CHEM 3405 is a lecture/recitation based survey course that covers those aspects of physical chemistry of use to biochemists in understanding the physical properties of biologically significant molecules and structures. Topics to be covered include thermodynamics, colligative properties of matter, electrolytes, enzyme kinetics, quantum theory, and spectroscopy. Note: Not for Chemistry majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 or MATH 1942), (PHYS 1062 (may be taken concurrently), PHYS 1962 (may be taken concurrently), PHYS 2022 (may be taken concurrently), or PHYS 2922 (may be taken concurrently)), and CHEM 4401 (may be taken concurrently)

CHEM 3881. Cooperative Research. 2 to 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

Independent study and research at Temple University outside of the Chemistry Department or at an off-campus laboratory facility under joint supervision of a member of the Temple Chemistry faculty and a Research Mentor at the laboratory facility. The class also meets one hour per week with the Undergraduate Research Coordinator to discuss report writing, searching the scientific literature, and proper research scholarship. Open to junior and senior chemistry and biochemistry majors, others with departmental approval. Credit may be offered for research during full-time off-campus employment. A final written report will be evaluated and endorsed by the research mentor and forwarded to the Department's Undergraduate Research Coordinator for final grade assignment. Students are responsible for arranging their programs and submitting reports with sufficient lead-time that registration and grading can be accomplished normally. NOTE: For further information and details, contact the Undergraduate Research Coordinator. CHEM 3881 can count as 1 of the 3 advanced laboratory courses required for the degree to be certified by the American Chemical Society. It will fulfill an Advanced Science elective for the Chemistry B.A. or B.S. degree. It will not fulfill an Advanced Chemistry elective for either Chemistry degree. Biochemistry majors may use CHEM 3881 as the first of two research courses towards satisfying one Biochemistry major elective.

Repeatability: This course may not be repeated for additional credits.

CHEM 3891. Undergraduate Research. 2 to 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

Independent study and research under the supervision of a member of the Chemistry faculty. The class also meets one hour per week with the Undergraduate Research Coordinator to discuss report writing, searching the scientific literature, and proper research scholarship. Open to junior and senior chemistry and biochemistry majors, others with permission of the department. A final written report will be evaluated by the faculty mentor and forwarded to the Department's Undergraduate Research Coordinator for final grade assignment. Students are responsible for arranging their program and submitting reports with sufficient lead-time that registration and grading can be accomplished normally. NOTE: For further information and details, contact the Undergraduate Research Coordinator. CHEM 3891 can count as 1 of the 3 advanced laboratory courses required for the degree to be certified by the American Chemical Society. It will fulfill an Advanced Science elective for the Chemistry B.A. or B.S. degree. It will not fulfill an Advanced Chemistry elective for the Chemistry B.A. or B.S. degree. Biochemistry majors may use CHEM 3891 as the first of two research courses towards satisfying one Biochemistry major elective.

Repeatability: This course may not be repeated for additional credits.

CHEM 4002. Advanced Inorganic Chemistry. 3 Credit Hours.

This course is not offered every year.

Group theory and its applications to chemical systems. Molecular orbital theory and spectroscopy. Descriptive chemistry of transition metal and organometallic compounds. Mode: Three hours lecture and one hour recitation per week.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 3001 or CHEM 4001) and (CHEM 3301 or CHEM 3302)

CHEM 4003. Inorganic Synthesis. 4 Credit Hours.

This course is typically offered in Fall and Spring.

Introduction to preparative techniques and spectroscopic techniques used in contemporary inorganic chemistry. NOTE: This course can count as one of the three advanced laboratory courses required for the degree to be certified by the American Chemical Society. Mode: One hour lecture and six hours laboratory per week.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 3001 or CHEM 4001) and (CHEM 3301 or CHEM 3302)

CHEM 4004. Crystallography and Diffraction. 4 Credit Hours.

This course is typically offered in Spring.

Students will learn the theory and practice of crystal structure determination by the method of single-crystal X-ray diffraction. Students will become independently competent in each stage of the crystal structure data collection, solution, and refinement processes, and will understand the theory behind each stage, as well as how to overcome common pitfalls. NOTE: This course can count as one of the three advanced laboratory courses required for the degree to be certified by the American Chemical Society. Mode: Three hours lecture and three hours laboratory per week.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 or CHEM 1951) and (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922)

CHEM 4103. Instrumental Design. 4 Credit Hours.

This course is typically offered in Fall.

This course covers method development for the analysis of complex organic mixtures. The analytical techniques detailed are High Performance Liquid Chromatography (HPLC), Gas Liquid Chromatography (GLC), and other appropriate chromatographic methodologies. NOTE: This course can count as one of the three advanced laboratory courses required for the degree to be accredited by the American Chemical Society.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3103, CHEM 3105, and CHEM 4196 (may be taken concurrently)

CHEM 4107. Drug Analysis. 4 Credit Hours.

This course is not offered every year.

Analytical techniques with specific applications to drug substances.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3103, CHEM 3105, CHEM 3301, and CHEM 4196.

CHEM 4108. Investigative Chemistry. 4 Credit Hours.

This course is typically offered in Spring.

This course will challenge students to perform chemical analyses on a variety of samples that may be considered as evidence. Students will be instructed in methodology and method validation. An understanding of data statistics and representation of data through use of spreadsheets will be emphasized. This course will introduce students to modern chemical instrumentation and techniques as applied to forensic issues.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3103, CHEM 3105, and CHEM 4196.

CHEM 4196. Techniques of Chemical Measurement II. 5 Credit Hours.

This course is typically offered in Fall and Spring.

This course provides an introduction to modern applications of chromatography and spectroscopy. Laboratory assignments involve quantitative and qualitative analyses of inorganic and organic molecules. Instrumentation design, operating principles, and theory will be presented as they apply to uv-vis, nmr, fluorescence, epr, aa, ae, gc, gc-ms, gpc, and hplc. NOTE: Capstone writing course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3103, CHEM 3105, (CHEM 3301 or CHEM 3302), and (CHEM 3301 (may be taken concurrently) or CHEM 3302 (may be taken concurrently))

CHEM 4201. Organic Structure and Mechanisms. 3 Credit Hours.

This course is typically offered in Fall.

A problem-oriented course in organic structure, stereochemistry, and reaction mechanisms. Introduction to efficient retrieval of information from the organochemical literature. Simple molecular orbital and HOMO/LUMO theory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2202, CHEM 2212, or CHEM 2922)

CHEM 4202. Organic Synthesis Methodology. 3 Credit Hours.

This course is typically offered in Spring.

Modern approaches to efficiently designed multi-step syntheses of important compounds. Retrosynthetic analysis, synthons, chiron, and protecting groups. Evaluation and appreciation of landmark achievements in the field.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2202, CHEM 2212, or CHEM 2922)

CHEM 4207. Synthesis and Identification of Organic and Medicinal Compounds. 4 Credit Hours.

This course is typically offered in the Spring.

This course emphasizes the preparation of organic and medicinal compounds using modern chemical methods. Literature sources and spectroscopic methods are extensively used. Students learn the safe use of air sensitive reagents, the methods for purification, and the design of multistep syntheses. The environmental impact of method choice is addressed throughout the course. NOTE: This course can count toward the American Chemical Society certified BS degree.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2202, CHEM 2212, or CHEM 2922) and (CHEM 2204, CHEM 2214, or CHEM 2924)

CHEM 4301. Advanced Physical Chemistry. 3 Credit Hours.

This course will cover advanced topics in Physical Chemistry. A main focus will be on statistical thermodynamics, which links the microscopic molecular properties of matter and its bulk thermodynamic properties. Other topics to be covered are chemical kinetics, reaction dynamics, and computational chemistry. Prior basic knowledge in Thermodynamics (CHEM 3301) and Quantum Mechanics (CHEM 3302) is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3301 and CHEM 3302.

CHEM 4396. Physical Chemistry Laboratory. 4 Credit Hours.

This course is typically offered in Fall and Spring.

A laboratory study of the fundamental physical and chemical principles involved in molecular spectroscopy, thermodynamics, and chemical kinetics, with particular emphasis on the techniques of physical measurement and the presentation of coherent laboratory reports. NOTE: Capstone writing course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3103, CHEM 3105, (CHEM 3301 or CHEM 3302), and (CHEM 3301 (may be taken concurrently) or CHEM 3302 (may be taken concurrently))

CHEM 4401. Biochemistry I. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Emphasis on structure/function relationships in proteins and nucleic acids. Kinetics and catalytic mechanisms of enzymes. Replication and genetic manipulation of DNA. NOTE: This course is required for the degree to be certified by the American Chemical Society.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2202, CHEM 2212, or CHEM 2922) and CHEM 3103 (may be taken concurrently)

CHEM 4496. Research Techniques in Biochemistry. 4 Credit Hours.

This course will be offered in Fall and Spring.

Laboratory instruction in techniques used to investigate biochemical problems. Techniques include spectrophotometry, various types of electrophoresis, separation of macromolecules, two-dimensional protein separation, affinity chromatography, isolation of plasmid DNA, Western Blot, immunoassay, enzyme kinetics, and radioisotope techniques. Students will be given a small research project. This is a writing intensive course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 4401 or BIOL 4375)

CHEM 4503. Introduction to Polymer Chemistry. 4 Credit Hours.

This course is typically offered in Fall.

Polymers are ubiquitous in many new (scaffolds for tissue engineering, hip replacements) and old (textiles, engineering resins, flocculants) applications, and are often used in composites with inorganic materials. In order to better understand the use and novel developments of polymers, this course will provide the fundamentals of synthesis, polymer structure/property relationships, and characterization methods. There is a laboratory component to the course that will cover molecular weight and phase transition methods.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2202, CHEM 2212, or CHEM 2922) and CHEM 3301.

CHEM 4881. Cooperative Research. 1 to 3 Credit Hour.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

Independent study and research at Temple University outside of the Chemistry Department or at an off-campus laboratory facility under joint supervision of a member of the Temple Chemistry faculty and a Research Mentor at the laboratory facility, to be taken after a minimum grade of C- in CHEM 3881 or CHEM 3891. Open to senior chemistry and biochemistry majors, others with departmental approval. Credit may be offered for research during full-time off-campus employment. A final written report will be evaluated and endorsed by the research mentor and forwarded to the Department's Undergraduate Research Coordinator for final grade assignment. Students are responsible for arranging their programs and submitting reports with lead-time sufficient that registration and grading can be accomplished normally. NOTE: For further information and details, contact the Undergraduate Research Coordinator. CHEM 4881 will not count as an advanced laboratory course required for the degree to be certified by the American Chemical Society and/or as an Advanced Science elective for the Chemistry B.A. or B.S. degree. CHEM 4881 will not fulfill an Advanced Chemistry elective for the Chemistry B.A. or B.S. degree. Biochemistry majors may use CHEM 4881 to satisfy one of the two major course electives.

Repeatability: This course may be repeated for additional credit.

CHEM 4891. Undergraduate Research. 1 to 3 Credit Hour.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

Independent study and research under supervision of a member of the Chemistry faculty, to be taken after a minimum grade of C- in CHEM 3881 or CHEM 3891. Open to senior chemistry and biochemistry majors, others with the permission of the department. A final written report will be evaluated by the faculty mentor and forwarded to the Department's Undergraduate Research Coordinator for final grade assignment. Students are responsible for arranging their program and submitting reports with sufficient lead-time that registration and grading can be accomplished normally. NOTE: For further information and details, contact the Undergraduate Research Coordinator. CHEM 4891 will not count as an advanced laboratory course required for the degree to be certified by the American Chemical Society and/or as an Advanced Science elective for the Chemistry B.A. or B.S. degree. CHEM 4891 will not fulfill an Advanced Chemistry elective for the Chemistry B.A. or B.S. degree. Biochemistry majors may use CHEM 4891 to satisfy one of the two major course electives.

Repeatability: This course may be repeated for additional credit.

Chinese (CHI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CHI 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

CHI 1001. Chinese Elements I. 4 Credit Hours.

First semester level of Mandarin Chinese. Assumes no prior knowledge.

Repeatability: This course may not be repeated for additional credits.

CHI 1002. Chinese Elements II. 4 Credit Hours.

Second semester level of Mandarin Chinese.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 1001.

CHI 2001. Chinese Intermediate I. 3 Credit Hours.

Third semester of Mandarin Chinese.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 1002.

CHI 2002. Chinese Intermediate II. 3 Credit Hours.

Fourth semester of Mandarin Chinese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 2001.

CHI 2011. Pre-Modern Chinese Literature. 3 Credit Hours.

This course provides an interdisciplinary introduction to Chinese literature from its inception to the early 18th century. Some of the course's readings are drawn from works well known in the west like the "Book of Songs," "Zhuangzi," the poems of the Tang poets Wang Wei, Li Bai, Du Fu, and Bai Juyi, and the Song poet Su Shi, and short stories by the dramatist and novelist Li Yu. Other readings include works less well known in the west but long considered central to various literary and performance traditions by many Chinese. This course will present its readings with an emphasis on their cultural and historical contexts. Special attention will be paid to the place they have in various Chinese literary traditions and how these traditions have contributed to both Chinese ways of understanding their own cultural heritage and how they have influenced western understandings of that heritage. Note: This course is cross-listed with Asian Studies 2014. Students may only receive credit for one of these courses: ASST 2014 or CHI 2011.

Repeatability: This course may not be repeated for additional credits.

CHI 2013. Modern and Contemporary Chinese Literature in Translation. 3 Credit Hours.

This course focuses on 20th- and 21st-century literature from China. Among the major themes of the course are socio-political and cultural upheaval and transformation, fiction and nation, and gender, race and class relations. Students will read representative short stories, novels, poetry, and essays. Selected documentaries and feature films will supplement the literary texts. The course will help familiarize students with major writers and with the cultural and historical contexts in which they produced their works. NOTE: Students will earn credit only once for either CHI 2013 or ASST 2013.

Repeatability: This course may not be repeated for additional credits.

CHI 2015. The Chinese Language. 3 Credit Hours.

This course provides a systematic introduction to the sound system and major grammatical structures of Mandarin Chinese. Readings will deal with topics ranging from the sounds of Mandarin and how they are organized into syllables and larger units to how the grammar expresses phenomena like the temporal ordering of actions with respect to each other, an action's duration, or a speaker's attitude towards an event. The course will be conducted in English and all examples will be transcribed into the Latin alphabet using Pinyin and will be provided with detailed English translations.

Repeatability: This course may not be repeated for additional credits.

CHI 2022. Contemporary Chinese Urban Film and Fiction in Translation. 3 Credit Hours.

This course looks at a selection of Chinese cinematic and literary texts by contemporary filmmakers and writers from China, Taiwan, and Hong Kong. Through the study of film and fiction, we will examine how urban spaces and subjects have been delineated and imagined within the context of recent social and economic transformation and globalization. In particular, we will examine the different ways in which cinematic images and narrative structures celebrate the metropolis and convey the anxieties associated with it. We will explore a wide range of urban subjects as represented in film and fiction, and the ways in which they are shaped by and at the same time are shaping society and culture in China, Taiwan, and Hong Kong today. Note: This course is cross-listed with Asian Studies 2022. Students may only receive credit for one of these courses: ASST 2022 or CHI 2022.

Repeatability: This course may not be repeated for additional credits.

CHI 2112. Chinese Literature: From Classical to Contemporary. 3 Credit Hours.

Students taking this course will have the opportunity to learn about China's long literary history by reading, discussing, and analyzing selected novels, short stories, poems, and literary essays. The first half of the semester will focus on work produced from around 1000 B.C.E. through the middle of the 19th century, with the second half covering the modern and contemporary periods. Ancient and classical writers (such as Zhuang Zi, Bai Juyi and Su Dongpo) and modern and contemporary writers (such as Lao She and Mo Yan) will be introduced. Class discussions and assignments will help students become acquainted with current theoretical and methodological approaches in the fields of Chinese. NOTE: Students can earn credit only once for either CHI 2112 or ASST 2112.

Repeatability: This course may not be repeated for additional credits.

CHI 3000. Chinese Special Topics I. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

CHI 3001. Chinese Advanced I. 3 Credit Hours.

Fifth semester of Mandarin Chinese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 2002.

CHI 3002. Chinese Advanced II. 3 Credit Hours.

Sixth semester of Mandarin Chinese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 3001.

CHI 3021. Modern China in Fiction and Film. 3 Credit Hours.

Covering topics such as identity, gender, urban culture, revolution, and dissent, this course will focus on literary and cinematic representations of modern Chinese society. Texts will include novels, novellas, short stories, dramatic films, and documentaries. Knowledge of Chinese is not required. The course will be conducted in English. All readings will be in English translation, and the films and documentaries will be subtitled.

Repeatability: This course may not be repeated for additional credits.

CHI 3031. Women in Chinese Literature. 3 Credit Hours.

This course focuses on women writers and women as characters in premodern, modern, and contemporary Chinese literature. Texts will include poetry, novels, short stories, and drama. Gender, representation, and women's roles in the history of Chinese literature are among the topics that will be covered. Knowledge of Chinese is not required. The class will be conducted in English, and all readings will be in English translation. Note: This course is cross-listed with Asian Studies 3031 and Gender, Sexuality, and Women's Studies 3031. Students may only receive credit once for these courses: ASST 3031, CHI 3031, or GSWS 3031.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CHI 3900. Honors Special Topics. 3 Credit Hours.

Topics vary from semester to semester. Please check with the faculty advisor or course instructor for a description and topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

CHI 4001. Chinese Culture and Civilization. 3 Credit Hours.

Seventh semester of Mandarin Chinese. This course covers topics and themes that are important to an understanding of Chinese culture and civilization. In addition, students will further develop their Chinese language skills in reading, writing, listening, and speaking. The course will be conducted entirely in Chinese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 3002.

CHI 4182. Chinese Independent Study I. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CHI 3002.

CHI 4282. Chinese Independent Study II. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CHI 3002.

CHI 4296. Chinese Composition. 3 Credit Hours.

Eighth semester of Mandarin Chinese. A writing-intensive course. This course focuses on developing advanced skills in writing standard Chinese. Assignments and class discussions will focus on material drawn from contemporary Chinese essays, fiction, and journalism. The course will be conducted entirely in Chinese.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 3002.

CHI 4297. Chinese Capstone Seminar. 3 Credit Hours.

This variable content course will focus closely on selected texts and themes in Chinese literature and/or film. Students will be expected to identify a research topic and formulate a thesis early in the semester, develop the project in stages (aided by collaborative class discussions and seminar presentations), and to submit a 15- to 20-page paper by the end of the semester.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHI 3002.

City and Regional Planning (CTRP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CTRP 0807. People, Places, and Environment. 3 Credit Hours.

Have you ever thought about the relationship people have to their place - home, neighborhood, town, or city? How about to the environment? Have you ever thought about how people have shaped the places of our everyday lives - suburban housing developments, shopping malls, and small towns? And, have you ever thought about what will happen in the future to the Earth's natural resources - the air, water, and land - as we continue to build and expand? Explore these kinds of questions through readings, lectures, video presentations, and group discussions. Challenge your mind - and imagination - and open up new avenues of discovery. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for CTRP 0807 if they have successfully completed CTRP 1007, CRP 1007 or CRP C061.

Course Attributes: GU, SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

CTRP 0821. Digital Mapping: From Mercator to Mashups. 4 Credit Hours.

Almost all of us interact with digital maps regularly for finding directions and the locations of services, like the nearest coffee shop. Yet for most, the inner workings of digital maps remain a mystery. This course provides an in-depth exploration of how digital maps work - what technologies support location tracking, where do the mapped data come from, and how digital maps are used to analyze geographic problems in urban and environmental planning and policy, health, and business. Along the way, you will develop quantitative literacy by learning how to acquire spatial data, make digital maps, and critically evaluate mapping applications. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for CTRP 0821 if they have successfully completed CRP 0821, GUS 0821 or GUS 0921.

Course Attributes: GQ, SI

Repeatability: This course may not be repeated for additional credits.

CTRP 1001. Freshman Seminar/Discovery Series. 1 Credit Hour.

Introduces first-year students to the purpose of higher education and the skills needed to use information technology and academic resources successfully in college and the workplace. Focuses on topics useful to college students, including time management, teamwork, study skills, and academic and career planning.

Repeatability: This course may not be repeated for additional credits.

CTRP 1017. City Planning Principles and Practice. 3 Credit Hours.

Theory and practice of urban planning in the United States. Discussion of planning policy, methodology, and implementation in such areas as land use, housing, environment, economic development, and transportation. Particular emphasis is given to the ways in which values and ethics inform the planning process, as well as how societal changes are affecting our land use options. Note: Prior to fall 2017, the course title was "Introduction to Community and Regional Planning."

Repeatability: This course may not be repeated for additional credits.

CTRP 2114. Urban Form and Design. 3 Credit Hours.

Basic design principles, techniques, and practices of sustainable urban form and design. The topics for most readings, projects, and guest lectures are people oriented and examine the many elements that contribute to the aesthetic and human quality of communities of all sizes. Through poster presentations, field visits, and other assignments, students analyze the nature of public spaces, streets and boulevards, landscaping, water, materials, light, scale, mass, and time. Explores the roles of unity, harmony, symbolism, and cultural values. Course readings have both historical and current references. Students participate in real-world urban design projects, visual design analyses, and presentations in a studio setting.

Course Attributes: SI, SS

Repeatability: This course may not be repeated for additional credits.

CTRP 2166. Land Use Planning. 3 Credit Hours.

At the heart and soul of community and regional planning is land use. How we use land and the institutional and legal basis by which we establish and implement land use goals are key elements in how our communities and regions are shaped. This course examines the foundations of land use planning, which begins with an understanding of attitudinal, value, and ethical perspectives of how land resources are used. The range of land use implementation approaches - regulatory, fiscal, incentives, and public investment - are also evaluated. The course additionally discusses the importance of ecological planning and design as prospects for contemporary land use planning to create sustainable communities and regions. NOTE: This course is not open to students who have taken Geography and Urban Studies 4015 (0215).

Course Attributes: SE, SI, SP, SS

Repeatability: This course may not be repeated for additional credits.

CTRP 2213. Environmental Planning. 3 Credit Hours.

A comprehensive overview of physical and environmental systems, including land, air, and water, and how planning can be conducted to protect such systems. Topics include environmental assessments and impact statements, storm water and floodplain management, water conservation, protection of open spaces and water supplies, waste management, and air pollution control.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

CTRP 2251. Sustainable Food Systems Planning. 3 Credit Hours.

Planners are paying attention to the notion of food system planning: farm land preservation and environmental stewardship; economic development including distribution, processing, employment and globalization; and food security, involving access to affordable, healthy foods. There are also issues of public health, food cultures, consumer spending patterns, and education. This course explores all of these concerns. Guest speakers and field trips provide a focus on regionally based food systems initiatives. Course readings and lectures address work that is underway elsewhere in North America. Students develop an appreciation for the ways in which a food systems perspective can enrich community planning efforts and create more sustainable and vital places in which to live and flourish.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

CTRP 2524. Fundamentals of Geographic Information Systems (GIS). 3 Credit Hours.

Basic principles and techniques of GIS, a computer-based system that uses spatial (geographic) data to analyze and solve real-world issues. Lab exercises, exams, and projects emphasize spatial data collection, entry, storage, analysis, and output using ArcGIS, the most widely used desktop GIS software. Students are expected to create maps, following basic cartographic rules and techniques, and to understand basic spatial data analysis techniques, including spatial query, geo-processing, and surface analysis. NOTE: This course is not open to students who have taken Geography and Urban Studies 3062 (0262). This course is the prerequisite for Advanced GIS (CTRP 5525) for all students (both undergraduate and graduate).

Repeatability: This course may not be repeated for additional credits.

CTRP 3155. Ecological Planning and Development. 3 Credit Hours.

The fundamentals of the ecological planning method developed by landscape architect and regional planner, Ian McHarg, establish a basis to plan and develop both individual projects and entire communities that can be enduring (sustainable). Students examine both theory and practice in the relationship between ecological planning and actual development. Case studies, field trips, and guest presenters will highlight specific examples of the successful implementation of ecological planning by the private development sector.

Course Attributes: SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

CTRP 3255. Sustainability in Suburban Communities. 3 Credit Hours.

The physical forms of suburban communities and the social and economic patterns that shape residents' lives make achieving sustainability in suburbia challenging and problematic. Distances between homes, businesses, and worksites are long, transportation choices are few, infrastructure needs are extensive and costly, and impacts on ecological systems can be severe. Many argue that higher-density, urban living holds our best promise for an environmentally sustainable future in the United States, but half of all Americans live in suburbia and finding sustainable solutions for them and their communities must be part of the solution. Lectures, readings, and discussions in this course address sustainability in suburban communities by covering the history of the American suburb and processes of suburbanization; architecture and housing; landscape and community design; transportation and infrastructure; built and natural environments and ecological systems; and planning, administration, and regionalism.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

CTRP 3256. Sustainable Community Design and Development. 3 Credit Hours.

Introduces students to the concept of sustainable development and how it has been applied to the design and development of communities. Beginning with an examination of the historical evolution of the concept of sustainable development, students then review the discourse of theory and practice of sustainable development at local, regional, and global levels. Review of case studies to understand how to evaluate the level of sustainable development principles being incorporated into planning practice.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

CTRP 3555. Internet and Digital Technologies for Community Engagement. 3 Credit Hours.

Emerging technologies are directly influencing the planning and management of our urban areas in very profound and pervasive ways. Planning and related professionals increasingly are adopting new technologies to develop plans, communicate ideas and concepts, and engage citizens in the decision-making process. The course introduces many fundamental technology concepts including: e-Planning and e-Government; Cybercities; e-Commerce & Economic Development; Web 1.0, 2.0, 3.x, Web Conferencing Tools; Online Project Collaboration Methods; IT Project Management; Section 508 Accessibility; Planning in Virtual Worlds; Municipal Wireless Networks & Public Spaces; and Digital Divide. Through a series of labs and assignments, students gain hands-on experience with each of these technologies.

Repeatability: This course may not be repeated for additional credits.

CTRP 3655. Transportation Planning. 3 Credit Hours.

Presents an overview of the history of transportation in the United States and the fundamentals of present day transportation planning and policies. Explores the influences of urban form on: modal choice; accessibility and mobility of various population subsets (such as the economically- and physically-disadvantaged); regional and local travel demand; and the operational efficiency of transit, highways, bicycle, pedestrian and other modes of transportation. Covers the impact of transportation investments on land use and regional population growth, and on environmental, community, and economic sustainability. Introduces students to currently used transportation planning methodologies, legal requirements, and decision-making processes. By studying actual transportation projects, students develop a plan for an assigned project.

Course Attributes: SE, SI, SP, SS

Repeatability: This course may not be repeated for additional credits.

CTRP 3755. Introduction to Emergency Management Planning. 3 Credit Hours.

Provides a fundamental understanding of the emergency planning process, the phases of emergency management, and the roles and responsibilities of all parties involved. Students work in a classroom environment, interacting with others on various assignments, projects and presentations.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CTRP 3860. Topics in Community & Regional Planning. 1 to 3 Credit Hour.

Variable offerings from semester to semester of selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Course Attributes: SF

Repeatability: This course may be repeated for additional credit.

CTRP 3870. Special Topics. 1 to 3 Credit Hour.

Variable offerings from semester to semester of selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

CTRP 3882. Independent Study. 1 to 3 Credit Hour.

Explorative study or research not met in any established course. Initiated by the student, the project must be sponsored by a faculty member with an approved agreement outlining the content and requirements, including readings, meetings, and papers. NOTE: Students must have the agreement of a faculty sponsor and must submit a formal proposal to this faculty member and Department before registering for the course. A maximum of 3 s.h. of Community and Regional Planning directed reading/study or independent study may be used as elective credit toward the Community and Regional Planning major.

Repeatability: This course may be repeated for additional credit.

CTRP 3883. Directed Reading/Study. 1 to 3 Credit Hour.

Advanced reading/study tutorial arranged between the student and a faculty member. Requirements are jointly determined relative to the specific focus of the course and may include literature review; preparation of journals, bibliographies and/or paper(s); and participation in regularly scheduled discussions. The level of work required is equivalent to a traditional course. Writing skills are evaluated for the final grade. Students are expected to demonstrate personal initiative in framing and meeting course requirements. NOTE: A maximum of 3 s.h. of Community and Regional Planning directed reading/study or independent study may be used as elective credit toward the Community and Regional Planning major.

Repeatability: This course may be repeated for additional credit.

CTRP 3889. Planning Studio. 3 Credit Hours.

A culminating experience for undergraduates that demonstrates their abilities to resolve real-life problems. Working in small teams, students integrate and apply the previous years of educational experience to a community planning problem: analysis of the problem, data collection, communication of goals and objectives, formulation of a solution, and implementation. NOTE: Studio topics vary. This course may be repeated for credit.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Community and Regional Plannin.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- (except where noted) in (CRP 2513 or CDEV 2596), (CTRP 2524 or CRP 2524), and (CTRP 4896 (C- or higher) or CRP 4896 (C- or higher))

CTRP 4885. Internship and Professional Practice in Planning. 3 Credit Hours.

Student must be a Community and Regional Planning major who has completed: CTRP/CRP 1017, 1027, 2014, 2213, 2496, 2513, 2524; plus at least one Community and Regional Planning elective. Students may register for CTRP 4885 only once. Requires 180 hours of supervised internship experience with public agencies, non-profit institutions, and private entities. Must have a designated field supervisor. Emphasizes the acquisition and application of practical skills in planning.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Community and Regional Plannin.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

CTRP 4896. Community and Regional Planning Senior Capstone Seminar. 3 Credit Hours.

Students complete a capstone project that simulates the type of work and project research likely to be undertaken in the first years of employment in a planning office. This involves developing and researching a planning topic. NOTE: Fulfills the capstone writing intensive requirement for the Community and Regional Planning major.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Community and Regional Plannin.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CTRP 2114 or CRP 2114), (CTRP 2213 or CRP 2213), (CDEV 2596 or CRP 2513), and (CTRP 2524 or CRP 2524)

Civil Engineering (CEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CEE 0845. The Environment. 3 Credit Hours.

In today's world characterized by rapid and global environmental changes, it is crucial that citizens have an understanding of the key concepts in environmental science. This course provides students with an introduction to the science behind critical environmental debates and breaks down the requirements for creating and maintaining sustainable ecosystems. A major focus of the course is to develop critical thinking skills and apply them to assess relevant questions such as: How do we predict trends in the growth of populations or climate change? How do human activities impact the nitrogen and phosphorus cycles and how does this in turn affect the environment? How can we quantify and value biodiversity? Should we eat lower on the food chain or are genetically modified crops a sustainable solution? What were the key outcomes of the 2015 U.N. Climate Change Conference in Paris and how will various countries carry out their commitments to protect the environment? This course will enhance awareness of the impacts that our everyday decisions have on the environment and will provide students with strategies to become better environmental stewards. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed CEE 0945, CEE 1051, ENVT 0845, ENVT 0945, or ENVT 1051.

Course Attributes: GS, SE, SF

Repeatability: This course may not be repeated for additional credits.

CEE 0945. Honors: The Environment. 3 Credit Hours.

In today's world characterized by rapid and global environmental changes, it is crucial that citizens have an understanding of the key concepts in environmental science. This course provides students with an introduction to the science behind critical environmental debates and breaks down the requirements for creating and maintaining sustainable ecosystems. A major focus of the course is to develop critical thinking skills and apply them to assess relevant questions such as: How do we predict trends in the growth of populations or climate change? How do human activities impact the nitrogen and phosphorus cycles and how does this in turn affect the environment? How can we quantify and value biodiversity? Should we eat lower on the food chain or are genetically modified crops a sustainable solution? What were the key outcomes of the 2015 U.N. Climate Change Conference in Paris and how will various countries carry out their commitments to protect the environment? This course will enhance awareness of the impacts that our everyday decisions have on the environment and will provide students with strategies to become better environmental stewards. (This is an Honors course.) NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed CEE 0845, CEE 1051, ENVT 0845 or ENVT 0945.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO, SE, SF

Repeatability: This course may not be repeated for additional credits.

CEE 1001. Introduction to Civil Engineering. 3 Credit Hours.

This course provides an understanding of the study and practice associated with Civil Engineering. It stresses the importance of good communications and teamwork skills in a successful engineering career. Students will understand the basics of problem solving and design. Laboratory included.

Repeatability: This course may not be repeated for additional credits.

CEE 1051. Introduction to the Environment. 3 Credit Hours.

Basic environmental issues, systems and change; biogeochemical cycles; human population; ecosystems and their management and restoration; biological diversity, productivity and energy flow; biogeography; environmental health, pollution and toxicology; energy; and global warming. Hands on laboratory exercises are an integral part of the course. The lab exercises are conducted within the class schedule at each campus. NOTE: Students cannot receive credit for this course if they have successfully completed CEE 0845, CEE 0945, ENVT 0845, ENVT 0945 or ENVT 1051.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

CEE 1105. Surveying. 2 Credit Hours.

Calculating closure and area of a traverse; computing offset angles and chord distances to layout circular and spiral curves; determine elevations to layout vertical curves; computing volumes from terrain cross sections. Field problems using surveying instruments to layout a traverse and a circular curve. Students will work on teams, which will be responsible for performing field work, analytic calculations, and report presentation associated with loop leveling and closed-loop traverse surveys.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 1021 to 4999, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC6T, or 'Y' in METW)

CEE 1115. Surveying Laboratory. 1 Credit Hour.

Students will work on teams, which will be responsible for performing field work, analytic calculations, and report presentation associated with loop leveling and closed-loop traverse surveys.

Repeatability: This course may not be repeated for additional credits.

CEE 2011. Civil Engineering Materials. 2 Credit Hours.

Basic laboratory and field tests conducted with aggregate, soil, concrete, steel, masonry, wood and other construction materials.

Repeatability: This course may not be repeated for additional credits.

CEE 2341. Construction Materials Laboratory. 2 Credit Hours.

Basic laboratory and field tests conducted with aggregate, soil, concrete, steel, masonry, wood and other construction materials. Students are required to submit lab reports on the test results of various materials.

Repeatability: This course may not be repeated for additional credits.

CEE 2711. Environmental Chemistry & Microbiology. 3 Credit Hours.

This course covers the structure of atoms; chemical bonds and reactions; water, solutions, and colloids; acids, bases, and pH; carbohydrates, lipids, proteins; nucleotides and nucleic acids; commonly occurring organic contaminants; and microorganisms and contamination remediation.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 or CHEM 1035) and CHEM 1033.

CEE 2712. Introduction to Environmental Engineering. 3 Credit Hours.

This course will provide an introduction to the sources, effects, and control of pollution in different environmental compartments. Topics include air and water quality (indicator parameters), mass transport, solid and hazardous waste classification, risk assessment, environmental regulations (air, water, solids). Water and wastewater treatment are introduced as well as water resources engineering (rainfall/runoff analysis).

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (CHEM 1031 or CHEM 1951) and (MATH 1042 (C or higher), MATH 1942 (C or higher), 'Y' in MATW, 'Y' in CRMA09, 'Y' in CRMA11, or 'Y' in METW)

CEE 2715. Principles of Sustainable Engineering. 3 Credit Hours.

Sustainable engineering principles include calculations of environmental emissions and resource consumption. Mass and energy balance calculations in context of pollution generation and prevention, resource recovery and life-cycle assessment. Economic aspects of sustainable engineering decision-making. Social impacts of technology system design decisions including ethical frameworks, government legislation and health risks. Students will gain an awareness of challenges to sustainable water and energy and inter-linkages between these. Energy-water design trade-offs will be investigated for various energy and water processing facilities, e.g. electric power or desalination plants.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 2712.

CEE 2811. Sustainable Projects in the Developing World I. 2 Credit Hours.

This course focuses on multiple aspects of developing and implementing projects in underserved areas of the world following guidelines established by Engineers Without Borders. This course will prepare students for international travel to work on projects currently being undertaken or considered by the EWB Temple University student chapter. The course topics include development of community partnerships, identification of community needs, budgeting, fundraising, communication, and sustainable project design. Topics covered each semester will be dependent on the current project status. The course is open to students across all disciplines with an interest in applying their education to projects in the developing world. This is the first of a two course sequence with CEE 2812.

Course Attributes: SF

Repeatability: This course may be repeated for additional credit.

CEE 2812. Sustainable Projects in the Developing World II. 1 Credit Hour.

This course focuses on multiple aspects of developing and implementing projects in underserved areas of the world following guidelines established by Engineers Without Borders. In this course students will develop a topic related to the service learning trip undertaken as part of CEE 2811 and write an in-depth technical report. Topics may include, but are not limited to, development of community partnerships, identification of community needs, and sustainable engineering design. This course is open to students across all disciplines who have successfully completed CEE 2811 and traveled on an EWB-Temple, or similar, service trip. This is the second of a two course sequence (with CEE 2811).

Course Attributes: SF

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CEE 2811.

CEE 3048. Probability, Statistics & Stochastic Methods. 3 Credit Hours.

A practical course on uncertainty and risk analysis for engineers and scientists, including modern computer algebra software applications. Random variables and probability distributions. Simulations of random systems, analytical models and Monte Carlo simulations. Systems with jointly distributed random variables. Estimation theory in engineering. Fitting probability models to data. Regression analysis. Reliability of engineering systems. Design of engineering experiments. Experiments and tests for two or more random variables. ANOVA. Introduction to stochastic processes, random walk, Brownian motion, white noise, and colored noise processes. Stochastic differential equations, stochastic calculus, differential equations with random initial conditions, random forcing functions, random boundary conditions, random partial differential equations. New techniques for non-linear equations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW)

CEE 3211. Transportation Engineering. 3 Credit Hours.

The principal modes of transportation including highway, rail, and air; analysis of elements of transport technology; transportation system development, planning, design, construction, and maintenance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 1105.

CEE 3311. Construction Engineering. 3 Credit Hours.

Contracts, construction contract documents, and construction specifications; estimating construction costs, planning and estimating earthwork, concrete formwork design and estimating; planning and scheduling construction projects, critical path method; project cash flow, funding and cost control; construction equipment: types, ownership and operating costs. Computer applications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 2011.

CEE 3331. Soil Mechanics. 3 Credit Hours.

Soil as a multiphase material, strength and deformation properties, earth pressure, bearing capacity, stability of slopes, soils laboratory. Written reports and oral presentations required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2333.

CEE 3332. Soil Mechanics Laboratory. 1 Credit Hour.

Students will work on teams, which will be responsible for performing laboratory work, analytic calculations, and report preparation associated with soil classification according to USCS and AASHTO systems and with soil compaction according to ASTM specifications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2333.

CEE 3334. Structural Design of Pavements. 3 Credit Hours.

Basic characteristics of different pavement structures, various modes of failure and design of pavement structures, identification and analysis of stresses, strains and deflections in flexible and rigid pavements, computation of the traffic loading and volume for the structural design of pavements, engineering properties of pavement materials, pavement performance, distress, empirical and mechanistic-empirical approaches.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3331.

CEE 3411. Structural Analysis. 3 Credit Hours.

Elastic analysis of statically indeterminate structures using force and deformation methods. Introduction to numerical methods and computer techniques. The analysis includes determination of stresses and deflections using stiffness method, force method, and moment-distribution methods.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2333.

CEE 3412. Structural Analysis Laboratory. 1 Credit Hour.

Introduction to the basic theory and concepts of the Stiffness Method and the Finite Element Method. Students will gain experience in analyzing structural systems and structural mechanics by general-purpose finite element programs such as STAAD PRO and ANSYS.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2333.

CEE 3421. Steel Design. 3 Credit Hours.

Loadings on structures. Design criteria and procedures for steel members subjected to axial forces, bending and shear. Buckling of columns. Plastic design and load and resistances factor theories. Computer-based design methods are included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3411.

CEE 3431. Concrete Design. 3 Credit Hours.

Load and strength factor design methods for plain and reinforced concrete elements of structural systems. Serviceability checks at service loads. Manual and computer-based design methods are included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3411.

CEE 3441. Steel & Concrete Design. 4 Credit Hours.

The course's design objective is to develop within the student an awareness of the fundamentals that are required to produce safe, functional, and economical steel and reinforced concrete structures, which are in conformance with national building codes and with industry codes, specifications and standards and to formulate applied load criteria and make reasonable assumptions regarding structural behavior. Then through an interactive process, the student will determine the most cost-effective solution.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3411.

CEE 3611. Hydraulic Engineering. 3 Credit Hours.

The course deals with the design of hydraulic systems based on various flow regimes (laminar and turbulent). Students will learn to design pipe and network systems along with open channels. The design of various hydraulic structures such as, culverts and spillways, will be taught. Widely used software such as MWH Soft and HECRAS (US Army Corps of Engineers) will be taught and used in the class. Field studies will be conducted and students will get to experiment with various instruments used in water systems (e.g., pumps, flowmeters, diffuser, etc). NOTE: Prior to spring 2010, the course title was "Hydrology and Hydraulic Engineering."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 3553.

CEE 3711. Environmental Engineering. 3 Credit Hours.

Sources, effect, and control of environmental pollution. Topics include air and water pollution, solid and hazardous waste, noise, radiation and risk assessment. Effects across media, and applications to current concerns such as global warming and ozone depletion are emphasized. Course material and problem solving are reinforced through application of appropriate computer models.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 or CHEM 1035) and (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW)

CEE 3712. Environmental Fluids and Contaminant Dynamics. 3 Credit Hours.

Dynamics of fluids in motion; laminar and turbulent flow, Bernoulli's equation, friction in conduits; open-channel flow. Introduction to the processes controlling the migration and fate of chemicals in all phases of the environment, including surface and subsurface water as well as the atmosphere. Boundary layers, turbulence, mixing, convection, stratification and plumes and their impacts on contaminant dynamics will be discussed.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 2712, ENGR 2334, (MATH 2043, MATH 2943, or 'Y' in METW), and (MATH 2041 (may be taken concurrently), MATH 2941 (may be taken concurrently), MATH 3041 (may be taken concurrently), MATH 3941 (may be taken concurrently), or 'Y' in METW)

CEE 3715. Microbiological Principles of Environmental Engineering. 3 Credit Hours.

Introduction to underlying microbiological principles dealing with fate and transport of contaminants in the natural and built environment; reactor configurations for water and air quality control; and contaminant partitioning and contemporary environmental issues. The diverse roles of microorganisms in natural and engineered environments will be discussed.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 2712.

CEE 3717. Chemical Principles of Environmental Engineering. 3 Credit Hours.

Introduction to chemical equilibrium, thermodynamics and kinetics in water, atmosphere, and soils and sediments. The objective of this course is to develop a basis for understanding the behavior of chemical processes in the natural and built environment.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 2712.

CEE 3725. Water Quality and Analysis Lab. 1 Credit Hour.

Environmental lab methods to measure properties and characteristics of dissolved, particulate, and microbiological constituents in water, air, and soil systems.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3715 (may be taken concurrently) and CEE 3717 (may be taken concurrently)

CEE 3727. Environmental Hydrology and Stormwater Management. 3 Credit Hours.

The course covers the relationship between precipitation and runoff, unit hydrographs, flood routing, and water supply principles and applications. Impacts of improperly controlled runoff on urban streams and how the rate, volume and quality of urban stormwater runoff can be properly controlled through appropriate Best Management Practice (BMP) implementation.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2043, MATH 2943, or 'Y' in METW) and (CEE 3712 or ENGR 3553)

CEE 4040. Special Topics. 1 to 3 Credit Hour.

A course designed to present new and emerging areas of engineering. The course may also be used to present areas not normally taught in the College. Course requirements vary with the topic and instructor. Offered as needed or as appropriate.

Repeatability: This course may be repeated for additional credit.

CEE 4072. Update and Assessment. 3 Credit Hours.

The course objective is to facilitate the process of Civil Engineering, Senior-Level Students preparing for and taking the NCEES Fundamentals of Engineering (FE) Examination. Students will take in-class examinations on each review topic.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

CEE 4201. Transportation Systems Management. 3 Credit Hours.

This course covers cost-effective techniques for the rebuilding of deteriorated transportation systems, pavement management and traffic systems management; extensive use of advanced computer software packages.

Repeatability: This course may not be repeated for additional credits.

CEE 4211. Bridge Engineering. 3 Credit Hours.

Design criteria, loads, construction techniques, state codes, superstructure components design-modeling and analysis, method, rating, computer software, detailing, new bridge, replacement, widening, rehabilitation, state codes, technical proposal, structural planning, feasibility studies, preliminary and final design, and post design services.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3441.

CEE 4221. Intelligent Transportation Systems. 3 Credit Hours.

To understand the multidimensional upgrades needed for highway and vehicles to develop intelligent transportation systems. The new system should be able to handle higher traffic safely in lesser time. Several case studies are an integral part of the course.

Repeatability: This course may not be repeated for additional credits.

CEE 4231. Airport Engineering. 3 Credit Hours.

This course deals with the various aspects of airport engineering, planning, design and development of 21st century airports. The course covers airport master and system planning, airside layout, landside access design, passenger and cargo facilities, terminal design, drainage and pavement design.

Repeatability: This course may not be repeated for additional credits.

CEE 4244. Introduction to Geosynthetics. 3 Credit Hours.

This course will enhance your critical understanding of Geosynthetic Materials used in civil engineering applications and develop the knowledge and skills required for designing and applying geosynthetic materials in civil engineering and environmental applications. Geosynthetics properties, testing of properties, design of geotextiles, geogrids, geonets, and geomembranes for applications in separation, pavement design, embankment and retaining wall reinforcement, soil stabilization, filtration, drainage and liquid barrier, construction guidelines and case histories. The module will also develop critical understanding of the processes and materials used for the manufacture of geosynthetic materials.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3331.

CEE 4301. Construction Administration. 3 Credit Hours.

The engineering and construction industry; basis of construction contracting; organizational structure and its functions; management structure and its functions, office administration, employment practices and labor relations; organizational financing and accounting; safety practices, risk management, and industrial insurance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3311.

CEE 4302. Engineering Project Management. 3 Credit Hours.

Overview of the basic principles underlying all methods of project management, including project estimating, planning and scheduling, budgeting, cost accounting and cost control, project documentation, tracking and resource leveling. Utilization of project management software packages for selected civil engineering projects. Different types of projects, organizing the project management functions, setting up the project team, starting up and managing engineering projects and ensuring the effective completion of the project on time, within budget and meeting specifications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3311.

CEE 4303. Construction Financial Management. 3 Credit Hours.

Overview of the basic principles underlying all methods of project management and financial accounting methods, construction cost accounting systems, construction project costing approaches, project budgeting, financial reporting procedure. Computer applications as required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3311.

CEE 4312. Construction Equipment Management. 3 Credit Hours.

Concepts and theories of construction equipment operation and ownership costs and their relationship to production systems. Production planning and Productivity Analysis. Analysis of depreciation and fixed costs for equipment pricing on construction projects. Selection and use of construction equipment. Equipment economics and financing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3311.

CEE 4321. Geotechnical Engineering. 3 Credit Hours.

Soil testing, site investigation, design of both shallow and deep foundations, bulkheads, soil-structure interaction and advanced topics in soil behavior and stability. Students are required to submit lab reports on the test results of various materials.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3331.

CEE 4421. Structural Dynamics. 3 Credit Hours.

Students are introduced to concepts in structural dynamics and their applications in structural engineering. Methods to determine dynamic response of single degree of freedom systems with free and forced vibrations are studied first, followed by similar concepts in multi-degree of freedom systems. Numerical methods to determine response over time will also be investigated.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3411, ENGR 2332, (MATH 2043, MATH 2943, or 'Y' in METW), and (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW)

CEE 4431. Behavior and Design of Steel Structures. 3 Credit Hours.

Loadings on structures. Design criteria and procedures for steel members subjected to axial forces, bending and shear. Buckling of columns. Design of connections. Plastic design and load factor resistance theories. Computer-based design methods included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3441.

CEE 4432. Behavior and Design of Reinforced Concrete Structures. 3 Credit Hours.

Behavior, analysis, and design of advanced reinforced concrete structures and components including columns subjected to flexure in one or two directions, slender columns, floor systems including two-way slabs, and analysis, design application using modern software.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3441.

CEE 4433. Behavior and Design of Masonry Structures. 3 Credit Hours.

Masonry materials, structural behavior of masonry assemblages, deformational characteristics of brick, block, and natural stone masonry. Performance of load-bearing wall systems, design of unreinforced and reinforced masonry members including beams, columns and pilasters, and walls; special design and construction topics; application of design to low and high-rise masonry buildings.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 3411.

CEE 4443. Finite Element Analysis. 3 Credit Hours.

Covers application of modern, computer-aided graphics techniques and the use of state-of-the-art, computer-aided design/drafting package(s) for finite element modeling. Includes 3-D modeling, solid modeling, shading, and rendering; and file transfer.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CEE 3411 and CEE 3412)

CEE 4445. Earthquake Engineering and Seismic Design. 3 Credit Hours.

Basic knowledge of and introduction to earthquake engineering, seismic design and analysis methods, and seismic design based on International Building Code (IBC), ASCE 7 - Minimum Design Loads for Buildings and Other Structures, introduction of material specific design requirement.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CEE 4421.

CEE 4446. Senior Design Project I for Civil Engineering. 3 Credit Hours.

This is the first course of a two-semester senior design sequence intended for civil engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Civil Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in CEE 3331, CEE 3332, ((CEE 3411 (D- or higher) and CEE 3412 (D- or higher)) or CEE 3711), ENGR 3553, and ENGR 3571.

CEE 4447. Senior Design Project I for Environmental Engineering. 3 Credit Hours.

This is the first course of a two-semester senior design sequence intended for environmental engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Environmental Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3712, CEE 3715, CEE 3717, (CEE 3727 or CEE 4631), and CEE 4721.

CEE 4531. Life Cycle Assessment and Carbon Footprinting. 3 Credit Hours.

Life Cycle Analysis (LCA) examines the environmental impacts of products, processes and policies beyond their direct production. Cradle to grave analysis in this manner provides the full picture needed to understand the true impact. This course provides an overview of Life Cycle Assessment principles and practice in relation to environmental and energy concerns. Regulatory and economic decision support tools and software analysis packages will be included. The course is structured such that students will start an LCA from the beginning of the course and progress on it as topics are covered.

Course Attributes: SF, SP

Repeatability: This course may not be repeated for additional credits.

CEE 4622. Fate Pollutants in Subsurface Environments. 3 Credit Hours.

This course focuses on integrated chemical, physical, and microbiological principles of contaminant fate and transport processes necessary in the use of engineered approaches toward selecting and implementing subsurface cleanup options. It also covers abiotic processes, biotic processes, empirical models, and vulnerability mapping.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

CEE 4623. Contaminant Dynamics in Urban Streams. 3 Credit Hours.

Contaminant Dynamics in Urban Streams is designed to teach undergraduate students fundamental concepts of solute exchange at the air:water interface and the water:sediment interface. These systems are by definition boundary or edge systems and are therefore exceptionally important to aquatic ecosystem functioning. After briefly discussing the air:water interface in rivers and lakes, the course will focus on the water:sediment interface. It is here that steep gradients in chemical concentration can be found and significant nutrient cycling occurs. In addition, studies have shown that significant ecosystem productivity and respiration occurs within the bed sediments of flowing water. The course will discuss the concept of transient storage and hyporheic exchange; issues surrounding modeling of transient storage and hyporheic exchange; phosphorus and nitrogen biogeochemistry within the hyporheic zone; and biotic/abiotic nutrient cycling.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 or CHEM 1035) and (CEE 4631, CEE 4621, or CEE 3711)

CEE 4631. Environmental Hydrology. 3 Credit Hours.

A study of the physical laws affecting the occurrence, distribution, movement, storage, and contamination of water in watersheds. The physics of surface and subsurface circulation and storage of water and the transport of contaminants in watersheds, soils, aquifers, rivers, the ocean, and the atmosphere. The laws and equations which govern the recharge, flow, storage, and discharge of water in natural environments. The laws and equations governing the occurrence, absorption, propagation and fate of contaminants in natural environments. Hydrologic effects of global climate change. Engineering methods for the sustainable use of water resources. Engineering methods for the containment and treatment of surface and groundwater pollution, and the restoration of aquifers.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW) and (ENGR 3553 (C- or higher) or CEE 3712 (C- or higher))

CEE 4641. Urban Streams and Stormwater Management. 3 Credit Hours.

Stormwater management has become a significant issue in recent years. In the past, the typical thinking was 'get it out of my town' which resulted in downstream communities suffering the brunt of poor or inadequate management. In fact, only the rate of runoff was addressed, not the volume, nor the quality of that runoff. In urban areas, the volume of runoff increases significantly due to the additional impervious cover (e.g. pavement and rooftops) and urban stormwater runoff causes water quality degradation due to excess amounts of nutrients, metals, bacteria and sediment. This course will address the impacts of improperly controlled runoff on urban streams and how the rate, volume and quality of urban stormwater runoff can be properly controlled through appropriate Best Management Practice (BMP) implementation.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Civil Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CEE 2712 or CEE 3711 (may be taken concurrently))

CEE 4711. Air Pollution Control System. 3 Credit Hours.

Principles of design and operation of the major categories of air pollution control equipment. Theory and principles are presented to reinforce extensive application and design components.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 1062 and (ENGR 3553 or CEE 3712)

CEE 4721. Water and Wastewater Systems Design. 3 Credit Hours.

Unit operations in water treatment, design objectives and parameters of water treatment; coagulation and flocculation; filtration plant design; physical unit operations; biological unit processes; design of facilities for biological treatment of waste water.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (CEE 3711 or CEE 2712) and (ENGR 3553 (C- or higher) or CEE 3712 (C- or higher))

CEE 4722. Water/Wastewater Lab. 1 Credit Hour.

Quantitative laboratory studies of operations such as coagulation/flocculation, adsorption/ion exchange, filtration, disinfection, biological oxidation, advanced oxidation processes, and gas transfer. Laboratory safety and technical writing skills are emphasized. The course will include field trips to water and wastewater treatment plants as well as a solid waste management facility.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 4721 (may be taken concurrently)

CEE 4725. Environmental Systems Design. 3 Credit Hours.

Systems-based design and integration of various unit operations at treatment plants dealing with potable water, industrial wastewater, municipal wastewater, high purity industrial water, groundwater, and soil remediation.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CEE 3712 or ENGR 3553) and CEE 4721.

CEE 4731. Solid & Hazardous Waste Management. 3 Credit Hours.

This course covers the principles of integrated solid waste management. The planning and engineering principles needed to address the growing and increasingly intricate problem of controlling and processing the refuse (solid waste) created by urban societies. Federal regulations and management practices associated with hazardous waste are also covered. Situations dealing with real world settings are covered through worked examples and field trips to solid waste management facilities. NOTE: Prior to spring 2010, the course title was "Solid & Hazardous Waste Engineering."

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 1031.

CEE 4741. Professional Issues I. 1 Credit Hour.

This environmental engineering seminar series will focus on contemporary environmental topics, innovation, entrepreneurship, and life-long skills.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

CEE 4742. Professional Issues II. 1 Credit Hour.

This environmental engineering seminar series will focus on contemporary environmental topics, innovation, entrepreneurship, and life-long skills.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

CEE 4761. Environmental Chemistry. 3 Credit Hours.

This is an advanced course focusing on examination of processes that affect the behavior and fate of anthropogenic organic contaminants in aquatic environments. The lectures will begin with intermolecular interactions and thermodynamic principles governing the kinetics of some of the important chemical and physicochemical transformation reactions of organic contaminants. From this class, students will learn to predict chemical properties and to apply the knowledge of chemical properties and transformation reactions to assess the environmental fate of organic contaminants.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 2201.

CEE 4762. Environmental Organic Chemistry. 3 Credit Hours.

This is an advanced course focusing on examination of processes that affect the behavior and fate of anthropogenic organic contaminants in aquatic environments. The lectures will focus on intermolecular interactions and thermodynamic principles governing the kinetics of some of the important chemical and physicochemical transformation reactions of organic contaminants.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 2201.

CEE 4773. Sustainability Aspects of Water Supply and Wastewater Treatment. 3 Credit Hours.

Major environmental, economic and social trends are influencing the application of sustainability principles within the engineering profession. This course will examine the sustainability principles that will transform future engineering practice regarding drinking water supply and the treatment of wastewater. The term, wastewater, will be replaced by one more representative of the fact that 'wastewater' is in fact a largely untapped source of raw materials. It is in the areas of energy recovery, small molecule harvesting, and the water energy nexus where the next generation of environmental engineers will have a major impact on meeting societal needs regarding the provision of adequate drinking water as well as industrial requirements for this increasingly scarce resource. The course will introduce the underlying principles of sustainability directly relevant to meeting this need. Case studies will evaluate the above mentioned principles and the applicable areas of energy, chemical intermediates, and reclamation of previously used water, with a focus on dealing with emerging microconstituents in the water environment.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

CEE 4775. Biological Principles of Environmental Engineering Systems. 3 Credit Hours.

Applications of biological processes in environmental engineering are historic and eminently modern, from traditional ones like activated sludge and anaerobic digestion to emerging applications like detoxification of hazardous chemical and bio-filtration of drinking water. This course is designed to identify the biological principles essential for the understanding and designing of biological processes used for environmental protection and improvement. Recent development of environmental bio-technologies such as ANAMMOX, membrane bioreactors, and algal bioreactors will be discussed in detail. This course emphasizes the comprehension of theoretical concepts and their application in a variety of situations. It covers the fundamental biological principles by their practical applications in engineered and natural environments.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 2712.

CEE 4811. Advanced Soil Mechanics. 3 Credit Hours.

Advanced concepts related to behavior of soil as an engineering material. Topics include consolidation magnitude and time rate, evaluation of secondary compression, mitigation of consolidation of settlements, shear strength of soils and other geologic materials, principles of critical state soil mechanics, and normalization of undrained shear strength.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3331.

CEE 4821. Foundation Engineering. 3 Credit Hours.

Principles of foundation engineering and design. Topics include soil stress distributions, bearing capacity of shallow (footings, mats) and deep foundations (driven piles, drilled shafts), tolerable settlements, construction techniques, and field quality control.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3331.

CEE 4822. Earth Retaining Systems. 3 Credit Hours.

Principles related to design of earth retaining systems and stability of earth slopes. Topics include lateral earth pressure theory, temporary and permanent retaining structures, in-situ reinforcement, and braced excavations. Shear strength of cohesive and granular soils and slope stability analysis using limited equilibrium, design charts and numerical methods.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3331.

CEE 4823. Geotechnical Earthquake Engineering. 3 Credit Hours.

An introduction to seismology and earthquake hazards in geotechnical engineering. Topics include plate tectonics and earthquake faulting, strong ground motions, dynamic soil properties, and characterization of design ground motions based on deterministic and probabilistic seismic hazard analysis. Analysis of earthquake-induced ground failures, seismic design of earth retaining systems and slopes, and effects of soil-structure interaction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CEE 3331.

CEE 4871. Fundamentals of Engineering in Civil Engineering. 1 Credit Hour.

Review of subject areas in preparation for the Fundamentals of Engineering examination in Civil Engineering.

Repeatability: This course may not be repeated for additional credits.

CEE 4882. Independent Study in Civil Engineering. 2 to 5 Credit Hours.

Student may complete a regular course during semester the course is not offered to meet prerequisite or graduation requirements. NOTE: An instructor is assigned to supervise the student.

Repeatability: This course may be repeated for additional credit.

CEE 4883. Directed Study in Civil Engineering. 1 to 4 Credit Hour.

An opportunity to study specialized topics not covered in currently available courses and providing significant progress towards the technical/professional objectives of the program. An instructor is assigned to define the scope and direct, supervise, and evaluate student progress.

Repeatability: This course may be repeated for additional credit.

CEE 4891. Independent Research in Civil Engineering. 2 to 5 Credit Hours.

A project assigned with the approval of the department chair and conducted under the supervision of a faculty sponsor.

Repeatability: This course may be repeated for additional credit.

College of Education (COED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

COED 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may be repeated for additional credit.

COED 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may be repeated for additional credit.

College of Liberal Arts (CLA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CLA 0820. GenEd Limited Edition GB. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Human Behavior requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

CLA 0830. GenEd Limited Edition GD. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Race and Diversity requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

CLA 0880. GenEd Limited Edition GU. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd U.S. Society requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

CLA 0920. Honors GenEd Limited Edition GB. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Human Behavior requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

CLA 0930. Honors GenEd Limited Edition GD. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Race and Diversity requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

CLA 0980. Honors GenEd Limited Edition GU. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd U.S. Society requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

CLA 1001. The CLA First Year Experience. 1 Credit Hour.

