; PhD, The Pennsylvania State University.

Uloma Opara-Osuoha, Assistant Professor of Instruction, Department of Biology; PhD, University of Ibadan.

Michael Opferman, Assistant Professor of Instruction, Department of Physics; PhD, University of Pittsburgh.

Charles Osborne, Associate Professor of Instruction, Department of Mathematics; PhD, Temple University.

Maria A. Pacheco, Research Assistant Professor, Department of Biology; PhD, Universidad Simón Bolívar.

Karen B. Palter, Associate Professor Emerita, Department of Biology; PhD, Princeton University.

Alex Pang, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, North Carolina State University.

Ellen Panofsky, Associate Professor of Instruction, Department of Mathematics; PhD, Lehigh University.

Christopher Pascucci, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, University of Pennsylvania.

Mohit Patel, Assistant Professor, Department of Chemistry; PhD, Temple University.

John A. Paulos, Professor, Department of Mathematics; PhD, University of Wisconsin.

Jamie Payton, Professor, Department of Computer and Information Sciences; DSc, Washington University.

Simona Percec, Research Professor, Department of Chemistry; PhD, Institute of Macromolecular Chemistry.

John P. Perdew, Laura H. Carnell Professor, Department of Physics; PhD, Cornell University.

Claudia Pine-Simon, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, University of Pennsylvania.

Athanasia Polychronopoulou, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Temple University.

Sergei L. Kosakovsky Pond, Professor, Department of Biology; PhD, University of Arizona.

Edwin F. Posada, Research Assistant Professor, Department of Chemistry; PhD, Temple University.

Matthew Posik, Research Associate Professor, Department of Physics; PhD, Temple University.

Sean Gillian Queisser, Associate Professor, Department of Mathematics; PhD, Ruprecht-Karls University of Heidelberg.

Daniele Ramella, Associate Professor of Instruction, Department of Chemistry; PhD, Boston University.

Paul Rapoport, Research Assistant Professor, Department of Mathematics; PhD, University of Illinois at Chicago.

Robert Rarig, Associate Professor of Instruction, Department of Chemistry; PhD, University of Michigan.

Sujith Ravi, Associate Professor, Department of Earth and Environmental Science; PhD, University of Virginia.

Brian Rider, Professor, Department of Mathematics; PhD, New York University Courant Institute of Mathematical Sciences.

Peter S. Riseborough, Professor, Department of Physics; PhD, Imperial College London.

Igor Rivin, Professor, Department of Mathematics; PhD, Princeton University.

Dmitri Romanov, Research Professor, Department of Physics; PhD, Novosibirsk Institute of Semiconductor Physics, USSR Academy of Sciences.

Andrew B. Rosen, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Georgia State University.

Kenneth Ruff, Assistant Professor of Practice, Department of Biology; PhD, Temple University.

Elisabeth Russell-McKenzie, Assistant Professor of Practice, Department of Chemistry; PhD, Temple University.

Dumitru D. Rusu, Associate Professor of Instruction, Department of Mathematics; PhD, University of Guelph.

Adrienn Ruzsinszky Perdew, Associate Professor, Department of Physics; PhD, Budapest University of Technology and Economics.

Robert W. Sanders, Professor, Department of Biology; PhD, University of Georgia.

Christian E. Schafmeister, Professor, Department of Chemistry; PhD, University of California San Francisco.

Benjamin Seibold, Professor, Department of Mathematics; PhD, University of Kaiserslautern.

Cinzia Sevignani, Associate Professor of Instruction, Department of Biology; PhD, University of Modena.

Brent Sewall, Associate Professor, Department of Biology; PhD, University of California Davis.

Joel B. Sheffield, Professor Emeritus, Department of Biology; PhD, University of Chicago.

Xinghua Mindy Shi, Associate Professor, Department of Computer and Information Sciences; PhD, University of Chicago.

Yuan Justin Shi, Associate Professor, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

Jingyang Shu, Research Assistant Professor, Department of Mathematics; PhD, University of California Davis.

Scott M. Sieburth, Professor Emeritus, Department of Chemistry; PhD, Harvard University.

Jeromy Sivek, Associate Professor of Instruction, Department of Mathematics; PhD, University of Pittsburgh.

Jonathan Smith, Associate Professor of Instruction, Department of Chemistry; PhD, Wesleyan University.

Gregory S. Smutzer, Associate Professor of Instruction, Department of Biology; PhD, State University of New York at Buffalo.

Richard Souvenir, Professor, Department of Computer and Information Sciences; DSc, Washington University.

Francis C. Spano, Professor, Department of Chemistry; PhD, Princeton University.

Nikolaos Sparveris, Associate Professor, Department of Physics; PhD, University of Athens.

Rachel Spigler, Associate Professor, Department of Biology; PhD, University of Georgia.

Robert J. Stanley, Professor, Department of Chemistry; PhD, The Pennsylvania State University.

Matthew Stover, Associate Professor, Department of Mathematics; PhD, University of Texas at Austin.

Daniel R. Strongin, Professor, Department of Chemistry; PhD, University of California Berkeley.

Deborah Stull, Associate Professor of Practice, Department of Biology; PhD, Yale University.

Ang Sun, Research Professor, Department of Biology; PhD, Sbarro Institute for Cancer Research and Molecular Medicine.

Yugang Sun, Professor, Department of Chemistry; PhD, University of Science and Technology of China.

Bernd Surrow, Professor, Department of Physics; PhD, University of Hamburg.

Daniel B. Szyld, Professor, Department of Mathematics; PhD, New York University.

Chiu Chiang Tan, Associate Professor, Department of Computer and Information Sciences; PhD, College of William and Mary.

Hong Tang, Research Assistant Professor, Department of Physics; PhD, Northwestern Polytechnical University.

Rongjia Tao, Professor, Department of Physics; PhD, Columbia University.

Samuel J. Taylor, Associate Professor, Department of Mathematics; PhD, University of Texas at Austin.

Dennis O. Terry Jr., Associate Professor, Department of Earth and Environmental Science; PhD, University of Nebraska.

Jesse Thornburg, Assistant Professor of Instruction, Department of Earth and Environmental Science; MS, Temple University.

Laura Toran, Professor, Department of Earth and Environmental Science; PhD, University of Wisconsin.

Darius H. Torchinsky, Assistant Professor, Department of Physics; PhD, Massachusetts Institute of Technology.

Georgia Triantafillou, Professor, Department of Mathematics; PhD, University of Bonn, Germany.

Tsvetelin D. Tsankov, Associate Professor of Instruction, Department of Physics; PhD, Drexel University.

Allison Tumarkin-Deratzian, Professor of Instruction, Department of Earth and Environmental Science; PhD, University of Pennsylvania.

Shivaiah Vaddypally, Research Assistant Professor, Department of Chemistry; PhD, Hyderabad University.

Ann M. Valentine, Professor, Department of Chemistry; PhD, Massachusetts Institute of Technology.

Elisa Ventura, Research Assistant Professor, Department of Biology; PhD, Temple University.

Vladimir Visnjic, Associate Professor of Instruction, Department of Mathematics; PhD, University of Bonn, Germany.

Evelyn Vleck, Assistant Professor of Instruction, Department of Biology; MA, William Paterson College.

Vincent Voelz, Associate Professor, Department of Chemistry; PhD, University of California San Francisco.

Slobodan Vucetic, Professor, Department of Computer and Information Sciences; PhD, Washington State University.

Anduo Wang, Assistant Professor, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

Charles Wang, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Wayne State University.

Pei Wang, Associate Professor of Instruction, Department of Computer and Information Sciences; PhD, Indiana University.

Rongsheng Wang, Associate Professor, Department of Chemistry; PhD, Washington University in St. Louis.

Yan Wang, Assistant Professor, Department of Computer and Information Sciences; PhD, Stevens Institute of Technology.

Yu Wang, Professor, Department of Computer and Information Sciences; PhD, Illinois Institute of Technology.

Richard B. Waring, Associate Professor, Department of Biology; PhD, Essex University.

Sarah Elizabeth Wengryniuk, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry; PhD, Duke University.

Vladimira V. Wilent, Associate Professor of Instruction, Department of Chemistry; PhD, University of Pennsylvania.

Katherine A. Willets, Professor, Department of Chemistry; PhD, Stanford University.

Jie Wu, Laura H. Carnell Professor, Department of Computer and Information Sciences; PhD, Florida Atlantic University.

Wei Wu, Assistant Professor of Instruction, Department of Mathematics; PhD, University of Leuven.

Xifan Wu, Professor, Department of Physics; PhD, Rutgers University.

Stephanie L. Wunder, Professor, Department of Chemistry; PhD, University of Massachusetts.

Xiaoxing Xi, Laura H. Carnell Professor, Department of Physics; PhD, Peking University and Institute of Physics.

Xiaojun Xu, Research Assistant Professor, Department of Physics; PhD, Chinese Academy of Sciences.

Qimin Yan, Assistant Professor, Department of Physics; PhD, University of California Santa Barbara.

Wei-Shih Yang, Professor, Department of Mathematics; PhD, Cornell University.

Weidong Yang, Professor, Department of Biology; PhD, Fudan University.

Mengsha Yao, Research Assistant Professor, Department of Mathematics; PhD, University of Southern California.

Atila Yilmaz, Associate Professor, Department of Mathematics; PhD, New York University.

Tan Yuen, Associate Professor, Department of Physics; PhD, Temple University.

Michael J. Zdilla, Professor, Department of Chemistry; PhD, Princeton University.

Bailin Zhang, Research Assistant Professor, Department of Biology; PhD, Dalian Institute of Chemical Physics, Chinese Academy of Sciences.

Kai Zhang, Associate Professor, Department of Computer and Information Sciences; PhD, Hong Kong University of Science and Technology.

Mi Zhao, Research Assistant Professor, Department of Chemistry; PhD, South China Sea Institute of Oceanology, Chinese Academy of Sciences.

Fox School of Business and Management

Aleksi Aaltonen, Assistant Professor, Department of Management Information Systems; PhD, London School of Economics.

Edoardo Airoldi, Professor, Department of Statistics, Operations, and Data Science; PhD, Carnegie Mellon University.

Joan Allatta, Associate Professor of Instruction, Department of Management; PhD, University of Pennsylvania.

Andrew T. Allmond, Assistant Professor of Practice, Department of Marketing; MJ, Temple University.

Ronald C. Anderson, Professor, Department of Finance; PhD, Texas A and M University.

Lynne M. Andersson, Associate Professor, Department of Management; PhD, University of North Carolina at Chapel Hill.

Cynthia R. Axelrod, Associate Professor of Practice, Department of Finance; MBA, Drexel University.

Sezgin Ayabakan, Assistant Professor, Department of Management Information Systems; PhD, University of Texas at Dallas.

Xue Bai, Professor, Department of Statistics, Operations, and Data Science; PhD, Carnegie Mellon University.

Gurdip Bakshi, Marvin Wachman Professor, Department of Finance; PhD, University of Wisconsin-Madison.

Xiaohui Gao Bakshi, Research Associate Professor, Department of Finance; PhD, University of Florida.

Steven Balsam, Professor, Department of Accounting; PhD, City University of New York.

Rajiv Banker, Professor and the Stanley Merves Chair in Accounting, Information Technology and Management, Department of Accounting; DBA, Harvard University.

Sudipta Basu, Professor, Department of Accounting; PhD, University of Rochester.

Konstantin Bauman, Assistant Professor, Department of Management Information Systems; PhD, Moscow State University.

Tawanda Benesi, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, University of Georgia.

Gary J. Blau, Professor, Department of Management; PhD, University of Cincinnati.

Misty P. Blessley, Associate Professor of Instruction, Department of Marketing; PhD, Temple University.

Jeffrey R. Boles, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of California Berkeley.

Lawrence Brown, Seymour Wolfbein Distinguished Research Professor, Department of Accounting; PhD, University of Rochester.

Lauren N. Burns, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, Temple University.

Dmitri Byzalov, Associate Professor, Department of Accounting; PhD, Harvard University.

Dwight Carey, Associate Professor of Practice, Department of Management; BS, Farleigh Dickinson University at Madison.

Debra Casey, Associate Professor of Instruction, Department of Management; PhD, Rutgers University-New Brunswick.

Steven J. Casper, Associate Professor of Instruction, Department of Finance; PhD, Temple University.

Yiwei Chen, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, Massachusetts Institute of Technology.

Pallavi Chitturi, Research Professor, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Austin.

J. Jay Choi, Laura H. Carnell Professor, Department of Finance; PhD, New York University.

Teresa Gill Cirillo, Assistant Professor of Practice, Department of Marketing; MA, Rowan University.

Benjamin Collier, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Kentucky.

Mary Conran, Professor of Practice, Department of Marketing; MBA, Temple University.

Cheri Cutler, Assistant Professor of Practice, Department of Marketing; MS, Temple University.

John R. Deckop, Professor, Department of Management; PhD, University of Minnesota.

C. Anthony Di Benedetto, Professor, Department of Marketing; PhD, McGill University.

Denise Donaghue, Assistant Professor of Practice, Department of Marketing; MA, Immaculata University.

Yuexiao Dong, Associate Professor, Department of Statistics, Operations, and Data Science; PhD, The Pennsylvania State University.

John V. Dormuth, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MS, Boston University.

Martin J. Doyle, Associate Professor of Practice, Department of Management Information Systems; MS, University of Phoenix.

Rob B. Drennan, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Pennsylvania.

Randy E. Dumm, Research Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Georgia.

Leora F. Eisenstadt, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, New York University School of Law.

Eric M. Eisenstein, Research Professor, Department of Statistics, Operations, and Data Science; PhD, University of Pennsylvania.

Philip English, Research Associate Professor, Department of Finance; PhD, University of South Carolina.

Ming Fang, Assistant Professor of Instruction, Department of Finance; PhD, Yale University.

Susan Feinberg, Associate Professor, Department of Management; PhD, University of Minnesota.

Laurie J. Fitzpatrick, Assistant Professor of Practice, Department of Marketing; MFA, Temple University.

Thomas T. Fung, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; MS, University of Pennsylvania.

Deanna Geddes, Professor, Department of Management; PhD, Purdue University.

Katherine W. Gerst, Associate Professor of Practice, Department of Marketing; MBA, Temple University.

Melissa Glenn, Associate Professor of Practice, Department of Marketing; MA, La Salle University.

Daniel Goldberg, Associate Professor of Instruction, Department of Management; EdD, Delaware Valley University.

Enrique A. Gomez, Assistant Professor, Department of Accounting; PhD, University of Georgia.

Elizabeth A. Gordon, Professor, Department of Accounting; PhD, Columbia University.

Kelly A. Grace, Assistant Professor of Instruction, Department of Management; PhD, University of Florida.

Martin Grace, Harry Cochran Professor in Risk, Insurance and Healthcare Management, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Florida.

Curtis J. Gregory, Assistant Professor of Instruction, Department of Management; PhD, Walden University.

Michael Guglielmo, Associate Professor of Practice, Department of Management; MBA, Temple University.

Bertrand Guillotin, Associate Professor of Instruction, Department of Management; PhD, Grenoble Ecole de Management.

Terry Ann Halbert, Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, Rutgers University.

Crystal M. Harold, Associate Professor, Department of Management; PhD, George Mason University.

James D. Harrington, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MBA, University of Georgia.

Theodore L. Hill III, Professor of Instruction, Department of Management; PhD, Temple University.

James Hilliard, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Connecticut.

Samuel D. Hodge Jr., Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, Temple University.

Brian C. Holtz, Associate Professor, Department of Management; PhD, George Mason University.

Leila Hosseini, Assistant Professor, Department of Management Information Systems; PhD, University of Texas at Dallas.

Michael Hubbel, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MBA, College of Insurance.

Michael J. Hughes, Assistant Professor of Practice, Department of Marketing; MBA, Temple University.

Thomas Intocchia, Assistant Professor of Practice, Department of Finance; MBA, Regis University.

Daniel Isaacs, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; JD, Brooklyn Law School.

Alan J. Izenman, Professor, Department of Statistics, Operations, and Data Science; PhD, University of California Berkeley.

Cheng (Jason) Jiang, Associate Professor of Instruction, Department of Finance; PhD, University of California Riverside.

David E. Jones, Associate Professor of Practice and the Jerome Fox Chair in Accounting, Taxation and Financial Strategy, Department of Accounting; PhD, Case Western Reserve University.

Jaehwuen Jung, Assistant Professor, Department of Management Information Systems; PhD, University of Minnesota.

Darin Kapanjie, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; EdD, Temple University.

Vishesh Karwa, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, The Pennsylvania State University.

Roger J. Kashlak, Professor of Instruction, Department of Management; PhD, Temple University.

Howard Keen, Assistant Professor of Instruction, Department of Finance; PhD, Bryn Mawr College.

Thomas Kenny, Assistant Professor of Practice, Department of Finance; MBA, Temple University.

Alan Kerzner, Assistant Professor of Practice, Department of Management; MBA, University of Pennsylvania.

Guangwen Kong, Associate Professor, Department of Statistics, Operations, and Data Science; PhD, University of Southern California.

