Engineering BSE with Energy and Power Engineering Concentration

Note: This program is not accepting applications for the 2023-2024 academic year.

The following information is for students who matriculated into this program in the 2022-2023 academic year.

Overview

The cross-disciplinary 128-credit **Bachelor of Science in Engineering**, offered by the Department of Engineering, Technology and Management, combines learning from several areas to create unique skill sets that are highly marketable. The curriculum not only takes courses from several departments and offers concentrations or study plans in engineering but also provides a basis for further study in business, law, medicine or further study in an engineering graduate program. The optional interdisciplinary concentrations and study plans include:

- Computer Hardware and Software Engineering (study plan)
- Electromechanical Engineering (concentration)
- Energy and Power Engineering (concentration)
- Engineering Fundamentals (study plan)

To give students the opportunity to understand these specialties, the College provides a strong foundation in the basic sciences and mathematics in a common first year. The Department of Engineering, Technology, and Management then aims to bring together the in-demand cross-functional skill sets desired in many industries, including the analysis, design and development of systems for diverse applications. The curriculum emphasizes a rigorous treatment of the mathematical and scientific approach to the solution of engineering problems. The program has design across the curriculum and is capped with an integrated design experience in the form of a senior project.

The Bachelor of Science in Engineering program shall produce graduates who:

1. will be employed in industries, academia and state or federal government agencies;
2. will advance their professional standing through graduate and/or professional degrees or lifelong learning; and
3. will contribute to their profession and to society.

Energy and Power Engineering Concentration

The Bachelor of Science in Engineering with the **optional concentration in Energy and Power Engineering** integrates the tenets of Electrical Engineering and Mechanical Engineering to provide a cross-disciplinary professional career in this burgeoning area. The program offers a relevant, stimulating, and effective course of undergraduate study to produce practicing power and energy engineers to meet the needs of the new century. The program emphasizes all aspects of electrical power and mechanical energy innovation in energy generation and delivery, alternative resources, and efficient devices. The program uses existing courses and laboratories in Electrical Engineering and Mechanical Engineering to provides cross-disciplinary requisite courses for graduate education. Professional employment includes the control of large utility systems to energy harvesting devices for microsensors. Electrical energy continues to be the foundation of the modern economy. The growth of solar energy, wind energy, and other resources, combined with trends such as electric and hybrid vehicles, will have a profound impact on the global society.

Engineering Technology BSET with Cooperative Education Program Concentration

Overview

The **Bachelor of Science in Engineering Technology** is offered by the Department of Engineering, Technology and Management. This program provides a broad base of technological skills extending across the traditional fields of engineering technology with a concentration designed by the student and program coordinator to meet personal and career objectives. A plan of study can be developed with a focus in areas such as construction engineering technology, computer engineering technology, mechanical engineering technology or general engineering technology.

Engineering Technology students may complete an **optional concentration** in Cooperative Education Program (Co-Op).

Cooperative Education Program

A **Cooperative Education** (Co-Op) is an optional experiential program available at the College of Engineering where you have the opportunity to gain professional work experience before graduation. It is designed to give you the chance to apply the knowledge learned in the classroom to real life problems. You will be exposed to the latest technology and new ideas at a worksite helping you understand your field of work more extensively. During the Co-Op, you will make valuable connections with professionals in your field. A cooperative education can enhance and strengthen you academically, professionally and personally.

Campus Location: Main

Program Code: EN-ENGT-BSET

Accreditation

The Engineering Technology (BS) program is accredited by the Engineering Technology Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria. ABET is a non-profit and non-governmental accrediting agency for academic programs in the disciplines of applied science, computing, engineering, and engineering technology recognized by the Council for Higher Education Accreditation (CHEA).

SGM 3585	Social Impact Internship - Work with Benefit/B-corps, Non-profits, or Multi-bottom-line Ventures	
SGM 3685	New Venture Internship: Learning to be a High-Value Employee, Manager, or Founder	

Required Engineering Technology Courses

Select one of the following: 4

ECE 2112 & ECE 2113	Electrical Devices & Systems I and Electrical Devices & Systems I Lab	
EET 2104	Introduction to Electrical Circuits	
ENGR 1101 or ENGR 1901	Introduction to Engineering & Engineering Technology Honors Introduction to Engineering	3
ENGR 1117	Engineering Graphics	2
ENGR 3001	Engineering Economics	3
ENGT 2322	Applied Strength of Materials	3
ENGT 2331	Applied Engineering Statics	3
ENGT 2521 or ENGT 3532	Applied Fluid Mechanics Thermodynamics	3
ENGT 3201	Applied Materials Technology	3
ENGT 4119	Professional Seminar	1
ENGT 4196	Capstone Project	3

Select one of the following Approved Science Electives: 4

CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II	
ENST 2002	Physical Geography	

Technical Electives (must include 3 labs) 24

Free Electives 4

Required Cooperative Education Courses

ENGR 2181	Co-Op Work Experience I	3
ENGR 3181	Co-Op Work Experience II	3

Total Credit Hours 130

Suggested Academic Plan

Below is a suggested five-year plan for the Co-Op program leading to the Bachelor of Science in Engineering Technology. The minimum requirement for graduation is 130 semester hours.

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Science in Engineering Technology with Concentration in Cooperative Education Program**Suggested Plan for New Students Starting in the 2023-2024 Academic Year**

Year 1		Credit Hours
Fall		
MATH 1022	Precalculus	4
CHEM 1031 or CHEM 1951	General Chemistry I or Honors General Chemical Science I	3
CHEM 1033 or CHEM 1953	General Chemistry Laboratory I or Honors Chemical Science Laboratory I	1

ENGR 1101 or ENGR 1901	Introduction to Engineering & Engineering Technology or Honors Introduction to Engineering	3
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4

Credit Hours	15
---------------------	-----------

Spring

MATH 1031	Differential and Integral Calculus	4
ENGR 1117	Engineering Graphics	2
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
GenEd Breadth Course		3
Approved Free Elective		3

Credit Hours	15
---------------------	-----------

Year 2**Fall**

Innovation & Business Elective		3
PHYS 1021	Introduction to General Physics I	4
CSI 1111 or CSI 1911	Introduction to Public Speaking or Honors Introduction to Public Speaking	3
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
GenEd Breadth Course		3

Credit Hours	16
---------------------	-----------

Spring

PHYS 1022	Introduction to General Physics II	4
ENGT 2331	Applied Engineering Statics	3
Approved Technical Elective		3
Select one of the following:		3
ECON 1101	Macroeconomic Principles	
ECON 1901	Honors Macroeconomic Principles	
ECON 1102	Microeconomic Principles	
ECON 1902	Honors Microeconomic Principles	
Select one of the following Approved Science Electives:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II	
ENST 2002	Physical Geography	

Credit Hours	17
---------------------	-----------

Year 3**Fall**

Innovation & Business Elective		3
STAT 2103 or STAT 2903	Statistical Business Analytics or Honors Statistical Business Analytics	4
ENGT 2322	Applied Strength of Materials	3
Approved Technical Elective		3
GenEd Breadth Course		3

Credit Hours	16

Environmental Engineering BSEnVE

Note: This program is not accepting applications after fall 2023.

Overview

The **Bachelor of Science in Environmental Engineering** is offered by the Department of Civil and Environmental Engineering. The program prepares students for careers at the interface of human society and the natural environment, aiming to find solutions to the world's challenges of air, land, and water pollution and sustainability. The environmental engineering curriculum at Temple University provides a fully-integrated design experience within a multidisciplinary learning environment. Students begin their undergraduate studies with courses in advanced mathematics, chemistry and physics, as well as engineering. As they progress, the coursework becomes more discipline-specific and includes topics such as water and wastewater treatment, air pollution control, environmental hydrology, stormwater management and others.

Through laboratory courses, students will gain hands-on experience in environmental chemistry and microbiology, as well as with the physical-chemical processes utilized in water and wastewater treatment. The program culminates with a year-long senior design project where students work in interdisciplinary teams to tackle an engineering design project. The goals of the environmental engineering program are to prepare students to pursue an environmental engineering career in design, project planning or research, to go on to graduate education in their specific areas of interest, and to pass the required exams to obtain professional licensure.

Campus Location: Main

Program Code: EN-ENVE-BSEN

Accreditation

The Environmental Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and Program Criteria for Environmental Engineering and Similarly Named Engineering Programs. ABET is a non-profit and non-governmental accrediting agency for academic programs in the disciplines of applied science, computing, engineering, and engineering technology recognized by the Council for Higher Education Accreditation (CHEA).

+1 Bachelor to Master's Accelerated Degree Program

High-achieving undergraduates can earn both a bachelor's degree and a master's degree within five years. Students apply for this program in sophomore year, and four graduate-level courses are taken in place of undergraduate requirements during junior and senior years. After the bachelor's degree is earned, one graduate-level course is taken in the summer followed by full-time study in the subsequent Fall and Spring semesters to complete the master's degree study. The following accelerated program is available:

- Bachelor of Science in Environmental Engineering and Master of Science in Environmental Engineering

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All Temple students must take a minimum of two writing-intensive courses for a total of at least six credits. The writing-intensive course credits are counted as part of the major; they are not General Education (GenEd) or elective credits. The writing-intensive courses must be completed at Temple University and students may not transfer in credits to satisfy this requirement. The specific writing-intensive courses required for this major are:

Code	Title	Credit Hours
ENGR 2196 or ENGR 2996	Technical Communication Honors Technical Communication	3
ENGR 4296 or ENGR 4996	Capstone Senior Design Project Honors Capstone Senior Design Project	3

Department Requirements

Environmental Engineering Minor

Overview

The Department of Civil and Environmental Engineering (CEE) offers a five-course (15 s.h.) **minor in Environmental Engineering**. Undergraduates from the physical sciences, mathematics and engineering are eligible to participate in this program.

The purpose of the minor is to allow students from a wide range of undergraduate majors to obtain an introductory background in sustainability, pollution prevention, environmental modeling and pollution control technologies most appropriate to their interests and major field. The Environmental Engineering minor will add considerably to students' major program skills and make them more valuable to employers. Mathematics and science majors will gain an understanding of engineering problem-solving processes and standard pollution control technologies. Engineering majors will understand the environmental effects of technologies in their major field and how to manage those effects. After the student completes the requirements for the minor, the minor will be recorded on the student's official university transcript upon graduation.

Declaration of Environmental Engineering Minor

Students who are interested in pursuing an Environmental Engineering minor should speak to their advisor in the school or college in which they are pursuing their degree. Students should formally declare the Environmental Engineering minor upon completing no more than 6 credits toward the minor. There is no penalty if the minor is not completed. For more information and to declare the minor, please contact the Center for Academic Advising and Student Affairs.

Campus Location: Main

Contact Information

Center for Academic Advising and Student Affairs

engradv@temple.edu

Engineering Building, Room 514
1947 North 12th Street
Philadelphia, PA 19122
215-204-7814

Requirements

Students pursuing the minor in Environmental Engineering must meet the following requirements:

- A minimum of C- in each course
- An overall GPA of 2.0 for courses in the Environmental Engineering minor

Code	Title	Credit Hours
Required Courses		
CEE 2711	Environmental Chemistry & Microbiology	3
CEE 3711	Environmental Engineering	3
Electives		
Select a minimum of three electives from the following:		9
CEE 4631	Environmental Hydrology	
CEE 4711	Air Pollution Control System	
CEE 4721	Water and Wastewater Systems Design	
CEE 4622	Fate Pollutants in Subsurface Environments	
CEE 4641	Urban Streams and Stormwater Management	
CEE 4623	Contaminant Dynamics in Urban Streams	
Total Credit Hours		15

Students pursuing the minor are responsible for knowing and completing all published prerequisite requirements for courses within the minor. Any prerequisite courses not outlined in the required or elective course listing will not be counted toward the 15 credit hour minimum required for the minor.

Industrial and Systems Engineering BSISE

Overview

The **Bachelor of Science in Industrial and Systems Engineering** is offered by the Department of Engineering, Technology and Management. This program prepares students to become leaders in quality and productivity management. This 128-credit undergraduate program is a blend of engineering and business, preparing students to design, develop, implement and improve the integrated systems that help a wide variety of companies save money and increase operating efficiency.

Industrial and systems engineering applies to more than manufacturing—the work of industrial and systems engineers encompasses nearly every industry and sector. The versatile, interdisciplinary curriculum positions students to graduate with the tools and skills that meet a growing demand for industrial and systems engineers. Compared to other engineering disciplines, Industrial and Systems Engineering students take courses in business and across engineering fields of study, making learning versatile for many types of applications for companies as they continuously seek to increase productivity and efficiency and improve quality. Students will gain the knowledge base to provide these companies with innovative and creative solutions. The curriculum will prepare graduates to design, develop, implement, and improve integrated systems that include people, materials, information and equipment. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

Mechanical Engineering BSME

Overview

The **Bachelor of Science in Mechanical Engineering** is offered by the Department of Mechanical Engineering. This program provides an excellent educational experience for the students. This experience includes an emphasis on the technical, communication and teamwork skills that graduate engineers need to succeed in both the workplace and society in general. In order to achieve these goals, the department places great importance on teaching, research, scholarship, engineering practice and service to the university community and the Engineering profession. The mechanical engineering program is structured to prepare the graduate for the professional practice of engineering and/or graduate school. The curriculum emphasizes a rigorous treatment of the mathematical and scientific approach to the solution of engineering problems. It provides a coherent set of courses in energy conversion and structures/motion in mechanical systems. The program has design across the curriculum and is capped with an integrated design experience in the form of a senior project.

Mechanical Engineering students may complete an **optional concentration** in Cooperative Education Program (Co-Op).

Campus Location: Main

Program Code: EN-ME-BSME

Accreditation

The Mechanical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs. ABET is a non-profit and non-governmental accrediting agency for academic programs in the disciplines of applied science, computing, engineering, and engineering technology recognized by the Council for Higher Education Accreditation (CHEA).

+1 Bachelor to Master's Accelerated Degree Program

High-achieving undergraduates can earn both a bachelor's degree and a master's degree within five years. Students apply for this program in sophomore year, and four graduate-level courses are taken in place of undergraduate requirements during junior and senior years. After the bachelor's degree is earned, one graduate-level course is taken in the summer followed by full-time study in the subsequent Fall and Spring semesters to complete the master's degree study. The following accelerated program is available:

- Bachelor of Science in Mechanical Engineering and Master of Science in Mechanical Engineering

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All Temple students must take a minimum of two writing-intensive courses for a total of at least six credits. The writing-intensive course credits are counted as part of the major; they are not General Education (GenEd) or elective credits. The writing-intensive courses must be completed at Temple University and students may not transfer in credits to satisfy this requirement. The specific writing-intensive courses required for this major are:

Code	Title	Credit Hours
ENGR 2196 or ENGR 2996	Technical Communication Honors Technical Communication	3
ENGR 4296 or ENGR 4996	Capstone Senior Design Project Honors Capstone Senior Design Project	3

Department Requirements

Code	Title	Credit Hours
Required Math & Basic Science Courses		
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4

Mechanical Engineering BSME with Cooperative Education Program Concentration

Overview

The **Bachelor of Science in Mechanical Engineering** is offered by the Department of Mechanical Engineering. This program provides an excellent educational experience for the students. This experience includes an emphasis on the technical, communication and teamwork skills that graduate engineers need to succeed in both the workplace and society in general. In order to achieve these goals, the department places great importance on teaching, research, scholarship, engineering practice and service to the university community and the Engineering profession. The mechanical engineering program is structured to prepare the graduate for the professional practice of engineering and/or graduate school. The curriculum emphasizes a rigorous treatment of the mathematical and scientific approach to the solution of engineering problems. It provides a coherent set of courses in energy conversion and structures/motion in mechanical systems. The program has design across the curriculum and is capped with an integrated design experience in the form of a senior project.

Mechanical Engineering students may complete an **optional concentration** in Cooperative Education Program (Co-Op).

Cooperative Education Program

A **Cooperative Education** (Co-Op) is an optional program available at the College of Engineering where you have the opportunity to gain professional work experience before graduation. It is designed to give you the chance to apply the knowledge learned in the classroom to real life problems. You will be exposed to the latest technology and new ideas at a worksite helping you understand your field of work more extensively. During the Co-Op, you will make valuable connections with professionals in your field. A cooperative education can enhance and strengthen you academically, professionally and personally.

Campus Location: Main

Program Code: EN-ME-BSME

Accreditation

The Mechanical Engineering (BS) program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs. ABET is a non-profit and non-governmental accrediting agency for academic programs in the disciplines of applied science, computing, engineering, and engineering technology recognized by the Council for Higher Education Accreditation (CHEA).

+1 Bachelor to Master's Accelerated Degree Program

High-achieving undergraduates can earn both a bachelor's degree and a master's degree within five years. Students apply for this program in sophomore year, and four graduate-level courses are taken in place of undergraduate requirements during junior and senior years. After the bachelor's degree is earned, one graduate-level course is taken in the summer followed by full-time study in the subsequent Fall and Spring semesters to complete the master's degree study. The following accelerated program is available:

- Bachelor of Science in Mechanical Engineering and Master of Science in Mechanical Engineering

Mechanical Engineering Technology BSMET

Overview

The **Bachelor of Science in Mechanical Engineering Technology** is offered by the Department of Engineering, Technology and Management. This program provides trained applied mechanical engineering practitioners for small and medium manufacturing and service firms. This market aligns well with the traditional history of Mechanical Engineering Technology education that suggests a greater emphasis on hands-on laboratory experiences and less emphasis on advanced engineering theory. Small to medium firms often require engineering talent that can span the boundary between engineering design and the actual production operations. There are over 1,000 manufacturing firms in the 11-county Greater Philadelphia region which are large enough to employ these versatile mechanical engineering technology graduates.

This diverse set of manufacturing and service firms are expected to prosper in the immediate to near future. Economic advantages in North America such as low energy costs and high productivity resulting from technology-based automation combined with rising wages in traditionally low-cost countries have combined to not only stem the loss of North American manufacturing jobs to Asia but to reverse the trend in a process referred to as re-shoring.

It should be noted that the future career prospects of Bachelor of Science in Mechanical Engineering Technology graduates are not significantly different from the prospects of more traditional engineering disciplines.

Campus Location: Main

Program Code: EN-MENT-BSME

Learn more about the Mechanical Engineering Technology program.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All Temple students must take a minimum of two writing-intensive courses for a total of at least six credits. The writing-intensive course credits are counted as part of the major; they are not General Education (GenEd) or elective credits. The writing-intensive courses must be completed at Temple University and students may not transfer in credits to satisfy this requirement. The specific writing-intensive courses required for this major are:

Code	Title	Credit Hours

Fox School of Business and Management

Overview

Established in 1918, Temple University's Fox School of Business and Management has a distinguished tradition of preparing business leaders, professionals and entrepreneurs for successful careers.

Accreditation

Accredited by AACSB International—Association to Advance Collegiate Schools of Business—in 1934, the Fox School offers BBA, BS, MBA, Executive MBA, International MBA, Online MBA, MBA/MS, MS, PhD and DBA programs on campuses throughout the region and around the world.

Mission Statement

The Fox School of Business and Management transforms our students into responsible professionals and leaders through engagement with Fox communities committed to lifelong learning, service and the advancement of management practice.

Vision

To transform student lives, develop leaders and impact our local and global communities through excellence and innovation in education and research.

Values

Our shared values guide our actions and describe how we behave in the world. These values are the underpinning of our culture and the essence of our mission. Within the Fox School, we declare the following to be our guiding values.

- **Collaboration:** We work together to achieve common objectives, and we recognize, reward and encourage cross-disciplinary and multi-stakeholder efforts.
- **Diversity and Inclusion:** We encourage and respect diversity in all forms and perspectives, and we create an inclusive, welcoming environment where everyone is emboldened to reach their full potential.
- **Empowerment:** We support, recognize and reward people by providing them with the tools and resources they need to learn, develop and succeed. In so doing, we challenge and encourage one another to persevere and excel in these pursuits.
- **Ethics and Integrity:** We create an atmosphere where trust, honesty and transparency are expected, valued and practiced.
- **Innovation:** We embrace innovative thinking, unique action and challenge norms while seeking solutions that solve problems and have a positive impact on our community.

Culture Statement

The Fox School is home to a community focused on excellence in the creation, application and dissemination of knowledge. The Fox School thrives on collegiality, collaboration and competition, guided by a strong sense of ethics and trust. We foster transparency, open communication and inclusion. Grounded in the power of our values, we combine thought leadership with an entrepreneurial spirit to develop future leaders. We reward innovation and encourage everyone to be forward-thinking, entrepreneurial, action-oriented and empowered. Our community is strong, diverse, connected and proud.

Learning Goals and Assurance of Learning

The four main learning goals for the Bachelor of Business Administration Program seek to assure students will:

- **Demonstrate business knowledge needed to make business decisions.**
 - Apply a core body of discipline-specific knowledge to business situations and problems.
- **Apply critical thinking skills to business decisions.**
 - Use integrated business knowledge to identify problems, generate solutions, and develop reasoned conclusions.
 - Understand the ethical, legal, and social responsibilities of individuals and organizations.
- **Apply quantitative reasoning skills to make recommendations and business decisions.**
 - Apply quantitative analysis and interpretation to business problems.
 - Use data to analyze business decisions.
 - Use software to analyze and implement business decisions.
- **Communicate Professionally.**
 - Demonstrate professional business writing skills.
 - Demonstrate professional business presentation skills.

Academic Departments

- The Department of Accounting provides intensive study of all areas of accounting—financial accounting, management, accounting, auditing, taxation and data analytics—to provide students a competitive edge in a variety of career opportunities.

- The Department of Finance offers various programs in finance, financial planning, and real estate, which combine fundamental knowledge and practical skills and prepare students for successful careers in asset management, commercial and investment banking, wealth management, corporate sector, consulting, and real estate.
- The Department of Management supports four undergraduate majors in Business Management, Entrepreneurship and Innovation Management, Human Resource Management, and International Business as well as graduate programs.
- The Department of Management Information Systems strives to be a worldwide leader in transformative research and teaching on the design, use and effects of information technology in a digital world.
- The Department of Marketing offers a wide range of undergraduate and graduate programs in marketing designed to equip students with the ability to solve problems, think critically and communicate clearly.
- The Department of Risk, Actuarial Science, and Legal Studies transforms student lives, develops leaders in risk management, actuarial science, healthcare management, and the legal professions, and has a positive impact on our local, national and global communities through excellence and innovation in education and research.
- The Department of Statistics, Operations, and Data Science strives to be an internationally recognized leader in the transformation of students and faculty into leaders in statistics, operations and data science, and to develop tools, methods and theory that support principled, data-driven decisions benefiting society, government and business.

Special Facilities and Programs

Center for Student Professional Development

The Center for Student Professional Development (CSPD) is an active partner in your collegiate experience at the Fox School of Business and Management. Besides academic preparation, professional development is important to your preparation for life after graduation. Consequently, the Fox School has integrated a unique professional development component into both the undergraduate and graduate curricula.

Rather than simply focus on the traditional career elements such as résumé development and interview strategies, etc., CSPD strives to differentiate you by taking a multi-faceted approach with a focus on personal development, career/industry awareness and impression management. This strategy in combination with job search coaching will truly make a difference in terms of your marketability.

CSPD services/resources (in-person and virtual) include:

- BA 2101 Professional Development Strategies course (BBA);
- One-on-one career/professional development coaching sessions;
- Group workshops on career/professional development topics;
- On-line career resources/tools including interview preparation, resume feedback, industry research, etc.;
- Web-based career management system – Handshake;
- Industry (Mock) interviews;
- Career Connections (job fairs);
- Networking events with employers/alumni; and
- Executive speaker series.

You have already invested in your future by pursuing a business degree from the Fox School; however, a degree alone will not land you that ideal job. Take the next step and make your investment pay off by taking advantage of the resources CSPD has to offer and start creating your "dream job" strategy from day one!

Business Communication Center

The mission of the Business Communication Center is to help Fox School of Business and Management and School of Sport, Tourism and Hospitality Management students become better communicators. Clear, concise, compelling communication is essential for success in business. The center provides one-on-one tutoring (in person or online) to help all Fox and STHM students with course assignments, presentations, scholarship essays and cover letters.

Internship Programs

The Center for Student Professional Development and Student Professional Organizations work in partnership with employers to connect students with a wide variety of internship positions, both full and part-time. For more information on internship opportunities, please contact the Center for Student Professional Development at 215-204-2371 or foxcspd@temple.edu.

Honors Program

The Fox School of Business and Management offers a stimulating Honors Program for students who demonstrate exceptional ability and achievement in their studies. Honors students receive personalized attention from dedicated honors staff. They are able to register early for select classes that are smaller in size and taught by top professors. They'll also have access to a student professional organization just for honors students that will help hone their professional development, give them opportunities to get involved with community service, and form close bonds that will last beyond graduation.

High school students are automatically reviewed for admission at the time of application to the university. Continuing/transfer students with at least a 3.70 grade point average are encouraged to apply. All students must first apply and be accepted to the University Honors Program. The program consists of a minimum number of academic classes. Students earn an Honors transcript designation upon completion of the program.

For more information about the Fox Honors Program, please contact Lori Roseman, Director, 215-204-4101, Alter Hall LL30 or visit the Fox Honors web site.

Honorary Societies, Awards and Student Associations

Beta Gamma Sigma

The Gamma Chapter of Beta Gamma Sigma, the international honorary business society, was installed in the Fox School of Business and Management in March 1935. Membership is limited to standing-year juniors and seniors who are in the upper 10 percent of their class. Eligible students will be notified by the Dean in March and invited to attend a special induction ceremony in May. Please contact Lori Roseman at 215-204-4101 for more information.

Alpha Mu Alpha

This national marketing honorary society was established by the American Marketing Association in 1981 to recognize and reward the scholastic achievement of marketing students as well as academic excellence in the discipline and science of marketing. To be invited to join Alpha Mu Alpha, marketing majors must maintain a minimum GPA of 3.25. Inductions are made during the final semester for graduating students in Spring and Fall. For more information, please contact the AMA Faculty Advisor, Sheri Lambert at sheri.lambert@temple.edu.

Beta Alpha Psi

This national honorary fraternity was established for students of accountancy, finance and information systems. For more information, please contact the officers of Beta Alpha Psi at 215-204-8889 or view their Beta Alpha Psi web site.

Gamma Iota Sigma

This is an international Risk Management, Insurance, and Actuarial Science fraternity. The purpose of the Sigma Chapter of Gamma Iota Sigma is to encourage, establish and enhance the professionalism of students in the Risk Management, Healthcare Risk Management and Actuarial Science programs. Contact R.B. Drennan in the Risk, Actuarial Science, and Legal Studies Department at 215-204-8894 or contact the GIS Officers at 215-204-9368.

CAFSBM Awards

<https://www.fox.temple.edu/academics/advising/awards-scholarships>

Each Spring, the Fox School of Business and Management opens its scholarship applications for matriculated Fox students; the application cycle opens on February 1 and ends on February 28. Students are notified of awarded scholarships before the end of the Spring term.

Fox departmental scholarships run on different cycles depending upon the department. Please check with the department chair for additional information.

Student Organizations

<https://www.fox.temple.edu/student-professional-organizations/>

As part of the student's overall professional development, all Fox students are strongly encouraged to participate in student organizations, professional associations, and academic fraternities. All major areas of concentration in the undergraduate curriculum have an associated organization. Freshmen and sophomores can utilize the organizations to find out more about the major fields of study available to them. The student organizations provide an opportunity for students to meet one another outside the classroom as well as to meet practicing professionals from industry and government. Many organizations have an array of social activities that range from fund raising and community service projects to evening gatherings.

The Fox School of Business and Management has the following student professional organizations:

- American Marketing Association (AMA)
- Ascend
- Association for Information Systems (AIS)
- Association of Latino Professionals for America (ALPFA)
- Beta Alpha Psi (BAP)
- Business Honors Student Association (BHSA)
- Business Management Organization (BMO)
- Chutzpah
- Entrepreneurial Students Association (ESA)
- Fashion & Business
- Financial Planning Association (FPA)

- Fox Accounting Association (FAA)
- Fox African American Business Association (FAABA)
- Fox for Balance (FFB)
- Fox Professional Speakers (FPS)
- Gamma Iota Sigma (GIS)
- Institute of Management Accountants (IMA-T)
- International Business Association (IBA)
- National Association of Black Accountants (NABA)
- Net Impact
- Phi Alpha Delta (PAD)
- Phi Beta Lambda (PBL)
- Professional Sales Organization (PSO)
- TU Supply Chain Association (TUSCA)
- TU Blockchain Club (TUBC)
- Temple Consulting Club (TCC)
- Temple Economics Society (TES)
- Temple Finance Association (TFA)
- Temple Real Estate Organization (TREO)
- TU Society for Human Resource Management (TUSHRM)
- TU American Statistical Organization (TUAmStat)
- Women in Finance (WiFi)

Please contact the College Council Officers at 215-204-6660 for more information about student organizations on the Main Campus. At the Ambler Campus, please call 267-468-8100.

Fox School of Business College Council

The College Council is comprised of student leaders who are active members in Fox student organizations, associations, and fraternities. The council's role is to assist the individual student organizations in recruiting members, obtaining funding, sponsoring activities, identifying outside speakers, and communicating with students. The College Council sponsors volunteer opportunities, student organization fairs, and social events for all Fox students. The council also works closely with the dean's office and the Center for Student Professional Development to identify issues that are of concern to students and the student organizations. To contact the Main Campus college council, please call 215-204-6660. At the Ambler Campus, please call 267-468-8100.

Academic Policies and Regulations

The university policies (p. 1835) and regulations apply to all undergraduate students and provide a framework within which schools and colleges may specify further conditions or variations appropriate to students in their courses or programs. Policies specific to FSBM are as follows:

Transfer Credits

Business courses taken at colleges or universities which are not members of The Association to Advance Collegiate Schools of Business (AACSB) will be accepted for transfer business credits only if they are equivalent to the following:

Code	Title	Credit Hours
ACCT 2101	Financial Accounting	3
ACCT 2102	Managerial Accounting	3

ACCT 2103	Financial and Managerial Accounting for Decision Making	4
AS 1501	Actuarial Probability	3
BA 1103	Legal and Ethical Reasoning in Business	3
BA 2501	Turning Numbers into Knowledge: Visualizing Data	3
BA 2502	Business Analytics: Modern Data Science Techniques	3
ECON 1101	Macroeconomic Principles	3
ECON 1102	Microeconomic Principles	3
HRM 1101	Leadership and Organizational Management	3
HRM 2501	Introduction to Human Resource Management	3

Specific articulation agreements with local colleges may expand on this list. View current articulation agreements.

Additional business credits are accepted from colleges that are members of the AACSB. It should be understood that it is possible for a student to transfer in a large number of credits which, while accepted by the university, may exceed the maximum number of elective credits applicable to the degree.

Permission to Complete Courses at Another Institution

Consistent with the university policy students will not receive transfer credit for courses taken at another institution while they are matriculated at Temple University unless prior permission has been obtained. The required **Permission to Take Courses Elsewhere workflow** is available under the University Forms channel within Student Tools tab in TUportal. For more information, refer to Permission to Complete a Course at another Institution after Matriculation (p. 1858).

Graduation Requirements

The Fox School of Business and Management requires students to complete a Graduation Review prior to registration for their final semester or, if active in Fly in 4, prior to their senior year. In addition, the University requires students to submit an application for graduation using the University online graduation application in Self Service Banner at the start of their last term in their academic program. Additional graduation information is available from the Office of the University Registrar.

Grade Point Average Requirement for Graduation

Fox students are required to attain a 2.0 (2.0 = C) average in all of their Temple coursework and in their major in order to graduate from the Fox School of Business and Management. Some courses may have specific minimum grade requirements for degree applicability. Please check current course descriptions and the section pertaining to your major for this information.

Residency Requirement

A minimum of 45 of the last 60 semester hours must be completed in the Fox School of Business and Management at Temple University in order to receive a degree. In addition, a minimum of 50% of the business courses and the majority of the requirements of a major must be completed at Temple University. For more information, see the Academic Residency Requirements (p. 1838).

Courses Inapplicable to Graduation Requirements

Credit is only awarded in academic subjects with a corresponding Temple department. Duplicate credit in the same course is not awarded in any case.

Students will not receive credits for lower-level courses after successful completion of higher-level courses in sequenced courses of study. This only applies to the First Year Writing sequence in English (ENG 0701-ENG 0802) and all courses in Mathematics and Foreign Languages. For example, after passing SPAN 1002, a student will not receive credits for SPAN 1001.

Semester hours earned in SRAP or ELECT, Preparatory Mathematics (formerly Mathematics 0001 or 0015), and lower-division (under 3000) Military Science courses do not yield academic credit toward the minimum total of 124.

Life Experience

The Fox School of Business and Management does not offer credits for life experiences. Please see Credit for Prior Learning (p. 1847) under the Academic Policies section of this *Bulletin* for information about advanced placement or CLEP examinations.

Co-Requisites and Prerequisites

Students may be de-enrolled from courses for which they do not meet prerequisites and co-requisites. (Please see the Prerequisites and Co-requisites (p. 1860) policy for more information.) Students are responsible for reviewing and abiding by all course prerequisites and co-requisites in the Course Catalog. The requirements are designed to assure that students are appropriately prepared to be successful in their courses. Prerequisites provide an efficient manner for students to register for the next course in a sequence for which they are prepared.

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Repeating Courses

University policy restricts the number of times students can enroll in the same course to three times. Permission is required to register for the third attempt of the same course and is not guaranteed for all Fox majors. Students should work closely with an academic advisor to review their options when required to repeat a course. Students who fail to complete a required major course listed in their academic program will be required to change to a different major. For more information, see Repeating a Course (p. 1860) and Policy 02.10.12.

Change of Program

Non-business students in their first semester at Temple or continuing students with 2.0 minimum cumulative GPA are eligible to request to change to a major in Fox. Information about the Fox Change of Program process is available on the Fox Advising web site.

Non-business students with a cumulative GPA below 2.0 are not eligible to change to Fox. Instead students can change to Division of University Studies until they earn the 2.0 minimum cumulative GPA. While enrolled in Division of University Studies students are eligible to take some lower-division business requirements.

Dismissal from Fox

In accordance with Temple's repeat policy, (p. 1860) students who fail to complete a "College Graduation Requirement" in three attempts will be required to change their program to one outside the Fox School of Business and Management.

Grievance Procedures

The Fox School of Business and Management Ombudsperson assists students in Fox to resolve problems and conflicts that might arise from the classroom, acting as mediator between faculty and students while promoting alternatives to more formal processes. The ombudsperson supports effective communication, cooperation, equity, and civility in all academic and scholastic settings. Students who believe they have been treated unfairly in an academic matter should first meet with the appropriate ombudsperson.

For more information, refer to grievance procedures or contact the Center for Undergraduate Advising at foxombud@temple.edu or 215-204-7672 for further information.

Non-Degree Seeking Student Policy

Students not formally admitted (p. 1857) to Temple University may take undergraduate courses numbered under 3000 in the Fox School of Business and Management. Undergraduate courses numbered above 3000 are open to visiting students who have completed a minimum of 60 credits, have met course prerequisites, and have written permission from their home institution. Students who have a baccalaureate degree and the prerequisites for the course desired may also enroll in advanced courses.

College Graduation Requirements

The Fox School of Business and Management offers two undergraduate degrees: a Bachelor of Business Administration (BBA) and a Bachelor of Science (BS). The BBA degree gives students a broad-based education, including foundation and chosen major coursework. The BS degree is for those students who wish for more specialized training in the field of Statistical Science and Data Analytics.

All Fox students must complete a minimum of two writing-intensive courses at Temple—BA 2196 and a writing-intensive course in the major. A minimum grade of C- is required in both writing-intensive requirements.

Second Majors, Minors, and Certificates

Students who choose to pursue a dual major in business can double-count a maximum of one course toward both majors. Students who choose to pursue one or more minors or certificates may not double-count courses already used to meet the requirements for a major or different minor or certificate.

Residency Requirements

A minimum of 45 of the last 60 semester hours must be completed in the Fox School of Business and Management at Temple University in order to receive a degree. In addition, a minimum of 50% of the business courses and the majority of the requirements of a major must be completed at Temple University.

Bachelor of Business Administration

The degree of Bachelor of Business Administration (B.B.A.) may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 124 semester hours of credit with a minimum cumulative GPA of 2.0 overall and in the major. A minimum of 124 credit hours will be earned in the following four requirement categories:

- University General Education (GenEd) Requirements
- Fox School of Business & Management lower- and upper-division requirements
- Major requirements
- Electives

Students must follow the program requirements in effect at the time the major is declared or changed. Program requirements include both the College Graduation Requirements listed here and the courses required for the major listed in the Programs of Study. In addition, students need to complete the Fox Leadership Development Program minimum point requirement. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

University General Education Curriculum

The General Education curriculum (GenEd (p. 83)) is required for all students. Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

Bachelor of Business Administration Requirements

Lower-Division Foundation Requirements

Note: 1000-level courses are typically taken in freshman year; 2000-level courses are typically taken in sophomore year.

Code	Title	Credit Hours

Total Credit Hours		43

1

Transfer credit for LGLS 1101 will satisfy BA 1103.

2

Higher level courses may be recommended depending on the mathematics placement score or the student's intended major. Actuarial Science majors should refer to the math courses listed under the Actuarial Science major description.

3

Successful completion of this course will waive the General Education Quantitative Literacy requirement.

4

Transfer credits for STAT 2101 and STAT 2102 will satisfy STAT 2103. Students with transfer credit for STAT 2101 only should meet with an advisor to discuss options.

5

Transfer credits for ACCT 2101 and ACCT 2102 will satisfy ACCT 2103. Students with transfer credit for ACCT 2101 only should meet with an advisor to discuss options.

Note: In order to graduate, a grade of C- or better must be obtained in all FSBM lower-division requirements.

Upper-Division Foundation Requirements

Note: 3000-level courses are typically taken in the junior or senior year; 4000-level courses are taken in the senior year.

Code	Title	Credit Hours
FIN 3101	Financial Management ¹	3
MSOM 3101	Operations Management	3
BA 4102	Strategic Management	3
Select three business electives ²		9
Total Credit Hours		18

1

Actuarial Science majors must take AS 2503 instead of FIN 3101.

2

2000-3999 electives can be selected from: ACCT, AS, BA, ECON, FIN, HRM, IB, LGLS, MIS, MKTG, RE, RMI, STAT, SCM, SGM. Please see your advisor for elective suggestions that match your career objectives.

Note: In order to graduate, a grade of C- or better must be obtained in all FSBM upper-division requirements.

Major Requirements

Major requirements are determined by the effective semester of their declaration and students should declare their majors upon the completion of 60 credits in consultation with their academic advisors. Major requirements include both the College Graduation Requirements listed above and the courses required for the major listed in the Programs of Study.

Bachelor of Business Administration majors are offered in the following programs: Accounting, Actuarial Science, Business Management, Economics, Entrepreneurship & Innovation Management, Finance, Financial Planning, Human Resource Management, International Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management & Insurance, and Supply Chain Management.

Twenty business courses (61 s.h.) are required as part of the lower- and upper-division foundation requirements for the B.B.A. program. In addition, a minimum of six business courses must be completed in the major. In completing the courses in the major, students will become competent in understanding critical business concepts and the practice of ethical decision-making, and demonstrate both effective written and oral communication and the ability to apply critical thinking to business problems. Students who choose to pursue a dual major in business can double-count a maximum of one course toward both majors. All Fox students must take a minimum of two writing-intensive courses at Temple. One of these courses will be BA 2196; the second will be a writing-intensive course in the major.

NOTE: Many upper-division foundation courses and major courses have prerequisites. Some prerequisites also include minimum grade requirements. Students are required to meet all prerequisites. Prerequisites will be strictly enforced and the school reserves the right to de-enroll students from courses when prerequisites have not been met. Course descriptions, including prerequisites, are found in the Courses section of the *Bulletin*.

Electives

Free electives: Students who have satisfied all of the requirements for GenEd, the Fox School Foundation, and the major will need additional credits to achieve the 124 credit minimum required for graduation. These credits may be taken in either business or non-business courses. Students

are encouraged to explore completing a minor, a certificate, or a second major for these credits. Students who choose to pursue a dual major in business can double-count a maximum of one course toward both majors. Students who choose to pursue one or more minors may not double-count courses already used to meet the requirements for a major or different minor.

Bachelor of Science

The degree of Bachelor of Science (BS) may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 122 semester hours of credit with a minimum cumulative GPA of 2.0 overall and in the major. A minimum of 122 credit hours will be earned in the following four requirement categories:

- University General Education (GenEd) Requirements
- Core requirements
- Major requirements
- Electives

Students must follow the program requirements in effect at the time the major is declared or changed. Program requirements include both the College Graduation Requirements listed here and the courses required for the major listed in the Programs of Study. In addition, students need to complete the Fox Leadership Development Program minimum point requirement. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

University General Education Curriculum

The General Education curriculum (GenEd (p. 83)) is required for all students. Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

Transfer credits for ACCT 2101 and ACCT 2102 will satisfy ACCT 2103. Students with transfer credit for ACCT 2101 only should meet with an advisor to discuss options.

Note: In order to graduate, a grade of C- or better must be obtained in all FSBM core requirements.

Major Requirements

Major requirements are determined by the effective semester of their declaration and students should declare their majors upon the completion of 60 credits in consultation with their academic advisors. Major requirements include both the College Graduation Requirements listed above and the courses required for the major listed in the Programs of Study. The Bachelor of Science major is offered in Statistical Science & Data Analytics. Requirements for the Statistical Science & Data Analytics major are available on the program's page (p. 923).

NOTE: Many core courses and major courses have prerequisites. Some prerequisites also include minimum grade requirements. Students are required to meet all prerequisites. Prerequisites will be strictly enforced and the school reserves the right to de-enroll students from courses when prerequisites have not been met. Course descriptions, including prerequisites, are found in the Courses section of the *Bulletin*.

Electives

Free electives: Students who have satisfied all of the requirements for GenEd, the core requirements, and the major requirements will need additional credits to achieve the 122 credit minimum required for graduation. These credits may be taken in either business or non-business courses. Students are encouraged to explore completing a minor, a certificate, or a second major for these credits. Students who choose to pursue a dual major in business can double-count a maximum of one course toward both majors. Students who choose to pursue one or more minors may not double-count courses already used to meet the requirements for a major or different minor.

Professional Development Requirement: Fox Leadership Development Program (FLDP)

In an effort to ensure our future graduates are positioned for career advancement, the Fox School of Business and Management requires all undergraduate students to participate in the Fox Leadership Development Program (FLDP). Hosted by the Suitable web site, the FLDP will strengthen competencies that companies/recruiters regularly look for in potential employees. By participating in a robust year-long schedule of activities, students will be able to show fundamental skills in these competencies: Community Engagement, Ethics, Global/Cultural Awareness, Personal/Professional Development, and Financial Literacy.

The Fox School of Business and Management will expect all undergraduate students to earn 250 FLDP points by the end of each of their academic years. There are many low point activities (attending SPO meetings, speaker events, etc.) and numerous high point activities (internships, study abroad, etc.). Students will need to earn at least 20 points in each competency, but they can decide what they want to participate in. Once minimum point levels are reached in the competency areas, students will have the ability to earn remaining needed points in any area of specialization. They will also be able to "level up" in each competency area, displaying continual growth and development skill sets to potential employers. These demonstrated skills will also be viewable through the Comprehensive Learner Record (CLR).

For more information, please visit the Fox Leadership Development Program site.

Fox Laptop Mandate

All students are required to have their own laptop while in Fox. Students with laptops can use wired and wireless connections in many classrooms and labs, as well as throughout the buildings. Learn more about Fox's laptop policy.

Academic Advising

Center for Undergraduate Advising

Speakman Hall, Room 101
215-204-7672
www.fox.temple.edu/academics/advising

The Center for Undergraduate Advising provides in-person advising at Main Campus and virtually for all Ambler, Main, and Online Campus students.

The Main Campus office is generally open every weekday from 8:30 AM to 5:00 PM.

Our purpose is to provide quality academic advising services that empower students to make informed decisions about their education, projected career, and personal/professional life at Temple University. Students work collaboratively with our academic advising team to develop individual plans for academic success, interpret university policy, fully utilize campus resources, and engage in the process of reflection and decision making that will promote their achievement.

Fox Advising is dedicated to working with students at each academic level. **Freshman/Sophomore Advising** focuses on the transition to college life, major exploration within Fox, successful completion of the lower-division foundation requirements, and retention. **Junior/Senior Advising** focuses on ensuring students are making satisfactory progress in their major, have completed their graduation audit prior to their final semester, and are prepared to graduate. Junior and senior students are assigned an advisor based on their declared major. **Online Advising**, for students intending to complete a majority of their Bachelor of Business Administration degree online, prioritizes flexible scheduling, with the same high-quality focus on developmental support and comprehensive academic planning as the on-campus services. The following majors can be completed online: Accounting, Business Management, Human Resource Management, Marketing, and Supply Chain Management.

As active participants in the advising process, students bear the ultimate responsibility for making educational and career decisions. Therefore, we rely on students to be prepared with questions, to research options before they come to their meeting, and to refer to their advising notes both before and after advising meetings. Students are expected to know University Policies (p. 1835) and their program requirements as defined in their *Bulletin* and on their DARS report.

Advisors, in turn, strive to provide knowledgeable assistance to ensure students' accurate understanding of university and school policies, utilization of campus resources, interpretation of curriculum requirements, and timely completion of degree requirements. Students in Fox have several ways to meet with an academic advisor, including *Scheduled Appointments* on-campus or online for academic planning or daily *Same-Day Advising* for urgent matters.

Peer Advising

The Center for Undergraduate Advising is pleased to provide peer advising on Main Campus, comprised of undergraduate peer advisors recruited from among the best and brightest in the Fox School of Business and Management. Peer advisors provide the perspective of an upper-class student and are trained to assist business students to be successful by sharing their knowledge and personal strategies for academic success. For more information, visit Peer Advising or contact foxpeer@temple.edu.

Faculty

In addition to the faculty list below, refer to the school's faculty and staff directory.

Aleksi Aaltonen, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, London School of Economics.

Edoardo Airoldi, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Carnegie Mellon University.

Joan Allatta, Associate Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, University of Pennsylvania.

Andrew T. Allmond, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MJ, Temple University.

Ronald C. Anderson, Professor, Department of Finance, Fox School of Business and Management; PhD, Texas A and M University.

Lynne M. Andersson, Associate Professor, Department of Management, Fox School of Business and Management; PhD, University of North Carolina at Chapel Hill.

Cynthia R. Axelrod, Associate Professor of Practice, Department of Finance, Fox School of Business and Management; MBA, Drexel University.

Sezgin Ayabakan, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, University of Texas at Dallas.

Xue Bai, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Carnegie Mellon University.

Gurdip Bakshi, Marvin Wachman Professor, Department of Finance, Fox School of Business and Management; PhD, University of Wisconsin-Madison.

Xiaohui Gao Bakshi, Research Associate Professor, Department of Finance, Fox School of Business and Management; PhD, University of Florida.

Steven Balsam, Professor, Department of Accounting, Fox School of Business and Management; PhD, City University of New York.

Rajiv Banker, Professor and the Stanley Merves Chair in Accounting, Information Technology and Management, Department of Accounting, Fox School of Business and Management; DBA, Harvard University.

Sudipta Basu, Professor, Department of Accounting, Fox School of Business and Management; PhD, University of Rochester.

Konstantin Bauman, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, Moscow State University.

Tawanda Benesi, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Georgia.

Gary J. Blau, Professor, Department of Management, Fox School of Business and Management; PhD, University of Cincinnati.

Misty P. Blessley, Associate Professor of Instruction, Department of Marketing, Fox School of Business and Management; PhD, Temple University.

Jeffrey R. Boles, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of California Berkeley.

Lawrence Brown, Seymour Wolfbein Distinguished Research Professor, Department of Accounting, Fox School of Business and Management; PhD, University of Rochester.

Lauren N. Burns, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Temple University.

Dmitri Byzalov, Associate Professor, Department of Accounting, Fox School of Business and Management; PhD, Harvard University.

Dwight Carey, Associate Professor of Practice, Department of Management, Fox School of Business and Management; BS, Farleigh Dickinson University at Madison.

Debra Casey, Associate Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, Rutgers University-New Brunswick.

Steven J. Casper, Associate Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, Temple University.

Yiwei Chen, Assistant Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Massachusetts Institute of Technology.

Pallavi Chitturi, Research Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Texas at Austin.

J. Jay Choi, Laura H. Carnell Professor, Department of Finance, Fox School of Business and Management; PhD, New York University.

Teresa Gill Cirillo, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MA, Rowan University.

Benjamin Collier, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Kentucky.

Mary Conran, Professor of Practice, Department of Marketing, Fox School of Business and Management; MBA, Temple University.

Cheri Cutler, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MS, Temple University.

John R. Deckop, Professor, Department of Management, Fox School of Business and Management; PhD, University of Minnesota.

C. Anthony Di Benedetto, Professor, Department of Marketing, Fox School of Business and Management; PhD, McGill University.

Denise Donaghue, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MA, Immaculata University.

Yuexiao Dong, Associate Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, The Pennsylvania State University.

John V. Dormuth, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; MS, Boston University.

Martin J. Doyle, Associate Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; MS, University of Phoenix.

Rob B. Drennan, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Pennsylvania.

Randy E. Dumm, Research Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Georgia.

Leora F. Eisenstadt, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, New York University School of Law.

Eric M. Eisenstein, Research Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Pennsylvania.

Philip English, Research Associate Professor, Department of Finance, Fox School of Business and Management; PhD, University of South Carolina.

Ming Fang, Assistant Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, Yale University.

Susan Feinberg, Associate Professor, Department of Management, Fox School of Business and Management; PhD, University of Minnesota.

Laurie J. Fitzpatrick, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MFA, Temple University.

Thomas T. Fung, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; MS, University of Pennsylvania.

Deanna Geddes, Professor, Department of Management, Fox School of Business and Management; PhD, Purdue University.

Katherine W. Gerst, Associate Professor of Practice, Department of Marketing, Fox School of Business and Management; MBA, Temple University.

Melissa Glenn, Associate Professor of Practice, Department of Marketing, Fox School of Business and Management; MA, La Salle University.

Daniel Goldberg, Associate Professor of Instruction, Department of Management, Fox School of Business and Management; EdD, Delaware Valley University.

Enrique A. Gomez, Assistant Professor, Department of Accounting, Fox School of Business and Management; PhD, University of Georgia.

Elizabeth A. Gordon, Professor, Department of Accounting, Fox School of Business and Management; PhD, Columbia University.

Kelly A. Grace, Assistant Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, University of Florida.

Martin Grace, Harry Cochran Professor in Risk, Insurance and Healthcare Management, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Florida.

Curtis J. Gregory, Assistant Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, Walden University.

Michael Guglielmo, Associate Professor of Practice, Department of Management, Fox School of Business and Management; MBA, Temple University.

Bertrand Guillotin, Associate Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, Grenoble Ecole de Management.

Terry Ann Halbert, Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, Rutgers University.

Crystal M. Harold, Associate Professor, Department of Management, Fox School of Business and Management; PhD, George Mason University.

James D. Harrington, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; MBA, University of Georgia.

Theodore L. Hill III, Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, Temple University.

James Hilliard, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Connecticut.

Samuel D. Hodge Jr., Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, Temple University.

Brian C. Holtz, Associate Professor, Department of Management, Fox School of Business and Management; PhD, George Mason University.

Leila Hosseini, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, University of Texas at Dallas.

Michael Hubbel, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; MBA, College of Insurance.

Michael J. Hughes, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MBA, Temple University.

Thomas Intoccia, Assistant Professor of Practice, Department of Finance, Fox School of Business and Management; MBA, Regis University.

Daniel Isaacs, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, Brooklyn Law School.

Alan J. Izenman, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of California Berkeley.

Cheng (Jason) Jiang, Associate Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, University of California Riverside.

David E. Jones, Associate Professor of Practice and the Jerome Fox Chair in Accounting, Taxation and Financial Strategy, Department of Accounting, Fox School of Business and Management; PhD, Case Western Reserve University.

Jaehwuen Jung, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, University of Minnesota.

Darin Kapanjie, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; EdD, Temple University.

Vishesh Karwa, Assistant Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, The Pennsylvania State University.

Roger J. Kashlak, Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, Temple University.

Howard Keen, Assistant Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, Bryn Mawr College.

Thomas Kenny, Assistant Professor of Practice, Department of Finance, Fox School of Business and Management; MBA, Temple University.

Alan Kerzner, Assistant Professor of Practice, Department of Management, Fox School of Business and Management; MBA, University of Pennsylvania.

Guangwen Kong, Associate Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Southern California.

A. J. Kreimer, Associate Professor of Practice, Department of Accounting, Fox School of Business and Management; MBA, Temple University.

Jagannathan Krishnan, Professor, Department of Accounting, Fox School of Business and Management; PhD, The Ohio State University.

Jayanthi Krishnan, Professor, Department of Accounting, Fox School of Business and Management; PhD, The Ohio State University.

Ravi S. Kudesia, Assistant Professor, Department of Management, Fox School of Business and Management; PhD, Washington University in St. Louis.

Subodha Kumar, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Texas at Dallas.

Edmund (Ned) L. Lafer, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; MD, Sackler School of Medicine.

Sheri L. Lambert, Associate Professor of Practice, Department of Marketing, Fox School of Business and Management; MBA, University of Michigan.

James M. Lammendola, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, University of Tulsa College of Law.

David Lanter, Assistant Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; PhD, University of South Carolina.

Amy Lavin, Associate Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; MBA, Temple University.

Vanessa J. Lawrence, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, University of Pennsylvania School of Law.

Kuang-Yao Lee, Assistant Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, The Pennsylvania State University.

Yan Li, Associate Professor, Department of Finance, Fox School of Business and Management; PhD, Cornell University.

Xueming Luo, Charles E. Gilliland, Jr. Professor in Marketing, Department of Marketing, Fox School of Business and Management; PhD, Louisiana Tech University.

Marco J. Malandra, Associate Professor of Practice, Department of Accounting, Fox School of Business and Management; MS, Golden Gate University.

Barbara Blundi Manaka, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, Temple University.

Munir Y. Mandviwalla, Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, Claremont Graduate University.

Connie Xiangdong Mao, Professor, Department of Finance, Fox School of Business and Management; PhD, Cornell University.

Marie-Christine Martin, Assistant Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; MBA, University of Montreal.

Kenichiro McAlinn, Assistant Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Duke University.

John A. McClendon, Associate Professor, Department of Management, Fox School of Business and Management; PhD, University of South Carolina.

Michael McCloskey, Associate Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; MBA, Drexel University.

James P. Miller, Associate Professor of Practice, Department of Marketing, Fox School of Business and Management; PhD, University College Cork.

Laurel A. Miller, Associate Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; MS, Temple University.

Neha Mittal, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Rutgers University.

- Thorsten P. Moenig*, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, Georgia State University.
- Christopher Monos*, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; PhD, Columbia University.
- Solon Moreira*, Assistant Professor, Department of Management, Fox School of Business and Management; PhD, Copenhagen Business School.
- Shreeram R. Mudambi*, Frank M. Speakman Professor of Strategic Management, Department of Management, Fox School of Business and Management; PhD, Cornell University.
- Susan Mudambi*, Research Professor, Department of Marketing, Fox School of Business and Management; PhD, University of Warwick.
- Jose Munoz*, Professor of Instruction, Department of Accounting, Fox School of Business and Management; DBA, Anderson University of Indiana.
- David Nash*, Associate Professor of Practice, Department of Management, Fox School of Business and Management; MS, University of Pennsylvania.
- Nicole Naumoff*, Assistant Professor of Practice, Department of Management, Fox School of Business and Management; MBA, York University, Canada.
- Lalitha Naveen*, Associate Professor, Department of Finance, Fox School of Business and Management; PhD, Arizona State University.
- Katherine A. Nelson*, Assistant Professor of Practice, Department of Management, Fox School of Business and Management; BA, College of Mount Saint Vincent.
- Cory Ng*, Associate Professor of Instruction, Department of Accounting, Fox School of Business and Management; DBA, Wilmington College Delaware.
- In-Sue Oh*, Professor, Department of Management, Fox School of Business and Management; PhD, University of Iowa.
- Christina M. Owings*, Associate Professor of Practice, Department of Marketing, Fox School of Business and Management; MEd, Lesley College.
- Bora Ozkan*, Associate Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, University of New Orleans.
- Min-Seok Pang*, Associate Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, University of Michigan.
- Dennis A. Paris*, Associate Professor of Practice, Department of Marketing, Fox School of Business and Management; MBA, Drexel University.
- Hyun Jong Park*, Assistant Professor, Department of Accounting, Fox School of Business and Management; PhD, University of Florida.
- Arvind Parkhe*, Laura H. Carnell Professor, Department of Management, Fox School of Business and Management; PhD, Temple University.
- Tony Petrucci*, Associate Professor of Practice, Department of Management, Fox School of Business and Management; PhD, Regent University.
- Michael D. Power*, Assistant Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Temple University.
- Robert S. Pred*, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Texas at Austin.
- Shaojun Qin*, Assistant Professor, Department of Marketing, Fox School of Business and Management; PhD, University of Minnesota.
- Yue Qui*, Assistant Professor, Department of Finance, Fox School of Business and Management; PhD, University of Minnesota.
- Robert T. Rajewski*, Assistant Professor of Practice, Department of Finance, Fox School of Business and Management; MS, Johns Hopkins University.
- Crystal Reeck*, Assistant Professor, Department of Marketing, Fox School of Business and Management; PhD, Duke University.
- Sheri Risler*, Associate Professor of Practice, Department of Accounting, Fox School of Business and Management; BS, Boston University.
- Michael J. Rivera*, Associate Professor of Instruction, Department of Management, Fox School of Business and Management; PhD, Purdue University.
- Samuel Rosen*, Assistant Professor, Department of Finance, Fox School of Business and Management; PhD, University of North Carolina at Chapel Hill.
- Edward C. Rosenthal*, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Northwestern University.
- Abhishek Roy*, Assistant Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Texas at Austin.

Donald B. Rubin, Research Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Harvard University.

Oleg Rytchkov, Associate Professor, Department of Finance, Fox School of Business and Management; PhD, Massachusetts Institute of Technology.

Sanat K. Sarkar, Cyrus C.K. Curtis Professor in Statistics, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Calcutta University.

Todd Schifeling, Assistant Professor, Department of Management, Fox School of Business and Management; PhD, University of Michigan.

Michael Schirmer, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; DBA, Wilmington College Delaware.

Stuart M. Schmidt, Professor Emeritus, Department of Management, Fox School of Business and Management; PhD, University of Wisconsin-Madison.

David Schuff, Research Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, Arizona State University.

Steven E. Sclarow, Assistant Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; MBA, Temple University.

Jonathan A. Scott, Professor, Department of Finance, Fox School of Business and Management; PhD, Purdue University.

Anthony Louis Seeton, Assistant Professor of Practice, Department of Management, Fox School of Business and Management; MBA, Temple University.

Jeremy J. Shafer, Assistant Professor of Practice, Department of Management Information Systems, Fox School of Business and Management; MS, Temple University.

Tianxiang (Tim) Shi, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Waterloo.

Amir Shoham, Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, Ben-Gurion University of the Negev.

Ofra Shoham-Bazel, Research Assistant Professor, Department of Finance, Fox School of Business and Management; EDBA, Temple University.

Indrajit Sinha, Associate Professor, Department of Marketing, Fox School of Business and Management; PhD, University of Michigan.

Marcus J. Sobel, Associate Professor Emeritus, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of California Berkeley.

John A. Soss, Associate Professor of Instruction, Department of Finance, Fox School of Business and Management; PhD, Northwestern University.

Joydeep Srivastava, Professor, Department of Marketing, Fox School of Business and Management; PhD, University of Arizona.

Alexander Stein, Assistant Professor of Instruction, Department of Marketing, Fox School of Business and Management; PhD, Temple University.

Detmar Straub, Research Professor, Department of Management Information Systems, Fox School of Business and Management; DBA, Indiana University.

Minhui (Barbara) Su, Assistant Professor, Department of Accounting, Fox School of Business and Management; PhD, University of Toronto.

Jennifer M. Sundstrom-Fitzgerald, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; MBA, Temple University.

Roman S. Szewczuk, Assistant Professor of Practice, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; MBA, La Salle University.

Chung (Jennifer) Won Tae, Assistant Professor, Department of Management, Fox School of Business and Management; PhD, London School of Business.

Vivek Tandon, Assistant Professor, Department of Management, Fox School of Business and Management; PhD, University of Michigan.

Cheng-Yong Tang, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Iowa State University.

Jason Thatcher, Milton F. Stauffer Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, Florida State University.

Reza Vafa, Instructor of Practice, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; MS, West Chester University.

Michael Valenza, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, Temple University.

Vinod Venkatraman, Associate Professor, Department of Marketing, Fox School of Business and Management; PhD, Duke University.

Krupa S. Viswanathan, Associate Professor, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; PhD, University of Pennsylvania.

Ryan M. Vogel, Associate Professor, Department of Management, Fox School of Business and Management; PhD, University of Georgia.

Kathleen Voss, Associate Professor of Practice, Department of Management, Fox School of Business and Management; MS, University of Pittsburgh.

Monica Wadhwa, Associate Professor, Department of Marketing, Fox School of Business and Management; PhD, Stanford University.

Wei Wang, Assistant Professor, Department of Accounting, Fox School of Business and Management; PhD, University of Missouri-Columbia.

Yang Wang, Assistant Professor, Department of Marketing, Fox School of Business and Management; PhD, Rice University.

Sunil Wattal, Professor, Department of Management Information Systems, Fox School of Business and Management; PhD, Carnegie Mellon University.

William W. S. Wei, Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Wisconsin-Madison.

Jean K. Wilcox, Assistant Professor of Practice, Department of Marketing, Fox School of Business and Management; PhD, University of Chicago.

David J. Wilk, Assistant Professor of Practice, Department of Finance, Fox School of Business and Management; MS, Johns Hopkins University.

Wayne W. Williams, Associate Professor of Instruction, Department of Accounting, Fox School of Business and Management; PhD, University of Pennsylvania.

Gary Witt, Associate Professor of Instruction, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, University of Pennsylvania.

Christian E. Wurst, Associate Professor of Instruction, Department of Accounting, Fox School of Business and Management; PhD, Temple University.

Timothy Young, Assistant Professor of Practice, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; MBA, Temple University.

Zhigen Zhao, Associate Professor, Department of Statistics, Operations, and Data Science, Fox School of Business and Management; PhD, Cornell University.

Jeffrey Zheng, Assistant Professor of Practice, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; MEd, Harvard University.

M. Michael Zuckerman, Associate Professor of Instruction, Department of Risk, Actuarial Science, and Legal Studies, Fox School of Business and Management; JD, John Marshall Law School.

Accounting BBA

Overview

Offered by the Department of Accounting, the **Bachelor of Business Administration in Accounting** provides students with practical and theoretical knowledge that opens many employment opportunities in the accounting profession and business.

Accounting majors pursue careers in public accounting, corporations, consulting, government and not-for-profit institutions. The accounting curriculum provides students with the conceptual framework and theory of accounting, while building skills to analyze, plan and make decisions with both numerical and qualitative information. Using data analytics and cutting-edge technologies, students learn to evaluate financial data, and provide organizations with information and solutions to operate efficiently, effectively and ethically. Courses such as financial accounting, cost accounting, accounting information systems, taxation and auditing provide core knowledge in accounting. Elective courses offer the flexibility to pursue in-depth areas such as business analysis, information systems, advanced taxation or management accounting.

Accounting majors may complete an optional concentration in Data Analytics (p. 812).

Campus Locations: Main and Online

Program Code: BU-ACCT-BBA

Student Professional Organizations

Accounting majors are encouraged to join a professional student organization, such as:

- Ascend
- Association of Latino Professionals for America (ALPFA)
- Beta Alpha Psi (BAP--National Honorary Society)
- Fox Accounting Association
- Institute of Management Accountants - Temple Chapter (IMA-T)
- National Association of Black Accountants (NABA)

These student professional organizations offer numerous opportunities to Accounting majors to attend career development seminars, connect with Fox alumni, and network with prominent business leaders and industry practitioners.

Licensure/Certification

Certified Public Accountant (CPA)

Certification as a Certified Public Accountant (CPA) is very helpful but not always necessarily required for finding work in the accounting profession. To become a CPA in Pennsylvania, individuals must complete certain academic requirements, sit for and pass the Uniform CPA Exam (administered by the National Association of State Boards of Accountancy (NASBA)), and complete certain work requirements. To be eligible to sit for the Uniform CPA Exam, individuals must: (i) receive a bachelor's degree or higher from an accredited college or university; and (ii) complete at least 120 semester credits with at least 24 semester credits in accounting subjects, including accounting and auditing, business law, finance, macroeconomics, microeconomics, or tax subjects sanctioned by the State Board of Accountancy. The education requirements to sit for the Uniform CPA Exam in Pennsylvania are met by successfully completing the Fox BBA in Accounting degree (124 credit hours). However, before applying for certification as a CPA, individuals must also complete an additional 12 semester credits in accounting, auditing, and tax subjects (36 total) and complete a total of at least 150 credit hours.

PA candidates who graduate with at least 150 credits must complete one year (1,600 hours) of work experience through employment in government, industry, academia, or public practice within five years of the date of application for CPA certification.

Students pursuing CPA certification are encouraged to take ACCT 3531 and ACCT 3532 (if interested in tax specialization), ACCT 3533 (if interested in business analysis and reporting specialization), and ACCT 3534 (if interested in information and controls specialization).

<https://www.picpa.org/future-cpas/become-a-cpa>

Certified Management Accountant (CMA)

Certification as a Certified Management Accountant (CMA) is very helpful but not always necessarily required for finding work in the accounting profession. The CMA certification and eligibility requirements are administered by the Institute of Management Accountants (IMA). To become a CMA in all states, including Pennsylvania, individuals must fulfill all of the following requirements: (i) active membership in IMA; (ii) active CMA entrance fee; (iii) satisfy certain education requirements; (iv) satisfy certain experiential requirements; (v) successfully complete all required CMA examination parts; and (vi) comply with the IMA Statement of Ethical Professional Practice.

The educational requirements to become a CMA are met upon obtaining a bachelor's degree from Temple University (or any accredited college or university). Candidates must submit verification of education to ICMA within seven years of completing the CMA examination. The experiential requirements to become a CMA include the completion of two continuous years of professional experience in management accounting and/or financial management. This requirement may be completed prior to or within seven years of passing the examination. Teaching qualifies as related professional experience when it is full-time and at least 60% of the course load taught is accounting or finance above the principles level over a two-year period. Professional experience is expected to be gained in full-time employment. However, continuous part-time positions of 20 hours per week meeting the definition of qualified experience will count toward this requirement at a rate of one year of experience for every two years of part-time employment.

Students pursuing CMA certification are encouraged to take ACCT 4502 (management accounting specialization).

<https://www.imanet.org/en/IMA-Certifications/CMA-Certification>

Institute of Internal Auditors' Global Certifications

The Institute of Internal Auditors (IIA) offers two core global certifications: the Certified Internal Auditor® (CIA®) and the Certification in Risk Management Assurance® (CRMA®).

The education requirement to sit for either of the CIA or CRMA certification programs is an Associate's degree or higher from an institution of higher education.

Although work experience is required to become certified, candidates may apply to the certification program and sit for exams prior to obtaining the requisite work experience. However, candidates will not be certified until all program requirements have been met. Additionally, candidates must meet

the experience requirement within the program eligibility period of three years in order to receive certification. Work experience for the IIA's certification programs is based on the maximum level of education achieved, as indicated below:

CIA Experience Requirement per Educational Level:

- Master's degree or equivalent: 12 months of internal audit experience or equivalent.
- Bachelor's degree or equivalent: 24 months of internal audit experience or equivalent.
- Associate degree, three A-level certificates with a grade of C or higher, or equivalent: 60 months of internal audit experience or equivalent.

<https://www.theiia.org/en/certifications/cia/eligibility-requirements/>

CRMA Experience Requirement per Educational Level:

- The CRMA Experience Requirements are the same as those listed above for the CIA. It also requires passing part one of the CIA exam.

Learn more about the Bachelor of Business Administration in Accounting.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 795) for the Bachelor of Business Administration including the requirements of the major listed below. Accounting students must attain a 2.0 GPA in the major and a 2.0 cumulative GPA in order to graduate.

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of Accounting Major

Code	Title	Credit Hours
ACCT 2521	Cost Accounting	3
ACCT 3511	Intermediate Accounting I	3
ACCT 3512	Intermediate Accounting II	3
ACCT 3526	Accounting Information Systems	3
ACCT 3531	Federal Taxes on Income	3
ACCT 3596	Auditing ¹	3
ACCT 4501 or ACCT 4502	Accounting Analytics Senior Seminar Strategic Financial Management Accounting	3
Select one of the following:		3
ACCT 3532	Topics in Taxation	
ACCT 3533	Advanced Financial Accounting	
ACCT 3534	Information Systems and Controls for Accounting Professionals	

ACCT 3580	Special Topics - Accounting
ACCT 4501	Accounting Analytics Senior Seminar ²
ACCT 4502	Strategic Financial Management Accounting ³

Total Credit Hours **24**

1

Effective Fall 2018, ACCT 3526 is a prerequisite for ACCT 3596, and ACCT 3531 is a prerequisite for ACCT 4501. These changes affect all students regardless of catalog year.

2

If ACCT 4502 Strategic Financial Management Accounting is selected as the Accounting Capstone Course, students may select ACCT 4501 to satisfy the required accounting elective.

3

If ACCT 4501 Accounting Analytics Senior Seminar is selected as the Accounting Capstone Course, students may select ACCT 4502 to satisfy the required accounting elective.

1

Please check with your departmental advisor on which course is most appropriate for the major.

2

Because this major has six additional major credits (two classes), only three credits (one class) of business electives are needed to satisfy the upper-division foundation requirement. 2000-3999 electives can be selected from: ACCT, AS, BA, ECON, FIN, HRM, IB, LGLS, MIS, MKTG, RE, RMI, STAT, SCM, SGM. Please see your advisor for elective suggestions that match your career objectives.

3

Students pursuing CPA licensure are encouraged to take ACCT 3531 (if interested in tax specialization). Students pursuing CMA certification are encouraged to take ACCT 4502 (management accounting specialization).

4

Students pursuing CPA licensure are encouraged to take ACCT 3532 (if interested in tax specialization). Students pursuing CPA licensure are encouraged to take ACCT 3533 (if interested in business analysis and reporting specialization).

5

Students pursuing CPA licensure are encouraged to take ACCT 3534 (if interested in information and controls specialization).

6

Students who complete ACCT 4501 can take ACCT 4502 as an elective. Students who complete ACCT 4502 can take ACCT 4501 as an elective.

Accounting BBA with Data Analytics Concentration

Overview

Offered by the Department of Accounting, the Bachelor of Business Administration in Accounting provides students with practical and theoretical knowledge that opens many employment opportunities in the accounting profession and business.

Accounting majors pursue careers in public accounting, corporations, consulting, government and not-for-profit institutions. The accounting curriculum provides students with the conceptual framework and theory of accounting, while building skills to analyze, plan and make decisions with both numerical and qualitative information. Using data analytics and cutting-edge technologies, students learn to evaluate financial data, and provide organizations with information and solutions to operate efficiently, effectively and ethically. Courses such as financial accounting, cost accounting, accounting information systems, taxation and auditing provide core knowledge in accounting. Elective courses offer the flexibility to pursue in-depth areas such as business analysis, information systems, advanced taxation or management accounting.

The **Bachelor of Business Administration in Accounting with an optional Concentration in Data Analytics** is open to all accounting majors and is designed to develop skills in problem-solving, data management, data analysis, creating visualizations and communicating insights. New technologies, big data, artificial intelligence, machine-driven learning and other trends are transforming business and the accounting profession. The Certified Public Accountant (CPA) exam is evolving to reflect the technology changes and increased specialization in the profession. The Certified Management Accountant (CMA) certificate includes new technology and analytics. The Data Analytics Concentration in Accounting will further develop the skills necessary to prepare you to succeed as an accountant.

Institute of Internal Auditors' Global Certifications

The Institute of Internal Auditors (IIA) offers two core global certifications: the Certified Internal Auditor® (CIA®) and the Certification in Risk Management Assurance® (CRMA®).

The education requirement to sit for either of the CIA or CRMA certification programs is an Associate's degree or higher from an institution of higher education.

Although work experience is required to become certified, candidates may apply to the certification program and sit for exams prior to obtaining the requisite work experience. However, candidates will not be certified until all program requirements have been met. Additionally, candidates must meet the experience requirement within the program eligibility period of three years in order to receive certification. Work experience for the IIA's certification programs is based on the maximum level of education achieved, as indicated below:

CIA Experience Requirement per Educational Level:

- Master's degree or equivalent: 12 months of internal audit experience or equivalent.
- Bachelor's degree or equivalent: 24 months of internal audit experience or equivalent.
- Associate degree, three A-level certificates with a grade of C or higher, or equivalent: 60 months of internal audit experience or equivalent.

<https://www.theiia.org/en/certifications/cia/eligibility-requirements/>

CRMA Experience Requirement per Educational Level:

- The CRMA Experience Requirements are the same as those listed above for the CIA. It also requires passing part one of the CIA exam.

<https://www.theiia.org/en/certifications/crma/eligibility-requirements/>

1

Please check with your departmental advisor on which course is most appropriate for the major.

2

Because this major has more than 9 additional major credits, no additional business electives are needed to satisfy the upper-division foundation requirement.

Accounting Minor

Overview

Offered by the Department of Accounting, the **Minor in Accounting** is open to all students. The minor provides valuable skills in the theory and practice of financial and managerial accounting. Students will learn basic business foundations, financial statements and the accountant's role in the management of a company. The Accounting minor can expand career opportunities and increase marketability with a strong foundation in the language and basic tools of business.

Campus Location: Main and Online

Contact Information

Elizabeth A. Gordon, Accounting Department Chair
 Alter Hall, Room 453
 215-204-6422
 egordon@temple.edu

Requirements

- Open to business or non-business students.
- Understand basic business foundations, financial statements, and the accountant's role in the management of a company.
- **Prerequisite courses for the minor:**

Code	Title	Credit Hours
ECON 1101	Macroeconomic Principles	3
ECON 1102	Microeconomic Principles	3
ACCT 2103	Financial and Managerial Accounting for Decision Making	4-6
or ACCT 2101 & ACCT 2102	Financial Accounting and Managerial Accounting	
Total Credit Hours		10-12

- Minimum grades of C- are required in prerequisite courses and are not calculated in the minor GPA.
- **Four departmental courses are required** (three of these must be taken at Temple University):

Code	Title	Credit Hours
ACCT 2521	Cost Accounting	3
ACCT 3511	Intermediate Accounting I	3
Select two of the following:		6
ACCT 3512	Intermediate Accounting II	

ACCT 3526	Accounting Information Systems
ACCT 3531	Federal Taxes on Income
ACCT 3532	Topics in Taxation
ACCT 3533	Advanced Financial Accounting
ACCT 3534	Information Systems and Controls for Accounting Professionals
ACCT 3596	Auditing ¹
ACCT 4501	Accounting Analytics Senior Seminar
ACCT 4502	Strategic Financial Management Accounting
Total Credit Hours	12

1

Effective Fall 2018, ACCT 3526 is a prerequisite for ACCT 3596. This change affects all students regardless of catalog year.

- Minimum grades of C are required in accounting courses unless otherwise specified.
- A grade point average of 2.0 in courses in the minor is required.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.
- Courses are available 100% online.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Actuarial Science BBA

Overview

Located in the Department of Risk, Actuarial Science, and Legal Studies, the **Bachelor of Business Administration in Actuarial Science** provides students the opportunity to develop a strong foundation in mathematics and statistics while being exposed to a wide range of business disciplines. Temple's Actuarial Science major is one of only a few programs designated as a Center of Actuarial Excellence by the Society of Actuaries.

Actuaries specialize in the evaluation of insurance and financial risks. They hold positions of responsibility with insurance companies, consulting firms, investment banks, government regulatory organizations and government insurance programs. Actuaries must also pass a series of professional exams, administered by the Society of Actuaries and Casualty Actuarial Society, to receive the credential of Associate or Fellow. For more information, see the Licensure/Certification section below.

Campus Location: Main

Program Code: BU-AS-BBA

Student Professional Organization

Students should meet with the Program Director as soon as they enter the Actuarial Science program. In addition to their coursework and professional examinations, students are strongly encouraged to become active in the Sigma chapter of **Gamma Iota Sigma (GIS)**, Temple's national award-winning professional student organization in Risk Management, Insurance, and Actuarial Science. The organization hosts numerous guest speakers from the industry, sponsors a variety of career development seminars, and maintains a widely-distributed résumé book. For more information, please contact the GIS President at 215-204-9368 or visit www.sigmachapter.org.

Licensure/Certification

Being credentialed as an actuary is important for advancement in the actuarial profession and to become qualified to offer professional judgement on financial statements. These credentials of Associate and Fellow are national credentials and are recognized internationally as well. There is no state-specific actuarial credentialing or state-specific actuarial exams.

Actuaries must pass a series of professional exams administered by the Society of Actuaries and Casualty Actuarial Society which test the candidate's knowledge in probability, statistics, financial mathematics, insurance contractual design, and insurance company financial operations. Candidates completing a certain set of exams receive the designation of Associate under either society. Beyond that set, candidates completing an additional set of exams receive the designation of Fellow of either society.

Coursework in Temple's Actuarial Science program helps prepare students for several Associateship-level actuarial exams. Students can self-study for additional exams.

An additional component to becoming credentialed as an Associate is completing Validation by Educational Experience (VEE) requirements. Candidates can satisfy these requirements by completing an external course or taking college courses which have been approved by the Society of Actuaries and receiving a minimum grade of B-. Courses in Temple's Actuarial Science curriculum are approved by the Society of Actuaries as satisfying these VEE (Validation by Educational Experience) requirements.

4

Course only offered in Spring term.

Business Analytics Minor

Overview

Offered by the Department of Statistics, Operations, and Data Science the **Minor in Business Analytics** is open to Fox School of Business and Management and School of Sport, Tourism and Hospitality Management (STHM) students with a minimum GPA of 3.0. Fox and STHM students will learn how to unlock the value buried in corporate data and create new business opportunities using cutting-edge tools and techniques in predictive modeling, forecasting, association mining, cluster analysis, decision trees, unstructured "big" data, sentiment analysis, and experimental design. This minor is ideal for Marketing and Management Information Systems students seeking more experience with Data Analytics.

Campus Location: Main

Contact Information

Lauren Burns, Deputy Chair and Academic Director
lburns@temple.edu

Requirements

- **Three prerequisite courses are required for this minor:**

Code	Title	Credit Hours
MIS 2101	Digital Systems ¹	3
MKTG 2101	Marketing Management ¹	3
STAT 2103	Statistical Business Analytics ¹	4

1

Minimum grades of C are required in prerequisite courses and are not calculated in the minor GPA.

- **Five courses are required** (three must be taken at Temple University). Recommended sequence is listed below:

Code	Title	Credit Hours
MIS 2502	Data and Analytics ¹	3
STAT 2521	Data Analysis and Statistical Computing	3
MKTG 3509	Customer Data Analytics	3
STAT 2523	Design of Experiments and Quality Control (Fall only)	3
MKTG 3508	Digital Marketing	3

Total Credit Hours	15
---------------------------	-----------

1

MIS majors will substitute a course chosen from: MIS 3505, MIS 3536, MIS 3538, MIS 3581, MKTG 3511, STAT 2512, or STAT 2522.

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course. A minimum grade of C is required in MIS 2502.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- For more information, visit the Statistics, Operations, and Data Science department.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Business Basics Certificate

Overview

The **Business Basics Certificate**, offered by the Fox School of Business and Management, is open to non-matriculated students only.

In addition to Analytical Reading and Writing, this certificate introduces students to some fundamental business courses. Courses in accounting, human resource management, legal/ethical reasoning, and statistics will be building blocks for those looking to develop or enhance strategic thinking in the business environment.

It is strongly recommended that students take the courses in the order listed within the requirements to build on their knowledge in a practical way.

These business foundation courses will apply toward the BBA if students matriculate into the degree program.

Campus Locations: Main and Online (some courses available in Japan and Rome)

Program Code: BU-BUSB-CR2+

Requirements

- **Five courses are required** (three of these courses must be taken at Temple University):

Code	Title	Credit Hours
ENG 0802	Analytical Reading and Writing ¹	4
BA 1103	Legal and Ethical Reasoning in Business	3
HRM 1101	Leadership and Organizational Management	3
STAT 1001	Quantitative Methods for Business I ¹	3
ACCT 2103	Financial and Managerial Accounting for Decision Making ¹	4
Total Credit Hours		17

1

Prior to enrolling in English, Statistics, and Accounting, students must receive placement assessment or take placement testing and may need to complete additional English or Math review courses if indicated by placement test results.

- A minimum grade of C in each course is required.
- The certificate will be awarded upon satisfactory completion of all required courses.
- Business Basics classes can be taken 100% online.

Business Management BBA

Overview

Offered by the Department of Management, the **Bachelor of Business Administration in Business Management** is ideal for both traditional undergraduates and adult students already in a professional environment. Business Management students learn how to be leaders in business and work with others effectively, efficiently and profitably, regardless of the organization's size or industry sector.

Business Management courses provide practical knowledge as well as theories that create skills in a wide range of areas, including

- Change Management,
- Intrapreneurship and Innovation,

- Applicable Technologies,
- Communication,
- Research,
- Management, and
- Supervisory Techniques.

Business Management majors also have many opportunities to

- Network,
- Meet business leaders,
- Learn through internships, and
- Understand the ever-evolving intricacies of the business world.

Campus Location: Main

Program Code: BU-BMGT-BBA

Careers and Placements

All businesses need managers. A business that is improperly managed will have difficulty succeeding.

Business Management careers include, but are not limited to

- Technology,
- Consulting,
- Retail,
- Manufacturing,
- Wholesale,
- Export/Import,
- Healthcare,
- Education,
- Entertainment, and
- Sales.

The above are just some of the industries that must have effective managers in order to function properly.

The Fox School of Business and Management's Center for Professional Development (CSPD) is one resource that helps students secure internships and employment in the industries noted above and others as well.

Minors

Students are encouraged to explore a minor or certificate program in addition to their major. Courses taken for the major will not count for a minor or certificate. Recommended minors include:

- Entrepreneurship and Innovation Management Minor
- International Business Administration Minor
- Sales Minor

Student Professional Organizations

Students are encouraged to join a Fox Student Professional Organization (SPO) that meets their interests. The following are specifically designed for the Business Management major:

- Business Management Organization (BMO)
- Professional Sales Organization (PSO)

Both chapters help you connect with business leaders, classmates who strive for success, and provide innovative and professionally stimulating events and speakers.

Internships

The Business Management major, through its Business Management Council and The Fox School's CSPD, works to provide all our students who desire internships the opportunity to acquire them.

Accelerated Program

4+1 Master of Education Degree (MEd)

The 4+1 Master of Education (MEd) program is designed for students who are interested in pursuing a Master of Education while completing the Bachelor of Business Administration (BBA) in Business Management program requirements. After completion of the programs, students earn a BBA degree and an MEd in Business, Computer and Information Technology Education (BCITE) or Marketing Education (ME), and a Commonwealth of Pennsylvania Instructional I Teaching Certificate in BCITE or ME. Learn more about the application process and deadlines for the 4+1 program in Career and Technical Education.

2

Business and Major Electives numbered 2000-3999 can be selected from: ACCT, AS, BA, ECON, FIN, HRM, IB, LGLS, MIS, MKTG, RE, RMI, STAT, SCM, SGM. Please see your advisor for elective suggestions that match your career objectives.

Business Minor

Overview

Offered by the Fox School of Business and Management, the **Minor in Business** is designed for undergraduate degree-seeking students outside the Fox School of Business and Management. The minor provides non-business students with an overview of specific, critical business areas and is designed to enhance students' readiness for work in business or other organizations after graduation and increase their professional marketability. In addition, this quantitatively-oriented minor provides a good foundation for non-business students to facilitate the transition into an MBA program.

Students interested in a less quantitatively-oriented business minor may consider the General Business Studies minor (p. 853).

Campus Locations: Main and Online

Contact Information

Chuck Allen, Associate Vice Dean for Undergraduate Programs

Alter Hall, Room 369
callen@temple.edu

Requirements

- Completion of MATH 1022, STAT 1001, or calculus with a minimum grade of C- is a prerequisite for some courses in this minor.
- **Eight courses required** (five of these must be taken at Temple University):

Code	Title	Credit Hours
ECON 1101	Macroeconomic Principles	3
ECON 1102	Microeconomic Principles	3
HRM 1101	Leadership and Organizational Management	3
ACCT 2101	Financial Accounting	3-4
or ACCT 2103	Financial and Managerial Accounting for Decision Making	
MKTG 2101	Marketing Management	3
RMI 2101	Introduction to Risk Management	3
STAT 2103	Statistical Business Analytics	3-4
or MATH 1013	Elements of Statistics	
One of the following courses can be substituted for STAT 2103 if required for the student's program:		
CEE 3048	Probability, Statistics & Stochastic Methods	
PSY 1003	Statistics for Psychology	
SOC 1167	Social Statistics	
SOC 3201	Statistical Methods in Sociology	
Total Credit Hours		21-23

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.
- Courses are available 100% online.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Business Plus Certificate

Overview

The **Business Plus Certificate**, offered by the Fox School of Business and Management, is open to non-matriculated students only.

Building on the skills students gained through the Business Basics certificate, the Business Plus certificate will introduce students to additional fundamental business courses. Courses in accounting, economics, marketing, and risk management and insurance will continue to sharpen and refine strategic thinking in the business environment.

Students should complete the Business Basics Certificate prior to taking Business Plus courses. It is strongly recommended that students take the courses in the order listed within the requirements to build on their knowledge in a practical way.

These business foundation courses will apply toward the BBA if students matriculate into the degree program.

Campus Locations: Main and Online (some courses available in Japan and Rome)

Program Code: BU-BUSP-CERT

1

Appropriate math assessment or prerequisite course required prior to enrolling in Economics and Statistics courses.

2

These courses have prerequisites.

- A minimum grade of C in each course is required.
- The certificate will be awarded upon satisfactory completion of all required courses.
- Business Plus courses are available 100% online.

Corporate Compliance and Regulatory Policy Minor

Overview

Offered by Department of Risk, Actuarial Science, and Legal Studies, the **Minor in Corporate Compliance and Regulatory Policy** is open to all students. The minor is designed to expose students to a practical law-related field in which they can use their legal training with or without a graduate degree and in which they can find professional opportunities in numerous industries.

Legal and Policy Issues in the Workplace

Total Credit Hours**18**

1

Minimum grade of C is required in all prerequisites.

- All courses required for the minor must be taken at Temple University. Residency excludes the prerequisite courses.
- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course, unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Digital Marketing Minor

Overview

Students interested in expanding their career options through a general knowledge of marketing and information systems principles and specializing in digital marketing should consider completing a **Minor in Digital Marketing**, offered by the Department of Marketing. The Digital Marketing minor integrates marketing with digital technology and analytics to prepare students for new and emerging jobs related to analytics, blogging, search engine optimization, e-detailing, site design, Internet research, digital demographics, personalization, customer relationship management, information architecture, social media, e-commerce and media design.

The Digital Marketing minor is open to all students. The minor is particularly relevant for Marketing, Human Resource Management, Business Management, and Management Information Systems students. It is also ideal for students in Lew Klein College of Media and Communication.

Campus Location: Main

Note: Select online course options may be offered at the discretion of the department.

Learn more about the Digital Marketing minor.

Requirements

- Quantitative, critical thinking, and problem-solving skills required for success in this minor; a cumulative GPA of 3.0 is recommended.
- **Eight courses required (six must be taken at Temple University):**

Code	Title	Credit Hours
ECON 1101 or ECON 1901	Macroeconomic Principles Honors Macroeconomic Principles	3
MIS 2101 or MIS 2901	Digital Systems ¹ Honors Digital Systems	3
MKTG 2101 or MKTG 2901	Marketing Management Honors Marketing Management	3
MIS 2502	Data and Analytics ¹	3
MIS 3504	Digital Design and Innovation ¹	3
MIS 3538	Social Media Innovation	3

MKTG 3501	Integrated Marketing Communications	3
MKTG 3508	Digital Marketing	3
Total Credit Hours		24

1

A minimum grade of C or higher is needed to enroll in MIS 2502 and MIS 3504.

Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

- **Marketing majors** who declare Digital Marketing minor will complete MKTG 3501 and MKTG 3508 as well as two other Marketing electives for the Marketing major.
- **MIS majors** who declare Digital Marketing minor will complete MIS 3505 instead of MIS 2502, which is already required for the MIS major.
- Some courses are only offered once a year depending on demand for the course.
- A cumulative grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Economics BBA

Overview

The **Bachelor of Business Administration in Economics** is offered by the Department of Economics through a joint effort between the College of Liberal Arts and the Fox School of Business and Management.

Economics is the study of how we allocate resources among alternative uses to satisfy our wants. Virtually all of the public and personal issues which confront us today have an important economic component. For this reason, the economic way of thinking plays a valuable role in helping us make sense of the complex world in which we live. In addition, the study of economics is excellent preparation for a wide range of careers. Economics majors with bachelor's degrees are well prepared to be managers in both the public and private sectors. Training in economics also provides a solid basis for professional study in law, business, public administration and the health sciences.

Campus Location: Main

Program Code: BU-ECBU-BBA

Student Organizations

The Temple Economics Society (TES) is the student professional organization for economics majors and is open to all students interested in economics. For more information, please see the TES web site or attend one of the weekly meetings (Fridays at noon in Alter Hall, Room 239).

Economics majors may also become members of Omicron Delta Epsilon (ODE), the National Honor Society, if they meet the admissions requirements of the organization. For more information, please see the ODE web site or contact Dimitrios Diamantaras (dimitrios.diamantaras@temple.edu).

Minor

Fox students who wish to understand basic business foundations and how the impact of economics affects public and personal issues may want to minor in Economics. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor. The requirements (p. 834) must be completed prior to graduation.

ECON 4071	Monetary Theory and Policy ³

Total Credit Hours **18**

1

This major capstone is usually taken in the final semester, and all prerequisites must be met.

2

In order to satisfy a Major Elective, Fox Students must take "Behavioral Economics" as ECON 3548. Students cannot receive credit for both ECON 3548 and ECON 3696.

3

This course was previously offered as ECON 3505. Students who have earned credit in ECON 3505 will not earn additional credit in ECON 4071.

ECON 3408, ECON 3581, ECON 3696, ECON 3999, and ECON 4999 cannot be used to fulfill an Elective for the Economics major. These courses as well as other courses in Economics not included above can be taken as free electives for the degree.

Total Credit Hours**12**

1

If both ECON 3501 and ECON 3502 are taken, one counts as one of these electives.

- ECON 3408, ECON 3581, ECON 3696, ECON 3999, and ECON 4999 cannot be used to fulfill an Elective for the Economics minor.
- A grade point average of 2.0 in courses in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Entrepreneurship and Innovation Management BBA

Overview

Entrepreneurs are creative problem-solvers that are driven to create their own financial futures and have a big impact on the world. Entrepreneurship is a way of life; anyone can be entrepreneurial—whether you want to start the next Google, take control of your work-life balance with a lifestyle business, be a leader driving change and innovation in an existing company or have a positive impact on the world with a social venture.