The CLA First Year Experience introduces students to the rich diversity of opportunities and resources available to them both university wide and especially in the College of Liberal Arts. The course is designed to help students in making the often-difficult transition to college life and college level coursework. The primary goal of the course is to give students the tools to make responsible decisions about their academic careers and better understand how to navigate the complex university system. This course covers a wide array of topics, including: time management, study skills, major/minor selection, internship opportunities, study abroad programs, faculty guidance and course planning/sequencing. It uses student-initiated goals as the context through which to view these topics and many other areas critical to success in the first year of college and beyond.

Repeatability: This course may not be repeated for additional credits.

CLA 1002. Professional Development for Liberal Arts Majors. 1 Credit Hour.

Given the rapidly changing nature of the world economy, a degree in the liberal arts has never been more valuable. This seminar will focus on how you as a student in the College of Liberal Arts can best leverage your unique skills to prepare for a career in a broad array of fields, including government, non-profit, corporate, human services, and education. You will participate in group discussions, exercises, and projects that will help you determine which sectors and occupations best match your interests and aptitudes. You will also learn what coursework and additional credentials might enhance the likelihood of obtaining the type of position you want. You will develop an application-ready resume and will be well prepared for networking and professional interviews. Upon successful completion of this course you will possess the ability to communicate effectively and professionally and to employ different strategies to search for internship and career opportunities. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

College Restrictions: Must be enrolled in one of the following Colleges: Liberal Arts.

Repeatability: This course may not be repeated for additional credits.

CLA 1009. Discovering the Liberal Arts. 2 Credit Hours.

The courses in this series provide a sweeping overview of the liberal arts curriculum and connections with the world of work. Through an interdisciplinary approach, students are exposed to examples of the content as well as the tools of the disciplines while learning how a liberal arts education translates into a career in business, law, health care, education, government and more. Each time the courses are offered they focus on a particular theme such as popular culture, conflict resolution and globalization, and faculty from a variety of departments are invited to present their perspectives. NOTE: Participation in a Discovery Series course helps students acquire a better understanding of the liberal arts majors and associated careers, and the skills needed to plan an effective course of study.

Repeatability: This course may not be repeated for additional credits.

CLA 1010. Special Topics in Liberal Arts. 1 Credit Hour.

Specific topics vary each semester and will be listed in the schedule of classes. Contact instructor for more information. This course will count as a free elective towards graduation but does not fulfill distribution or major requirements for any major in the liberal arts.

Repeatability: This course may be repeated for additional credit.

CLA 1019. Discovering the American Legal System. 2 Credit Hours.

Repeatability: This course may not be repeated for additional credits.

CLA 1021. Social Media Marketing for Liberal Arts Majors. 1 Credit Hour.

This course provides an introductory-level overview of social media marketing strategies used by individuals and organizations to cultivate and maintain engaged virtual audiences, with a primary focus on personal branding. Students will learn how to leverage the power of popular social media platforms (including but not limited to LinkedIn, Instagram, and YouTube) to share their skills and knowledge while enhancing their career development. Students will also have opportunities to network with online marketing professionals through guest lectures. At the end of the course, students will walk away with an authentic yet polished online presence on multiple platforms that creates a positive first impression with potential employers and followers alike.

College Restrictions: Must be enrolled in one of the following Colleges: Liberal Arts.

Repeatability: This course may not be repeated for additional credits.

CLA 1234. Life Experience Portfolio. 1 to 6 Credit Hour.

Students in the Bachelor of Arts in Liberal Studies program may apply for up to six general elective credits for relevant life experience. There is a variety of work that may be considered for life experiences: professional work experience, published papers, articles, books, or creative works, as well as non-credited certificate programs completed prior to matriculation in the program.

Repeatability: This course may not be repeated for additional credits.

CLA 1701. The Washington Center Leadership Forum. 3 Credit Hours.

This course is restricted to participation in The Washington Center program. Students participate in a combination of academic seminars and intern in the Washington DC area. More details can be found at www.cla.temple.edu/ipa.

Repeatability: This course may not be repeated for additional credits.

CLA 1801. Career Seminar in the Liberal Arts. 3 Credit Hours.

Specially designed workshops will walk students through the various stages of career search strategies: informational interviewing, identifying appropriate positions, writing effective cover letters and resumes, obtaining references, and identifying employer expectations and interview preparation, all in a way that helps the student identify and promote the skills learned in their liberal arts major(s). This course examines several workplace settings including: working in the non-profit sector, corporate environment, research, education, and mental health facilities. Most sections of this course will include 3 or more of these modules, depending on student interest.

Repeatability: This course may not be repeated for additional credits.

CLA 1919. Honors Discovering the American Legal System. 2 Credit Hours.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CLA 2010. Special Topics in Liberal Arts I. 1 Credit Hour.

Specific topics vary each semester. Contact department chair for information.

Repeatability: This course may be repeated for additional credit.

CLA 2020. Special Topics in Liberal Arts II. 2 Credit Hours.

Specific topics vary each semester. Contact department chair for information.

Repeatability: This course may be repeated for additional credit.

CLA 2030. Special Topics in Liberal Arts III. 3 Credit Hours.

Specific topics vary each semester. Contact department chair for information.

Repeatability: This course may be repeated for additional credit.

CLA 2096. Approaches to Liberal Studies. 3 Credit Hours.

This course is designed to serve as an introduction to interdisciplinary studies in the Bachelor of Arts in Liberal Studies program and will focus on a particular facet of American culture. Through course readings and occasional screenings this course will trace out the key concepts and debates within a liberal arts discipline. This course may take a disciplinary approach (How do sociologists think about a variety of social problems?) or might look at a theme from multiple disciplines (What are the shifting definitions of stardom?). This writing intensive course will reintroduce students to the critical thinking, writing, and research skills that are fundamental to upper level courses in the liberal arts and should be taken within the first year of the major. This course is open only to students in two programs: BA in Liberal Studies and BGS in General Studies.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

CLA 2685. Internship. 1 to 12 Credit Hour.

Consult with instructor.

Repeatability: This course may be repeated for additional credit.

CLA 2701. The Washington Center Seminar. 3 Credit Hours.

This course is restricted to participation in The Washington Center program. Students participate in a combination of academic seminars and intern in the Washington DC area. More details can be found at www.cla.temple.edu/ipa.

Repeatability: This course may not be repeated for additional credits.

CLA 2785. The Washington Center Internship. 3 to 9 Credit Hours.

This course is restricted to participation in The Washington Center program. Students participate in a combination of academic seminars and intern in the Washington DC area. More details can be found at www.cla.temple.edu/ipa.

Repeatability: This course may not be repeated for additional credits.

CLA 3075. Corporate Interdisciplinary Seminar. 3 Credit Hours.

Drawing on the literature from the disciplines of sociology, psychology, economics, history and others, this interdisciplinary seminar is the academic component accompanying an internship in the corporate sector for CLA juniors and seniors. It will appeal to those students interested in future employment in for-profit companies regardless of CLA major. These upper division students will learn to understand the importance and relevance in corporate settings of the skills developed through their liberal arts academic experience. NOTE: Junior or senior standing in CLA (preference given to seniors); 3.0 cumulative GPA; approval of instructor required.

Repeatability: This course may not be repeated for additional credits.

CLA 3085. Corporate Interdisciplinary Internship. 3 Credit Hours.

In this internship, Liberal Arts students will have the opportunity to work for ten hours a week in a for-profit industry such as financial services, healthcare, insurance, technology, human services, and communication. They will work and interact with a variety of departments including legal, human resources, marketing, public relations, technology, customer service, and community relations. NOTE: Junior or senior standing in CLA (preference given to seniors); 3.0 cumulative GPA; approval of instructor required.

Repeatability: This course may be repeated for additional credit.

CLA 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

CLA 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

CLA 3900. Honors Interdisciplinary Special Topics I. 3 Credit Hours.

Variable offerings on special topics that explore topics or issues from an interdisciplinary perspective. Check with the Honors Program office and/or web site (www.temple.edu/honors) for details on Special Topics courses. NOTE: Restricted to Honors students only.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

CLA 4900. Honors Interdisciplinary Special Topics II. 3 Credit Hours.

Variable offerings on special topics that explore topics or issues from an interdisciplinary perspective. Check with the Honors Program office and/or web site (www.temple.edu/honors) for details on Special Topics courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

CLA 4901. Honors Interdisciplinary Research Methods. 3 Credit Hours.

This course is designed for upper-level Honors students interested in developing an interdisciplinary research project. This course introduces the student to the techniques and disciplines used in interdisciplinary research in addition to how to design such research, how to communicate with specialists in other fields, and how to use existing sources of data to address an interdisciplinary problem or issue selected by the student. Students will be able to pursue research topics of their own design, and use this course to develop the topic of their Honors Thesis.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CLA 4902. Honors Interdisciplinary Thesis. 3 Credit Hours.

Designed as a continuation of Liberal Arts 4901, this course provides the student support during the development of the research project, the writing, completion, and presentation of the Honors Thesis project in interdisciplinary studies.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CLA 4910. Honors Humanities Special Topics. 3 Credit Hours.

Variable offerings on special topics that explore topics or issues in the humanities. Check with the Honors Program office and/or web site (www.temple.edu/honors) for details on Special Topics courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

CLA 4911. Honors Humanities Research Methods. 3 Credit Hours.

This course is designed for upper-level Honors students majoring in the humanities. The course focuses on the research methods common to disciplines in the humanities and provides experiences in developing a meaningful research question, understanding the basic tools available, and developing an individual research project. Students will be able to pursue research topics of their own design, and use this course to develop the topic of their Honors Thesis.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CLA 4912. Honors Humanities Thesis. 3 Credit Hours.

Designed as a continuation of Liberal Arts 4911, this course provides the student support during the development of the research project, the writing, completion, and presentation of the Honors Thesis project in the humanities.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CLA 4920. Honors Social Science Special Topics. 3 Credit Hours.

Variable offerings on special topics that explore topics or issues in the social sciences. Check with the Honors Program office and/or web site (www.temple.edu/honors) for details on Special Topics courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

CLA 4921. Honors Social Science Research Methods. 3 Credit Hours.

This course is designed for upper-level Honors students majoring in the social sciences. The course focuses on the research methods common to disciplines in the social sciences and provides experiences in developing a meaningful research question, understanding the basic tools available, and developing an individual research project. Students will be able to pursue research topics of their own design, and use this course to develop the topic of their Honors Thesis.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CLA 4922. Honors Social Science Thesis. 3 Credit Hours.

Designed as a continuation of Liberal Arts 4921, this course provides the student support during the development of the research project, the writing, completion, and presentation of the Honors Thesis project in the social sciences.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

College of Public Health & School of Social Work (CHP)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CHP 0840. GenEd Limited Edition GG. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Global/World Society requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

CHP 0860. GenEd Limited Edition GS. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Science and Technology requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

CHP 0940. Honors GenEd Limited Edition GG. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Global/World Society requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

CHP 0960. Honors GenEd Limited Edition GS. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Science and Technology requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

College of Science and Technology (SCTC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

SCTC 0712. Mathematical Concepts I. 0 Credit Hours.

The goal of this course is to give students a firm foundation in the topics of intermediate algebra as a basis for subsequent courses in mathematics and other disciplines. Included in this goal is the development and strengthening of one's skill in interpreting and solving application problems. Intermediate Algebra begins with a presentation of topics of Algebra including use of variables, exponents, order of operations. Further topics include solving linear equations and inequalities, understanding and graphing linear equations in two variables, finding the equation of a line, applying the laws of exponents, performing operations with polynomials, factoring polynomials, and solving polynomial equations. The skill of solving equations will be extended to formulating and solving equations of applied problems. Students will be offered the opportunity to use MyMath Test with instructor support as they work through the course material and will be offered the opportunity to re-take the Math Placement Test upon completion of the course. Note: The fee for this course may be found in the Detailed Class Information, which can be reached from the class schedule listing.

SCTC 0721. Mathematical Concepts II. 0 Credit Hours.

This course emphasizes techniques of problem solving using algebraic concepts. This course will prepare students for Pre-calculus by review of multiple algebraic concepts. This course covers polynomial, rational and algebraic expressions, solving linear equations and inequalities, algebra and graphs of quadratic expressions, and an introduction to the concept of a function. Approaches to problem solving will be emphasized. Students will be offered the opportunity to use MyMath Test with instructor support as they work through the course material and will be offered the opportunity to re-take the Math Placement Test upon completion of the course. Note: The fee for this course may be found in the Detailed Class Information, which can be reached from the class schedule listing.

SCTC 0727. Chemical Concepts. 0 Credit Hours.

In this course quantitative practices in chemistry will be emphasized. Topics include empirical and molecular formula, reaction quantities, stoichiometry, thermochemistry and gas properties. Core concepts and principles will be reviewed. A significant component of the course will focus on problem solving skills. A discussion of expectation and test taking practices in preparation for General Chemistry will be provided. Note: The fee for this course may be found in the Detailed Class Information, which can be reached from the class schedule listing.

SCTC 0860. GenEd Limited Edition GS. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Science and Technology requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

SCTC 0960. Honors GenEd Limited Edition GS. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Science and Technology requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GS, HO

Repeatability: This course may not be repeated for additional credits.

SCTC 1001. CST First Year Seminar. 1 Credit Hour.

This course is typically offered in Fall.

This course provides students with the foundation necessary for success in college. Students engage in interactive workshops to develop the academic, professional, and life skills required for Science and Technology students. Topics include: study habits, test-taking strategies, time management tools, goal setting techniques, financial literacy, communication in college, and university resources/navigation/utilization. Students work closely with the instructor to develop an academic plan. NOTE: Registration for this course is restricted to first year students enrolled in the College of Science & Technology.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may not be repeated for additional credits.

SCTC 1002. STEM Scholars Seminar. 1 Credit Hour.

This course provides students majoring in Biology, Biochemistry, and Chemistry with the foundation necessary to succeed in college. Student participants in the Emerging STEM Scholars program are required to attend these weekly seminars in both the fall and spring semesters over all four years, enabling them to develop the academic, professional, and life skills required for success in a science or science-related career. Topics will include: study habits, test-taking strategies, time management tools, and contact with academic and industrial scientists. The seminars will be led by advanced graduate student mentors in computational biology or chemistry. As needed, students will be directed to appropriate university provided resources. NOTE: Registration for this course is restricted to participants in the Emerging STEM Scholars program.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: STEM.

Repeatability: This course may be repeated for additional credit.

SCTC 1003. STEM Connections Seminar. 1 Credit Hour.

This one credit course will engage first-year students in explorations of inter- and trans-disciplinary themes in science and mathematics. Themes include (but are not limited to): Fragile Futures, Molecules to Medicine, Modern Materials, Dark Matter/Dark Energy, Modeled by Math, and Designed by Data. Faculty from CST departments will contribute a 30-45 minute presentation to a series of six seminars related to one of the selected themes. Students are to contribute broadly to a discussion of the theme. Students will complete activities and/or assignments related to the faculty presentations.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

SCTC 1013. Elements of Data Science for the Physical and Life Sciences. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This course provides a basic introduction to data science. Data is ubiquitous in our society, as it is processed in fields including science, medicine, economics, and business. We evaluate surveys, test performance, analyze large data sets and more. This course will help students to understand how data is generated, collected, and used. Both inferential and computational thinking will be applied to practical problems and common problems faced by all in the sciences. Students will learn basic computer programming and statistical inference by working, hands-on, with real world problems. This course is based on the Foundations of Data Science (Data 8) course designed by faculty at UC Berkeley and distributed widely to academic partners. Data projects will be selected from the basic sciences including biology, ecology, environmental science, genomics, chemistry and physics. This approach will allow students from the physical, life and mathematical sciences to engage in disciplinary knowledge in their majors as they learn and apply basic tools of data science. The applications will focus on experimental design, basic simulation and data analyses. Course topics will be explored using on-line resources in a collaborative learning classroom environment. To increase student engagement and success, the topics will be broken into smaller modules with focused exercises that allow scaffolding of the computer programming and basic statistics curricula. This course is a component of the recommended CST first-year student curriculum.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), or 'Y' in MC6T)

SCTC 1021. Journey of the Algorithm. 1 to 4 Credit Hour.

Students will explore mathematics via discussions, manipulative methods, and other techniques. By completing tasks provided by the instructor, students will make authentic connections across the mathematical platform. The tasks will allow students to investigate mathematics from an integrated approach, bringing appropriate mathematical phenomena and algorithms into their solutions as needed. Science applications will be part of each curricular unit, and this content will support integration of mathematics into science lessons for students in the TUteach program.

Repeatability: This course may not be repeated for additional credits.

SCTC 1189. Step 1: Inquiry Approaches to Teaching. 1 Credit Hour.

This course is typically offered in Fall and Spring.

This is the first course in the TUteach pedagogy sequence. This course will provide students with an opportunity to explore teaching in science or mathematics as a career; early field experiences in teaching; and an introduction to the theory and practice necessary to prepare and deliver excellent instruction. To obtain first-hand experience with planning and implementing inquiry-based curriculum, students will teach science/mathematics lessons (designed in NSF-funded project) in elementary classrooms in a local school district. Students will attend 1.5 hours of class on campus each week, where they will learn to prepare and deliver excellent science/mathematics lessons. Students, working in teams, will present three lessons in a third, fourth, fifth or sixth grade classroom during the semester. These classrooms are selected both for the diversity of the student body and for the quality of the classroom teacher. Each team of students will have a district classroom teacher and a TUteach master teacher who will work with them to improve their teaching skills as the semester progresses. The district classroom teacher will remain in the classroom at all times and provide immediate feedback on the quality of the instruction. A tuition remission stipend will be paid to those students who successfully complete this course.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1021, any MATH course numbered 1022 to 4999 (C- or higher; may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, 'Y' in MC6A, STAT 1001, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in CRMA04, 'Y' in CRST01, 'Y' in CRST02, or 'Y' in MC6T)

SCTC 1289. Step 2: Inquiry Based Lesson Design with Strategies for English Learners. 1 Credit Hour.

This course is typically offered in Fall & Spring.

This is the second course in the TUteach pedagogy sequence. This course offers students the opportunity to explore science or mathematics teaching as a career, first-hand experience planning inquiry-based curriculum, and an introduction to theory, research and practice in teaching English language learners in the middle grades. Students will explore the philosophies of bilingual and ESL education as well as different program models that address the education of linguistically diverse students. Students attend 1.5 hours of class on campus each week, where they learn to design and deliver inquiry-based lessons with an understanding of how to adapt standards-based lessons for English language learners. Students teach three lessons in middle grade classroom during the semester. Students will also develop cross-cultural competence through interactions with ELLs, teachers and school staff in the middle grades. After Step 2, students can decide whether they want to pursue teacher certification through the TUteach program.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in SCTC 1189.

SCTC 1301. Problem Solving in Science. 2 Credit Hours.

This course is typically offered in Fall and Summer II.

As a gateway into science majors, this introductory course will show students how to apply critical thinking and build problem solving skills in all science disciplines. We will look at a vast array of actual problems that you will be confronted with in courses in Biology, Chemistry, Computer Science, Geology, Mathematics and Physics. Problem solving processes and techniques that will be beneficial in solving complex and intricate problems that naturally arise in the sciences will be examined. Rote problems designed to give you practice at learning subject matter are straightforward. Actual science takes place, however, in conceptual, non-formulaic problems, which form the essence of the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

SCTC 1385. Community Engagement: Science and Mathematics Tutoring Mentoring and Service. 1 to 3 Credit Hour.

Students, sophomores and above, will apply in a real world setting, teaching, tutoring, mentoring and/or curriculum development skills. Students will work with the instructor to identify a set of background readings on: a) science and math background content, b) populations to be served, particular needs of these populations, and proven approaches to tutoring, mentoring, or developing curriculum for inquiry-based science or mathematics lessons for in-school or out-of-school activities to be offered, and c) the relationship of science to society for the particular placement. After this background research, students will develop a proposal, carry out the teaching/tutoring/mentoring/curriculum development they proposed, and reflect on the efficacy of their project.

Repeatability: This course may not be repeated for additional credits.

SCTC 1389. Step 1 and 2: Inquiry-Based Lesson Design in Science and Mathematics Modified for English Learners. 2 Credit Hours.

This course is typically offered in Fall and Spring.

This is the first course in the TUTEACH pedagogy sequence. This course will provide students with an opportunity to explore teaching in science or mathematics as a career; early field experiences in teaching; and an introduction to the theory and practice necessary to prepare and deliver excellent instruction. Students will attend 3 hours of class on campus each week, where they will learn to prepare and deliver excellent inquiry-based science/mathematics lessons. Each team of students will have a district classroom teacher and a TUTEACH master teacher who will work with them to improve their teaching skills as the semester progresses. The district classroom teacher will remain in the classroom at all times and provide immediate feedback on the quality of the instruction. Students will become familiar with elementary and middle school environments as well as the instructional needs of English language learners (ELLs) by observing and discussing middle school culture and by teaching lessons to a middle school class that includes ELLs. They will become familiar with exemplary science curricula for the middle school setting. This course also offers students an introduction to theory, research, and practice in teaching English language learners in the middle grades. Lesson plans will be designed using a modified SIOP (Sheltered Instruction Observation Protocol) model, a model teachers use to differentiate instruction for ELLs. As a result, they will gain an understanding of how to adapt standards-based lessons for English language learners. Students will also develop cross-cultural competence through interactions with ELLs, teachers and school staff in the middle grades. This course helps students determine if they wish to choose a teaching career.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1021, (MATH 1021 (may be taken concurrently) and SCTC 1021 (may be taken concurrently)), (MATH 0702 (may be taken concurrently) and SCTC 1021 (may be taken concurrently)), any MATH course numbered 1022 to 4999 (C- or higher; may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, 'Y' in MC6A, STAT 1001, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in CRMA04, (SCTC 1021 (may be taken concurrently) and 'Y' in CRMA04), (SCTC 1021 (may be taken concurrently) and 'Y' in CRMA01), 'Y' in CRST01, 'Y' in CRST02, (MATH 1021 (may be taken concurrently) and 'Y' in CRTC01), ('Y' in CRMA04 and 'Y' in CRTC01), (MATH 0702 (may be taken concurrently) and 'Y' in CRTC01), ('Y' in CRMA01 and 'Y' in CRTC01), or 'Y' in MC6T)

SCTC 1501. STEM Challenge: The World Around Us. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course provides an exploration of the world around us using an integrated and conceptual approach that includes the major themes: life science, physical science and environmental sciences. Topics of matter and motion, electricity and magnetism, sound and light, astronomy and earth science will be integrated to understand natural phenomena. In addition, students in the course will investigate the role of science through reading "Science in the News" and other current science-focused publications. The course is part of a two semester sequence intended to prepare students with a strong background in science to support disciplinary majors or to prepare elementary education majors with the necessary background to teach science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (any MATH course numbered 0701 to 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1102, STAT 1902, 'Y' in STT2, 'Y' in MATW, 'Y' in MC3S, 'Y' in CRMA18, 'Y' in CRMA19, 'Y' in CRST02, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

SCTC 1502. STEM Challenge: The World Within. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course provides an exploration of the world within using an integrated and conceptual approach that includes the major themes: life science, physical science. Topics including biomolecules and the cell, biochemical cycles, proteins and DNA, cellular processes, genetics, evolution, anatomy and plant biology and ecology will be integrated to understand natural phenomena associated with organisms in their habitats. In addition, students in the course will investigate the role of science through reading "Science in the News" and other current science-focused publications. The course is part of a two semester sequence intended to prepare students with a strong background in science to support disciplinary majors or to prepare elementary education majors with the necessary background to teach science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (any MATH course numbered 0701 to 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1102, STAT 1902, 'Y' in STT2, 'Y' in MATW, 'Y' in MC3S, 'Y' in CRMA18, 'Y' in CRMA19, 'Y' in CRST02, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

SCTC 2001. CST Transfer Seminar. 1 Credit Hour.

This course provides transfer students with the foundation necessary for success in the College of Science and Technology and provides guided exploration of the opportunities and resources at Temple University. Students engage in interactive workshops to develop the academic, professional, and life skills required for Science and Technology students. Topics may include: study habits, test-taking strategies, time management tools, goal setting techniques, financial literacy, communication in college, university resources/navigation/utilization, potential career paths, obtaining internships, research opportunities, getting involved on campus, and graduate school preparation. Students work closely with the instructor to develop an academic plan.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

SCTC 2002. CST Professional Development Seminar. 1 Credit Hour.

CST's Professional Development Seminar will introduce students to central concepts, resources, and skills to prepare for the career exploration and job search/application process, as well as develop leadership skills. Topics include: learning one's strengths, career exploration, resume writing, networking, cover letter writing, interview preparation, and the science of building high-performing teams and organizations. Students will complete individual and collaborative in-class assignments and exercises to develop their professional skills.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may not be repeated for additional credits.

SCTC 2082. Sophomore Directed Study. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Intensive study in a cross-disciplinary area. This course does not count for a major elective credit in a CST major. Prerequisites are completion of one year of an introductory science sequence in a CST department.

Repeatability: This course may not be repeated for additional credits.

SCTC 2100. Special Topics in Science and Technology. 1 to 6 Credit Hour.

This course is typically offered in Fall and Spring.

This course will challenge students to examine topics in the sciences (Earth Science, Environmental Science, Chemistry, Biology, Physics, Computer and Information Science, Mathematics) and appreciate that the sciences are inter- and cross-disciplinary. Students may also be required to use a variety of problem solving skills to address specific issues related to the topic selected. Selected topics include current discoveries or analysis of seminal works in various scientific fields.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, BIOL 2112, BIOL 2912, CHEM 1031, CHEM 1951, CIS 1068, CIS 1968, EES 2001, PHYS 1061, PHYS 2021, PHYS 2921, or 'Y' in BIOW) and (MATH 1022 (may be taken concurrently), any MATH course numbered 1038 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

SCTC 2101. Medical Imaging Physics - Seeing Through Ourselves. 3 Credit Hours.

From practically the very day x-rays were discovered in 1895, the use of physics-based methods to see inside the body without surgery has helped greatly reduce suffering from disease and injury. Accuracy and certainty of diagnosis have continuously improved, and the effectiveness of treatment can easily be monitored. This course will provide descriptions of the basic physical science behind conventional and modern medical imaging methods. Topics include endoscopy, laser light scattering, ultrasound, conventional and tomographic x-ray imaging, PET and other nuclear medicine methods, and MRI.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1022, CHEM 1032, or CHEM 1952) and (PHYS 1021, PHYS 1061, PHYS 2021, PHYS 2921, or CIS 2168)

SCTC 2102. SERC: Science of Energy Resource Consumption. 3 Credit Hours.

This course is typically offered in Fall.

This course delves into our scientific understanding of the Earth, its resources, and the methods of resource extraction necessary to meet societal demand. We will consider the increasingly complex and large-scale methods of energy extraction. In addition, we will investigate clashes between societal demands for these resources, interest groups on the demand and supply side, and the public perceptions of the science. Students will obtain skills in earth sciences applied to energy and resources, but also skills in communicating uncertainty and scientific results to the general public.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, BIOL 2112, BIOL 2912, CHEM 1031, CHEM 1951, CIS 1068, CIS 1968, EES 2001, PHYS 1061, PHYS 2021, PHYS 2921, or 'Y' in BIOW) and (MATH 1022 (may be taken concurrently), any MATH course numbered 1038 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

SCTC 2105. Best Selling Science and Mathematics. 3 Credit Hours.

Students in this course will read and analyze two best selling books written along science and mathematics themes. The books selected will vary by semester to cover topics from the various disciplines of science. Advanced reading topics will be selected from the literature as it relates to the assigned reading from the best selling books. Major writing assignments and integrated classroom activities will emphasize the development of conceptual knowledge in math and science. Statistics and data science applications to book topics will be infused throughout the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 1022 and (any CHEM course numbered 1021 to 4999, any BIOL course numbered 1011 to 4999, CIS 1051, CIS 1057, any CIS course numbered 1068 to 4999, any EES course numbered 2001 to 4999, or any PHYS course numbered 1021 to 4999)

SCTC 2106. Learning Science with New Media. 3 Credit Hours.

Over the last 10 years there has been a renaissance in the way people communicate about and learn science. These new ways involve newer tools, techniques, and the power of social media to inform and collaborate. Examples of these groundbreaking learning tools include, but are not limited to, Khan Academy, SciShow, Veritasium, ASAPScience, Zooniverse and others. The online science learning tools are followed by hundreds of thousands to millions of people around the world interested in learning science. The purpose of this course is twofold: 1) for students to learn how to develop and use these new tools so that they can communicate science to a broader audience and 2) to join a team of researchers on a project aligned to their area of study and contribute to the data collection of that research through citizen science. The course is divided into 2 parts that align with these purposes. In Part One of the course (developing and using tools to create science communication media), students will engage a specific audience (student, teacher, parent or the general public) and learn to write a script that matches that level of audience engagement. In Part Two of the course, students will join a science research team and learn how this team is communicating their work and data. The students in this course will utilize one of a myriad of citizen science curated online tools such as SciStarter, Zooniverse, Smithsonian, National Geographic, and Foldit among others.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 1022 and (any CHEM course numbered 1021 to 4999, any BIOL course numbered 1011 to 4999, CIS 1051, CIS 1057, any CIS course numbered 1068 to 4999, any EES course numbered 2001 to 4999, or any PHYS course numbered 1021 to 4999)

SCTC 2201. Peer Leader Development Seminar. 1 Credit Hour.

This 1-credit course is designed to prepare students for their future role as Peer Leaders in a section of the College of Science and Technology's required first year seminar or transfer seminar. Students will explore various topics such as leadership development, information processing theory, diversity awareness, active learning strategies, lesson plan design, presentation acumen and knowledge of university resources in order to prepare them to integrate this knowledge into a Peer Leader role. This course will prepare students for this position by providing them with proper skill development to be applied during their time as a Peer Leader. Registration for this course is restricted to students who wish to pursue a Peer Leader position in a CST first year or transfer seminar in the following semester.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of CR in (SCTC 1001 or SCTC 2001)

SCTC 2385. Internship in Informal Science Education. 1 to 6 Credit Hour.

This course is typically offered in Fall, Spring, Summer I, and Summer II.

Students registering for the course will be working as instructional assistants in a variety of informal education venues. The student will be responsible for delivering science content to middle and high school students in after school programs or summer programs. The students registered for this course will be responsible for lesson planning, implementation and assessment.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher), MATH 1038 (C or higher), MATH 1031 (C or higher), 'Y' in MATW, 'Y' in CRMA06, or 'Y' in CRMA08), (SCTC 1385 (C or higher) or SCTC 1389 (C or higher)), and (CHEM 1032, CHEM 1042, CHEM 1052, BIOL 1111, BIOL 1911, BIOL 2112, BIOL 2912, (BIOL 1011 and BIOL 1012), EES 2011, EES 2021, EES 2065, PHYS 1022, PHYS 1062, PHYS 2022, PHYS 2922, or 'Y' in BIOW)

SCTC 2389. Step 3: STEM Classroom Teaching. 2 Credit Hours.

This course provides additional classroom observation and practice for intending science and mathematics teachers by focusing on instruction that requires high level STEM content and understanding of different classroom behaviors, pedagogies, and multi-modal assessments. TUteach students are encouraged to take this course to enhance their classroom experience portfolio. CST majors may take this course as an elective with approval of the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 2112, CHEM 1032, EES 2011, EES 2096, PHYS 1062, PHYS 2022, or 'Y' in BIOW) and (MATH 1041, MATH 1031, or 'Y' in MATW)

SCTC 2396. Writing for Science and Technology. 3 Credit Hours.

This course will teach students how to become more effective writers by developing their technical writing skills through practical examples and exercises. The disciplinary content for the writing assignments will be based on the content from the student's major area: biology, chemistry, earth and environmental science, or physics. Specifically, students will learn the process of developing professional scientific documents, including abstract preparation, literature research practice, use of scientific databases, and creation of white papers leading to final proposals. The ability to formulate a research proposal is a critical skill for students entering research careers or working in scientific industries. All documents and assignments will be reviewed by faculty in the science disciplines.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1031, MATH 1941, or 'Y' in MATW) and (BIOL 1111, BIOL 1911, BIOL 1012, BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, CHEM 1032, CHEM 1952, EES 2011, PHYS 1022, PHYS 1062, PHYS 1962, PHYS 2022, PHYS 2922, or 'Y' in BIOW)

SCTC 3001. History of Science. 3 Credit Hours.

This course is not offered every year.

The first two objectives of this course are to give the students a working knowledge of the broad developments in science since the ancient world and to give them familiarity with the concept of the Scientific Method necessary for understanding areas of science not covered in the course. The ultimate objective is to provide students with the skill to evaluate claims and classify them as scientific or un-scientific. Students will take an inquiry-based approach through readings and discussions and will address both the scientific history and its role in controversial social and moral issues such as pollution, child labor in the Industrial Revolution, weapons in wartime, attitudes toward women, and science and religion. The course will survey the genesis of the Scientific Revolution and go on to examine the work of scientists in the 16th century through today.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SCTC 3082. Junior Individual Research. 1 to 4 Credit Hour.

This course is typically offered in Fall and Spring.

This course is intended for students doing multidisciplinary research under the direction of a CST faculty member that is not in the student's home department. This course does not count for major elective credit in any CST major. Prerequisites are successful completion of at least two upper-level (2000+) courses in their CST major.

Repeatability: This course may be repeated for additional credit.

SCTC 3185. Laboratory Experiences in STEM for Pre-Service and In-Service Teachers. 1 to 3 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course will offer students intending teaching careers and those in-field an opportunity to perform several small research projects that would be adaptable to implementation in classrooms as extended activities. The students in the course will be expected to complete laboratory projects that integrate Pennsylvania and Next Generation Science Standards. The students in the course are expected to develop a mini-proposal/work plan, create a project safety plan, complete project objectives and submit a final report for each short project that not only describes the STEM work in journal format, but provides a detailed description of how the project might be implemented in a school setting and how the goals and objectives of the project meet educational science standards.

Cohort Restriction: TUteach students and in-service teachers holding Level I certification in one or more STEM disciplines.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in EDUC 2179 and (SCES 2189 (may be taken concurrently) or MAES 2189 (may be taken concurrently))

SCTC 3201. Research On and Assessment of STEM Teaching Practices. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Students will learn about innovative and emerging trends and resources that support effective learning in science, technology, engineering, and mathematics education. One aspect of the course will focus on recent research findings and how they can be applied within instruction throughout a K-16 environment. Another aspect of the course will focus on existing learning tools and the development of original STEM content. Tools that allow this content to be distributed to a regional or global audience will also be explored. These distribution tools also allow for additional support, user feedback, and user/developer collaboration. Analysis of data from ongoing STEM research projects will also be explored. Cohort Restriction: TUteach students and in-service teachers holding Level I certification in one or more STEM disciplines.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1031 (C or higher; may be taken concurrently), 'Y' in MATW, 'Y' in CRMA06, or 'Y' in CRMA08), (MAES 2189 (may be taken concurrently), SCES 2189 (may be taken concurrently), or SCTC 3485 (may be taken concurrently)), and (CHEM 1032, CHEM 1042, CHEM 1052, BIOL 1111, BIOL 1911, BIOL 2112, BIOL 2912, (BIOL 1011 and BIOL 1012), EES 2011, EES 2021, EES 2065, PHYS 1022, PHYS 1062, PHYS 2022, PHYS 2922, or 'Y' in BLOW)

SCTC 3312. Coding STEM Lessons. 1 to 3 Credit Hour.

This course requires that students create STEM lessons and projects that integrate science and/or mathematics and coding. The purpose of integrating science and/or mathematics and coding is to introduce coding to a broad audience that includes intending teachers and learners from all disciplines and reinforce STEM content through the coding algorithm. For each credit hour, students will create and present 4 STEM-coded lessons. 1 credit will be required for all TUteach majors. Students can repeat the course up to a total of 3 credit hours.

Repeatability: This course may be repeated for a total of 3 credit.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, CHEM 1032, CHEM 1952, EES 2001, PHYS 1062, PHYS 1962, or 'Y' in BLOW) and (MATH 1021, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MA03, 'Y' in MATW, or 'Y' in MC6T)

SCTC 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

This course is typically offered in Fall and Spring.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

SCTC 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

This course is typically offered in Fall and Spring.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

SCTC 3485. Science and Mathematics in the Classroom. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course moves from a focus on thinking and learning to a focus on teaching, learning and classroom management. Topics include principles of delivering effective instruction, integration of formative assessment in lesson planning, developing classroom management practices, unit lesson planning. Students will also examine issues of gender, class, race, and culture in mathematics and science education and policies related to mathematics and science education. Additionally, students will examine different classroom settings reviewing video from urban, suburban and rural classrooms. Students will intern for one week in a local school and present a full STEM unit. The course will be an early term Spring or a SSI offering. The course will use hybrid pedagogy. The reading and study unit will be taught through a series of online modules. The practice will be on-site at TU and local high schools, HSES, U-School, Elverson.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (EDUC 2179 (may be taken concurrently) or 'Y' in CRED02) and SCTC 1389 (may be taken concurrently)

SCTC 4001. Responsible Conduct of Research. 2 Credit Hours.

This course is not offered every year.

The course is designed to expose undergraduate students to the research environment in terms of a research code of conduct and ethical standards. The course is open to senior undergraduate students of all majors with special authorization required. The course has no specific prerequisites and it does not count as a biology major elective. The course will fulfill the requirement for training in responsible conduct of research for students funded by the National Institutes of Health.

Repeatability: This course may not be repeated for additional credits.

SCTC 4321. Entrepreneurship in Science and Technology. 3 Credit Hours.

This course is not offered every year.

The theme of this course is identifying opportunity and application. It will demonstrate that in every area of interest, or course of study, there is an entrepreneurial potential. Students will be given the basic knowledge to pursue their ideas and to understand the steps required to finance, promote, staff, and manage a business. The goal, however, is not establishing an enterprise but rather developing the skills to relate interests and opportunities; and to apply knowledge of a particular field to its commercial possibilities. The course will use case studies from diverse fields and discuss specific entrepreneurial ventures. There will also be guest speakers from industry to discuss their entrepreneurial endeavors.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

SCTC 4385. STEM Teaching and Assessment in Practice. 7 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course is designed to provide a secondary student teaching experience for TUteach majors that meets PDE requirements for student teaching and will encompass the full context of pedagogy and assessment specific to STEM disciplines. Use of electronic resources and application of teaching methods to students of different backgrounds and abilities will be emphasized. Approaches to and methods of teaching STEM to ELL students will be part of all lessons. Each of these lessons will be documented with video. Prerequisites: Research Methods (BIO/CHEM/EES/PHYS 3091), Competitive Praxis score, Praxis II score within 1 semester of passing, Permission of instructor. Completion of major requirements and education course sequence. Students taking this class cannot register for any other academic course without approval of their advisor with the single exception of MATH 4096.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Repeatability: This course may not be repeated for additional credits.

SCTC 4396. Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data. 3 Credit Hours.

In this course students will integrate study of descriptive research methods and corresponding statistical concepts that are applied to medicine and clinical research. Topics include ethical considerations, research techniques, graphing, variability, linear regression and correlation. Students will learn how data is used in science policy development. Basic statistical approaches, research protocols and ethics will be discussed. The class will be conducted as slide lecture and discussion; readings will be drawn from texts and scientific journals.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1942, MATH 1031, MATH 1044, or 'Y' in MATW) and ((CHEM 1032 and CHEM 1034) or (CHEM 1952 and CHEM 1954))

SCTC 4401. Cyber STEM Lessons. 3 Credit Hours.

This course provides instructors with research-based best practices for transferring teaching materials from a traditional classroom to a virtual one. Students will examine, interact with, and evaluate the application of a wide-range of technology-based innovations to achieve and assess learning goals and actively engage K-12 students in the online environment.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SCTC 1389 and (EDUC 2179, SCES 2189, or MAES 2189)

SCTC 4485. Integrating STEM Practice in Diverse Teaching Environments. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course will combine lecture instruction with significant field work. Students in the class will develop evidence-based lessons based on best practices literature. They will apply the best practice of scientists and engineers in multiple teaching venues and in classrooms with students of diverse backgrounds and abilities. Students will develop, implement and assess lessons that are discipline specific but integrated with other curricular themes. These lessons will incorporate technology, use of electronic/virtual lessons, real world problem solving and the design process. Students will develop these lessons with faculty mentors from their discipline in collaboration with master teachers in the TUteach program. Four unique lessons will be created. Students will practice the lesson and create a video of each lesson prior to delivery. These lessons will be reviewed prior to implementation in the school setting. Feedback will allow for modification of the lesson. Students will serve as peer reviewers for these lessons as well.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (SCES 2189 (may be taken concurrently), SCTC 2385 (may be taken concurrently), or SCTC 3385 (may be taken concurrently))

Communication and Social Influence (CSI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CSI 0801. Contemporary American Social Movements. 3 Credit Hours.

This course introduces students to the study of contemporary American social movements from a communication perspective. Our primary focus is on the symbolic strategies social movements use to attract members, address counter-movements, and engage dominant social institutions. The course progresses through three sections: a discussion of the characteristics and types of social movements, an examination of the persuasive tactics used by social movements, and an analysis of the persuasive materials/tactics used by social movements. These materials and tactics include documentaries, speeches, videos, social media posts as well as protests, campaigns, and violent acts. The course also teaches students how to understand social movements using perspectives from political science, sociology, and economics/business. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 0801, STRC 0901 or CSI 0901.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

CSI 0836. Interpersonal Communication: Critical Competencies for Professional and Personal Success. 3 Credit Hours.

The primary goal of this course is to help you enhance your interpersonal communication competence so you have successful interpersonal communication with your family, friends and work colleagues. In the first phase of the course you will assess your own communication skills. You will develop and set personal goals and an action plan by which to create the change you wish to see. In the course you will learn the basic components of interpersonal communication situations (communicators, content, and contexts) and you will investigate how interpersonal communication needs and effectiveness change throughout life (in early childhood, adolescence, young adulthood, middle age, and old age). The course includes frequent small group discussions which will allow you to integrate course and research information for personal skill development. The course will provide a reflective and supportive environment in which to expand your communication skills and knowledge. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

CSI 0901. Honors Contemporary American Social Movements. 3 Credit Hours.

This honors course provides an advanced introduction to the study of contemporary American social movements from a communication perspective. Our primary focus is on the symbolic strategies social movements use to attract members, address counter-movements, and engage dominant social institutions. The course progresses through three sections: a discussion of the characteristics and types of social movements, an examination of the persuasive tactics used by social movements, and an analysis of the persuasive materials/tactics used by social movements. These materials and tactics include documentaries, speeches, videos, social media posts, as well as protests, campaigns, and violent acts. The course also teaches students how to understand social movements using perspectives from political science, sociology, and economics/business. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 0801, STRC 0901, or CSI 0801.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

CSI 1111. Introduction to Public Speaking. 3 Credit Hours.

Students will prepare, present, and evaluate speeches on significant topics of public concern. The course focuses on the three skills necessary for successful professional public speaking: selecting the appropriate content, organization, and using an effective style of delivery. Students also study more advanced principles of public speaking including critical thinking, the discovery and evaluation of arguments and evidence, audience analysis and adaptation, peer evaluation, speech composition, and persuasion. The course prepares students for making professional presentations in our increasingly diverse workplace. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 1111, STRC 1911 or CSI 1911.

Repeatability: This course may not be repeated for additional credits.

CSI 1112. Introduction to Communication and Social Influence. 3 Credit Hours.

This course provides an overview of the theory, research, and practice of communication and social influence. Students will be introduced to risk, political, and conflict communication techniques and cutting-edge research and how it all applies and/or relates to current events and contemporary culture. Career paths and opportunities for Communication and Social Influence majors are also explored. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2111.

Repeatability: This course may not be repeated for additional credits.

CSI 1113. Persuasion. 3 Credit Hours.

Persuasion viewed from the perspectives of the persuader and persuadee. The course is designed to make students more effective in both roles, and also to raise troubling ethical questions. It covers politics, product advertising, education, and much more. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2112.

Repeatability: This course may not be repeated for additional credits.

CSI 1201. Communication and Civic Engagement. 3 Credit Hours.

The course will generate discussion and debate concerning how we should approach the purpose and function of communication in relation to civic engagement at the national, regional, and local levels across the globe. The role of the citizenry, their communication agency, and what should be our normative expectations for citizens will be a centerpiece of our dialogue. Particular focus will be given to a wide range of communicative (mass, mediated interpersonal, interpersonal) activities.

Repeatability: This course may not be repeated for additional credits.

CSI 1401. Conflict and Communication Behavior. 3 Credit Hours.

This course is designed to introduce theories and concepts pertaining to conflict management with an emphasis on the role of communication in creating, reflecting, and remediating conflict. In addition, emphasis will be given to increasing awareness of productive and disruptive conflict patterns and how conflict behaviors may be affecting interpersonal and organizational relationships.

Repeatability: This course may not be repeated for additional credits.

CSI 1601. Communication and Behavior Change. 3 Credit Hours.

Students of this course will develop a strong understanding of the role that communication plays in behavior prediction and change models. Theories such as the Health Belief Model, Social Cognitive Theory, and the Integrated Model of Behavior Change will be discussed in relation to contemporary health, political, science, and other pro-social campaigns. The class will also cover effective use of fear appeals, conformity, compliance gaining and other theories of social influence, and the diffusion of new behaviors through social networks.

Repeatability: This course may not be repeated for additional credits.

CSI 1911. Honors Introduction to Public Speaking. 3 Credit Hours.

In this honors section of public speaking, students will research, prepare, present, and evaluate speeches on significant topics of public concern. The course focuses on the three skills necessary for successful professional public speaking: selecting the appropriate content, organization, and using an effective style of delivery. Students prepare for more advanced principles of public speaking including critical thinking, the discovery and evaluation of arguments and evidence, audience analysis and adaptation, peer evaluation, speech composition, and persuasion. The course prepares students for making professional presentations in our increasingly diverse workplace. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 1111, STRC 1911, or CSI 1111.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CSI 2101. Communicating Civic Engagement through Sports. 3 Credit Hours.

The sports arena has long been a place where socio-political issues are debated in the marketplace of ideas. This course will offer a historical account of the link between sports and civic engagement. In addition, focus will be given to present-day sports figures, teams, and organizations and the ways they have chosen to engage (or remain outside of) socio-political debates taking place at the local, regional, national, and international levels.

Repeatability: This course may not be repeated for additional credits.

CSI 2111. Argumentation and Advocacy. 3 Credit Hours.

Students learn the basic principles of making arguments. Includes format for analyzing arguments, organizing ideas, providing evidence for claims, and preparing briefs. Students prepare speeches and debates on current public policy issues. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2221.

Repeatability: This course may not be repeated for additional credits.

CSI 2112. Social Influence Inquiry. 3 Credit Hours.

The study of communication and social influence crosses epistemological boundaries, from the humanities to the social sciences. This course provides a foundation of different ways to define and seek out knowledge that, through communication, influences our attitudes, beliefs, and behaviors. Most importantly, it will educate students on how to ask a good question and to think critically about the knowledge they are generating about various communication processes.

Repeatability: This course may not be repeated for additional credits.

CSI 2201. The Meaningful Enjoyment of Civic Life. 3 Credit Hours.

People derive a variety of pleasure from various forms of civic engagement and communication plays a key role in these processes. This course will survey the landscape of social scientific and humanistic approaches to the hedonic and eudaimonic (meaningful enjoyment) motivations associated with communicating about civic activities. Focus will be given to a wide range of entertainment messages types (e.g., satire, irony, sarcasm) provided in different settings (e.g. drama, comedy) that all deal with various types of civic engagement and their effects. The course adopts a global perspective and will focus on a variety of communication processes taking place in Europe, Oceania, and the Middle East to allow for proper comparisons to be made with the United States.

Repeatability: This course may not be repeated for additional credits.

CSI 2296. Resistance, Protests, and Social Movements. 3 Credit Hours.

This class focuses on the communicative dimensions of social movement activity with a focus on the persuasive strategies employed by participants to achieve change and justice. At the heart of change in society are social protest movements; it is here that ideas are shaped, voiced, and possibly believed, followed, and refuted. This course aims to explore the many facets that surround protest and resistance - both from the participants and their opposition. More specifically, we will define the social movement, explain its development, and look at the specific strategies that movements generally employ. By the end of the course, you should be familiar with several specific social movements and have a better understanding of the communicative construction of social protest. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 2296 or STRC 2996.

Course Attributes: SF, WI

Repeatability: This course may not be repeated for additional credits.

CSI 2401. Intercultural and Cross Cultural Conflict. 3 Credit Hours.

This course provides a communication perspective on the nature of intercultural conflict theory, research and practice. In the increasingly global society, communication and social influence requires cultural sensitivity and an awareness of how cultural difference triggers conflict and requires sophisticated conflict intervention. This course reviews theories of culture and conflict and proposes models of conflict intervention that have proven successful in addressing that conflict.

Repeatability: This course may not be repeated for additional credits.

CSI 2403. Civil Disobedience. 3 Credit Hours.

This course introduces students to theories and practices of civil disobedience as a form of political persuasion. The course examines the tactics, strategies, moral debates, philosophical foundations, and persuasive appeals of disruption, intervention, and noncompliance.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CSI 2602. Rhetoric of Hate and Violence. 3 Credit Hours.

This course examines the way rhetors communicate hate and violence through speech, physical acts, media depictions, and art. Students will examine the ways that hate and violence work to persuade, coerce, or force behavioral and cognitive change among individuals, groups, governments, and nations.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CSI 2696. Risk Communication. 3 Credit Hours.

In this course, students will gain a deep understanding of the current research and practice of communicating health, scientific, and environmental risk. We will discuss public understanding of issues that pose risks, such as climate change, global infectious diseases, and engineering the human genome. Different perspectives on risk communication across a variety of disciplines will be explored to provide students an understanding of how people make sense of and use information about risk. Techniques for communicating risk across multiple channels (e.g. mass media, interpersonal, mobile and social) will be covered.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

CSI 3085. Study Away Internship. 1 to 3 Credit Hour.

Students will work at a professional location earning valuable experience that relates to future professional opportunities. Students will keep a diary of their experiences and build a portfolio project that will aid their professional development.

Repeatability: This course may be repeated for additional credit.

CSI 3100. Special Topics in Communication and Social Influence. 3 Credit Hours.

Subject matter not covered by regular departmental course offering. Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

CSI 3182. Independent Study. 3 Credit Hours.

Students will undertake an independent study of an area of Communication and Social Influence not otherwise offered. The study and results of that study will be completed under the supervision of a faculty member. Arranged each semester.

Repeatability: This course may be repeated for additional credit.

CSI 3185. Internship. 1 to 3 Credit Hour.

Students will work at a professional location earning valuable experience that relates to future professional opportunities. Students will keep a diary of their experiences and build a portfolio project that will aid their professional development.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CSI 3186. Study Away Internship. 3 Credit Hours.

Students will work at a professional location earning valuable experience that relates to future professional opportunities. Students will keep a diary of their experiences and build a portfolio project that will aid their professional development.

Repeatability: This course may be repeated for additional credit.

CSI 3187. Practicum. 1 to 3 Credit Hour.

Students will earn valuable experience that relates to future professional opportunities. Students will keep a diary of their experiences and build a portfolio project that will aid their professional development.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CSI 3189. Field Experience. 3 Credit Hours.

Field Experience will acquaint students with actual professional practices in their disciplines. Serves as the first opportunity for the student to gain experience in the communication career path.

Repeatability: This course may be repeated for additional credit.

CSI 3191. Directed Research. 1 to 3 Credit Hour.

Students will engage in the practice of knowledge generation with a full-time faculty member.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CSI 3201. Rhetoric and Civic Culture. 3 Credit Hours.

This course focuses on the nature, strategies, and implications of human discourse within a variety of political and cultural settings. It studies the communicative practices by which public culture is created, sustained, modified, and challenged. Topics include persuasion in electoral campaigns, the political nature of social advocacy, the implications and consequences of media everyday-use, and the relationship between cultural practices and public/ideological communication. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 3323.

Repeatability: This course may not be repeated for additional credits.

CSI 3296. Speechwriting. 3 Credit Hours.

Students prepare speeches for their own presentation and ghost write speeches for others. Emphasis on audience analysis, speech construction, style, persuasion and manuscript preparation. Includes study of practices of prominent speechwriters and their speeches, as well as great speeches in American history.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

CSI 3401. Social Activism and Community Organizing. 3 Credit Hours.

This is a "how-to" course for becoming a social activist and community organizer with a focus on creating and running grassroots campaigns for social justice. Students will learn how to assess social/political problems, how to organize communities into a political force, how to develop mobilization tactics, how to build coalitions with like-minded people, how to lobby elected officials, how to design street actions, and how to implement communication strategies. Over the course of the semester, students will develop their "activist toolbox" for creating real-world change on issues that are most pertinent to their personal passions. Given the location of Temple University, the course places particular emphasis on urban contexts and concerns.

Course Attributes: SI, SS

Repeatability: This course may not be repeated for additional credits.

CSI 3402. Conflict and Influence: Identity, Emotion and Power. 3 Credit Hours.

This course is designed to introduce students to theories and concepts pertaining to conflict management with an emphasis on the role of identity, power and emotion in conflict and social influence. All conflict is driven by identity, emotion and power; the focus of this course is how these drivers create and reflect conflict and how interpersonal and social conflict management must attend to these drivers to secure constructive resolution.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CSI 3601. Misperceptions and Misinformation. 3 Credit Hours.

Many people strongly hold beliefs about science, health, and/or politics that are often unsupported or completely false. This course will explore the psychological and social factors that make people vulnerable to deceptive communication, misinformation, and conspiracy theories and why it is often very hard to correct misinformed beliefs. This course will cover theories of cognitive biases, conformity, identity protection, motivated reasoning, cultural cognition and many more. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 3336 or STRC 2222.

Repeatability: This course may not be repeated for additional credits.

CSI 3602. Communicating Science in Today's World. 3 Credit Hours.

This course will provide an overview of the communication theory, research, and practice of science communication. Students will be introduced to the philosophical and historical implications of the scientific method. In doing so, this course addresses the popularization of science, the politicization of science, and the use and misuse of scientific evidence. The class will be structured into three main areas. The first section of the class will focus on the evolution/revolution that informs scientific knowledge, inquiry, and methods. The second section will cover the communicative processes and functions of scientific knowledge such as norms and values, information presentation, audience cognition and reception biases. The third section will apply communication processes and functions to current case studies on labor, hazard and risk, COVID-19, genetically modified organism (GMO), human gene editing, and gender and sexuality.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CSI 3701. Intercultural Communication. 3 Credit Hours.

This course considers how culture influences communication processes by examining theories of intercultural communication and looking at many of the different processes that make up cultural differences. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 3801.

Repeatability: This course may not be repeated for additional credits.

CSI 3702. Communication, Culture and Identity. 3 Credit Hours.

This course explores how identities, individual and collective, are constructed, maintained, and transformed. From rhetorical and sociological perspectives, this class highlights the fundamental role of intersectionality (i.e., the connections between gender, sexual orientation, class, race, ethnicity, and bodily difference when shaping who is who and what is what) in the construction of personal and social identities. In this class, students will learn not only theoretical issues such as similarity and difference, selfhood and mind, self-image and public-image, but also will be able to analyze the influences and consequences of a mediated discourse of identity. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 3236.

Repeatability: This course may not be repeated for additional credits.

CSI 3703. Intercultural Communication in the Workplace. 3 Credit Hours.

This course brings together research and practice from three areas of study: intercultural communication, organizational communication, and negotiation. Research in these areas has grown extensively over the past decade across disciplines that include communication, management, political science, and psychology. In this course, we will look at how culture influences communication within organizations and in the contexts of negotiating and managing conflicts.

Repeatability: This course may not be repeated for additional credits.

CSI 3801. Social Science Research Methods of Social Influence. 3 Credit Hours.

This course addresses research of social influence from a social science perspective. This course provides students with a working knowledge of how to ask a research question and how to choose a method to address a research question, provides an overview of a broad range of qualitative and quantitative methods, engages students in the challenges of conducting research in the digital era, and offers a cursory glance at data analysis. The course covers key ethical issues involved in the study of individuals and publics. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 3663.

Repeatability: This course may not be repeated for additional credits.

CSI 3896. Rhetorical Criticism. 3 Credit Hours.

This course surveys contemporaneous approaches to rhetorical criticism. In this class, students will study different critical methods: neo-classical, dramatic, narrative, metaphoric, social movement, genre, ideographic, gender, and post-modern. Using contemporary critical practice, students will learn how to analyze linguistic cultural artifacts (e.g., speeches, poems, magazine ads, TV shows, films, and videos) and critique their influences and consequences on everyday living. NOTE: Students cannot receive credit for this course if they have successfully completed STRC 3396.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

CSI 4111. Senior Seminar. 3 Credit Hours.

Senior seminar is an upper-level capstone experience in which students will be asked to integrate their knowledge and skills from the range of courses they completed during their major's coursework. The focus is on synthesis, cohesion, and integration of knowledge for all CSI majors. The capstone will include upper-level argumentation skills training, a heavy emphasis on formal writing, and the completion of a social influence campaign.

Repeatability: This course may not be repeated for additional credits.

CSI 4201. Communication, Attitudes, and Opinion. 3 Credit Hours.

This course investigates the public use of reason and communication as it relates to attitude and opinion formation and collective will to influence social, political, and economic outcomes. Topics include investigations of the traditional and digital public sphere, the role of mass, social, and emergent media in attitude and opinion formation, communicative acts that influence attitude and opinion formation, and how collective will affects civic engagement. From a normative perspective, the course will cover the history, theories, methods, and practice of attitude and opinion formation using a communication and social influence lens.

Repeatability: This course may not be repeated for additional credits.

CSI 4212. Communication and Media in New York City: Communities. 3 Credit Hours.

The basis of this course focuses on the development and appreciation of the communicative function of New York City. Students will learn about printed, electronic, and mediated communication through ongoing experiential assignments. Students will also consider personal narratives and non-discursive communication. Students will be expected to investigate several rhetorical themes and trends within New York City related to communication, including both humanistic and mediated traditions. This course should be taken with CSI 4213 and will occur on site in Manhattan. Students should consult with the KCMC Study Away office for additional information.

Co-requisites: CSI 4213.

Repeatability: This course may be repeated for additional credit.

CSI 4213. Communication and Media in New York City: Institutions. 3 Credit Hours.

This class will be an extension of the information students learned in CSI 4212, Communication and Media in New York City: Communities. While the former class focused on the creation of communicative identity within public and mediated spaces, this course will be an investigation into a series of public and media institutions. Each of these organizations has had and will continue to have a communicative impact on the culture and ethos of New York City. This course will allow students an opportunity to bolster their knowledge of research in New York City. This course should be taken with CSI 4212 and will occur on site in Manhattan. Students should consult with the KCMC Study Away office for additional information.

Co-requisites: CSI 4212.

Repeatability: This course may be repeated for additional credit.

CSI 4289. Communication and Media New York City Applied Experience: Field Experience/Corporate Works/Projects. 1 to 4 Credit Hour.

In order to investigate communication within the public life of New York City, students will be expected to undertake a series of individualized projects throughout the semester. These experiences will allow students to more deeply explore a singular facet of media or communication within New York City. The experience component of the course is based upon a learning contract and must draw from communicative principles noted through CSI 4212 and CSI 4213. Students will have to provide a brief explanation of their project in conjunction with the program director.

Co-requisites: CSI 4212, CSI 4213.

Repeatability: This course may be repeated for additional credit.

CSI 4402. Multiparty Conflict Processes: Dialogue, Facilitation and Multiparty Mediation. 3 Credit Hours.

Intergroup and intragroup conflicts require more complex conflict management processes. This course examines primary multiparty conflict processes of dialogue, facilitation, and multiparty mediation with a focus on analysis of these processes in environmental and public policy disputes.

Repeatability: This course may not be repeated for additional credits.

CSI 4571. International Studies in Media and Communication. 1 to 6 Credit Hour.

This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. Available only to student participating in a Klein GO! Program.