A. J. Kreimer, Associate Professor of Practice, Department of Accounting; MBA, Temple University.

Jagannathan Krishnan, Professor, Department of Accounting; PhD, The Ohio State University.

Jayanthi Krishnan, Professor, Department of Accounting; PhD, The Ohio State University.

Ravi S. Kudesia, Assistant Professor, Department of Management; PhD, Washington University in St. Louis.

Subodha Kumar, Professor, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Dallas.

Edmund (Ned) L. Lafer, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MD, Sackler School of Medicine.

Sheri L. Lambert, Associate Professor of Practice, Department of Marketing; MBA, University of Michigan.

James M. Lammendola, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; JD, University of Tulsa College of Law.

David Lanter, Assistant Professor of Practice, Department of Management Information Systems; PhD, University of South Carolina.

Amy Lavin, Associate Professor of Practice, Department of Management Information Systems; MBA, Temple University.

Vanessa J. Lawrence, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, University of Pennsylvania School of Law.

Kuang-Yao Lee, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, The Pennsylvania State University.

Yan Li, Associate Professor, Department of Finance; PhD, Cornell University.

Xueming Luo, Charles E. Gilliland, Jr. Professor in Marketing, Department of Marketing; PhD, Louisiana Tech University.

Marco J. Malandra, Associate Professor of Practice, Department of Accounting; MS, Golden Gate University.

Barbara Blundi Manaka, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; PhD, Temple University.

Munir Y. Mandviwalla, Professor, Department of Management Information Systems; PhD, Claremont Graduate University.

Connie Xiangdong Mao, Professor, Department of Finance; PhD, Cornell University.

Marie-Christine Martin, Assistant Professor of Practice, Department of Management Information Systems; MBA, University of Montreal.

Kenichiro McAlinn, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, Duke University.

John A. McClendon, Associate Professor, Department of Management; PhD, University of South Carolina.

Michael McCloskey, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MBA, Drexel University.

James P. Miller, Associate Professor of Practice, Department of Marketing; PhD, University College Cork.

Laurel A. Miller, Associate Professor of Practice, Department of Management Information Systems; MS, Temple University.

Neha Mittal, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, Rutgers University.

Thorsten P. Moenig, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, Georgia State University.

Christopher Monos, Assistant Professor of Practice, Department of Marketing; PhD, Columbia University.

Solon Moreira, Assistant Professor, Department of Management; PhD, Copenhagen Business School.

Shreeram R. Mudambi, Frank M. Speakman Professor of Strategic Management, Department of Management; PhD, Cornell University.

Susan Mudambi, Research Professor, Department of Marketing; PhD, University of Warwick.

Jose Munoz, Professor of Instruction, Department of Accounting; DBA, Anderson University of Indiana.

David Nash, Associate Professor of Practice, Department of Management; MS, University of Pennsylvania.

Nicole Naumoff, Assistant Professor of Practice, Department of Management; MBA, York University, Canada.

Lalitha Naveen, Associate Professor, Department of Finance; PhD, Arizona State University.

Katherine A. Nelson, Assistant Professor of Practice, Department of Management; BA, College of Mount Saint Vincent.

Cory Ng, Associate Professor of Instruction, Department of Accounting; DBA, Wilmington College Delaware.

In-Sue Oh, Professor, Department of Management; PhD, University of Iowa.

Christina M. Owings, Associate Professor of Practice, Department of Marketing; MEd, Lesley College.

Bora Ozkan, Associate Professor of Instruction, Department of Finance; PhD, University of New Orleans.

Min-Seok Pang, Associate Professor, Department of Management Information Systems; PhD, University of Michigan.

Dennis A. Paris, Associate Professor of Practice, Department of Marketing; MBA, Drexel University.

Hyun Jong Park, Assistant Professor, Department of Accounting; PhD, University of Florida.

Arvind Parkhe, Laura H. Carnell Professor, Department of Management; PhD, Temple University.

Tony Petrucci, Associate Professor of Practice, Department of Management; PhD, Regent University.

Michael D. Power, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, Temple University.

Robert S. Pred, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Austin.

Shaojun Qin, Assistant Professor, Department of Marketing; PhD, University of Minnesota.

Yue Qui, Assistant Professor, Department of Finance; PhD, University of Minnesota.

Robert T. Rajewski, Assistant Professor of Practice, Department of Finance; MS, Johns Hopkins University.

Crystal Reeck, Assistant Professor, Department of Marketing; PhD, Duke University.

Sheri Risler, Associate Professor of Practice, Department of Accounting; BS, Boston University.

Michael J. Rivera, Associate Professor of Instruction, Department of Management; PhD, Purdue University.

Samuel Rosen, Assistant Professor, Department of Finance; PhD, University of North Carolina at Chapel Hill.

Edward C. Rosenthal, Professor, Department of Statistics, Operations, and Data Science; PhD, Northwestern University.

Abhishek Roy, Assistant Professor, Department of Statistics, Operations, and Data Science; PhD, University of Texas at Austin.

Donald B. Rubin, Research Professor, Department of Statistics, Operations, and Data Science; PhD, Harvard University.

Oleg Rytchkov, Associate Professor, Department of Finance; PhD, Massachusetts Institute of Technology.

Sanat K. Sarkar, Cyrus C.K. Curtis Professor in Statistics, Department of Statistics, Operations, and Data Science; PhD, Calcutta University.

Todd Schifeling, Assistant Professor, Department of Management; PhD, University of Michigan.

Michael Schirmer, Assistant Professor of Practice, Department of Marketing; DBA, Wilmington College Delaware.

Stuart M. Schmidt, Professor Emeritus, Department of Management; PhD, University of Wisconsin-Madison.

David Schuff, Research Professor, Department of Management Information Systems; PhD, Arizona State University.

Steven E. Sclarow, Assistant Professor of Practice, Department of Management Information Systems; MBA, Temple University.

Jonathan A. Scott, Professor, Department of Finance; PhD, Purdue University.

Anthony Louis Seeton, Assistant Professor of Practice, Department of Management; MBA, Temple University.

Jeremy J. Shafer, Assistant Professor of Practice, Department of Management Information Systems; MS, Temple University.

Tianxiang (Tim) Shi, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Waterloo.

Amir Shoham, Professor of Instruction, Department of Finance; PhD, Ben-Gurion University of the Negev.

Ofra Shoham-Bazel, Research Assistant Professor, Department of Finance; EDBA, Temple University.

Indrajit Sinha, Associate Professor, Department of Marketing; PhD, University of Michigan.

Marcus J. Sobel, Associate Professor Emeritus, Department of Statistics, Operations, and Data Science; PhD, University of California Berkeley.

John A. Soss, Associate Professor of Instruction, Department of Finance; PhD, Northwestern University.

Joydeep Srivastava, Professor, Department of Marketing; PhD, University of Arizona.

Alexander Stein, Assistant Professor of Instruction, Department of Marketing; PhD, Temple University.

Detmar Straub, Research Professor, Department of Management Information Systems; DBA, Indiana University.

Minhui (Barbara) Su, Assistant Professor, Department of Accounting; PhD, University of Toronto.

Jennifer M. Sundstrom-Fitzgerald, Assistant Professor of Practice, Department of Marketing; MBA, Temple University.

Roman S. Szewczuk, Assistant Professor of Practice, Department of Statistics, Operations, and Data Science; MBA, La Salle University.

Chung (Jennifer) Won Tae, Assistant Professor, Department of Management; PhD, London School of Business.

Vivek Tandon, Assistant Professor, Department of Management; PhD, University of Michigan.

Cheng-Yong Tang, Professor, Department of Statistics, Operations, and Data Science; PhD, Iowa State University.

Jason Thatcher, Milton F. Stauffer Professor, Department of Management Information Systems; PhD, Florida State University.

Reza Vafa, Instructor of Practice, Department of Statistics, Operations, and Data Science; MS, West Chester University.

Michael Valenza, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; JD, Temple University.

Vinod Venkatraman, Associate Professor, Department of Marketing; PhD, Duke University.

Krupa S. Viswanathan, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies; PhD, University of Pennsylvania.

Ryan M. Vogel, Associate Professor, Department of Management; PhD, University of Georgia.

Kathleen Voss, Associate Professor of Practice, Department of Management; MS, University of Pittsburgh.

Monica Wadhwa, Associate Professor, Department of Marketing; PhD, Stanford University.

Wei Wang, Assistant Professor, Department of Accounting; PhD, University of Missouri-Columbia.

Yang Wang, Assistant Professor, Department of Marketing; PhD, Rice University.

Sunil Wattal, Professor, Department of Management Information Systems; PhD, Carnegie Mellon University.

William W. S. Wei, Professor, Department of Statistics, Operations, and Data Science; PhD, University of Wisconsin-Madison.

Jean K. Wilcox, Assistant Professor of Practice, Department of Marketing; PhD, University of Chicago.

David J. Wilk, Assistant Professor of Practice, Department of Finance; MS, Johns Hopkins University.

Wayne W. Williams, Associate Professor of Instruction, Department of Accounting; PhD, University of Pennsylvania.

Gary Witt, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science; PhD, University of Pennsylvania.

Christian E. Wurst, Associate Professor of Instruction, Department of Accounting; PhD, Temple University.

Timothy Young, Assistant Professor of Practice, Department of Statistics, Operations, and Data Science; MBA, Temple University.

Zhigen Zhao, Associate Professor, Department of Statistics, Operations, and Data Science; PhD, Cornell University.

Jeffrey Zheng, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies; MEd, Harvard University.

M. Michael Zuckerman, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies; JD, John Marshall Law School.

Kornberg School of Dentistry

Nezar Al-Hebshi, Associate Professor, Department of Oral Health Sciences; PhD, University of Bergen.

Jasim M. Albandar, Professor, Department of Periodontology and Oral Implantology; DMD, Temple University Kornberg School of Dentistry.

Anabela Amado, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Mustafa A. Badi, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Eileen K. Barfuss, Instructor (Clinician Scholar), Department of Oral Health Sciences.

Kelcie Barnts, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Mohamed A. Bassiouny, Professor, Department of Restorative Dentistry.

Jeffrey S. Bendler, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Nicholas R. Bizzaro, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Kenneth G. Boberick, Associate Professor, Department of Restorative Dentistry; DMD.

Kevin Chen, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Susan M. Chialastri, Associate Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

Sandra Deiley, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Louis Dipede, Associate Professor (Clinician Scholar), Department of Restorative Dentistry.

Carmen Doumit, Assistant Professor (Clinician Scholar), Department of Orthodontics.

Eugene M. Dunne, Assistant Professor, Department of Oral Health Sciences; PhD, University of Florida-Gainesville.

Jennifer Dyke, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Maria L. Fornatora, Associate Dean - Dental, Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

John P. Friel Jr., Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Nazanin Ghobadi, Associate Professor (Clinician Scholar), Department of Clinic Rev Restorative.

Jeffrey H. Godel, Associate Professor (Clinician Scholar), Department of Orthodontics; DDS, Howard University.

Wanda C. Gordon, Associate Professor (Clinician Scholar), Department of Endodontology.

Ayla Gourani, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Marc Herman, Associate Professor (Clinician Scholar), Department of Restorative Dentistry.

Luis Herra Pernudiz, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Kelly A. Holst, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Hae Young Hong, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Mehran Hossaini Zadeh, Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Yueh Hsiao, Associate Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

Amid Ismail, Laura H. Carnell Professor and Dean, Department of Restorative Dentistry; DrPH, University of Michigan.

Jodi J. Jasionowicz, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Maryam Khalili, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Jong Ryul Kim, Associate Professor (Clinician Scholar), Department of Endodontology; DMD, PhD, Kyung Hee University School of Dentistry.

Kevin Krick, Assistant Professor (Clinician Scholar), Department of Pediatric Dentistry.

Laurie MacPhail, Professor, Department of Oral and Maxillofacial Pathology, Medicine and Surgery; DMD.

Judith Mckain-Rubin, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Robert C. Miller, Assistant Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Ivan R. Miloradovic, Assistant Professor (Clinician Scholar), Department of Endodontology.

John V. Moore, Assistant Professor of Instruction, Department of Oral Health Sciences.

Gary T. Morreale, Assistant Professor (Clinician Scholar), Department of Endodontology.

Alaa Mouminah, Associate Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

Becky Newcomb, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Roni Nissan, Associate Professor, Department of Endodontology; DMD, Temple University Kornberg School of Dentistry.

Jo Ann Nyquist, Associate Professor of Instruction, Department of Pediatric Dentistry.

Chukwuebuka Ogwo, Research Assistant Professor, Department of Oral Health Sciences.

Santiago Orrego, Assistant Professor, Department of Restorative Dentistry; PhD, University of Maryland Baltimore County.

Bhumica R. Patel, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Nupur Patel, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Michael E. Pliskin, Associate Professor, Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Sumant Puri, Assistant Professor, Department of Oral Health Sciences; PhD, State University of New York at Buffalo.

Thomas E. Rams, Professor, Department of Periodontology and Oral Implantology; DDS, University of Maryland.

Sheila Reilly, Instructor (Clinician Scholar), Department of Restorative Dentistry.

Ahmed Sarhan, Assistant Professor (Clinician Scholar), Department of Endodontology.

James J. Sciote, Professor, Department of Orthodontics; PhD, University of Michigan.

Aaron Segal, Associate Professor (Clinician Scholar), Department of Restorative Dentistry.

David P. Semeniuk, Assistant Professor (Clinician Scholar), Department of Periodontology and Oral Implantology.

Sheelpa S. Shah, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Christopher Singh, Associate Professor (Clinician Scholar), Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Shari Jill Sklar, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Varun Vivek Solanki, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Leona A. Sperrazza, Associate Dean, Department of Oral and Maxillofacial Pathology, Medicine and Surgery.

Roy H. Stevens, Professor, Department of Endodontology; DDS, Columbia University.

Fang-Yu Su, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Louis P. Tarnoff, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Marisol Tellez-Merchán, Associate Professor, Department of Oral Health Sciences; PhD, University of Michigan.

Sara Toema, Assistant Professor (Clinician Scholar), Department of Pediatric Dentistry.

Orhan C. Tuncay, Gerald D. Timmons Professor, Department of Orthodontics; DMD, Temple University Kornberg School of Dentistry.

Elizabeth Tweddale, Assistant Professor (Clinician Scholar), Department of Restorative Dentistry.

Geraldine Weinstein, Professor (Clinician Scholar), Department of Restorative Dentistry.

Eugene J. Whitaker, Associate Professor, Department of Restorative Dentistry; DMD, University of Pennsylvania.

Adam B. Wolf, Assistant Professor (Clinician Scholar), Department of Pediatric Dentistry.

Jie Yang, Professor, Department of Oral and Maxillofacial Pathology, Medicine and Surgery; DMD, Temple University Kornberg School of Dentistry.

Maobin Yang, Associate Professor, Department of Endodontology; DMD, Temple University Kornberg School of Dentistry, PhD, University of Connecticut.

Cemil Yesilsoy, Associate Professor, Department of Endodontology; DMD, Temple University Kornberg School of Dentistry.

Lew Klein College of Media and Communication

Quaiser D. Abdullah, Assistant Professor of Instruction, Department of Communication and Social Influence; PhD, Temple University.

Tracy Agostarola, Assistant Professor of Instruction, Department of Advertising and Public Relations; BA, Kutztown University.

Saleem Ahmed, Assistant Professor of Practice, Department of Journalism; MFA, University of Hartford.

Osei Alleyne, Assistant Professor, Department of Media Studies and Production; PhD, University of Pennsylvania.

Jennifer Gerard Ball, Assistant Professor, Department of Advertising and Public Relations; PhD, University of Texas at Austin.

Jillian E. Bauer-Reese, Associate Professor of Practice, Department of Journalism; MS, Philadelphia University.

Geoffrey Baym, Professor, Department of Media Studies and Production; PhD, University of Utah.

Katherine M. Bex, Assistant Professor of Instruction, Department of Advertising and Public Relations; MS, Temple University.

David Boardman, Professor, Department of Journalism; MA, University of Washington.

David W. Brown, Associate Professor of Instruction, Department of Advertising and Public Relations; ThM, Eastern University.

Lauren J. Bullock, Assistant Professor of Instruction, Department of Advertising and Public Relations; MS, Florida State University.

Deborah Cai, Professor, Department of Communication and Social Influence; PhD, Michigan State University.

Guillermo G. Caliendo, Assistant Professor of Instruction, Department of Communication and Social Influence; PhD, University of Pittsburgh.

Amy L. Caples, Assistant Professor of Instruction, Department of Media Studies and Production; BA, Temple University.

Alice Castellini, Assistant Professor of Instruction, Department of Media Studies and Production; MS, University of Pennsylvania.

Jessica Castonguay, Assistant Professor, Department of Advertising and Public Relations; PhD, University of Arizona.

Olivia Cohen, Assistant Professor of Instruction, Department of Communication and Social Influence; PhD, The Pennsylvania State University.

William B. Cook, Assistant Professor of Instruction, Department of Advertising and Public Relations; MA, The Pennsylvania State University.

Erin K. Coyle, Associate Professor, Department of Journalism; PhD, University of North Carolina at Chapel Hill.

Brian Creech, Associate Professor, Department of Journalism; PhD, University of Georgia.