The **Bachelor of Business Administration in Entrepreneurship and Innovation Management (EIM)** major and courses, offered by the Department of Management, are highly experiential and designed to be real-world relevant and high impact. Students will get out of the classroom to work on ideas and ventures about which they are passionate. Coursework focuses on a variety of topics that enable students to become successful entrepreneurs, high impact intrapreneurs and social change leaders. Students will learn how to operate with open mindsets, uncover high impact opportunities, develop innovative product and service solutions, quickly and affordably validate ideas, pivot as the world evolves, develop effective Business Model Canvases (BMC) and Business Plans, and successfully pitch for and secure funding. These skills are highly valued by employers and leaders within the entrepreneurial ecosystem.

Careers and Placements

Our graduates have appeared in the Forbes "30 under 30", have founded companies among the fastest growing in Philadelphia, have raised substantial funding as they launch and scale their ventures, and have created amazing positive impact as they address complex social issues.

The Entrepreneurship and Innovation Management major is a good choice for students who:

- would like to start a new venture or business;
- would like to achieve a desired lifestyle doing consulting, freelancing, or gig work;
- plan to assume responsibilities in a family business;

- want to work in the dynamic and exciting environment of startup ventures or the entrepreneurial ecosystem (for example, accelerators and incubators);
- want to innovate and lead change in a high-growth organization; or
- want to have positive social impact with a social venture, non-profit, or multi-bottom line organization.

Getting the Most Out of Your Major

Through Temple's Entrepreneurship and Innovation Management BBA you will learn to:

- Creatively solve business problems,
- Recognize opportunities to create value for customers,
- Develop and drive organizational innovation,
- Quickly and inexpensively test your ideas,
- Design business models that drive critical outcomes,
- Create high-impact pitch decks, and
- Write business plans for funding.

Co-Curricular Opportunities

We offer many academic and co-curricular opportunities for our entrepreneurship majors to get the most from their time at Temple:

- **Practical Hands-On Curriculum** - Come to class ready to identify opportunities and evolve your entrepreneurial ideas. Our courses are taught by successful serial entrepreneurs, experienced venture capital executives, senior innovators and successful executives who have turned ideas into reality across a wide range of contexts.
- **Learn about the IEI** - The Innovation & Entrepreneurship Institute houses co-curricular programs for the EIM major.
- **Join the 1810 Accelerator** - The 1810 Accelerator is the home for entrepreneurs and innovators on Temple's campus. Accelerator membership is open to students, alumni, faculty and staff from all 17 schools and colleges at Temple University. Apply for 1810 Accelerator membership.
- **Entrepreneurial Student Association (ESA)** - We expect all EIM majors to be active members in the ESA where they can meet exciting Philly-based entrepreneurs and work on a variety of interesting projects with local companies and the community.
- **Participate in IEI competitions** - Throughout the year, the Innovation & Entrepreneurship Institute (IEI) runs the Innovative Idea Competition (IIC), Changemaker Challenge (CMC), and Be Your Own Boss Bowl (BYOBB). EIM majors should be competing in these competitions as often as possible. Learn more about these competitions.
- **Entrepreneurial Internships** - We want our Entrepreneurship and Innovation Management majors to have relevant business experience when they graduate. Thus, our program includes a required internship course SGM 3685 in which students will do an internship within a startup, accelerator, incubator or other entrepreneurial support program.
- **Launch a Venture NOW!** - While all our classes let students work on projects that move their ideas closer to market readiness, one popular class lets students actually launch a new venture while in school: SGM 3504 Launch a New Venture in 100 Days. We want to be able to say that all of our EIM graduates are already successful entrepreneurs before they graduate.

Campus Location: Main

Program Code: BU-EIM-BBA

Related Academic Programs

For students interested in Entrepreneurship and Innovation Management (EIM), we offer several academic options including:

- Human Behavior General Education course: SGM 0827 Creativity and Organizational Innovation
- Double Major (students in many Fox majors can double count one course in both majors)
- Entrepreneurship and Innovation Management minor
- Entrepreneurship and Innovation Management undergraduate certificate (for non-business students)
- Master of Science in Innovation Management and Entrepreneurship
- MBA concentrations in Innovation Management and Entrepreneurship or Strategic Management
- Graduate certificate in Healthcare Innovation Management.

Other programs offered by the Department of Management are:

- International Business Administration Minor
- Organizational Leadership Minor
- Sales Minor

Note: Entrepreneurship courses are listed under the subject "Strategic Management" (SGM).

STHM 3426	Entrepreneurship in Sport, Recreation, Tourism, and Hospitality
SGM 3580	Special Topics - Strategic Management ⁵
SGM 3682	Independent Study ⁶

Total Credit Hours **18**

1

This is the major capstone and all prerequisites must be met.

2

Although internships are not a prerequisite for SGM 4596, students are strongly encouraged to take SGM 3585/SGM 3685 prior to their final semester at Temple to optimize options at graduation and balance workload.

3

SGM 3504 or SGM 3585 can only be taken to satisfy Entrepreneurial Breadth-Depth Elective if not already completed to satisfy other major course requirements.

4

Students interested in enrolling in IB 2509 should be aware that it is a competitive program and, if accepted, their project should be Entrepreneurship related. Please contact: study.abroad@temple.edu

5

SGM 3580 course topics vary by semester. Approval of the academic director, chair, or approved department personnel is required. Not all SGM 3580 course topics are appropriate for EIM students.

6

SGM 3682 Independent Study projects will be identified or created by the department or may be proposed by faculty/students collaborating where coursework does not match student's goals or needs and faculty are available to oversee a project. Approval of the academic director, chair, or approved department personnel is required.

Notes

Students pursuing a double major in business can double-count a maximum of one course toward both majors.

Students pursuing a minor may not double count courses for the major and minor.

Entrepreneurship and Innovation Management Certificate

Overview

Entrepreneurs are creative problem-solvers that are driven to create their own financial futures and have a big impact on the world. Entrepreneurship is a way of life; anyone can be entrepreneurial—whether you want to start the next Google, take control of your work-life balance with a lifestyle business, be a leader driving change and innovation in an existing company or have a positive impact on the world with a social venture.

Our Entrepreneurship and Innovation Management (EIM) courses and programs are highly experiential and designed to be real-world relevant and high impact. Students will get out of the classroom to work on ideas and ventures about which they are passionate. Coursework focuses on a variety of topics that enable students to become successful entrepreneurs, high impact intrapreneurs and social change leaders. Students will learn how to operate with open mindsets, uncover high impact opportunities, develop innovative product and service solutions, quickly and affordably validate ideas, pivot as the world evolves, develop effective Business Model Canvases (BMC) and Business Plans, and successfully pitch for and secure funding. These skills are highly valued by employers and leaders within the entrepreneurial ecosystem.

The **Certificate in Entrepreneurship and Innovation Management**, offered by the Department of Management, is an indicator that you are a proactive self-starter who can creatively solve problems and turn ideas into reality. Entrepreneurial thinking and innovation are the lifeblood of any organization. Even if you plan to work in a well-established company, the EIM certificate shows that you are able to go beyond your functional expertise and innovate when it counts. Companies are looking for employees that have specialization in a relevant field, as well as broad understanding of the business environment that allows them to approach issues from a strategic, outside-the-box perspective. This is part of what you will learn in the EIM certificate program.

The Entrepreneurship and Innovation Management certificate is open to non-Fox students only. Fox students should consider the Entrepreneurship and Innovation Management (EIM) minor (p. 842) or a dual major instead.

Campus Location: Main

Program Code: BU-EIM-CERT

Related Program

In collaboration with Fox, the Tyler School of Art and Architecture offers the certificate in Creative Entrepreneurship (p. 164).

Related Institute: Innovation & Entrepreneurship Institute (IEI)

Total Credit Hours

9

1

A maximum of 3 credits can be taken from outside of the Fox School of Business and Management for this certificate.

2

A maximum of 3 credits of GenEd courses can be utilized for completion of this certificate.

3

SGM 3580 course topics vary by semester. Approval of the academic director, chair, or approved department personnel is required. Not all SGM 3580 topics are appropriate for EIM students.

4

SGM 3682 Independent Study projects will be identified or created by the department or may be proposed by faculty/students collaborating where coursework does not match student's goals or needs and faculty are available to oversee a project. Approval of the academic director, chair, or approved department personnel is required.

- Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate.
- For more information and to declare or rescind this certificate, contact the entrepreneurship advisor in the Center for Undergraduate Advising, Fox School of Business, Speakman 101.

Interested students should discuss with their home college advisors or with personnel in the Innovation & Entrepreneurship Institute (1810 Liacouras Walk, 1st Floor) how the courses in the certificate will fit into their overall degree plan. Students are strongly encouraged to declare the certificate early in their academic career.

Entrepreneurship and Innovation Management Minor

Overview

Entrepreneurs are creative problem-solvers that are driven to create their own financial futures and have a big impact on the world. Entrepreneurship is a way of life; anyone can be entrepreneurial—whether you want to start the next Google, take control of your work-life balance with a lifestyle business, be a leader driving change and innovation in an existing company or have a positive impact on the world with a social venture.

The **Minor in Entrepreneurship and Innovation Management (EIM)**, offered by the Department of Management, is open to all students and is a great complement to any Temple major. It empowers students to follow multiple paths in their professional life and provides the problem-solving skills and strategic perspectives to take one's career to the next level. The EIM minor prepares students to start a business, run a consulting, freelancing or independent professional practice, be a productive member of an entrepreneurial or small business and entrepreneurial ecosystem, assume responsibilities in a family business, or become a highly effective leader in any growing, innovative business or social impact venture.

Our EIM courses and programs are highly experiential and designed to be real-world relevant and high impact. Students will get out of the classroom to work on ideas and ventures about which they are passionate. Coursework focuses on a variety of topics that enable students to become successful entrepreneurs, high impact intrapreneurs and social change leaders. Students will learn how to operate with open mindsets, uncover high impact opportunities, develop innovative product and service solutions, quickly and affordably validate ideas, pivot as the world evolves, develop effective Business Model Canvases (BMC) and Business Plans, and successfully pitch for and secure funding. These skills are highly valued by employers and leaders within the entrepreneurial ecosystem.

HRM 3507	Intrapreneurship in the 21st Century	
SGM 3580	Special Topics - Strategic Management ²	
SGM 3682	Independent Study ³	

Total Credit Hours**9**

1

This writing intensive course is also the major capstone, and all prerequisites must be met.

2

SGM 3580 course topics vary by semester. Approval of the academic director, chair, or approved department personnel is required. Not all SGM 3580 topics are appropriate for EIM students.

3

SGM 3682 Independent Study projects will be identified or created by the department or may be proposed by faculty/students collaborating where coursework does not match student's goals or needs and faculty are available to oversee a project. Approval of the academic director, chair, or approved department personnel is required.

- A grade point average of 2.0 as well as a minimum grade of C- in each course is required unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Finance BBA

Overview

The **Bachelor of Business Administration in Finance**, offered by the Department of Finance, provides students with theoretical and practical knowledge that opens many employment opportunities in the financial industry and corporate sector. It is intended for students who plan to pursue careers in asset management, commercial and investment banking, corporate sector, consulting, and public finance. The curriculum covers a variety of topics that include the structure and functioning of financial markets, asset valuation, portfolio management, corporate finance, financial statement analysis, fixed income analysis, credit analysis, and risk management. Students acquire a variety of skills that are highly valuable by employers. The main competencies to be developed include analyzing financial data from professional platforms such as Bloomberg and S&P Capital IQ, producing analyst reports, building financial models, and making sound financial business decisions. In addition, students have an opportunity to participate in The William C. Dunkelberg Owl Fund, a real money student-managed investment fund, and obtain real-life investing experience.

Campus Location: Main and Online

Program Code: BU-FIN-BBA

Student Professional Organization

All Finance majors are encouraged to join the Temple Finance Association. This student professional organization offers numerous opportunities for Finance majors to attend career development seminars, connect with Fox alumni, and network with prominent business leaders and industry practitioners.

Licensure/Certification

Chartered Financial Analyst (CFA)

A Chartered Financial Analyst (CFA) credential is often required for employment or advancement in money management. The condition for taking the first CFA exam is either to have a completed bachelor's degree or be in the final year of a four-year degree.

To become a CFA Charter holder, you must

- pass all three levels of the exam; and
- have at least 36 months of experience as a professional in investments or a related field.

<https://www.cfainstitute.org/en/programs/cfa>

Financial Risk Manager (FRM)

The Financial Risk Manager (FRM) certification is the most valuable certification in the area of risk management. There are no educational requirements or professional prerequisites that should be satisfied to register for the FRM exam.

To obtain the FRM certification, you must

- pass the FRM Exam Part I;
- pass the FRM Exam Part II within 4 years of passing Part I; and
- demonstrate 2 years of professional full-time financial risk management work experience.

<https://www.garp.org/frm/frequently-asked-questions>

Minor

The Finance minor is designed for students who want to obtain a deeper understanding of financial principles and learn about their applications to various problems in the corporate, financial and government sectors. The minor is open to business and non-business students.

Requirements (p. 849) for the minor must be fulfilled prior to graduation. The courses counted toward a major or another minor cannot be used to meet the minor requirements.

Finance Minor

Overview

The **Minor in Finance**, offered by the Department of Finance, allows students to obtain a deeper understanding of financial principles and learn about their applications to various problems faced by decision-makers in the corporate, financial and government sectors. It develops marketable skills and expands job opportunities for non-finance majors.

The minor is open to all students.

1

Requires permission of the instructor.

- Minimum grades of C are required in all FIN courses. Minimum grades of C- required in all other courses.
- A grade point average of 2.0 in the minor is required.
- FIN courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Financial Planning BBA

Overview

The **Bachelor of Business Administration in Financial Planning**, offered by the Department of Finance, provides students with knowledge and skills that are necessary to become a financial planning professional. Financial planners help individuals meet their life goals through growing, managing and protecting their assets. They holistically evaluate clients' financial situations, develop and present recommendations, advise clients on retirement, taxes, and estate planning, create portfolios that meet clients' investment objectives, and monitor clients' progress toward their financial goals. A successful financial planner must be skilled in the following areas:

- Retirement planning;
- Investment allocation;
- Income tax and estate planning;
- Insurance and employee benefits planning; and
- Financial statement preparation and analysis.

Financial planners are in great demand nationally and in the Philadelphia region. Potential employers include national and regional banks (i.e., Wells Fargo, Bank of America, Citigroup, JPMorgan Chase), asset managers (i.e., Charles Schwab, Vanguard, Fidelity, T. Rowe Price), accounting firms, registered investment advisors, and independent financial planning businesses and institutions.

Campus Location: Main

Program Code: BU-FINP-BBA

Student Professional Organization

All Financial Planning majors are encouraged to join the Financial Planning Association (FPA). This student professional organization provides its members an opportunity to engage and interact with financial planning professionals from registered investment advisors, broker-dealers and national investment firms. The annual FPA Career Day event and weekly student-led workshops prepare students for internships and careers in financial planning.

Licensure/Certification

Certified Financial Planner (CFP)

A Certified Financial Planner (CFP) credential is the gold standard for employment and advancement in the financial planning industry. The CFP requirements are the same in all states. First and foremost, candidates must hold at least a bachelor's degree from an accredited college or university. Second, they must complete coursework offered by a Registered Program provider approved by the CFP Board. The BBA in Financial Planning at the Fox School of Business and Management has been a CFP Board Registered Program since July 2015. To maintain this status, it incorporates 72 required Principal Knowledge Topics in the course curriculum. Third, candidates must pass the CFP exam, which is given three times per year (March, July, September). Fourth, candidates must attain three years of relevant work experience. Fifth, candidates must sign an Ethics Declaration and undergo a background check.

2000-3999 electives can be selected from: ACCT, AS, BA, ECON, FIN, HRM, IB, LGLS, MIS, MKTG, RE, RMI, STAT, SCM, SGM. Please see your advisor for elective suggestions that match your career objectives.

General Business Studies Minor

Overview

Offered by the Fox School of Business and Management, the **Minor in General Business Studies** is designed for undergraduate degree-seeking students outside the Fox School of Business and Management who are interested in a less quantitatively-focused business minor. The minor provides non-business students with an overview of some critical business areas and allows students the flexibility to select electives to explore interested areas of business. It is designed to enhance students' readiness for work in business or other organizations after graduation and increase their professional marketability.

Total Credit Hours		24-25

- A grade point average of 2.0 in the minor is required.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.
- Foundation courses can be completed 100% online. Many, but not all, of the electives are online.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Healthcare Management Minor

Overview

Offered by Department of Risk, Actuarial Science, and Legal Studies, the **Minor in Healthcare Management** is open to all students. This minor develops value-added skills for students who aim to understand the structure, policy, finance and strategy/operations issues of healthcare organizations.

Campus Location: Main

Contact Information

Edmund (Ned) Lafer, Assistant Professor of Practice
edmund.lafer@temple.edu

Requirements

- **Three courses required** (all three courses must be taken at Temple University):

Code	Title	Credit Hours
Required Courses		
HCM 3501	Introduction to Health Services Systems	3
HCM 3502	Healthcare Financing and Information Technology	3
HCM 4596	Healthcare Quality and Risk Management	3
Total Credit Hours		9

- Courses must be taken in sequence, not concurrently, so a minimum of three semesters is required to complete this minor.
- A grade point average of 2.0 in the minor is required as well as a minimum grade of C in each course unless otherwise specified.
- Health Economics (ECON 3507) is recommended but not required as an additional course.
- Risk Management majors who complete the Healthcare track are not eligible for the minor.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Human Resource Management BBA

Overview

The **Bachelor of Business Administration in Human Resource Management** (HRM), offered by the Department of Management, produces leaders who develop and deploy a crucial asset: the people who make up the organization. All organizations need great human talent to succeed, they need to reward and retain that talent, and they need all that talent to work well together. Human resource professionals recruit, train and develop, support, manage, and engage organizational members so that great goals can be achieved.

The Human Resource Management major

- Prepares students for careers in human resources (HR) either as generalists, specialists, or consultants;
- Focuses on HRM's role in creating synergies between the human and business sides of the business; and
- Links an organization's human capital with its productivity, reputation, and creation of sustainable profits.

If you like to think about humans and how they can do their best work together, this major is for you.

Campus Location: Main

Program Code: BU-HRM-BBA

Careers and Placements

The HRM major prepares graduates to be leaders in critical areas, including:

- Talent Acquisition;
- Training and Development;
- Compensation, Benefits, and Total Rewards;
- Employee Engagement;
- HR Metrics and Information Systems;
- Performance Management;
- Employee and Labor Relations;
- Ethical Practices in Labor and Employment; and,
- Legal Compliance with Local, State, and Federal Employment Regulations.

Typical first jobs for Human Resource Management majors include:

- HR Analyst,
- HR Generalist,
- HR Coordinator,
- Corporate Recruiter,
- Talent Development Specialist,
- Employee Relations Specialist,
- DE&I Coordinator,
- Compensation Analyst,
- Corporate Trainer, and
- HR Consultant.

Typical jobs held five to ten years out include managerial roles in these areas or movement into a specialty area of interest within the organization.

Minors

The Department of Management offers the following minors:

- Entrepreneurship and Innovation Management Minor
- International Business Administration Minor
- Organizational Leadership Minor
- Sales Minor

Related Academic Programs

RMI & HRM Focus

The Department of Risk, Actuarial Science, and Legal Studies offers Risk Management and Insurance (RMI) courses that complement the Department of Management's HRM courses for students interested in a career in employee benefits and/or human resource management. These courses allow students to broaden their career options by taking advantage of the cross-training offered by these departments.

- HRM major with a RMI focus: Students take RMI 3501 and RMI 3503.
- RMI major with a HRM focus: Students take HRM 2501 and HRM 3511.
- Dual HRM/RMI major: Students fulfill all requirements for both majors.

Graduate Program

- MS in Human Resource Management (MSHRM)

SHRM CP/SCP Certification

The Society for Human Resource Management offers graduating students the opportunity to sit for the SHRM CP/SCP Certification Exam. This comprehensive exam encompasses the entire field of human resource management. Upon passing the exam, the candidate is granted the designation of "Certified Professional" or "Senior Certified Professional" (CP/SCP).

- HRM students in their senior year are highly encouraged to register for, and prepare for, this exam with the goal of becoming certified (usually at the Certified Professional "CP" level).
- Certification with a SHRM CP/SCP credential differentiates you in the job market upon graduation and in the years ahead in your entire career.
- The SHRM CP/SCP Certification Preparation Course provides the materials, lectures, and activities needed to develop professional HR skills and to do well when you sit for the exam.
- Department of Management SHRM Certification Prep Scholarships are available to cover the SHRM CP/SCP Certification Preparation Course itself and associated materials.

Getting the Most Out of Your Major

Your successful growth into a professional field occurs both inside and outside the classroom. Human Resource Management majors are strongly encouraged to go to events, participate in activities, join a student professional organization (SPO), and do internships to maximize post-graduation success. Some of the benefits of extra-curricular activities are:

- Build friendships and networks outside of class,
- Build professional relationships with those currently in practice,
- Discover new areas and facets of your chosen field,
- Talk through your perceptions of the field with others interested in HR issues,
- Keep up to date with changes in the modern practice of HR, and
- Balance your class work with a variety of other activities.

Student Professional Organizations for HRM Majors

Society of Human Resource Management (TUSHRM)

One of the benefits of being an HRM major is the opportunity to join the student chapter of the Society of Human Resource Management (TUSHRM). TUSHRM is a 100% participative working organization; all members have an important role to play.

- Join other HR majors in creating, managing, and attending activities that build relationships with HR professionals.
- Staff various community service efforts, access mentoring opportunities and promote professional development programming.
- Dues are paid yearly to National SHRM, allowing for many benefits at the student chapter level, free membership in a regional Professional SHRM chapter (like Philly SHRM, SEPA SHRM, or GVFHRA), discounted rates for the SHRM CP/SCP Certification Exam, and access to members-only TU SHRM events (like the Head Shots meeting and the Informational Interviews).

For more information, contact faculty advisor Debra Casey at 215-204-4130 or debra.casey@temple.edu, or visit the TUSHRM web site.

Net Impact

For those HRM majors interested in making the world a better place (and who isn't?), a great SPO choice is Net Impact. Together with other Fox students, you will:

- Focus on strengthening leaders to use the power of business in positive ways;
- Involve yourself in important social, environmental, and economic impacts of business; and
- Show your interests in Corporate Social Responsibility (CSR), a leading issue for modern businesses around the world.

For more information, contact faculty advisor Lynne Andersson at 215-204-5088 or landerss@temple.edu, or visit the Net Impact web site.

Student Professional Sales Organization (PSO)

For those HRM majors who want to be at the top of their professional game, you'll want to check out the Student Professional Sales Organization (PSO). Together with other Fox students, you will:

- Learn skills that have relevancy in every career path;
- Build on your understanding of negotiation, influence and sales;
- Strengthen your professional communication skills;
- Participate in events, training, competitions, and conferences; and
- Compete in the signature annual Fox Sales Challenge event.

For more information, contact faculty advisor Tony Petrucci at 215-204-8138 or petrucci@temple.edu, or visit the PSO web site.

Internships

The most valuable thing you can do as a student to prepare for your career is an internship. Many students complete multiple internships in their college years. There are many ways within Fox, with CSPD's expert assistance, to find and evaluate internship opportunities.

The HRM 3581 Co-op Experience in Human Resource Management course combines academic work with your internship experience in a 3-credit course with a group ShareOut of experiences at the end. If interested in HRM 3581, contact faculty advisor Debra Casey at 215-204-4130 or debra.casey@temple.edu for more information.

Professional Development Program

The Fox Leadership Development Program

Fox majors are required to participate in the Fox Leadership Development Program (FLDP).

HRM Key Achievement Award ("KAA")

HRM majors, along with Fox students interested in HR issues, are encouraged to earn the **HRM Key Achievement Award**. While you earn the FLDP Points, you can also earn your KAA by attending and participating in a wide variety of events and activities that relate to the field of HRM, community service in HR related fields, and your growth from your studies into your professional career. Learn more at TUSHRM.

1

HRM majors are required to participate in the Fox Leadership Development Program (FLDP). This program was created to respond to employer expectations regarding the skill sets of college graduates. Please refer to FLDP for more information.

2

This major capstone is typically taken in the final semester, and all prerequisites must be met.

3

These courses make up the Organizational Leadership Minor. However, they cannot be double counted for HRM major requirements if applied toward the Organizational Leadership Minor.

4

This course may be offered multiple semesters with different topics. It can be applied once toward the major. It can be used as a free elective if completed with a different topic.

International Business Administration Minor

Overview

The **Minor in International Business Administration**, offered by the Department of Management, uniquely prepares students for the global economy through project-based courses, internships and transformative study abroad opportunities. This minor is designed to benefit students of all majors by giving them an option to study International Business courses and, therefore, embrace an increasingly international world without having to be fully proficient in a foreign language. The International Business Administration minor is the perfect complement to any major.

The minor is open to all business and non-business students who have already selected a Temple University major.

Campus Location: Main

Department of Management
Alter Hall, Room 333
215-204-5183
mgmtdept@temple.edu

Requirements

- Open to business and non-business students.
- Designed to benefit students of all majors by giving them an option to study International Business courses and, therefore, embrace an increasingly international world without having to be fully proficient in a foreign language. The International Business Administration minor is the perfect complement to any major.
- **Four courses are prerequisites for this minor (two of these must be taken at Temple):**

Code	Title	Credit Hours
ECON 1101 or ECON 1901	Macroeconomic Principles ¹ Honors Macroeconomic Principles	3
ECON 1102 or ECON 1902	Microeconomic Principles ¹ Honors Microeconomic Principles	3
HRM 1101 or HRM 1901	Leadership and Organizational Management ¹ Honors Leadership and Organizational Management	3
MKTG 2101 or MKTG 2901	Marketing Management ² Honors Marketing Management	3
Total Credit Hours		12

1

A minimum grade of C- is required in ECON 1101/ECON 1901, ECON 1102/ECON 1902 and HRM 1101/HRM 1901.

2

A minimum grade of C is required in MKTG 2101/MKTG 2901.

Note: Prerequisite courses are not calculated in the minor GPA.

- **Required courses (three of these must be taken at Temple University):**

Code	Title	Credit Hours
Select two Geographical International Business electives:		6
IB 3101	Fundamentals of International Business	
IB 2501	Fundamentals of Asian Business	
IB 2502	Fundamentals of Latin American Business	
IB 2503	Fundamentals of European Business	
IB 2504	Fundamentals of Business in Africa and the Middle East	
IB 2509	Short Study Trip Abroad: Doing Business in a Foreign Country	

Electives

Select two of the following:

6

International Business & Marketing	
IB 3581 or IB 3585	International Business Internship
MKTG 3504	Professional Selling and Sales Management
MKTG 3505	Entrepreneurial Marketing
MKTG 3508	Digital Marketing
International Business & Supply Chain Management	
SCM 3515	Principles of Supply Chain Management ¹
SCM 3516	Transportation and Logistics Management ¹
International Business & Entrepreneurship	
IB 3596	Global Entrepreneurship ²
SGM 3002	Planning to Start Your Own Business
SGM 3501	Entrepreneurial and Innovative Thinking
SGM 3503	Lean Startup: Fast and Inexpensive Ways to Test and Launch Your Ideas
Total Credit Hours	12

1

SCM 3515 and SCM 3516 have additional prerequisites which would require non-business students to complete additional courses.

2

IB 3596 has an additional prerequisite.

- Two of the four prerequisite courses and three of the four required courses for the minor must be taken at Temple University.
- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course, unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

International Business BBA with International Economics Concentration

Overview

The **Bachelor of Business Administration in International Business**, offered by the Department of Management, uniquely prepares students for the global economy through project-based courses, internships and transformative study abroad opportunities. The nationally recognized Fox International Business (IB) program, which has been supported by Temple University since the 1970s and the U.S. Department of Education since 2000 (CIBER grant), offers two options: an International Business major with six job market/employer-facing concentrations and an International Business Administration minor.

Students who wish to pursue the IB major **must select one of the following concentrations** to align their interest with those of employers:

- International Economics Concentration
- International Entrepreneurship Concentration
- International Finance Concentration
- International Marketing Concentration
- International Sales and Business Development Concentration
- International Supply Chain Management, Transportation and Logistics Concentration

Students are required to prove proficiency in a foreign language or waive that requirement through testing. In addition, it is highly recommended, but not required, for students to study abroad.

Careers and Placements

- **International Economics:** Manage or consult on projects in international organizations, government agencies, or non-governmental organizations.
- **International Entrepreneurship:** Manage operations in a small international firm or launch your own born-global venture.

- **International Finance:** Operate international aspects of the banking sector, including currency exchange or international payment methods for the bank's corporate clients involved in international business.
- **International Marketing:** Conduct international market research, lead product development, manage global or local lines of products and decide which marketing policies must be adapted to local conditions.
- **International Sales and Business Development:** Solicit new international clients while growing relationships with existing clients. Language proficiency, cultural sensitivity, and social negotiation skills are essential.
- **International Supply Chain Management, Transportation and Logistics:** Take charge of delivering products from various points across the globe in a safe and efficient manner. This is a detail-and-customer-oriented career in a fast-paced, high-pressure work environment.

Entry-level positions: Import/Export Coordinator, Foreign Affairs Analyst, Immigration Specialist, Business Analyst, Language Specialist, Operations Specialist/Analyst, Digital Marketer, International Researcher, Marketing & Business Development Associate, Global Mobility Services Associate, Business Strategy Associate, International Sales Coordinator, Logistics Coordinator.

Post entry-level positions: Administrative Manager, Global Business Manager, Business Analyst, Business Consultant, Trade Settlement Analyst, Executive Director, Senior Accountant, Project Management Consultant, Client Relationship Specialist.

Getting the Most Out of Your Major

Through specialized courses and experiences, students can focus on projects and the real world, not just textbooks. These courses include Global Entrepreneurship (IB 3596), International Internship (IB 3581/IB 3585) in Philadelphia, Rome or Tokyo, Short-term Study Abroad (IB 2509), and International Consulting (IB 4587). These courses uniquely prepare students to thrive anywhere, in either global Philadelphia or sunny Barcelona.

IB students often decide to immerse themselves in a foreign country and can spend a semester or more at the Temple University Rome campus or the Temple University Tokyo campus. Students can also go on exchange to any of our multiple partner locations: Paris or Lyon, France; Dublin, Ireland; London, UK; Oviedo, Spain; Seoul, South Korea; etc.

In addition to these international partners and campuses abroad, the Fox IB program is deeply connected to the local and regional ecosystem of international managers, companies, chambers of commerce and government agencies. The student-led International Business Association (IBA) facilitates interactions with these local experts and hiring managers on a weekly basis. In addition, the IBA provides a social network to discover cultures, languages and careers while also giving back through philanthropy.

Lastly, the top IB students are invited to join the prestigious IB Honor Society (Beta Gamma Sigma), which includes Marillynn Hewson (former Chairman, President and CEO of Lockheed Martin), Alan Greenspan (former Chairman of the Federal Reserve) and Ann-Marie Campbell (Executive Vice President of U.S. stores and international operations, Home Depot).

Minors and Certificates

International Business Administration Minor

The International Business Administration minor (p. 861) is the perfect complement to any major. This minor has attracted students from six different Temple colleges to make diversity through interdisciplinary pedagogy a reality. Students who wish to pursue this minor can select the geographic region of their choice through any IB 2500-level course: Asia, Africa and the Middle East, Europe, or Latin America. Neither mastery of a foreign language nor study abroad are required for the International Business Administration minor.

Other Department of Management Minors

- Entrepreneurship and Innovation Management Minor (p. 842)
- Organizational Leadership Minor (p. 905)
- Sales Minor (p. 921)

IB-related Certificates

The following interdisciplinary certificates are offered to enhance a student's international understanding and readiness for the global economy.

- Asian Business and Society (p. 975)
- Spanish and Latin American Studies for Business (p. 1164)

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 795) for the Bachelor of Business Administration, including the requirements of the major listed below. International Business students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate.

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of International Economics Concentration

Undergraduate students may earn a Bachelor of Business Administration (B.B.A.) degree in International Business (IB) with a concentration in International Economics. Students are strongly encouraged to pursue a complementary major or minor to enhance their professional marketability by specializing in a functional area of business and/or pursuing area studies expertise.

The nationally recognized Fox International Business (IB) program, which has been supported by Temple University since the 1970s and the U.S. Department of Education since 2000 (CIBER grant), offers two options: an International Business major with six job market/employer-facing concentrations and an International Business Administration minor.

Students who wish to pursue the IB major **must select one of the following concentrations** to align their interest with those of employers:

- International Economics Concentration
- International Entrepreneurship Concentration
- International Finance Concentration
- International Marketing Concentration
- International Sales and Business Development Concentration
- International Supply Chain Management, Transportation and Logistics Concentration

Students are required to prove proficiency in a foreign language or waive that requirement through testing. In addition, it is highly recommended, but not required, for students to study abroad.

Careers and Placements

- **International Economics:** Manage or consult on projects in international organizations, government agencies, or non-governmental organizations.
- **International Entrepreneurship:** Manage operations in a small international firm or launch your own born-global venture.
- **International Finance:** Operate international aspects of the banking sector, including currency exchange or international payment methods for the bank's corporate clients involved in international business.
- **International Marketing:** Conduct international market research, lead product development, manage global or local lines of products and decide which marketing policies must be adapted to local conditions.
- **International Sales and Business Development:** Solicit new international clients while growing relationships with existing clients. Language proficiency, cultural sensitivity, and social negotiation skills are essential.
- **International Supply Chain Management, Transportation and Logistics:** Take charge of delivering products from various points across the globe in a safe and efficient manner. This is a detail-and-customer-oriented career in a fast-paced, high-pressure work environment.

Entry-level positions: Import/Export Coordinator, Foreign Affairs Analyst, Immigration Specialist, Business Analyst, Language Specialist, Operations Specialist/Analyst, Digital Marketer, International Researcher, Marketing & Business Development Associate, Global Mobility Services Associate, Business Strategy Associate, International Sales Coordinator, Logistics Coordinator.

Post entry-level positions: Administrative Manager, Global Business Manager, Business Analyst, Business Consultant, Trade Settlement Analyst, Executive Director, Senior Accountant, Project Management Consultant, Client Relationship Specialist.

Getting the Most Out of Your Major

Through specialized courses and experiences, students can focus on projects and the real world, not just textbooks. These courses include Global Entrepreneurship (IB 3596), International Internship (IB 3581/IB 3585) in Philadelphia, Rome or Tokyo, Short-term Study Abroad (IB 2509), and International Consulting (IB 4587). These courses uniquely prepare students to thrive anywhere, in either global Philadelphia or sunny Barcelona.

IB students often decide to immerse themselves in a foreign country and can spend a semester or more at the Temple University Rome campus or the Temple University Tokyo campus. Students can also go on exchange to any of our multiple partner locations: Paris or Lyon, France; Dublin, Ireland; London, UK; Oviedo, Spain; Seoul, South Korea; etc.

In addition to these international partners and campuses abroad, the Fox IB program is deeply connected to the local and regional ecosystem of international managers, companies, chambers of commerce and government agencies. The student-led International Business Association (IBA) facilitates interactions with these local experts and hiring managers on a weekly basis. In addition, the IBA provides a social network to discover cultures, languages and careers while also giving back through philanthropy.

Lastly, the top IB students are invited to join the prestigious IB Honor Society (Beta Gamma Sigma), which includes Marillynn Hewson (former Chairman, President and CEO of Lockheed Martin), Alan Greenspan (former Chairman of the Federal Reserve) and Ann-Marie Campbell (Executive Vice President of U.S. stores and international operations, Home Depot).

Minors and Certificates

International Business Administration Minor

The International Business Administration minor (p. 861) is the perfect complement to any major. This minor has attracted students from six different Temple colleges to make diversity through interdisciplinary pedagogy a reality. Students who wish to pursue this minor can select the geographic region of their choice through any IB 2500-level course: Asia, Africa and the Middle East, Europe, or Latin America. Neither mastery of a foreign language nor study abroad are required for the International Business Administration minor.

Other Department of Management Minors

- Entrepreneurship and Innovation Management Minor (p. 842)
- Organizational Leadership Minor (p. 905)
- Sales Minor (p. 921)

IB-related Certificates

The following interdisciplinary certificates are offered to enhance a student's international understanding and readiness for the global economy.

- Asian Business and Society (p. 975)
- Spanish and Latin American Studies for Business (p. 1164)

International Business BBA with International Marketing Concentration

Overview

The **Bachelor of Business Administration in International Business**, offered by the Department of Management, uniquely prepares students for the global economy through project-based courses, internships and transformative study abroad opportunities. The nationally recognized Fox International Business (IB) program, which has been supported by Temple University since the 1970s and the U.S. Department of Education since 2000 (CIBER grant), offers two options: an International Business major with six job market/employer-facing concentrations and an International Business Administration minor.

Students who wish to pursue the IB major **must select one of the following concentrations** to align their interest with those of employers:

- International Economics Concentration
- International Entrepreneurship Concentration
- International Finance Concentration
- International Marketing Concentration
- International Sales and Business Development Concentration
- International Supply Chain Management, Transportation and Logistics Concentration

Students are required to prove proficiency in a foreign language or waive that requirement through testing. In addition, it is highly recommended, but not required, for students to study abroad.

Careers and Placements

- **International Economics:** Manage or consult on projects in international organizations, government agencies, or non-governmental organizations.
- **International Entrepreneurship:** Manage operations in a small international firm or launch your own born-global venture.
- **International Finance:** Operate international aspects of the banking sector, including currency exchange or international payment methods for the bank's corporate clients involved in international business.
- **International Marketing:** Conduct international market research, lead product development, manage global or local lines of products and decide which marketing policies must be adapted to local conditions.
- **International Sales and Business Development:** Solicit new international clients while growing relationships with existing clients. Language proficiency, cultural sensitivity, and social negotiation skills are essential.
- **International Supply Chain Management, Transportation and Logistics:** Take charge of delivering products from various points across the globe in a safe and efficient manner. This is a detail-and-customer-oriented career in a fast-paced, high-pressure work environment.

Entry-level positions: Import/Export Coordinator, Foreign Affairs Analyst, Immigration Specialist, Business Analyst, Language Specialist, Operations Specialist/Analyst, Digital Marketer, International Researcher, Marketing & Business Development Associate, Global Mobility Services Associate, Business Strategy Associate, International Sales Coordinator, Logistics Coordinator.

Post entry-level positions: Administrative Manager, Global Business Manager, Business Analyst, Business Consultant, Trade Settlement Analyst, Executive Director, Senior Accountant, Project Management Consultant, Client Relationship Specialist.

Getting the Most Out of Your Major

Through specialized courses and experiences, students can focus on projects and the real world, not just textbooks. International Business BBA with International Supply Chain Management, Transportation and Logistics

Overview

The **Bachelor of Business Administration in International Business**, offered by the Department of Management, uniquely prepares students for the global economy through project-based courses, internships and transformative study abroad opportunities. The nationally recognized Fox International Business (IB) program, which has been supported by Temple University since the 1970s and the U.S. Department of Education since 2000 (CIBER grant), offers two options: an International Business major with six job market/employer-facing concentrations and an International Business Administration minor.

Students who wish to pursue the IB major **must select one of the following concentrations** to align their interest with those of employers:

- International Economics Concentration
- International Entrepreneurship Concentration
- International Finance Concentration
- International Marketing Concentration

- International Sales and Business Development Concentration
- International Supply Chain Management, Transportation and Logistics Concentration

Students are required to prove proficiency in a foreign language or waive that requirement through testing. In addition, it is highly recommended, but not required, for students to study abroad.

Careers and Placements

- **International Economics:** Manage or consult on projects in international organizations, government agencies, or non-governmental organizations.
- **International Entrepreneurship:** Manage operations in a small international firm or launch your own born-global venture.
- **International Finance:** Operate international aspects of the banking sector, including currency exchange or international payment methods for the bank's corporate clients involved in international business.
- **International Marketing:** Conduct international market research, lead product development, manage global or local lines of products and decide which marketing policies must be adapted to local conditions.
- **International Sales and Business Development:** Solicit new international clients while growing relationships with existing clients. Language proficiency, cultural sensitivity, and social negotiation skills are essential.
- **International Supply Chain Management, Transportation and Logistics:** Take charge of delivering products from various points across the globe in a safe and efficient manner. This is a detail-and-customer-oriented career in a fast-paced, high-pressure work environment.

Entry-level positions: Import/Export Coordinator, Foreign Affairs Analyst, Immigration Specialist, Business Analyst, Language Specialist, Operations Specialist/Analyst, Digital Marketer, International Researcher, Marketing & Business Development Associate, Global Mobility Services Associate, Business Strategy Associate, International Sales Coordinator, Logistics Coordinator.

Post entry-level positions: Administrative Manager, Global Business Manager, Business Analyst, Business Consultant, Trade Settlement Analyst, Executive Director, Senior Accountant, Project Management Consultant, Client Relationship Specialist.

Getting the Most Out of Your Major

Through specialized courses and experiences, students can focus on projects and the real world, not just textbooks. These courses include Global Entrepreneurship (IB 3596), International Internship (IB 3581/IB 3585) in Philadelphia, Rome or Tokyo, Short-term Study Abroad (IB 2509), and International Consulting (IB 4587). These courses uniquely prepare students to thrive anywhere, in either global Philadelphia or sunny Barcelona.

IB students often decide to immerse themselves in a foreign country and can spend a semester or more at the Temple University Rome campus or the Temple University Tokyo campus. Students can also go on exchange to any of our multiple partner locations: Paris or Lyon, France; Dublin, Ireland; London, UK; Oviedo, Spain; Seoul, South Korea; etc.

In addition to these international partners and campuses abroad, the Fox IB program is deeply connected to the local and regional ecosystem of international managers, companies, chambers of commerce and government agencies. The student-led International Business Association (IBA) facilitates interactions with these local experts and hiring managers on a weekly basis. In addition, the IBA provides a social network to discover cultures, languages and careers while also giving back through philanthropy.

Lastly, the top IB students are invited to join the prestigious IB Honor Society (Beta Gamma Sigma), which includes Marillynn Hewson (former Chairman, President and CEO of Lockheed Martin), Alan Greenspan (former Chairman of the Federal Reserve) and Ann-Marie Campbell (Executive Vice President of U.S. stores and international operations, Home Depot).

Program Code: BU-IB-BBA

Minors and Certificates

International Business Administration Minor

The International Business Administration minor (p. 861) is the perfect complement to any major. This minor has attracted students from six different Temple colleges to make diversity through interdisciplinary pedagogy a reality. Students who wish to pursue this minor can select the geographic region of their choice through any IB 2500-level course: Asia, Africa and the Middle East, Europe, or Latin America. Neither mastery of a foreign language nor study abroad are required for the International Business Administration minor.

Other Department of Management Minors

- Entrepreneurship and Innovation Management Minor (p. 842)
- Organizational Leadership Minor (p. 905)
- Sales Minor (p. 921)

IB-related Certificates

The following interdisciplinary certificates are offered to enhance a student's international understanding and readiness for the global economy.

- Asian Business and Society (p. 975)
- Spanish and Latin American Studies for Business (p. 1164)

Learn more about the Bachelor of Business Administration in International Business.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 795) for the Bachelor of Business Administration, including the requirements of the major listed below. International Business students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate.

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of International Supply Chain Management, Transportation & Logistics Concentration

Undergraduate students may earn a Bachelor of Business Administration (B.B.A.) degree in International Business (IB) with a concentration in International Supply Chain Management, Transportation & Logistics. Students are strongly encouraged to pursue a complementary major or minor to enhance their professional marketability by specializing in a functional area of business and/or pursuing area studies expertise.

Legal Studies BBA

Overview

Offered by the Department of Risk, Actuarial Science, and Legal Studies, the **Bachelor of Business Administration in Legal Studies** is designed to acquaint students with the broad spectrum of the economic, political and sociological framework within which the law functions. It also may be pursued as a pre-law major in preparation for law school. Students will be exposed to a curriculum that will challenge their thinking process and reasoning abilities through the use of actual court cases, trial simulations, negotiations and other advocacy skills that stress written and oral communication. The Legal Studies major also offers students, who may not be interested in law school, with an academic foundation for future careers in corporate compliance, court administration, federal and state regulatory agencies, non-profit organizations, and other organizations in which a legal background combined with business studies is of critical importance.

All faculty are graduates of law school and many also possess PhD or other advanced law or academic degrees. Adjunct faculty are drawn from government agencies, private law firms, corporate law firms, and the federal and state judiciary.

Students pursuing this curriculum in preparation for the study of law should acquaint themselves with the content and format of the Law School Admissions Test (LSAT). Learn more about the LSAT and the Law School admissions process.

Campus Location: Main

Program Code: BU-LGLS-BBA

Student Professional Organization

Phil Alpha Delta

Legal Studies majors are encouraged to become involved in Phi Alpha Delta (PAD) Law Fraternity, International. This organization hosts guest speakers, sponsors law-related field trips, and assists students in gaining internships within the legal field.

The Temple Law Scholars Program

The Temple Law Scholars program provides an opportunity for outstanding students to gain provisional admission to Temple University's Beasley School of Law at the same time they are accepted into an undergraduate program of study. Law Scholars are expected to participate in the University Honors Program while undergraduates, after which they enroll in the Beasley School of Law, leading to the degree of Juris Doctor. Learn more about the Temple Law Scholars Program and its application process.

Minors

Legal Studies Minor

The Legal Studies minor, which is open to all students except for Legal Studies majors, is designed to expose students to a curriculum in legal studies, particularly students from any discipline who are considering law school or a similar career in the legal profession.

Requirements (p. 893) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

Corporate Compliance & Regulatory Policy Minor

The Corporate Compliance and Regulatory Policy minor, which is open to all students, is designed to expose students to a practical law-related field, compliance, where they can use their training with or without a graduate degree and in which they can find professional opportunities in numerous industries.

Requirements (p. 828) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

Legal Studies Minor

Overview

Offered by Department of Risk, Actuarial Science, and Legal Studies, the **Minor in Legal Studies** is open to all students, with the exception of Legal Studies majors. The minor is designed to expose students to a curriculum in legal studies, particularly students majoring in other disciplines such as accounting, criminal justice, philosophy, risk management or finance who are considering law school. Students will learn how to read cases and statutes, do legal research and make a legal argument as well as develop their critical thinking skills and identify the legal issues that will impact their business and personal decisions.

 Speakman Hall, Room 204A
 215-204-4145
 jeffrey.boles@temple.edu

Requirements

- All students are required to take the prerequisite course BA 1103, which is a lower division Fox School foundation.
- Five courses are required:**

Code	Title	Credit Hours
Prerequisite Course		
BA 1103	Legal and Ethical Reasoning in Business	3
Required Course		
LGLS 1112	Law for Business	3
Electives		
Select three of the following:		9
LGLS 1102	Law of Contracts	
LGLS 3501	Introduction to Corporate Compliance	
LGLS 3509	Entertainment Law	
LGLS 3511	Environmental Law and Sustainability	
LGLS 3523	Detecting Financial Crimes	
LGLS 3524	Legal and Policy Issues in the Workplace	
LGLS 3580	Special Topics - Law	
LGLS 3581	Pre-Law Internship and Seminar	
LGLS 3582	Independent Study	
RE 3501	Real Estate Fundamentals	
RE 3502	Real Estate Practice	
Total Credit Hours		15

- Three of the four courses required for the minor must be taken at Temple University. Residency excludes BA 1103.
- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Management Information Systems BBA

Overview

Offered by the the Department of Management Information Systems, the **Bachelor of Business Administration in Management Information Systems** (MIS) produces digital leaders who design, architect and manage API-driven products. These products apply APIs, cloud, cyber-security, agile, user experience, and analytics to achieve business outcomes.

MIS prepares students to

- Design software applications that meet requirements and are enjoyable to use employing state-of-the-art UX techniques;
- Build web-based, API-driven business applications using HTML, CSS, JavaScript, and Node.js as well as frameworks such as Express;
- Deploy APIs on a robust cloud infrastructure using Amazon Web Services;
- Secure applications and businesses against cyber-threats applying cryptography and vulnerability discovery techniques; and
- Analyze critical business data using data mining techniques and navigate relational and NoSQL data stores using MySQL and MongoDB.

The BBA in MIS is a **STEM program** that provides access to STEM scholarships, as well as MIS department scholarships.

Campus Location: Main

Program Code: BU-MIS-BBA

Professional Achievement Program

MIS majors benefit from an innovative patent-pending PRO - professional achievement program, where students

1. Earn required points for professional development activities and for applying learning to practice (e.g., internships, student leadership)
2. Receive recognition for professional achievement on leaderboards, badges, professional achievement wire, and e-portfolios. 'Cash-in' points at the MIS Points Store.
3. Showcase their educational and professional achievements at the IT Career Fair.

Careers and Placement

MIS majors get placed in the top firms in the region and nationally. Learn about careers in IS and participate in the IT Career Fair which provides exclusive one-stop placement and internship opportunities for MIS students. The Temple University-led ISJobIndex.com project provides national-level data on jobs in the IS field:

- Bachelor MIS students' average salary is \$75,517 nationally. Salaries for IS graduates are higher than typical business majors.
- 81% of IS graduates are satisfied with their job offer.

Source: IS Job Index, <https://isjobindex.com/>

Minors and Certificates

Management Information Systems Minor

A minor in MIS provides undergraduate students the ability to specify, select, utilize, and apply information technology (IT) to their major field of study. The minor provides the skills and terminology needed to become an expert user of IT in the business world. The minor positions students for jobs in business application areas, consulting positions, technical liaisons, and selling and acquisition of business software.

Requirements (p. 899) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Digital Marketing Minor

The Digital Marketing minor prepares students for careers related to customer relationship management, social media, information architecture, e-commerce, search engine optimization, e-detailing, site design, Internet research, demographic and sales analytics, blogging, and media design. This minor is appropriate for all business students and is particularly relevant for Marketing, Human Resource Management, Business Management, and Management Information Systems students.

Requirements (p. 829) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Management Information Systems Certificate

The Management Information Systems certificate prepares students to identify, select and evaluate innovative technology solutions for business.

Requirements (p. 898) for the certificate must be completed prior to graduation. Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate. Contact the Management Information Systems department to declare the Management Information Systems certificate.

1

Please check with your departmental advisor on which course is most appropriate for the major.

2

2000-3999 electives can be selected from: ACCT, AS, BA, ECON, FIN, HRM, IB, LGLS, MIS, MKTG, RE, RMI, STAT, SCM, SGM. Please see your advisor for elective suggestions that match your career objectives. MIS 3535 is highly recommended as a business elective.

Management Information Systems Certificate

Overview

Offered by Department of Management Information Systems, the **Certificate in Management Information Systems (MIS)** is open to non-business students. The MIS certificate provides undergraduate students the ability to identify, select and evaluate innovative technology solutions for business. In this nine-credit certificate program, students become a knowledgeable user of information technology and develop the tools necessary to successfully interact with technology professionals. As a graduate of the program, students acquire valuable, translatable skills and differentiate themselves in an increasingly competitive industry.

Campus Location: Main

Program Code: BU-MIS-CERT

Contact Information

Joseph Allegra, Senior Associate Director
 Speakman Hall, Room 210C
 215-204-3060
 jallegra@temple.edu

Learn more about the undergraduate certificate in Management Information Systems.

Requirements

- **Three courses required** (all courses must be taken at Temple University):

Code	Title	Credit Hours
Required Courses		
MIS 2101	Digital Systems	3
MIS 2502	Data and Analytics	3
Elective		
Select one of the following:		3
MIS 0855	Data Science	
MIS 0955	Honors Data Science	
MIS 3406	Cloud Architecture	
MIS 3504	Digital Design and Innovation	
MIS 3505	Scripting for Data Science/Analytics	
MIS 3534	Strategic Management of Information Technology	
MIS 3536	Information Systems Innovation	
MIS 3538	Social Media Innovation	
Total Credit Hours		9

- A grade point average of 2.0 in the certificate is required, including a minimum grade of C in each course.
- Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate.

Interested students should discuss with their home college advisors how the courses in the certificate will fit into their overall degree plan and are strongly encouraged to declare the certificate early in their academic career.

Management Information Systems Minor

Overview

Offered by Department of Management Information Systems, the **Minor in Management Information Systems (MIS)** is open to all students. A minor in MIS provides undergraduate students the ability to identify, select, use and apply information technology (IT) to their major field of study. The minor provides the skills and terminology needed to become a knowledgeable user of IT in the business world and interact successfully with technology professionals in an organization. The MIS minor will position students for jobs in business application areas, consulting, technical liaisons, and selling and acquisition of business software. Students will

- Understand the key information technologies used by organizations;
- Learn how to specify technology solutions and engage with IT professionals;
- Understand the importance of business processes;
- Identify how specific IT solutions are designed and implemented to increase efficiency and effectiveness; and
- Apply data analytics to collect, store, analyze and disseminate organizational information.

To take courses for the MIS minor students must first declare their intent to minor in MIS.

Learn more about the Management Information Systems minor.

Campus Location: Main

Contact Information

Joseph Allegra, Senior Associate Director
 Speakman Hall, Room 210C
 215-204-3060
 jallegra@temple.edu

Requirements

- **Six courses are required for the minor** (four of these must be taken at Temple University):

Code	Title	Credit Hours
Required Courses		
ECON 1101	Macroeconomic Principles	3
HRM 1101	Leadership and Organizational Management	3
MIS 2101	Digital Systems	3
MIS 2502	Data and Analytics	3
MIS 3504	Digital Design and Innovation	3
Select one of the following:		3
MIS 0855	Data Science	
MIS 0955	Honors Data Science	
MIS 3505	Scripting for Data Science/Analytics	
MIS 3507	Defending Against Cyber Crime	
MIS 3534	Strategic Management of Information Technology	
MIS 3536	Information Systems Innovation	
MIS 3538	Social Media Innovation	
MIS 3580	Special Topics	
MIS 3581	Co-operative Experience in Management Information Systems	
Total Credit Hours		18

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- ECON 1101, HRM 1101 and MIS 2101 cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- For more information and to declare or rescind this minor visit the Fox MIS Minor web site.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Marketing BBA

Overview

Marketing activities provide critical economic functions for the success of organizations. Companies of all sizes must develop effective marketing strategies to reach customers; this requires an understanding of how to innovate and develop new products, create effective promotional programs, price products and services, and distribute these in a global marketplace. Offered by the Department of Marketing, the **Bachelor of Business Administration in Marketing** provides students with career-ready skills and professional development opportunities.

The Marketing curriculum focuses on today's key marketing activities and performance metrics. The program immerses students in the applied quantitative methods and the behavioral sciences necessary to address contemporary marketing challenges. Experiential and active learning are frequently used in the upper division curriculum; cases and simulations, along with projects—many offered in cooperation with business and government organizations—allow students to apply their experiences to real-life scenarios and build their resumes and competencies.

Students are encouraged to choose major elective course pairings within the major curriculum which offer specific in-depth coverage of topics and provide job-ready skills. These industry focused sequences include: Consumer Insights, Sales Force Effectiveness and Retailing Management.

Campus Locations: Main and Online

Program Code: BU-MKTG-BBA

Careers

Marketing majors have varied career choices, including:

- Advertising, including media planning, social media, or account management;
- Customer Relationship Management;
- Data Analytics;
- Digital Marketing;
- Service Marketing;
- Marketing Management;
- Marketing Research and Consumer Insights;
- Marketing Coordination for Non-profit organizations such as hospitals and universities;
- Sales and Sales Management; and
- Wholesaling and Retail Management, including buying and allocations.

Student Professional Organizations

American Marketing Association

Marketing majors are encouraged to become involved in the **American Marketing Association (AMA)**, a student professional organization that offers students the opportunity to develop their professional network in marketing. The AMA hosts bi-weekly meetings, professional speaker sessions, and career development workshops. The AMA is open to all majors. For more information, please see the AMA web site or contact Professor Sheri Lambert at sheri.lambert@temple.edu or 215-204-7533.

Professional Sales Organization

Marketing Majors may also be interested in joining the Professional Sales Organization (PSO) or the Fashion & Business Club (F&B); each organization offers students access and insight to a variety of career paths in marketing.

Minors

Marketing Minor

Students in the Fox School of Business and Management and the School of Sport, Tourism and Hospitality Management who are interested in expanding their career options through a general knowledge of marketing principles and specializing in an area of marketing should consider completing

a minor in Marketing. The requirements (p. 904) must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Digital Marketing Minor

The Digital Marketing minor, which is open to all Temple students, prepares students for careers related to customer relationship management, social media, information architecture, e-commerce, search engine optimization, e-detailing, site design, internet research, demographic and sales analytics, blogging, and media design. The Digital Marketing minor is appropriate for all BBA students in the Fox School of Business and Management and is particularly relevant for Marketing, Human Resource Management, Business Management, and Management Information Systems students. It is also ideal for Klein College of Media and Communication students. The requirements (p. 829) must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Accelerated Program: 4+1 Master of Education Degree (MEd)

The 4+1 Master of Education (MEd) accelerated program is designed for students interested in pursuing a Master of Education while completing the Bachelor of Business Administration (BBA) in Marketing requirements. After completion of the programs, students earn a BBA degree and an MEd in Career and Technical Education with a concentration in Marketing Education, and a Commonwealth of Pennsylvania Instructional I Teaching Certificate in Marketing Education. Learn more about the application process and deadlines.

For more information on the accelerated program, contact:

Marketing Minor

Overview

The **Minor in Marketing**, offered by the Department of Marketing, allows students to explore a firm's value creation, customer acquisition, and development and retention processes, expanding career options especially for students with majors in Business Management, Entrepreneurship, Finance, Human Resources, International Business, Management Information Systems, and Real Estate. Students can develop career-based competencies in the marketing minor.

This minor is open only to students in the Fox School of Business and Management and the School of Sport, Tourism and Hospitality Management.

Campus Locations: Main and Online

215-204-4341

melissa.glenn@temple.edu

Requirements

- Both Fox and STHM students are required to take MKTG 2101 as part of their school's foundation requirements. STHM students also need to complete STAT 2103/STAT 2903 as a prerequisite.
- Four additional Marketing courses required** (all four must be taken at Temple University):

Code	Title	Credit Hours
Required Courses ¹		
MKTG 3511	Marketing Research	3
MKTG 3596	Consumer and Buyer Behavior	3
Electives ²		
Select two of the following:		6
MKTG 3501	Integrated Marketing Communications	
MKTG 3504	Professional Selling and Sales Management	
MKTG 3506	Retail Management	
MKTG 3508	Digital Marketing	
MKTG 3509	Customer Data Analytics	
MKTG 3513	Service Marketing	
MKTG 3514	Sustainable Consumer Centric Innovation	
MKTG 3580	Special Topics - Marketing	
Total Credit Hours		12

1

STHM students need the prerequisite STAT 2103/STAT 2903 for MKTG 3509 and MKTG 3511.

2

Students are encouraged to "smart pair" the electives for career readiness (e.g. Communications: MKTG 3501 and MKTG 3508; Sales: MKTG 3504 and MKTG 3501; Retailing and B2B: MKTG 3506 and MKTG 3508).

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C in each course, including MKTG 2101.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.
- Many of these courses are available online.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Organizational Leadership Minor

Overview

The **Minor in Organizational Leadership**, offered by the Department of Management, is open to students in the Fox School of Business and Management (except for Business Management majors) and the School of Sport, Tourism and Hospitality Management.

Research shows that business school graduates need certain skills beyond their technical competence as they step into leadership roles. Graduates with the Organizational Leadership minor are better able to think and act in valuable ways that benefit the interests of multiple organizational stakeholders. The four courses comprising this minor enhance your organizational leadership skills, specifically:

- Organizational communication and influence;
- Conflict management and negotiation;
- Team building and performance management; and
- Critical thinking and problem-solving.

Requirements

- The requirements for the minor are:

Code	Title	Credit Hours
ACCT 2101 or ACCT 2901 or ACCT 2501	Financial Accounting Honors Financial Accounting Survey of Accounting	3
ECON 1101 or ECON 1901	Macroeconomic Principles Honors Macroeconomic Principles	3
HRM 1101 or HRM 1901	Leadership and Organizational Management Honors Leadership and Organizational Management	3
MKTG 2101 or MKTG 2901	Marketing Management Honors Marketing Management	3
HRM 3501	Power, Influence and Negotiation	3
HRM 3502	Leading People at Work	3
HRM 3503	Communicating in Organizations	3
HRM 3504 or HRM 3904	Leadership in the 21st Century Honors, The Leadership Experience: Leading Yourself, Leading Change, Leading Communities	3
Total Credit Hours		24

- Five of the eight courses required for the minor must be taken at Temple University.
- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course, unless otherwise specified.
- HRM 3501, HRM 3502, HRM 3503, HRM 3504, or HRM 3904 cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Real Estate BBA

Overview

The **Bachelor of Business Administration in Real Estate**, offered by the Department of Finance, provides an educational foundation for students who are interested in real estate and considering careers in the real estate sector. Typical career paths include real estate investment and financial analysis, real estate financing and mortgage lending, real estate appraisal and valuation, property management, residential and commercial brokerage and marketing, and corporate real estate analysis.

Core competencies to be developed include the ability to analyze real estate investment opportunities from an investor and lender perspective, conduct asset and risk evaluation, implement risk management strategies, understand the dynamics of real estate markets, and navigate the legal and regulatory environment of real estate ownership, title transfer, and agency obligations common in real estate transactions.

Campus Location: Main

Program Code: BU-RE-BBA

Student Professional Organization

All Real Estate majors are strongly encouraged to join the Temple Real Estate Organization (TREO), the Fox School professional organization for students interested in real estate. TREO meets regularly throughout the semester and has an active real estate speaker series.

Licensure/Certification

To become licensed as a real estate sales agent in Pennsylvania, a candidate must be at least 18 years old, complete a pre-licensing class covering at least 75 hours of approved real estate material, submit to a background check, and pass the Pennsylvania licensing exam. Although the process of getting a real estate license is similar in most states, each state has its own unique rules that must be followed. Individuals already licensed in one state may also become licensed in other states through reciprocity, but reciprocity requirements vary from state to state.

Students who earned a BBA in Real Estate from Temple as well as Temple students who successfully completed RE 3501 and RE 3502 qualify under the Pennsylvania educational requirements to sit for the state real estate licensing exam.

Real estate majors who are interested in the appraisal profession can receive up to 258 hours of qualified appraisal education toward their state appraisal license through the agreement between Temple University and Appraisal Foundation.

Real Estate Degree Review Program (appraisalfoundation.org)

Minor

The Real Estate minor exposes students to the main principles of real estate development, valuation and management. Students who want to obtain their Pennsylvania real estate licenses have an opportunity to take courses that will prepare them for the licensing exam. The minor is open to business students only.

Requirements (p. 910) for the minor must be fulfilled prior to graduation. The courses counted toward a major or another minor cannot be used to meet the minor requirements.

2000-3999 electives can be selected from: ACCT, AS, BA, ECON, FIN, HRM, IB, LGLS, MIS, MKTG, RE, RMI, STAT, SCM, SGM. Please see your advisor for elective suggestions that match your career objectives.

Real Estate Minor

Overview

The **Minor in Real Estate**, offered by the Department of Finance, exposes students to the main principles of real estate development, valuation and management. Students who want to obtain their Pennsylvania real estate licenses have an opportunity to take courses that will prepare them for the licensing exam.

The minor is open to business students only.

FIN 3514	Commercial Real Estate Analysis	
FIN 3523	Real Estate Financial Modeling	
FIN 3524	Real Estate Finance and Mortgage Markets	
FIN 3525	Real Estate Development	
RE 3524	Residential Property Management	
RE 3525	Management of Corporate Real Estate Assets	
Total Credit Hours		18

1

Minimum grade of C- is required.

- Minimum grades of C are required for the FIN and RE courses.
- A grade point average of 2.0 in the minor is required.
- Except for BA 1103, LGLS 1101, and FIN 3101, courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their school/college advisor on how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Risk Management and Insurance BBA with Healthcare Risk Management Concentration

Overview

Offered by the Department of Risk, Actuarial Science and Legal Studies, the **Bachelor of Business Administration in Risk Management and Insurance** (RMI) prepares students to identify and evaluate various sources of risk, then select and implement solutions to control these risks through insurance and other mechanisms of risk transfer and distribution.

Graduates of this program often enter the risk management or employee benefit departments of large businesses and other organizations. They may also take challenging positions within insurance or benefit consulting firms, brokerage firms, agency operations, or insurance companies.

Concentrations

Student who wish to pursue the RMI major **must select one of the following concentrations** to align with their career interests:

- Healthcare Risk Management
- Managing Corporate Risk
- Managing Human Capital Risk

Students pursuing the **Healthcare Risk Management concentration** will explore the dynamics between risk management, quality improvement and patient safety and learn how these aspects impact the business of healthcare and patient health. They will examine the financial, technological and health services systems required to successfully operate healthcare management organizations.

Campus Location: Main

Program Code: BU-RMI-BBA

Student Professional Organization

Risk Management and Insurance majors are strongly encouraged to become active in the Sigma chapter of Gamma Iota Sigma (GIS), Temple's national award-winning professional student organization in Risk Management, Insurance, and Actuarial Science. The organization hosts numerous guest speakers from the industry, sponsors a variety of career development seminars, and maintains a widely-distributed résumé book. For more information, contact the GIS president at 215-204-9368 or visit the web site at www.sigmachapter.org.

RMI and HRM Focus

The Department of Risk, Actuarial Science and Legal Studies offers Risk Management and Insurance (RMI) courses that complement the Department of Management's Human Resource Management (HRM) courses for students interested in a career in employee benefits and/or human resource management. These courses allow students to broaden their career options by taking advantage of the cross-training offered by these departments.

- HRM major with a RMI focus: Students take RMI 3501 and RMI 3503.
- RMI major with a HRM focus: Students take HRM 2501 and HRM 3511.
- Dual HRM/RMI major: Students fulfill all requirements for both majors.

For more information on joint HRM/RMI courses, contact Rob Drennan at 215-204-8894.

Minor

Students in any college who are interested in the health professions and want to enhance their skills by understanding the business principles underlying healthcare systems should consider a minor in Healthcare Management (p. 855). Risk Management majors in the Healthcare Risk Management concentration are not eligible for the minor. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Risk Management and Insurance BBA with Managing Corporate Risk Concentration

Overview

Offered by the Department of Risk, Actuarial Science and Legal Studies, the **Bachelor of Business Administration in Risk Management and Insurance** (RMI) prepares students to identify and evaluate various sources of risk, then select and implement solutions to control these risks through insurance and other mechanisms of risk transfer and distribution.

Graduates of this program often enter the risk management or employee benefit departments of large businesses and other organizations. They may also take challenging positions within insurance or benefit consulting firms, brokerage firms, agency operations, or insurance companies.

Concentrations

Student who wish to pursue the RMI major **must select one of the following concentrations** to align with their career interests:

- Healthcare Risk Management
- Managing Corporate Risk
- Managing Human Capital Risk

Students pursuing the **Managing Corporate Risk concentration** will gain a comprehensive understanding of risk management within complex global organizations and corporations. They will learn how to identify and manage emerging risks by using tools such as key risk indicators, risk maps, risk registers and more. Students also obtain foundational knowledge of the financial characteristics of the property-liability insurance industry as well as non-insurance financing techniques available to corporations.

Campus Location: Main

Program Code: BU-RMI-BBA

Student Professional Organization

Risk Management and Insurance majors are strongly encouraged to become active in the Sigma chapter of Gamma Iota Sigma (GIS), Temple's national award-winning professional student organization in Risk Management, Insurance, and Actuarial Science. Sales Minor

Overview

The **Minor in Sales**, offered by the Department of Management, allows business students to augment their business degree with specific skills and expertise that are valued in many different fields and industries. Graduates with the Sales minor can combine this expertise with any business major to align with personalized career strategies. These skills are valuable in a wide variety of business contexts, making graduates with this minor stand out in their chosen field.

This minor is open to Fox School of Business and Management students only.

The major includes an emphasis on

- Sales,
- Persuasion,
- Negotiation,
- Marketing, and
- Customer relationship management.

Requirements

- **Six courses are required** (four of these must be taken at Temple University):

Code	Title	Credit Hours
HRM 1101	Leadership and Organizational Management	3
MKTG 2101	Marketing Management	3
MKTG 3501	Integrated Marketing Communications	3
MKTG 3504	Professional Selling and Sales Management	3
HRM 3501	Power, Influence and Negotiation	3
Select one of the following:		3
HRM 3502	Leading People at Work	
HRM 3503	Communicating in Organizations	
HRM 3504	Leadership in the 21st Century	
or HRM 3904	Honors, The Leadership Experience: Leading Yourself, Leading Change, Leading Communities	
Total Credit Hours		18

- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- **Marketing majors** who declare the Sales minor will complete MKTG 3501 and MKTG 3504 for the minor, as well as two other Marketing electives for the Marketing major.
- **Business Management majors** who declare the Sales minor will complete HRM 3504 or HRM 3904 instead of HRM 3501, as well as HRM 3502. See below.

Code	Title	Credit Hours
HRM 1101	Leadership and Organizational Management	3
MKTG 2101	Marketing Management	3
MKTG 3501	Integrated Marketing Communications	3
MKTG 3504	Professional Selling and Sales Management	3
HRM 3504	Leadership in the 21st Century	3
or HRM 3904	Honors, The Leadership Experience: Leading Yourself, Leading Change, Leading Communities	
HRM 3502	Leading People at Work	3
Total Credit Hours		18

- A cumulative grade point average of 2.0 in the minor is required, as well as a minimum grade of C- in each course unless otherwise specified.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Statistical Science and Data Analytics BS

Overview

The Department of Statistics, Operations and Data Science offers the **Bachelor of Science in Statistical Science and Data Analytics**. A recent Best Jobs list compiled by CareerCast (a Local and National Job search company) ranks Data Scientist as No. 1 in their list of the best jobs with high demand. As we survey representatives from different companies, the consistent message we receive is that the cost of hiring and the demand for talent are skyrocketing. The demand is driven by the proliferation of computing technology, software and statistical tools for capturing and interpreting the substantial volume of data now available at the enterprise, government and personal levels.

The educational objective of the program is to provide graduates with a rigorous and broad-based curriculum providing:

1. Rigorous quantitative foundation;
2. Alignment and coordination with the established quantitative disciplines at Fox and at Temple University;
3. Exposure to programming and modern languages such as Python, R and SQL; and
4. Effective communication skills.

With this degree, there are a wide range of employment areas including decision-making in business, healthcare, public policy and the pharmaceutical industry, as well as in social media and commercial areas. In each field, there are large bodies of data accumulated in need of being explored, understood and analyzed. Reputable national organizations, like the American Statistical Association (ASA), endorse the value of undergraduate

programs in statistics as a reflection of the increasing importance of the discipline. Statistics programs should be flexible enough to prepare bachelor's graduates to either be functioning statisticians in a service-oriented economy or go on to graduate school. We ensure students entering the work force or heading to graduate school have the appropriate capacity to "think with data" and to pose and answer statistical questions.

Minor

Skilled users of data enhance their career opportunities. Students in any major who wish to become proficient in the ability to select, utilize and apply quantitative and data analysis skills can pursue a minor in Statistical Science and Data Analytics. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor. Requirements (p. 926) for the minor must be completed prior to graduation.

Campus Location: Main

Learn more about the Bachelor of Science in Statistical Science and Data Analytics.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 795) for the Bachelor of Science, including the requirements of the major listed below. Students must attain an overall GPA of 2.0 and a 2.0 GPA in the major to graduate as a Statistical Science and Data Analytics major.

Core Requirements

Code	Title	Credit Hours
ECON 1101 or ECON 1901	Macroeconomic Principles Honors Macroeconomic Principles	3
ECON 1102 or ECON 1902	Microeconomic Principles Honors Microeconomic Principles	3
BA 1103 or BA 1903	Legal and Ethical Reasoning in Business Honors Legal and Ethical Reasoning in Business	3
ACCT 2103 or ACCT 2903	Financial and Managerial Accounting for Decision Making Honors Financial and Managerial Accounting	4
BA 2104	Excel for Business Applications	1
BA 2196 or BA 2996	Business Communications Honors Business Communications	3
BA 2502	Business Analytics: Modern Data Science Techniques	3
RMI 2101 or RMI 2901	Introduction to Risk Management Honors Introduction to Risk Management	3
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4
MATH 1042 or MATH 1942	Calculus II Honors Calculus II	4

STAT 2103 or STAT 2903	Statistical Business Analytics Honors Statistical Business Analytics	4
CIS 1051	Introduction to Problem Solving and Programming in Python	4
BA 2101	Professional Development Strategies	1
Total Credit Hours		40

Note: In order to graduate, a grade of C- or better must be obtained in all FSBM core requirements.

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Statistical Science and Data Analytics Minor

Overview

Offered by the Department of Statistics, Operations and Data Science, the **Minor in Statistical Science and Data Analytics** is open to all students.

Becoming a skilled user of data enhances career opportunities. Students in any major who wish to become proficient in the ability to select, utilize and apply quantitative and data analysis skills can pursue this minor.

Campus Location: Main

Contact Information

Lauren Burns, Deputy Chair and Academic Director
lburns@temple.edu

Requirements

- Open to business or non-business students.
- Completion of MATH 1022/STAT 1001 or calculus with a minimum grade of C- is a prerequisite for some courses in this minor.
- **Six courses are required** (four of six must be taken at Temple University):

Code	Title	Credit Hours
BA 2501	Turning Numbers into Knowledge: Visualizing Data ¹	3
Select one of the following:		1-4
STAT 2103	Statistical Business Analytics	
or STAT 2903	Honors Statistical Business Analytics	
STAT 2104	Selected Topics in Statistical Business Analytics	
STAT 2521	Data Analysis and Statistical Computing	3
STAT 3502	Regression and Predictive Analytics	3
Select two of the following:		6
BA 2502	Business Analytics: Modern Data Science Techniques ¹	
STAT 2522	Survey Design and Sampling	
STAT 2523	Design of Experiments and Quality Control	
STAT 3503	Applied Statistics and Data Science	
STAT 3504	Time Series and Forecasting Models	
STAT 3506	Nonparametric and Categorical Data Analysis	
STAT 3508	Data Management, Missing Data, and Outlier Analysis	
Total Credit Hours		16-19

1

A minimum grade of C- or better is required for these courses.

- One of the following courses can be substituted for STAT 2103/STAT 2903 if required for the student's program:

Code	Title	Credit Hours
CEE 3048	Probability, Statistics & Stochastic Methods	3
SOC 1167	Social Statistics	3
SOC 3201	Statistical Methods in Sociology	4
MATH 3031	Probability Theory I	3

ECE 3522	Stochastic Processes in Signals and Systems	3
AS 2101	Actuarial Probability and Statistics II	3
ANTH 0825	Quantitative Methods in the Social Sciences	4
POLS 0825	Quantitative Methods in the Social Sciences	4
PSY 0825	Quantitative Methods in the Social Sciences	4
SOC 0825	Quantitative Methods in the Social Sciences	4

- A grade point average of 2.0 in the minor is required, as well as a minimum grade of C in each course (except where noted).
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Supply Chain Management BBA

Overview

Supply Chain Management (SCM) is both an art and a science; SCM is a discipline focused on planning and forecasting, purchasing, product assembly, moving, storage, distribution, sales and customer service—in short, all of the activities that take place to get the right products and services into the right hands, in the right quantity, at the right time, and at the right price.

Supply chain management professionals are involved in every facet of the business process and strive to achieve a sustainable competitive advantage by building and delivering products better, faster and at a better value. To achieve success, SCM professionals must work across disciplines, interacting with nearly every department in an organization.

Offered by the Department of Statistics, Operations and Data Science, the **Bachelor of Business Administration in Supply Chain Management** provides students with basic knowledge of supply chain management, such as distribution strategies, planning and procurement, while also working on their communication, negotiation and leadership skills.

The major is complemented by seminars and career fairs to share industry best practices from the leaders in the market; these experiences introduce and acquaint students with the variety of jobs and responsibilities in SCM and help students identify areas of interest for their careers.

The SCM major provides opportunities for students to learn about supply chain management in an integrated business framework from distinguished faculty and regional industry experts in the area of supply chain management. The program prepares students to operate and lead major aspects of the supply system in established and start-up firms.

The curriculum focuses on providing knowledge on topics of practical skills and competencies: Supply Chain Principles, Transportation and Logistics Management, Procurement, Warehousing, and Inventory Management. Courses balance theory and practice in supply chain management to bridge the gap between academic and business practices and devise innovative research and teaching methods.

A key feature of this major is that it provides students with individualized career and academic advising. The SCM faculty work with the Center for Student Professional Development (CSPD) to help students stay connected with the regional industry associations, leaders, alumni and corporate partners to prepare them for their future challenges upon entering the work force.

The SCM major requires a high level of quantitative, critical thinking and problem-solving skills; students with an overall GPA of 2.75 or more are recommended to enroll in the major. Prospective students are invited to discuss options with Program Director Misty Blessley (misty.blessley@temple.edu), PhD.

Student Professional Organization (SPO)

Temple University Supply Chain Association (TU-SCA) is a Supply Chain Management SPO that connects students with industry professionals and standards. For more information, contact Misty Blessley (misty.blessley@temple.edu), PhD.

Minor

The Supply Chain Management minor is ideal for students innovative enough to think creatively, yet meticulous enough to forecast the bigger picture. Students completing the SCM minor pursue careers which direct the efficient flow of goods and services within and among organizations—from suppliers and manufacturers to retailers and consumers.

The SCM minor's course sequence is a strong complement to several Fox School majors such as Accounting, Finance, International Business, Management Information Systems, Marketing, and Healthcare Management.

The SCM minor provides students with basic knowledge of supply chain management, such as distribution strategies, planning and procurement, while also working on their communication, negotiation and leadership abilities. Courses balance theory and practice in supply chain management to bridge the gap between academic and business practices and devise innovative research and teaching methods. The minor prepares students to operate and lead major aspects of the supply system in established and start-up firms.

The requirements (p. 930) must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Supply Chain Management Minor

Overview

Offered by Department of Statistics, Operations and Data Science, the **Minor in Supply Chain Management (SCM)** is open to Fox students only and is ideal for students innovative enough to think creatively, yet meticulous enough to forecast the bigger picture.

Students completing the SCM minor pursue careers which direct the efficient flow of goods and services within and among organizations—from suppliers and manufacturers to retailers and consumers.

The SCM minor's course sequence is a strong complement to all business majors, especially Accounting, Finance, International Business, Management Information Systems, Marketing, and Healthcare Management.

The SCM minor provides students with basic knowledge of supply chain management, such as distribution strategies, planning and procurement, while also working on students' communication, negotiation and leadership abilities.

SCM courses balance theory and practice in supply chain management to bridge the gap between academic and business practices and devise innovative research and teaching methods. The minor prepares students to operate and lead major aspects of the supply system in established and start-up firms.

airoidi@temple.edu

Requirements

- Open to business students.
- Integrates SCM topics and themes to prepare students for new and emerging jobs related to SCM, Fulfillment, Planning, Storage and Distribution, and Customer Service.
- Quantitative, critical thinking and problem-solving skills required for success in this minor; a cumulative GPA of 2.75 is recommended.
- **Four courses required** (three must be taken at Temple University):

Code	Title	Credit Hours
SCM 3515	Principles of Supply Chain Management	3
Select one of the following:		3
SCM 3516	Transportation and Logistics Management	
SCM 3517	Inventory and Warehouse Management	
SCM 3596	Sourcing and Procurement ¹	
Select two of the following:		6
SCM 3505	Lean Six Sigma in Supply Chain Management	
SCM 3506	Project Management	
SCM 3507	Data Management and Analytics for Business Strategies	
SCM 3516	Transportation and Logistics Management	
SCM 3517	Inventory and Warehouse Management	
SCM 3596	Sourcing and Procurement ¹	
Total Credit Hours		12

1

Students need to complete SCM 3515 and SCM 3516 (C or better grade in each) to be eligible to register for this course.

- Courses taken for this minor cannot be double-counted toward the major or another minor.
- A cumulative grade point average of 2.0 in courses in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

Interested students should discuss with their advisor how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

College of Liberal Arts

Overview

Given the current pace of social and technological change in the world community, a firm grounding in the liberal arts is essential to one's prospects for success. Although recent trends in higher education highlight the proliferation of job-specific training, a well-rounded, liberal arts education is more relevant now than ever before. While highly specialized training and knowledge may prove helpful in landing one's first job, those who will build successful careers and lead us into the future will have a much broader, more transferable set of skills. Graduates of the College of Liberal Arts will be able to think critically while analyzing complex issues and developing creative solutions to problems that we have not yet imagined. The written and oral communication skills honed by a liberal arts program will allow our graduates to communicate their ideas concisely and effectively to both specialized and lay audiences. Working across disciplines to evaluate ideas and arguments throughout their college career, liberal arts graduates develop the technological and cultural literacy necessary to thrive in the global marketplace. In short, our leaders of the future will possess the skills and attributes that have long defined a liberal arts education.

In the College of Liberal Arts, our students learn *how* to learn by exploring a rich diversity of rigorous coursework in the humanities and social sciences, including anthropology, English, history, philosophy, sociology, religion, psychology and foreign languages. Many of our courses are taught in intimate, seminar-style settings that encourage students to engage our world-class faculty in meaningful discourse that expands world views and enhances analytical reasoning skills. Equally important is the flexibility afforded students within the liberal arts curriculum, which provides them with myriad opportunities to supplement their classroom education in meaningful ways by participating in study abroad programs, engaging in directed research, pursuing original scholarship through independent studies, and gaining valuable professional experience in internship programs. Taken together, these liberal arts experiences not only prepare students for rewarding careers, but for fulfilling lives as informed and engaged citizens of the world.

Accreditation

Departments and programs at Temple University are accredited by the Middle States Commission on Higher Education (<https://www.msche.org/>). Individual departments and programs may carry additional accreditation by the official accreditation body for that discipline.

Special Programs

Accelerated +1 BA/MA Programs

High achieving students in any undergraduate program in the College of Liberal Arts have the opportunity to apply to begin a master's degree program during their junior year. Students admitted into these programs typically take up to 12 graduate credits that count towards both the BA and the MA degrees, leaving only one year of additional coursework beyond the baccalaureate degree to complete the master's degree. Students accepted into these programs are not required to take the Graduate Record Examination, the standardized test most students take to gain entry to graduate school.

The following programs are available in the College of Liberal Arts. Most master's degrees are open to students who are continuing in the same discipline.

- BA in Criminal Justice / MA in Criminal Justice
- BA in Economics / MA in Economics
- BA in English / MA in English
- BA in Environmental Studies / MA in Geography and Urban Studies
- BA in Gender, Sexuality and Women's Studies / MA in Sociology
- BA in Geography and Urban Studies / MA in Geography and Urban Studies
- BS in Neuroscience: Systems, Behavior, and Plasticity / MS in Neuroscience: Systems, Behavior, and Plasticity
- BA in Philosophy / MA in Philosophy
- BA in Political Science / MA in Political Science
- BA in Psychology / MS in Psychological Research
- BA in Sociology / MA in Sociology
- BA in Spanish / MA in Spanish

Two master's degree programs will consider students from any undergraduate degree program:

- BA or BS / MPP in Public Policy
- BA or BS / PSM in Geographic Information Systems

Learn more about Accelerated +1 programs.

calmon@temple.edu

First-Year Writing includes two 4-credit courses, ENG 0701 Introduction to Academic Discourse and ENG 0802 Analytical Reading and Writing. First-Year Writing also includes ENG 0711 and ENG 0812, which are alternative versions of ENG 0701 and ENG 0802 (respectively) designated especially for English as a Second Language (ESL) students. The ESL sections of all of our courses are equivalent in weight and credit to their direct counterparts.

Entering students are either placed into the 0701-0802 sequence, placed into 0802 only, or exempted from these courses entirely. Placement is determined by Institutional Research and Assessment and is based on the SAT/ACT score, AP English score, and/or a placement assessment.

If a student places into ENG 0701/ENG 0711, he or she may not enroll in ENG 0802/ENG 0812 until the first course is completed successfully, with a grade of C- or better. ENG 0802/ENG 0812 may not be taken for credit by students who have successfully completed ENG 0902 Honors Writing About Literature.

ENG 0802/ENG 0812 (or ENG 0902 for University Honors students) is a required course in the General Education program. Students are strongly advised to successfully complete this course before taking the Intellectual Heritage sequence IH 0851 and IH 0852, any upper-level course in the College of Liberal Arts (all courses numbered 2000-4999), and all Writing Intensive courses (course numbers ending in -96, -97, and -98).

Students are advised to take the required three-course sequence of *Analytical Reading and Writing*, *Intellectual Heritage I: The Good Life*, and *Intellectual Heritage II: The Common Good* (IH 0851 and IH 0852, or IH 0951 and IH 0952 for Honors students) in order and in successive semesters.

Intellectual Heritage Program

<https://liberalarts.temple.edu/departments-and-programs/intellectual-heritage/>
214 Mazur Hall
215-204-3177

Heath F. Davis, Director
hfd@temple.edu

Douglas Greenfield, Senior Associate Director
dmg33@temple.edu

Sheryl Sawin, Associate Director
sheryl.sawin@temple.edu

The Intellectual Heritage (IH) Program offers two complementary courses, IH 0851 Intellectual Heritage I: The Good Life and IH 0852 Intellectual Heritage II: The Common Good, which are foundation courses in Temple University's General Education curriculum. The IH curriculum introduces students to intellectually and artistically influential works, both ancient and modern, from cultures around the world. In small seminars, students read and discuss books that have shaped the way people think and act, working together to interpret their historical significance, their relation to one another, and their relevance today.

Students are required to complete both courses to fulfill their General Education requirements. Transfer students should see their academic advisor for more information regarding their IH placement. Satisfactory completion of ENG 0802 is strongly advised prior to taking the Intellectual Heritage sequence. Honors versions of the Intellectual Heritage sequence are offered as IH 0951 Honors Intellectual Heritage I: The Good Life and IH 0952 Honors Intellectual Heritage II: The Common Good.

Law Scholars Program

Paul Crowe, Director
7th floor Mazur Hall
215-204-8591
pcrowe@temple.edu

The Temple Law Scholars Program provides an opportunity for outstanding students to gain provisional admission to the Temple University Beasley School of Law at the same time they are accepted into the College of Liberal Arts. As Temple Law Scholars, students spend their undergraduate years in Temple's Honors Program, after which they enroll in the Beasley School of Law, leading to the JD degree. Scholars will take advantage of special opportunities, including internships, mock trial competitions, attendance at special events and lectures, and sitting in on law school classes.

The Temple Law Scholars Program is highly selective. To be considered, applicants must be accepted into the Honors Program. High class standing, high SAT scores, and superior letters of recommendation are expected, as is an articulate, thoughtful essay. In addition, other criteria used in the

decision-making process include above-average maturity, community service, leadership, and a genuine commitment to the legal profession and service to others.

Application to the Temple Law Scholars Program takes place at the same time students apply to the College of Liberal Arts. The application materials include the Temple undergraduate admission application, the Temple Law Scholars application, a letter of recommendation, and an essay on a topic assigned by the Temple Law Scholars admissions committee. An interview may also be required. The deadline for receipt of all application materials is April 1. Applications received before March 1 will receive priority treatment.

Majors' Associations

Most of the departments in the College of Liberal Arts support student interest groups, clubs, and majors' associations. These organizations provide opportunities for students from the individual disciplines of the liberal arts to meet one another and to extend the learning experience beyond the classroom. Some of these associations invite their alumni back to campus to connect with current undergraduates and talk with them about the wide range of career options open to liberal arts graduates.

Participation in the majors' associations has significant benefits. Active involvement cultivates skills in leadership, team work, cultural sensitivity, and public speaking, all of which are highly valued in the workplace. Students are strongly encouraged to participate in these organizations. For more information, see your department's web site or faculty advisor.

abayless@temple.edu

Carissa Forde, MPH
Associate Director
carissa.forde@temple.edu

Given the rapidly-changing nature of the world economy, a degree in the liberal arts has never been more valuable. Our professional development advisors teach students in the liberal arts how they can best leverage their skills to prepare for careers in a broad array of industries, including government, non-profit, corporate, education, etc. We are committed to enhancing students' professionalism and empowering students to present themselves successfully as candidates for internships and employment opportunities. We also work with students interested in preparing for graduate or professional school.

We provide an array of services to students in the College of Liberal Arts, including one-on-one appointments with a Professional Development Advisor to discuss internship, jobs, and/or graduate school. To schedule an appointment, call 215-204-7971. Advisors can help with:

- Drafting and editing résumés;
- Writing and revising cover letters;
- Practicing interview skills;
- Strategizing on internships and job opportunities search;
- Building a personal brand; and,
- Connecting a student's unique experience with potential employers.

In addition to working individually with students, our professional development advisors collaborate with faculty, administrators and prospective employers to coordinate and host a number of career-related workshops and events, including:

- Internship information sessions;
- Graduate School 101;
- Career fairs and employer visits in partnership with the university Career Center;
- Skill-building training workshops; and,
- Alumni networking events.

Affiliated Academic Courses

CLA 1002 Professional Development for Liberal Arts Majors (1 s.h.): Designed to guide students as they explore the transferability of the skills they have acquired in the liberal arts with an emphasis on the value of those skills in the marketplace. Students will learn how to search effectively for internship and career opportunities, communicate professionally, develop an application-ready résumé and prepare for networking and professional interviews.

CLA 2685 Internship (1 to 12 s.h.): Provides students with the opportunity to complete an internship for upper-level elective credit in the College of Liberal Arts. Interested students should meet with a professional development advisor and complete an internship contract.

Study Abroad

Undergraduates majoring in any liberal arts discipline may pursue a large variety of study abroad options. Temple University has campuses in Rome, Italy, and Tokyo, Japan. We offer programs in London, England, Oviedo, Spain, and exchange programs with universities in England, Germany, and Puerto Rico. Summer programs are offered in a number of countries, such as France, Germany, Ghana, Great Britain, India, Italy, Japan, and South Africa. In addition, CLA undergraduates can choose to study in non-Temple programs around the world.

Students are urged to see an advisor about one year prior to their anticipated study abroad semester to determine their academic plan.

See the Office of Education Abroad and Overseas Campuses, 200 Tuttleman Learning Center or <https://studyabroad.temple.edu> for more information about study abroad options.

Honors Societies and Awards for Achievement

Awards

During the graduation season in May, the Baccalaureate Awards Ceremony is held to honor seniors who have demonstrated outstanding academic performance and/or exceptional service to the college. These prizes are awarded competitively and are a testament to the excellence of the College of Liberal Arts undergraduates. Learn more about awards offered for particular majors. Additional information may be obtained via department web sites, or ask a faculty advisor about the awards nomination process.

Departmental Honors Programs

Several departments in the College of Liberal Arts offer an Honors track for their majors. Students should consult the *Bulletin* information listed under the individual majors for eligibility, specific program requirements, and contacts.

University Honors

The College of Liberal Arts participates in the university-wide honors program. Go to the University Honors Program (p. 58) section in this *Bulletin* for more information.

Phi Beta Kappa

See the Honor Societies (p. 61) section of the *Undergraduate Bulletin*.

College of Liberal Arts - Information Technology (CLA IT)

The College of Liberal Arts offers cutting-edge technology and resources for students, faculty and staff. Our IT staff manages over 110 technology-enabled smart classrooms and meeting spaces, more than 575 computer stations in laboratory, kiosk, and classroom settings, in addition to a wireless network with 100% coverage in all CLA spaces.

Academic Policies and Regulations

University policies (p. 1835) and regulations generally apply to all undergraduate students and provide a framework within which schools and colleges may specify further conditions or variations appropriate to students in their courses or programs.

Academic Residency Requirements

Upon transferring into the College of Liberal Arts, all students must complete at least 30 credits of coursework as a degree-seeking student, completing at least half of the courses required for any major, minor, or certificate program at Temple University.