Repeatability: This course may be repeated for additional credit.

CSI 4601. Narrative Persuasion. 3 Credit Hours.

Storytelling has historically been used to convey culturally, politically, and socially relevant information. Narratively structured messages offer persuasion and social influence communicators a unique way to deliver information to diverse audiences. From Hollywood films to online advocacy videos, narratives are used as vehicles for developing persuasive messages through mass, entertainment, social, and emergent media. This course offers students an opportunity to study how narratively structured messages are developed, as well as when and why they are persuasive. Topics will cover various theories and uses of narrative persuasion and media engagement, ranging from entertainment education to political docudramas. The theories and concepts will be used to analyze examples of health, science, and social campaigns that have used this strategy in comparison with more traditional persuasive campaigns.

Repeatability: This course may not be repeated for additional credits.

CSI 4628. Empowerment of the LGBTQ+ Community through the NYC Pride March: Exploration of a Social Movement. 3 Credit Hours.

Students will learn about the importance of Pride as a social movement, the history, mediated depiction, and impact of Pride within NYC and across the world, and discuss the function of Pride as a social movement. Coinciding with this year's event, students will be eligible to take part in the Pride March, being trained and helping to administer and oversee operations of the March, as well as take part in additional Pride events. Guest speakers from Heritage of Pride, the organization that runs NYC Pride, as well as other Pride associates will be arranged.

Repeatability: This course may not be repeated for additional credits.

Communication Sciences and Disorders (CSCD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CSCD 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, EDUC 0815/0915, English 0815, Italian 0815, PSY 0815, Russian 0815, or Spanish 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

CSCD 0816. The World of Sign Languages. 3 Credit Hours.

"But isn't sign language universal??" Nope! Sign languages are as different from - and similar to - each other as spoken languages are. Likewise, the lives of d/Deaf and hard-of-hearing (DHH) people around the world can look very different from one another, but often also share key similarities. How much of this is due to deafness itself, and how much is due to the ways that different societies respond to deafness? What do DHH people in different countries view as the most significant issues they face? Whose priorities are reflected in the policies and practices that shape what DHH people's lives look like? What kinds of changes would have the greatest beneficial impact? We'll examine these questions on a global scale through a framework that emphasizes the core principle of disability justice: nothing about us without us.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

CSCD 0841. The Attentive Mind. 3 Credit Hours.

In today's society, we are bombarded daily with more information than our brains can possibly process. It is widely accepted that attention plays a critical role in our ability to manage this information overload. In this course, we will review recent advances in understanding how attention works - how it determines the content of our conscious awareness and impacts our learning, problem-solving, interpersonal interaction, and social behavior. We will review common influences known to impede attention and examine how attention is compromised in certain clinical disorders. Given that Attention-Deficit/Hyperactivity Disorder (ADHD) is a widely known yet often misunderstood entity, we will review in some detail the fascinating historical origins and evolution of the diagnosis and examine the key controversies that have surrounded its conceptualization, identification, biological basis, and treatment. As there is no scientific consensus for some of the topics to be covered, the course will encourage critical thinking with the aim of separating fact and myth. We will then discuss techniques for improving attention as well as approaches to avoid.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

CSCD 1001. American Sign Language I. 3 Credit Hours.

The linguistic structure of American Sign Language is taught in this course. Students learn about American deaf culture and the history of the deaf in the United States. This course assumes no prior knowledge of American Sign Language or deaf culture. NOTE: Check school/college policy regarding the use of this course to fulfill the degree's foreign language requirements, if applicable.

Repeatability: This course may not be repeated for additional credits.

CSCD 1002. American Sign Language II. 3 Credit Hours.

This is the second semester of a two semester sequence in American Sign Language. This class teaches students to reach an advanced beginner level of proficiency in providing and understanding American Sign Language. The course also discusses deaf culture in a global framework. Students must have successfully completed American Sign Language I (CSCD 1001) to enroll in this course. NOTE: Check school/college policy regarding the use of this course to fulfill the degree's foreign language requirements, if applicable.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1001 or 'Y' in CRCS04)

CSCD 1003. American Sign Language III. 3 Credit Hours.

This intermediate level ASL course focuses on interactive experiences with language structures, functions, and vocabulary necessary for building narrative and conversational skills that enable efficient communication in ASL and Deaf Cultural contexts. The course also aims to expand students' range of cultural and personal topics of discussion, and to use the target language meaningfully and creatively.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CSCD 1002 or CSCD 1902)

CSCD 1004. American Sign Language IV. 3 Credit Hours.

This is the fourth in a sequence of ASL courses, which focuses on expanded interactive experiences with language structures, functions, and vocabulary necessary for efficient communication in ASL and Deaf Cultural contexts. Particular attention is given to enhanced fluency in the use of ASL classifiers, non-manuals, role shift, and spatial mapping within both conversational and more formal situations. Attention is also given to expanding the range of cultural and personal topics of discussion in meaningful and creative ways.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CSCD 1003.

CSCD 1107. Introduction to Communication Disorders. 3 Credit Hours.

This undergraduate course provides a basic introduction to the profession of speech-language pathology and audiology, and a broad survey of the myriad of communication disorders within the field. An overview of the biology, physics and typical developmental milestones of speech and language will provide the background necessary for understanding and discussion of communication disorders and deviations. Assessment and treatment of communication disorders will be considered within the context of linguistic and cultural diversity, evidence-based practice and case studies.

Repeatability: This course may not be repeated for additional credits.

CSCD 1108. Introduction to Linguistics. 3 Credit Hours.

A survey of methods and results in the study of natural language syntax, phonology, semantics, historical change, and dialect variation. English is the primary language of investigation, but facts from other languages are introduced as appropriate. NOTE: Only one of the following two courses may be credited toward the baccalaureate degree: CSCD 1108 (0108); English 2821 (0111).

Repeatability: This course may not be repeated for additional credits.

CSCD 1222. Indigenous Languages: Introduction to Language Diversity, Discrimination, and Endangerment. 3 Credit Hours.

UNESCO projects that 50-90% of the approximately 7,000 languages spoken around the world will become extinct in less than 100 years. This course explores theoretical issues such as nativeness, linguistic diversity and discrimination, and language endangerment and revitalization by considering such questions as: What causes extinction of a language? Should all endangered languages be protected? What can be done to save indigenous languages from becoming extinct? How will the loss of indigenous languages affect its speakers and the world? What is the impact of mass media in portraying and perpetuating stereotypes related to languages and their speakers?

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CSCD 1296. Studies in Psycholinguistics. 3 Credit Hours.

This course leads students through the domains of psycholinguistic research and study with particular emphasis on how subconscious knowledge of linguistic systems is put into use in the comprehension and production of language. Topics such as language acquisition, literacy, and multilingualism are also addressed as they fit into the larger topic of language in the mind. This course is writing intensive and its assignments are designed for students to practice and revise writing in the language sciences. Specifically, students are instructed on, and practice themselves, methods of scientific thinking, critical examination of primary literature, and written argumentation. Students will acquire information literacy skills and be familiarized with the American Psychological Association (APA) writing style and relevant professional terminology.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1108 or 'Y' in CRCS01)

CSCD 1901. Honors American Sign Language 1. 3 Credit Hours.

This is an introductory course in American Sign Language that emphasizes beginning receptive and expressive skills. The linguistic structure of American Sign Language (ASL) is emphasized as students gain practical skills. The honors course also emphasizes the ways in which ASL differs from other signed languages used around the world and explores Deaf culture and history. This course assumes no prior knowledge of American Sign Language or Deaf culture. NOTE: Check school/college policy regarding the use of this course to fulfill the degree's foreign language requirements, if applicable.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CSCD 1902. Honors American Sign Language 2. 3 Credit Hours.

This is the second semester of a two-semester Honors sequence in American Sign Language. Students in this class achieve an advanced beginner level of expressive and receptive skills in American Sign Language. This course emphasizes genetic and social factors that lead to and follow from a high incidence of deafness within selected communities. Students must have successfully completed Honors American Sign Language 1 (CSCD 1901) to enroll in this course. NOTE: Check school/college policy regarding the use of this course to fulfill the degree's foreign language requirements, if applicable.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1901 or 'Y' in CRCS06)

CSCD 2011. American Deaf Culture. 3 Credit Hours.

This course addresses the difference between the medical view of deafness as a disability, focusing on hearing loss, and the cultural view, focusing on the language and culture of the Deaf. The course explores the relation between language and culture, the history of the Deaf in America, Deaf art, literature and folklore in addition to issues surrounding deaf education, bilingualism, and how cochlear implants are viewed by the Deaf community. Students need not have any experience with American Sign Language to take this course.

Repeatability: This course may not be repeated for additional credits.

CSCD 2022. Medical American Sign Language. 1 Credit Hour.

This elective course is designed to teach students, who have already learned basic American Sign Language (ASL), how to communicate with Deaf individuals regarding commonly-occurring health conditions. The course reinforces basic rules of grammar, fingerspelling, and cultural behaviors of the Deaf community, and goes on to focus on ASL vocabulary and phrases needed in a variety of medical situations. We will take information written about specific health conditions, identify the important elements and organize the information into symptoms, causes, and treatments.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1001, CSCD 1901, 'Y' in CRCS04, or 'Y' in CRCS06)

CSCD 2049. Language and the Brain. 3 Credit Hours.

This course introduces students to the major issues and results in neurolinguistics, the study of the representation of language in the brain. Major topics include localization of language function in the brain, the use of linguistic knowledge in producing and comprehending words and sentences, and the effects of brain damage on language behavior.

Repeatability: This course may not be repeated for additional credits.

CSCD 2108. Phonetics. 3 Credit Hours.

This course is a comprehensive introduction to phonetics, the branch of linguistics concerned with the mechanics of pronunciation and the notation used to record it. Learning outcomes of the course include: (1) acquisition of a body of knowledge relating to phonetic taxonomy, (2) mastery of techniques of data description and analysis in phonetics (the study of speech production and perception), and to a certain extent (3) honing of analytical reasoning skills. Upon successful completion of this course, the student will be equipped with phonetic transcription tools for use in professional settings, as well as for more advanced coursework in phonetic analysis in a clinical research setting, and for future coursework in theoretical phonology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1108 or 'Y' in CRCS01)

CSCD 2202. Sociolinguistics. 3 Credit Hours.

Sociolinguistics connects languages with the societies and social situations in which they are used. We study regional and social dialects and the judgments listeners make when they hear language and its variations. This course includes the study of African American Vernacular English as well as other dialects and variants of English. We also study pidgins and creoles and the social situations in which they evolve and their relation to so-called "full-fledged" languages.

Repeatability: This course may not be repeated for additional credits.

CSCD 2203. Anatomy and Physiology of the Speech and Hearing Mechanism. 3 Credit Hours.

In order to understand how speech is produced and perceived, it is critical to have knowledge of the anatomy (structure) and understanding of the physiology (function) of the speech and hearing mechanism. This course provides students with the information. The course content is vital as a foundation for the study of speech science, hearing science, and human neuroscience. Together, these courses are vital to the understanding of typical and atypical (delayed/disordered) speech, language, and hearing.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

CSCD 2204. The Linguistic Structure of Sign Language. 3 Credit Hours.

This 3-credit course examines the grammatical of American Sign Language (ASL) and other sign languages of the world in light of linguistic theory and research. The course will focus on iconicity, arbitrariness, and basic parameters of sign description, as well as ASL phonology, morphology, syntax, semantics and pragmatics. This course will also examine the historical development of ASL and its "genetic" relationship to other languages; its artistic use; the many sociolinguistic factors influencing its dialect variation by region, ethnicity, and social factors unique to the deaf experience, as well as the effects of bimodal bilingualism and other forms of contact with spoken, written and signed English.

Repeatability: This course may not be repeated for additional credits.

CSCD 2301. Development of Speech and Language. 3 Credit Hours.

This is an introductory course on normal language development from birth through adolescence. Child speech and language acquisition in this course is investigated and related to broader issues in cognitive science, development, and the theory of knowledge. Theories of language acquisition and cognitive and social foundations for language and communication will be explored. Biological, neurological, sensory, psychological, developmental, and cultural influences on language development will be discussed. We will also consider other topics in less detail: the nature and extent of individual and cross-linguistic differences in the course of acquisition (including bilingual/second language acquisition), the nature of deficits and delays in language acquisition, the development of reading, and changes in linguistic competence and performance at times of life following the primary acquisition period for language.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1108 or 'Y' in CRCS01)

CSCD 2303. Foundations in Hearing Science. 3 Credit Hours.

This course provides an overview of the scientific foundations and current understanding of the sense of hearing. Following a review of the physics of sound, sound measurement and basic psychoacoustics, students review and extend their knowledge of the anatomy, physiology and function of the peripheral and central auditory system. Through this exploration, students acquire an understanding of how the auditory system decodes variations in sound parameters in the process of mediating sensory/perceptual experience and a variety of auditory perceptual phenomena. Students learn how damage or maldevelopment of various components of the auditory system may lead to a variety of impairments in hearing, localizing and recognizing sounds.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CSCD 2203.

CSCD 3203. Audiology. 3 Credit Hours.

An introductory course in the field of audiology, including assessment of disorders of the auditory system, acoustic measurements, testing environment and testing protocol, electrophysical measurements, test interpretation, and professional development. The Audiology course is an intermediate level study of hearing, the assessment of hearing impairment, and hearing disorders. Knowledge of basic concepts in the physics of sound and anatomy and physiology of the auditory system is assumed (CSCD 2403 Foundations in Hearing Science is prerequisite).

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CSCD 2303.

CSCD 3222. Introduction to Aphasia. 1 Credit Hour.

Approximately one million Americans have aphasia, which is a language and communication impairment that sometimes results from strokes. This course will explore multiple facets of aphasia, including treatment approaches for this population. Students will learn about the etiology, characteristics, and types of aphasia as well as evidence-based strategies that can be used to facilitate communication with this population. Permission of instructor is required to register.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Non-Degree Undergrad.

Co-requisites: CSCD 3287.

Repeatability: This course may not be repeated for additional credits.

CSCD 3225. Syntax of Natural and Machine Languages. 3 Credit Hours.

In this course, we will explore sentence structure (syntax) while comparing and contrasting the language of humans and the language of machines. Both types of language systems have the goal of communication and make use of structure. However, differences are also significant as aspects of natural language are not programmable in currently available machine languages. In this course, you will be exposed to and will utilize the syntactic, semantic, morphological, and sometimes, phonological tests that argue for the modules that comprise contemporary syntactic theory and that underlie the development of programming languages.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1108 or 'Y' in CRCS01)

CSCD 3232. Introduction to Aphasia and Evidence-Based Communicative Interventions. 3 Credit Hours.

Approximately one million Americans have aphasia, which is a language and communication impairment that sometimes results from strokes. This course will provide the opportunity to learn about aphasia, including treatment approaches for this population. Students will learn about the etiology, characteristics, and types of aphasia as well as evidence-based strategies that can be used to facilitate communication with this population. Students will complete a field project in which they will work with people who have aphasia. Students will be assigned to specific field projects based on availability, schedules, and preferences. All field projects will be carried out on Temple's campus at sites such as The Philadelphia Aphasia Community at Temple (PACT) and Temple's Speech-Language-Hearing Center (TUSLHC). Registration is by permission only; registration is restricted to students with an overall GPA of 3.0 and above.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

CSCD 3235. Human Neuroscience. 4 Credit Hours.

Introduction to the anatomy, organization, and function of the human nervous system, with an emphasis on the disorders that result from damage to the brain.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Cognitive Neuroscience, Linguistics, Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

CSCD 3236. Cultural and Linguistic Diversity: Focus on Autism. 3 Credit Hours.

Autism occurs across all cultural and linguistic groups, but services to diverse populations are notably limited. This course will provide the opportunity to learn about autism, including treatment approaches for this population, and about service to the under-served immigrant community in Philadelphia. We will begin the semester by covering information about cultural and linguistic competence and the services provided by a range of professionals. We will also discuss the types of strategies that can be used to facilitate communication. Students will complete field projects in which they will work with families where a child has been diagnosed with autism. These projects will occur in community settings and at Temple University.

Repeatability: This course may not be repeated for additional credits.

CSCD 3287. Aphasia Field Project. 2 Credit Hours.

Approximately one million Americans have aphasia, which is a language and communication impairment that sometimes results from strokes. This course is designed to be taken at the same time as "Introduction to Aphasia." Students will complete a field project in which they will work with people who have aphasia. Students will be assigned to specific field projects based on availability, schedules, and preferences. All field projects will be carried out on Temple's campus at sites such as The Philadelphia Aphasia Community at Temple (PACT) and Temple's Speech-Language-Hearing Center (TUSLHC). Registration is by permission only.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Co-requisites: CSCD 3222.

Repeatability: This course may not be repeated for additional credits.

CSCD 3304. Clinical Phonetics. 3 Credit Hours.

This course engages students in the scientific study of speech sounds with a focus on clinical application. The course will involve transcription of different types of speech, including adult and child speech, and typical and disordered speech. The emphasis will be on English (including its dialectal variants), but other languages will also be discussed at various points. The course will include both lecture format and lab format. Lectures will cover important knowledge relevant to clinical phonetics. Class activities will be devoted to transcription practice and further illustration of concepts discussed in lecture.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 2209 or 'Y' in CRCS03)

CSCD 3305. Teaching and Learning: The Preceptor Experience. 2 Credit Hours.

This course offers students the opportunity to learn about both teaching and learning in a hands-on environment. Each student is assigned to work as a preceptor for an undergraduate class in which the student has previously earned an 'A.' Preceptors will provide review sessions and tutoring support (during preceptor office hours) to students enrolled in the class. In addition, preceptors will attend all meetings of the class for which they are precepting, as well as weekly 1-hour lectures focusing on learning styles, pedagogical methods (such as collaborative learning), and ways of modifying information presented to different individuals. These skills are critical to working with people with communication disorders.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Communication Science.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3.5 in: courses numbered 0700 to 4999.

CSCD 3382. Independent Study in Communication Sciences. 1 to 3 Credit Hour.

Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Linguistics, Spch Lang Hearing Science.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CSCD 3403. Foundations in Speech Science. 3 Credit Hours.

This course provides students with an in-depth knowledge of speech acoustics and speech analysis, focusing on typical speakers, with an introduction to those with delays and disorders. In addition to the study of segmental aspects of speech, the course also addresses sources of variability including coarticulation, speaking rate, stress, syllable organization, etc. Further understanding of the content is enhanced by the inclusion of lab work in which students record, analyze, and explain acoustic characteristics of speech.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CSCD 2108, CSCD 2203, and CSCD 2303.

CSCD 3421. Multilingualism. 3 Credit Hours.

This course explores multilingualism through discussion of topics such as K-12 education, cognitive development, and code-switching. A variety of language pairings are incorporated into the course, including both spoken and signed languages. Students have the opportunity to complete a more comprehensive set of asynchronous modules on multilingualism or select a research-based learning experience. Core course content is the same for all students. Those selecting a research-based learning experience will complete a lab-based practical experience or research project providing students with the opportunity to experience real research ongoing in the Department of Communication Sciences and Disorders. Those choosing the comprehensive asynchronous modules on multilingualism will investigate the readings and topics in greater details through response papers and investigations of related literature. Students do not need to be multilingual to take this course. Research-based experiences require instructor approval.

Repeatability: This course may not be repeated for additional credits.

CSCD 3503. Foundations in Human Neuroscience. 3 Credit Hours.

This course will provide a broad overview of human neuroscience beginning with an overview of historical aspects proceeding through the neuron doctrine and ultimately covering the anatomy and physiology of the human brain. Students will learn about neurological disorders and neural measurement techniques. It is strongly recommended that you also complete a biology course before taking this course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CSCD 3403.

CSCD 3730. Topics in Linguistics. 3 Credit Hours.

CSCD 3730 is a 3-credit undergraduate elective that will challenge students to think critically and analytically about pressing issues and questions in Linguistics. Topics will change from semester to semester, enabling students to take the course up to 3 times in order to explore the range of offerings. This course will be of special interest to students in Speech-Language-Hearing, Linguistics, Foreign Languages, English, and Anthropology. The course is also open to those in other disciplines.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (CSCD 1108, ENG 2821, 'Y' in CRCS01, or 'Y' in CREN01)

CSCD 3900. Honors Special Topics in Communication Sciences and Disorders. 3 Credit Hours.

This Honors Elective course in CSCD will challenge students to think critically and analytically about pressing issues and questions in Communication Sciences and Disorders. The topics will change from semester to semester, enabling students to take the course up to 3 times in order to explore different topics.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

CSCD 4221. Speech and Language Disorders: Children. 3 Credit Hours.

This class focuses on pediatric speech and language disorders that are treated by Speech Language Pathologists. This class will attempt to provide both breadth and depth of exposure to the field of speech language pathology. To that end, the course will cover speech and language disorders in children. However, the specific disorders covered may vary from semester to semester. Within each disorder, we will discuss the clinical presentation, diagnosis, and treatment of the disorder with a focus on evidence-based practices. Aspects of interprofessional education will be addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1107 or 'Y' in CRCS05), CSCD 2108, and CSCD 2301.

CSCD 4222. Speech and Language Disorders: Adults. 3 Credit Hours.

This class focuses on speech and language disorders in adults. Within each disorder, we will discuss the clinical presentation, diagnosis, and treatment of the disorder with a focus on evidence-based practices. Aspects of inter-professional education will be addressed.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (CSCD 1107 or 'Y' in CRCS05), CSCD 2108, and CSCD 2301.

CSCD 4302. Aural Rehabilitation. 3 Credit Hours.

This course reviews basic communication sciences and their role in the development of (re)habilitative strategies for use with both adults and children with hearing impairment. Students will have an introduction to theories and procedures used to provide aural and audiological rehabilitation. This course will provide an overview of the rehabilitation available for both adults and children with hearing impairment and the impact of new technologies on therapy and teaching. Current research and theory in aural rehabilitation and counseling will be presented.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Spch Lang Hearing Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CSCD 2303 and CSCD 3203.

CSCD 4496. Diagnosis and Treatment in Speech-Language Pathology. 3 Credit Hours.

CSCD 4496 is the capstone course for communication sciences and disorders majors. This is a writing intensive course designed to provide information about the principles underlying the diagnostic and therapeutic processes in the area of communication disorders and to help the student develop writing skills needed for clinical documentation and report writing. Throughout the semester, students will participate in guided observations of clients in a professional setting with an ASHA-certified Speech-Language Pathologist (i.e., CCC-SLP).

Field of Study Restrictions: Must be enrolled in one of the following Majors: Spch Lang Hearing Science.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CSCD 1296, CSCD 2108, and CSCD 2301.

CSCD 4730. Topics in Communication Sciences and Disorders. 1 to 3 Credit Hour.

Special topics in Communication Sciences and Disorders will change from semester to semester. Topics and instructors for a specific semester will be announced by the department and posted on the CSCD Department's web site and undergraduate listserv. This course is variable credit ranging from 1 to 3 credits.

Repeatability: This course may be repeated for additional credit.

CSCD 4979. Honors in Communication Sciences. 3 Credit Hours.

Students are expected to write and support a major paper under the supervision of a designated honors advisor. The work must be of honors quality and accepted by the honors advisor and a second reader. Students who complete this course satisfactorily, perform 20 hours of volunteer work in consultation with the departmental honors advisor, and meet the other requirements described in the Bulletin about CSCD programs will graduate with distinction in Communication Sciences and Disorders. NOTE: Registration in CSCD 4979 requires a GPA is 3.50 or better both within the major and overall, and having no grade below B in the major. Eligible seniors should consult the Undergraduate Program Director, Dr. Krakow, for details.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Linguistics, Spch Lang Hearing Science.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Communication Studies (CMST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CMST 1111. Communication and Public Life. 3 Credit Hours.

This course will introduce students to the interrelationships between communication and public life, including the engagements that take place in social institutions, politics, the professions and the arts. It will look at the basic literature on the concept of civil society. Finally, it will introduce students to the issues to be discussed in the four tracks that make up Communication Studies: Policy, Regulation and Advocacy; Contemporary Media Environments; Global Civil Society; and Arts in the Public Sphere.

Repeatability: This course may not be repeated for additional credits.

CMST 2111. Communications Seminar. 3 Credit Hours.

This course will introduce a case study analysis of a contemporary public issue in communication. Students will examine the selected issue from the range of disciplinary approaches and methodologies introduced in the Communication Studies foundation courses: Communication Studies 1111 (Communication and Public Life) and MSP 1021 (Media and Society). They will discuss how disciplinary approaches and methodologies can condition conclusions, and consider the options available to them in interdisciplinary study. In the process, students will also focus on professional and academic preparation skills that will equip them to approach their futures.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MSP 1021, BTMM 1021, or 'Y' in CRMS01) and (CMST 1111 or 'Y' in CRCM01)

CMST 3185. Communication Studies Internship. 1 to 4 Credit Hour.

Students will arrange for an internship in an appropriate area of Communication Studies. Students must fill out all paperwork in the Communication Studies Manual, particularly areas related to internship supervisor's documentation. Additionally, students must meet with the Communication Studies director during pre-registration meetings. Students will complete a total of 15 short paper responses, 2 evaluations, and 1 final review paper. Students must have an overall GPA of 3.0 and director's permission to take part in an internship.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC: College of Media & Comm.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CMST 2111 (may be taken concurrently)

Communications and Theater (COMM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

COMM 3081. Communications Special Projects. 1 to 4 Credit Hour.

Individualized project proposed by the student and approved by a faculty advisor which will contribute to and enhance the student's general education and add to specific interest of the student in the field of communications. NOTE: Permission of faculty advisor required.

Repeatability: This course may be repeated for additional credit.

COMM 3082. Communications Independent Study. 1 to 4 Credit Hour.

Student proposed independent study/research in an area of interest to the student which will enhance their general education and a specific area of the field of communications. NOTE: Permission of Instructor/Faculty Advisor required.

Repeatability: This course may be repeated for additional credit.

COMM 3085. Communications Major Internship. 1 to 4 Credit Hour.

Student will research internship opportunities, set up interviews, secure position, and work a minimum of five hours per week and a maximum of twenty-five hours in a professional environment. Experiences will be shared with classmates and documented with written submission to the faculty advisor. Students should visit the Internship Manual through the Communication Studies Program web page at <https://smc.temple.edu/commstudies/student-resources/internships/> for additional information and requirements. NOTE: This course is for majors only. Director permission required. Please see Internship Manual for prerequisites and information.

Repeatability: This course may be repeated for additional credit.

COMM 3980. Honors Special Topic: An Introduction to Communication in Public Life. 3 Credit Hours.

Variable topics course which can be used for partial fulfillment of the requirements for completion of the University Honors Program. Topics cover aspects of communication studies, including applications of theory, performance, advocacy, media, and analysis. NOTE: For University Honors Program students only.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

COMM 3990. Honors Special Topics. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

COMM 4111. Communications Major Senior Seminar. 3 Credit Hours.

A capstone experience concerning the various components of the field and discipline of communications. This seminar will synthesize the academic preparation posited by the Communications Program, focusing on aspects of theoretical and applied contributions. Particular focus is on both fortifying academic skills and preparation for post graduation goals. NOTE: This course is for senior communications majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Communications.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Community Arts (CART)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CART 3011. Introductory Seminar in Community Arts. 3 Credit Hours.

Community Arts brings artists together with people of a community of location, spirit, or tradition, to create art that is based in the life of that community. This course introduces students to the history and theory of Community Arts and current projects in Philadelphia and nationally, through field trips, guest speakers, readings and research. Students will engage in arts projects to orient to and re-discover their own communities of origin in relation to Community Arts and examine issues of race, class, and aesthetics. The course prepares students to become involved in the field internships that are being offered through Tyler/Temple's Arts in Community Program and is a prerequisite for other Arts in Community courses. NOTE: Course previously called "Interdisciplinary Seminar in Community Arts."

Repeatability: This course may not be repeated for additional credits.

CART 3089. Research and Project Planning Seminar in Community Arts. 3 Credit Hours.

In this course, students will apply methods of community data collection to research on a specific community, including personal and oral history interviews, background cultural research, detailed observation of community visual environments and performative conventions, and relationship building. Site visits to community sites and meetings with community leaders provide context for this research. These processes are then directed toward sequential project planning, including a research paper and individual and group creative responses in various media. Utilizing a collective research methodology, students then collaborate to identify emerging themes and key issues toward the conceptual design of a community arts project.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTE 3011, CART 3011, CART 3911, ARTE 3911, or VS 1058)

CART 3911. Honors Introductory Seminar in Community Arts. 3 Credit Hours.

Community Arts brings artists together with people of a community of location, spirit, or tradition, to create art that is based in the life of that community. The goals of this course are for students to learn about the history and theory of Community Arts, to gain skills in Community Arts studio and research processes, to learn to think critically about the issues of race, class, and aesthetics inherent in Community Arts practice, to gain exposure to established Community Arts projects in Philadelphia through field trips and guest speakers, and to orient to and re-discover one's own community of origin in relation to Community Arts. NOTE: This is an honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CART 3989. Honors Research and Project Planning in Community Arts. 3 Credit Hours.

In this course, students will apply methods of community data collection to research on a specific community, including personal and oral history interviews, background cultural research, detailed observation of community visual environments and performative conventions, and relationship building. Site visits to community sites and meetings with community leaders provide context for this research. These processes are then directed toward sequential project planning, including a research paper and individual and group creative responses in various media. Utilizing a collective research methodology, students then collaborate to identify emerging themes and key issues toward the conceptual design of a community arts project. NOTE: This is an honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (ARTE 3911 or CART 3911)

CART 4012. Community Arts. 3 Credit Hours.

In this course students will create, develop and implement a community-based arts project in media including visual arts and performance within a particular Philadelphia community. Students will gain skills in community arts processes including project design, local research, teaching, and design/performance/installation of arts projects. The course is grounded in community arts theory, growing out of the fields of public art and performance studies.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTE 3089, CART 3089, CART 3989, or ARTE 3989) and (ARTE 3011, CART 3011, CART 3911, ARTE 3911, or VS 1058)

CART 4082. Independent Study. 1 to 3 Credit Hour.

Self-directed study and research initiated by a student with an independent study contract developed in conjunction with, and supervised by, a faculty member in community arts.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

CART 4089. Evaluation and Documentation in Community Arts. 3 Credit Hours.

In this course students will learn and apply methods for evaluation and ongoing work in the aftermath phase of Community Arts projects, including assessment of artistic process and product and community impact, approaches to continuing community involvement, and transitioning of project ownership to the community. The course offers students a variety of media for documenting and assisting community members to document Community Arts projects in the form of scholarly articles, video and audio documentary, community feedback and personal essays/journals that contribute knowledge to the field of Community Arts.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTE 4012 or CART 4012)

Community Development (CDEV)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CDEV 1113. Introduction to Community Development. 3 Credit Hours.

Community development refers to the broad set of skills and institutions that local communities utilize in an effort to improve the quality of life for all residents. The course examines the history of housing, economic trends, and social policies that have affected low-income communities across the US, and the various ways through organizing and capacity building that community development professionals and activists have sought to improve these conditions. Topics include the provision of affordable housing, community economic development and finance, public education and workforce development, local food systems, and environmental sustainability.

Course Attributes: SE, SI, SP, SS

Repeatability: This course may not be repeated for additional credits.

CDEV 2013. Community Redevelopment and Revitalization. 3 Credit Hours.

This required course within the core curriculum of the community development major is designed to give students a background on the history of urban redevelopment programs, and their impact on individuals and communities. Spanning the period from the early 20th century through the first years of the 21st, students will learn about early progressive era reforms, programs of the New Deal, Urban Renewal, Model Cities, and the Great Society. It will also cover the development of community development corporations, and their role in revitalizing cities across the United States. Market-based and neoliberal programs that began in the 1980s will also be discussed, as will the current policy landscape for redevelopment of urban communities. Particular focus will be paid to this history in the City of Philadelphia.

Repeatability: This course may not be repeated for additional credits.

CDEV 2155. Housing and Community Development. 3 Credit Hours.

A comprehensive study of housing and community development within the context of its environment, both natural and built. Explores the implications on housing of topography, public policy, demographics, transportation, adjacent uses, local culture, building practices, zoning, climate, and historical patterns. A broad range of housing types and densities are examined along with housing as both shelter and social symbol. This course has both historical and current references and introduces the role of the community development professional or planner as a community designer and advocate.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CDEV 2255. Environmental Justice in Communities. 3 Credit Hours.

This course explores the histories, policies, and innovations associated with environmental justice movements in the United States and throughout the world. It will explore public policy responses to social movement against environmental injustices and environmental racism; discuss the role of science in the public debate; and connect environmental justice to community development theories, policies, and practices. Service learning for a Philadelphia-area organization on an environmental justice project is a key component to this course.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

CDEV 2354. Cooperatives. 3 Credit Hours.

Cooperatives serve a unique role in the modern economy. Having first emerged during the Industrial Revolution, cooperatives were an alternative way for individuals to work together on food production, ownership of businesses, and labor. Today, cooperatives represent a significant portion of the economy around the world, and are a vital component of place-based grassroots community development. This course examines the history and development of cooperatives in the United States and around the world, as well as exploring the innovations that cooperatives continue to bring to communities. Philadelphia is a recognized center of cooperatives in the United States, many of which will be engaged as part of this course. Specific attention will be paid to the Rad Dish Co-Op Cafe, Temple University's student-run co-op.

Course Attributes: SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

CDEV 2454. Grant Writing for Non-Profits. 3 Credit Hours.

The course will help to develop the skills necessary for students to have the knowledge to be able to develop, write and submit a solid grant proposal. Students will obtain hands-on practice to learn to write successful grants. The course will start with an introduction to grants and their place in the development and funding of non-profit organizations. Students will learn the roles of both government and private grant funding for non-profits. Students will learn sound planning skills, write a grant proposal and get feedback on their proposals. Using interactive learning and assigned tasks, we will focus on planning, research, evaluation techniques, budgeting, and how to effectively communicate issues and needs in a clear and concise manner. There will be some exposure to grant-writing software, as applicable.

Repeatability: This course may not be repeated for additional credits.

CDEV 2596. Community Planning Analysis. 3 Credit Hours.

Community development and planning practitioners use tools to gather, analyze, and present information. This course provides an introduction to a broad range of analytical methods and techniques used in the field to understand communities. Students learn to obtain data, select and use the most appropriate analytical methods (with an emphasis on computer applications, such as Microsoft Excel), and present results effectively. Topics to be covered include primary and secondary data collection, basic methods of descriptive statistics, demographic models, population projections and forecasts, economic analysis, housing indicators, surveys, interviews, questionnaires, community asset mapping and zoning. Classes consist of a mix of lectures, small group exercises, and hands-on computer labs. Students, over the course of the semester, develop a portfolio of analytical tools for an assigned community. Consistent with the University's Writing Intensive Program, each weekly assignment will be returned with comments for revision and compilation into a single portfolio. This 'thick description' of a community demonstrates competency with the wide range of methods used in community development. Note: Basic computer skills required. By lecture 4, students must have familiarity with Microsoft Excel. Go to <http://www.temple.edu/cs/training/> for information on free seminars offered by Temple University Computer Services.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

CDEV 3113. Nonprofit Management. 3 Credit Hours.

The course provides an overview of management of nonprofit organizations, including issues pertinent for nonprofit managers and leaders faced with changing organizational environments. Most community development activities are centered within a nonprofit organization or work closely with these community-based organizations. Students are introduced to the major aspects of nonprofits and voluntary organizations that distinguish them from public and private organizations: mission/vision; legal definitions/IRS rulings; voluntary governance structures; and a social change agenda. Topics covered include the history and scope of the nonprofit sector, variations within the sector, contemporary theories of nonprofit enterprise, growth in the international nonprofit sector, management issues which pertain to nonprofits, financial management, accountability, human resources management, strategic planning, collaborative partnerships, leadership, advocacy, and the future of the sector.

Repeatability: This course may not be repeated for additional credits.

CDEV 3155. Healthy Community Design and Development. 3 Credit Hours.

This course seeks to bridge the gap between planning and public health, providing an interdisciplinary approach to address the health implications of the built environment. Students will understand public health and planning history, evolution and significant movements to the present, and historical and current theories on the relationship between the built environment and public health. They will identify contemporary features of the built environment such as patterns of development, parks, public works projects, houses, and transportation systems that reflect past efforts to influence health, and use methods developed by architects, urban planners, public health professionals, sociologists and anthropologists to address current health impacts of the built environment. Students learn about vulnerable populations and health disparities, and develop skills to identify studies and engage communities, critique methods and findings, and apply lessons from planning and public health research to current and future problems.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

CDEV 3165. Placemaking: Revitalizing Urban Communities. 3 Credit Hours.

The term placemaking (sometimes referred to as "creative placemaking") refers to a particular approach to community building and revitalization that has gained popularity in recent years. Through readings, lectures, exercises, and tours students will explore placemaking practices focused on asset based, bottom up approaches that seek to enhance the social fabric while improving physical places. This includes local economic development and revitalization practices that value community identity as expressed in local cultural, historic and natural resources, but also includes other types of practices that simply seek to create a sense of "place" in some otherwise under-used or ill-defined space. Students will assess placemaking practices and identify opportunities for "creative placemaking" in Philadelphia's neighborhoods.

Repeatability: This course may not be repeated for additional credits.

CDEV 3175. Gentrification and Equitable Development. 3 Credit Hours.

With the recent revitalization of cities, gentrification has become a real, complex and highly contested issue that represents progress for some and displacement or its threat for others. This course investigates gentrification and interventions aimed at limiting its negative effects. Through analyzing academic literature, current events and case studies, we consider: the processes, forms, agents and impacts (positive and negative) of gentrification; examine the roles of policy, planning and community development in the gentrification process; and investigate programs and strategies that practitioners could implement to foster equitable development.

Repeatability: This course may not be repeated for additional credits.

CDEV 3197. Community-based Organizations. 3 Credit Hours.

For the past 50 years, community-based organizations (CBOs) have played an important role in the housing, economic and social development in low-income communities: community development corporations (CDCs) were established to construct and manage affordable housing; community economic development programs seek to empower local residents through job training and entrepreneurial assistance; and faith-based organizations continue to play an important role in social service provision in many communities. Fundamentally, CBOs strive to build community leadership and empower low-income people to take charge of their own future. Understanding the role of such organizations is crucial in being an effective planner. Synthesizing skills developed in lower-level courses within the Community Development major, students in this writing-intensive course produce - over the course of the full semester - a strategic plan for a community-based organization of their choosing. Beginning with a profile of the community served, students develop a profile of a specific CBO within the Philadelphia region. After meeting with stakeholders, students develop and present a strategic plan to assist that organization in meeting the needs of its client community, both now and in the future. The plan produced is a result of ongoing feedback from classmates, stakeholders, and the instructor.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CDEV 1113 and CDEV 2596.

CDEV 3313. Community Development Finance. 3 Credit Hours.

The course examines the history and practice of community development finance in the United States. Low-income communities face particular challenges in meeting their credit needs through the traditional financial sector. Over the past 100 years, various institutions have developed to both advocate for change and to cover this gap. The course explores strategies for developing assets for low-income families and low-income communities. Different types of community development finance projects are discussed, including affordable housing, charter schools, community facility, small business lending, and nonprofit real estate projects. The course concludes with an examination of continuing challenges to meet the depository and credit needs of low-income communities.

Repeatability: This course may not be repeated for additional credits.

CDEV 3334. Community Economic Development. 3 Credit Hours.

This elective course within the community development program is designed for students seeking to work in the areas of community economic development. It begins with a thorough examination of the theories of regional, city, and local economic growth and development, including tools necessary to document economic indicators. The second part of the course utilizes a case-study approach of methods and practice, including topics such as workforce development, entrepreneurship, small business attraction and retention, commercial corridors, immigrant communities, leveraging the creative economy, and development without displacement. Examples from the Philadelphia region will be given particular focus.

Course Attributes: SI, SP, SS

Repeatability: This course may not be repeated for additional credits.

CDEV 3455. Community Engagement and Empowerment. 3 Credit Hours.

This class explores the theory and practice of involving citizens in agency-led and community-based planning processes. Readings, class discussions, case studies, and guest lectures emphasize building knowledge and skills necessary to develop open and inclusive processes using a continuum of civic engagement practices such as community organizing, outreach and education, interactive tools and technologies, charrettes and full empowerment.

Course Attributes: SI, SS

Repeatability: This course may not be repeated for additional credits.

CDEV 3860. Topics in Community Development. 1 to 3 Credit Hour.

Variable offerings from semester to semester of selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

CDEV 3870. Special Topics in Community Development. 1 to 3 Credit Hour.

Variable offerings from semester to semester of selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

CDEV 3882. Independent Study in Community Development. 1 to 3 Credit Hour.

An advanced course that involves explorative study or research not met in any established course. Initiated by the student, the project must be sponsored by a faculty member with an approved agreement outlining the content and requirements, including readings, meetings, and papers. NOTE: Students must have the agreement of a faculty sponsor and must submit a formal proposal to this faculty member and Department before registering for the course. A maximum of 3 s.h. of Community Development directed reading/study or independent study may be used as elective credit toward the B.S. in Community Development.

Repeatability: This course may be repeated for additional credit.

CDEV 3883. Directed Reading/Study in Community Development. 1 to 3 Credit Hour.

Prerequisite: Written contract with faculty member and approval of the Department Chair.

Advanced reading/study tutorial arranged between the student and a faculty member. Requirements are jointly determined relative to the specific focus of the course and may include literature review; preparation of journals, bibliographies and/or paper(s); and participation in regularly scheduled discussions. The level of work required is equivalent to a traditional course. Writing skills are evaluated for the final grade. Students are expected to demonstrate personal initiative in framing and meeting course requirements. NOTE: This course may be repeated for credit. A maximum of 3 s.h. of Community Development directed reading/study or independent study may be used as elective credit toward the B.S. in Community Development.

Repeatability: This course may be repeated for additional credit.

CDEV 4885. Internship and Professional Practice in Community Development. 3 Credit Hours.

The course requires 180 hours of supervised internship experience with public agencies, non-profit institutions, and private entities. The internship must have a designated field supervisor and must emphasize the acquisition and application of practical skills in community development. Undergraduates may register for CDEV 4885 only once.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CDEV 1113, CDEV 2596, (CRP 2524 or CTRP 2524), and (CDEV 3113 or CDEV 3197)

CDEV 4889. Community Development Workshop. 3 Credit Hours.

This capstone course in the Community Development major focuses the practice of contemporary community development in collaboration with a community-based organization. It builds upon the knowledge and skills students acquired earlier in the degree program and demonstrate their abilities to resolve real-life problems. Students work in small teams to formulate a research design and scope of services to investigate existing conditions; collect and analyze data needed to devise effective solutions to local problems which build on available community assets; and produce reports local leaders can use to guide their future revitalization efforts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CDEV 1113, CDEV 2596, CTRP 2524, CDEV 3197, CDEV 2013, and CDEV 3455.

Computer & Information Science (CIS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CIS 0822. Technological Horizons: Information Technology in the 21st Century. 3 Credit Hours.

This single semester course hopes to equip students with critical consciousness around information technologies. The course is designed with the presumption that living and working with 21st Century technologies requires not only vocational skills but also theoretical grounding. Key themes such as "Computational Thinking" or "21st Century Economics and Global Communication" embed an introduction to highly impactful technologies within a discussion of their historical, economic, and cultural contexts, highlighting the importance and impact information and communication technologies have on the students' lives today. Throughout the course, virtual coding lab will give students hands-on, practical experience with the computational thinking that underlies the many technologies addressed. By requiring all students to be exposed to a multi-faceted and rigorous understanding of computational thinking, societal and cultural issues raised by technology, critical and creative thinking, data and information analysis, along with some basic programming, Temple University can prepare them to thrive in a technological world.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

CIS 0823. Math for a Digital World. 4 Credit Hours.

This course is not offered every year.

This course is about becoming an "informed user" of quantitative information. Do numbers make us more or less rational? What does "free" really mean? What's the difference between "correlation" and "cause"? How can we be misled by numbers? How can we make better decisions and have more effective discussions by understanding mathematics? Does it make sense to play the lottery? What are your chances of drawing the card you need in a poker game? How long will it take you to save a million dollars assuming interest is earned but you keep spending? How does math play into the digital world that surrounds us, whether it is email, online tools or the creation of passwords, IDs or serial numbers? These and many other questions will be explored and answered throughout the course. NOTE: (1) This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. (2) Duplicate Course: Students cannot receive credit for CIS 0823/0923 if they have successfully completed MATH 0823/0923.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0822 (may be taken concurrently), any MATH course numbered 0824 to 0922 (may be taken concurrently), any MATH course numbered 0924 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

CIS 0835. Cyberspace & Society. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

This course provides students with an understanding of the underlying foundations of technology that have an impact on their lives and integrates those principles with real-world activities. It promotes information fluency by giving students an understanding of the foundational concepts from which the technology is derived and helping them to develop higher-level intellectual capabilities for applying the technology. The class is broken into three sections - technology principles, technology's impact in society and labs. It is the combination of these three sections that will enable students to understand the foundation and the implementation of technology in their daily lives. Class lectures incorporating a myriad of digital technologies including computer hardware, readings, labs and student discussions will be utilized to integrate the application of technology and the impact facing society. NOTE: (1) Duplicate Course: No credit for students who have taken CIS 1055 (C055), 1955 (H095) or 0935. (2) This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

CIS 0923. Honors Math for a Digital World. 4 Credit Hours.

This course is not offered every year.

This course is about becoming an "informed user" of quantitative information. Do numbers make us more or less rational? What does "free" really mean? What's the difference between "correlation" and "cause"? How can we be misled by numbers? How can we make better decisions and have more effective discussions by understanding mathematics? Does it make sense to play the lottery? What are your chances of drawing the card you in need in a poker game? How long will it take you to save a million dollars assuming interest is earned but you keep spending? How does math play into the digital world that surrounds us, whether it is email, online tools or the creation of passwords, IDs or serial numbers? These and many other questions will be explored and answered throughout the course. NOTE: (1) This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. (2) Duplicate Course: Students cannot receive credit for CIS 0823/0923 if they have successfully completed MATH 0823/0923.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 0822 (may be taken concurrently), any MATH course numbered 0824 to 0922 (may be taken concurrently), any MATH course numbered 0924 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

CIS 0935. Honors Cyberspace & Society. 3 Credit Hours.

This course is typically offered in Fall and Spring.

This course provides students with an understanding of the underlying principles of technology that have an impact on their lives and how those principles are related to real-world activities. The course promotes information fluency by giving students an understanding of the foundational concepts on which the technology is derived and helping them to develop higher-level intellectual capabilities for applying the technology. The class is broken into three equal sections - technology, ethics and virtual labs. It is the combination of these three sections that will enable students to understand the foundation and the implementation of technology in their daily lives. Class lectures, readings, virtual labs and student discussions will be utilized to integrate the application of technology with social and ethical issues facing society. As examples, discussions might include: What is the impact of the Internet on intellectual property? How far can government surveillance go to detect criminal behavior without reducing our civil liberties? How can vulnerable groups be protected from predators, scam artists, and identity theft? Is it ethical to download free music and video from the Internet? NOTE: (1) Duplicate Course: No credit for students who have taken CIS 1055 (C055), 1955 (H095) or 0835. (2) This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. (3) This is an Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO

Repeatability: This course may not be repeated for additional credits.

CIS 1001. Introduction to Academics in Computer Science. 1 Credit Hour.

This course is typically offered in Fall and Spring.

Students will be introduced to the field of computing, including potential career opportunities, the Computer & Information Sciences department and its resources, the departmental faculty, and the Computer Science degree programs, as well as the opportunities for internships and research. There will be guest lectures by Computer & Information Sciences faculty, students and alumni, demonstrations of computing technology, and discussions to illustrate the interdisciplinary nature of Computer Science and Information Science and Technology. NOTE: This is a required course for all Computer Science and Information Science and Technology majors. It is also recommended for undecided students looking for a major.

Repeatability: This course may not be repeated for additional credits.

CIS 1049. Comp Tools Competency. 1 Credit Hour.

Repeatability: This course may not be repeated for additional credits.

CIS 1051. Introduction to Problem Solving and Programming in Python. 4 Credit Hours.

This course introduces computer programming using Python, a computer language which is widely used in industry, scientific research, game programming and web applications. Students will learn how to design a program to solve a problem using procedural programming constructs such as loops, branching structures, and functions. Students will write programs that are testable (using assertions) and maintainable (using good programming style, naming conventions, indentation, and comments). Topics covered also include the general characteristics of computers, techniques of problem solving, and algorithm specification. Students are also introduced to software engineering practices, including unit testing techniques, debugging techniques, and version control management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 0702 (C or higher), any MATH course numbered 1021 to 4999 (may be taken concurrently), 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (C or higher), STAT 1102, STAT 1902, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA01, 'Y' in CRMA04, 'Y' in CRST01, or 'Y' in MC6T)

CIS 1052. Introduction to Web Technology and Programming. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course is designed to introduce students with no programming experience to the programming languages and techniques associated with the World Wide Web. The course will introduce web-based media-rich programming tools for creating interactive web pages. Basic animation programming is also introduced with an emphasis on media-rich content creation, distribution and tracking capabilities.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

CIS 1053. Programming in Matlab. 4 Credit Hours.

Introduces students to computers and computer programming. Topics covered include the general characteristics of computers, techniques of problem solving and algorithm specifications, and the debugging and testing of computer programs in Matlab. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1021 (C or higher), any MATH course numbered 1022 to 4999 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, STAT 1001 (C or higher), STAT 1102, STAT 1902, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA04, 'Y' in CRST01, or 'Y' in MC6T)

CIS 1055. Computers and Applications. 4 Credit Hours.

With the explosion of computer technology, knowledge of computing applications as tools for all disciplines has become a necessary asset. This course will introduce the student to understanding the components of a computer system; the use of the computer to process information; the technology behind computers and networks and how this technology is likely to change; purchasing and maintaining a personal computer system; understanding the technology of the Internet; and social and ethical implications of computing. The laboratory portion of this class will provide students with hands-on experience to supplement the lecture material. Operating system concepts, a working knowledge of collaborative software and the following applications are covered: advanced features of word processing, spreadsheets, presentation software and the resources of the Internet including developing a web site using sound design techniques to publish course documents and incorporating multi-media components. NOTE: (1) Duplicate Course: No credit for students who have taken CIS 0835 (GE-SCI 0060) or 0935 (GE-SCI H060). (2) This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

CIS 1056. Advanced Web Technology and Programming. 4 Credit Hours.

This course is typically offered in Fall.

In this course, students will learn how to write web applications using Java and JSP (Java Server Pages). This course focuses on fundamental programming concepts such as data types, type conversion, exception handling, assignment statements, methods, objects, conditions, and loops. SQL (Structured Query Language) will be used to communicate with a database. JSP implicit objects (e.g., session, response) will be employed for the management of log-in and security. Students are expected to have prior knowledge of basic web design, since HTML, CSS, and Javascript will be reviewed only briefly. By the end of the course, each student will have created a simple web application that accesses a database.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 1052.

CIS 1057. Computer Programming in C. 4 Credit Hours.

This course introduces students to computer programming using the C language. Students will solve programming problems using procedural programming constructs such as variable assignment, loops, branching structures, and functions. Students will write programs that are testable (using assertions) and maintainable (using good programming style, naming conventions, indentation, and comments). Topics covered also include the general characteristics of computers, techniques of problem solving, and algorithm specification. Students also begin the debugging and testing of computer programs in the C language. Students are also introduced to software engineering practices, including unit testing techniques, debugging techniques, and version control management. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 0702 (C or higher), any MATH course numbered 1021 to 4999 (may be taken concurrently), 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (C or higher), STAT 1102, STAT 1902, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA01, 'Y' in CRMA04, 'Y' in CRST01, or 'Y' in MC6T)

CIS 1068. Program Design and Abstraction. 4 Credit Hours.

Introduction to problem solving and programming in Java, software engineering, procedural and data abstraction, and object-oriented programming, including class hierarchies, inheritance and interfaces. Data types covered include primitive data types, strings, classes, arrays, vectors, and streams. Programming techniques include at least one technique for searching and sorting an array and an introduction to file processing. Note: For Computer Science Majors and IST Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (CIS 1051, CIS 1057, or 'Y' in CISA) and (MATH 0702 (C or higher), any MATH course numbered 1021 to 4999 (may be taken concurrently), 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MC6T, or 'Y' in MATW)

CIS 1166. Mathematical Concepts in Computing I. 4 Credit Hours.

Introduction to the mathematical concepts fundamental to computer and information science. Topics include an introduction to predicate and propositional calculus; sets and set operations; functions and mappings; big-O notation and the growth of functions; algorithms, integers, and matrices; mathematical induction and recursive definitions; combinations, permutations, and binomial coefficients; discrete probability, expected value and variance. Students will also learn formal methods for writing mathematical proofs. Applications to computer science will be illustrated. NOTE: For Computer Science and Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1021, any MATH course numbered 1022 to 4999 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

CIS 1951. Honors Introduction to Problem Solving and Programming in Python. 4 Credit Hours.

An Honors version of CIS 1051, this course introduces computer programming using Python, a computer language which is widely used in industry, scientific research, game programming and web applications. Students will learn how to design a program to solve a problem using procedural programming constructs such as loops, branching structures, and functions. Students will write programs that are testable (using assertions) and maintainable (using good programming style, naming conventions, indentation, and comments). Topics covered also include the general characteristics of computers, techniques of problem solving, and algorithm specification. Students are also introduced to software engineering practices, including unit testing techniques, debugging techniques, and version control management. Expect the usual boundary between lab and lecture to be somewhat blurred as we look at design and implementation in both places, often in the context of small group activities. The course will end with small group programming projects of modest complexity chosen jointly by the students and instructor based on their areas of interest. These could include elements of graphics, robotics, applied mathematics, engineering, or projects from other disciplines.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1021 (C or higher), 'Y' in MATW, any MATH course numbered 1022 to 4999 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, STAT 1001 (C or higher), STAT 1102, STAT 1902, 'Y' in MC6A, 'Y' in CRMA04, 'Y' in CRST01, or 'Y' in MC6T)

CIS 1966. Honors Mathematical Concepts in Computing I. 4 Credit Hours.

An honors version of CIS 1166, this course provides an introduction to the mathematical concepts fundamental to computer and information science. Topics include an introduction to predicate and propositional calculus; sets and set operations; functions, sequences and matrices; big-O notation and the growth of functions; algorithms; number theory; mathematical induction and recursive definitions; combinations, permutations, and binomial coefficients; probability, relations. Students will also learn formal methods for writing mathematical proofs. Additional topics beyond the scope of an introductory course will be included. These topics will not only enrich the class, but also show how the concepts can be applied to solve cutting edge problems in science and technology.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher; may be taken concurrently), MATH 1941 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (D or higher; may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

CIS 1968. Honors Program Design and Abstraction. 4 Credit Hours.

An Honors version of CIS 1068, this course provides an introduction to problem solving and programming in Java, software engineering, procedural and data abstraction, and object-oriented programming, including class hierarchies, inheritance and interfaces. Data types covered include primitive data types, strings, classes, arrays, vectors, and streams. Programming techniques include at least techniques for searching and sorting an array. In addition to the standard materials for 1068, this course will look more deeply into the underlying representations of numeric data types, it will consider some more advanced language topics including a more detailed look at polymorphism, and it may consider additional techniques such as linked data structures and recursion. Expect the usual boundary between lab and lecture to be somewhat blurred as we look at design and implementation in both places, often in the context of small group activities. The course will end with small group programming projects of modest complexity chosen jointly by the students and instructor based on their areas of interest. These could include elements of graphics, robotics, applied mathematics, engineering, or projects from other disciplines.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (CIS 1051, CIS 1057, or CIS 1951) and (MATH 1041 (C or higher; may be taken concurrently), MATH 1941 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (D or higher; may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

CIS 2004. Sci+Tech Scholars Seminar. 1 Credit Hour.

This seminar course provides students participating in the Sci+Tech Scholars program with advanced preparation for success in exploring tech-focused science education and career opportunities. The goals of the course are to: 1) foster a cohort experience and build community among Sci+Tech Scholars; 2) enhance students' understanding of the social relevance and interdisciplinary applications of computing concepts within scientific industries; 3) explore professional development topics that enhance students' understanding of research, graduate school, and careers related to their sci+tech studies; and 4) support students' engagement in experiential service-learning projects that apply and enhance their technical skills. This course is repeatable for credit; Sci+Tech Scholars are expected to enroll in this seminar in each year of their participation in the Sci+Tech Scholars program.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCITECHSCH.

Repeatability: This course may be repeated for additional credit.

CIS 2033. Computational Probability and Statistics. 3 Credit Hours.

This course is typically offered in Spring.

The goal is to introduce students to modern and extremely useful topics in computational statistics. It focuses on computational aspects and provides a hands-on introduction to fundamental concepts of data analysis. The course offers a foundation for further courses in data mining, machine learning, artificial intelligence, robotics, computer vision, and in general in computational statistics and scientific computing.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1068 or CIS 1073), CIS 1166, and (MATH 1041, MATH 1038, (MATH 1031 and MATH 1022), MATH 1941, MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA05, 'Y' in MA06, or 'Y' in MATW)

CIS 2082. Independent Research I. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisites: Completion of CIS 2168 with at least a C-, and a GPA of 3.0 or better in the major. Supervised research under the direction of a faculty member in the Department of CIS. All students must obtain the approval of the CIS Administrative Coordinator. NOTE: Not available for major credit and does not count in the major GPA. This course is repeatable.

Repeatability: This course may be repeated for additional credit.

CIS 2100. Special Topics in CIS. 1 to 6 Credit Hour.

The aim of this course is to examine current problems in Computer Science. Subject matter varies from semester to semester.

Repeatability: This course may be repeated for additional credit.

CIS 2107. Computer Systems and Low-Level Programming. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course introduces computer systems architecture at the level required to understand low-level systems programming. It examines issues of information representation, the form of machine instructions and addressing, the implementation of programming language constructs in terms of machine instructions, the interfaces to peripheral devices. Programming is done in assembly language and in C. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Computer & Information Science, Computer Science, Computer Science and Physics, Data Science: Comp Analytics, Mathematics/Computer Science, Mathematics & Comp Sci w/Teach.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1068 or CIS 1073) and CIS 1166.

CIS 2109. Database Management Systems. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This is an introductory course in database management systems (DBMS) and file management systems. The course covers data modeling concepts, various file management techniques, data definition and manipulation using SQL, issues in data management, development and implementation of database applications, and a perspective on emerging issues in database systems. Students work in the Lab on various assignments including prototyping and SQL, utilizing state of the art DBMS and CASE tools. NOTE: (1) Duplicate Course: No credit for students who have completed CIS 4331 (0331). (2) Prior to fall 2016, the course title was "Database and File Management Systems."

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1051, CIS 1057, CIS 1068, CIS 1951, or CIS 1968)

CIS 2166. Mathematical Concepts in Computing II. 4 Credit Hours.

This course is typically offered in Fall and Spring.

A continuation of CIS 1166. Concepts include recursion and recursive algorithms; relations including equivalence, congruence, and order; introduction to graphs and trees. Additional topics include Boolean algebra and finite automata. Applications to computer science will be illustrated. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher), MATH 1941 (C or higher), MATH 1038 (C or higher), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21), (CIS 1068 or CIS 1968), and (CIS 1166, CIS 1966, or MATH 2111)

CIS 2168. Data Structures. 4 Credit Hours.

A continuation of CIS 1068. Program style organization and design with continued emphasis on the object-oriented design paradigm. Understanding and use of data abstraction through Java classes and class libraries. Understanding and use of the following Abstract Data Types: strings, stacks, queues, priority queues, lists, linked lists, binary trees, heaps, and hash tables. Introduction to expression evaluation and other applications. Introduction to recursion and comparative analysis of searching and sorting algorithms and data structures. Sorting algorithms include insertion sort, mergesort, heapsort, and quicksort. Searching algorithms include binary search, hashing, and Huffman coding. NOTE: For Computer Science and Information Science and Technology Majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1068 or CIS 1968), (CIS 1166, CIS 1966, or MATH 2111), and (MATH 1022, any MATH course numbered 1038 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

CIS 2229. Architecture, Operating Systems and Networking. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course provides an introduction to computer system architecture, operating systems concepts, and network organization, structure, and management. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1051, CIS 1951, CIS 1057, CIS 1068, or CIS 1968)

CIS 2305. Mobile Computing Technologies. 4 Credit Hours.