Youngji Seo, Assistant Professor of Instruction, Department of Advertising and Public Relations; PhD, University of Georgia.

Adrienne Shaw, Associate Professor, Department of Media Studies and Production; PhD, University of Pennsylvania.

Larry Stains, Associate Professor of Practice, Department of Journalism; MJ, Columbia University.

Meghna Tallapragada, Assistant Professor, Department of Advertising and Public Relations; PhD, Cornell University.

Karen M. Turner, Associate Professor, Department of Journalism; JD, Northwestern University School of Law.

Barry Vacker, Associate Professor of Instruction, Department of Media Studies and Production; PhD, University of Texas at Austin.

Linn Washington, Professor, Department of Journalism; MSL, Yale Law School.

Kristine Trever Weatherston, Associate Professor of Instruction, Department of Media Studies and Production; PhD, Virginia Commonwealth University.

Tracey Weiss, Associate Professor of Instruction, Department of Advertising and Public Relations; PhD, Temple University.

Andrea D. Wenzel, Assistant Professor, Department of Journalism; PhD, University of Southern California.

Thomas Wright, Associate Professor of Instruction, Department of Communication and Social Influence; PhD, Purdue University.

Laura Zaylea, Associate Professor of Instruction, Department of Media Studies and Production; MFA, San Francisco Art Institute.

School of Sport, Tourism and Hospitality Management

John Allgood, Assistant Professor of Practice, Department of Sport and Recreation Management; MS, University of Oklahoma.

Benjamin Altschuler, Associate Professor of Practice, Department of Tourism and Hospitality Management; PhD, University of Utah.

Bradley J. Baker, Assistant Professor, Department of Sport and Recreation Management; PhD, Temple University.

Heather A. Blackburn, Assistant Professor of Instruction, Department of Sport and Recreation Management; EdD, Drexel University.

Debra K. Blair, Associate Professor of Instruction, Department of Sport and Recreation Management; EdD, Temple University.

Christine Ann Cleaver, Assistant Professor of Practice, Department of Tourism and Hospitality Management; MEd, Cabrini College.

George Diemer, Associate Professor of Instruction, Department of Sport and Recreation Management; PhD, Temple University.

Daniel C. Funk, Professor, Department of Sport and Recreation Management; PhD, The Ohio State University.

Ashley Gardner, Assistant Professor of Instruction, Department of Sport and Recreation Management; PhD, University of Tennessee.

Amy Giddings, Professor of Instruction, Department of Sport and Recreation Management; PhD, Temple University.

Caroline Heffernan, Assistant Professor of Instruction, Department of Sport and Recreation Management; PhD, University of Minnesota.

Jonathan E. Howe, Assistant Professor of Instruction, Department of Sport and Recreation Management; PhD, The Ohio State University.

Gareth J. Jones, Assistant Professor, Department of Sport and Recreation Management; PhD, North Carolina State University.

Jeremy S. Jordan, Professor, Department of Sport and Recreation Management; PhD, The Ohio State University.

R. Aubrey Kent, Professor, Department of Sport and Recreation Management; PhD, The Ohio State University.

Thilo Kunkel, Associate Professor, Department of Sport and Recreation Management; PhD, Griffith University.

Lindsey Lee, Assistant Professor, Department of Tourism and Hospitality Management; PhD, University of Houston.

Xiang Li, Professor, Department of Tourism and Hospitality Management; PhD, Texas A and M University.

Lu Lu, Associate Professor, Department of Tourism and Hospitality Management; PhD, University of Washington.

Joseph Mahan III, Associate Professor of Instruction, Department of Sport and Recreation Management; PhD, University of Maryland College Park.

Chihyung Michael Ok, Associate Professor, Department of Tourism and Hospitality Management; PhD, Kansas State University.

Richard Ridall, Associate Professor of Instruction, Department of Sport and Recreation Management; MEd, Temple University.

Wesley S. Roehl, Professor, Department of Tourism and Hospitality Management; PhD, Texas A and M University.

Ira L. Rosen, Associate Professor of Practice, Department of Tourism and Hospitality Management; MA, Montclair State University.

Michael F. Sheridan, Associate Professor of Practice, Department of Tourism and Hospitality Management; EdD, Temple University.

Elizabeth Taylor, Assistant Professor, Department of Sport and Recreation Management; PhD, University of Tennessee.

Luorong Wu, Associate Professor, Department of Tourism and Hospitality Management; PhD, The Pennsylvania State University.

Yang Yang, Associate Professor, Department of Tourism and Hospitality Management; PhD, University of Florida.

School of Theater, Film and Media Arts

Mounia Akl, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Columbia University.

Nora Alter, Professor, Department of Film and Media Arts; PhD, University of Pennsylvania.

Warren F. Bass, Professor, Department of Film and Media Arts; MFA, Columbia University.

Chris Cagle, Associate Professor, Department of Film and Media Arts; PhD, Brown University.

Marie Anne Chiment, Professor, Department of Theater; MFA, New York University Tisch School of the Arts.

Roderick L. Coover, Professor, Department of Film and Media Arts; PhD, University of Chicago.

Peter P. d'Agostino, Professor, Department of Film and Media Arts; MA, San Francisco State University.

Neal Dhand, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Rochester Institute of Technology.

Sarah Drury, Associate Professor, Department of Film and Media Arts; MA, New York University Tisch School of the Arts.

Fred M. Duer, Professor, Department of Theater; MFA, Ohio University.

LeAnn Erickson, Professor, Department of Film and Media Arts; MFA, University of Iowa.

Marcus Giamatti, Associate Professor, Department of Theater; MFA, Yale University.

Lindsay Goss, Assistant Professor, Department of Theater; PhD, Brown University.

Steven Gross, Associate Professor, Department of Theater; PhD, Yale University.

David Ingram, Associate Professor of Instruction, Department of Theater; MFA, New York University Tisch School of the Arts.

Lynne Innerst, Associate Professor, Department of Theater; MFA, University of Southern California.

Melanie Julian, Associate Professor of Practice, Department of Theater; MFA, Point Park University.

Michael J. Kuetemeyer, Associate Professor, Department of Film and Media Arts; MFA, Temple University.

Andrew Laine, Associate Professor of Practice, Department of Theater; MFA, University of Texas at Austin.

King Lu, Assistant Professor of Instruction, Department of Film and Media Arts; MFA, Columbia University.

Brandon McShaffrey, Assistant Professor of Instruction, Department of Theater; MFA, Temple University.

Matthew Miller, Professor of Practice, Department of Theater; MFA, University of North Carolina at Chapel Hill.

Kartik Nair, Assistant Professor, Department of Film and Media Arts; PhD, New York University.

Jason Norris, Instructor, Department of Theater; MFA, University of Texas at Austin.

Rea Tajiri, Associate Professor, Department of Film and Media Arts; MFA, California Institute of the Arts.

Douglas C. Wager, Professor, Department of Theater; MFA, Boston University.

Kimika Williams-Witherspoon, Associate Professor, Department of Theater; PhD, Temple University.

Ashley S. Young, Instructor, Department of Film and Media Arts; PhD, University of Southern California.

Jamie Zelechowski, Assistant Professor of Instruction, Department of French, German, Italian and Slavic; PhD, University of California Los Angeles.

College of Science and Technology

Ergin H. Ahmed, Research Associate Professor, Department of Physics; PhD, Temple University.

Ola Ajaj, Assistant Professor of Instruction, Department of Physics; PhD, Florida Atlantic University.

Tamer Aldwairi, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Mississippi State University.

Shohreh Amini, Professor, Department of Biology; PhD, University of Pennsylvania.

Eleni Anni, Associate Professor of Instruction, Department of Biology; PhD, University of Patras.

Alla Arzumanyan, Research Assistant Professor, Department of Biology; PhD, Yerevan State University.

Hamza Atac, Research Assistant Professor, Department of Physics; PhD, Temple University.

Caryn S. Babaian, Assistant Professor of Instruction, Department of Biology; PhD, Temple University.

Jessica Babcock, Assistant Professor of Instruction, Department of Mathematics; MEd, Temple University.

Zachary Bailey, Assistant Professor of Instruction, Department of Mathematics; PhD, University of Delaware.

Darius Balciunas, Associate Professor, Department of Biology; PhD, Uppsala University.

Matthew Banks, Research Assistant Professor, Department of Biology; PhD, State University of New York at Stony Brook.

Suman Batish, Assistant Professor of Instruction, Department of Biology; PhD, University of Cambridge.

Rebecca L. Beadling, Assistant Professor, Department of Earth and Environmental Science; PhD, University of Arizona.

Jocelyn Behm, Assistant Professor, Department of Biology; PhD, University of Wisconsin-Madison.

Richard Beigel, Professor, Department of Computer and Information Sciences; PhD, Stanford University.

Gianfranco Bellipanni, Associate Professor of Instruction, Department of Biology; PhD, University of Palermo.

Abha Belorkar, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, National University of Singapore.

Shiferaw S. Berhanu, Professor, Department of Mathematics; PhD, Rutgers University.

Eugeny Bichenkov, Research Assistant Professor, Department of Biology; PhD, Novosibirsk Institute of Bioorganic Chemistry.

Christopher J. Biehl, Instructor, Department of Computer and Information Sciences; MBA, Temple University.

James D. Bloxton, Associate Professor of Instruction, Department of Chemistry; PhD, Temple University.

Eric U. Borguet, Professor, Department of Chemistry; PhD, University of Pennsylvania.

Yelena Borovitskaya, Associate Professor of Instruction, Department of Physics; PhD, Institute of Applied Physics, Nizhnii Novgorod, Russia.

Angela L. Bricker, Associate Professor of Instruction, Department of Biology; PhD, University of Cambridge.

Craig Brumwell, Assistant Professor of Instruction, Department of Biology; PhD, University of Connecticut Health Center.

Ilya V. Buynevich, Associate Professor, Department of Earth and Environmental Science; PhD, Boston University.

Vincenzo Carnevale, Associate Professor, Department of Biology; PhD, International School for Advanced Studies, Trieste.

Elizabeth Cerkez, Associate Professor of Instruction, Department of Chemistry; PhD, Temple University.

Farzana Chaudhry, Associate Professor of Instruction, Department of Mathematics; PhD, Oxford University.

Steven M. Chemtob, Assistant Professor, Department of Earth and Environmental Science; PhD, California Institute of Technology.

Je-Wei Chen, Associate Professor of Instruction, Department of Mathematics; PhD, State University of New York at Stony Brook.

Ke Chen, Research Associate Professor, Department of Physics; PhD, Chinese Academy of Sciences.

Yuzhou Chen, Assistant Professor, Department of Computer and Information Sciences; PhD, Princeton University.

Rujeko Chinomona, Research Assistant Professor, Department of Mathematics; PhD, Southern Methodist University.

Martha Constantinou, Selma Lee Bloch Brown Associate Professor in Physics, Department of Physics; PhD, University of Cyprus.

Erik Cordes, Professor, Department of Biology; PhD, The Pennsylvania State University.

Raymond F. Coughlin, Associate Professor, Department of Mathematics; PhD, Illinois Institute of Technology.

Edward T. Crotty, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, University of Pennsylvania.

Hai-Lung Dai, Professor, Department of Chemistry; PhD, University of California Berkeley.

Boris A. Datskovsky, Professor, Department of Mathematics; PhD, Harvard University.

Alexandra Krull Davatzes, Associate Professor, Department of Earth and Environmental Science; PhD, Stanford University.

Nicholas Davatzes, Associate Professor, Department of Earth and Environmental Science; PhD, Stanford University.

Franklin A. Davis, Professor Emeritus, Department of Chemistry; PhD, Syracuse University.

Timothy S. Davis, Instructor, Department of Earth and Environmental Science; MS, Temple University.

Graham Dobreiner, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry; PhD, Yale University.

David Dobar, Instructor, Department of Computer and Information Sciences; MS, Temple University.

Vasily Dolgushev, Professor, Department of Mathematics; PhD, Massachusetts Institute of Technology.

Marilena Downing, Assistant Professor of Instruction, Department of Mathematics; MA, Temple University.

Eduard Dragut, Associate Professor, Department of Computer and Information Sciences; PhD, University of Illinois at Chicago.

Jeanette V. Dumas, Associate Professor of Instruction, Department of Biology; PhD, Drexel University.

Zbigniew Dziembowski, Associate Professor, Department of Physics; PhD, Warsaw University.

Andrew Eisenberg, Assistant Professor of Instruction, Department of Mathematics; PhD, Tufts University.

Khaled M. Elokely, Research Associate Professor, Department of Chemistry; PhD, University of Mississippi.

Jennifer Emtage, Assistant Professor of Instruction, Department of Biology; PhD, Johns Hopkins University.

Ananias A. Escalante, Professor, Department of Biology; PhD, University of California Irvine.

Catherine Fair, Assistant Professor of Practice, Department of Chemistry; MD, University of Alabama at Birmingham.

Mark A. Feitelson, Professor, Department of Biology; PhD, University of California Los Angeles.

John Fiore, Assistant Professor of Instruction, Department of Computer and Information Sciences; MS, University of Pennsylvania.

Leigh Flagg, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, University of Tulsa.

Steven Fleming, Professor of Instruction, Department of Chemistry; PhD, University of Wisconsin.

Natalie P. Flynn, Assistant Professor of Instruction, Department of Earth and Environmental Science; MA, Temple University.

Seema Freer, Associate Professor of Practice, Department of Biology; PhD, Thomas Jefferson University.

Amy Freestone, Associate Professor, Department of Biology; PhD, University of California Davis.

David Futer, Professor, Department of Mathematics; PhD, Stanford University.

Hongchang Gao, Assistant Professor, Department of Computer and Information Sciences; PhD, University of Pittsburgh.

Eleonora Gianti, Research Associate Professor, Department of Chemistry; PhD, University of the Sciences.

Jayakumar G. Gilbert, Associate Professor of Instruction, Department of Chemistry; PhD, Drexel University.

Isabel C. Gines, Instructor, Department of Biology; PSM, Temple University.

Antonio Giordano, Professor, Department of Biology; PhD, University of Trieste.

Mary Grace Giraldo, Assistant Professor of Instruction, Department of Computer and Information Sciences; PhD, Syracuse University.

Yury Grabovsky, Professor, Department of Mathematics; PhD, New York University.

David E. Grandstaff, Professor, Department of Earth and Environmental Science; PhD, Princeton University.

Jean-David Grattepanche, Research Assistant Professor, Department of Biology; PhD, University of Littoral.

Giovanni Gravina, Research Assistant Professor, Department of Mathematics; PhD, Carnegie Mellon University.

Alexander Gray, Associate Professor, Department of Physics; PhD, Lawrence Berkeley National Laboratory and University of California, Davis.

Cristian E. Gutiérrez, Professor, Department of Mathematics; PhD, University of Buenos Aires.

Raymond Habas, Professor, Department of Biology; PhD, State University of New York at Stony Brook.

Allan Haldane, Research Associate Professor, Department of Physics; PhD, Rutgers University.

Nahed Hamid, Assistant Professor of Instruction, Department of Mathematics; MS, Kean University.

Jun Han, Research Assistant Professor, Department of Chemistry; PhD, Texas A and M University.

Xubin He, Professor, Department of Computer and Information Sciences; PhD, University of Rhode Island.

Lewis Katz School of Medicine

Thair Abed, Clinical Professor, Department of Pediatrics; MD.

Omar Agosto, Clinical Associate Professor, Department of Radiology; MD.

Mian Ahmad, Clinical Professor, Department of Anesthesiology; MD.

Saira Ahmad, Clinical Assistant Professor, Department of Radiology; MBBS.

Ziauddin Ahmed, Clinical Professor, Department of Medicine; MD.

Israh Akhtar, Clinical Professor, Department of Pathology and Laboratory Medicine; MD.

Kamardeen Alao, Clinical Associate Professor, Department of Anesthesiology; MBBS.

Jennifer Aldrich, Clinical Professor, Department of Medicine; MD.

Nadia Ali, Clinical Associate Professor, Department of Medicine; MD.

Sayed Ali, Professor, Department of Radiology; MBBS.

Jack Allan, Clinical Instructor, Department of Emergency Medicine; MD.

Jill Megan Allenbaugh, Associate Professor, Department of Medicine; MD.

Natalie Allman, Clinical Assistant Professor, Department of Neurology; DO.

Rami Almefty, Assistant Professor, Department of Neurosurgery; MD.

Mohamed Alsammak, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD.

Jeffrey H. Anderson, Clinical Assistant Professor, Department of Surgery; MD.

Syed Yasir Andrabi, Assistant Professor, Department of Radiology; MD.

Allison M. Andrews, Research Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

Jonathan Anolik, Clinical Professor, Department of Medicine; MD.

Sofia B. Arango Mendoza, Clinical Assistant Professor, Department of Medicine; MD.

Jordana Arkus, Assistant Professor, Department of Physician Assistant Program; MMS.

Valerie Armstead, Clinical Professor, Department of Anesthesiology; MD.

Stephen Aronoff, Professor and the Waldo Nelson Chair, Department of Pediatrics; MD.

Oneida Arosarena, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Aileen Arriola, Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

Michael V. Autieri, Professor, Department of Lemole Center for Integrated Lymphatics Research; PhD, Hahnemann University.