In order to be considered for Latin honors (p. 1855) (*cum laude*, *magna cum laude*, and *summa cum laude*), a student must complete a minimum of 60 credits at Temple University and meet the GPA requirements as set out in the University policy.

Change of Program

Students who wish to complete a Change of Program (COP) into the College of Liberal Arts from other colleges and schools at Temple must have at least a 2.0 GPA in the intended major and overall. Students will not be permitted to COP as undeclared majors if they have completed, or are in the process of completing, 60 or more credits.

Course Levels

All College of Liberal Arts undergraduate courses are open to all students who have successfully completed appropriate course prerequisites and are divided into four categories:

- Preparatory courses numbered 0700-0799.
- General Education courses numbered 0800-0999.
- Lower-level courses numbered 1000-1999.
- Upper-level courses numbered 2000-4999.

Courses Taken at Other Institutions

Students must complete the "Petition to Take Courses Elsewhere" form in advance of registering at another institution. Students access the form by logging into the TUportal, selecting the Student Tools tab, and under the University Forms channel, select Permission to Take Courses Elsewhere. This form will be routed to the student's advising unit for approval. (Refer to Permission to Complete a Course at Another Institution after Matriculation (p. 1858).)

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Declaration of Major

Students in the College of Liberal Arts must declare their major before completing 60 credits, including credits transferred from other institutions. Undeclared students with 45 or more credits must meet with an advisor in the Center for Academic Advising and Professional Development before registering.

Foreign Language Course Placement Policy

Students who have studied a foreign language in the four years prior to admission to Temple must take a placement exam if they wish to continue in that language. If a period of more than four years has elapsed between a student's graduation from high school and admission to college, s/he is eligible to enroll in the first level of the language s/he studied in high school.

If a student enrolls in a course level lower than the placement score indicates, s/he will not receive graduation credit for the course or will be dropped from the course by the College of Liberal Arts. If a student wishes to receive credit for a course lower than that indicated by the placement exam, s/he must receive permission from the department chair or program coordinator for that language.

Heritage speakers (also known as native speakers) of a foreign language taught by Temple University must meet with the language program coordinator or department chairperson to assess their readiness and course placement in the language skills sequence. Students will not receive credit for courses lower than their placement indicates. A student with pre-existing language skills (family background, travel or study in a foreign country, participation in non-credit summer language institutes, etc.) who then enrolls in lower division courses in that same language will not receive graduation credit for the course and may be dropped from the course by the College of Liberal Arts.

Foreign Language Regression in Coursework Policy

- Students who have completed 4000 level coursework may enroll in courses at the 3000 level, but not at the 1000 or 2000 level.
- Students who have completed the 3000 level may enroll in courses at the 2000 level, but not at the 1000 level.
- Students who have completed a 2000 level course may not enroll at the 1000 level.
- General Education courses at the 0800 and 0900 levels are not language skills courses and are open to all students.

If a student seeks permission for an exception to the Regression policy, s/he should discuss the request with the program coordinator for the language.

Graduation Application Process

Currently enrolled students in a degree-program, such as a Certificate, Bachelor, Master, Doctoral or professional degree, should apply to graduate when they become degree-eligible. Students should regularly meet with their academic advisors to ensure academic program requirements are being met and that their intended graduation date is up-to-date. Learn more about the graduation application process.

Grievances, Academic

Title IX of the Educational Amendments Act of 1972 requires that each college or university establish due process for the resolution of academic grievances. This is to protect students from prejudiced and capricious academic evaluation. All undergraduate students enrolled in the College of Liberal Arts have a right to appeal grades which they deem unfair and unreasonable. The student must provide evidence indicating a mistake, fraud, or bad faith on the part of an instructor. Students will not be allowed to grieve a grade unless it is accompanied by such evidence.

Students should first contact their instructor to discuss the grade(s) in question, and if the matter cannot be resolved at that level, students are then urged to talk with the chairperson for the department in which this course was given. Chairperson information is available in this publication. A student must initiate the first stage of an academic grievance by the dates in the College of Liberal Arts Grievance Procedure.

For more information, students should contact the college's Undergraduate Grievance Officer, Amanda Gibson, at gibson@temple.edu or 215-204-8504.

Grievances, Non-Academic

Students may have grievances that are not academic in nature. Such grievances should be directed to other offices on campus, which may include the Office of the Dean of Students, the Equal Opportunity Compliance office, Office of University Housing and Residential Life, and other units on campus.

Students unsure as to where to proceed with a non-academic grievance should consult either with the Office of the Dean of Students or the college's Center for Academic Advising and Professional Development.

Internship and Individual Studies

BA and BS degree students in the College of Liberal Arts are permitted to take up to 12 credits of internship and up to 9 credits of Independent Study/Directed Readings/Directed Research.

Placement Assessments

All incoming freshmen are placed into English, Mathematics, and foreign language classes according to their SAT/ACT score and/or diagnostic tests.

Transfer students who have not completed the equivalent of ENG 0802 or a college-level math will receive placement in these subjects once they have completed diagnostic assessments.

Students placed into ENG 0701/ENG 0711 must register each semester for that course until the requirement is completed. Only upon successful completion of ENG 0701/ENG 0711 can such students enroll in ENG 0802/ENG 0812. Students assigned to courses designed to remedy deficiencies in mathematics are required to complete those courses (MATH 0701 or MATH 0702) before enrolling in the mathematics component of the University General Education Program (GenEd (p. 83)). Incoming students must also take a foreign language placement examination if they plan to continue a language previously studied or if they wish to place out of the foreign language requirement.

Plagiarism and Academic Cheating

Plagiarism and academic cheating are unacceptable in College of Liberal Arts courses. The development of independent thought and a respect for the thoughts of others is essential to intellectual growth. The penalty for plagiarism or cheating as a first offense is normally an F in the course in which the offense is committed. In such cases, the instructor will write a report to the dean. The CLA Grievance Committee will adjudicate appeals made by students and serious cases, or repeat offenses, referred to the committee by an instructor or the dean. The dean may recommend suspension or expulsion from the university when warranted. Instructors may also refer the offense to the University Disciplinary Committee (UDC) for adjudication.

The prohibition against plagiarism and cheating is intended to foster this independence and respect. For more information, see Academic Honesty (p. 42) under Student Responsibilities.

Standing - Academic Warning, Probation, Dismissal, and Reinstatement

To maintain academic good standing in the university, a student enrolled in an associate or baccalaureate degree-seeking program must achieve both a semester grade point average and a cumulative grade point average of at least a 2.0. See the University policy on Academic Standing for details on academic warning, academic probation, academic dismissal and reinstatement. There is a related policy on Academic Forgiveness.

Withdrawal from Classes

During the first two weeks of the fall or spring semester or summer sessions, students may drop one or more courses with no record of the course(s) appearing on the transcript. After the drop period but prior to the deadline for the applicable term set forth in the university's academic calendar, students may withdraw with the assistance of an academic advisor or by using the withdrawal function in Self-Service Banner (SSB). Instructors' signatures are not required to withdraw. The course will be recorded on the transcript with the notation of "W," indicating that the student withdrew. After the withdrawal deadline, students may not withdraw from courses.

For the complete policy, please refer to the Academic Policies (p. 1850) section of this *Bulletin*.

Requirements for the Baccalaureate Degree

Credit Hour Requirements

Bachelor of Arts (BA) and Bachelor of Science (BS) degrees in the College of Liberal Arts require a minimum of 123 credits, distributed according to the university and college policy outlined below, with at least a 2.0 cumulative grade point average (GPA). A minimum 2.0 GPA must also be maintained in College of Liberal Arts and College of Science and Technology (hereafter "CLA/CST") coursework and in the major.

To earn a CLA baccalaureate degree, a student must complete a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999). Of that, 6 credits must be outside the student's major division (e.g. Social Sciences or Humanities).

Students are permitted to take up to 9 credits of independent work such as Independent Study, Directed Readings, and Research courses and up to 12 credits of internship credits. Any affiliated courses with a regular meeting time do not count towards this limit but do count towards the bachelor's degree.

Degree Eligibility

The College of Liberal Arts does not award baccalaureate degrees to students who have already completed an accredited first Bachelor's, Master's, or PhD degree, regardless of when the degree was completed.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

University Requirements

All students entering an undergraduate degree program are required to complete the university General Education (GenEd (p. 83)) curriculum.

All students must take a minimum of two writing-intensive courses at Temple University as designated by their major requirements. The specific writing-intensive courses required for each major are listed on the individual program pages and are identified by "WI."

Foreign Language/Global Studies Requirement for Bachelor of Arts Students

NOTE: This is *not* required for students majoring in the Bachelor of Science in Neuroscience: Systems, Behavior, and Plasticity program.

1. All BA students complete the second level of a foreign language;
2. All BA students must complete at least one course from the GenEd Global/World Society category; and
3. All BA students must complete one of the following options:
 - Third level of a foreign language;
 - Demonstrated proficiency in a foreign language;
 - A second General Education Global/World Society course;
 - Study Abroad at an approved program; or
 - Take one CLA Global Studies course from the following list:

Code	Title	Credit Hours

Major

Students must also complete the requirements of a major. The minimum acceptable grade in a course taken to fulfill major requirements is a "C-," though students need a 2.0 GPA overall in major coursework in order to graduate. At least half of the coursework required for a major must be taken at Temple University.

Students are permitted to double-major (both inside CLA and across schools and colleges) but Temple University does not permit transcription of a third major.

Students are encouraged to declare their major as soon as possible, and university policy requires that a major must be declared by the time a student has earned 60 credits.

Major requirements are determined by the effective semester of their declaration. The Center for Academic Advising and Professional Development is responsible for making this assignment and informs the student via e-mail.

Students who wish to declare or change their major or minor should consult the Center for Academic Advising and Professional Development.

BA and BS majors are offered in the divisions of the Humanities and the Social Sciences.

- **Humanities:** Chinese, Classics, English (includes the Creative Writing concentration), French, German Language and Cultural Studies, Greek and Roman Classics, Interdisciplinary German Studies, Italian, Italian Studies, Japanese (only available at our Japan campus), Philosophy, Religion, and Spanish (includes the options in Language, Literature and Linguistics; Professional Studies; and Education).
- **Social Sciences:** Africology and African American Studies, American Studies, Anthropology (includes tracks in Human Biology and Visual Anthropology), Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Mathematical Economics, Neuroscience: Systems, Behavior and Plasticity (BS), Political Science, Psychology, and Sociology (includes Sociology of Health option).

Upper-level Distribution Requirements

All BA and BS students in the College of Liberal Arts must complete upper-level distribution requirements by taking two upper-level (numbered 2000-4999) CLA courses outside the curriculum division of the major (or upper-level College of Science and Technology courses) as stated above. Students who have double majors in two different divisions automatically satisfy the distribution requirement.

Note: The Humanities Division has been expanded to include upper-level courses in Art History from the Tyler School of Art and Architecture.

Professional Development Requirement

All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for any CLA major. Other courses that may be used to fulfill this requirement are CJ 1002 Professional Development in Criminal Justice, ENG 1801 Career Seminar, HIST 1012 Professional Development for History Majors, NSCI 1002 Careers in Neuroscience, POLS 1002 Careers in Political Science, PSY 1002 Careers in Psychology and SOC 1002 Professional Development for Sociology Majors.

Note: Because there is significant overlap in course content, students will receive credit for only one of these courses.

Military Science Courses

Undergraduate students in the College of Liberal Arts whose degree programs allow for free electives may apply up to 12 credits of military science courses at the 3000 and 4000 levels in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC).

Courses Inapplicable to Graduation

Students will not receive credits for lower-level courses after successful completion of higher-level courses in sequenced courses of study. This only applies to the First Year Writing sequence in English (0701-0802), and all courses in Mathematics and Foreign Languages. For example, after passing a SPAN 1002 Basic II course, a student will not receive credits for SPAN 1001 Basic I.

Credit/No Credit

During the junior and senior years, any College of Liberal Arts student who is in good standing and taking a minimum of 12 semester hours may elect to take one course each semester on a Credit/No Credit basis, except for courses that count toward major, minor, GenEd, or distributional requirements. Application must be made at the Center for Academic Advising and Professional Development during the first two weeks of a fall or spring semester course and during the first three days of a first or second summer session course.

Special Major and Minor Requirements

Interdisciplinary Major

Rather than major in an existing department or program, students may apply for a major in Interdisciplinary Studies. The proposed major should consist of coursework totaling at least 36 semester hours and be justified in terms of some thematic unit of cohesive rationale. The program must not closely resemble any major currently available in the College of Liberal Arts.

The proposed major program may include courses outside of the College of Liberal Arts, but at least 24 semester hours must be in upper-level liberal arts or science courses. The student's proposal must be sponsored by two faculty members from different departments, at least one of whom must be in the College of Liberal Arts. Approval for the program must be obtained from the College of Liberal Arts' Center for Academic Advising and Professional Development prior to the initiation of the last 60 semester hours of the degree.

Please contact Chris Wolfgang at chris.wolfgang@temple.edu for more information.

Honors Interdisciplinary Major

Students in the University Honors Program may apply for a College of Liberal Arts Honors Interdisciplinary Major. They must complete the degree requirements of the BA in the College of Liberal Arts and the requirements for the Interdisciplinary Major described above as well as the requirements for the University Honors Program. Approval for this program must also be obtained from the University Honors Committee prior to the initiation of the last 60 semester hours of the degree.

In addition, the proposed major program should include submission of an acceptable honors thesis to the University Honors Oversight Committee.

Minor

Students may also choose to complete the requirements for a minor. The minimum acceptable grade in a course taken to fulfill minor requirements is "C-," though students need a 2.0 GPA in the minor in order to have it awarded at graduation. At least half of the courses taken by a student to fulfill the minor must be taken at Temple. Students may declare a minor at the Center for Academic Advising and Professional Development. The College of Liberal Arts offers minors in:

- Africology and African American Studies
- American Studies
- Ancient Mediterranean Studies
- Anthropology
- Arabic
- Asian Studies
- Biomedical Anthropology
- Chinese
- Classical Languages and Literature
- Clinical and Health Psychology
- Cognitive Neuroscience
- Creative Writing
- Criminal Justice
- Economics
- English
- Environmental Studies
- French
- Gender, Sexuality and Women's Studies
- Geography and Urban Studies
- German Language and Cultural Studies
- Global Studies
- History
- Interdisciplinary German Studies

- Italian
- Italian Studies
- Japanese
- Jewish Studies
- Latin American Studies
- Lesbian, Gay, Bisexual and Transgender Studies (LGBT)
- Neuroscience Research
- Philosophy
- Political Science
- Portuguese
- Psychology
- Public Policy
- Religion
- Sociology
- Sociology of Health
- Spanish
- Visual Anthropology

Certificates of Specialization

Students may choose to complete the requirements for an additional certificate of specialization. At least half of the courses taken by a student to fulfill a certificate of specialization must be taken at Temple. Students may declare a certificate in the Center for Academic Advising and Professional Development. Certificates of specialization are available in the following programs:

- Asian Business and Society
- Cybersecurity and Human Behavior
- Ethics
- Foreign Languages: Arabic, Chinese, French, German, Italian, Japanese, Spanish
- Gender, Sexuality and Women's Studies
- Geographic Information Systems
- Health Research
- Jewish Secular Studies
- Language and Cross-Cultural Communication
- Latin American Studies
- Management Career Certificate
- Political Economy
- Professional Writing
- Social Science Research
- Spanish and Latin American Studies for Business
- Spanish and Latinx Studies for the Health and Human Services Professions
- Sports and Society

Academic Advising

Center for Academic Advising
120 Gladfelter Hall

Chris Wolfgang, EdD, Assistant Dean for Student Services
cwolfgan@temple.edu

Anar Khandvala, MEd, Director
anar@temple.edu

The Center for Academic Advising in the College of Liberal Arts helps students plan curricula, choose majors, make vocational and post-graduate plans, and resolve a variety of academic matters. Services are provided by a staff of full-time professional advisors. The Center informs students about the results of placement testing and assignment into corresponding courses. Monitoring academic progress and graduation clearance is also the responsibility of the Advising Center. Through individual appointments and group workshops, the Center offers the following services:

- New Student Orientation.
- Advising and registration assistance for all students in the College of Liberal Arts. Students enrolled in the University Honors Program also receive advising in the Honors Program Office in Tuttleman Learning Center, Suite 201. Students are strongly encouraged to seek faculty advising in their major department.
- It is recommended, and in some cases required, that students consult with an advisor prior to registration. The advisor will review the proposed coursework and inform students of the requirements for graduation. In addition, the advisor helps students achieve breadth in their curriculum and provides other needed assistance.
- Academic advising provides an opportunity for students to develop a meaningful education plan compatible with their life goals. Students can also meet with advisors to discuss a variety of academic concerns and identify solutions. Students experiencing academic difficulty work with advisors to learn strategies for overcoming the obstacles to success.
- Change of Program (COP) advising for students transferring into the College of Liberal Arts from other schools and colleges within Temple. Students seeking to declare their primary major in the College of Liberal Arts must contact the CLA Center for Academic Advising to be added to a "Change of Program" Canvas course which covers important information about academic advising and degree requirements. Upon successful completion of the course, students will receive a Change of Program form to finalize the process.
- Approving special requests including: academic forgiveness; course repeats; re-enrollment at the University; permission to take courses elsewhere (p. 1858); registration overload (p. 1836); credit/no-credit (p. 1848) option for free electives; and other questions regarding University or College policies (p. 1835). (Click the links to be directed to more information on specific policies.)

All academic advisors are trained to evaluate information carefully to give students the best possible advice. **Primary responsibility for course selection and degree completion rests with the student.** Every student must be aware of the requirements of their degree and should collaborate with an advisor regularly to ensure timely completion of their program.

Department-Based Advisors

All departments in the College of Liberal Arts have designated faculty advisors, undergraduate chairs, or embedded professional advisors, with whom students can discuss the requirements of their major, minor, and/or certificate programs.

Student Grievance Procedures

Title IX of the Educational Amendments Act of 1972 requires that each college or university establish due process for the resolution of academic grievances. This is to protect students from prejudiced and capricious academic evaluation. All undergraduate students enrolled in the College of Liberal Arts have a right to appeal grades which they deem unfair and unreasonable. The student must provide evidence indicating a mistake, fraud, or bad faith on the part of an instructor. Students will not be allowed to grieve a grade unless it is accompanied by such evidence.

Students should first contact their instructor to discuss the grade(s) in question, and if the matter cannot be resolved at that level, students are then urged to talk with the chairperson for the department in which this course was given. Chairperson information is available in this publication. A student must initiate the first stage of an academic grievance by the dates in the College of Liberal Arts Grievance Procedure, available at <https://liberalarts.temple.edu/students/resources>.

For more information, students should contact the college's Undergraduate Grievance Officer, Amanda Gibson, at gibson@temple.edu or 215-204-8504.

Non-Academic Grievances

Students may have grievances that are not academic in nature. Such grievances should be directed to other offices on campus, which may include the Office of the Dean of Students, the Equal Opportunity Compliance office, Office of University Housing and Residential Life, and other units on campus. Students unsure as to where to proceed with a non-academic grievance should consult either with the Office of the Dean of Students or the college's Center for Academic Advising and Professional Development.

Pre-Law Advising

Pre-Law Advisors

Beth Lawson
CLA Academic Advising
elizabeth.lawson@temple.edu

Paul Crowe
Department of Philosophy
pcrowe@temple.edu

Preparation for the Study of Law

All law schools accept the degree of Bachelor of Arts as fulfillment of their requirements for admission. The Pre-Legal Education Committee of the Association of American Law Schools and the Temple University School of Law stress the importance of a well-rounded education. Liberal arts majors are considered excellent preparation for law school. Although Temple University does not have a specific major in Pre-Law, we do offer specialized advising for students interested in applying to law school, as well as majors in challenging disciplines that will help students hone their critical thinking, analytical and communication skills. Since the legal profession makes extensive use of both the written and spoken English language as professional tools, the law student should have extensive preparation in English in undergraduate courses. Because a large part of a lawyer's work requires problem solving and sound judgment, students should take courses that help develop creative power in thinking. The study of law, furthermore, rests upon a broad knowledge of western civilization, including its political, economic, and social institutions; hence, the student preparing for law should schedule courses which afford this broad background. Some law schools also recommend two semesters of accounting. After selecting a field of concentration, the student schedules courses in consultation with both the advisor in the area of concentration and with the pre-law advisor in the Center for Academic Advising and Professional Development of the College of Liberal Arts.

Courses of Special Interest to Pre-Law Students

While no specific undergraduate courses or majors are required for admission to accredited law schools, pre-law students are advised to select courses and programs of study that are intellectually challenging, while helping to develop necessary skills and knowledge.

To develop the communications skills of reading and comprehension, expository writing, and speaking:

Code	Title	Credit Hours
CSCD 1108	Introduction to Linguistics	3
AOD 2214	Conflict Processes	3
ENG 2006	Non-Fiction Writing	3
ENG 2009	Writing the Research Essay	3
English 2000+ Upper-level literature courses		3
CSI 1111	Introduction to Public Speaking (formerly STRC 1111)	3
CSI 1113	Persuasion (formerly STRC 2112)	3

To develop analytical reasoning skills:

Code	Title	Credit Hours
PHIL 1055	Critical Thinking	3
PHIL 1066	Introduction to Logic	3
PHIL 1196	Introduction to Philosophy	3
PHIL 2121	Introduction to Ethical Theory	3
CSI 3601	Misperceptions and Misinformation (formerly STRC 3336)	3
Computer Science and Mathematics		
Natural Science		

Courses that are "law-related" because they either require reading of law cases or concern the study of particular legal issues are listed below for the convenience of interested students. Law school admissions officials prefer that pre-law students take very few such courses, believing that the teaching of law more appropriately belongs in the province of the law school. It may be useful, however, for students who are uncertain about attending law school to test their level of interest by selecting one or more of the following courses in the College of Liberal Arts:

Code	Title	Credit Hours
AMST 3033	Courtroom in American Society	3
CJ 2501	Introduction to Criminal Law	3
CJ 3201	The American Jury System	3
CJ 3502	Criminal Procedure: Prosecution & Adjudication	3
GSWS 4004	Women and Criminal Justice	3
HIST 2105	Race and the U.S. Constitution	3
PHIL 1062	Morality and the Law	3
PHIL 2154	Political Philosophy	3
PHIL 3243	Philosophy of Law	3

POLS 3121	American Constitutional Principles I	3
POLS 3123	American Constitutional Principles II: Civil Rights in America	3
POLS 3411	Classical Political Philosophy	3
SOC 3243	Social Movements and Conflict	3

Since most law schools require applicants to submit the score earned on the Law School Aptitude Test, administered periodically by the Law School Admissions Service, students planning to study law should consult the pre-law advisor prior to the senior year to determine whether the school to which they plan to apply will require such a test and to determine the dates when such examinations are given. Prospective law students should consult the pre-law advisor about requirements for admission to law school, law school scholarship assistance, and opportunities in the legal profession. To satisfy statutory requirements, early in their senior year, prospective law students should consult the pre-law advisor concerning the legal requirements for practicing law in the state in which the student desires to study and practice.

Phi Alpha Delta Law Fraternity, International

Students interested in College of Liberal Arts pre-law studies are encouraged to join Phi Alpha Delta. Its pre-law program assists "undergraduate students to make an 'informed choice' in selecting law as a career, deciding which law school to attend, and in preparing for the rigors of law school."

Phi Alpha Delta was formed "to advance the ideals of liberty and equal justice under law; to stimulate excellence in scholarship; to inspire the virtues of compassion and courage; to foster integrity and professional competence; to promote the welfare of its members; and to encourage their moral, intellectual, and cultural advancement." For more information about Phi Alpha Delta and College of Liberal Arts pre-law society, please contact Paul Crowe, pre-law advisor, at 215-204-8591 or pcrowe@temple.edu.

Faculty

Go to the College of Liberal Arts' Departments and Programs site, click on the individual department for a list of faculty in that department. See also <https://directory.temple.edu/>.

Casarae Abdul-Ghani, Assistant Professor, Department of English, College of Liberal Arts; PhD, Purdue University.

Zain Abdullah, Associate Professor, Department of Religion, College of Liberal Arts; PhD, The New School for Social Research.

Elizabeth Adams, Instructor, Department of Criminal Justice, College of Liberal Arts; PhD, Michigan State University.

Hiram Aldarondo, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, University of Chicago.

Lauren B. Alloy, Laura H. Carnell Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Pennsylvania.

Cate Almon, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; EdD, Temple University.

Rebecca T. Alpert, Professor Emerita, Department of Religion, College of Liberal Arts; PhD, Temple University.

Eli Alshanetsky, Assistant Professor, Department of Philosophy, College of Liberal Arts; PhD, New York University.

Michael Altimore, Professor of Instruction, Department of Sociology, College of Liberal Arts; PhD, University of Iowa.

Elizabeth Alvarez, Associate Professor of Instruction, Department of Religion, College of Liberal Arts; PhD, University of Chicago Divinity School.

Nilgün Anadolu-Okur, Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, Hacettepe University.

Reynaldo Anderson, Associate Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, University of Nebraska-Lincoln.

Max Andrucki, Associate Professor of Instruction, Department of Geography and Urban Studies, College of Liberal Arts; PhD, University of Leeds.

Molefi Kete Asante, Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, University of California Los Angeles.

Philip Atkins, Associate Professor of Instruction, Department of Philosophy, College of Liberal Arts; PhD, University of California Santa Barbara.

Melissa Auerbach, Assistant Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, State University of New York at Stony Brook.

Kathleen Auerhahn, Associate Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of California Riverside.

James D. Bachmeier, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, University of California Irvine.

Marcia B. Bailey, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Colgate Rochester Crozer Divinity.

Chloé Bakalar, Assistant Professor, Department of Political Science, College of Liberal Arts; PhD, University of Pennsylvania.

Christina Baker, Assistant Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, University of Wisconsin-Madison.

Debra Bangasser, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Rutgers University.

Alison Baren, Assistant Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Graduate Center, City University of New York.

Austin B. Bean, Assistant Professor, Department of Economics, College of Liberal Arts; PhD, University of Texas at Austin.

Steven R. Belenko, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, Columbia University.

Jamal Benin, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.

Stefania Benini, Assistant Professor of Instruction, Department of French, German, Italian and Slavic, College of Liberal Arts; PhD, Stanford University.

Daniel W. Berman, Professor, Department of Greek and Roman Classics, College of Liberal Arts; PhD, Yale University.

Lila Corwin Berman, Professor, Department of History, College of Liberal Arts; PhD, Yale University.

Susan Bertolino, Instructor, Department of Intellectual Heritage Program, College of Liberal Arts; MA, University of Chicago.

Abhit Bhandari, Assistant Professor, Department of Political Science, College of Liberal Arts; PhD, Columbia University.

Marcus Bingenheimer, Associate Professor, Department of Religion, College of Liberal Arts; Dr.Phil., Wurzburg University.

Erwin A. Blackstone, Professor, Department of Economics, College of Liberal Arts; PhD, University of Michigan.

Khalid Y. Blankinship, Professor, Department of Religion, College of Liberal Arts; PhD, University of Washington.

Michael L. Bognanno, Professor, Department of Economics, College of Liberal Arts; PhD, Cornell University.

Aryeh I. Botwinick, Professor, Department of Religion, College of Liberal Arts; PhD, Princeton University.

Lucy Bregman, Professor Emerita, Department of Religion, College of Liberal Arts; PhD, University of Chicago Divinity School.

Mary K. Brennan, Assistant Professor of Instruction, Department of Philosophy, College of Liberal Arts; PhD, Temple University.

Lisa A. Briand, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Michigan.

Seth C. Bruggeman, Associate Professor, Department of History, College of Liberal Arts; PhD, College of William and Mary.

Gregory Byala, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Yale University.

César Cabezas, Assistant Professor, Department of Philosophy, College of Liberal Arts; PhD, Columbia University.

Nicholaos Catsis, Assistant Professor of Instruction, Department of Political Science, College of Liberal Arts; PhD, Temple University.

Lee-Ann Chae, Assistant Professor, Department of Philosophy, College of Liberal Arts; PhD, University of California Los Angeles.

Sanjoy Chakravorty, Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, University of Southern California.

Colin Chamberlain, Associate Professor, Department of Philosophy, College of Liberal Arts; PhD, Harvard University.

Isabelle Chang, Assistant Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Temple University.

Jason M. Chein, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Pittsburgh.

Eunice Y. Chen, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Sydney.

Eugene Chislenko, Assistant Professor, Department of Philosophy, College of Liberal Arts; PhD, University of California Berkeley.

Fletcher Chmara-Huff, Assistant Professor of Instruction, Department of Geography and Urban Studies, College of Liberal Arts; PhD, The Ohio State University.

Yongjin Choi, Assistant Professor of Instruction, Department of Economics, College of Liberal Arts; PhD, University of North Carolina at Chapel Hill.

- Elise Chor*, Assistant Professor, Department of Political Science, College of Liberal Arts; PhD, University of Chicago.
- Bettye Collier-Thomas*, Professor, Department of History, College of Liberal Arts; PhD, George Washington University.
- Gretchen A. Condran*, Associate Professor Emerita, Department of Sociology, College of Liberal Arts; PhD, University of Pennsylvania.
- Whitley Cooke*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, University of Oklahoma.
- Norma Corrales-Martin*, Associate Professor of Instruction, Department of Spanish and Portuguese, College of Liberal Arts; PhD, Ohio University.
- Nyron Crawford*, Assistant Professor, Department of Political Science, College of Liberal Arts; PhD, The Ohio State University.
- Paul Crowe*, Professor of Instruction, Department of Philosophy, College of Liberal Arts; PhD, Catholic University of Louvain.
- Beth K. Curran*, Professor of Instruction, Department of French, German, Italian and Slavic, College of Liberal Arts; PhD, Rutgers University.
- Amanda Czerniawski*, Professor of Instruction, Department of Sociology, College of Liberal Arts; PhD, Columbia University.

- Melissa R. Gilbert*, Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Clark University.
- Tania Giovannetti*, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Drexel University.
- Joseph Giuffre*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Rutgers University.
- Kristin Gjesdal*, Professor, Department of Philosophy, College of Liberal Arts; PhD, University of Oslo.
- Travis F. Glasson*, Associate Professor, Department of History, College of Liberal Arts; PhD, Columbia University.
- Petra Goedde*, Professor, Department of History, College of Liberal Arts; PhD, Northwestern University.
- Eli C. Goldblatt*, Professor Emeritus, Department of English, College of Liberal Arts; PhD, University of Wisconsin-Madison.
- Sara Goldrick-Rab*, Professor, Department of Sociology, College of Liberal Arts; PhD, University of Pennsylvania.
- Cynthia M. Gooch*, Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Princeton University.
- Alex Gottesman*, Associate Professor, Department of Greek and Roman Classics, College of Liberal Arts; PhD, University of Chicago.
- Declan Gould*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, State University of New York at Buffalo.
- Kimberly Ann Goyette*, Professor, Department of Sociology, College of Liberal Arts; PhD, University of Michigan.
- Cristina Gragnani*, Associate Professor, Department of French, German, Italian and Slavic, College of Liberal Arts; PhD, Harvard University.
- Matthew H. Graham*, Assistant Professor, Department of Political Science, College of Liberal Arts; PhD, Yale University.
- Peter Gran*, Professor, Department of History, College of Liberal Arts; PhD, University of Chicago.
- Jason Gravel*, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of California Irvine.
- Douglas Green*, Assistant Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; PhD, John Jay College of Criminal Justice.

- Douglas Greenfield*, Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Columbia University.
- Elizabeth Groff*, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of Maryland.
- Rachael Groner*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Purdue University.
- Lisa Grunberger*, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, University of Chicago Divinity School.
- Alexandra Guisinger*, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, Yale University.
- Keith D. Gumery*, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Temple University.
- Elizabeth Gunderson*, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Chicago.
- Victor Gutierrez-Velez*, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Columbia University.
- Lee Hachadoorian*, Assistant Professor of Instruction, Department of Geography and Urban Studies, College of Liberal Arts; PhD, City University of New York.
- Michael G. Hagen*, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, University of California Berkeley.
- Simon Hakim*, Professor, Department of Economics, College of Liberal Arts; PhD, University of Pennsylvania.
- Raymond Halnon*, Instructor, Department of Intellectual Heritage Program, College of Liberal Arts; BA, Boston College.
- Espen Hammer*, Professor, Department of Philosophy, College of Liberal Arts; PhD, The New School for Social Research.
- Patricia Hansell*, Associate Professor of Instruction, Department of Anthropology, College of Liberal Arts; PhD, Temple University.
- Donald A. Hantula*, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Notre Dame.
- Carissa M. Harris*, Associate Professor, Department of English, College of Liberal Arts; PhD, Northwestern University.
- Carol Harris-Shapiro*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.
- Allison Hayes-Conroy*, Associate Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Clark University.
- Richard G. Heimberg*, Professor Emeritus, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Florida State University.
- Chelsea A. Helion*, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Cornell University.
- Katherine Henry*, Associate Professor Emerita, Department of English, College of Liberal Arts; PhD, Rutgers University.
- Kevin A. Henry*, Associate Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, McGill University.
- Karen E Klaiber Hersch*, Associate Professor, Department of Greek and Roman Classics, College of Liberal Arts; PhD, Rutgers University.
- Michael Hesson*, Associate Professor of Instruction, Department of Anthropology, College of Liberal Arts; PhD, University of Pennsylvania.
- Rebeca L. Hey-Colón*, Assistant Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, Harvard University.
- Matthew Hiller*, Associate Professor, Department of Criminal Justice, College of Liberal Arts; PhD, Texas Christian University.
- Kathryn A. Hirsh-Pasek*, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Pennsylvania.
- John Erik Hmiel*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, University of Wisconsin-Madison.
- Kathy M. Houff*, Assistant Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, University of Georgia.
- Alistair Howard*, Professor of Instruction, Department of Political Science, College of Liberal Arts; PhD, George Washington University.
- Roselyn Hsueh*, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, University of California Berkeley.
- Shuchen Susan Huang*, Assistant Professor of Instruction, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; PhD, University of Massachusetts.
- Brian J. Hutler*, Assistant Professor, Department of Philosophy, College of Liberal Arts; PhD, University of California Los Angeles.

- Richard H. Immerman*, Professor Emeritus, Department of History, College of Liberal Arts; PhD, Boston College.
- Michael Ingram*, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; MFA, University of Iowa.
- Cheryl L. Irons-Guynn*, Associate Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; JD, Temple University.
- Afrin Islam*, Assistant Professor of Instruction, Department of Economics, College of Liberal Arts; PhD, Washington State University.
- Jessie B. Iwata*, Instructor, Department of Intellectual Heritage Program, College of Liberal Arts; MEd, Temple University.
- Veronica Jacome*, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, University of California Berkeley.
- Peter James*, Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Lehigh University.
- Stephen Jankiewicz*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Rutgers University.
- Johanna Jarcho*, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of California Los Angeles.
- Wilbert L. Jenkins*, Associate Professor, Department of History, College of Liberal Arts; PhD, Michigan State University.
- Rhiannon Jerch*, Assistant Professor, Department of Economics, College of Liberal Arts; PhD, Cornell University.
- Jayasinhji Jhala*, Associate Professor Emeritus, Department of Anthropology, College of Liberal Arts; PhD, Harvard University.
- C. Amari Johnson*, Assistant Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, University of Texas at Austin.
- Kareem J. Johnson*, Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Michigan.
- Peter R. Jones*, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, Aberystwyth University.
- Priya Joshi*, Professor, Department of English, College of Liberal Arts; PhD, Columbia University.
- Joyce A. Joyce*, Professor, Department of English, College of Liberal Arts; PhD, University of Georgia.
- Artemy M. Kalinovsky*, Professor, Department of History, College of Liberal Arts; PhD, London School of Economics and Political Science.
- Andrew Karpinski*, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Michigan.
- Michael W. Kaufmann*, Associate Professor, Department of English, College of Liberal Arts; PhD, Columbia University.
- James M. Kelly*, Assistant Professor of Instruction, Department of Economics, College of Liberal Arts; PhD, Temple University.
- Philip C. Kendall*, Laura H. Carnell and Distinguished University Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Virginia Commonwealth University.
- Dustin Kidd*, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, University of Virginia.
- Jacob Kim*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.
- Sook Kyung Kim*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; EdD, Temple University.
- Joshua Klugman*, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, Indiana University.
- Robin A. Kolodny*, Professor, Department of Political Science, College of Liberal Arts; PhD, Johns Hopkins University.
- Rita Krueger*, Associate Professor, Department of History, College of Liberal Arts; PhD, Harvard University.
- Peter Lavelle*, Associate Professor, Department of History, College of Liberal Arts; PhD, Cornell University.
- Anne Layman-Horn*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, New York University.
- Mindie Lazarus-Black*, Professor Emerita, Department of Anthropology, College of Liberal Arts; PhD, University of Chicago.
- Don Lee*, Professor, Department of English, College of Liberal Arts; MFA, Emerson College.
- Jeffrey Ethan Lee*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, New York University.
- Sue-Im Lee*, Associate Professor, Department of English, College of Liberal Arts; PhD, University of Illinois at Chicago.

Michael A. Leeds, Professor, Department of Economics, College of Liberal Arts; PhD, Princeton University.

Daniel Leonard, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Columbia University.

Mark A. Leuchter, Professor, Department of Religion, College of Liberal Arts; PhD, University of Toronto.

Heather Levi, Assistant Professor of Instruction, Department of Anthropology, College of Liberal Arts; PhD, New York University.

Judith A. Levine, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, Northwestern University.

Laura S. Levitt, Professor, Department of Religion, College of Liberal Arts; PhD, Emory University.

Xiaojiang Li, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, University of Connecticut.

Vasiliki M. Limberis, Professor Emerita, Department of Religion, College of Liberal Arts; ThD, Harvard University.

Jay B. Lockenour, Professor, Department of History, College of Liberal Arts; PhD, University of Pennsylvania.

Peter Logan, Professor Emeritus, Department of English, College of Liberal Arts; PhD, University of California Berkeley.

Martin Lopez-Daneri, Assistant Professor, Department of Economics, College of Liberal Arts; PhD, University of Iowa.

Gerardo Augusto Lorenzino, Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, Graduate Center, City University of New York.

Kevin Loughran, Assistant Professor, Department of Sociology, College of Liberal Arts; PhD, Northwestern University.

Hilary Iris Lowe, Associate Professor, Department of History, College of Liberal Arts; PhD, University of Kansas.

Natalie Léger, Assistant Professor, Department of English, College of Liberal Arts; PhD, Cornell University.

Johanna Catherine Maclean, Associate Professor, Department of Economics, College of Liberal Arts; PhD, Cornell University.

Marian Makins, Assistant Professor of Instruction, Department of Greek and Roman Classics, College of Liberal Arts; PhD, University of Pennsylvania.

Louis S. Mangione, Associate Professor, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; PhD, Cornell University.

Peter J. Marshall, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Cambridge.

James Martin, Assistant Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Binghamton University.

Joshua Mask, Assistant Professor of Instruction, Department of Economics, College of Liberal Arts; PhD, University of Illinois at Chicago.

Melinda Mattingly, Associate Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Saint Louis University.

Gabriella Kecskes Mazal, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Temple University.

Ama Mazama, Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, La Sorbonne Nouvelle, Paris III.

Walter Thomas McAllister, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; MFA, University of Iowa.

Patricia M. McCarthy, Associate Professor of Instruction, Department of English, College of Liberal Arts; MA, Temple University.

Michael S. McCloskey, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Southern Mississippi.

Stanley McDonald, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; MFA, Brown University.

Michael McGlin, Assistant Professor of Instruction, Department of Greek and Roman Classics, College of Liberal Arts; PhD, State University of New York at Buffalo.

Laura McGrath, Assistant Professor, Department of English, College of Liberal Arts; PhD, Michigan State University.

Alan McPherson, Professor, Department of History, College of Liberal Arts; PhD, University of North Carolina at Chapel Hill.

Alexander Melonas, Assistant Professor of Instruction, Department of Political Science, College of Liberal Arts; PhD, Temple University.

Patricia Melzer, Associate Professor, Department of French, German, Italian and Slavic, College of Liberal Arts; PhD, Clark University.

Jeremy Mennis, Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, The Pennsylvania State University.

- Joanne C. Metzger*, Associate Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; JD, Widener University School of Law.
- Catresa G. Meyers*, Associate Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; JD, Temple University.
- Aldona Middlesworth*, Instructor, Department of Intellectual Heritage Program, College of Liberal Arts; MA, Temple University.
- Marina Mikhaylova*, Assistant Professor of Instruction, Department of Anthropology, College of Liberal Arts; PhD, University of Chicago.
- Juris M. Milestone*, Assistant Professor of Instruction, Department of Anthropology, College of Liberal Arts; PhD, Temple University.
- Nichole E. Miller*, Associate Professor, Department of English, College of Liberal Arts; PhD, University of California Irvine.
- David Mislin*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Boston University.
- Robin N. Mitchell-Boyask*, Professor, Department of Greek and Roman Classics, College of Liberal Arts; PhD, Brown University.
- Pamela Beth Monaco*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.
- Elizabeth J. Moore*, Associate Professor, Department of English, College of Liberal Arts; MFA, City University of New York-Hunter College.
- Geoffrey Moss*, Professor of Instruction, Department of Sociology, College of Liberal Arts; PhD, Columbia University.
- Andrew R. Mossin*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.
- Katherina Motyl*, Assistant Professor, Department of History, College of Liberal Arts; PhD, University of Chicago.
- Gary A. Mucciaroni*, Professor, Department of Political Science, College of Liberal Arts; PhD, University of Wisconsin-Madison.
- Srimati Mukherjee*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, University of Louisiana.
- Eleanor Mulhern*, Assistant Professor of Instruction, Department of Greek and Roman Classics, College of Liberal Arts; PhD, Bryn Mawr College.
- Rimun Murad*, Assistant Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Louisiana State University.
- Vishnu Murty*, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Duke University.
- Shigenori Nagatomo*, Professor, Department of Religion, College of Liberal Arts; PhD, University of Hawaii.
- Nicole A. Nathan*, Assistant Professor of Instruction, Department of Spanish and Portuguese, College of Liberal Arts; PhD, Temple University.
- Michael Neff*, Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; MA, University of Pennsylvania.
- Kimani Nehusi*, Associate Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, University College of London.
- Harvey R. Neptune*, Associate Professor, Department of History, College of Liberal Arts; PhD, New York University.
- Nora S. Newcombe*, Laura H. Carnell Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Harvard University.
- Jessica M. Newman*, Assistant Professor, Department of Anthropology, College of Liberal Arts; PhD, Yale University.
- Steven L. Newman*, Associate Professor, Department of English, College of Liberal Arts; PhD, Johns Hopkins University.
- William M. Newman*, Assistant Professor of Instruction, Department of Economics, College of Liberal Arts; MA, Temple University.
- David Nickerson*, Professor, Department of Political Science, College of Liberal Arts; PhD, Yale University.
- Melissa E. Noel*, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University at Albany, State University of New York.
- Daniel T. O'Hara*, Professor Emeritus, Department of English, College of Liberal Arts; PhD, Temple University.
- Thomas Olino*, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, State University of New York at Stony Brook.
- Lauren Olsen*, Assistant Professor, Department of Sociology, College of Liberal Arts; PhD, University of California San Diego.
- Ingrid Olson*, Professor and the Thaddeus L. Bolton Chair in Psychology, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Yale University.
- Ryan Omizo*, Assistant Professor, Department of English, College of Liberal Arts; PhD, The Ohio State University.

- David J. Organ*, Assistant Professor of Instruction, Department of Geography and Urban Studies, College of Liberal Arts; PhD, University of California Berkeley.
- Richard Orodenker*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; MA, Johns Hopkins University.
- Laura A. Orrico*, Assistant Professor, Department of Sociology, College of Liberal Arts; PhD, University of California Los Angeles.
- Miles D. Orvell*, Professor, Department of English, College of Liberal Arts; PhD, Harvard University.
- Jena Osman*, Professor, Department of English, College of Liberal Arts; PhD, State University of New York at Buffalo.
- Lara Ostaric*, Associate Professor, Department of Philosophy, College of Liberal Arts; PhD, University of Notre Dame.
- Randall J. Pabich*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.
- Christine Palumbo-De Simone*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Temple University.
- Vinay Parikh*, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Punjabi University.
- Anna L. Peak*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.
- C. Hamil Pearsall*, Associate Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Clark University.
- Elizabeth W. Pearson*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; MA, Sarah Lawrence College.
- José Manuel Pereiro-Otero*, Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, University of Colorado Boulder.
- Donna Marie Peters*, Professor of Instruction, Department of Sociology, College of Liberal Arts; PhD, The New School for Social Research.
- Sonja Peterson-Lewis*, Associate Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, University of Florida-Gainesville.
- Montserrat Piera*, Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, The Pennsylvania State University.
- Danya Pilgrim*, Assistant Professor, Department of History, College of Liberal Arts; PhD, Yale University.
- Michelle Pinto*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, New York University.
- Mark A. Pollack*, Professor, Department of Political Science, College of Liberal Arts; PhD, Harvard University.
- Jennifer Pollitt*, Assistant Professor of Instruction, Department of Gender, Sexuality and Women's Studies, College of Liberal Arts; PhD, Widener University.
- Lori Pompa*, Instructor, Department of Criminal Justice, College of Liberal Arts; MSW, Rutgers University.
- Joshua M. Pongan*, Instructor, Department of Spanish and Portuguese, College of Liberal Arts; PhD.
- Gary D. Pratt*, Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Brandeis University.
- Peter Puchek*, Assistant Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Lehigh University.
- Victor M. Pueyo Zoco*, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, State University of New York at Stony Brook.
- Robert Rabiee*, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, University of Southern California.
- David E. Racker*, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Tulane University.
- Elver Sergio Ramirez-Franco*, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, University of Pittsburgh.
- Jerry H. Ratcliffe*, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of Nottingham (UK).
- Leslie A. Reeder-Myers*, Assistant Professor, Department of Anthropology, College of Liberal Arts; PhD, Southern Methodist University.
- Aunshul P. Rege*, Associate Professor, Department of Criminal Justice, College of Liberal Arts; PhD, Rutgers University.

Terry Rey, Professor, Department of Religion, College of Liberal Arts; PhD, Temple University.

Eunsook Ha Rhee, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; EdD, Temple University.

Monica Ricketts, Associate Professor, Department of History, College of Liberal Arts; PhD, Harvard University.

Moritz Ritter, Associate Professor, Department of Economics, College of Liberal Arts; PhD, University of Toronto.

L. Christie Rockwell, Associate Professor, Department of Anthropology, College of Liberal Arts; PhD, University of California Davis.

Norman Roessler, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, University of Pennsylvania.

Caterina Gouvis Roman, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, American University.

Jessica Roney, Associate Professor, Department of History, College of Liberal Arts; PhD, Johns Hopkins University.

Christina Rosan, Associate Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Massachusetts Institute of Technology.

Cathryn Jo Rosen, Associate Professor, Department of Criminal Justice, College of Liberal Arts; LLM, Temple University.

Natasha T. Rossi, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Columbia University.

Christopher Roy, Assistant Professor of Instruction, Department of Anthropology, College of Liberal Arts; PhD, Princeton University.

Eileen Ryan, Associate Professor, Department of History, College of Liberal Arts; PhD, Columbia University.

James Salazar, Associate Professor, Department of English, College of Liberal Arts; PhD, University of California Berkeley.

Michael W. Sances, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, Massachusetts Institute of Technology.

Rickie Sanders, Professor Emerita, Department of Geography and Urban Studies, College of Liberal Arts; PhD, The Ohio State University.

Viviane Sanfelice, Assistant Professor, Department of Economics, College of Liberal Arts; PhD, University of Rochester.

Sheryl Sawin, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, University of Rochester.

Danielle Scherer, Assistant Professor of Instruction, Department of Political Science, Global Studies Program, College of Liberal Arts; PhD, Temple University.

Kolson Schlosser, Associate Professor of Instruction, Department of Geography and Urban Studies, College of Liberal Arts; PhD, The Pennsylvania State University.

Joseph M. Schwartz, Professor Emeritus, Department of Political Science, College of Liberal Arts; PhD, Harvard University.

Ryan T. Sentner, Instructor, Department of Criminal Justice, College of Liberal Arts; MA, Rutgers University.

Sandra Sepulveda-Kozakowski, Assistant Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Delaware.

Mansi A. Shah, Associate Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Pittsburgh.

Jordan Shapiro, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Pacifica Graduate Institute.

Pamela J. Shapiro, Associate Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Temple University.

Jacob Shell, Associate Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Syracuse University.

Adam Joseph Shellhorse, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, University of California Berkeley.

Thomas F. Shipley, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Pennsylvania.

Pedro Silos, Associate Professor, Department of Economics, College of Liberal Arts; PhD, University of Iowa.

Daniel A. Silverman, Associate Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; JD, Temple University.

Bryant Simon, Laura H. Carnell Professor, Department of History, College of Liberal Arts; PhD, University of North Carolina at Chapel Hill.

Alan S. Singer, Professor Emeritus, Department of English, College of Liberal Arts; PhD, University of Washington.

Matthew Smetona, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.

Aaron X. Smith, Assistant Professor, Department of Africology and African American Studies, College of Liberal Arts; PhD, Temple University.

David V. Smith, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Duke University.

Sandra Wilson Smith, Associate Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, City University of New York.

Hillel David Soifer, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, Harvard University.

Miriam Solomon, Professor, Department of Philosophy, College of Liberal Arts; PhD, Harvard University.

John A. Sorrentino, Associate Professor, Department of Economics, College of Liberal Arts; PhD, Purdue University.

Laura Spagnoli, Professor of Instruction, Department of French, German, Italian and Slavic, College of Liberal Arts; PhD, University of Pennsylvania.

Howard Spodek, Professor Emeritus, Department of History, College of Liberal Arts; PhD, University of Chicago.

Gerald J. Stahler, Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Temple University.

Damien Stankiewicz, Associate Professor, Department of Anthropology, College of Liberal Arts; PhD, New York University.

Jessica Stanton, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, Columbia University.

Laurence D. Steinberg, Laura H. Carnell and Distinguished University Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Cornell University.

Mary Stricker, Professor of Instruction, Department of Sociology, College of Liberal Arts; PhD, Temple University.

Dorothy Stringer, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, University at Albany, State University of New York.

William J. Stull, Professor, Department of Economics, College of Liberal Arts; PhD, Massachusetts Institute of Technology.

Ames Sutton Hickey, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Michigan.

Sandra L. Suárez, Professor, Department of Political Science, College of Liberal Arts; PhD, Yale University.

Charles E. Swanson, Associate Professor, Department of Economics, College of Liberal Arts; PhD, University of Minnesota.

Michael D. Szekely, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.

Naomi Taback, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, University of California Los Angeles.

Benjamin Talton, Professor, Department of History, College of Liberal Arts; PhD, University of Chicago.

Ronald D. Taylor, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Michigan.

Rebecca Tesfai, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, University of Pennsylvania.

Kimberley Thomas, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, Rutgers University.

Wendy A. Thompson, Assistant Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; PhD, Temple University.

Barbara E. Thornbury, Professor, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; PhD, University of British Columbia.

Teshale Tibebe, Professor, Department of History, College of Liberal Arts; PhD, State University of New York at Binghamton.

Olga Timoshenko, Associate Professor, Department of Economics, College of Liberal Arts; PhD, Yale University.

Melissa Toomey, Assistant Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Miami University.

Luis Torres, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of Missouri-St. Louis.

Paul D. Toth, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, University of Pittsburgh.

- Tara N. Tripp*, Assistant Professor of Instruction, Department of Criminal Justice, College of Liberal Arts; MS, Saint Joseph's University.
- Kathleen S. Uno*, Associate Professor, Department of History, College of Liberal Arts; PhD, University of California Berkeley.
- J. Christopher Upton*, Assistant Professor, Department of Anthropology, College of Liberal Arts; PhD, Indiana University.
- Gregory J. W. Urwin*, Professor, Department of History, College of Liberal Arts; PhD, University of Notre Dame.
- Rani Vasudeva*, Assistant Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Drexel University.
- Jane Vaynman*, Assistant Professor, Department of Political Science, College of Liberal Arts; PhD, Harvard University.
- Lawrence Venuti*, Professor Emeritus, Department of English, College of Liberal Arts; PhD, Columbia University.
- Pablo S. Vila*, Professor, Department of Sociology, College of Liberal Arts; PhD, University of Texas at Austin.
- Wilson Vincent*, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Georgia State University.
- Gerald A. Vision*, Professor Emeritus, Department of Philosophy, College of Liberal Arts; PhD, University of Michigan.
- E. Rely Vilcicã*, Associate Professor, Department of Criminal Justice, College of Liberal Arts; PhD, Temple University.
- Thomas J. Waidzunas*, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, University of California San Diego.
- Shannon Walters*, Associate Professor, Department of English, College of Liberal Arts; PhD, The Pennsylvania State University.
- Jeffrey T. Ward*, Associate Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of Florida.
- Donald Wargo*, Associate Professor of Instruction, Department of Economics, College of Liberal Arts; PhD, Temple University.
- David Waxler*, Associate Professor of Instruction, Department of Psychology and Neuroscience, College of Liberal Arts; MS, Rutgers University.
- Ronald W. Webb*, Instructor, Department of Latin American Studies Program, College of Liberal Arts; PhD, The Pennsylvania State University.
- Douglas Webber*, Associate Professor, Department of Economics, College of Liberal Arts; PhD, Cornell University.
- Marsha A. Weinraub*, Professor Emerita, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Michigan.
- Robert W. Weisberg*, Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, Princeton University.
- Charles A. Weitz*, Professor, Department of Anthropology, College of Liberal Arts; PhD, The Pennsylvania State University.
- Timothy Welbeck*, Assistant Professor of Instruction, Department of Africology and African American Studies, College of Liberal Arts; JD, Villanova University.
- Susan Wells*, Professor Emerita, Department of English, College of Liberal Arts; PhD, University of Texas at Austin.
- Wayne N. Welsh*, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of California Irvine.
- Gabriel Wettach*, Professor of Instruction, Department of English, College of Liberal Arts; PhD, Purdue University.
- Sydney D. White*, Associate Professor, Department of Religion, College of Liberal Arts; PhD, University of California Berkeley.
- Catherine Wiley*, Associate Professor of Instruction, Department of English, College of Liberal Arts; PhD, Temple University.
- Kimberly D. Williams*, Associate Professor, Department of Anthropology, College of Liberal Arts; PhD, The Ohio State University.
- Lalain Williams*, Instructor, Department of Psychology and Neuroscience, College of Liberal Arts; MS, Capella University.
- Roland L. Williams Jr.*, Professor, Department of English, College of Liberal Arts; PhD, University of Pennsylvania.
- Mathieu E. Wimmer*, Assistant Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of Pennsylvania.
- Gregory Winch*, Assistant Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; PhD, Southern Illinois University.
- Brad Windhauser*, Professor of Instruction, Department of First Year Writing Program, College of Liberal Arts; MFA, Queens University of Charlotte.
- Steven Windisch*, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of Nebraska.
- Celeste M. Winston*, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; PhD, City University of New York.

Gordon Witty, Assistant Professor of Instruction, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; MA, University of Pennsylvania.

David Wolfsdorf, Professor, Department of Philosophy, College of Liberal Arts; PhD, University of Chicago.

Wendy H. Wong, Assistant Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, Temple University.

Jennifer D. Wood, Professor, Department of Criminal Justice, College of Liberal Arts; PhD, University of Toronto.

Alese Wooditch, Associate Professor, Department of Criminal Justice, College of Liberal Arts; PhD, George Mason University.

Matt Wray, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, University of California Berkeley.

Hongling Xie, Associate Professor, Department of Psychology and Neuroscience, College of Liberal Arts; PhD, University of North Carolina at Chapel Hill.

Sean Yom, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, Harvard University.

Reiko Yoshida, Instructor, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; MA, West Chester University.

Ralph F. Young, Professor of Instruction, Department of History, College of Liberal Arts; PhD, Michigan State University.

Amarat Zaatut, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; PhD, Rutgers University.

Janire Zalbidea, Assistant Professor, Department of Spanish and Portuguese, College of Liberal Arts; PhD, Georgetown University.

Lu Zhang, Associate Professor, Department of Sociology, College of Liberal Arts; PhD, Johns Hopkins University.

Shanyang Zhao, Professor, Department of Sociology, College of Liberal Arts; PhD, University of Maryland.

Yun Zhu, Associate Professor, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; PhD, University of South Carolina.

Rebekah Zhuraw, Associate Professor of Instruction, Department of Intellectual Heritage Program, College of Liberal Arts; PhD, University of Pennsylvania.

Adam Ziegfeld, Associate Professor, Department of Political Science, College of Liberal Arts; PhD, Massachusetts Institute of Technology.

Africology and African American Studies BA

Overview

Mission

Temple University's Department of Africology and African American Studies provides students with a textured intellectual experience through the systematic Afrocentric study of the thought, behavior and practices of African people globally. Inasmuch as our faculty and students pursue knowledge from the perspective of African people as both agents and subjects of experience, we also remain open to plural understandings emanating from the multicultural society in which we live, and the rapidly shrinking world beyond. Students engage in critical discourse about issues of race, ethnicity, gender, sexuality, class and culture across a great expanse of time and geographical space. Our classes interrogate African frames of reference, from the classical to the contemporary periods, tracing continuities and transformations from Africa to numerous diasporic communities worldwide.

We commit ourselves to the shaping and evolution of our discipline, and to positive change in our communities. Through enhanced mentoring and cooperative pedagogy, we cultivate the academic excellence, social responsibility and political engagement necessary for subsequent generations of scholars to carry this work into the future.

Curriculum

The curriculum for the **Bachelor of Arts in Africology and African American Studies** stresses the skills necessary to think critically, write clearly, argue persuasively and solve problems effectively. Students are exposed to theory and research in a variety of subject areas and are encouraged to engage in active research and service beyond the classroom.

Campus Location: Main

Program Code: LA-AAAS-BA

Career Opportunities

Our alumni have entered careers in primary and secondary education and administration, social work and administration, research design, law enforcement, city government, and have also worked with museums and other cultural and artistic institutions. Several Africology and African American

Studies alumni are active in local and national entertainment in roles that include music production, film making, acting and script writing. Many others have earned graduate degrees in a variety of areas, including Africology, law, the health-related professions such as medicine and nursing, public administration, and the social sciences, including political science, history, psychology, sociology and anthropology.

Awards and Honors

The department offers three internal awards for graduating seniors: two privately-sponsored awards for outstanding academic performance and one departmental award for outstanding service. The Department of Africology and African American Studies supervises the Temple in Ghana program, which allows students to study for six weeks during the summer at the University of Ghana in Accra.

Distinction in Major

Africology and African American Studies majors may graduate with distinction in the major if they have earned a GPA of 3.3.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The African American Studies major requires AAAS 2296 Introduction to Africology and AAAS 4096 Senior Seminar.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities or Natural/Mathematical Sciences. This includes the following departments in the College of Liberal Arts: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish as well as the Department of Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**

- All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (33 credits)

Code	Title	Credit Hours

Africology and African American Studies Minor

Overview

The **Minor in Africology and African American Studies** is offered by the Department of Africology and African American Studies. This department provides students with a textured intellectual experience through the systematic Afrocentric study of the thought, behavior and practices of African people globally.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements and Suggested Order of Completion

Code	Title	Credit Hours
Required Courses		
AAAS 2201	African Civilization	3
AAAS 2242	Afrocentricity	3
AAAS 2296	Introduction to Africology	3
Electives		
Select three (3) additional AAAS courses, two of which must be at or above the 2000 level. ¹		9
Total Credit Hours		18

1

Make these selections based on the content areas in which you desire greater familiarity (e.g., Africology and African American Studies in culture, literature, social issues, psychology, etc.). One of these two upper-level courses may be a related course outside the Africology and African American Studies department; however, students must seek written approval from the undergraduate director prior to enrolling in outside courses that they want to apply toward the Africology and African American Studies minor.

American Studies BA

Overview

The **Bachelor of Arts in American Studies**, offered by the American Studies Program, is a broad-based interdisciplinary program that explores the rich complexity of American culture and American lives. Courses in the major focus on national myths and everyday realities, race and ethnicity, work, technology, media and popular culture, architecture and city planning, and the production and consumption of art forms like photography, film, dance, and music. In American Studies, though, we do not treat these topics as discrete categories, but instead explore their relationships to each other. For instance, we look at ideas about race and class embedded in national symbols and ideas. Through a variety of courses and in a mix of different categories, American Studies provides students with a deep understanding of the many forces and ideas shaping America over a long sweep of time in any number of places, the East, the West, in the heartland, and at the borders.

The program also offers student internship opportunities and other hands-on kinds of learning at a variety of cultural institutions in Philadelphia and the Delaware Valley. American Studies courses are challenging and thought-provoking and many of them are cross-listed with the Temple University Honors Program. The major program stresses development of reading, writing and analytical skills that are necessary for successful careers in a range of professional fields.

American Studies majors go on to graduate school in the humanities and social sciences, law school, and medical school. They also may take jobs in schools, non-profit organizations, museums, libraries, business, social services, public relations, and the media.

Campus Location: Main

Program Code: LA-AMST-BA

Distinction in Major

American Studies majors may graduate with distinction in the major if they have a GPA of at least 3.5 in the major and a cumulative GPA of at least 3.0.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are: AMST 2098, and AMST 4097 (or AMST 4098 with permission).
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**

- The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (39 credits)

Code	Title	Credit Hours
Core Courses		
Must complete five courses, one from each group below:		
American Biography and Work		3
AMST 1042	Work in America	
American Culture		3
AMST 2011	The Arts in America	
AMST 2012	American Things: Introduction to Material Culture	
AMST 2022	Museums and American Culture	
AMST 2120/2900	Topics in American Culture ¹	
AMST 3011	Photography in America	
AMST 3012	Film and American Society	
Place in American Life		3
AMST 2001	Tourism in America	
AMST 2021	Philadelphia Neighborhoods	
AMST 2051/2951	American Places: Home, City, Region	
AMST 2120/2900	Topics in American Culture ¹	
AMST 3022	Architecture, Urban Design, and American Culture	
AMST 3051	American Frontiers	
AMST 3061	Media and American Popular Culture	
Diversity in America		3
Select one course in consultation with your advisor.		
Change in America		3
AMST 2031	Radicalism in the United States	
AMST 2041	Technology and American Culture	
AMST 2065	Global America	
AMST 2120/2900	Topics in American Culture ¹	
AMST 3031/3931	Political Protest and Culture in the '60s	
AMST 3032	Literature and Political Change	
AMST 3033	Courtroom in American Society	
AMST 3041	Contemporary Trends in the American Workplace	
AMST 3075	Literature of American Slavery	
Additional Courses		
Select three American Studies 2000-4999 Electives ²		9
Three American-Focused Electives from Related Disciplines, numbered 1000+. ³		9
Writing Intensive Courses		
AMST 2098	Reading Culture	3
AMST 4097	Senior Seminar in American Studies ⁴	3
or AMST 4098	Senior Independent Study	
Total Credit Hours		39

1

Specific subjects change each semester. See class schedule for information on a particular offering. AMST 2120 may meet one or more of the above requirements with permission of the director.

2

These can include choices from the American Studies core courses as well as choices from all other American Studies courses.

3

Students must take at least three courses outside of the major selected in consultation with the American Studies director and congruent with an American Studies focus. We recommend that at least 6 of these credits be in American history or literature.

4

Students must take the Senior Seminar in their final year of study (usually offered in Fall semester). Only in rare circumstances and with special permission can students satisfy the capstone by taking AMST 4098.

1

Choose this course with the American Studies Director.

2

Students must take AMST 4097 (usually offered in fall semester) in their final year of study. Only in rare circumstances and with special permission can students satisfy the capstone by taking AMST 4098.

American Studies Minor

Overview

The **Minor in American Studies** is offered by the American Studies Program, which is a broad-based interdisciplinary program that explores the rich complexity of American culture and American lives. Courses in the minor focus on national myths and everyday realities, race and ethnicity, work, technology, media and popular culture, architecture and city planning, and the production and consumption of art forms like photography, film, dance, and music. In American Studies, though, we do not treat these topics as discrete categories, but instead explore their relationships to each other. For instance, we look at ideas about race and class embedded in national symbols and ideas. Through a variety of courses and in a mix of different categories, American Studies provides students with a deep understanding of the many forces and ideas shaping America over a long sweep of time in any number of places, the East, the West, in the heartland, and at the borders.

An American Studies minor is particularly useful in journalism, business, education and those fields that are served by creating thinking that draw inspiration from more than one area.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Ancient Mediterranean Studies Minor

Overview

The **Minor in Ancient Mediterranean Studies** is offered by the Department of Greek and Roman Classics. Classics is an interdisciplinary field of study which encompasses multiple disciplines of the liberal arts: languages, history, literature, art and philosophy. Majors and minors in the Greek and Roman Classics department are encouraged to study a semester at Temple's Rome Campus.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Students are required to complete 18-20 credits, depending on language proficiency.

Code	Title	Credit Hours
Select two courses in Ancient Greek or two courses in Latin or demonstrate proficiency through placement testing. ¹		6-8
GRKA 1001	Ancient Greek 1	
GRKA 1002	Ancient Greek 2	
LAT 1001	Latin 1	
LAT 1002	Latin 2	
Select one of the following:		3
GRC 2011	Classical Greek and Roman Mythology	
GRC 3296		
GRC 3396		
Select two of the following: ²		6
GRC 3596	Ancient City: Periclean Athens	
GRC 3696	Ancient City: Hellenistic Alexandria	
GRC 3002	Ancient City: Augustan Rome	
or GRC 3796	Ancient City: Augustan Rome	
GRC 3003	Ancient City: Byzantium	
or GRC 3896		
GRC 3897	Ancient City: Jerusalem	
Greek & Roman Classic Elective - One additional course at or above 2000 ³		3
Total Credit Hours		18-20

¹
Students who demonstrate proficiency in Ancient Greek or Latin will need to take two additional courses. Students may opt to take either advanced courses in the language or additional electives. See faculty advisor for assistance in course selection.

²
Cycle of five cities offered: Jerusalem, Augustan Rome, Byzantium, Periclean Athens, Hellenistic Alexandria.

The elective can be from this department or from another department, such as Anthropology, Art History, Religion, History, or Philosophy, as approved by Greek & Roman Classics department advisors.

Anthropology BA

Overview

The **Bachelor of Arts in Anthropology** is offered by the Department of Anthropology. Anthropology is the study of human origins, development, and diversity. Anthropologists explore the ways in which people understand and adapt to living in a variety of settings, ranging from urban environments to rural villages, all over the world and across time. Anthropologists are interested in investigating such questions as: What does it mean to be human? What are the historical, social, political, economic, and environmental pressures that have helped shape the experiences of particular groups of people? How do human beings interact with the physical environment? Does the language that one speaks affect the ways in which one thinks and experiences the world?

The Anthropology major at Temple is organized according to two thematic areas of anthropology: "Evolution and Human Environments" and "Mobility and Global Inequality." These two areas allow us to offer students the tools they will need to work and thrive in an increasingly multicultural and multilingual globalized world. Laboratory facilities, internships, fieldwork, and experiential learning courses provide students with practical experiences.

The Anthropology major is intended to give students a foundation in the discipline of anthropology. Each thematic area of anthropology at Temple requires the development of a number of skills, including: formulating hypotheses; developing research programs and proposals; applying theories to the interpretation of artifacts and other data; and gathering ethnographic information through participant-observation. There is sufficient flexibility in the requirements for the Anthropology major so that a student with a specific interest can focus their program of study in that area—or not, if a more general program is of interest.

With its focus on human diversity and its emphasis on cultural relativism, the Anthropology major well prepares students for the issues they are likely to encounter in today's workplaces. At Temple we offer a number of courses on such topics as the Anthropology of Policy, Medical Anthropology, and Anthropology of the Family, which prepare students for careers in public administration, social work, health policy, and other aspects of public policy-related work, in addition to professional careers in fields such as business, law and medicine. Anthropology students are also well-prepared to participate in activities which call for cultural sensitivity and an understanding of cultural differences, such as the teaching of English as a foreign language and other work with immigrant communities or work in the global marketplace. A variety of courses on archaeology prepare students for careers in the field of cultural resources management and historic preservation.

Campus Location: Main

Program Code: LA-ANTH-BA

Distinction in Major

Anthropology majors may graduate with distinction in the major if they have earned a GPA of 3.5 or higher.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. All Anthropology majors take one writing-intensive methods course selected from: ANTH 3196, ANTH 3396, ANTH 3596, or ANTH 3796, and a capstone writing intensive course, ANTH 4097.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (33 credits)

Code	Title	Credit Hours
Required Gateway to the Major Courses		
ANTH 2001	Evolution and Human Environments	3
ANTH 2002	Mobility and Global Inequality	3
Methods Course		
Select one of the following:		
ANTH 3196	Methods in Environmental Archaeology	3
ANTH 3396	Fieldwork and Ethnographic Methods	3
ANTH 3596	Research Methods in Culture and Communication	3

ANTH 3796	Methods in the Study of Evolution	
Capstone Course		
ANTH 4097	Capstone in Mobility and Global Inequality	3
Anthropology Electives ^{1,2}		
Select seven electives numbered 1000-4999		21
Total Credit Hours		33

1

It is anticipated that at least six of the electives in Anthropology will be taken at the 2000 level or higher so as to double-count against the minimum requirement of 45 upper level credits to allow students maximum flexibility in their program.

2

Electives may not have been used to satisfy other requirements of the major.

Anthropology Electives: It is anticipated that at least six of the electives in Anthropology will be taken at the 2000 level or higher so as to double-count against the minimum requirement of 45 upper level credits to allow students maximum flexibility in their program.

Anthropology Minor

Overview

The **Minor in Anthropology**, offered by the Department of Anthropology, is designed for undergraduate students who want to learn about general anthropology, but cannot commit to a full academic major. Students in the Anthropology minor gain a well-rounded education and form writing and research skills, as well as a capacity to speak about human communities and social change in complex and informed ways, that help them stand out in the job market.

The Anthropology minor is not open to Anthropology majors.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
Fundamentals

ANTH 2002	Mobility and Global Inequality	3
Electives		
Select one elective in Anthropology numbered 1000+		3
Select three electives in Anthropology numbered 2000+		9
Total Credit Hours		18

Arabic Certificate

Overview

A **Certificate in Arabic**, offered by the Department of Asian and Middle Eastern Languages and Studies, focuses on acquiring language skills and developing a strong foundation for the effective use of Arabic socially and professionally. This program should be of particular interest to students considering careers in international business, government service, or other professions where foreign language proficiency is important. This program has two tracks: one for students who enter Temple University with little or no previous background in Arabic; and one for students who enter Temple University with a previous background in Arabic.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-ARBC-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Arabic.

Requirements

The curriculum consists of six developmentally-sequenced semesters of instruction in Arabic. Students with no background in Arabic will begin the six-course sequence with ARBC 1001 and will complete the certificate with a total of 20 credits. Students who enter the program with a placement above ARBC 1001 will need to complete the six-course requirement by taking either or both ARBC 4183 and ARBC 4283, and will complete the certificate with 18-19 credits. A grade of C- or higher must be earned in all required courses to qualify for the certificate.

Code	Title	Credit Hours
ARBC 1001	Arabic Elements I ¹	4
ARBC 1002	Arabic Elements II ¹	4
ARBC 2001	Arabic Intermediate I	3
ARBC 2002	Arabic Intermediate II	3
ARBC 3001	Arabic Advanced I	3
ARBC 3002	Arabic Advanced II	3
Total Credit Hours		20

¹

Students who place above ARBC 1001 will need to complete the six-course requirement by taking either or both ARBC 4183 and ARBC 4283.

Arabic Minor

Overview

The **Minor in Arabic**, which is offered by the Department of Asian and Middle Eastern Languages and Studies, emphasizes language study while also recognizing the importance of learning about areas of the world where Arabic is spoken through work in fields such as literature, history, anthropology and religion. This program will be of particular use to students interested in careers in education, business, government or other professions where Arabic language proficiency is important.

The minor requires a minimum of three Arabic language courses and three specified content courses. A minimum grade of C- must be earned in all courses used for the minor. Students who place out of one or more Arabic language courses must replace those requirements with electives approved by their Arabic faculty advisor.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
ARBC 2002	Arabic Intermediate II	3
ARBC 3001	Arabic Advanced I	3
ARBC 3002	Arabic Advanced II	3
Select two of the following: ¹		6
ARBC 2012	Modern Arabic Literature in Translation	
ARBC 2021	Contemporary Arab Society in Film (in Translation)	
ARBC 0868	World Society in Literature & Film	
Elective - Select in consultation with the Arabic faculty advisor.		3
Total Credit Hours		18

1

With advisor approval, one elective may be selected from other courses in Arabic or another department with an exclusive focus on Arabic culture, literature, and/or film.

Asian Business and Society Certificate

Overview

The **Certificate in Asian Business and Society** requires a minimum of 15 credits, but may require more if the Language requirement is not satisfied by examination of oral/aural and reading skills in any Asian language approved by the Asian Studies head advisor.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-ASBS-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

This certificate requires a minimum of 15 credits, but may require more if the Language requirement is not satisfied by examination of oral/aural and reading skills in any Asian language approved by the Asian Studies head advisor.

Code	Title	Credit Hours
Required Courses		
ASST 2001	Practical Asian Society and Culture	3
IB 2501 or ASST 2511	Fundamentals of Asian Business ¹ Introduction to Asian Business	3
Economics Course		
Select one of the following:		3
ECON 3563	International Trade	
ECON 3564	International Monetary Economics	
ECON 3596	Energy, Ecology, and Economy	
Asian Studies Country Elective		
See Academic Advising Center for list of approved electives. ²		3
Asian Studies Writing Intensive Elective		
See Academic Advising Center for list of approved courses. ²		3
Language		
Select one of the following (second semester): ³		4
HIN 1002	Hindi Elements II	
CHI 1002	Chinese Elements II	
JPNS 1002	Japanese Elements II	
KRN 1002	Korean Elements II	

1

IB 2501 and ASST 2511 are cross-listed.

2

The country of the Asian Studies Country Elective and the Asian Studies Writing-Intensive Elective must match the country of the language studied. For example, if the language requirement is met with Chinese, then courses on China must be chosen for both the Country and Writing-Intensive Electives.

3

The language requirement may also be satisfied by examination of speaking, listening and interpreting, and reading skills in any Asian language approved by the Asian Studies faculty advisor.

Asian Studies BA

Overview

The Department of Asian and Middle Eastern Languages and Studies offers majors in Asian Studies and Chinese, minors in Arabic, Asian Studies, Chinese, and Japanese, as well as certificates in Arabic, Chinese and Japanese. The department also offers instruction in Hebrew, Hindi and Korean. These programs are designed to provide the language skills and cultural knowledge needed for a number of professions and careers.

Every semester the department offers several courses on topics such as literature, film and culture that are taught in English and utilize translated materials. These courses provide rigorous academic training for those interested in pursuing graduate studies and professional degrees. The popular minor and certificate programs complement most majors at the university.

The **Bachelor of Arts in Asian Studies** prepares students for careers that require linguistic proficiency and cultural knowledge. Students are required to take at least four semesters of Chinese, Japanese or Korean. Language courses are incorporated into a program of study comprising required and elective Asia-focused content courses in several disciplines, such as literature, religion, history, political science, sociology and anthropology. Careers that require or benefit from Asia-related expertise include government, education and business. The Asian Studies degree also prepares students for graduate programs in the humanities and social sciences as well as for professional schools in areas such as law and business.

Asian Studies majors are strongly encouraged to spend a semester or academic year studying abroad in a university program that combines language classes with courses focusing on culture and history—and to participate in the daily life of the host country.

Students may not combine the Asian Studies major with any of the following curricula: minor in Chinese, minor in Japanese, and may not double-major with Global Studies Global Cultures track. Students may double-major in Asian Studies and either the Economic Development or the Security tracks in the Global Studies major.

Campus Location: Main and Japan

Program Code: LA-ASST-BA

Distinction in Major

Asian Studies majors may graduate with distinction in the major if they have a GPA of at least 3.5 in the major and a cumulative GPA of at least 3.0.

Study Abroad at Temple University Japan

Temple University's campus in Tokyo, Japan (TUJ) can provide students with experience abroad while taking their coursework. If you have an interest in studying at TUJ consult the Office of Education Abroad and Overseas Campuses and the TUJ web site.

Student Organization

The East West Club offers lectures, films, and career development programs, as well as fun and fellowship through extracurricular activities.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses that will fulfill this requirement are ASST 2196 and ASST 4096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.

- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - The language requirement of the Asian Studies major exceeds the minimum requirements of the College of Liberal Arts; no additional coursework is required.
 - **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (minimum 30 credits plus 12-14 credits of language study)

Code	Title	Credit Hours
Foundation Courses		
Select two of the following:		6
ASST 2501 or HIST 2501	Introduction to East Asia: China	
ASST 2502 or HIST 2502	Introduction to East Asia: Japan

Biomedical Anthropology Minor

Overview

The **Minor in Biomedical Anthropology** is offered by the Department of Anthropology.

Students considering medical school or study in other health professions might find the minor in Biomedical Anthropology of particular interest given the recent shifts in the Medical College Admission Test (MCAT) to evaluate the social and cultural competence of applicants. All students receive a foundation in Biological Anthropology and select electives according to their interests and professional goals.

The Biomedical Anthropology minor is not open to Anthropology majors.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Chinese BA

Overview

The **Bachelor of Arts in Chinese** is offered by the Department of Asian and Middle Eastern Languages and Studies. The department also offers programs leading to an undergraduate minor or certificate in Chinese. Our programs are designed to provide the language skills and cultural knowledge needed for a number of professions and careers.

Every semester the department offers several courses on topics such as literature, film and culture which are taught in English and utilize translated materials. These provide rigorous academic training for those interested in pursuing graduate studies and professional degrees. The popular minor and certificate programs complement most majors at the university, including Asian Studies and Global Studies.

Students who major in Chinese develop strong language skills along with an in-depth disciplinary knowledge acquired in courses on Chinese literature, film, and other aspects of China's culture and society. Those who begin their study of Chinese early in their university careers can attain a high level of proficiency in spoken and written Chinese by the time they graduate. A comprehensive array of content courses enables them to achieve the cultural knowledge and insights needed to engage in effective communication in Chinese speech communities.

All students majoring in Chinese are strongly encouraged to study for at least one semester abroad in an intensive language program to build their language skills while enriching their knowledge of Chinese culture. Other options for intensive language study that students have are university-based summer Chinese language programs (in China or the U.S.) and/or a full year of language study abroad.

The Bachelor of Arts in Chinese prepares students for post-graduation careers that require or benefit from China-related expertise in government, nongovernmental organizations and business. The degree also prepares students for graduate programs in the humanities and social sciences as well as for professional schools in areas like law and business.

Campus Location: Main

Program Code: LA-CHI-BA

Distinction in Major

Students who have achieved a 3.75 GPA in Chinese courses as well as in their cumulative average will have their transcript noted with "Distinction in Major".

 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Several of our larger departments have alternatives for their program; these alternative options may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - The requirements for the major in Chinese exceed the CLA minimum for this requirement.
 - **Notes on Foreign Language Study**

- The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in Chinese (30 credits)

The Chinese major is 10 courses/30 credits after the prerequisites of CHI 1001, CHI 1002, CHI 2001, and CHI 2002 (or equivalent in transfer or experience) with a minimum grade of C- or equivalent placement.

Course levels are incremental in skills and content. Language courses must be taken sequentially (Chinese culture, film, and literature courses taught in English can be taken concurrently with language courses).

Code	Title	Credit Hours
CHI 3001	Chinese Advanced I	3
CHI 3002	Chinese Advanced II	3

Chinese Certificate

Overview

A **Certificate in Chinese**, offered by the Department of Asian and Middle Eastern Languages and Studies, focuses on learning language skills and developing a strong foundation for the effective use of Chinese socially and professionally. This program should be of particular interest to students considering careers in international business, government service or other professions where foreign language proficiency is important. This program also contributes to meeting the diverse language needs of students with personal or academic interests in China and its culture.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-CHI-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Chinese.

Requirements

A grade of C- or higher must be earned in all required courses.

Code	Title	Credit Hours
CHI 1001	Chinese Elements I	4
CHI 1002	Chinese Elements II	4
CHI 2001	Chinese Intermediate I	3
CHI 2002	Chinese Intermediate II	3
CHI 3001	Chinese Advanced I	3
CHI 3002	Chinese Advanced II	3
Total Credit Hours		20

Chinese Minor

Overview

The **Minor in Chinese**, offered by the Department of Asian and Middle Eastern Languages and Studies, requires 6 courses: three Chinese-language courses and three China-focused content courses. Students who place out of CHI 2002, CHI 3001, and/or CHI 3002 may substitute Chinese electives. See the Department of Asian and Middle Eastern Languages and Studies for more information on placement and appropriate substitutions.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

The minor can only be taken as part of an undergraduate degree program. An average of 2.0 in all Chinese courses as well as a minimum grade of C- must be earned in all courses used for the minor. The specific courses required for this minor are listed below.

Code	Title	Credit Hours
Required Courses		
CHI 2002	Chinese Intermediate II	3
CHI 3001	Chinese Advanced I	3
CHI 3002	Chinese Advanced II	3
Electives		
Select two of the following:		6
ASST 3000	Special Topics in Asian Studies II	
ASST 3030	Special Topics III (focused on Chinese literature or film) ¹	
CHI 2011 or ASST 2014	Pre-Modern Chinese Literature	
CHI 2022	Contemporary Chinese Urban Film and Fiction in Translation	

or ASST 2022	Contemporary Chinese Urban Film and Fiction in Translation	
CHI 2112	Chinese Literature: From Classical to Contemporary	
or ASST 2112	Chinese Literature: From Classical to Contemporary	
CHI 3000	Chinese Special Topics I	
CHI 3031	Women in Chinese Literature	
or ASST 3031	Women in Chinese Literature	
Select one other elective ²		3
Total Credit Hours		18

1

ASST 3030 may only count if the content is focused exclusively on Chinese literature or film.

2

One elective from another CLA department may be approved by an advisor (the course must be focused exclusively on China).

Classical Languages and Literature Minor

Overview

The **Minor in Classical Languages and Literature** is offered by the Department of Greek and Roman Classics. Classics is an interdisciplinary field of study which encompasses multiple disciplines of the liberal arts: languages, history, literature, art and philosophy. Majors and minors in the Greek and Roman Classics department are encouraged to study a semester at Temple's Rome Campus.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Classics BA with Classical Civilizations Concentration

Overview

The **Bachelor of Arts in Classics** is offered by the Department of Greek and Roman Classics. Students **must select one of the following concentrations**:

- Classical Civilizations
- Classical Languages and Literature.

The Department also offers the minor in Ancient Mediterranean Studies and the minor in Classical Languages and Literature. Students in these programs study the cultures and languages of two major civilizations of the ancient Mediterranean world. Classics is an interdisciplinary field of study which encompasses multiple disciplines of the liberal arts: languages, history, literature, art and philosophy.

Campus Location: Main

Program Code: LA-CLAS-BA

Career Preparation

Classics offers a sound liberal arts background that prepares students for any career. Classics majors have held senior positions in government, law and public service organizations, have founded and headed companies and organizations, and have worked as correspondents and journalists. Recent Temple Classics majors have gone on to law school, veterinary school, graduate school, and business and teaching careers. To help prepare for careers, the Department of Greek and Roman Classics offers funding for internships that provide no remuneration.

Study Abroad

Classics majors and minors are encouraged to study a semester at Temple's Rome Campus. Majors are eligible to apply for funding for summer study in the Mediterranean through the Rudolph Masciantonio Traveling Summer Scholarship.

Undergraduate Associations

The organization for majors and minors is the Temple Classics Club, and there is a chapter of the national honorary society for Classics, Eta Sigma Phi, on campus.

Distinction in Major

Distinction in Major requires a senior thesis and a minimum GPA of 3.5 in Greek, Latin, or Greek and Roman Classics courses.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. See below for a list of the specific courses required for your major.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999).
- **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete the second level of a foreign language;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All students must complete one of the following options:
 - Third level of a foreign language;
 - Demonstrated proficiency in a foreign language;
 - A second General Education Global/World Society course;
 - Study Abroad at an approved program; or
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page.
- **General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

4+1 BA/MEd Accelerated Program for High School Latin Teachers (with the College of Education and Human Development)

The accelerated +1 program offers students following the concentration in Classical Languages and Literature in the College of Liberal Arts the exciting opportunity to complete their undergraduate degree and a Master of Education in Secondary Education with one year of study beyond the BA. Students take several graduate-level courses while still an undergraduate student. The MEd meets the Pennsylvania Department of Education's program requirements for Teacher Certification as a Latin teacher. See the College of Education and Human Development for more details.

Clinical and Health Psychology Minor

Overview

The **Minor in Clinical and Health Psychology**, offered by the Department of Psychology and Neuroscience, consists of 21 credits. The minor introduces students to the specialties in psychology that focus on understanding health and illness through the study of the interplay among psychology, biology and environment. This minor is designed for students who do not major in psychology but have interests in psychology, public health and other health-related careers (e.g., nursing, speech therapy). Pre-med students will find this minor helpful in preparing for the MCAT exam, which was modified to include psychology topics.

Students outside of the Psychology major may declare this minor. Psychology majors are **not** permitted to declare the Clinical and Health Psychology minor but are permitted to take its courses as electives in their major.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Seven courses are required.

Code	Title	Credit Hours
PSY 1001	Introduction to Psychology	3
PSY 1003	Statistics for Psychology	3
PSY 1004	Critical Thinking in Psychology	3
PSY 2201	Foundations of Psychopathology	3
PSY 2601	Foundations of Health Psychology ¹	3
Select two of the following advanced-level courses:		6
PSY 3600	Advanced Topics in Health Psychology	
PSY 3601	Social Health Psychology	
PSY 3602	Clinical Neuropsychology	
PSY 3603	Clinical Applications of Health Psychology	
PSY 3303	Psychological Testing: Measuring IQ, Thoughts, Feelings, and Attitudes	
PSY 3223	Child Psychopathology and Treatment	
PSY 3221	Clinical Psychology: Research and Practice	
PSY 3200	Topics: Clinical	
PSY 3561	Psychopharmacology	
PSY 3306	Neuroscience of Development and Aging	
Total Credit Hours		21

1

For students in the College of Public Health, SBS 2103 Health Psychology and Human Behavior (formerly HRPR 2103) may be used as a substitution for PSY 2601. All other students should take PSY 2601. Students may only receive credits for one of these two courses.

Cognitive Neuroscience Minor

Overview

Cognitive Neuroscience is an interdisciplinary field with a focus on a fundamental mystery of science: how the mind arises from the brain. The **Minor in Cognitive Neuroscience**, offered by the Department of Psychology and Neuroscience, will strengthen the academic record of students who plan

to apply for graduate programs. For example, in Psychology this minor will strengthen applicants' records for specializations such as Behavioral Neuroscience, Clinical Neuropsychology, Cognitive Psychology, or Psychophysiology. Students might also go into General Neuroscience or Cognitive Science. Pre-med students with a Cognitive Neuroscience minor would present distinctive profiles to medical school admissions offices.

Students in the College of Liberal Arts (including Psychology majors) as well as students in other colleges, schools, and departments may choose to minor in Cognitive Neuroscience. Only the following courses can be double-counted for the Psychology major and the Cognitive Neuroscience minor:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- PSY 1004 Critical Thinking in Psychology

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Creative Writing Minor

Overview

The **Minor in Creative Writing**, offered by the Department of English, is designed to draw both majors and non-majors who are interested in cultivating their creative writing in a structured, focused program. Student focus on either fiction or poetry in a core sequence of three creative writing courses as well as electives in other creative writing genres or literature.

Upon completion of the minor, students will have collected a portfolio of creative writing in multiple genres suitable for application to graduate programs, internship opportunities, or for publication in literary journals or as a manuscript.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
A. Workshop Sequence		
Complete three courses within one of the following genre sequences (poetry or fiction):		9
Poetry Sequence		
ENG 2003	Creative Writing: Poetry	
ENG 3003	Intermediate Poetry Writing	
ENG 3103	Advanced Poetry Workshop	
Fiction Sequence		
ENG 2004	Creative Writing: Fiction	
ENG 3004	Intermediate Fiction Workshop	
ENG 3104	Advanced Fiction Workshop	
B. Workshop in Second Genre		
Select one course in a genre other than your chosen sequence:		3
ENG 2003	Creative Writing: Poetry	
ENG 2004	Creative Writing: Fiction	
ENG 2005	Creative Writing: Plays	
ENG 2006	Non-Fiction Writing	
ENG 3003	Intermediate Poetry Writing	
ENG 3004	Intermediate Fiction Workshop	
ENG 3005	Advanced Creative Writing: Plays	
ENG 3401	Intermediate Writing: Non-Fiction	
C. Literature Course in Chosen Genre ¹		
Select one literature course in your chosen genre:		3
Poetry		
ENG 2511	Modern Poetry	
ENG 3511	Modern British and American Poetry	
ENG 3521	Contemporary Poetry	
Fiction		
ENG 2111	The Short Story	

ENG 2112	Children's Literature and Folklore
ENG 2113	Popular Fiction
ENG 2115	Young Adult Literature
ENG 2116	Disability and Literature
ENG 2512	The Modern Novel
ENG 2513	Modern Drama
ENG 2521	Contemporary Literature
ENG 3232	English Novel to 1832
ENG 3252	Victorian Novel
ENG 3261	Modern British Fiction
ENG 3331	Modern American Fiction
ENG 3332	Contemporary American Fiction
ENG 3513	Modern World Fiction
ENG 3522	Contemporary World Fiction in English
ENG 3523	Contemporary Drama
Variable; course genre will be designated each semester ²	
ENG 2206	The City in Literature
ENG 2714	Writing for the Arts
ENG 3101	Themes and Genres in Women's Literature
ENG 3241	English Romanticism
ENG 3321	American Romanticism
ENG 3322	American Realism and Naturalism
ENG 3411	Studies in African-American Literary Genre
ENG 3412	The Harlem Renaissance

D. Elective in Creative Writing or Literature

Select one elective from the following list of Creative Writing courses or an additional Literature course from list C above: 3

ENG 0826	Creative Acts
or ENG 0926	Honors Creative Acts
ENG 2005	Creative Writing: Plays
ENG 2006	Non-Fiction Writing
ENG 2022	Beyond the Field: Sports and Storytelling
ENG 3005	Advanced Creative Writing: Plays
ENG 3401	Intermediate Writing: Non-Fiction
ENG 3085	Career Internship (when the internship complements the minor)
ENG 3813	Writers at Work

An additional workshop (not previously taken) in fiction, poetry or playwriting from the Workshop in Second Genre requirement listed above.

Total Credit Hours

18

1

Additional courses may be substituted, pending approval of the director of undergraduate studies.

2

Genre designations for these courses are subject to change each semester. Check with the undergraduate advisor for specific genre designations prior to registering for these courses.

Criminal Justice BA

Overview

The **Bachelor of Arts in Criminal Justice** is offered by the Department of Criminal Justice. The mission of the Criminal Justice program is to foster a comprehensive understanding of the nature of crime and the effectiveness and fairness of society's efforts to prevent and control it. Students engage in a multi-disciplinary approach to the study of crime, offenders and victims, and the agencies, goals, laws, policies and processes of the criminal justice system. The Criminal Justice major emphasizes critical thinking about the kinds of questions and problems that shape developments in research, practice, policy and reform, and the skills utilized by scholars and professionals in the field.

Students majoring in Criminal Justice who pursue the Cybersecurity and Human Behavior certificate are permitted to count up to two Criminal Justice courses towards both programs.