This course is typically offered in Spring.

This course provides an environment for students to learn and experiment with mobile computing technologies in different platforms, such as iPhone, Android and Windows Mobile (in partnership with Microsoft Research). The actual platform may rotate according to students' interest, device and instructor availability. The course is tutorial and project oriented. The first eight weeks are for tutorials and laboratories. The remaining weeks are for group projects. Each team will consist of students with programming, management and critical analysis skills. NOTE: For Information Science & Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1068, CIS 1073, or CIS 1056)

CIS 3100. Special Topics in CIS. 1 to 6 Credit Hour.

The aim of this course is to examine current problems in Computer Science. Subject matter varies from semester to semester.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 3191. Independent Research II. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisites: Completion of CIS 2168 and [CIS 3223 or CIS 3309] with at least a C-, and a GPA of 3.0 or better in the major. Research under the direction of a faculty member in the Department of CIS. All students must obtain the approval of the CIS Administrative Coordinator. NOTE: Not available for major credit and does not count in the major GPA. This course is repeatable.

Repeatability: This course may be repeated for additional credit.

CIS 3203. Introduction to Artificial Intelligence. 4 Credit Hours.

This course is typically offered in Fall.

Introduction to the issues and ideas of artificial intelligence using LISP and PROLOG. Knowledge of representation, search, problem solving, learning and mathematical reasoning. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2033, CIS 2166, and CIS 2168.

CIS 3207. Introduction to Systems Programming and Operating Systems. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course is concept-oriented, not specialized to a particular operating system, and not trying to teach how to code the kernel of an operating system. After reviewing a number of system programming issues, it examines the basic components of modern operating systems in terms of their function, domain, design, principles and implementation techniques, use and impact on systems programming. It describes and uses in programming homework two modern operating systems (UNIX and Windows NT). Design and implementation of a number of concurrent programs is examined. Hardware support for operating system functions is discussed. Performance issues are considered through the course. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 1166, CIS 2107, and CIS 2168.

CIS 3211. Automata, Computability, and Languages. 3 Credit Hours.

This course is not offered every year.

Finite automata, their limitations and capabilities, and Kleen's theorem or regular expressions. Other types of automata and their events. Turing machine and computability, computable functions, and halting problems. Introduction to context-free languages. Syntactical analysis of such languages with application to translation. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2166.

CIS 3217. Computer Architecture. 3 Credit Hours.

This course covers the fundamentals of computer architecture with an emphasis on how application software is executed on computing systems. The primary goal is to provide a deeper understanding of how machines are built and execute programs so that students learn to develop software that runs on modern multiprocessing computing systems more efficiently and become more effective at program debugging. Students also gain exposure to techniques and tools used by system designers such as code profilers, disassemblers, debuggers, and other performance measurement tools.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2107 and CIS 2168.

CIS 3219. Computer Graphics and Image Processing. 4 Credit Hours.

This course is typically offered in Spring.

An analysis of the techniques used in computer manipulation of two- and three-dimensional images. Hardware and software for displaying images, two- and three-dimensional transformations, the hidden line problem, picture processing, character recognition, and two-dimensional filtering. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in CIS 1166, CIS 2107, CIS 2168, and (MATH 1042 (C or higher), MATH 1942 (C or higher), MATH 1951 (C or higher), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

CIS 3223. Data Structures and Algorithms. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Comparative analysis of algorithms and data structures. Data structures include heaps, priority queues, binary and general trees, binary search trees, AVL trees, Red-Black trees, B-trees, and graphs. Algorithms include heapsort, topological sort, breadth-first search, depth-first search, shortest path algorithms, and Greedy algorithms. Students will gain experience working in a group on at least one moderate-size project. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2166, CIS 2168, (CIS 2033 or MATH 3031), and (MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, or 'Y' in MATW)

CIS 3238. Software Design. 4 Credit Hours.

This course is typically offered in Spring.

Provides direct experience in the design, development, documentation, testing and maintenance of medium size software projects, in the use of modern software problem solving abstractions and solution patterns, and in the use of software development environments. This course is the capstone of the programming course sequence.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168 and CIS 3207.

CIS 3242. Discrete Structures. 3 Credit Hours.

This course is typically offered in Fall.

Introduction to algebraic structures fundamental to various areas of computer science. Graphs, planar graphs, algorithms on graphs and their analysis, sequential machines and their minimization, semi-groups, and groups and their application to computer science. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2166.

CIS 3281. Cooperative Education Experience in Information Science & Technology. 4 Credit Hours.

This course is typically offered in Fall, Spring and Summer I.

Prerequisites: Completion of CIS 2168 with at least a C-. All students must obtain the approval of the IST Faculty Advisor. In this course, students undertake directed study in Information Science and Technology, which integrates academic program and work experience. The course is coordinated by an Information Science & Technology faculty member, but supervised by the student's work supervisor. At the end of the semester students will turn in a final report detailing the work done on the project. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may be repeated for additional credit.

CIS 3287. Software Design/Practicum. 4 Credit Hours.

This course is typically offered in Fall.

Provides direct experience in the design, development, documentation, testing and maintenance of medium size software projects, in the use of modern software problem solving abstractions and solution patterns, and in the use of software development environments. This course is the capstone of the programming course sequence. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (CIS 2168 or 'Y' in CRCI02) and (CIS 3207 or 'Y' in CRCI03)

CIS 3296. Software Design. 4 Credit Hours.

This course provides direct experience in the design, development, documentation, testing and maintenance of medium size software projects, in the use of modern software problem solving abstractions and solution patterns, and in the use of software development environments. This course is the capstone of the programming course sequence. By its very nature, the capstone course is a method of summative evaluation of students' previous learning in computer science disciplines. It provides a forum that allows an instructor to assess the student's overall collegiate learning experience. Students are assumed to have gained adequate computer language (C and Java in particular) and programming skills in their early-year curriculum. As this is a writing-intensive course, students are required to submit written assignments that go through an iterative writing cycle: a student submits an assignment, the instructor gives feedback on the assignment, student revises and resubmits work, and the instructor assigns a grade for the revised version. Writing assignments in this course will be grounded in the expression of technical computer science concepts and are designed to help students to develop and practice skills in writing for the computer science discipline.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168 and CIS 3207.

CIS 3308. Web Application Programming. 4 Credit Hours.

This course is typically offered in the Spring.

This course introduces the techniques used in the design and implementation of web applications. Using development environments such as Dreamweaver, Visual Studio, Eclipse, Netbeans, and SQL Management Studio, students write code for the browser (HTML, Cascading Style Sheets, javascript, ajax), web application server (JSP, PHP, or C# .NET), and database server (SQL, stored procedures, triggers). Students learn about internet protocols and how to work with web application objects (e.g., request, response, session). Students learn how design patterns such as MVC (Model-View-Controller) can and should be applied to the multi-tiered, distributed software that make up today's web applications. XML (a format commonly used to transfer data over the internet) and web services (a method call to a remote computer over the internet) are discussed and demonstrated. Each student will program their own web application, expanding on its functionality each week in the lab.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2107 and (CIS 2168 or CIS 2173)

CIS 3309. Component-Based Software Design. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course emphasizes component-based software development using a modern object-oriented programming (OOP) language (currently C#). Students are introduced to software development techniques applicable in a component (class)-based, integrated software development environment (IDE). Students will learn (and practice using) the OOP language, object-oriented software design techniques, and the principles of good user interface design. Students will also learn how to navigate in, and take full advantage of, an IDE in building quality software, including user interfaces to databases, sequential files, and graphics tools. Object-oriented concepts such as inheritance, polymorphism, static and dynamic binding, and interface (abstract class) components will be covered. The primary focus is on windows-based software products, but the use of ASP.NET for client-server systems development is also introduced. NOTE: (1) Duplicate Course: Students may not get credit for both CIS 4309 and 3309. (2) For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 2109 (may be taken concurrently) or CIS 4331), (CIS 2168 or CIS 2173), and (MATH 1022, any MATH course numbered 1038 to 4999, 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

CIS 3319. Wireless Networks and Security. 4 Credit Hours.

This course is typically offered in Spring.

The students are expected to learn fundamental knowledge of cryptography, several types of important wireless networks, and security issues and defenses in the wireless networks and systems.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2107 and CIS 2168.

CIS 3329. Network Architectures. 4 Credit Hours.

This course covers the operation of computer networks and internets. It provides the background to enable students to evaluate alternative approaches to client-server computing and n-tier software development. To accomplish this the course includes communications technology, computer network technology internetworking using the TCP/IP protocol suite, client-server protocols, client-server computing, network program component models as well as issues involving security, privacy, authentication, intellectual property rights, and social changes related to computer networking. NOTE: For Information Science and Technology Majors and Minors only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168 and (CIS 2107 or CIS 2229)

CIS 3342. Server-Side Web Application Development. 4 Credit Hours.

This course is typically offered in Fall and Spring.

The objective of this course is to provide further depth, beyond CIS 3309, into the development of network deployed systems. Its emphasis is on distributed, multi-tier architectures. The course is divided into 3 parts. First is the theory associated with software engineering design principles and distributed processing in client/server architectures and database systems. The second part is a deeper knowledge of the ASP.NET and C#.NET languages beyond CIS 3309. This would include such topics as web and windows applications, user interfaces, event handling, database design and ADO.NET, Web Services, Ajax, user controls, and report generation. The third part of the course is a project that the student will perform in the design and programming of a distributed client/server application. NOTE: (1) For Information Science and Technology Majors. (2) Prior to fall 2017, the course title was "Networked Application Systems."

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2109, CIS 3309, and CIS 3344.

CIS 3344. Client-Side Scripting for the Web. 4 Credit Hours.

This course is typically offered in Fall and Spring.

Today's web applications are becoming more interactive, doing more on the client side and less on the server side. A new software design goal is to write a single code base that can support many formats, from mobile phones, to tablets, to computer monitors. This course will focus on current technologies in client side web scripting, such as: HTML, CSS, responsive web design techniques, JavaScript, JavaScript libraries (such as jQuery), JSON (or other web data formats), Ajax (a technique using JavaScript to make asynchronous calls to web APIs), and client side web application frameworks (such as AngularJS). Students will create web applications that access a database using client side code that invokes web APIs. NOTE: (1) For Information Science and Technology Majors. (2) Prior to fall 2016, the course title was "Advanced Web Application Design and Scripting."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2109 (may be taken concurrently) and CIS 2168.

CIS 3374. Quality Assurance & Testing. 4 Credit Hours.

This course is typically offered in Fall.

Learn the techniques for creating quality systems. This course discusses the crucial steps to be taken to assure that systems: do what they are intended to do; work reliably; satisfy the client's requirements; are completed on time and within budget. Quality practices will be introduced and reviewed to give you a perspective as to why some systems succeed and others fail. Most importantly, students will learn techniques for building quality systems. A number of software tools will be introduced and discussed. Participants will be expected to complete one research paper on test automation, write test plans, and develop the skills to improve the software development process. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 3376. Enterprise Resource Planning (ERP) Design and Implementation. 3 Credit Hours.

This course is typically offered in Spring.

This course is designed to teach students about implementation of integrated information system for the enterprise using SAP ERP. The course will explain the fundamental concepts of ERP implementations, including cost/benefit, infrastructure design and integration issues. Online tutorials will be used to provide an introduction to the SAP and navigation exercises to acquaint students with getting around within SAP ERP. Students then will work in teams on case studies that execute business process integration in five key areas: sales logistics, production logistics, procurement logistics, accounting/controlling, and human resources. Additionally, students are introduced to SAP master data creation and use. NOTE: For Information Science & Technology Majors.

NOTE: This is a new course number for the SAP course, which had been offered as CIS 4340. Students may not take this course if you already took CIS 4340. For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2109 and CIS 2168.

CIS 3381. Cooperative Education Experience in Computer Science. 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Students undertake directed study in Computer Science, which integrates academic program and work experience. The course is coordinated by a Computer Science faculty member, but supervised by the student's work supervisor. Students will submit a weekly log and turn in a final report detailing the work completed at the end of the semester. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may be repeated for additional credit.

CIS 3441. Software Security. 3 Credit Hours.

This course will familiarize students with the common vulnerabilities that plague developed code as outlined in publications like the OWASP Top 10 and SANS Top 25. They will understand what type of development behaviors lead to vulnerabilities and how to avoid those behaviors when creating secure code. Students will learn how to perform a threat model on development features to understand what threats could impact code, where they come from and how to mitigate them. They will also review and operate analysis tools that are available to developers in order to analyze their code and discover vulnerabilities, allowing them to be corrected early in the development life cycle.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 3513. Introduction to iOS Application Development. 4 Credit Hours.

One of the two major mobile computer system platforms, the Apple iOS SDK has proven to be a powerful platform upon which to build sophisticated mobile applications. Students will learn to design, build and test mobile applications on Intel Apple Mac computers using a freely available compiler and simulator. The applications can be transferred to iOS devices such as iPhones and iPads. Students will become proficient in the object-oriented language Objective-C or Swift, Apple iOS Frameworks, and the XCode development environment.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 3207 or CIS 3342)

CIS 3515. Introduction to Mobile Application Development. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course will introduce students to application development for mobile devices, and the various concerns of mobile platforms. Students will learn about the various constraints inherent to mobile applications as well as the new opportunities that they present. They will learn how to address challenges in hardware and mobile interface modalities by incorporating software design and user-interaction design principles. Additionally, students will be exposed to new models of software and data distribution, leveraging third party software, and managing local and remote data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 3603. User Experience Design. 3 Credit Hours.

This course is typically offered in the Fall and Spring.

This course will focus on the effective understanding and implementation of the iterative UX design process. Students will learn to have empathy for users by putting into practice each phase of the design process, including Scoping, Research, Analysis, Ideation, Design, Validation, and more. Students will gain exposure and experience in a simulation of a real-world experience.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 3605. Introduction to Digital Forensics. 3 Credit Hours.

This course is typically offered in Fall.

This course is a broad introduction to the field of Digital Forensics. It covers various fundamental topics necessary for digital forensics investigation. The course begins with foundations of electronic evidence including cyber crime laws, the 4th Amendment, compliance and requirements, collection and handling, analysis, and reporting. The course also covers fundamentals of file systems with specific details pertaining to Microsoft FAT file systems. Students will learn two important forensics techniques - file recovery and file carving - among other things. Finally, forensics artifacts relevant to Windows Systems and Networks are discussed with relevant lab activities and students are also introduced to Antiforensics. Hands-on lab activities familiarize students with several relevant investigation techniques and the use of open source forensics tools.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 2107 or CIS 2229) and CIS 2168.

CIS 3715. Principles of Data Science. 4 Credit Hours.

This course is typically offered in Spring.

Introduction to the practice of data science. Students will leave the class with a broad set of practical data analytic skills based on building real analytic applications on real data. Skills include collecting, accessing, and transferring data, applying methods from machine learning and data mining to analyze data, and visualization and presentation of results. The students will gain experience in processing "big data" which are too big to fit in the computer's memory. NOTE: For Computer Science and Information Science and Technology Majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 2166, MATH 2101, MATH 2103, or ENGR 2011) and (CIS 1051, CIS 1057, CIS 1068, or CIS 1968)

CIS 3755. Introduction to Information Visualization. 3 Credit Hours.

Data is everywhere. People, organizations, and governments are increasingly using this data to inform personal behaviors, guide decision-making, and craft public policy. However, data is not objective. The way it is collected, analyzed, and presented can strongly influence the story that is communicated. In the worst case, charts can even be designed to mislead and misinform. This course will help students learn how to communicate important insights about people through data and visualization. They will be able to identify ineffective and misleading visualizations. Through a series of in-class activities, take-home assignments, and group projects, students will have opportunities to flex their new skills and develop portfolio items to showcase their ability to craft and publish compelling data stories.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 3775. Information Technology Project Management. 3 Credit Hours.

This course will be offered in the Fall and Spring semesters.

Strong business leaders in today's marketplace use project management knowledge and skills as a key differentiator driving success in their organizations. This course will use case studies to examine basic components of time, scope and resources within the project management processes defined by the Project Management Institute. This course lays the foundation for learning project management with practical examples and tools used in actual business situations. Learn how project management can be driven not only from a monitoring and numbers perspective but also from a people perspective to reach business goals. NOTE: For Information Science and Technology Majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4083. Directed Reading/Study. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisites: Completion of CIS 2168 and [CIS 3223 or CIS 3309] with at least a C-, and a GPA of 3.0 or better in the major. A tutorial opportunity for a student to work with a faculty member to investigate areas of study not covered by courses in the department. All students must obtain the approval of the CIS Administrative Coordinator. NOTE: Not available for major credit. Counts toward the major GPA. This course is repeatable.

Repeatability: This course may be repeated for additional credit.

CIS 4105. Information Technology Process Management. 3 Credit Hours.

This course is typically offered in Fall.

An introduction to essential techniques for successfully creating, organizing and managing IT projects. The course provides the foundation for more advanced studies in process management and software engineering. Enterprise-wide requirements, long-range planning and managing all aspects of the development process will be emphasized. The course will stress the use of appropriate software tools and process modeling throughout the development lifecycle. Quality assurance techniques are introduced at the outset to guide IT processes and decision making. Methods and tools for the technical development of IT systems are presented and used in case projects. The course follows the normal development lifecycle, starting with the recognition and justification of the need for either a new system or an upgrade to an existing system. It then proceeds through analysis, specification, design, implementation, testing (quality assurance), client training and turnover, and maintenance. The importance of each development stage will be taught within the framework of systems reliability, effectiveness, security, scalability, and development cost. NOTE: For Information Science & Technology Majors.

NOTE: For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4106. System Development Process. 3 Credit Hours.

This course is typically offered in Spring.

Methods and tools for the technical development of IT systems are presented and used in case projects. The course follows the normal development lifecycle, starting with the recognition and justification of the need for either a new system or an upgrade to an existing system. It then proceeds through analysis, specification, design, implementation, testing (quality assurance), client training and turnover, and maintenance. The importance of each development stage will be taught within the framework of systems reliability, effectiveness, security, scalability, and development cost. NOTE: For Information Science & Technology Majors.

NOTE: For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3309.

CIS 4108. Emerging Technologies and Tools for Enterprise Management. 3 Credit Hours.

This course is typically offered in Spring.

The purpose of this course is to provide students with an understanding of maturing and emerging technologies and their likely impact on the networked information paradigm and enterprise management. Both hardware and software technologies will be covered. Students will be introduced to advanced software tools that demonstrate how agency enterprises make use of vast information flows and interconnectivity. NOTE: For Information Science & Technology Majors.

NOTE: For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3309.

CIS 4282. Independent Study. 1 to 6 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Research under supervision of a faculty member.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may be repeated for additional credit.

CIS 4296. Information Systems Analysis and Design. 4 Credit Hours.

This course is typically offered in Fall and Spring.

The analysis and design phases of the System Development Life cycle are covered in detail. Methodologies for systems analysis, specifications, and design are covered. Both the Traditional Structured and Object Oriented methodologies are used by the students, working in teams, to develop real-life information systems. Emphasis is placed on well-written documentation as well as oral communication typically required during the software development life cycle. Project management tools are employed by students to monitor their progress and the costs associated with their projects. CASE tools are employed for data and information modeling and specification. NOTE: (1) Duplicate Course: No credit for students who have completed CIS 4298 (W338). (2) For Information Science and Technology Major.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2109, CIS 3309, and CIS 3342 (may be taken concurrently)

CIS 4305. Real Time Computer Systems. 4 Credit Hours.

This course is not offered every year.

Introduction to the problems and techniques of designing and developing real-time systems. Topics will include components of real-time and embedded systems, system and device architecture, synchronous and asynchronous event handling, multi-tasking in real-time systems, scheduling and synchronization, and real-time data acquisition and control. The laboratory component involves building systems and simulations in real-time environments, with real-time kernels. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3207 and CIS 3223.

CIS 4307. Introduction to Distributed Systems and Networks. 4 Credit Hours.

This course is not offered every year.

Introduction to the concepts that are fundamental for understanding distributed systems and the technical infrastructure that makes them possible. Lectures will mostly be expository and conceptual. Directed closed laboratories and home assignments will be applied and involve the solution of distributed programming problems. NOTE: For Computer Science Majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2166, CIS 3207, and CIS 3223.

CIS 4308. Development of Multi-tier Client/Server Systems. 4 Credit Hours.

This course is not offered every year.

The objective of this course is to teach the principles and development of multi-tiered distributed systems. It is introduced with a basic review of internet communications and the architecture of client and server sites, including the functions of and relationships among the browser, web server, operating and file systems, middle-ware, database server, and application servers. Concepts involving various types of client/server side processing and remote connectivity methodologies are reviewed, including scripting languages, HTML, Dynamic HTML, XML, ASP, CGI, and DCOM. About 30% of the course is devoted to the above-described theory. The remainder of the course will be devoted to putting some of these principles and techniques into practice using the DCOM technology. A series of progressively sophisticated problems will be studied and programmed in the lab. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3207 and CIS 3223.

CIS 4319. Computer Networks and Communications. 4 Credit Hours.

This course is not offered every Fall.

Introduction to computer networks and communications. Local and wide area networks. Network topology and routing. Internet and ISO protocols. Applications including remote procedure calls, remote logon, and file transfer. Network operating systems. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3207 and CIS 2166.

CIS 4324. Compiler Design. 4 Credit Hours.

This course is not offered every year.

The student will learn what a compiler is and how it works. Topics covered include: how to specify what a legal program is in a language (syntax); how to specify what a legal program does (semantics); how a computer uses these specifications to recognize a legal program and translate this program into the machine's language. Students will develop a working compiler for a simple object-oriented programming language using an Object-Oriented approach, using Java, and the compiler construction tool ANTLR. The target will be the Java Virtual Machine. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168 and CIS 2166.

CIS 4330. Current Topics in Information Science & Technology. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Current problems in information science and technology. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

This course is repeatable for credit.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Information Science & Technolo.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4331. Principles of Database Systems. 4 Credit Hours.

This course will cover the fundamental concepts of database systems, with an emphasis on relational database systems. It will cover both the theory and practice of relational databases, including Codd's original relational model, the relational algebra and calculus, and normalization. Students will learn how to do database design using the (extended) entity-relationship model. There will be a semester-long project in which students will design and implement an actual database, using an existing relational database management system, such as Access, MySQL, or Oracle. NOTE: (1) Duplicate Course: No credit for students who have completed CIS 2109. (2) For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2107 and CIS 2166.

CIS 4340. Seminar in Information Science & Technology. 4 Credit Hours.

This course is typically offered in Spring.

Current problems in information science and technology. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

This course is repeatable for credit.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Information Science & Technolo.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4344. Advanced Web Application Design & Scripting. 4 Credit Hours.

This course is typically offered in Fall and Spring.

A principal objective of the course is to present web site design and web application programming as separate technical disciplines and, at the same time, to show how they must be carefully integrated to produce effective results. The course will provide the student with the principal design techniques and associated implementation languages for creating dynamic web pages and for both client and server side processing via scripting and an object oriented, event driven language. The new concepts associated with Web 2.0 are presented. These capabilities are sometimes collectively described as Rich Internet Applications (RIA). They greatly enhance the dynamics and interactivity of web presentation and include the "push" vs. "pull" paradigms. Prevalent technologies and languages for web design to be taught are XHTML, CSS, XML, XSL, and DaM, Javascript, Action Script and Adobe FLEX. The prerequisite courses will provide students with the necessary elements of VB.NET for server side processing as well as SQL for database design. Together, the client side scripting languages and the server side .NET and SQL languages will enable students to create applications for the complete client/server cycle. Two other technologies will also be introduced as important contributors to RIA: (1) AJAX, which enhances the effectiveness and speed of the client/server interaction, and (2) Really Simple Syndication (RSS), which provides new delivery modes of web based information in terms of the "push" paradigm. Online tutorials and reference manuals will be made available for all languages used in the course as a supplement to the Text Book. The course will emphasize good web design practice, client server architecture, and the principles of event oriented programming. It will be shown how the use of an Integrated Development Environment (IDE) and other specialized tools can enhance programmer/designer productivity and quality of the final product. NOTE: For Information Science and Technology Majors. Prior to spring 2011, the course title was "Client/Server Scripting Languages for Web Development."

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3309 and CIS 2168.

CIS 4345. Introduction to Cloud Computing. 3 Credit Hours.

Cloud Computing is concerned with the use and architecture of this model of computation. We study the services provided by clouds, their internal structure, and their possibilities and limitations. Topics include: Infrastructure as a Service, Middleware (Platform) as a Service, Software as a Service, Service-oriented architectures, Web Services and standards, cloud security, reliability, governance, and wireless clouds.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3207.

CIS 4350. Seminar on Topics in Computer Science. 4 Credit Hours.

This course is typically offered in Fall.

Current problems in computer science. NOTE: For Computer Science Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

This course is repeatable for credit.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Computer & Information Science, Computer Science, Computer Science and Physics, Data Science: Comp Analytics, Data Science, Mathematics/Computer Science, Mathematics & Comp Sci w/Teach.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4360. Seminar on Topics in Computer Science. 3 Credit Hours.

Course content varies from semester to semester and is concerned with current issues in computer science. Note: For Computer Science Majors.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Computer & Information Science, Computer Science, Computer Science and Physics, Data Science: Comp Analytics, Data Science, Mathematics/Computer Science, Mathematics & Comp Sci w/Teach.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4362. Application System Development Using Relational Technology. 4 Credit Hours.

This course is not offered every year.

This course will assist in achieving a significant level of understanding and synergy of a variety of Oracle tools, environments and languages including SQL*Plus, PL/SQL, Oracle Forms and Reports. As a parallel line it will be supported by a course project done in a team environment where every team member will do independent work in addition to learning how to work in a team. The course project will include a functional requirements specification, database design, SQL queries, SQL-based listings and reports, reports developed using Oracle Reports, online interface using Oracle Forms, and PL/SQL code supporting the developed application system. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 2109 or CIS 4331)

CIS 4372. C++ Applications Programming. 4 Credit Hours.

This course is not offered every year.

The C++ programming language is used extensively for interest and applications programming. This course is aimed at providing students with the object-oriented programming experience needed in applying C++ to these problem areas. The objectives are two-fold. One aim is to enhance the student's ability to organize large scale programming tasks using the object oriented approach. The second aim is to further the student's ability to develop error-free maintainable code. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2229 and CIS 3309.

CIS 4376. E-Commerce System Development. 4 Credit Hours.

This course is typically offered in Fall.

The objective of this course is to teach the technical aspects of developing a commercial web site. This process combines a number of technologies: (1) web page and style sheet design, (2) dynamic web pages that access data from relational and XML databases, (3) client and server side transaction processing, (4) principles of internet security, scalability, and database reliability, (5) distributed component integration using packages for major functions such as credit card validation, shopping cart management, order fulfillment and inventory management. Students will develop a site as a course project. They will use the Microsoft Visual Studio.NET as the principal software development tool. This includes the ASP.NET and VB.NET languages. Tools to perform the other tasks include Front Page for web design, an XML editor for XML pages, and the Microsoft Enterprise Manager for the management of SQL Server databases and VS.NET component deployment. The course will provide numerous online references to all of these languages and tools. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168.

CIS 4378. Computer and Network Security. 4 Credit Hours.

This course is typically offered in Spring.

This course provides an introduction to the inherent insecurities in today's computer systems and networks, and the commonly used tools and techniques used to secure them. Topics include cryptography basics, virtual private networks, secure sockets, e-mail security, firewalls, building secure software, kerberos, web server security, viruses, intrusion detection systems, and privacy issues. NOTE: For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2229 and CIS 3329.

CIS 4382. Independent Study. 1 to 6 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Research under supervision of a faculty member.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Repeatability: This course may be repeated for additional credit.

CIS 4396. Information Systems Implementation. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This is a capstone course where teams of students implement the information system for which they developed specifications in CIS 4296 (W281). The teams create the database, programs, procedures and documentations necessary for their project. Techniques of modular design, program development, testing and integration are employed. Emphasis is placed on writing documentations, oral presentations and project management. NOTE: (1) Duplicate Course: No credit for students who have completed CIS 4398 (4339, 0339). (2) For Information Science and Technology Majors.

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 4296 and (CIS 3342 or CIS 4342)

CIS 4397. Independent Research in Computer Science. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer (12 weeks).

Students undertake research under the supervision of a CIS faculty member. The research project must be approved by the chair of the student's undergraduate program. Students must apply by November 15 for Spring, March 15 for Summer, and April 15 for Fall. Requirements include a 3.0 GPA overall and a 3.3 GPA in the major, and students must have completed all required courses in the major except for no more than 2 required electives in the major (CIS, Math, or Data Science Electives). Students are strongly urged to take an independent study with their research professor prior to enrolling in this course. Note: (1) This course is used to fulfill the capstone requirement in the major and (2) For Computer Science, Math & Computer Science, and Data Science majors.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

CIS 4398. Projects in Computer Science. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Team-oriented design and implementation of large programming project. Students will propose topics for review and acceptance early in the semester. Students will provide written documentation of their completed projects and will demonstrate the operation of their completed projects in an oral presentation. Projects will be solicited from industry and other departments at the University. NOTE: For Computer Science Majors (For Math/CS Majors see your advisor).

For any CIS prerequisite course taken prior to Spring 2012 a grade of C or better is required.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 3238, CIS 3287, or CIS 3296) and CIS 3223.

CIS 4419. Securing the Internet of Things. 3 Credit Hours.

We are seeing the rise in popularity of embedding computing and communication capabilities into everyday objects to make them "smarter". From smart cities to smart power grids, from autonomous vehicles to AI-powered decision systems, this new Internet of Things (IoT) world brings with it many new security and privacy challenges. The objective of this course is to introduce students to the new cybersecurity and privacy issues in these emerging systems, as well as the latest research on defending against these threats. Students will build on their knowledge of fundamental cybersecurity concepts and techniques from CIS 4378 or CIS 3319, and learn to apply them in these new problems. Upon successful completion of the course, students are expected to demonstrate knowledge and understanding of these contemporary systems and be able to identify the vulnerabilities in these systems as well as countermeasures to address these threats. Some of the topics that will be covered include: 1) Security of standards and protocols used in smart environments such as MQTT, CoAP, UPnP, 2) Security and privacy of wireless communications used in IoT systems, including Bluetooth, Zigbee, RFID, 3) Security and privacy issues in various application domains such as smart homes, public safety, healthcare, and wearable systems, and 4) Security and privacy challenges of AI-enabled systems such as autonomous vehicular networks, voice/facial recognition, virtual and augmented reality (VR/AR), etc.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168 and (CIS 2107 or CIS 3329)

CIS 4496. Projects in Data Science. 3 Credit Hours.

This course provides students an experience in the design and implementation of an end-to-end pipeline for a challenging real-world data science project. Students will work in teams of 4-6 to identify a practical problem scenario, apply knowledge synthesized from previous courses to design a solution, and learn new skills and techniques in the process of implementing the proposed solution. Lecture times will be used to discuss components of a data science project life cycle, to consider common issues in data science projects, to deliberate over business case studies, to brainstorm ideas for addressing stumbling blocks in team projects, and to seek and share feedback on project decisions and progress. Lab times will be used to develop project design, code, and documentation. Students will receive project feedback from the instructor as well as from student peer groups which will be used for iterative development and improvement. Upon completion of the course, students are expected to have gained essential professional and technical skills to enter the work force as a data science professional.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168, CIS 3715, and MATH 3032 (may be taken concurrently)

CIS 4515. Advanced Mobile Application Development. 4 Credit Hours.

This course is typically offered in Spring.

This course will introduce students to advanced concepts in application development for mobile devices. Students will learn to leverage the various novel components found in modern mobile devices such as NFC, Bluetooth, and GPS, to build applications that are aware of and act based on their environment. Students will learn to work in teams to design and implement complex applications and learn how to address challenges in hardware and user interfaces by incorporating software design and user-interaction design principles. Students will also be introduced to current software distribution models and the ethics of managing user data.

Note: Students can enroll in this course without the prerequisite if instructor permission is granted.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 3515.

CIS 4517. Data-Intensive and Cloud Computing. 3 Credit Hours.

This course is typically offered in Spring.

This course will expose students to recently emerged and fast moving technology of big data and cloud computing. It will cover a spectrum of topics from core techniques in data management and analysis to highly-scalable data processing using parallel database systems. Students will be introduced to big data ecosystems such as Hadoop, Spark, Storm and MapReduce; cloud technologies such as Amazon EC2, Microsoft Azure and Google Cloud; data management tailored to cloud and big data such as NoSQL, Google Big Table/Apache HBase, and introductory applications to big data and cloud environment. Students will work directly with a selected set of these platforms, compare and contrast their relative strengths and weaknesses, and characterize the problems they are designed to solve. Note: Students may not receive credit for both CIS 4517 and CIS 5517.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2168 and (CIS 2166, MATH 2101, MATH 2103, ENGR 2011, or MATH 3045)

CIS 4523. Knowledge Discovery and Data Mining. 3 Credit Hours.

This course is not offered every year.

Basic concepts and techniques for the automated extraction of interesting patterns in large databases. Topics covered include: association-rule mining, sequence mining, web and texting mining, data warehousing, information filtering, classification and clustering analysis, Bayesian and neural networks, classification and regression trees, hypotheses evaluation, feature extraction, dimensionality reduction, singular value decomposition, data compression and reconstruction, visualization of large data sets, fractals in databases, and indexing methods that support efficient data mining and queries by content. Special emphasis is given in multimedia, business, scientific, and medical databases. Note: Students may not receive credit for both CIS 4523 and CIS 5523.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2043, (CIS 2166, MATH 2101, or ENGR 2011), (MATH 3031, ECE 3522, STAT 2103, or BIOL 3312), and (CIS 1051, CIS 1057, or CIS 1068)

CIS 4524. Analysis and Modeling of Social and Information Networks. 3 Credit Hours.

This course is not offered every year.

This course will include methods for analyzing and modeling the following aspects of social networks: the small-world network models, centralized and decentralized social network search algorithms, power-laws and preferential attachment, diffusion and information propagation in social networks, influence maximization in social networks, community detection in social networks, models of network cascades, models of evolving social networks, links and attributes prediction. Note: Students may not receive credit for both CIS 4524 and CIS 5524.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2043, (CIS 2166, MATH 2101, or ENGR 2011), (MATH 3031, ECE 3522, STAT 2103, or BIOL 3312), and (CIS 1051, CIS 1057, or CIS 1068)

CIS 4526. Foundations of Machine Learning. 3 Credit Hours.

This course is typically offered in Fall.

The goal of the field of machine learning is to build computer systems that learn from experience and are able to adapt to their environments. This introductory machine learning course will present modern machine learning algorithms from supervised and unsupervised learning. It will provide the basic intuition behind the algorithms as well as a more formal understanding of how and why they work. Students will learn how to apply machine learning algorithms on a range of real-life problems and how to evaluate their performance. Note: Students may not receive credit for both CIS 4526 and CIS 5526.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 2043, (CIS 2166, MATH 2101, MATH 2103, or ENGR 2011), (CIS 2033, MATH 3031, ECE 3522, STAT 2103, or BIOL 3312), and (CIS 1051, CIS 1057, CIS 1068, CIS 1951, or CIS 1968)

CIS 4615. Ethical Hacking and Intrusion Forensics. 3 Credit Hours.

This course is typically offered in Spring.

This class teaches students how to use hacking techniques to perform a hack within legal confines. Such hacking is more commonly referred to as a white-hat or an ethical hack. The course will focus on both technical and social aspects of security, ranging from cryptography and biometrics to risk mitigation and disaster recovery aspects of security. Based on the ethical concepts built during the first half of the semester, students will learn the process involved with intrusion attack detection and forensics investigation. Finally, the course will significantly emphasize the key factors that differentiate a hacker (adversary/black-hat) from an ethical hacker, stressing the importance of being within legal confines, an important prerequisite for a successful ethical hacking career. NOTE: For Computer Science and Information Science and Technology Majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 3319 or CIS 4378)

CIS 4625. Audit and Compliance for Security and Digital Forensics. 3 Credit Hours.

This course is typically offered in Spring.

This course will provide students with a basic understanding of IT systems and the need for audit and compliance. Students will learn about IT terminology, governance, and the IT audit practice that has matured into given sets of frameworks, methodologies, approaches, and models with certain sets of underlying assumptions such as COBIT and SOX. Students will be exposed to various governance standards and federal compliance requirements. NOTE: For Computer Science and Information Science and Technology Majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CIS 2229 and CIS 4378.

Construction Management Technology (CMT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CMT 1005. Elements of Surveying. 3 Credit Hours.

Activities that will acquaint the student with instruments and tools of the surveyor, including their use in the techniques of field surveying. Emphasis on actual layouts and areas and elevations as performed in the civil and construction discipline.

Repeatability: This course may not be repeated for additional credits.

CMT 2010. Computers and Special Topics. 3 Credit Hours.

The application of computers for computer-aided drawings, graphical presentations, communications, data base operations and engineering computations, which require the writing of higher level language program segments to solve engineering application problems in statics and dynamics; with laboratory.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in PHYS 1021.

CMT 2124. Construction Methods and Materials. 3 Credit Hours.

Materials and construction processes of importance to the designer and constructor; construction equipment and methods of handling and placing these materials on the job.

Repeatability: This course may not be repeated for additional credits.

CMT 2125. Construction Contracts and Specifications. 3 Credit Hours.

Analysis of construction contract law cases, analysis of selected contracts, bidding and contract award procedures, interpretation of specifications. Preparation of written reports and oral presentations are required.

Repeatability: This course may not be repeated for additional credits.

CMT 2271. Building Systems. 3 Credit Hours.

A basic study of the primary mechanical and electrical equipment and systems used in buildings. Design principles for selecting and sizing various systems are stressed throughout the course. Mechanical topics include plumbing, heating, ventilating, air conditioning, water supply, fire protection, and sanitary sewer systems. Electrical topics include basic principles of electricity, single and three phase systems, transformers, branch circuits and feeders, and residential and commercial illumination.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (PHYS 1022, PHYS 1062, or PHYS 1962) and CMT 2124 (D- or higher)

CMT 3121. Construction Estimating. 3 Credit Hours.

Estimating quantities of materials, labor, and equipment for various construction tasks; pricing of cost items; indirect costs; types of bids and bidding process; term project using actual construction blueprints; written and oral presentations; computer applications using spreadsheet program and Timberline Precision Estimating Software.

Co-requisites: CMT 3123.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CMT 2124 and CMT 2125)

CMT 3123. Construction Estimating Laboratory. 1 Credit Hour.

Introduction of the construction bidding process and construction documents; blueprint reading; programming and database generation with spreadsheet software; computer applications using Timberline Precision Estimating Software.

Co-requisites: CMT 3121.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CMT 2124 and CMT 2125)

CMT 3145. Structural Analysis. 3 Credit Hours.

The analysis of statically determinant structures under static and moving loads, techniques for determining the deflection of structural members, and analysis of indeterminate structures.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGT 2322 or ENGR 2333)

CMT 3322. Construction Planning and Scheduling. 3 Credit Hours.

Field office planning, quality control plan development, construction planning and scheduling; term project using actual construction blueprints; written and oral presentations; computer applications using Primavera Project Planner Software.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CMT 2124 and CMT 2125)

CMT 3333. Soils Mechanics. 3 Credit Hours.

Physical composition of soils, weight-volume relationships, absorption, soil classifications, seepage and flow nets, settlement analysis, lateral earth pressure, and foundation design.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGT 2331 or ENGR 2331)

CMT 3341. Environmental and Safety Aspects of Construction. 2 Credit Hours.

Construction-related environmental issues, erosion control, wetland areas, habitat protection. Issues which relate to protective equipment, safety and potential hazards for construction workers, construction equipment operators, and others impacted by on-going construction activities; with laboratory.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

CMT 3351. Applied Hydraulics. 3 Credit Hours.

The design of water conveying and containment systems; pumps, sewers, open channels, dams, reservoirs, and water-related structures.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ENGT 2331 or ENGR 2331 (D- or higher))

CMT 4040. CMT - Special Topics. 1 to 4 Credit Hour.

A course designed to present new and emerging areas of Construction Management Technology. The course may also be used to present areas not normally taught in the College. Course requirements vary with the topic and instructor. Offered as needed or as appropriate.

Repeatability: This course may be repeated for additional credit.

CMT 4182. Independent Study in Construction Management Technology. 2 to 5 Credit Hours.

Student may complete a regular course during a semester the course is not offered, to meet prerequisite or graduation requirements. An instructor is assigned to supervise the student.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CMT 4183. Directed Study in Construction Management Technology. 1 to 4 Credit Hour.

An opportunity to study specialized topics not covered in currently available courses and providing significant progress towards the technical/professional objectives of the program. An instructor is assigned to define the scope, direct, supervise, and evaluate student progress.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CMT 4191. Independent Research in Construction Management Technology. 2 to 5 Credit Hours.

A project assigned with the approval of the department chair and conducted under the supervision of a faculty sponsor.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

CMT 4335. Steel and Wood Structures. 3 Credit Hours.

Structural systems and framing plans are developed for simple wood and steel structures. Typical framing members are designed and analyzed for adequate strength and serviceability.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CMT 3145.

CMT 4336. Concrete and Masonry Design. 3 Credit Hours.

Structural systems and framing plans are developed for simple concrete and masonry structures. Typical sub-systems and framing members are designed and analyzed for adequate strength and serviceability. The design of plain and reinforced concrete footings is included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in CMT 3145.

CMT 4355. Transportation Systems Management. 3 Credit Hours.

Transportation systems of the United States; design and technology of signalized traffic intersections, coordinated for the design of flexible and rigid pavements.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

CMT 4373. Construction Financial Management. 3 Credit Hours.

Construction cost accounting systems, job costing approaches, project budgeting, financial reporting procedure. Term project; written and oral presentations. Computers applied as required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CMT 3121 and CMT 3322)

CMT 4396. Capstone in Construction. 3 Credit Hours.

Synthesis of estimating, scheduling, and cost control for selected construction projects. Project management computer application. Preparation of written reports and oral presentations is required.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (CMT 2125, CMT 3121, and CMT 3322)

Counseling Psychology (CPSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CPSY 2301. Helping Professions for Diverse Populations. 3 Credit Hours.

This course prepares students for work in the helping professions. In this seminar, students will learn how to use empirical findings from psychological research to address issues encountered in community placements. Effective applications of the science of psychology in community settings depend not only upon the technical expertise of the student, but also on the student's adoption of a professional role. Thus, the course assists students in learning attitudes and behaviors that are characteristic of the profession of psychology.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

CPSY 2302. Can We Talk? Real World Interviewing. 3 Credit Hours.

The purpose of this course is to provide students with both an understanding of the theoretical concepts of interviewing as well as practice in developing interviewing skills. Students will understand the interviewer's role in the change process as applied to problems of education, counseling, performance, health care, and employment. Finally, students will become aware of the impact of personal attitudes, feelings, and behaviors upon the interviewing process.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

CPSY 3571. Introduction to Counseling Psychology. 3 Credit Hours.

A lecture course providing an overview of the field of counseling psychology as well as the role and function of the counselor in community and educational settings. Basic theories and principles of the counseling process, skills career, assessment, and group counseling approaches (couples, families, addictions and others) are covered.

Repeatability: This course may not be repeated for additional credits.

CPSY 3572. Interviewing Techniques. 3 Credit Hours.

The theory and techniques of interviewing, especially as they apply to problems of educational, vocational, and social counseling, rehabilitation, and employment. Course includes learning skills and applying techniques in various work settings.

Repeatability: This course may not be repeated for additional credits.

Criminal Justice (CJ)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CJ 0812. Criminal Behavior. 3 Credit Hours.

Although we like to think differently, committing crime is an extremely common human behavior. From the extremes of armed robbery or serial murder to the ordinary failure to declare income on tax returns or the tendency to speed on the highway, nearly everyone has broken the law and committed a crime at some point. Considering physiological, psychological and pharmacological factors, we explore the influences of family, peers and the effects of alcohol and drugs on the incidence of criminal behavior. And we examine how the urban and social environment encourages (or inhibits) opportunities to commit crime. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed CJ 0912.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

CJ 0852. Justice in America. 3 Credit Hours.

This course invites students to engage in an interdisciplinary examination of one of U.S. society's most enduring conflicts - the struggle to achieve an acceptable balance between state power to prevent and control crime, and the rights of individuals to be free from undue government coercion. Within the context of the structures and processes of the criminal justice system, students will investigate a select number of critical policy issues/problems, and ponder questions about the legitimacy of the criminal law method of social control. Against a brief introductory background to some of the major criminal justice policies and practices, students will have the opportunity to question their effectiveness, efficiency, and fairness, and to increase their skill in being able to articulate reasoned, logical, and evidence-based grounds for their conclusions and opinions. Key questions include: How well is society doing in its efforts to prevent/control crime? How do those efforts rate in terms of securing a just balance between the rights of individuals and the coercive powers of the government? Are we doing things right? Are we doing the right things? What improvements should be made? How can we know/decide? NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed CJ 0952.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

CJ 0853. Doing Justice. 3 Credit Hours.

Justice agencies - the juvenile justice system, police, judges and juries in courts, and prisons - are expected to create justice in response to lawbreakers. These agencies, however, often operate under enormous political, cultural, social, organizational and economic pressures. Further, what citizens or local leaders sometimes want from these agencies may create challenges and temptations. Thus, just outcomes are sometimes elusive. Focusing on the period 1925-2025 and largely on Philadelphia data, students will explore conceptual frameworks in the sociology of law, research articles, movies, maps, Census data, historical documents and newspaper archives to help understand these outcomes. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed CJ 0953.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

CJ 0912. Honors Criminal Behavior. 3 Credit Hours.

Although we like to think differently, committing crime is an extremely common human behavior. From the extremes of armed robbery or serial murder to the ordinary failure to declare income on tax returns or the tendency to speed on the highway, nearly everyone has broken the law and committed a crime at some point. Considering physiological, psychological and pharmacological factors, we explore the influences of family, peers and the effects of alcohol and drugs on the incidence of criminal behavior. And we examine how the urban and social environment encourages (or inhibits) opportunities to commit crime. (This is an Honors course.) NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed CJ 0812.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

CJ 0952. Honors: Justice in America. 3 Credit Hours.

This course invites students to engage in an interdisciplinary examination of one of U.S. society's most enduring conflicts - the struggle to achieve an acceptable balance between state power to prevent and control crime, and the rights of individuals to be free from undue government coercion. Within the context of the structures and processes of the criminal justice system, students will investigate a select number of critical policy issues/problems, and ponder questions about the legitimacy of the criminal law method of social control. Against a brief introductory background to some of the major criminal justice policies and practices, students will have the opportunity to question their effectiveness, efficiency, and fairness, and to increase their skill in being able to articulate reasoned, logical, and evidence-based grounds for their conclusions and opinions. Key questions include: How well is society doing in its efforts to prevent/control crime? How do those efforts rate in terms of securing a just balance between the rights of individuals and the coercive powers of the government? Are we doing things right? Are we doing the right things? What improvements should be made? How can we know/decide? (This is an Honors course.) NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed CJ 0852.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

CJ 0953. Honors: Doing Justice. 3 Credit Hours.

Justice agencies - the juvenile justice system, police, judges and juries in courts, and prisons - are expected to create justice in response to lawbreakers. These agencies, however, often operate under enormous political, cultural, social, organizational and economic pressures. Further, what citizens or local leaders sometimes want from these agencies may create challenges and temptations. Thus, just outcomes are sometimes elusive. Focusing on the period 1925-2025 and largely on Philadelphia data, students will explore conceptual frameworks in the sociology of law, research articles, movies, maps, Census data, historical documents and newspaper archives to help understand these outcomes. (This is an Honors course.) NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed CJ 0853.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

CJ 1001. Introduction to Criminal Justice. 3 Credit Hours.

This course, provides an overview of a broad range of ways of understanding "criminal justice" - as an academic discipline, a philosophical construct, and, most especially, a system and process defining a large-scale enterprise characterized by a complex and fascinating array of public and private agencies, laws, rules, theories, policies, practices, technologies, problems and controversies. Emphasis is placed upon a critical understanding of the key foundations [e.g., constitutions, statutes, case law, administrative rules], components [e.g., law enforcement, courts, corrections], processes [e.g., legislation, arrest, prosecution, conviction, sentencing, correctional intervention], and goals [e.g., due process, crime prevention and control, retribution, reparation] of the criminal justice system and, to a far lesser degree, related social control mechanisms such as mental health, juvenile, and civil justice systems. NOTE: This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

CJ 1002. Professional Development in Criminal Justice. 1 Credit Hour.

This one-credit seminar will focus on the various traditional and non-traditional career avenues that graduates of an undergraduate program in Criminal Justice can pursue. Upon successful completion of this course, students will have developed the skills necessary to effectively search for career opportunities and communicate professionally. Students will also develop an application-ready resume and will be well-prepared for networking and professional interviews. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

CJ 1901. Honors Introduction to Criminal Justice. 3 Credit Hours.

Honors version of Criminal Justice 1001 (C050). NOTE: This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IN

Repeatability: This course may not be repeated for additional credits.

CJ 2000. Special Topics. 3 Credit Hours.

Topics will be arranged each semester. Please consult with the instructor for more information.

Repeatability: This course may be repeated for additional credit.

CJ 2001. Introduction to Juvenile Justice. 3 Credit Hours.

Study of the juvenile justice system, including its origins, and development and contemporary calls for reform. Topics include definition of juvenile delinquency, philosophy and procedures of the juvenile justice system. Processes and policies used to control juvenile offenders, correctional treatment of juveniles, and prevention and intervention strategies will also be discussed.

Repeatability: This course may not be repeated for additional credits.

CJ 2002. Victims in Society. 3 Credit Hours.

This course explores the problem of victimization - both general and criminal; the types of victims involved -- direct and indirect, and individual and collective; and the harms they sustain -- financial, physical and mental. It also examines the fairness and efficacy of a wide variety of preventive and reactive ways of dealing with it -- by society in general and by the criminal justice system in particular. Emphasis is upon data sets and research studies shedding light upon the levels, correlates, dynamics, and consequences of major forms of victimization, as a basis for critical assessment of victimization theory, as well as existing and potential laws, policies, programs, practices, and technologies for reducing its incidence and impact.

Repeatability: This course may not be repeated for additional credits.

CJ 2101. Introduction to Law Enforcement. 3 Credit Hours.

Explores major trends and issues in law enforcement. The history and contemporary operation of police organizations, as well as the legal framework within which they operate. Examines police behavior and attitudes, especially as they effect discretionary decision making, and issues such as police brutality and corruption.

Repeatability: This course may not be repeated for additional credits.

CJ 2201. Criminal Courts and Criminal Justice. 3 Credit Hours.

Comprehensive introduction to the U.S. criminal court system including the structure and administration of federal and state court systems. The course focuses on several significant stages in the criminal process, including decision to charge, pretrial release, preliminary hearings, the grand jury, jury trials, and sentencing. Examines the roles of the prosecutor, defense attorney, judge, and victim. The course contrasts the popular image with the reality of the court system.

Repeatability: This course may not be repeated for additional credits.

CJ 2301. Introduction to Corrections. 3 Credit Hours.

An overview of sentencing, punishment, and treatment of convicted offenders. Beginning with sentencing, the course explores the options for dealing with convicted persons, including institutional and community dispositions.

Repeatability: This course may not be repeated for additional credits.

CJ 2304. Ethics, Crime, and Justice. 3 Credit Hours.

Police brutality, prosecutorial misconduct, prison guards who look the other way when rules are violated: these are just a few examples of ethical choices that undermine the public trust in the Criminal Justice System. This course will examine the meaning of ethics and its importance in modern society. Ethical decision making systems and theories will also be explored in detail. In addition the course will examine examples of ethical misconduct and the responses by the criminal justice system, in the context of three main arenas: law enforcement, lawyers and corrections. Finally, students will learn to apply these decision making systems to ethical dilemmas, as they develop an understanding of the factors that influence the criminal justice professional's decisions in real life verses theory.

Repeatability: This course may not be repeated for additional credits.

CJ 2401. Nature of Crime. 3 Credit Hours.

Overview of the various theories explaining crime and deviance. Emphasis on understanding the wide range of theoretical perspectives on crime and criminals, and how these theories impact criminal justice policy and treatment of offenders.

Repeatability: This course may not be repeated for additional credits.

CJ 2501. Introduction to Criminal Law. 3 Credit Hours.

Study of the general principles of substantive criminal law. Topics include the American legal system and appellate process; nature, origin and purposes of criminal law; constitutional limits on criminal law; elements of crime - actus reus, mens rea, causation; and defenses to charges of crime. The course emphasizes the application of legal rules to solve hypothetical and real life legal problems.

Repeatability: This course may not be repeated for additional credits.

CJ 2597. Criminal Justice Research Methods. 3 Credit Hours.

Introduces the scientific method and research designs including qualitative field methods, survey research, experiments, and quasi-experiments. Evaluation of research quality and synthesis of research evidence related to criminal justice issues emphasized. Special attention devoted to research problems often salient when researching criminal justice topics. Students who have taken CJ 2601 will not earn additional credit for CJ 2597.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CJ 1001.

CJ 2602. Criminal Justice Statistics. 3 Credit Hours.

Introduction to basic statistical methods and their application to criminal justice data. Covers both descriptive and inferential statistics. Topics include frequency distributions, measures of central tendency and dispersion, and basic hypothesis testing. NOTE: This course can be used to satisfy the university Core Quantitative Reasoning B (QB) requirement. Although it may be used towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. (Prior to spring 2017, the course title was "Criminal Justice Research and Analysis.")

Course Attributes: QB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CJ 1001 and CJ 2597.

CJ 2701. Inside-Out Prison Exchange. 3 Credit Hours.

The "Inside-Out" Prison Exchange Program is an opportunity for a small group of Temple students to go behind the walls of an area prison or jail to take a course with a comparable number of residents of the correctional facility. Using a unique pedagogical approach, approximately 15 "inside" students and 15 "outside" students (from Temple) meet for class once a week to explore issues of crime and justice, the criminal justice system, corrections and imprisonment. These topics are examined in depth, through an ongoing facilitated dialogue involving all participants, both in small groups and in the full class. There are numerous texts for the course, as well as several reflective/analytical assignments throughout the semester. Additionally, students work on a project together towards the end of the semester, developing solutions to the problems examined during the term. The course offers a chance for all participants to gain a deeper understanding of the criminal justice system through the marriage of theoretical knowledge and practical experience achieved by weekly meetings throughout the semester inside the facility.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CJ 3000. Special Topics. 3 Credit Hours.

Topics will be arranged each semester. Please consult with the instructor for more information.

Repeatability: This course may be repeated for additional credit.

CJ 3002. Drugs, Crime, and Justice. 3 Credit Hours.

This course examines the role that drugs play in the U.S. criminal justice system. Topics covered include the history of drug prohibition in the U.S.; the types of illegal drugs currently available in the United States; patterns, trends, and scope of illicit drug use; consideration of the relationship between drugs and crime; and manifestations and consequences of the criminal justice system response. The course includes hands-on experimental learning including site visits to locations such as drug court and rehabilitation programs. Note: This course was previously known as CJ 4002 or 4902. Students who have already received credit for this topic under those numbers will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3003. Race and Criminal Justice. 3 Credit Hours.

Study of the social, cultural, economic, psychological, and political factors associated with race and crime in the United States. This course examines the real and perceived relationship between race/ethnicity and criminal activity, as well as the impact of both personal and institutional racism on the criminal justice system. NOTE: This course was formerly taught as "Urban Minorities and the Criminal Justice System." Students who received credit under the prior title will not receive additional credit because the content overlaps significantly. This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Note also that this course existed previously under the course number of CJ 4003. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CJ 3004. Women and Criminal Justice. 3 Credit Hours.

Examination of historic and contemporary treatment of women involved in the criminal justice system as offenders, victims of crime, and workers and criminal justice professions. Specific topics may include criminological theories of women's crime, prostitution, infanticide, women's prisons, sexual offenses, domestic violence, and women's experience in policing, corrections, and law. Note that this course was formerly known as CJ 4004. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CJ 3005. Historical Roots of Urban Crime. 3 Credit Hours.

The historical development of organized crime (gambling, prostitution, narcotics, and bootlegging), professional theft, juvenile delinquency, and deviant subcultures in American cities since the Civil War. The development of criminal justice institutions, especially police, and their relationship to criminal activity. NOTE: Prior background in history or criminal justice preferred, but not required. Please also know that this course was formerly known as CJ 4005. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3006. Crime and Justice Around the World. 3 Credit Hours.

Philosophies, practices, and institutions of criminal justice in other countries. Crime & Justice Around the World was formerly known as CJ 4006 Comparative Criminal Justice. Students who have already received credit for CJ 4006 will not receive additional credit but can repeat the topic as CJ 3006 Crime & Justice Around the World for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3007. Cybercrime. 3 Credit Hours.

This course examines the criminal activity that occurs in cyberspace, the criminal actors that operate and organize in this space, the various criminological theoretical explanations for their crimes, and how policing and legal bodies are managing these crimes and criminals. Emphasis is on how communication technologies (e.g., computers and related networking technologies) can be targets of crime, instruments of crime, and important sources of criminal evidence. Students in this class will examine how cybercrime occurs along a continuum of technical expertise and physical-cyber operations. Students will also engage in practical experiential learning projects that emphasize everyday safe cyber-hygiene. Note: This course was formerly known as CJ 4007 and CJ 3007 Computer Crime. Students who have already received credit for this topic under the prior course number or former title will not receive additional credit but can repeat the topic/title under this new course number or title for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3101. Police Organization and Management. 3 Credit Hours.

Historical and contemporary management practices as applied to law enforcement organizations are examined, with particular concern for assessing police management accountability. Theories of organization and management are examined with regard to the police role and the efficient and effective provision of law enforcement services to the community.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CJ 2101.

CJ 3102. Community and Crime Prevention. 3 Credit Hours.

Course links features of community and individuals with different responses to crime and disorder, including individual and community prevention efforts. Examines causes of fear of crime, impacts of neighborhood features on reactions to crime, and types of prevention efforts mounted in different types of neighborhoods. The course emphasizes the links among individuals, community context, and psychological and behavioral reactions to disorder. Note that this course was formerly known as CJ 4102. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3201. The American Jury System. 3 Credit Hours.

Examination of the role of the jury within the larger context of the criminal justice system. Explores the origins of the concept of "trial by jury" in an historical and philosophical context. Analyzes obstacles to definitions and operationalization of the notion of a "trial by jury of one's peers." Discusses contribution of juries to attainment of criminal justice system goals and critiques suggestions for jury reform.

Repeatability: This course may not be repeated for additional credits.

CJ 3301. Community Corrections. 3 Credit Hours.

Various dimensions of community corrections, including the effect of the community on the formation of correctional policy, as well as the numerous intermediate sanctions (community corrections) available on the continuum between probation and incarceration. Analysis of correctional policy making. Topics include probation, parole, electronic monitoring, day reporting centers, boot camps, and many other sentencing options.

Repeatability: This course may not be repeated for additional credits.

CJ 3302. Prisons in America. 3 Credit Hours.

Focus on development, current state of, and issues related to the U.S. prison system. Examination of the reality of the prison experience. Analysis of the system's efficacy and strategies for prison reform. Topics include prison life and culture, correctional management, the history of incarceration, and AIDS, drugs, sexual activity, and prison privatization.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CJ 3303. Rehabilitation of the Offender. 3 Credit Hours.

Community and institutional correctional interventions are considered, examination of various treatments for certain kinds of offenders, problems in providing services in correctional settings, and research findings on the effectiveness of correctional interventions. NOTE: This course was formerly numbered CJ 2302 under the same title. Students who have earned credits for CJ 2302 will not receive additional credit for CJ 3303. Students who earned a low grade in CJ 2302 may take CJ 3303 to improve their grade point average.

Repeatability: This course may not be repeated for additional credits.

CJ 3304. Capital Punishment. 3 Credit Hours.

An examination of the highly controversial subject of the death penalty. The history of capital punishment in America and the types of offenses to which it has been applied; arguments for and against its use; its status in current legislation; significant cases; the current death row population and the likelihood of execution; public attitudes toward capital punishment; and the moral issues it raises. Note that this course was formerly known as CJ 4301. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3401. White Collar Crime. 3 Credit Hours.