Peter Axelrod, Professor, Department of Medicine; MD.

Arleen Ayala-Crespo, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Homaira Azim, Assistant Professor, Department of Biomedical Education and Data Science; MD, PhD.

Sanam Baghshomali, Clinical Assistant Professor, Department of Neurology; MD.

Karim Bahmed, Research Assistant Professor, Department of Center for Inflammation and Lung Research; PhD.

Ashish Bains, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MBBS.

Upneet K. Bains, Clinical Associate Professor, Department of Ophthalmology; MD.

Charles T. Bakhos, Professor, Department of Thoracic Medicine and Surgery; MD.

Eli Balshan, Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

Pamela Bannon, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Mary F. Barbe, Professor, Department of Center for Translational Medicine; PhD, Wake Forest University.

Ruby H. Barghini, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Leslie F. Barnes, Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Jeffrey Barrett, Clinical Associate Professor, Department of Emergency Medicine; MD.

Riyaz Bashir, Professor, Department of Medicine; MBBS.

Anuj Basil, Associate Professor, Department of Medicine; MD.

Sean M. Baskin, Clinical Assistant Professor, Department of Anesthesiology; DO.

Richard H. G. Baxter, Assistant Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Chicago.

Jessica Beard, Associate Professor, Department of Surgery; MD.

Jordan G. Becker, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Joseph Benjamin, Clinical Professor, Department of Medicine; MBBS.

Abiona Berkeley, Clinical Professor, Department of Anesthesiology; MD.

Robert L. Bettiker, Clinical Professor, Department of Medicine; MD.

Sumita Bhambhani, Clinical Professor, Department of Anesthesiology; MBBS.

Rajiv Bhuta, Clinical Assistant Professor, Department of Medicine; MD.

Aurelia N. Bizamcer, Clinical Professor, Department of Psychiatry and Behavioral Science; MD, PhD.

Carly Blick, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Michael Bode, Clinical Assistant Professor, Department of Medicine; MD.

Charles Bongiorno, Clinical Professor, Department of Medicine; MD.

Lucia Borriello, Assistant Professor, Department of Cancer and Cellular Biology; PhD, University of Paris.

Suzanne Boyle, Associate Professor, Department of Medicine; MD.

Tanise L. Branche, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Kathleen Brennan, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

Lawrence Brent, Professor, Department of Medicine; MD.

Jessica Briscoe, Clinical Assistant Professor, Department of Medicine; MD.

Michael Bromberg, Professor, Department of Medicine; MD, PhD.

Andrea E. Brown, Clinical Associate Professor, Department of Physical Medicine and Rehabilitation; MD.

Lauren A. Brown, Clinical Assistant Professor, Department of Radiology.

Robert Bryan, Clinical Associate Professor, Department of Emergency Medicine; DO.

Tricia Helen Burdo, Professor, Department of Center for Neurovirology and Gene Editing; PhD, Penn State College of Medicine.

Julia M. Burger, Clinical Associate Professor, Department of Pediatrics; MD.

Jessie Burkhardtmeier Huff, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; DO.

Jacqueline Burnell, Clinical Assistant Professor, Department of Medicine; MD.

Monica Busuioc, Clinical Associate Professor, Department of Medicine; MD, PhD.

Bettina A. Buttaro, Associate Professor, Department of Biomedical Education and Data Science; PhD, University of Minnesota.

Whitney V. Cabey, Assistant Professor, Department of Emergency Medicine; MD.

Rachel Caplan, Clinical Assistant Professor, Department of Neurology; MD.

Saraswathi A. Cappelle, Clinical Assistant Professor, Department of Medicine; DO.

Bruce Carnivale, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; DO.

Jordan Carter, Clinical Assistant Professor, Department of Medicine; MD.

Dione J. Cash, Clinical Professor, Department of Pediatrics; MD.

John Cernetich, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Linda Chaille-Arnold, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Marion M. Chan, Associate Professor, Department of Biomedical Education and Data Science; PhD, Cornell University Medical College.

Ashwin Chandar, Assistant Professor, Department of Medicine; MD.

Seetha Chandrasekhara, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Georgios Charatzoglou, Assistant Professor, Department of Anesthesiology; MD.

Wissam Chatila, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

Ankita Chatterjee, Clinical Assistant Professor, Department of Medicine; MD.

Alexander Chau, Clinical Assistant Professor, Department of Medicine; MD.

Cindy Chen, Clinical Assistant Professor, Department of Medicine; MD.

Zhongjian Cheng, Research Assistant Professor, Department of Center for Translational Medicine; PhD.

Santhosh Cherian, Clinical Assistant Professor, Department of Radiology; MD.

Konstantin Chernukha, Clinical Associate Professor, Department of Radiology; MD.

Divya Chillapalli, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Hiu Ying Joanna Choi, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

Julee Choi, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Parkson Lee-Gau Chong, Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Illinois at Urbana-Champaign.

Christopher Chu, Clinical Associate Professor, Department of Medicine; MD.

Frank B. Chumley, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

David E. Ciccolella, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

Rachael E. Clark, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

Tatyan Clarke, Clinical Associate Professor, Department of Surgery; MD.

Heather Clauss, Clinical Professor, Department of Medicine; MD.

Katsuko Nagayoshi Cleymaet, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; DO.

Kylee Clyatt, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Gary S. Cohen, Professor and the Herbert M. Stauffer Chair in Diagnostic Imaging, Department of Radiology; MD.

Lisa Collazzo, Clinical Assistant Professor, Department of Radiology; MD.

Christopher J. Combs, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; PhD.

Serban Constantinescu, Professor, Department of Medicine; MD, PhD.

Joshua Cooper, Professor, Department of Medicine; MD.

Francis C. Cordova, Professor, Department of Thoracic Medicine and Surgery; MD.

Brittany Corso, Clinical Assistant Professor, Department of Medicine; MD.

Melanie A. Cosby, Assistant Professor, Department of Office of Health Equity, Diversity and Inclusion; PhD.

Thomas G. Costantino, Clinical Professor, Department of Emergency Medicine; MD.

Vincent Cowell, Clinical Professor, Department of Anesthesiology; MD.

Deborah Crabbe, Professor, Department of Medicine; MD.

Gerard J. Criner, Laura H. Carnell Professor, Department of Thoracic Medicine and Surgery; MD.

Edmond Cronin, Associate Professor, Department of Medicine; MBBCh.

Amy Cruz, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Ernesto S. Cruz, Professor, Department of Physical Medicine and Rehabilitation; MD.

Jeffrey Cruz, Clinical Assistant Professor, Department of Radiology; MD.

Dorian L. Culmer-Butler, Assistant Professor, Department of University Animal Laboratory Resources; DVM.

Emily Cuthbertson, Clinical Associate Professor, Department of Radiology; MD.

Gilbert E. D'Alonzo, Professor, Department of Thoracic Medicine and Surgery; DO.

Joseph D'Orazio, Clinical Associate Professor, Department of Emergency Medicine; MD.

Simindokht Dadparvar, Professor, Department of Radiology; MD.

Judith Daniels, Associate Professor, Department of Biomedical Education and Data Science; PhD, University of North Carolina at Chapel Hill.

Chandra Dass, Professor, Department of Radiology; MBBS.

Elizabeth Dauer, Clinical Associate Professor, Department of Surgery; MD.

Edward C. DaVeiga, Clinical Assistant Professor, Department of Medicine; MD.

Blachy Davila, Clinical Assistant Professor, Department of Radiology; MD.

Michael A. DeAngelis, Clinical Professor, Department of Emergency Medicine; MD.

Anahita Deboo, Clinical Professor, Department of Neurology; MD.

Christopher Decker, Assistant Professor, Department of Surgery; MD.

Giuliana Defrancesch, Clinical Professor, Department of Medicine; MD.

Michael Del Vecchio, Clinical Professor, Department of Pediatrics; MD.

Nicole Desai, Clinical Assistant Professor, Department of Medicine; DO.

Parag Desai, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

Mark Desmond, Clinical Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Eric A. DeVeaux, Clinical Assistant Professor, Department of Anesthesiology; MD.

Sanjiv Dewan, Clinical Assistant Professor, Department of Surgery; MD.

Antonio Di Carlo, Professor, Department of Surgery; MD.

Jaclyn Dietzold, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Shalizi Dolan, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Gary Domeracki, Clinical Associate Professor, Department of Ophthalmology; MD.

Eduardo Dominguez Castillo, Clinical Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

Jose Dorotan, Assistant Professor, Department of Anesthesiology; MD.

Laura Douglass, Clinical Assistant Professor, Department of Urology; MD.

Ilona Duffy, Clinical Associate Professor, Department of Pediatrics; MD.

Sean Duffy, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

Nahum J. Duker, Professor, Department of Pathology and Laboratory Medicine; MD, University of Illinois College of Medicine.

Michelle Duncan, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Shahnaz Duymun, Clinical Assistant Professor, Department of Medicine; DO.

Charles Earley, Assistant Professor, Department of Medicine.

Jocelyn P. Edathil, Clinical Associate Professor, Department of Medicine; MD.

Merritt Edlind, Clinical Assistant Professor, Department of Medicine; MD.

Daniel Edmundowicz, Professor and the Florence P. Bernheimer Distinguished Service Chair in Medicine, Department of Medicine; MD.

Satoru Eguchi, Professor, Department of Cardiovascular Research Center; MD, Tohoku University School of Medicine, PhD, Tokyo Medical and Dental University.

Adam C. Ehrlich, Associate Professor, Department of Medicine; MD.

Toby K. Eisenstein, Professor, Department of Center for Substance Abuse Research; PhD, Bryn Mawr College.

Isabel Eisner, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

John Elrod, Associate Professor, Department of Cardiovascular Research Center; PhD, Albert Einstein College of Medicine.

Nora Engel, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Buenos Aires.

Cherie P. Erkmén, Professor, Department of Thoracic Medicine and Surgery; MD.

Kadir Erkmén, Professor, Department of Neurosurgery; MD.

Maria Escorcía De Leon, Clinical Assistant Professor, Department of Medicine; MD.

David Essex, Professor, Department of Medicine; MD.

Concepcion Estaras, Assistant Professor, Department of Center for Translational Medicine; PhD, University of Barcelona.

Shekar Eswarakrishnan, Clinical Assistant Professor, Department of Medicine; MD.

Daniel D. Eun, Professor, Department of Urology; MD.

Justin Faden, Associate Professor, Department of Psychiatry and Behavioral Science; DO.

Kathleen Fane, Clinical Associate Professor, Department of Emergency Medicine; MD.

Pauline Farnsworth, Clinical Associate Professor, Department of Emergency Medicine; MD.

Anam Fatma, Clinical Assistant Professor, Department of Medicine; MD.

Diana Feinstein, Clinical Associate Professor, Department of Anesthesiology; DO.

Thomas Fekete, Professor and the Thomas M. Durant Chair, Department of Medicine; MD.

Arthur Feldman, Laura H. Carnell Professor, Department of Cardiovascular Sciences; MD, PHD, Louisiana State University.

Sarah D. Fenerty, Clinical Assistant Professor, Department of Radiology; MD.

Gustavo Fernandez Romero, Clinical Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

Jaime Fineman, Clinical Associate Professor, Department of Medicine; MD.

Michael J. Fiorito, Clinical Associate Professor, Department of Emergency Medicine; MD.

David J. Fish, Clinical Professor, Department of Anesthesiology; MD.

David Fiss, Clinical Associate Professor, Department of Medicine; MD.

Jack FitzSimmons, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

David Fleece, Clinical Professor, Department of Pediatrics; MD.

Kimberly Forde, Associate Professor, Department of Medicine; MD.

Paul Forfia, Professor, Department of Medicine; MD.

Silvia Fossati, Associate Professor, Department of Alzheimer's Center at Temple; PhD, University of Florence.

Joseph Friedberg, Professor, Department of Thoracic Medicine and Surgery; MD.

Frank K. Friedenberg, Professor, Department of Medicine; MD.

Emily Friend, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Jian Fu, Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

Gianluca Gallo, Professor, Department of Neural Sciences; PhD, University of Illinois.

David Galos, Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Ana Gamero, Associate Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of South Florida.

Justin M. Gamez, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Andrew Gangemi, Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

Chethan Gangireddy, Clinical Associate Professor, Department of Medicine; MD.

Michael P. Gannon, Assistant Professor, Department of Medicine; MD.

Erhe Gao, Research Professor, Department of Center for Translational Medicine; MD, PhD.

Jamie Garfield, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

Amanda Gavin, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Nina Gentile, Professor, Department of Emergency Medicine; MD.

Glenn Stephen Gerhard, Professor and the Joseph and Rebecca Goodfriend Endowed Chair in Genetics, Department of Medical Genetics and Molecular Biochemistry; MD, The Pennsylvania State University.

Susan Gersh, Clinical Professor, Department of Medicine; MD.

Edward J. Gettings, Associate Professor, Department of Neurology; DO.

Jayashri Ghosh, Research Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD.

Kathleen M. Giangiacomo, Associate Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Pennsylvania.

Andrew Gibb, Instructor, Department of Cardiovascular Research Center.

Ryan C. Gibbons, Associate Professor, Department of Emergency Medicine; MD.

Avrum Gillespie, Professor, Department of Medicine; MD.

Carol Glowacki, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Ellen Gluzman, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; MD.

Harry Goett, Clinical Associate Professor, Department of Emergency Medicine; MD.

Eric Gokcen, Clinical Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Amy J. Goldberg, Professor and the George S. Peters, MD and Louise C. Peters Chair in Surgery, Department of Surgery; MD.

Marc S. Goldberg, Clinical Professor, Department of Anesthesiology; MD.

Alejandro Gonzalez, Clinical Associate Professor, Department of Medicine; MD.

Maria Gonzalez, Associate Professor, Department of Pathology and Laboratory Medicine; MD.

Louis Goodrich, Clinical Assistant Professor, Department of Neurology; DO.

Matthew Gordon, Associate Professor, Department of Thoracic Medicine and Surgery; MD.

James J. Graham, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; DO.

Jeffrey Grand, Clinical Assistant Professor, Department of Surgery; PsyD.

Xavier Graña-Amat, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Barcelona.

Nicole Griffin, Associate Professor, Department of Biomedical Education and Data Science; PhD.

Paul Guido, Clinical Assistant Professor, Department of Medicine; MD.

Neilesh Gupta, Clinical Assistant Professor, Department of Radiology; MD.

Rohit Gupta, Associate Professor, Department of Thoracic Medicine and Surgery; MBBS.

Hemalatha Guruprasad, Clinical Professor, Department of Pediatrics; MBBS.

Maryellen E. Gusic, Professor, Department of Biomedical Education and Data Science; MD.

Behnum Habibi, Assistant Professor, Department of Physical Medicine and Rehabilitation; MD.

Dale S. Haines, Associate Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, Hahnemann University.

Shqiponja Hajdinaj, Clinical Assistant Professor, Department of Radiology; DO.

Ashleigh Hall, Clinical Associate Professor, Department of Pediatrics; DO.

Eman A. Hamad, Professor, Department of Medicine; MD.

Alireza Hamidian Jahromi, Assistant Professor, Department of Surgery; MD.

Samuel Han, Clinical Assistant Professor, Department of Surgery; MD.

Brittany Hansen, Clinical Associate Professor, Department of Pediatrics; DO.

Amanda Hargrove, Clinical Associate Professor, Department of Anesthesiology; MD.

Richard A. Harrigan, Professor, Department of Emergency Medicine; MD.

Brendan Hart, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Laura A. Hart, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Jared Hassler, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD.

Ellen Hauck, Clinical Professor, Department of Anesthesiology; DO.

Mary B. Hays, Assistant Professor, Department of Center for Urban Bioethics; MSW.

Megan Healy, Clinical Associate Professor, Department of Emergency Medicine; MD.

Candrice R. Heath, Assistant Professor, Department of Dermatology; MD.

Megan Heere, Clinical Professor, Department of Pediatrics; MD.

Terry Heiman-Patterson, Professor, Department of Neurology; MD.

Stephen Heller, Clinical Professor, Department of Medicine; MD.

Jeffrey Henderer, Professor and the Edward Hagop Bedrossian Chair, Department of Ophthalmology; MD.

Randa P. Hennawy, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MBBCh.

Enrique Hernandez, Professor and the J. Robert Willson Chair, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Gail Herrine, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Sharon Herring, Associate Professor, Department of Medicine; MD.

Beverly Hershey, Clinical Professor, Department of Radiology; MD.

Gregory Hertel, Clinical Assistant Professor, Department of Anesthesiology; MD.

Hannah Hill, Clinical Assistant Professor, Department of Medicine; MD.

Wen-Zhe Ho, Professor, Department of Pathology and Laboratory Medicine; MD, Wuhan University School of Medicine.

Carolyn Hogan, Clinical Assistant Professor, Department of Medicine; MD.

Kelly Holz, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Brenda J. Horwitz, Clinical Professor, Department of Medicine; MD.

Ralph I. Horwitz, Professor, Department of Cardiovascular Research Center; MD.

Hillary Hott, Clinical Assistant Professor, Department of Anesthesiology; MD.