Campus Location: Main

Program Code: LA-CJ-BA

Careers

Majoring in criminal justice helps to prepare students for careers as practitioners, researchers and academics in a variety of public and private sector professions in both adult and juvenile systems of justice, at the federal, state and local levels of government. Graduates obtain positions with many different public and private criminal justice-related agencies, including local, state and federal law enforcement; district attorney offices; public defender offices; juvenile and adult probation agencies; city, county and federal courts; crime victims advocacy agencies; organizations providing rehabilitation and reentry services; and social justice organizations.

Criminal Justice students learn the core liberal arts skills in oral and written communication, problem-solving, and critical thinking, also preparing them for career paths outside the traditional criminal justice occupations or for post-graduate education. Graduates move on to doctoral and master's degree programs in criminology and criminal justice, law school, social work, forensic psychology, business school, public policy, and a wide variety of other advanced degrees.

The department hosts an annual career fair every spring for Criminal Justice majors where representatives from over 40 local, state, federal, and private criminal and social justice related organizations gather to recruit Temple students for competitive internships and post-graduation careers.

Internship and Experiential Learning

Students are encouraged to enroll in our specialized internship program, earning 3 credits for CJ 4075 Criminal Justice Internship Seminar (which can be used toward the electives in the major) and 1–9 credits in CJ 4085 Criminal Justice Internship (which count towards the 123 credits required for graduation but may not be used to fulfill any requirements of the Criminal Justice major). This program runs in the Fall, Spring and Summer (over the two summer sessions). Interested students should contact the CJ advisor, Kimberly Campanese (kimberly.campanese@temple.edu), for more information.

Many other courses in the department include experiential learning components. CJ 2701 Inside-Out Prison Exchange is part of an award-winning national and international program that originated here at Temple University's Criminal Justice Department. Students travel weekly to a local prison where they take a class with a select group of inmates. In other classes, students often take field trips, hear from guest speakers, and engage in hands-on research and policy-relevant projects.

Criminal Justice 4+1 Accelerated BA/MA Program

High-achieving undergraduates will be invited by the faculty of the Criminal Justice Department to apply for the 4+1 BA/MA accelerated program. Students admitted to this program begin taking graduate courses, along with their undergraduate curriculum, in their last three undergraduate semesters. After completing their Bachelor of Arts degree, they then complete the remaining requirements of a Master of Arts in Criminal Justice in the 5th year. Twelve credits of graduate work may count for both the Bachelor's and Master's degree programs; these are used as Criminal Justice major electives in the undergraduate degree. Eligible students will have a minimum 3.5 overall GPA and will be able to complete their Bachelor's degree in three semesters by the time they are admitted to the 4+1 program in the spring of their Junior year. Students must have completed or be enrolled in the following courses to be considered for this program: CJ 1001, CJ 2401, CJ 2597 and CJ 2602.

Eligible students will receive notification at the end of their Sophomore year, and applications will be accepted until September 30th of their Junior year.

Student Organization

The Criminal Justice Society hosts speakers from a variety of criminal justice related organizations, hosts information sessions on applying to graduate school and law school, and performs voluntary community service projects both within and outside the Temple community. Membership is open to all students majoring or minoring in Criminal Justice. For more information, contact the Criminal Justice Society advisor, Cheryl Irons (cirons@temple.edu).

Distinction in Major

Criminal Justice majors may graduate with distinction in the major if they have earned a GPA of 3.5 in the major and a cumulative GPA of at least 3.25.

[Learn more about the Bachelor of Arts in Criminal Justice.](#)

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are CJ 2597 and CJ 4097.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the general course option for any CLA major and Criminal Justice offers CJ 1002 Professional Development in Criminal Justice. Several other departments have alternatives to these courses which may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)

- See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (36 credits)

Code	Title	Credit Hours
Specifically Required Courses		
CJ 1001	Introduction to Criminal Justice	3
CJ 2401	Nature of Crime	3
CJ 2501	Introduction to Criminal Law	3
CJ 2597	Criminal Justice Research Methods	3
CJ 2602	Criminal Justice Statistics	3
CJ 4097	CJ Capstone Seminar	3
Electives in Major ¹		
Select three Criminal Justice electives numbered 2000-4999		9
Select three Criminal Justice electives numbered 3000-4999		9
Total Credit Hours		36

1

A student may count CJ 4075 toward the Criminal Justice major electives. CJ 4085 does not count toward the major electives but up to 12 credits may count as free electives.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Criminal Justice Minor

Overview

The **Minor in Criminal Justice** is offered by the Department of Criminal Justice. The mission of the Criminal Justice program is to foster a comprehensive understanding of the nature of crime and the effectiveness and fairness of society's efforts to prevent and control it.

Students minoring in Criminal Justice who pursue the Cybersecurity and Human Behavior certificate are permitted to count one Criminal Justice course towards both programs.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Student Organization

The Criminal Justice Society hosts speakers from a variety of criminal justice related organizations, hosts information sessions on applying to graduate school and law school, and performs voluntary community service projects both within and outside the Temple community. Membership is open to all students majoring or minoring in Criminal Justice. For more information, contact the Criminal Justice Society advisor, Cheryl Irons, cirons@temple.edu.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
CJ 1001	Introduction to Criminal Justice	3
CJ 2401	Nature of Crime	3
CJ 2501	Introduction to Criminal Law	3
Two Criminal Justice courses numbered 2000-4999		6
One Criminal Justice course numbered 3000-4999		3
Total Credit Hours		18

Cybersecurity and Human Behavior Certificate

Overview

The five-course **Certificate in Cybersecurity and Human Behavior**, offered by the Department of Criminal Justice, focuses on the human and social elements of cyberattacks and cybersecurity. In addition to obtaining a broad understanding of cybercrime and cyber-investigations, students will learn how technology has impacted various other crimes, such as organized crime, terrorism, hate crimes and white-collar crime. Through the core and elective courses, students will be introduced to criminological concepts, such as theories of criminal behavior, organizational structures and group dynamics, decision-making and adaptation, and to law enforcement and legal responses to cyberattacks.

The certificate will emphasize experiential learning and the development of critical thinking, writing and oral communication skills, which will prepare students to be strong contributors to the cybersecurity discourse and community. Completing the certificate enhances student's candidacy for positions in cybersecurity by demonstrating understanding of the relevance of the human factor in cyberattacks and cybersecurity.

This program is open to any matriculated undergraduate students. Students majoring in Criminal Justice who pursue the Cybersecurity and Human Behavior certificate are permitted to count up to two Criminal Justice courses towards both programs. Students minoring in Criminal Justice who pursue the Cybersecurity and Human Behavior certificate are permitted to count one Criminal Justice course towards both programs.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Economics BA

Overview

The **Bachelor of Arts in Economics**, offered by the Department of Economics, exposes students to the economist's way of thinking about social problems and behavior. The major helps a student understand the economic aspect of current events and public policy and is excellent preparation for careers in law and business.

Campus Locations: Main and Japan

Program Code: LA-ECON-BA

Accelerated Degree Program

Students who wish to earn a BA and an MA in Economics may do so in a combined +1 accelerated program. Students begin graduate study during their undergraduate program and are able to count some electives towards both degrees. This program is only open to students who will complete both degrees in a total of five years or less. See the Economics faculty advisor if you are considering this option.

Honors Society and Majors' Association

The student honorary fraternity is Omicron Delta Epsilon. Along with the more general student organization, The Economics Society, it provides opportunities for students to network with other students and with practicing economists in learning more about economics and finding internships and employment opportunities.

Workplace Preparation

Students may participate in an internship, gaining valuable work experience which can enhance their job market prospects upon graduation. By completing an academic research project under the guidance of a faculty member, student interns may earn credit for ECON 2585.

Cooperative Education Option

Through this program, students may earn income while gaining valuable work experience which can enhance their job market prospects upon graduation. By completing an academic research project under the guidance of a faculty member, co-op students will earn credit for ECON 3581.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ECON 3598 and one of the following: ECON 3596, ECON 3597, ECON 3696, ECON 3697, or ECON 3698.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language, these are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honors society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (37 credits)

Code	Title	Credit Hours
Required Courses		
ECON 1101 or ECON 1901	Macroeconomic Principles ¹ Honors Macroeconomic Principles	3
ECON 1102 or ECON 1902	Microeconomic Principles ¹ Honors Microeconomic Principles	3
STAT 2103	Statistical Business Analytics	4
ECON 3501 or ECON 3701	Intermediate Microeconomic Analysis Intermediate Microeconomic Analysis with Calculus	3
ECON 3502 or ECON 3702	Intermediate Macroeconomic Analysis Intermediate Macroeconomic Analysis with Calculus	3
ECON 3503 or ECON 3703	Introduction to Econometrics Econometric Theory	3
ECON 3563 or ECON 3564	International Trade International Monetary Economics	3
Writing-intensive elective		
Select one of the following:		3
ECON 3596	Energy, Ecology, and Economy	
ECON 3597	Health Economics	
ECON 3696	Behavioral Economics	
ECON 3697	The Economics of Sports	
ECON 3698	Economic Inequality	
Capstone Course		
ECON 3598	Economics Writing Seminar	3
Major Electives		
Three electives in Economics at the 3000 level or above		9
Total Credit Hours		37

¹

These courses are prerequisites for most of the Economics 2000-3999 courses. Check specific course descriptions for details.

Note: Students preparing for graduate study in economics or in an economics-related area are strongly encouraged to take ECON 3701, ECON 3702, ECON 3703, and ECON 3504 as well as courses in calculus and linear algebra in the Mathematics department.

Economics Minor

Overview

The **Minor in Economics** is offered by the Department of Economics. Students are exposed to the economist's way of thinking about social problems and behavior.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Locations: Main and Japan

Contact Information

Main Campus

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Temple Japan Campus

Requirements

(For Liberal Arts and all other colleges allowing a minor in Economics)

Code	Title	Credit Hours
ECON 1101 or ECON 1901	Macroeconomic Principles Honors Macroeconomic Principles	3
ECON 1102 or ECON 1902	Microeconomic Principles Honors Microeconomic Principles	3
ECON 3501 or ECON 3502 or ECON 3701 or ECON 3702	Intermediate Microeconomic Analysis Intermediate Macroeconomic Analysis Intermediate Microeconomic Analysis with Calculus Intermediate Macroeconomic Analysis with Calculus	3

Three electives in Economics at the 3000-level or above ¹

9

Total Credit Hours**18**

1

If both ECON 3501 (or ECON 3701) and ECON 3502 (or ECON 3702) are taken, the second course counts as one of these electives.

English BA

Overview

The Department of English offers the Bachelor of Arts in English, the minor in English, and the minor in Creative Writing.

Powerful, persuasive writing, sharp analytic skills, and creative, flexible thinking are essential abilities for tomorrow's leaders and professionals. The **Bachelor of Arts in English** program cultivates these abilities through the study of the literatures, language and cultures of the United States, Britain, the English-speaking world and beyond. Our classes prepare students to engage the world knowledgeably and effectively so that they may go on to lead rich lives as professionals, members of their communities and global citizens.

Literature, the practice of writing and the analysis of language develop attentiveness and mental agility by presenting us with complex perspectives on social and artistic movements, historical events, cultural phenomena and communication patterns. A focus on English can not only lead to advanced study in English literature and other academic fields, but can also prepare students to enter arts and public administration, business, law and politics, where their skills stand to make a difference. English majors become critical and reflective readers, aware of the history and development of writing in English.

Students in English are also strong, inventive writers; able to analyze problems, do careful and innovative research, argue and evaluate the arguments of others. The emphasis on writing prepares English majors and minors for careers in publishing and journalism, public relations, business, industry, management, marketing, social services and government. English is a strong pre-professional major for medicine, library science and teaching, from the elementary to the post-secondary level.

Campus Location: Main

Program Code: LA-ENG-BA

Distinction in Major

Students need at least a 3.65 GPA in English courses to earn distinction in major.

Accelerated Programs

The 4+1 Accelerated BA in English/MA in English is open to Temple English majors and is designed to allow students to graduate with both a master's degree and a bachelor's degree in English within five years of matriculating at Temple University. The program is designed for high-achieving English majors who have excelled in the first three years of their undergraduate studies, and who seek out the credential of a master's degree as an aid in teaching, publishing or writing positions, or in acquiring a competitive edge in applying to PhD programs. Students apply during their junior year.

An additional opportunity is available to complete the Bachelor of Arts in English and either a Master of Education in Middle Grades Education or a Master of Education in Secondary Education with one year of study beyond the BA. Students take several graduate level courses while still an undergraduate student.

- BA in English/MEd in Middle Grades Education with a Concentration in Language Arts
- BA in English/MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BA in English/MEd in Secondary Education with a Concentration in English Education

Learn more about the Bachelor of Arts in English.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. For the English major, these courses are ENG 2096 and a 4000 level Capstone Seminar.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors or ENG 1801 Career Seminar would be an appropriate choice for this major. Several of our larger departments have alternatives for their program, these alternative options may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)

- See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Curriculum Overlap Policy: Students may combine the English major with the minor in Creative Writing but only two courses may be used for both programs of study.

Major Requirements (36 credits/12 courses)

Code	Title	Credit Hours
ENG 2096	Introduction to English	3
Two survey courses from the following:		6
ENG 2402	African-American Literature II	
ENG 2501	Introduction to British Writing	
ENG 2502	Introduction to American Writing	
ENG 2503	Introduction to Global Writing	
Two English 2000+ Electives		6
One English 3000+ course focused on pre-1900 literature		3
Five other English 3000+ Electives ¹		15
One English 4000+ course - Senior Capstone Course ²		3
Total Credit Hours		36

1

This total does not include the Pre-1900 course above.

2

Indicates writing capstone for the major.

No more than two of which are in writing (creative, technical, or business)

Environmental Studies BA

Overview

The Department of Geography and Urban Studies offers a Bachelor of Arts in Environmental Studies, a minor in Environmental Studies and a certificate in Geographic Information Systems (GIS). Many of our students choose to complete a double major, a minor in a complementary discipline, and/or the GIS certificate.

The **Bachelor of Arts in Environmental Studies** focuses on the department's four themes of globalization, sustainability, social justice and geographic methods that are increasingly central to understanding the serious environmental challenges we face. Environmental Studies students learn geographic theory and methods that examine the complexity of human-environmental interactions; the increasing interconnectedness of the global economy, environment, culture and politics; and the importance of place and context in people's daily lives.

Additionally, the Environmental Studies program introduces students to environmental processes, contemporary environmental issues and policies, geospatial technologies including Geographic Information Systems (GIS), and qualitative and quantitative social science research methods.

The Environmental Studies gateway courses are designed to develop the theoretical and methodological frameworks and tools necessary to understand the relationships between people and their environment as they interact through local and global connections. In required courses and electives, students examine environmental policy and the role of political institutions; the geography of natural resources; environmental decision-making; natural hazards and risk assessment; environmental ethics and legal issues; health and the environment; environmental justice; food access; etc. The electives give students the opportunity to develop an area of emphasis around their particular interests. Students focus on an individualized research project in

their Senior Research Seminar. Each student's program is developed with a departmental advisor to suit individual interests and is designed to maximize educational and career opportunities. We encourage Environmental Studies students to incorporate a semester abroad and/or an internship into their plan of study.

The objective of the Bachelor of Arts in Environmental Studies is to provide students with an understanding of:

- How space, place, and scale shape the interaction between environment and society;
- Critical thinking skills developed through examining a range of analytical approaches to investigate geographic, urban, and environmental processes;
- Contemporary explanatory frameworks in Geography and Urban Studies such as political ecology, feminist and poststructuralist theory, and development theory;
- The application of information technology skills to analyze spatial and temporal information, processes, and patterns through integrative research experiences;
- Practical considerations of community and environmental organizational settings at the local and regional scales.

The Environmental Studies major examines the nature, causes and consequences of human interactions with the environment. Students in Environmental Studies are equipped with the intellectual and methodological tools to understand and address the crucial environmental issues of our time: sustainability, health, climate change, food access, natural resource consumption, and environmental justice.

Themes

The department has identified several informal areas of concentration to assist students in making course selections. These do not constitute formal tracks but rather provide guidelines for developing a personalized curriculum. Students can focus on the following themes:

- Globalization
- Social Justice
- Urban Sustainability
- Geographic Methods

Campus Location: Main

Program Code: LA-ENST-BA

Distinction in Major

Environmental Studies majors may graduate with distinction in major with a 3.5 in Environmental Studies coursework and a 3.0 GPA overall.

Career Preparation

Environmental Studies graduates are especially competitive in the job market because of their technical and critical thinking skills, a sense of the complexity of interactions between humans and the environment, and their ability to synthesize information at a variety of scales. Students have the opportunity to gain technical skills in spatial statistics, Geographic Information Systems (GIS), cartographic production and design, and qualitative methods that are highly valued by employers. Our graduates find employment with nonprofits (domestic and international), planning or government agencies, consulting firms, and citizens' organizations. Many also go on to graduate programs in geography, planning, environmental studies, law and other fields. The Department of Labor expects that employment for geographers, planners and other geographic professions will grow at a rate of twenty percent or more for the next decade.

Double-Counting Across Curricula

Many students elect to take a combination of the Environmental Studies major or minor and the Geography and Urban Studies major or minor, as they are complementary programs.

The ONLY courses that can double-count between the Environmental Studies and the Geography and Urban Studies majors are: ENST 3161 Spatial Statistics/GUS 3161 Spatial Statistics; ENST 2097 Research Design in Environmental Studies/GUS 2197 Research Design in Geography and Urban Studies; ENST 3062 Fundamentals of Geographic Information Systems/GUS 3062 Fundamentals of Geographic Information Systems. When used for the major in either program, these courses may not be used to fulfill the minor elective requirements of the other program. Note: GUS 4198 Senior Seminar in Geography and Urban Studies and ENST 4198 Senior Research Seminar are NOT cross-listed seminars. Anyone pursuing a double major in Geography and Urban Studies and Environmental Studies must take both capstone courses.

Students are not permitted to combine a major or minor in Environmental Studies and a major or minor in Environmental Science in the College of Science and Technology.

Internships

We encourage students to apply their skills and knowledge in a credit-bearing internship that utilizes their academic training. Assignments at planning, social service, environmental and other agencies, as well as at firms that specialize in mapping and geographic data analysis, have helped in securing

employment opportunities after graduation. The internship is complemented by a seminar in which students reflect on their experiences. Contact Dr. Max Andrucki for more information on this opportunity.

Learn more about the Bachelor of Arts in Environmental Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ENST 2097 and ENST 4198.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:

- Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Select one of the following:		3
ENST 3061	Fundamentals of Cartography	
ENST 3063	Environmental Remote Sensing	
ENST 3064	Qualitative Methods	
ENST 3068	Environmental Impact Assessment	
ENST 4066	Environmental GIS	
Advanced Environmental Studies courses:		
ENST 3004	Geography of Natural Resources	3
ENST 4198	Senior Research Seminar	3
Electives		
Select three upper-level courses in ENST numbered 2003-4999. ¹		9
Select one ENST course numbered 0800-4999 ²		3
Select one course numbered 2003-4999 in ENST or from the approved electives list below.		3-4
Total Credit Hours		40-41

1

No electives may double-count between the Environmental Studies major and either the Geography & Urban Studies major or minor.

2

One General Education course taken in Environmental Studies may count towards the major.

Environmental Studies Approved (non-ENST) Electives List

Students may use one elective from the list below toward the Environmental Studies Major to fulfill the Approved Elective requirement. This requirement can also be fulfilled with any ENST elective numbered 2003+.

Note: Upper-level Science and Liberal Arts courses from this list can be used to satisfy the CLA 45 credit upper-level distribution requirement, but not all courses below are offered within the College of Liberal Arts or College of Science and Technology. Please consult with a CLA Academic Advisor.

Code	Title	Credit Hours
ANTH 2705	Introduction to Evolutionary Anthropology	4
ANTH 3774	Environmental Physiology and Health	3
BIOL 2227	Principles of Ecology	3
BIOL 3244	Experimental Marine Biology	4
BIOL 3245	Marine Ecology	4
BIOL 3316	Tropical Marine Biology	4
BIOL 3336	Freshwater Ecology	4
BIOL 4327	Biological Impacts of Global Climate Change	3

Total Credit Hours		123

Environmental Studies Minor

Overview

The **Minor in Environmental Studies** is offered by the Department of Geography and Urban Studies. The minor focuses on the department's four themes of globalization, sustainability, social justice and geographic methods that are increasingly central to understanding the serious environmental challenges we face.

The Environmental Studies minor examines the nature, causes, and consequences of human interactions with the environment. Students in Environmental Studies are equipped with the intellectual and methodological tools to understand and address the crucial environmental issues of our time: sustainability, health, climate change, food access, natural resource consumption, and environmental justice.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

The minor in Environmental Studies is 6 courses (minimum of 18 credits). Students are required to take one of the Gateway courses, either ENST 2001 or ENST 2002. Students also take 5 elective courses: one at any level and four at the upper level (2000+), which they can use to focus on their own particular interests.

Code	Title	Credit Hours
Gateway Course		
Select one of the following:		3-4
ENST 2001	Environment and Society	
ENST 2002	Physical Geography	
Electives ¹		
Select 5 courses as per the following criteria:		15
Select one Environmental Studies course - any level		
Select four upper level Environmental Studies courses		
Total Credit Hours		18-19

1

No electives may double-count between the Environmental Studies minor and either the Geography & Urban Studies major or minor.

Ethics Certificate

Overview

The 12-credit **Certificate in Ethics** is offered by the Department of Philosophy and is open to Temple undergraduate students in all majors. The Ethics certificate offers important training for those preparing for leadership positions in professional communities. Career options are regularly discussed in the Undergraduate Philosophy Club and featured on the Philosophy Department web site.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-ETHC-CERT

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
PHIL 2121 or PHIL 2921	Introduction to Ethical Theory Honors Introduction to Ethical Theory	3
Select two courses in applied/professional ethics from the following:		6
PHIL 2157	Environmental Ethics	
PHIL 3249 or PHIL 3949	Ethics in Medicine Honors Ethics in Medicine	
BA 1103 or BA 1903	Legal and Ethical Reasoning in Business Honors Legal and Ethical Reasoning in Business	
Any approved course in applied/professional ethics from across the University		
Select one of the following:		3
PHIL 3222	Contemporary Ethical Theory	
PHIL 3225	Good & Bad, Right & Wrong	
PHIL 3226	Classics in Moral Philosophy	
Another approved course in applied/professional ethics		
Total Credit Hours		12

French BA

Overview

The **Bachelor of Arts in French**, offered by the Department of French, German, Italian and Slavic, helps students develop skills in reading, writing and oral communication while providing them with a rich understanding of the literature, cinema, history and traditions of one or more Francophone cultures. In all classes, students focus on communication and communities, comparisons and connection, and culture. As they improve their linguistic skills and study various forms of cultural production from other nations, French majors also strengthen their ability to analyze and interpret in a way that contributes to their education above and beyond courses they take for the major. Through study at Temple, often enhanced by study abroad, French majors gain insight into their own identities and assumptions in relation to others. Majors complete the program with an ability to communicate, a grounding in literary tradition, and an awareness of cultural differences that has become increasingly important in the contemporary world.

The French major is a good preparation for a career that requires analytical thinking and communication skills in general, which includes the domains of education, business, government service, travel and tourism. It is a good major or second major for students planning to attend law or medical school. Studies have shown that learning a foreign language helps raise scores on the LSAT, GRE and MCAT exams. This course of study also proves valuable to anyone who plans to work for a multinational corporation.

The French courses are often small, allowing students to get to know each other and their professors well. The program helps prepare students enrolled in the College of Education and Human Development for careers teaching French and provides the opportunity to students enrolled in the Fox School of Business and Management to acquire a certificate in French with a special course on French in the business world.

Campus Location: Main

Program Code: LA-FREN-BA

Distinction in Major

To be considered for Distinction in Major, students must:

- Complete the requirements for the concentration in French with a GPA of at least 3.50;
- Be recommended to the chair of the department by the French faculty advisor after consultation with the French faculty;
- Have an overall GPA of at least 3.25.

Study Abroad

Students declaring a major or minor in the department are encouraged to study abroad. Temple University has a summer program at the Sorbonne in Paris. Credits earned through the Temple Sorbonne Program may be used toward the French major, minor, certificate and for satisfaction of the GenEd World Society requirement.

Accelerated Program

Students have the opportunity to pursue the following 4+1 program: BA in French/MEd in Secondary Education with a Concentration in World/Foreign Languages Education.

Learn more about the Bachelor of Arts in French.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are FREN 2096 and FREN 3096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - The requirements for the major in French exceed the CLA minimum for this requirement.
 - **Notes on Foreign Language Study**

- The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in French (30 credits)

Prerequisites: FREN 1001, FREN 1002, and FREN 1003 with a minimum grade of C or equivalent placement.

Course levels are incremental in skills and content. Courses must be taken sequentially or in some instances may be taken concurrently. Students who initially place beyond FREN 1003 may begin with FREN 2001 or a course beyond 2001, as appropriate.

Code	Title	Credit Hours
FREN 2001	Intermediate	3
FREN 2041	Reading I	3
FREN 2096	Composition I (WI)	3
FREN 3096	Composition II (WI)	3
FREN 3101	Survey of French Literature I	3
FREN 3102	Survey of French Literature II	3
Two French 4000-level courses		6
One French elective numbered 2002-4999		3
One French elective numbered 3000-4999		3
Total Credit Hours		30

French Certificate

Overview

The 20-credit **Certificate in French**, offered by the Department of French, German, Italian and Slavic, introduces undergraduates to the French language and Francophone cultures. As students progress through the various levels of language courses, they'll learn the fundamentals of grammar

and vocabulary, and will work to develop sophisticated conversational skills. These skills will allow students to speak, read and write confidently in French for the purposes of their professional or personal pursuits, in the U.S. and abroad.

Students declaring a major or minor in the department are encouraged to study abroad. Temple University has a summer program at the Sorbonne in Paris. Credits earned through the Temple Sorbonne Program may be used toward the French major, minor or certificate and for satisfaction of the GenEd World Society requirement.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-FREN-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Gender, Sexuality and Women's Studies BA

Overview

The Gender, Sexuality and Women's Studies Program within the College of Liberal Arts offers an undergraduate major, minor and certificate in Gender, Sexuality and Women's Studies (GSWS) as well as a minor in Lesbian, Gay, Bisexual and Transgender Studies. The program offers a cohesive framework of inquiry into gender and sexuality issues in the U.S. and around the world. The curriculum for the **Bachelor of Arts in Gender, Sexuality and Women's Studies** highlights the ways in which gender and sexuality relate to other social categories, such as race, class, disability, nationality and ethnicity. As an interdisciplinary field, Gender, Sexuality and Women's Studies takes into account social, historical, economic, political and cultural variables in its study of women's experience, the workings of gender as both an analytical category and identity, and the functioning of sexuality in social life. The field pays particular attention to inequality and discrimination based on gender, sexuality and gender identity. Gender, Sexuality and Women's Studies also seeks to transform traditional fields of study by incorporating new methodologies, data, theories and frameworks developed by feminist scholars.

The Gender, Sexuality and Women's Studies Program offers students an interdisciplinary curriculum taught by faculty from various departments and other schools and colleges across the university. Students learn to apply the methods and theories of social scientists, historians, philosophers, film and literary critics, and legal analysts to the study of women's experiences, as well as gender, sexuality and trans identities. They explore a growing body of feminist theories that revise our understanding of gender, society and culture.

Campus Location: Main

Program Code: LA-GSWS-BA

Special Programs

Gender, Sexuality and Women's Studies majors are required to take a Fieldwork course involving an internship which gives them the opportunity to get hands-on professional experience.

We encourage students to take advantage of university study abroad programs. Please contact the director for more information.

Accelerated Degree Programs

Gender, Sexuality and Women's Studies majors have several options for a 4+1 accelerated BA + master's degree program:

- BA in GSWS / MA in Sociology
- BA in GSWS / MEd in Advocacy and Organizational Development
- BA in GSWS / MEd in Urban Education
- BA in GSWS / MPP in Public Policy

For more information on these programs see the Accelerated Programs (p. 1792) section of this *Bulletin* as well as the program's web site.

Advising Policy

We encourage students to take Foundations in Women's Studies (GSWS 1301), Critical Race Feminist Theory (GSWS 2051), Feminist Theory (GSWS 3097) and Field Work (GSWS 4389) before taking the Research Seminar (GSWS 4396).

Double-Counting of Credits

Students combining a minor in Lesbian, Gay, Bisexual and Transgender Studies and a major, minor, or certificate in GSWS may double-count for both programs only Field Work (GSWS 4389 or LGBT 4489) and Queer Lives (GSWS 2405 or LGBT 2405).

Distinction in Major

Gender, Sexuality and Women's Studies students may graduate with a distinction in the major if they have a GPA of 3.5 or better in the major, a cumulative GPA of 3.0 or better, and successfully completed an honors thesis (minimum 3 credits) under the supervision of a faculty member from Gender, Sexuality and Women's Studies.

Awards

The Gender, Sexuality and Women's Studies Program has the following five annual undergraduate awards that honor academic and creative excellence in our students:

- Barbara Brownstein Prize
- Sonia Sanchez Scholarship
- Lucia Beck Weiss and Howard J. Weiss Prize
- Audre Lorde Prize
- Certificate of Excellence

Professional Development

After graduation, Gender, Sexuality and Women's Studies students enter professional schools in law, medicine and business; take graduate degrees in the humanities and social sciences; and pursue careers in health, counseling, teaching, public advocacy and many other fields.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GSWS 3097 or ENG 3097, and GSWS 4396.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.

- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Total Credit Hours**36**

1

The final requirement for the major is a two-course sequence. This sequence should be taken during the major's last three semesters of enrollment. Students will select a field assignment (internship) with the assistance of the advising coordinator. This sequence is designed for students to learn how to write a research paper.

Gender, Sexuality and Women's Studies Certificate

Overview

The 12-credit **Certificate in Gender, Sexuality and Women's Studies** (GSWS) explores the cultural, economic and political factors that form the daily experiences of women and queer communities. Through the curriculum, students will engage in critical studies of gender and sexuality and their intersection with ability, class, gender and race in the U.S. Students will deepen their critical and analytical thinking skills with rigorous reading and writing coursework, and study the central institutions of gender, including family, sexuality and love, the ideology of femininity, and more.

This certificate is designed for students whose major is outside the College of Liberal Arts who want to pursue a Gender, Sexuality and Women's Studies-oriented career.

Students combining a minor in Lesbian, Gay, Bisexual and Transgender (LGBT) Studies and a major, minor or certificate in GSWS may double-count for both programs only Field Work (GSWS 4389 or LGBT 4489) and Queer Lives (GSWS 2405 or LGBT 2405).

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-GSWS-CERT

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

GSWS 4389	Field Work	3
Two electives in Gender, Sexuality and Women's Studies ¹		6
Total Credit Hours		12

1

At least one of these two courses must be at the upper level.

Gender, Sexuality and Women's Studies Minor

Overview

The **Minor in Gender, Sexuality and Women's Studies** is housed within the Gender, Sexuality, and Women's Studies Program, which offers students an interdisciplinary curriculum taught by faculty from various departments and other schools and colleges across the university. Students learn to apply the methods and theories of social scientists, historians, philosophers, film and literary critics, and legal analysts to the study of women's experiences, as well as gender, sexuality and trans identities.

The Gender, Sexuality and Women's Studies minor can be taken by students in the College of Liberal Arts or by students in other colleges.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Double-Counting of Credits

Students combining a minor in Lesbian, Gay, Bisexual and Transgender Studies and a major, minor, or certificate in Gender, Sexuality and Women's Studies may double-count for both programs only Field Work (GSWS 4389 or LGBT 4489) and Queer Lives (GSWS 2405 or LGBT 2405).

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
GSWS 1301	Foundations in Women's Studies	3
Four electives in Gender, Sexuality and Women's Studies ¹		12
One elective selected from the Race & Diversity list ²		3
One elective from the Sexuality list ²		3
Total Credit Hours		21

1

At least two of the four electives must be taken at the upper level (GSWS 2000-4999).

2

For a list of the Sexuality and Race & Diversity electives, please go to the major requirements page (p. 1027) for the BA in Gender, Sexuality and Women's Studies. Other courses may be substituted with permission of the faculty advisor.

General Program AA

Overview

The **Associate in Arts in General Program** is awarded by the College of Liberal Arts and is available only at Temple University, Japan Campus. Students should check the Requirements tab for specific details or contact the TUJ Academic Advising Center.

Campus Location: Japan

Program Code: LA-GENP-AA

Contact Information

Johnathan McCaskill, JD, Major Coordinator
johnathan.mc.caskill@tuj.temple.edu

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Requirements

University and College of Liberal Arts (CLA) Requirements

- The Associate in Arts (AA) degree requires a minimum of 62 credits distributed according to University policy, with at least a 2.0 cumulative GPA.
- Students must complete the General Education (p. 83) curriculum.
- Students must maintain a GPA of 2.0 in all of CLA courses (please consult with the academic advisor for details).
- AA candidates must complete a minimum of 45 credit hours within CLA disciplines.
- AA candidates may count a maximum of 17 non-CLA credits toward the AA degree.
- A maximum of 9 credit hours of the preparatory course works (numbered 0700 - 0799) may be applied to the AA degree.

Program Requirements (minimum 12 credits, in addition to General Education and CLA requirements)

Code	Title	Credit Hours
Upper Level Humanities		
Select two upper level courses (numbered 2000 or higher) from the College of Liberal Arts. Please consult with the academic advisor for details.		6
Upper Level Social Science		
Select two upper level courses (numbered 2000 or higher) from the College of Liberal Arts. Consult with the academic advisor for details.		6
Writing Intensive		
The Associate of Arts degree candidates are required to complete at least one Writing Intensive course.		3

If one of the courses taken in the Humanities or Social Science requirements above is Writing Intensive, the course can also count toward this requirement.

Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

One of these CLA Upper Level Courses must be Writing Intensive (WI).

General Program BA

Overview

The **Bachelor of Arts in General Program** is awarded by the College of Liberal Arts and is available only at Temple University, Japan Campus. With the BA in General Program, students design an interdisciplinary major in the Humanities (art history, Chinese, English, Japanese, Korean, philosophy, religion) or the Social Sciences (American studies, Asian studies, economics, history, political science, psychology) in consultation with the major coordinator and the Academic Advising Center.

A General Program major allows students to benefit from all the academic fields available at the Japan campus and to create an area of study that embraces an intellectual theme, such as environmental and population control, human rights, war and peace, or moral and ethical responsibilities.

Campus Location: Japan

Program Code: LA-GENP-BA

Contact Information

Johnathan McCaskill, JD, Major Coordinator
johnathan.mc.caskill@tj.temple.edu

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements for the Degree

1. University and College of Liberal Arts (CLA) Requirements

- All Temple students must take a minimum of two writing-intensive courses as part of the major.
- Students must complete the General Education (p. 83) curriculum.
- Students must follow CLA requirements as specified in the CLA College Requirements (p. 940) section of the Undergraduate Bulletin.

2. Major Requirements (minimum 45 credits)

Code	Title	Credit Hours
Major Concentration ¹		
	Select five (5) courses in one discipline from either the Social Science or Humanities division within the College of Liberal Arts.	15
	At least three (3) of these five (5) courses must be upper level (2000+).	
	Consult with the academic advisor for details.	
	Major Concentration Course (upper level)	
	Major Concentration Course (upper level)	
	Major Concentration Course (upper level)	
	Major Concentration Course (any level)	
	Major Concentration Course (any level)	
Interdisciplinary Electives ¹		
	Select seven (7) courses from either the Social Science or Humanities division to which the Major Concentration belongs.	21
	Courses selected for this requirement area must be from at least (3) different disciplines, other than the Major Concentration, within the selected division.	
	Consult with the academic advisor for details.	
	Interdisciplinary Elective	
	Interdisciplinary Elective	
	Interdisciplinary Elective	
	Interdisciplinary Elective	
	Interdisciplinary Elective	
	Interdisciplinary Elective	
	Interdisciplinary Elective	
Opposite Division Electives		
	Select three (3) courses from the division opposite from the selected concentration.	9
	All three (3) courses selected for this requirement area must be upper level (2000+).	
	Consult with the academic advisor for details.	
	Opposite Division Elective (upper level)	
	Opposite Division Elective (upper level)	
	Opposite Division Elective (upper level)	

Total Credit Hours **45**

¹
Of the total twelve (12) courses selected for the Major Concentration and Interdisciplinary Electives requirements, at least seven (7) courses must be Upper Level including two (2) writing intensive.

Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

Geographic Information Systems Certificate

Overview

Geographic Information Systems (GIS) is a powerful analytical software tool that combines data and maps to solve complex problems at different scales. GIS is a rapidly growing field with applications in a wide range of fields and in public, private and governmental sectors of the economy. Areas that use GIS include health, social and natural sciences, planning, government, engineering, design, communications and business, among others. GIS skills are increasingly in demand by employers and, according to the Department of Labor, the industry has a high annual growth rate of 35 percent.

The four-course **Certificate in Geographic Information Systems**, offered by the Department of Geography and Urban Studies (GUS), teaches advanced location science and technology that meet the increased demand for well-trained professional practitioners. Our courses introduce students to a variety of cutting-edge spatial analysis technology and mapping software to identify, analyze and visualize spatial data patterns. GUS faculty have expertise in a range of GIS applications, including urban analytics, health, environment, business, location analysis, geovisualization, and remote sensing.

This certificate is open to undergraduate students in all majors at Temple University. Students majoring in Geography and Urban Studies or Environmental Studies may also complete the GIS certificate.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-GIS-CERT

guses@temple.edu

Learn more about the undergraduate certificate in Geographic Information Systems.

Requirements

The curriculum consists of two required courses, GUS 3161/ENST 3161 and GUS 3062/ENST 3062, and two electives from the array below. GUS and Environmental Studies majors need only two electives from the approved list below that are unique to the certificate (they cannot double-count with the major requirements).

Code	Title	Credit Hours
Required Courses		
GUS/ENST 3161	Spatial Statistics	3
GUS/ENST 3062	Fundamentals of Geographic Information Systems	3
Electives		
Select two of the following: ¹		6
GUS/ENST 3061	Fundamentals of Cartography	
GUS/ENST 3063	Environmental Remote Sensing	
GUS 3067	GIS and Location Analysis	
GUS/ENST 3069	GIS for Health Data Analysis	
GUS/ENST 4061	Cartographic Production	
GUS/ENST 4065	Urban Geographic Information Systems	
ENST 4066	Environmental GIS	
Total Credit Hours		12

1

Alternatives are acceptable with the approval of the GUS/ENST advisor.

Geography and Urban Studies BA

Overview

The Department of Geography and Urban Studies offers a Bachelor of Arts in Geography and Urban Studies, a minor in Geography and Urban Studies, and a certificate in Geographic Information Systems (GIS). Many of our students choose to complete a double major, a minor in a complementary discipline, or the GIS certificate.

The **Bachelor of Arts in Geography and Urban Studies** combines the discipline of geography with the field of urban studies to offer a program that emphasizes geographic theory and methods to the study of urban and regional processes and problems in the U.S. and international settings. Geography and Urban Studies graduates are equipped with the intellectual and methodological tools necessary to understand and address a wide range of environmental, economic, social and political challenges that are central to the well-being of billions of people in an increasingly connected and urbanizing world.

The major focuses on the four themes of globalization, sustainability, social justice and geographic methods that are increasingly central to understanding and addressing global challenges. Geography and Urban Studies majors learn geographic theory and methods that examine the complexity of human-environmental interactions; the increasing interconnectedness of the global economy, environment, culture and politics; and the importance of place and context in people's daily lives.

The Geography and Urban Studies major introduces students to urban processes, spatial relations, geospatial technologies including GIS, and qualitative and quantitative social science research methods. In required courses and electives, students examine urban issues; the role of political institutions; policy-making; and human interactions with the environment. The Geography and Urban Studies gateway courses are designed to develop the theoretical and methodological frameworks and tools necessary to understand the relationships among people, places and the environment as they interact through local and global connections. The electives give students the opportunity to develop an area of emphasis around their particular interests. Students focus on an individualized research project in their Senior Research Seminar. Each student's program is developed with a departmental advisor to suit individual interests and is designed to maximize educational and career opportunities. We encourage Geography and Urban Studies students to incorporate a semester abroad and/or an internship into their plan of study.

The objective of the Bachelor of Arts program in Geography and Urban Studies is to provide students with an understanding of:

- How space, place, and scale shape the interaction between environment and society;
- Critical thinking skills developed through examining a range of analytical approaches to investigate geographic, urban, and environmental processes;
- Contemporary explanatory frameworks in Geography and Urban Studies such as political ecology, feminist and poststructuralist theory, and development theory;
- The application of information technology skills to analyze spatial and temporal information, processes, and patterns through integrative research experiences;
- Practical considerations of community and environmental organizational settings at the local and regional scales.

Campus Location: Main

Program Code: LA-GUS-BA

Distinction in Major

Geography and Urban Studies students can graduate with distinction if they have, at the time of graduation, a 3.5 GPA in the major and a 3.0 cumulative GPA.

Career Preparation

Geography and Urban Studies graduates are especially competitive in the job market because of their technical and critical thinking skills, a sense of the complexity of interactions between humans and the environment, and their ability to synthesize information at a variety of scales. Students have the opportunity to gain technical skills in spatial statistics, Geographic Information Systems (GIS), cartographic production and design, and qualitative methods that are highly valued by employers. Our graduates find employment with nonprofits (domestic and international), planning or government agencies, consulting firms and citizens' organizations. Many also go on to graduate programs in geography, planning, environmental studies, law and other fields. The Department of Labor estimates that employment for geographers, planners and other geographic professions is expected to grow at a rate of twenty percent or more for the next decade.

Double-Counting Across Curricula Policy

Many students elect to take a combination of the Geography and Urban Studies major or minor and the Environmental Studies major or minor as they are complementary programs, but there are limits in terms of which courses may count for the two curricula.

The ONLY courses that can double-count between the Geography and Urban Studies and Environmental Studies majors are: GUS 3161 Spatial Statistics/ENST 3161 Spatial Statistics; GUS 2197 Research Design in Geography and Urban Studies/ENST 2097 Research Design in Environmental Studies; GUS 3062 Fundamentals of Geographic Information Systems/ENST 3062 Fundamentals of Geographic Information Systems. When used for the major in either program, these courses may not be used to fulfill the minor elective requirements of the other program.

Note that GUS 4198 Senior Seminar in Geography and Urban Studies and ENST 4198 Senior Research Seminar are NOT cross-listed seminars. Anyone pursuing a double major in Geography and Urban Studies and Environmental Studies must take both capstone courses.

Internships

We encourage students to apply their skills and knowledge in a credit-bearing internship that utilizes their academic training. Assignments at planning, social service, environmental and other agencies, as well as at firms that specialize in mapping and geographic data analysis, have helped our graduates in securing employment opportunities. The internship is complemented by a seminar in which students discuss their experiences. Contact Max Andrucki (max.andrucki@temple.edu) for more information on this opportunity.

Accelerated Programs

Undergraduate Geography and Urban Studies students have an opportunity to graduate with both a bachelor's degree and a master's degree within five years in one of the following accelerated programs.

- BA in Geography and Urban Studies + Master of Arts in Geography and Urban Studies: The Master of Arts in Geography and Urban Studies is an innovative, 36-credit program. Our curriculum focuses heavily on the themes of social justice, sustainability, globalization and geographic methods. Graduates go on to pursue further graduate study as well as professional positions related to urban and economic development, environmental sustainability and social justice at the local and international scale.
- BA in Geography and Urban Studies + Professional Science Master's in Geographic Information Systems: The PSM in GIS program combines advanced training in GIS core skills with professional development and business ethics to prepare students to enter the GIS workforce. Students learn in-demand technical skills and are introduced to a wide array of software and analytical problems, making them versatile problem solvers and critical thinkers.
- BA in Geography and Urban Studies + Master of Education in Secondary Education: The Master of Education (MEd) in Secondary Education program focuses on the needs and subject areas of today's secondary school students. This graduate program prepares students to teach grades 7 through 12 in their chosen content area such as English, Mathematics, Science, Social Studies or World Languages.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GUS 2197 and GUS 4198.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Geography and Urban Studies Minor

Overview

The 18-credit **Minor in Geography and Urban Studies**, offered by the Department of Geography and Urban Studies, is open to students in all majors. The minor focuses on the four themes of globalization, sustainability, social justice and geographic methods that are increasingly central to understanding and addressing global challenges.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Students are required to take one of the Gateway courses, either GUS 2001 or GUS 2002. Students also take 5 elective courses: one at any level and four at the upper level 2000+, which they can use to focus on their own particular interests.

Code	Title	Credit Hours

¹

No electives may double-count between the Geography & Urban Studies minor and the Environmental Studies major or minor.

²

One cognate course can substitute for an elective with written permission from the faculty advisor.

German Certificate

Overview

The 20-credit **Certificate in German**, offered by the Department of French, German, Italian and Slavic, provides students the experience and interpersonal skills required to engage in complex, cross-cultural situations. Required coursework emphasizes aural, pronunciation and oral drills, as well as grammar. The program is tailored to help students achieve their learning goals, whether they want to engage in business with German partners, work in government agencies or in media, or pursue relevant graduate studies.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

German Language and Cultural Studies BA

Overview

German is a major world language spoken in Germany, Austria and Switzerland, as well as in some communities in the United States. Whether you are interested in literature, music, theater, film or art, German culture is a rich and exciting tradition. Temple's German program provides broad linguistic, cultural, and practical experiences to prepare students to participate meaningfully in the German-speaking world.

The Department of French, German, Italian and Slavic offers two different programs of study in German:

- a traditional German Language and Cultural Studies major (and minor), and
- an Interdisciplinary German Studies major (and minor).

The traditional **Bachelor of Arts in German Language and Cultural Studies** focuses on the acquisition of German language and develops that skill through courses taught completely in German from the intermediate level onward. The Bachelor of Arts in Interdisciplinary German Studies includes introductory and intermediate level German, but allows up to two electives on German culture and history to be taken outside of German (allowing for the language of instruction to be English). This allows students more flexibility in course selection and although language acquisition is important, the study of German culture is emphasized. Either program of study will help students achieve their learning goals, whether they want to go on to use German to communicate with friends in Germany, Austria or Switzerland; to engage in business with German partners; to work in government or in the media; or to participate in German culture. They develop skills in reading, writing, and oral communication while acquiring a rich understanding of the literature, cinema, history and culture of the German-speaking world.

Students who study German at Temple find that the program prepares them to do well in whatever they choose upon graduation. The German major is a good preparation for a career that requires analytical thinking and communication skills in general, which includes the domains of education, business, government service, travel and tourism. It is a good major or second major for students planning to attend law school or medical school. Studies have shown that learning a foreign language helps raise scores on the LSAT, GRE and MCAT examinations. This course of study also proves valuable to anyone who plans to work for a multinational corporation.

The German courses are often small, allowing students to get to know one another and their professors well. The program helps prepare students enrolled in the Fox School of Business and Management to acquire a special language certificate including a special course on German in the business world. Outside of class, students can share conversations and activities informally or with the Temple University German Society.

Campus Location: Main

Program Code: BA-GLCS-BA

Study Abroad

Students declaring a major or minor in the department are strongly encouraged to study abroad. Temple University has programs at the universities of Hamburg, Tübingen, and Leipzig in Germany. Courses completed in these programs may be credited toward the German major or minor and in partial satisfaction of the CLA Global Studies requirement.

Students interested in Study Abroad should discuss their plans with the faculty advisor in German early in their academic program.

Distinction in Major

To be considered for Distinction in the German Language and Cultural Studies Major, students must:

- Complete the requirements for the concentration in German with a GPA of at least 3.50;
- Have an overall GPA of at least 3.25;
- Be recommended to the chair of the department by the German faculty advisor after consultation with the German department faculty.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GER 3096 and GER 4296.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.

- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - The language requirements of the German major exceed the minimum College of Liberal Arts requirements; no additional coursework is necessary for this requirement.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in German (30 credits/10 Courses)

Prerequisites: GER 1001 and GER 1002, with a minimum grade of C- or equivalent placement.

Course levels are incremental in skills and content. Courses must be taken sequentially or in some instances may be taken concurrently. Students who initially place beyond GER 2001 may begin with GER 2002 or another course at the 2000-level, as appropriate. Consult the faculty advisor for information.

Code	Title	Credit Hours

Select one from:		3
GER 3201	Culture and Civilization I	
GER 3202	Culture and Civilization II	
Total Credit Hours		19

1

Students who place out of GER 1002 will replace this with a 3 credit elective and will meet the requirement for the minor with 18 credits.

Note: Up to two upper-level courses outside of the department will count as electives if they relate to the major and are approved by the faculty advisor in German.

Global Studies BA

Overview

Now more than ever, global knowledge, language abilities and international experience are crucial for students preparing to enter a global workforce. The **Bachelor of Arts in Global Studies**, which is administered by the Global Studies Program, prepares students for just that by combining bedrock instruction in multiple disciplines with foreign language instruction, regional enrichment and specialization in one of three thematic areas: global security, global economy, or global cultures. The Global Studies major goes beyond work done in other majors by exposing students to interdisciplinary perspectives on the world. Students gain advanced knowledge about international cultures and perspectives as well as essential skills like critical thinking and effective communication that are prized by every professional industry.

A BA in Global Studies prepares students to

- **Understand complex global problems** using tools from multiple disciplines, including economic analysis, social science and historical methods;
- **Communicate ideas about global issues effectively** through written work, oral expression and digital communication tools;
- **Look beyond local and national boundaries** to see themselves as part of a global network, the sustainability of which requires ethical and moral forthrightness;
- **Experience other cultures** by studying a world language and participating in a regional enrichment experience such as study abroad; and
- **Thrive professionally** in a variety of careers in an increasingly global marketplace.

Curriculum

The Global Studies curriculum offers a foundation through a set of four introductory courses, as well as specialization in one of three concentrations. Students **must select one of the following concentrations**:

- Global Security
- Global Economy
- Global Cultures

The introductory courses prepare students for the concentrations by studying alternative disciplinary and problem-based approaches to global studies. Within this general framework, the three concentrations allow students to identify a specialized program of study drawing from a structured set of concentration-specific requirements and electives, culminating in a research-based and writing-intensive capstone seminar. Each concentration offers many elective options and new courses are added each semester. Students are encouraged to work with their advisor to select the best options for their intended career path.

To develop a world perspective, students in Global Studies take two full years (through 4th semester) of a foreign language and either participate in an approved study abroad program or take additional area studies courses. Students work with their advisor and the Education Abroad office to identify the best fit with their language skills, disciplinary interests, career plans and financial capabilities.

Campus Location: Main

Program Code: LA-GBST-BA

Distinction in Major

Global Studies majors will receive Distinction in the Major if they have earned an overall GPA of 3.5 or higher and a GPA of at least 3.5 in the courses required for the major (excluding the language requirement).

Career Potential

Global Studies is not a major with a limiting, predefined career destination. Today, a large and growing number of careers can and do feature international or global components. Students with a degree in Global Studies thrive in a variety of industries, including local and national government, advocacy, policy development, the business sector and diplomacy. Foreign language proficiency and study abroad experience also make Global Studies graduates attractive job candidates in a variety of industries, including business, civil service, government, education, law, trade and policy.

This major is an obvious choice for students aiming specifically for an international career in government, business, or the non-profit sector, and its interdisciplinary and multidisciplinary nature provides an appropriate foundation for work or graduate study in any field affected by global change.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GBST 2197 and GBST 4096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement are listed on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - Global Studies majors are required to complete the fourth level of a foreign language, which exceeds the CLA minimum requirement. No additional coursework is required. The fourth level of language is numbered 2001 in French, German, Spanish, and Portuguese and in all other foreign language subjects, it is numbered 2002.
 - **Notes on Foreign Language Study**
 - The third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

LAS 2361	Peoples of Latin America
SOC 2163	Area Studies: Latin American Development
POLS 2231	Comparative Political Systems in Latin America
Foreign Language	
Fourth-semester proficiency in one foreign language	0-16 credits
Total Credit Hours	36-58

Global Security Concentration (6 courses)

The quest for security, and the seemingly endless recurrence of interstate war are fundamental features of an anarchical world of sovereign states. Historically, this led students of security to focus on state power, military strategy, geopolitics, diplomacy and conflict in the international arena. In the 21st century, interstate wars have been joined by both increasingly destructive civil wars within countries, and by international and global terrorism perpetrated by non-state actors. In this concentration, students will draw on disciplines as diverse as history, political science, anthropology, geography and criminal justice to understand the causes of war, the security strategies of states, and the rise of new and challenging security threats in the 21st century.

Code	Title	Credit Hours
Global Security Concentration Requirements		
Select three of the following:		9
CJ 3405	Terrorism, Transnational Crime and Global Security	
ENST 3055	Environmental Hazards and Disasters	
HIST 2304	20th Century Europe: A Continent in Crisis	
POLS 2311	Post-Cold War Security	

Note: Courses taken for this requirement may not count as Global Security electives below.

Global Security Electives

Select three of the following:

9

ANTH 3337	Anthropology of War and Conflict
ANTH 3366	Violence: An Anthropological Approach
CJ 3403	Organized Crime
CJ 3405	Terrorism, Transnational Crime and Global Security
GUS 3055	Environmental Hazards and Disasters

POLS 2341	U.S. Foreign Policy
POLS 3332	Globalization: Politics and Political Economy ¹

1

These courses require prerequisites beyond those covered in the Global Studies Foundation courses; students wishing to take these courses should plan accordingly.

Global Economy Concentration (6 courses)

Economic globalization is one of the defining features of the contemporary world. This concentration introduces students to fundamental features of the global economy from multiple disciplinary perspectives, including in the areas of trade, finance, and development. It studies the origins and consequences of globalization for development and growth, income and poverty, literacy and health, as well as political, demographic, environmental, and cultural changes. Students examine the evolution of cooperation among states in managing the global economy, and the role of history, politics, and technology in shaping international, national, and local relations.

Code	Title	Credit Hours
------	-------	--------------

Global Economy Concentration Requirements

Select three of the following:

9

ECON 2061	Foundations of Macroeconomic Development
ECON 3062	Economics of Global Poverty
GUS 2031	Geography of the Global Economy
SOC 3221	Global Development

Note: Courses taken for this requirement may not count as Global Economy electives below.

Global Economy Electives

Select three of the following:

9

ANTH 3327	Globalization and Localization
ECON 3547	Economics of Development and Growth
ECON 3563	International Trade
ECON 3564	International Monetary Economics
GUS 2032	Urban Systems in a Global Economy

GUS 2073	African Development
GUS 3021	International Urbanization
GUS 3073	Geography of Travel and Tourism
HIST 3811	World Economy Since 1945
POLS 2201	Comparative Politics: Developing Nations
POLS 2321	Politics of the Global Economy
POLS 3332	Globalization: Politics and Political Economy
SOC 3219	Understanding Globalization

Global Cultures Concentration (6 courses)

The Global Cultures concentration studies cultural formation, cultural change, and cultural interaction among peoples across the world. "Culture" is defined as learned systems of values, beliefs, and practices that bind a group of people together and give common meaning to their lived experiences. These groups can be local, regional, national or international; they are shaped by various structures of power and are continuously migrating. Students in the Global Cultures concentration will examine the interaction of global and local cultures and study aspects of cultural circulation, transaction, and mobility through courses in Literature, Film, Religion, History, Anthropology, and Sociology.

Code	Title	Credit Hours

1

Students are encouraged to study abroad, but if not possible, can replace with the area studies requirements as noted in this grid.

Global Studies Minor

Overview

Students interested in enhancing their degree program with a firm grounding in the understanding of globalization and its impact on national and international security, the globalized economy, and global cultures may opt to declare a **Minor in Global Studies**, which is administered by the

Global Studies Program. The minor includes the primary features of the major coursework, without the requirements for foreign language and regional enrichment.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Health Research Certificate

Overview

The **Certificate in Health Research**, offered by the Department of Anthropology, is an 18-credit program that allows students to explore the ways in which healthcare impacts the development, structure and functioning of human society. In addition to building a foundational knowledge of health and its role in society, students will hone their analytical research and critical thinking skills through advanced data analysis and methodology courses.

This certificate is open to undergraduate students, except for Sociology majors.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-HLRE-CERT

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Health Research.

Requirements

The Certificate in Health Research requires five courses, including a health-related sequence and research methods.

Code	Title	Credit Hours
Required Courses		
SOC 2552	Health and Disease in American Society	3
SOC 3201	Statistical Methods in Sociology ¹	4
SOC 3261	Research Design and Methods ¹	4
Required Advanced Methods Course		

Select one from:		4
SOC 4001	Qualitative Research ²	
SOC 4002	Data Analysis ²	
Health-related Courses		
Select one of the following:		3
SOC 2522	Sociology of the Self	
SOC 2530	Selected Topics in Medical Sociology	
SOC 2572	Sex & Society	
SOC 3511	Environmental Sociology: The End of the World as We Know It?	
SOC 3525	Urban Health	
SOC 3530	Selected Topics in Medical Sociology	
SOC 3559	Health and Reproduction	
SOC 3565	Sociology of the Body	
SOC 3575	Population Studies	
SOC 3582	Independent Study in Medical Sociology	

Total Credit Hours **18**

1

Students must take SOC 3201 prior to, or concurrently with, SOC 3261.

2

Students must complete SOC 3201 and SOC 3261 before taking either of the advanced methods courses, SOC 4001 or SOC 4002.

History BA

Overview

Using rigorous standards of evidence, historians tell meaningful stories about the past. In-depth historical study gives students important tools for understanding contemporary issues affecting their own lives as well as local, national and global events. The **Bachelor of Arts in History**, offered by the Department of History, enables students to develop skills useful for any career that requires high-level critical thinking, wide-ranging analytical skills and great writing. Our students learn to master large amounts of information, conduct in-depth research, contextualize evidence from a variety of sources, and craft powerful written and oral arguments. These strengths are a foundation not only for successful careers but for lifelong learning and civic engagement.

Our home, Philadelphia, is a terrific place to study history—not only of the city and its remarkable past, but of the world as well. Our courses take advantage of Philly's exciting past and our major allows students to take advantage of the many study abroad options available at Temple.

The History major requires twelve courses (36 credits). Students must take two introductory level courses selected from American and World history surveys. Students may opt to take two survey courses from either area or one from each. These should be taken as early as possible, preferably in the freshman year. The three-course sequence in research methods and writing should be taken in the following order: HIST 2001 The Historian's Craft, then HIST 3096 Intermediate Writing Seminar, culminating in the senior level course, HIST 4096 Capstone Seminar in History in which students develop a research and writing project on the topic of their choice.

Students must select two "American" and two "non-American" History courses. This requirement can be fulfilled with a combination of the required survey courses and the upper-level electives. (Note: HIST 2001, HIST 3096 and HIST 4096 may not be used for this requirement.)

In addition, students in this major have a high degree of freedom, selecting seven upper-level electives in history (numbered 2000+). Our majors take rigorous courses in subjects such as Dissent in America, The History of Nazi Germany, the History of Philadelphia, Immigration and the American Dream, and Cold War Africa. We have faculty experts in urban history, African history, Asian history, military history, gender history, diplomacy, imperialism, the environment and many other fields.

Campus Location: Main

Program Code: LA-HIST-BA

Undergraduate Honors and Distinction in Major

There are two ways to enhance your history degree by achieving honors within the major:

- Participate in the History Honors Thesis Program
- Become a member of *Phi Alpha Theta*, the National History Honors Society.

Students in the [History Honors Thesis Program](#) research and write an original history thesis. All students who have a 3.4 cumulative and history averages are eligible to apply by contacting the History Honors Thesis Program Advisor, Eileen Ryan (eileen.ryan@temple.edu). Note that this program is separate from the University Honors Program and is designed to complement that experience.

In addition to meeting the major requirements, students who successfully complete HIST 4934 Honors Historiography and Research Methods (3 credits, History major elective) and HIST 4997 Honors Thesis Seminar (3 credits, taken in lieu of HIST 4096) are eligible to graduate with distinction in major.

Phi Alpha Theta, the National History Honors Society, is open to both history majors and non-majors who have completed at least 12 credits in history and achieved a history GPA of 3.25 and a cumulative GPA of 3.10. Participation in *Phi Alpha Theta* is separate from the History Honors Thesis Program and the University Honors Program. For more information, contact the Phi Alpha Theta advisor, Katya Motyl (katherina.motyl@temple.edu).

Special Organizations

Both majors and minors participate in the Temple Undergraduate History and Social Sciences Association (TUHSSA).

Accelerated Program

The BA in History / MEd in Secondary Education with a concentration in Social Studies Education is an accelerated program, administered through the College of Education and Human Development, which allows students to earn a Master in Education one year after receiving their undergraduate History degree.

Career Potential

Our students have interned at organizations like the American Philosophical Society, the Constitution Center, the Historical Society of Pennsylvania, and the McNeil Center for Early American Studies. Philadelphia's rich museum heritage provides abundant opportunities for students to pursue their interests.

Graduates have gone on to successful careers, including:

- Educator,
- Layer,
- Filmmaker,
- Military officer,
- Database administrator,
- Public health professional,
- Diplomat,
- Public policy expert,
- Museum curator, and
- Historian.

Associated Research Centers

- Center for Public History
- Center for the Study of Force and Diplomacy
- Feinsein Center for American Jewish History

Learn more about the Bachelor of Arts in History.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - History is designated as a "social science" major in the College of Liberal Arts.
 - **Distribution Requirement:** Social Science majors must take 6 upper level credits (numbered 2000-4999) in Humanities subject areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. History majors may select either HIST 1012 Professional Development for History Majors or CLA 1002 Professional Development for Liberal Arts Majors. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (36 credits/12 courses in history)

Code	Title	Credit Hours
------	-------	--------------

Select a minimum of 12 courses in History, distributed as follows:

Select two Introductory Level courses from: ¹

HIST 1101	U.S. History to 1877	
HIST 1102	U.S. History since 1877	
HIST 1701	World History Ancient	
HIST 1702	World History Modern	
Select 7 electives in History numbered 2000-4999 ¹		21
HIST 2001	The Historian's Craft	3
HIST 3096	Intermediate Writing Seminar	3
HIST 4096	Capstone Seminar in History	3
Total Credit Hours		36

1

From the introductory and elective courses, two courses must be taken in American History and two courses in non-American history.

---------------------------	------------

1

All students must take a minimum of two courses focused on American history and two courses that are non-American history. These can be taken from the introductory course options or the history electives (but not HIST 2001, HIST 3096, or HIST 4096).

History Minor

Overview

The Minor in History, offered by the Department of History, is an ideal complement to other majors and programs at Temple—from medicine to journalism, from computer science to finance, from film to marketing.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Students are required to take six courses for a total of 18 credits. Students take two introductory courses from the list below, HIST 2001 The Historian's Craft, and any three courses in History numbered 2000-4999.

Code	Title	Credit Hours
Select two introductory courses from:		6
HIST 1101	U.S. History to 1877	
HIST 1102	U.S. History since 1877	
HIST 1701	World History Ancient	
HIST 1702	World History Modern	
Students may substitute one History course 2000+ for one of the introductory courses		
HIST 2001	The Historian's Craft	3
History electives numbered 2000+		9
Total Credit Hours		18

Interdisciplinary German Studies BA

Overview

German is a major world language spoken in Germany, Austria and Switzerland, as well as in some communities in the United States. Whether you are interested in literature, music, theater, film or art, German culture is a rich and exciting tradition. Temple's German program provides broad linguistic, cultural, and practical experiences to prepare students to participate meaningfully in the German-speaking world.

The Department of French, German, Italian and Slavic offers two different programs of study in German:

- a traditional German Language and Cultural Studies major (and minor), and
- an Interdisciplinary German Studies major (and minor).

The traditional Bachelor of Arts in German Language and Cultural Studies focuses on the acquisition of German language and develops that skill through courses taught completely in German from the intermediate level onward. The **Bachelor of Arts in Interdisciplinary German Studies** includes introductory and intermediate level German, but allows up to two electives on German culture and history to be taken outside of German (allowing for the language of instruction to be English). This allows students more flexibility in course selection and although language acquisition is important, the study of German culture is emphasized. Either program of study will help students achieve their learning goals, whether they want to go on to use German to communicate with friends in Germany, Austria or Switzerland; to engage in business with German partners; to work in government or in the media; or to participate in German culture. They develop skills in reading, writing, and oral communication while acquiring a rich understanding of the literature, cinema, history and culture of the German-speaking world.

Students who study German at Temple find that the program prepares them to do well in whatever they choose upon graduation. The German major is a good preparation for a career that requires analytical thinking and communication skills in general, which includes the domains of education, business, government service, travel and tourism. It is a good major or second major for students planning to attend law school or medical school. Studies have shown that learning a foreign language helps raise scores on the LSAT, GRE and MCAT examinations. This course of study also proves valuable to anyone who plans to work for a multinational corporation.

The German courses are often small, allowing students to get to know one another and their professors well. The program helps prepare students enrolled in the Fox School of Business and Management to acquire a special language certificate including a special course on German in the business world. Outside of class, students can share conversations and activities informally or with the Temple University German Society.

Campus Location: Main

Program Code: BA-IGS-BA

Study Abroad

Students declaring a major or minor in the department are strongly encouraged to study abroad. Temple University has programs at the universities of Hamburg, Tübingen, and Leipzig in Germany. Courses completed in these programs may be credited toward the German major or minor and in partial satisfaction of the CLA Global Studies requirement.

Students interested in Study Abroad should discuss their plans with the faculty advisor in German early in their academic program.

Distinction in Major

To be considered for Distinction in the Interdisciplinary German Studies Major, students must:

- Complete the requirements for the concentration in German with a GPA of at least 3.50;
- Have an overall GPA of at least 3.25;
- Be recommended to the chair of the department by the German faculty advisor after consultation with the German department faculty.

Learn more about the Bachelor of Arts in Interdisciplinary German Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GER 3096 and GER 4296 .
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**

- The language requirements of the German major exceed the minimum College of Liberal Arts requirements; no additional coursework is necessary for this requirement.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in German (30 credits/10 Courses)

Prerequisites: GER 1001 and GER 1002 , with a minimum grade of C- or equivalent placement.

Course levels are incremental in skills and content. Courses must be taken sequentially or in some instances may be taken concurrently. Students who initially place beyond GER 2001 may begin with GER 2001 or speak to a faculty advisor about placement.

Code	Title	Credit Hours
GER 2001	Intermediate I	3
GER 2002	Intermediate II	3
GER 3096	Composition I	3
GER 4296	Composition II	3
Two elective courses numbered 2000 or higher must be taken in the German Department (German must be the language of instruction).		6
Four elective courses numbered 2000 or higher. English may be the language of instruction in all four of these electives; at least two of these must be taken in the German Department. Two courses may be taken in other disciplines with written approval of the German faculty advisor.		12
Total Credit Hours		30

Interdisciplinary German Studies Minor

Overview

The **Minor in Interdisciplinary German Studies** is offered by the Department of French, German, Italian and Slavic. The minor includes introductory and intermediate level German, but allows up to two electives on German culture and history to be taken outside of German (allowing for the language of instruction to be English). This allows students more flexibility in course selection and although language acquisition is important, the study of German culture is emphasized.

Students declaring a major or minor in the department are strongly encouraged to study abroad. Temple University has programs at the universities of Hamburg, Tübingen, and Leipzig in Germany. Courses completed in these programs may be credited toward the German major or minor and in partial satisfaction of the CLA Global Studies requirement.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Students may select only one of the following programs of study: German Language and Cultural Studies major; German Language and Cultural Studies minor; Interdisciplinary German Studies major; Interdisciplinary German Studies minor.

Campus Location: Main

International Affairs BA

Overview

The **Bachelor of Arts in International Affairs (IA)** is offered by the College of Liberal Arts' Department of Political Science and is available only at Temple University, Japan Campus. IA is an interdisciplinary and multidisciplinary subject which covers political science, geography, economics and history. It explores international cooperation and conflict, poverty and development, the nature and causes of war, nationalism and social change, and other issues. Focusing especially upon Japan and its place in Asia and the world, it requires students to study regions besides East Asia (Japan, China, Korea) and the United States. Students must undertake an internship and study an East Asian language.

Campus Location: Japan

Program Code: LA-IA-BA

International Business Studies BS

Overview

The **Bachelor of Science in International Business Studies** (IBS) is offered by the College of Liberal Arts' Department of Economics and is available only at Temple University, Japan Campus (TUJ). This program will prepare students for a challenging career anywhere in the world.

The IBS program was developed in response to the contemporary global need for personnel with the knowledge and skills to work in the international arena. The curriculum encompasses a general knowledge of cultures, economies and societies, the business knowledge required to succeed in a variety of careers, and the language abilities to work across borders. The program challenges students to integrate international business with language studies, an understanding of world affairs and hands-on internship experience. Students develop the global mindset that multinational firms need in the 21st century.

IBS students work on teams with people of similar backgrounds and with those who are often quite different in how they approach life and their studies. TUJ encourages students not only to be multilingual, but also to understand how to navigate across cultures and borders. The IBS program teaches them to think critically, form a well-reasoned opinion, and then capably express that opinion. This is accomplished through class participation, visits to local businesses, and by bringing savvy international business people in the classroom. With those tools, TUJ graduates move confidently into the world of international business and launch productive, fulfilling and viable global careers.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements for the Degree

1. University and College of Liberal Arts (CLA) Requirements

- All Temple students must take a minimum of two writing-intensive courses as part of the major.
- Students must complete the General Education (p. 83) curriculum.
- Students must follow CLA requirements as specified in the CLA College Requirements (p. 940) section of the Undergraduate Bulletin.

2. Major Requirements (Minimum 76 credits, in addition to a fourth semester level foreign language requirement)

Code	Title	Credit Hours
General IBS Core / Non-Business Courses		
MATH 1021	College Algebra	4
MATH 1031	Differential and Integral Calculus	4
MATH 2031	Probability and Statistics	3
ECON 1101	Macroeconomic Principles	3
ECON 1102	Microeconomic Principles	3
ECON 3563	International Trade	3
or ECON 3564	International Monetary Economics	
ECON 3538	Managerial Economics	3
ENG 2007	Writing for Business and Industry	3
CLA 2030	Special Topics in Liberal Arts III (Technology in International Business)	3
Political Science 2000 or higher level	elective (consult with the Academic Advisor and/or the Major Coordinator)	3
POLS 2321	Politics of the Global Economy (consult with the academic advisor for pre-requisite)	3
ASST 2511	Introduction to Asian Business	3
ECON 3581	Co-op Experience in Economics (Internship)	3
CLA 2020	Special Topics in Liberal Arts II (International Career Strategies)	2
Lower Division Business Courses		
ACCT 2101	Financial Accounting	3
ACCT 2102	Managerial Accounting	3

MKTG 2101	Marketing Management	3
IBS Major Courses		
Select two of the following:		6
JIBS 3101	Introduction to Global Finance	
JIBS 3102	Global Operations and Supply Chain Management	
JIBS 3501	Marketing in a Global Environment	
IBS Major Courses Writing Intensive and Capstone		
JIBS 4197	Global Business Overview	3
JIBS 4596	International Business Capstone	3
College of Liberal Arts (CLA) or College of Science and Technology (CST)		
Select three of any CLA/CST courses at 2000+ level or higher		9
Fourth-semester proficiency in one foreign language		
Select one of the following, or consult with the Academic Advisor and/or the Major Coordinator:		3-4
CHI 2002	Chinese Intermediate II	
JPNS 2702	TUJ - Japanese Intermediate II	
or JPNS 2002	Intermediate Japanese II	
KRN 2002	Korean Intermediate II	

Language Proficiency Requirement: The language requirement may be satisfied by coursework or proficiency in the language for heritage speakers. The assessment tests listening, speaking, and reading comprehension as well as written communications in foreign languages approved by the International Business Studies major coordinator. Students who demonstrate proficiency beyond the fourth semester are not required to replace this with an International Business Studies approved elective.

MATH 1021: The MATH 1021 requirement may be satisfied by coursework (taken at Temple or transfer course) or the Placement Assessment. Students who are exempted from MATH 1021 by the Placement Assessment are not required to replace this with an International Business Studies approved elective.

Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

This course satisfies the GenEd Quantitative Literacy requirement.

2

Through a consultation with an academic advisor or the major coordinator.

Italian BA

Overview

Apart from being the number one study abroad destination among university students, Italy's importance in the corporate world and its complimentary pairing with humanities studies make Italian the fourth most studied foreign language in the United States.

Temple University students have two options for taking a degree in Italian, offered through the Department of French, German, Italian and Slavic: a traditional **Bachelor of Arts in Italian** that focuses on learning Italian language through the advanced level, or a Bachelor of Arts in Italian Studies that focuses on learning Italian language through the intermediate level and includes more major electives in Italian culture but taught in English or Italian. Both majors are interdisciplinary programs of study that, in addition to being built on requirements of language proficiency and core knowledge of Italian literary history, places strong emphasis on cultural, global and national identity studies. An additional learning goal for students of Italian is to demonstrate understanding and appreciation of cultural perspectives and practices in the Italian-speaking world. The program's methodology is based on a communicative approach coupled with technology-based student engagement practice to enhance the students' language retention, level of competency, and proficiency, as well as to provide a window into Italian culture. The transferable communication and critical thinking skills acquired by the program prove invaluable to employers of liberal arts graduates.

Campus Location: Main

Program Code: LA-ITAL-BA

Distinction in Major

To be considered for Distinction in Major in Italian, students must:

- Complete the requirements for the concentration in Italian with a GPA of at least 3.50;
- Have an overall GPA of at least 3.25;
- Be recommended to the chair of the department by the Italian faculty advisor.

Study Abroad

Students declaring a major in Italian are encouraged to study abroad. Temple has its own campus in Rome, Italy, which offers courses in a variety of fields, including language, art, art history, architecture and international business. Students interested in studying in Italy should discuss their plans with the Italian faculty advisor as early as possible.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ITAL 3096, and either ITAL 2096 or ITAL 4096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
 - **Professional Development Requirement**

- All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - The requirements of the Italian major exceed the minimum requirements of the College of Liberal Arts; no additional coursework is required.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (30 credits)

Code	Title	Credit Hours

Italian Certificate

Overview

In the 20-credit **Certificate in Italian**, offered by the Department of French, German, Italian and Slavic, students learn to effectively communicate in Italian with confidence and cultivate their writing, reading and listening skills. Apart from being the number one study abroad destination among university students, Italy's importance in the corporate world and its complimentary pairing with humanities studies make Italian the fourth most studied foreign language in the United States.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-ITAL-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Italian.

Requirements

Six courses beginning with ITAL 1001 and including ITAL 2501.

Students who place out of any course will need additional electives.

Code	Title	Credit Hours
ITAL 1001	Italian Language I	4
ITAL 1002	Italian Language II	4

ITAL 2002	Intermediate Italian II	3
ITAL 2501	Italian for Business	3
Select one Italian Elective numbered 2000+		3
Total Credit Hours		20

All courses must be taught in Italian.

Italian Minor

Overview

The **Minor in Italian**, offered by the Department of French, German, Italian and Slavic, focuses on learning the Italian language.

Students declaring a minor in Italian are encouraged to study abroad. Temple has its own campus in Rome, Italy, which offers courses in a variety of fields, including language, art, art history, architecture and international business. Students interested in studying in Italy should discuss their plans with the Italian faculty advisor as early as possible.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Students with proficiency in Italian may replace ITAL 1002 and ITAL 2001 with upper-level courses taught in Italian. See the faculty advisor for more information.

Italian Studies BA

Overview

Apart from being the number one study abroad destination among university students, Italy's importance in the corporate world and its complimentary pairing with humanities studies make Italian the fourth most studied foreign language in the United States.

Temple University students have two options for taking a degree in Italian, offered through the Department of French, German, Italian and Slavic: a traditional Bachelor of Arts in Italian that focuses on learning Italian language through the advanced level, or a **Bachelor of Arts in Italian Studies** that focuses on learning Italian language through the intermediate level and includes more major electives in Italian culture but taught in English or Italian. Both majors are interdisciplinary programs of study that, in addition to being built on requirements of language proficiency and core knowledge of Italian literary history, places strong emphasis on cultural, global and national identity studies. An additional learning goal for students of Italian is to demonstrate understanding and appreciation of cultural perspectives and practices in the Italian-speaking world. The program's methodology is based on a communicative approach coupled with technology-based student engagement practice to enhance the students' language retention, level of competency, and proficiency, as well as to provide a window into Italian culture. The transferable communication and critical thinking skills acquired by the program prove invaluable to employers of liberal arts graduates.

Students who major in Italian Studies are seeking a combination of the language acquisition skills developed through the intermediate level Italian along with their interest in Italian culture and history. Many courses are offered that are related to Italian culture, but the courses are conducted in English and wouldn't normally fulfill the requirements of the traditional Italian major. Courses in Classical Culture, Art History and History may be combined with the Italian language courses for this major.

Campus Location: Main

Program Code: LA-ITLS-BA

Distinction in Major

To be considered for Distinction in Major in Italian Studies, students must:

- Complete the requirements for the concentration in Italian with a GPA of at least 3.50;
- Have an overall GPA of at least 3.25;
- Be recommended to the chair of the department by the Italian faculty advisor.

Study Abroad

Students declaring a major in Italian Studies are encouraged to study abroad. Temple has its own campus in Rome, Italy, which offers courses in a variety of fields, including language, art, art history, architecture and international business. Students interested in studying in Italy should discuss their plans with the Italian faculty advisor as early as possible.

Learn more about the Bachelor of Arts in Italian Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ITAL 3096 , and either ITAL 2096 or ITAL 4096 .
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - The requirements of the Italian major exceed the minimum requirements of the College of Liberal Arts; no additional coursework is required.
 - **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (30 credits)

Code	Title	Credit Hours
ITAL 2001	Intermediate Italian I	3
ITAL 2002	Intermediate Italian II	3
ITAL 2096 or ITAL 4096	Composition I: Italian Composition and Conversation	3
ITAL 3096	Composition II: Advanced Writing Skills	3
Italian Electives (Italian language of Instruction) 2000+		6
Italian Electives (English or Italian language of instruction) 2000+		6
Related Electives (with faculty advisor approval)		6
Total Credit Hours		30

Note: Students who place out of ITAL 2001 must take an additional elective. Students who place out of ITAL 2002 must take two additional electives.

Italian Studies Minor

Overview

The 19-credit **Minor in Italian Studies**, offered by the Department of French, German, Italian and Slavic (FGIS), is an interdisciplinary program designed for students with intermediate proficiency who want to enrich their knowledge of Italian cultural studies (film, media, music, art, literature, language and history) beyond the language requirement of the Bachelor of Arts in Italian. Students take a combination of Italian language courses (through level 2002, 4th semester Italian) and electives in literature, film, or some other aspect of Italian history and culture. One of these electives must be taught in Italian language (where the whole course is conducted in the language and assignments are done in Italian) and the other two courses may be conducted in English (one of these must be offered by the FGIS department, the other may be from another related department with the approval of the faculty advisor).

Students declaring a minor in Italian Studies are encouraged to study abroad. Temple has its own campus in Rome, Italy, which offers courses in a variety of fields, including language, art, art history, architecture and international business. Students interested in studying in Italy should discuss their plans with the Italian faculty advisor as early as possible.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Japanese BA

Overview

The **Bachelor of Arts in Japanese** is offered by the College of Liberal Arts' Department of Asian and Middle Eastern Languages and Studies at the Temple University, Japan Campus only.

The Japanese major is a unique undergraduate degree program designed to offer a comprehensive four-year Japanese language curriculum in a Japanese as a Second Language (JSL) setting. It aims to achieve advanced and well-balanced proficiency in Japanese so that students will, by using the Japanese language as a communication tool, be well-equipped and fully prepared to examine socio-cultural aspects of Japan and Japanese literature, and be active social agents to make contributions in the world of globalization.

The Bachelor of Arts in Japanese will be conferred upon the student after the completion of 123 credits across the following requirements:

- 35-36 credit hours of General Education coursework;
- 43 credit hours (14 courses) required for major; major courses must be passed with at least a C-; and
- 44-45 elective credit hours.

Campus Location: Japan

Program Code: LA-JPNS-BA

A Japanese minor and certificate are also offered at both Main Campus and Temple Japan.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements for the Degree

1. University requirements

- All Temple students must take a minimum of two writing-intensive courses as part of the major.
- Students must complete the General Education (p. 83) curriculum.

2. General electives vary according to a student's individual program of study. Consult your academic advisor for more information.

3. Prerequisites: JPNS 1001, JPNS 1002, and JPNS 2701/JPNS 2001 with a minimum grade of C- or equivalent placement. Course levels are incremental in skills and content. Courses must be taken sequentially or in some instances may be taken concurrently. Students who are exempted from JPNS 2701/JPNS 2001 may begin with JPNS 2702 or higher level, in accordance to the placement assessment.

4. Major requirements (minimum 43 credits)

Code	Title	Credit Hours
Language Requirements		
JPNS 2702	TUJ - Japanese Intermediate II	4
JPNS 3001	Advanced Japanese I	3
JPNS 3002	Advanced Japanese II	3
JPNS 4001	Japanese Advanced III	3
JPNS 4002	Japanese Advanced IV	3

Language Skills ¹

Select at least four of the following:

12

Note: Students who have placed out of JPNS 2702 must take ONE additional Language Skills course. Those who have placed out of JPNS 3001 must take TWO additional Language Skills courses. Those who have placed out of JPNS 3002 must take THREE additional Language Skills courses.

JPNS 2003	Oral Intensive Japanese II
JPNS 2301	Kanji II
JPNS 2631	Structure of Japanese Language I
JPNS 3000	Special Topics in Japanese I (Introduction to Consecutive Translation for Non-Native Speakers of Japanese I)
JPNS 3003	Advanced Japanese Writing
JPNS 3010	Special Topics in Japanese II (Introduction to Consecutive Translation for Non-Native Speakers of Japanese II)
JPNS 3096	Intermediate Writing in Japanese
JPNS 3631	Structure of Japanese Language II
JPNS 4003	Advanced Oral Japanese

Area Studies Electives ¹

Select 3 courses from the pre-approved courses list:

9

ANTH 2238 or ASST 2238	Visual Anthropology of Modern Japan
ANTH 2373 or ASST 2373	Japanese Culture
ASST 2351 or POLS 2351	Japan in a Changing World
ASST 2502 or HIST 2502	Japan and the Changing World Order
ASST 2815 or ARTH 2815	Introduction to East Asia: Japan
ASST 3247 or SOC 3247	Introduction to East Asia: Japan
ASST 3541	Japanese Art
	Pre-Modern Japanese Art up to the Edo Period
	Ideology and Social Change in Japan
	Ideology and Social Change in Japan
	Japan Today

or HIST 3541	Japan Today
ASST 3542	Women and Society in Japan
or HIST 3542	Women and Society in Japan
or GSWS 3542	Women and Society in Japan
GUS 3076	Metropolitan Tokyo
JPNS 2011	Survey of Japanese Literature: Pre-Modern
or ASST 2011	Survey of Japanese Literature Before 1868
JPNS 2012	Modern and Contemporary Japanese Literature in Translation
or ASST 2012	Modern and Contemporary Japanese Literature in Translation
JPNS 2015	Tokyo in Literature and Film
or ASST 2015	Tokyo in Literature and Film
JPNS 2016	Mystery and Crime Fiction in Japan
or ASST 2016	Mystery and Crime Fiction in Japan
JPNS 2021	Japanese Literature in Film
or ASST 2021	Japanese Literature in Film
JPNS 3000	Special Topics in Japanese I (Japanese Communication and Culture I)
JPNS 3010	Special Topics in Japanese II (Japanese Communication and Culture II)

Japanese Certificate

Overview

The **Certificate in Japanese**, offered by the Department of Asian and Middle Eastern Languages and Studies, focuses on learning language skills and developing a strong foundation for the effective use of Japanese socially and professionally. This program will be of particular interest to students considering careers in international business, government service or other professions where foreign language proficiency is important. This program also contributes to meeting the diverse language needs of students with personal or academic interests in Japan and its culture.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Locations: Main and Japan

Program Code: LA-JPNS-CR2+

Contact Information

If a student takes JST 2408 AND JST 2409, one may count as an elective in this category.

Jewish Studies BA

Overview

This program is not accepting applications for academic year 2023-2024.

The **Bachelor of Arts in Jewish Studies** is offered by the Department of Religion. Jewish Studies is an interdisciplinary field that allows students to sample courses across the liberal arts curriculum at Temple University. Central to Jewish Studies is an examination of the history, culture, beliefs, customs, practices, texts and languages of the Jewish people. It addresses the legacy of over 2,000 years of Jewish life as it has been lived in Jewish communities across the globe. At Temple we pay particular attention to contemporary issues of Jewish culture, identity, and practice.

Program Code: LA-JST-BA

Distinction in Major

Jewish Studies majors may graduate with distinction if they have a GPA of 3.5 or better in the major, a cumulative GPA of 3.0 or better, and a grade of 3.5 or better in the capstone course (JST 4096, an individual research project with a specific faculty member, intended for majors in the final semester of coursework).

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are JST 4096 and one additional Jewish Studies elective that is writing-intensive.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
 - **Professional Development Requirement**

- All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

JST/HEBR 3797		
Select two Jewish Studies Electives numbered 2000+		6
JST 4096	Independent Study in Jewish Studies	3
Total Credit Hours		33

1

All students must take two writing-intensive courses in their major. In addition to JST 4096, students must select one Jewish Studies elective that is writing-intensive.

Students interested in a history or religion focus should consult with a Jewish Studies advisor to plan an individual program of study.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Jewish Studies

Language and Cross-Cultural Communication Certificate

Overview

The **Certificate in Language and Cross-Cultural Communication**, offered by the Department of Anthropology, is designed to provide students with the anthropological and linguistic tools to understand and study the sociocultural foundations of language use and communication, including both forms of everyday and institutional communication.

This program fits well with the current institutional mission of Temple University to prepare students to work and thrive in an increasingly globalized world where language-related expertise, particularly cross-linguistic and cross-cultural knowledge, is a highly desirable skill. This program is also congruent with professional trends in language-related disciplines that currently emphasize programs that provide students with the sociolinguistic and cultural knowledge needed to solve language-related problems in the real world.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-LCCC-CERT

Latin American Studies BA

Overview

The **Bachelor of Arts in Latin American Studies** is offered by the Latin American Studies Program within the Department of Spanish and Portuguese.

Latin American Studies (LAS) offers an interdisciplinary approach to learning about the politics, economics, cultures and societies of Latin America and the Caribbean. LAS uses this region as a framework for exploring thematic issues in such disciplines as anthropology, art, history, political science, Spanish and Portuguese, and communication studies. Courses are offered in departments from every school and college, and our affiliated faculty research diverse topics from development economics to immigrant healthcare, from Latin American music to colonial literature. Our students become true experts who can speak to a wide range of issues confronting Latin America; experts who can contribute proactively to development and cooperation, as well as to business and political analysis in a way that their peers with a more traditional disciplinary focus cannot.

Campus Location: Main

Program Code: LA-LAS-BA

Distinction in Major

Latin American Studies majors may graduate with distinction in the major if they have a GPA of at least 3.5 in the major and a cumulative GPA of at least 3.0.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are LAS 4097 and one of the following: LAS 2097, LAS 2098, LAS 4698.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements:**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);

- Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

2

Check prerequisites for 4000+ literature option.

3

LAS 4097 offered only once a year; see advisor before senior year.

Latin American Studies Certificate

Overview

Each spring semester, the Department of Spanish and Portuguese offers a Latin American Studies Semester (LASS) immersion program. Students who successfully complete the LASS program may be awarded a **Certificate in Latin American Studies** and a waiver of the General Education World Society requirement. The 17-credit Certificate in Latin American Studies combines 9 credit hours of intensive Spanish language with 8 credit hours of study focusing on geography, history, and culture in Latin America and a 21-day trip to a Spanish-speaking country.

Applications for LASS are received between April and November for the following spring. For information, please visit Study Abroad or contact Montserrat Piera (mpiera01@temple.edu) (215-204-8285).

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-LAS-CERT

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Latin American Studies.

Latin American Studies Minor

Overview

The **Minor in Latin American Studies** is offered by the Latin American Studies Program within the Department of Spanish and Portuguese. The Latin American Studies minor enables students to combine the requirements of their majors with the study of Latin America. It is designed to be of particular value to students who intend to engage in technical, professional, business or government work involving Latin America. To earn the minor, students must complete six 3-credit courses in subjects with a Latin American emphasis and demonstrate a reading knowledge and speaking facility of Spanish or Portuguese.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
Introductory course		
LAS 1001	Perspectives on Latin America	3
Electives		
Select five Latin American Studies Electives numbered 1000-4999 ¹		15
Language Proficiency Requirement

Spanish or Portuguese 2000+		
Latin American Studies Semester (LASS)		
Proficiency examination		
Total Credit Hours		18

1

Students who successfully complete the Latin American Studies Semester (LASS Program) need only four additional LAS electives. They are waived LAS 1001, one elective course, and the language proficiency requirement.

2

Students also must demonstrate reading knowledge and speaking facility of Spanish or Portuguese.

Lesbian, Gay, Bisexual and Transgender Studies Minor

Overview

The **Minor in Lesbian, Gay, Bisexual and Transgender Studies** analyzes gender, sexuality and sexual orientation as they are understood by various disciplines and in cross-cultural perspectives. The minor, which is housed within the Gender, Sexuality and Women's Studies Program, enables students to become familiar with concepts, theories, history, literature and socio-political issues concerning the LGBTQ community. It also gives students an opportunity to examine and think critically about the intersections of sexuality, sex, and gender and become aware of the diversity of attitudes about sexuality in different cultures and historical eras.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Double-Counting of Credits

Students combining a minor in Lesbian, Gay, Bisexual and Transgender Studies and a major, minor, or certificate in Gender, Sexuality and Women's Studies may double-count for both programs only Field Work (GSWS 4389 or LGBT 4489) and Queer Lives (GSWS 2405 or LGBT 2405).

LGBT 3400	Topics in LGBT Studies	
LGBT 3548	Intimate Partner Violence: Gender and Social Justice	
Total Credit Hours		18

Liberal Studies BA

Overview

The **Bachelor of Arts in Liberal Studies** is offered by the Liberal Studies Program within the College of Liberal Arts. The major is designed to meet the unique needs of working adults who may have delayed or stopped out of college, or who have difficulty finding a major in one of the other disciplines in the College of Liberal Arts that meets their scheduling needs.

The Liberal Arts major is essentially self-designed, other than some common writing intensive coursework and a course that emphasizes critical thinking. It is purposely flexible so students can develop a program of study that will help them achieve a specific personal or professional goal that might be unrelated to a traditional discipline. Courses are offered year-round at Main Campus, Ambler Campus, Online, and at Temple University Center City. Students may combine locations as their schedule dictates.

Curriculum

The primary goal of the Liberal Studies curriculum is to assist students in developing their analytical, critical thinking, reading, writing and research skills, as they progress through a challenging curriculum that is primarily of their own design.

The curriculum is a broad-based liberal arts program, primarily focused on upper-division coursework selected by the student in keeping with their professional and academic goals.

All students in the Liberal Studies major begin their studies in CLA 2096 Approaches to Liberal Studies. This writing intensive, interdisciplinary course brings students together and (re)introduces the idea of academic research, writing, and participation in the academic enterprise. Instructors select a topic of their choice and examine it from a variety of perspectives and viewpoints in the various disciplines of the liberal arts.

Later in their program of study, all Liberal Studies majors take AMST 2098 Reading Culture to complete the second required writing intensive course for the General Education Curriculum.

Critical Thinking (either PHIL 1055 or PSY 1004) is the foundations-level course for this major.