The continued rate of white-collar offending in the U.S. has presented many significant and unique issues for criminological theory and the criminal justice system. This course will expose students to the nature, extent, and costs of white-collar crime. Students in this course will explore contemporary forms of white-collar crime through reported legal cases, case studies, and other materials to investigate the complexities of this form of criminal offending. The course will also delve into the problems of detection and punishment and the causes of this social problem, including discussions of policy evaluation and suggested reforms. Note: This course description changed in summer I, 2020. Students who have taken White Collar Crime in prior semesters should not repeat this course; no additional credit will be given.

Repeatability: This course may not be repeated for additional credits.

CJ 3402. Street-Level Criminology. 3 Credit Hours.

This course introduces a set of crime theories that emphasize the role of the built environment in shaping human behavior and consequently where crime happens. The basic question asked in environmental criminology is why crime occurs where it does. Theoretical frameworks used to explore this question include: behavioral geography, routine activities, crime pattern theory, rational choice and human territorial functioning. In addition, various crime prevention strategies are examined such as situational crime prevention, CPTED, and defensible space. Note: This course was formerly known as "Environmental Criminology." Students who received credit under the prior title will not receive additional credit because the content overlaps significantly.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CJ 2401.

CJ 3403. Organized Crime. 3 Credit Hours.

Analysis of definitional issues and methodological problems in the study of organized crime. This course studies a variety of organized criminal activities on the local, national and international level. It explores of the origins, opportunity, motives for criminal enterprises and examines the interconnections between organized criminals and legitimate organizations. Legislative and policy responses are investigated.

Repeatability: This course may not be repeated for additional credits.

CJ 3404. Urban Crime Patterns. 3 Credit Hours.

The spatial variation of crime is analyzed at three levels. Cultural variables are used to explain crime in regions of the United States within which the cities are located. Economic base is used to explain variation in crime between cities. Finally, housing and income segregation are used to explain the spatial variation of crime within a city. Much of the course focuses on Philadelphia.

Repeatability: This course may not be repeated for additional credits.

CJ 3405. Terrorism, Transnational Crime and Global Security. 3 Credit Hours.

Acts of terrorism can include crimes committed to disrupt governments, change political will, instigate religious furor, and impose a transformation by violent means. These actions can interrupt or damage critical infrastructure, cause fear amongst citizens and require governments to expend huge resources and efforts to marginalize the effect of terrorist acts or prevent them from occurring. This course will address the causes and consequences of terrorism and transnational crime; the interaction between terrorist groups, other criminal elements such as organized crime and other entities that provide material support to these groups; the mechanisms employed by global organizations to conduct terrorist acts; and how dealing with terrorist events has changed the global concept of security and its implications on the rule of law.

Repeatability: This course may not be repeated for additional credits.

CJ 3406. Youth and Crime. 3 Credit Hours.

An examination of key issues associated with youth and crime in the United States, and the educational, social, and cultural efforts to reduce youth involvement with guns, drugs, and gangs. Emphasis will be on the nature and structure of youth gangs, drug use by juveniles, and risk factors associated with youth violence. Other issues may involve curfews, gun violence, victims of youth violence, and the over-representation of minority youth in the juvenile justice system. Note that this course was formerly known as CJ 4401. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CJ 3407. Violence, Crime, and Justice. 3 Credit Hours.

Exploration of violence in its diverse aspects as well as collective and individual questions about its nature and causes. Of particular interest are definitions of violence: when is violence criminal, when is it political? In addition to discussion of the causes of violence, emphasis will be placed on society's response to violent acts. Note that this course was formerly known as CJ 4402. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3408. Forensic Psychology. 3 Credit Hours.

The contribution of psychology to our understanding of various aspects of, and decisions within, the criminal justice process. The psychological implications of criminal behavior, criminal justice decision-making, jury selection, witness recall, sentencing, prisonization, and correctional treatment. Note that this course was formerly known as CJ 4403 and CJ 4903. Students who have already received credit for this topic under those numbers will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish. Please also be advised that this course was previously titled "Psychology and Criminal Justice"; students who received credit under that title will not receive additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

CJ 3409. Criminal Gangs. 3 Credit Hours.

This course explores the modern urban street gang and specialty gangs (e.g. outlaw biker gangs, skinhead groups, etc.) by investigating the extensive history of theory and research on gangs. The first half of the course will attempt to answer such questions as: What is a gang? How does one differentiate between the different types of gang? Why do individuals join gangs? The second half of the course will focus on the law enforcement and community response to gangs with a heavy emphasis on comparing and contrasting a variety of "evidence-based" models of gang prevention and intervention.

Repeatability: This course may not be repeated for additional credits.

CJ 3501. Criminal Procedure: Police Phase. 3 Credit Hours.

In depth exploration of the law of criminal procedure applicable to the police phase of the criminal process, based primarily on reading and analysis of Supreme Court opinions establishing the legal rules that govern searches and seizures, arrests, interrogation, identification procedures, investigating grand juries, and entrapment. The course includes investigation of the historical roots of the "Bill of Rights" and study of the process by which criminal procedure became constitutionalized. Emphasis is on application of legal rules to real and hypothetical situations and critical analysis of rules' impact on the criminal justice system. Note: This course was formerly known as "Criminal Procedure: Law Enforcement Practices and Procedures." Students who received credit under the prior title will not receive additional credit because the content overlaps significantly.

Repeatability: This course may not be repeated for additional credits.

CJ 3502. Criminal Procedure: Prosecution & Adjudication. 3 Credit Hours.

The legal principles governing the post-investigation phase of the criminal justice process: bail, pretrial detention, arraignment, preliminary hearings, guilty pleas, right to counsel, speedy trial, double jeopardy, and the right to trial by jury, including practical impact of these rules on the criminal justice system. Law and legal issues are examined primarily through study of U.S. Supreme Court cases.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CJ 2501.

CJ 3503. Sex Crimes and the Law. 3 Credit Hours.

An exploration of the definition and nature of sexual crimes, the experiences of victims of sexual violence, and the criminal justice system and community response to sex crime offenders. Note that this course was formerly known as CJ 4501. Students who have already received credit for this topic under that number will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Repeatability: This course may not be repeated for additional credits.

CJ 3504. Hate Crimes. 3 Credit Hours.

This course focuses on hate crime as a specific type of crime as well as a social problem connected to strained intergroup relations, discrimination, the politics of lawmaking and enforcement, and social control more generally. The purpose of this course is to examine the causes, manifestations, and consequences of hate crimes, as well as the larger social context in which they occur and get reacted to in both legal and extra-legal ways.

Repeatability: This course may not be repeated for additional credits.

CJ 3505. Restorative Justice. 3 Credit Hours.

Many individuals view our criminal justice system as being in a state of crisis, pointing to issues such as overcrowded prisons, poor treatment of victims, the school to prison pipeline, and racial, economic and geographic inequalities. Restorative justice offers a different approach, focused mainly on repairing the harms caused by crimes for victims, offenders, and the community. In this course, we will try to imagine what a justice system based on the principles of restorative justice would look like. We will begin our journey by exploring the historical development of restorative justice practices and theories. We will also review the underlying principles that guide restorative justice programs, thinking critically about where those ideas fit into current methods across the country. And finally, students will assess the pros and cons of a few examples of restorative justice programs at local, state and national levels.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

CJ 3506. Cyber-Investigations, Digital Forensics, and the Law. 3 Credit Hours.

This course explores the impact of rapidly evolving technology on criminality and the response of the criminal justice system. Cybercrime will be examined through the lens of evolving law enforcement techniques, and the response of the courts to many of the new ideas that are continually presenting themselves, such as encryption, the expanding range of personal information that is digitally stored, shifting perceptions of expectations of privacy, and the challenges presented by remote data storage and the resulting difficulties in the service of legal process. Focal points will include law enforcement response to crimes on the internet, the capabilities and limitations of digital and network forensics, and legal issues that have developed as a result of the dynamic landscape of the digital environment.

Repeatability: This course may not be repeated for additional credits.

CJ 3602. Evidence-Based Policing. 3 Credit Hours.

Policing is often described as a craft; however, science is increasingly playing a role in operational law enforcement. This course traces the origins and principles of evidence-based policy-making, and how these ideas have helped define evidence-based policing (EBP). It also provides an overview of research methods and research design relevant to EBP and how these have examined a variety of policing issues. We will explore the challenges of science knowledge translation and the conflicts between policing as a science and as a craft. The course will help students understand what is necessary to develop and use scientific research evidence to strategically guide law enforcement practice.

Repeatability: This course may not be repeated for additional credits.

CJ 3603. Mapping Crime and Justice Data. 3 Credit Hours.

Why do some streets have more drug deals than others? Is travel distance a barrier to successfully completing probation? Can locating more after-school programs in particular neighborhoods reduce juvenile delinquency in a city? This course uses geographic information systems (GIS) to address questions like these as well as to disentangle criminal justice-related problems and inform criminal justice policy.

Repeatability: This course may not be repeated for additional credits.

CJ 3701. Land Management and Federal Law Enforcement. 3 Credit Hours.

This course offers a broad introduction to the history, operation and governing laws of the United States Public Lands System as well as a more detailed examination of several federal government agencies with law enforcement divisions, namely, the National Park Service (NPS), the U.S. Forest Service (USFS), the U.S. Fish and Wildlife Service (USFWS), the Bureau of Indian Affairs (BIA) and the Bureau of Land Management (BLM), that are responsible for providing visitor and resource protection in areas that are or have been owned or administered by the federal government. Several themes underpinning the course include: the discretionary prerogatives of law enforcement branches of land management agencies, the scope of federal and state authority and jurisdiction on public lands and their regulating mechanisms (i.e., law/policy, markets, norms, architecture), the significance of enabling legislation for the stewardship of cultural, natural and historical resources, and the issues and challenges inherent in the protection, conservation and preservation of vast public lands and resources.

Repeatability: This course may not be repeated for additional credits.

CJ 3901. Honors Issues in Criminal Procedure. 3 Credit Hours.

Students in this class will get a "taste of law school" while studying the constitutional law that governs the police phase of the criminal process. Students will learn what police can and cannot do when they initiate an encounter with a citizen, search the citizen's person or property, and seek to obtain a confession. The rules that have developed are the result of a constant tension between safeguarding our personal liberty and protecting public safety. By exploring the impact of these rules on real and hypothetical situations, students will critically analyze and debate the balance that the Supreme Court has established in this on-going conflict. Students will also learn about the Supreme Court; the historical roots of the Bill of Rights and the process by which the law of criminal procedure became constitutionalized; and how to find, read, and analyze U.S. Supreme Court decisions.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CJ 3902. Honors: Street-Level Criminology. 3 Credit Hours.

This course introduces a set of crime theories that emphasize the role of the built environment in shaping human behavior and consequently where crime happens. The basic question asked in environmental criminology is why crime occurs where it does. Theoretical frameworks used to explore this question include: behavioral geography, routine activities, crime pattern theory, rational choice and human territorial functioning. In addition, various crime prevention strategies are examined such as situational crime prevention, CPTED, and defensible space. (Students who have received credit under the former title of this course, Honors Environmental Criminology, will not earn additional credit for taking this course.)

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CJ 3903. Honors Forensic Psychology. 3 Credit Hours.

The contribution of psychology to our understanding of various aspects of, and decisions within, the criminal justice process. The psychological implications of criminal behavior, criminal justice decision-making, jury selection, witness recall, sentencing, prisonization, and correctional treatment. Note that this course was formerly known as CJ 4403 and CJ 4903. Students who have already received credit for this topic under those numbers will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish. Please also be advised that this course was previously titled "Honors: Psychology and Criminal Justice"; students who received credit under that title will not receive additional credit for this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CJ 3904. Honors: Drugs, Crime, and Criminal Justice. 3 Credit Hours.

This course examines the role that drugs play in the U.S. criminal justice system. Topics covered include the history of drug prohibition in the U.S.; the types of illegal drugs currently available in the United States; patterns, trends, and scope of illicit drug use; consideration of the relationship between drugs and crime; and manifestations and consequences of the criminal justice system response. The course includes hands-on experimental learning including site visits to locations such as drug court and rehabilitation programs. Note: This course was previously known as CJ 4002 and CJ 4902. Students who have already received credit for this topic under those numbers will not receive additional credit but can repeat the topic under this new course number for a better grade if they wish.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

CJ 4075. Criminal Justice Internship Seminar. 3 Credit Hours.

Mandatory weekly seminar to be taken in conjunction with field service internship with law enforcement and other criminal justice agencies, rehabilitation and prevention programs, and community organizations dealing with the crime problem. Students who have earned credits for CJ Internship Seminar (CJ 4077) will not be permitted to earn additional credits in CJ 4075. Must be taken with CJ 4085.

Co-requisites: CJ 4085.

Repeatability: This course may not be repeated for additional credits.

CJ 4082. Independent Study. 1 to 3 Credit Hour.

For students wishing to engage in intensive study of a specific topic in consultation with a faculty member. Not intended to be a substitute for any required course. The student and faculty member must enter into an agreement regarding the content and requirements, including readings, meetings, and papers. NOTE: The agreement must be filed in the department office before the end of the first two weeks of the semester.

Repeatability: This course may be repeated for additional credit.

CJ 4085. Criminal Justice Internship. 1 to 9 Credit Hour.

Field Service Training is provided with law enforcement and other criminal justice agencies, rehabilitation and prevention programs, and community organizations dealing with the crime problem. Allows a student to clarify career interests, synthesize prior knowledge from the classroom with direct experience, critically examine the criminal justice system in operation, and sharpen analytic and observational skills. NOTE: Students must complete 50 hours of work at their placement for each credit they take, for example a 4 credit internship requires 200 hours at the placement site. NOTE: Enrollment requires permission from the Instructor. Students who have earned credits for CJ Practicum (CJ 4087) will not be permitted to earn additional credits in CJ 4085. Must be taken with CJ 4075.

Co-requisites: CJ 4075.

Repeatability: This course may not be repeated for additional credits.

CJ 4097. CJ Capstone Seminar. 3 Credit Hours.

This topical seminar focuses on a broad topic of interest within Criminal Justice. The specific content will vary with individual instructors. This is a writing-intensive course designed to integrate knowledge and critical thinking skills developed in the major. Each seminar will focus upon analysis and synthesis of scholarly sources, culminating in an independent research paper. This course is required for all CJ majors and must be taken during the senior year.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Criminal Justice.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CJ 1001, CJ 2401, CJ 2501, and CJ 2602.

CJ 4941. Honors Youth and Crime. 3 Credit Hours.

An examination of key issues associated with youth and crime in the United States, and the educational, social, and cultural efforts to reduce youth involvement with guns, drugs, and gangs. Emphasis will be on the nature and structure of youth gangs, drug use by juveniles, and risk factors associated with youth violence. Other issues may include curfews, gun violence, victims of youth violence, and the over-representation of minority youth in the juvenile justice system.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Cultural Studies (CLST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CLST 2000. Special Topics. 3 Credit Hours.

Unique topics are arranged each term; subtitle and course description are added to each section for students to review. For more information, consult with the instructor.

Repeatability: This course may be repeated for additional credit.

CLST 2401. The Italian Origins of Classic Fairy Tales. 3 Credit Hours.

In this course we will trace the Italian origins of some of the best-known fairy tales of the Western tradition. We will compare versions from the sixteenth and seventeenth centuries with later French and German versions. Furthermore, we will discuss international screen adaptations, including Jean Cocteau's surrealist film *Beauty and the Beast* (1946), Pedro Almodovar's *Talk to Her* (2002), and a few Disney adaptations. We will analyze such classics as *Beauty and the Beast*, *Cinderella*, *Sleeping Beauty*, *Jack and the Beanstalk*, and *Pinocchio*. The course will look at how fairy tales have shaped, strengthened or questioned gender stereotypes, normative gender and sexual identity, and traditional power relations through the lens of gender, feminist and queer theory, psychoanalysis, narratology, and social history.

Repeatability: This course may not be repeated for additional credits.

Dance (DANC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

DANC 0806. The Jazz Century in America. 3 Credit Hours.

What is jazz? Students will explore its roots and reinventions in Ragtime, Hot Jazz, Blues, Swing, Bebop, Free Jazz, Rhythm & Blues, and Hip Hop throughout the 20th century in America. We'll experience its manifestations across media, screening dance films, listening to music, viewing visual art works, and reading poetry. Then we'll move into the studio to experience first-hand its rhythms, moods, dynamics, creative expression and improvisation. A key theme will be how the individual and the collective nurture each other in jazz. Intellectually, we'll examine the historical and social backdrop and analyze the essential components of jazz. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core.

Department Restrictions: May not be enrolled in one of the following Departments: Music:Dance.

Field of Study Restrictions: May not be enrolled in one of the following Fields of study: Dance.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

DANC 0827. Philadelphia Dance Experience. 3 Credit Hours.

Open your eyes to the wealth of culture right at your doorstep. Deepen your appreciation of dance as you become an educated audience member about the various styles and layers of meaning present in any one dance. We will look at dance primarily from a cultural studies perspective, focusing specifically on European, African, Asian, and Latin influences in the Philadelphia experience. We will attend performances in the city, interact with guest artists and lecturers, observe performances on video, and engage in guided viewing exercises to enhance your knowledge and understanding of dance. Dance concerts are selected from a variety of styles, including classical and contemporary forms from around the world. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

DANC 0828. Embodying Pluralism. 3 Credit Hours.

How do dance and the arts represent diversity? Were we humans born to dance? From everyday interactions to dance theater to music videos, movement expresses human identity and difference. Through a variety of media, we will explore these themes in relation to race, ethnicity, gender, sexuality, and other constructions that form our perceptions of self and others. Embodying Pluralism combines dance and movement experiences with reading, writing, discussion, and viewing of videos and live performance. Classes and assignments emphasize active learning in small groups. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

DANC 0831. Shall We Dance? Dance as Narrative in American Film. 3 Credit Hours.

"Shall We Dance?" introduces students to a myriad of dance styles that appear on the popular American screen. It looks at how the screen apparatus is employed to shape the ways in which dancing bodies are represented across a range of film and television genres, and it develops interpretive methods to read popular screen dance within its social, historical and economic contexts of production. The course examines how dance on screen can impact spectators' lived experience, and the affect that screen images have on the broader social world. The course covers dance in Hollywood musicals, narrative dance films, film documentaries, pop music video, reality television contests, commercial advertisements, and YouTube clips. Students will be assessed on class participation, a short answer quiz, a written analysis, a group project, and a final essay. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed Dance 0931.

Course Attributes: GA, SI

Repeatability: This course may not be repeated for additional credits.

DANC 0931. Honors Shall We Dance? Dance as Narrative in American Film. 3 Credit Hours.

Investigate the role dance plays and has played in informing and acknowledging social trends in the twentieth and early twenty-first centuries. Connections are made between dance and immigration, industry, politics, fashion, social change, class and gender, nationalism, education and popular culture. Dance both perpetuates and challenges social and cultural issues of power, class, gender, sexual orientation, and age, and acts as a mirror of our society. We will study popular perceptions of dance, dance in Hollywood, and dance as a reflection of social change, dance as social ritual, dance and contemporary notions of the "Impossible Body." You will not be dancing in the course, but will learn through lecture, discussion and film/videotape viewing. (This is an Honors course.) NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed Dance 0831.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO, SI

Repeatability: This course may not be repeated for additional credits.

DANC 1801. First Year Seminar in Dance. 1 or 3 Credit Hour.

Through a varied range of movement experiences, students investigate the conceptual and theoretical foundations of modern dance. NOTE: Required of freshman dance majors. Prior to fall 2010, the course titles were "Freshman Seminar in Dance" and "Movement Sources and Concepts."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1802. Breaking: Moves and Meanings. 2 Credit Hours.

Breaking: Moves and Meanings is a studio-based dance technique course that welcomes both beginners and dancers who have already been exposed to the various hip hop dance forms. Students will be introduced to and build upon the foundational vocabulary of "breaking" (sometimes termed "b-boying" or "breakdancing"), and will trace its journey from a Black social dance practice through to an elite competition sport. Students will not only learn and create original choreographic phrases, but they will develop the capacity to freestyle in the context of a breaking cipher. Students will learn various techniques of breaking through a historical lens, examining multiple styles, moves, and motivations which thread through the dance's rich cultural history. Through studio practice, discussion, and supporting media, students will gain an understanding of why and how breaking evolved. Students will be exposed to the myriad genres of music, approach, and contexts which surround this traditional American vernacular dance. Students are asked to attend class in loose comfortable clothing and indoor sneakers, and will spend the majority of the class participating in embodied learning, although there may also be opportunity for watching screen examples, reading articles related to the dance, and engaging in discussion. Students will be graded on their motivation, attitude and commitment to the class, as well as on demonstrating their movement skills, creative and interpretive capacities, and the ability to freestyle within the cipher context.

Repeatability: This course may not be repeated for additional credits.

DANC 1803. House and Hip Hop Social Dance. 2 Credit Hours.

House and Hip Hop Social Dance is a studio-based dance technique course that welcomes both beginners and dancers who have already been exposed to house dance and hip hop social dances. Students will be introduced to and build upon the foundational vocabulary of each style, and they will develop the capacity to freestyle in each form through task-based learning so that they can throw down a round within the context of a hip hop dance cypher. Students are asked to attend class in loose comfortable clothing and indoor sneakers and will spend the majority of the class participating in embodied learning, although there may also be opportunities for watching screen examples, reading articles related to the dances, and engaging in discussion. Students will be graded on their motivation, attitude, and commitment to the class, as well as on demonstrating their movement skills and capacity to freestyle within the context of a cypher.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

DANC 1804. Jazz Dance I. 2 Credit Hours.

Jazz Dance I presents introductory experience in the movement vocabularies used in contemporary dance and theater.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 1805. Tap Technique I. 2 Credit Hours.

Emphasis is on basic principles and practices of tap dancing.

Repeatability: This course may be repeated for additional credit.

DANC 1807. Hatha Yoga I. 2 Credit Hours.

This course promotes the health of the entire body through the performance of asanas or postures.

Repeatability: This course may be repeated for additional credit.

DANC 1808. Flamenco. 2 Credit Hours.

This is a basic level Flamenco dance class that introduces the complex history, the "compas" (rhythm structure) of the "palo" (rhythm families) of "Alegrias." The study will involve the "colocacion" (body placement) specific technique of arm work and footwork in relation to the "compas" and "palo." Flamenco "palos" have a specific rhythm and "cante" (verse/song) structure that will be studied through the phrase work and rhythm training with "palmas" (hand clapping).

Repeatability: This course may not be repeated for additional credits.

DANC 1811. Movement Improvisation I. 2 Credit Hours.

This course provides experiences in the spontaneous use of movement structures derived from movement concepts, games, imagery, and media sources. It is designed to help students discover and develop their own movement potential.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 1812. Movement Improvisation II. 2 Credit Hours.

Weight, speed, momentum, inertia, and relationships are explored through structural improvisational exercises. These techniques provide the basis for improvised duets and group dances. Issues of performance are also addressed.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 1811.

DANC 1813. Dance Repertory I. 2 or 3 Credit Hours.

This course for entering dance majors is designed to provide a structured rehearsal experience with a faculty choreographer that culminates in performance in the fall. NOTE: Required of freshman dance majors. Prior to fall 2010, the course title was "Freshman Repertory."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 1814. Graham-Based Technique. 2 Credit Hours.

Introduces students to the fundamentals of the modern dance technique developed by Martha Graham. Students will learn the principals of contraction and release, and to increase the strength and mobility of the spine, and to find the full use of the breath.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1815. Modern Dance Technique I A. 2 Credit Hours.

This course addresses the development of basic movement skills and concepts as a means toward effective performance. Note: Prior to fall 2010, the course title was "Elements of Modern Dance I."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 1816. Rhythmic Analysis. 3 Credit Hours.

This course explores temporal and rhythmic organizations of movement and dance analyzed for the purpose of enhancing clarity in performance, choreography, and teaching. Elementary musical notation, scoring, and accompaniment skills developed. NOTE: This course is for dance majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1817. Modern Dance Technique I B. 2 Credit Hours.

This course addresses the development of basic movement skills and concepts as a means toward effective performance. Note: Prior to fall 2010, the course title was "Elements of Modern Dance II."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 1818. Elements of Modern Dance III. 2 Credit Hours.

This course addresses the development of basic movement skills and concepts as a means toward effective performance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1819. Dance Production. 1 Credit Hour.

This course provides dance majors with an introduction to the technical aspects of dance production. Students will gain practical experience in the theater, learning about the equipment and tasks necessary for effective dance production. Production participation is required. NOTE: Required of freshman dance majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1821. Michael Jackson: Entertainer, Artist, Celebrity. 3 Credit Hours.

Who was Michael Jackson and why was he such an important figure in the cultural imagination? We will examine the cultural phenomenon of pop superstar Michael Jackson (1958-2009) through his career as a singer, dancer, and celebrity. Topics will include American entertainment history, the media and popular culture, and the politics of race, gender, and sexuality. Students will be asked to research Michael Jackson through the rich literature that comprises 'Michael Jackson studies', viewing his corpus of music videos and short films, activities that involve moving, thinking, and making, and group discussions and individual study.

Repeatability: This course may not be repeated for additional credits.

DANC 1831. Ballet I A. 2 Credit Hours.

This course provides further skills in basic classical ballet vocabulary and preparation for professional study at the intermediate level.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 1832. Ballet I B. 2 Credit Hours.

This course provides further skills in basic classical ballet vocabulary and preparation for professional study at the intermediate level. Note: Prior to fall 2010, the course title was "Classical Ballet II."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 1831.

DANC 1834. Introduction to African Diasporic Dance Traditions. 2 Credit Hours.

The purpose of each African Diasporic Dance course is to experience selected dances, styles, and techniques as movement practices that embody aspects of African culture and history. In this introductory course, three dance genres will be studied in some depth: Neo-Traditional West African, Hip-Hop and the Umfundalai technique.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1835. Early Modern Dance I. 2 Credit Hours.

Temple University's Department of Dance takes an inclusive approach to technical training that honors a range of artistic voices. Early Modern Dance I is the first foundation level technique class that aims to inform students' dance skills through studying the concepts and techniques of early modern dance pioneers who expanded knowledge and expressive range to increase potential as a dancer and artist. This course will begin with the Graham base technique which provided a solid base and foundation to be able to deal with many kinds of movement and styles of dance later on. The course will progress throughout the semester and will be based on the foundational exercises including those listed below. Variation on the exercises will be practiced as the class progresses. The sequence of movements - floor work, standing center work, and traveling across the floor - is usually taught in order. The contraction and release principle is used throughout the classwork.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: May not be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1836. Introduction to Classical Ballet. 2 Credit Hours.

This course provides a foundational study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration and coordination; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation discipline. Over the term students become familiar with terminology and positions of the body, and gain broad knowledge of the protocols and traditions of ballet class.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1837. Neo-Traditional West African Dance I. 2 Credit Hours.

Neo-Traditional West African Dance I is an exploration in fundamentals of Neo-Traditional West African dance through kinesthetic engagement and selected philosophical and aesthetic perspectives. This course will explore selected dances and their associated cultural functions as a way to enter an embodied dialogue in African Diasporic dance. Primary focus will be placed on dance from Senegal, Ghana, Mali and Gambia as many of those dance traditions that we have been exposed to in the US come from these countries.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 1834.

DANC 1838. Early Modern Dance II. 2 Credit Hours.

Early Modern Dance II is the second foundation level technique class that aims to further form students' dance skills, from studying the concepts and techniques of early modern pioneers to expanding knowledge and expressive range to increase potential as a dancer and artist. This course will start out with deepening students' study in Graham base technique then introduce the contrasting technique of Humphrey-Limo.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 1835.

DANC 1839. Ballet Enchainments. 2 Credit Hours.

This course provides beginning level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. In this class students move beyond learning components of ballet vocabulary to perform more complex combinations of steps and short phrases or enchainments.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 1836.

DANC 1841. Music for Dancers. 2 Credit Hours.

Dance and Music share a dynamic connection; yet, dance performers, teachers, and choreographers sometimes have difficulties communicating their artistic ideas to musicians and composers. This course will teach dancers to understand the language of music and build the necessary vocabulary to analyze, develop, and communicate musical ideas. We will explore the basic elements of music through the study of rhythmic structures, an introduction to fundamental music theory, critical analysis of compositions & choreography of various genres, and experiential activities that combine music & movement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1851. Global Dance Traditions. 2 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 1852. Ways of Knowing Dance. 2 Credit Hours.

"Ways of Knowing Dance" is a foundation course that seeks to provide students with a basic knowledge of ways in which we might study dance. It commences with the fundamental questions of 'what is dance' and 'what is the dancing body' before moving on to other approaches to reading and understanding dance.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

Repeatability: This course may not be repeated for additional credits.

DANC 2801. Entry to Dance as Art. 3 Credit Hours.

This course is designed to provide the basis for understanding, appreciating, and participating in dance as art in culture and individual life. Concepts, intuitions, and communication in dance will be cultivated through lectures, films, live performances, and studio experiences. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

DANC 2802. Pathways in American Dance. 3 Credit Hours.

This course provides participants with concentrated beginning level studio experiences in urban popular dance forms, jazz, and modern dance, each presented in a five-week unit. Through active participation, students will dance, observe videos, and read articles to gain insight into these three approaches to dancing. Learning the movement vocabularies, values, aesthetics, and techniques of these different traditions will move students into a physical and conceptual understanding of the kinetic and cultural sources that inform dance as a contemporary performance art. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

DANC 2803. Dance in Human Society. 3 Credit Hours.

This course offers students an opportunity to explore the world of dance. Through video observation, readings, and dancing, students will be exposed to many faces of dance as an expression of cultural values. Dance as art, religion, social custom, and political action will be examined as evidenced in many human societies. Examples will be primarily drawn from North America, West Africa, Brazil, Japan, India, Bali, and the Cook Islands. Students will be introduced to the field of dance anthropology and have the opportunity for on-site observation of dance events. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

DANC 2805. Dance, Movement, and Pluralism. 3 Credit Hours.

This course will focus on movement as a language of expression that conveys culturally learned values. From pedestrian behaviors to social dance to artistic traditions, movement will be explored as a carrier of cultural and aesthetic meaning. The works of contemporary dance artists will be examined within their socio-cultural and historical contexts. Issues of race and racism will be addressed in relationship to the content, context, and appreciation of the specific works viewed. Students will participate in movement improvisations and theater games. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

DANC 2806. Funk Styles: Locking and Popping. 2 Credit Hours.

Funk Styles: Locking and Popping is a studio-based dance technique course that welcomes both beginners and dancers who have already been exposed to the hip hop dance forms of locking and popping. Students will be introduced to and build upon the foundational vocabulary of each style, and they will develop the capacity to freestyle in each form through task-based learning so that they can throw down a round within the context of a hip hop dance cypher. Students will not only develop skills in the movement techniques of locking and popping, but they will also gain an understanding of the histories of each form as dances of the African diaspora that evolved within the US West Coast and were then circulated through the popular screen media. Students will be exposed to a range of funk music, and learn to develop musical awareness as they respond to its form and structure while engaged in the dance. Students are asked to attend class in loose comfortable clothing and indoor sneakers, and will spend the majority of the class participating in embodied learning, although there may also be opportunity for watching screen examples, reading articles related to the dance, and engaging in discussion. Students will be graded on their motivation, attitude and commitment to the class, as well as on demonstrating their movement skills and capacity to freestyle within the context of a cypher.

Repeatability: This course may not be repeated for additional credits.

DANC 2807. Creating Hip Hop for the Theater Stage. 2 Credit Hours.

Creating Hip Hop for the Theater Stage focuses on how students can bring the principles and aesthetics of hip hop to the concert stage. Students will be introduced to a range of methods for developing hip hop as a theatrical form, including autobiographical story-telling techniques, narrative-driven structures, and as an expressive or formalist movement device. Examples of professional hip hop theater will be analyzed, and students will develop their own creative techniques for developing a short performance using one or more dancers. Students can expect to engage in hands-on task based learning, movement exploration and improvisation, and independent research throughout the course. Students will also have opportunity to watch and analyze professional examples of hip hop dance performance through class observation and discussion. Each student will create a hip hop performance for the culminating project.

Repeatability: This course may not be repeated for additional credits.

DANC 2809. Hip Hop Entrepreneurship. 2 Credit Hours.

In this course, students examine the intersection between hip hop and entrepreneurship and how to develop methods to sustain artistic pursuits and professional skills in hip hop culture. This class teaches students how to leverage their artistic knowledge and deploy their creative worth in the workplace. We discuss how personal passions align with career paths, and focus on how students can successfully envision possible streams of income. As the entertainment industry has recognized the value of hip hop, we want employers and educators also to recognize the economic, social and cultural value of hip hop. The hip hop industry continually evolves and the course shows students how to adapt to changing conditions in order to remain profitable. We will focus on case studies of artists who have monetized their skills and knowledge.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

DANC 2811. Hip Hop History and Performance. 2 Credit Hours.

In Hip Hop History and Performance, the communities of origin in which hip hop dance and culture developed are examined alongside the many ways in which hip hop dance has circulated across various performance sites. The mythologies and historiographies of hip hop dance culture inform the introductory material. Four foundational elements: breaking, MC-ing, DJ-ing and graffiti writing enable a focus on the development of hip hop across the East and West Coasts of America while also tracing the influence of the expressive practices of the African diaspora and the Latin sounds and moves that contributed to its development. In addition to oral methods of transmission, we consider how hip hop dance has circulated across popular television shows, fiction and documentary film, music video performance, concert dance performance, competition battles, and social media. A consideration of what is at stake socially, politically, and aesthetically in considerations of race and racism, cultural appropriation, consumer capitalism, and African heritage and values is a key aspect of this course.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

DANC 2813. Dance Composition I. 2 Credit Hours.

The fundamentals of choreography are explored in this course. Solo studies based on choreographic problems are presented and performed. NOTE: Required of sophomore dance majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 1811.

DANC 2814. Dance Composition II. 2 Credit Hours.

This course addresses problems in presentation, form, design, and content. Experiences include experimentation with musical settings, voice, spoken word, and duets. NOTE: Required of sophomore dance majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 2813.

DANC 2815. Modern Dance Technique II A. 2 Credit Hours.

This course addresses the extension of range, control, and clarity of performance for more complex dance sequences. Note: Prior to fall 2010, the course title was "Intermediate Modern Dance I."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 1815.

DANC 2816. Intermediate Modern Dance II. 3 Credit Hours.

This course addresses the extension of range, control, and clarity of performance for more complex dance sequences.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 2817. Modern Dance Technique II B. 2 Credit Hours.

This course addresses the extension of range, control, and clarity of performance for more complex dance sequences. Note: Prior to fall 2010, the course title was "Intermediate Modern Dance III."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 1817.

DANC 2818. Intermediate Modern Dance IV. 3 Credit Hours.

This course addresses the extension of range, control, and clarity of performance for more complex dance sequences.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 2822. Pilates: Body Conditioning. 1 to 2 Credit Hour.

The course will begin with an in-depth exploration of Joseph Pilates original mat work, its origins, and its applications. We will focus on skills of self-assessment, using the system as a tool to improve both strength and alignment. We will look at multiple facets of the Pilates system and industry, as well as the benefits and limitations of the system as a wellness tool. Finally, each student will examine multiple ways of integrating the fundamental concepts of the system into both their movement training and their pedagogy.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 2823. Pilates II: Applications. 1 to 2 Credit Hour.

This course is designed for students looking to further their already in-depth understanding of Joseph Pilates original mat and tower work. This course seeks to expose students to the current philosophies and schools of thought on the Pilates method. Students will emerge from the course with an understanding of the history of the method, and the ways in which it has evolved to meet the needs of today's practitioners. During this course, students will advance in their practice from intermediate to advanced level mat and tower exercises, visit and report on a Philadelphia Pilates studio, practice peer teaching, and report on relevant articles from Pilates publications.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 2822.

DANC 2831. Ballet II A. 2 Credit Hours.

This course addresses increased vocabulary and skills for increasing demands of more complex combinations and sequences.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 2832. Ballet II B. 2 Credit Hours.

This course addresses increased vocabulary and skills for increasing demands of more complex combinations and sequences. Note: Prior to fall 2010, the course title was "Classical Ballet III."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 1832.

DANC 2833. Contemporary Approaches to Ballet I. 2 Credit Hours.

This course provides intermediate level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. In keeping with contemporary practice in higher education, students deepen their understanding of ballet as historically situated, linking work done in class with historical ballet repertory as well as the historical context of the form's emergence.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 1839.

DANC 2834. Neo-Traditional West African Dance II. 2 Credit Hours.

Neo-Traditional West African Dance II is a continuation of the exploration of Neo-Traditional West African dance through kinesthetic engagement and selected philosophical and aesthetic perspectives. This course will explore selected dances and their associated cultural functions as a way to enter an embodied dialogue in African Diasporic dance. Primary focus will be placed on dances from Senegal and Mali as many of those dances have gained exposure in the West through National Dance Company tours and dancers from these companies have relocated to the States and teach the repertory of their national dances.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 1837.

DANC 2835. Post-Judson Dance Practices I. 2 Credit Hours.

Post-Judson Dance Practices I addresses the period after the 1960s cultural upheaval that occurred in American modern dance. Inspired by Robert Dunn's composition classes at the Cunningham studio from 1960-1962, the Judson Dance Theater questioned and rebelled against ingrained values, forms, and presentational contexts. In this spirit, members of the Judson movement rejected technical virtuosity, embraced "pedestrian" movement and combined different techniques to initiate a period of "eclecticism" within American modern dance. In this course, students will experience material inspired by this movement, focusing upon expanding their spatial parameters and incorporating weight and breath into full-bodied explorations.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (DANC 1838 or 'Y' in CRDA01)

DANC 2836. Pointe I. 2 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 2837. Umfundalai Technique I. 2 Credit Hours.

Students of Umfundalai Technique will explore and embody a codified technique based on the principles and movement vocabularies that they have been learning. The class is structured with an on the floor series of movements, an across the floor series of movements and from time to time and at the end of each course, a Bantaba, which is a circle formation that allows space for students to acknowledge each other, the musicians and the teacher.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 2834.

DANC 2838. Post-Judson Dance Practices II. 2 Credit Hours.

Post-Judson Dance Practices II deepens students embodied investigations of material influenced by post-1960s developments within American modern dance. Inspired by Robert Dunn's composition classes at the Cunningham studio from 1960-1962, the Judson Dance Theater questioned and rebelled against ingrained values, forms, and presentational contexts. In this spirit, members of the Judson movement rejected technical virtuosity, embraced "pedestrian" movement, and combined different techniques to initiate a period of "eclecticism" within American modern dance. In this course, students will deepen their awareness of qualitative approaches towards dance performance initiated by the Judson era. They will continue to focus upon expanding their spatial parameters, experiencing more challenging off-vertical movements, and floorwork.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 2835.

DANC 2839. Contemporary Approaches to Ballet II. 2 Credit Hours.

This course provides intermediate level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on: alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. In keeping with contemporary practice in higher education, students continue to deepen their understanding of ballet as a historically-situated movement practice and oral tradition, learning and performing historical ballet repertory and the many ways this choreographic legacy is evolving over time.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 2836.

DANC 2844. Hip Hop. 2 Credit Hours.

Initially an U.S. black urban expressive culture, hip-hop has become a formidable global cultural phenomenon. In going global, hip-hop has taken the angst, hope, social and political conditions of life in the inner cities to the global stage. It has become an anti-establishment culture, spawning its own special mode of communication and dress styles, and fostering a culture of resistance to institutional dominance, class exploitation, and middle class values. This course will study the development, history, communication style, dance form, moral framework, and processes of globalization. It begins by asking what hip-hop is. Next, it outlines the relationship between rap, dub, and hip-hop, and determines who the key figures of this global movement are. In reconstructing the growth and key moments of this life form, we will examine the myriad dimensions of this culture, through its music, music videos, dance styles, and films.

Repeatability: This course may be repeated for additional credit.

DANC 2853. African Dance I. 1 to 3 Credit Hour.

This introductory studio course is a survey of core movements and rhythms from Africa and the Diaspora. Students learn the Umfundalai technique as a way to integrate song, dance and music into a meaningful and aesthetic experience.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 2861. Non-Western Dance Traditions. 3 Credit Hours.

Different modes of choreographic and movement inquiry will be used to interpret and create movement and movement styles. Students will learn skills in culturally specific spatial designs and explorations in order to expand their choreographic landscape. Choreographic explorations will include definition, explanation, and evaluation of movements. Non-Western movement vocabularies will be explored examining a variety of non-western performance aesthetics. Experiences with visual arts, literature, drama, and music will govern the class' approach to the study of non-western performance. Movement studies will be assigned to incorporate various interpretations of non-western performance genres in the context of students' individual expressions and experiences.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 2862. Foundations of Dance Pedagogy. 3 Credit Hours.

The purpose of this course is to introduce, explore and practice basic principles of teaching and learning in dance. Acknowledging that teaching is a very complex activity, the course will try to delineate specific needs, skills and materials that might be helpful in planning and executing a class or course in dance. The teacher must ultimately make the decisions in a class. This course will offer information and skills so that those decisions are based on thoughtful reflection on why you want to teach, what constitutes good teaching, and how you can continue to improve as well as incorporate student participation. Remember--the best teacher never stops being a student! This course will strive to be a hands-on practical "How do I do this?" class. It will explore such questions as: Who am I as a learner? What do I consider good teaching? Why do I want to teach? A general outline of essential elements in the classroom/studio will be presented and discussed, followed by practice in designing within that framework for materials and experiences. The course will address the role/use of such topics as anatomy/kinesiology, learning theory, technology, texts, movement analysis/design, history/aesthetics in teaching various parts in a dance curriculum.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 2868. Studies in Dance. 1 to 3 Credit Hour.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 2869. Studies in Dance Technique. 2 Credit Hours.

This course will focus on dance technique. It will only be recommended for those students who have shown competence at a specific level of technique and it would be in their interests to pursue further in-depth study at this particular level.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 2872. Foundations of Dance Education. 3 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 1801.

DANC 2897. Creative Process in Dance. 3 Credit Hours.

In this course, students investigate motives and values in creating dance. The development of individual aesthetics and the ability to articulate these is cultivated. NOTE: Required of junior dance majors.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

DANC 2901. Honors Entry to Dance as Art. 3 Credit Hours.

This course is designed to provide the basis for understanding, appreciating, and participating in dance as art in culture and individual life. Concepts, intuitions, and communication in dance will be cultivated through lectures, films, live performances, and studio experiences. NOTE: (1) Open to Honors students only. (2) This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

DANC 2904. Honors Dance in Human Society. 3 Credit Hours.

This course offers students an opportunity to explore the world of dance. Through video observation, readings, and dancing, students will be exposed to many faces of dance as an expression of cultural values. Dance as art, religion, social custom, and political action will be examined as evidenced in many human societies. Examples will be primarily drawn from North America, West Africa, Brazil, Japan, India, Bali, and the Cook Islands. Students will be introduced to the field of dance anthropology and have the opportunity for on-site observation of dance events. NOTE: (1) Required for dance majors and is for University Honors Program students. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

DANC 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

DANC 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

DANC 3811. Field Experience in Dance. 1 to 8 Credit Hour.

Opportunity for experience in teaching dance.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 3812. Creative Process in Dance. 3 Credit Hours.

This course explores the creative process, particularly as it applies to dance making. The course will focus on the development of skills that facilitate creative processes in art. We will look at our own ways of working as well as those of other artists. One objective of the course is for each student to further define his/her personal tastes, commitments, and passions within the field of dance, while also expanding current preferences and practices.

NOTE: This course is for junior dance majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 2814.

DANC 3813. Dance Repertory II. 3 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 3815. Dance Composition III. 2 Credit Hours.

This course addresses various approaches to group composition. Students choreograph a series of studies for small groups of dancers that address counterpoint, stage space, and movement manipulation and development. NOTE: Required of junior dance majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 3817. Modern Dance Technique III A. 2 Credit Hours.

This course addresses increased technical accuracy, sensitivity, and versatility of performance. The dance material offered covers a wide range of spatial, dynamic, and rhythmic qualities. Note: Prior to fall 2010, the course title was "Advanced Modern Dance I."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 2815.

DANC 3818. Modern Dance Technique III B. 2 Credit Hours.

This course addresses increased technical accuracy, sensitivity, and versatility of performance. The dance material offered covers a wide range of spatial, dynamic, and rhythmic qualities. Note: Prior to fall 2010, the course title was "Advanced Modern Dance II."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 2817.

DANC 3831. Global Ballet Styles and Conventions. 2 Credit Hours.

This course provides advanced level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on: alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. Students deepen their understanding of ballet as a culturally expressive and responsive movement practice. In the third year, students move beyond technical proficiency, exploring ballet as a window into understanding larger cultural processes and historical frameworks. Classes interweave embodied and theoretical approaches to ballet performance, allowing students to develop insights into personal and cultural identity, and stimulating an expanded recognition and appreciation of difference within the cultural landscape of dance.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 2839.

DANC 3832. Ballet and Abstraction. 2 Credit Hours.

This course provides advanced level study of ballet for dancers within a university setting. Classes concentrate on foundational concepts within ballet technique and theory. Work focuses on: alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; and self-motivation and discipline. Students deepen their understanding of ballet as an aesthetic philosophy based upon abstract concepts and ideas. In the third year, students interweave embodied and theoretical material into their performance of ballet, demonstrating critical thinking, as well as an understanding of how ballet technique relates and transfers to and supports other dance forms/techniques.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 2839.

DANC 3834. Umfundalai Technique II. 2 Credit Hours.

Students of the Umfundalai Technique will continue their exploration and embodiment of a codified technique based on the principles and movement vocabularies that they have been learning. The class is structured with an on the floor series of movements, an across the floor series of movements and from time to time and at the end of each course, a Bantaba, which is a circle formation that allows space for students to acknowledge each other, the musicians and the teacher.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 2837.

DANC 3835. Somatic Dance Explorations I. 2 Credit Hours.

Somatic Dance Explorations I applies basic kinesiological principles that have informed a range of somatic practices such as Feldenkrais, Bartenieff Fundamentals, Alexander Technique, and yoga. These practices have become widely incorporated into the contemporary dance field as a means of developing greater movement efficiency, enhancing mindfulness, and preventing injuries. In this course, students will gain an understanding of dance performance as it relates to functional anatomy. Building knowledge of the body's structures and regions, particularly the musculoskeletal system, the course will incorporate imagery and kinesthetic exercises to expand the students' technical proficiency and expressivity.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 2838.

DANC 3837. Hip Hop I. 2 Credit Hours.

Hip Hop I introduces students to the foundations of hip hop dance through contextualizing the development of the form with the U.S., across East Coast and West Coast locations, and through learning the fundamental movement patterns of five hip hop styles: breaking, locking, popping, house and hip hop social dances. Students will acquire a basic knowledge of key terminology, rhythmic awareness and improvisational techniques.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 3834.

DANC 3838. Somatic Dance Explorations II. 2 Credit Hours.

Somatic Dance Explorations II delves into more complex kinesiological principles that have informed a range of somatic practices such as Feldenkrais, Bartenieff Fundamentals, Alexander Technique, and yoga. These practices have become widely incorporated into the contemporary dance field as a means of developing greater movement efficiency, enhancing mindfulness, and preventing injuries. In this course, students will deepen their ability to apply anatomical knowledge in understanding physical idiosyncrasies and movement behaviors and enhancing expressivity. Exploring further the body's structures and regions, particularly the musculoskeletal system, the course will incorporate imagery and kinesthetic exercises in expanding students' technical proficiency and expressivity.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 3835.

DANC 3851. Lighting Design for Dance. 3 Credit Hours.

This course introduces concepts and techniques through lecture-demonstrations focusing on the impact of light as a supportive medium and a source for dance composition, problems and projects.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 1819.

DANC 3853. African Dance II. 1 to 3 Credit Hour.

This is the second course in the series of Umfundalai dance studies. Students learn to recognize rhythms and movements by region, country and selected ethnic groups. More advanced studio work is performed as students develop their expressive voices via movement studies.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 2853.

DANC 3868. Studies in Dance. 1 to 3 Credit Hour.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 3871. Dance and the Child. 3 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 3872. Dancing Places. 3 Credit Hours.

In *Dancing Places*, we examine the creation of, and participation in, dance that occurs in everyday spaces and environments. We look to choreographies and dance events that take place outside the formality of the concert stage and consider how and why people dance in alternative locations. From the vogue-ing balls of Harlem to the bordellos of Argentine tango we reflect on how geographic and social locations are embodied in dance, and how histories and cultural memories are embedded in dance sites and moving bodies. Delivered as an online course, through a combination of discussion forums, reading assignments, video analysis and participation in live dance events, students will discover how dance emerges through everyday sites as a creative practice, as a leisure pursuit, as a form of social action, and as a global phenomenon. Through this interactive course, students will create original choreography, develop experiential writing, engage in movement analysis, and foster research skills in site specific dance.

Repeatability: This course may not be repeated for additional credits.

DANC 3873. Creating Dance Histories. 3 Credit Hours.

This course will focus on historical research methods. The class provides students with the necessary research skills to understand how those who undertake historical research shape historiography. In addition, students are equipped with the tools necessary to undertake their own historical investigations. We will explore a broad range of dance genres and time periods in dance history, ensuring students encounter a significant amount of both conceptual and concrete dance historical content.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (DANC 1852 or DANC 1851)

DANC 3876. Rhythmic Analysis. 3 Credit Hours.

This course explores temporal and rhythmic organizations of movement and dance analyzed for the purpose of enhancing clarity in performance, choreography, and teaching. Musical notation, scoring, and accompaniment skills are developed.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 3882. Independent Study in Dance. 1 to 4 Credit Hour.

Student may propose individual projects in areas such as choreography, production, and history.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 3896. Dancing Cultures. 3 Credit Hours.

In "Dancing Cultures" we seek to examine how dance practice forms an important expression of our cultural landscape and, in return, how dance maintains, negotiates and challenges the social, political, historical and economic frameworks through which it exists.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 1811.

DANC 3897. Making Meaning in Dance. 3 Credit Hours.

"Making Meaning in Dance" focuses on methods of dance analysis. The course provides students with a broad set of theoretical tools with which to describe, interpret and evaluate dance in a broad spectrum of contexts. Students will learn to utilize both structuralist and poststructuralist modes of looking at dance to their analyses of multiple dance genres.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (DANC 1852 or DANC 1851)

DANC 4185. Dance Internship. 1 to 3 Credit Hour.

An intensive experience offering hands-on, organized, professional work, under supervision in some aspect of the music business. Open to Boyer College of Music and Dance juniors and seniors only. Students will work at a professional location earning valuable experience that relates to future opportunities. Students will keep a diary of their experiences and build a portfolio project that will aid their professional development. This course provides a learning experience that unites prior coursework with professional organizational experience. Students will have the responsibility of providing the best service possible to their agency/school/company. Practical professional application of industry related work experiences. Up to eight hours per week for 12 weeks of the semester of enrollment. Written report due after the last session has been completed. Repeatability: This course may be repeated for additional credit.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 4806. Somatic Theater. 3 Credit Hours.

This interdisciplinary studio course utilizes specific experimental theater techniques to explore new avenues of expression and to expand the participants' understanding of performance. Conventional categorical divisions between movement, dance, drama and play are blurred as are the divisions between "art" and "entertainment." Areas for investigation may include stories, myths, playscripts, poetry, and personal journals. Improvisation, structured and free-form, is used as an end in itself and as a means of arriving at composition.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4811. African Dance Repertory. 1 to 3 Credit Hour.

Students learn selected neo-traditional dances and study the performance qualities of African dances. This course is the last in the series of Umfundalai dance studies.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 3853.

DANC 4815. Modern Dance Technique IV A. 2 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 4817. Modern Dance Technique IV B. 2 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 4819. Advanced Modern Dance III. 3 Credit Hours.

This class seeks to train the student in a variety of fundamental issues in dance performance for the concert dance stage. Major emphasis is placed on performance practice and artistry.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4821. Adv Modern Dance IV. 3 Credit Hours.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4831. Introduction to Laban Movement Analysis. 3 Credit Hours.

This course introduces the theoretical framework of Laban Movement Analysis as a system of movement description. It investigates application in the fields of dance, education, anthropology, and non-verbal communications research.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 1801.

DANC 4832. Advanced Ballet Technique I. 2 Credit Hours.

This course provides pre-professional level study of ballet for dancers within a university setting. Following the structure of a traditional ballet class, the course places emphasis on rhythm, musicality, dynamic phrasing, and development of personal voice in performance. Students work collaboratively with each another and the instructor to expand, deepen and refine their grasp of the component parts of ballet technique and theory. Classes focus on: alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; self-motivation and discipline. In this advanced class, students incorporate compositional and pedagogical perspectives and strategies to participate in the choreographic design and composition of technique class and enchainments. Students combine embodied and theoretical material at an advanced level physically, intellectually, and affectively, using a personal somatic lens that allows for a holistic understanding of ballet as a culturally responsive movement practice and aesthetic philosophy.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 2834.

DANC 4833. Advanced Ballet Technique II. 2 Credit Hours.

This course provides pre-professional level study of ballet for dancers within a university setting. Following the structure of a traditional ballet class, the course places emphasis on rhythm, musicality, dynamic phrasing, and development of personal voice in performance. Students work collaboratively with each other and the instructor to expand, deepen and refine their grasp of the component parts of ballet technique and theory. Classes focus on: alignment and core connection; balance and/or aplomb; physical strength and flexibility; upper and lower body integration; clarity of line and direction in movement; qualitative range and expressivity inside movement; use of dynamics, weight and breath; mental dexterity; self-motivation and discipline. In this advanced class, students incorporate compositional and pedagogical perspectives and strategies to participate in the choreographic design and composition of technique class and enchainments. Students combine embodied and theoretical material at an advanced level physically, intellectually, and affectively, using a personal somatic lens that allows for a holistic understanding of ballet as a culturally responsive movement practice and aesthetic philosophy, as well as a living historical tradition.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in DANC 4832.

DANC 4834. Hip Hop II. 2 Credit Hours.

Hip Hop II builds on the introduction to practice in Hip Hop I through a deeper investigation of the style and culture. We consider some of the issues that underpin hip hop practice, such as its global circulation, its appropriation by the media, and its capacity to articulate ideas of community and identity. Students will work on increasingly advanced knowledge of the form across five hip hop styles: breaking, locking, popping, house and hip hop social dances. Students will further develop rhythmic awareness and improvisational techniques, in addition to cyphering and battling strategies.

Department Restrictions: Must be enrolled in one of the following Departments: Music/Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 3837.

DANC 4835. Contemporary Hybrid Dance Practices I. 2 Credit Hours.

This course is the first advanced level technique class that aims to strengthen and enrich students' dance skills in the broadest sense and to expose students to professional working practice under the guidance of experienced artists/professors. Each Artist/Professor will base the class on her/his particular approach and research to contemporary dance.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 3838.

DANC 4837. Matters in Contemporary African Diasporic Dance. 2 Credit Hours.

In this course, students are guided and encouraged to use the aesthetic and cultural tools that they have learned to create a contemporary full length dance that indicates a substantial knowledge of the cultural foundations of the genre that they have chosen as the basis for their choreography.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 4834.

DANC 4838. Contemporary Hybrid Dance Practices II. 2 Credit Hours.

This course is the second advanced level technique class that aims to strengthen and enrich students' dance skills in the broadest sense, and to expose students to professional working practice under the guidance of experienced artists/professors. Each Artist/Professor will give her/his own first hand approach to contemporary dance.

Department Restrictions: Must be enrolled in one of the following Departments: Music:Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in DANC 4835.

DANC 4842. Jazz Dance II. 2 Credit Hours.

This course provides a more sophisticated approach to jazz dance vocabularies and sensitivities used in contemporary dance and theater.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4843. Jazz Dance III. 2 Credit Hours.

This course provides a complete integration to the approach to jazz dance vocabularies and sensitivities used in contemporary dance and theater.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4861. Dance Science and Somatics. 3 Credit Hours.

Six themes are interwoven through this course: physiological basis of dance training; conditioning to address individual needs in dance training; dance injuries - their causes, pathology, care rehabilitation, and prevention; dancers and wellness; application of motor learning and control to dance pedagogy; and mental imagery to enhance performance.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4864. Dance Education Project. 3 Credit Hours.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4868. Studies in Dance. 1 to 3 Credit Hour.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 4871. Movement Improvisation II. 2 Credit Hours.

Weight, speed, momentum, inertia and relationships are explored through structural improvisational exercises. These techniques provide the basis for improvised duets and group dances. Issues of performance are also addressed.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 1811.

DANC 4872. Creative Process in Dance. 3 Credit Hours.

The course will focus on the development of skills that facilitate the role of imagination, imagery and intuition in the creation of dances. Students will look at their own ways of working as well as those of other artists. One objective of the course is for each student to further define his/her personal tastes, commitments, and passions within choreography and creative practice.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4873. Senior Seminar. 3 Credit Hours.

In this course, students examine and clarify professional goals, values, and actions consistent with personal competencies. Dance in the larger society is discussed and professional resources and issues are addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may not be repeated for additional credits.

DANC 4874. Dance Repertory III. 3 Credit Hours.

This course provides students with an opportunity to learn and perform a work by an established choreographer.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Dance, Dance Foundation.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

DANC 4875. Contact Improvisation. 1 to 2 Credit Hour.

This course provides experiences in improvisational duet dancing involving weight sharing, touch, lifting, carrying, and active use of momentum. Activities develop sensitivity to partnering and spontaneous creativity.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 1811.

DANC 4884. Senior Choreographic Project. 3 Credit Hours.

This course facilitates production of a major creative dance work that will be performed in the BFA Senior Concert as the culmination of the student's study in the BFA program. NOTE: Successful completion is prerequisite to graduation.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Dance.

College Restrictions: Must be enrolled in one of the following Colleges: Music & Dance, Boyer College.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in DANC 3812.

Early Childhood Education (ECED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ECED 2101. Child Development, Birth to Nine. 3 Credit Hours.

This class introduces students to trends and variations in children's physical, cognitive, and socioemotional development from the birth through the start of adolescence (around 4th grade). Specifically we will discuss how children's development proceeds in terms of physical changes to the body (and the brain), thinking skills, and social competence. We will also examine developmental differences across individual children (including those with exceptional characteristics and/or special needs) and, more broadly, across cultures within and beyond the US. Six hours of field experience required for this course.

Repeatability: This course may not be repeated for additional credits.

ECED 2104. Integrating the Arts into Early Childhood Education. 3 Credit Hours.

This course is a joint project between the College of Education and the Boyer College of Music and Dance. It is designed to provide an overview of the role and the significance of the arts in the education of children from Pre-K through fourth grade. Pre-service teachers will be exposed to art experiences that support standards, increase learning of content, teach basic aesthetic principles, and help them learn specific techniques and ideas. Through numerous hands-on experiences, students will start with their own skills and perspectives as creators of art and then move to explore the power and potential of the arts to reach children in new and effective ways. Students will be introduced to four art forms - dance, music, drama, and the visual arts - and their unique histories and pedagogies. Students will learn from disciplinary experts in each of these four domains, who also have expertise in engaging young children in developmentally appropriate ways.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Early Childhood Education.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

ECED 2105. Cognition and Learning in the Classroom. 3 Credit Hours.

Understanding how people learn is a critical part of understanding how best to teach. This course will address theories of cognition and learning and provide practice in weaving key ideas into the design, implementation, and assessment of classroom instruction. This class is not a methods class; rather, it is a perspectives class designed to help students flexibly organize and use the teaching methods that you will add to your "tool belt" in the coming semesters. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECED 2101.

ECED 2106. Language and Literacy Development in Early Childhood: Birth through Kindergarten. 3 Credit Hours.

The main focus of this course is to develop an understanding of the development of language skills and how language lays the critical foundation for pre-literary skills, which are necessary for learning to read. The course will cover the important theories of language development and the developmental course of language acquisition. Woven throughout the class will be a discussion of dual language learners and ESL learners as they encounter the task of reading at the same time that they may be learning to speak English. Early childhood classroom activities will be discussed in relation to the six critical language and pre-literacy precursors suggested by the National Early Literacy Panel (2009). A unique emphasis is on the children's language and literacy development from birth to 6 years of age. There has been a dramatic shift in how early childhood language and pre-literacy development is perceived, taught, and learned. However, these new theoretical understandings have not translated into effective classroom practices. Through current readings and class discussion the following questions will be addressed: How should we think about language and the learning and teaching of literacy? How will we prepare young children for a world in which reading, specifically vocabulary development and comprehension will be increasingly important? How can activities be developed that embody the changes in reading teaching and learning advocated by recent recommendations? How can we form these changes to include all children, especially children in poverty and ESL children? NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Co-requisites: ECED 2187.