Karen Houck, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Steven R. Houser, Professor, Department of Cardiovascular Research Center; PhD, Temple University.

Aroonsiri Howell, Associate Professor, Department of Medicine; MD.

Sylvia Hsu, Professor, Department of Dermatology; MD.

Wenhui Hu, Professor, Department of Center for Metabolic Disease Research; MD, PhD, Peking Union Medical College and Chinese Academy of Medical Science.

Kelly Eileen Hughes, Clinical Assistant Professor, Department of Medicine; MD.

Christian Hurtz, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Albert-Ludwigs-Universität Freiburg im Breisgau.

Tiffany Hwa, Assistant Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Vanneta Hyatt, Clinical Professor, Department of Medicine; MD.

Laura Igarabuzza, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

Vikranth Induru, Clinical Assistant Professor, Department of Medicine; MD.

Glenn Isaacson, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Derek Isenberg, Clinical Associate Professor, Department of Emergency Medicine; MD.

David Isgan, Associate Professor, Department of Biomedical Education and Data Science; MHS.

Sabrina Islam, Assistant Professor, Department of Medicine; MD.

Amy Iwamaye, Assistant Professor, Department of Medicine; MD.

Jessica Jackson, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Mercedes P. Jacobson, Professor, Department of Neurology; MD.

Neelu Jain, Assistant Professor, Department of Radiology.

Jessica James, Clinical Associate Professor, Department of Pediatrics; MD.

Arundathi Jayatilleke, Clinical Associate Professor, Department of Medicine; MD.

Liselotte Jensen, Associate Professor, Department of Center for Inflammation and Lung Research; PhD, University of Aarhus.

Stacey Jeronis, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Nirag C. Jhala, Professor, Department of Pathology and Laboratory Medicine; MD.

Xi Jing, Associate Professor, Department of Surgery; MD.

Keonna Johnson, Clinical Assistant Professor, Department of Surgery; MD.

Christine M. Jones, Assistant Professor, Department of Surgery; MD.

Nora L. Jones, Associate Professor, Department of Center for Urban Bioethics; PhD, Temple University.

Padmaja Jonnalagadda, Clinical Professor, Department of Radiology; MBBS.

Erin Kaesshaefer, Assistant Professor, Department of Physician Assistant Program; MS.

Allan Kahler, Instructor, Department of Pediatrics.

Caroline Kaigh, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Aditi Kalla, Clinical Assistant Professor, Department of Medicine; MD.

Bhishak Kamat, Clinical Associate Professor, Department of Radiology; MD.

Ihab Kamel, Professor, Department of Anesthesiology; MD.

Rafal Kaminski, Research Assistant Professor, Department of Center for Neurovirology and Gene Editing; PhD.

Shin Hyeok Kang, Assistant Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Johns Hopkins University School of Medicine.

Lawrence Kaplan, Professor, Department of Medicine; MD.

Karan Kapoor, Assistant Professor, Department of Medicine; MD.

Sergey Karakashev, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD.

Sunil Karhadkar, Associate Professor, Department of Surgery; MBBS.

Alyssa Karl, Clinical Assistant Professor, Department of Emergency Medicine; MD.

David J. Karras, Professor, Department of Emergency Medicine; MD.

Mohammed A. Kashem, Research Assistant Professor, Department of Surgery; PhD.

Willard Stein Kasoff, Associate Professor, Department of Neurosurgery; MD.

Paul Katz, Clinical Professor, Department of Neurology; MD.

Martin Keane, Professor, Department of Medicine; MD.

Nicole Keane, Clinical Assistant Professor, Department of Medicine; MBBSCh.

Amer Kechli, Clinical Professor, Department of Pediatrics; MD.

Kathleen M. Keefe, Assistant Professor, Department of Biomedical Education and Data Science; PhD.

Cory Keller, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; DO.

Caroline Kelly, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

Steven G. Kelsen, Professor, Department of Thoracic Medicine and Surgery; MD.

Renee M. Kendziarski, Clinical Assistant Professor, Department of Radiology; DO.

Michael F. Keresztury, Clinical Professor, Department of Anesthesiology; MD.

Kamel Khalili, Laura H. Carnell Professor, Department of Center for Neurovirology and Gene Editing; PhD, University of Pennsylvania School of Medicine.

Adil Irfan Khan, Associate Professor, Department of Pathology and Laboratory Medicine; PhD.

Mansoor Khan, Clinical Associate Professor, Department of Radiology; MD.

Mohsin Khan, Assistant Professor, Department of Cardiovascular Sciences; PhD, University of the Punjab.

Laurie Kilpatrick, Professor, Department of Center for Inflammation and Lung Research; PhD, University of Pennsylvania.

Andrew Kim, Clinical Assistant Professor, Department of Radiology; MD.

Bong-Soo Kim, Clinical Professor, Department of Neurosurgery; MD.

Daniel Kim, Assistant Professor, Department of Medicine; MD.

Rebecca Kim, Clinical Assistant Professor, Department of Medicine; MD.

Seonhee Kim, Associate Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Rutgers University.

Louis King, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Neil A. King, Assistant Professor, Department of Surgery; MD.

Lynn Kirby, Professor, Department of Center for Substance Abuse Research; PhD, University of Pennsylvania.

Natasha Kiryankova-Dalseth, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; MD.

Raj Kishore, Professor, Department of Center for Translational Medicine; PhD, Lucknow University.

Walter J. Koch, Professor and the William Wikoff Smith Endowed Chair in Cardiovascular Medicine, Department of Center for Translational Medicine; PhD, University of Cincinnati College of Medicine.

Robert Koenigsberg, Professor, Department of Radiology; DO.

Donald Koers, Assistant Professor, Department of Anesthesiology; MD.

Lauren Koffman, Clinical Assistant Professor, Department of Neurology; DO.

Beata Kosmider, Professor, Department of Center for Inflammation and Lung Research; PhD, University of Lodz.

Nikhil Kothari, Clinical Assistant Professor, Department of Medicine; MD.

Sheetal Koul, Clinical Assistant Professor, Department of Medicine; MBBS.

Jessica G. Kovach, Clinical Professor, Department of Psychiatry and Behavioral Science; MD.

Samuel L. Krachman, Professor, Department of Thoracic Medicine and Surgery; DO.

Mark Krakauer, Clinical Associate Professor, Department of Ophthalmology; MD.

Kristin Kain Krauss, Clinical Associate Professor, Department of Anesthesiology; MD.

Benjamin Krevsky, Professor, Department of Medicine; MD.

Kewal Krishan, Clinical Associate Professor, Department of Surgery; MBBS.

Barbara Krynska, Research Associate Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Medical University of Silesia.

Riya Kuklani, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; DDS.

Maruti Kumaran, Associate Professor, Department of Radiology; MBBS.

Satya P. Kunapuli, Professor, Department of Sol Sherry Thrombosis Research Center; PhD, Indian Institute of Science.

Lindsay Kuo, Assistant Professor, Department of Surgery; MD.

Caitlyn Labella, Clinical Assistant Professor, Department of Medicine; MD.

James Labor, Clinical Associate Professor, Department of Emergency Medicine; MD.

Tim Lachman, Clinical Professor, Department of Neurology; MD.

Vladimir Lakhter, Assistant Professor, Department of Medicine; DO.

T. Dianne Langford, Professor, Department of Center for Substance Abuse Research; PhD, University of Alabama.

David Laslett, Assistant Professor, Department of Medicine; MD.

Kwan Nang Lau, Associate Professor, Department of Surgery; MD.

Menachem Leasy, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

Derek Lee, Assistant Professor, Department of Radiology; MD.

Iris Lee, Professor, Department of Medicine; MD.

Janet B. Lee, Associate Professor, Department of Pediatrics; MD.

Jean Lee, Clinical Professor, Department of Medicine; MD.

Shane Lee, Clinical Assistant Professor, Department of Radiology; MD.

Woo Jung Jay Lee, Clinical Associate Professor, Department of Medicine; MB.

Young Ju Lee, Clinical Assistant Professor, Department of Medicine; MD.

Paul Leone, Clinical Assistant Professor, Department of Medicine; MD.

Eros Leotta, Clinical Assistant Professor, Department of Surgery; MD.

Noah Levinson, Clinical Assistant Professor, Department of Neurology; MD.

Nicole Levy, Assistant Professor, Department of Radiology; MD.

Shuxin Li, Professor, Department of Shriners Hospitals Pediatric Research Center; MD, PhD, Henan Medical University.

Si Li, Clinical Assistant Professor, Department of Medicine; MD.

Abdelhamid Liacini, Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

Dan A. Liebermann, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Weizmann Institute.

Adrienne Ligouri, Clinical Assistant Professor, Department of Anesthesiology; MD.

Chien-Fu Lin, Clinical Assistant Professor, Department of Medicine; MD.

Karen Lin, Clinical Professor and the Abraham Roth Chair in Preventative Medicine, Department of Medicine; MD.

Stephen Ling, Clinical Professor, Department of Radiology; MD.

Jeffrey Liu, Associate Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Xiaolei Liu, Assistant Professor, Department of Lemole Center for Integrated Lymphatics Research; PhD, University of Oklahoma Health Sciences Center.

Lee-Yuan Liu-Chen, Professor, Department of Center for Substance Abuse Research; PhD, Massachusetts Institute of Technology.

Jon Livelsberger, Clinical Associate Professor, Department of Anesthesiology; DO.

Carla Lopinto-Khoury, Associate Professor, Department of Neurology; MD.

Matthew Lorei, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Victor Luna, Assistant Professor, Department of Alzheimer's Center at Temple; PhD.

Jin Jun Luo, Professor, Department of Neurology; MD, PhD.

Nicholas Lyssenko, Instructor, Department of Alzheimer's Center at Temple; PhD.

Grace X. Ma, Laura H. Carnell Professor, Department of Center for Asian Health; PhD, University of Oklahoma.

Flore Macenat Sulzynski, Clinical Assistant Professor, Department of Anesthesiology; MD.

Mark Magee, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Zoe Maher, Associate Professor, Department of Surgery; MD.

Ian Maitin, Professor, Department of Physical Medicine and Rehabilitation; MD.

Mark Malamood, Clinical Assistant Professor, Department of Medicine; MD.

Zubair Malik, Associate Professor, Department of Medicine; MD.

Albert James Mamary, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

David Manoff, Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

Nathaniel Marchetti, Professor, Department of Thoracic Medicine and Surgery; DO.

Hillel Maresky, Assistant Professor, Department of Radiology; MD.

Aswin Mathew, Clinical Assistant Professor, Department of Medicine; MD.

Brionna Matt, Clinical Assistant Professor, Department of Medicine; DO.

Stephen McCaughan, Clinical Associate Professor, Department of Anesthesiology; DO.

Joseph McComb, Clinical Associate Professor, Department of Anesthesiology; DO.

Lindsay McGann, Clinical Assistant Professor, Department of Medicine; MD.

Alexander McGinley, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Rita McKeever, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Erica McKernan, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Paige McLaughlin, Assistant Professor, Department of Anesthesiology; MD.

Caitlin McLean, Clinical Associate Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Robert McNamara, Professor, Department of Emergency Medicine; MD.

Keith McNellis, Clinical Professor, Department of Medicine; MD.

Amanda Mcvey, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

Jared Meshekow, Clinical Assistant Professor, Department of Radiology; MD.

Michael Metro, Clinical Associate Professor, Department of Urology; MD.

Pietro Miazzo, Clinical Professor, Department of Psychiatry and Behavioral Science; MD.

Nicole Mills, Assistant Professor, Department of Thoracic Medicine and Surgery; DO.

Nancy Minniti, Clinical Assistant Professor, Department of Neurology; PsyD.

Aaron Mishkin, Assistant Professor, Department of Medicine; MD.

Curtis Miyamoto, Professor, Department of Radiation Oncology; MD.

Neena Mohan, Clinical Assistant Professor, Department of Medicine; MD.

Sadia Mohsin, Assistant Professor, Department of Cardiovascular Research Center; PhD, University of the Punjab.

Suyog A. Mokashi, Assistant Professor, Department of Surgery; MD.

Mehri Mollaei, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

Lauren Monaco, Clinical Assistant Professor, Department of Medicine; MD.

Marc Monestier, Professor, Department of Biomedical Education and Data Science; MD, PhD, University of Lyon.

Richard Month, Clinical Associate Professor, Department of Anesthesiology; MD.

Pekka Mooar, Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Gordon Morewood, Clinical Professor, Department of Anesthesiology; MD.

Mary Morrison, Professor, Department of Psychiatry and Behavioral Science; MD.

Christine Mount, Clinical Associate Professor, Department of Physician Assistant Program; MS.

Ray Moyer, Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Daniel Mueller, Clinical Associate Professor, Department of Medicine; MD.

Wadia Mulla, Clinical Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Michael Mullen, Associate Professor, Department of Neurology; MD.

Gurpreet Mundi, Clinical Assistant Professor, Department of Anesthesiology; MD.

Maria Munoz-Allen, Clinical Associate Professor, Department of Anesthesiology; MD.

Lauren Murphy, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Meghan Musselman, Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Jack H. Mydlo, Professor, Department of Urology; MD.

Sumithra Nalla, Clinical Assistant Professor, Department of Medicine; MBBS.

John Nawn, Clinical Assistant Professor, Department of Medicine; MD.

Joshua Nelson, Clinical Assistant Professor, Department of Anesthesiology; MD.

Andy Ngo, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MD.

Malgorzata Nieborowska-Skorska, Research Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; MD, PhD.

Dmitry Niman, Clinical Professor, Department of Radiology; MD.

Michelle Noreski, Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; DO.

David O'Gurek, Associate Professor, Department of Family and Community Medicine; MD.

Brian O'Murchu, Clinical Professor, Department of Medicine; MD.

Bryan O'Young, Professor, Department of Physical Medicine and Rehabilitation; MD.

Emily A. Oliver, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MBBS.

Estefania Oliveros Soles, Assistant Professor, Department of Medicine; MD.

Ebenezer Oni, Assistant Professor, Department of Medicine; MBBS.

Lawrence Oresanya, Assistant Professor, Department of Surgery; MD.

Natalia Ortiz, Clinical Professor, Department of Psychiatry and Behavioral Science; MD.

Kourtney Osorio, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

Kaede Ota, Professor, Department of Pathology and Laboratory Medicine; MD.

Brett Oxberry, Associate Professor, Department of Biomedical Education and Data Science; PhD.

Avita Pahwa, Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Joseph Panaro, Clinical Associate Professor, Department of Radiology; MD.

Ioannis P. Panidis, Professor, Department of Medicine; MD.

Anuradha Paranjape, Professor, Department of Medicine; MBBS.

Dustin Pardo, Clinical Associate Professor, Department of Medicine; MD.

Henry P. Parkman, Professor, Department of Medicine; MD, Case Western Reserve University.

Akash S. Patel, Assistant Professor, Department of Medicine; DO.

Arjun Patel, Clinical Assistant Professor, Department of Medicine; MD.

Dilipkumar Patel, Clinical Professor, Department of Anesthesiology; MBBS.

Monica Patel, Clinical Assistant Professor, Department of Medicine; DO.

Abhijit Pathak, Professor, Department of Surgery; MD.

Pravin Patil, Professor, Department of Medicine; MD.

Jessica Patterson, Clinical Assistant Professor, Department of Emergency Medicine; MD.

David Paul, Clinical Assistant Professor, Department of Anesthesiology; DO.

Theresa Pazonis, Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Jack Peace, Clinical Assistant Professor, Department of Anesthesiology; MD.

Helen E. Pearson, Associate Professor, Department of Biomedical Education and Data Science; PhD, Medical College of Pennsylvania.

Lee Peng, Clinical Professor, Department of Medicine; MD, PhD.

Stephen Permut, Professor, Department of Family and Community Medicine; MD.

Yuri Persidsky, Professor, Department of Pathology and Laboratory Medicine; MD, PhD, Kiev State Medical Institute.

Sara Peterson, Clinical Associate Professor, Department of Medicine; MD.

Roman Petrov, Associate Professor, Department of Thoracic Medicine and Surgery; MD, PhD.

Victoria Pham, Clinical Assistant Professor, Department of Anesthesiology; MD.

Kristopher Philogene, Clinical Assistant Professor, Department of Medicine; MD.

Matthew Philp, Clinical Associate Professor, Department of Surgery; MD.

Gregory Piech, Clinical Assistant Professor, Department of Medicine; MD.

Shaun Plotnick, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Juan Poggio, Professor, Department of Surgery; MD.

Natasha Pollak, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Michel A. Pontari, Professor, Department of Urology; MD.

Steven N. Popoff, Professor and the John Franklin Huber Chair, Department of Biomedical Education and Data Science; PhD, Loyola University.

Raghava Potula, Professor, Department of Pathology and Laboratory Medicine; PhD, Jawaharlal Nehru Institute of Postgraduate Medical Education and Research.

Valeriya Poukas, Clinical Associate Professor, Department of Neurology; MD.

Seyedmohammad Pourshahid, Clinical Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

Theresa Power, Clinical Associate Professor, Department of Radiology; DO.

Swayam Prabha, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Nebraska Medical Center.