Students must select a track, either Humanities or Social Sciences, and follow the requirements of that track. Within their track, students select a "concentration" of five courses all taken in a single department in their chosen track, all of which are numbered 2000-4999. If a particular course requires a lower-level prerequisite, this prerequisite is taken in addition to the required upper-level courses of their program. Four upper-level "breadth" courses numbered 2000+ are selected from other cognate departments within their chosen track. In lieu of the CLA Distribution requirement, students in the Liberal Studies major take four courses numbered 2000-4999 in the "other" track (Humanities or Social Sciences).

Campus Locations: Main, Ambler, Temple University Center City, Online

Program Code: LA-LIBS-BA

Program Restrictions

Liberal Studies is a stand-alone program and **may not be combined** with any other majors, minors or certificate programs.

Life Experience Portfolio Review

Students in the Liberal Studies major have the opportunity to submit a portfolio for review to earn up to 6 credits of professional "life experience." See your faculty advisor for more information.

Online-only Program of Study

New non-traditional, transfer students can take their entire degree program online. Required courses for the major are offered online in the fall and spring semesters, and a variety of other courses to fulfill elective requirements are also available via online instruction. For more information contact Keith Gumery (gumery@temple.edu).

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The writing-intensive courses required for this major are CLA 2096 and AMST 2098.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - The distribution requirement is built into this major.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Management Career Certificate

Overview

The **Certificate in Management Career**, offered by the Department of Economics, is designed for students who intend to seek employment in the business or nonprofit sectors of the economy. It is designed to provide students with skills that complement those acquired through a traditional liberal arts education and to make the students more appealing to potential employers.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main and Japan

Program Code: LA-ECMG-CR2+

Contact Information

Requirements

Code	Title	Credit Hours
Required Courses		
Select one of the following:		3
ECON 1001	Introduction to the Economy	
ECON 1102	Microeconomic Principles	
ECON 1902	Honors Microeconomic Principles	
ACCT 2103 or ACCT 2903	Financial and Managerial Accounting for Decision Making Honors Financial and Managerial Accounting	4
HRM 1101	Leadership and Organizational Management	3
PSY 2402 or MKTG 2101	Foundations of Industrial and Organizational Psychology ¹ Marketing Management	3
One Statistics course selected in consultation with the certificate advisor.		3
Approved Elective		
Select one of the following: ²		3-4
ECON 1101	Macroeconomic Principles	
ECON 3536	Economics of American Industry	
ECON 3541	The Economics of Sports	
MKTG 2101	Marketing Management ¹	
HRM 2501	Introduction to Human Resource Management	
CIS 1055	Computers and Applications	
GUS 2031	Geography of the Global Economy	
POLS 2321	Politics of the Global Economy	
POLS 3155	Business and Public Policy	
PSY 2402	Foundations of Industrial and Organizational Psychology ¹	
Total Credit Hours		19-20

¹

Students may not double count either MKTG 2101 or PSY 2402 within this certificate program.

²

An alternative elective or an internship or practicum may be approved to substitute for the elective. Please see the certificate advisor prior to registration for written approval.

Mathematical Economics BA (CLA)

Overview

The College of Liberal Arts' Department of Economics and the College of Science and Technology's Department of Mathematics jointly offer the **Bachelor of Arts in Mathematical Economics** as a platform for systematic concentration in the mathematical approach to economics. Economics has progressed in the last several decades by making extensive use of mathematical techniques. As a result, students who wish to pursue graduate study in economics, finance, accounting and other disciplines that make an extensive use of economics need a thorough grounding in both economics and mathematics. The Mathematical Economics curriculum provides this grounding with a broad selection of courses that cover all important areas of economics and the mathematical tools required for a critical, deep mastery of these areas. This program is especially recommended for those students who intend to pursue graduate studies in economics.

Campus Location: Main

Program Code: LA-MECN-BA

Residency Requirements

Students must satisfy general Temple University residency requirements (p. 1838).

At least 10 courses required for the major must be completed at Temple. At least 5 Mathematics courses and 4 Economics courses must be completed at Temple.

Distinction in Major

For distinction in Mathematical Economics, a student must have an overall GPA of 3.25 or higher. A student must also have a GPA of 3.50 or higher in the 3000+ Mathematics courses and a GPA of 3.60 or higher in the 3000+ Economics courses.

Learn more about the Bachelor of Arts in Mathematical Economics.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 and/or ENG 0701, if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of their major. All students must take ECON 3598 as their capstone experience. The following is a list of courses that can be used to satisfy the remaining writing-intensive requirement:

Code	Title	Credit Hours
ECON 3596	Energy, Ecology, and Economy	3
ECON 3597	Health Economics	3
ECON 3696	Behavioral Economics	3
ECON 3697	The Economics of Sports	3
ECON 3698	Economic Inequality	3
MATH 3096 or MATH 3098	Introduction to Modern Algebra Modern Algebra	3
MATH 4096	Senior Problem Solving	3

- Students must complete the General Education (GenEd (p. 83)) requirements. Students who complete this major typically receive a waiver for 1 Quantitative Literacy (GQ) GenEd course.

College Requirements

Completion of a minimum of 123 credits, including:

- 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
- 45 Upper-Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
- Two (2) Upper-Level (2000+) Liberal Art courses.
- Second (2nd) Level of a Foreign Language (1002).

Major Requirements (60-62 credits)

Code	Title	Credit Hours
Computer & Information Science		
Select one of the following:		3-4
CIS 1051 or CIS 1951	Introduction to Problem Solving and Programming in Python Honors Introduction to Problem Solving and Programming in Python	
CIS 1057	Computer Programming in C	
CIS 1068 or CIS 1968	Program Design and Abstraction Honors Program Design and Abstraction	
MATH 1033 & MATH 1034	Computing in MATLAB and Applications in MATLAB	
Mathematics		
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4
MATH 1042 or MATH 1942	Calculus II Honors Calculus II	4
MATH 2043 or MATH 2943	Calculus III Honors Calculus III	4
MATH 2101	Linear Algebra	3
MATH 2111	Basic Concepts of Math	3
MATH 3031	Probability Theory I	3
MATH 3032	Mathematical Statistics (S)	3
Select one of the following sequences:		6-7
MATH 3043 & MATH 3044	Numerical Analysis I and Numerical Analysis II	
MATH 3137 & MATH 3138	Real & Complex Analysis I and Real & Complex Analysis II	
MATH 3141 & MATH 3142	Advanced Calculus I and Advanced Calculus II	
One Mathematics elective at the 3000 level or above ^{1,2}		3
Economics		

ECON 1102 or ECON 1902	Microeconomic Principles Honors Microeconomic Principles	3
ECON 3501 or ECON 3701	Intermediate Microeconomic Analysis Intermediate Microeconomic Analysis with Calculus	3
ECON 3502 or ECON 3702	Intermediate Macroeconomic Analysis Intermediate Macroeconomic Analysis with Calculus	3
ECON 3503 or ECON 3703	Introduction to Econometrics Econometric Theory	3
ECON 3504	Mathematical Economics	3
ECON 3598	Economics Writing Seminar	3
Two Economics electives at the 3000 level or above, with permission from advisor ²		6
Total Credit Hours		60-62

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course.

(S) - Spring only course.

1

MATH 2041, MATH 2941, MATH 2045, or MATH 2121 may be used to fulfill the Mathematics elective at the 3000 level or above.

2

One of the Mathematics or Economics electives must be a writing-intensive course in order to satisfy the University requirement that each student must fulfill two writing-intensive courses within the major.

1

All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement are ENG 1801 Career Seminar and PSY 1002 Careers in Psychology.

2

One of the Mathematics or Economics electives must be a writing-intensive course in order to satisfy the University requirement that each student must fulfill two writing-intensive courses within the major.

3

MATH 2041, MATH 2941, MATH 2045, or MATH 2121 may be used to fulfill the Mathematics elective at the 3000 level or above.

4

You must complete the year-long sequence of either MATH 3043 and MATH 3044; or MATH 3137 and MATH 3138; or MATH 3141 and MATH 3142.

Neuroscience Research Minor

Overview

The **Minor in Neuroscience Research**, offered by the Department of Psychology and Neuroscience, expands opportunities for Temple students to apply neuroscience knowledge in research settings and to become more competitive in their applications to graduate and professional schools. The required courses in the Neuroscience Research minor focus on basic neuroscience, neuroanatomy, cellular neuroscience and conducting research.

In addition to formal coursework, students are required to take two neuroscience elective courses. The students have options to take independent study courses that result in a research project as electives. The Neuroscience Research Project is a unique project developed over two semesters of independent study. This research project may not overlap with projects for other programs (e.g., Honors).

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Curricular Overlap Policies

Students majoring in Psychology may declare a minor in Neuroscience Research and may double-count **one elective** and NSCI 3096 Conducting Neuroscience Research for both programs without taking any replacement coursework.

Because of some overlap in coursework, students cannot pursue both the Neuroscience Research minor and the Cognitive Neuroscience minor.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Neuroscience: Systems, Behavior and Plasticity BS

Overview

Neuroscience is a rapidly growing field that is making great advances in understanding behavior and cognitive functions, as well as advancing treatments for psychiatric, neurodegenerative and neurological disorders. It encompasses a broad domain that ranges from molecular genetics and neural development, to brain processes involved in cognition and emotion, to mechanisms and consequences of neurodegenerative disease. The field of neuroscience also includes mathematical and physical principles involved in modeling neural systems and in brain imaging.

The **Bachelor of Science in Neuroscience: Systems, Behavior and Plasticity**, offered by the Neuroscience Program within the Department of Psychology and Neuroscience, is designed to teach students to explore neural and brain function at multiple levels. The curriculum is customizable and flexible to ensure students get a well-rounded academic experience to prepare for graduate school, professional school (e.g., medical school, occupational therapy school, etc.), and entering the workforce.

The degree includes 52-54 required credits: 25 credits in Neuroscience, 6-8 credits in electives on neuroscience topics from a variety of participating departments, and 21 credits of co-requisite courses in Biology, Chemistry and Psychology. Students majoring in Neuroscience are strongly encouraged to participate in hands-on research by taking Independent Study courses as part of their elective credits for the major. Independent Study opportunities are offered in many of the laboratories of the more than 130 neuroscientist faculty members within the various colleges and schools participating in Temple University's Neuroscience Program.

Campus Location: Main

Program Code: LA-NSCI-BS

Curricular Overlap Policy

Because of overlap in coursework, students pursuing the BS in Neuroscience: Systems, Behavior and Plasticity cannot complete the Cognitive Neuroscience minor offered by the Department of Psychology and Neuroscience.

Combining the Major in Neuroscience with Major or Minor Programs in Psychology

Students who choose to double-major in Neuroscience and Psychology may count the following courses towards both majors without taking replacement coursework:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- NSCI 3096 Conducting Neuroscience Research
- BIOL 1012 General Biology II
- CHEM 1031 General Chemistry I and CHEM 1033 General Chemistry Laboratory I
- CHEM 1032 General Chemistry II and CHEM 1034 General Chemistry Laboratory II

For students who major in Neuroscience and minor in Psychology, the following courses may count towards both programs without taking replacement coursework:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- NSCI 3096 Conducting Neuroscience Research

Distinction in Major

Majors in Neuroscience: Systems, Behavior and Plasticity have the opportunity to be awarded departmental distinction upon graduation. Graduating with distinction can be achieved by maintaining a GPA of 3.0 or better in all neuroscience courses, completing two semesters of *Independent Study in Neuroscience* (NSCI 4182 and NSCI 4282) with an A- or better, and successfully completing a neuroscience research project based on the independent study work and described in a research paper and poster presented to Neuroscience Program faculty and students. Learn more about graduating with distinction.

Accelerated +1 Bachelor of Science/Master of Science Program

The accelerated +1 Bachelor of Science / Master of Science in Neuroscience: Systems, Behavior and Plasticity program offers outstanding Temple University Neuroscience: Systems, Behavior and Plasticity majors the opportunity to earn both the BS and MS in Neuroscience: Systems, Behavior and Plasticity in just 5 years. Admission to the program is highly selective. The program is designed to provide a research-intensive experience, advanced coursework and professional development to students who intend to pursue doctoral studies in any of the academic Neuroscience disciplines.

The accelerated +1 program consists of a maximum of 113 semester hours of undergraduate coursework, a maximum of 10 semester hours of graduate coursework to count towards both the undergraduate and the graduate degrees, and an additional 20 semester hours of graduate coursework as a

graduate student. Upon successful completion of the fourth year, students will receive a BS in Neuroscience: Systems, Behavior and Plasticity, using 10 credits of graduate coursework, if they have met all other degree requirements. At the end of the contiguous fifth year, students will receive a MS in Neuroscience: Systems, Behavior and Plasticity.

Students apply to the +1 program in the spring semester of the junior year after completing a minimum of 72 undergraduate credits. Additionally, students must have a faculty sponsor who has agreed to mentor the student's master's project research during the four-semester program.

Career Options

Many high-level career options within and outside of the field of neuroscience are open to students with this major. This is a popular major with students aiming for professional careers in the health sciences such as in medicine, dentistry, pharmacy, physical and occupational therapy, and veterinary science. Students interested in graduate school in biology, chemistry, communications science, neuroscience or psychology are also likely to find this major attractive. Learn more about career options.

Student Organizations

Neuroscience majors are encouraged to get involved in various organizations outside the classroom. Learn more about the Nu Rho Psi Honor Society and the Undergraduate Neuroscience Society.

Contact Information

Neuroscience Program Office
6th Floor Weiss Hall

Vinay Parikh, Director
vinay.parikh@temple.edu

Learn more about the Bachelor of Science in Neuroscience: Systems, Behavior and Plasticity.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are NSCI 3096 and NSCI 4197.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. NSCI 1002 Careers in Neuroscience, PSY 1002 Careers in Psychology or CLA 1002 Professional Development for Liberal Arts Majors would be an appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, or minor requirements.
- Note: For Neuroscience majors, there is no CLA Foreign Language/Global Studies Requirement because it is a Bachelor of Science program. However, students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

1

Students may substitute NSCI 1002 or PSY 1002 for this requirement.

2

CHEM 1031/CHEM 1033 and CHEM 1032/CHEM 1034 fulfill the GenEd Science & Technology requirement. Prerequisite for CHEM 1031 is MATH 1021 with a C or better or placement into MATH 1022.

Philosophy BA

Overview

Philosophy explores life's big questions about knowledge, existence, and value. What is it to be rational? What is the mind? What is it to be responsible for our actions? What kinds of facts and explanations do the sciences offer? What is a good life? Students in the **Bachelor of Arts in Philosophy** learn to assess claims and evaluate arguments in a wide range of fields. They graduate with the ability to think incisively and critically, to write and speak clearly and intelligently, and to structure and simplify complex information. Philosophy course offerings cover pure and applied philosophy; contemporary philosophy and the history of philosophy; and philosophy of race, gender, and other forms of social diversity.

Besides the BA in Philosophy (with or without pre-law emphasis), the Department of Philosophy also offers a minor in Philosophy and a certificate in Ethics.

Campus Location: Main

Program Code: LA-PHIL-BA

Distinction in Major

Students graduate with Distinction in Major upon successful completion of PHIL 4999.

Accelerated Bachelor of Arts / Master of Arts in Philosophy (4+1) Program

High-achieving undergraduates can apply for the 4+1 BA/MA accelerated degree program in Philosophy, which enables them to obtain their BA and MA in Philosophy in five years rather than the usual six. Students begin taking graduate courses in their last three undergraduate semesters, and then spend their fifth year completing all remaining MA requirements. Eligible students must have a minimum overall undergraduate GPA of 3.5 and a 3.5 in Philosophy. Students will receive notification of eligibility at the end of their sophomore year, and applications will be accepted until October 15th of their junior year. For more information, please contact the Graduate Chair.

Awards

[The Ira Lawrence Family Award](#) - Established from a gift to the Philosophy department from Ira Lawrence, Jr. MD (CST '76), this award is given to a graduating CLA student majoring in philosophy with outstanding academic performance in the major.

The Thomas Meyer Memorial Award - Established by family, faculty and friends in memory of Thomas Meyer, former Philosophy department professor, this award is given to a CLA student majoring in philosophy for community building activities among philosophy undergraduates.

Professional Development

Philosophy is an excellent major for careers in medicine, law and business. Career options are regularly discussed in the Undergraduate Philosophy Club and featured on the Philosophy department's web site.

Learn more about the Bachelor of Arts in Philosophy.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are PHIL 1196, and either PHIL 4297 or PHIL 4298.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
 - **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
 - **Foreign Language/Global Studies Requirements**

- All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
- All students must complete at least one course from the GenEd Global/World Society category; and
- All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: 12 courses in Philosophy (36 credits)

3

PHIL 3085 must be taken with PHIL 3075.

Philosophy Minor

Overview

The **Minor in Philosophy**, offered by the Department of Philosophy, is an excellent minor for careers in medicine, law and business. Career options are regularly discussed in the Undergraduate Philosophy Club and featured on the Philosophy department's web site.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Political Economy Certificate

Overview

The Department of Economics and the Department of Political Science jointly offer the **Certificate in Political Economy**.

The 24-credit Political Economy certificate enables undergraduate students to study more intensely the relationship between the political and economic spheres of society. The program is based on the belief that a focused examination of this relationship provides a better understanding of several social phenomena. Chief among these is a better understanding of public policy and the policy making process, as well as how government actions affect the process of economic change and vice versa.

The program is open to all matriculated undergraduate students. It is not restricted to Economics or Political Science majors. The Political Economy program provides an excellent preparation for graduate study in not just economics and political science but also in public policy, law and business.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Locations: Main and Japan

Program Code: LA-POLE-CERT

Learn more about the undergraduate certificate in Political Economy.

Requirements

The program consists of two components: required core courses at the lower-division level and elective courses at the upper-division level.

Core Courses

All students must take the following core courses:

Code	Title	Credit Hours
ECON 1101 or ECON 1901	Macroeconomic Principles Honors Macroeconomic Principles	3
ECON 1102 or ECON 1902	Microeconomic Principles Honors Microeconomic Principles	3
POLS 1101 or POLS 1911	The American Political System Honors Introduction to American Politics	3
Select one of the following:		3
POLS 1201 or POLS 1921	Foreign Governments and Politics Honors Foreign Governments and Politics	
POLS 1301 or POLS 1931	International Politics Honors International Politics	

Elective Courses

All students must successfully complete (grade of C- or better) four courses from the following list. Two of the four courses must be in economics, and two courses must be in political science. Students should select courses that correspond to their own substantive interests and are encouraged to take cognate areas (e.g., if you choose international politics courses, also choose international economics courses). Students should plan their schedules well in advance, since some courses are not offered each semester.

Code	Title	Credit Hours
Select two of the following:		6
ECON 3531	History of Economic Theory	
ECON 3547	Economics of Development and Growth	
ECON 3511	The Economics and Management of Privatization	
ECON 3512	Public Finance	
ECON 3513	Economics of State and Local Governments	
ECON 3563	International Trade	
ECON 3564	International Monetary Economics	
ECON 3596 or ECON 3506	Energy, Ecology, and Economy ¹ Energy, Ecology, and Economy	
ECON 3597	Health Economics ¹	

or ECON 3507	Health Economics
ECON 3545	Economics of Labor Markets
ECON 3546	Women in the Economy
ECON 3535	Public Control of Business: Antitrust
ECON 3536	Economics of American Industry
Select two of the following:	
POLS 2102	American State and Local Politics
POLS 2103	Making Public Policy
POLS 2201	Comparative Politics: Developing Nations
POLS 2321	Politics of the Global Economy
POLS 2441	Democracy, Capitalism, and Socialism
POLS 3134	The Politics of Inequality
POLS 3151	Public Policy Analysis
POLS 3152	U.S. Environmental Policy
POLS 3155	Business and Public Policy
POLS 3252	East Asia and the United States
POLS 3265	International Environmental Policy

6

Writing Intensive courses.

Political Science BA

Overview

The **Bachelor of Arts in Political Science**, offered by the Department of Political Science, enables students to learn about the theory and practice of politics across four established subfields:

- American politics (including the local, state, and federal levels);
- comparative (foreign) governments;
- international relations, and
- political theory.

Students develop strong proficiency in analytical, research and writing skills, with a particular emphasis on methodological rigor. They learn how to develop sophisticated arguments, conduct critical research on a variety of topics, and communicate their work through oral presentations and scholarly papers. Finally, they gain civic awareness about their role as citizens and thinkers in an increasingly complex political world.

Political Science graduates pursue a wide range of careers. Many work in government offices, political campaigns, civic organizations, public institutions and international agencies. A degree in Political Science is also excellent preparation for graduate school, with law school, public policy and international affairs being the most popular choices. Many also work in the private sector, such as consulting, business and the media. To support career planning, the department offers its own 1-credit career development seminar (POLS 1002).

The department offers many opportunities for students to further their learning outside the classroom. Many students undertake internships linked to academic study, including public service opportunities. The Experiential Learning Program offers internships combined with academic seminars. The department also works closely with several student organizations, including the Political Science Society as well as Pi Sigma Alpha, the national honorary political science society.

Course Sequencing for Political Science Majors

Students begin the major by taking four introductory courses: POLS 1101, POLS 1201, POLS 1301, and POLS 2496.

Courses should be sequenced so that students take the introductory courses before the upper-level courses. POLS 1101 is an introduction to U.S. politics and should be taken before upper-level courses in this area. Similarly, POLS 1201 introduces foreign governments and precedes upper-level courses in this field. POLS 1301 introduces international politics and is a prerequisite for upper-level courses in this subject matter. POLS 2496 introduces political theory and should generally be taken in the sophomore year and should precede upper-level theory courses.

Once the introductory courses are completed, students can move on to the electives at the upper level (numbered 2000-4999), of which 3 are needed. Students should pay particular attention to the order in which they take the research methods-capstone sequence (which is taken concurrent with the electives). The first course in this sequence is POLS 2503 Evidence and Knowledge, a research design course that teaches students how to conduct empirical research, an essential skill for successfully completing the upper-level courses.

Evidence and Knowledge (POLS 2503) will lay the foundation for the next two research preparation courses (numbered 3501 through 3599). These research-intensive courses focus on an advanced topic, like other upper level courses, but they also place an emphasis on sharpening the research skills covered in the first course. Once two research intensive courses are completed, the student enrolls in a capstone seminar, the culminating experience of the Political Science major. Topics for research intensive and capstone courses change each semester and often address recent political events and dilemmas. Course descriptions for these courses will be available online.

Campus Location: Main and Japan

Program Code: LA-POLS-BA

Distinction in Major

Distinction in Major recognizes highly motivated Political Science students who accept opportunities to demonstrate their interests and skills by undertaking additional research-oriented classes or in-depth Political Science oriented internships.

Students earn Distinction in Major by holding a GPA in the major of at least 3.8 at graduation and by completing at least one additional upper-level course (POLS 3580, POLS 3996, or an additional 4000-level capstone) or by enrolling in a 3+ credit Political Science internship (POLS 4585). Entry to junior and senior capstone courses requires permission by the Political Science Advisors (Nick Catsis (ncatsis@temple.edu) and Sean Murphy (seanmurphy@temple.edu)). When applying for permission, students should note their interest in receiving distinction.

Students who have questions about their eligibility are encouraged to contact Undergraduate Chair, Alexandra Guisinger (alexandra.guisinger@temple.edu).

Accelerated Bachelor of Arts / Master of Arts in Political Science (4+1) Program

High-achieving undergraduates can apply for the 4+1 BA/MA accelerated degree program in Political Science, which enables them to obtain their BA and MA in Political Science in five years rather than the usual six. Students begin taking graduate courses in their last three undergraduate semesters, and then spend their fifth year completing all remaining MA requirements. Eligible students must have a minimum GPA of 3.5, both overall and in Political Science and have passed POLS 2503 Evidence and Knowledge by the time they begin graduate coursework. Students will receive notification of eligibility at the end of their sophomore year, and applications will be accepted until October 15th of their junior year. For more information, please contact the Graduate Chair.

Accelerated Bachelor of Arts in Political Science / Master of Public Policy (4+1) Program

The Department of Political Science and the Master of Public Policy (MPP) program offer an accelerated track that enables students to attain their BA in Political Science and an MPP in five years, instead of the customary six. Students apply to the program during their third or fourth year of undergraduate study and begin taking graduate coursework upon entry. The GRE is not necessary, but students must maintain an overall undergraduate GPA of at least 3.5. For more information, please contact the MPP Director, Gary Mucciaroni (gary.mucciaroni@temple.edu).

Funding and Support

- Students may apply for financial support to cover research-related activities, such as visits to archives, travel to present a scholarly paper, etc., through the Creative Arts, Research and Scholarship (CARAS) Program.
- Funding is also available through the Diamond Research Scholars Program.
- Students are also encouraged to submit their completed research papers to the Library Prize for Undergraduate Research and the Temple University Symposium for Undergraduate Research and Creativity.
- The department is committed to supporting student success through internships and presenting research. It works with alumni funding to support internship placements. The department also funds students traveling to present undergraduate research, such as with the annual conference of Pi Sigma Alpha, the national honorary political science society.

The Political Economy Certificate Program

The Department of Political Science and the Department of Economics offer an interdisciplinary program leading to a Certificate in Political Economy. The program focuses on the interaction between government and the economy and is ideal preparation for students planning careers in either the public or private sector. It also provides an excellent foundation for graduate studies in law, the social sciences, and public administration. The program is open to all matriculated students in the university. Contact Alexandra Guisinger (alexandra.guisinger@temple.edu) or Roselyn Hsueh (rhsueh@temple.edu) for specific details and requirements.

Pre-Law Studies

Beth Lawson
 CLA Academic Advising
 elizabeth.lawson@temple.edu

Political Science is one of the most popular majors for pre-law students. Pre-law students should develop skills in communicating ideas, sharpen their analytical abilities and ability to think logically, and acquire in-depth understanding of at least one liberal arts field (such as Political Science). Students

interested in law school can read these requirements at CLA Pre-Law (p. 944), and for more information contact Paul Crowe (pcrowe@temple.edu) in the Philosophy department.

Internships

The department encourages students to obtain internships linked to academic study. Students may replace up to two upper-level electives (equivalent to 6 credit hours) from qualifying internships undertaken with external organizations and programs, as approved by the Internship Coordinator. In addition, the Experiential Learning Program offers internships combined with academic seminars, with courses specially designated for this track.

Public Service Opportunities through the Public Service Cooperative

Temple University's faculty, students and alumni have a long tradition of public service. For internships related to public service, the department offers several credit-bearing opportunities at the local, state and federal levels. Interested students should complete the program application and contact Internship Coordinator Sean Murphy (seanmurphy@temple.edu).

The City Hall Experience

The City Hall Internship Experience allows undergraduate students the opportunity to work in Philadelphia City Hall for 10-12 hours each week while earning the equivalent of a 3-credit internship. In addition to receiving credits for internship, students will participate in a 1-credit class for one hour each week to discuss Philadelphia, its policy initiatives, and the ins and outs of city government.

Harrisburg Capital Semester

Temple University sponsors an internship semester each fall and spring in Harrisburg in association with Temple's Harrisburg campus. Students have the opportunity to explore government affairs, policymaking and implementation first-hand while being full-time students and staying on track to graduation. The Harrisburg semester allows students to receive 6-9 credit hours of internship along with a 3-credit Research Preparation course and a 1-credit Professional Development Seminar.

The Washington Semester

The Washington Semester allows Temple students to gain valuable career experience in the nation's capital, while remaining full-time students. If accepted into the program, students register for three courses in the College of Liberal Arts (two for 3 credits each, and one for 9 credits) for a 15-credit semester in the fall or spring. (Summer programs are also available for 12 credits.) Temple University serves as liaison to The Washington Center (TWC), a well-established and well-regarded internship semester program in Washington, D.C., through which Temple students receive internships and take classes.

Study Abroad

Many Political Science majors have taken advantage of Temple's study abroad programs, which provide the life-changing experience of scholarship at overseas institutions, immersion in foreign cultures and learning new languages. The Office of Education Abroad and Overseas Campuses has information on a variety of programs. The most popular destinations include the Temple campuses in Tokyo and Rome, as well as programs in the United Kingdom, France, Germany and Spain. Study abroad destinations include over 80 countries located on every continent. For questions regarding eligibility and program equivalency, please contact Undergraduate Advisor Nick Catsis (ncatsis@temple.edu).

Student Organizations

The department hosts two main organizations that represent the breadth and depth of its students. The faculty advisor is Sean Yom (seanyom@temple.edu).

Political Science Society

The Political Science Society is the organization for all Political Science majors and minors at Temple University. The purpose of the association is to represent the opinions and interests of undergraduate majors within the Political Science Department. The association sponsors activities including career forums, lectures, student and faculty mixers, law and graduate forums, seminars on popular topics, and trips to locales like New York City and Washington, DC.

Pi Sigma Alpha

Pi Sigma Alpha is the national honorary society for political science students. Temple's chapter was founded in 1965, and since then has inducted over a thousand students. Eligible students are offered membership prior to their junior or senior year. Membership is lifetime. Students who join have opportunities to attend special research conferences, apply for internship and graduate funding, and publish their work in research journals.

Learn more about the Bachelor of Arts in Political Science.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are POLS 2496 Introduction to Political Philosophy and POLS 4896 Capstone Seminar in Political Science.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Foreign Language/Global Studies Requirements**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:

- Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements - 11 Courses in Political Science (33 credits)

Code	Title	Credit Hours
Required Courses		
POLS 1101	The American Political System	3
POLS 1201	Foreign Governments and Politics	3
POLS 1301	International Politics	3
POLS 2496	Introduction to Political Philosophy	3
POLS 2503	Evidence and Knowledge	3

Political Science Minor

Overview

The **Minor in Political Science**, offered by the Department of Political Science, enables students to learn about the theory and practice of politics across four established subfields:

- American politics (including the local, state, and federal levels),
- comparative (foreign) governments,
- international relations, and
- political theory.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

The Political Science Society is the organization for all Political Science majors and minors at Temple University. The purpose of the association is to represent the opinions and interests of undergraduate students within the Political Science department. The association sponsors activities including career forums, lectures, student and faculty mixers, law and graduate forums, seminars on popular topics, and trips to locales like New York City and Washington, DC.

Portuguese Minor

Overview

The minor in Portuguese, offered by the Department of Spanish and Portuguese, prepares students to engage with diverse communities both at home and abroad through the development of language skills and intercultural competencies. The Portuguese minor is designed to develop strong language and professional skills and to provide a critical awareness of Brazilian, Portuguese and Luso-African cultures.

Spanish and Portuguese organizations and activities include Sigma Delta Pi, the National Hispanic Honor Society, the scholarly publications of the Society of Spanish and Spanish-American Studies, and the Spanish and Portuguese Clubs and Film Series.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

The minor in Portuguese requires 6 courses (18 credits minimum) in Portuguese.

Code	Title	Credit Hours
PORT 1001	Basic I ¹	4
PORT 1002	Basic II ¹	4
Select 4 Portuguese elective courses from 2000+ level offerings.		10-12
Total Credit Hours		18-20

1

Students may substitute PORT 1021 Portuguese for Spanish Speakers or intermediate/advanced level courses for the beginning PORT 1001 and PORT 1002. Students must still take at least six courses.

Professional Writing Certificate

Overview

Powerful writing is an invaluable asset for people in all walks of life. The **Certificate in Professional Writing**, offered by the Department of English, is designed to give students training that will prepare them to be polished communicators in a variety of professional environments, effectively use digital tools, skillfully convey field-specific information, productively collaborate with diverse teams, and competently interact with cross-cultural audiences. Students will put the specific knowledge and skills learned in their majors to work in publishing, editing, content-generation, development, communications, or administration in for-profit, non-profit, government and free-lance settings, among others. At the conclusion of the certificate, they will have assembled a portfolio of accomplished work. The certificate provides maximum flexibility, allowing students to focus on the specific skills and competencies that are most relevant for their chosen field.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-PRWR-CERT

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Professional Writing.

Requirements

Select a total of five courses in Writing. Two courses must be selected from the 2000 level options, two from the 3000 level options, and one additional elective from either list.

Code	Title	Credit Hours
2000-Level Courses		
Select two courses at the 2000 level from this list:		6
ENG 2006	Non-Fiction Writing	
ENG 2007	Writing for Business and Industry	
ENG 2008/2696	Technical Writing	
ENG 2009	Writing the Research Essay	
ENG 2022	Beyond the Field: Sports and Storytelling	
ENG 2714	Writing for the Arts	
ENG 2831	Literacy and Society	
ENG 2832	Science Writing	
ENG 2833	Medical Writing	
3000-Level Courses		
Select at least two courses at the 3000 level from this list:		6
ENG 3009	Building Electronic Portfolios	
ENG 3085	Career Internship (Must be taken for at least 3 credits.)	
ENG 3401	Intermediate Writing: Non-Fiction	
ENG 3813	Writers at Work	
ENG 3814	Topics in Professional Writing	
ENG 3821	Linguistics and Grammar	
Electives		
Select one elective from either list noted above.		3
Total Credit Hours		15

Students who are majoring in English may double-count no more than two courses between these programs.

Psychological Studies BA

Overview

The **Bachelor of Arts in Psychological Studies** is offered by the College of Liberal Arts's Department of Psychology and Neuroscience and is available only at Temple University, Japan Campus (TUJ).

The Psychological Studies major is designed to promote a broad understanding of human behavior and the affective and cognitive processes that underlie it from the perspective of psychology as a science and a profession. In addition to introductory courses, the study of statistics and research methodology will prepare students to deal with the wealth of research-based knowledge they will encounter as they develop a strong foundation in basic and applied areas of psychology. The research or internship option rounds out the Psychological Studies majors' experiences as they complete advanced electives. Unique to TUJ's Psychological Studies major is its focus on cross-cultural issues, with special emphasis on Asia and the U.S.

Campus Location: Japan

Program Code: LA-PSYS-BA

A Psychology minor is also offered at both Main Campus and Japan Campus.

Contact Information

Dariusz Skowronski, PhD, Major Coordinator
dariusz.skowronski@tuj.temple.edu

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements for the Degree

1. University and College of Liberal Arts (CLA) Requirements

- All Temple students must take a minimum of two writing-intensive courses as part of the major. The writing-intensive courses required for this major are PSY 3096 and a Psychology course at the 4000 level, such as PSY 4696.

- Students must complete the General Education (p. 83) curriculum.
- Students must follow CLA requirements as specified in the CLA College Requirements (p. 940) section of the Undergraduate Bulletin.

2. Major Requirements (Minimum 38 credits)

Code	Title	Credit Hours
Introductory Courses		
PSY 1001	Introduction to Psychology	3
PSY 1002	Careers in Psychology (should be taken in the students' freshman / sophomore year)	1
PSY 1003	Statistics for Psychology	3
PSY 1004	Critical Thinking in Psychology	3
Psychological Studies Science Requirement		
Select one of the following:		4
BIOL 1001	Human Biology	
BIOL 1011	General Biology I	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
PHYS 1021	Introduction to General Physics I	
Developmental/Clinical/Social Foundation Courses (Group 1)		
Select one of the following:		3
PSY 2201	Foundations of Psychopathology	
PSY 2301	Foundations of Developmental Psychology	
PSY 2401	Foundations of Social Psychology	
PSY 2402	Foundations of Industrial and Organizational Psychology	
Brain and Cognitive Sciences Foundation Courses (Group 2)		
Select one of the following:		3
PSY 2101	Foundations of Cognitive Psychology	
PSY 2103	Foundations of Learning and Behavior Analysis	
PSY 2104	Foundations of Sensation and Perception	
PSY 2501	Foundations of Behavioral Neuroscience	
PSY 2502	Foundations of Cognitive Neuroscience	
Psychology Foundation Elective Course		
Select an additional course from Group 1 or Group 2		3
Required Methods Course		
PSY 3096	Conducting Psychological Research	3
Advanced Courses		
In consultation with the Academic Advisor and/or Major Coordinator, select 2 psychology courses at the 3000 level or higher, one of which must focus on gender/culture.		6
PSY 3151	Direct Applications of Behavioral Principles	
PSY 3152		
PSY 3221	Clinical Psychology: Research and Practice	
PSY 3223	Child Psychopathology and Treatment	
PSY 3620	Topics in Psychology (focus on gender/culture)	
Internship / Collaborative Research / Clinical Practicum		
Must complete at least one internship, collaborative research or clinical practicum for at least 3 credits, with approval by the Major Coordinator.		3
PSY 3785	Psychology Internship	
PSY 3787	Practicum	
PSY 3791	Collaborative Research I	
PSY 3891	Collaborative Research II	
Senior Writing Seminar		
PSY 4696	Capstone in Psychology	3
Total Credit Hours		38

Credit Hours	15
Total Credit Hours	123-124

Psychology BA

Overview

The **Bachelor of Arts in Psychology**, offered by the Department of Psychology and Neuroscience, provides a modern curriculum covering a breadth of content, ranging from biological bases of cognition and behavior to sociocultural influences on human interactions and psychological disorders. The curriculum is designed to develop students' critical thinking skills through emphasis of the scientific basis of psychology and through courses in statistics and research methodology. The program also emphasizes the integration and synthesis of information across courses and activities through the step-wise progression of the curriculum from the introductory, foundational and advanced classes up to the final capstone course that is taken in the senior year. Students are strongly encouraged to develop applied skills through rigorous and highly focused experiential learning in research laboratories and community-based internships. The curriculum is designed to be sufficiently flexible to satisfy the diversity of needs among undergraduates. An individually tailored curriculum may be selected for the purpose of preparing students for employment or further study in psychology, neuroscience, medicine, law, business or other fields.

Psychology identifies several learning goals for each level of instruction in the program. At the introductory level (PSY 1001, PSY 1002, PSY 1003, PSY 1004), goals include familiarity with the scientific grounding of the discipline (PSY 1001), basic statistics (PSY 1003) and scientific methods (PSY 1004), as well as information on how to prepare for a career in psychology or a related discipline (PSY 1002). At the Foundation level (2000-level courses), students develop deeper knowledge of the fascinating content areas in the discipline, which are broadly organized in two groups:

1. Developmental/Clinical/Social (DCS); and
2. Brain and Cognitive Sciences (BCS).

Students are required to choose at least two courses from each of these two general areas, and this ensures familiarity with the breadth of the discipline. These courses cover a wide range of topics from the functions of the neuron to the development of moral thought. At the Advanced level (3000-3620), students continue to develop critical thinking skills to dispassionately examine conflicting claims, analyze data, organize research papers, and become more proficient with the scientific process in a writing-intensive course (PSY 3096). Students also are required to select four courses with the option of continuing to develop breadth or choosing to delve into greater depth in one area, such as clinical psychology. Finally, at the 4000 level, students choose a Capstone course to complete their coursework. This writing-intensive course is designed to help students integrate their knowledge base, to refine their critical and writing skills, and generally to synthesize their knowledge of the discipline.

Campus Location: Main

Program Code: LA-PSY-BA

Internships and Research Opportunities

Psychology students have the opportunity to gain real-world experiences and course credit through Internship and Practicum classes. Learn more information about Internships and Practica.

For students interested in research opportunities, many of the Temple Psychology faculty have active research laboratories on a wide range of research topics. Students can apply to work as research assistants in a laboratory and can also earn Collaborative Research credit for doing so. Learn more about Collaborative Research.

Accelerated +1 BA/MS Program

The accelerated +1 Bachelor of Arts in Psychology / Master of Science in Psychological Research offers outstanding Temple University psychology majors the opportunity to earn both the BA in Psychology and the MS in Psychological Research in just 5 years. Admission to the program is highly selective. This program is designed to provide a research-intensive experience, advanced coursework and professional development to students who intend to pursue doctoral studies in any of the academic psychology disciplines.

Students apply to the program in the spring semester of their junior year after completing a minimum of 72 undergraduate credits. Eligible students have a minimum 3.5 GPA overall and in Psychology. Additionally, students must have a faculty sponsor who has agreed to mentor the student's master's project research during the four-semester program.

Applications are due March 1st each year.

Learn more about the MS in Psychological Research.

Careers

An undergraduate degree in psychology affords many opportunities for careers and further study at the graduate level because the knowledge and skills learned through the major (e.g. critical thinking, human behavior) are important to many disciplines. Psychology majors are often employed in management positions, education, healthcare, research, real estate, sales, marketing, social services and labor relations. Many psychology majors also go on to graduate study in psychology or other fields, including law, medicine and business school.

Psychology students at Temple are informed of career options and advised to begin to make career decision through a formal course called Careers in Psychology (PSY 1002). This course is designed to encourage students to begin to prepare for their career early during their undergraduate training so that they may maximally benefit from their undergraduate education.

Curricular Overlap Policies

There are several related majors and minors offered by the Psychology and Neuroscience department, including the major and minor in Psychology, the Cognitive Neuroscience minor, the Clinical and Health Psychology minor, the major in Neuroscience: Systems, Behavior and Plasticity, and the Neuroscience Research minor.

Students majoring in Psychology may take a minor in Cognitive Neuroscience, a second major in Neuroscience: Systems, Behavior and Plasticity, or a minor in Neuroscience Research. Psychology majors are not permitted to take the minor in Clinical and Health Psychology but are permitted to take its courses as electives in their major.

Students who opt to double major in Psychology and Neuroscience: Systems, Behavior and Plasticity may double-count the following required courses without taking additional electives in their major to replace the credits:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- PSY 3096 Conducting Psychological Research or NSCI 3096 Conducting Neuroscience Research
- BIOL 1012 General Biology II
- CHEM 1031 General Chemistry I and CHEM 1033 General Chemistry Laboratory I
- CHEM 1032 General Chemistry II and CHEM 1034 General Chemistry Laboratory II

Students who major in Psychology and minor in Cognitive Neuroscience may double count the following required courses:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- PSY 1004 Critical Thinking in Psychology

Students who major in Psychology and minor in Neuroscience Research may double count one elective course and

- PSY 3096 Conducting Psychological Research or NSCI 3096 Conducting Neuroscience Research

The Psychology Honors Program

Students who major in Psychology are encouraged to participate in the Psychology Honors Program. A main goal of the Psychology Honors Program is to provide each student with an individualized experience that will prepare them for psychological research in the future. This program is designed as a two-year study that begins with critical thinking, writing and the study of methodology. Grade requirement is a 3.5 GPA across all courses. Upon completion of this program, students will have produced a senior thesis and presented their work at a student poster session. Some students present research at regional or national meetings.

Learn more about the Psychology Honors Program.

Code	Title	Credit Hours
PSY 2991	Honors Research I	4
PSY 3991	Honors Research II	3
PSY 4991	Honors Research III	3
PSY 4996	Honors Capstone	4

Distinction in Major

Students earn Distinction in Major upon completion of the Psychology Honors Program.

Student Organizations and Honor Societies

Joining a student organization can provide opportunities for leadership experience, career development and service. Some of the student organizations that are of particular interest for psychology majors are:

- Psychology Majors Association (PMA)
- Psychology Majors of Color (PMC)
- Psi Chi: The International Honor Society in Psychology

Learn more about student organizations for psychology majors.

The Undergraduate Psychology Majors Association

The goal of the Psychology Majors Association (PMA) is to provide opportunities for students to apply their appreciation of psychology through activities outside of the classroom. PMA also promotes networking between students and faculty members within the psychology department. PMA members participate in a variety of opportunities including volunteer work, field trips, workshops on graduate school, current topics in psychology, and career development. More information is available at Psychology Majors Association.

Psychology Majors of Color

Psychology Majors of Color bridges the gap between psychology students of color (and other related fields) by providing a common place to convene to create a sense of community. We touch upon mental wellness issues within communities of color as well as making sure that our members are able to thrive within their career paths post-Temple by providing them with the necessary skill sets. By creating this common space, we provide a supportive environment for our members to uplift each other's professional goals. For more information, contact templepmc@gmail.com.

Psi Chi - The National Honor Society in Psychology

Psi Chi, the National Honor Society in Psychology, has an active chapter at Temple University. The minimum requirements for membership in Psi Chi are a 3.20 cumulative GPA and a 3.50 GPA in Psychology courses. Psi Chi members are given opportunities for growth and development within the field of psychology. Psi Chi encourages students to engage in research opportunities within psychology as well as continue their education in graduate studies. For more information, contact psichi@temple.edu.

Phi Beta Kappa

Phi Beta Kappa is the oldest honor society in the United States. It was developed to foster and recognize excellence in the humanities and sciences. More information about Phi Beta Kappa requirements and activities is available at Honor Societies (p. 61).

Advising Resources

The Department of Psychology and Neuroscience has its own academic advisor for undergraduate students. Psychology majors are encouraged to contact the department advisor with questions about the curriculum and graduation requirements. In addition, psychology majors should contact the advisor for:

- Capstone Registration,
- Psychology Internship Inquiries,

- Research Credits, and
- Adding a Psychology Course After the Open Drop/Add Period.

Learn more about the Bachelor of Arts in Psychology.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are PSY 3096 Conducting Psychological Research and one of the following capstone courses: PSY 4696 or PSY 4996.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. PSY 1002 Careers in Psychology is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;

- Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
- The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (minimum 44 credits; 40 credits in Psychology plus 4 credits in a designated science area)

Code	Title	Credit Hours
Introductory Courses Required		
PSY 1001 or PSY 1901	Introduction to Psychology Honors: Introduction to Psychology	3
PSY 1002	Careers in Psychology	1
PSY 1003	Statistics for Psychology	3
PSY 1004	Critical Thinking in Psychology	3
Psychology Science Requirement		
Select one of the following:		4
BIOL 1001	Human Biology	
BIOL 1011	General Biology I	
CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I	
CHEM 1027	Applications of Chemistry	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
PHYS 1021	Introduction to General Physics I	
EES 2001	Physical Geology	
Developmental/Clinical/Social (DCS) Foundation Courses ¹		
Select two of the following:		6
PSY 2201	Foundations of Psychopathology	
PSY 2301	Foundations of Developmental Psychology	
PSY 2401	Foundations of Social Psychology	
PSY 2402	Foundations of Industrial and Organizational Psychology	
PSY 2601	Foundations of Health Psychology	
Brain and Cognitive Sciences (BCS) Foundation Courses ¹		
Select two of the following:		6
PSY 2101	Foundations of Cognitive Psychology	
PSY 2103	Foundations of Learning and Behavior Analysis	
PSY 2104	Foundations of Sensation and Perception	
PSY 2501	Foundations of Behavioral Neuroscience	
PSY 2502	Foundations of Cognitive Neuroscience	
Required Methods Course		
PSY 3096	Conducting Psychological Research	3
Advanced Courses (3000-3620)		
Select three of the following: ²		9
PSY 3002	Evolutionary and Comparative Psychology	
PSY 3003	Advanced Undergraduate Statistics	

PSY 3005	Affective Neuroscience
PSY 3100	Topics: Brain, Behavior and Cognition
PSY 3151	Direct Applications of Behavioral Principles
PSY 3200	Topics: Clinical
PSY 3221	Clinical Psychology: Research and Practice
PSY 3223	Child Psychopathology and Treatment
PSY 3301	Phases of Development: Infancy
PSY 3303	Psychological Testing: Measuring IQ, Thoughts, Feelings, and Attitudes
PSY 3304	Personality, Social and Emotional Development
PSY 3305	Cognitive and Language Development
PSY 3306	Neuroscience of Development and Aging
PSY 3411	Social Cognition
PSY 3417	Personnel Psychology
PSY 3418	Human Performance Improvement
PSY 3561	Psychopharmacology
PSY 3566	Neurobiology of Learning and Memory
PSY 3600	Advanced Topics in Health Psychology
PSY 3601	Social Health Psychology
PSY 3602	Clinical Neuropsychology
PSY 3603	Clinical Applications of Health Psychology
PSY 3615	History and Systems of Psychology
PSY 3620	Topics in Psychology
CJ 3408	Forensic Psychology

Psychology Elective

One additional course at the Foundation Level or the Advanced Level (2000-3620). 3

Capstone Course³

Select one of the following: 3-4

PSY 4696	Capstone in Psychology
PSY 4996	Honors Capstone

Total Credit Hours 44-45

1

Foundation courses are prerequisites for the advanced (3000-level) areas.

2

Select three from any of the advanced courses (3000-3620) for which you have completed the prerequisite foundation course. These courses cover specialty areas within particular fields of psychology.

Note: PSY 3096 does not count toward the requirement.

3

Seniors only - minimum of 90 credits completed and completion of PSY 3096.

Individual Study Courses

Permission of the instructor is required to register for these courses. For all Psychology majors and minors.

Code	Title	Credit Hours
PSY 4182 & PSY 4282	Independent Study in Cognitive Neuroscience I and Independent Study in Cognitive Neuroscience II	6
Select one of the following:		1-4
PSY 3791	Collaborative Research I	
PSY 3891	Collaborative Research II	
PSY 4791	Collaborative Research III	
PSY 4891	Collaborative Research IV	

PSY 3785	Psychology Internship	3
PSY 3787	Practicum	3

1

PSY 1002 Careers in Psychology completes the CLA Professional Development requirement.

Psychology Minor

Overview

The **Minor in Psychology**, offered by the Department of Psychology and Neuroscience, introduces the student to a representative array of Psychology courses, prepares the student for the minimal course requirements for acceptance to most Psychology graduate schools, and results in formal university recognition on the student's official transcript.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Locations: Main and Japan

Public Policy Minor

Overview

The **Minor in Public Policy**, offered by the Department of Political Science, combines a student's interest in their major discipline or particular societal issue with the study of how public policies are created, implemented, and how they impact specific populations. This minor is specially designed to integrate well with many disciplines in CLA and several in other colleges. Students take two specifically required courses in Public Policy combined with four policy-related electives. See the Public Policy advisor for more options such as special topics courses that might complete this requirement. This six-course program may be completed in as few as two semesters.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Curricular Overlap Policies

Students majoring or minoring in Political Science may count PLCY 2103/POLS 2103 and PLCY 3151/POLS 3151 towards that program.

Students in the Public Policy minor have flexibility in the electives and may count up to two courses towards another major, minor, or certificate program in the College of Liberal Arts. CLA students may count CLA courses numbered 2000-4999 towards the upper level CLA requirement. Non-CLA courses count towards free electives only.

Students may not declare this minor after application to the Accelerated Master of Public Policy (4+1) Program. Students may declare this minor and later apply to that program and no courses will double-count between the two programs.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

This minor requires 6 courses for a total of 18 credits. The courses are distributed as follows:

Code	Title	Credit Hours
Required Policy Courses		
PLCY 2103 or POLS 2103	Making Public Policy	3
PLCY 3151 or POLS 3151	Public Policy Analysis	3
Policy-Related Electives		
Select four from the following:		12
College of Liberal Arts Electives		
CJ 2001	Introduction to Juvenile Justice	
CJ 2002	Victims in Society	
CJ 2201	Criminal Courts and Criminal Justice	
CJ 2301	Introduction to Corrections

HRM 2501	Introduction to Human Resource Management
HRM 2511	Corporate Sustainability: People, Profits & Planet
HRM 3501	Power, Influence and Negotiation
HRM 3512	Human Resource Management and Public Policy

Total Credit Hours**18**

Religion BA

Overview

Religion is a pervasive, powerful, multifaceted and enduring dimension of human experience. Religions have shaped complex cultures and countless individual lives. Religions are influential in the world today and will continue to be so in the future.

The academic study of religion is multidisciplinary, drawing upon approaches from history, literary studies, philosophy and the social sciences. It is multicultural, exploring the beliefs, practices and development of particular religious communities in many different cultures. The Department of Religion provides a wide array of courses introducing students to the major religions of the world, with an emphasis upon the comparison of traditions and their encounter with one another. Instruction is offered in African and African American religions, Buddhism, Christianity, Confucianism, Hinduism, Judaism and Daoism.

The **Bachelor of Arts in Religion**, offered by the Department of Religion, is very flexible by design; it easily accommodates study abroad plans, internship opportunities, or a second major or minor in a related discipline. The Religion major provides graduates with the knowledge base and the intellectual, analytical, communication and interpersonal skills essential to succeed in any career. Consult your academic advisor to develop a plan of study that meets your professional goals.

Campus Location: Main

Program Code: LA-REL-BA

Career Preparation

Students who major in Religion develop a useful skill set that is in demand in a number of professions. Cultural sensitivity, analytical thinking, and excellent writing and verbal communications are the necessary training for careers related to public service, diplomacy, journalism, counseling, research, social work, health and human services, conflict resolution, and government. Some students go on to further study in doctoral programs, law school, medical school, or prepare for the ministry.

Employment prospects after graduation include the fields of journalism and communications, social work, ministry/chaplaincy, pre-law, pre-med/health services, government/FBI, non-profit organizations, hospice/end-of-life care, international enterprise, education, academic research, human resources, tourism and hospitality.

Distinction in Major

For graduation with Distinction in Major, an overall GPA of 3.25 is required along with a GPA of 3.5 in Religion courses.

Learn more about the Bachelor of Arts in Religion.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. All students take the Capstone, REL 4096, and one upper level elective in Religion that is designated as WI.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
 - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
 - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
 - **Professional Development Requirement**

- All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Eleven courses in Religion (33 credits)

Code	Title	Credit Hours
Required Courses		
REL 1001	Religion and Society	3
Writing-Intensive Course		
Select one designated writing intensive course in Religion numbered 2000+		3
Electives		
Select eight (8) courses in Religion, numbered 2000-4999		24
Capstone

Religion Minor

Overview

The **Minor in Religion**, offered by the Department of Religion, is an excellent addition to the degree programs in the College of Liberal Arts or other colleges throughout Temple University. Students who have an interest in world history and providing sensitive patient care will find this program of study especially helpful.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

REL 1001	Religion and Society	3
Five Religion courses 2000+		15
Total Credit Hours		18

Social Science Research Certificate

Overview

The **Certificate in Social Science Research**, offered by the Department of Sociology, provides undergraduate students the opportunity to acquire a diverse range of skills in applied statistics and research. The acquisition of these skills places students in a competitive position in a labor market that requires not only the mastery of specific skill sets, but also the flexibility to respond to changing jobs and job requirements.

The program is inherently interdisciplinary and students can design a program of study that pushes them to develop a wide range of skills. Where there is an overlap in requirements, students in CLA may "double count" up to two courses in their major with this program. (Note: These do not carry additional credits.)

This program is open to any matriculated Temple University undergraduate student.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-SSR-CERT

PSY 2401	Foundations of Social Psychology	
PSY 3003	Advanced Undergraduate Statistics	
SOC 3575	Population Studies	
SOC 4001	Qualitative Research	
SOC 4002	Data Analysis	

Total Credit Hours
15

Other electives may be added to this list as new courses are developed. See advisor for more information.

Sociology BA

Overview

The **Bachelor of Arts in Sociology** is offered by the Department of Sociology.

Sociology is the study of human behavior in the context of the groups, organizations, institutions, and societies in which it occurs. The sociology department offers courses covering a wide range of topics, including: contemporary social issues, race and racism, sexuality and gender, health and health care, education, urban life, housing, organizations, family, political life, popular culture, immigration, law, international development and globalization. The sociological perspective pays close attention to diversity in culture, values and human experience.

Campus Location: Main

Program Code: LA-SOC-BA

Accelerated Programs

Sociology majors may opt to do a Bachelor of Arts in Sociology (or the Health Track option) and apply to earn an accelerated master's degree. Sociology has three programs:

- BA in Sociology with an MA in Sociology
- BA in Sociology with an MEd in Advocacy and Organizational Development
- BA in Sociology with an MEd in Secondary Education (Social Studies)

For more information on other master's programs that accept students from any major in CLA, see Accelerated Degree Programs (p. 1792).

Careers Related to Sociology

Majoring in sociology prepares students for many careers and graduate programs by providing both a broad sociological perspective and specific research, statistical and analytic skills. Students gain experience in fieldwork and interviewing; they develop, administer and analyze surveys and statistics; and they write research reports. Sociology provides an excellent background for students planning to begin their careers upon graduation as well as those planning to pursue graduate education. Recent graduates have gone to work and graduate school in the areas of law, medicine, business, non-profits, community planning, social work, market research and education. Students who are interested in a career in the health field can pursue a special sociology major option focused on health-related coursework. The Health Track option (p. 1159) prepares students for graduate studies in leading medical, dental, nursing, public health, and physical and occupational therapy programs as well as graduate programs in sociology and related fields.

Student Organizations and Opportunities

Sociology majors and minors are encouraged to participate in the Sociology Undergraduate Majors and Minors Association (SUMMA), which hosts academic, community service and social events throughout the year. The department sponsors an annual student research conference where students can present their work.

Awards

Awards available to sociology majors include the Robert K. Merton Award, the Sociology Prize, the Benjamin and Irma Robboy Award, and the Nelsi Beato Award.

Distinction in Major

Sociology majors graduate with distinction in the major if they have a GPA of 3.5 or higher in the major and a minimum cumulative GPA of 3.25.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are SOC 3396 and SOC 4096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including:
 - 90 credits in CLA/CST courses;
 - 45 credits of which must be at the upper level (numbered 2000-4999).
 - For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art and Architecture, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**
 - All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
 - All students must complete at least one course from the GenEd Global/World Society category; and
 - All Bachelor of Arts students must complete one of the following options:
 - Third semester of a foreign language;
 - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
 - Take one Global Studies course from the list on the CLA College Requirements (p. 940) page;
 - Study Abroad at an approved program; or
 - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (36 credits)

Code	Title	Credit Hours

Sociology Minor

Overview

The **Minor in Sociology** is offered by the Department of Sociology. Sociology is the study of human behavior in the context of the groups, organizations, institutions and societies in which it occurs.

Sociology majors and minors are encouraged to participate in the Sociology Undergraduate Majors and Minors Association (SUMMA), which hosts academic, community service and social events throughout the year. The department sponsors an annual student research conference where students can present their work.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

The minor in Sociology requires a minimum of six courses:

Code	Title	Credit Hours
SOC 1176	Introduction to Sociology	3
or SOC 1576	Introduction to Sociology for Health Professions	
Five Sociology electives at the 2000 level or above		15
Total Credit Hours		18

Sociology of Health Minor

Overview

The **Minor in Sociology of Health** is offered by the Department of Sociology. Sociology is the study of human behavior in the context of the groups, organizations, institutions and societies in which it occurs.

Sociology majors and minors are encouraged to participate in the Sociology Undergraduate Majors and Minors Association (SUMMA), which hosts academic, community service and social events throughout the year. The department sponsors an annual student research conference where students can present their work.

This minor is not open to Sociology majors or Sociology majors pursuing the Health Track option.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

The minor in the Sociology of Health requires a minimum of six courses, three of which are health-related.

Code	Title	Credit Hours

Spanish and Latin American Studies for Business Certificate

Overview

This interdisciplinary **Certificate in Spanish and Latin American Studies for Business** is designed to allow Temple students in business-related programs to develop skills and knowledge in two complementary areas so that they may compete more successfully in this growing job market. To earn this certificate, students need a minimum of 18 credits.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-SLSB-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Spanish and Latin American Studies for Business.

Total Credit Hours**18**

1

Students participating in SPAN 1076 must also complete SPAN 2002.

2

SPAN 1076 or SPAN 2098 count as two of the three required courses; each is 9 s.h. and taught in connection with the Latin American Studies Semester (LASS), an immersion program offered every spring. Students who choose this option must take at least one additional language course from this list.

3

These courses are part of the Latin American Studies Semester. The LASS Program is an integration of several courses totaling 17 s.h.: 9 credits are assigned to language instruction, 6 credits to culture and society, taught under LAS 2101 and SOC 2163, and 2 credits to the LASS Seminar. All instruction in LASS is in Spanish. The LASS Program runs every Spring term. For more information on the Latin American Studies Semester, visit <https://liberalarts.temple.edu/academics/departments-and-programs/spanish-and-portuguese/study-abroad#latin-american-studies-semester-lass>.

Spanish and Latinx Studies for the Health and Human Services Professions Certificate

Overview

The 18-credit **Certificate in Spanish and Latinx Studies for the Health and Human Services Professions** prepares undergraduate students to communicate effectively in Spanish within medical and related human-service areas. The combination of courses in this certificate program is designed to make participants especially qualified to provide health and human services to members of the Latinx community.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-SLSH-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Spanish and Latinx Studies for the Health and Human Services Professions.

Requirements

To earn this certificate, students need a minimum of 18 credits.

Code	Title	Credit Hours
Spanish Language - Select three of the following:		9
SPAN 1001	Basic I	
SPAN 1002	Basic II	
SPAN 1003	Intermediate	
SPAN 2001	Conversational Review	
SPAN 2096	Composition	
SPAN 2002	Hispanic Readings	
SPAN 1076	Intensive Practice in the Four Skills ¹	
SPAN 2098	Advanced Intensive Practice in the Four Skills ¹	
SPAN 2011	Spanish for Heritage and Bilingual Speakers	
Select one of the following courses in Spanish language for health/medical professions:		3
SPAN 3601	Spanish for Health Professions	
SPAN 3602	Medical Spanish	
Select one of the following courses focused on Latin American culture:		3
LAS 1001	Perspectives on Latin America	
LAS 2101	Latin America through Film and Fiction	
SPAN 3204	Latin America through Film	
SPAN 3241	The Cultures of Latin America	
SPAN 3261	The Hispanic World	
Select one of the following courses on Latinx population in the United States:		3
LAS 0854	Latino Immigration	
or SPAN 0854	Latino Immigration	
LAS 2072	Puerto Ricans in Philadelphia	
LAS 3020	Topics in Latino Studies	
LAS 3101	Latino Identity in the United States	
SPAN 4152	U.S. Latino/a Studies	
SPAN 4885	Internship	
Total Credit Hours		18

1

SPAN 1076 or SPAN 2098 count as two courses; each is 9 s.h. and taught in connection with the Latin American Studies Semester (LASS), an immersion program offered every spring. Students who choose this option need only take one additional course from this list.

Spanish BA

Overview

The **Bachelor of Arts in Spanish** is offered by the Department of Spanish and Portuguese. The department prepares students to engage with diverse communities both at home and abroad through the development of language skills and intercultural competencies. The department provides instruction in the languages, cultures and literatures of Spain, Latin America and the Luso-Brazilian world as well as professional courses in business, criminal justice, law and healthcare. Coursework at the undergraduate level in Spanish, Portuguese or Catalan develops proficiency in the four basic skills: speaking, listening, reading and writing. Opportunities are also available for the in-depth study of Hispanic and Luso-Brazilian culture. Students may participate in special programs, such as an intensive Spanish-language immersion program in Latin American Studies; community engagement and internships in areas of healthcare, social service, government and education in Philadelphia; and diverse programs abroad.

Students selecting the Spanish major must achieve competence in Spanish language skills in conjunction with qualifications outlined in one of three options:

- The **Language, Literature and/or Linguistics** option is designed for students who wish to develop advanced language skills in the study of Latin American Literature, Peninsular Literature, and/or Linguistics.

- The **Language and Professional Studies** option is designed for students who wish to develop language and professional skills as well as an awareness of Hispanic culture.
- The **Spanish for Education** option includes the Spanish-language courses required for certification in Spanish for Secondary Education in the College of Education and Human Development at Temple University and satisfies the requirements for the Spanish major in the College of Liberal Arts.

Campus Location: Main

Program Code: LA-SPAN-BA

Student Organizations

Spanish and Portuguese organizations and activities include Sigma Delta Pi, the National Hispanic Honor Society, the scholarly publications of the Society of Spanish and Spanish-American Studies, and the Spanish and Portuguese Clubs and Film Series.

Career Options

Graduates of the Department of Spanish and Portuguese find careers in a wide range of areas, including public health, education, business, government and social services.

Distinction in Major

Distinction in Major is awarded to Spanish majors who graduate with a 3.75 GPA in Spanish courses and a cumulative GPA of at least 3.25.

Internships and Community Engagement

The internship experience provides students the opportunity to learn more about the discipline and potential career paths through a workplace experience. Students may earn up to 3 credits towards the requirements of the major through enrollment in the internship course (SPAN 4885) and an internship placement. Interested students should contact Augusto Lorenzino (galorenz@temple.edu) for more information.

Accelerated BA/MA in Spanish (4+1) Program

An accelerated 4+1 BA/MA in Spanish degree program is designed for students who wish to graduate with both an undergraduate and a graduate degree in just 5 years. The program is suitable for highly accomplished Spanish majors who have excelled in their studies during the first 3 years at the Department of Spanish and Portuguese, and who see the benefits of adding a master's degree to their academic credentials. Undergraduate students interested in the 4+1 accelerated BA/MA degree program in Spanish must declare their intent and apply to the program during their junior or fourth year. Students admitted to this program begin taking graduate courses, along with their undergraduate curriculum, in their last three undergraduate semesters. After completing their Bachelor of Arts degree, they then complete the remaining requirements of a Master of Arts in Spanish in the fifth year. Eligible students will have a GPA of 3.5 or higher in Spanish and at least a 3.25 overall GPA. For more information, contact Victor Pueyo (vpueyozo.temple.edu).

Study Abroad Opportunities

Latin American Studies Semester Program

Each spring semester, the Spanish and Portuguese Department offers a 17-credit immersion program in Latin American Studies and Spanish (LASS). The LASS program combines 9 hours of intensive Spanish with 8 hours of study focusing on geography, history, culture in Latin America and Latinos in the United States in addition to a short-term study trip to a Spanish-speaking country. Successful completion of the program is awarded with a certificate of participation. The rolling admissions application process is open from April to November for the following spring. For more information, contact the Program Director Montserrat Piera (mpiera01@temple.edu) or visit the the program's web site.

Spring in Spain Program

The Temple Semester in Spain Program takes place during spring semester in Oviedo, Spain. The 15-credit program combines coursework with faculty from the International Program at the University of Oviedo and with a Temple faculty member who directs the program. All courses are pre-approved for Temple University credit. Courses focus on aspects of Spanish language, culture and literature. The program develops Spanish skills over a semester of intensive study in a Spanish-speaking environment; it also provides the opportunity to complete a number of Spanish courses that may be used to satisfy the requirements for the Temple major or minor in Spanish. The program begins with an initial orientation week in Madrid prior to the start of the semester. In Oviedo, lodging and meals are with Spanish families. For further information, contact the Program Director Jaime Duran (jduran@temple.edu) in the Department of Spanish and Portuguese or the Office of Education Abroad and Overseas Campuses.

Summer Abroad in Spain: Spanish Language and Culture

Temple University's summer program in Oviedo, Spain, provides students with the opportunity to learn the Spanish language while being immersed in that country's unique and diverse culture. The duration of the program is five weeks; students may enroll for a total of 6 credits. For further information, contact the Program Director Jaime Duran (jduran@temple.edu) in the Department of Spanish and Portuguese or the Office of Education Abroad and Overseas Campuses.

Learn more about the Bachelor of Arts in Spanish.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Requirements

This section provides the requirements for each of the following options:

- Language, Literature and/or Linguistics (p. 1168)
- Language and Professional Studies (p. 1169)
- Spanish for Education (p. 1170)

Language, Literature and/or Linguistics Option

Summary of Degree Requirements

University Requirements

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are SPAN 2096 or SPAN 2098, and SPAN 3096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 83) of the *Undergraduate Bulletin* for more details.

College of Liberal Arts Requirements

- Completion of a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999).
- **Distribution Requirement for Humanities majors:** Six upper level credits must be earned in the Social Science, Science, and/or interdisciplinary subject areas. Select from the following CLA departments and programs: Africology & African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Gender, Sexuality, and Women's Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, and Sociology, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Professional Development Requirement**

- All students in the College of Liberal Arts are required to take a 1 credit seminar in professional development. CLA 1002 Professional Development for Liberal Arts Majors is the appropriate course option for this major. Other courses that fulfill this requirement may be found on the CLA College Requirements (p. 940) page. Only one course in this category may count towards graduation.
- **Foreign Language/Global Studies Requirements**
 - The requirements for the major in Spanish exceed the CLA minimum for this requirement.
 - **Notes on Foreign Language Study**
 - The third level of language is numbered 1003 in French, German, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
 - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
 - See the College of Liberal Arts Policies (p. 938) section of this *Bulletin* for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.
- **General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (30 credits)

- Prerequisites: SPAN 1001, SPAN 1002, and SPAN 1003.
- After completion of prerequisite courses, a total of ten courses are required for the major:

Code	Title	Credit Hours
Writing Intensive Courses		6
SPAN 2096	Composition (prerequisite for most 3000-level courses)	
SPAN 3096	Advanced Analysis and Writing Skills ¹	
Electives		24
A maximum of two electives may be selected at the 2000 level		
A maximum of three electives may be selected at the 3000 level		
A minimum of three electives must be selected at the 4000 level		
Total Credit Hours		30

1

Indicates writing capstone for the major.

Note: Up to two Catalan or Portuguese courses may be taken in place of two Spanish 2000/3000 level courses.

Language and Professional Studies Option

Spanish Certificate

Overview

The 20-credit undergraduate **Certificate in Spanish**, offered by the Department of Spanish and Portuguese, prepares students for careers in the public and private sectors, working in an array of professional areas that include education and international relations. Additionally, students with this certificate pursue graduate studies in law school, medical school and other professional degree programs.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-SPAN-CR2+

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Learn more about the undergraduate certificate in Spanish.

Requirements

The certificate requires completion of six courses, beginning with SPAN 1001 and advancing to more specialized study of Spanish designed to enhance career opportunities in business, communication, government, and social service.

Code	Title	Credit Hours
SPAN 1001	Basic I	4
SPAN 1002	Basic II	4
SPAN 1003	Intermediate	3
SPAN 2001	Conversational Review	3
SPAN 2096	Composition ¹	3

Spanish Minor

Overview

The **Minor in Spanish**, offered by the Department of Spanish and Portuguese, prepares students to engage with diverse communities both at home and abroad through the development of language skills and intercultural competencies.

Spanish and Portuguese organizations and activities include Sigma Delta Pi, the National Hispanic Honor Society, the scholarly publications of the Society of Spanish and Spanish-American Studies, and the Spanish and Portuguese Clubs and Film Series.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Six courses (18 credits) numbered 2000-4999 are required; the distribution of courses depends on the individual student's proficiency level. See the faculty advisor in Spanish for more information.

Code	Title	Credit Hours
	A maximum of three Spanish courses at the 2000 level	0-9
	A minimum of three Spanish courses at the 3000 level or higher	9-18

Sports and Society Certificate

Overview

The four-course **Certificate in Sports and Society** is designed to appeal to students who are interested in careers in sports management, training, or writing, or who want a more in-depth understanding of the role of sports in both U.S. and global societies.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Program Code: LA-SPSO-CERT

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
Four courses, distributed as follows:		12
Select one introductory course from:		
SOC 2111	Sociology of Sports	
SRM 1211	Sport, Entertainment and Society	
Select up to two courses from the following array in Liberal Arts: ¹		
ECON 3541	The Economics of Sports	
HIST 2116	Baseball and American History	
HIST 2117	History of Global Soccer	
REL 2005	Religion and Sports	
SOC 2122	Global Sports	
Select up to two courses from the following array in Sport and Recreation Management or the College of Public Health: ²		
SRM 3221	Athletics Administration	
SRM 3222	Global Sport Management	
SRM 3224	Media and Communications in Sport and Recreation	
SRM 3225	Recreation and Leisure Service Management	
KINS 4196	Sociology of Physical Activity	

1

If SOC 2111 is selected for the required introductory course above, only one course may be taken from this array.

2

If SRM 1211 is selected for the required introductory course above, only one course may be taken from this array.

Visual Anthropology Minor

Overview

The **Minor in Visual Anthropology**, offered by the Department of Anthropology, can deepen a student's understanding of how anthropologists use and study audiovisual media with courses examining film, television, photography and other forms of audiovisual expression. Students learn how to analyze media, especially within and across various cultural contexts, and grapple with the problem of how mass media reflects and influences people's social worlds and everyday lives.

The Visual Anthropology minor is not open to Anthropology majors.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Campus Location: Main

Contact Information

Please contact the College of Liberal Arts' Center for Academic Advising for more information on minors, certificates or other CLA programs.

Requirements

Code	Title	Credit Hours
Production of Anthropological Media Requirement ¹		
Select one of the following:		3
ANTH 2409	Introduction to the Production of Anthropological Media	
ANTH 3439	Anthropology of Photography	
ANTH 3444	Advanced Production of Anthropological Media	
Visual Anthropology Electives ¹		
Select five of the following:		15
ANTH 2432	Indigenous Media	
ANTH 2434	Anthropology of Feature Films	
ANTH 3324	Anthropology and Art	
ANTH 3433	Ethnographic Film	
ANTH 3436	Anthropology of New Media	
ANTH 3438	Anthropology of Mass Media	
ANTH 3439	Anthropology of Photography	
ANTH 3444	Advanced Production of Anthropological Media	
Total Credit Hours		18

¹ If more than one course from the Production array is taken, additional courses count as Visual electives.

Low Klein College of Media and Communication

Overview

Goals and Objectives

The Low Klein College of Media and Communication generates knowledge and educates students to be ethical, analytical and creative leaders, producers and citizens in a multimedia and multicultural society. This mission is pursued through the training of students for leadership careers in media and communication, through advancing research and creative activity in these fields, and through serving the public need for free and open communication. The college is concerned not only with high standards of professional work but also with encouraging the next generation of teachers and media managers to develop an intellectual background and a sense of social responsibility. Toward this end, Klein students are encouraged to take coursework in disciplines outside the college. For some, history and political science are related areas of interest; others choose literature and the arts; still others choose business, economics, or the social sciences. In this way, the college participates in providing not only professional training but also a broad humanistic education for its students.

The faculty of the college comes from diverse backgrounds. Many come to the college through academic study, doing graduate work and continuing the practice of research and scholarship while teaching at Temple. Others have extensive professional experience as journalists, television producers, speech writers, advertising executives, and public relations practitioners.

Renowned for their research, teaching, and professional experience, our faculty prepare our graduates for a wide range of careers in media and communication industries, as well as lead graduate students towards PhD, MA, MS, and MJ degrees.

History

The study of communication began formally at Temple University with the founding of the Department of Journalism in 1927. It was the first such department in the Commonwealth of Pennsylvania.

Theater was an extracurricular activity at Temple until 1931, when formal courses were developed.

Radio-Television became an instructional division in 1947, and extensive film offerings were added in 1967. That year, Journalism and Radio-Television-Film joined Theater to form the School of Communications and Theater. In 1987 the highly respected Department of Speech moved to the school from the College of Arts and Sciences. A year later, Speech became two departments: Rhetoric and Communication, and Speech-Language-Hearing.

The school was restructured in 1995. Radio-Television-Film became the Department of Film and Media Arts and the Department of Broadcasting, Telecommunications, and Mass Media; Journalism became Journalism, Public Relations, and Advertising; Rhetoric and Communication became Speech Communication. In 1998, the Department of Communication Sciences (Speech-Language-Hearing) moved to the College of Health Professions.

Effective Fall 2004, a change occurred with the Departments of Journalism, Public Relations and Advertising, and Speech Communication. Advertising became a separate department. The Department of Speech Communication changed its name to Strategic and Organizational Communication and included Public Relations as one of three concentrations: Public Communication (formerly Speech Communication), Public Relations, and Organizational Leadership. In 2010, the Department of Strategic and Organizational Communication changed its name to the Department of Strategic Communication.

In Fall 2011, Communication Studies replaced the former Communications major.

On July 1, 2012, the School of Communications and Theater was renamed the School of Media and Communication. It housed the departments of Advertising; Journalism; Media Studies and Production (formerly Broadcasting, Telecommunications, and Mass Media); and Strategic Communication. The Communication Studies program remained a part of the School of Media and Communication. The Departments of Theater and Film and Media Arts comprised the Division of Theater, Film and Media Arts and joined Boyer College of Music and Dance and the Tyler School of Art to form the Center for the Arts.

Also in 2012, the Department of Broadcasting, Telecommunications, and Mass Media changed its name to Media Studies and Production while the Department of Strategic Communication renamed the Public Communication concentration to Rhetoric and Public Advocacy.

On March 29, 2017, the School of Media and Communication was renamed the Low Klein College of Media and Communication in tribute to broadcasting pioneer Low Klein.

Effective March 2017, the Department of Strategic Communication was renamed the Department of Communication and Social Influence. The newly named department, along with a new major of the same name, introduced a new area of study in the communication discipline. Additionally, the Communication Studies major is housed in the Department of Communication and Social Influence. The Department of Advertising was renamed the Department of Advertising and Public Relations and offers a new major in Public Relations in addition to the existing Advertising major.

In fall 2017, the following minors were added: Content Creation, Digital Media Engagement, Journalism Studies, and International Communication.

In Fall 2019, the minor in Communication and Activism was added. Also, a new Production track for Communication Studies was established and is offered only in Temple Japan. Thus, there are five options for concentrating in Communication Studies: Communication and Entrepreneurship; Contemporary Media Environments; Global Civil Society; Policy, Regulation, and Advocacy; or the Communication Thesis (Major of Distinction) track.

In 2021, Klein officially launched the Certificate in Sports Media for undergraduates. Klein College also established the Jonathan Logan Family Foundation Center for Urban Investigative Journalism in 2021. The Logan Center will focus exclusively on the issues facing Philadelphia and other large American cities, including gun violence, economic inequality, education and health disparities, crumbling infrastructure and eroding trust in institutions. Through the Logan Center, Klein students and faculty will report aggressively not only on these problems, but on potential solutions, closely examining what has worked well in other cities and across the nation and the globe.

In 2023, Klein launched the BA in Audio and Live Entertainment, the BA in Virtual Media Management, a minor in Global Communication and Media Arts, and a certificate in Children's Media.

Academic Departments

The Lew Klein College of Media and Communication currently consists of the following departments:

- Advertising and Public Relations
- Communication and Social Influence
- Journalism
- Media Studies and Production

Diversity, Equity and Inclusion

Equity and diversity play a significant role in Klein College's hiring, cross-college initiatives, coursework and student life. For example, students launched the university's first Spanish language programming on TUTV, Temple University's television station, and in 2020 added its first Mandarin programming with *Temple Moment*. The capstone course in journalism, *Philadelphia Neighborhoods*, requires students to cover underserved parts of the city that receive less attention from traditional outlets.

In 2018, Klein College of Media and Communication received the Association for Education in Journalism and Mass Communication (AEJMC) Equity and Diversity Award, honoring the College's commitment to inclusion. The AEJMC Equity and Diversity Award recognizes academic programs that are working toward, and have maintained measurable success in, increasing equity and diversity within their units. AEJMC is a nonprofit association that promotes high standards for journalism and mass communication education, communication research and multicultural society in the classroom and curriculum. It also works to defend and maintain freedom of communication to improve professional practice and create a better-informed public.

In 2019, Assistant Professor of Public Relations David W. Brown was named Klein's first Diversity Advisor to the Office of the Dean. In this role, he launched a workshop series in the Fall of 2019 called "Can We Really Talk" for faculty in partnership with the University's Center for Advanced Teaching (CAT) and the IDEAL Office (Institute for Diversity, Equity, Advocacy, and Leadership) to better equip instructors to have uncomfortable conversations about diversity and race in our classrooms.

Special Facilities

Klein College of Media and Communication is housed in buildings designed for teaching, research and production.

The College's primary location is Annenberg Hall, which houses the Departments of Advertising and Public Relations, Journalism, and Media Studies and Production. Television and film production areas (studios and editing, graphics, and film labs) occupy the first floor. The building also includes extensive video and film editing areas, a 75-seat multimedia screening room, photographic labs, two news writing labs and smart classrooms.

The Department of Communication and Social Influence is housed in Weiss Hall.

The Joe First Media Center is located on the first floor, linking Annenberg and Tomlinson Halls. The Center is a communications and media hub for the college and includes a cyber-café, a multimedia information center, and a venue for displaying student work.

Special Programs

Klein Rising

Klein College requires that all new first-year and transfer students enroll in an introductory seminar course, either KLN 1001 or an equivalent course. Students enrolled in either KLN 1001 or KLN 2001 are assigned a Klein Rising Peer Mentor—a sophomore, junior, or senior-status student who guides new students through their first semester and beyond. The Klein Rising program is anchored by the seminar, and it also includes opportunities to get engaged with student organizations and academic research. The Klein Rising program includes a workshop series for all undergraduate and graduate students to explore co-curricular engagement opportunities throughout the year.

TUTV - Temple University Television

In Fall 2010, the university launched TUTV, a new regional cable television channel with associated new media platforms, which showcases the innovative work done by Temple students, faculty, and alumni.

TUTV offices and master control are located on the first floor of Annenberg Hall and is a part of the Kal & Lucille Rudman Media Production Center. The Rudman Center also features a broadcast studio and a computer-equipped classroom. The station features news, sports, music, comedy, and documentary programs. TUTV presents content from many of the university's other professional schools plus programs produced in association with community cultural groups and professional broadcasters. Student volunteers are also accepted. For more information, contact the TUTV General Manager at paul.gluck@temple.edu.

Temple Update

Temple Update is a production course in which students can gain experience producing, reporting, and editing for a half-hour weekly news magazine format. The program airs on a cable outlet. The course gives students the opportunity to produce material for a résumé tape and provides students with valuable experience in field work, news writing, video editing, and the pressure of a live program.

Career Services

The Klein College Career Center is an exclusive professional development resource for all Klein College students and alumni. Located in Annenberg Hall, Room 7, the Career Center is dedicated to helping students prepare for a life and career they want in the field of media and communication.

Our most recent survey shows 89% of our seniors found employment or went on to graduate school within 9 months of graduation. Over 80% of full-time and part-time jobs are related to their field of study.

The Director of Career Services, Lu Ann Cahn, is an author and an eight-time Emmy Award-winning journalist who launched the Career Center after 40 years of mentoring interns during her career in TV news. All students and alumni can meet with her and peer advisors to review résumés, cover letters and plan for their future.

The Career Center calendar includes weekly workshops for creating résumés, cover letters, LinkedIn profiles, a career network and job hunt specifically for the media and communication industry.

The Career Center offers individual recruiting and hiring events with employers and typically hosts two Klein College Internship and Career Fairs each year. At the Spring fair, more than 75 media and communication employers come to campus to recruit Klein College students.

The Klein Career Center is home to KleinConnect, an exclusive media and communication internship and job database. Students and alumni with approved résumés and cover letters can apply for the hundreds of opportunities updated in KleinConnect on a daily basis. Students and employers can access KleinConnect.

Every day students receive an email from KleinConnect with the latest internship postings. Alumni receive a weekly email with full time job opportunities.

Internship Program

Although the requirements may vary, internships are available to junior and senior students of every department in the college. Internships are for academic credit and must involve professional activity related to the student's course of study. The internships must be approved by the administrator or faculty member charged with supervising internships.

Global Opportunities

The Lew Klein College of Media and Communication offers several programs for undergraduate and graduate students who are interested in studying away and strongly encourages students to participate in these programs.

Global Opportunities offers programs ranging from a week-long excursion embedded in a course to a full semester away. There are several unique short-term opportunities for those who cannot be away a full semester. Students can choose to explore the Children's Media Industry in Los Angeles or The Art of Visual Storytelling in Puerto Rico. New short-term programs are added each year.

In 2021, Klein College developed a new program called Klein on the GO for Philadelphia-based excursions. Each semester, faculty and staff from Klein College lead small group tours around the region to help students connect what they're learning in the classroom to our surrounding urban environment.

Summer programs are also an important feature of the college's Global Opportunities, and one such program is the Global Internship Program. This program offers students the opportunity to participate in 8-week full-time internship opportunities in international locations including but not limited to: Barcelona, Melbourne, Mumbai, Paris, San José, Santiago, Shanghai, Singapore, Sydney, or Toronto, or students can select a U.S. location: New York City or Washington, DC. All students, regardless of their internship location, spend time together on Temple's Main Campus studying Intercultural Communications in the Workplace as a group before they depart for their chosen destination. Students work one-on-one with an industry expert so as to secure an internship in their desired field. Each of the programs is a unique combination that includes travel, learning, and exciting events, with a résumé building internship. Knowledge of a foreign language is not required to study in any of these locations. However, some previous experience with a city's local or national language can lead to even more internship opportunities while abroad.

All of the Klein Global Opportunities coursework can be counted towards the International Communication Concentration/Minor within Klein.

All semester and summer programs are open to qualified students from other universities and colleges and to others who choose to continue their education in a less formal manner than in a prescribed program of study.

Klein is also in the process of developing new Global Opportunities. Check with the Global Opportunities office for information on these developments. Current information on the Klein programs listed here is available from Klein Global Opportunities (e-mail: kleingo@temple.edu; phone: 215-204-2354).

See Education Abroad and Overseas Campuses (p. 55) for more information about University Study Abroad options.

Academic Policies and Regulations

Please see the Undergraduate Academic Policies (p. 1835) section of this *Bulletin*. Students are responsible for complying with all university-wide academic policies as well as those of the Lew Klein College of Media and Communication that appear below.

Academic Standing

A matriculated undergraduate student in the university is in Academic Good Standing if enrolled in a baccalaureate degree-seeking program.

Please see the University's policy on Academic Standing (p. 1840) for detailed information about Academic Warning, Academic Probation, and Academic Dismissal.

Change of Program

Students from other Temple University schools/colleges may change their primary major to Klein if they possess a cumulative GPA of 2.0 or higher. Students interested in switching their primary major into Klein, or adding a minor, certificate, or second major, should attend a Change of Program Information Session hosted by the Academic Advising Office. To sign-up for a Change of Program Information Session, please contact advise@temple.edu.

Credits Not Applied Toward the Degree

Credits earned in the following courses are not applied toward a degree in the Lew Klein College of Media and Communication: lower-level courses in Military Science.

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Re-enrollment

Students returning to the Lew Klein College of Media and Communication after an absence of one semester (unless an approved Leave of Absence form was filed prior to the leave) must use the *Undergraduate Bulletin* in effect at the time of readmission or any subsequent *Undergraduate Bulletin*. Credits more than 10 years old require additional review in order to determine if they remain applicable toward a degree in the college. For the re-enrollment form, please visit: <https://admissions.temple.edu/apply/request-re-enroll>.

Transfer Students

Refer to the Transfer Students Admissions (p. 27) section of this *Bulletin* for general information on transferring courses to Temple. In addition to these criteria, each department in the Lew Klein College of Media and Communication will evaluate any credit to be transferred into a major. The maximum number of credit hours allowed to transfer in for use toward major requirements are: 12 hours in Advertising; 20 hours in Media Studies and Production; 24 hours in Communication Studies; 9-12 hours in Journalism; 12 hours in Public Relations; and 12 hours in Communication and Social Influence.

College Requirements for Graduation

The Lew Klein College of Media and Communication requires 124 credits to graduate; completion of the university General Education (GenEd (p. 83)) (p. 83) requirements; completion of departmental requirements, including two writing-intensive courses in the major; and a minimum of 2.00 GPA, both cumulative and in the major.

Minimum and maximum credit requirements within each major are listed with the departmental requirements. Students are also required to complete KLN 1001 Klein First-Year Seminar or an equivalent course.

Students who are planning to graduate must schedule an official graduation review with their assigned academic advisor and complete the application for graduation at least one semester prior to the anticipated graduation date. Appointments may be made on the TUportal with the student's assigned academic advisor.

Program Descriptions

1. The total number of credit hours at graduation may be greater for some students based on initial placement exams, transfer evaluations, individual curricular choices, and academic progress.
2. Students must fulfill the necessary prerequisites for any given course or course sequence. See the Prerequisites and Co-requisites Policy (p. 1860) in the university-wide Academic Policies section of this *Bulletin*.

Advising

Klein Academic Advising
9 Annenberg Hall
2020 N. 13th Street
Philadelphia, PA 19122
215-204-5273
<https://klein.temple.edu/student-life/advising>
advise@temple.edu

Students in the Lew Klein College of Media and Communication are advised by professional academic advisors and faculty advisors. Klein College students can make advising appointments on the online appointment system, which is accessible on the Klein College tab on TUportal, or by visiting the Klein Academic Advising Center, located on the ground floor of Annenberg Hall. Consult your major departmental office for assignment to an appropriate faculty advisor. Effective Fall 2021, Klein Advising implemented a caseload advising system so that every student has an assigned academic advisor.

Academic advisors attempt to avoid errors when advising students about their program requirements, but schools and colleges cannot assume liability for errors in advising. Therefore, students must assume primary responsibility for knowing the requirements for their degree and for acquiring current information about their academic status.

Most students will be eligible to register for classes online via the Registration and Planning tab on Student Tools page of TUportal. However, all students should meet with an advisor prior to the eligible registration period. Students preparing to graduate must complete an online graduation application in their graduating term but should consult with an academic advisor at least one semester prior to the graduation date for advice and clarification of graduation requirements.

Faculty

Quaiser D. Abdullah, Assistant Professor of Instruction, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, Temple University.

Tracy Agostarola, Assistant Professor of Instruction, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; BA, Kutztown University.

Saleem Ahmed, Assistant Professor of Practice, Department of Journalism, Lew Klein College of Media and Communication; MFA, University of Hartford.

Osei Alleyne, Assistant Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Pennsylvania.

Jennifer Gerard Ball, Assistant Professor, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; PhD, University of Texas at Austin.

Jillian E. Bauer-Reese, Associate Professor of Practice, Department of Journalism, Lew Klein College of Media and Communication; MS, Philadelphia University.

Geoffrey Baym, Professor, Department of Media Studies and Production, Lew Klein College of Media and Communication; PhD, University of Utah.

Katherine M. Bex, Assistant Professor of Instruction, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; MS, Temple University.

David Boardman, Professor, Department of Journalism, Lew Klein College of Media and Communication; MA, University of Washington.

David W. Brown, Associate Professor of Instruction, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; ThM, Eastern University.

Lauren J. Bullock, Assistant Professor of Instruction, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; MS, Florida State University.

Deborah Cai, Professor, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, Michigan State University.

Guillermo G. Caliendo, Assistant Professor of Instruction, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, University of Pittsburgh.

Amy L. Caples, Assistant Professor of Instruction, Department of Media Studies and Production, Lew Klein College of Media and Communication; BA, Temple University.

Alice Castellini, Assistant Professor of Instruction, Department of Media Studies and Production, Lew Klein College of Media and Communication; MS, University of Pennsylvania.

Jessica Castonguay, Assistant Professor, Department of Advertising and Public Relations, Lew Klein College of Media and Communication; PhD, University of Arizona.

Olivia Cohen, Assistant Professor of Instruction, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, The Pennsylvania State University.

Thomas Wright, Associate Professor of Instruction, Department of Communication and Social Influence, Lew Klein College of Media and Communication; PhD, Purdue University.

Laura Zaylea, Associate Professor of Instruction, Department of Media Studies and Production, Lew Klein College of Media and Communication; MFA, San Francisco Art Institute.

Advertising BA with Account Management Concentration

Overview

Advertising is a competitive, creative and challenging industry that sits at the intersection of media and society. The **Bachelor of Arts in Advertising**, offered by the Department of Advertising and Public Relations, provides students with an overall understanding and appreciation of the influence advertising and marketing communications have in business and the social and economic orders. Students become acquainted with the language, processes and opportunities within the industry, including potential roles in strategic planning, research, copywriting, art direction, and media buying and planning. The major is designed to stimulate curiosity, strengthen critical thinking and create more astute consumers whether they enter the field of advertising or not.

Advertising students at Temple University fall into clearly-defined groups:

- Students interested in advertising as a career;
- Students with creative talent in art, design, writing and strategic thinking and wish to express that talent in a professional career;
- Students who are broadly interested in media and the power of advertising;
- Students interested in marketing, sales or business, but who do not wish to major in business or finance.

Students **must select one of the following concentrations**:

- Account Management,
- Art Direction,
- Brand Strategy and Research,
- Copywriting, or
- Media Planning.

An optional concentration in International Communication is also available for this major.

Account Management Concentration

The **Account Management concentration** prepares students for careers in management, which will open doors for students in a broad array of industries in today's complex, fragmented media landscape. In the three advanced Account Management courses (ADV 3031, ADV 3033, and ADV 4034) students learn about Digital Analytics and Reporting, Advertising Sales, and Account Management. Students are also required to take Introduction to Marketing (ADV 2111).