Repeatability: This course may not be repeated for additional credits.

ECED 2108. Engaging Children in the Learning Process through Classroom Management. 3 Credit Hours.

The purpose of this course is to prepare pre-service early childhood educators with the knowledge and skills required to create classroom climates that support positive social, emotional, and academic outcomes for all learners. This course follows Child Development and is taken in conjunction with Cognition and Learning because we will work on applying these ideas about how children learn and grow in service of creating an optimal environment to foster this change. Specifically, this course will address relationship-building approaches and classroom management techniques and strategies that have been shown to promote resiliency, and mediate/moderate risk factors. Course work will focus on prevention of learner problem situations, preparation to deal with learner problem situations that cannot always be prevented, and proactively responding to learner problem situations in the future, all in the context of developmentally appropriate practices for young learners. Prevention content will explore how to create a classroom ecology that promotes safety and access to the social and academic curriculum; creating a positive and psychologically safe classroom climate; establishing relationships; using class rules and routines; and making instructional and curricular decisions that foster pro-social and emotional growth along with positive academic outcomes. Preparation to deal with concerns as they arise will include collaborative problem-solving for group and individual interventions (e.g., conflict resolution, social skills). Content on how to proactively respond to problem situations in the future will include methods on how to collaborate in the design, implementation, and monitoring of individual interventions for young learners with challenging behaviors, regardless of disability classification status and the role and function of early childhood educators in crisis responding. Across these topic areas, we will discuss how to adjust real-world techniques to a variety of children (i.e., taking a focus on every child), with attention to gender, ethnicity, language learning status, special needs, or levels of classroom engagement and attention. NOTE: Background clearances required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

ECED 2187. Practicum for Pre-K and Kindergarten. 3 Credit Hours.

This course provides pre-service teachers with opportunities to apply theories of learning and development, observe classroom management skills, and practice effective methods of instruction under the guidance of a cooperating teacher and through interactions with the practicum instructor. This three-credit practicum integrates content from three courses (ECED 2105, ECED 2106, and ECED 2108) through practical application and implementation of assignments in pre-kindergarten and kindergarten classrooms. Pre-service teachers complete 45 hours of field experience. The majority of time is spent on classroom experience and related professional development. Three stages of field experience are incorporated into this practicum. Observation (Stage 1) occurs throughout the semester as students experience the culture of an early childhood setting and the everyday life of classrooms, teachers, and children. Exploration (Stage 2) takes place as pre-service teachers conduct individual tutorials and work with a small group of students. Activities often include subject matter experiences, such as language and literacy, as well as outdoor play, and monitoring classroom routines and procedures. Pre-student Teaching (Stage 3) occurs as students design pedagogical materials and implement instructional plans with individuals, small groups and the whole class.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may be repeated for additional credit.

ECED 2251. Effective Use of Instructional Technology in Early Childhood Classrooms. 3 Credit Hours.

This 3 semester-hour undergraduate course will provide Early Childhood pre-service teachers with knowledge and experiences necessary for incorporating appropriate educational technology into their classrooms. The course will provide hands-on experiences to examine, interact with, and evaluate educational software and web sites, along with technology intended for young learners. Students will learn to develop classroom applications for use by both teachers and students, and to develop instructional materials for use in the classroom.

Repeatability: This course may not be repeated for additional credits.

ECED 2321. Curriculum Development and Implementation in Early Childhood Program. 3 Credit Hours.

This course provides an introduction to the field of early education. Special emphasis is placed on understanding diverse program models and practices for children from birth to age eight. Students learn how to organize the classroom and plan educationally appropriate experiences for young children. Practicum experiences in local schools and child care centers provide opportunities for students to implement curricular activities in areas such as language and literacy, mathematics, science, social studies, expressive arts, and play. NOTE: This is an introductory course that serves as a prerequisite to all other early childhood courses.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ECED 2322. Family/School/Community Environments for Young Children. 3 Credit Hours.

The purpose of this course is to provide early childhood educators with information about (a) what school-family-community relations are, (b) how they can promote children's early academic and social development as well as other family and school outcomes, and (c) how teachers and other educators can build strong, healthy, mutually beneficial relationships with families and communities.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ECED 3106. Literacy Foundations for the Primary Grades: First Grade through Fourth Grade. 3 Credit Hours.

The main focus of this course is to develop knowledge of the theories, methods and materials that can be used to teach reading concepts and skills in the elementary classroom (from first grade through fourth grade). The core curriculum for reading education should equip graduating teachers with the theoretical and practical knowledge to teach young children how to read and comprehend written text and to produce readers who are successful in the classroom and on standardized tests and use reading effectively to negotiate the world. There is growing consensus around a set of six foundational elements that teachers must use to produce proficient readers that should be included in any systematic program of study. These six foundational elements-- foundations in theory and research, word-level instructional strategies, text-level comprehension strategies, reading and writing connections, Instructional approaches and materials, and integrated assessment-- are the key components of the syllabus. Current research has provided important insight into how young children acquire literacy skill-- reading, writing, and comprehension of text. However, these new theoretical understandings have not entirely translated into effective classroom practices. Through current readings and class discussion the following questions will be addressed: How should we think about reading and the teaching of reading? How will we motivate young children to learn to read? How do we approach instruction for children who are struggling to learn to read? How do we prepare young children to approach different types of text and text from different subject areas? How can classroom activities be developed that emphasize reading and comprehension? How can assessment be used to help tailor the literacy curriculum? How can these changes to include all children? NOTE: Must be admitted to candidacy.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3187.

Repeatability: This course may not be repeated for additional credits.

ECED 3107. Learning Mathematics for the Primary Grades: First through Fourth Grade. 3 Credit Hours.

The main focus of this course is to develop knowledge of the theories, methods and materials that can be used to teach mathematics concepts and skills in preschool through fourth grade classrooms. Students will develop both a) a conceptual understanding of the important identified math concepts for first through fourth graders and b) procedural knowledge of how to teach children mathematical concepts using developmentally appropriate strategies and activities. The purpose of this course is to help pre-service teachers discover how early childhood and elementary children think about and learn mathematics. The overall objective of teaching mathematics should be to help each child to understand mathematical concepts, enabling them to become mathematically literate. The foundations for this course are the Professional Standards for Teaching Mathematics set forth by the National Council of Teachers of Mathematics. These standards propose significant change in mathematics teaching in the Pre-K - 12 classrooms, as well as how mathematical learning is assessed and evaluated. They are available online at <http://www.nctm.org/standards/>. NOTE: Must be admitted to candidacy.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3109, ECED 3187.

Repeatability: This course may not be repeated for additional credits.

ECED 3108. Social Studies for the Early Years, Pre K-4. 3 Credit Hours.

The main focus of this course is to develop an understanding of the development of social skills and how they lay the critical foundation for civic and citizenship skills and habits, which are necessary for being a citizen in a democracy. The course will cover the important theories of social education and the developmental course of learning history, economics, civics, and geography. Woven throughout the class will be a discussion of culture and diversity as children encounter the world. A unique emphasis is on the children's social development from pre-K to grade 4. There has been a dramatic shift in how young children understand cultural universals, the core of the early childhood social studies curriculum. These new theoretical understandings are slowly being translated into effective classroom practices. Through current readings and class discussion the following questions will be addressed: What do young children understand about cultural universals (e.g., food, clothing, shelter)? How will we prepare young children for a world in which respect for the environment, diversity, and the principles of democracy have become increasingly important? How can activities be developed that embody the principles of children's concept development in history, economics, geography, and citizenship? How can we create learning experiences that include and value all children's backgrounds? NOTE: Must be admitted to candidacy.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3106, ECED 3187.

Repeatability: This course may not be repeated for additional credits.

ECED 3109. Science for the Early Years. 3 Credit Hours.

This three-credit course will draw on inquiry, instructional technology (e.g., video vignettes of classroom activities and science websites), and collaborative lab-based activities to explore current issues of teaching and learning science in the pre-K and early elementary school classroom. It is very important that young children develop scientific habits of mind from the outset. As a result, this course will be based on developing these habits of mind while giving students an understanding of the "Big Ideas" in the field. Therefore, the first part of this course will be devoted to developing an understanding for those habits of minds and how to engage young children. The second part of the course will examine the Big Ideas in science as a whole, focusing heavily on scientific inquiry as a pedagogical approach and a learning goal. Throughout the course, investigating the preconceptions that young children bring to the science classroom will be emphasized, as well as discovering the pedagogical approaches to uncovering and addressing them. Students will apply, evaluate, and reflect upon early childhood science teaching methods through class activities and field experience assignments that address the interdisciplinary nature of science. The assignments for the course will use the foundation fostered in the course to (a) examine science content, (b) student conceptions, (c) the meeting of theory and practice, (d) instructional resources (e.g., museums, websites, children's literature), and (e) lesson planning. Students will have opportunities to develop their own philosophy of science education and explore each of the major content domains in science. NOTE: Must be admitted to candidacy.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3107, ECED 3187.

Repeatability: This course may not be repeated for additional credits.

ECED 3187. Practicum for the Primary Grades. 3 Credit Hours.

This practicum is a continuation of the early childhood field experiences with 3- to 5-year-old children. For this practicum with school age children, students will be placed in 1st through 4th grade classrooms for the purpose of implementing lessons and activities in reading, math, science, and social studies. Students will be expected to implement activities and lessons with individual children, as well as small and large groups. This practicum experience is an integral part of the methods courses with which it is associated and is under the direct supervision of a university instructor and the cooperating teacher. NOTE: Must be admitted to candidacy.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3107.

Repeatability: This course may be repeated for additional credit.

ECED 3205. Assessment in Early Childhood Education. 3 Credit Hours.

This course is designed to provide early childhood educators with the ability to use a variety of assessment methods to determine the developmental levels and needs of young children. Learners are introduced to the meaning and uses of authentic assessment as well as various tools and assessment strategies. The course addresses the interpretation of observational and assessment data to monitor children's progress, guide instructional practice, and identify at-risk children. This course requires 15 hours of field experience and, therefore, background clearances prior to enrollment. The purpose of the field work is to provide experiences for students to learn how to conduct focused, systematic, and unbiased observations useful for making informed instructional and assessment decisions on an individual case study child. In addition, students will learn ways to gather documentation on all the children in the class in multiple developmental areas.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3296.

Repeatability: This course may not be repeated for additional credits.

ECED 3206. Differentiated Reading Instruction in the Early Grades. 3 Credit Hours.

Every classroom is made up of students who have diverse backgrounds, different strengths and weaknesses, and varying approaches to learning. A "one-size fits all" approach to reading instruction will not adequately address the needs of ALL students. Differentiated instruction is an instructional approach designed to understand students' developmental level and provide instructional support that scaffolds individual learning. At its most basic level, differentiation consists of the efforts of teachers to respond to variance among the learners in the classroom and to tailor instruction to meet individual needs. In essence, teachers differentiate instruction whenever they reach out to an individual or small group to vary their teaching skills in order to create the best learning experience possible. This course will focus on four basic classroom elements in discussing differentiated instruction - content, process, product, and learning environments. The content is what the student needs to learn about reading and what various methods will be used to help the student access that information. The process is the specific activities that the student will engage in order to master the reading content. The products are the various projects and activities that require the student to rehearse, apply and extend the information that he has learned. The learning environments are the way the classroom is structured to support the differentiated instruction activities and grouping practices.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ECED 3207. Mathematics and Science Pedagogical Content Knowledge. 3 Credit Hours.

This three credit hour course focuses on the idea of pedagogical content knowledge (PCK) for mathematics and science teaching: the intersection of content specific knowledge and pedagogy. According to Shulman (1986), PCK includes "the ways of representing and formulating the subject that make it comprehensible to others...Pedagogical content knowledge also includes an understanding of what makes the learning of specific topics easy or difficult: the conceptions and preconceptions that students of different ages and backgrounds bring with them to the learning of those most frequently taught topics and lessons." Recently, the Common Core State Standards for Mathematics has called for a greater focus, coherence, and rigor in understanding key mathematical concepts (CCSSI, 2010). In teaching content courses for preservice teachers, Thanheiser et al., (2010) focus on engaging preservice teachers in developing their own understanding, facilitating opportunities for mathematical communication, and conducting formative assessments of their knowledge and development to inform mathematics instruction. Similarly, the Next Generation Science Standards (Quinn et al, 2012) emphasize that teachers' knowledge be built around crosscutting concepts that unify the study of science and engineering through their common application across fields. For mathematics, this course will focus on geometry, measurement, and data analysis, which are topics expected by the CCSS but have little room in ECE 3107 due to time constraints. For science, the content will focus on crosscutting topics emphasized in the NGSS in the physical, life, and earth science and engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3208, ECED 3296.

Repeatability: This course may not be repeated for additional credits.

ECED 3208. Social Studies for the Early Years, Pre K-4. 3 Credit Hours.

The main focus of this course is to develop an understanding of the development of social skills and how they lay the critical foundation for civic and citizenship skills and habits, which are necessary for being a citizen in a democracy. The course will cover the important theories of social education and the developmental course of learning history, economics, civics, and geography. Woven throughout the class will be a discussion of culture and diversity as children encounter the world. A unique emphasis is on the children's social development from pre-K to grade 4. There has been a dramatic shift in how young children understand cultural universals, the core of the early childhood social studies curriculum. These new theoretical understandings are slowly being translated into effective classroom practices. Through current readings and class discussion the following questions will be addressed: What do young children understand about cultural universals (e.g., food, clothing, shelter)? How will we prepare young children for a world in which respect for the environment, diversity, and the principles of democracy have become increasingly important? How can activities be developed that embody the principles of children's concept development in history, economics, geography, and citizenship? How can we create learning experiences that include and value all children's backgrounds? NOTE: Must be admitted to candidacy.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3207, ECED 3296.

Repeatability: This course may not be repeated for additional credits.

ECED 3209. Teaching English Language Learners in the Early Grades. 3 Credit Hours.

This course offers students an introduction to theory, research and practice in teaching English language learners in the early grades (i.e. PreK-4). The course begins with an overview of sociocultural characteristics of ELLs, legal responsibilities, and educational and language policies in the United States. Students will also learn the basic theories and principles associated with second language acquisition. Students will explore the philosophies of bilingual and ESL education as well as different program models that address the education of linguistically diverse students. Students will be introduced to an array of contemporary, research-based instructional approaches, including content-based instruction, task-based language teaching, and sheltered English instruction. As a result, they will gain an understanding of how to adapt standards-based lessons for English language learners. Through a practicum component, students will learn to design lessons and assessments for small-group instruction. Students will also develop cross-cultural competence through interactions with ELLs, teachers and school staff in the middle grades.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3206, ECED 3298, EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

ECED 3287. Practicum II for the Primary Grades. 3 Credit Hours.

Temple University's Practicum courses provide students with an opportunity to practice the craft of teaching. Practicum II for the Primary Grades (ECED 3287) offers a second authentic, in-depth classroom experience, following on the heels of ECE 3187. This course provides practicum students in Junior 2 with the opportunity to explore, implement, and reflect on the research, theory, and strategies introduced in the methods courses. The practicum presents a unique opportunity in the life of a developing teacher in that it provides a safe space for trial and error in the development of one's professional style and practice. Throughout the semester, the practicum student has the on-going feedback and support of his peers, mentor teachers, and school leaders at the practicum site, and an experienced master teacher who serves as the University Coach. NOTE: Clearances are required.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3207, ECED 3208, ECED 3296, SPED 3211.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in ECED 3187.

ECED 3296. Differentiated Literacy and Assessment. 3 Credit Hours.

Every classroom is made up of students who have diverse backgrounds and different strengths and weaknesses. A "one-size fits all" approach to reading instruction will not adequately address the needs of all students. Differentiated instruction is an instructional approach designed to understand students' developmental level and provide instructional support that scaffolds individual learning. At its most basic level, differentiation consists of the efforts of teachers to tailor instruction to meet individual needs. This course will focus on four basic classroom elements in discussing differentiated instruction - content, process, product, and learning environments. The content is what the student needs to learn about reading and what various methods will be used to help the student access that information. The process is the specific activities that the student will engage in order to master the reading content. The products are the various projects and activities that require the student to rehearse, apply and extend the information that he has learned. The learning environments are the way the classroom is structured to support the differentiated instruction activities and grouping practices. Assessment is essential in all facets of differentiation, because data show the teacher what children already know, how well they are learning new information, and what kinds of activities would best support their continued learning. This course has been designated as a writing intensive course. In their writing for the course, students will practice (a) effective organizational structure, (b) advanced instructional terminology, and (c) clear and logical communication. The writing assignments are designed to teach students about the kinds of writing that are specific to early childhood classroom teachers. Specifically, students will be asked to produce writing that is appropriate for fellow educators and parents.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 3287.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ECED 3298. Assessment in Early Childhood Education. 3 Credit Hours.

This course is designed to provide early childhood educators with the ability to use a variety of assessment methods to determine the developmental levels and needs of young children. Learners are introduced to the meaning and uses of authentic assessment as well as assessment terms, various tools, and assessment strategies. The course addresses the interpretation of observational and assessment data to monitor children's progress, guide instructional practice, and identify at-risk children. This course requires 15 hours of field experience. The purpose of the field work is to provide experiences for students to learn how to conduct focused, systematic, and unbiased observations useful for making informed instructional and assessment decisions on an individual case study child. In addition, students will learn ways to assess, observe, and record documentation.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ECED 3322. Observing, Documenting, and Assessing Young Children's Learning. 3 Credit Hours.

This course gives students experience in using effective methods for observing and documenting young children's development. Various recording methods are featured along with principles of child development and appropriate practice. Practicum experiences in local schools and centers provide opportunities for students to conduct focused, systematic, and unbiased observations useful for making instructional and assessment decisions.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ECED 4101. Integrating the Arts into Early Childhood Education. 3 Credit Hours.

This course is a joint project between the College of Education and the Boyer College of Music and Dance. It is designed to provide an overview of the role and the significance of the arts in the education of children from Pre-K through fourth grade. Pre-service teachers will be exposed to art experiences that support standards, increase learning of content, teach basic aesthetic principles, and help them learn specific techniques and ideas. Through numerous hands-on experiences, students will start with their own skills and perspectives as creators of art and then move to explore the power and potential of the arts to reach children in new and effective ways. Students will be introduced to four art forms --dance, music, drama, and the visual arts -- and their unique histories and pedagogies. Students will learn from disciplinary experts in each of these four domains, who also have expertise in engaging young children in developmentally appropriate ways.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Early Childhood Education.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

ECED 4102. Children's Literature: Pre-K through Fourth Grade. 3 Credit Hours.

Books are a valuable source of learning and pleasure for children at every stage of development. This course focuses on literature for children in pre-kindergarten through fourth grade. Students in the course will engage in selecting, interpreting, discussing, and evaluating children's books in preparation for their professional careers. They will also examine theory and research as well as classroom practice relating to children's literature, with and without pictures, in a variety of genres. The field of children's literature is expanding rapidly. Vibrant picture books display many artistic media, styles and text-picture relationships. Works of fiction and non-fiction not only pertain to an increasing diversity of themes and issues but also exhibit an array of writing styles and formats. This introductory course surveys literature written for children with varied abilities, cultural backgrounds and book preferences. Its ultimate purpose is to develop future teachers' appreciation of (and passion for) a broad range of children's literature that they will be able to use effectively in the classroom.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

ECED 4106. The Learning Community: Family and Community Relationships. 3 Credit Hours.

The purpose of this course is to provide pre-service early childhood and elementary grade teachers with critical information about what school-family-community relationships are; how they can promote children's early academic and social development as well as other family and school outcomes; and how teachers and other educators can build strong, healthy, mutually beneficial relationships with families and communities. An important theme in this course is that all children, families, schools, and communities are different, thus students in this course will learn about this diversity, develop knowledge about general guidelines for good practice, and spend time tailoring these guidelines to specific situations that they have encountered or are likely to encounter in their careers as educators. Special attention will be devoted to diversity in terms of family culture, language, ethnicity, income, household structure, and disability status of children.

Repeatability: This course may not be repeated for additional credits.

ECED 4187. Senior Practicum in Early Childhood Education. 1 to 6 Credit Hour.

This integrated practicum experience provides opportunities for students to apply theories of learning and development, observe and participate in implementing classroom management, and practice developing and delivering effective evidence-based instructional practices with the guidance of a cooperating teacher and through interactions with the practicum coach in varied content areas to students ranging in grade level from Pre-kindergarten through Fourth grade, depending on individual placements in inclusive classrooms and other educational settings. Focus will be placed on delivery of instruction in Literacy, Social Studies, and Special Education. Particular emphasis will be focused on ways to connect information from your co-requisite courses and apply this knowledge to ALL learners in the classroom. Differentiated instruction, active engagement, classroom management, response to intervention, appropriate instructional modification, and use of a variety of assessments related to appropriate instructional decision-making are themes that run throughout this learning experience.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may be repeated for additional credit.

ECED 4207. Mathematics and Science Pedagogical Content Knowledge. 3 Credit Hours.

This three credit hour course focuses on the idea of pedagogical content knowledge (PCK) for mathematics and science teaching: the intersection of content specific knowledge and pedagogy. According to Shulman (1986), PCK includes "the ways of representing and formulating the subject that make it comprehensible to others...Pedagogical content knowledge also includes an understanding of what makes the learning of specific topics easy or difficult: the conceptions and preconceptions that students of different ages and backgrounds bring with them to the learning of those most frequently taught topics and lessons." Recently, the Common Core State Standards for Mathematics has called for a greater focus, coherence, and rigor in understanding key mathematical concepts (CCSSI, 2010). In teaching content courses for preservice teachers, Thanheiser et al., (2010) focus on engaging preservice teachers in developing their own understanding, facilitating opportunities for mathematical communication, and conducting formative assessments of their knowledge and development to inform mathematics instruction. Similarly, the Next Generation Science Standards (Quinn et al, 2012) emphasize that teachers' knowledge be built around crosscutting concepts that unify the study of science and engineering through their common application across fields. For mathematics, this course will focus on geometry, measurement, and data analysis, which are topics expected by the CCSS but have little room in ECE 3017 due to time constraints. For science, the content will focus on crosscutting topics emphasized in the NGSS in the physical, life, and earth science and engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ECED 4324. Integrated Programming for Young Children. 3 Credit Hours.

This advanced seminar is designed to prepare students for educating infants, toddlers, and young children who are at risk or have disabilities. The main focus is on differentiation of teaching method, curriculum content and resources considered to be key components of inclusive classroom practice. NOTE: This is an advanced seminar and should be taken as the final early childhood course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ECED 4588. Student Teaching in Early Childhood Education. 7 to 11 Credit Hours.

Involves a school placement where students demonstrate their knowledge of and competence in early childhood teaching, birth through third grade (N-3). Students work with a certified cooperating teacher and are supervised by a Temple University faculty member. NOTE: All coursework must be completed before taking this course.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ECED 4801 (may be taken concurrently), ECED 4803 (may be taken concurrently), or 'Y' in CREA03) and minimum GPA of 3 in: courses numbered 0700 to 4999.

ECED 4801. Senior Seminar and Performance Assessment in Early Childhood Education. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting, and engage in activities that foster professionalism in school and community settings. The senior performance assessment, a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the student teaching semester.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 4588.

Repeatability: This course may not be repeated for additional credits.

ECED 4802. Senior Seminar I in Early Childhood Education. 1 or 3 Credit Hour.

This seminar is designed to help you make connections between the teaching experiences you will have this semester as student teachers and what you have learned in your university classes. The course will help you bridge theory and practice and provide you with a framework of support and guidance as you prepare to take charge of your own classroom. It will also provide you with tools to reflect on your experience and learn from it, which will facilitate your successful entry into the teaching profession. To accomplish this, we will engage in discussions and activities that center on your core beliefs about teaching, the context for your teaching (where you teach), your pedagogical practices (how you teach), the content you teach (what you teach), and the needs of your students (whom you teach). We will also examine how theory informs classroom practice and come to understand how instructional management strategies are inherently linked to good pedagogy. We will also examine and discuss how both formal and informal student assessments work as tools for reflection and improvement.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 4187.

Repeatability: This course may not be repeated for additional credits.

ECED 4803. Senior Seminar II in Early Childhood Education. 2 or 3 Credit Hours.

This seminar is designed to help you make connections between the teaching experiences you will have this semester as student teachers and what you have learned in your university classes. The course will help you bridge theory and practice and provide you with a framework of support and guidance as you prepare to take charge of your own classroom. It will also provide you with tools to reflect on your experience and learn from it, which will facilitate your successful entry into the teaching profession. To accomplish this, we will engage in discussions and activities that center on your core beliefs about teaching, the context for your teaching (where you teach), your pedagogical practices (how you teach), the content you teach (what you teach), and the needs of your students (whom you teach). We will also examine how theory informs classroom practice and come to understand how instructional management strategies are inherently linked to good pedagogy. We will also examine and discuss how both formal and informal student assessments work as tools for reflection and improvement.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ECED 4588.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ECED 4802 or 'Y' in CREA02)

Earth & Environmental Science (EES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

EES 0827. Hidden Figures to Gamergate: Race and Gender in Science and Technology. 3 Credit Hours.

Who do you think of when someone asks you to draw a scientist? In this GenEd course we explore the myriad of ways in which racial and gender stereotypes have affected our perception of what it means to be an accomplished scientist. When we think of influential scientists, the names Claudia Alexander and Carolyn Parker should come as easily to the mind as Buzz Aldrin or Thomas Edison. We will discuss how the public perceives science and scientists, and explore the implications of this in terms of how science serves a diverse society. We will also explore the ways in which violence and misogyny have impacted our digital world. Technology and science change our society; who authors this change influences how we participate in the process and the cultural narrative of who innovates and leads our society, which is critical to the current controversy of science in politics.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

EES 0836. Disasters: Geology vs. Hollywood. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer.

Clips from Hollywood disaster movies will drive our inquiry into geologic phenomena. Can you really drive over a lava flow in a jeep? (Dante's Peak) Are we foolish not to prepare for a major earthquake in New York City? (Aftershock) Could global warming melt the polar ice caps turning "dry land" into a myth? (Waterworld) Would the impact of an asteroid the "size of Texas" kill half the Earth by heat and freeze the remainder in a nuclear winter? (Armageddon) Learn the fundamentals of plate tectonics, how petrologic properties control volcanic explosivity, how to calculate earthquake locations from seismic data, and prepare a disaster readiness plan for a major U.S. city. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS, SF

Repeatability: This course may not be repeated for additional credits.

EES 0837. Evolution of Earth and Its Life. 3 Credit Hours.

This course is typically offered in Fall and Spring.

The Earth is our home, but few of us stop to consider in detail how it works and changes. Although popularly applied mostly to biological systems, the word evolution simply means "change through time". This course intends to foster understanding of the Earth as an evolving and changing interconnected system across the vast expanse of 4.5 billion years of geologic history. Where did we come from? How did we get where we are now? What can we expect in the future? Through hands-on experience with fossils and rocks, students discover how to decode information about past Earth environments and ecosystems and the implications of this knowledge for understanding current and future global issues. Special focus is given to major interactions between the living and non-living parts of the Earth system, including major mass extinction events, many of which have been linked to climate shifts with disastrous consequences for living organisms. (Prior to Spring 2022, this course was titled "Evolution & Extinctions". Students may not receive credit for both EES 0837: Evolution & Extinctions and EES 0837: Evolution of Earth and Its Life.) NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core.

Course Attributes: GS, SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

EES 0842. Sustainable Environments. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer.

Humans are at a critical juncture in their relationship with the environment. Many of the global changes occurring in the atmosphere, climate, and oceans can be attributed to human activity. While the standard of living has increased for many people across the globe, the technological advancements that have made this possible endanger future generations because of their environmental impacts. Environmental toxins and air pollution are increasing, and fossil fuels and forests are being depleted at unsustainable rates. Now more than ever, the viability of human life depends on the scientific understanding of global environmental change, and on developing science-based policies to both protect the environment and promote human well-being in a just and sustainable manner. Course mission: enhance your capability to be environmentally informed consumers and citizens based on a sound understanding of the ecological, technological, economic, political, and ethical dimensions of environmental sustainability. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed GUS 0842/0942 or ENST 0842/0942.

Course Attributes: GS, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

EES 0854. Geology of the National Parks. 3 Credit Hours.

This course is typically offered in Fall.

The primary purpose of the National Park Service is to preserve areas of natural or cultural interest for current and future generations. Quite commonly these areas of interest, such as the Grand Canyon, or Yellowstone National Park, are the result of extreme geologic forces which have shaped the landscape. The goal of this class is to use geologic principles to understand the "science of the scenery" of individual parks. Students will also address key issues within individual parks, such as the competing interests of visitor access vs. land management, the societal need for natural resources, and the preservation of unique or delicate ecosystems. NOTE: (1) This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. (2) Students cannot receive credit for this course if they have successfully completed EES 0954.

Course Attributes: GS, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

EES 0873. Evil Plots. 4 Credit Hours.

Computer technology and the internet have produced a glut of digital information that can't be communicated without using charts and graphs. But like all forms of human communication, graphs can fib a little or lie outright. There are three basic ways data visualizations can go wrong: (1) The plot can be evil, designed to persuade or mislead rather than inform; (2) the data set may be suspect (too small, biased, or full of errors); or (3) even if the plot and data are okay, they may not support the claims being made. In this class, we will explore the representation and misrepresentation of data, learn the questions to ask about data quality, and how to spot falsehoods and fallacies in the digital age. Examples will be drawn from science, politics, marketing, business and more. Protect yourself by learning to spot evil plots! Students cannot receive credit for this course if they have successfully completed EES 0973.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

EES 0874. Environmental Life Cycle Analysis: Does Buying "Green" Matter?. 4 Credit Hours.

With increasing societal awareness of environmental sustainability, many industry and business sectors have prioritized the development and application of green technology and/or green processes over the course of a product's life span. Life cycle analysis (LCA) is a scientific methodology that systematically examines both cumulative and potential environmental impacts of a product over its entire life cycle, ranging from the extraction of raw Earth materials to its disposal when all the materials ultimately return to the Earth. LCA can also provide comparative impacts among the different products, and both companies and consumers benefit from the environmental rating systems for their marketing and decision making processes. Through this course, we will learn how LCA model works in detail, using real-world examples, such as paper vs plastic bags, cathode ray tube (CRT) vs liquid crystal display (LCD) technology, as well as electronic wastes.

Course Attributes: GQ, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

EES 0954. Honors Geology of the National Parks. 3 Credit Hours.

This course is typically offered in Fall.

The primary purpose of the National Park Service is to preserve areas of natural or cultural interest for current and future generations. Quite commonly these areas of interest, such as the Grand Canyon, or Yellowstone National Park, are the result of extreme geologic forces which have shaped the landscape. The goal of this class is to use geologic principles to understand the "science of the scenery" of individual parks. Students will also address key issues within individual parks, such as the competing interests of visitor access vs. land management, the societal need for natural resources, and the preservation of unique or delicate ecosystems. NOTE: (1) This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. (2) Students cannot receive credit for this course if they have successfully completed EES 0854. (3) This is an Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

EES 0973. Honors Evil Plots. 4 Credit Hours.

Computer technology and the internet have produced a glut of digital information that can't be communicated without using charts and graphs. But like all forms of human communication, graphs can fib a little or lie outright. There are three basic ways data visualizations can go wrong: (1) The plot can be evil, designed to persuade or mislead rather than inform; (2) the data set may be suspect (too small, biased, or full of errors); or (3) even if the plot and data are okay, they may not support the claims being made. In this class, we will explore the representation and misrepresentation of data, learn the questions to ask about data quality, and how to spot falsehoods and fallacies in the digital age. Examples will be drawn from science, politics, marketing, business and more. Protect yourself by learning to spot evil plots! Students cannot receive credit for this course if they have successfully completed EES 0873. This is an Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

EES 1001. Introductory Geology. 4 Credit Hours.

This course is typically offered in Fall, Summer I and Summer II.

An introduction to the basic principles and processes of geology. Wide range of topics, including rocks and minerals, surface processes, plate tectonics, and the earth's interior. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

EES 2001. Physical Geology. 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

Physical geology provides a working introduction to Earth materials and the major processes that shape our planet. Geology plays an important role in many aspects of our lives from everyday natural resources including soil (food) and water to environmental hazards and natural disasters. This course is intended to prepare geology and environmental science majors for advanced studies, while also providing all students with general knowledge of how our planet operates, allowing them to become better-informed citizens of the world. Upon completion of this course, students will understand the rock cycle, plate tectonics, geohazards, surface processes and environments, natural resources, and the climate system. Laboratory sessions (3 hours per week) provide hands-on experience and focus on the identification of mineral and rock specimens, map skills, and the visualization and interpretation of Earth processes.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

EES 2002. Energy and Environment. 3 Credit Hours.

Energy and Environment examines the scientific principles governing energy technologies and use, and the implications of energy development on our natural resources and environmental quality. The first part of the course will provide an introduction to the basic physical principles behind energy production, existing and emerging energy technologies, and energy use. The second part of the course will provide an understanding of the impacts associated with energy development on land, water and the atmosphere, impact assessment techniques, and interactions among energy, food and water resources. This course will provide an opportunity to become familiar with the future grand challenges in energy development in the context of changing climate and policy scenarios.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering, Science & Technology.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (any MATH course numbered 0701 to 0702 (C or higher), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in CRMA18, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

EES 2011. Mineralogy I. 4 Credit Hours.

This course is typically offered in Fall.

Fundamentals of hand-specimen analysis including crystallography, bonding, physical properties, chemical composition and growth of common minerals.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001 and (CHEM 1031 (may be taken concurrently), CHEM 1041 (may be taken concurrently), or CHEM 1951 (may be taken concurrently))

EES 2012. Mineralogy II. 4 Credit Hours.

This course is typically offered in Spring.

Microanalysis by polarized light microscopy, powder x-ray diffractometry and microprobe including site occupancy, crystal growth, and microstructural defects with emphasis on silicates.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2011.

EES 2021. Sedimentary Environments. 4 Credit Hours.

This course is typically offered in Fall and Spring.

Analysis of sediments, physical and biogenic structures, and strata to assess the dynamics of modern and ancient depositional environments. Laboratory and field exercises emphasize data collection, interpretation, and graphic presentation as a means of reconstructing sediment transport mechanisms and depositional settings. NOTE: Required day-long field trips. (Prior to fall 2016, this course was titled "Facies Models.")

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001.

EES 2022. Paleontology and Stratigraphy. 4 Credit Hours.

This course is typically offered in Spring.

This course provides a working introduction to invertebrate paleontology and the principles of bio-, litho-, and allostratigraphy. Emphasis is placed on combining data from the geological and biological records to understand the sedimentary record through time. Students will gain skill in identifying major invertebrate fossil groups and describing their anatomy, paleoecology, and temporal significance; explore how sedimentological factors influence our understanding of evolution as recorded by the fossil record, and vice versa; and construct measured sections and stratigraphic columns and correlate using multiple stratigraphic techniques. Through two multi-day field trips, students will develop and employ field and map skills while investigating elements of earth history and changes in the tectonic setting of eastern North America through geologic time. NOTE: Two multi-day (including weekends) field trips are required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2021.

EES 2031. Introduction to Field Methods in the Earth and Environmental Sciences. 1 Credit Hour.

This course is typically offered in Fall.

This course offers a half semester (7-week), intensive introduction to various field methods. Techniques covered will provide a background and foundation to prepare students for both future field courses as well as employment in the environmental industry. Students will learn mapping techniques (geologic and topographic), geologic/soil/water sampling techniques, analysis and understanding of well-log/geophysical data, note taking skills, and the use of a compass to determine location as well as use to determine geologic structures. This course will include multiple field trips. This is a required course for the Certificate in Environmental Professional Training.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001 and EES 2021.

EES 2032. Environmental Sensors. 1 Credit Hour.

This course is not offered every year.

This two-week intensive course will provide hands-on experience with implementing field-sensor systems to monitor the environment for research and citizen science projects. The students will familiarize with the fundamental operation principles of a variety of passive and active sensors used widely for long-term field measurements of meteorological and hydrological variables, field installation and maintenance, automation of data collection with data loggers, telemetry, and best practices for acquiring and securing data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001.

EES 2051. Introduction to Data Visualization and Analysis for Earth and Environmental Science. 3 Credit Hours.

This course is typically offered in the Fall.

This course provides an introduction to the management, visualization, and analysis of data sets common to Earth and Environmental Science. Microsoft Excel and Matlab will be introduced and then used to analyze example data sets which introduce and reinforce key algebraic, calculus and physics concepts. Student understanding and skill is developed through projects analyzing stream flow, earthquake populations, plate tectonics and hot spot motion, atmospheric CO₂ concentration, and topography.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001 and (MATH 1022 (may be taken concurrently), MATH 1031 (may be taken concurrently), MATH 1038 (may be taken concurrently), MATH 1041 (may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1941 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), 'Y' in MC6, 'Y' in MATW, 'Y' in MC6A, or 'Y' in MC6T)

EES 2061. Introduction to Geochemistry. 4 Credit Hours.

This course is typically offered in Fall of odd-numbered years.

Application of chemical principles and quantitative methods to understand and solve various geological problems. Field trips and laboratory exercises will emphasize techniques of obtaining and measuring geological samples. Students will analyze, summarize, and present data in oral and written reports.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001 and (CHEM 1031 or CHEM 1951)

EES 2065. Nanogeoscience and Technology. 4 Credit Hours.

This course is typically offered in Fall.

Today, everyone is talking about nanomaterials, even advertisements for consumer products use the prefix "nano" as a keyword for special features. Nanotechnology is one of the most important new technologies of the 21st century. Through this course, history, principles, mechanisms, many exciting phenomena and the processes of nano-scale materials, as well as their applications and environmental impact, will be covered in great detail. The lab component of this course will consist of analyzing nanoparticles in water samples, extracting nanomaterials from consumer products, and monitoring plant growth from soils amended with nanomaterials. Through the course of the lab exercises, students will have hands-on experience on various instruments, including inductively-coupled plasma spectrometry, x-ray diffraction, scanning electron microscopy, and transmission electron microscopy.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering, Science & Technology.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032 (may be taken concurrently), CHEM 1952 (may be taken concurrently), or CHEM 1035) and (CHEM 1033 or CHEM 1953)

EES 2067. Introduction to Environmental Toxicology. 3 Credit Hours.

This course covers fundamental concepts of environmental toxicology, including dose-response, exposure routes, biological variation and toxicity phases. Topics include fate and effects of hazardous substances in organisms and the environment, air pollutants, pesticides, insecticides, aquatic toxicity, endocrine disruptors, biomarkers and bioassays, as well as risk assessment.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2061, (CHEM 1032 (may be taken concurrently) or CHEM 1952 (may be taken concurrently)), and (CHEM 1034 (may be taken concurrently) or CHEM 1954 (may be taken concurrently))

EES 2096. Climate Change: Oceans To Atmosphere. 4 Credit Hours.

This course is typically offered in Spring.

The major topics in Oceanography will be covered in addition to introducing students to meteorology through the study of the Atmospheric circulation system. These topics will give students a better understanding of climate change and forecasting. The course includes a significant writing project.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Environmental Science, Earth & Space Sci with Teachin, Geology, Sec Ed-Science Ed.

Course Attributes: SE, SF, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001.

EES 2097. Process Geomorphology. 4 Credit Hours.

This course is typically offered in Fall.

The course explores key Earth surface processes and landforms by examining the role of tectonic and climatic forces, as well as biota, in landscape evolution. The quantitative approach focuses on modern systems in order to reconstruct their ancient counterparts, including their subsurface expression in paleo-landscapes. Culminates in a term project based on original research of active geomorphic systems.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2001.

EES 3001. Igneous and Metamorphic Petrology. 4 Credit Hours.

This course is typically offered in Fall.

A comprehensive study of Igneous and Metamorphic rocks in both hand samples and thin sections. Understanding of the chemistry, physical properties, global distribution, origin and identification of Igneous and Metamorphic rocks. Lab work will emphasize mineral and rock identification of both hand and thin sections. Thin section production will be introduced. A small group paper and presentation are required, as are day field trips. Scientific literature will be analyzed to examine current issues relating to the Igneous and Metamorphic research.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2011.

EES 3011. Remote Sensing and GIS. 4 Credit Hours.

This course is typically offered in Spring.

The focus of this class is on remote sensing technologies and geographic information systems. Remote sensing is a dynamic field; new, high-resolution satellites are coming online almost daily, and there has been an exponential growth in applications of remote sensing data during the past decade, including: mineral exploration, precision agriculture, watershed management, land use classification, military intelligence, and climate monitoring. The demand for college graduates with experience in this field is growing exponentially as well. By the end of this class you won't be a remote sensing expert, but you will have a fundamental understanding of the uses and limitations of remote sensing data for geologic and environmental applications, as well as fundamental geographic information systems skills.

Department Restrictions: Must be enrolled in one of the following Departments: CST: College of Science & Tech, CST:Physics, CST: College of Science & Tech, CST:Biology, CST:Chemistry, CST:Earth & Environmental Sci, CST:Mathematics, CST:Computer & Info Sci, CST:Environmental Sciences, CLA:Geography & Urban Studies, Engineering: Engineering, Engineering: Engineering, Engineering:Civil Engineering, Engineering:Elec Engineering, Engineering:Mech Engineering.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

EES 3015. Drone Shortcourse. 1 Credit Hour.

This course is typically offered in Spring.

Drones are everywhere. This course offers a short introduction to use of drones, otherwise known as unmanned aerial vehicles (UAVs). Students will be taught use of drones in research and other societal applications, basics of flight and operation of drones, and regulations applicable to drone usage. This course does not provide certification to become a drone pilot, but the steps to certification will be reviewed. Flying experience will be provided through labs conducted at the Ambler campus. Students will complete a project involving video or photography using a drone.

Department Restrictions: Must be enrolled in one of the following Departments: Tyler:Architect & Env Design, CST: College of Science & Tech, CST:Physics, CST:Biology, CST:Chemistry, CST:Earth & Environmental Sci, CST:Mathematics, CST:Computer & Info Sci, CST:Environmental Sciences, CLA:Geography & Urban Studies, Engineering:Civil Engineering.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

EES 3021. Groundwater Hydrology. 4 Credit Hours.

This course is typically offered in the Spring.

This course provides an introduction to groundwater geology. Topics include how geology influences groundwater flow and geochemistry, how groundwater and surface water interact, and contamination and remediation issues. Student understanding of groundwater and contaminant movement is developed through a series of homework problems and labs that require basic algebra skills.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in EES 2001 and (MATH 1022 (C or higher), any MATH course numbered 1038 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MC6A, 'Y' in MA04, 'Y' in MATW, 'Y' in CRMA05, or 'Y' in MC6T)

EES 3025. Physical Hydrology. 4 Credit Hours.

This course is typically offered in Fall.

This course examines the physical principles governing the flow of water on and beneath the Earth's surface and the relationship of hydrological processes to other disciplines such as geology, ecology, and atmospheric sciences.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in EES 2001, (MATH 1022 (C or higher), any MATH course numbered 1041 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in CRMA05), and (PHYS 1061, PHYS 1961, PHYS 2021, or PHYS 2921)

EES 3031. Coastal Plain Sedimentology and Paleontology of the Cretaceous-Paleogene Transition. 2 Credit Hours.

This course is not offered every year.

This course offers a half semester (7-week) examination of the sedimentological and paleontological changes associated with the Cretaceous-Paleogene Boundary in the New Jersey coastal plain. Classroom lectures and laboratory activities on regional geology, sedimentology, and paleofaunas will be interspersed with field modules at the Edelman Fossil Park of Rowan University where students will learn and refine skills in lithologic description and stratigraphic mapping as well as basic paleontological field excavation, mapping, and data collection techniques.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2011 and EES 2022.

EES 3032. Field and Laboratory Methods in Environmental Geochemistry. 2 Credit Hours.

Students will learn fundamental principles of geochemistry as they apply to environmental problems. Students will learn field sampling techniques and become familiar with the use of laboratory techniques for solid and fluid analysis. Students will prepare field reports synthesizing multiple datasets to explain the processes that are occurring at each site. Field-based methods to discuss include the following: extraction from wells, surface water characterization (sampling and water quality loggers), sediment core sampling, and field analysis techniques such as portable XRF and photoionization detectors. Lab-based methods to discuss include the following: spectrophotometric methods, alkalinity by titration, ion chromatograph, ICP-OES, XRD, and rock/mineral digestion techniques.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2011.

EES 3042. Coastal Processes and Geomorphology. 4 Credit Hours.

This course is typically offered in Spring.

The course will apply a process geomorphological approach to understanding coastal behavior. Subjects will include the global distribution of coasts, wave and tidal hydraulics, barrier morphodynamics, nearshore and aeolian sediment transport, and morphological signatures of extreme events.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (EES 2021, EES 2042, or EES 2097)

EES 3065. Nanoscience & the Environment. 4 Credit Hours.

This course is typically offered in Fall.

Today, everyone is talking about nanomaterials, even advertisements for consumer products use the prefix "nano" as a keyword for special features. Nanotechnology is one of the most important new technologies of the 21st century. Through this course, history, principles, mechanisms, many exciting phenomena and the processes of nano-scale materials, as well as their applications and environmental impact, will be covered in great detail. The lab component of this course will consist of analyzing nanoparticles in water samples, extracting nanomaterials from consumer products, and monitoring plant growth from soils amended with nanomaterials. Through the course of the lab exercises, students will have hands-on experience on various instruments, including inductively-coupled plasma spectrometry, x-ray diffraction, scanning electron microscopy, and transmission electron microscopy.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering, Science & Technology.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032 (may be taken concurrently), CHEM 1952 (may be taken concurrently), or CHEM 1035) and (CHEM 1033 or CHEM 1953)

EES 3082. Individual Study Program I. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, and Summer I.

Individual independent study and research under supervision of a member of the Earth & Environmental Science Faculty. A final written report will be submitted to the faculty member. For further information and details, see the undergraduate advisor. NOTE: Student must have a cumulative GPA of 3.25 and have completed at least 30 credits (sophomore or junior standing).

Class Restrictions: Must be enrolled in one of the following Classes: Sophomore 30 to 59 Credits, Junior 60 to 89 Credits.

Repeatability: This course may be repeated for additional credit.

EES 3091. Research Methods. 3 Credit Hours.

This course is typically offered in Spring.

Research Methods is required for all of the TUteach with Teaching majors. It is one of several content courses specially designed to meet the needs of future teachers. Sections meet two hours per week for non-traditional, interactive lectures and two hours per week for lab. The course is cross-listed in Biology, Chemistry, Earth and Environmental Science, and Physics. The goals of the course are (1) to provide students with the tools that scientists use to solve scientific problems; (2) to give students the opportunity to use these tools in a laboratory setting; (3) to make students aware of how scientists communicate with each other through peer-reviewed scientific literature; and (4) to enable students to understand how scientists develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in conventional science classes. Students design and carry out four independent inquiries, which they write up and present in the manner that is common in the scientific community. The inquiries incorporate mathematics and the various science disciplines, thus the team of instructors teaching this course have expertise in different disciplines and are available to supervise all students as they work on their inquiries in the lab. The combination of Research Methods and the TUteach course "Perspectives on Science and Mathematics" (Philosophy 2196) provides prospective science and mathematics teachers with an in-depth understanding of how the scientific enterprise works. NOTE: EES 3091 is only available for major credit in the Earth and Space Science with Teaching BS program.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SCTC 1289 or SCTC 1389)

EES 3506. Observing and Modeling Climate Change. 3 Credit Hours.

There is no scientific doubt that human activity has been influencing the climate system since the industrial era due to emissions of greenhouse gases and causing a rise in global mean temperature (i.e., global warming). While Earth's climate and temperature has fluctuated naturally in the past, the rate of current warming in response to human activity is unprecedented and is having a large impact on the climate system and living organisms on our planet. We are experiencing the effects of climate change today in the form of melting of sea ice, glaciers, and ice sheets, sea level rise, increases in the intensity of heat waves, change in frequency and intensity of droughts, extreme rainfall events, and wildfires. The results of climate model simulations suggest that the effects of climate change will worsen throughout the 21st century and beyond if we continue to emit greenhouse gases. In this course we will gain a foundational understanding of anthropogenic climate change and explore the evidence directly through hands-on analysis and visualization of real-world observational datasets. After investigating observational evidence, we will build an understanding of climate models, the experiments performed including climate projections, and how to access, analyze, and visualize publicly available model output. Along the way, students will gain experience in the tools that scientists use to analyze and visualize observational datasets and climate model output. While no prior computational knowledge is assumed, students will be introduced to aspects of the Python programming language, the command line interface, and GitHub. Course content and assignments will be centered around the use of Jupyter Notebooks. This course will be hands-on and assignment and project oriented, with in-class periods geared toward learning to analyze and visualize climate datasets.

Department Restrictions: Must be enrolled in one of the following Departments: CST: College of Science & Tech, CST:Physics, CST:Biological, CST:Chemistry, CST:Earth & Environmental Sci, CST:Mathematics, CST:Computer & Info Sci, CLA:Geography & Urban Studies, Engineering: Engineering.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1022, STAT 1001, STAT 1102, STAT 2103, GUS 3161, any MATH course numbered 1041 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

EES 4031. Appalachian Tectonics. 2 Credit Hours.

This course is not offered every year.

This 2-week intensive course (Summer I) applies classroom and laboratory training from other EES courses to solve geological problems in the field. We will synthesize field observations and measurements from several field localities to understand the formation and erosion of the Appalachian mountains along the eastern coast of the United States. Students should expect to spend a minimum of 4 full days in the field, and on the other days, spend 3 hours in the classroom, and the rest of the day on individual and group work.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2011 and EES 2021.

EES 4082. Individual Study Program II. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, and Summer I.

Individual independent study and research under supervision of a member of the Earth & Environmental Science Faculty. A final written report will be submitted to the faculty member. For further information and details, see the undergraduate advisor. NOTE: Student must have a cumulative GPA of 3.25 and have completed at least 60 credits (junior or senior standing).

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

EES 4101. Structural Geology. 4 Credit Hours.

This course is typically offered in Spring.

The purpose of this course is to train students in the concepts and techniques of structural geology. Students will learn how to collect, analyze, and interpret geologic data drawn from a variety of disciplines pertinent to structural geology and present a cohesive argument. Results are presented as maps, reports, and computer models. NOTE: Geology B.S. Capstone.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2011, EES 2021, and (PHYS 1061, PHYS 2021, or PHYS 2921)

EES 4200. Topics in Geoscience. 1 to 3 Credit Hour.

This course is not offered every year.

This seminar will allow students to study current problems in geology and environmental science. NOTE: 3 credit courses may count as elective credit for Earth and Environmental Science majors. May be taken multiple times (on different topics) with permission of instructor.

Repeatability: This course may be repeated for additional credit.

EES 4210. Topics in Geoscience with Lab. 4 Credit Hours.

This course is not offered every year.

This seminar will allow students to study current problems in geology and environmental science. NOTE: Elective for Earth and Environmental Science majors (Geology and Environmental Science). May be taken multiple times (on different topics) with permission of instructor.

Repeatability: This course may be repeated for additional credit.

EES 4502. Ice and Global Climate. 3 Credit Hours.

We live in a time of rapid global warming and are faced with adverse effects on human society. Ice, in its various forms from snow to ice sheets, plays an important role in the global climate system by, for example, modulating the solar-energy flux and global sea level. Ice also provides a unique archive of past climate history that contributed to our understanding of global warming today. This course will provide an overview of different forms of ice and their role in Earth's climate system, and foundations in physical understanding of how ice behaves at and near Earth's surface. In addition, contemporary techniques in observations of different forms of ice will be explored with examples in processing and interpretation of publicly available datasets.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1061, PHYS 1961, PHYS 2021, or PHYS 2921) and EES 2001.

EES 4589. Field Geology. 2 to 6 Credit Hours.

This course is typically offered in Summer.

The purpose of this course is to train students in the techniques and methodologies of field geology. Students will learn how to collect, analyze, and interpret field data across a variety of geologic disciplines. Results are presented as maps, reports, measured sections, and computer models. NOTE: Students must seek prior permission to take the course elsewhere through the Petition to Take a Course at Another Institution. Course selection must be approved by an EES faculty advisor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in EES 2011 and EES 2021.

EES 4696. Vertebrate Paleontology and Taphonomy. 3 Credit Hours.

This course is typically offered in Fall of odd years.

This course examines vertebrate fossils and their importance for interpreting and reconstructing terrestrial ecosystems. Students will learn the basics of vertebrate skeletal anatomy, interpret transport and depositional histories of skeletal elements and assemblages, and combine this information with geologic data to reconstruct paleoenvironmental settings and paleocommunity associations. Several class sessions will meet off-campus at local museums; one weekend field trip is required.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2022.

EES 4796. Soils and Paleosols. 4 Credit Hours.

The course is divided into two parts: modern soils and paleosols. The goals of this course are to teach students the fundamentals of modern soil genesis and classification in order to interpret ancient soils preserved in the rock record (paleosols), and to incorporate models of soil genesis into the traditional geology paradigm. Students will be exposed to a combination of laboratory methods and field work.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EES 2021 and EES 2022 (may be taken concurrently)

EES 4896. Planetary Geology. 4 Credit Hours.

This writing-intensive course explores the modern and ancient geologic processes on other planets and discusses how studies of other planets can aid us in a better understanding of our Earth. The course will also cover topics such as planetary exploration and astrobiology and includes a lab.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (EES 2061, EES 3001, or EES 3096) and (MATH 1041, MATH 1941, MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (D or higher; may be taken concurrently), or 'Y' in MATW)

Economics (ECON)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ECON 0858. The American Economy. 3 Credit Hours.

Should the federal government more forcefully engage health care issues, or are its current obligations a hidden time bomb facing the federal budget? Should we be concerned about the outsourcing of U.S. jobs? Is the minimum wage too low, or will increases in the minimum simply lead to greater unemployment? Students will engage these and other pressing issues, write position papers advocating specific actions that governments or firms should take, and debate these recommendations. While economic theory is not the centerpiece of this course, students will learn enough economic theory to be able to discuss policy in an informed manner. They will also be introduced to important sources of "economic" information, from government web sites to major publications. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for ECON 0858 if they have successfully completed SOC 0858.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

ECON 1001. Introduction to the Economy. 3 Credit Hours.

Discussion of what economics is all about. Provides an overview of how a market economy operates, what it does well, what it may not do so well, and what could be done instead. The concepts of economic analysis are developed and applied to discussing some of the current economic problems the world is facing. NOTE: (1) This course is designated for students who are not business or economics majors. Students planning to take 2000, 3000 or 4000 level economics courses may have to take Economics 1101 or 1102 in addition to Economics 1001. Look at prerequisites for a particular course to see if 1101 or 1102 is specified. (2) This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

ECON 1101. Macroeconomic Principles. 3 Credit Hours.

An introductory course in macroeconomics. Topics include business cycles, inflation, unemployment, banking, monetary and fiscal policy, international economics, and economic growth. NOTE: (1) Economics 1101 and 1102 may be taken in any order. (2) This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, SCTC 1021, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in STA1, 'Y' in STA2, 'Y' in MC3A, 'Y' in MC6A, 'Y' in ST1A, 'Y' in ST2A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

ECON 1102. Microeconomic Principles. 3 Credit Hours.

An introductory course in microeconomics. Topics include the market system, supply and demand, cost, competition, monopoly, oligopoly, factor markets, and public goods. NOTE: (1) Economics 1101 and 1102 may be taken in any order. (2) This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, SCTC 1021, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in STA1, 'Y' in STA2, 'Y' in MC3A, 'Y' in MC6A, 'Y' in ST1A, 'Y' in ST2A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

ECON 1103. Global Economics. 3 Credit Hours.

This course is designed to introduce non-majors to key terms and concepts economists use to analyze questions related to economic growth and development. Global economic issues to be discussed include questions such as persistence of underdevelopment, free trade vs. protectionism, migration, and the role of multinational corporations. NOTE: (1) May not be taken by FSBM students as a substitute for Economics 1101, 1102, 1901, or 1902. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IS, SI

Repeatability: This course may not be repeated for additional credits.

ECON 1901. Honors Macroeconomic Principles. 3 Credit Hours.

An introductory course in macroeconomics. Topics include business cycles, inflation, unemployment, banking, monetary and fiscal policy, international economics, and economic growth. NOTE: (1) 1901 is the honors course. It usually requires additional reading and writing assignments. (2) This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IN

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in STA1, 'Y' in STA2, 'Y' in MC3A, 'Y' in MC6A, 'Y' in ST1A, 'Y' in ST2A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

ECON 1902. Honors Microeconomic Principles. 3 Credit Hours.

An introductory course in microeconomics. Topics include the market system, supply and demand, cost, competition, monopoly, oligopoly, factor markets, and public goods. NOTE: (1) 1902 is the honors course. It usually requires additional reading and writing assignments. (2) This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IN

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in STA1, 'Y' in STA2, 'Y' in MC3A, 'Y' in MC6A, 'Y' in ST1A, 'Y' in ST2A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

ECON 2000. Special Topics/Non-Majors. 3 Credit Hours.

Topics vary. See academic advisor for a description.

Repeatability: This course may be repeated for additional credit.

ECON 2061. Foundations of Macroeconomic Development. 3 Credit Hours.

This course provides students with the tools to understand current and historic events in the world economy. We will study selected models in economic growth, international trade, and international finance. The theoretical background will then be used as the basis for discussion of international economic policy issues. Note: This course does not count towards the major or minor in Economics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102, ECON 1902, or ECON 1103) and (MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, or 'Y' in MC3S)

ECON 2408. Economics of Everyday Choices. 3 Credit Hours.

This course discusses key economic concepts that play an important role in major life choices. Particular emphasis is placed on financial decisions, such as saving for retirement, house and car purchases, and financing college education. These personal financial decisions are placed into their macroeconomic context; topics such as inflation, interest rates, and banking are discussed. Using a calculator and basic mathematical concepts, students learn how to access and evaluate government and private data pertaining to each of the topics of the course. Duplicate Credit Warning: Students will only receive credit for one of these: ECON 2408 or ECON 3408. Note: This course is designed for non-majors and will not count towards the major in Economics or Mathematical Economics. Students majoring in Economics or Mathematical Economics may take this as a non-major elective only.

Repeatability: This course may not be repeated for additional credits.

ECON 2585. Internship. 1 to 12 Credit Hour.

This course is intended to combine work experience with long-term learning goals. Students who have obtained a qualified internship can enroll. Each student will maintain regular contact with the instructor of the course, and will complete a series of written assignments. These written assignments will give progressively more in depth analyses of the place of the internship. The objective is to gain awareness of the purpose of the organization, its function in society, its challenges, and the decisions that it needs to make regarding its long-term goals. The student will report not only on his or her own activities, but also on the long-term goals and challenges of the organization. An internship is both an entry level position for an organization, and an opportunity to explore the needs of that organization, and to begin to think about broader issues, such as those that a leader or president with that organization might address one day.

Repeatability: This course may be repeated for a total of 12 credit.

ECON 3062. Economics of Global Poverty. 3 Credit Hours.

This course will introduce students to the microeconomics foundations of development and the economic lives of the poor in low- and middle-income countries. Topics include measurement of poverty, inequality, and human development.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102, ECON 1103, or ECON 1902) and (MATH 0702, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in STA1, 'Y' in STA2, 'Y' in MC3A, 'Y' in MC6A, 'Y' in ST1A, 'Y' in ST2A, or 'Y' in MC3S)

ECON 3408. Economics for Life. 3 Credit Hours.

Increasingly, people are expected to make their own personal financial choices. Economics, which is often defined as the study of choice, provides a structure for making these decisions. This course is designed to help a student, regardless of his or her major, to understand what options are available with respect to a given financial choice and how to go about deciding which one is best in terms of that student's preferences. Among the financial choices that may be discussed are: whether to rent or buy a house or apartment, whether to accept a current job offer or wait for a better one, and when and how much to begin setting aside for retirement.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3501. Intermediate Microeconomic Analysis. 3 Credit Hours.