Domenico Praticò, Professor and the Scott Richards North Star Charitable Foundation Chair for Alzheimer's Research, Department of Alzheimer's Center at Temple; MD, University of Roma, La Sapienza Medical School.

Jeremy G. Price, Assistant Professor, Department of Radiation Oncology; MD, PhD.

Daniela M. Proca, Clinical Professor, Department of Pathology and Laboratory Medicine; MD.

Mary T. Pronovost, Clinical Associate Professor, Department of Surgery; MD.

Paul H. Pronovost, Clinical Associate Professor, Department of Medicine; MD.

Danielle Pulton, Clinical Assistant Professor, Department of Anesthesiology; MD.

Lisa Rae, Associate Professor, Department of Surgery; MD.

Yusuf Rahman, Clinical Assistant Professor, Department of Medicine; DO.

Sudarsan Rajan, Research Associate Professor, Department of Center for Translational Medicine; PhD.

Charu Rajput, Research Instructor, Department of Center for Inflammation and Lung Research; PhD.

Ilay Rakhman, Clinical Assistant Professor, Department of Medicine; MD.

Val Rakita, Assistant Professor, Department of Medicine; MD.

Parth Rali, Associate Professor, Department of Thoracic Medicine and Surgery; MBBS.

Ravishankar Raman, Clinical Assistant Professor, Department of Surgery; MBBS.

Servio Ramirez, Professor, Department of Pathology and Laboratory Medicine; PhD, University of Rochester School of Medicine and Dentistry.

A. Koneti Rao, Sol Sherry Professor, Department of Pathology and Laboratory Medicine; MBBS, All India Institute of Medical Sciences.

Ajaykumar Rao, Associate Professor, Department of Medicine; MD.

Aarif Rassiwalla, Clinical Associate Professor, Department of Medicine; MD.

Hannah Ravreby, Clinical Associate Professor, Department of Medicine; MD.

Scott M. Rawls, Professor, Department of Center for Substance Abuse Research; PhD, East Carolina University School of Medicine.

Jessica Reardon, Clinical Associate Professor, Department of Anesthesiology; DO.

Adam Reese, Associate Professor, Department of Urology; MD.

Kathleen Reeves, Clinical Professor, Department of Pediatrics; MD.

Saqib Rehman, Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Zachary W. Reichenbach, Assistant Professor, Department of Medicine; MD, PhD.

Zachary Repanshek, Clinical Associate Professor, Department of Emergency Medicine; MD.

Lori Lee Rhodes, Assistant Professor, Department of Surgery.

Charis Ripley-Hager, Assistant Professor, Department of Surgery.

Victor Rizzo, Professor, Department of Cardiovascular Research Center; PhD, University of Medicine and Dentistry of New Jersey, New Jersey Medical School.

Dmitry Roberman, Clinical Assistant Professor, Department of Anesthesiology; DO.

Monique Roberts, Clinical Assistant Professor, Department of Anesthesiology; MD.

William Robinson, Professor, Department of Biomedical Education and Data Science; PhD, DPT.

Thomas J. Rogers, Professor, Department of Center for Inflammation and Lung Research; PhD, University of Wisconsin-Madison.

Slava Rom, Assistant Professor, Department of Pathology and Laboratory Medicine; PhD, Ben-Gurion University of the Negev.

Michelle Romeo, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Yuan Rong, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD, PhD.

Marisa Rose, Clinical Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Jennifer Rosenbaum, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Naomi Rosenberg, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Jeffrey Rosenblum, Clinical Assistant Professor, Department of Urology; MD.

Anika Ross, Clinical Assistant Professor, Department of Medicine; DO.

Brad S. Rothberg, Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, University of Florida.

Isoke Roundtree, Clinical Associate Professor, Department of Medicine; MD.

Daniel Rubin, Professor, Department of Medicine; MD.

Jonathan Rubin, Clinical Assistant Professor, Department of Radiology; MD.

Rachel Rubin, Clinical Associate Professor, Department of Medicine; MD.

Abdelkarim Sabri, Professor, Department of Cardiovascular Research Center; PhD, Rene Descartes University.

Mahmut Safak, Associate Professor, Department of Center for Neurovirology and Gene Editing; PhD, Thomas Jefferson University.

Amy Safran-Henderson, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

Yedidya Saiman, Assistant Professor, Department of Medicine; MD, PhD.

Umadevi Sajjan, Associate Professor, Department of Center for Inflammation and Lung Research; PhD, University of Mysore.

Yidy Yuliana Salamanca-Padilla, Clinical Associate Professor, Department of Anesthesiology; MD.

Larissa Salas, Clinical Associate Professor, Department of Anesthesiology; DO.

Daniel Salerno, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

Denise Salerno, Clinical Professor, Department of Pediatrics; MD.

Maura Sammon, Clinical Associate Professor, Department of Emergency Medicine; MD.

Rafik Samuel, Professor, Department of Medicine; MD.

Thomas Santora, Professor, Department of Surgery; MD.

Carmen Sapienza, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Dalhousie University.

Ilker K. Sariyer, Research Associate Professor, Department of Center for Neurovirology and Gene Editing; PhD, DVM, Temple University.

Aditi Satti, Clinical Professor, Department of Thoracic Medicine and Surgery; MD.

Wayne A. Satz, Clinical Associate Professor, Department of Emergency Medicine; MD.

Bassel E. Sawaya, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Rene Descartes University.

Vishal Saxena, Assistant Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Rosario Scalia, Professor, Department of Cardiovascular Research Center; MD, PhD, University of Catania.

Scott A. Schartel, Professor, Department of Anesthesiology; DO.

Cecelia Schmalbach, Professor and the David Myers, MD Chair, Department of Otolaryngology - Head and Neck Surgery; MD.

Frank Schmieder, Clinical Professor, Department of Surgery; MD.

Ryan Schreiter, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; DO.

Kraftin Schreyer, Associate Professor, Department of Emergency Medicine; MD.

Geri A. Schulman, Professor, Department of Medicine.

Sara Schultz, Associate Professor, Department of Medicine; MD.

Ari B. Schwell, Clinical Professor, Department of Emergency Medicine; MD.

Michael Selzer, Professor, Department of Shriners Hospitals Pediatric Research Center; MD, PhD, New York University.

Anjali Seth, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; PhD.

Anish Sethi, Clinical Assistant Professor, Department of Anesthesiology; DO.

Joseph Sowards, Clinical Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Michael Shafik, Clinical Assistant Professor, Department of Medicine; DO.

Avani Shah, Clinical Assistant Professor, Department of Neurology; MD.

Monali Shah, Clinical Assistant Professor, Department of Medicine; MD.

Dharmini Shah Pandya, Clinical Associate Professor, Department of Medicine; MD.

Yanfu Shao, Clinical Professor, Department of Anesthesiology; MD.

Manjari Sharma, Clinical Associate Professor, Department of Medicine; MBBS.

Kartik Shenoy, Professor, Department of Thoracic Medicine and Surgery; MD.

Scott Shepard, Clinical Professor, Department of Neurosurgery; MD.

Norihisa Shigemura, Professor, Department of Surgery; MD, PhD.

Scott K. Shore, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Drexel University.

Edward Siegel, Clinical Associate Professor, Department of Emergency Medicine; MD.

Mari Siegel, Clinical Associate Professor, Department of Emergency Medicine; MD.

Stephanie E. Sullivan, Assistant Professor, Department of Center for Substance Abuse Research; PhD, Vanderbilt University.

Jillian Simon, Assistant Professor, Department of Cardiovascular Sciences; PhD, University of Illinois at Chicago.

Matthew Simon, Clinical Associate Professor, Department of Emergency Medicine; MD.

Peter Simonsson, Assistant Professor, Department of Center for Urban Bioethics; PhD.

Jason Sims, Clinical Assistant Professor, Department of Medicine; MD.

Imali Sirisena, Clinical Associate Professor, Department of Medicine; MD.

Lars Ola Sjöholm, Clinical Associate Professor, Department of Surgery; MD.

Tomasz Skorski, Professor, Department of Fels Cancer Institute for Personalized Medicine; MD, PhD, DSc, Medical Academy of Warsaw.

Jeffrey Smietana, Assistant Professor, Department of Medicine; MD.

Cara Lea Smith, Clinical Assistant Professor, Department of Medicine; MD.

George Smith, Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Case Western Reserve University.

Nathaniel W. Snyder, Associate Professor, Department of Center for Metabolic Disease Research; PhD, University of Pennsylvania.

Rachel Snyder, Clinical Assistant Professor, Department of Medicine; MD.

Samantha So, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Rohit Soans, Associate Professor, Department of Surgery; MD.

Jonathan Soboloff, Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, University of Ottawa.

Mark Solarz, Clinical Associate Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Ahmed Soliman, Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Debra L. Somers, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Young-Jin Son, Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, University of Texas at Austin.

Dianne R. Soprano, Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, Rutgers University.

Stephanie Spivack, Clinical Assistant Professor, Department of Medicine; MD.

Uma Sriram, Research Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

James Stefano, Clinical Assistant Professor, Department of Medicine; MD.

Gerald Sterling, Professor, Department of Biomedical Education and Data Science; PhD.

Sam Stern, Clinical Associate Professor, Department of Medicine; MD.

Nicolle Strand, Associate Professor, Department of Center for Urban Bioethics; JD.

Francisco Felipe Suero, Clinical Assistant Professor, Department of Anesthesiology; MD.

Gail Sullivan, Clinical Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD.

Rebecca Sullivan, Professor, Department of Biomedical Education and Data Science; PhD.

Enid Sun, Clinical Assistant Professor, Department of Medicine; MD.

Vincent Tam, Assistant Professor, Department of Microbiology, Immunology and Inflammation; PhD, Harvard Medical School.

Michiko Taniguchi, Assistant Professor, Department of Pathology and Laboratory Medicine; PhD.

Suad Tarraf, Clinical Associate Professor, Department of Pathology and Laboratory Medicine; MD.

Heidi Taylor, Clinical Associate Professor, Department of Pediatrics; DO.

Ellen Tedaldi, Professor, Department of Medicine; MD.

Sean Thatcher, Associate Professor, Department of Biomedical Education and Data Science; PhD.

Joseph Thoder, John W. Lachman Professor, Department of Orthopaedic Surgery and Sports Medicine; MD.

Emil Thomas, Clinical Associate Professor, Department of Medicine; MD.

Gareth Thomas, Associate Professor, Department of Shriners Hospitals Pediatric Research Center; PhD, Dundee University.

Ying Tian, Associate Professor, Department of Center for Translational Medicine; PhD, Temple University.

Douglas Tilley, Professor, Department of Center for Translational Medicine; PhD, Queen's University.

Stephanie Tittaferrante, Clinical Assistant Professor, Department of Medicine; MD.

Pedro Torres-Ayuso, Assistant Professor, Department of Cancer and Cellular Biology; PhD, Autonomous University of Madrid.

Yoshiya Toyoda, Professor and the William Maul Measey Chair in Surgery, Department of Surgery; MD, PHD.

John Travaline, Professor, Department of Thoracic Medicine and Surgery; MD.

Gaurav Trehan, Clinical Professor, Department of Anesthesiology; MD.

Ching Tsao, Clinical Assistant Professor, Department of Neurology; MD.

Alexander Y. Tsygankov, Associate Professor, Department of Sol Sherry Thrombosis Research Center; PhD, Bach Institute of Biochemistry, Moscow.

James Rory Tucker, Clinical Assistant Professor, Department of Family and Community Medicine; MD.

Chaim Tuckman, Clinical Assistant Professor, Department of Medicine; MD.

Ronald F. Tuma, George H. Stewart Professor, Department of Center for Substance Abuse Research; PhD, Temple University.

Brian Tuohy, Assistant Professor, Department of Center for Urban Bioethics; PhD.

Nicholas Tyner, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Çagla Tükel, Associate Professor, Department of Center for Microbiology and Immunology; PhD, Ankara University.

Jacob W. Ufberg, Professor, Department of Emergency Medicine; MD.

Audrey Uknis, Professor, Department of Medicine; MD.

Mehriban Ulas, Clinical Assistant Professor, Department of Pathology and Laboratory Medicine; MD, PhD.

Ellen M. Unterwald, Professor, Department of Center for Substance Abuse Research; PhD, Boston University School of Medicine.

Anjali Vaidya, Professor, Department of Medicine; MD.

Paul Van Bemmelen, Professor, Department of Surgery; MD, PhD.

William Van Decker, Professor, Department of Medicine; MD.

James T. VandenBerg, Clinical Assistant Professor, Department of Emergency Medicine; MD.

Priju Varghese, Clinical Assistant Professor, Department of Medicine; MD.

Cherie Lisa Vaz Wicks, Associate Professor, Department of Medicine; MBBS.

Maria Elena Vega Sanchez, Clinical Associate Professor, Department of Thoracic Medicine and Surgery; MD.

Varun Vendra, Assistant Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Nicholas R. Villalta, Clinical Assistant Professor, Department of Medicine; MD.

Philip Villanueva, Clinical Professor, Department of Neurosurgery; MD.

Ernest Vina, Associate Professor, Department of Medicine; MD.

David A. Wald, Professor, Department of Emergency Medicine; DO.

M. Ingre Walters, Clinical Associate Professor, Department of Psychiatry and Behavioral Science; MD.

Hong Wang, Laura H. Carnell Professor, Department of Center for Metabolic Disease Research; MD, PhD, University of Montreal.

Jiaqiong Wang, Clinical Assistant Professor, Department of Radiology; MD, PhD.

Sara Jane Ward, Assistant Professor, Department of Center for Substance Abuse Research; PhD, Wake Forest University.

Susan Ward, Clinical Instructor, Department of Otolaryngology - Head and Neck Surgery; AuD.

Arthur Washburn, Associate Professor, Department of Biomedical Education and Data Science; PhD.

Michael W. Weaver, Professor, Department of Neurosurgery; MD.

Sheila E. Weaver, Clinical Professor, Department of Thoracic Medicine and Surgery; DO.

Kelly A. Whelan, Assistant Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Drexel University.

Karl Vincent Whitley, Clinical Associate Professor, Department of Otolaryngology - Head and Neck Surgery; MD.

Isaac R. Whitman, Associate Professor, Department of Medicine; MD.

John Wiebelhaus, Assistant Professor, Department of Anesthesiology; MD.

Mauricio Wilk, Clinical Assistant Professor, Department of Surgery; MD.

Eric Wilkens, Clinical Professor, Department of Anesthesiology; MD.

Kevin Williams, Professor, Department of Cardiovascular Research Center; MD.

Paul Williams, Clinical Associate Professor, Department of Medicine; MD.

Jennifer Windstein, Clinical Associate Professor, Department of Physician Assistant Program; MS.

Marla R. Wolfson, Professor, Department of Center for Translational Medicine; PhD, Temple University.

Hassen S. Wollebo, Assistant Professor, Department of Center for Neurovirology and Gene Editing; PhD, Humboldt University.

Matthew Wong, Clinical Associate Professor, Department of Emergency Medicine; MD.

Brian Work, Clinical Associate Professor, Department of Medicine; MD.

Sam Wu, Clinical Professor, Department of Physical Medicine and Rehabilitation; MD.

Sheng Wu, Associate Professor, Department of Center for Metabolic Disease Research; PhD, University of Victoria.

Janice Yackoski, Clinical Assistant Professor, Department of Medicine; MD.

Roh Yanagida, Assistant Professor, Department of Surgery; MD, PhD.

Ling Yang, Assistant Professor, Department of Medical Genetics and Molecular Biochemistry; PhD, Chinese Academy of Sciences.

Xiao-Feng Yang, Professor, Department of Cardiovascular Research Center; MD, PhD, University of Montreal.

Yoon Kyong Yang, Clinical Associate Professor, Department of Medicine; MD, Yonsei University Wonju College of Medicine.

Ho-Man Yeung, Clinical Assistant Professor, Department of Medicine; MD.

Daohai Yu, Professor, Department of Center for Biostatistics and Epidemiology; PhD.

Jun Yu, Associate Professor, Department of Center for Metabolic Disease Research; MD, Yale University School of Medicine.

M. Raza Zaidi, Associate Professor, Department of Fels Cancer Institute for Personalized Medicine; PhD, Rutgers University, Robert Wood Johnson Medical School.

Massa Zantah, Assistant Professor, Department of Thoracic Medicine and Surgery; MD.

Yi Zhang, Clinical Associate Professor, Department of Ophthalmology; MD, PhD.

Huaqing Zhao, Professor, Department of Center for Biostatistics and Epidemiology; PhD.

Xin Zhou, Clinical Assistant Professor, Department of Neurology; MD.

Lin Zhu, Assistant Professor, Department of Center for Asian Health; PhD.

Polina Zilbering, Clinical Assistant Professor, Department of Psychiatry and Behavioral Science; MD.

Beverley Zuccarello, Clinical Assistant Professor, Department of Physician Assistant Program; MS.

School of Pharmacy

Magid Abou-Gharbia, Laura H. Carnell Professor, Department of Pharmaceutical Sciences; PhD, University of Pennsylvania.

Carlos Barrero, Assistant Professor, Department of Pharmaceutical Sciences; MD, Universidad de Caldas.

Neela Bhajandas, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Benjamin E. Blass, Assistant Professor, Department of Pharmaceutical Sciences; PhD, University of Rochester.