Campus Location: Main

Program Code: CO-ADV-BA

ADV 3042	Quantitative Advertising Research
ADV 3101	Creative Thinking for Advertising

Total Credit Hours **48**

1

Requires special permission from instructor.

Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities. The Internship Directors, faculty members and Klein's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Advertising with a Concentration in Account Management

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

1

See the list of elective options under Requirements. The courses students can take to fulfill their Advertising electives will vary from semester to semester.

2

ADV 3171, ADV 3185, and ADV 4103 require special permission from instructor.

Optional Concentration

The **optional International Communication Concentration** (ICC) provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	
MSP 3572	Communication and Development	
MSP 4453	Information Society	
MSP 4496	Global Media	
PR 2672	Global Communication and Leadership	
International/Intercultural Electives outside of Klein		
Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.		
Choose any two (2) courses of the following:		6-8
Up to any two foreign language courses		
Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any non-Klein internship taken in a Klein Global Opportunities International Program		
Anthropology		
ANTH 2238 or ASST 2238	Visual Anthropology of Modern Japan

Advertising BA with Art Direction Concentration

Overview

Advertising is a competitive, creative and challenging industry that sits at the intersection of media and society. The **Bachelor of Arts in Advertising**, offered by the Department of Advertising and Public Relations, provides students with an overall understanding and appreciation of the influence advertising and marketing communications have in business and the social and economic orders. Students become acquainted with the language, processes and opportunities within the industry, including potential roles in strategic planning, research, copywriting, art direction, and media buying and planning. The major is designed to stimulate curiosity, strengthen critical thinking and create more astute consumers whether they enter the field of advertising or not.

Advertising students at Temple University fall into clearly-defined groups:

- Students interested in advertising as a career;
- Students with creative talent in art, design, writing and strategic thinking and wish to express that talent in a professional career;

- Students who are broadly interested in media and the power of advertising;
- Students interested in marketing, sales or business, but who do not wish to major in business or finance.

Students **must select one of the following concentrations**:

- Account Management,
- Art Direction,
- Brand Strategy and Research,
- Copywriting, or
- Media Planning.

An optional concentration in International Communication is also available for this major.

Art Direction Concentration

Students in the **Art Direction concentration** develop hands-on skills in creating both digital and traditional advertising. Art Direction students must develop proficiency in the Adobe Creative Suite. Concentration courses are ADV 3052, ADV 3053 and ADV 4064. These courses must be taken consecutively and cannot be taken concurrently. The Portfolio class provides students the opportunity to work in teams with copywriters and to develop a professional-quality portfolio. ADV 2052 is a recommended elective for Art Direction students.

Note: Students must apply for acceptance in the Art Direction concentration after they have completed ADV 1001 and ADV 2151. Transfer students should apply immediately upon acceptance to Temple University. Learn more about the Portfolio Application process.

1

Requires special permission from instructor.

2

Sequence may not be taken concurrently.

Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities.

The Internship Directors, faculty members and Klein's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Advertising with a Concentration in Art Direction

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

1

See the list of elective options under Requirements. The courses students can take to fulfill their Advertising electives will vary from semester to semester.

2

ADV 3052 requires application and acceptance into the Art Direction concentration.

3

ADV 3171, ADV 3185 and ADV 4103 require special permission from instructor.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		

Select three of the following:

9

Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program

CSI 2401 Intercultural and Cross Cultural Conflict

CSI 3702 Communication, Culture and Identity

CSI 3703 Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)

JRN 3254 International Reporting

JRN 3706 Journalism and Globalization

MSP 3471 Media and Cultural Differences

MSP 3572 Communication and Development

MSP 4453 Information Society

MSP 4496 Global Media

PR 2672 Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Advertising BA with Brand Strategy and Research Concentration

Overview

Advertising is a competitive, creative and challenging industry that sits at the intersection of media and society. The **Bachelor of Arts in Advertising**, offered by the Department of Advertising and Public Relations, provides students with an overall understanding and appreciation of the influence advertising and marketing communications have in business and the social and economic orders. Students become acquainted with the language, processes and opportunities within the industry, including potential roles in strategic planning, research, copywriting, art direction, and media buying and planning. The major is designed to stimulate curiosity, strengthen critical thinking and create more astute consumers whether they enter the field of advertising or not.

Advertising students at Temple University fall into clearly-defined groups:

- Students interested in advertising as a career;
- Students with creative talent in art, design, writing and strategic thinking and wish to express that talent in a professional career;
- Students who are broadly interested in media and the power of advertising;
- Students interested in marketing, sales or business, but who do not wish to major in business or finance.

Students **must select one of the following concentrations**:

- Account Management,
- Art Direction,
- Brand Strategy and Research,
- Copywriting, or
- Media Planning.

An optional concentration in International Communication is also available for this major.

Brand Strategy and Research Concentration

Students following the **Brand Strategy and Research concentration** receive training that helps develop skills in strategic thinking and planning, understanding consumer behavior, conducting surveys, focus groups and other forms of research, analyzing data, testing copy and studying America's changing demographics. Strong research and strategic thinking skills will prepare students for a wide variety of careers in corporations, research firms, marketing companies and advertising agencies. Students in Brand Strategy and Research take ADV 3031, ADV 3043 and ADV 4044. ADV 3042 is a recommended elective.

Campus Location: Main

Program Code: CO-ADV-BA

Advertising BA with Copywriting Concentration

Overview

Advertising is a competitive, creative and challenging industry that sits at the intersection of media and society. The **Bachelor of Arts in Advertising**, offered by the Department of Advertising and Public Relations, provides students with an overall understanding and appreciation of the influence advertising and marketing communications have in business and the social and economic orders. Students become acquainted with the language, processes and opportunities within the industry, including potential roles in strategic planning, research, copywriting, art direction, and media buying and planning. The major is designed to stimulate curiosity, strengthen critical thinking and create more astute consumers whether they enter the field of advertising or not.

Advertising students at Temple University fall into clearly-defined groups:

- Students interested in advertising as a career;
- Students with creative talent in art, design, writing and strategic thinking and wish to express that talent in a professional career;
- Students who are broadly interested in media and the power of advertising;
- Students interested in marketing, sales or business, but who do not wish to major in business or finance.

Students **must select one of the following concentrations**:

- Account Management,
- Art Direction,
- Brand Strategy and Research,
- Copywriting, or
- Media Planning.

An optional concentration in International Communication is also available for this major.

Copywriting Concentration

Copywriters are responsible for the words and ideas that drive marketing communications in all its forms. Students in the **Copywriting concentration** take three advanced courses to help develop their conceptual skills and writing talents. The Portfolio class provides students the opportunity to collaborate with Art Directors and produce a professional-quality portfolio. Students following the Copywriting concentration take ADV 3022, ADV 3023 and ADV 4064.

Total Credit Hours**48**

1

Requires special permission from instructor.

Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities. The Internship Directors, faculty members and Klein's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Advertising: Copywriting Concentration**Suggested Plan for New Students Starting in the 2023-2024 Academic Year**

1

See the list of elective options under Requirements. The courses students can take to fulfill their Advertising electives will vary from semester to semester.

2

ADV 3171, ADV 3185, and ADV 4103 require special permission from instructor.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	
MSP 3572	Communication and Development	
MSP 4453	Information Society	
MSP 4496	Global Media	
PR 2672	Global Communication and Leadership	
International/Intercultural Electives outside of Klein		
Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.		
Choose any two (2) courses of the following:		6-8
Up to any two foreign language courses		
Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any non-Klein internship taken in a Klein Global Opportunities International Program		
Anthropology		
ANTH 2238 or ASST 2238	Visual Anthropology of Modern Japan

The **Bachelor of Arts in Advertising**, offered by the Department of Advertising and Public Relations, provides students with an overall understanding and appreciation of the influence advertising and marketing communications have in business and the social and economic orders. Students become acquainted with the language, processes and opportunities within the industry, including potential roles in strategic planning, research, copywriting, art direction, and media buying and planning. The major is designed to stimulate curiosity, strengthen critical thinking and create more astute consumers whether they enter the field of advertising or not.

Advertising students at Temple University fall into clearly-defined groups:

- Students interested in advertising as a career;
- Students with creative talent in art, design, writing and strategic thinking and wish to express that talent in a professional career;
- Students who are broadly interested in media and the power of advertising;
- Students interested in marketing, sales or business, but who do not wish to major in business or finance.

Students **must select one of the following concentrations**:

- Account Management,
- Art Direction,
- Brand Strategy and Research,
- Copywriting, or
- Media Planning.

An optional concentration in International Communication is also available for this major.

Media Planning Concentration

This concentration prepares students for careers in digital and traditional media buying and planning and media sales. These skills are highly valued by corporations, media companies, media sales organizations, media buying and planning firms, research companies and advertising agencies. Students study Digital Analytics and Reporting (ADV 3031), Advertising Sales (ADV 3033) and Advanced Media Planning (ADV 4054).

1

Requires special permission from instructor.

Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities.

The Internship Directors, faculty members and Klein's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

1

See the list of elective options under Requirements. The courses students can take to fulfill their advertising electives will vary from semester to semester.

2

ADV 3171, ADV 3185, and ADV 4103 require special permission from instructor.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	
MSP 3572	Communication and Development	
MSP 4453	Information Society	
MSP 4496	Global Media	
PR 2672	Global Communication and Leadership	
International/Intercultural Electives outside of Klein		
Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.		
Choose any two (2) courses of the following:		6-8
Up to any two foreign language courses		
Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any non-Klein internship taken in a Klein Global Opportunities International Program		
Anthropology		
ANTH 2238 or ASST 2238	Visual Anthropology of Modern Japan

Audio and Live Entertainment BA

Overview

During the first two decades of this millennium, the entertainment industries have undergone a profound transformation. Audio and popular music, in particular, have become more intertwined with and dependent upon media industries. Music consumers have shifted their focus from ownership to access and from artifacts to experiences. The recording industry has evolved away from marketing products to the consumer in favor of licensing the use of recordings to media platforms and outlets, and a focus on providing live music experiences has intensified, just as corporate events have grown increasingly media intensive. As social media provide performing artists with new channels for connecting with potential audiences, and as streaming services present new outlets and revenue streams (albeit small ones) for recorded music content, the number of popular music-oriented media properties (e.g., *American Idol*, *The Masked Singer*, *A Star Is Born*, *Bohemian Rhapsody*, *Rocket Man*, etc.) has dramatically increased.

Popular music is, now more than ever, part of the media landscape, and those earning their livelihoods in the popular music industries have never been more heavily invested in and dependent on media to provide sources of revenue.

To better prepare the next generation of media professionals for this new landscape, the **Bachelor of Arts in Audio and Live Entertainment (ALE)** is located at the intersection of media, live events, music and business. Offered by the Department of Media Studies and Production, its curriculum involves coursework in the Lew Klein College of Media and Communication, the School of Sport, Tourism and Hospitality Management, the Boyer College of Music and Dance, and the Fox School of Business and Management.

This program is ideal for students aspiring to be audio engineers, content creators, managers, mastering engineers, media entrepreneurs, publishers, promoters or recording artists. Students are immersed in the conception, creation, distribution, management and marketing of recorded audiobooks, concerts, music, nightclub performances, podcasts and more.

Campus Location: Main

Program Code: CO-ALE-BA

Learn more about the Bachelor of Arts in Audio and Live Entertainment.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Audio and Live Entertainment (ALE) by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 or higher overall and in the major.

Students must meet:

1. University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive (WI) courses in the major at Temple University. Whenever possible, it is recommended that students select these WI courses from courses that directly satisfy a specific ALE requirement to ease the path to program completion.
2. Lew Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
3. Minimum of 47 credits in the major / maximum of 68 credits in the major (total of MSP, MUST, HRM, LGLS, SGM, and STHM).
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. All prerequisites must be met unless exempted in writing.
6. No more than 20 transfer credits may be applied to the Audio and Live Entertainment major.
7. Total number of credits taken in internship, practicum, independent study, and independent project courses may not exceed 12 credits total.

Audio and Live Entertainment Major Requirements

Code	Title	Credit Hours
Foundation Courses ¹		
MSP 1701	Introduction to Media Production	3

Note: STHM 2401, STHM 3425, STHM 3428, and STHM 4415 combine for an Event and Entertainment Management Certificate in STHM that is available to ALE students. Limiting electives to 30 credits will provide sufficient space to complete this certificate without counting any course for more than one requirement.	
Note also: STHM 2401, STHM 3424, STHM 3425, STHM 3428, STHM 3429, and STHM 4415 combine for an Event and Entertainment Management Minor in STHM that is available to ALE students. Limiting electives to 24 credits will provide sufficient space to complete this minor without counting any course for more than one requirement.	
In the Boyer College of Music and Dance	
MUST 1705	Music Theory for Non-Music Majors II
MUST 4713	Sound Recording
MUST 4714	Sound Editing
MUST 4725	Advanced Audio Production
MUST 4762	Introduction to Music Technology for Non-Majors
Note: MUST 4713, MUST 4714, MUST 4725, and MUST 4762 combine for a Music Technology Certificate in Boyer that is available to ALE students. Limiting electives to 30 credits will provide sufficient space to complete this certificate without counting any course for more than one requirement.	
Note also: The Boyer College of Music and Dance welcomes ALE students to participate in Boyer's non-major, non-auditioned ensembles: OWLchestra, Temple University Night Owls Campus Community Band (TUNO), Temple University Swinging Owls 6 & 8, and Temple University Singing Owls Community Choir.	
In the Fox School of Business	
BA 2196	Business Communications
HRM 1101	Leadership and Organizational Management
LGLS 3509	Entertainment Law
SGM 3501	Entrepreneurial and Innovative Thinking
SGM 3503	Lean Startup: Fast and Inexpensive Ways to Test and Launch Your Ideas

Total Credit Hours**47-49**

1

Foundation courses must be completed within the first 45 credits at Temple University. Students transferring into Temple must complete at least one Audio and Live Entertainment foundation course at Temple, unless exempted in writing by the chair of the department.

2

Taken during final 30 credits.

3

It is recommended that these are chosen in consultation with an Advisor.

Note: Courses offered in various categories can only be counted once.

About the Professional Development Requirements

The academic experience for all Audio and Live Entertainment majors culminates with the Professional Development requirements, which include MSP 4039 Senior Seminar (3 s.h.) and one of the Experiential Learning Options (3-4 credits). Together, these courses provide students with hands-on and practical training in the field while allowing them the opportunity to explore their potential professional futures.

Experiential Learning Option: MSP 4785 Internship

Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the Lew Klein College of Media and Communication's Global Opportunities Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours. NOTE: To be eligible for an internship, students must obtain an appropriate internship placement for the term of registration (assistance is available), have Junior or Senior standing, a minimum GPA of 3.00, have completed all three ALE foundation courses with a minimum grade of C-, and official approval by the MSP Internship Coordinator via submission of the Internship Verification Form, and once determined eligible, the Site Verification Form.

Whenever possible, it is recommended that students select these WI courses from those that also directly satisfy one of their specific ALE requirements, since that will provide a more efficient use of credits and ease the path to program completion.

2

To be eligible for an internship, students must obtain an appropriate internship placement for the term of registration (assistance is available), have Junior or Senior standing, a minimum GPA of 3.00, have completed all three ALE foundation courses with a minimum grade of C-, and official approval by the MSP Internship Coordinator via submission of the Internship Verification Form, and once determined eligible, the Site Verification Form.

Children's Media Certificate

Overview

The **Certificate in Children's Media**, offered by the Department of Media Studies and Production, gives Temple University students the opportunity to gain experience and expertise in the fields of journalism, advertising, public relations, media and communication by completing a minimum of 13 credit hours in courses that focus on children, child development and children's media.

The Children's Media Certificate is open to all students. In addition to Klein College students, students majoring in education, psychology and other areas focused on children may be interested in the certificate.

Campus Location: Main

Program Code: CO-CHME-CERT

Contact Information

Sherri Hope Culver

Learn more about the undergraduate certificate in Children's Media.

Requirements

The Certificate in Children's Media requires a minimum of 13 credit hours. Four courses are required: three courses (3 credits per course) plus a capstone (1 credit), for a total of 10 credits. In addition, one course must be selected from the list of electives. The elective course must be outside the student's major. Required courses may count toward the student's major or toward the certificate, but not toward both.

Students must have a sophomore standing to begin work on the certificate. All students must be in good academic standing with a 3.0 cumulative average to pursue the certificate.

Communication and Activism Minor

Overview

The **Minor in Communication and Activism**, offered by the Department of Communication and Social Influence, provides students with theories and skills necessary for becoming effective, conscientious, civically minded agents of social change who are capable of communicating across a variety of issues and contexts and within a multicultural and multi-ethnic society.

The Communication and Activism minor is for students who are interested in public advocacy, politics, campaign management, community organizing and community relations, government communication, law and judiciary careers, organizational development, social movement leadership, and political and nonprofit lobbying. The minor complements such majors as sociology, political science, criminal justice, social work, civil engineering, environmental studies, and community development.

Upon completing this minor, students should be able to:

- Identify, analyze, and address important social, cultural, political, and/or economic issues that are in need of remediation.
- Develop strategies and tactics for improving, solving, and/or intervening into those issues.
- Develop various messages and use various modes of communication for addressing a diversity of audiences across a variety of contexts.
- Develop a social justice sensibility that demonstrates concern for communities and populations that are under-served, under-sourced, and/or under-represented.

The minor is open to all Temple undergraduate students with a cumulative GPA of 2.5 or better. Students majoring in Communication and Social Influence (CSI) are not eligible for the minor. However, students enrolled in the minor can choose to roll over their minor credits if they want to change their major to CSI. Students with a Communication Studies major (CMST) are eligible for the minor.

Communication and Social Influence BA

Overview

Utilizing Temple's unique setting as an urban institution, the **Bachelor of Arts in Communication and Social Influence** (CSI), which is offered by the Department of Communication and Social Influence, prepares students to be public communication leaders in urban settings defined by their civic engagement, risk and conflict management. The civic engagement area focuses on communication of socio-political activities and community advocacy. The risk area deals with communication about health, science, environment, and security. The conflict area focuses on community, institutional, organizational, and conflict analyses and appropriate conflict management. Infused across these areas is a core aspect of urban environments—social justice and diversity. The Communication and Social Influence major shapes tomorrow's communication professionals who wish to help bring about positive social change, and prepares students for law school and graduate programs, as well as working in the public, private and non-profit sectors.

An optional concentration in International Communication is available for this major.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication and Social Influence by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements:
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in their major at Temple University. The specific writing-intensive course options for this major are CSI 2296, CSI 2696, CSI 3296, and CSI 3896.
- Levin College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
- Minimum 45 credit hours in Communication and Social Influence.
- Maximum 59 credit hours may be taken in Communication and Social Influence courses.
- A grade of C- or higher must be attained in all required Communication and Social Influence courses.
- No more than 12 semester hours of transfer credits may be applied to Communication and Social Influence requirements.
- No more than 8 credits may be taken in Kinesiology and Dance activities courses.

Communication and Social Influence Requirements

Code	Title	Credit Hours
CSI Core Courses		
CSI 1111 or CSI 1911	Introduction to Public Speaking Honors Introduction to Public Speaking	3

CSI 1112	Introduction to Communication and Social Influence	3

CSI 2112	Social Influence Inquiry	3

Subject Areas

Select six courses from the three subject areas of Civic Engagement, Conflict Communication, and Risk Communication. 18

One course in each of the three subject areas (9 credits)

Three other courses in any subject areas (9 credits)

Course levels for the six subject area courses should be selected as follows:

One 1000-level course

Two 2000-level courses ¹

Two 3000-level courses ¹

One 4000-level course

Civic Engagement Courses

CSI 1201 Communication and Civic Engagement

CSI 2201 The Meaningful Enjoyment of Civic Life

CSI 2296 Resistance, Protests, and Social Movements (WI)

CSI 3201 Rhetoric and Civic Culture

CSI 3296 Speechwriting (WI)

CSI 4201 Communication, Attitudes, and Opinion

Conflict Communication Courses

CSI 1401 Conflict and Communication Behavior

CSI 2401 Intercultural and Cross Cultural Conflict

CSI 2403 Civil Disobedience

CSI 3401 Social Activism and Community Organizing

CSI 3402 Conflict and Influence: Identity, Emotion and Power

CSI 4402 Multiparty Conflict Processes: Dialogue, Facilitation and Multiparty Mediation

Risk Communication Courses

CSI 1601 Communication and Behavior Change

CSI 2602 Rhetoric of Hate and Violence

CSI 2696 Risk Communication (WI)

CSI 3601 Misperceptions and Misinformation

CSI 3602 Communicating Science in Today's World

CSI 4601 Narrative Persuasion

Supporting Areas

At least 1 culture course 3

CSI 3701 Intercultural Communication

CSI 3702 Communication, Culture and Identity

At least 1 method course 3

CSI 3801 Social Science Research Methods of Social Influence

CSI 3896 Rhetorical Criticism (WI)

Experience Course

Select one of the following: 3

CSI 3085 Study Away Internship

CSI 3185 Internship

CSI 3187 Practicum

CSI 3191 Directed Research

Senior Seminar

CSI 4111 Senior Seminar 3

Total Credit Hours

45

1

If CSI 3896 is selected as the method course, one writing-intensive (WI) course must be selected from among the subject area course choices. If CSI 3896 is not selected, then two WI courses must be selected.

1

If CSI 3896 is selected as the method course, one writing-intensive (WI) course must be selected from among the subject area course choices. If CSI 3896 is not selected, then two WI courses must be selected.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	
MSP 3572	Communication and Development	
MSP 4453	Information Society	

MSP 4496	Global Media
PR 2672	Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Communication Studies BA with Communication and Entrepreneurship Track

Overview

The **Bachelor of Arts in Communication Studies** is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the Lew Klein College of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students **must select one of the following tracks** as a distinctive area of investigation:

- Communication and Entrepreneurship
- Contemporary Media Environments
- Global Civil Society
- Policy, Regulation and Advocacy
- Production (for Temple Japan students only)
- Communication Studies Thesis (the Major of Distinction track, which is available for advanced scholars)

An optional concentration in International Communication is also available.

The flexibility of the Communication Studies program offers students access to the field experiences, internships and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility, and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Communication and Entrepreneurship Track

The **Communication and Entrepreneurship track** focuses on the intersection between the field of communication and entrepreneurship. Classes will reflect the communicative and functional aspect of entrepreneurship by focusing on and critiquing organizational development. Developed from principles of digital convergence and innovation, this track reflects the need for a host of skills that will function in the digital workplace and will allow students to consider means of developing a more nuanced understanding of capitalism and its impacts.

Learn more about the Bachelor of Arts in Communication Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in the major at Temple University.
- Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
- Minimum of 42 s.h. in Communication Studies.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- Maximum of 30 s.h. in any one Klein department may be counted toward the major.
- A maximum of 4 s.h. of Internship credit may be counted toward the degree.
- A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
- No more than 8 s.h. in Kinesiology and Dance activities courses.
- Students may participate in study away programs.
- Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
- Communication Studies majors may minor in established Klein minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and Klein minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Communication and Entrepreneurship Track Requirements

- All Communication Studies majors must take the following two foundation courses:

Code	Title	Credit Hours
CMST 1111	Communication and Public Life	3
MSP 1021	Introduction to Media Analysis	3
Total Credit Hours		6

- All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track (see below) by taking appropriate core courses.

Code	Title	Credit Hours
Core Courses		
CMST 2111	Communications Seminar ¹	3
Communication Theory

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization

Communication Studies BA with Communication Studies Thesis Track

Overview

The **Bachelor of Arts in Communication Studies** is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the Lew Klein College of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students **must select one of the following tracks** as a distinctive area of investigation:

- Communication and Entrepreneurship
- Contemporary Media Environments
- Global Civil Society
- Policy, Regulation and Advocacy
- Production (for Temple Japan students only)
- Communication Studies Thesis (the Major of Distinction track, which is available for advanced scholars)

An optional concentration in International Communication is also available.

The flexibility of the Communication Studies program offers students access to the field experiences, internships and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility, and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Communication Studies Thesis (Major of Distinction) Track

The **Communication Studies Thesis track**, also referred to as the Major of Distinction track, is an academically rigorous program for students who wish to construct an interdisciplinary curriculum that meets their individual interests across the Klein departments. In the Major of Distinction, each student works individually with a faculty advisor from a relevant Klein department to build a curriculum that goes beyond the offered tracks. The student completes five courses, four of which must be at the 3000 or 4000 level, and in the senior year completes a two-semester thesis. A student in the Major of Distinction must have completed three semesters of a foreign language (or equivalent with the approval of the Director of Communication Studies) by the time of graduation. If appropriate to the student's research, an advanced methods or theory course may be required by the student's faculty advisor.

Students apply for a Major of Distinction in the second semester of their sophomore year. To be considered, students must be on schedule to complete their Foundational and Core Communications courses by the end of their sophomore year. Also, students must have earned at least a 3.5 cumulative grade point average (GPA) in their Foundational and Core Communications courses along with a 3.25 overall GPA. Students must submit an application to the Director of Communication Studies that includes a statement of student's interest, a proposed curriculum, and a support letter from a full-time Klein faculty member willing to act as the student's faculty advisor.

Once accepted into the Major of Distinction and in consultation with his or her faculty advisor and the Director of Communication Studies, each student constructs his or her own curriculum. The curriculum must contain five courses, four of which must be at the 3000 or 4000 level, and include courses from at least three of the Klein majors. Courses selected should be designed to lead to the senior-year thesis.

Learn more about the Bachelor of Arts in Communication Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in the major at Temple University.
- Low Klein College of Media and Communication requirements (p. 1184), including KLN 1002 and KLN 1002.
- Minimum of 42 s.h. in Communication Studies.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- Maximum of 30 s.h. in any one Klein department may be counted toward the major.
- A maximum of 4 s.h. of Internship credit may be counted toward the degree.
- A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
- No more than 8 s.h. in Kinesiology and Dance activities courses.
- Students may participate in study away programs.
- Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
- Communication Studies majors may minor in established Klein minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and Klein minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Communication Studies Thesis (Major of Distinction) Requirements

- All Communication Studies majors must take the following two foundation courses:

Code	Title	Credit Hours
CMST 1111	Communication and Public Life	3
MSP 1021	Introduction to Media Analysis	3
Total Credit Hours		6

- All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track (see below) by taking appropriate core courses.

Communication Studies BA with Contemporary Media Environments Track

Overview

The **Bachelor of Arts in Communication Studies** is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the Lew Klein College of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students **must select one of the following tracks** as a distinctive area of investigation:

- Communication and Entrepreneurship
- Contemporary Media Environments
- Global Civil Society
- Policy, Regulation and Advocacy
- Production (for Temple Japan students only)
- Communication Studies Thesis (the Major of Distinction track, which is available for advanced scholars)

An optional concentration in International Communication is also available.

The flexibility of the Communication Studies program offers students access to the field experiences, internships and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility, and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Contemporary Media Environments Track

The **Contemporary Media Environments track** provides an historical overview of communication technologies—from papyrus to moveable type, from the rotary press to broadcasting and the Internet—and the ways that they shape public life. It will introduce theories on the relationship between technology and society, focusing on the intersection between communication technologies and the public sphere.

Learn more about the Bachelor of Arts in Communication Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in the major at Temple University.
- Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
- Minimum of 42 s.h. in Communication Studies.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- Maximum of 30 s.h. in any one Klein department may be counted toward the major.
- A maximum of 4 s.h. of Internship credit may be counted toward the degree.
- A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
- No more than 8 s.h. in Kinesiology and Dance activities courses.
- Students may participate in study away programs.
- Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
- Communication Studies majors may minor in established Klein minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and Klein minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Contemporary Media Environments Track Requirements

- All Communication Studies majors must take the following two foundation courses:

Code	Title	Credit Hours
CMST 1111	Communication and Public Life	3
MSP 1021	Introduction to Media Analysis	3
Total Credit Hours		6

- All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track by taking appropriate core courses.

Code	Title	Credit Hours
Core Courses		
CMST 2111	Communications Seminar ¹	3
Communication Theory		
Select one of the following:		3
ADV 1101	Introduction to Media and Society	
ADV 1102	Introduction to Advertising	
JRN 1111	Journalism and Society	
MSP 1011	Introduction to Media Theory	
Research Methods		
Select one of the following:		3
ADV 2141	Introduction to Brand Strategy and Research	
JRN 2101	Journalism Research	
MSP 2141	Media Research ¹	
Analysis		
Select one of the following:		3
ADV 2151	Introduction to Art Direction: Visual Communication	
MSP 2421	Media Popular Culture ¹	
CSI 1111	Introduction to Public Speaking	
or CSI 1911	Honors Introduction to Public Speaking	

Cross-Cultural Perspectives

Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3702	Communication, Culture and Identity	

Total Credit Hours **15**

1

Course has prerequisites.

3. In consultation with a faculty advisor, a student must take seven courses (minimum 21 credits) from the list below.
- Within the track, a student must take at least one course from at least three different departments.
 - At least four courses in the track must be taken at the 3000 or 4000 level. At least one of these four must be taken at the 4000 level.
 - Students must have met the prerequisites for courses in their track by taking the appropriate core courses (see above).
 - All students must take a minimum of two writing-intensive courses in the major. Writing-intensive courses end in the numbers 96, 97 and 98 and are noted (WI) in the list below.

Code	Title	Credit Hours
Contemporary Media Environments Track Options		21
ADV 2151	Introduction to Art Direction: Visual Communication ¹	3
JRN 2301	Introduction to Magazines	3
JRN 3401	Photography	4
JRN 3403	Documentary Photography	3
JRN 3505	Experimental Journalism	3
JRN 3701	Contemporary Issues in Journalism	3
JRN 3702	Race and Racism in the News	3
JRN 3703	History of Journalism	3
JRN 3704	Ethical Issues in Journalism	3
JRN 3705	Gender and American Mass Media	3
JRN 3708	Newsroom Management	3
JRN 3709	The Entrepreneurial Journalist	3
MSP 3153	Media Criticism	3
MSP 3297	History of Electronic Media (WI)	3
MSP 3324	The Video Game Industry and Game Culture	3
MSP 3421	Technology and Culture	3
MSP 3445	Media Images and Analysis	3
MSP 4226	Public Media	3
MSP 4252	Law and Ethics of Digital Media	3
MSP 4446	Psychological Processing of Media	3
MSP 4453	Information Society	3
MSP 4454	Public Information Media Campaigns	3
MSP 4496	Global Media (WI)	3
MSP 4497	Media and Children (WI)	3
MSP 4541	Mobile Media	3

1

ADV 2151 will apply towards Contemporary Media Environments track to satisfy a distribution requirement. For students completing this track, they will be required to take MSP 2421, CSI 1111, or CSI 1911 to satisfy the Analysis requirement.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Communication Studies with a Track in Contemporary Media Environments

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
CMST 1111	Communication and Public Life	3
Select one of the following (Communication Theory):		3
ADV 1101	Introduction to Media and Society	
ADV 1102	Introduction to Advertising	
JRN 1111	Journalism and Society	
MSP 1011	Introduction to Media Theory

Electives	10
Credit Hours	16

Spring

One 4000-4999 CME Track Course	3
Electives	13
Credit Hours	16
Total Credit Hours	124

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	

MSP 3572	Communication and Development
MSP 4453	Information Society
MSP 4496	Global Media
PR 2672	Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Communication Studies BA with Global Civil Society Track

Overview

The **Bachelor of Arts in Communication Studies** is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the Lew Klein College of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students **must select one of the following tracks** as a distinctive area of investigation:

- Communication and Entrepreneurship
- Contemporary Media Environments
- Global Civil Society
- Policy, Regulation and Advocacy
- Production (for Temple Japan students only)
- Communication Studies Thesis (the Major of Distinction track, which is available for advanced scholars)

An optional concentration in International Communication is also available.

The flexibility of the Communication Studies program offers students access to the field experiences, internships and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility, and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Global Civil Society Track

The **Global Civil Society track** will survey evidence on the emergence of global civil society including social movements, historical development and the growing international public sphere. Courses will address such topics as public diplomacy, global mediascapes, international and public opinion.

Learn more about the Bachelor of Arts in Communication Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in the major at Temple University.
- Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
- Minimum of 42 s.h. in Communication Studies.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- Maximum of 30 s.h. in any one Klein department may be counted toward the major.
- A maximum of 4 s.h. of Internship credit may be counted toward the degree.
- A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
- No more than 8 s.h. in Kinesiology and Dance activities courses.
- Students may participate in study away programs.
- Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
- Communication Studies majors may minor in established Klein minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and Klein minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Global Civil Society Track Requirements

- All Communication Studies majors must take the following two foundation courses:

Code	Title	Credit Hours
CMST 1111	Communication and Public Life	3
MSP 1021	Introduction to Media Analysis	3
Total Credit Hours		6

- All majors will take five additional core courses. Students will select one course each from the categories below. Students should plan to meet the prerequisites for courses in their selected track by taking appropriate core courses.

Code	Title	Credit Hours
Core Courses		
CMST 2111	Communications Seminar ¹	3
Communication Theory		
Select one of the following:		3
ADV 1101	Introduction to Media and Society	
ADV 1102	Introduction to Advertising	
JRN 1111	Journalism and Society	
MSP 1011	Introduction to Media Theory	
Research Methods		
Select one of the following:		3
ADV 2141	Introduction to Brand Strategy and Research	
JRN 2101	Journalism Research	
MSP 2141	Media Research ¹	
Analysis		
Select one of the following:		3
ADV 2151	Introduction to Art Direction: Visual Communication	
MSP 2421	Media Popular Culture ¹	

CSI 1111 or CSI 1911	Introduction to Public Speaking Honors Introduction to Public Speaking	
-------------------------	---	--

Cross-Cultural Perspectives

Select one of the following: 3

CSI 3701	Intercultural Communication	
CSI 3702	Communication, Culture and Identity	

Total Credit Hours 15

1

Course has prerequisites.

3. In consultation with a faculty advisor, a student must take seven courses (minimum 21 credits) from the list below.
- Within the track, a student must take at least one course from at least three different departments.
 - At least four courses in the track must be taken at the 3000 or 4000 level. At least one of these four must be taken at the 4000 level.
 - Students must have met the prerequisites for courses in their track by taking the appropriate core courses (see above).
 - All students must take a minimum of two writing-intensive courses in the major. Writing-intensive courses end in the numbers 96, 97 and 98 and are noted (WI) in the list below.

Code	Title	Credit Hours

Total Credit Hours	124

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	

MSP 3572	Communication and Development
MSP 4453	Information Society
MSP 4496	Global Media
PR 2672	Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Communication Studies BA with Policy, Regulation and Advocacy Track

Overview

The **Bachelor of Arts in Communication Studies** is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the Lew Klein College of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students **must select one of the following tracks** as a distinctive area of investigation:

- Communication and Entrepreneurship
- Contemporary Media Environments
- Global Civil Society
- Policy, Regulation and Advocacy
- Production (for Temple Japan students only)
- Communication Studies Thesis (the Major of Distinction track, which is available for advanced scholars)

An optional concentration in International Communication is also available.

The flexibility of the Communication Studies program offers students access to the field experiences, internships and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility, and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Policy, Regulation and Advocacy Track

The **Policy, Regulation and Advocacy track** focuses on citizen advocacy in the field of communication as related to and shaped by communication policy and regulation. Students are introduced to historical and recent examples of citizen advocacy in communication policy through the examination of social movements, civic journalism, art and performance, and special interest groups tied to issues of race, gender, ethnicity, sexual orientation and the environment.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

1. University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in the major at Temple University.
2. Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
3. Minimum of 42 s.h. in Communication Studies.
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. Maximum of 30 s.h. in any one Klein department may be counted toward the major.
6. A maximum of 4 s.h. of Internship credit may be counted toward the degree.
7. A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
8. No more than 8 s.h. in Kinesiology and Dance activities courses.
9. Students may participate in study away programs.
10. Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
11. Communication Studies majors may minor in established Klein minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and Klein minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	

CSI 3702	Communication, Culture and Identity
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)
JRN 3254	International Reporting
JRN 3706	Journalism and Globalization
MSP 3471	Media and Cultural Differences
MSP 3572	Communication and Development
MSP 4453	Information Society
MSP 4496	Global Media
PR 2672	Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Communication Studies BA with Production Track (TUJ)

Overview

The **Bachelor of Arts in Communication Studies** is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the Lew Klein College of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students **must select one of the following tracks** as a distinctive area of investigation:

- Communication and Entrepreneurship
- Contemporary Media Environments
- Global Civil Society
- Policy, Regulation and Advocacy
- Production (for Temple Japan students only)
- Communication Studies Thesis (the Major of Distinction track, which is available for advanced scholars)

An optional concentration in International Communication is also available.

The flexibility of the Communication Studies program offers students access to the field experiences, internships and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility, and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Production Track

The **Production track** is available only at Temple University, Japan Campus. It provides an overview of divergent technologies used in the production of media, including traditional and multi-media platforms. Students wishing to expand their knowledge of communications to include skill-based knowledge vital in a variety of professional fields, including filmmaking, television and radio are welcome.

Students are expected to gain an understanding of both fiction and non-fiction narratives, and how technological components such as photography, editing and audio contribute to the realization of the project. As writing is a crucial component of project work, students will complete scripts, essays and articles, including extensive revision. Attainment of professional production broadcast standards is expected.

Campus Location: Japan

Program Code: CO-CMST-BA

Learn more about the Bachelor of Arts in Communication Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in the major at Temple University.
- Lew Klein College of Media and Communication requirements (p. 1184).
- Minimum of 42 s.h. in Communication Studies.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- Maximum of 30 s.h. in any one Klein department may be counted toward the major.
- A maximum of 4 s.h. of Internship credit may be counted toward the degree.
- A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
- No more than 8 s.h. in Kinesiology and Dance activities courses.
- Students may participate in study away programs.
- Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
- Communication Studies majors may minor in established Klein minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and Klein minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Production Track Requirements

- All Communication Studies majors must take the following two foundation courses:

Code	Title	Credit Hours
CMST 1111	Communication and Public Life	3
MSP 1021	Introduction to Media Analysis	3
Total Credit Hours		6

- All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track by taking appropriate core courses.

Code	Title	Credit Hours
Core Courses		
CMST 2111	Communications Seminar ¹	3
Communication Theory		
Select one of the following:		3
JRN 1111	Journalism and Society	
ADV 1101	Introduction to Media and Society	
Research Methods		
JRN 2101	Journalism Research	3
Analysis		
Select one of the following:		3

MSP 2421	Media Popular Culture ¹	
CSI 1111	Introduction to Public Speaking	
Cross-Cultural Perspectives (specific to TUJ)		
JRN 3706	Journalism and Globalization	3
Total Credit Hours		15

1

Course has prerequisites.

3. In consultation with a faculty advisor, a student must take seven courses (minimum 21 credits) from the list below.

- Students must have met the prerequisites for courses in their track by taking the appropriate core courses (see above).
- All students must take a minimum of two writing-intensive courses in the major. The writing-intensive course options for this track are MSP 4496, MSP 4796 and JRN 2396.

Code	Title	Credit Hours
MSP 1701	Introduction to Media Production	3
Choose either the TV Production or Audio/Radio focus:		12
TV Production Focus		
MSP 2701	Intermediate Video Production	
MSP 3701	Genres of Media Production

Communication Studies Minor

Overview

The focus of the Communication Studies program is on the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication and media.

The **Minor in Communication Studies** requires students to take two foundational courses (6 credits) introducing students to the broad concepts of communication in public life and of media history and convergence. Students then take one course from each of the following categories (12 credits): Communication Theory, Research Methods, Analysis, and Cross-Cultural Perspectives.

Unlike Communication Studies majors, students are not required to take advanced coursework.

The minor is available to undergraduate students in any major except Communication Studies. Other Klein students may declare the minor, but all minor requirements must be separate from major requirements, with the exception of MSP 1021.

Campus Location: Main

Digital Media Technologies Minor (KCMC)

Overview

The **Minor in Digital Media Technologies** is an interdisciplinary minor offered through the Department of Media Studies and Production (MSP) within the Lew Klein College of Media and Communication and the Department of Computer and Information Sciences (CIS) within the College of Science and Technology. This minor is designed to expand students' knowledge of the information age and enable them to share communications over the internet using fast evolving, emerging technologies.

The minor is available to undergraduate students in Media Studies and Production, Computer and Information Science, as well as other departments and colleges. Upon completion of the minor, students should be able to demonstrate the following competencies:

- Use technology to integrate internet content with computers and mobile devices.
- Design and implement content for various digital media, utilizing database technologies.
- Critically analyze decisions made regarding the use of technology, specifically in the social and ethical domains.
- Understand the impact of current and emerging technologies on communications, both locally and globally.
- Create effective written communications make professional presentations.
- Analyze and solve problems efficiently.

Campus Location: Main

Note: Transfer credits are not accepted for credit for the minor.

Minor Requirements

- Students with a GPA of 2.00 or more may declare this minor by contacting either CST advising (215-204-2890) or Klein advising (215-204-5273). See additional Grade Requirements below.

- Three (3) of the Digital Media Technologies minor courses must be distinct from the student's major. Students should see their CST or Klein advisor for course substitutions.
- Students without a CIS background should begin their CIS courses in their Junior year or earlier.

Code	Title	Credit Hours
Two Required MSP Courses:		
Select one of the following:		3-4
MSP 1701	Introduction to Media Production	
MSP 2701	Intermediate Video Production ¹	
MSP 2751	Audio for Media ¹	
MSP 2741	Introduction to Internet Studies and Web Authoring ¹	3
Two Required CIS Courses:		
Select two courses from the following:		8
CIS 1052	Introduction to Web Technology and Programming	
CIS 1056	Advanced Web Technology and Programming	
CIS 2305	Mobile Computing Technologies ¹	
CIS 3308	Web Application Programming ¹

CIS 3515	Introduction to Mobile Application Development ¹	
Two Electives:		
One CIS elective and one MSP elective are required. However, MSP students may choose two CIS electives instead and CIS students may choose two MSP electives instead.		
Select two courses from the following:		7-9
MSP Elective Options		
MSP 4741	Emergent Media Production	
MSP 4221	Information Technology Policy ¹	
MSP 4252	Law and Ethics of Digital Media	
MSP 4541	Mobile Media	
MSP 4614	Creating a Media Business	
CIS Elective Options		
CIS 2305	Mobile Computing Technologies ^{1,2}	
	any other CIS 2000+ level course ¹	
Total Credit Hours		21-24

¹
This course requires additional prerequisites outside of the Digital Media Technology Minor coursework.

²
May satisfy a CIS Elective only if CIS 2305 was not taken as a Required CIS Course.

Elective Requirements

- All prerequisites must be completed to enroll in minor courses or permission from both the faculty advisor and instructor must be obtained prior to registration.

Grade Requirements

- Minor credit is not given for grades below C-.
- Students must maintain at least a 2.00 grade point average in the program to successfully complete this minor.

Residency Requirements

At least 4 courses required for the minor must be completed at Temple. At least 2 CIS courses and at least 2 MSP courses must be completed at Temple.

Global Communication and Media Arts Minor

Overview

The Lew Klein College of Media and Communication has partnered with Temple University Rome (TU Rome) and Temple University Japan (TU Japan) to offer an 18–20-credit (at least 6 courses) **Minor in Global Communication and Media Arts (GCMA)**. This program is designed to provide undergraduate students from a wide range of academic backgrounds and interests, and especially students already studying at TU Rome or TU Japan, or who may be planning to study on one of Temple's international campuses, with an international education in communication arts and media production.

To earn the GCMA minor, students, who can be from any major, must successfully complete at least nine of the minor's 18–20 credits on one of Temple's international campuses: TU Rome or TU Japan. If desired, students can complete all 18–20 credits for the minor on one or both of Temple's international campuses. However, a maximum of 10 credits completed on Temple's Main campus can count toward the GCMA minor. In other words, a student could complete the entire GCMA minor without taking any courses on Temple's Main campus.

Students majoring in Advertising, Communication and Social Influence, Film and Media Arts, Journalism, or Media Studies and Production may count up to 3 credits (1 course) from the array of courses in the minor toward both their major and the minor. Should students decide to pursue a major in one of these programs, any courses from the minor's array that were completed from that major can be applied to the major; however, only 3 credits can count toward completing both the major and the minor.

Campus Locations: Japan, Rome

Requirements

To earn the Global Communication and Media Arts Minor transcript notation, a student must successfully complete a total of 18–20 credits of courses from the Klein College of Media and Communication and from the Department of Film and Media Arts. The minor requires that a minimum of 9 credits—and up to all—of the 18–20 credit hours must be taken on the campuses of either TU Rome or TU Japan, or both, and a maximum of 10 credit hours can be completed on Temple's Main campus. Each course that fulfills a requirement for the minor must be passed with a C- or better.

Code	Title	Credit Hours
Required Course		
Select one of the following: ¹		3
ADV 1101	Introduction to Media and Society	
JRN 1111	Journalism and Society	
MSP 1021	Introduction to Media Analysis	
Electives		
Select from the following list of courses, for a total of 15-17 credits: ²		15-17
ADV 1103	Digital Media and Advertising	
ADV 2104	Personal Branding	
ADV 2151	Introduction to Art Direction: Visual Communication	
CSI 2296	Resistance, Protests, and Social Movements	
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3401	Social Activism and Community Organizing	
CSI 3701	Intercultural Communication	
CSI 3702	Communication, Culture and Identity	
JRN 3255	Sports Writing	
JRN 3263	Travel Writing	
JRN 3297	Writing Arts Criticism	
JRN 3403	Documentary Photography	
JRN 3711	Ethnic and Alternative News Media	
MSP 1655	Introduction to Media Business	
MSP 1701	Introduction to Media Production	
MSP 3296	Travel Writing	
MSP 3471	Media and Cultural Differences	
MSP 3473	Media and the Environment	
MSP 4496	Global Media	
MSP 4541	Mobile Media	

MSP 4614	Creating a Media Business
PR 2672	Global Communication and Leadership
FMA 1144	Media Arts for Non-Production Majors
FMA 1171	Media & Culture
FMA 1172	Introduction to Film and Video Analysis
FMA 2245	Video Production for Non-Production Majors ³
FMA 2678	History of Experimental Film and Video Art
FMA 3247	Cross-Cultural Image Making ⁴

Total Credit Hours**18-20**

1

At TU Rome and TU Japan, these courses may be cross-listed.

2

Not all of these courses will be offered at TU Rome or TU Japan every semester, but a select group will be offered regularly on both campuses.

3

Must be taken with FMA 3247.

4

Students without filmmaking experience must also take FMA 2245.

International Communication Minor

Overview

The **Minor in International Communication** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the minor will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This program is restricted to students outside the Lew Klein College of Media and Communication only.

Campus Locations: Main and Study Abroad

Journalism BA

Overview

The curriculum for the **Bachelor of Arts in Journalism**, offered by the Department of Journalism, is based on developing critical thinking in students for a multimedia, urban, journalistic environment. This requires a broad educational background coupled with rigorous professional training. The curriculum emphasizes subject matter from other disciplines, particularly those in the liberal arts. The Journalism department also believes that effective writing is central to communication and is, therefore, integral to the department curriculum.

Graduates of the program will develop:

1. Strong skills in reporting, writing, photography, audio/video newsgathering, print and web editing and design.
2. The ability to analyze critically past and present trends of journalism and to help craft alternative forms of journalism for the future.
3. A strong sense of ethical responsibility and the knowledge necessary for ethical decision-making.
4. An understanding of digital and interactive media technologies.
5. The ability to provide information in multimedia formats.
6. A culture of collaboration through team reporting....
7. ...in order to tell stories emanating from a diverse urban environment.
8. A keen understanding of the increasingly global nature of today's journalistic environment.
9. An appreciation of free expression and awareness of legal constraints guiding responsible journalism.

Journalism students need to meet the department's nine required courses as well as 18 credits of journalism electives, which often form an area of emphasis. The capstone experience combines urban community journalism with multimedia storytelling. This capstone produces the online news site, *PhiladelphiaNeighborhoods.com*.

An optional concentration in International Communication is available for this major.

Students who major in Journalism enter a variety of careers, including those as web reporters and producers, newspaper reporters and editors, still and video photographers, radio and television reporters and producers, magazine writers and editors, and any other areas that value storytelling, multimedia, and the accurate gathering, assessment, and reporting of information and ideas.

Although students must ultimately be responsible for their own academic programs, freshmen and first-semester transfer students will first meet with a Lew Klein College of Media and Communication academic advisor. During the sophomore and junior years, a student must meet at least once each year with a faculty advisor who is knowledgeable about the area of study the student is following.

Campus Location: Main

Program Code: CO-JRN-BA

Accreditation

Temple's Journalism department is one of only three programs in Pennsylvania accredited by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC).

Student Associations and Awards

The department has a chapter of the national journalism and mass communication honor society, Kappa Tau Alpha. Additionally, every spring the department awards thousands of dollars in scholarships to deserving majors.

Learn more about the Bachelor of Arts in Journalism.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Journalism by recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative average of 2.0 overall and in the major.

Students must meet:

1. University requirements:
 - a. All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - b. All students must take a minimum of two writing-intensive courses in the major at Temple University. The specific writing-intensive courses required for this major are JRN 1196 and JRN 3696.
2. Lew Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
3. Minimum 46 credits in Journalism required. Maximum 62 credits in the Lew Klein College of Media and Communication permitted (excluding certain Communication and Social Influence courses). Students must complete 62 credits outside the Lew Klein College of Media and Communication.
 - a. Students are cautioned to plan their program so they do not exceed the 62-credit hour limit (excluding certain Communication and Social Influence courses) that is set by our accrediting body.
 - b. Below is the list of Communication and Social Influence courses that could be exempted from the ACEJMC accreditation cap:

Code	Title	Credit Hours
CSI 1111	Introduction to Public Speaking	3
or CSI 1911	Honors Introduction to Public Speaking	
CSI 1112	Introduction to Communication and Social Influence	3
CSI 1113	Persuasion	3
CSI 1201	Communication and Civic Engagement	3
CSI 1401	Conflict and Communication Behavior	3
CSI 1601	Communication and Behavior Change	3
CSI 2111	Argumentation and Advocacy	3
CSI 2112	Social Influence Inquiry	3
CSI 2201	The Meaningful Enjoyment of Civic Life	3
CSI 2296	Resistance, Protests, and Social Movements (WI)	3
CSI 2401	Intercultural and Cross Cultural Conflict	3
CSI 2403	Civil Disobedience	3
CSI 2602	Rhetoric of Hate and Violence	3
CSI 2696	Risk Communication (WI)	3
CSI 3201	Rhetoric and Civic Culture	3
CSI 3401	Social Activism and Community Organizing	3
CSI 3402	Conflict and Influence: Identity, Emotion and Power	3
CSI 3601	Misperceptions and Misinformation	3
CSI 3602	Communicating Science in Today's World	3
CSI 3701	Intercultural Communication	3
CSI 3702	Communication, Culture and Identity	3
CSI 3896	Rhetorical Criticism (WI)	3
CSI 4402	Multiparty Conflict Processes: Dialogue, Facilitation and Multiparty Mediation	3
CSI 4601	Narrative Persuasion	3

4. For Journalism department courses to fulfill the 46-credit requirement in the Journalism major, students must earn a grade of C- or higher.

5. A maximum of 6 credits may be earned for internships and a maximum of 3 credits for independent studies. If students plan to take multiple internships, please keep in mind the six-credit maximum. Internships may be taken for 1-3 credits.
6. Only 8 credits will be accepted from Kinesiology and Dance activity courses.
7. No more than 30 credits may be taken in any single CLA department without special written permission from the Department of Journalism. These requirements are to ensure a broad-based liberal arts education for each major.
8. Journalism-related coursework must be evaluated for transfer (including courses taken through study abroad programs after enrolling at Temple University) by the Department Chair. No more than 12 credits in total will be accepted for transfer from an accredited journalism/mass communication program; maximum 9 credits from a non-accredited program. Under no circumstances will credit be allowed for duplicate courses.
9. The department does not award credit for academic or life experience. Students with extensive experience may present evidence and petition for a waiver of department course requirements.
10. Coursework taken in Business Education, lower-level credits in Military Science, and the Extern Program are not applicable towards graduation.

Departmental Requirements for the Major

It is the student's responsibility to meet all course prerequisite requirements.

1

If STAT 0826 not taken as GenEd Quantitative Literacy (GQ) Requirement.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	
JRN 3254	International Reporting	
JRN 3706	Journalism and Globalization	
MSP 3471	Media and Cultural Differences	
MSP 3572	Communication and Development	
MSP 4453	Information Society	
MSP 4496	Global Media	
PR 2672	Global Communication and Leadership	
International/Intercultural Electives outside of Klein		
Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.		
Choose any two (2) courses of the following:		6-8
Up to any two foreign language courses		
Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any non-Klein internship taken in a Klein Global Opportunities International Program		
Anthropology		
ANTH 2238	Visual Anthropology of Modern Japan	
or ASST 2238	Visual Anthropology of Modern Japan

Journalism, Society and Culture Minor

Overview

The **Minor in Journalism, Society and Culture**, offered by the Department of Journalism, serves students in other majors who would benefit from a deeper understanding of journalism's role in society. Coursework explores the social, political and economic issues that underlie journalism's role in public life. This minor has a natural affinity with the liberal arts and education. It offers students headed toward a range of careers—for instance,

community advocacy work, teaching, media research, law, policymaking, public history, global development, and many other fields—a valuable perspective on how contemporary issues in journalism will impact their roles as citizens and professionals.

Leadership Minor

Overview

The **Minor in Leadership**, offered by the Department of Advertising and Public Relations, consists of six courses (18 s.h.) which provide students in other Temple University programs the opportunity to better prepare for life after graduation by acquiring the knowledge and skills required to communicate effectively and to lead at the organizational, team and individual levels.

The goal of the Leadership minor is to help students understand that leadership is a communication and relational process, not a position. Viewed that way, leadership requires responsible, thoughtful reflection and action at all societal levels. That also requires competencies in being self-aware, in managing teams, in making ethical decisions, and leading with an intent to engender positive change.

Media Studies and Production BA with Media Analysis Concentration

Overview

The Department of Media Studies and Production expands students' knowledge and skills to create, evaluate and manage media content and organizations. With the urban and global communities as their living laboratories, students draw on their creativity, entrepreneurship, intellectual curiosity and analytical abilities to navigate digital media in our global society.

Theory and practice are integrated into all areas of study in the **Bachelor of Arts in Media Studies and Production**. Media Studies and Production students learn how to produce, evaluate and manage media content for traditional and emerging media in a variety of genres, including information (news and documentary), music, comedy, sports, drama, and commercial and noncommercial persuasion campaigns. They study institutions that create, distribute, and investigate media products (e.g., production studios, television and radio networks, and audience measurement companies) and learn how to create and operate successful media businesses. Media Studies and Production students learn to think purposefully and critically about media, and examine the media's role in history, culture and society from many perspectives. They also learn how to act ethically as they interact with the world both in careers in media institutions and as media consuming and producing citizens.

Students must select one of the following concentrations:

- Media Analysis,
- Media Business, or
- Media Production.

An optional concentration in International Communication is also available for this major.

Media Analysis Concentration

The **Media Analysis** professional option concentration introduces students to the critical understanding of the roles of media in contemporary life, including media technology as a cultural force; the nature of media institutions, audiences, and texts; and the media as a source of shared social identities. Students who select this concentration are prepared for careers as media consultants, editorial or technical writers, community activists, corporate communication producers, media scholars and market research analysts.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production (MSP) by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive (WI) courses in the major at Temple University. Whenever possible, it is recommended that students select WI courses that also directly satisfy a specific MSP requirement to ease the path to program completion.
- Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
- Minimum of 45 credits in Media Studies & Production / maximum of 64 credits in Media Studies & Production.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- All prerequisites must be met unless exempted in writing.
- No more than 20 transfer credits may be applied to the Media Studies & Production major.
- No more than 12 credits total for internship, practicum, and independent study courses.

MSP 3445	Media Images and Analysis
MSP 4446	Psychological Processing of Media
MSP 4497	Media and Children (WI)
MSP 4533	Media, Ecology and Technology

Emergent Media

Select a minimum of one of the following: 3

MSP 2741	Introduction to Internet Studies and Web Authoring
MSP 3324	The Video Game Industry and Game Culture
MSP 3421	Technology and Culture
MSP 4453	Information Society
MSP 4455	New Media Literacies
MSP 4541	Mobile Media
MSP 4741	Emergent Media Production

International/Intercultural Media Issues

Select a minimum of one of the following: 3

MSP 3471	Media and Cultural Differences
MSP 3473	Media and the Environment
MSP 3572	Communication and Development
MSP 4275	#ourmedia: Community, Activist, Citizens' and Radical Media
MSP 4496	Global Media (WI)
MSP 4571	International Studies in Media and Communication
MSP 4572	British Media and Telecommunication

Professional Development and Experiential Learning Requirements

MSP 4039 Senior Seminar² 3

Select one of the following Experiential Learning Options based upon your interests and eligibility:³ 3-4

MSP 4785	Internship
MSP 4487	TUTV Practicum
MSP 4596	TV News Production Practicum - Temple Update (WI)
MSP 4597	Sports Production Practicum (WI)
MSP 4687	Recording Industry Practicum
MSP 4787	Television Production Workshop Practicum
MSP 4887	Radio Production Practicum
MSP Special Topics practicum course (when available - check the course schedule for the term in question)	

Media Analysis Concentration Options

Select a minimum of 18 credit hours from the following courses, including at least two (2) courses at EITHER the 2000 or 3000 level. (Two is the minimum; however, there is no limit to the number of courses taken at these levels.)³ 18

MSP 1011	Introduction to Media Theory
MSP 2141	Media Research
MSP 2421	Media Popular Culture
MSP 2741	Introduction to Internet Studies and Web Authoring
MSP 2889	Field Experience in Youth Media and Media Literacy
MSP 3153	Media Criticism
MSP 3196	Writing Workshop (WI)
MSP 3297	History of Electronic Media (WI)
MSP 3324	The Video Game Industry and Game Culture
MSP 3421	Technology and Culture

MSP 3445	Media Images and Analysis
MSP 3471	Media and Cultural Differences
MSP 3473	Media and the Environment
MSP 3572	Communication and Development
MSP 4221	Information Technology Policy
MSP 4226	Public Media
MSP 4446	Psychological Processing of Media
MSP 4252	Law and Ethics of Digital Media
MSP 4453	Information Society
MSP 4275	#ourmedia: Community, Activist, Citizens' and Radical Media
MSP 4454	Public Information Media Campaigns
MSP 4455	New Media Literacies
MSP 4496	Global Media (WI)
MSP 4497	Media and Children (WI)
MSP 4541	Mobile Media
MSP 4696	Communication in Media Organizations (WI)

Total Credit Hours**45-46**

1

Foundation courses must be completed within the first 45 credits at Temple University. Students transferring into Temple must complete at least one Media Studies & Production foundation course at Temple, unless exempted in writing by the chair of the department.

2

Taken during final 30 credits.

3

It is recommended that these are chosen in consultation with a Media Studies & Production Faculty Advisor.

Note: Courses offered in various categories can only be counted once.

About the Professional Development Requirements

The academic experience for all Media Studies and Production majors culminates with the Professional Development requirements, which include MSP 4039 Senior Seminar (3 credits) and one of the Experiential Learning Options (3-4 credits). Together, these courses provide students with hands-on and practical training in the field while allowing them the opportunity to explore their potential professional futures.

Experiential Learning Option: Internship

MSP 4785 Internship (3 or 4 credits): Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the Lew Klein College of Media and Communication's Global Opportunities Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours. NOTE: To be eligible for an internship, students must obtain an appropriate internship placement for the term of registration (assistance is available), have Junior or Senior standing, a minimum GPA of 3.00, have completed all three MSP foundation courses with a minimum grade of C-, and official approval by the MSP Internship Coordinator via submission of the Internship Verification Form, and once determined eligible, the Site Verification Form.

Experiential Learning Option: Standard and Special Topics Practica

As noted in the major requirements list, there are six (6) standard practica courses, (MSP 4487, MSP 4596, MSP 4597, MSP 4687, MSP 4787, and MSP 4887). Four to five (4-5) of those options are offered each term and most of them have specific course prerequisites that must be completed prior to practica registration, so students are advised to plan accordingly.

When possible, at least one Special Topics practicum is also offered each year, and these focus on media-related topics different from the standard six. Consult the MSP Department for any upcoming Special Topics availability as well as the process for counting them toward the Professional Development Option within the official degree audit.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Media Studies and Production with a Concentration in Media Analysis

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
MSP 1021	Introduction to Media Analysis (Foundation Requirement)	3
MSP 1701	Introduction to Media Production (Foundation Requirement)	3
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
GenEd Quantitative Literacy Course ^{GQ}		4
KLN 1001	Klein First-Year Seminar	1
Credit Hours		15
Spring		
MSP 1655	Introduction to Media Business (Foundation Requirement)	3
Select one of the following courses from the Media Analysis Concentration Requirement (Other options may be possible depending upon completed prerequisites.) ¹		3
MSP 1011	Introduction to Media Theory	
MSP 2741	Introduction to Internet Studies and Web Authoring	
MSP 3196	Writing Workshop

Non-MSP Electives		13-12
	Credit Hours	16
	Total Credit Hours	124

1

All students are required to take at least two writing-intensive (WI) courses in their major. Therefore, this academic plan includes a [WI] notation next to any course that has a writing-intensive attribute. All three MSP concentrations and three of the four focus areas include WI options. Whenever possible, it is recommended that students select their two WI courses from those that also directly satisfy one of their specific MSP requirements, since that will provide a more efficient use of credits and ease the path to program completion.

2

Internship Requirements: a.) Junior or Senior standing (minimum 60 credits completed), b.) a minimum 3.0 GPA, c.) completion of ALL MSP Foundations courses (MSP 1021, MSP 1655, and MSP 1701), and d.) no outstanding grades of Incomplete for any course. For details of the application process and information about the Internship course, review the MSP Internship Overview document, available from the "Forms and Links" section of the Klein tab on the TUPortal.

3

Practicum requirements vary from course to course. Check specific course prerequisites so you may plan accordingly.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturality-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
	Select one of the following:	3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	

Klein International/Intercultural courses

Select three of the following:

9

Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program

CSI 2401 Intercultural and Cross Cultural Conflict

CSI 3702 Communication, Culture and Identity

CSI 3703 Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)

JRN 3254 International Reporting

JRN 3706 Journalism and Globalization

MSP 3471 Media and Cultural Differences

MSP 3572 Communication and Development

MSP 4453 Information Society

MSP 4496 Global Media

PR 2672 Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Anthropology

Media Studies and Production BA with Media Business Concentration

Overview

The Department of Media Studies and Production expands students' knowledge and skills to create, evaluate and manage media content and organizations. With the urban and global communities as their living laboratories, students draw on their creativity, entrepreneurship, intellectual curiosity and analytical abilities to navigate digital media in our global society.

Theory and practice are integrated into all areas of study in the **Bachelor of Arts in Media Studies and Production**. Media Studies and Production students learn how to produce, evaluate and manage media content for traditional and emerging media in a variety of genres, including information (news and documentary), music, comedy, sports, drama, and commercial and noncommercial persuasion campaigns. They study institutions that create, distribute, and investigate media products (e.g., production studios, television and radio networks, and audience measurement companies) and learn how to create and operate successful media businesses. Media Studies and Production students learn to think purposefully and critically about media, and examine the media's role in history, culture and society from many perspectives. They also learn how to act ethically as they interact with the world both in careers in media institutions and as media consuming and producing citizens.

Students must select one of the following concentrations:

- Media Analysis,
- Media Business, or
- Media Production.

An optional concentration in International Communication is also available for this major.

Media Business Concentration

The **Media Business** professional option concentration introduces students to the business decisions, challenges, creative approaches and ethical responsibilities of media managers and media entrepreneurs in the digital age. Students who follow this concentration seek career opportunities as network executives, talent agents, program developers, executive producers or founders/owners of a digital channel, production company, recording studio or web site development company.

Campus Location: Main

Program Code: CO-MSP-BA

Learn more about the Bachelor of Arts in Media Studies and Production.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production (MSP) by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

- University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive (WI) courses in the major at Temple University. Whenever possible, it is recommended that students select WI courses that also directly satisfy a specific MSP requirement to ease the path to program completion.
- Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
- Minimum of 45 credits in Media Studies & Production / maximum of 64 credits in Media Studies & Production.
- Each course that fulfills a requirement for the major must be passed with a C- or better.
- All prerequisites must be met unless exempted in writing.
- No more than 20 transfer credits may be applied to the Media Studies & Production major.
- No more than 12 credits total for internship, practicum, and independent study courses.

MSP 4696	Communication in Media Organizations (WI)
MSP 4703	Multimedia Production for Corporations and Non-Profits

Total Credit Hours**45-46**

1

Foundation courses must be completed within the first 45 credits at Temple University. Students transferring into Temple must complete at least one Media Studies & Production foundation course at Temple, unless exempted in writing by the chair of the department.

2

Taken during final 30 credits.

3

It is recommended that these are chosen in consultation with a Media Studies & Production Faculty Advisor.

Note: Courses offered in various categories can only be counted once.

About the Professional Development Requirements

The academic experience for all Media Studies and Production majors culminates with the Professional Development requirements, which include MSP 4039 Senior Seminar (3 credits) and one of the Experiential Learning Options (3-4 credits). Together, these courses provide students with hands-on and practical training in the field while allowing them the opportunity to explore their potential professional futures.

Experiential Learning Option: Internship

MSP 4785 Internship (3 or 4 credits): Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the Lew Klein College of Media and Communication's Global Opportunities Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours. NOTE: To be eligible for an internship, students must obtain an appropriate internship placement for the term of registration (assistance is available), have Junior or Senior standing, a minimum GPA of 3.00, have completed all three MSP foundation courses with a minimum grade of C-, and official approval by the MSP Internship Coordinator via submission of the Internship Verification Form, and once determined eligible, the Site Verification Form.

Experiential Learning Option: Standard and Special Topics Practica

As noted in the major requirements list, there are six (6) standard practica courses, (MSP 4487, MSP 4596, MSP 4597, MSP 4687, MSP 4787, and MSP 4887). Four to five (4-5) of those options are offered each term and most of them have specific course prerequisites that must be completed prior to practica registration, so students are advised to plan accordingly.

When possible, at least one Special Topics practicum is also offered each year, and these focus on media-related topics different from the standard six. Consult the MSP Department for any upcoming Special Topics availability as well as the process for counting them toward the Professional Development Option within the official degree audit.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Media Studies and Production with a Concentration in Media Business

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall

Non-MSP Elective		3
Credit Hours		15
Year 3		
Fall		
Media Business Concentration Course ¹		3
Emergent Media Requirement Course		3
GenEd Breadth Course		3
Non-MSP Electives		7-6
Credit Hours		16-15
Spring		
Media Business Concentration Course ¹		3-4
International/Intercultural Media Issues Requirement Course ¹		3
MSP or Non-MSP Electives		9-8
Credit Hours		15
Year 4		
Fall		
MSP 4039	Senior Seminar (Professional Development Requirement)	3
Media Policy & Ethics Requirement Course ¹		3
MSP or Non-MSP Electives		10
Credit Hours		16

Spring

Select one of the following courses from the Professional Development Experiential Learning Options based upon your interests and eligibility: ¹ 3-4

MSP 4785	Internship ²	
MSP 4487	TUTV Practicum ³	
MSP 4596	TV News Production Practicum - Temple Update ³	
MSP 4597	Sports Production Practicum ³	
MSP 4687	Recording Industry Practicum ³	
MSP 4787	Television Production Workshop Practicum ³	
MSP 4887	Radio Production Practicum ³	
MSP Special Topics practicum course (when available - check the course schedule for the term in question)		
Non-MSP Electives		13-12
Credit Hours		16
Total Credit Hours		124

1

All students are required to take at least two writing-intensive (WI) courses in their major. Therefore, this academic plan includes a [WI] notation next to any course that has a writing-intensive attribute. All three MSP concentrations and three of the four focus areas include WI options. Whenever possible, it is recommended that students select their two WI courses from those that also directly satisfy one of their specific MSP requirements, since that will provide a more efficient use of credits and ease the path to program completion.

2

Internship Requirements: a.) Junior or Senior standing (minimum 60 credits completed), b.) a minimum 3.0 GPA, c.) completion of ALL MSP Foundations courses (MSP 1021, MSP 1655, and MSP 1701), and d.) no outstanding grades of Incomplete for any course. For details of the application process and information about the Internship course, review the MSP Internship Overview document, available from the "Forms and Links" section of the Klein tab on the TUPortal.

3

Practicum requirements vary from course to course. Check specific course prerequisites so you may plan accordingly.

Optional Concentration

The **optional International Communication Concentration** (ICC) provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses		
Select three of the following:		9
Any ADV, CMST, CSI, JRN, MSP, or PR courses taken as part of a Klein Global Opportunities Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)		
Any ADV, CMST, CSI, JRN, MSP, or PR Internship completed as part of a Klein Global Opportunities International Program		
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3702	Communication, Culture and Identity	
CSI 3703	Intercultural Communication in the Workplace (if not used to fulfill common course requirement above)	

JRN 3254	International Reporting
JRN 3706	Journalism and Globalization
MSP 3471	Media and Cultural Differences
MSP 3572	Communication and Development
MSP 4453	Information Society
MSP 4496	Global Media
PR 2672	Global Communication and Leadership

International/Intercultural Electives outside of Klein

Note: Satisfying the GenEd World Society requirement by completing a Study Abroad does not also satisfy this requirement.

Choose any two (2) courses of the following:

6-8

Up to any two foreign language courses

Any non-Klein courses at the 2000-level or higher taken in a Klein Global Opportunities Int'l Program, or at a Temple University Overseas Campus (e.g., Temple Rome or Temple Japan)

Any non-Klein internship taken in a Klein Global Opportunities International Program

Anthropology

ANTH 2238	Visual Anthropology of Modern Japan
or ASST 2238	Visual Anthropology of Modern Japan

Media Studies and Production BA with Media Production Concentration

Overview

The Department of Media Studies and Production expands students' knowledge and skills to create, evaluate and manage media content and organizations. With the urban and global communities as their living laboratories, students draw on their creativity, entrepreneurship, intellectual curiosity and analytical abilities to navigate digital media in our global society.

Theory and practice are integrated into all areas of study in the **Bachelor of Arts in Media Studies and Production**. Media Studies and Production students learn how to produce, evaluate and manage media content for traditional and emerging media in a variety of genres, including information (news and documentary), music, comedy, sports, drama, and commercial and noncommercial persuasion campaigns. They study institutions that create, distribute, and investigate media products (e.g., production studios, television and radio networks, and audience measurement companies) and learn how to create and operate successful media businesses. Media Studies and Production students learn to think purposefully and critically about media, and examine the media's role in history, culture and society from many perspectives. They also learn how to act ethically as they interact with the world both in careers in media institutions and as media consuming and producing citizens.

Students must select one of the following concentrations:

- Media Analysis,
- Media Business, or
- Media Production.

An optional concentration in International Communication is also available for this major.

Media Production Concentration

The **Media Production** professional option concentration introduces students to conceptual and technical tools employed to create media content for the digital world. Students who study in this concentration develop strong professional skills as well as critical and analytical abilities that enable them to produce and evaluate content for various media. They seek career opportunities as producers, writers, videographers, editors, recording engineers, web site designers, and talent in traditional and emerging media.

Campus Location: Main

Program Code: CO-MSP-BA

Learn more about the Bachelor of Arts in Media Studies and Production.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production (MSP) by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

1. University requirements
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive (WI) courses in the major at Temple University. Whenever possible, it is recommended that students select WI courses that also directly satisfy a specific MSP requirement to ease the path to program completion.
2. Lew Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
3. Minimum of 45 credits in Media Studies & Production / maximum of 64 credits in Media Studies & Production.
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. All prerequisites must be met unless exempted in writing.
6. No more than 20 transfer credits may be applied to the Media Studies & Production major.
7. No more than 12 credits total for internship, practicum, and independent study courses.

Total Credit Hours**45-46**

1

Foundation courses must be completed within the first 45 credits at Temple University. Students transferring into Temple must complete at least one Media Studies & Production foundation course at Temple, unless exempted in writing by the chair of the department.

2

Taken during final 30 credits.

3

It is recommended that these are chosen in consultation with a Media Studies & Production Faculty Advisor.

Note: Courses offered in various categories can only be counted once.

About the Professional Development Requirements

The academic experience for all Media Studies and Production majors culminates with the Professional Development requirements, which include MSP 4039 Senior Seminar (3 credits) and one of the Experiential Learning Options (3-4 credits). Together, these courses provide students with hands-on and practical training in the field while allowing them the opportunity to explore their potential professional futures.

Experiential Learning Option: Internship

MSP 4785 Internship (3 or 4 credits): Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the Lew Klein College of Media and Communication's Global Opportunities Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours. NOTE: To be eligible for an internship, students must obtain an appropriate internship placement for the term of registration (assistance is available), have Junior or Senior standing, a minimum GPA of 3.00, have completed all three MSP foundation courses with a minimum grade of C-, and official approval by the MSP Internship Coordinator via submission of the Internship Verification Form, and once determined eligible, the Site Verification Form.

Experiential Learning Option: Standard and Special Topics Practica

As noted in the major requirements list, there are six (6) standard practica courses, (MSP 4487, MSP 4596, MSP 4597, MSP 4687, MSP 4787, and MSP 4887). Four to five (4-5) of those options are offered each term and most of them have specific course prerequisites that must be completed prior to practica registration, so students are advised to plan accordingly.

When possible, at least one Special Topics practicum is also offered each year, and these focus on media-related topics different from the standard six. Consult the MSP Department for any upcoming Special Topics availability as well as the process for counting them toward the Professional Development Option within the official degree audit.

1

All students are required to take at least two writing-intensive (WI) courses in their major. Therefore, this academic plan includes a [WI] notation next to any course that has a writing-intensive attribute. All three MSP concentrations and three of the four focus areas include WI options. Whenever possible, it is recommended that students select their two WI courses from those that also directly satisfy one of their specific MSP requirements, since that will provide a more efficient use of credits and ease the path to program completion.

2

Internship Requirements: a.) Junior or Senior standing (minimum 60 credits completed), b.) a minimum 3.0 GPA, c.) completion of ALL MSP Foundations courses (MSP 1021, MSP 1655, and MSP 1701), and d.) no outstanding grades of Incomplete for any course. For details of the application process and information about the Internship course, review the MSP Internship Overview document, available from the "Forms and Links" section of the Klein tab on the TUPortal.

3

Practicum requirements vary from course to course. Check specific course prerequisites so you may plan accordingly.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Public Relations BA

Overview

The **Bachelor of Arts in Public Relations**, offered by the Department of Advertising and Public Relations, consists of 17 Public Relations courses (minimum of 48 credit hours). In this major, students learn the theories of communication influencing how public relations (PR) is practiced while developing the knowledge base and skills they need for strategic and critical thinking, speaking and writing—the basic foundations for becoming a PR professional.

The goal of the Public Relations major is to help students understand public relations is an ongoing communication and relational process, not a position. Viewed this way, public relations requires responsible, thoughtful reflection and action from all levels of organizations, not just those in leadership positions. This approach requires competencies of self-awareness, oral and written communication skills, ethical decision-making and action, the ability to understand audiences' needs, wants and desires, and generate mutual win-win scenarios using a variety of communication tools to create a vision and lead with, through and for others to bring about positive change.

This program will build both knowledge and skills for students to understand true public relations, e.g., "relating" to publics through building a meaningful two-way continuous dialogue built on mutual trust and respect, and be able to effectively formulate a position, influence and empower others. Students will be able to use the knowledge gained from this program to bridge the divide between the theoretical and practical application in the organizations they work in (for-profit, non-profit, government and non-governmental organizations) and the communities they serve.

An optional concentration in International Communication is available for this major.

Learn more about the Bachelor of Arts in Public Relations.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

1. University requirements:
 - a. New students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - b. All students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are PR 1496 and PR 3096.

2. Lew Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
3. Minimum of 48 credits in Public Relations courses and CSI 1111 or CSI 1911.
4. A grade of C or higher must be attained in all required Public Relations courses and CSI 1111 or CSI 1911.
5. An overall GPA of 2.0 must be attained in the major.
6. No more than 12 semester hours of transfer credits may be applied to Public Relations major requirements.
7. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

Public Relations Requirements

1

This program requires a minimum of 124 credits. If students choose to take PR 3587 Public Relations Field Experience for less than 2 credits, they may need to take one additional elective credit to reach a total of 124 credits.

Optional Concentration

The **optional International Communication Concentration (ICC)** provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple's domestic campuses and may be supplemented with study abroad coursework.

This concentration is restricted to Klein students only.

Requirements

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas. Each course that fulfills a requirement for the concentration must be passed with a C- or better.

Code	Title	Credit Hours
Common Course		
Select one of the following:		3
CSI 3701	Intercultural Communication	
CSI 3703	Intercultural Communication in the Workplace	
Klein International/Intercultural courses

Public Relations Minor

Overview

The **Minor in Public Relations**, offered by the Department of Advertising and Public Relations, consists of seven courses (21 s.h.) which provide students in other programs at Temple University the opportunity to better prepare them for life after graduation by gaining the knowledge and skill sets required to communicate effectively and lead at the organizational, team and individual levels.

The goal of the Public Relations minor is to help students understand public relations is a communication and relational process, not a position. Viewed this way, public relations requires responsible, thoughtful reflection and action from all levels of organizations, not just those in leadership positions. This approach requires competencies of self-awareness, oral and written communication skills, ethical decision-making and action, and the ability to understand audiences and generate mutual win-win scenarios using a variety of communication tools to generate a vision and lead with, through, and for others to bring about positive change.

This program will build both knowledge and skills for students to understand true public relations, e.g., "relating" to publics in a meaningful and continuous two-way dialogue built on mutual trust and respect, and be able to effectively formulate a position, influence and empower others. They will

be able to use the knowledge gained from this program to bridge the divide between the theoretical and practical application in the businesses (for-profit, non-profit, government and non-government organizations) and industries they work in and the communities they serve.

Sports Media Certificate

Overview

The **Certificate in Sports Media** gives Klein College students the opportunity to gain experience and expertise in the fields of journalism, advertising, public relations, media and communication by completing a minimum of 18 credit hours in designated sports media courses offered across the college. The Sports Media certificate enables Klein College to compete with a variety of peer and aspirant universities for students embarking on careers dealing with some phase of sports media. Because the certificate will be noted on students' transcripts, the program is expected to enhance the possibility of employment in a variety of sports media fields as well as create a foundation for research on the topic of sports media.

Total Credit Hours		18

1

Only 4 credits of JRN 4597 and MSP 4597 can count toward the Sports Media Certificate. These two courses are cross-listed.

Virtual Media Management BA

Overview

The **Bachelor of Arts in Virtual Media Management** (VMM) is an interdisciplinary program designed to prepare tomorrow's communication experts to work and lead in professional environments that require abilities to build relationships while working on virtual teams, make decisions across international boundaries, and adapt to new technologies within ever-changing virtual environments. This program can be completed either fully online or in hybrid mode. It delivers a unique combination of courses in interpersonal communication, organizational communication, mediated communication, team and group communication, all of which focus on communicating within virtual organizations and mediated environments.

Students begin this major with two 7-week courses that focus on how to work and learn effectively in virtual environments. These courses set the foundation for students to learn and be successful throughout the rest of the VMM major. The ability to communicate efficiently and effectively in virtual settings, and the ability to adapt to continual changes in mediated environments—from virtual platforms to the growth in virtual reality and avatars that represent spaces and identities—requires a novel type of preparation of students who seek to excel in the remote workplace that has become the new normal. Media corporations increasingly depend on a workforce that is capable of crossing state, national and international boundaries, working across time zones, and engaging daily with people who live and work in cultures and nations far from their own homes.

This undergraduate major addresses the cultural, organizational and mediated challenges of this type of workplace, while preparing students with the theoretical and practical knowledge for leading teams and managing media platforms in these types of mediated spaces. This major offers the value of a degree in media and communication, with a specific focus on how to manage and work within virtual environments, which can be applied to both remote and in-person work environments.

Campus Location: Main and Online

Program Code: CO-VMM-BA

Learn more about the Bachelor of Arts in Virtual Media Management.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Virtual Media Management by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major.

Students must meet:

1. University requirements:
 - All students are required to complete the General Education (GenEd (p. 83)) curriculum.
 - All students must take a minimum of two writing-intensive courses in their major at Temple University. VMM 4196 is required for all students completing this major. The second writing-intensive course can be selected from the following: ADV 1196, JRN 1196, CSI 2296, CSI 2696.
2. Low Klein College of Media and Communication requirements (p. 1184), including KLN 1001 and KLN 1002.
3. Minimum 45 credit hours in Virtual Media Management major.
4. Grades of C- or higher must be attained in all courses within the Virtual Media Management major.
5. No more than 12 semester hours of transfer credits may be applied to Virtual Media Management major requirements.

Virtual Media Management Major Requirements

Code	Title	Credit Hours
Core Courses (all core courses are offered online)		
VMM 1111	Introduction to Virtual Media Management ¹	3
VMM 1112	Challenges of Virtual Media Management ¹	3
VMM 3112	Experiential Learning in Virtual Media Management ²	3
VMM 4196	(WI)	3
Communicating in Virtual Environments (CVE) Focus Area		
Select three of the following:		9
CSI 1111	Introduction to Public Speaking	
CSI 1113	Persuasion	
CSI 1401	Conflict and Communication Behavior	
CSI 2401	Intercultural and Cross Cultural Conflict	
CSI 3701	Intercultural Communication	
CSI 4201	Communication, Attitudes, and Opinion	
CSI 4601	Narrative Persuasion	
MSP 4454	Public Information Media Campaigns	
PR 1112	Communicating Leadership	
PR 2661	Communicating Organizational Change	
PR 2672	Global Communication and Leadership	
VMM 4571	International Studies in Media and Communication	
Mediated Platforms and Environments (MPE) Focus Area		
Select three of the following:		9
ADV 2005	Social Media Marketing	
JRN 3709	The Entrepreneurial Journalist	
JRN 3712	The Business of Journalism	
MSP 1001	Video Production for Non-Majors	
MSP 1655	Introduction to Media Business	
MSP 3471	Media and Cultural Differences	
MSP 4221	Information Technology Policy	
MSP 4252	Law and Ethics of Digital Media	
MSP 4446	Psychological Processing of Media	
MSP 4614	Creating a Media Business	
MSP 4641	Programming for Multiplatform Media	
MSP 4657	Current Issues in Media Management	

Focus Area Electives

Select four courses in any combination from the CVE and MPE Focus Areas. At least two of these courses must be at or above the 3000-level. 12

Writing Intensive Course

Select one of the following: 3

ADV 1196	Persuasive Writing	
CSI 2296	Resistance, Protests, and Social Movements	
CSI 2696	Risk Communication	
JRN 1196	Writing and Reporting	
MSP 4696	Communication in Media Organizations	

Total Credit Hours 45

1

Students should complete VMM 1111 and VMM 1112 in their first semester of the major.

2

Students should complete VMM 3112 during the last two years in the major.

Suggested Academic Plan

Please note that this is a **suggested** academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Arts in Virtual Media Management**Suggested Plan for New Students Starting in the 2023-2024 Academic Year**

Year 1

College of Public Health

Overview

Since its inception in 1966, the College of Public Health has prepared well-rounded practitioners who are sensitive to patient/client needs and whose professional competence is built on a solid foundation of theory, laboratory practice, and clinical fieldwork/internships with a focus in interprofessional engagement. The college offers undergraduate programs that include Exercise and Sport Science; Health Information Management; Health Professions; Health Studies; Kinesiology; Nursing; Public Health; Social Work; Speech, Language and Hearing Science; and Recreational Therapy. Students graduating with a bachelor's degree in Health Information Management, Kinesiology, Nursing, Public Health, or Recreational Therapy meet the entry-level requirements of their professions and are qualified to take state and/or national examinations leading to certification or licensure in their fields. The college also offers an exploratory undeclared major for lower-division students as well as accelerated undergraduate-plus-graduate degree programs, including a 3+3 Doctor of Physical Therapy degree program and a Direct Entry 5-year program leading to the Master of Science degree in Athletic Training.

Vision Statement

Solving health's complexities for a better tomorrow.

Mission Statement

The mission of Temple University's College of Public Health is to prepare our students to become researchers, practitioners and educators. Collaborating across health-related disciplines, we address community needs, create evidence-based solutions, and deliver effective, compassionate care.

Academic Departments

- The Department of Communication Sciences and Disorders seeks to enhance the theoretical and applied knowledge in the fields of speech, language and hearing sciences, speech-language pathology, and theoretical linguistics.
- The Department of Epidemiology and Biostatistics strives to enhance population health and train the next generation of public health scholars and professionals.
- The Department of Health and Rehabilitation Sciences is committed to both preventing injury and disability and helping those who have illnesses, short-term injuries, or long-term physical or psychological disabilities lead full, satisfying and meaningful lives.
- The Department of Health Services Administration and Policy is focused on improving population health through research on the role and effectiveness of health services, health information and informatics, leadership/management and policy.
- The Department of Nursing prepares graduates for the practice of professional nursing through rigorous academic and clinical coursework grounded in nursing science and related biological sciences, social sciences and the arts.
- The Department of Social and Behavioral Sciences strives to promote healthy communities and train those who excel in public health practice and research.
- The School of Social Work is an integral part of Temple's College of Public Health, sharing a home with other professions that seek healing and opportunities to bolster human capacities.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the College of Public Health.

- **3+3 Accelerated Bachelor of Science in Health Professions / Doctor of Physical Therapy:** Exceptional freshman undergraduate students can maximize their academic investment and shorten the path to a DPT through this accelerated degree option, which allows them to earn both an undergraduate and a DPT degree in six years instead of seven. Learn more about the benefits of the College of Public Health's 3+3 Accelerated DPT Admissions Option.
- **Accelerated Bachelor of Science in Public Health / Master of Public Health:** The College of Public Health offers a rigorous five-year (4+1) program in which outstanding public health majors can earn a bachelor of science in public health and a master of public health degree in five years, rather than six. This combined degree program offers exceptional students an opportunity to work closely with faculty, while developing critical skills in public health and completing graduate work for professional careers in research, policy, administration, or real-world public health practice. The public health curriculum at Temple University is diverse, offering both undergraduate and graduate students access to faculty from a broad range of public health areas. The MPH requirements will be satisfied by the end of the fifth year of study. The undergraduate program consists of 110 undergraduate credits and the graduate program consists of 39 graduate credits, for a total of 149 credits. The +1 Accelerated BS in Public Health/ MPH program is currently available with the MPH in Epidemiology, MPH in Health Policy and Management and MPH in Social and Behavioral Sciences programs.
- **Accelerated Bachelor of Science in Recreational Therapy / Master of Science in Recreational Therapy:** The College of Public Health offers a rigorous five-year (4+1) program in which high-performing undergraduate recreational therapy students can earn a BS in Recreational Therapy and MS in Recreational Therapy in five years, rather than six. This combined degree program offers exceptional students an opportunity to develop critical skills in recreational therapy and complete graduate work for professional careers in diverse settings, including hospitals, rehabilitation

centers, nursing homes, assisted living facilities, schools and community recreation agencies. Students can apply for admission to this accelerated program at the beginning of their junior year. They begin taking graduate-level courses the semester after they are admitted. Students will complete the requirements for the undergraduate degree within two years after entering the +1 program, and the MS requirements will be satisfied by the end of the fifth year of study.

- **Direct Entry Master of Science in Athletic Training:** For undergraduate students interested in a career in athletic training, the College of Public Health offers a direct entry program combining our BS in Health Professions and our MS in Athletic Training. More than 70 percent of athletic trainers hold at least a master's degree—and within the next few years, a master's degree will be required in order to become eligible for national certification. This program provides you with a direct path into our accredited Master of Science in Athletic Training program, allowing you to earn both a bachelor's and master's degree in five years and preparing you to begin practicing as an athletic trainer. Admitted students are granted direct acceptance into both programs—meaning you do not have to apply separately to the MS program. During the program, you will work with an advisor on academic planning to make sure you are on track and remain in good academic standing to satisfy academic requirements for both programs. View a sample academic plan.

For a complete list, see Accelerated Degree Programs (p. 1792) in the *Undergraduate Bulletin*.

College Accreditation

Temple University's College of Public Health is fully accredited by the Council on Education for Public Health (CEPH). The college is one of only two CEPH-accredited schools of public health in the Philadelphia region, and one of three in the state of Pennsylvania. The college's accreditation is in addition to its 24 program-specific accreditations.

Student Organizations

The College of Public Health houses many student organizations within its departments and organized by area of study.

Contact Information

Undergraduate students with general questions should contact the College's Dean's Office at 215-204-5440.

For questions about academic requirements, students should contact the departmental academic advisor. A list of advisors is available at Academic Advising.

Contact information for specific departments is available at the College of Public Health web site. Please select the program tab at the top of the college page and follow the links for additional program information.

Undergraduate Programs

- American Sign Language Certificate (p. 1360)
- Applied Epidemiology Minor (p. 1361)
- Emergency and Sports Injury Management Certificate (p. 1361)
- Exercise and Sport Science BS (p. 1362)
- Global Health Minor (p. 1365)
- Health Information Management BSHIM (p. 1366)
- Health Information Management Minor (p. 1370)
- Health Policy and Management Minor (p. 1371)
- Health Professions BS (p. 1372)
- Health Studies BA (p. 1376)
- Kinesiology BS (p. 1379)
- Linguistics Certificate (p. 1382)
- Nursing BSN (p. 1383)
- Nutrition Minor (p. 1387)
- Public Health BS (p. 1388)
- Public Health Minor (p. 1393)

- Recreational Therapy BS (p. 1394)
- Speech, Language and Hearing Science BA (p. 1399)

Academic Policies and Regulations

Students are responsible for complying with all university-wide academic policies that apply to their individual academic status (Please see Undergraduate Academic Policies (p. 1835)). Additional and unique policies, or exceptions for the College of Public Health (CPH), appear below.

Attendance

The College of Public Health desires to promote professional responsibility among its students. It is therefore the policy of the college to place the responsibility for class attendance upon the students. Students are accountable for all work missed due to absence. Instructors are generally not required to make special arrangements or examinations for students who are absent. There are certain courses that require a minimum number of hours of student participation in laboratory or clinical experiences, as established by the professional accrediting agency and/or the academic department concerned. At the beginning of each such course, the department shall make the attendance requirement clearly known to the enrolled students. Excessive absences may, at the option of the department, jeopardize the student's grade and/or continuance in the course.

Grade Grievances

Temple University students have the right to appeal any academic matter in which they feel they have been treated unfairly, including grade grievances. Learn about the College of Public Health's grade grievance appeals procedure.

Change of Major (CPH students)

In order to add or change majors or minors within CPH, a CPH student must meet with the academic advisor for their intended major. The advisor will evaluate the student's record in accordance with the following policy:

1. CPH students in their first semester at Temple University who wish to add or change majors or minors may be approved, but a discussion with the academic advisor in your intended major may be required.
2. Continuing CPH students who wish to add or change majors or minors within CPH must have a cumulative grade point average (GPA) of 2.00 or higher. Continuing CPH students who wish to change their major may be required to have an additional meeting with the academic advisor of their intended major.

Change of Major (Non-CPH Temple Students)

To transfer into CPH from another school or college within Temple University, a non-CPH student must complete the following steps:

Step One: Review a brief College of Public Health Change of Program presentation (pdf), which covers important information about academic advising and college/university requirements.

Step Two: Complete a brief online assessment, which will test your knowledge of the information covered in the presentation. You must answer each question correctly in order to complete the process. You may take the test more than once.