An intermediate treatment of microeconomic theory and applications. Topics include consumer behavior, production, costs, perfect competition, imperfect competition, factor markets, public goods, and market failure. NOTE: This theory course is designed for economics, finance, and actuarial science majors with analytic skills. It is required for all Economics majors. It is not recommended for non-majors who earned less than B- in Economics 1101 or 1102. Students who have received credit for ECON 3701 may not register for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3502. Intermediate Macroeconomic Analysis. 3 Credit Hours.

An intermediate treatment of macroeconomic theory and policy. Following a discussion of the important macroeconomic sectors, static and dynamic macroeconomic models are developed. Unemployment, inflation, business cycles, monetary and fiscal policy, economic growth, and the balance of payments are then analyzed using these models. NOTE: This theory course is designed for economics, finance, and actuarial science majors with analytic skills. It is required for all Economics majors. Not recommended for non-majors who earned less than B- in Economics 1101 or 1102. Students who have earned credit for ECON 3702 may not register for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3503. Introduction to Econometrics. 3 Credit Hours.

Introduction to the theory and practice of econometrics. Topics include a review of basic statistics, simple regression, multiple regression, dummy variables, autocorrelation, heteroscedasticity, and model specification. Applications in economics are stressed. Problem sets, computer estimation of economic relationships, and a data analysis paper are required. This course is strongly recommended for Economics majors. NOTE: Not recommended for non-majors who earned less than B- in Economics 1101 or 1102.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW), (ECON 1102 or ECON 1902), and (STAT 2103, STAT 2903, MATH 3031, STAT 2101, or MATH 2031)

ECON 3504. Mathematical Economics. 3 Credit Hours.

Elements of set theory, calculus, and matrix algebra are presented and used to analyze mathematical models from economic theory, econometrics, management science, and statistics. This course is strongly recommended for Economics majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW), (ECON 1102 or ECON 1902), and (MATH 1031, MATH 1041, MATH 1941, MATH 1038, or 'Y' in MATW)

ECON 3506. Energy, Ecology, and Economy. 3 Credit Hours.

After surveying the elements of energy and ecology, and reviewing the basics of economics, this course investigates the interaction of the three. Each of the major nonrenewable and renewable energy sources is examined in light of its "eco-feasibility." The potential of energy conservation is examined, and the need for energy/environmental/economic (3-E) policy is debated. Some speculations about future 3-E scenarios are offered, as the U.S. and the rest of the world face their energy, ecological, and economic problems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3507. Health Economics. 3 Credit Hours.

Problems of efficient production and the equitable distribution of health-related services. Policy-oriented material with comprehensive review of standard microeconomic theory in the context of supplier-dependent consumer decisions, third-party payers, and not-for-profit producers. NOTE: Students will receive credit only once for either ECON 3507 or ECON 3597.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3511. The Economics and Management of Privatization. 3 Credit Hours.

This course introduces students to the new trend of shifting delivery of services and responsibilities from governments and non-profit organizations to the private sector. It includes North American and international experiences. This course provides public economics theoretical models, as well as description and evaluation of experiences in the fields of justice, transportation, education, health, and welfare. The course will further suggest models of the privatization process.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3512. Public Finance. 3 Credit Hours.

An overview of the economics of the public sector. Topics include the theories of public goods and optimal (efficient and equitable) taxation, public expenditures, revenues, and tax incidence.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3513. Economics of State and Local Governments. 3 Credit Hours.

Economic problems confronting state and local governments. Topics include intergovernmental relationships, the response of state and local governments to problems of urbanization, and the impact of state and local taxes and expenditures.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3514. The Economics of Education and Human Capital. 3 Credit Hours.

This course will focus on an analysis of the market for education in the United States, including both K-12 and higher education. We will discuss how our education system is currently organized (e.g. how schools are funded), and the implications this has for students and the economy as a whole. We will examine and critically evaluate scientific studies related to key questions in the policy debate, such as "How does a smaller class size impact student outcomes?", or "What are the biggest problems with the student loan system?"

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902), (ECON 1101 or ECON 1901), and STAT 2103.

ECON 3519. Game Theory and Strategic Behavior. 3 Credit Hours.

Game theory is a fundamental tool to analyze economic and social interactions. It has been widely used in economics, management science, sociology, political science, computer science, biology, and other areas. In this course, you will study essential concepts in game theory, such as strategic/extensive form and Nash/subgame perfect equilibrium, and master their application to various situations in economics, business, society, and daily life.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902) and (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080, or 'Y' in MATW)

ECON 3522. Economic Theory of Networks. 3 Credit Hours.

This course presents an overview of networks with emphasis on social networks, online and offline. The student will learn the basic mathematical techniques for representing networks as well as techniques from game theory and economics for the analysis of network structure and evolution.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3525. Urban Economics. 3 Credit Hours.

This course introduces students to the concepts, methods and the core models used by economists to study not only cities, towns and regions and their relationships with each other, but, more generally, the interesting spatial aspects and spatial outcomes of decision-making by households and firms. The course will examine the determinants of the characteristics and structure of urban and regional areas (both intra-urban and inter-urban), and consider the causes and consequences of city, suburban and regional development, growth, and decline. We will discuss how issues related to poverty, housing, transportation and education are closely intertwined with the spatial decisions of households and firms. An important component of this course will be the study of the impact and relationship of local, state and federal government tax, spending, and land-use policies on urban and regional economies.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3531. History of Economic Theory. 3 Credit Hours.

The development of economic analysis from the pre-classical period to the neo-classical tradition that dominates contemporary mainstream economic thinking; emphasis on the work of Adam Smith, Malthus, Ricardo, the Marginalists, Marx, and Marshall.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3532. Economic History of the United States. 3 Credit Hours.

An overview of the forces that influence economic development and growth. Topics include alternative theories of development, empirical studies of the development process, and the role of non-economic factors in helping or hindering economic progress.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102, ECON 1103, or ECON 1902)

ECON 3535. Public Control of Business: Antitrust. 3 Credit Hours.

An overview of U.S. antitrust policy as applied to monopoly, mergers, price discrimination, tying agreements, and patents. Includes analysis of antitrust issues in law, medicine, and professional sports. The relative merits of government ownership, regulation, and antitrust policy are examined.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3536. Economics of American Industry. 3 Credit Hours.

Examines the competitive and monopolistic features of American industry and their effect on product prices and quality, the distribution of income, the rate of technological progress, and, among others, the efficient utilization of scarce resources, and economic rationale for the antitrust laws.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3537. Comparative Economic Systems. 3 Credit Hours.

The course highlights how two economic models - market and government control - are combined and applied in different societies. Specifics are studied for the following cases: (1) the U.S., with traditionally lowest government involvement in economic activity; (2) West European countries, with both market and socialist oriented institutions; (3) the former Soviet Union and Central European countries, which rejected complete government control and are being transformed into market economies; and (4) China, where the government keeps control of big business and allows economic freedom for small business and agriculture. An important consideration is how various systems promote economic growth and withstand crises.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102, ECON 1103, or ECON 1902)

ECON 3538. Managerial Economics. 3 Credit Hours.

The application of microeconomic principles to business planning and decision-making. Topics include demand estimation, cost analysis, and production planning.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3541. The Economics of Sports. 3 Credit Hours.

This course introduces students to a variety of economic disciplines through the prism of professional and amateur sports. Students confront industrial organization and anti-trust issues involving sports leagues, public finance issues involving the relationship between cities and franchises, and labor issues involving reward systems, unions and discrimination. The course concludes with an analysis of collegiate sports and the NCAA.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3543. Law and Economics. 3 Credit Hours.

This course provides an introduction to the economic analysis of law. The course employs microeconomics to develop a behavioral model of response to legal rules. Topics covered include the common laws of property, contract, and tort as well as an extended discussion of intellectual property.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3544. Computer-Based Modeling. 3 Credit Hours.

Students access a variety of economic models established on the University computing system. The models are used in problem-solving to reinforce economic concepts and to gain experience in the conduct of applied economics. Evaluating the consequences of government policies using cost/benefit analysis is emphasized. NOTE: No prior experience with computers or computer programming is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW), (ECON 1102 or ECON 1902), and (MATH 1031, MATH 1041, MATH 1941, MATH 1038, STAT 1102, STAT 1902, or 'Y' in MATW)

ECON 3545. Economics of Labor Markets. 3 Credit Hours.

Examines the nature of labor market equilibrium. Topics include fertility and migration, the allocation of time and occupational choice, human capital, and discrimination.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3546. Women in the Economy. 3 Credit Hours.

A course in labor economics with specific application to women in paid and unpaid employment. The course explores alternative economic theories of the labor market and economic approaches to discrimination as well as historic changes in the nature of unpaid and paid work. These theories are then applied to the economic situation of women in the U.S. and other societies.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3547. Economics of Development and Growth. 3 Credit Hours.

The course concentrates on issues of growth and development for a variety of world economies. The issues covered include topics such as scarcity of resources, interaction between market and government control, role of technology and human capital, and inequality and poverty. Specific tools include the measurement of economic growth and standards of living, conduct of macroeconomic policy, models of international trade, and instruments of global capital markets.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3548. Behavioral Economics. 3 Credit Hours.

This upper-level course, provides a solid foundation for understanding the new field of Behavioral Economics. It takes rational choice theory as a point of departure and then presents the findings of Behavioral Economics, explaining how these findings either support or call for a revision to the rational expectations model. The course uses multidisciplinary findings from psychology, experimental economics, neuroscience and evolutionary psychology to enhance our understanding of how humans make economics decisions and how incentives influence those decisions. Not only CLA economic majors, but also other CLA and FSBM students should be interested in this course, as it deals with the basis of all human decision-making. Students who have earned credit in ECON 3696 will not receive additional credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3563. International Trade. 3 Credit Hours.

An examination of the basic theories of international trade, commercial policy, and factor movements. Topics may include the relation between trade and economic growth, global aspects of U.S. trade policy, international trade agreements, and protectionism. NOTE: Not recommended for non-majors who earned less than B- in Economics 1101 or 1102.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3564. International Monetary Economics. 3 Credit Hours.

The analysis of the balance of payments and foreign currency markets. Topics include the international payments system, foreign investment and debt, and exchange rate regimes. NOTE: Not recommended for non-majors who earned less than B- in Economics 1101 or 1102.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3571. Money and Banking. 3 Credit Hours.

This course explores the role of the banking and monetary institutions within a modern developed economy, with an emphasis on the United States. (1) We will analyze financial intermediation and the role of banks in the economic system, place them in historical context, and discuss the economic rationale behind banking regulation. (2) We will study the role of money and the Federal Reserve in the U.S. economic and financial system. (3) We will discuss the instruments and goals of monetary policy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3572. Owl Fund Seminar I. 3 Credit Hours.

This course provides students with the in-depth training in applied business economics to support the William C. Dunkelberg Owl Fund as part of the economics team. Students provide business conditions forecasts by sector incorporating data from FRED, Bloomberg, etc. including development of visually effective charts. In addition, the economics team is responsible for determining over versus under weighting of sectors based on their macro analysis. Permission of the instructor is required for admission.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901) and (ECON 1102 or ECON 1902)

ECON 3580. Special Topics. 3 Credit Hours.

Special topics in current developments in the field of economics.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3581. Co-op Experience in Economics. 3 Credit Hours.

Students undertake a research project that integrates their current work experience with their classroom experience at Temple University. The results are reported in a 10 to 20-page paper prepared under the supervision of a faculty member. NOTE: Fox students should contact the Center for Student Professional Development (CSPD; www.sbm.temple.edu/cspd/; 215-204-2371) for permission to enroll in this course. All other students should contact the Economics Department Coordinator (Ritter Annex 873; 215-204-8880).

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3582. Independent Study. 1 to 6 Credit Hour.

Directed reading and/or writing assignments under supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

ECON 3596. Energy, Ecology, and Economy. 3 Credit Hours.

After surveying the elements of energy and ecology, and reviewing the basics of economics, this course investigates the interaction of the three. Each of the major nonrenewable and renewable energy sources is examined in light of its "eco-feasibility." The potential of energy conservation is examined, and the need for energy/environmental/economic (3-E) policy is debated. Some speculations about future 3-E scenarios are offered, as the U.S. and the rest of the world face their energy, ecological, and economic problems.

Course Attributes: SE, SF, SP, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3597. Health Economics. 3 Credit Hours.

Problems of efficient production and the equitable distribution of health-related services. Policy-oriented material with comprehensive review of standard microeconomic theory in the context of supplier-dependent consumer decisions, third-party payers, and not-for-profit producers. NOTE: Students will receive credit only once for either ECON 3507 or ECON 3597.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902)

ECON 3598. Economics Writing Seminar. 3 Credit Hours.

This course fulfills the advanced writing requirement for economics majors in the College of Liberal Arts and the Fox School of Business and Management. Students are expected to demonstrate through a series of writing assignments that they can use the economic techniques learned in previous courses to analyze current economic policy issues.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 3501 or ECON 3701) and (ECON 3502 or ECON 3702)

ECON 3672. Owl Fund Seminar II. 3 Credit Hours.

This course is a continuation of ECON 3572 providing the in-depth training in applied business economics to support the William C. Dunkelberg Owl Fund as part of the economics team. Students in this course will focus on producing attribution analysis reports in support of the portfolio manager of the Owl Fund. Permission of instructor is required for admission.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECON 3572.

ECON 3682. Independent Study. 1 to 6 Credit Hour.

Directed reading and/or writing assignments under supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

ECON 3696. Behavioral Economics. 3 Credit Hours.

This upper-level course, provides a solid foundation for understanding the new field of Behavioral Economics. It takes rational choice theory as a point of departure and then presents the findings of Behavioral Economics, explaining how these findings either support or call for a revision to the rational expectations model. The course uses multidisciplinary findings from psychology, experimental economics, neuroscience and evolutionary psychology to enhance our understanding of how humans make economics decisions and how incentives influence those decisions. Not only CLA economic majors, but also other CLA and FSBM students should be interested in this course, as it deals with the basis of all human decision-making.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3697. The Economics of Sports. 3 Credit Hours.

This course introduces students to a variety of economic disciplines through the prism of professional and amateur sports. Students confront industrial organization and anti-trust issues involving sports leagues, public finance issues involving the relationship between cities and franchises, and labor issues involving reward systems, unions and discrimination. The course concludes with an analysis of collegiate sports and the NCAA. Students who have earned credit in ECON 3541 will not receive additional credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3698. Economic Inequality. 3 Credit Hours.

This course studies inequality from the economic perspective. Students learn about and discuss: moral evaluations of inequality in political philosophy; the measurement of economic inequality; the connection of inequality with economic growth; the connection of globalization with inequality both within and across countries; the analyses and policy proposals advanced recently; and finally, the proper role of state institutions and policies in addressing inequality.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902) and (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW)

ECON 3701. Intermediate Microeconomic Analysis with Calculus. 3 Credit Hours.

An intermediate treatment of microeconomic theory and applications that makes frequent use of calculus and other mathematical techniques. Topics include consumer behavior, production, costs, perfect competition, imperfect competition, factor markets, public goods, and market failure. NOTE: This theory course is designed for students with strong analytic skills who have taken a minimum of Economics 1102 and Math 1041. Students who have received credit for ECON 3501 may not earn additional credit by taking this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902) and (MATH 1041, MATH 1941, ECON 3504, or 'Y' in MATW)

ECON 3702. Intermediate Macroeconomic Analysis with Calculus. 3 Credit Hours.

An intermediate treatment of macroeconomic theory and applications that makes frequent use of calculus and other mathematical techniques. NOTE: This theory course is designed for students with strong analytic skills who have taken a minimum of Economics 1101/1901, Economics 3501/3701, and Math 1041/1941 or Economics 3504. Students who have earned credit for ECON 3502 may not register for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901), (ECON 3501 or ECON 3701), and (MATH 1041, MATH 1941, ECON 3504, or 'Y' in MATW)

ECON 3703. Econometric Theory. 3 Credit Hours.

An introduction to econometric theory. This course covers regression analysis, hypothesis testing, panel data, limited dependent variable models, instrumental variables, causal effects, and derives the properties of each of these estimators in substantial detail. The course also covers an introduction to statistical programming. This course is relatively math-intensive; it is designed for students who have at least taken Statistics 2103.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1102 or ECON 1902) and (STAT 2103, STAT 2903, or MATH 3031)

ECON 3900. Honors Topics in Economics. 3 Credit Hours.

Treatment of a particular topic in economics at the Honors level. NOTE: Topic varies from semester to semester. Honors courses usually require extra reading and a paper.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 3999. Honors Thesis I. 1 to 6 Credit Hour.

Students work in an independent study situation to develop an original research project. Permission of the Department Chairperson required for registration.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101, ECON 1901, MATH 1042, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW) and (ECON 1102 or ECON 1902)

ECON 4021. Economics of Risk, Uncertainty, and Information. 3 Credit Hours.

This course provides an introduction to the issues of risk, uncertainty and information in economics. Students are introduced to the standard model of decision making under uncertainty, the expected utility model. The model is applied to theories of decision-making in financial and insurance markets and the design of contracts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 3501 or ECON 3701) and (MATH 1041, MATH 1941, ECON 3504, or 'Y' in MATW)

ECON 4071. Monetary Theory and Policy. 3 Credit Hours.

This course discusses advanced topics in Monetary Economics and Banking. We will first cover an essential list of theories and techniques in monetary economics. We will then explore topics such as the choice of monetary policy rules versus discretion, the liquidity effect of open market operations and the role of the credit channel of monetary policy. All these theories and techniques emphasize the interactions between macroeconomic phenomena and individuals' decisions. Students who have earned credit in ECON 3505 will not earn additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 3501 and ECON 3571)

ECON 4999. Honors Thesis II. 1 to 6 Credit Hour.

Students continue working on the original original research project developed in ECON 3999. Permission of the Department Chairperson required for registration.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901) and (ECON 1102 or ECON 1902)

Education (EDUC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

EDUC 0806. It's Bigger Than Hip-hop: Exploring the Evolution of Race and Identity through Hip-hop. 3 Credit Hours.

Hip-hop is no longer a subculture where members of marginalized groups are rapping and DJing, break dancing, and participating in the activity of graffiti. No, Hip-hop has evolved into a worldwide phenomenon. Not only do Hip-hop artists such as Jay-Z perform to sold out crowds at Madison Square Garden, but they also headline such mega-events as the Global Citizen Festival in South Africa. Hip-hop is now a global force, ubiquitous with mainstream culture. In this class, we will explore, analyze, and critique the beliefs, practices and behaviors associated with Hip-hop in the context of the conditions of systemic racial oppression and marginalization. Further, the course content will reflect a historical, sociological, and psychological perspective of U.S. culture. Students will follow Hip-hop from its early days in New York City, to the dark and gritty environments that produced the sounds of Hip-hop in the 1990s, to the "bling-bling" era of the early 2000s, and now to contemporary Hip-hop that influences fashion, urbanization, and the mainstream lexicon. Models of racial identity development and race-related psychological impact will be used to explore the development of the group and personal identities for those who are part of Hip-hop culture. At the end of the course, students will be able to critically examine the extent to which Hip-hop has helped form a new cultural identity in the 21st century.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

EDUC 0809. Race and Diversity in Children's and Young Adult Books: Reading Between the Lines. 3 Credit Hours.

The purpose of this course is to develop and explore multiple understandings of race and diversity through reading and examining literature that is intended for children and adolescents. We will explore a wide range of historically popular and current picture-books, chapter books, graphic novels and young adult fiction that features characters from traditionally underrepresented racial groups. You will read stories from varied genres, gain an understanding of approaches to content analysis and examine responses readers have to stories. Through critical reading, we will explore the role of literature in identity development and will identify and carefully consider broader ideological beliefs about race and culture raised by the texts. This course will help you discuss issues of race, an important ability for all citizens in a diverse democracy, as well as to read critically and to employ textual data in your writing, two significant abilities needed for success in college across majors.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

EDUC 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and the Individual & Society (IN) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0915, English 0815, Italian 0815, PSY 0815, Russian 0815, or Spanish 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

EDUC 0817. Youth Cultures. 3 Credit Hours.

Do you listen to hip hop, spend all your time in Second Life, dress up like a cartoon character and go to anime fairs, or go skateboarding every day with your friends? Then you're part of the phenomenon called youth culture. Often related to gender, race, class and socio-economic circumstances, youth cultures enable young people to try on identities as they work their way to a clearer sense of self. Empowered by new technology tools and with the luxury of infinite virtual space, young people today can explore identities in ways not available to previous generations. Students in this class will investigate several youth cultures, looking closely at what it means to belong. They will also come to appreciate how the media and marketing construct youth identities and define youth cultures around the world. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and the Individual & Society (IN) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed ANTH 0817, Education 0917 or SOC 0817.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

EDUC 0819. Tweens and Teens. 3 Credit Hours.

Exuberance, excitement, social expansion, risk-taking, experimentation, breaking away, testing limits. Anxiety, peer pressure, competition, parental pressure, work and school, drugs and alcohol, test scores. These are some of the challenges that make adolescence one of the most intriguing and disturbing stages of life. But adolescence is only one stage on a continuum of human development that begins in infancy and extends into old age. At each stage, we have hurdles to climb over, tasks to complete, experiences to absorb, lessons to learn. Yet in contemporary society the extended period between childhood and adulthood seems to capture all the attention. Why? This class on human development takes a close look at one of the most confusing, exciting, and critical phases of development, the pre-teen and teen years. Using literature, TV and film, as well as articles and books from the field of human development, the course will explore how children grow into teenagers, how they survive the challenges of adolescence, and how they become productive adults. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and the Individual & Society (IN) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed Education 0919.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

EDUC 0823. Kids in Crisis: When Schools Don't Work. 3 Credit Hours.

This course is designed to teach students how to think about race and diversity through the lens of three social problems in schools. Social problems are part of modern society. They represent a gap between what we would like society to be like and the lived reality for individuals in the society. Race and diversity are implicated in the framing of these three issues as social problems and in devising solutions that move us towards a more equitable society. Devising solutions to social problems and participating in their implementation is an important role for citizens in a democracy. In order to do so we need to understand the role of race and diversity in modern American society and in our own lived experience. This General Education course will examine three pressing social problems in American society that play out in our schools--segregation and racial isolation in schools, school violence, and dropout. Questions that will guide our exploration of these social problems include: Can schools "solve" social problems? How do schools and teachers participate in the social construction of race? How does a student's race influence his or her experiences in American schools? Note: A student may not take both Kids in Crisis to fulfill the Race and Diversity requirement AND Kids, Community and Controversy to fulfill the Human Behavior requirement.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

EDUC 0865. Albums and Algorithms. 4 Credit Hours.

Music is a constant, from Hip-hop to country to Gospel. We can play it on our phones, computers, and turntables. You have access to music from the 1700s, 1920s and 2020s. In this class we will explore lyrics, beats, music history, and the health and wealth of artists and the music industry using tools from statistics and data analysis. This course helps students explore and consider potential explanations for different phenomena they might observe while learning about music, such as how Hip-hop record sales have changed throughout the last 25 years. The purpose of this course is to: (a) show how statistics and data analysis are inherently creative and visual, (b) expose students to how statistics and data function in their everyday lives, (c) explore how research questions are formed, and (d) explain how data are collected/managed, analyzed, and presented visually and in written form. By exploring changes in lyrics over time we can describe how rap's language has evolved, or looking at artists' royalties from various media we can better understand the chances of a new artist being able to survive. This course will provide a basic overview of quantitative measurement and associated quantitative concepts and will explore the ways in which certain data analytic techniques and associated quantitative models could be used to explore problems in the music industry. Finally, and most importantly, this course will help students to become more fluent in their understanding of and communication about data by moving away from data and statistics as content that is highly theoretical and move towards a content that has real-world application.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

EDUC 0915. Honors Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815, English 0815, Italian 0815, PSY 0815, Russian 0815, or Spanish 0815.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

EDUC 0917. Honors Youth Cultures. 3 Credit Hours.

Some young people dye their hair red and go to punk concerts, listen to hip hop, spend all their time in Second Life, dress up like cartoon characters and go to anime fairs, or skateboard every day. They're part of the phenomenon called youth culture. Often related to gender, race, class and socio-economic circumstances, youth cultures enable young people to find new communities and try on different identities as they work their way to a clearer sense of self. Students in this class will investigate several youth cultures, looking closely at why people join and what it means to belong. They will also conduct independent, original research on a youth culture of their choice and draw their own conclusions about how youth cultures interact with mainstream society. (This is an Honors course.) NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and the Individual & Society (IN) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed ANTH 0817, ASST 0817, Education 0817 or SOC 0817.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

EDUC 0919. Honors Tweens and Teens. 3 Credit Hours.

Exuberance, risk-taking, experimentation, breaking away, testing limits. Anxiety, peer pressure, competition, parental pressure, work and school, drugs and alcohol. These are some of the challenges that make adolescence one of the most intriguing and disturbing stages of life. But adolescence is only one stage on a continuum of human development that begins in infancy and extends into old age. At each stage, we have hurdles to climb over, tasks to complete, experiences to absorb, lessons to learn. This honors class on human development takes a close look at one of the most confusing, exciting, and critical phases of development, the pre-teen and teen years. Working individually and collaboratively, students will learn theoretical frameworks for interpreting their own experience and that of their peers. They will view media representations of adolescence and draw conclusions about how the media influence adolescents. Students will conduct original research on teen phenomenon and draw their own conclusions about whether identity is innate or a product of our environments. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and the Individual & Society (IN) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed Education 0819.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

EDUC 1001. Diversity and Inclusion: Reflective Paper. 0 Credit Hours.

This reflective paper is designed to help students conceptualize how the coursework of the Diversity and Inclusion certificate applies to their area of study and desired career. Students will reflect on each course individually, as well as how their cumulative skills will transfer to employment or further schooling after graduating. Student learning of the Diversity and Inclusion coursework is chiefly evaluated through this reflective paper; students must attain at least 16 of 20 possible points on the final reflective paper to be awarded a certificate in Diversity and Inclusion.

Repeatability: This course may be repeated for additional credit.

EDUC 1002. College of Education and Human Development First Year Seminar. 1 Credit Hour.

College of Education and Human Development (CEHD) First Year Seminar is a one-credit seminar that introduces students to the opportunities and resources available, both university-wide and within the CEHD. This interactive course is designed to help students transition successfully to academic and student life at Temple University. It emphasizes resources available to help students take responsibility for their academic and career goals and better understand how to navigate the Temple University system. Students will explore campus resources and opportunities; their skills, interests, and goals; and will learn about the history of Temple University and the mission of the CEHD.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

EDUC 1016. Mathematics for Educators. 4 Credit Hours.

This course is intended for undergraduate students seeking Pennsylvania teaching certification in early childhood education, middle grades, secondary education, foreign language education, music, or art education. In alignment with mathematics competencies required for admission into a teacher education program, the course will develop deep, connected understandings of content included in the Geometry, Measurement and Data, Expressions and Equations, and Operations and Algebraic Thinking. Researchers have shown that students learn mathematical concepts more productively when they are given opportunities to struggle with solving problems, to communicate and share their ideas with each other, and to interact with different representations of mathematical objects, especially representations that are concrete and visual. In accordance with this research, we will work in a student-centered and inquiry-based class that provides you opportunities to learn cooperatively and work with concrete and virtual manipulatives. You will not only learn how these instructional techniques and materials can be used in the classroom, but also get a first-hand experience with these as you participate as a learner in this class. In addition to a focus on mathematical content, you will have opportunities to become familiar with research on how students learn mathematics and to consider ways in which this knowledge can be integrated into your future teaching. In summary, you will have opportunities to develop knowledge, understandings, and skills useful for teaching elementary mathematics.

Repeatability: This course may not be repeated for additional credits.

EDUC 1017. Algebra and Algebraic Thinking for Educators. 4 Credit Hours.

This course will focus on key algebraic concepts, including polynomial, rational, and algebraic expressions, equations, and inequalities. Students engage in problem solving to build conceptual understandings of algebraic thinking, variables, and functions. Emphasis on transitions from arithmetic to algebra and links between data analysis and algebra.

Repeatability: This course may not be repeated for additional credits.

EDUC 1087. Pract International Educ. 1 to 12 Credit Hour.

Repeatability: This course may be repeated for additional credit.

EDUC 1176. Ed Sch & Indiv in US Soc. 3 Credit Hours.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

EDUC 1196. Education and Schooling in America. 3 Credit Hours.

The purpose of this writing intensive educational foundations course is to examine selected historical, philosophical and social issues that impact education in the United States. This course will examine the trends in educational studies as well as the political forces at work in the schools. The social and academic goals of education, the current conditions of the American educational systems, and the teaching profession will be addressed. This course presents an interdisciplinary analysis of education and schooling in the United States, examining how education policy has been shaped in the U.S., what important roles certain individuals, institutions and social groups have played in this process, how education policies have had differential impact on various groups. Enables students to study and critically evaluate schools as a significant social institution within the framework of American values and institutions. NOTE: This course can be used to satisfy a university Core American Culture (AC) and Writing Intensive (WI) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC, WI

Repeatability: This course may not be repeated for additional credits.

EDUC 1255. Inclusive Education for a Diverse Society. 3 Credit Hours.

In Inclusive Education for a Diverse Society, students explore the role of culture in education in the United States. They learn about different definitions of culture and how culture is influenced by social, economic and political factors. Culture is viewed as dynamic and evolving and a major influence on the curriculum, policies and practices of schools. In addition, students learn about the close relationship between culture and learning and how teachers and education professionals are seeking to create positive learning environments for all students. Real situations are debated and discussed, and students are encouraged to contribute their own experiences and individual interpretations of events and strategies to the discussion.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

EDUC 1322. The Developing Individual across the Life Span. 3 Credit Hours.

This course provides an overview of the factors that have an impact on physical, cognitive and psychosocial development. Students study developmental theories and concepts and how they relate to patterns of change over the lifespan. Both typical and atypical development will be considered. Course work emphasizes the impact on educational practice.

Repeatability: This course may not be repeated for additional credits.

EDUC 2002. College of Education and Human Development Transfer Seminar: Planning for Success. 1 Credit Hour.

The College of Education and Human Development (CEHD) Transfer Seminar is a one-credit seminar that provides transfer students support during the transition to Temple University. The seminar introduces students to the opportunities and resources available, both university-wide and within the CEHD. This interactive course is designed to help students transition successfully to academic and student life at Temple University. It emphasizes resources available to help students take responsibility for their academic and career goals and better understand how to navigate the Temple University system. Students will explore campus resources and opportunities; their skills, interests, and goals; and will learn about the history of Temple University and the mission of the CEHD.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

EDUC 2082. Undergraduate Independent Study. 1 to 3 Credit Hour.

Students will have an opportunity to pursue special topics in their content area or to develop an in-depth project designed to meet personal and program objectives.

Repeatability: This course may be repeated for additional credit.

EDUC 2087. School-Based Community Service. 1 to 3 Credit Hour.

This course provides pre-service teachers and non-education majors with an opportunity to engage with local elementary and high schools in the surrounding community. This effort is focused on addressing the early literacy needs of K-4th graders where the gap in performance often begins and on the needs of 9th grade students in a project-based learning school. Similar to service learning, students in this course will serve as assistants or tutors and make a weekly visit to either two elementary schools located adjacent to main campus or one high school located in North Philadelphia. The course instructor will provide students with strategies for how to provide assistance to individuals and small groups of students. This variable-credit course presents an opportunity for meaningful on-going community engagement through the practical application of academic, behavioral, and creative support in kindergarten through fourth grade classrooms or 9th grade classrooms. Students will spend between 2 to 5 hours per week in the field depending on the number of credits selected for this course.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may be repeated for additional credit.

EDUC 2103. Socio-cultural Foundations of Education in the United States. 3 Credit Hours.

This course will help students place their work with students in a broader social, political and economic context. It will introduce students to the history of education in the United States and to many of the issues that shape our schools and the ways children, parents, and teachers experience them. The course will focus particularly on the role of schooling in a democracy and the many demands Americans have placed - historically and currently - on the schools. It will also help students understand how issues of class, race, and gender are manifest in classrooms. Finally, it will provide students with an overview of the challenges facing urban schools and contemporary issues in school reform. Teachers will leave this course with a more robust understanding of the state of American education today, and how they as individuals and members of a profession can most effectively and ethically make a difference.

Repeatability: This course may not be repeated for additional credits.

EDUC 2109. Adolescent Development for Educators. 3 Credit Hours.

This course is designed to present information that would help prospective and practicing educators understand the minds and behaviors of middle and high school students. Emerging abilities in adolescents present both wonderful opportunities and challenges for teachers and parents. To understand how to connect with, manage and instruct adolescents, educators need to understand how adolescents think, what motivates them, and what they are capable of understanding. This course should prepare educators to correctly anticipate the likely consequences of their actions directed toward adolescents. NOTE: Background clearances required.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

EDUC 2179. Knowing and Learning in Mathematics and Science. 3 Credit Hours.

This course focuses on issues of what it means to learn and know science and mathematics. What are the standards for knowing we will use? How are knowing and learning structured and how does what we know change and develop? For the science and mathematics educator, what are the tensions between general, cross-disciplinary characterizations of knowing (e.g. intelligence) and the specifics of coming to understand powerful ideas in mathematics and science? What are the links between knowing and developing in learning theory, and the content and evolution of scientific ideas? Also, current issues and tensions in education will be discussed, especially as it relates to mathematics and science instruction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (SCTC 1289 (may be taken concurrently) or SCTC 1389 (may be taken concurrently))

EDUC 2205. Curriculum Instruction and Technology in Education. 3 Credit Hours.

"Curriculum, Instruction and Technology in Education" is one of the first in a series of courses designed to enable future teachers to develop skills of effective practice by engaging in and responding to authentic educational experiences. Students will observe authentic interactions among people in school environments. Students will develop learning objectives, and plan, deliver, and evaluate instruction in a simulated teaching/learning environment. The recording of simulated teaching and learning experiences is a primary component of the course. The recordings serve the dual purpose of allowing students to reflect and self-evaluate and providing the basis for peer-evaluation and instructor-student conferences. The development of several teaching skills, self-evaluation and reflection will create the opportunity for a lifetime of professional growth.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

EDUC 2211. English for Foreign Students. 3 Credit Hours.

The focus of this course is on English skills needed for instructional purposes. The course offers students opportunities to develop communicative skills necessary for successful teaching and information about teaching in U.S. institutions of higher education (e.g., syllabi, instructional formats, and legal issues, such as sexual harassment and plagiarism). NOTE: This course is for ITA students.

Repeatability: This course may not be repeated for additional credits.

EDUC 2212. English for Academic Purposes. 2 Credit Hours.

The purpose of this course is to improve graduate students' academic English and intercultural competence, necessary for successful participation in an academic environment. Students will work on developing their academic English skills through individual presentations and group discussions. NOTE: This course serves as the graduate school requirement for new international graduate students.

Repeatability: This course may not be repeated for additional credits.

EDUC 2214. Curriculum and Supervised Teaching K-12. 3 Credit Hours.

The primary intent of the course is to provide prospective teachers with an opportunity to study teaching practice in an urban public school context by working directly with experienced teachers. The course is organized as a series of seminars and in-school experiences in which students, through inquiry and critical reflection, construct their own understanding of teaching. Specific experiences enable students to develop personal perspectives about how teaching professionals think in action and use professional knowledge in situations of practice. NOTE: A field-based course generally taken in the senior year.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2287 (may be taken concurrently)

EDUC 2224. Service Learning. 2 to 3 Credit Hours.

A course that helps students investigate what it means to be a community member and a teacher in a diverse, democratic society. The course combines reading, discussion, action in the community, and reflection in the context of addressing real community needs. In addition, students will begin to develop skills needed as a teacher to use service learning with his or her own students. In this course you will engage in literacy and numeracy activities with very young children in local head-start programs, while learning about the communities in which these program exist. NOTE: Students will work in community organizations or after school programs. Students should not register for a class immediately following EDUC 2224 (0224). Students should not sign up for EDUC 2289 (0225) at the same time as EDUC 2224 (0224).

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

EDUC 2255. Effective Use of Instructional Technology in Classrooms. 3 Credit Hours.

This course focuses on using technology to develop N-12 classroom applications to ensure effective teaching. Students are expected to begin to integrate technology into their teaching strategies. Students will develop technology competencies using modern technology to achieve this goal. Additional technology tools and software will be examined and reviewed for possible use in the N-12 classroom. Extensive internet work will be required.

Repeatability: This course may not be repeated for additional credits.

EDUC 2272. Instructional Practices in Middle Level Classrooms. 3 Credit Hours.

An in-depth exploration of most effective research-based diagnosis and instrumental practices for the contemporary middle level classrooms. Emphasis is upon a curriculum which recognizes the unique qualities of middle level learners.

Repeatability: This course may not be repeated for additional credits.

EDUC 2287. Practicum. 3 Credit Hours.

A first hand opportunity to explore teaching as a profession. Organized visits to elementary, middle, and high schools are combined with assigned readings and seminars. Critical inquiry and reflection will allow for one's essential personal commitment for success in teaching.

Repeatability: This course may be repeated for additional credit.

EDUC 2289. Field Experience: Managing the Contemporary Classroom. 3 Credit Hours.

Education 2289 introduces students to best practices in managing instruction and behavior in contemporary classrooms and to the principles that underlie those practices. Overall, the goal of the course is to ensure that students can identify and articulate the rationale for classroom routines and practices upon which effective instruction depends. This course requires students to spend two hours each week observing classes in an area school. NOTE: Students who are seeking certification in Special Education should enroll in EDUC 2489 (0226).

Repeatability: This course may be repeated for additional credit.

EDUC 2296. Effective Teaching: Theory and Practice. 3 Credit Hours.

EDUC 2296 introduces students to a selection of strategies - some theoretical, some practical - for improving student performance. Course assignments and activities derive from two assumptions - namely, that good planning contributes to good instruction and good instruction contributes to student learning.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

EDUC 2306. Assessment and Evaluation. 3 Credit Hours.

Students will learn how to develop and use a variety of evaluation methods to monitor student academic achievement and teaching effectiveness. Special emphasis will be placed on relating evaluations to curriculum and instruction. Students will learn about standardized tests and other diagnostic tools frequently encountered and/or used by classroom teachers. Particular attention will be given to adapting assessments to meet the needs of all students. Students will plan, construct, administer, and analyze data for a diagnostic evaluation of achievement for a content unit. Contemporary issues related to testing, grading, evaluation, and accountability will be addressed.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

EDUC 2489. Field Experience: Special Education. 3 Credit Hours.

This course is designed to teach basic techniques for managing your classroom. While emphasis is placed on applied behavior analysis, other approaches will also be discussed. In addition, there will be a section on autistic spectrum disorders.

Repeatability: This course may be repeated for additional credit.

EDUC 2900. Honors Special Topics in Education. 3 Credit Hours.

A special topics course, used for materials and approaches to Education. NOTE: Course content varies each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

EDUC 2903. Honors Socio-Cultural Foundations of Education in the United States. 3 Credit Hours.

This course will help students place their work with students in a broader social, political and economic context. It will introduce students to the history of education in the United States and to many of the issues that shape our schools and the ways children, parents, and teachers experience them. The course will focus particularly on the role of schooling in a democracy and the many demands Americans have placed - historically and currently - on the schools. It will also help students understand how issues of class, race, and gender are manifest in classrooms. Finally, it will provide students with an overview of the challenges facing urban schools and contemporary issues in school reform. Teachers will leave this course with a more robust understanding of the state of American education today, and how they as individuals and members of a profession can most effectively and ethically make a difference.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

EDUC 3332. Professional Seminar in Human Development and Community Engagement I. 1 Credit Hour.

Many students want to make a difference in children's lives in other ways besides being a teacher. There are several hundred charitable and educational foundations and agencies in the greater metro Philadelphia area alone. State, federal, and local governments also often have child-focused initiatives. The programs, policies, and practices of these agencies and governments could benefit from employees who understand the factors that impede or facilitate the cognitive, social, and physical development of children, particularly in urban communities. This course provides an orientation to the HDCE major and exposure to a variety of career options and organizations that are relevant to HDCE. It aims to help students develop a sense of their future career path and understand their role within a collective impact framework.

Repeatability: This course may not be repeated for additional credits.

EDUC 3333. Professional Seminar in Human Development and Community Engagement II. 1 Credit Hour.

Many students want to make a difference in children's lives in other ways besides being a teacher. There are several hundred charitable and educational foundations and agencies in the greater metro Philadelphia area alone. State, federal, and local governments also often have child-focused initiatives. The programs, policies, and practices of these agencies and governments could benefit from employees who understand the factors that impede or facilitate the cognitive, social, and physical development of children, particularly in urban communities. This course provides an orientation to the HDCE major and exposure to a variety of career options and organizations that are relevant to HDCE. It aims to help students develop a sense of their future career path and to understand both the needs and resources in the North Philadelphia area.

Repeatability: This course may not be repeated for additional credits.

EDUC 3900. Honors Special Topics in Education. 3 Credit Hours.

A special topics course, used for materials and approaches to Education. NOTE: Course content varies each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

EDUC 4038. Assessment of Curr & Instr. 3 Credit Hours.

Repeatability: This course may not be repeated for additional credits.

EDUC 4091. Capstone Project: Minor in Education. 3 Credit Hours.

"Capstone Project: Minor in Education" is the culminating experience for the minor degree in education. This required independent study is an opportunity for students to synthesize and apply the range of learning across their education coursework in an inquiry project. Students will be required to demonstrate increased knowledge and skills in practice, research, and evaluation. In coordination with the instructor, students will develop a project around an issue in education they studied during their minor degree coursework. Students will independently investigate this question and produce a written response. In the course of their research, students will conduct observations and interview and interact with stakeholders in schools, community centers, and other educational settings.

Field of Study Restrictions: Must be enrolled in one of the following Minors: Education.

Repeatability: This course may not be repeated for additional credits.

EDUC 4111. Classroom and Conflict Management in Grades 4 through 12. 3 Credit Hours.

One of the National Education Goals is the creation of safe and constructive learning environments. Educators are increasingly aware of the need to build community in classrooms and schools in order to help students have such environments. A key component of that is conflict resolution education. This course introduces students to the broad field of conflict resolution education (including classroom management, social and emotional learning, anti-bullying programs, peer mediation, negotiation processes, expressive arts, restorative justice programs, and bias/diversity/cultural awareness programs). AOD 2115 provides students with examples of programs, gives them an opportunity to interact with experts in the field, and encourages them to consider how they can support and utilize these programs as teachers and administrators. Particular emphasis will be placed on understanding how to design and implement conflict resolution and social emotional learning programs that address the developmental needs of adolescents and the middle school environment.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

EDUC 4185. Community Internship and Seminar. 1 to 12 Credit Hour.

This internship in applied development provides a learning experience that unites prior coursework with professional organizational settings and the community as a whole, while also guiding students as they transition into their own professional lives. Students will have dual responsibility: to provide the best service possible to your agency/school/company (you will be, in some sense, an ambassador for Temple and for the program), and to participate in the internship seminar. Students will continue at the site they completed their practicum course. Having developed relationships and acquainting themselves with the organization, students can seamlessly transition into an internship at the same site.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Human Develop Commnty Engagemn.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in EDUC 4187.

EDUC 4187. Practicum in Applied Development. 3 Credit Hours.

This course will give undergraduate students the opportunity to integrate and apply theory and coursework within a community organization working with children or other vulnerable populations. Students will be required to demonstrate increased knowledge and skills in practice, research, and evaluation across multi-level systems. Students will experience a practicum placement under the immediate supervision of a professional who functions as the student's Site Supervisor, and the overall supervision of the Practicum Instructor. The practicum will involve activities such as observing the members within the organization and conducting background research about the organization. Additionally, practicum students will meet five times during the course of the semester to share observations and experiences gained from the practicum placement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Human Develop Commnty Engagemn.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in EDUC 3332 and EDUC 3333.

EDUC 4288. Student Teaching in Elementary/Special Education. 9 to 11 Credit Hours.

Practicum for full-time students and education majors who have completed all other program requirements. NOTE: There is a \$50 fee associated with all sections and numbers of student/supervised teaching. Student Teaching Applications are now online at www.temple.edu/education/studentteaching/index.html. Obtain your advisor's signature and return the completed application to the CITE Department advisor, 359 Ritter Hall.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4801.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

EDUC 4333. Effectiveness of Interventions for Children (Zero through 8th Grade). 3 Credit Hours.

This course is designed to describe and promote critical thinking about interventions that have been created to address various societal problems faced by children such as racial gaps in academic achievement, drug use among adolescents, and childhood diseases. Students taking this course will already have taken the following courses: (a) child development (that explain age trends in outcomes such as achievement and the factors that cause these outcomes), (b) research methods (that explain the differences between studies that provide interpretable data and studies that do not), and (c) statistics for decision-making. Students will use information from these prior courses to help evaluate specific interventions such as Head Start. Hopefully, students will not only develop a certain amount of expertise about existing interventions, but will also develop a good sense of how to create new interventions that might be effective, and how to use a framework to evaluate other interventions that were not examined in this course. This knowledge will prove valuable during the required internship in the HDCE major where a major paper focuses on the effectiveness of the agency or program in which the internship takes place.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (EPSY 2325 (may be taken concurrently) or 'Y' in CREY01), (AOD 2201 or 'Y' in CRAO01), and (ECED 2101 or 'Y' in CREA01)

EDUC 4388. TUTEACH Apprentice Teaching. 4 Credit Hours.

The purpose of Apprentice Teaching is to offer TUTEACH students a culminating experience that provides them with the tools needed for their first teaching jobs. Apprentice teachers maintain their role as teacher for the equivalent of two six-week grading periods. Apprentice Teaching students are required to teach two sections of a science, math, or computer science class in a public middle or high school. They remain on the school campus a minimum of four hours per day. Students are evaluated throughout Apprentice Teaching, including two evaluations (formative and summative) on the PA Department of Education (PDE) 430 Form. To pass this assessment, students must receive a satisfactory rating in each of the 4 categories resulting in a minimum total of at least 4 points on the final summative rating. Apprentice Teaching reinforces and augments teaching strategies that students have developed through their coursework and field experiences. The program also attempts to fill in any gaps in students' professional development. In particular, Apprentice Teaching focuses on classroom management and time management strategies, parent/teacher communication strategies, school culture and school dynamics that make up an effective middle school and high school system, legal and logistical issues in teaching, the final portfolio, and state certification requirements. TUTEACH apprentice teachers explore professional development opportunities beyond the classroom, including attending conferences, subscribing to education journals, joining professional organizations, and conducting presentations in educational settings. The goal of Apprentice Teaching is to provide the experiences, information, and coaching that will enable students to be successful teachers who are leaders in their schools and communities.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUTEACH.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4802.

Repeatability: This course may not be repeated for additional credits.

EDUC 4389. Field Experience. 1 to 6 Credit Hour.

The goal of the field experience course is to allow students to apply what they have learned in Secondary Education courses in a school. Students will observe, assist, tutor, and/or instruct in schools or an education-related setting.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may be repeated for additional credit.

EDUC 4441. Discourse Practices in Diverse Communities. 3 Credit Hours.

From private businesses to public service, the institutions of today's society are composed of diverse groups of participants whose communication practices reflect their varied backgrounds, traditions, and practices of social relations. Combining discourse analytic and sociolinguistic perspectives, this course will advance students' understandings of the ways people from different cultural backgrounds think, communicate, and behave based on the value systems, worldviews, and narratives that ground them. Students will be asked to read challenging texts, engage in class discussions and exercises, reflect on a variety of media clips, and critically contemplate multiple perspectives on communication. The concepts that we will cover include: the nature of signs; linguistic relativity and the relationship between language and thought; multilingualism; the difference between linguistic and communicative competence; standard language and dialects such as African American Vernacular English; and the connections between language and power, race, class, and gender.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

EDUC 4488. Student Teaching in Elementary/Special Education/Early Childhood Education. 9 to 11 Credit Hours.

Students are admitted to student teaching only after their records and potential for success have been reviewed by the program faculty. Students will work under the guidance of cooperating teachers and Temple supervisors. NOTE: There is a \$50 fee associated with all sections and numbers of student/supervised teaching. Student Teaching Applications are now online at www.temple.edu/education/studentteaching/index.html. Obtain your advisor's signature and return the completed application to the CITE Department advisor, 359 Ritter Hall.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4801.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

EDUC 4588. Student Teaching in Elementary Education/Early Childhood Education. 9 to 11 Credit Hours.

Involves a school placement where students demonstrate their knowledge of and competence in early childhood teaching, birth through 3rd grade (N-3). Students work with a certified cooperating teacher and are supervised by a Temple University faculty member. NOTE: All coursework must be completed before taking this course. There is a \$50 fee associated with all sections and numbers of student/supervised teaching. Student Teaching Applications are now online at www.temple.edu/education/studentteaching/index.html. Obtain your advisor's signature and return the completed application to the CITE Department advisor, 359 Ritter Hall.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4801.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

EDUC 4688. Student Teaching in Secondary Education. 9 to 11 Credit Hours.

Students are admitted only after they give evidence of appropriate professional maturity and the potential for success. NOTE: All coursework must be completed before taking this course. There is a \$50 fee associated with all sections and numbers of student/supervised teaching. Student Teaching Applications are now online at www.temple.edu/education/studentteaching/index.html. Obtain your advisor's signature and return the completed application to the CITE Department advisor, 359 Ritter Hall.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4801.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

EDUC 4788. Student Teaching in Secondary Education/Career Technical Education. 3 to 9 Credit Hours.

Involves a full-time school placement where students demonstrate their knowledge of and competence in teaching discipline-specific subject matter to students in grades 7-12, and in some cases, K-12. Students work with a certified cooperating teacher and are supervised by a Temple University faculty member. NOTE: All coursework must be completed before taking this course. Student Teaching Applications are now online at www.temple.edu/education/studentteaching/index.html. Obtain your advisor's signature and return the completed application to the CITE Department advisor, 359 Ritter Hall.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4801.

Repeatability: This course may be repeated for additional credit.

EDUC 4801. Senior Seminar and Performance Assessment. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting, and engage in activities that foster professionalism in school and community settings. The senior performance assessment, which is a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the student teaching semester.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

EDUC 4802. TUteach Apprentice Teaching Seminar. 3 Credit Hours.

Students will be involved in experiences that prepare them for making the transition from college to the practice setting and engage in activities that foster professionalism in school and community settings. The senior performance assessment (SPA), which is a requirement for teacher certification students, is also a part of the course. NOTE: This is a required course for all teacher certification candidates, which is taken during the apprentice teaching semester.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: TUteach.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4388.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MGSE 4189.

EDUC 4941. Honors Discourse Practices in Diverse Communities. 3 Credit Hours.

Even when we speak the same language, we often miscommunicate with friends, co-workers, family members, and neighbors. Add to that scenario a group of people who speak different languages or language varies, and the challenge of communicating effectively becomes more acute. But that's the reality of America today. Simply put, intercultural awareness and communication skills are now a necessary part of life for most people in most aspects of their lives. This course is designed to help students identify how to become better communicators in a wide range of cross-cultural situations. Through readings, discussion, hands-on activities, and 'real world' projects, students will: increase understanding of their own cultural backgrounds and communication style(s); explore different world views, ideologies, and behaviors; acquire knowledge, skills and attitudes that increase intercultural competence; and learn creative ways to address (and possibly avoid) miscommunication in cross-cultural contexts.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SI

Repeatability: This course may not be repeated for additional credits.

EDUC A000. Elective. 0 Credit Hours.

Repeatability: This course may not be repeated for additional credits.

Educational Administration (EDAD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

EDAD 0855. Why care about College: Higher Education in American Life. 3 Credit Hours.

You have decided to go to college. But why? What role will college and in particular Temple University play in your life? Reflect on this important question by looking at the relationship between higher education and American society. What do colleges and universities contribute to our lives? They are, of course, places for teaching and learning. They are also research centers, sports and entertainment venues, sources of community pride and profit, major employers, settings for coming-of-age rituals (parties, wild times, courtship, etc.), and institutions that create lifetime identities and loyalties. Learn how higher education is shaped by the larger society and how, in turn, it has shaped that society. Become better prepared for the world in which you have chosen to live for the next few years. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed American Studies 0855 or English 0855.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

EDAD 0955. Honors Why care about College: Higher Education in American Life. 3 Credit Hours.

You have decided to go to college. But why? What role will college and in particular Temple University play in your life? Reflect on this important question by looking at the relationship between higher education and American society. What do colleges and universities contribute to our lives? They are, of course, places for teaching and learning. They are also research centers, sports and entertainment venues, sources of community pride and profit, major employers, settings for coming-of-age rituals (parties, wild times, courtship, etc.) and institutions that create lifetime identities and loyalties. Learn how higher education is shaped by the larger society and how, in turn, it has shaped that society. Become better prepared for the world in which you have chosen to live for the next few years. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed American Studies 0855, English 0855 or EDAD 0855.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

EDAD 3027. Research-Based Practices. 3 Credit Hours.

This course is a comprehensive examination of middle schools and the middle school movement. Topics to be studied are: the history, philosophy, and curriculum of middle schools; characteristics of effective middle schools; team organizations; recent influences (debates of effective vs. cognitive); advisories; transition programs; flexible/block scheduling; and the essential characteristics of middle level teachers.

Repeatability: This course may not be repeated for additional credits.

Educational Psychology (EPSY)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

EPSY 2325. Statistics for Decision Making. 3 Credit Hours.

How can organizations choose the best options for new programs they want to start? How should a non-profit decide which services to keep providing and which ones to drop? How can an after-school program figure out which activities are helping kids and which ones need to be improved? How can a museum improve attendance by reaching out to the right audiences? Data-driven decision-making is a set of skills for gathering high-quality information and understanding that information in order to make effective decisions about programs. The course includes an introduction to choosing surveys and measures, ethically gathering high-quality data, visualizing the data, and basics of data analyses that will be most useful to future practitioners and leaders in non-profit, healthcare, and educational settings. Effective communication--of the data gathering process, analysis, results, and implications--to stakeholders is stressed throughout the course.

Repeatability: This course may not be repeated for additional credits.

Electrical Engineering (ECE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ECE 0822. Investing for the Future. 4 Credit Hours.

This class will teach you about seemingly complicated financial topics in a very comprehensible manner that will help you make informed financial decisions to ensure a secure financial future. We begin with identification of common financial problems among the "young, fabulous and broke" and how to avoid them. After thinking about life and financial priorities, we address why thinking about retirement now must be at the top of your list. We examine how to compute your retirement needs and how to get there, primarily with a focus on investing in common stock. You will learn how to think smart about big ticket purchases such as cars, housing, and graduate/professional education. Finally we will make sure you understand how to create a safety net to protect your future. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed FIN 0822, FIN 0922 or RMI 0822.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

ECE 0832. Digital World and Everyday Life. 3 Credit Hours.

Every career is being shaped by digital technology. Buzzwords like Cryptocurrency, Artificial Intelligence, Smart Grid, Big Data, The Cloud, Internet of Things, 5G, and Augmented Reality appear in news articles every day. How do all these technologies fit into your daily life and your future career? This class will help you to understand the current state of digital technology and give you the foundation to understand future technological innovations including understanding the fourth industrial revolution, a.k.a. "Industry 4.0". You will gain foundational knowledge such as how computers work, how they communicate with each other, and how people program computers. You will apply this foundational knowledge to more advanced topics such as the topics at the start of the course description. Lastly, the course will describe the ethical considerations of these changes and what role policy should play. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and a Science & Technology Second Level (SB) requirement for students under Core.

Department Restrictions: May not be enrolled in one of the following Departments: CST:Computer & Info Sci, Engineering:Elec Engineering.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Computer & Information Science, Electrical Engineering.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

ECE 1012. Introduction to Electrical Engineering. 2 to 3 Credit Hours.

This course introduces basic concepts in Electrical and Computer Engineering, and demonstrates them in the context of real applications. Course topics include basics of DC and AC circuits, transistor, diode and operational amplifier circuits, digital logic gates and power supply operation. Students assemble and test a robot car or mouse as part of the class project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 1022 to 4999, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC6T, or 'Y' in METW)

ECE 1014. Evolution of Modern Electronic Systems. 3 Credit Hours.

Introduction to modern electronic systems such as telephone networks, television, radio, radar, and computers. Key discoveries such as the vacuum tube, transistor, and laser are covered. The fundamental operating principles are presented in a non-mathematical and historic context. The evolution of these technologies is presented in terms of the need for communication systems and their impact on society. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any course with attribute "SA" or any course with attribute "GS")

ECE 1022. Technology and You. 3 Credit Hours.

The practitioners of science are scientists. However, we never refer to the practitioners of technology as technologists; rather, they are always referred to as engineers. Therefore understanding the process of engineering is to understand the process of technological development. The engineer of today is either making an old technology better or developing a new technology. As will be illustrated in the readings, engineering is a human endeavor that has existed since the dawn of human kind. To understand engineering and its roots is to understand and appreciate one of humanity's greatest assets. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any course with attribute "SA" or any course with attribute "GS")

ECE 1111. Engineering Computation I. 4 Credit Hours.

This course will cover the essentials of computer program design, development, testing, and debugging for engineers. In addition to fundamentals such as loops, branching, and subroutines, the course will discuss memory management, pointers, file and data I/O, compilers and linkers, objects, data structures, algorithms, and variable scope. Students will become familiar with scientific and technical computing in the context of solving engineering design challenges. The course will be programming intensive, and students will be expected to code both in and out of class.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MATW, or 'Y' in METW), (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW), ENGR 1102, PHYS 1062, ENGR 2011 (may be taken concurrently), and ENGR 2013 (may be taken concurrently)

ECE 1112. Electrical Applications. 2 Credit Hours.

This course introduces basic concepts in Electrical and Computer Engineering, and demonstrates them in the context of real applications. Course topics include basics of DC and AC circuits, transistor, diode and operational amplifier circuits, digital logic gates and power supply operation.

Co-requisites: ECE 1113.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 1022 to 4999, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC6T, or 'Y' in METW)

ECE 1113. Electrical Applications Laboratory. 1 Credit Hour.

Laboratory for ECE 1112 (0007): Electrical Applications. This is a hands-on lab based on the material covered in ECE 1112.

Co-requisites: ECE 1112.

Repeatability: This course may not be repeated for additional credits.

ECE 2105. Introduction to Cyber Physical Security. 3 Credit Hours.

This is an introductory course to build foundational knowledge in Cyber Physical Security. While Cyber Security (CS) is to ensure security when we use globally interconnected digital network, Cyber Physical Security (CPS) is to ensure the security of critical, real-time, automated and distributed cyber physical infrastructures and facilities that we depend our livelihood on such as water, power (electrical), energy (oil, nuclear), communication, transportation, manufacturing, the emerging world of Internet-of-Things (IoT). This course starts with high level knowledge areas in CS foundations and principles. The course then expands to knowledge areas in Industrial Control System (ICS), embedded systems, mobile technology, wireless sensor networks, and hardware and firmware security, highlighting various architectures, devices, network, operations, processes, and their vulnerability and potential resilient solutions. Case studies such as an actual attack on power grids are used to analyze the incident and its responses. In some cases, tools are used to demonstrate the CPS applications.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor Sci in Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 1101.

ECE 2112. Electrical Devices & Systems I. 3 Credit Hours.

The purpose of this course is to teach non-Electrical Engineering major students the basics of Electrical circuits and systems, such as: voltage and current, electrical elements (resistors, inductors, capacitors), Kirchoff current and voltage Laws, parallel and series connections, time domain vs. frequency domain analysis, AC power, three phase systems, electrical machines, operational amplifiers, semiconductor diodes and transistors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062 or PHYS 1022) and (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1031 (may be taken concurrently), 'Y' in MATW, or 'Y' in METW)

ECE 2113. Electrical Devices & Systems I Lab. 1 Credit Hour.

The purpose of this course is to teach non-Electrical Engineering major students the basics of Electrical circuits and systems in a laboratory environment and to reinforce the theoretical concepts of ECE 2112 by using experimentation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2112 (may be taken concurrently)

ECE 2122. Electrical Devices and Systems II. 4 Credit Hours.