Michael R. Borenstein, Associate Professor, Department of Pharmaceutical Sciences; PhD, Temple University.

Daniel J. Canney, Associate Professor, Department of Pharmaceutical Sciences; PhD, Temple University.

Marrisa Cavaretta, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Albany College of Pharmacy.

Michael J. Cawley, Clinical Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Wayne E. Childers, Associate Professor, Department of Pharmaceutical Sciences; PhD, University of Georgia.

Katherine Cho, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, University of Michigan.

Mark Cinquegrani, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, University of Wisconsin.

A. Reza Fassih, Professor, Department of Pharmaceutical Sciences; PhD, Brighton University.

Jason C. Gallagher, Clinical Professor, Department of Pharmacy Practice; PharmD, Rutgers University.

Patrick M. Glassman, Assistant Professor, Department of Pharmaceutical Sciences; PhD, University at Buffalo.

Van T. Hellerslia, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Marc A. Ilies, Professor of Instruction, Department of Pharmaceutical Sciences; PhD, University of Bucharest.

Kenneth R. Korzekwa, Professor, Department of Pharmaceutical Sciences; PhD, University of Washington.

David B. Lebo, Professor of Instruction, Department of Pharmaceutical Sciences; PhD, Philadelphia College of Pharmacy.

Patrick J. McDonnell, Clinical Professor, Department of Pharmacy Practice; PharmD, Temple University.

Salim Merali, Professor, Department of Pharmaceutical Sciences; PhD, City University of New York.

Margaret A. Miklich, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, University at Buffalo.

Swati V. Nagar, Professor, Department of Pharmaceutical Sciences; PhD, University of Minnesota.

Jayanth Panyam, Professor, Department of Pharmaceutical Sciences; PhD, University of Nebraska Medical Center.

Nima M. Patel-Shori, Clinical Professor, Department of Pharmacy Practice; PharmD, Rutgers University.

Oscar Perez-Leal, Assistant Professor, Department of Pharmaceutical Sciences; MD, Universidad del Norte.

Melissa Mary Potts, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Temple University.

Talitha L. Pulvino, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Temple University.

Mario C. Rico, Research Assistant Professor, Department of Pharmaceutical Sciences; MD, Universidad Nacional de Colombia.

Natalie P. Rodriguez, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Susan Romann, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, University of North Carolina.

Christina Rose, Clinical Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Melissa E. Rotz, Clinical Associate Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Charles Ruchalski, Clinical Professor, Department of Pharmacy Practice; PharmD, Temple University.

Nicole Sifontis, Clinical Professor, Department of Pharmacy Practice; PharmD, Philadelphia College of Pharmacy.

Divita Singh, Clinical Assistant Professor, Department of Pharmacy Practice; PharmD, Rutgers University.

Tina Tran, Assistant Professor, Department of Pharmacy Practice; PharmD, University of California San Francisco.

Ellen A. Walker, Professor, Department of Pharmaceutical Sciences; PhD, University of Michigan.

Ho-Lun Wong, Professor, Department of Pharmaceutical Sciences; PhD, University of Toronto.

Hui Yi Xue, Research Assistant Professor, Department of Pharmaceutical Sciences; PhD, University of Toronto.

School of Podiatric Medicine

Khurram H. Khan, Associate Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

Kwasi Y. Kwaadu, Associate Professor, Department of Podiatric Surgery; DPM, Temple University School of Podiatric Medicine.

Ziad George Labbad, Professor, Department of Podiatric Biomechanics; DPM, Temple University School of Podiatric Medicine.

Ebony L. Love, Associate Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

James B. McGuire, Professor, Department of Podiatric Medicine; DPM, Pennsylvania College of Podiatric Medicine.

Andrew J. Meyr, Professor, Department of Podiatric Surgery; DPM, Temple University School of Podiatric Medicine.

Joshua Moore, Professor, Department of Podiatric Surgery; DPM, Des Moines University College of Podiatric Medicine and Surgery.

Steven J. Pettineo, Associate Professor, Department of Podiatric Biomechanics; DPT, Temple University.

Jane Pontious, Professor, Department of Podiatric Surgery; DPM, Pennsylvania College of Podiatric Medicine.

Lesly Robinson, Associate Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

Laura E. Sansosti, Associate Professor, Department of Podiatric Biomechanics; DPM, Temple University School of Podiatric Medicine.

Jinsup Song, Assistant Professor, Department of Podiatric Biomechanics; DPM, Temple University School of Podiatric Medicine, PhD, Drexel University.

Samuel Spadone, Instructor, Department of Podiatric Medicine; DPM, Pennsylvania College of Podiatric Medicine.

Jennifer C. Van, Associate Professor, Department of Podiatric Surgery; DPM, Temple University School of Podiatric Medicine.

Tracey C. Vlahovic, Professor, Department of Podiatric Medicine; DPM, Temple University School of Podiatric Medicine.

Tyler School of Art and Architecture

Mariola Alvarez, Assistant Professor, Department of Art History; PhD, University of California.

Stephen M. Anderson, Associate Professor of Instruction, Department of Architecture and Environmental Design; MArch, University of Pennsylvania.

Kate E. Benisek, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MLA, Cornell University.

Philip P. Betancourt, Professor Emeritus, Department of Art History; PhD, University of Pennsylvania.

Sonja Bijelic, Associate Professor of Instruction, Department of Architecture and Environmental Design; MArch, New Jersey Institute of Technology.

Gerard F. Brown, Associate Professor, Department of Art; MA, School of the Art Institute of Chicago.

Douglas J. Bucci, Assistant Professor, Department of Art; MFA, Temple University.

Susan E. Cahan, Professor, Department of Art History; PhD, Graduate Center, City University of New York.

Joshua S. Caplan, Research Associate Professor, Department of Architecture and Environmental Design.

William J. Cohen, Associate Professor of Practice, Department of Architecture and Environmental Design; PhD, University of Pennsylvania.

Tracy E. Cooper, Professor, Department of Art History; PhD, Princeton University.

Chad D. Curtis, Associate Professor, Department of Art; MFA, Alfred University, New York State College of Ceramics.

Delaney K. DeMott, Assistant Professor of Instruction, Department of Art; MFA, School of the Art Institute of Chicago.

Ryan Devlin, Assistant Professor of Instruction, Department of Architecture and Environmental Design; PhD, University of California Berkeley.

Therese A. Dolan, Professor Emerita, Department of Art History; PhD, Bryn Mawr College.

Jeffrey Doshna, Associate Professor of Instruction, Department of Architecture and Environmental Design; PhD, Rutgers University.

Müge Durusu-Tanrıöver, Assistant Professor, Department of Art History; PhD, Brown University.

Linda Earle, Professor of Practice, Department of Art History; MFA, Columbia University.

Sasha Eisenman, Associate Professor, Department of Architecture and Environmental Design; PhD, Rutgers University.

Amze J. Emmons, Associate Professor, Department of Art; MFA, University of Washington.

Jane DeRose Evans, Professor, Department of Art History; PhD, University of Pennsylvania.

Clifton R. Fordham, Associate Professor, Department of Architecture and Environmental Design; MArch, Yale University.

Samuel C. Fritch, Assistant Professor of Instruction, Department of Foundations; MFA, Temple University.

Mark T. Gibson, Assistant Professor, Department of Art; MFA, Yale University.

Philip Glahn, Associate Professor, Department of Art; PhD, City University of New York.

Abby Ryan Guido, Assistant Professor, Department of Graphic and Interactive Design; MBA, Temple University.

Marcia B. Hall, Laura H. Carnell Professor, Department of Art History; PhD, Harvard University.

Sally W. Harrison, Professor, Department of Architecture and Environmental Design; MArch, Massachusetts Institute of Technology.

Jesse Harrod, Associate Professor, Department of Art; MFA, School of the Art Institute of Chicago.

Nathan Heavers, Associate Professor, Department of Architecture and Environmental Design; MLA, University of Pennsylvania.

David Herman Jr., Assistant Professor, Department of Art Education and Community Arts Practices; PhD, University of North Texas.

Kelly A. Holohan, Professor, Department of Graphic and Interactive Design; MFA, Temple University.

Richard D. Hricko, Professor Emeritus, Department of Art; MFA, University of Iowa.

Pauline Hurley-Kurtz, Associate Professor, Department of Architecture and Environmental Design; MLA, University of Pennsylvania.

Renee E. Jackson, Assistant Professor, Department of Art Education and Community Arts Practices; PhD, Concordia University.

Simona M. Josan-Barkley, Associate Professor of Instruction, Department of Foundations; MFA, Pennsylvania Academy of the Fine Arts.

Jessica Jane Julius, Associate Professor of Instruction, Department of Art; MFA, Rochester Institute of Technology.

Gabriel Kaprielian, Assistant Professor, Department of Architecture and Environmental Design; MArch, University of California Berkeley.

Lisa Kay, Associate Professor, Department of Art Education and Community Arts Practices; EdD, Northern Illinois University.

Nichola Kinch, Associate Professor, Department of Foundations; MFA, Temple University.

Joseph R. Kopta, Assistant Professor of Instruction, Department of Art History; PhD, Temple University.

Jenny Kowalski, Assistant Professor of Instruction, Department of Graphic and Interactive Design; MFA, Temple University.

Robert T. Kuper, Associate Professor, Department of Architecture and Environmental Design; MLA, Auburn University.

Baldev S. Lamba, Associate Professor, Department of Architecture and Environmental Design; MLA, University of Pennsylvania.

Scott R. Laserow, Professor, Department of Graphic and Interactive Design; BFA, Temple University.

- Roberto Lugo*, Assistant Professor, Department of Art; MFA, The Pennsylvania State University.
- Dermot MacCormack*, Professor, Department of Graphic and Interactive Design; BFA, National College of Art and Design, Dublin.
- Martha Madigan*, Professor Emerita, Department of Art; MFA, School of the Art Institute of Chicago.
- Lynn A. Mandarano*, Associate Professor, Department of Architecture and Environmental Design; PhD, University of Pennsylvania.
- Christopher McAdams*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MArch, University of Pennsylvania.
- Pablo Meninato*, Associate Professor, Department of Architecture and Environmental Design; PhD, Universidade Federal do Rio Grande do Sul.
- Rebecca Michaels*, Associate Professor of Instruction, Department of Art; MFA, Temple University.
- Leah Modigliani*, Associate Professor, Department of Art History; PhD, State University of New York at Stony Brook.
- Dona R. Nelson*, Professor, Department of Art; BFA, The Ohio State University.
- Jeffrey Nesbit*, Assistant Professor, Department of Architecture and Environmental Design; DDes, Harvard University, Graduate School of Design.
- Emily Neumeier*, Assistant Professor, Department of Art History; PhD, University of Pennsylvania.
- Rachel Grace Newman*, Assistant Professor, Department of Art History; PhD, Stanford University.
- Sharyn A. O'Mara*, Associate Professor, Department of Art; MFA, Rhode Island School of Design.
- Odili Donald Odita*, Professor, Department of Art; MFA, Bennington College.
- Karyn Olivier*, Professor, Department of Art; MFA, Cranbrook Academy of Art.
- Michael Olszewski*, Associate Professor, Department of Architecture and Environmental Design; PhD, University of Delaware.
- Eric Oskey*, Associate Professor of Practice, Department of Architecture and Environmental Design; MArch, Cornell University.
- Pepón Osorio*, Laura H. Carnell Professor, Department of Art Education and Community Arts Practices; MA, Columbia University.
- Alpesh Patel*, Associate Professor, Department of Art History; PhD, University of Manchester.
- Erin Pauwels*, Assistant Professor, Department of Art History; PhD, Indiana University, Bloomington.
- Andrea Ray*, Associate Professor of Instruction, Department of Art; PhD, Lund University.
- Jeffrey Richards*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MArch, Yale University.
- Fauzia Sadiq Garcia*, Assistant Professor of Instruction, Department of Architecture and Environmental Design; MArch, Harvard University, Graduate School of Design.
- Lauren Sandler*, Associate Professor of Instruction, Department of Art; MFA, The Pennsylvania State University.
- Bryan Martin Satalino*, Associate Professor of Instruction, Department of Graphic and Interactive Design; MFA, Temple University.
- Mark Shaver*, Associate Professor of Instruction, Department of Foundations; MFA, University of Georgia.
- Paul E. Sheriff*, Professor, Department of Graphic and Interactive Design; BFA, Temple University.
- Mark Shetabi*, Associate Professor, Department of Art; MFA, Pennsylvania Academy of the Fine Arts.
- Robert Z. Shuman Jr.*, Associate Professor, Department of Architecture and Environmental Design; BArch, Temple University.
- Gerald D. Silk*, Professor Emeritus, Department of Art History; PhD, University of Virginia.
- Samantha Simpson*, Associate Professor, Department of Foundations; MFA, San Francisco Art Institute.
- Hester Stinnett*, Professor, Department of Art; MFA, Temple University.
- Alexandra Strada*, Assistant Professor, Department of Art; MFA, Columbia University.
- Kim D. Strommen*, Professor, Department of Foundations; MFA, Washington University.
- Lolly Tai*, Professor Emerita, Department of Architecture and Environmental Design; PhD, Heriot-Watt University, Edinburgh College of Art.

Christian Tomaszewski, Assistant Professor, Department of Art; MFA, Academy of Fine Arts in Poznan, Poland.

Ulysses Sean Vance III, Associate Professor, Department of Architecture and Environmental Design; MArch, North Carolina State University.

Jessica Vaughn, Associate Professor, Department of Art; MFA, University of Pennsylvania.

Ashley West, Associate Professor, Department of Art History; PhD, University of Pennsylvania.

Mallory Weston, Associate Professor of Instruction, Department of Art; MFA, Rhode Island School of Design.

M. Katherine Wingert-Playdon, Professor, Department of Architecture and Environmental Design; MS, The Pennsylvania State University.

Andrew Wit, Associate Professor, Department of Architecture and Environmental Design; MArch, Massachusetts Institute of Technology.

Byron Wolfe, Professor, Department of Art; MFA, Arizona State University.

William Yalowitz, Associate Professor, Department of Art Education and Community Arts Practices; EdD, Temple University.

Nathan W. Young, Assistant Professor of Instruction, Department of Graphic and Interactive Design; MFA, Rhode Island School of Design.

Jennifer Zarro, Assistant Professor of Instruction, Department of Foundations; PhD, Rutgers University.

About Courses	1866
About Temple University	23
About This Bulletin (Undergraduate)	22
Academic Calendar (Undergraduate)	2903
Academic Course Load	1836
Academic Forgiveness	1836
Academic Opportunities	48
Academic Policies (Undergraduate)	1835
Academic Programs List	2908
Academic Progress for Undergraduate Courses	1837
Academic Residency Requirements	1838
Academic Rights and Responsibilities	1838
Academic Standing	1840
Academic Support	62
Accelerated Degree Programs	1792
Accelerated Programs (CST)	1430
Accounting (ACCT)	1884
Accounting BBA	807
Accounting BBA with Data Analytics Concentration	812
Accounting Minor	816
Acting Certificate	489
Actuarial Science (AS)	1890
Actuarial Science BBA	817
Adult & Organizational Development (AOD)	1894
Adult and Organizational Development BA	565
Adult and Organizational Development Minor	569
Advanced Core Medical Science (ACMS)	1898
Advanced Core Science Studies Postbaccalaureate Certificate	1448
Advertising (ADV)	1898
Advertising BA with Account Management Concentration	1189
Advertising BA with Art Direction Concentration	1196
Advertising BA with Brand Strategy and Research Concentration	1204
Advertising BA with Copywriting Concentration	1212
Advertising BA with Media Planning Concentration	1219
Aerospace Studies - Air Force ROTC (AIRF)	1909
Africology and African American Studies (AAAS)	1911
Africology and African American Studies BA	959
Africology and African American Studies Minor	963
Ambler Campus	1816

American Sign Language Certificate	1360
American Studies (AMST)	1919
American Studies BA	963
American Studies Minor	967
Analytical Reading & Writing (GW)	89
Ancient Mediterranean Studies Minor	969
Anthropology (ANTH)	1928
Anthropology BA	970
Anthropology Minor	973
Applied Behavior Analysis (ABA)	1948
Applied Behavior Analysis Certificate	569
Applied Epidemiology Minor	1361
Applied Mathematics BS	1449
Arabic (ARBC)	1949
Arabic Certificate	974
Arabic Minor	975
Architecture (ARCH)	1951
Architecture BSArch	117
Art (ART)	1963
Art - Japan Campus (ARTU)	2003
Art BA (TUJ)	122
Art Education (ARTE)	2011
Art Education BSEd	125
Art History (ARTH)	2014
Art History BA	130
Art History Minor	135
Art Minor	136
Art Therapy (ARTT)	2030
Art Therapy BA	137
Arts (GA)	90
Asian Business and Society Certificate	975
Asian Studies (ASST)	2031
Asian Studies BA	976
Asian Studies Minor	980
Assessment of Student Learning	1844
Astrophysics Certificate	1454
Astrophysics Minor	1455
Attendance	1844
Audio and Live Entertainment (ALE)	2040
Audio and Live Entertainment BA	1227
Audit	1844