Step Three: Within a week, you will receive an official College of Public Health Change of Program form **via email**. It is the student's responsibility to get that form to the advisor of their intended major. Your change of program will not be complete until you submit this form. Please note that this form is **NOT available online**. Once the change is complete, you will then be able to make an appointment with your advisor if you need to register/revise your schedule for the upcoming semester.

After submitting your form, your request to transfer to the College of Public Health will then be reviewed to ensure that you are eligible for transfer. If you have completed all the steps above and have a cumulative and previous semester GPA of 2.0 or higher, your request will be forwarded to the Office of the University Registrar for processing. You will receive e-mail notifications from the Office of the University Registrar once your Change of Program is complete.

Please note the following:

- Students also must be aware that there may be a tuition increase for transferring to CPH (with the exception of intended Social Work majors).
- Students interested in transferring into Nursing are not eligible for the Change of Program process. Information about the application process and access to the application itself can be found on the page for each program.

Laptop

All incoming students in the College of Public Health and the School of Social Work are required to have a laptop. Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health and the School of Social Work to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing

students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

Standards of Scholarship

The grading system is in accordance with the system adopted by Temple University. For students enrolled in this college, a grade of C is the lowest acceptable final grade in major courses, as these are defined in the description of each major. Students not achieving a grade of C or better are required to repeat those courses in which they have failed to demonstrate acceptable performance.

Student Code of Ethics and Professional Conduct

Since students of the College of Public Health are enrolled in professional programs, they are expected to abide by standards of professional conduct and behavior at all times.

The College of Public Health prepares practitioners to fulfill their ideals of service in health or social service settings. In attaining these goals, practitioners must demonstrate exemplary professional behavior, as this is the keystone of the professional associations of the disciplines within this college. The Code of Conduct of Temple University's College of Public Health is intended to contribute to an environment in which excellence in learning and conduct may be fostered.

Terms of the Temple University Student Rights, the Student Conduct Code, and disciplinary procedures described in that code apply to students within the College of Public Health. In addition to the major violations noted by the University code, another action has been identified by the faculty of the college as constituting a major infraction of the code: "Unethical conduct or intentional neglect of duty on clinical practice."

Clinical Training and Field Education

Most College of Public Health programs prepare students for careers that involve close examination of a person's background before being employed or even engaged in clinical training and field education. *Thus, students are strongly encouraged to begin gathering required documentation and clearances immediately after admission into their program so that they have sufficient time to assemble their portfolio well before it is required for field-based learning, including internships.* Gathering required background information early also provides sufficient time to address any issues that might postpone or prevent fieldwork. Each program publishes more detailed information on health screenings and background clearances that are used for clinical training and field education.

Military Science Courses

Undergraduate students in CPH whose degree programs allow for free electives may apply up to 12 credits of military science courses at the 3000 and 4000 levels in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC).

College Graduation Requirements

Specific graduation requirements for undergraduate programs in the College of Public Health (CPH) are available on the individual program pages within this *Bulletin* as well as at CPH Academics.

College Core Course

A key requirement for entering undergraduates is the College Core Course, HRP 1001 Public Health: The Way We Live, Work and Play. For all students who enrolled in the college prior to fall 2015, this course is strongly recommended, but it will not be required. The course was integrated into existing programs and does not extend time to graduation or increase tuition costs. Students should consult individual program descriptions in this *Bulletin* to see how the course fits into their programs—replacing either an elective or an existing course requirement—and consult with their program advisors about whether they should or must take the course.

The course is designed to help students think about contemporary health issues from an interdisciplinary perspective. The course includes an introduction to the five core areas of public health—biostatistics, epidemiology, environmental health, health services administration, and social and behavioral sciences—and how these areas relate to various health, health care, and human service professions. Public health helps inform decisions that shape the behavior of individuals and communities. Students will analyze health issues such as health promotion, disease prevention, and health care policy from a variety of perspectives. As part of the course, students will work in small interdisciplinary teams to access and evaluate information about a particular individual or population-level health issue, and learn to argue persuasively, both orally and in writing, for interdisciplinary approaches to that health issue. An aim of the course is to engage students' curiosity about how the discipline of public health and interdisciplinary approaches apply to issues students may confront in their future professional work.

Academic Advising

The College of Public Health has an extensive system of academic advising provided by professional and faculty advisors. Professional advisors, coordinated by the Associate Director for Advisement, are available for each department, where they provide assistance with such topics as registration, course scheduling, and transfer credits, as well as referral to other resources. For a complete listing of our professional advising staff and more information on academic advising in the College of Public Health, visit CPH Academic Advising.

In most departments, when students reach junior or senior standing, they are assigned to faculty advisors who assist with mentoring as students progress in their professional training.

Academic advisors strive to avoid errors when advising students about program requirements; however, the college cannot assume liability for errors in advising. Students must, therefore, assume primary responsibility for knowing the requirements for their degree and for acquiring current information about their academic status.

Faculty

William Aaronson III, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Temple University.

Cynthia R. Abbott-Gaffney, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; MA, Boston University.

Rebecca Alper, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of Iowa.

Susannah Anderson, Assistant Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; PhD, Tulane University.

Robin Aronow, Instructor, Department of Communication Sciences and Disorders, College of Public Health; MA, University of Delaware.

Laura Baehr, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Temple University.

Sarah Bauerle Bass, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Temple University.

Loretta Ann Bassion, Clinical Assistant Professor, Department of Nursing, College of Public Health; DNP, Drexel University.

Lisa M. Bedore, Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Purdue University.

Janet P. Bettger, Professor, Department of Health and Rehabilitation Sciences, College of Public Health; ScD, Boston University.

Amelia Bieda, Associate Professor of Instruction, Department of Nursing, College of Public Health; PhD, Case Western Reserve University.

Linda Bomboka Wilson, Assistant Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of South Florida.

Algje Lakesa Bond, Assistant Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; MHA, Saint Joseph's University.

Andrea R. Branas, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Arcadia University.

Susan Brotherton, Assistant Professor of Instruction, Department of Social Work, College of Public Health; MSW, Temple University.

Jennifer Brown, Assistant Professor of Instruction, Department of Nursing, College of Public Health; DNP, Walden University.

Heather J. Burket, Instructor, Department of Health and Rehabilitation Sciences, College of Public Health; MEd, Temple University.

Scott Burns, Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, University of Colorado Denver.

Lauren E. Burrows, Assistant Professor of Instruction, Department of Communication Sciences and Disorders, College of Public Health; DPhil, University of Memphis.

Cheri E. Carter, Associate Professor of Instruction, Department of Social Work, College of Public Health; PhD, University of Delaware.

Chaudron Carter Short, Professor of Instruction, Department of Nursing, College of Public Health; EdD, Saint Joseph's University.

Susan S. Caspari, Instructor, Department of Communication Sciences and Disorders, College of Public Health; MA, Temple University.

Wendy Cheesman, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Temple University.

Sezgin Ciftci, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Middle East Technical University.

Marissa Cloutier, Assistant Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; DSc, Harvard University.

Bradley N. Collins, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, State University of New York at Binghamton.

Lorri L. Collins, Clinical Instructor, Department of Nursing, College of Public Health; MSN, Drexel University.

Susan E. Connor, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; OTD, Thomas Jefferson University.

Revay O. Corbett, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Virginia.

LaVonne E. Couch, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, The College of St. Scholastica.

Jeanne Coviello, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; OTD, Thomas Jefferson University.

Patricia A. Crane, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Widener University.

Tamika Curry, Assistant Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; PhD, Temple University.

Gayle DeDe, Research Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Boston University.

Melissa Dichter, Associate Professor, Department of Social Work, College of Public Health; PhD, University of Pennsylvania.

Susan B. Dickey, Associate Professor, Department of Nursing, College of Public Health; PhD, University of Pennsylvania.

Deirdre Dingman, Associate Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; DrPH, University of North Carolina at Greensboro.

Ann E. Dolloff, Instructor, Department of Health and Rehabilitation Sciences, College of Public Health; MEd, Temple University.

Kathleen M. Donocoff, Clinical Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; MS, La Salle University.

Jeffrey N. Draine, Professor, Department of Social Work, College of Public Health; PhD, University of Pennsylvania.

Levent Dumenci, Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Iowa State University.

Bari Dzomba, Associate Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; PhD, Alvernia University.

Jasmine Edwards, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Temple University.

William E. Egan, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Regis University.

Karin Eyrich-Garg, Associate Professor, Department of Social Work, College of Public Health; PhD, Washington University in St. Louis.

Jay S. Fagan, Professor Emeritus, Department of Social Work, College of Public Health; PhD, Columbia University.

Marina Oktapodas Feiler, Research Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of Rochester.

Lisa Ferretti, Research Assistant Professor, Department of Social Work, College of Public Health; MSW, University at Albany, State University of New York.

Jennifer Orlet Fisher, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, The Pennsylvania State University.

Cathy A. Flite, Associate Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; MEd, Widener University.

Margaret M. Foley, Associate Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; PhD, Temple University.

Anne Frankel, Associate Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; PhD, Florida International University.

Kathryn Fritz, Assistant Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, University of Georgia.

Felicidad M. Garcia, Assistant Professor of Instruction, Department of Communication Sciences and Disorders, College of Public Health; MS, Columbia University.

Lina-Maria Garcia, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; OTD, Temple University.

Heather M. Gardiner, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, State University of New York at Buffalo.

Jeffrey Gehris, Associate Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, Temple University.

Catherine Gibbs, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; BSN, Thomas Jefferson University.

Letitia Gill Gembala, Associate Professor of Instruction, Department of Nursing, College of Public Health; DNP, Duquesne University.

Susan Gresko, Assistant Professor of Instruction, Department of Nursing, College of Public Health; MSN, University of Pennsylvania.

Matthew Hall, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of California San Diego.

Inkyu Han, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Rutgers, The State University of New Jersey.

Joelle D. Hargraves, Associate Professor of Instruction, Department of Nursing, College of Public Health; DNP, Chatham University.

Kyle Harris, Instructor, Department of Kinesiology, College of Public Health; MS, Temple University.

Chantelle Hart, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Case Western Reserve University.

Jonathan M. Hartmann, Instructor, Department of Communication Sciences and Disorders, College of Public Health; MA, Gallaudet University.

DaVonti' DeAngelo Haynes, Assistant Professor of Instruction, Department of Social Work, College of Public Health; PhD, The Ohio State University.

Kathryn A. Helland, Clinical Instructor, Department of Communication Sciences and Disorders, College of Public Health; MS, William Paterson University of New Jersey.

Elizabeth Heller Murray, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Boston University.

Kaitlyn Heron, Clinical Instructor, Department of Nursing, College of Public Health; MSN, Drexel University.

Beth Heuer, Associate Professor of Instruction, Department of Nursing, College of Public Health; DNP, Robert Morris University.

Shivayogi V. Hiremath, Assistant Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Pittsburgh.

Ilene L. Hollin, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Johns Hopkins University.

Cheryl A. Hyde, Associate Professor, Department of Social Work, College of Public Health; PhD, University of Michigan.

Jennifer K. Ibrahim, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, University of California Berkeley.

Graciela Jaschek, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of Maryland.

Laura Johnson, Assistant Professor, Department of Social Work, College of Public Health; PhD, Rutgers, The State University of New Jersey.

Lauren Gabrielle Johnson, Assistant Professor of Instruction, Department of Nursing, College of Public Health; PhD, University of Pennsylvania.

Lisa A. Johnson, Associate Professor of Instruction, Department of Nursing, College of Public Health; DrNP, Drexel University.

Resa M. Jones, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of Minnesota.

Hoda Jradi, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, The Ohio State University.

- Zebulon V. Kendrick*, Professor, Department of Kinesiology, College of Public Health; PhD, Temple University.
- Emily Keshner*, Professor Emerita, Department of Health and Rehabilitation Sciences, College of Public Health; EdD, Columbia University.
- Julia Kobulsky*, Assistant Professor, Department of Social Work, College of Public Health; PhD, Case Western Reserve University.
- Sara J. Kovacs*, Associate Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, University of Pittsburgh.
- Rena A. Krakow*, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Yale University.
- Erin R. Kulick*, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Columbia University.
- Joseph A. Kumi*, Instructor, Department of Social Work, College of Public Health; MSW, Florida State University.
- Yanda Lang*, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Western Michigan University.
- Margorie H. Lehigh*, Clinical Instructor, Department of Nursing, College of Public Health; MSN, American Sentinel University.
- Stephen J. Lepore*, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of California Irvine.
- Beth A. Levine*, Instructor, Department of Communication Sciences and Disorders, College of Public Health; MS, Boston University.
- Wenxue Lin*, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, The Pennsylvania State University.
- Barbara A. Little*, Clinical Instructor, Department of Nursing, College of Public Health; MS, La Salle University.
- Jialiang Liu*, Assistant Professor of Instruction, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of North Texas.
- Amy Lynch*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Delaware.
- Raven E. Lynch*, Assistant Professor of Instruction, Department of Social Work, College of Public Health; PhD, The Ohio State University.
- Edwin Maas*, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, San Diego State University.
- Jamie Mansell*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Temple University.
- Nadine Martin*, Laura H. Carnell Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, Temple University.
- Bettyanne Matase*, Assistant Professor, Department of Nursing, College of Public Health; DNP, Walden University.
- Karen McBride*, Assistant Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; MS, Philadelphia University.
- Philip McCallion*, Professor, Department of Social Work, College of Public Health; PhD, University at Albany, State University of New York.
- Bryan P. McCormick*, Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Clemson University.
- Jane McDevitt*, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Temple University.
- Brian D. McHugh*, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of California Los Angeles.
- Gabriella M. McLoughlin*, Assistant Professor, Department of Kinesiology, College of Public Health; PhD, University of Illinois at Urbana-Champaign.
- Nicholas S. Mirabito*, Instructor, Department of Kinesiology, College of Public Health; MS, Temple University.
- C. Daniel Moser*, Assistant Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, Temple University.
- Pricila Mullachery*, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, New York University.
- Kavya Sukumaran Nair*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Florida.
- Elizabeth Neil*, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Indiana State University.
- Bernie Sue Newman*, Associate Professor, Department of Social Work, College of Public Health; PhD, University of Pittsburgh.

Emeka Nwadiora, Associate Professor, Department of Social Work, College of Public Health; JD, Hofstra University School of Law.

Michael C. O'Hara, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Temple University.

Lindsey Oakes, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of North Carolina at Greensboro.

Rebecca A. Operacz, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, University of Colorado and Health Sciences Center.

Kimberly Pachik, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; OTD, Chatham University.

Aimee J. Palumbo, Associate Professor of Instruction, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Drexel University.

Carolyn Parks, Associate Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Tennessee at Knoxville.

Paige Pastalove, Assistant Professor of Instruction, Department of Communication Sciences and Disorders, College of Public Health; AuD, West Virginia University.

Jay S. Patel, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Indiana University - Purdue University Indianapolis.

Elizabeth A. Pfeiffer, Associate Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Nova Southeastern University.

Jacqueline Phillips, Associate Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, Temple University.

Heather Porter, Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Temple University.

Kseniia Power, Assistant Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, Temple University.

Erica A. Pugh, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; OTD, Temple University.

Gillian A. Rai, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DOT, Temple University.

Laura Rauth, Clinical Instructor, Department of Nursing, College of Public Health; MSN, Yale University.

Jodi Reich, Associate Professor of Instruction, Department of Communication Sciences and Disorders, College of Public Health; PhD, Yale University.

James J. Reilly, Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of Pennsylvania.

Daniel M. Rosney, Assistant Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, State University of New York at Buffalo.

Nancy L. Rothman, Professor, Department of Nursing, College of Public Health; EdD, Temple University.

Abby Rudolph, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Johns Hopkins University.

Anne C. Russ, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Temple University.

Mark Salzer, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Illinois at Urbana-Champaign.

Mayra C. Santiago, Associate Professor, Department of Kinesiology, College of Public Health; PhD, University of Minnesota.

David B. Sarwer, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Loyola University Chicago.

Michelle C. Scarpulla, Instructor, Department of Social and Behavioral Sciences, College of Public Health; MPH, Temple University.

Krista Schroeder, Assistant Professor, Department of Nursing, College of Public Health; PhD, Columbia University.

Brittany Schuler, Assistant Professor, Department of Social Work, College of Public Health; PhD, University of Maryland Baltimore.

Leah M. Schumacher, Assistant Professor, Department of Kinesiology, College of Public Health; PhD, Drexel University.

Jack V. Sears, Assistant Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, University of Texas at Austin.

Jay S. Segal, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, The Ohio State University.

Jing Shen, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; PhD, University of California San Diego.

Laura Siminoff, Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, Johns Hopkins University.

Laura Sinko, Assistant Professor, Department of Nursing, College of Public Health; PhD, University of Michigan.

Melody J. Slashinski, Associate Professor of Instruction, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Texas.

Alissa Smethers, Assistant Professor, Department of Kinesiology, College of Public Health; PhD, The Pennsylvania State University.

Brandon S. Snead, Instructor, Department of Health and Rehabilitation Sciences, College of Public Health; MS, Temple University.

Gretchen A. Snethen, Associate Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Indiana University.

Tulay G. Soylu, Assistant Professor of Instruction, Department of Health Services Administration and Policy, College of Public Health; PhD, George Mason University.

Alesya Starayeva, Instructor, Department of Communication Sciences and Disorders, College of Public Health; BA, Gallaudet University.

Elizabeth Steele, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, Arcadia University.

Gerry A. Stefanatos, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; DPhil, Oxford University.

Ashley E. Stewart, Assistant Professor of Instruction, Department of Social Work, College of Public Health; PhD, Ohio State University.

Amy Stolarick, Instructor, Department of Nursing, College of Public Health; MSN, Wilmington University.

Mark Stoutenberg, Associate Professor, Department of Kinesiology, College of Public Health; PhD, University of Miami.

Chang Su, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Xi'an Jiaotong University.

Gabriel Tajeu, Assistant Professor, Department of Health Services Administration and Policy, College of Public Health; DrPH, University of Alabama at Birmingham.

Monica Taylor, Associate Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, University of Pittsburgh.

Brenda Teichman, Clinical Instructor, Department of Nursing, College of Public Health; MS, Western Governors University.

Elizabeth Tenison, Assistant Professor of Instruction, Department of Kinesiology, College of Public Health; PhD, Northern Illinois University.

Mary Terhaar, Professor, Department of Nursing, College of Public Health; PhD, The Catholic University of America.

Elizabeth Thomas, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Nebraska-Lincoln.

Christopher Thompson, Assistant Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, University of Illinois.

Ryan T. Tierney, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Temple University.

Jasmine M. Tooles, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; DPT, University of Delaware.

Gina Tripicchio, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of North Carolina at Chapel Hill.

Elizabeth Van Nostrand, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; JD, Tulane University.

Gena B. Vargas, Assistant Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Clemson University.

Aurora J. Verlin, Instructor, Department of Health and Rehabilitation Sciences, College of Public Health; MS, Temple University.

Carolina Villamil Grest, Assistant Professor, Department of Social Work, College of Public Health; PhD, University of Southern California.

Christopher Wheldon, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of South Florida.

Kirsten Wiens, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, New York University.

Robin T. Wilson, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, University of Iowa.

Caitlin N. Wolak, Instructor, Department of Social and Behavioral Sciences, College of Public Health; MPH, Temple University.

Andrea Wolf, Associate Professor of Instruction, Department of Nursing, College of Public Health; DNP, Case Western Reserve University.

W. Geoffrey Wright, Professor, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Brandeis University.

Huanmei Wu, Professor, Department of Health Services Administration and Policy, College of Public Health; PhD, Northeastern University.

Jingwei Wu, Associate Professor of Instruction, Department of Epidemiology and Biostatistics, College of Public Health; PhD, Indiana University.

Andrew Yannaccone, Associate Professor of Instruction, Department of Health and Rehabilitation Sciences, College of Public Health; PhD, Virginia Commonwealth University School of Medicine.

Recai Yucef, Professor, Department of Epidemiology and Biostatistics, College of Public Health; PhD, The Pennsylvania State University.

Dana Zeuggin, Instructor, Department of Communication Sciences and Disorders, College of Public Health; MS, Bloomsburg University.

Yaara Zisman-Ilani, Assistant Professor, Department of Social and Behavioral Sciences, College of Public Health; PhD, University of Haifa.

American Sign Language Certificate

Overview

The **Certificate in American Sign Language (ASL)**, offered by the Department of Communication Sciences and Disorders, provides students with intermediate-level skills in the widely used language of the deaf in the U.S. and Canada. Students also learn about American Deaf culture and gain valuable insight for future encounters with individuals who are deaf in professional and social contexts. This course of study is particularly useful for students majoring in any of the health professions, education, psychology, law, cognitive neuroscience or linguistics. The certificate program also provides students with foundational skills in ASL for additional education in ASL-English interpreting or education of individuals who are D/deaf or hearing impaired.

Campus Location: Main

Program Code: HP-ASL-CERT

Learn more about the undergraduate certificate in American Sign Language.

Requirements

The Certificate in American Sign Language (ASL) will be awarded to students who complete the following 5-course sequence:

Code	Title	Credit Hours
CSCD 1001 or CSCD 1901	American Sign Language I Honors American Sign Language 1	3
CSCD 1002	American Sign Language II	3

or CSCD 1902	Honors American Sign Language 2	
CSCD 1003	American Sign Language III	3
CSCD 1004	American Sign Language IV	3
CSCD 2011	American Deaf Culture	3
Total Credit Hours		15

Applied Epidemiology Minor

Overview

The **Minor in Applied Epidemiology**, offered by the Department of Epidemiology and Biostatistics, is designed for students interested in science and health with an opportunity to enhance their skillset obtained from an undergraduate program in public health and other science-related undergraduate programs. Students in the 18-credit minor will expand their knowledge and abilities in the application of epidemiologic and statistical methods, tools and frameworks focusing on evidence-based findings, and best practices. Students will understand how to investigate, detect and address population- and community-level health issues. The minor consists of 6 undergraduate courses (2 required; 4 electives).

Campus Location: Main

Requirements

The requirements for the minor in Applied Epidemiology are:

Code	Title	Credit Hours
Required Courses		
EPBI 2219	Biostatistics and Public Health	3
EPBI 3101	Introduction to Epidemiology	3
Elective Courses		
Choose four from the following:		12
EPBI 2301	Public Health Beyond Borders	
EPBI 2305		
EPBI 2361	Epidemiology 360: Determinants, Disease and Health-related Outcomes	
EPBI 3203	Applied Survey Methods	
EPBI 3205	Introduction to Statistical Computing	
EPBI 3209		
GUS 3062	Fundamentals of Geographic Information Systems	
GUS 3065	Census Analysis with GIS	
GUS 3069	GIS for Health Data Analysis	
ENST 4066	Environmental GIS	
Total Credit Hours		18

Emergency and Sports Injury Management Certificate

Overview

Students learn to assess, outline and review management procedures for specific sports injuries with the **Certificate in Emergency and Sports Injury Management**. This 12-credit undergraduate certificate, offered by the Department of Health and Rehabilitation Sciences, teaches students to describe

and implement musculoskeletal assessment techniques. Students will gain valuable experience and knowledge for potential careers in healthcare and be eligible to take the National Registry EMT certification exam.

The Emergency and Sports Injury Management certificate program also provides in-depth training in assessment and extra- and pre-hospital management of sports injuries in an interprofessional manner. Students will have the opportunity to develop skills extracting and immobilizing mock patients from challenging scenarios, including gymnastics foam pits and an ice hockey rink. Additionally, students will gain further insight into the pathophysiology of many of the common illnesses likely encountered as a health professional.

The Certificate in Emergency Sports Injury Management presents an opportunity for students in pre-health majors to gain experience in emergency medicine and foundational knowledge for future graduate programs. Potential future career paths include emergency responder, physical therapist and sports injury specialist, among many others.

The Certificate in Emergency and Sports Injury Management will be awarded to students who complete the following requirements:

Code	Title	Credit Hours
HRPR 3001	Emergency Medical Technician	6
HRPR 2442	Basic Assessment of Musculoskeletal Injuries	3
HRPR 3443	Assessment of Head, Neck, and Spine Injuries in Sport	3
Total Credit Hours		12

Exercise and Sport Science BS

Overview

The **Bachelor of Science in Exercise and Sport Science**, offered by the Department of Health and Rehabilitation Sciences, focuses on the science and practice of health, fitness and sports performance. This program prepares students for a range of professional certifications and physical fitness careers. The Exercise and Sport Science program focuses on providing training to work with individuals and small groups in two areas of emphasis:

1. Exercise Physiology (the application of exercise principles involving populations that are either healthy or have pre-existing medical conditions), and
2. Sports Performance (the application of sport science principles involving populations whose primary goals are competitive and related to sports performance).

Our students pursue a wide range of pathways, including workforce opportunities and pursuing advanced studies, following graduation from the Exercise and Sport Science program.

1. **Workforce Opportunities:** Our students work in a variety of university, corporate, commercial, community and clinical settings. Career opportunities include working in clinical exercise physiology, cardiac rehabilitation, strength and conditioning, sport performance, and personal training.
2. **Graduate Training in Exercise and Sport Science:** Our students are prepared to attend graduate programs focused on exercise science, exercise physiology, kinesiology and human performance.
3. **Graduate Training in Other Professional Fields:** Our students develop a strong foundation that prepares them for other graduate programs, including athletic training, recreational therapy, physical therapy and other allied health professions. If pursuing graduate studies is a future goal of yours, please see your academic advisor for further details early in your program of study.

To prepare students for these career pathways, our curriculum incorporates didactic training and hands-on learning experiences required to sit for several professional examinations. We thoughtfully integrate multiple hands-on learning experiences that include laboratory experiences, service-learning opportunities, and a culminating internship that provides students with real-world experience implementing what was learned in the classroom throughout the Exercise and Sport Science program.

 sara.kovacs@temple.edu

Learn more about the Bachelor of Science in Exercise and Sport Science.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are KINS 3196 and KINS 4396.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note that the Exercise and Sport Science program requires students to complete clinical/field education experiences at facilities both on and off the University campus. Many of these placements may require that you have personal health insurance. Additionally, these placements may require criminal background checks, Act 33/34 clearances, health clearances and immunizations and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements.

Major Requirements

Code	Title	Credit Hours
Exercise and Sport Science Core		
KINS 1203	Introduction to Exercise and Sport Science	3
KINS 1223	Human Anatomy and Physiology I	4
KINS 1224	Human Anatomy and Physiology II	4
KINS 2001	Social Determinants of Health and Physical Activity	3
KINS 2203	Physiology of Physical Activity	4
SBS 2204	Diet and Weight Management	3
HRPR 2421	First Aid and CPR for Health and Exercise	3
KINS 2424	Functional Anatomy for Kinesiology	3
KINS 3196	Psychology of Physical Activity	3
KINS 3202	Biomechanics of Physical Activity	4
KINS 3203	Exercise Assessment and Programming	4
KINS 3316	Principles of Personal Fitness	4
KINS 3368	Principles of Health Fitness Program Management	3
KINS 4311	Advanced Physiology of Exercise	3
KINS 4364	Business Management for Exercise Professionals	3
KINS 4385	Exercise and Sport Science Internship I	3
KINS 4396	Research and Writing in Exercise and Sport Science (WI)	3
KINS 4485	Exercise and Sport Science Internship II	3
Kinesiology Physical Activity Program (KPAP) Courses		4
Content Electives		
Select from the following:		12

HRPR 1444	Movement Injuries: Prevention and Care
KINS 3362	Olympic and Powerlifting
KINS 3363	Basic Electrocardiography
KINS 4283	Directed Readings and Study in Kinesiology
KINS 4290	Special Topics in Kinesiology
KINS 4315	Applied Performance Nutrition
KINS 4316	Principles of Strength and Conditioning
KINS 4333	Clinical Cardiovascular Pulmonary Exercise Physiology
KINS 4335	Clinical Exercise Physiology
CHEM 1031	General Chemistry I
CHEM 1033	General Chemistry Laboratory I
CHEM 1032	General Chemistry II
CHEM 1034	General Chemistry Laboratory II
BIOL 1011	General Biology I
BIOL 1012	General Biology II
PHYS 1021	Introduction to General Physics I
MATH 1021	College Algebra
MATH 1022	Precalculus
MATH 1041	Calculus I

Total Credit Hours**76**

Suggested Academic Plan

Bachelor of Science in Exercise and Sport Science

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		
Fall		Credit Hours
HRPR 1001	Public Health: The Way We Live, Work and Play	3
KINS 1203	Introduction to Exercise and Sport Science	3
KINS 1223	Human Anatomy and Physiology I	4
Kinesiology Physical Activity Program (KPAP) Course		2
GenEd Breadth Course		3
Credit Hours		15
Spring		
KINS 1224	Human Anatomy and Physiology II	4
Kinesiology Physical Activity Program (KPAP) Course		2
ENG 0802	Analytical Reading and Writing	4
or ENG 0812	or Analytical Reading and Writing: ESL	
or ENG 0902	or Honors Writing About Literature	
GenEd Quantitative Literacy (GQ)		4
GenEd Breadth Course		3
Credit Hours		17
Year 2		
Fall		
KINS 2001	Social Determinants of Health and Physical Activity	3
KINS 2203	Physiology of Physical Activity	4
KINS 2424	Functional Anatomy for Kinesiology	3
IH 0851	Intellectual Heritage I: The Good Life	3
or IH 0951	or Honors Intellectual Heritage I: The Good Life	
Free Elective		3
Credit Hours		16
Spring		
HRPR 2421	First Aid and CPR for Health and Exercise	3

SBS 2204	Diet and Weight Management	3
KINS 3202	Biomechanics of Physical Activity	4
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
GenEd Breadth Course		3
Credit Hours		16
Year 3		
Fall		
KINS 3203	Exercise Assessment and Programming	4
KINS 3196	Psychology of Physical Activity	3
GenEd Breadth Course		3
GenEd Breadth Course		3
Free Elective		3
Credit Hours		16
Spring		
KINS 3316	Principles of Personal Fitness	4
KINS 3368	Principles of Health Fitness Program Management	3
ESS Content Elective		3
Free Elective		3
Credit Hours		13
Year 4		
Fall		
KINS 4311	Advanced Physiology of Exercise	3
KINS 4364	Business Management for Exercise Professionals	3
KINS 4385	Exercise and Sport Science Internship I	3

Total Credit Hours		120

Global Health Minor

Overview

The **Minor in Global Health**, offered by the Department of Health Services Administration and Policy, provides students the opportunity to gain experience and expertise for the health of peoples of the world and the current population health problems and its associated influential factors and social determinants. This minor requires students to complete 18 credit hours. Students participating in the minor will gain knowledge to understand global health systems. They will also develop interdisciplinary skills to evaluate global health phenomena and design solutions to major public health challenges and engage actively in international initiatives to improve health as global citizens. Specifically, they will learn primary health disparities, social determinants, policy management, care outcomes, health informatics and public health communications in a connected global environment. The students in this minor will be well prepared for a professional career in the global public health field, including research, teaching or health services across many sectors, such as universities, government agencies, international agencies, non-governmental organizations or private industry.

Health Information Management BSHIM

Overview

The **Bachelor of Science in Health Information Management (HIM)**, offered by the Department of Health Services Administration and Policy, is focused on the development, implementation, management and maintenance of patient health information systems in accordance with legal, regulatory and accrediting agencies' requirements for health care data collection and dissemination. HIM professionals have a special role in making sure that patient information remains confidential and maintained in a manner that ensures the patient's privacy and that health care information is secure. A career in HIM combines interests in medicine, management, information technology, electronic health record systems and finance. HIM professionals design and manage health information systems, with special attention to quality and privacy of health information, in a wide range of settings such as hospitals, managed and ambulatory care, insurance and pharmaceutical companies, consulting firms and public health organizations.

The Bachelor of Science in Health Information Management (BSHIM) includes classes covering six main areas:

- Core HIM: Health Record Documentation, Legal Aspects of HIM, Internships, Healthcare Delivery Systems, and Professional Development.
- Data Analytics: HIM IT Fundamentals, Electronic Health Record Systems, Informatics, and Database Development and Design.
- Management: Leadership and Strategy, Human Resources, Operations, and Project Management.
- Classification and Reimbursement: ICD-10, CPT4, Intermediate Coding, and Reimbursement.
- Clinical Medicine: Pathophysiology, Medical Terminology, Clinical Procedures, and Pharmacology.
- Internship: Management Internship (four weeks at a facility where you will be participating in a management project at that organization). Examples of internship sites include the University of Pennsylvania Health System, Thomas Jefferson University Hospital, NYU Medical Center, and Johns Hopkins Hospital.

Admissions

Beginning Fall 2021, first-year students may select Health Information Management as their major on their application for admission to Temple University and may be offered direct admission to the program. Prerequisite courses must be completed with a grade of C or above in order to begin the HIM major courses.

Laptop Requirements

Laptops are integrated into the HIM curriculum and are required to complete in-class activities and projects outside of class. In order to run specialized analytical software, a laptop with the minimum hardware specifications defined at <https://cphapps.temple.edu/wiki/it/student/laptop> will allow a smooth experience.

Certification

Students enrolled in the HIM program and in the last term of study are eligible to apply for and sit for the examination of the American Health Information Management Association for the nationally recognized certification as a Registered Health Information Administrator (RHIA).

Following satisfactory completion of all course requirements, the graduate is awarded the degree of Bachelor of Science in Health Information Management.

See <https://www.ahima.org/certification-careers/certifications-overview/> for information about credentialing in Health Information Management.

Accreditation

The baccalaureate program in Health Information Management at Temple University is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Learn more about the Bachelor of Science in Health Information Management.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All students are required to complete the university's General Education (GenEd (p. 83)) curriculum (Analytical Reading & Writing, Intellectual Heritage I and II, Arts, Human Behavior, Global/World Society, U.S. Society, Race & Diversity, Science & Technology, Quantitative Literacy).

All Temple students must take a minimum of two writing-intensive courses at Temple as part of the major. The writing-intensive courses for this major are HIM 3297 and HIM 4298.

College Requirement

All CPH students must complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note the Health Information Management program requires students to complete internships at facilities both on and off the University campus. These placements may require criminal background checks, Act 33/34 clearances and perhaps a drug screen. Placements may also require the student to maintain personal health insurance. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements.

Program Requirements

Students in the HIM program are required to satisfy the following prerequisite courses before beginning HIM upper level courses. A grade of C or better is required for all prerequisite and professional courses (a grade of C- is not acceptable).

Health Information Management Prerequisites:

Code	Title	Credit Hours
MATH 1013 or PSY 1167 or SOC 1167 or EPBI 2219	Elements of Statistics Social Statistics Biostatistics and Public Health	3
KINS 1223 or KINS 1221	Human Anatomy and Physiology I ¹ Principles of Anatomy and Physiology I	3-4
KINS 1224 or KINS 1222	Human Anatomy and Physiology II ¹ Principles of Anatomy and Physiology II	3-4
HIM 1101	Medical Terminology	3

HIM 1055	IT Applications for Health	3
HPM 2214	Politics and Payments in US Healthcare System	3
Total Credit Hours		18-20

Health Information Management Professional Courses: ²

Code	Title	Credit Hours
HIM 2215	Health Information Management IT Fundamentals	3
HIM 3101	Health Record Documentation	3
HIM 3106	Pathophysiology	3
HIM 3107	Healthcare Leadership and Strategic Management	3
HIM 3111	Statistics and Research in Health Care	3
HIM 3113	Healthcare Database Design and Development	3
HIM 3203	Electronic Health Record Systems	3
HIM 3208	International Classification of Diseases	3
HIM 3216	Clinical Procedures and Pharmacology	3
HIM 3271	Professional Development	1
HIM 3297	Health Information Management Human Resource Management (WI)	3
HIM 4101	Health Informatics: Infrastructure and Standards	3
HIM 4102	Legal Aspects of Health Information Management	3
HIM 4207	Healthcare Quality Improvement	3
HIM 4105	Current Procedural Terminology Coding	3
HIM 4113	Healthcare Reimbursement Systems	3
HIM 4121	Healthcare Data Analytics	3
HIM 4202	Health Information Management Project Management	3
HIM 4206	Intermediate Coding	3
HIM 4104	Health Information Management Operations Management	3
HIM 4286	Management Internship	4
HIM 4298	Health Information Management Senior Seminar (WI)	3
Total Credit Hours		65

1

You should consult with your advisor for information on the distinctions between Anatomy and Physiology selection sequence and its implication for your degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science and Technology requirement. These courses are similar but not interchangeable and must be taken in the correct sequence. Students choosing the KINS 1221 and KINS 1222 sequence may need to take an additional 2-credit elective to meet credit hours degree graduation requirement. Please see a departmental academic advisor for clarification.

2

The professional courses follow a strict semester-by-semester sequence that requires careful attention to registration dates. See a departmental academic advisor for help planning your professional course registration.

Electives

6 credits. Strongly recommended electives include business writing electives.

Suggested Academic Plan

Bachelor of Science in Health Information Management

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

HIM 4104	Health Information Management Operations Management	3
HIM 4206	Intermediate Coding	3
HIM 4286	Management Internship	4
HIM 4298	Health Information Management Senior Seminar ³	3
Credit Hours		16
Total Credit Hours		123

A grade of C or better is required to satisfy ALL prerequisite and professional course requirements. Grades below a C will not be accepted.

Note: All professional courses are offered only once a year.

1

MATH 0823 or MATH 0824 is strongly recommended.

2

You should consult your advisor for information on the distinctions between the anatomy and physiology selection sequence and its implication for your degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science & Technology requirement. These courses are similar but not interchangeable. Courses must be taken in the correct sequence. Students choosing KINS 1221 and KINS 1222 may need to take an additional 2-credit elective to meet credit hour degree requirements as well as annual progress requirements. Please see your advisor for clarification.

3

Indicates writing capstone for major.

Health Information Management Minor

Overview

The **Minor in Health Information Management**, open to all students and offered by the Department in Health Services Administration and Policy, is designed to complement existing programs throughout Temple University, where knowledge of Health Information Management would enhance a student's marketability and overall preparedness for working in the healthcare field. Students will benefit greatly as technology becomes increasingly utilized in every sector of healthcare. The Health Information Management minor provides students in any discipline with the fundamental background in areas of healthcare information technology, electronic health records and documentation, medical terminology and health care systems in the United States. Students participating in this minor will be better equipped to succeed in fieldwork and internships in their major as they will be more familiar with patient portals, electronic records, privacy and security of patient data.

Completing the Health Information Management minor improves students' marketability in many professional paths, including public health, kinesiology, health professions and psychology. The minor also prepares students for professional graduate programs such as physical therapy, occupational therapy, physician assistant or medical school.

Campus Location: Main

Contact Information

To declare or rescind this minor, contact:

Sara Byron, Academic Advisor
sara.byron@temple.edu

Requirements

The requirements for the minor in Health Information Management are:

Code	Title	Credit Hours
HIM 1006	Electronic Documentation for Health Care Providers	3
HIM 1055	IT Applications for Health	3

HIM 1101	Medical Terminology	3
HPM 2214	Politics and Payments in US Healthcare System	3
HIM 2215	Health Information Management IT Fundamentals	3
HIM 3113	Healthcare Database Design and Development	3
Total Credit Hours		18

Note:

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C in each course.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- Two courses can be used to meet minor requirements as well as major requirements.

Health Policy and Management Minor

Overview

The **Minor in Health Policy and Management** (HPM) is open to all undergraduate students who are qualified to take a minor at Temple University. The HPM minor, offered by the Department of Health Services Administration and Policy, provides students with a background in policy issues and management challenges related to politics, ethics, quality, payments and access to health care. The minor gives students the opportunity to gain experience in communicating health policies for diverse audiences, advocating for health policies, analyzing health policies and explaining the political process underlying policy making. Students will also have options to learn sound management principles, leadership skills and the operation of health-related organizations. This minor requires students to complete 18 credit hours: 9 credit hours from required courses and 9 credit hours from interdisciplinary elective courses. The required courses and electives are offered by various departments in the College of Public Health and in other colleges. Alternative electives can be approved at the discretion of the program director. Elective courses in the minor also allow students to choose how to focus their area of study—students may concentrate on policy, management, or both.

Campus Location: Main

HCM 3502	Healthcare Financing and Information Technology

Total Credit Hours
18

1

Other electives as approved by the program director.

Health Professions BS

Overview

The **Bachelor of Science in Health Professions** (BSHP), offered by the Department of Health and Rehabilitation Sciences, helps students prepare for their chosen professional graduate program with the prerequisites necessary for many health professions, e.g., physical therapy, occupational therapy, physician assistant practice, certified anesthesiology assistant, etc. The BSHP provides a broad course of study, while also allowing students to tailor their electives toward their career of choice. For those students interested in medicine or dentistry, we recommend pursuing a degree from Temple University's College of Science and Technology.

The BSHP program provides an academically rigorous set of required core courses with unique interdisciplinary and inter-professional electives that will help set the student apart in the selection process. Drawing from the philosophy of "acres of diamonds," the program utilizes courses from across the College of Public Health (CPH), providing students with an expanded view of health professions. Courses drawn from the disciplines in the CPH give students a more inclusive view of the field reinforcing the team approach so widely used in healthcare today. Most of the core courses provide students with the prerequisites for the professional clinical degrees, i.e., Biology 1 and 2, Chemistry 1 and 2, Physics 1 and 2, Anatomy and Physiology 1 and 2, and statistics. In addition, some programs require additional courses like Microbiology, Biochemistry, Genetics (particularly for certified anesthesiology assistant), or Medical Terminology (e.g., Physical Therapy and Occupational Therapy).

Note: Depending on the program, students may be required to take advanced courses in psychology or sociology, which have been factored in as well. It is important to note some schools may require additional coursework over and above the courses mentioned here; and some professional healthcare programs may require very different prerequisite courses. Your academic advisor will assist you in choosing courses to meet your professional objectives.

Learn more about the Bachelor of Science in Health Professions.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All University GenEd courses must be completed with a minimum grade of C- in order to count toward graduation; however, students are encouraged to aim for the B grade or higher to improve their chances for successful admission to their graduate program of choice. It should be noted that the Department of Kinesiology requires KINS 1223 Human Anatomy and Physiology I and KINS 1224 Human Anatomy and Physiology II to fulfill the GenEd

Science & Technology requirement. Further note that KINS 1223 and KINS 1224 are required prerequisites for admission to the majority of health profession graduate programs, and students are encouraged to earn a B or better in those classes.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses for this major are HRPR 3096 and HRPR 3197.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play .

Major Requirements

All program courses must be completed with a minimum grade of C. However, if a student wants to be successful when applying for a graduate program in the Health Professions, it is recommended that all program courses be completed with a minimum grade of B. This is especially important for the core courses in math and science.

It should also be noted that some electives are 3 credits and others are 4 credits. In planning the course of study, the student needs to be mindful of the 120-credit requirement for graduation when choosing electives. It is expected the student will work with his/her advisor to ensure the 120 credits are reached and timely completion of the BS in Health Professions program is on track.

1

Please note that electives have various credit hours (i.e., 3, 4 or 6 credit hours). In planning the course of study, the student needs to be mindful of the 22-credit elective and 120-credit total requirements for graduation when choosing electives. It is expected the student will work with his/her advisor to ensure the 120 credits are reached and timely completion of the BS in Health Professions program is on track.

2

Please note that free elective credits will vary depending on the number of major-related elective credits that have been or will be taken. It is expected that the student will work with his/her advisor to ensure the 120 credits are reached and timely completion of the BS in Health Professions program is on track.

Health Studies BA

Overview

The **Bachelor of Arts in Health Studies**, offered by the Department of Health and Rehabilitation Sciences at Temple's College of Public Health, is a degree completion program for students interested in health fields which do not require a breadth of bench sciences. Generally, these are students who have at least 60 credits and a GPA at or below a 3.0 out of 4.0 scale. Students can utilize the flexibility of this program to explore a wide range of interests and to tailor their degree to their own interests in areas such as public health, health information management or psychology (just to name a few), while also preparing for careers in occupational therapy, athletic training and many more. Note: This program is intended for internal and external transfer students, not direct admit for incoming students. Incoming first year students interested in health professions should consider the BS in Health Professions.

Students in the BA in Health Studies will take a wide range of courses in public health, anatomy and physiology, statistics, and health care. This interdisciplinary approach will help prepare students to become professionals who seek healthcare solutions focused on interdisciplinary approaches and upstream interventions resulting in innovative solutions to patient and health care issues.

Campus Location: Main

Program Code: HP-HLST-BA

What makes this program special?

Flexible Curriculum: Students will have the opportunity to work with academic advisors and tailor their degree to their goals and interests.

Interdisciplinary Curriculum: Course work will provide background in the science of the human body, determinants of health, health communication, nutrition, health care systems, and much more.

Extraordinary Educators: Students take courses from leaders and innovators across fields in the College of Public Health. These educators use innovative classroom approaches and a wealth of practical experience to bring real world lessons and skills to the curriculum.

Special Admissions Information

Transfers only (internal and external). Generally minimum 60 credits and GPA at or below a 3.0 out of 4.0 scale.

Distinction in Major

Degree completion initiative.

1

Please note that some electives are 3 credits and others are 4 credits. In planning the course of study, the student needs to be mindful of the 120-credit requirement for graduation when choosing electives. It is expected the student will work with their advisor to ensure the 120 credits are reached and timely completion of the BA in Health Studies program is on track.

2

Please note that free elective credits will vary depending on the number of major-related elective credits that have been or will be taken. It is expected that the student will work with their advisor to ensure the 120 credits are reached and timely completion of the BA in Health Studies program is on track.

3

Students may work closely with their advisor to plan out a suggested minor or certificate to meet their educational goals. While the minor or certificate is not required, it is strongly recommended due to the flexibility of the BA in Health Studies.

Kinesiology BS

Overview

The **Bachelor of Science in Kinesiology**, offered by the Department of Health and Rehabilitation Sciences, prepares students to enter a variety of jobs in the fields of physical activity, health promotion and fitness/wellness. Students learn about the field of kinesiology through an interdisciplinary curriculum that provides students with the basic foundations of movement, which are then applied to helping communities and populations be healthier and more active. The Bachelor of Science in Kinesiology provides multiple career options as there is a growing demand for professionals skilled at

integrating physical activity, health and well-being into community settings. This demand is expected to continue growing in the future, particularly since physical activity is one of the most important public health strategies for preventing and managing chronic diseases.

Our students pursue a wide range of pathways, including workforce opportunities and pursuing advanced studies, following graduation from the Kinesiology program.

- 1. Workforce Opportunities:** Our students work in a variety of settings including wellness centers, healthcare systems, school district wellness programs, and rehabilitation centers. Career opportunities include working as a physical activity director, corporate wellness coordinator, fitness trainer/instructor, health club/spa manager, fitness/wellness manager, and community recreation center manager.
- 2. Graduate Training in Kinesiology:** Our students are prepared to attend graduate programs focused on kinesiology, physical activity, and public health.
- 3. Graduate Training in Other Professional Fields:** Our students develop a strong foundation that can prepare them for other graduate programs, including chiropractic school, occupational therapy, and other allied health professions. If pursuing graduate studies is a future goal of yours, please see your academic advisor for further details early in your program of study.

To prepare students for these career pathways, our curriculum incorporates didactic training and hands-on learning experiences. We thoughtfully integrate multiple applied learning experiences, laboratory courses and service-learning opportunities into the Kinesiology program of study.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses for this major are KINS 3196 and KINS 4196.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Major Requirements

Code	Title	Credit Hours
Kinesiology Core Courses		
KINS 1201	Introduction to Kinesiology in Public Health	3
KINS 1223	Human Anatomy and Physiology I	4
KINS 1224	Human Anatomy and Physiology II	4
KINS 2203	Physiology of Physical Activity	4
KINS 2204	Motor Behavior	3
KINS 3101	Historical and Philosophical Dimensions of Physical Activity	3

Linguistics Certificate

Overview

The **Certificate in Linguistics**, offered by the Department of Communication Sciences and Disorders, provides students with a foundation in the science of language while addressing such pressing issues as the similarities and differences between human and machine languages as well as diversity and bias related to language and dialect. This program engages students in a field that enhances analytical abilities and critical thinking in the context of a complex and changing world.

Nursing BSN

Overview

The **Bachelor of Science in Nursing** is offered by the Department of Nursing.

The degree of Bachelor of Science in Nursing (BSN) may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 124 credit hours with a minimum cumulative GPA of 2.0 overall and in the major. The minimum passing grade in all required nursing major courses is 73% (C); this includes all courses listed under Department of Nursing requirements and Nursing Major requirements.

Campus Location: Main

Program Codes: HP-NUR4-BSNU, HP-NURS-BSNU

Admissions

Admission to the Bachelor of Science in Nursing program is competitive. A minimum high school GPA of 3.25 is required for first-year applicants. Students seeking to transfer from a different institution must have a minimum GPA of 3.5 for college-level work.

Facilities and Clinical Sites

The Nursing Resource Center at Temple's Health Sciences Center campus is a simulation-based learning environment that utilizes state-of-the-art technology to aid in student skill development, critical reasoning and teamwork. Students participate in real-life situations in a safe and controlled simulated setting with guidance from our faculty. BSN students complete a total of 798 hours of clinical experience in community-and hospital-based settings.

Clinical Sites may include Temple Hospital Main, Fox Chase Cancer Center, Jeanes Hospital, Episcopal Hospital, Children's Hospital of Philadelphia and St. Christopher's Hospital for Children.

Accreditation

The program is approved by the State Board of Nursing, Commonwealth of Pennsylvania. The baccalaureate degree program in nursing program at Temple University is accredited by the Commission on Collegiate Nursing Education.

Learn more about the Bachelor of Science in Nursing.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All students must take a minimum of two writing-intensive courses as part of the major. The writing-intensive courses required for this major are NURS 3296 and NURS 3496.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Community and Hospital Clinical Requirements

All nursing students must complete a pre-matriculation physical prior to the start of attending Temple University. Starting sophomore year, the nursing program requires students to complete clinical education experiences at facilities both on and off the University campus. As part of the clinical experience all students must complete and submit the following clearances annually: Pennsylvania state criminal background check, Pennsylvania state child abuse clearance, FBI fingerprinting clearance, and a 12-panel drug screening. The results of these requirements may impact the student's ability to continue on with the clinical component of the program, thus resulting in an inability to satisfy graduation requirements. Additionally, the conviction of a misdemeanor, felony, or illegal act may prevent the individual from becoming credentialed and/or licensed to practice nursing. Please see www.ncsbn.org/contact-bon.htm for more information about licensure.

Students also need proof of required immunizations, annual influenza vaccination, proof of Covid vaccination, Quantiferon testing (a blood test that detects the bacteria that causes tuberculosis), American Heart Association (AHA) cardiopulmonary resuscitation (CPR) certification, and personal health insurance. Students must complete the required health and immunization requirements to attend clinical. If these requirements are not completed, students may not progress in the nursing program. Additionally, all nursing students are required to be covered under the Temple University Accident Insurance Policy. If the student sustains an injury as a result of a required clinical activity, the student's expenses related to that injury are covered

by this policy (see the policy in detail since there may be some limitations). To examine the details of this policy and the procedure, go to <https://careers.temple.edu/hr-resources/our-functional-areas/benefits-administration/health-insurance-plans/student-health-1>.

Student Transportation

Transportation to and from clinical sites is the responsibility of the student. Shuttle service is available from Temple University-Main Campus to the Health Sciences Center Campus Monday through Friday. To review the current schedule, go to <https://campusoperations.temple.edu/shuttle-services/between-main-campus-hsc-ambler>. Students need to consider transportation costs in their educational planning when attending the nursing program.

Nutrition Minor

Overview

The **Minor in Nutrition** is designed for students interested in understanding food, where it comes from, and how it affects health. Students in the minor develop knowledge and skills that supplement their major, and that are helpful for improving overall health in individuals and communities.

Completing the Nutrition minor improves students' marketability in many professional paths, including public health, nursing, kinesiology, psychology, tourism and hospitality, business, education, health communication and journalism, marketing, health professions, and sports and recreational management. The minor also prepares students to pursue graduate training or research in dietetics and nutrition, and to enhance their personal understanding of rapidly changing messages about diet and health.

Public Health BS

Overview

The **Bachelor of Science in Public Health** is offered by the Department of Social and Behavioral Sciences (SBS) in the College of Public Health. The undergraduate curriculum prepares students for diverse careers in the public health field that focus on creating, implementing and evaluating interventions and programs designed to improve the health status and quality of life for all individuals.

As one of the earliest accredited undergraduate public health programs in the country, the BS in Public Health serves as a national model in which students take a set of common theoretical courses designed to promote an understanding of health, wellness, and disease prevention and health promotion.

Coursework topics include

- Health psychology and human behavior,
- Health communication,
- Biostatistics and epidemiology,
- Health policy and services,
- Research methods,
- Community program planning, implementation, and evaluation.

Students learn to use educational interventions to provide health information, gain experience in assessing the needs of target populations, clarify program goals and objectives, and develop strategies to motivate and involve their clients/patients in educational interventions. Students also participate in 300 hours of fieldwork experience in public health agencies, organizations, or other entities to gain invaluable real-world experience in the field.

The Public Health major trains entry-level public health workers to provide frontline preventive health information, services, and health behavior interventions at the community level, particularly in communities with high-risk populations. Majors receive intensive pre-professional training and direct public health work experience through their internship experience available throughout the city of Philadelphia and surrounding area. There are also opportunities to work alongside faculty members in one of the many research labs and centers in the SBS department and College of Public Health. Graduates typically work in public health departments, hospitals, rehabilitation centers, corporate work sites, community health organizations, nonprofit agencies, family planning clinics, and managed-care facilities.

Some graduates also go on to graduate public health programs (such as the Master of Public Health or Master of Science in Epidemiology) or programs in other health-related professions. Eligible students in the Public Health BS program also can apply for the +1 BSPH-MPH accelerated program, in which they can earn a Master of Public Health degree at Temple typically in one additional year after completing the BS in Public Health.

Campus Location: Main

Program Code: HP-PBHL-BS

Accreditation

The Bachelor of Science in Public Health program at Temple University is accredited by the Council on Education for Public Health (CEPH).

Accelerated Programs

The College of Public Health has developed a rigorous five-year (4+1) accelerated BS to MPH program in which outstanding Public Health majors can earn a Bachelor of Science (BS) in Public Health and a Master of Public Health (MPH) degree in five years, rather than six.

This combined degree program offers exceptional students an opportunity to work closely with faculty, while developing critical skills in public health and completing graduate work for professional careers in research, policy, administration or real-world public health practice.

The public health curriculum at Temple University is diverse, offering both undergraduate and graduate students access to faculty from a broad range of public health areas. The MPH requirements will be satisfied by the end of the fifth year of study. The accelerated degree program will consist of a minimum of 108 semester hours of undergraduate coursework, a maximum of 12 (twelve) semester hours of graduate coursework to count towards both the undergraduate and the graduate degrees, and a minimum of 30 semester hours of additional graduate coursework to count towards the graduate degree.

The +1 Accelerated BS in Public Health/MPH program is currently available with the following graduate programs:

- MPH in Epidemiology
- MPH in Health Policy and Management
- MPH in Social and Behavioral Sciences

Learn more about the Bachelor of Science in Public Health.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

All students are required to complete the university's General Education (GenEd (p. 83)) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are SBS 3496 and SBS 3596.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note the Public Health program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements may require criminal background checks, Act 33/34 clearances and perhaps a drug screen. Placements may also require the student to maintain personal health insurance. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. See www.nchec.org for information about credentialing in public health.

Public Health Program Requirements

Students must complete a set of specific courses in the major, including the College Core course and Public Health Major courses, including one credit-earning internship (SBS 4185). Also required are three public health electives, two Cognate electives and three general (free) electives. The major requires a minimum of 120 total credits.

All Public Health College and Major Core course work (those courses with an ENVH, EPBI, HPM, or SBS designation and courses approved as a cognate elective) must be completed with a grade of C or higher.

Public Health Minor

Overview

The **Minor in Public Health**, offered by the Department of Social and Behavioral Sciences, expands students' understanding of how the natural sciences, social sciences and technology can be used to help solve human health problems. Students in the minor explore the fundamentals of public health research and practice and learn to see the world through a public health lens.

The minor's required coursework explores the core areas of public health, preparing students to examine a variety of issues from a population health perspective. Additional elective courses allow students to shape the minor to complement their major, as well as their specific interests and career goals.

Completing the Public Health minor improves students' marketability in many professional paths, including social work, kinesiology, education, business, health professions, psychology, health communication and others. The minor also prepares students to pursue graduate training in public health.

Campus Location: Main

Contact Information

To declare this minor, contact:

Laura Windisch, Last Names A-K
laura.windisch@temple.edu

Brianna Boyd, Last Names L-Z
brianna.boyd@temple.edu

Requirements

An overall GPA of 2.0 or permission from the Public Health Undergraduate Director is required to apply for the minor. Students pursuing the minor in Public Health should consult with an advisor in the school or college in which they are pursuing their degree and with a Public Health Undergraduate Advisor. A minimum grade of "C" is required for each course and an overall 2.5 GPA is required for the courses taken in the minor. Additionally, no more than two (2) courses may be taken prior to declaring the Public Health minor.

The curriculum for the Public Health minor is:

Recreational Therapy BS

Overview

The **Bachelor of Science in Recreational Therapy** is offered by the Recreational Therapy Program within the Department of Health and Rehabilitation Sciences.

Recreational therapists use a systematic process involving play, recreation and leisure activities as a means to promote psychosocial adaptation, health, rehabilitation, community engagement and life quality for children and adults of all ages who have illnesses and disabilities. The Recreational Therapy curriculum's primary goal is to prepare competent entry-level recreational therapists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enable them to function as recreational therapists in traditional and emerging service delivery settings. Alumni of Temple's recreational therapy (formerly therapeutic recreation) program can be found in a wide range of health and human services agencies. They are employed in diverse settings, including hospitals, rehabilitation centers, nursing homes, assisted-living facilities, schools and community recreation agencies. According to the U.S. Department of Labor, employment opportunities are expected to increase approximately 10% over the next ten years, as fast as the average for all other occupations. A growth in employment opportunities will be most prevalent in the areas of aging/nursing care facilities, working with students with disabilities in schools, and outpatient medical facilities versus inpatient care.

Campus Location: Main

Program Code: HP-RLTH-BS

Accelerated Program

The Department of Health and Rehabilitation Sciences offers a 4+1 accelerated Bachelor of Science in Recreational Therapy (BSRT) and Master of Science in Recreational Therapy (MSRT) program which provides the opportunity for qualifying students studying recreational therapy as an

undergraduate to begin taking graduate level courses within their undergraduate curriculum and therefore complete the MSRT typically within a year after completing the BSRT. Students complete the first four years of the accelerated program on Temple University's Main Campus and the fifth year online. Learn more about the accelerated BSRT to MSRT program.

Mission of the Program

The Recreational Therapy Program strives to be a world-class academic and research unit committed to advancing the role of play, recreation and leisure opportunities in health promotion, rehabilitation and disease prevention for diverse individuals with chronic illnesses and disabilities across the life span. The program provides exceptional educational experiences, conducts discipline-expanding research and contributes to society via programs that explore and test evidence-based innovations in practice and policy. The program's mission includes:

- instilling knowledge, values, ethics and skills that will guide students in their future academic pursuits and their professional practice in recreational therapy at the local, national and international levels;
- being a leading contributor to the ever-changing knowledge base in recreational therapy, health, leisure and disability studies through research and other scholarly activities;
- providing innovative and responsive educational opportunities, research and service in collaboration with local, regional and national agencies and organizations; and
- fostering interdisciplinary collaborations to promote a better understanding of the importance of physically and socially active lifestyles to health, wellbeing and quality of life.

Central to the overall mission of the Recreational Therapy Program is a commitment to access and diversity. This is realized through a commitment to ensuring equal access to all qualified applicants and a commitment to promoting equal access to recreation and leisure opportunities for all people regardless of age, economics, race, gender, culture, sexual orientation, religion or abilities.

Accreditation

The Bachelor of Science in Recreational Therapy is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) / Committee on Accreditation of Recreational Therapy Education (CARTE).

Licensure/Certification

A license is required to practice recreational therapy in the following states: New Hampshire, New Jersey, North Carolina, Oklahoma and Utah. The National Council for Therapeutic Recreation Certification (NCTRC) administers an examination students must pass in order to become a Certified Therapeutic Recreation Specialist (CTRS). Graduates from Temple's Bachelor of Science in Recreational Therapy and Master of Science in Recreational Therapy programs meet the educational eligibility requirements to sit for the NCTRC exam.

Learn more about the Bachelor of Science in Recreational Therapy.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

A Bachelor of Science (BS) degree in Recreational Therapy is awarded to students upon satisfactory completion of a minimum of 121 semester hours of credit with a minimum GPA of 2.00 overall and a minimum GPA of 2.5 for classes in the major. Students completing this degree are eligible to sit for the national credentialing examination for recreational therapists.

Summary of Requirements

University Requirements

- All students are required to complete the General Education (GenEd (p. 83)) curriculum. Please note that the University GenEd curriculum has specific rules regarding the completion of this university requirement (for example, the number of courses a student may take in one department to satisfy GenEd Requirements), so careful review of the GenEd section of this *Bulletin* is encouraged.
- MATH 0701 (4 credits) and/or ENG 0701 (4 credits), if required by placement testing.

- All Temple students must take a minimum of two writing-intensive courses as part of the major. Writing Intensive classes in Recreational Therapy include:

Code	Title	Credit Hours
RCTH 3096	Assessment and Documentation in Recreational Therapy	3
RCTH 4196	Recreational Therapy Clinical Procedures	3

- Students are also encouraged to review university requirements for successful progression through their academic careers. Knowledge of course repeat policies, including the withdrawal policy, academic standing, and rules on taking courses elsewhere can be found in the Academic Policies (p. 1835) section of this *Bulletin*.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note the Recreational Therapy program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and perhaps a drug screen. Placements may also require the student to maintain personal health insurance and/or submit a physical and immunization records. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice in recreational therapy. Please see <https://www.atra-online.com/page/CertandLicense> for more information about certification and licensure.

Recreational Therapy Program Requirements

Students must complete a set of specific courses in the major, including Health Related Professions Core, Cognate Core, Recreational Therapy major courses, and two credit-earning field-based clinical internships (RCTH 3185 and RCTH 4185). Students must also complete other non-credit earning requirements as part of the major, including 70 hours of professional development / volunteer experiences relevant to the major, criminal and child abuse clearances, health immunization and physical documentation, and certification in First-Aid/CPR.

All Recreational Therapy courses must be completed with a grade of C or higher.

Recreational Therapy Electives

Select two of the following: 6

RCTH 2201	Recreational Therapy and Developmental Disabilities	
RCTH 2203	Assistive Technology in Recreation	
RCTH 2205	Adventure Challenge/Programming	
RCTH 3201	Health, Activity, and Aging	
RCTH 3202	Recreational Therapy and Mental Health	
RCTH 4205	Recreational Therapy in Geriatric Service Settings	
RCTH 4211	Recreational Therapy and Physical Disabilities	
RCTH 4213	Therapeutic Play, Recreation and Children's Health	

Total Credit Hours**81-83**

1

Students must successfully pass all Health Related Professions courses and Cognate Core courses with a minimum grade of C. Students not demonstrating the ability to meet this academic requirement will not be permitted to progress to the upper-division Recreational Therapy Core and related electives in the curriculum.

2

Students should consult with their advisor for information on the distinctions between Anatomy and Physiology selection sequence and its implication for the degree and career goals. Satisfactory completion of KINS 1221 and KINS 1222 sequence or KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science and Technology requirement. The courses are similar, but not interchangeable, and must be taken in the correct sequence. Students choosing the KINS 1221 and KINS 1222 sequence may need to take an additional 2-credit elective to meet the minimum 121 credit hour degree requirement. Please see a departmental advisor for clarification.

Suggested Academic Plan

Bachelor of Science in Recreational Therapy

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

The following academic plan displays required courses. Please note that, unless specified otherwise, students may select from a number of university-approved courses in the various areas of the GenEd curriculum. The Recreational Therapy Program Director and the Recreational Therapy Advisor are available to work with students, as needed, to adjust their academic plan.

1

You should consult your advisor for information on the distinctions between the anatomy and physiology selection sequence and its implication for your degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science & Technology requirement. These courses are similar but not interchangeable. Courses must be taken in the correct sequence. Students choosing KINS 1221 and KINS 1222 should be sure to take a sufficient number of elective credits to meet the minimum 121 credit hour degree requirement. Please see a departmental advisor for clarification.

2

Indicates Writing Intensive course for the major.

3

Two Recreational Therapy Elective courses (6 credits) are required for graduation.

4

These courses are offered in the fall semester only.

5

These courses are offered in the spring semester only.

Note: Students may lighten their academic load in the fall and spring semesters by taking classes during the summer sessions. Please see a departmental advisor to explore summer course offerings and suitable options.

Speech, Language and Hearing Science BA

Overview

The **Bachelor of Arts in Speech, Language and Hearing Science** is offered by the Department of Communication Sciences and Disorders. This is a degree program for students interested in becoming speech-language pathologists or audiologists. Both of those professions require a graduate degree in addition to the prerequisites obtained in the undergraduate major. Speech-language pathologists and audiologists diagnose, treat and work to prevent a variety of speech, language and hearing disorders. This major is also excellent preparation for those interested in going on to graduate programs in education, linguistics, neuroscience and a variety of health professions.

Majors have opportunities to observe and work with clients and to participate in research as well.

Campus Location: Main

Program Code: HP-SPLH-BA

Distinction in the Major

Students who complete the Speech, Language and Hearing Science major may graduate with distinction in the department if they meet the requirements outlined below:

1. GPA of 3.50 or better in the major and overall;
2. No grade below B in the major;

3. Completion of an honors paper at the end of a 3-credit independent study (CSCD 4979) during which the student will engage in an empirical study or library research in the field of Communication Sciences and Disorders under the supervision of a faculty advisor;
4. Completion of 20 hours of volunteer work, internship or fieldwork in consultation with the advisor.

Learn more about the Bachelor of Arts in Speech, Language and Hearing Science.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

The Bachelor of Arts in Speech, Language and Hearing Science may be conferred upon a student by recommendation of the faculty upon the satisfactory completion of 122 credit hours. A grade of C is the lowest acceptable final grade for courses required of majors as well as departmental electives taken by majors. A grade of C- (C minus) is the lowest acceptable grade in GenEd courses. The Department of Communication Sciences and Disorders requires that students show a basic level of proficiency in a language other than English. This requirement may be met by taking college-level courses up to or beyond the equivalent of the 1002-level or by showing similar knowledge through a placement examination. Students may take American Sign Language to satisfy this requirement.

Summary of Requirements

University Requirements

Students must complete the requirements of the General Education (GenEd (p. 83)) program.

All Temple students must take a minimum of two writing-intensive (WI) courses as part of the major. The specific writing-intensive courses that are required for the Speech-Language-Hearing major are CSCD 1296 and CSCD 4496.

College Requirement

Students must complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Major Requirements

All of the following major requirements must be passed with a grade of C or better in order to successfully complete the major.

Code	Title	Credit Hours

School of Social Work

Overview

The School of Social Administration opened in 1969, with the goal of developing and promoting leadership in the public sector. The school's first Master of Social Work (MSW) class graduated in 1971, and the first Bachelor of Social Work (BSW) class graduated in 1973. In 2009, the school was renamed the School of Social Work (SSW) and merged with the College of Health Professions, which in 2015, was renamed the College of Public Health.

In 2017, the online MSW Program launched. The online BSW Program followed in 2021.

Launched in 2020 and housed within SSW, the Social Service Annex (SS Annex) is dedicated to empowering students who self-identify as in need of supportive services. The SS Annex offers prevention-focused and empowerment-based intervention support services to Temple students and the community at large—offering solutions and delivering effective, compassionate care that helps students achieve a better quality of life and a higher likelihood of degree completion.

The School of Social Work is committed to eliminating social, political and economic injustices for poor and oppressed populations and advancing the quality of life for all. Our faculty are committed to fostering societal transformation through education that emphasizes solutions and action; research that generates evidence-based strategies to resolve problems at local, national and global levels; and public service that shares this knowledge with a wider audience. In all of our work, we closely partner with communities, agencies and organizations to ensure that the needs of our constituents are represented and met.

The SSW mission and goals, BSW curricular objectives, National Association of Social Workers (NASW), and Council on Social Work Education (CSWE) inform all aspects of the School of Social Work.

Accreditation

The Bachelor of Social Work and the Master of Social Work programs are accredited by the Council on Social Work Education. This attests to the educational quality of the curricula and to the qualifications of graduates to assume professional positions that legally require applicants to have these degrees.

Mission and Goals

The School of Social Work is dedicated to societal transformations to eliminate social, political and economic injustices for poor and oppressed populations, and advance the quality of life for all through the following:

- Education emphasizing the discovery of knowledge and the use of critical inquiry and professional ethics to guide solution-seeking and action-taking to effect social change among professional social workers in front-line, supervisory, managerial and other leadership positions.
- Research and scholarship to advance applied knowledge and generate evidence-based strategies to resolve problems occurring between people and their social environments at local, state, national and global levels.
- Public service that aids the dissemination of knowledge and evidence-based strategies and that aids the responsiveness of the school to the needs of constituents through collaborations and partnerships with communities, agencies and organizations.

Student Groups

Alpha Delta Mu (ADM) National Social Work Honor Society: The purpose of ADM is to advance excellence in social work practice and to encourage, stimulate and maintain scholarship of its individual members. BSW and MSW students enrolled in Temple University's School of Social Work (online and on campus, full time and part time) are eligible for nomination. Please reach out to one of the leaders or the advisor for GPA requirements.

Social Work Student Collective: Including undergraduate and graduate social work students enrolled in all social work programs (online and on campus, full time and part time), the Social Work Student Collective represents a unified student voice that incorporates the diversity of the student body. The Collective sponsors social, educational and professional activities. Student representatives, selected by the Collective, sit on various school committees as voting members.

School of Social Work Alumni Association (SSWAA): Members serve as ambassadors for the School of Social Work, helping to unite social work alumni. All School of Social Work alumni are lifetime, dues-free members.

National Association of Social Workers (NASW): This is a membership organization with a dual mission to:

1. Promote, develop and protect the practice of social workers; and
2. Seek to enhance the effective functioning and well-being of individuals, families and communities through its work and advocacy.

The Pennsylvania Chapter of the National Association of Social Workers (NASW-PA) serves as the leading voice of the profession in the Commonwealth to enhance the value and respect of social workers, to influence public policy and to promote social justice. Learn more about student membership, benefits and resources.

The Southeast Division of the Pennsylvania Chapter of the National Association of Social Workers serves Philadelphia, Montgomery and Bucks Counties.

Latino Social Work Organization (LSWO): LSWO was founded in 1992 by a group of young social workers in Chicago. Temple students involved in LSWO have advocated for quality bilingual / bicultural services to Latinos and other oppressed communities.

Student Association of Black Social Workers (SABSW): The National Association of Black Social Workers, Inc., comprised of people of African ancestry, is committed to enhancing the quality of life and empowering people of African ancestry through advocacy, human services delivery and research. The Alliance of Black Social Workers, Inc. (ABSWS) is the Philadelphia chapter of the National Association of Black Social Workers, Inc. (NABSWS). It is a membership organization dedicated to the betterment of the lives of people of African descent in the Philadelphia area and beyond.

Pride in Social Work (PSW): PSW provides support, education and advocacy for gay, lesbian, bisexual and transgendered students, and their supporters. For additional information on Pride in Social Work at Temple University, contact Professor Bernie Newman, bernie.newman@temple.edu.

Administrators

Jennifer Ibrahim, Dean; PhD, University of California Berkeley.

Philip McCallion, School of Social Work Director; PhD, University at Albany.

Valarie Clemmons, Field Education Director; MSW, Temple University.

Brandi Crawford, Social Service Annex Assistant Director; MSW, Temple University.

Ashley Stewart, MSW Program Director; PhD, The Ohio State University.

Cheri Carter, BSW Program Director; PhD, University of Delaware.

Undergraduate Program

- Social Work BSW (p. 1407)

Academic Policies and Regulations

Please see the Undergraduate Academic Policies (p. 1835). Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions for the School of Social Work, appear below.

Laptop

Beginning in Fall 2020, all incoming students in the College of Public Health and the School of Social Work are required to have a laptop.

Academic programs in the college are technology intensive. They incorporate statistical and database analyses; utilize specialized tools for athletic training, kinesiology and physical therapy; stream audio and video for communication sciences; facilitate online interactive counseling for social work; and foster clinical experiences and online assessments. The laptop requirement enables the College of Public Health and the School of Social Work to improve opportunities for active learning and provide greater access to specialized software and required tools in and out of the classroom, better preparing students for the workforce. Learn more about device specifications and suggested vendors. Students can use excess financial aid (i.e., funds that are reimbursed after all tuition and fees are paid) to meet student needs, including the purchase of a laptop. Scholarships may also provide funding.

Re-enrollment Request

To re-enter the School of Social Work, students must complete a Re-Enrollment Request. Applications of students seeking re-enrollment after an absence of one or more semesters, not including summers, will be reviewed by the director of the BSW program. If the student is accepted for re-enrollment, their program for completion of degree requirements will be planned in accordance with those currently operative in the program. If courses were taken elsewhere, applicants are responsible for having official transcripts available when submitting the request form.

Transfer from Schools within the University

Students who are in good standing at Temple University may transfer to the School of Social Work at any point during their academic career. Before applying to transfer to Social Work, Temple students must attend a Change of Program session. Learn more about the change of major process.

Transfer applications will not be processed until the student attends the Change of Program session. Students will be notified of the decision regarding their request to change majors to Social Work in an e-mail from the university. A minimum GPA of 2.00 is required for admission.

Prior to transferring, students are encouraged to arrange to meet with both the original school advisor and the SSW academic advisor or BSW program director. Because of the professional requirements and the sequential nature of the curriculum, students are encouraged to enter the program as early as possible. Students must be majors in the social work program for a minimum of two years.

Dean's List

Each fall and spring semester, undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Military Science Courses

Undergraduate students in the School of Social Work may apply up to 12 credits of military science courses at the 3000 and 4000 levels in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC) towards their degree as free electives. **These credits cannot count as Social Work credit towards the degree.**

School Requirements

Please see the Undergraduate Academic Policies (p. 1835). Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions for the School of Social Work, appear below.

Program Performance

Social Work majors are required to maintain a cumulative GPA of 2.00 or above and grades of C or above in all social work courses and HRPR 1001. Students who obtain a C- or below in any social work course or HRPR 1001 will be required to repeat the course.

Collegial Warning will be issued to students whose GPA falls below 2.00 for one semester. Students are discouraged from registering for more than 12 credits until they have improved their GPA.

Collegial Probation: If a student's cumulative GPA falls below 2.00 they will be placed on academic probation and will not be permitted to register more than 12 credits for the next term, in order to optimize the chance of improving their GPA. If their GPA is still below a 2.00 after two semesters of academic probation, students are subject to being dropped from the Social Work program.

Being Dropped from the Program: If a student does not achieve a cumulative average of 2.00 or show evidence of substantive scholastic improvement after two semesters on collegial probation and a 12-credit roster, the student is subject to being dropped from the School of Social Work.

General Graduation Requirements

In order to receive a Bachelor of Social Work degree, a student must complete a minimum of 120 semester hours, which includes the University General Education (GenEd (p. 83)) curriculum, the College of Public Health Core course (HRPR 1001) and the School of Social Work curriculum. A potential graduate must also hold a cumulative GPA of 2.00 or better (having received a C or better in all social work courses and HRPR 1001) and meet any additional requirements, such as completion of a graduation application.

Field Practicum

The Council for Social Work Education (CSWE) identifies field practicum as the signature pedagogy of social work education. Students complete two semesters (200-hours in Fall and 200-hours in Spring) of field practicum courses during their final academic year. Hours are completed in a social service agency. Students are required to be in their practicum a minimum of 15 or 16 hours per week.

In preparation for this experience, all BSW students are required to submit a completed field application via SSW's Office of Practicum Education Portal. Information regarding deadlines can be found on the BSW Information Hub on Canvas.

Additionally, the Office of Practicum Education mandates all students obtain the maximum clearances required by the state in which their practicum is located. The results of an individual's clearances could limit or eliminate placement options, resulting in an inability to meet graduation requirements.

Advising

In line with the Council for Social Work Education (CSWE), professional and academic advising is provided by social work program faculty and staff. The BSW program has two academic advisors. Rebecca Dean advises BSW students enrolled in the BSW on-campus program and Alyssa Garnich advises BSW students enrolled in the BSW online program. Faculty, including Cheri Carter, are available for professional advising.

Early and regular contact with the advisor can be extremely helpful. The advisor is a knowledgeable person with whom students may discuss issues of concern in relation to university regulations, course selection and career paths.

Academic advisors are particularly important for social work majors. The Bachelor of Social Work curriculum is organized so that courses scheduled to be taken later in the program build on the knowledge and skill foundation provided in the liberal arts and social work courses taken earlier. For this

reason, most social work courses designate successful completion (with a C or better) of earlier courses as a prerequisite to taking later courses. This program of study for BSW students has been carefully designed and approved by faculty. It is intended to provide students with a coherent, integrated and high-quality learning experience.

Students must assume primary responsibility for knowing the requirements for their degree and for acquiring information about their academic status.

Advisor Contact Information

Social Work BSW

Overview

The **Bachelor of Social Work** (BSW), offered by the School of Social Work within the College of Public Health, prepares students for entry-level social work careers advancing social justice and working with individuals, families and communities in need.

Program Objectives

By completion of their undergraduate studies, BSW students will be able to:

- apply skills and knowledge of generalist social work practice with systems of all sizes;
- understand human behavior from holistic and developmental perspectives that encompass dynamic interaction among social, political, cultural, economic, psychological, spiritual and biological factors;
- critically select and apply theories and research findings to social work practice;
- understand and adhere to professional social work values and ethics;
- assess situations using knowledge about the effects of structural injustices based on race, class, gender, culture, sexual orientation, ability, age and other forms of oppression; and
- exercise self-awareness and reflection as part of the development of their professional and personal selves.

Curriculum

The BSW curriculum is organized so that courses scheduled to be taken later in the program assume, and build on, the knowledge and skill foundation provided in the General Education and social work courses taken earlier. For this reason, most social work courses designate successful completion (with a C or better) of earlier courses as prerequisite to taking later courses. This program of study for BSW students has been carefully designed and approved by faculty. It is intended to provide students with a coherent, integrated and high-quality learning experience.

Campus Location: Main, Online

Program Code: SW-SSWU-BSWK

Licensure/Certification

Social work is a licensed profession and BSW graduates are eligible for licensure. For license requirements by state or province view the interactive map provided by the Association of Social Work Boards (ASWB).

Cheri Carter, PhD, LSW, Assistant Professor and Undergraduate Program Director
Ritter Annex, Room 581
215-204-1228

cheri.carter@temple.edu

Learn more about the Bachelor of Social Work.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements for the Degree

University Requirements

- All students are required to complete the university General Education (GenEd (p. 83)) curriculum. (Students who entered prior to fall 2011 should check with their advisor for the appropriate year and program requirements.)
- All Temple students must take a minimum of two writing-intensive courses at Temple as part of the major. The specific writing-intensive courses required for this major are SSWU 3096 and SSWU 4396.

College Requirement

- All CPH students, including SSW students, must complete the College Core Course, HRPR 1001.

Clearance Requirements

Please note the Social Work program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and perhaps a drug screen. Placements may also require the student to maintain personal health insurance. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice social work. Please see <https://www.aswb.org/licenses/> for more information about state licensure.

School of Social Work Requirements

- Satisfactory completion of a minimum of 120 semester hours of credit.
- A minimum cumulative GPA of 2.00 overall and in the major.
- A grade of C or higher is required in all social work courses and HRPR 1001.

BSW Program Requirements

Total Credit Hours

85

Field Work Practice

A minimum of 400 hours in supervised field settings is required. Students are overseen by an MSW (or BSW with at least two years of experience). They are directly involved in professional tasks in the agency and in the community. This component of the educational program of study facilitates the integration of classroom learning, particularly in the social work subject areas of human behavior, policy, practice and research. Students apply what they are learning and receive feedback from both classroom and field instructors on their work. Field work practice consists of 10 credits of the 55 credits of professional social work courses specified above.

Some of the fields of practice in the five-county Philadelphia area in which majors do their field work are these:

- **Ageing:** including adult service centers as well as assistance in a variety of public and private organizations with treatment and protective functions;
- **Children and Youth:** child abuse, foster care and adoption agencies, parenting and support services;
- **Community Organization/Planning:** public issues and policies, neighborhood services at settlements, Y's, community centers;
- **Correctional/Justice:** probation, parole, prison, community rehabilitation organizations;
- **Developmental Disabilities:** community-living arrangements, day programs, other public and private functions;
- **Education:** schools and alternative education programs;
- **Family Services:** material aid, crisis intervention, ongoing counseling;
- **Health/Hospitals:** advising, counseling, direct service with and on behalf of patients; a variety of functions in hospitals and community health centers;
- **Legal:** public agencies assisting low-income population in matters relating to law, housing, and discrimination;
- **Mental Health:** small and large institutions, community-based units, public and private auspices;
- **Substance Abuse:** counseling and other direct service in a variety of settings, both public and private;
- **Violence and Domestic Issues:** domestic violence of all kinds, sexual assault, and child abuse, in a wide variety of settings.

1

Refer to GenEd Science & Technology (p. 98) for information on a GS Waiver.

2

ECON 0858 satisfies the University GenEd U.S. Society requirement as well as SSW's Economics requirement.

3

16 hour/week field practicum requirement.

In order to receive a Bachelor of Social Work degree, a student must complete a minimum of 120 semester hours, which includes the University General Education (GenEd (p. 83)) curriculum and the School of Social Work curriculum. A potential graduate must also hold a cumulative GPA of 2.00 or better (having received a C or better in all social work courses and HRPR 1001), and meet any additional requirements, such as the Exit Interview.

College of Science and Technology

Overview

Science and technology were responsible for a profound transformation of the world in the 20th century and will drive the economy of the 21st century. The objectives of the undergraduate programs of the College of Science and Technology are to prepare students for careers in these important areas and to graduate informed, responsible citizens.

The college approaches science and technology as a body of knowledge that has an advancing frontier and a complex interface with society. The traditional mandate for a university is to provide undergraduate students with a comprehensive education and the opportunity to focus closely on a particular area of study. The College of Science and Technology embraces this mandate and extends additional opportunities to our students. Science and Technology students are encouraged to participate in faculty research projects and thus experience the advancement of this body of knowledge.

Bachelor of Science programs offer a greater concentration in major coursework, while Bachelor of Arts programs offer a greater variety of coursework. All programs offer undergraduates the opportunity to work with distinguished faculty and a richly-diverse and stimulating student body as they prepare for active roles in society.

Mission Statement

The mission of the College of Science and Technology is to seek academic excellence by providing outstanding instruction in the sciences, and to foster scientific research of the highest quality. In pursuing its mission, the College is committed to meeting the needs of a diverse student body, and is truly dedicated to the founding principles of Temple University in providing a superior education to the prepared student. The educational mission of the College is pursued through offering a current curriculum that incorporates the fundamental principles as well as the latest discoveries in the major scientific disciplines.

Interdisciplinary degree programs and independent research projects allow the student to explore scientific boundaries. The College offers a general education curriculum that provides the opportunity for non-science majors to be better informed of the complex scientific and ethical issues facing society. The College also strives to improve science and mathematics education in the Philadelphia schools. All of these aspects of the educational mission of the College are achieved through the dedicated efforts of the faculty, who are leading scholars in their field.

The research mission of the College is pursued through a sustained effort to recruit the best and brightest new faculty, to aggressively develop promising research initiatives, and to create a modern science campus with facilities fully supportive of cutting-edge research. The College also strives to support the scholarly pursuits and professional activities of its faculty, who in turn advance their respective disciplines. In doing so, the College provides an outstanding environment for graduate and undergraduate research, with the Departments and Centers as focal points for interdisciplinary research initiatives and graduate degree programs. In pursuing its research mission, the College of Science and Technology will be a vital participant in establishing Temple University as a recognized center of excellence in scientific research and development.

Academic Departments

The College of Science and Technology consists of the following departments:

- Biology
- Chemistry
- Computer and Information Sciences
- Earth and Environmental Science
- Mathematics
- Physics

Admissions

See Undergraduate Admissions (p. 24) for more details.

Awards and Achievements

Awards & Scholarships

Rising sophomores, juniors and seniors are often honored for outstanding performance in a variety of academic areas and for exceptional service to the College and the University. The college offers both awards and scholarships.

Distinction in Major

Many programs allow exceptional students to receive a Distinction in Major. Please see the program pages for the specific requirements for any particular major.

Honor Societies

Temple University is in partnership with several national honor societies including Phi Beta Kappa (p. 61).

Financial Aid and Scholarships

See Financial Aid (p. 1809) for more details.

Special Facilities

The College of Science and Technology (CST) is home to the advanced Science Education and Research Center (SERC). One of the largest facilities of its kind on the East Coast, SERC is home to teaching and research labs, sophisticated instrumentation and collaborative spaces to facilitate innovation and discovery. Learn more about CST's facilities.

CST's advanced research institutes and centers provide the facilities and support needed for scientists to conduct advanced investigation, partner with similar entities around the world, disseminate new discoveries and turn scientific breakthroughs into advances that improve society.

Additionally, students have access to the Ambler Arboretum at Temple University, The Temple University Field Station at Ambler, and the Temple University Ambler Campus Greenhouse Education and Research Complex where faculty and students can use these resources in coursework and research.

Special Programs

The College of Science and Technology offers the following opportunities for students.

Accelerated Bachelor of Arts/Professional Programs

Temple Professional School Programs (within the Lewis Katz School of Medicine at Temple University, Temple University Kornberg School of Dentistry, Temple University School of Podiatry, and Temple University School of Pharmacy) agree to cooperate in providing an accelerated 3 + 4 undergraduate/professional school education leading to both a Bachelor of Arts degree in the College of Science and Technology and a Doctorate degree from the professional school. The Temple University College of Public Health agrees to cooperate in providing an accelerated 3 + 3 undergraduate/graduate education leading to both a Bachelor of Arts degree in the College of Science and Technology and a Doctorate of Physical Therapy in the College of Public Health.

Students in the College of Science and Technology who are in the joint program above, have been admitted to the professional program at the end of their third year, and have completed 90 semester hours, may transfer their first year in professional study toward the completion of the credit requirements for the degree of Bachelor of Arts. Biology and Chemistry majors may also transfer approved courses in their first year of professional study toward the elective courses in their major.

Students in the College of Science and Technology who have been admitted to other health-related professional schools at the end of their third year with a cumulative GPA of at least 3.5 and who have completed 90 semester hours, including all course requirements of the major, college and university, may petition the dean for the transfer of their first year of professional study toward the completion of the credit requirements for the degree of Bachelor of Arts. University residency (p. 1838) requirements must also be met.

Accelerated Bachelor of Science/Professional Programs

The Temple University School of Pharmacy agrees to cooperate in providing an accelerated 3 + 4 undergraduate/professional school education leading to both a Bachelor of Science degree in Pharmaceutical Sciences in the College of Science and Technology and a Doctor of Pharmacy degree from the Temple University School of Pharmacy.

Students in the College of Science and Technology who are in the joint program above, have been admitted to the professional program at the end of their third year, and have completed 90 semester hours, may transfer their first year in professional study toward the completion of the credit requirements for the degree of Bachelor of Science.

Accelerated Bachelor/Master and Bachelor/Professional Science Master (PSM) in CST Programs

Many departments in the College of Science and Technology cooperate in providing an accelerated +1 undergraduate/graduate education leading to a Bachelor of Arts or Science degree as well as a Master of Arts or Science, or a Professional Science Master (PSM) degree from the Graduate School.

Accelerated Bachelor/Master of Education Programs with Teacher Certification

Temple's College of Education and Human Development cooperates in providing an accelerated +1 undergraduate/graduate education leading to a Bachelor of Arts or Science degree in the College of Science and Technology as well as a Master of Education degree from the College of Education and Human Development. The Biology, Chemistry, Earth and Environmental Science, Mathematics, and Physics departments enable talented students to complete both a Bachelor's degree in one of the above departments and a Master of Education degree typically in a total of five years. After completing the Bachelor's degree in one of the aforementioned disciplines, students spend an additional year as a graduate student in the College of Education and Human Development. Students must apply for the accelerated +1 Bachelor/Master of Education program during their sophomore year. If accepted, they will take both undergraduate major courses as well as Master of Education courses beginning in their junior year. They typically complete their undergraduate major in their fourth year and their Master of Education degree in their fifth year. Students who complete this program earn a Master

of Education degree and may apply for a Pennsylvania Instructional I Teaching Certificate after passing all required licensure examinations. See the College of Education and Human Development (p. 552) for more details.

For a complete list, see Accelerated Degree Programs (p. 1792).

CST Science Scholars Program

The CST Science Scholars Program offers exceptional and motivated students additional paid research opportunities and academic and professional development. Students must be invited to apply based on their admissions information or performance in their first year of courses.

CST TTeach Certification for Secondary Education

Bachelor of Science programs enable students to prepare for secondary education certification while mastering the content of their field.

CST Undergraduate Research Program

The CST Undergraduate Research Program offers students in the College of Science and Technology an opportunity to work directly with world-class scientists on real-world research. Completing hands-on independent research is critical to the next step in a student's educational or professional career.

Study Abroad

See Education Abroad and Overseas Campuses (p. 55) and Temple University's Education Abroad and Overseas Campuses web site for more information about study abroad options.

University Honors Program

Students in the College of Science and Technology may apply to the University Honors Program. Honors students are eligible to enroll in CST honors courses, provided that they have satisfied the prerequisites and co-requisites. Honors courses are designated with a nine as the second digit in the four-digit number, e.g. MATH 1941 is *Honors Calculus I*. See Academic Opportunities: University Honors Program (p. 58) for more information.

Student Associations

Many of the departments within the College of Science and Technology support student interest organizations known as Majors' Associations and Societies. Each department organization provides an opportunity for students to interact with faculty and other students who share similar interests. It is through these venues that students may influence course offerings, faculty recruitment, and departmental policy. Temple University has many pre-professional health organizations that may interest students in the College of Science and Technology. These organizations allow students to interact with others with similar professional interests and gain more knowledge about admissions requirements and examinations.