B

Basic Core Medical Science (BCMS)	2041
Basic Core Science Studies Postbaccalaureate Certificate	1455
BFA Foundation	141
Biochemistry BS	1457
Bioengineering (BIOE)	2041
Bioengineering BS BIOE with Cellular Engineering Concentration	657
Bioengineering BS BIOE with Engineering Devices Concentration	663
Bioengineering BS BIOE with Pre-Health Concentration	668
Biology (BIOL)	2050
Biology BA	1465
Biology BA/MEd	1433
Biology BS	1471
Biology BS/MEd	1433
Biology Minor	1476
Biology with Teaching BS	1478
Biomedical Anthropology Minor	981
Biophysics BS	1484
Botany (BOT)	2077
Boyer College of Music & Dance	314
Boyer College of Music & Dance (BCMD)	2078
Business Administration (BA)	2078
Business Analytics Minor	821
Business Basics Certificate	822
Business Education (BSED)	2083
Business Management BBA	822
Business Minor	826
Business Plus Certificate	827

C

Campuses	1816
Career and Technical Education (CTE)	2083
Career and Technical Education BSEd	570
Career and Technical Education BSEd with Business, Computer and Information Technology Education	574
Career and Technical Education BSEd with Marketing Education Concentration	578
Center for the Performing and Cinematic Arts (CFA)	2085
Center for the Performing and Cinematic Arts (Undergraduate)	313
Ceramics BFA	144
Ceramics with Entrepreneurial Studies BFA	151
Chamber Music Certificate	333
Chemistry (CHEM)	2085
Chemistry BA	1489
Chemistry BA/MEd	1434

Chemistry BS	1494
Chemistry BS/MEd	1435
Chemistry BS/MS	1436
Chemistry Minor	1501
Chemistry with Teaching BS	1503
Children's Media Certificate	1232
Chinese (CHI)	2099
Chinese BA	982
Chinese Certificate	985
Chinese Minor	986
City and Regional Planning (CTRP)	2102
City and Regional Planning Minor	156
Civil Engineering (CEE)	2106
Civil Engineering BSCE	674
Civil Engineering BSCE with Cooperative Education Program Concentration	680
Civil Engineering BSCE with Environmental Engineering & Cooperative Education Program Concentrations	686
Civil Engineering BSCE with Environmental Engineering Concentration	691
Classical Languages and Literature Minor	987
Classical Piano Certificate	334
Classical Voice Certificate	335
Classics BA with Classical Civilizations Concentration	988
Classics BA with Classical Languages and Literature Concentration	992
Clinical and Health Psychology Minor	996
Cognitive Neuroscience Minor	996
College of Education (COED)	2118
College of Education (Undergraduate)	552
College of Engineering (Undergraduate)	648
College of Liberal Arts (CLA)	2118
College of Liberal Arts (Undergraduate)	932
College of Public Health & School of Social Work (CHP)	2123
College of Public Health (Undergraduate)	1350
College of Science & Technology (Undergraduate)	1412
College of Science and Technology (SCTC)	2124
Communication and Activism Minor	1234
Communication and Social Influence (CSI)	2133
Communication and Social Influence BA	1235
Communication Sciences and Disorders (CSCD)	2140
Communication Studies (CMST)	2148
Communication Studies BA with Communication and Entrepreneurship Track	1242
Communication Studies BA with Communication Studies Thesis Track	1250
Communication Studies BA with Contemporary Media Environments Track	1258
Communication Studies BA with Global Civil Society Track	1266

Communication Studies BA with Policy, Regulation and Advocacy Track	1274
Communication Studies BA with Production Track (TUJ)	1282
Communication Studies Minor	1290
Communications and Theater (COMM)	2148
Community Arts (CART)	2149
Community Arts Practices Certificate	157
Community Development (CDEV)	2151
Community Development BS	157
Community Development Minor	162
Composition BM	336
Computer & Information Science (CIS)	2155
Computer Science and Physics BS	1509
Computer Science BA	1513
Computer Science BS	1518
Computer Science Minor	1523
Computer Science, BS/MS	1437
Computer Security and Digital Forensics Certificate	1524
Construction Engineering Technology BSCET	696
Construction Engineering Technology BSCET with Cooperative Education Program Concentration	701
Construction Management Technology (CMT)	2175
Content Creation Minor	1291
Continuing Degree Seeking Students	1845
Corporate Compliance and Regulatory Policy Minor	828
Cost and Aid (Undergraduate)	1800
Counseling Psychology (CPSY)	2178
Course Descriptions	1881
Course Numbering System	1845
Courses Inapplicable to Graduation	1846
Courses Over Ten Years Old	1846
Creative Entrepreneurship Certificate	164
Creative Writing Minor	998
Credit for Prior Learning	1847
Credit Hours	1847
Credit-Bearing Certificate Programs	33
Credit/No Credit Courses	1848
Criminal Justice (CJ)	2179
Criminal Justice BA	999
Criminal Justice Minor	1003
Cultural Studies (CLST)	2189
Cybersecurity and Human Behavior Certificate	1004
D	
Dance (DANC)	2189

Dance BFA	339
Dance Certificate	344
Dance Minor	345
Data Science BS with Computation and Modeling Concentration	1526
Data Science BS with Computational Analytics Concentration	1530
Data Science BS with Genomics and Bioinformatics Concentration	1535
Data Science: Computational Analytics Certificate	1540
Data Science: Computational Analytics Minor	1541
Dean's List	1849
Declaration of Major and/or Concentration	1849
Dental 3+4 Program	1438
Digital Marketing Minor	829
Digital Media Engagement Minor	1291
Digital Media Technologies Minor	1796
Digital Media Technologies Minor (CST)	1543
Digital Media Technologies Minor (KCMC)	1292
Disciplinary Action	1850
Diversity and Inclusion Certificate	581
Division of University Studies	1788
Double Major Across Colleges	1850
Dropping or Withdrawing from Courses	1850
E	
Early Childhood Education (ECED)	2209
Early Childhood-Elementary Education (PreK-4) BSEd	582
Early Childhood-Elementary Education (PreK-4) BSEd with Special Education Concentration	585
Earth & Environmental Science (EES)	2219
Earth and Space Science with Teaching BS	1544
Ecological Planning and Design Minor	165
Ecology, Evolution and Biodiversity BS	1549
Economics (ECON)	2229
Economics BA	1005
Economics BBA	830
Economics Minor	834
Economics Minor	1009
Education (EDUC)	2240
Education Minor	589
Educational Administration (EDAD)	2251
Educational Psychology (EPSY)	2252
Electrical Engineering (ECE)	2252
Electrical Engineering BSEE	706
Electrical Engineering BSEE with Bioelectrical Engineering and Cooperative Education Program	711
Electrical Engineering BSEE with Bioelectrical Engineering Concentration	716

Electrical Engineering BSEE with Computer Engineering and Cooperative Education Program	721
Electrical Engineering BSEE with Computer Engineering Concentration	726
Electrical Engineering BSEE with Cooperative Education Program Concentration	731
Electrical Engineering Technology (EET)	2265
Elementary Education (ELED)	2266
Emergency and Sports Injury Management Certificate	1361
Engineering (ENGR)	2266
Engineering (General) (ENGG)	2278
Engineering (Undeclared)	736
Engineering BSE	737
Engineering BSE with Electromechanical Engineering Concentration	742
Engineering BSE with Energy and Power Engineering Concentration	747
Engineering Technology (ENGT)	2278
Engineering Technology BSET	752
Engineering Technology BSET with Cooperative Education Program Concentration	757
English (ENG)	2281
English BA	1010
English Education (Elementary) (ENEE)	2307
English Education (Secondary) (ENES)	2307
English Language Teaching Certificate	589
English Minor	1014
Entertainment Industry Studies Certificate	490
Entrepreneurship and Innovation Management BBA	835
Entrepreneurship and Innovation Management Certificate	840
Entrepreneurship and Innovation Management Minor	842
Environmental Engineering BSEnvE	762
Environmental Engineering Minor	766
Environmental Engineering Technology (ENVT)	2308
Environmental Health (ENVH)	2310
Environmental Horticulture Minor	166
Environmental Professional Training Certificate	1556
Environmental Programs	1798
Environmental Science (CST) (ENVS)	2311
Environmental Science BS with Applied Ecology Concentration	1558
Environmental Science BS with Climate Concentration	1564
Environmental Science BS with Environmental Geochemistry Concentration	1569
Environmental Science BS with Hydrology Concentration	1574
Environmental Studies (CLA) (ENST)	2312
Environmental Studies BA	1014
Environmental Studies Minor	1020
Environmental Sustainability Certificate	167
Epidemiology and Biostatistics (EPBI)	2323

Esports Certificate	1758
Ethics Certificate	1020
Event and Entertainment Management BS	1759
Event and Entertainment Management Certificate	1763
Event and Entertainment Management Minor	1764
Exercise and Sport Science BS	1362
F	
Facilities Management BS	169
Faculty	2933
Family Educational Rights & Privacy Act (FERPA)	1852
Fibers and Material Studies with Entrepreneurial Studies BFA	174
Fibers and Materials Studies BFA	179
Film and Media Arts (FMA)	2325
Film and Media Arts BA	490
Film and Media Arts BA with Cinematography Concentration	495
Film and Media Arts BA with Post Production Concentration	499
Film and Media Arts BA with Producing Concentration	503
Film and Media Arts BA with Screen Studies Concentration	507
Film and Media Arts BFA with Directing Concentration	511
Film and Media Arts BFA with Media Arts Concentration	517
Film and Media Arts BFA with Screenwriting Concentration	521
Film Certificate	525
Final Examinations	1852
Finance (FIN)	2343
Finance BBA	844
Finance Minor	849
Financial Planning BBA	850
First-Year	24
Foundation Program (FDPR)	2352
Fox School of Business & Management (Undergraduate)	789
French (FREN)	2354
French BA	1021
French Certificate	1024
French Minor	1025
Fundamentals of Physics Certificate	1580
Fundamentals of Programming Certificate	1581
G	
Gender, Sexuality and Women's Studies (GSWS)	2357
Gender, Sexuality and Women's Studies BA	1026
Gender, Sexuality and Women's Studies Certificate	1032
Gender, Sexuality and Women's Studies Minor	1032
General Admissions Information (Undergraduate)	24

General Business Studies Minor	853
General Program AA	1033
General Program BA	1034
General Science and Technology with Teaching BS	1582
General Science with Teaching BS	1587
General Studies BGS	1779
Genomic Medicine BS	1592
Genomic Medicine BS with Pre-Medicine Concentration	1599
Genomic Medicine Certificate	1605
Geographic Information Systems Certificate	1037
Geography and Urban Studies (GUS)	2368
Geography and Urban Studies BA	1038
Geography and Urban Studies Minor	1043
Geology BA	1608
Geology BA/MEd	1438
Geology BS	1612
Geology BS/MEd	1439
Geology Minor	1618
German (GER)	2385
German Certificate	1043
German Language and Cultural Studies BA	1044
German Language and Cultural Studies Minor	1048
Glass BFA	186
Glass with Entrepreneurial Studies BFA	194
Global Communication and Media Arts Minor	1294
Global Health Minor	1365
Global Studies (GBST)	2392
Global Studies BA	1049
Global Studies Minor	1056
Global/World Society (GG)	92
Grade Change	1853
Grade Point Average (GPA)	1853
Grades and Grading	1853
Graduation Procedures	1854
Graphic and Interactive Design BFA	198
Graphic and Interactive Design with Entrepreneurial Studies BFA	208
Graphic Arts and Design (GAD)	2394
Greek (Ancient) (GRKA)	2412
Greek (Modern) (GRKM)	2413
Greek and Roman Classics (GRC)	2413
Grievances	1855

H

Health Information Management (HIM)	2419
Health Information Management BSHIM	1366
Health Information Management Minor	1370
Health Policy and Management (HPM)	2424
Health Policy and Management Minor	1371
Health Professions BS	1372
Health Related Professions (HRPR)	2426
Health Research Certificate	1059
Health Sciences Center	1822
Health Studies BA	1376
Healthcare Management (HCM)	2430
Healthcare Management Minor	855
Hebrew (HEBR)	2431
Hindi (HIN)	2432
Hip Hop Dance and Culture Minor	346
Historic Preservation BS	214
Historic Preservation Certificate	219
History (HIST)	2432
History BA	1060
History Minor	1064
Honor Societies	61
Honors for Academic Achievement	1855
Honors Program (HNRS)	2464
Horticultural Therapy Certificate	220
Horticulture (HORT)	2465
Horticulture AS	221
Horticulture BS	226
Human Behavior (GB)	93
Human Development and Community Engagement (HDCE)	2472
Human Development and Community Engagement BS	590
Human Development and Community Engagement Minor	594
Human Resource Management (HRM)	2473
Human Resource Management BBA	856
Human Services (HS)	2479
I	
Incomplete Coursework	1856
Industrial and Systems Engineering (ISE)	2480
Industrial and Systems Engineering BSISE	767
Information Science and Technology BA	1619
Information Science and Technology BS	1623
Information Science and Technology BS/MS	1439

Information Science and Technology Minor	1629
Intellectual Heritage (GY & GZ)	95
Intellectual Heritage (IH)	2482
Intercollegial Programs	1796
Interdisciplinary German Studies BA	1065
Interdisciplinary German Studies Minor	1068
International Affairs BA	1069
International Business Administration (IB)	2483
International Business Administration Minor	861
International Business BBA with International Economics Concentration	863
International Business BBA with International Entrepreneurship Concentration	867
International Business BBA with International Finance Concentration	872
International Business BBA with International Marketing Concentration	877
International Business BBA with International Sales and Business Development Concentration	881
International Business BBA with International Supply Chain Management, Transportation and Logistics	885
International Business Studies BS	1076
International Communication Minor	1295
International Students	25
Italian (ITAL)	2487
Italian BA	1079
Italian Certificate	1083
Italian Minor	1083
Italian Studies BA	1084
Italian Studies Minor	1087
J	
Japanese (JPNS)	2493
Japanese BA	1088
Japanese Certificate	1092
Japanese Minor	1092
Jazz Arranging Certificate	347
Jazz Improvisation Certificate	348
Jazz Piano Certificate	349
Jazz Studies Composition Certificate	350
Jazz Studies/Composition BM	351
Jazz Studies/Performance BM	358
Jazz Studies/Performance BM with Piano Concentration	362
Jazz Studies/Performance BM with Voice Concentration	366
Jazz Voice Certificate	370
Jewish Secular Studies Certificate	1093
Jewish Studies (JST)	2498
Jewish Studies BA	1094
Jewish Studies Minor	1097

Journalism (JRN)	2503
Journalism BA	1299
Journalism, Society and Culture Minor	1309
K	
Kinesiology (KINS)	2517
Kinesiology BS	1379
Klein College of Media and Communication (KLN)	2532
Korean (KRN)	2534
L	
Landscape Architecture (LARC)	2535
Landscape Architecture BS	229
Landscape Architecture BS with Horticulture Concentration	233
Landscape Plants Certificate	237
Landscape Studies Minor	238
Language and Cross-Cultural Communication Certificate	1099
Latin (LAT)	2540
Latin American Studies (LAS)	2542
Latin American Studies BA	1099
Latin American Studies Certificate	1103
Latin American Studies Minor	1103
Law - Undergraduate Courses (LAWU)	2548
Leadership and Military Science Certificate	595
Leadership Minor	1310
Leave of Absence	1856
Legal Studies (LGLS)	2549
Legal Studies BBA	890
Legal Studies Minor	893
Lesbian, Gay, Bisexual and Transgender Studies (LGBT)	2556
Lesbian, Gay, Bisexual and Transgender Studies Minor	1104
Liberal Studies BA	1105
Linguistics Certificate	1382
M	
Main Campus	1823
Management Career Certificate	1110
Management Information Systems (MIS)	2559
Management Information Systems BBA	894
Management Information Systems Certificate	898
Management Information Systems Minor	899
Management Science/Operations Management (MSOM)	2564
Marketing (MKTG)	2564
Marketing BBA	900
Marketing Minor	904

Materials Science BS	1630
Math Education (Elementary) (MAEE)	2570
Math Education (Secondary) (MAES)	2571
Mathematical Economics	1798
Mathematical Economics BA (CLA)	1112
Mathematical Economics BA (CST)	1635
Mathematics (MATH)	2573
Mathematics and Computer Science BS	1640
Mathematics and Computer Science with Teaching BS	1645
Mathematics and Physics BS	1650
Mathematics and Technology with Teaching BS	1654
Mathematics BA	1661
Mathematics BA/MEd	1440
Mathematics BA/MS	1441
Mathematics BS	1665
Mathematics BS/MEd	1442
Mathematics BS/MS	1442
Mathematics Minor	1669
Mathematics with Teaching BS	1670
Mechanical Engineering (MEE)	2587
Mechanical Engineering BSME	772
Mechanical Engineering BSME with Cooperative Education Program Concentration	779
Mechanical Engineering Technology (MET)	2593
Mechanical Engineering Technology BSMET	784
Media Arts Certificate	526
Media Studies & Production (MSP)	2594
Media Studies and Production BA with Media Analysis Concentration	1311