Undergraduate Programs

- Accelerated Programs in CST (p. 1430)
- Advanced Core Science Studies Postbaccalaureate Certificate (p. 1448)
- Applied Mathematics BS (p. 1449)
- Astrophysics Certificate (p. 1454)
- Astrophysics Minor (p. 1455)
- Basic Core Science Studies Postbaccalaureate Certificate (p. 1455)
- Biochemistry BS (p. 1457)
- Biology BA (p. 1465)
- Biology BS (p. 1471)
- Biology Minor (p. 1476)
- Biology with Teaching BS (p. 1478)
- Biophysics BS (p. 1484)
- Chemistry BA (p. 1489)

- Chemistry BS (p. 1494)
- Chemistry Minor (p. 1501)
- Chemistry with Teaching BS (p. 1503)
- Computer Science and Physics BS (p. 1509)
- Computer Science BA (p. 1513)
- Computer Science BS (p. 1518)
- Computer Science Minor (p. 1523)
- Computer Security and Digital Forensics Certificate (p. 1524)
- Data Science BS with Computation and Modeling Concentration (p. 1526)
- Data Science BS with Computational Analytics Concentration (p. 1530)
- Data Science BS with Genomics and Bioinformatics Concentration (p. 1535)
- Data Science: Computational Analytics Certificate (p. 1540)
- Data Science: Computational Analytics Minor (p. 1541)
- Digital Media Technologies Minor (CST) (p. 1543)
- Earth and Space Science with Teaching BS (p. 1544)
- Ecology, Evolution and Biodiversity BS (p. 1549)
- Environmental Professional Training Certificate (p. 1556)
- Environmental Science BS with Applied Ecology Concentration (p. 1558)
- Environmental Science BS with Climate Concentration (p. 1564)
- Environmental Science BS with Environmental Geochemistry Concentration (p. 1569)
- Environmental Science BS with Hydrology Concentration (p. 1574)
- Fundamentals of Physics Certificate (p. 1580)
- Fundamentals of Programming Certificate (p. 1581)
- General Science and Technology with Teaching BS (p. 1582)
- General Science with Teaching BS (p. 1587)
- Genomic Medicine BS (p. 1592)
- Genomic Medicine BS with Pre-Medicine Concentration (p. 1599)
- Genomic Medicine Certificate (p. 1605)
- Geology BA (p. 1608)
- Geology BS (p. 1612)
- Geology Minor (p. 1618)
- Information Science and Technology BA (p. 1619)
- Information Science and Technology BS (p. 1623)
- Information Science and Technology Minor (p. 1629)
- Materials Science BS (p. 1630)
- Mathematical Economics BA (CST) (p. 1635)
- Mathematics and Computer Science BS (p. 1640)
- Mathematics and Computer Science with Teaching BS (p. 1645)
- Mathematics and Physics BS (p. 1650)
- Mathematics and Technology with Teaching BS (p. 1654)
- Mathematics BA (p. 1661)
- Mathematics BS (p. 1665)
- Mathematics Minor (p. 1669)
- Mathematics with Teaching BS (p. 1670)
- Mobile Application Development Certificate (p. 1676)
- Natural Sciences BA with Biology Concentration (p. 1677)
- Natural Sciences BA with Chemistry Concentration (p. 1682)
- Natural Sciences BA with Earth and Environmental Sciences Concentration (p. 1688)
- Natural Sciences BA with Physics Concentration (p. 1694)
- Natural Sciences BS with Biology Concentration (p. 1699)
- Natural Sciences BS with Chemistry Concentration (p. 1705)
- Natural Sciences BS with Earth and Environmental Sciences Concentration (p. 1711)

- Natural Sciences BS with Physics Concentration (p. 1716)
- Natural Sciences Minor (p. 1722)
- Neuroscience: Cellular and Molecular BS (p. 1723)
- Pharmaceutical Sciences BS (p. 1729)
- Physics BA (p. 1734)
- Physics BS (p. 1738)
- Physics Minor (p. 1742)
- Physics with Teaching BS (p. 1743)
- Science and Technology Writing Certificate (p. 1748)

Academic Policies and Regulations

Please see the Undergraduate Academic Policies (p. 1835) for details. Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions for the College of Science and Technology (CST), appear below.

Changing Majors

CST Students: In order to add or change majors within the College of Science and Technology, a CST student must meet with an advisor in the CST's Center for Academic Advising and Professional Development. The advisor will evaluate the student's record in accordance with the following policy:

1. CST students in their first semester at Temple University who wish to add or change majors within the CST will be automatically approved.
2. Continuing CST students who wish to add or change declared majors within the CST should have a cumulative grade point average (GPA) of 2.00 or higher. Continuing CST students who wish to change their major to undeclared will be automatically approved, provided that the total of completed and registered credits is fewer than 60 credits.
3. CST students can complete a second major in the CST. For more details, please refer to the Second Major section within the Requirements (p. 1418) page.

Non-CST Students: To transfer into the College of Science and Technology (CST), a non-CST student must be in accordance with the following policy:

1. Complete the CST Change of Program (COP) requirements on the Temple University COP Canvas.
2. Students in their first semester at Temple University who wish to transfer into CST will be automatically approved.
3. Continuing students who wish to transfer into CST must have a cumulative grade point average (GPA) of 2.00 or higher.

Course Eligibility

The College of Science and Technology offers four types of undergraduate courses as well as graduate courses:

1. Preparatory courses numbered 0700-0799: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. If required, students must complete these courses before enrolling in any higher level courses in the same department.
2. General Education courses numbered 0800-0999: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. These courses satisfy University General Education requirements as indicated in the course description.
3. Lower-level courses numbered 1000-1999: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. These are general foundation level courses in the various disciplines.
4. Upper-level courses numbered 2000-4999: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. These courses build on the foundation courses (and on other upper-level courses) to provide a focused exploration of field-specific content.
5. Graduate-level courses numbered 5000-9999: undergraduate students are generally prohibited from taking graduate-level courses. In rare circumstances, special permission may be granted for undergraduate students to take graduate courses. Graduate-level courses numbered 5000-5999 require permission of the course instructor, the Undergraduate Faculty advisor for the student's undergraduate major, the Graduate Chair of the department housing the course, and the College of Science and Technology's Center for Academic Advising and Professional Development. Graduate-level courses numbered 8000-9999 require permission from those listed above as well as the Vice Provost for Undergraduate Studies and the Vice Provost for Graduate Studies.

Courses Over Five Years Old

For transfer and re-enrolling students, courses over five years old will be reviewed by the College to determine whether they will be accepted toward the degree. Final determination of the acceptability of such courses is the responsibility of the Center for Academic Advising and Professional Development.

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria are placed on the Dean's List. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Grading

Major, Minor, and GenEd courses must be completed with a letter grade of C- or higher unless otherwise specified. Certain courses require a higher minimum grade in order to advance to the next level.

Graduation Procedures

Fly in 4 requires students to complete a graduation review prior to the start of the senior year. To meet this requirement, all CST students will have a graduation review prepared by an advisor in Spring of the junior year. Students must apply for graduation online via Self-Service Banner (SSB) early in the semester in which they will complete their degree requirements. For application deadlines, see the University's Undergraduate Graduation Procedures (p. 1854).

Grievance Procedure

The College of Science and Technology grievance procedure is available on the CST web site.

Non-Traditional Credits

A maximum of 12 semester hours of credit will be allowed by CST for life experience, upper-level military science (ROTC) courses, and CLEP/DSST examinations.

CLEP

A maximum of 8 semester hours of credit will be allowed by CST for CLEP examinations.

Life Experience

A maximum of 8 semester hours of credit will be allowed by CST for Life Experience. Students are required to write what proficiencies are developed by their life experience and designate courses similar to their background. The experience will be reviewed by the appropriate faculty. Students need a 2.5 minimum cumulative GPA in order to apply.

ROTC

A maximum of 4 courses or up to 12 semester hours will be allowed for upper-level Military Science (Army ROTC), Naval Science (Navy ROTC) or Aerospace Studies (Air Force ROTC) courses.

Overload Requests

Students in the College of Science and Technology must petition through the Center for Academic Advising and Professional Development for approval of an overload when they request to take more than 18 credits in either the fall or spring semesters or more than 8 credits in either summer session. Credits over 18 carry additional tuition charges (p. 1800). The following items are considered when reviewing an overload petition:

- Minimum 2.75 GPA overall and in the last semester of graded coursework at Temple.
- The number of credits completed in previous semesters.
- The number of science and math courses taken previously in each semester.
- The amount of credits requested.
- The type of courses requested including requests for repeated coursework. The office focuses particularly on the number of science and math courses in the student's proposed roster.

Placement Assessment

The results of placement assessments determine the best place for students to start in their English, Foreign Language and Mathematics courses. Please see Placement Assessment for additional information.

All CST transfer students are required to complete the Math placement assessment unless they transfer in the equivalent of MATH 1041, MATH 1042, MATH 2043 or MATH 3041.

Pre-Pharmacy Track Students

Students can be admitted to the Pre-Pharmacy track. Pre-Pharmacy students will need to declare a major before reaching 30 earned credits. Pre-Pharmacy students who have completed 30 or more credits without declaring a major will have a "declaration of major" hold added to their account and will need to see an advisor to declare a major before being able to register for a future semester.

Prerequisites and Co-Requisites

Students will be de-enrolled from courses for which they do not meet prerequisites and co-requisites. Please see the University's Prerequisites and Co-requisites (p. 1860) for additional information.

Re-enrollment to the College of Science and Technology

College of Science and Technology students who have not enrolled for one or more semesters and are not on an approved Leave of Absence (p. 1856) must submit a Request to Re-Enroll.

Repeating a Course

Please refer to the University policy on Repeating a Course (p. 1860) for further information.

Undeclared Majors

Due to the sequencing of our coursework, CST encourages undeclared students to declare a major by the time they have earned 30 credits. In accordance with University policy, students must declare a degree-earning major by the time they have earned 60 credits. Undeclared students who have 60 or more credits will have a "declaration of major" hold added to their account and will need to meet with an advisor to declare a major before being able to register for a future semester.

General College Graduation Requirements

The College of Science and Technology offers two undergraduate degrees: a Bachelor of Arts (BA) and a Bachelor of Science (BS). The BA degree gives students a broad-based education, including the study of a foreign language. The BS degree is for those students who wish for more specialized training in their chosen disciplines.

Credit Hour Requirements

The College of Science and Technology requires that students complete a total of 123 credits for most programs. The TUteach programs require students to complete a total of 124 credits. Of these totals, 90 credits must be in the College of Science and Technology, the College of Liberal Arts or the College of Engineering. A course shall count as a College of Science and Technology or College of Liberal Arts or College of Engineering course if it is offered by a department or program in these respective colleges, or if it is in the department of Art History, or if it is taken to satisfy a major, minor or certificate requirement in the College of Science and Technology. Of those 90 credits, 45 must be in upper-level courses. Upper-level courses consist of course numbers at the 2000 level or above.

Seminar Requirement

All students in the College of Science and Technology are required to take a one credit first year seminar. SCTC 1001 CST First Year Seminar is the appropriate course option for every entering first year CST major as well as those students changing from another School/College at Temple during the first year. UNVS 1001 First Year Seminar I and HNRS 1901 Honors First Year Seminar I can also fulfill this requirement.

Transfer students and students changing their major to CST after the first year should use SCTC 2001 CST Transfer Seminar to fulfill this requirement. UNVS 2002 Transfer Seminar: Planning for Success can also fulfill this requirement.

Students are allowed a maximum of three attempts in total to fulfill the Seminar Requirement.

General Education

All students are required to complete the General Education (GenEd (p. 83)) requirements.

Grade Point Average (GPA) Requirement

The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA.

Calculation of Major GPA

Unless otherwise noted, all courses listed under the major requirements for the degree will be included in the calculation of the major GPA. Courses that do not apply toward the major as an elective or required course would not be counted in the calculation of the major GPA. Please refer to degree programs for any variations from this.

Residency Requirements

Students must satisfy general Temple University residency requirements (p. 1838). Please refer to degree programs for the specific number of major, minor, or certificate courses required to be completed at Temple.

Bachelor of Science Requirements

Major

Students must also complete the requirements of a departmental major. The minimum acceptable grade in a course taken to fulfill major requirements is a C- unless otherwise specified. Bachelor of Science majors are offered in the following programs:

- Applied Mathematics
- Biochemistry
- Biology
- Biology with Teaching
- Biophysics
- Chemistry
- Chemistry with Teaching
- Computer Science
- Computer Science and Physics
- Data Science with Concentration in Computation and Modeling
- Data Science with Concentration in Computational Analytics
- Data Science with Concentration in Genomics and Bioinformatics
- Earth and Space Science with Teaching
- Ecology, Evolution, and Biodiversity
- Environmental Science with Concentration in Applied Ecology
- Environmental Science with Concentration in Climate
- Environmental Science with Concentration in Environmental Geochemistry
- Environmental Science with Concentration in Hydrology
- General Science with Teaching
- General Science and Technology with Teaching¹
- Genomic Medicine
- Genomic Medicine with Concentration in Pre-Medicine
- Geology
- Information Science and Technology
- Materials Science
- Mathematics
- Mathematics and Computer Science
- Mathematics and Physics
- Mathematics with Teaching
- Mathematics and Computer Science with Teaching
- Mathematics and Technology with Teaching
- Natural Sciences with Concentration in Biology
- Natural Sciences with Concentration in Chemistry
- Natural Sciences with Concentration in Earth and Environmental Sciences
- Natural Sciences with Concentration in Physics
- Neuroscience: Cellular and Molecular
- Pharmaceutical Sciences
- Physics
- Physics with Teaching

1

Pending the approval of the Department of Education, the General Science and Technology with Teaching program may be available for students in the 2023-2024 academic year. Students should see an advisor to confirm that the program has received approval prior to selecting this major.

Bachelor of Arts Requirements

Language Requirement

Bachelor of Arts candidates are required to successfully complete the second semester (typically courses numbered 1002) of a foreign language with a C- or better or demonstrate this proficiency through placement. In addition to the language offerings in the College of Liberal Arts, American Sign Language coursework can also fulfill this requirement.

Upper-Level Distribution Requirements

Bachelor of Arts students must complete a minimum of six credits of upper-level coursework (courses numbered 2000 and above) in one or more departments of the College of Liberal Arts or the department of Art History with a C- or better.

Major

Bachelor of Arts candidates must complete the requirements of a major. It is important to note that students enter the College of Science and Technology as Bachelor of Science majors. If students wish to change their degree choice to Bachelor of Arts, they must do so with an advisor in the Center for Academic Advising and Professional Development. The minimum acceptable grade in a course taken to fulfill major requirements is a C- unless otherwise specified. BA majors are offered in the following programs:

- Biology
- Chemistry
- Computer Science
- Geology
- Information Science and Technology
- Mathematics
- Mathematical Economics
- Natural Sciences with Concentration in Biology
- Natural Sciences with Concentration in Chemistry
- Natural Sciences with Concentration in Earth and Environmental Sciences
- Natural Sciences with Concentration in Physics
- Physics

Optional Minors, Certificates and Second Majors

Minors

Students may also choose to complete the requirements for a minor. The minimum acceptable grade in a course taken to fulfill minor requirements is a C- unless otherwise specified. At least three of the courses credited towards the minor must be courses that were not credited towards a CST major, additional CST minor, or CST certificate. Minors are available in the following programs:

- Astrophysics
- Biology
- Chemistry
- Computer Science
- Data Science: Computational Analytics
- Digital Media Technologies (CIS/MSP)
- Geology
- Information Science and Technology
- Mathematics
- Natural Sciences
- Physics

Certificates

Students may also choose to complete the requirements for a certificate. The minimum acceptable grade in a course taken to fulfill certificate requirements is a C- unless otherwise specified. At least two of the courses credited towards the certificate must be courses that were not credited towards a CST major, CST minor, or CST additional certificate. Certificates are available in the following programs:

- Astrophysics
- Computer Security and Digital Forensics
- Data Science: Computational Analytics

- Environmental Professional Training
- Fundamentals of Physics
- Fundamentals of Programming
- Genomic Medicine
- Mobile Application Development
- Science and Technology Writing

Second Major

Students may complete a second major by fulfilling all requirements for the primary and second majors, including at least four distinct courses in the primary major and four distinct courses in the second major. General Education requirements must be satisfied in accordance with the requirements of the primary major. In instances of a double major, only one degree will be conferred.

Academic Advising

The Center for Academic Advising and Professional Development
111 Tuttleman Learning Center
1809 North 13th Street
Philadelphia, PA 19122-6073
215-204-2890
<https://cst.temple.edu/students/academic-advising>
cstadv@temple.edu

The College of Science and Technology's Center for Academic Advising and Professional Development utilizes best practices to facilitate undergraduate student development and academic growth while guiding students from pre-admission to degree completion. By establishing a support network of connections with faculty, campus resources and the Temple University community, our academic advisors encourage positive and independent thinking, provide professional planning, promote resource utilization and foster quality academic strategies for the students we serve. Through teamwork, collaboration and open lines of communication, we empower our students to take ownership of their decisions, choices, and goals relating to academic and professional aspirations.

Professional advisors help students plan courses, explore majors, research career opportunities, and understand Temple's resources. CST's advising model consists of a First Year Advising team, which serves students from the time of admission throughout the successful completion of the first academic year, and advising by two Discipline teams for sophomores through to graduation. One discipline team oversees the majors, minors, and certificates in the Biology, Chemistry and Earth and Environmental Science (BCE) departments and the other does the same for the Computer and Information Sciences, Mathematics and Physics (CMP) departments. This model allows students to develop a connection with advisors who specialize in their area of study.

Our CST Peer Team assists our students with a variety of questions. The peer advisors are trained on CST and Temple University policies, services, and procedures. They serve as a point of contact as students arrive at the Center for Academic Advising and Professional Development. Our peers help with student-related programs and projects. Any general questions can be directed to our CST Peers at cstpeers@temple.edu.

CST also has Faculty advisors. Faculty advisors use their knowledge of departmental curriculum to help students choose courses consistent with their specific career objectives. Each faculty advisor is knowledgeable within their field and can help with questions involving research and real work experience within each field. Faculty advising is very important in developing ties between a student's academic program and his or her professional goals. Faculty advisors may assist students in finding research opportunities and professional internships and will help students choose courses that will best prepare them for their field of interest within a particular discipline. A list of Faculty Advisors may be found on the CST web site.

The Student Professional Development office prepares students for academic and professional careers through a variety of workshops, professional development training sessions, networking events, and job fairs. Hands-on independent research and internships are considered to be critical steps in a students' preparation for pursuing additional educational opportunities or their professional career.

The office facilitates the Undergraduate Research Program (URP) which provides world class research opportunities for undergraduate students in labs on campus as well as at the Temple University Health Science Campus.

Pre-Professional Advising

The College of Science and Technology works in conjunction with the Office of Pre-Professional Health Advising to advise students interested in professional schools. Knowledge gained in the College of Science and Technology curricula provides the foundation needed in preparing for Professional Health School entrance exams. Many of the courses required by professional programs such as dentistry, medicine, pharmacy, and veterinary medicine are incorporated into College of Science and Technology curricula. This approach allows our students to fulfill degree requirements, while at the same time meeting admissions criteria for professional and graduate programs. Students interested in professional health programs should contact the Office of Pre-Professional Health Advising early in their academic career for detailed advising.

CST offers a variety of ways in which students can pursue health professional programs.

- Students may complete a bachelor's degree and apply to health professional programs.
- Students may apply to the 3+4 and 3+3 accelerated programs (p. 1430) linked to particular Temple health professional programs by which they may complete both their bachelor and professional degree. For more information on accelerated programs, please visit the Office of Pre-Professional Health Advising web site.
- Students may apply to the direct admit 3+4 Pharmaceutical Sciences (p. 1729) and Temple University School of Pharmacy by which students would complete a Bachelor of Science in Pharmaceutical Sciences (BS-PS) and a Doctor of Pharmacy (PharmD).
- Students who have completed prerequisite courses may apply to the Temple University School of Pharmacy without completing their Undergraduate degree requirements such that students would only complete a Doctor of Pharmacy (PharmD).
- Students who have completed prerequisite courses may apply to the Temple University School of Podiatric Medicine without completing their Undergraduate degree requirements such that students would only complete a Doctor of Podiatric Medicine (DPM).

Faculty

Please go to the College of Science & Technology web site at <https://cst.temple.edu> and click on the individual department at the bottom of the page for a list of faculty in each department. See also <https://directory.temple.edu/>.

Ergin H. Ahmed, Research Associate Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

Ola Ajaj, Assistant Professor of Instruction, Department of Physics, College of Science and Technology; PhD, Florida Atlantic University.

Tamer Aldwairi, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Mississippi State University.

Shohreh Amini, Professor, Department of Biology, College of Science and Technology; PhD, University of Pennsylvania.

Eleni Anni, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Patras.

Alla Arzumanyan, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, Yerevan State University.

Hamza Atac, Research Assistant Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

Caryn S. Babaian, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Temple University.

Jessica Babcock, Assistant Professor of Instruction, Department of Mathematics, College of Science and Technology; MEd, Temple University.

Zachary Bailey, Assistant Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, University of Delaware.

Darius Balciunas, Associate Professor, Department of Biology, College of Science and Technology; PhD, Uppsala University.

Matthew Banks, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, State University of New York at Stony Brook.

Suman Batish, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Cambridge.

Rebecca L. Beadling, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Arizona.

Jocelyn Behm, Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Wisconsin-Madison.

Richard Beigel, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Stanford University.

Gianfranco Bellipanni, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Palermo.

Abha Belorkar, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, National University of Singapore.

Shiferaw S. Berhanu, Professor, Department of Mathematics, College of Science and Technology; PhD, Rutgers University.

Eugeney Bichenkov, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, Novosibirsk Institute of Bioorganic Chemistry.

Christopher J. Biehl, Instructor, Department of Computer and Information Sciences, College of Science and Technology; MBA, Temple University.

James D. Bloxton, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, Temple University.

Eric U. Borguet, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Pennsylvania.

Yelena Borovitskaya, Associate Professor of Instruction, Department of Physics, College of Science and Technology; PhD, Institute of Applied Physics, Nizhnii Novgorod, Russia.

Angela L. Bricker, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Cambridge.

Craig Brumwell, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Connecticut Health Center.

Ilya V. Buynevich, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Boston University.

Vincenzo Carnevale, Associate Professor, Department of Biology, College of Science and Technology; PhD, International School for Advanced Studies, Trieste.

Elizabeth Cerkez, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, Temple University.

Farzana Chaudhry, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, Oxford University.

Steven M. Chemtob, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, California Institute of Technology.

Je-Wei Chen, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, State University of New York at Stony Brook.

Ke Chen, Research Associate Professor, Department of Physics, College of Science and Technology; PhD, Chinese Academy of Sciences.

Yuzhou Chen, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Princeton University.

Rujeko Chinomona, Research Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, Southern Methodist University.

Martha Constantinou, Selma Lee Bloch Brown Associate Professor in Physics, Department of Physics, College of Science and Technology; PhD, University of Cyprus.

Erik Cordes, Professor, Department of Biology, College of Science and Technology; PhD, The Pennsylvania State University.

Raymond F. Coughlin, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, Illinois Institute of Technology.

Edward T. Crotty, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.

Hai-Lung Dai, Professor, Department of Chemistry, College of Science and Technology; PhD, University of California Berkeley.

Boris A. Datskovsky, Professor, Department of Mathematics, College of Science and Technology; PhD, Harvard University.

Alexandra Krull Davatzes, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Stanford University.

Nicholas Davatzes, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Stanford University.

Franklin A. Davis, Professor Emeritus, Department of Chemistry, College of Science and Technology; PhD, Syracuse University.

Timothy S. Davis, Instructor, Department of Earth and Environmental Science, College of Science and Technology; MS, Temple University.

Graham Dobreiner, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry, College of Science and Technology; PhD, Yale University.

David Dobar, Instructor, Department of Computer and Information Sciences, College of Science and Technology; MS, Temple University.

Vasily Dolgushev, Professor, Department of Mathematics, College of Science and Technology; PhD, Massachusetts Institute of Technology.

Marilena Downing, Assistant Professor of Instruction, Department of Mathematics, College of Science and Technology; MA, Temple University.

Eduard Dragut, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Illinois at Chicago.

Jeanette V. Dumas, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Drexel University.

Zbigniew Dziembowski, Associate Professor, Department of Physics, College of Science and Technology; PhD, Warsaw University.

Andrew Eisenberg, Assistant Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, Tufts University.

Khaled M. Elokely, Research Associate Professor, Department of Chemistry, College of Science and Technology; PhD, University of Mississippi.

Jennifer Emtage, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Johns Hopkins University.

Ananias A. Escalante, Professor, Department of Biology, College of Science and Technology; PhD, University of California Irvine.

Catherine Fair, Assistant Professor of Practice, Department of Chemistry, College of Science and Technology; MD, University of Alabama at Birmingham.

Mark A. Feitelson, Professor, Department of Biology, College of Science and Technology; PhD, University of California Los Angeles.

John Fiore, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; MS, University of Pennsylvania.

Leigh Flagg, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Tulsa.

Steven Fleming, Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, University of Wisconsin.

Natalie P. Flynn, Assistant Professor of Instruction, Department of Earth and Environmental Science, College of Science and Technology; MA, Temple University.

Seema Freer, Associate Professor of Practice, Department of Biology, College of Science and Technology; PhD, Thomas Jefferson University.

Amy Freestone, Associate Professor, Department of Biology, College of Science and Technology; PhD, University of California Davis.

David Futer, Professor, Department of Mathematics, College of Science and Technology; PhD, Stanford University.

Hongchang Gao, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pittsburgh.

Eleonora Gianti, Research Associate Professor, Department of Chemistry, College of Science and Technology; PhD, University of the Sciences.

Jayakumar G. Gilbert, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, Drexel University.

Isabel C. Gines, Instructor, Department of Biology, College of Science and Technology; PSM, Temple University.

Antonio Giordano, Professor, Department of Biology, College of Science and Technology; PhD, University of Trieste.

Mary Grace Giraldo, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Syracuse University.

Yury Grabovsky, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University.

David E. Grandstaff, Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Princeton University.

Jean-David Grattepanche, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Littoral.

Giovanni Gravina, Research Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, Carnegie Mellon University.

Alexander Gray, Associate Professor, Department of Physics, College of Science and Technology; PhD, Lawrence Berkeley National Laboratory and University of California, Davis.

Cristian E. Gutiérrez, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Buenos Aires.

Raymond Habas, Professor, Department of Biology, College of Science and Technology; PhD, State University of New York at Stony Brook.

Allan Haldane, Research Associate Professor, Department of Physics, College of Science and Technology; PhD, Rutgers University.

Nahed Hamid, Assistant Professor of Instruction, Department of Mathematics, College of Science and Technology; MS, Kean University.

Jun Han, Research Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, Texas A and M University.

Xubin He, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Rhode Island.

Stephen Blair Hedges, Laura H. Carnell Professor, Department of Biology, College of Science and Technology; PhD, University of Maryland.

- Meredith M. Hegg*, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, Temple University.
- Matthew Richard Helmus*, Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Wisconsin-Madison.
- Emanuel B. Hey*, Professor, Department of Biology, College of Science and Technology; PhD, State University of New York at Stony Brook.
- Tonia Hsieh*, Associate Professor, Department of Biology, College of Science and Technology; PhD, Harvard University.
- Anthony Hughes*, Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Illinois.
- Maria Iavarone*, Professor, Department of Physics, College of Science and Technology; PhD, University of Napoli Federico II.
- Mihaela Ignatova*, Selma Lee Bloch Brown Assistant Professor in Mathematics, Department of Mathematics, College of Science and Technology; PhD, University of Southern California.
- Susan A. Jansen-Varnum*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Missouri-St. Louis.
- Serge Jasmin*, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; BS, Temple University.
- Rob Jennings*, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Massachusetts Institute of Technology.
- Donald Jones*, Research Assistant Professor, Department of Physics, College of Science and Technology; PhD, University of Virginia.
- Kelli Shepard El Jones*, Instructor, Department of Mathematics, College of Science and Technology; MS, Temple University.
- Krishna Kant*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Texas at Dallas.
- Gurpreet Kaur*, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Temple University.
- Jaskiran Kaur*, Assistant Professor of Instruction, Department of Chemistry, College of Science and Technology; MS, University of Pennsylvania.
- Vince Kelly*, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; MS, Temple University.
- Roy A. Keyer*, Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, University of California Irvine.
- Bojeong Kim*, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, Cornell University.
- Daniel Kim*, Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, University of California.
- Isaac Klapper*, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University Courant Institute of Mathematical Sciences.
- Michael L. Klein*, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Bristol.
- Dominique M. Kliger*, Assistant Professor of Practice, Department of Computer and Information Sciences, College of Science and Technology; PhD, Temple University.
- James F. Korsh*, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.
- Svetlana Kotochigova*, Research Professor, Department of Physics, College of Science and Technology; PhD, St. Petersburg State University.
- Rob J. Kulathinal*, Associate Professor, Department of Biology, College of Science and Technology; PhD, McMaster University.
- Sudhir Kumar*, Laura H. Carnell Professor, Department of Biology, College of Science and Technology; PhD, The Pennsylvania State University.
- Eugene Kwatny*, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Drexel University.
- Sally Kyvernitis*, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; MS, Indiana University.
- Paul S. LaFollette Jr.*, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; MD, Temple University.
- Jaclyn Lang*, Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, University of California Los Angeles.

Longin Jan Latecki, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Hamburg.

Dominic Letarte, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Ecole Polytechnique Montreal.

Edward S. Letzter, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Washington.

Robert J. Levis, Professor, Department of Chemistry, College of Science and Technology; PhD, The Pennsylvania State University.

Ronald M. Levy, Laura H. Carnell Professor, Department of Chemistry, College of Science and Technology; PhD, Harvard University.

Stephanie Lewkiewicz, Research Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, University of California Los Angeles.

Xiuqi Li, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Florida Atlantic University.

David A. Liberles, Professor, Department of Biology, College of Science and Technology; PhD, California Institute of Technology.

Chyanlong Lin, Associate Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

Maria E. Lorenz, Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, University of Southern California.

Martin W. Lorenz, Professor, Department of Mathematics, College of Science and Technology; PhD, Universität Giessen.

Sheryl L. Love, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Temple University.

Mia Luehrmann, Associate Professor of Instruction, Department of Physics, College of Science and Technology; PhD, University of Illinois at Urbana-Champaign.

Jay Lunden, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Temple University.

A. Marjatta Lyyra, Professor, Department of Physics, College of Science and Technology; PhD, University of Stockholm.

Marcella Macaluso, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Palermo.

Stephen MacNeil, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of North Carolina at Charlotte.

Carol M. Manhart, Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, University of Colorado Boulder.

C. Jeffrey Martoff, Professor, Department of Physics, College of Science and Technology; PhD, University of California Berkeley.

Spiridoula Matsika, Professor, Department of Chemistry, College of Science and Technology; PhD, The Ohio State University.

Kathleen E. Mc Kinley, Instructor of Practice, Department of Mathematics, College of Science and Technology; MS, Saint Joseph's University.

Rose Marie McGinnis, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; MBA, Temple University.

Michelle Hedwig McGowan, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Rutgers University.

George Mehler, Assistant Professor of Practice, Department of Biology, College of Science and Technology; PhD, Temple University.

Gerardo A. Mendoza, Professor, Department of Mathematics, College of Science and Technology; PhD, Massachusetts Institute of Technology.

Andreas Metz, Professor, Department of Physics, College of Science and Technology; PhD, Institut Für Kernphysik Universität Mainz.

Olena Mishchuk, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Yuriy Fedkovych Chernivtsi National University.

Irina Mitrea, Laura H. Carnell Professor, Department of Mathematics, College of Science and Technology; PhD, University of Minnesota.

Sayaka Miura, Research Associate Professor, Department of Biology, College of Science and Technology; PhD, The Pennsylvania State University.

Anna Moore, Assistant Professor, Department of Biology, College of Science and Technology; PhD, University of Connecticut Health Center.

Andrea Morrione, Research Associate Professor, Department of Biology, College of Science and Technology; PhD, University of Milan.

Karl Morris, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Florida International University.

Atsuhiko Muto, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Colorado.

Manal A. Nael, Research Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, University of Mississippi.

James Napolitano, Professor, Department of Physics, College of Science and Technology; PhD, Stanford University.

Frank E. Nelson, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Oregon State University.

Matthew Newby, Assistant Professor of Instruction, Department of Physics, College of Science and Technology; PhD, Rensselaer Polytechnic Institute.

Allen W. Nicholson, Professor, Department of Biology, College of Science and Technology; PhD, University of Pennsylvania.

Rhonda H. Nicholson, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, Wayne State University.

John Noel, Associate Professor of Instruction, Department of Physics, College of Science and Technology; PhD, Texas A and M University.

Jonathan Nyquist, Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Wisconsin.

Zoran Obradovic, Laura H. Carnell Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, The Pennsylvania State University.

Uloma Opara-Osuoha, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Ibadan.

Michael Opferman, Assistant Professor of Instruction, Department of Physics, College of Science and Technology; PhD, University of Pittsburgh.

Charles Osborne, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, Temple University.

Maria A. Pacheco, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, Universidad Simón Bolívar.

Karen B. Palter, Associate Professor Emerita, Department of Biology, College of Science and Technology; PhD, Princeton University.

Alex Pang, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, North Carolina State University.

Ellen Panofsky, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, Lehigh University.

Christopher Pascucci, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; MS, University of Pennsylvania.

Mohit Patel, Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, Temple University.

John A. Paulos, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Wisconsin.

Jamie Payton, Professor, Department of Computer and Information Sciences, College of Science and Technology; DSc, Washington University.

Simona Percec, Research Professor, Department of Chemistry, College of Science and Technology; PhD, Institute of Macromolecular Chemistry.

John P. Perdew, Laura H. Carnell Professor, Department of Physics, College of Science and Technology; PhD, Cornell University.

Claudia Pine-Simon, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; MS, University of Pennsylvania.

Athanasia Polychronopoulou, Assistant Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Temple University.

Sergei L. Kosakovsky Pond, Professor, Department of Biology, College of Science and Technology; PhD, University of Arizona.

Edwin F. Posada, Research Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, Temple University.

Matthew Posik, Research Associate Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

Sean Gillian Queisser, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, Ruprecht-Karls University of Heidelberg.

Daniele Ramella, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, Boston University.

Paul Rapoport, Research Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, University of Illinois at Chicago.

Robert Rarig, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, University of Michigan.

Sujith Ravi, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Virginia.

Brian Rider, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University Courant Institute of Mathematical Sciences.

Peter S. Riseborough, Professor, Department of Physics, College of Science and Technology; PhD, Imperial College London.

Igor Rivin, Professor, Department of Mathematics, College of Science and Technology; PhD, Princeton University.

Dmitri Romanov, Research Professor, Department of Physics, College of Science and Technology; PhD, Novosibirsk Institute of Semiconductor Physics, USSR Academy of Sciences.

Andrew B. Rosen, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Georgia State University.

Kenneth Ruff, Assistant Professor of Practice, Department of Biology, College of Science and Technology; PhD, Temple University.

Elisabeth Russell-McKenzie, Assistant Professor of Practice, Department of Chemistry, College of Science and Technology; PhD, Temple University.

Dumitru D. Rusu, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, University of Guelph.

Adrienn Ruzsinszky Perdew, Associate Professor, Department of Physics, College of Science and Technology; PhD, Budapest University of Technology and Economics.

Robert W. Sanders, Professor, Department of Biology, College of Science and Technology; PhD, University of Georgia.

Christian E. Schafmeister, Professor, Department of Chemistry, College of Science and Technology; PhD, University of California San Francisco.

Benjamin Seibold, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Kaiserslautern.

Cinzia Sevignani, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, University of Modena.

Brent Sewall, Associate Professor, Department of Biology, College of Science and Technology; PhD, University of California Davis.

Joel B. Sheffield, Professor Emeritus, Department of Biology, College of Science and Technology; PhD, University of Chicago.

Xinghua Mindy Shi, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Chicago.

Yuan Justin Shi, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.

Jingyang Shu, Research Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, University of California Davis.

Scott M. Sieburth, Professor Emeritus, Department of Chemistry, College of Science and Technology; PhD, Harvard University.

Jeromy Sivek, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, University of Pittsburgh.

Jonathan Smith, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, Wesleyan University.

Gregory S. Smutzer, Associate Professor of Instruction, Department of Biology, College of Science and Technology; PhD, State University of New York at Buffalo.

Richard Souvenir, Professor, Department of Computer and Information Sciences, College of Science and Technology; DSc, Washington University.

Francis C. Spano, Professor, Department of Chemistry, College of Science and Technology; PhD, Princeton University.

Nikolaos Sparveris, Associate Professor, Department of Physics, College of Science and Technology; PhD, University of Athens.

Rachel Spigler, Associate Professor, Department of Biology, College of Science and Technology; PhD, University of Georgia.

Robert J. Stanley, Professor, Department of Chemistry, College of Science and Technology; PhD, The Pennsylvania State University.

Matthew Stover, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, University of Texas at Austin.

Daniel R. Strongin, Professor, Department of Chemistry, College of Science and Technology; PhD, University of California Berkeley.

Deborah Stull, Associate Professor of Practice, Department of Biology, College of Science and Technology; PhD, Yale University.

Ang Sun, Research Professor, Department of Biology, College of Science and Technology; PhD, Sbarro Institute for Cancer Research and Molecular Medicine.

Yugang Sun, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Science and Technology of China.

Bernd Surrow, Professor, Department of Physics, College of Science and Technology; PhD, University of Hamburg.

Daniel B. Szyld, Professor, Department of Mathematics, College of Science and Technology; PhD, New York University.

Chiu Chiang Tan, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, College of William and Mary.

Hong Tang, Research Assistant Professor, Department of Physics, College of Science and Technology; PhD, Northwestern Polytechnical University.

Rongjia Tao, Professor, Department of Physics, College of Science and Technology; PhD, Columbia University.

Samuel J. Taylor, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, University of Texas at Austin.

Dennis O. Terry Jr., Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Nebraska.

Jesse Thornburg, Assistant Professor of Instruction, Department of Earth and Environmental Science, College of Science and Technology; MS, Temple University.

Laura Toran, Professor, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Wisconsin.

Darius H. Torchinsky, Assistant Professor, Department of Physics, College of Science and Technology; PhD, Massachusetts Institute of Technology.

Georgia Triantafillou, Professor, Department of Mathematics, College of Science and Technology; PhD, University of Bonn, Germany.

Tsvetelin D. Tsankov, Associate Professor of Instruction, Department of Physics, College of Science and Technology; PhD, Drexel University.

Allison Tumarkin-Deratzian, Professor of Instruction, Department of Earth and Environmental Science, College of Science and Technology; PhD, University of Pennsylvania.

Shivaiah Vaddypally, Research Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, Hyderabad University.

Ann M. Valentine, Professor, Department of Chemistry, College of Science and Technology; PhD, Massachusetts Institute of Technology.

Elisa Ventura, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, Temple University.

Vladimir Visnjic, Associate Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, University of Bonn, Germany.

Evelyn Vleck, Assistant Professor of Instruction, Department of Biology, College of Science and Technology; MA, William Paterson College.

Vincent Voelz, Associate Professor, Department of Chemistry, College of Science and Technology; PhD, University of California San Francisco.

Slobodan Vucetic, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Washington State University.

Anduo Wang, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, University of Pennsylvania.

Charles Wang, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Wayne State University.

Pei Wang, Associate Professor of Instruction, Department of Computer and Information Sciences, College of Science and Technology; PhD, Indiana University.

Rongsheng Wang, Associate Professor, Department of Chemistry, College of Science and Technology; PhD, Washington University in St. Louis.

Yan Wang, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Stevens Institute of Technology.

Yu Wang, Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Illinois Institute of Technology.

Richard B. Waring, Associate Professor, Department of Biology, College of Science and Technology; PhD, Essex University.

Sarah Elizabeth Wengryniuk, Robert L. Smith Early Career Associate Professor in Chemistry, Department of Chemistry, College of Science and Technology; PhD, Duke University.

Vladimira V. Wilent, Associate Professor of Instruction, Department of Chemistry, College of Science and Technology; PhD, University of Pennsylvania.

Katherine A. Willets, Professor, Department of Chemistry, College of Science and Technology; PhD, Stanford University.

Jie Wu, Laura H. Carnell Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Florida Atlantic University.

Wei Wu, Assistant Professor of Instruction, Department of Mathematics, College of Science and Technology; PhD, University of Leuven.

Xifan Wu, Professor, Department of Physics, College of Science and Technology; PhD, Rutgers University.

Stephanie L. Wunder, Professor, Department of Chemistry, College of Science and Technology; PhD, University of Massachusetts.

Xiaoxing Xi, Laura H. Carnell Professor, Department of Physics, College of Science and Technology; PhD, Peking University and Institute of Physics.

Xiaojun Xu, Research Assistant Professor, Department of Physics, College of Science and Technology; PhD, Chinese Academy of Sciences.

Qimin Yan, Assistant Professor, Department of Physics, College of Science and Technology; PhD, University of California Santa Barbara.

Wei-Shih Yang, Professor, Department of Mathematics, College of Science and Technology; PhD, Cornell University.

Weidong Yang, Professor, Department of Biology, College of Science and Technology; PhD, Fudan University.

Mengsha Yao, Research Assistant Professor, Department of Mathematics, College of Science and Technology; PhD, University of Southern California.

Atila Yilmaz, Associate Professor, Department of Mathematics, College of Science and Technology; PhD, New York University.

Tan Yuen, Associate Professor, Department of Physics, College of Science and Technology; PhD, Temple University.

Michael J. Zdilla, Professor, Department of Chemistry, College of Science and Technology; PhD, Princeton University.

Bailin Zhang, Research Assistant Professor, Department of Biology, College of Science and Technology; PhD, Dalian Institute of Chemical Physics, Chinese Academy of Sciences.

Kai Zhang, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; PhD, Hong Kong University of Science and Technology.

Mi Zhao, Research Assistant Professor, Department of Chemistry, College of Science and Technology; PhD, South China Sea Institute of Oceanology, Chinese Academy of Sciences.

Accelerated Programs in CST

Overview

The College of Science and Technology (CST) has a variety of accelerated programs in partnership with professional and graduate programs. For a complete list, see Accelerated Degree Programs (p. 1792) in the About Temple University section of the *Undergraduate Bulletin*.

3+3, 3+4 Bachelor/Professional Accelerated Programs

Temple Professional School Programs (Lewis Katz School of Medicine at Temple University, Temple University Kornberg School of Dentistry, Temple University School of Podiatry, Temple University School of Pharmacy) agree to cooperate in providing an accelerated 3+4 undergraduate/professional school education leading to both a Bachelor of Arts degree in the College of Science and Technology and a Doctorate degree from the Professional School. The Temple University College of Public Health agrees to cooperate in providing an accelerated 3+3 undergraduate/graduate education leading to both a Bachelor of Arts degree in the College of Science and Technology and a Doctor of Physical Therapy in the College of Public Health.

Students in the College of Science and Technology who are in a joint program listed above, have been admitted to the professional program at the end of their third year, and have completed 90 semester hours, may transfer their first year in professional study toward the completion of the credit requirements for the degree of Bachelor of Arts. Biology and Chemistry majors may also transfer approved courses in their first year of professional study toward the elective courses in their major.

Students in the College of Science and Technology who have been admitted to other health-related professional schools at the end of their third year with a cumulative GPA of at least 3.50 and who have completed 90 semester hours, including all course requirements of the major, college and

university, may petition the dean for the transfer of their first year of professional study toward the completion of the credit requirements for the degree of Bachelor of Arts. University residency (p. 1838) requirements must also be met.

The specific Bachelor/Professional accelerated programs are:

- Dental 3+4 Program
- Medical 3+4 Program
- Pharmacy 3+4 Program
- Physical Therapy 3+3 Program
- Podiatry 3+4 Program
- Pharmaceutical Sciences BS

Accelerated Programs within the College of Science and Technology

Many departments in the College of Science and Technology cooperate in providing an accelerated +1 undergraduate/graduate education leading to a Bachelor of Arts or Bachelor of Science degree as well as a Master of Arts, a Master of Science, or a Professional Science Master (PSM) degree from the Graduate School.

The specific accelerated +1 programs available within CST are:

- BA or BS in Biology / PSM in Scientific Writing
- BA or BS in Biology / PSM in Bioinformatics and Biological Data Science
- BA or BS in Biology / PSM in Bioinnovation
- BA or BS in Biology / PSM in Biotechnology
- BS in Biochemistry / PSM in Bioinformatics and Biological Data Science
- BS in Biochemistry / PSM in Bioinnovation
- BS in Biochemistry / PSM in Biotechnology
- BS in Biochemistry / PSM in Forensic Chemistry
- BS in Chemistry / MS in Chemistry
- BA or BS in Chemistry / PSM in Forensic Chemistry
- BS in Computer Science / MS in Computer Science
- BS in Computer Science / MS in Computational Data Science
- BS in Data Science / MS in Computational Data Science
- BA in Mathematics / MS in Mathematics
- BS in Mathematics / MS in Mathematics
- BS in Mathematics and Computer Science / MS in Computational Data Science
- BA or BS in Natural Sciences / PSM in Scientific Writing
- BA or BS in Natural Sciences / PSM in Bioinnovation
- BA or BS in Natural Sciences / PSM in Biotechnology
- BS in Neuroscience: Cellular and Molecular / PSM in Biotechnology
- BS in Neuroscience: Cellular and Molecular / PSM in Bioinformatics and Biological Data Science
- BS in Neuroscience: Cellular and Molecular / PSM in Bioinnovation
- BA in Physics / MS in Physics
- BS in Physics / MS in Physics

Accelerated Programs with the College of Education and Human Development

Temple's College of Education and Human Development cooperates in providing an accelerated +1 undergraduate/graduate education leading to a Bachelor of Arts or Bachelor of Science degree in the College of Science and Technology as well as a Master of Education degree from the College of Education and Human Development. The Biology, Chemistry, Earth and Environmental Science, Mathematics, and Physics departments enable talented students to complete both a Bachelor's degree in one of the above departments and a Master in Education degree in a total of five years. After completing the Bachelor's degree in one of the aforementioned disciplines, students spend an additional year as a graduate student in the College of Education and Human Development.

Students must apply for the accelerated +1 Bachelor of Arts or Bachelor of Science / Master of Education program during their sophomore year. If accepted, they will take both undergraduate major courses as well as Master in Education courses beginning in their junior year. They typically complete their undergraduate major in their fourth year and their Master of Education degree in their fifth year. Students who complete this program earn a Master

of Education degree and may apply for a Pennsylvania Instructional I Teaching Certificate after passing all required licensure examinations. See the Secondary Education/Science Education MEd for more details.

The specific accelerated +1 programs available between the College of Science and Technology and the College of Education and Human Development are:

- BA in Biology / MEd in Middle Grades Education with a Concentration in Science
- BA in Biology / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BS in Biology / MEd in Middle Grades Education with a Concentration in Science
- BS in Biology / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BA in Chemistry / MEd in Middle Grades Education with a Concentration in Science
- BA in Chemistry / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BS in Chemistry / MEd in Middle Grades Education with a Concentration in Science
- BS in Chemistry / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BA in Geology / MEd in Middle Grades Education with a Concentration in Science
- BA in Geology / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BS in Geology / MEd in Middle Grades Education with a Concentration in Science
- BS in Geology / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BA in Mathematics / MEd in Middle Grades Education with a Concentration in Mathematics
- BA in Mathematics / MEd in Middle Grades Education with a Concentration in Mathematics and Language Arts
- BS in Mathematics / MEd in Middle Grades Education with a Concentration in Mathematics
- BS in Mathematics / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BA in Natural Sciences / MEd in Middle Grades Education with a Concentration in Science
- BA in Natural Sciences / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BA in Physics / MEd in Middle Grades Education with a Concentration in Science
- BA in Physics / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BS in Physics / MEd in Middle Grades Education with a Concentration in Science
- BS in Physics / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BA in Mathematics / MEd in Secondary Education with a Concentration in Mathematics Education
- BS in Mathematics / MEd in Secondary Education with a Concentration in Mathematics Education

For more specific details on some of the agreements with Temple's graduate and professional schools, see the following links. For a complete list, see the Accelerated Degree Programs (p. 1792) section of the *Undergraduate Bulletin*.

Chemistry BS/MS

Overview

The +1 Bachelor of Science and Master of Science in Chemistry is an accelerated program within the College of Science and Technology. This program allows a talented student to obtain a master's degree in one additional year after completion of a bachelor's degree. A chemistry major may apply for the program prior to the junior or senior year. Interested students should contact their advisor for details about the application process and required approvals. For more information, see the following program pages: Chemistry BS (p. 1494) and Chemistry MS.

Computer Science, BS/MS

Overview

The +1 Bachelor of Science in Computer Science and Master of Science in Computer Science program is an accelerated degree program within the College of Science and Technology. High achieving Computer Science majors with at least 4 semesters at Temple are qualified to apply to the +1 program.

- Students may apply to the accelerated degree program after completing a progress review in CST advising and meeting with the Faculty advisor. These steps must be completed during the Spring of the Sophomore or Junior year. *In addition to having a GPA of 3.25 or higher, junior status entrants must be able to complete their BS degree within two years of program entry, while senior status entrants must be able to complete their BS degree within one year of program entry. Please note that many of the graduate Computer Science electives expect a background in networking and math (e.g., Calculus III, Linear Algebra Statistics), so students should select their undergraduate courses appropriately.*
- The +1 program provides 12 credits of graduate coursework that have been approved to fulfill up to 12 credits of undergraduate degree requirements as either Computer Science electives or free electives. The graduate coursework will also fulfill up to 12 credits of graduate degree requirements.
- After earning the BS degree, students must be able to complete the graduate degree in one additional year including one summer.

Interested students should contact their advisor for details. For more information, see the following program pages: Computer Science BS (p. 1518) and Computer Science MS and the Department of Computer and Information Sciences' Graduate Page.

Dental 3+4 Program

Overview

The seven-year Bachelor of Arts in any College of Science and Technology major and Doctor of Dental Medicine is a combined program between the College of Science and Technology and the Temple University Kornberg School of Dentistry.

The program is designed for high-achieving students. Students must apply through the Office of Pre-Professional Health Advising.

Students must meet the admissions requirements for early admission to the Temple University Kornberg School of Dentistry. The 3+4 option is only with Temple University Kornberg School of Dentistry. If interested in applying to other schools, students will need to follow a 4+4 option.

Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the major before entering the School of Dentistry with the exception of the following:
 1. Biology majors may count the following three first year School of Dentistry courses as Biology electives:
 - DENT D100 Biochemistry so long as the student has not previously earned credit for BIOL 4375 General Biochemistry I;
 - DENT D101 General and Oral Histology so long as the student has not previously earned credit for BIOL 2235 General Histology;
 - DENT D202 Gross Anatomy so long as the student has not previously earned credit for BIOL 2233 Mammalian Anatomy.
 2. Chemistry majors may count the following first year School of Dentistry course as a Chemistry elective:
 - DENT D100 Biochemistry so long as the student has not previously earned credit for BIOL 4375 General Biochemistry I/CHEM 4401 Biochemistry I CHEM 3401 Applications of Biochemistry.
- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Dentistry as equivalents of upper-level credits in the College of Science and Technology.
- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Dentistry to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Center for Academic Advising and Professional Development (Tuttleman Learning Center, Suite 111) or Pre-Professional Health Advising (Mitten Hall, Suite 110) and will be shared with prospective and current students.

Academic Plan

Individual academic plans will vary based on previous course work, AP credits, performance on University placement tests and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Advising and a CST academic advisor during the first academic year at Temple University.

Geology BA/MEd

Overview

Information Science and Technology BS/MS

Overview

The +1 Bachelor of Science in Information Science and Technology and Master of Science in Information Science and Technology program is an accelerated program within the College of Science and Technology. High achieving Information Science and Technology (IS&T) majors with at least 4 semesters at Temple are qualified to apply to the +1 Accelerated Program.

- Students may apply to the accelerated degree program after completing a progress review in CST advising and meeting with the faculty advisor. These steps must be completed during the Spring of the Junior year. *In addition to having a GPA of 3.5 or higher, applicants must be able to complete their BS degree within one year of program entry and also be able to complete at least 99 credits (including MATH 2031 Probability and Statistics, CIS 3329 Network Architectures, and CIS 3342 Server-Side Web Application Development) before the start of their Senior year.*
- During their Senior year, students take 24 credits, 9 credits of which are graduate. These 9 graduate credits count three ways: (a) as general undergraduate credit, (b) as upper level undergraduate IS&T elective credit, (c) as graduate credit.
- After their Senior year, students receive their undergraduate degree, then are formally admitted to the graduate program (with 9 graduate credits already completed).
- During their +1 year, students take an additional 21 graduate credits to earn the Master's degree.

Interested students should contact their advisor for details. For more information, see the following program pages: Information Science and Technology BS (p. 1623) and Information Science and Technology MS and the Department of Computer and Information Sciences' Graduate Page.

Mathematics BA/MS

Overview

The +1 Bachelor of Arts in Mathematics and Master of Science in Mathematics program is an accelerated program within the College of Science and Technology. To participate in this +1 program, a mathematics major should be enrolled in the BA program. Application to continue in the MS program must be made to the graduate chair of the department no later than the first semester of the senior year. To be accepted by the MS program, a student must have a GPA of at least 3.25 in Mathematics courses when the application is made. Students must complete MATH 3141, MATH 3142 and MATH 4051 in place of MATH 3137 and MATH 3138, and MATH 3098 in place of MATH 3096 in order to be considered for admission to the Master's program. In addition to completing the BA requirements, the student must complete four additional graduate-level mathematics courses numbered 5000 and above by the end of her/his senior year. If the General Education and college requirements have also been met, the student will be awarded the BA degree at the conclusion of this portion of the program. All courses must be passed with a grade of C- or better, and no more than two graduate courses can carry a grade less than B- for the student to continue with the MS portion of the program.

+1 Year Course Requirements

The student will take a total of six graduate-level courses, selected to conform to the MS requirements. At the end of the +1 year, the student must either write a master's thesis or pass one of the following examinations:

- Master's Comprehensive Examination in Pure Mathematics
- Master's Comprehensive Examination in Applied Mathematics
- PhD Combined Comprehensive Examination (MS level pass)

For more information, see the following program pages: Mathematics BA (p. 1661) and Mathematics MS.

Medical 3+4 Program

Overview

The seven-year Bachelor of Arts in any College of Science and Technology major and Doctor of Medicine program is a combined program between the College of Science and Technology and the Lewis Katz School of Medicine.

The program is designed for high-achieving students. Students must apply to be a Temple University Health Scholar through the Office of Pre-Professional Health Advising.

Students who entered Temple University as Health Scholars are able to be considered for early admissions to the Lewis Katz School of Medicine at Temple University as BA/MD Accelerated Option candidates. The 3+4 option is only with Lewis Katz School of Medicine. If interested in applying to other schools, students will need to follow a 4+4 option.

Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology

- Health Scholar Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the major before entering the Lewis Katz School of Medicine.
- College of Science and Technology Health Scholars may count up to 33 of the credit hours from the first year at the Lewis Katz School of Medicine as equivalents of upper-level credits in the College of Science and Technology.
- College of Science and Technology Health Scholars may count up to 33 of the credit hours from the first year at the Lewis Katz School of Medicine to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Center for Academic Advising and Professional Services (Tuttleman Learning Center, Suite 111) and will be shared with prospective students and current Health Scholars. Advising on progress toward career goal and eventual presentation as a Health Scholar (3+4 or 4+4) will occur through Pre-Professional Health Advising (Mitten Hall, Suite 110).

Academic Plan

Individual academic plans will vary based on previous course work, AP credits, performance on University placement tests and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Advising and a CST academic advisor during the first academic year at Temple University.

Pharmacy 3+4 Program

Overview

The seven-year Bachelor of Arts in any College of Science and Technology major and Doctor of Pharmacy program is a combined program between the College of Science and Technology and the School of Pharmacy. The program is designed for high-achieving students. Students must apply through the Office of Pre-Professional Health Advising.

Students must meet the admissions requirements for early admission to the Temple University School of Pharmacy. The 3+4 option is only with Temple University School of Pharmacy. If interested in applying to other schools, students will need to follow a 4+4 option in order to obtain both a Bachelor of Arts degree and a Doctor of Pharmacy (PharmD) degree.

Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the major before entering the School of Pharmacy with the exception of the following:

1. Biology majors may count up to three of the following first year Temple University School of Pharmacy's Pharmaceutical Sciences courses as Biology electives:

PS P155 Principles of Infectious Diseases so long as the student has not previously earned credit for BIOL 3317 General Microbiology;

PS P151 Medicinal Chemistry I or PS P164 Pharmacology so long as the student has not previously earned credit for BIOL 4375 General Biochemistry I;

PS P152 Medicinal Chemistry II so long as the student has not previously earned credit for BIOL 4376 General Biochemistry II.

2. Chemistry majors may count the following first year Temple University School of Pharmacy course as a Chemistry elective:

PS P151 Medicinal Chemistry I so long as the student has not previously earned credit for BIOL 4375 General Biochemistry I/CHEM 4401 Biochemistry I/CHEM 3401 Applications of Biochemistry

- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Pharmacy as equivalents of upper-level credits in the College of Science and Technology.
- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Pharmacy to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Center for Academic Advising and Professional Development (Tuttleman Learning Center, Suite 111) or Pre-Professional Health Advising (Mitten Hall, Suite 110) and will be shared with prospective and current students.

Academic Plan

Individual academic plans will vary based on previous course work, AP credits, performance on University placement tests and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Advising and a CST academic advisor during the first academic year at Temple University.

Physical Therapy 3+3 Program

Overview

The six-year Bachelor of Arts in any College of Science and Technology major and Doctor of Physical Therapy program is a combined program between the College of Science and Technology and the College of Public Health's Doctor of Physical Therapy program. The program is designed for high-achieving students. Students must apply through the Office of Pre-Professional Health Advising.

Students must meet the admissions requirements for early admission to the Doctor of Physical Therapy program in Temple University's College of Public Health. The 3+3 option is only with the Doctor of Physical Therapy program in Temple University's College of Public Health. If interested in applying to other schools, students will need to follow a 4+3 option.

Guidelines for the Completion of the Bachelor of Arts Degree from the College of Science & Technology

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for their major before entering the Doctor of Physical Therapy (DPT) Program in the College of Public Health (CPH) with the exception of the following:

Biology majors may count one of the following first year DPT Program courses as one of their three required Biology electives:

PHTH 8114 Neuroscience

PHTH 8115 Human Physiology and Pathology II

PHTH 8116 Motor Control and Learning

- CST students may count up to 33 equivalent credit hours from the first year at the DPT Program in the CPH as equivalents of upper-level credits in the College of Science and Technology.
- CST students may count up to 33 equivalent credit hours from the first year at the DPT Program in the CPH to fulfill their general credit hour requirements for the BA degree in the CST.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Center for Academic Advising and Professional Development (Tuttleman Learning Center, Suite 111) or Pre-Professional Health Advising (Mitten Hall, Suite 110) and will be shared with prospective and current students.

Academic Plan

Individual academic plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Advising and a CST academic advisor during the first academic year at Temple University.

Physics BA/MEd

Overview

The five-year Bachelor of Arts in Physics and Master of Education in Secondary Education program with Teacher Certification in Secondary Education is a combined program between the College of Science and Technology and the College of Education and Human Development. For more information, see the following program pages: Physics BA (p. 1734) and Secondary Education/Science Education MEd.

Physics BA/MS

Overview

The +1 Bachelor of Arts in Physics and Master of Science in Physics program is an accelerated program within the College of Science and Technology. This program allows a talented student to obtain a master's degree in one additional year after completion of a bachelor's degree. A physics major may apply for the program during the junior or senior year. Please consult the advisor for details. For more information, see the following program pages: Physics BA (p. 1734) and Physics MS.

Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the degree program before entering the School of Podiatric Medicine with the exception of the following:
 1. Biology majors may use up to three of the following first year School of Podiatry Biomedical Studies (PBMS) courses as replacements for Biology electives:

PBMS P100 Histology as long as the student has not previously earned credit for BIOL 2235 General Histology;
PBMS P102 General Anatomy as long as the student has not previously earned credit for BIOL 2233 Mammalian Anatomy;

PBMS P104 Neurophysiology as long as the student has not previously earned credit for BIOL 3352 Systems Neuroscience or BIOL 3358 Cellular and Molecular Neuroscience;

PBMS P110 Biochemistry as long as the student has not previously earned credit for BIOL 4375 General Biochemistry I;

PBMS P111 Physiology as long as the student has not previously earned credit for BIOL 3334 Mammalian Physiology.

2. Chemistry majors may use up to one of the following first year Temple University School of Podiatry courses as replacements for Chemistry electives:

PBMS P110 Biochemistry as long as the student has not previously earned credit for BIOL 4375 General Biochemistry I or CHEM 4401 Biochemistry I or CHEM 3401 Applications of Biochemistry.

- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Podiatric Medicine as equivalents of upper-level credits in the College of Science and Technology.
- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Podiatric Medicine to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Center for Academic Advising and Professional Development (Tuttleman Learning Center, Suite 111) or Pre-Professional Health Advising (Mitten Hall, Suite 110) and will be shared with prospective and current students.

Academic Plan

Individual academic plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Advising and a CST academic advisor during the first academic year at Temple University.

Advanced Core Science Studies Postbaccalaureate Certificate

Overview

The **Postbaccalaureate Certificate in Advanced Core Science Studies** is a postbaccalaureate program for students not enrolled in an undergraduate major who are planning to apply to medical, dental, podiatry, physician assistant, physical therapy or pharmacy school.

The curriculum is designed to prepare students for standardized tests and coursework in health professional school, with small, primarily postbaccalaureate exclusive classes, individual and group academic support sessions and test prep, and full application support including personalized advising, committee letters and mock interviews.

For more information about the program, please visit: <https://postbac.cst.temple.edu/>.

Program Code: ST-ACSS-CRPB

Learn more about the postbaccalaureate certificate in Advanced Core Science Studies.

Certificate Requirements

To earn a Certificate in Advanced Core Science Studies, students must complete the following courses and additional requirements.

Required Courses

The Certificate consists of a set of core course requirements and additional courses in one of 3 tracks based on the anticipated career path.

Track 1: For students interested in pursuing a career as an MD, DO, PharmD, DPM, or OD (26 Total Credit Hours)

Track 2: For students interested in pursuing a career as a DMD or DDS (27 Total Credit Hours)

Track 3: For students interested in pursuing a career as a PA (28 Total Credit Hours)

Residency Requirements: All coursework for the certificate must be completed at Temple while enrolled in the 10-month Post Baccalaureate Pre-Health Program in the College of Science and Technology.

Core Courses

Code	Title	Credit Hours
ACMS 4004	Fundamentals of Physiology for Pre-Health Postbaccalaureates	4
BIOL 4201	The Practice of Health Care: Competencies and Current Topics	1

BIOL 4218	Principles of Medical Genetics for Pre-Health Postbaccalaureates	4
BIOL 4233	Human Anatomy for Pre-Health Postbaccalaureates	4
BIOL 4275	Fundamentals of Medical Biochemistry for Pre-Health Postbaccalaureates	4
CHEM 1055	Introduction to Problem Solving and Logical Thinking for Pre-Health Postbaccalaureates	1
Total Credit Hours		18

Track Courses

Track 1: Additional Courses

Students interested in pursuing a career as an MD, DO, PharmD, DPM, or OD should complete the following courses:

Code	Title	Credit Hours
ACMS 4006	Cellular and Molecular Basis of Immunology and Microbiology for Pre-Health Postbaccalaureates	4
BIOL 4268	Fundamentals of Cell and Cancer Biology for Pre-Health Postbaccalaureates	4
Total Credit Hours		8

Track 2: Additional Courses

Students interested in pursuing a career as a DMD or DDS should complete the following courses:

Code	Title	Credit Hours
ACMS 4006	Cellular and Molecular Basis of Immunology and Microbiology for Pre-Health Postbaccalaureates	4
BIOL 4268	Fundamentals of Cell and Cancer Biology for Pre-Health Postbaccalaureates	4
CHEM 1005	Practice and Development of Spatial Visualization Skills	1
Total Credit Hours		9

Track 3: Additional Courses

Students interested in pursuing a career as a PA should complete the following courses:

Code	Title	Credit Hours
ACMS 4005	Fundamentals of Physiology Lab for Pre-Health Postbaccalaureates	1
BIOL 1004	Medical Terminology for Pre-Health Postbaccalaureates	1
BIOL 2001	Clinical Microbiology	4
BIOL 4234	Human Anatomy Lab for Pre-Health Postbaccalaureates	1
MATH 1013	Elements of Statistics	3
Total Credit Hours		10

Additional Requirements

1. Attend the appropriate standardized test preparatory course(s).
2. Participate in clinical enhancement and/or volunteer opportunities.
3. Attend mandatory advising sessions.

Applied Mathematics BS

Overview

The **Bachelor of Science in Applied Mathematics**, offered by the Department of Mathematics, focuses on mathematical and computational methods applicable in the sciences, engineering and industry. In particular, this degree is suitable preparation for professions featuring sophisticated mathematical modeling and/or scientific computing. This degree is also suitable preparation for graduate study in applied mathematics or related disciplines.

Campus Location: Main

Program Code: ST-APMA-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.25 cumulative GPA;
- achieve a minimum 3.50 GPA in the Mathematics courses required for the major;
- successful completion of MATH 3098 instead of MATH 3096; and
- achieve a minimum 3.50 GPA in the following courses:
 - MATH 3098
 - MATH 3141
 - MATH 3142
 - MATH 4051
 - Any additional courses from the following:
 - MATH 3043
 - MATH 3044
 - MATH 3101
 - Any 4000-level course other than Individual Study.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
MATH 3096	Introduction to Modern Algebra	3
MATH 3098	Modern Algebra	3
MATH 4096	Senior Problem Solving	3
SCTC 2396	Writing for Science and Technology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).

- A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (71-73 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 8 Math courses must be completed at Temple.

Code	Title	Credit Hours
Computer Programming courses		
MATH 1033	Computing in MATLAB	1.5
MATH 1034	Applications in MATLAB	1.5
Mathematics courses		
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4
MATH 1042 or MATH 1942	Calculus II Honors Calculus II	4
MATH 2043 or MATH 2943	Calculus III Honors Calculus III	4
MATH 2045	Differential Equations with Linear Algebra	4
MATH 2111	Basic Concepts of Math	3
MATH 2121	Mathematical Modeling and Simulation	3
MATH 3031	Probability Theory I	3
MATH 3043	Numerical Analysis I (F)	4
MATH 3044	Numerical Analysis II (S)	3

Astrophysics Certificate

Overview

Student interest in astrophysical phenomenon has always been strong, and is on the rise with recent developments, such as the James Webb Space Telescope, NASA's Artemis Lunar program, black hole imaging and more. Astrophysics is a burgeoning field that not only captures the public interest, but has implications for terrestrial problems as we observe extreme environments in "nature's laboratory." In the last two decades the Nobel prize in physics has been awarded seven times for astrophysical discoveries. Offered by the Department of Physics, the **Certificate in Astrophysics** has scientific merit, student interest and employment value. The certificate provides students with the opportunity to do bright sky astronomy in a large city and to design and build instruments and analyze resulting data.

This certificate is open to all students.

Campus Location: Main

Program Code: ST-APHY-CERT

Contact Information

Matthew Newby
215-204-2642
matthew.newby@temple.edu

Certificate Requirements

All courses listed below have prerequisites. For more information, please check the course descriptions or ask an advisor.

Students desiring a certificate in Astrophysics are required to satisfy the following:

Code	Title	Credit Hours
Select one of the following:		4
PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I	
Select one of the following:		4
PHYS 1062	Elementary Classical Physics II	
PHYS 1962	Honors Elementary Classical Physics II	
PHYS 2022	General Physics II	
PHYS 2922	Honors General Physics II	
PHYS 2796	Introduction to Modern Physics ¹	4
PHYS 3424	Introduction to Astrophysics	3
Select one of the following:		2-4
PHYS 1004	Introduction to Astronomy	
PHYS 1454	Observational Astronomy Through Design	
PHYS 4091	Undergraduate Research	
Total Credit Hours		17-19

1

PHYS 2796 has a concurrent prerequisite of MATH 2043 or MATH 2943.

Astrophysics Minor

Overview

Student interest in astrophysical phenomenon has always been strong, and is on the rise with recent developments, such as the James Webb Space Telescope, NASA's Artemis Lunar program, black hole imaging and more. Astrophysics is a burgeoning field that not only captures the public interest, but has implications for terrestrial problems as we observe extreme environments in "nature's laboratory." In the last two decades the Nobel prize in physics has been awarded seven times for astrophysical discoveries. Offered by the Department of Physics, the **Minor in Astrophysics** has scientific merit, student interest and employment value. The certificate provides students with the opportunity to do bright sky astronomy in a large city and to design and build instruments and analyze resulting data.

This certificate is open to all students.

PHYS 2922	Honors General Physics II	
PHYS 2796	Introduction to Modern Physics ¹	4
PHYS 3424	Introduction to Astrophysics	3
Select two of the following:		5-7
PHYS 1004	Introduction to Astronomy	
PHYS 1454	Observational Astronomy Through Design	
PHYS 4091	Undergraduate Research	
Total Credit Hours		20-22

1

PHYS 2796 has a concurrent prerequisite of MATH 2043 or MATH 2943.

Basic Core Science Studies Postbaccalaureate Certificate

Overview

The **Postbaccalaureate Certificate in Basic Core Science Studies** is a postbaccalaureate program for students not enrolled in an undergraduate major who are planning to apply to medical, dental, podiatry, physician assistant, physical therapy or pharmacy school.

The curriculum is designed to prepare students for standardized tests and coursework in health professional school, with small, primarily postbaccalaureate exclusive classes, individual and group academic support sessions and test prep, and full application support including personalized advising, committee letters and mock interviews.

For more information about the program, please visit: <https://postbac.cst.temple.edu/>.

Program Code: ST-BCSS-CRPB

Learn more about the postbaccalaureate certificate in Basic Core Science Studies.

Certificate Requirements

To earn a Certificate in Basic Core Science Studies, students must complete the following required courses and additional requirements.

Required Courses

The Certificate consists of a set of core course requirements and additional courses in one of 3 tracks based on the anticipated career path.

Track 1: For students interested in pursuing a career as an MD, DO, PharmD, DPM, or OD (37 Total Credit Hours)

Track 2: For students interested in pursuing a career as a DMD or DDS (38 Total Credit Hours)

Track 3: For students interested in pursuing a career as a PA (39 Total Credit Hours)

Residency Requirements: All coursework for the certificate must be completed at Temple while enrolled in the 12-month Post Baccalaureate Pre-Health Program in the College of Science and Technology.

Core Courses

Code	Title	Credit Hours
BCMS 4003	Fundamentals of Biochemistry for Pre-Health Postbaccalaureates	4
CHEM 1051 & CHEM 1053	General Chemistry I for Pre-Health Postbaccalaureates and General Chemistry I Lab for Pre-Health Postbaccalaureates	4
CHEM 1052 & CHEM 1054	General Chemistry II for Pre-Health Postbaccalaureates and General Chemistry II Lab for Pre-Health Postbaccalaureates	4
CHEM 2251 & CHEM 2253	Organic Chemistry for Pre-Health Postbaccalaureates and Organic Chemistry Lab for Pre-Health Postbaccalaureates	7
Total Credit Hours		19

Track Courses

Track 1: Additional Courses

Students interested in pursuing a career as an MD, DO, PharmD, DPM, or OD should complete the following courses:

Code	Title	Credit Hours
BIOL 2212	Introduction to Biology I for Pre-Health Postbaccalaureates	4
BIOL 2211	Introduction to Biology II for Pre-Health Postbaccalaureates	4
BIOL 4201	The Practice of Health Care: Competencies and Current Topics	1
CHEM 1055	Introduction to Problem Solving and Logical Thinking for Pre-Health Postbaccalaureates	1
PHYS 1031	Physics I for Pre-Health Postbaccalaureates	4
PHYS 1032	Physics II for Pre-Health Postbaccalaureates	4
Total Credit Hours		18

Track 2: Additional Courses

Students interested in pursuing a career as a DMD or DDS should complete the following courses:

Code	Title	Credit Hours
BIOL 2212	Introduction to Biology I for Pre-Health Postbaccalaureates	4
BIOL 2211	Introduction to Biology II for Pre-Health Postbaccalaureates	4
BIOL 4201	The Practice of Health Care: Competencies and Current Topics	1
PHYS 1031	Physics I for Pre-Health Postbaccalaureates	4
PHYS 1032	Physics II for Pre-Health Postbaccalaureates	4
CHEM 1005	Practice and Development of Spatial Visualization Skills	1

CHEM 1055	Introduction to Problem Solving and Logical Thinking for Pre-Health Postbaccalaureates	1
Total Credit Hours		19

Track 3: Additional Courses

Students interested in pursuing a career as a PA should complete the following courses:¹

Code	Title	Credit Hours
ACMS 4004	Fundamentals of Physiology for Pre-Health Postbaccalaureates	4
ACMS 4005	Fundamentals of Physiology Lab for Pre-Health Postbaccalaureates	1
BIOL 1004	Medical Terminology for Pre-Health Postbaccalaureates	1
BIOL 2001	Clinical Microbiology	4
BIOL 4201	The Practice of Health Care: Competencies and Current Topics	1
BIOL 4233	Human Anatomy for Pre-Health Postbaccalaureates	4
BIOL 4234	Human Anatomy Lab for Pre-Health Postbaccalaureates	1
CHEM 1055	Introduction to Problem Solving and Logical Thinking for Pre-Health Postbaccalaureates	1
MATH 1013	Elements of Statistics	3
Total Credit Hours		20

1

Students interested in Track 3 (career as a PA) have already taken Biology I and II before entering the program.

Additional Requirements

1. Attend the appropriate standardized test preparatory course(s).
2. Participate in clinical enhancement and/or volunteer opportunities.
3. Attend mandatory advising sessions.

Biochemistry BS

Overview

The Department of Chemistry is one of the oldest departments in the university and has a long record of preparing students for careers in science. Since a significant portion of America's chemical industry is centered in the Philadelphia region, there is a wide range of career opportunities locally available. Although most of our students have gone on to medicine, dentistry or the chemical industry, recent graduates have also gone on to careers in law, forensics and even art restoration.

The **Bachelor of Science in Biochemistry** prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological or pharmaceutical industries. Students learn a wide array of topics in biology, chemistry, mathematics and physics. In upper-division studies, Biochemistry majors learn to apply biochemical principles to real-life situations via problem-based approaches in their courses. Laboratory courses give students the tools they will need as biochemists to pursue research. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

Campus Location: Main

Program Code: ST-BIOC-BS

Distinction in Major

To graduate with distinction in this major, a student must achieve a minimum 3.33 GPA in all the Biology and Chemistry courses required for the major.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Biochemistry.

- BS in Biochemistry / PSM in Bioinformatics and Biological Data Science
- BS in Biochemistry / PSM in Bioinnovation
- BS in Biochemistry / PSM in Biotechnology
- BS in Biochemistry / PSM in Forensic Chemistry

Learn more about the Bachelor of Science in Biochemistry.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
 - Students must complete all University requirements including those listed below.
 - All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
CHEM 4196	Techniques of Chemical Measurement II	5
CHEM 4496	Research Techniques in Biochemistry	4

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (79-83 s.h.)

At least 10 courses required for the major must be completed at Temple. At least 4 Biology and 4 Chemistry courses must be completed at Temple.

Code	Title	Credit Hours
Chemistry		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one of the following:		4

PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I (F)	
Select one of the following:		4
PHYS 1062	Elementary Classical Physics II	
PHYS 1962	Honors Elementary Classical Physics II (S)	
PHYS 2022	General Physics II	
PHYS 2922	Honors General Physics II (S)	
Total Credit Hours		79-83

Code	Title	Credit Hours
(F) - Fall only course		
(S) - Spring only course		

1

This course has a co-requisite of BIOL 2207.

2

A minimum of 6 credits of these research courses, in any combination, may be used to fulfill one of the Biochemistry Electives.

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. Most research and Independent Study courses are not available for major credit, such as:

Code	Title	Credit Hours
BIOL 3091	Research Methods	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1-4
BIOL 4591	Research in Neuroscience	1 to 4

Suggested Academic Plan

All prospective majors should schedule an appointment with one of the departmental advisors (names of current faculty advisors are available in the Overview section) to plan a program of study. The recommended order of courses for the major is listed below; a different order is acceptable as long as the student adheres to prerequisite requirements.

Bachelor of Science in Biochemistry

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
SCTC 1001	CST First Year Seminar	1
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Elective		2
Credit Hours		15
Spring		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	4
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	4
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
Credit Hours		15
Year 2		
Fall		
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes or Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology or Honors Introduction to Cellular and Molecular Biology	
Select one of the following:		4
CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2211 & CHEM 2213	Organic Chemistry for Majors I and Organic Majors Laboratory I (F)	
CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	
Select one of the following:		4
PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I (F)	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I (F)	
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
Credit Hours		15
Spring		
BIOL 2207	Genetics (S)	3

BIOL 2297	Research Techniques in Genetics (S)	3
Select one of the following:		4
CHEM 2202 & CHEM 2204	Organic Chemistry II and Organic Chemistry Laboratory II	
CHEM 2212 & CHEM 2214	Organic Chemistry for Majors II and Organic Majors Laboratory II (S)	
CHEM 2922 & CHEM 2924	Organic Chemistry for Honors II and Organic Honors Laboratory II (S)	
Select one of the following:		4
PHYS 1062	Elementary Classical Physics II	
PHYS 1962	Honors Elementary Classical Physics II (S)	
PHYS 2022	General Physics II	
PHYS 2922	Honors General Physics II (S)	
Elective		2
Credit Hours		16
Year 3		
Fall		
BIOL 3204	Cell Structure and Function (F)	4
CHEM 3103	Techniques of Chemical Measurement I ¹	3
CHEM 3105	Introduction to Chemical Research Techniques ¹	1
Biochemistry Elective ²		3-4
GenEd Breadth Course		4-3
Credit Hours		15
Spring		
CHEM 3405	Physical Chemistry of Biomolecules ²	3
CHEM 4401	Biochemistry I	3
GenEd Breadth Course		3-4
GenEd Breadth Course		3
Elective		3-2
Credit Hours		15
Year 4		
Fall		
BIOL 4376	General Biochemistry II (F)	3
Biochemistry Elective ²		3-4
Biochemistry Elective ²		3-5
GenEd Breadth Course		3
Elective		4-1
Credit Hours		16
Spring		
CHEM 4496	Research Techniques in Biochemistry	4
BIOL 3324	Molecular Biology	3
GenEd Breadth Course		3
Elective		6
Credit Hours		16
Total Credit Hours		123

1

It is strongly encouraged that CHEM 3103/CHEM 3105 be taken prior to any laboratory courses numbered above CHEM 3105.

2

Biochemistry majors who want to take CHEM 4196 as a Biochemistry elective **must** take the CHEM 3301-CHEM 3302 sequence as CHEM 3405 does not serve as a prerequisite for these courses or any other course that has CHEM 3301 as a prerequisite or co-requisite.

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

Biochemistry Electives

Code	Title	Credit Hours
------	-------	--------------

Select three of the following:

9-13

BIOL 3113	Genome Analytics	
BIOL 3128	Genomics and Infectious Disease Dynamics (F)

A minimum of 6 credits of these research courses, in any combination, may be used to fulfill one of the Biochemistry Electives.

Biology BA

Overview

Biology spans a continuum of organization from molecules and cells to individuals and ecosystems. The Department of Biology offers programs designed to give students a broad base, while allowing a measure of sub-field specialization. All Biology majors are required to take a two-semester series of "Introduction to Biology" classes, plus a course in Genetics. In addition, students have the choice of Cell Biology, Biochemistry, or Molecular Biology, and Ecology or Evolution as part of their core program requirements, followed by upper-level electives.

The **Bachelor of Arts in Biology**, which also provides the essential background for professional schools, is appropriate for those who are planning for careers in fields where a science background with additional breadth is advantageous.

Campus Location: Main

Program Code: ST-BIOL-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.2 cumulative GPA;
- achieve a minimum 3.2 major GPA;
- successfully complete BIOL 4391 Accelerated Research in Biology or BIOL 4291 Extradepartmental Research for a total of 6 credits over two semesters;
- write a final research paper; and
- present their research at a departmental research poster session.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Biology.

- BA in Biology / MEd in Middle Grades Education with a Concentration in Science
- BA in Biology / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BA or BS in Biology / PSM in Scientific Writing
- BA or BS in Biology / PSM in Bioinformatics and Biological Data Science
- BA or BS in Biology / PSM in Bioinnovation
- BA or BS in Biology / PSM in Biotechnology
- Dental 3+4 Program (p. 1438)
- Medical 3+4 Program (p. 1443)
- Pharmacy 3+4 Program (p. 1444)
- Physical Therapy 3+3 Program (p. 1445)
- Podiatry 3+4 Program (p. 1447)

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (64-68 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 4 Biology courses must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes	4

PHYS 2021 or PHYS 2921	General Physics I Honors General Physics I	
Select one of the following:		4
PHYS 1022	Introduction to General Physics II	
PHYS 1062 or PHYS 1962	Elementary Classical Physics II Honors Elementary Classical Physics II	
PHYS 2022 or PHYS 2922	General Physics II Honors General Physics II	

Total Credit Hours**64-68**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

2

Only one of these courses need be selected to meet the requirement of the major. If additional courses from this group are taken they may be used to fulfill the requirement for upper-level electives.

3

See course descriptions for exceptions.

4

At least one upper-level biology elective must be writing-intensive.

The research and independent study courses shown below do not count as Biology electives, but they may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

A total of up to 3 credits of Biology research courses numbered lower than 4000 (to include: BIOL 2082, BIOL 3082, BIOL 3181, BIOL 3281, and BIOL 3681) may be taken for a letter grade. Any additional credits in research courses in this category can be taken only on a CR/NC basis.

Suggested Academic Plan

Bachelor of Arts in Biology

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	4

Code	Title	Credit Hours

(F) - Fall only course

(S) - Spring only course

1

This program requires only one of the following courses: BIOL 3204, BIOL 3324 or BIOL 4375. Note that due to prerequisite requirements BIOL 3324 and BIOL 4375 are shown in the next term of the suggested academic plan. If BIOL 3204 is completed it is not necessary to take BIOL 3324 or BIOL 4375 as the program only requires one of these three courses. If taken in addition to BIOL 3204 these courses can be used to fulfill the upper-level biology electives (numbered 2200 and above) required by the program.

2

See course descriptions for exceptions. If the student has taken the necessary prerequisite courses, some of the Biology elective courses may be taken before the Spring semester of Year 3.

3

Select an upper-level biology elective (numbered 2200 and above). At least one of the electives must be a writing-intensive (WI) course.

Biology BS

Overview

Biology spans a continuum of organization from molecules and cells to individuals and ecosystems. The Department of Biology offers programs designed to give students a broad base, while allowing a measure of sub-field specialization. All Biology majors are required to take a two-semester series of "Introduction to Biology" classes, plus a course in Genetics. In addition, students have the choice of Cell Biology, Biochemistry, or Molecular Biology, and Ecology or Evolution as part of their core program requirements, followed by upper-level electives.

The **Bachelor of Science in Biology** provides a strong preparation for those wishing to attend professional or graduate school in biology or related disciplines such as cell or molecular biology, ecology, bioinformatics, biochemistry, biophysics, medicine, pharmacy, dentistry and allied health fields. It is also recommended for those who intend to enter the scientific workforce upon completion of a bachelor's degree.

Campus Location: Main

Program Code: ST-BIOL-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.2 cumulative GPA;
- achieve a minimum 3.2 major GPA;
- successfully complete BIOL 4391 Accelerated Research in Biology or BIOL 4291 Extradepartmental Research for a total of 6 credits over two semesters;
- write a final research paper; and
- present their research at a departmental research poster session.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Biology.

- BS in Biology / MEd in Middle Grades Education with a Concentration in Science
- BS in Biology / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BA or BS in Biology / PSM in Scientific Writing
- BA or BS in Biology / PSM in Bioinformatics and Biological Data Science
- BA or BS in Biology / PSM in Bioinnovation
- BA or BS in Biology / PSM in Biotechnology

Learn more about the Bachelor of Science in Biology.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (73-80 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 6 Biology courses must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4

PHYS 1061 or PHYS 1961	Elementary Classical Physics I Honors Elementary Classical Physics I
PHYS 2021 or PHYS 2921	General Physics I Honors General Physics I

Select one of the following: 4

PHYS 1022	Introduction to General Physics II
PHYS 1062 or PHYS 1962	Elementary Classical Physics II Honors Elementary Classical Physics II
PHYS 2022 or PHYS 2922	General Physics II Honors General Physics II

Total Credit Hours 73-80

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

2

Only one of these courses need be selected to meet the requirement of the major. If additional courses from this group are taken they may be used to fulfill the requirement for upper-level electives.

3

Up to two (2) Biology Electives (6-8 s.h.) may be replaced by Cognate electives selected from the following (B.S. degree only): ANTH 2764; CHEM 3301, CHEM 3302; MATH 1042/MATH 1942; or MATH 2043/MATH 2943 (but only one of these math courses, and MATH 1042/MATH 1942 may only count if MATH 1044 is used to satisfy the second math course requirement in the major); PHYS 2511 and PHYS 3511, PHYS 4301; STAT 5002 (if substituted for BIOL 3312; students are not allowed to use both BIOL 3312 and STAT 5002 as upper-level electives).

4

Students may fulfill one upper-level elective by completing a total of 6 credits of research. A maximum of 3 credits may come from the junior level research course BIOL 3082 and the remaining 3 credits must come from a senior level (**4000+**) research course. Students may also complete all 6 credits using two semesters of the senior research course if they prefer. Consult with your departmental advisor to determine which course(s) are appropriate. Once completed, students must seek approval from a CST advisor to obtain the waiver for credit towards one upper-level elective.

5

At least one upper-level biology elective must be writing intensive.

With the exception in footnote 4 above, the research and independent study courses shown below do not count as Biology electives, but they may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

A total of up to 3 credits of Biology research courses numbered lower than 4000 (to include: BIOL 2082, BIOL 3082, BIOL 3181, BIOL 3281, and BIOL 3681) may be taken for a letter grade. Any additional credits in research courses in this category can be taken only on a CR/NC basis.

(F) - Fall only course

(S) - Spring only course

1

This program requires only one of the following courses: BIOL 3204, BIOL 3324 or BIOL 4375. Note that due to prerequisite requirements, BIOL 3324 and BIOL 4375 are shown in the next term of the suggested academic plan. If BIOL 3204 is completed it is not necessary to take BIOL 3324 or BIOL 4375 as the program only requires one of these three courses. If taken in addition to BIOL 3204 these courses can be used to fulfill the upper-level biology electives (numbered 2200 and above) required by the program.

2

If the student has taken the necessary prerequisite courses, some of the Biology or Cognate elective courses may be taken before the Spring semester of Year 3.

3

Select an upper-level biology elective (numbered 2200 and above). At least one of the electives must be a writing-intensive (WI) course.

Biology Minor

Overview

Offered by the Department of Biology, the **Minor in Biology** is meant for students who wish to enhance their knowledge of the life sciences. After completion of the introductory courses, students may choose upper level courses in their particular area of interest.

Campus Location: Main

Minor Requirements

Students interested in acquiring basic knowledge in biology but not wishing to major in the subject may pursue a minor by successful completion of the following courses:

Code	Title	Credit Hours
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology Honors Introduction to Cellular and Molecular Biology	
Three additional upper-level Biology electives numbered 2200 or higher (see course descriptions for exceptions); at least one of these electives must have a laboratory component		10
Total Credit Hours		18

Note: Grades of C- or higher are required unless otherwise specified in all courses for the minor, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate. Please consult a Biology departmental advisor when choosing the three additional courses to ensure that prerequisites have been satisfied.

A minimum of 18 credits in Biology is required for the minor.

Residency Requirements: At least 3 Biology courses required for the minor must be completed at Temple.

Biology with Teaching BS

Overview

Biology spans a continuum of organization from molecules and cells to individuals and ecosystems. The Department of Biology offers programs designed to give students a broad base, while allowing a measure of sub-field specialization. All Biology majors are required to take a two-semester series of "Introduction to Biology" classes, plus a course in Genetics. In addition, students have the choice of Cell Biology, Biochemistry, or Molecular Biology, and Ecology or Evolution as part of their core program requirements, followed by upper-level electives.

The **Bachelor of Science in Biology with Teaching** is part of Temple's innovative "TUteach" secondary education teacher-training program. The BS in Biology with Teaching provides broad training in Biology and prepares students for a career in secondary school teaching, further graduate study or an entry level position as a biologist. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Biology with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-BITC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA;
- achieve a minimum 3.2 GPA in all Biology courses;
- achieve a minimum 3.9 GPA in the following courses:
 - SCES 2189 or SCTC 3485
 - SCES 4189 or SCTC 4485
 - EDUC 4802
 - EDUC 4388
- write a final research paper either in a topic combining both major content and pedagogy or a topic focused on research in Biology; and
- present at a departmental research poster session.

Undergraduate Contact Information

Susan Varnum, Program Director and Professor of Chemistry
 Senior Associate Dean for Undergraduate Affairs and Science Education
 College of Science and Technology
 Gladfelter Hall, Room 629
 215-204-6390 or 215-204-4073
 susan.varnum@temple.edu

George Mehler, Master Teacher/Faculty Advisor (Science Education) and Assistant Professor of Practice
 College of Science and Technology

Gladfelter Hall, Room 644
215-204-4074
george.mehler@temple.edu

Kenneth Ruff, TUTEACH Faculty Advisor, Academic Programs Director, and Assistant Professor of Practice
College of Science and Technology
Gladfelter Hall, Room 656
215-204-3628
kruff@temple.edu

Robert Sanders, Chair
Biology-Life Sciences Building, Room 255
215-204-8851

Erik Cordes, Vice Chair
Biology-Life Sciences Building, Room 447
215-204-4067
erik.cordes@temple.edu

Angela Bricker, Faculty Advisor for Biology Majors - junior and senior
Biology-Life Sciences Building, Room 248C
215-204-8578
abricker@temple.edu

Jay Lunden, Faculty Advisor for Biology Majors - first and second year
Biology-Life Sciences Building, Room 248M
215-204-8524
jlunden@temple.edu

Evelyn Vleck, Faculty Advisor for Biology Majors - transfer students
Biology-Life Sciences Building, Room 333
215-204-8842
evleck@temple.edu

Learn more about the Bachelor of Science in Biology with Teaching.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TUTEACH majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).

- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (95-99 s.h.)¹

At least 9 courses required for the major must be completed at Temple. At least 5 Biology courses and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology Honors Introduction to Cellular and Molecular Biology	
BIOL 2207	Genetics (S)	3
BIOL 2297	Research Techniques in Genetics (WI, S) ²	3
Select one of the following:		3
BIOL 2227	Principles of Ecology	
BIOL 3101	Evolution (F)	
BIOL 3091	Research Methods (S)	3
Select one of the following:		3-4
BIOL 3324	Molecular Biology	
BIOL 3204	Cell Structure and Function (F)	
BIOL 4375	General Biochemistry I	
Three upper level Biology electives at the 2200 level or above ³		9-12
Chemistry		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
Select one of the following:		4
CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	
Select one of the following:		4
CHEM 2202 & CHEM 2204	Organic Chemistry II and Organic Chemistry Laboratory II	
CHEM 2922 & CHEM 2924	Organic Chemistry for Honors II and Organic Honors Laboratory II (S)	
Mathematics		
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4
Select one of the following:		4

MATH 1042 or MATH 1942	Calculus II Honors Calculus II	
MATH 1044	Introduction to Probability and Statistics for the Life Sciences	
Physics		
Select one of the following:		4
PHYS 1021	Introduction to General Physics I	
PHYS 1061 or PHYS 1961	Elementary Classical Physics I Honors Elementary Classical Physics I	
PHYS 2021 or PHYS 2921	General Physics I Honors General Physics I	
Select one of the following:		4
PHYS 1022	Introduction to General Physics II	
PHYS 1062 or PHYS 1962	Elementary Classical Physics II Honors Elementary Classical Physics II	
PHYS 2022 or PHYS 2922	General Physics II Honors General Physics II	
College of Science and Technology		
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
SCTC 1389	Step 1 and 2: Inquiry-Based Lesson Design in Science and Mathematics Modified for English Learners	2
SCTC 3001	History of Science	3
SCTC 3312	Coding STEM Lessons ⁴	1
Education		
EDUC 2179	Knowing and Learning in Mathematics and Science	3
EDUC 4388	TUteach Apprentice Teaching	4
EDUC 4802	TUteach Apprentice Teaching Seminar	3
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3
MGSE 2189 or SCTC 3485	Classroom Interactions (S) Science and Mathematics in the Classroom	3
MGSE 4189 or SCTC 4485	Project-Based Instruction (F) Integrating STEM Practice in Diverse Teaching Environments	3
SPED 2231	Introduction to Special Education	3
Total Credit Hours		95-99