Students will study circuit analysis using frequency domain techniques, Laplace Transforms, Operational amplifiers, elements of semiconductor devices, electronic circuits, and logic circuits. Students will work on practical applications relating primarily to the mechanical engineering discipline. The laboratory portion of this course allows students to undertake practical applications of the principles discussed in the lecture. NOTE: This course is for Mechanical Engineering majors only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 2112 (D- or higher) and (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW)

ECE 2142. Engineering Principles for Building Science. 4 Credit Hours.

The engineering design approach centers around principles that apply across disciplines, especially those focused on those studying structures. Every architectural student should have an instinctive understanding of fundamental and traditional concepts in the engineering approach to solving problems in making creative design decisions within physical constraints and requirements. Students will learn properties of structures and materials in context of building science and apply their knowledge to solve open ended problems with focus on intelligently choosing methods rather than arriving at exact solutions. Students will become familiar with emerging technologies while relating them to fundamental concepts. The course is design project based with topics including: Vectors, Physical Modeling of Forces, Free Body Diagrams, Structure Analysis, Perspective, Camera/Projector Optics, Introduction to Sensors, Networks and Smart Buildings.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1031, any MATH course numbered 1032 to 4999, 'Y' in MATW, or 'Y' in METW)

ECE 2312. Electrical Engineering Science I. 3 Credit Hours.

Electric circuit fundamentals including DC and transient circuit analysis are covered in the course. Topics include independent and dependent sources, circuit elements such as resistors, inductors, capacitors and operational amplifiers, linearity, source transformation, Thevenin and Norton equivalent circuits, as well as the analysis and design of first and second order circuits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (C or higher; may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, 'Y' in MATW, or 'Y' in METW), PHYS 1062 (may be taken concurrently), and ECE 2313 (may be taken concurrently)

ECE 2313. Electrical Engineering Science I Lab. 1 Credit Hour.

This laboratory is concerned with the analysis and design of first and second order circuits with direct current (DC) power sources. This laboratory complements ECE 2312: Electrical Engineering Science I. Topics include independent and dependent sources, circuit elements such as resistors, inductors, capacitors, and operational amplifiers. We also investigate the concept of linearity and source transformation, Thevenin equivalent circuits, and Norton Equivalent circuits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2312 (may be taken concurrently)

ECE 2322. Electrical Engineering Science II. 3 Credit Hours.

This course is concerned with the analysis of alternate current (AC) circuits. Sinusoidal steady-state analysis, AC power analysis, magnetically coupled circuits, and frequency responses are covered. Laplace transforms are introduced and are used to solve first, second and higher order differential equations. The use of Laplace transforms for circuit analysis is studied and applied.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 2312, ECE 2323 (may be taken concurrently), and (MATH 1042 (C or higher; may be taken concurrently), 'Y' in MATW, 'Y' in CRMA09, or 'Y' in METW)

ECE 2323. Electrical Engineering Science II Lab. 1 Credit Hour.

This course provides hands-on experience of the principles discussed in ECE 2322. Specifically students will gain practical experience on the use of various electrical equipment and their applications for measuring alternating current quantities.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2322 (may be taken concurrently)

ECE 2332. Principles of Electric Circuits. 4 Credit Hours.

Electric circuit fundamentals including DC and AC circuit analysis are covered in the course. Topics include circuit elements such as resistors, inductors, capacitors, voltage and current sources, and operational amplifiers; methods of circuit analysis, such as superposition theorem, Thevenin and Norton equivalent circuits, as well as the analysis of first and second order circuits. Sinusoidal steady-state analysis, AC power analysis, magnetically coupled circuits, and frequency responses are covered. Laplace transforms are introduced and are used to solve first, second and higher order differential equations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MATW, or 'Y' in METW) and (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), 'Y' in MATW, or 'Y' in METW)

ECE 2333. Principles of Electric Circuits Lab. 1 Credit Hour.

This is a hands-on laboratory course for electric circuit fundamentals including DC and AC circuits. Experiments for this laboratory course will be based on the course material covered in ECE 2332. Topics include series and parallel circuits in DC and AC, frequency response, transient response, and AC sinusoidal response.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2332.

ECE 2342. Circuits and Electronics I. 5 Credit Hours.

This course is the first in a three-course sequence intended to provide students with foundational knowledge and skills in electrical and computer engineering. In this first course, students will analyze and design DC and AC circuits with linear components such as resistors, inductors, and capacitors. Operational amplifiers will also be studied. Analysis techniques include Kirchoff's voltage and current laws, phasors methods, complex impedance, AC power, Thevenin and Norton equivalent models. Students will explore course concepts in integrated laboratory experiments which include design projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MATW, or 'Y' in METW), (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW), ENGR 1102, PHYS 1062, ENGR 2011 (may be taken concurrently), and ENGR 2013 (may be taken concurrently)

ECE 2352. Circuits and Electronics II. 5 Credit Hours.

This course is the second in a three-course sequence intended to provide students with foundational knowledge and skills in electrical and computer engineering. In this second course, students will build on concepts learned in Circuits and Electronics I. They will analyze and design DC and AC circuits containing non-linear devices such as diodes, bipolar junction transistors, and field-effect transistors. Analysis techniques include modeling diodes, transistors, and operational amplifiers. Biasing, frequency response, and amplifier design will also be studied. Students will explore course concepts in integrated laboratory experiments which include design projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2342, ENGR 2011, and ENGR 2013.

ECE 2612. Digital Circuit Design. 3 Credit Hours.

This course considers binary number systems, codes, truth tables and the fundamental operation of digital logic circuits. The implementation of combination and sequential digital logic is by a hardware description language in Verilog behavioral synthesis. Complex digital logic and state machine analysis and design are implemented in simulation and programmable gate array hardware.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 2312, ECE 2332 (may be taken concurrently), or PHYS 1062), ECE 2613 (may be taken concurrently), and ECE 1111.

ECE 2613. Digital Circuit Design Laboratory. 1 Credit Hour.

Laboratory for ECE 2612: Digital Circuit Design. This course provides hands-on experience in digital circuits, gates, flip-flops etc.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2612 (may be taken concurrently)

ECE 2922. Honors Electrical Engineering Science II. 3 Credit Hours.

Topics in this course include: sinusoidal analysis, power measurements, three-phase circuits, complex frequency and network functions, resonance, scaling, frequency response, two-port networks, Fourier series and transforms. This Honors course will be challenging and held to a high standard.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 2312 (C or higher), ECE 2923 (may be taken concurrently), and MATH 1942.

ECE 2923. Honors Electrical Engineering Science II Lab. 1 Credit Hour.

Topics in this course include: sinusoidal analysis, power measurements, three-phase circuits, complex frequency and network functions, resonance, scaling, frequency response, two-port networks, Fourier series and transforms. This Honors course will be challenging and held to a high standard.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2922 (may be taken concurrently)

ECE 3082. Independent Study in Electrical Engineering. 1 to 3 Credit Hour.

With the department chair's approval, students may complete a regular course during semesters the course is not offered in order to meet prerequisite or graduation requirements. An instructor supervises the student.

Repeatability: This course may be repeated for additional credit.

ECE 3091. Independent Research in Electrical Engineering. 1 to 3 Credit Hour.

Project assigned with the approval of the department chair and conducted under the supervision of a faculty sponsor.

Repeatability: This course may be repeated for additional credit.

ECE 3185. Electrical and Computer Engineering Summer Internship Experience. 1 to 3 Credit Hour.

This course is for an approved, full-time, full-summer (ten weeks or more) work experience in industry or a government agency. The full-time work experience must be carried out during the summer between a full, regular spring semester and full, regular fall semester. The summer employment must entail rigorous engineering analysis at a level comparable to an approved technical elective course in the BS EE program. Work experience in industry, governmental agencies or educational institutions is arranged through the Director of Career Services in the College of Engineering. The course is for one semester of work experience. Letter from supervisor and report by student are required.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ECE 3312. Microelectronics I. 3 Credit Hours.

Students study ideal and non ideal operational amplifier circuits, diodes in nonlinear circuit applications, bipolar junction transistors, field-effect transistors (JFETs), metal oxide semiconductor field effect transistors (MOSFETs), biasing techniques, gain and bandwidth, the design of amplifiers, and transistors as loads.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ECE 2322 or ECE 2332) and ECE 3313 (D- or higher; may be taken concurrently)

ECE 3313. Microelectronics I Laboratory. 1 Credit Hour.

Electrical devices and circuits laboratory to be taken concurrently with Electrical Engineering 3312.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 3312 (D- or higher; may be taken concurrently) and (ECE 2323, ECE 2333, or ECE 2113)

ECE 3412. Classical Control Systems. 3 Credit Hours.

Students will learn the basic theory of analog (classical) control systems. The concept of what constitutes a system is learned as well as how to analyze a system by using input-output pairs. The importance of a transfer function and how it characterizes the behavior of a linear time invariant system will be studied. What a feedback system is and how it may change the behavior of a system is learned. Finally, students will learn how to analyze and design linear time invariant control systems using both time domain and frequency domain techniques.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in ECE 3512 (C- or higher) and (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW)

ECE 3413. Classical Control Laboratory. 1 Credit Hour.

Experimentation on selected topics in ECE 3412: Classical Control Systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3412 (may be taken concurrently)

ECE 3432. Robotic Control using Robotic Operating System (ROS). 3 Credit Hours.

This course covers the steps of building a robot capable of autonomous movement and remote control from start to finish. It is to educate the beginning robot builder and hopefully inspire creativity so that you can design, build, and modify your own robots with the use of the Robotic Operating System (ROS). The skills and concepts taught in this course are presented from an interdisciplinary approach which merges practices in arts and technology. Essential elements of this course are 1) understanding how ROS is used in robotic control, 2) motor drive and sensor integration, 3) Linux-based microcontroller interface, 4) basics of Python programming language, and 5) controlling the robot using control algorithms, signal and image processing, and cloud computing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 1111 or CIS 1057)

ECE 3512. Signals: Continuous and Discrete. 4 Credit Hours.

This course covers continuous time signal models, convolution, and superposition integral and impulse response. Students also study Fourier series and periodic signals, Parseval's theorem, energy spectral density, Fourier transform and filters, discrete time signals, difference equations, discrete Fourier transform, and discrete convolution.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 2322 or ECE 2332) and ENGR 2011.

ECE 3516. Signals and Systems. 5 Credit Hours.

This course is the third in a three-course sequence intended to provide students with foundational knowledge and skills in electrical and computer engineering. In this third course, students will build on concepts learned in Circuits and Electronics I and II to analyze and design signals and systems. Analysis techniques include impulse response, convolution, Fourier series, Fourier transforms, and Laplace transforms. Students will also study discrete-time signals, difference equations, and discrete-time Fourier transform. Students will explore course concepts in integrated laboratory experiments which include design projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2352 and (MATH 2041, MATH 2941, or 'Y' in METW)

ECE 3522. Stochastic Processes in Signals and Systems. 3 Credit Hours.

To provide the student with an understanding about probability, random variables and random processes and their applications to linear systems. Therefore, the student will learn about the various aspects of probability such as distribution and density functions, conditional probability and various types of random processes such as stationary and nonstationary, ergodic and random processes, the autocorrelation and crosscorrelation, power spectral density, white noise and frequency domain analysis of random signals and their evaluation in linear systems analysis.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 3512.

ECE 3612. Processor Systems. 3 Credit Hours.

The course focuses on the Atmel 8-bit processor hardware/software architecture through both assembly language programming and C language and its hardware system implementation using the Atmel 324PB microcontroller. Emphasis will be on both C and assembly languages and how they interact with I/O ports and memory. Additional topics include memory addressing modes, stack operations, arithmetic computations, logic operations, subroutine calls, input/output (I/O) interfacing, interrupts, timers, pulse width modulation, A/D conversion, stepper motor control and if time allows I2C protocol. The hybrid flipped/lecture material is supplemented by coordinated homework augmented with videos and in class assignments in both microcontroller simulations and hardware assignments using Atmel Studio 7.0 and the AVR 324PB microcontroller.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in ECE 2612 (C- or higher), ECE 2613, and ECE 3613 (may be taken concurrently)

ECE 3613. Processor Systems Laboratory. 1 Credit Hour.

This Junior ECE course is the corresponding laboratory for ECE 3612 Processor Systems. The laboratory assignments utilize Atmel AVR microcontroller simulations using Atmel Studio 6.1 and hardware experiments with the Atmel 169P Butterfly microcontroller. Labs will cover reading and writing to memory, stack operations, LED's on I/O ports, PWM for servo motor control, timers and counters.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3612 (may be taken concurrently)

ECE 3614. Printed Circuit Board Design. 3 Credit Hours.

The course introduces students to manufacturing and soldering techniques used in the design of Printed Circuit Boards (PCBs). The design of PCBs will center around using the KiCad Electronic Design Automation (EDA) tool. KiCad will be used to design 1-and 2-layer PCBs from electronic schematic capture followed by the board layout and track routing techniques. Students will gain hands-on experience in the manufacturing process by populating and soldering components to the PCB. Students will learn industry standard design and measurement techniques allowing them to construct PCBs that use both Surface Mounted Devices (SMD) and Plated Thru-Hole (PTH) components.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3612 (may be taken concurrently) and ECE 3613 (may be taken concurrently)

ECE 3622. Embedded System Design. 3 Credit Hours.

This course and co-requisite laboratory considers embedded systems in digital process control and digital signal processing using the Verilog hardware description language and behavioral synthesis using the programmable gate array. Topics include: the controller-datapath construct, nested modules, soft core processing elements, fixed and floating point arithmetic calculations in programmable hardware, interfacing to hard core peripherals and soft core microprocessors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3612, ECE 3613, and ECE 3623 (may be taken concurrently)

ECE 3623. Embedded System Design Laboratory. 1 Credit Hour.

Laboratory for ECE 3622 (0245): Embedded System Design.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3622 (may be taken concurrently)

ECE 3712. Introduction to Electromagnetic Fields and Waves. 3 Credit Hours.

Engineering applications of electromagnetic field theory including Coulomb's Law, Gauss' Law and Faraday's Law and applications of Poisson's equations with boundary values, Magnetic flux and the use of Gauss' and Ampere's Laws. The course will also consider transmission lines, the development of Maxwell's equations and the transmission of plane waves in free space and uniform, homogenous, isotropic media.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 1062, (ECE 2322 or ECE 2332), and (ENGR 2011 or MATH 2101)

ECE 3722. Electromagnetic Wave Propagation. 3 Credit Hours.

This course considers the application of the time-harmonic Maxwell's equations to electromagnetic wave propagation, transmission lines, wave guides, antenna, and methods for numerical analysis. Matlab and computer aided design software is used for simulation of electromagnetic wave propagation in engineering applications.

Co-requisites: ECE 3723.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3712.

ECE 3723. Electromagnetic Wave Propagation Laboratory. 1 Credit Hour.

Laboratory for ECE 3722 (0222): Electromagnetic Wave Propagation.

Co-requisites: ECE 3722.

Repeatability: This course may not be repeated for additional credits.

ECE 3732. Electromechanical Energy Systems. 3 Credit Hours.

Fundamentals of electromechanical energy conversion, electromechanical devices, and systems. Energy state functions, force-energy relationships, basic transducers, and introduction to AC and DC machines. DC motors and generators, synchronous motors and generators, induction motors, and transformers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 3733 (D- or higher; may be taken concurrently), (ECE 2322, ECE 2332, or ECE 2112), and (ECE 2323, ECE 2333, or ECE 2113)

ECE 3733. Electromechanical Energy Systems Laboratory. 1 Credit Hour.

This course provides hands-on experience on various types of electrical machines, such as DC and AC motors and generators, and transformers. Experiments include operation of transformers, motors and generators, control of motor speed, and loading of generators. Computer data acquisition system is utilized for interface.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 3732 (D- or higher; may be taken concurrently) and (ECE 2333, ECE 2323, or ECE 2113)

ECE 3822. Engineering Computation II. 3 Credit Hours.

The primary goal for this course is to teach engineers how to solve problems of scale using a variety of computer tools. The three main goals of this course are: (1) introduce students to the hierarchy of software tools (e.g., scripting languages, interpreted languages, compiled languages) used to solve engineering problems; (2) introduce the basics of Python, a scripting language that is a dominant tool in engineering; and (3) introduce Java, object-oriented design, and a number of Java-related software tools that automate testing, documentation and cross-compilation into web applications. A common thread throughout these topics is the decomposition of large-scale problems into smaller problems that can be solved using reusable modules. Good software engineering practices will be stressed throughout the course. The latter part of the course will involve developing a significant computer simulation of a real-world engineering system that involves real data and utilizes both Python and Java.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CIS 1057 or ECE 1111) and ENGR 2011.

ECE 3824. Engineering Computation III. 3 Credit Hours.

Electrical and computer engineers are increasingly interacting with the Internet as part of the technology development process. This requires a complex set of software skills that includes knowledge of operating systems and cloud computing, web programming and graphical user programming. Engineers today are also expected to participate in large software development projects that use integrated development environment tools to interact with Internet-based code repositories and agile development methodologies. In this project-based course, students will learn how to (1) work in a cloud-based environment using the Linux operating system, (2) develop complex software systems using object-oriented design in C++, (3) program using interpretive languages such as Python, (4) develop user interfaces and Internet-aware software using Python, and (5) manage complex software projects using contemporary tools such as GitHub and Taiga.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 1111 or CIS 1057)

ECE 3912. Honors Signals: Continuous and Discrete. 4 Credit Hours.

This course covers continuous time signal models, convolution, and superposition integral and impulse response. Students also study Fourier series and periodic signals, Parseval's theorem, energy spectral density, Fourier transform and filters, discrete time signals, difference equations, Z transforms, and discrete convolution. This honors course will be very challenging.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 2322 or ECE 2332)

ECE 3914. Honors Microprocessor Systems. 3 Credit Hours.

Students study finite-state machines in process control, assembly language programming of the Intel i186EX 16-bit microprocessor and its hardware system implementation. Additional topics include: dynamic RAM read/write and DMA access, hardware interrupts, I/O port addressing, peripheral interface design, microprocessor addressing modes, op codes, and arithmetic computation. A stimulating and challenging Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 2612, ECE 2613 (D- or higher), (ECE 2922 or ECE 2332), and ECE 3915 (D- or higher; may be taken concurrently)

ECE 3915. Honors Microprocessor Systems Lab. 1 Credit Hour.

This course is the hardware and software laboratory in microprocessor systems.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3914 (may be taken concurrently)

ECE 3916. Honors Signals and Systems. 5 Credit Hours.

This course is the third in a three-course sequence intended to provide students with foundational knowledge and skills in electrical and computer engineering. In this third course, students will build on concepts learned in Circuits and Electronics I and II to analyze and design signals and systems. Analysis techniques include impulse response, convolution, Fourier series, Fourier transforms, and Laplace transforms. Students will also study discrete-time signals, difference equations, and discrete-time Fourier transform. Students will explore course concepts in integrated laboratory experiments which include design projects. This honors course will require students to complete a more in-depth design for these projects.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 2352 and (MATH 2041, MATH 2941, or 'Y' in METW)

ECE 4110. Special Topics. 1 to 4 Credit Hour.

Topics vary by semester. See the course schedule for the specific topic each semester.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Civil Engineering, Electrical Engineering, Engineering, Mechanical Engineering.

Repeatability: This course may be repeated for additional credit.

ECE 4176. Senior Design Project I: ECE. 3 Credit Hours.

This is the designated discipline-specific design course for the BSEE program which will be taken in the senior year. It is the first course of a two-semester senior design sequence intended for electrical engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects within a team. The goals for this course will be for each team to build a prototype, measure system performance, and communicate results to peers, sponsors, and faculty. At completion of ECE 4176, students will have the flexibility to continue with the same topic or choose a completely new topic in the follow-on course ENGR 4296: Capstone Senior Design Project. Project requirements for ENGR 4296 will be adjusted depending on whether students elected to continue with the same topic or choose a new topic.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (ECE 3612 or ECE 3914), (ECE 3613 or ECE 3915), (ECE 3412, ECE 3522, ECE 3622, ECE 3712, or ECE 3822), and (ECE 3512 (C- or higher), ECE 3912 (C- or higher), ECE 3516 (C- or higher), or ECE 3916 (C- or higher))

ECE 4312. Microelectronics II. 3 Credit Hours.

This course emphasizes solving software design problems as well as advanced study of electronic devices and their application to linear, non-linear, and digital circuits. Further topics include: transistors, FET's filters, oscillators, amplifiers, A/D, D/A, some integrated circuits, and VLSI systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3312.

ECE 4322. VLSI Systems Design. 3 Credit Hours.

This course introduces the hierarchical design methodology of VLSI and the study of basic logic elements and design methods in MOS and CMOS, as well as the physics of MOS devices and the fabrication process. Design rules and computation of circuit parameters from layout, and system level design are further topics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 3312.

ECE 4412. Modern Control Theory. 3 Credit Hours.

Analysis and design of control systems using state variable techniques, including discrete and continuous state variable analysis, linear vector spaces, eigenvalues, eigenvectors, controllability, observability, stability, state feedback design, and observer design.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3412.

ECE 4422. Digital Control Systems. 3 Credit Hours.

Subjects for this course include: discrete data and digital control systems, signal conversions and processing, the Z transform and state variable techniques applied to digital control system, time and frequency domain analysis techniques, stability of digital control systems, etc. The students are required to design and implement a digital control system in groups and are assigned with different tasks.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3412.

ECE 4442. Introduction to Engineering Optimization. 3 Credit Hours.

Optimization aims at maximizing or minimizing an objective in the presence of complicating constraints. This course will cover fundamental concepts and methods in optimization and their applications in engineering systems. The focus will be on linear and nonlinear systems of equations, unconstrained optimization, equality-constrained optimization, and inequality-constrained optimization, with applications in engineering systems. Topics include formulation of nonlinear optimization problems, optimality conditions for convex optimization, review of classical optimization techniques, and illustrative examples from various fields of engineering. The goal is to maintain a balance between theory, numerical computation, problem setup for solution by optimization software, and applications to engineering systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW) and ENGR 2011.

ECE 4512. Digital Communication Systems. 3 Credit Hours.

This course and co-requisite laboratory considers techniques of digital signaling and data communication with amplitude, frequency and phase modulation and demodulation in the presence of noise using MATLAB/Simulink simulation. Topics include: the optimum correlation receiver in baseband and bandpass systems, binary and multiple level signaling, time and frequency division multiplexing, error detection and correction, analog-to-digital conversion and traditional analog amplitude and frequency modulation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3522 and ECE 4513 (may be taken concurrently)

ECE 4513. Digital Communication Systems Laboratory. 1 Credit Hour.

Laboratory for Electrical Engineering 4512: Digital Communication Systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 4512 (may be taken concurrently)

ECE 4522. Digital Signal Processing. 3 Credit Hours.

Course topics include: Discrete-time signals and systems, Random signals, Sampling process, Digital processing of analog signals, Discrete-time Fourier Transforms (DTFT), Filter types and characteristics, Filter design, Finite Impulse Response (FIR) systems, linear phase FIR filters, Infinite Impulse Response (IIR) systems, Discrete Fourier Transforms (DFT), Fast Fourier Transform (FFT), Circular convolution, Transfer functions, and Applications of digital signal processing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3522.

ECE 4526. Introduction to Computer Intrusion and Detection of Cyber Physical Security. 3 Credit Hours.

This is an introductory course to computer and system intrusion and detection techniques for cyber physical security (CPS). Students will learn hardware/firmware security and hardware reverse engineering, gaining theoretical and practical knowledge to analyze critical security vulnerabilities of Industrial Control Systems (ICS), in wired and wireless environment - the backbones of any cyber physical systems. Students will learn case studies from actual ICS attacks and run hands-on exercises and tools of being all the 'hats' - red, blue, and white.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor Sci in Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 4532.

ECE 4527. Introduction to Machine Learning and Pattern Recognition. 3 Credit Hours.

Pattern recognition theory and practice is concerned with the design, analysis, and development of methods for the classification or description of patterns, objects, signals, and processes. At the heart of this discipline is our ability to infer the statistical behavior of data from limited data sets, and to assign data to classes based on generalized notions of distances in a probabilistic space. Many commercial applications of pattern recognition exist today, including voice recognition, fingerprint classification, and retinal scanners. Recent developments in statistical modeling using deep learning have accelerated the growth of pattern recognition applications. The objective of this course is to introduce fundamental methods of pattern recognition, both statistical and neural, with examples from several application areas.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 3512 or ECE 3912) and ECE 3522.

ECE 4528. Introduction to Cryptography for Cyber Physical Security. 3 Credit Hours.

This is an introductory course to the theory and practice of cryptography used in security for cyber physical systems or Cyber Physical Security (CPS). Cyber physical systems are built upon Industrial Control Systems (ICS) and have a unique set of challenges with the need to support security in three key operations: real-time protection, SCADA (supervisory control and data acquisition), and engineering access (event log). The course starts with cryptography foundations and principles. The course then covers various cryptographic primitives, algorithms, intrusion attacks, security protocols, crypto devices and hardware, government standards, and case studies, specific for CPS needs.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor Sci in Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 4532.

ECE 4532. Data and Computer Communication. 3 Credit Hours.

This course considers wired and wireless data transmission, communication networks and protocols, error detection and correction coding, spread spectrum modulation and demodulation. Topics include protocol architectures, flow and error control, multiplexing, code division multiple access 4G LTE cellular systems and embedded Ethernet.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ECE 3522 (D- or higher) and (CIS 1057 or ECE 1111)

ECE 4542. Telecommunications Engineering. 3 Credit Hours.

This course considers digital data communication with complex modulation and error detection and correction in the presence of noise using MATLAB/Simulink simulation. Topics include: quadrature amplitude and continuous phase modulation, frequency hopping and spread spectrum modulation, linear, block, cyclic, convolutional and CRC codes, fading and multipath interference, Doppler shift in mobile environments and the performance of cellular and wireless communication systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 4512.

ECE 4574. Introduction to Cisco Certificate Preparation. 3 Credit Hours.

This course introduces/prepares students to become certified as a Cisco Certified Entry Network Technician (CCENT). CCENT-certified professionals have the knowledge and skill to install, operate, and troubleshoot a small enterprise branch network, including basic network security. The course includes a hands-on lab equipped with Cisco networking equipment, access to the powerful Cisco Packet Tracer networking simulation software, as well as access to the online courses at Cisco Networking Academy. Students who complete the online curricula will receive a discount voucher to reduce the cost of the CCENT exam. Students who wish to prepare to become certified in the Cisco Certified Networking Associate program may take other follow-up courses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ECE 4532 (may be taken concurrently)

ECE 4612. Advanced Processor Systems. 3 Credit Hours.

This course focuses on Verilog hardware description language and its applications to digital hardware system design including CPU and memory, as well as synchronous and asynchronous events and multitasking in the design of computational and data communication processors. The course will also consider computer-aided-design software and simulators, and hardware description language compilers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 3612 and ECE 3613.

ECE 4712. Power System Analysis. 3 Credit Hours.

This course introduces the modern power systems and its changing landscape. Topics include the basics of power generation, transmission and distribution, power flow, economic dispatch, transient and stability analysis, short circuit analysis, and HVDC systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 2322 or ECE 2332)

ECE 4722. Power Electronics. 3 Credit Hours.

This course introduces the basics of power electronic circuits and their applications in modern power systems. Topics include converters and inverters, and their applications in power systems. Course material covers DC-DC converters in buck and boost topologies, and their analysis; AC-DC rectification and control; DC-AC inverters and their applications in voltage and frequency control; three-phase inverters and HVDC transmission. This course will use Matlab/Simulink simulation for student projects and homework.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((ECE 2332 and ECE 2333), (ECE 2112 and ECE 2113), or (ECE 2322 and ECE 2323))

ECE 4822. Engineering Computation IV. 3 Credit Hours.

In this course, students will study the implementation of parallel processing algorithms on graphics processing units (GPUs). This course has three main components: an overview of processor architectures, a study of parallel algorithms and hands-on experience with programming Nvidia GPUs using popular software libraries such as CUDA. Students will be expected to program in C/C++ and Python and have experience with the Linux operating system.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECE 3822 or CIS 2168)

Electrical Engineering Technology (EET)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

EET 2104. Introduction to Electrical Circuits. 4 Credit Hours.

This course considers electrical and physical characteristics of resistance, inductance, and capacitance, analysis of DC and AC circuits, operational amplifiers, elements of semiconductor devices, electronic circuits, and logic circuits. Students will also study electrical measurements. A laboratory is included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 1022.

EET 2112. Elements of Electrical Engineering Technology I (DC Circuits). 4 Credit Hours.

A non-calculus approach to DC circuits, node and mesh analysis, superposition and Thevenin's Theorem, as well as power, electromechanical systems and transient analysis. The laboratory portion of this course allows students to undertake practical applications of the principles discussed in the lecture. NOTE: Offered at Lehigh Carbon County College campus only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 1022.

EET 2122. Elements of Electrical Engineering Technology II (AC Circuits). 4 Credit Hours.

Circuit analysis of alternating current circuits. Examine RC, RL, and RLC circuits as well as resonance and time response of reactive circuits and transformers. The laboratory portion of this course requires students to build basic circuits and check circuit operation with oscilloscopes. Further checks on circuit performance are done with computer software simulations of circuits covered in the lecture. NOTE: Offered at Lehigh Carbon County College campus only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in EET 2112.

EET 3276. Digital Logic Circuits. 4 Credit Hours.

This course covers: number systems, codes, and truth tables; logical hardware devices such as gates, inverters, tristate logic, flip-flops, and latches; digital circuits such as arithmetic units, comparators, code converters, ripple and ring counters, and shift registers; and design of combinational and sequential digital circuits. XILINX will be used. A laboratory is included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in EET 2112.

EET 3277. Microcomputer Systems. 4 Credit Hours.

Topics in this course include: finite-state machines in process control; assembly language programming of the WDC 65816 16 bit microprocessor and its hardware system implementation; dynamic RAM read/write and DMA access; hardware interrupts; I/O port addressing and peripheral interface design; microprocessor addressing modes; op codes; and arithmetic computation. A laboratory is included.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in EET 3276.

EET 3278. Digital Logic Circuits & Microprocessors. 4 Credit Hours.

This course is the study of basic circuits common to digital logic circuits such as gates, flip-flops, counters, and arithmetic circuits. Also included are mathematical concepts such as Boolean algebra. Students also study finite-state machines in process control, assembly language programming of the WDC 65816 16 bit microprocessor and its hardware system implementation. Additional topics include: dynamic RAM read/write and DMA access, hardware interrupts, I/O port addressing, peripheral interface design, microprocessor addressing modes, op codes, and arithmetic computation. The lab runs concurrently with the lecture and provides students an opportunity to learn and prove digital and microprocessor concepts by experimentation. NOTE: Offered at Lehigh Carbon County College campus only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in EET 2112.

Elementary Education (ELED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ELED 3287. Practicum: Teaching Elementary Children N-6. 2 to 3 Credit Hours.

Practicum experience supervised by college personnel at educational centers designed to provide students with experience in working with elementary school children and other school personnel. NOTE: Students must not register for any other classes before 1 p.m. on Tuesdays.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ENEE 3297.

Repeatability: This course may be repeated for additional credit.

ELED 3387. Practicum: Teaching Math/Science to Elementary Children N-6. 2 to 3 Credit Hours.

Practicum experience supervised by university personnel at educational centers designed to provide students with experience in working with elementary school children and other school personnel; focuses on math/science. NOTE: Students must not register for any other classes before 1 p.m. on Tuesdays.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: MAEE 3141, SCEE 3151.

Repeatability: This course may be repeated for additional credit.

Engineering (ENGR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENGR 1001. College of Engineering First Year Seminar. 1 Credit Hour.

This course will focus on helping first-year engineering students develop the skills needed to effectively transition to college life in their engineering program at Temple University. The course is designed to provide students with an introduction to valuable and functional time management skills, goal setting, study and test-taking strategies and career and professional development skills necessary for success in engineering. The course will also focus on student engagement by introducing students to experiential education, student professional organizations, research opportunities, and other social activities within the College of Engineering and Temple community. NOTE: Registration for this course is restricted to first year students enrolled in the College of Engineering.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

ENGR 1101. Introduction to Engineering & Engineering Technology. 3 Credit Hours.

Provides an understanding of the study and practice associated with bioengineering, civil, electrical, mechanical engineering and technology disciplines. Understand the importance of good communications and teamwork skills in a successful engineering and technology career. Understand the basics of problem solving and design. Discipline-specific labs.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

ENGR 1102. Introduction to Engineering Problem Solving. 3 Credit Hours.

This course is designed to introduce students to important computational skills and tools that will provide the basis for future work and study in engineering. The overall theme of the course will focus on the role of the computer in engineering problem solving and analysis. Students will learn the fundamentals of algorithmic thinking, program design, program development, debugging, and critical analysis of the suitability of different techniques for different problems. Applications to problems in engineering analysis with topics selected from the engineering degree programs offered.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 1101 or ENGR 1901)

ENGR 1103. Introduction to Mathematical Modeling for Engineers. 4 Credit Hours.

This course will provide an overview of the salient math topics most heavily used in the core sophomore-level engineering courses. These include algebraic manipulation of engineering equations, trigonometry, vectors and complex numbers, sinusoids and harmonic signals, systems of equations and matrices, differentiation, integration and differential equations. All math topics will be presented within the context of an engineering application, and reinforced through extensive examples of their use in the core engineering courses.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1021, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in CRMA04, or 'Y' in MC6T)

ENGR 1117. Engineering Graphics. 2 Credit Hours.

Computer-aided geometrical construction, solids modeling, charts, orthographic and isometric drawings, dimensioning, auxiliary views, sectioning, geometric tolerancing, and elementary drafting problems.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

ENGR 1185. Internship Experience I. 1 to 4 Credit Hour.

Work experience in industry, governmental agencies, or educational institutions is arranged through the Director of Career Services in the College of Engineering. The course is for one semester of work experience. Letter from supervisor and report by student are required.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ENGR 1901. Honors Introduction to Engineering. 3 Credit Hours.

Provides a high level understanding of the study and practice associated with bioengineering, civil, electrical, mechanical engineering and technology disciplines. Understand the importance of good communication and teamwork skills in a very successful engineering and technology career. Understand the fundamentals of problem solving and design. Discipline-specific labs.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ENGR 2011. Engineering Analysis & Applications. 3 Credit Hours.

This course introduces applications of linear algebra for solving engineering problems from theoretical, analytical, and computer-based perspectives. Topics include linear matrix equations with engineering applications, vector and matrix operations, rank and determinant, matrix inversion, linear independence, eigenvalues and eigenvectors, rectangular and polar representations of complex numbers, and complex number algebra. Engineering applications of various concepts are emphasized. Modern appropriate software tools will be utilized to aid in solving these mathematical problems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1942, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in METW), ENGR 1102, and ENGR 2013 (may be taken concurrently)

ENGR 2013. Engineering Analysis and Applications Lab. 1 Credit Hour.

This is a supplementary computer laboratory course for ENGR 2011 Engineering Analysis and Applications. Modern appropriate software tools will be utilized to aid in solving mathematical problems studied in ENGR 2011.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW), ENGR 1102, and ENGR 2011 (may be taken concurrently)

ENGR 2101. Professional Development Seminar for Engineers. 1 Credit Hour.

The purpose of this course is to help prepare students for engineering internship, research, Co-Op, and job search processes and experiences. Guided by the National Association of Colleges and Employers (NACE) career readiness and competencies framework the course will help students gain, refine, and demonstrate requisite skills necessary for a successful transition into the professional work environment.

Repeatability: This course may not be repeated for additional credits.

ENGR 2181. Co-Op Work Experience I. 3 Credit Hours.

Each is a prerequisite to the course that follows. Full time work experience in industry, governmental agencies, or educational institutions is arranged through the co-op coordinator of the College of Engineering (15 weeks, 40 hours/week). Students are considered as academically full-time during work periods.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ENGR 2185. Internship Experience II. 1 to 4 Credit Hour.

Work experience in industry, governmental agencies, or educational institutions is arranged through the Director of Career Services in the College of Engineering. The course is for one semester of work experience. Letter from supervisor and report by student are required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in ENGR 1185.

ENGR 2196. Technical Communication. 3 Credit Hours.

Technical Communication prepares students for their capstone Senior Design project and professional communication as engineers. This course emphasizes technical research and source evaluation, audience-specific writing, accuracy, and clarity. Responsible engineering is a core component, particularly current events, the impact of engineering, and ethical decision-making. Students are encouraged to explore areas of personal interest for the term paper, which can be used as a writing sample or draft for later publication.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1031 (may be taken concurrently), 'Y' in MATW, or 'Y' in METW) and (PHYS 1061 (may be taken concurrently), PHYS 2021 (may be taken concurrently), PHYS 2921 (may be taken concurrently), or PHYS 1021 (may be taken concurrently))

ENGR 2331. Engineering Statics. 3 Credit Hours.

You will learn fundamental concepts that are used in every engineering discipline: vector mechanics of concentrated and distributed forces, moments, Free Body Diagrams, static analyses of trusses, frames and machines, internal forces and moments, frictional systems, centroids, and moments of inertia.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1031, 'Y' in MATW, or 'Y' in METW) and (PHYS 1061, PHYS 2021, PHYS 2921, or PHYS 1021)

ENGR 2332. Engineering Dynamics. 3 Credit Hours.

A vector approach to the study of the rectilinear and curvilinear motion of particles and rigid bodies as described by rectangular, polar, and path coordinates and the study of the forces that produce such motion as described through the application of Newton's second law of motion, work-energy relationships, and impulse and momentum principles, including rigid body rotation and relative motion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2331 or ENGR 2931)

ENGR 2333. Mechanics of Solids. 3 Credit Hours.

Classical approach to axial stress and strain, torsion, bending, combined stress, biaxial stress, deflection of beams and frames, elastic strain energy, pressure vessels, column stability, and buckling.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2331 or ENGR 2931)

ENGR 2334. Engineering Statics/Dynamics. 3 Credit Hours.

Vector mechanics of force and moment systems in two and three dimensions, free body diagrams and the static equilibrium of structures, centroids, area and mass of the rectilinear and curvilinear motion of particles as described by rectangular, polar and path coordinates and the study of the forces that produce such motion using Newton's second law of motion, work-energy relationships, and impulse-momentum techniques. An overview of rigid body rotation is presented.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MATW, or 'Y' in METW) and (PHYS 1021 or PHYS 1061)

ENGR 2335. Mechanics I. 3 Credit Hours.

A vector mechanics study of STATICS: free body diagrams, equilibrium, resultant force/couple systems, reaction forces and couples on 2-D and 3-D systems, member forces in trusses; and DYNAMICS: kinematics and kinetics of particles.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1042 (may be taken concurrently), MATH 1942 (C or higher; may be taken concurrently), MATH 1951 (C or higher; may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA11, or 'Y' in METW) and (PHYS 1061 (may be taken concurrently), PHYS 2021 (may be taken concurrently), PHYS 2921 (may be taken concurrently), PHYS 1062 (may be taken concurrently), PHYS 2022 (may be taken concurrently), PHYS 2922 (may be taken concurrently), any PHYS course numbered 2101 to 2701 (may be taken concurrently), any PHYS course numbered 3101 to 3701 (may be taken concurrently), or any PHYS course numbered 4101 to 4796 (may be taken concurrently))

ENGR 2336. Mechanics II. 3 Credit Hours.

A vector mechanics study of STATICS: centroids, moments of inertia, shearing force and bending moment diagrams, frictional systems; and DYNAMICS: the rectilinear and curvilinear motion, rigid bodies as described by rectangular, polar and path coordinates and the study of the forces that produce such motion as described through the application of Newton's second law of motion, work-energy relationships, and impulse and momentum principles, including rigid body rotation and relative motion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ENGR 2335.

ENGR 2900. Honors Special Topics. 3 Credit Hours.

Variable Honors offerings on special topics that are not part of the standard roster of courses. Check with the College of Engineering office for details on Special Topics courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENGR 2931. Honors Engineering Statics. 3 Credit Hours.

Vector mechanics of force and moment systems in two and three dimensions, freebody diagrams and the static equilibrium of structures, centroids, moments of inertia, frictional systems, shearing force, and bending moment diagrams. This honors class will be held to high standards.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MATW, or 'Y' in METW) and (PHYS 1061, PHYS 2021, or PHYS 2921)

ENGR 2933. Honors Mechanics of Solids. 3 Credit Hours.

Classical approach to axial stress and strain, torsion, bending, combined stress, biaxial stress, deflections of beams and frames, elastic strain energy, pressure vessels, column stability, and buckling. Very challenging honors course.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2931.

ENGR 2996. Honors Technical Communication. 3 Credit Hours.

This course prepares engineering and other STEM honors students for the technical writing and related communications they will generate in subsequent courses and professionally. (The growing interdisciplinarity of engineering projects has prompted this invitation to other STEM majors. But note that this course teaches communication topics generically - not specialized terminologies, document types, or writing styles.) Writing skills emphasized in the course include finding and properly using technical research sources, responding to the needs of diverse audiences, ensuring accuracy and clarity, and automating documents for efficient maintainability. Students are encouraged to put extra effort into their self-designed main paper to increase its value as a professional writing sample and perhaps even for publication. The course also readies students for responsible professional practice by having them analyze relevant news developments, project impacts, and ethical challenges.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1031 (may be taken concurrently), 'Y' in MATW, or 'Y' in METW) and (PHYS 1021 (may be taken concurrently), PHYS 1061 (may be taken concurrently), PHYS 1961 (may be taken concurrently), PHYS 2021 (may be taken concurrently), PHYS 2921 (may be taken concurrently), CHEM 1031 (may be taken concurrently), CHEM 1035 (may be taken concurrently), or CHEM 1951 (may be taken concurrently))

ENGR 3001. Engineering Economics. 3 Credit Hours.

The objectives of the course are to apply economic theory to design, planning and execution of engineering problems and projects. This course focuses on modern economic theories such as behavioral economics and random theory to provide engineering students with the decision-making skills necessary to evaluate the economic feasibility of investment projects. As the capital outlays may be significant and affect the productive potential of a firm over the long term, it is important to understand the time value of money and how it may be impacted by parameters such as climate change. The course emphasizes on measurements of economic worth, after tax cash flow analysis, replacement analysis, and supplemental analysis; including break even, sensitivity, and risk analysis. A final project consisting of evaluating a real-world investment project is performed and submitted as a report and presented at the end of the course.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

ENGR 3033. Entrepreneurial Engineering. 3 Credit Hours.

The course is specifically designed to introduce students to the ideas and concepts of entrepreneurship; to help students recognize the entrepreneurial potential within themselves and others in their environment; link the entrepreneur's spirit with the engineer's mind and discipline; give the students the understanding of the opportunities and challenges facing any entrepreneur from the start up through running and growing a business; and create an understanding of the role of technology in developing the students' understanding of all the different opportunity paths that are available in today's economic and global environment. Students will develop an awareness of how to detect, understand, and develop product and/or service opportunities; understand and master the different business, legal, regulatory and human challenges that confront any business every day; understand the basic accounting, marketing, sales, negotiating, communication, intellectual property and analytical tools of business and how to apply them; understand how to decipher and learn from case studies; and learn the importance of and the creation of a business plan and how to use it to raise money and/or support for their business venture.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

ENGR 3077. Simulation of Linear and Nonlinear Engineering Systems. 3 Credit Hours.

A first course on the theory and engineering applications of mathematical modeling of linear and nonlinear systems. Building mathematical models from essential laws, the role of assumptions, development of governing equations, dimensional analysis, solutions of fundamental equations, computer programming using Maple, simulation, effect of parameter estimation, forecasting, graphical systems analysis, model verification, and validation.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2043 (may be taken concurrently) or 'Y' in METW)

ENGR 3117. Computer-Aided Design (CAD). 3 Credit Hours.

Introduction to Computer-Aided Design (CAD) using the state of the art ANSYS finite element program. The focus is to train students to perform advanced two- and three- dimensional solid modeling/stress analysis using ANSYS finite element software for solving and designing complex mechanical structures. It is expected that before taking this course, students have fundamental understanding of statics, dynamics, and solid mechanics concepts. Design projects will be given where students will have to design, analyze, and manufacture structural designs.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ENGR 1117 (D- or higher) or MEE 1117 (D- or higher)), (ENGR 2333, ENGR 2933, or BIOE 3312), and (MEE 3011 (D- or higher) or Complete the following: (ENGR 2332 or BIOE 2312), (MATH 2101, ENGR 2011, or MEE 2011), and (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW))

ENGR 3181. Co-Op Work Experience II. 3 Credit Hours.

Each is a prerequisite to the course that follows. Full time work experience in industry, governmental agencies, or educational institutions is arranged through the co-op coordinator of the College of Engineering (15 weeks, 40 hours/week). Students are considered as academically full-time during work periods.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in ENGR 2181.

ENGR 3185. Internship Experience III. 1 to 4 Credit Hour.

Work experience in industry, governmental agencies, or educational institutions is arranged through the Director of Career Services in the College of Engineering. The course is for one semester of work experience. Letter from supervisor and report by student are required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in ENGR 2185.

ENGR 3201. Material Science for Engineers. 3 Credit Hours.

Atomic and molecular structures, bonding and interatomic forces, thermodynamics and kinetics of solid reactions, mechanical, electronic, and magnetic properties of solids.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 2022, or PHYS 2922), (CHEM 1031, CHEM 1035, or CHEM 1951), and (ENGR 2333 (may be taken concurrently) or ENGR 2933 (may be taken concurrently))

ENGR 3281. Co-op Experience I. 3 Credit Hours.

Students will research Co-op opportunities, receive the Director's approval for the specific Co-op, set up interviews, and obtain a position and work a minimum thirty-five hours a week during the 14-week term for the three credit hours in a professional environment related to the careers they might have an interest. Students are responsible for preparing themselves for the professional experience in consultation with the Director of the Co-op program. There will be a number of sources to choose from, including approved opportunities maintained on file in the Director's office, student generated or discovered opportunities for which student must receive prior approval and opportunities with established commercial, engineering and professional organizations approved by the Director. Students may take Co-op experiences with different entities but are encouraged to repeat professional experiences with the same organization.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ENGR 3334. Mechanical Systems. 3 Credit Hours.

This course considers the fundamentals of mechanics including statics, dynamics, materials, thermodynamics and fluid mechanics and their application to systems of beams, pulleys, gear trains, levers exhibiting vibration, heat conduction, convection and expansion and fluid flow.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Elec Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 1062 and (MATH 2043 or 'Y' in METW)

ENGR 3381. Co-op Experience II. 3 Credit Hours.

Students will research Co-op opportunities, receive the Director's approval for the specific Co-op, set up interviews, and obtain a position and work a minimum thirty-five hours a week during the 14-week term for the three credit hours in a professional environment related to the careers they might have an interest. Students are responsible for preparing themselves for the professional experience in consultation with the Director of the Co-op program. There will be a number of sources to choose from, including approved opportunities maintained on file in the Director's office, student generated or discovered opportunities for which student must receive prior approval and opportunities with established commercial, engineering and professional organizations approved by the Director. Students may take Co-op experiences with different entities but are encouraged to repeat professional experiences with the same organization.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in minimum GPA of 2.5 in: ENGR 3281.

ENGR 3553. Mechanics of Fluids. 3 Credit Hours.

General physical properties of fluids. Fluid statics and pressure measurements. Kinematics of fluid motion. Conservation laws in control volume and differential forms with applications. Bernoulli's equation and irrotation flow. Viscous flow in pipes and flow measurements. Boundary layer concepts. Numerical methods. Design project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2332 or BIOE 3312), (MATH 3041 (may be taken concurrently), MATH 3941 (may be taken concurrently), MATH 2041 (may be taken concurrently), MATH 2941 (may be taken concurrently), or 'Y' in METW), and (MATH 2043, MATH 2943, or 'Y' in METW)

ENGR 3571. Classical and Statistical Thermodynamics. 3 Credit Hours.

The study of the concepts, theory, and application of energy and entropy from a classical and statistical viewpoint. NOTE: Special Authorization for Non-Majors. Open to all engineering majors.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062, PHYS 1962, PHYS 2022, or PHYS 2922), (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW), and (CHEM 1031, CHEM 1035, CHEM 1041, or CHEM 1951)

ENGR 3953. Honors Mechanics of Fluids. 3 Credit Hours.

General physical properties of fluids. Fluid statics and pressure measurements. Kinematics of fluid motion. Conservation laws in control volume and differential forms with applications. Bernoulli's equation and irrotation flow. Viscous flow in pipes and flow measurements. Boundary layer concepts. Numerical methods. Design project. This honors course will be held to high standards.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2332 or BIOE 3312), (MATH 3041 (may be taken concurrently), MATH 3941 (may be taken concurrently), MATH 2041 (may be taken concurrently), MATH 2941 (may be taken concurrently), or 'Y' in METW), and (MATH 2043, MATH 2943, or 'Y' in METW)

ENGR 3982. Honors Independent Study. 1 to 4 Credit Hour.

A challenging opportunity to either 1) study an honors course which is not offered during the semester, or 2) study specialized topics not covered in currently available honors courses. High standards are expected of the student by an honors faculty who will supervise.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENGR 4040. Special Topics. 1 to 4 Credit Hour.

A course designed to present new and emerging areas of engineering. The course may also be used to present areas not normally taught in the College. Course requirements vary with the topic and instructor. Offered as needed or as appropriate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may be repeated for additional credit.

ENGR 4101. Fundamentals of Engineering (FE) Examination Review. 1 Credit Hour.

This course will give students the practical and theoretical knowledge to help pass the FE examination. The course provides a comprehensive review of basic science and engineering, theories and applications, advanced topics in civil and mechanical engineering. Problem solving and test taking strategies will be an integral part of the course. The course will provide additional assessment for ABET.

Repeatability: This course may not be repeated for additional credits.

ENGR 4116. Spacecraft Systems Engineering. 3 Credit Hours.

This course will introduce the systems engineering concept through satellite applications. The goals of this course are to introduce: a) systems engineering concepts, b) satellite subsystems, c) astrodynamics, and d) intellectual property. Topics covered will include space environment, dynamics of spacecraft, celestial mechanics, mission analysis, attitude control, systems engineering, and patents.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (MATH 3041, MATH 3941, MATH 2041, MATH 2941, or 'Y' in METW)

ENGR 4121. Design of Experiments. 3 Credit Hours.

The practice of modern science and engineering is synonymous with the ability to plan, design and conduct experiments efficiently and effectively, and analyze the resulting data to obtain objective conclusions in applications ranging from new product design and development to phenomenological/basic science studies. In this course we will focus primarily on methodological and design issues in planning experiments rather than on statistical analysis of the data. Nevertheless, we will briefly review various statistical analysis approaches required for fully designed experiment. Case studies involving single factor experiments, factorial designs, manipulation checks, etc. will be used to develop hands on skills for designing your own experiments. The course will have a focus on engineering approach to design of experiments with a particular emphasis on problem definition, system identification, data collection, statistical analysis, and hypothesis testing. For the final project, you will prepare a fellowship or grant (e.g. NSF GRFP or AHA Predoctoral) application ready for submission to a funding agency.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

ENGR 4169. Engineering Seminar. 1 Credit Hour.

Preparation for entering the professional world of engineering. Includes job placement, professional registration, ethics, professional societies, case studies, and guest speakers.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGR 2196 (may be taken concurrently) or ENGR 2996 (may be taken concurrently))

ENGR 4171. Senior Design Project I for Industrial and Systems Engineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for industrial and systems engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Industrial + Sys Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in ISE 3102, ISE 3103, ISE 4104, CEE 3048 (D- or higher), and ENGR 4169 (D- or higher)

ENGR 4172. Senior Design Project I for Engineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (ECE 2332 (C- or higher) or ECE 2112 (C- or higher)), (ECE 3732, ECE 3722, ECE 3622, or ENGR 3553), and ENGR 4169.

ENGR 4173. Senior Design Project I for Environmental Engineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for environmental engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Environmental Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in CEE 3712, CEE 3715, CEE 3717, (CEE 3727 or CEE 4631), CEE 4721, and ENGR 4169 (D- or higher)

ENGR 4174. Senior Design Project I for Bioengineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for bioengineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in BIOE 3001 (may be taken concurrently), BIOE 3101, BIOE 3102 (may be taken concurrently), BIOE 3201, and ENGR 4169 (D- or higher)

ENGR 4175. Senior Design Project I for Civil Engineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for civil engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Civil Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in CEE 3331, CEE 3332, ((CEE 3411 (D- or higher) and CEE 3412 (D- or higher)) or CEE 3711), ENGR 3553, ENGR 3571, and ENGR 4169 (D- or higher)

ENGR 4176. Senior Design Project I for Electrical Engineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for electrical engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Electrical Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (ECE 3412 or CIS 1068), ECE 3512 (C- or higher), ECE 3522, ECE 3612, (ECE 3712 or ECE 3622), and ENGR 4169 (C- or higher)

ENGR 4177. Senior Design Project I for Mechanical Engineering. 2 Credit Hours.

This is the first course of a two-semester senior design sequence intended for mechanical engineering majors. Students will develop and practice skills and techniques for managing and executing engineering design projects. This includes problem identification, planning of the project, formulation of design specifications, the development and evaluation of alternative conceptual designs, the development of detailed designs and specification of manufacturing processes, prototyping of manufacturing processes, and analysis and documentation of results. At completion, students will present their design process and final design in several formats: oral presentations, poster presentations, web pages, and reports.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Mechanical Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in ECE 2112, (ENGR 3553 (C- or higher) or ENGR 3953 (C- or higher)), ENGR 3571 (C- or higher), ENGR 4169, MEE 3301, and (ENGR 3117 (may be taken concurrently) or MEE 3117 (may be taken concurrently))

ENGR 4181. Co-Op Work Experience III. 1 Credit Hour.

Each is a prerequisite to the course that follows. Full time work experience in industry, governmental agencies, or educational institutions is arranged through the co-op coordinator of the College of Engineering (15 weeks, 40 hours/week). Students are considered as academically full-time during work periods.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in ENGR 3181.

ENGR 4182. Independent Study in Engineering. 1 to 5 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

ENGR 4185. Internship Experience IV. 1 to 4 Credit Hour.

Work experience in industry, governmental agencies, or educational institutions is arranged through the Director of Career Services in the College of Engineering. The course is for one semester of work experience. Letter from supervisor and report by student are required.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in ENGR 3185.

ENGR 4201. Micro- to Nano-sized Machines. 3 Credit Hours.

This course begins with a vision of the present and futuristic nano-machines and micro-factories, as well as a brief review of the crystal structure and types of materials most commonly used to make them. The advantages of shrinking bulk machines to microscopic-to-nanoscale sizes are discussed. The course quantifies 'scaling laws' for various physical properties, and their impact on design and microfabrication considerations. Microfabrication methods are discussed in detail, ranging from hard and soft lithography, to 3d printing. The course classifies various types of actuators and sensors based on thermal, electric, electronic, magnetic, optical, and chemical energy conversion principles; this is followed by their design and microfabrication. The course is supplemented by physical and video demonstrations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGR 3201 or ENGT 3201)

ENGR 4281. Co-Op Work Experience IV. 1 Credit Hour.

Full time work experience in industry, governmental agencies, or educational institutions is arranged through the co-op coordinator of the College of Engineering (15 weeks, 40 hours/week). Students are considered as academically full-time during work periods.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of D- in ENGR 4181.

ENGR 4296. Capstone Senior Design Project. 3 Credit Hours.

In this college-wide capstone design project, College of Engineering seniors, either individually or in (possibly cross-disciplinary) teams, will devise an engineered solution to a well-defined, approved, problem statement selected by the team in the prior semester. The wide variety of projects which may be undertaken include, for example: industry-sponsored case studies, or a student's entrepreneurial-invention idea, or the development of new instrumentation for a faculty's lab; furthermore, the team may choose to continue, refine, or extend a prior-semester's project. The student (or student team) will identify the relevant stakeholders for their engineered solution, create a prototype and/or a comprehensive analysis of their solution, and document their design in a report which meets the needs of the project's stakeholders. The semester will culminate in the college-wide Capstone Design Poster event, with industry sponsors and industrial advisory boards in attendance.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (BIOE 3402, CEE 4446, CEE 4447, ECE 4176, ISE 4176, or MEE 4177)

ENGR 4314. Continuum Mechanics. 3 Credit Hours.

Tensors, Kinematics of Continuum, Stress, Integral Formulations, the Elastic Solid, and the Newtonian Fluid.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW), (MATH 2043, MATH 2943, or 'Y' in METW), and (ENGR 2333 or ENGR 2933)

ENGR 4334. Advanced Dynamical Systems. 3 Credit Hours.

This course focuses on the algebraic and differential equations governing the static and dynamic 3D motion of 3D bodies, including vectors, vector differentiation, and dyads. The equations of motion for multibody systems will be derived using Newton-Euler, Lagrange, and Kane's methods. Computational tools for 3D force and motion analysis will be used to simulate physical systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MEE 3011.

ENGR 4576. Computational Fluid Dynamics. 3 Credit Hours.

Computational Fluid Dynamics (CFD) simulations are an essential element of thermal and fluid engineering design. In this course, students will be introduced to various numerical methods for computing heat transfer and fluid flows. Fundamental topics include discretization, explicit and implicit schemes, finite differencing, and finite volume formulations. Important aspects of industry applications of CFD will also be covered, including grid generation, flow visualization, and turbulence modeling. MATLAB programming and the use of commercially available software will be emphasized.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (ENGR 3553 (C- or higher) or ENGR 3953 (C- or higher)), (ENGR 3117 (may be taken concurrently) or MEE 3117 (may be taken concurrently)), and MEE 4572 (may be taken concurrently)

ENGR 4577. Nanotechnology Solutions for a Sustainable Urban Environment. 3 Credit Hours.

The course will introduce students to the revolutionary field of nanotechnology, where emphasis will be placed on using nanomaterials to the betterment of a sustainable urban environment. Students will be introduced to the remarkable transformation that the mechanical, optical, electrical, and thermal material properties undergo as their dimensions are reduced to the nanoscale. They will also understand the major nanomaterial fabrication techniques such as nanoscale lithography and self-assembly. In addition, students will be introduced to techniques which characterize materials on the nanoscale. The second half of the course will be devoted to applications and potential applications of nanotechnology which will advance urban sustainability. Applications in water purification, transportation, energy and biomedicine will be presented to the students through series of expert lectureships offered by Temple University faculty utilizing nanomaterials in their research laboratories. Students will also carry out laboratory modules devoted to the use of nanomaterials for these applications.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

ENGR 4996. Honors Capstone Senior Design Project. 3 Credit Hours.

In this college-wide capstone design project, College of Engineering seniors, either individually or in (possibly cross-disciplinary) teams, will devise an engineered solution to a well-defined, approved, problem statement selected by the team in the prior semester. The wide variety of projects which may be undertaken include, for example: industry-sponsored case studies, or a student's entrepreneurial-invention idea, or the development of new instrumentation for a faculty's lab; furthermore, the team may choose to continue, refine, or extend a prior-semester's project. The student (or student team) will identify the relevant stakeholders for their engineered solution, create a prototype and/or a comprehensive analysis of their solution, and document their design in a report which meets the needs of the project's stakeholders. The semester will culminate in the college-wide Capstone Design Poster event, with industry sponsors and industrial advisory boards in attendance. For those on the Honors Scholar track, the final report produced in this course may also be submitted as the Honors Scholar Project so long as it meets the Honors Scholar project requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (BIOE 3402, CEE 4446, CEE 4447, ECE 4176, ISE 4176, or MEE 4177)

Engineering (General) (ENGG)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENGG 3385. Diamond Peer Teachers - Internship I. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

ENGG 3386. Diamond Peer Teachers - Internship II. 1 Credit Hour.

The Diamond Peer Teachers Program provides students with a mentored university-level teaching experience in their major. Course requirements include participation in the three-day pre-semester Teaching Institute and regular participation in the Peer Teachers support group throughout the semester. Peer Teachers provide supplemental instruction in first- and second-year courses, promote student engagement, and model successful study habits and academic preparedness for students with whom they work. For Diamond Peer Teachers only.

Repeatability: This course may be repeated for additional credit.

Engineering Technology (ENGT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENGT 2322. Applied Strength of Materials. 3 Credit Hours.

Investigation of the elastic behavior of materials through the study of normal stress, strain, shear, and deformation under centric loading, flexural stress, shear, and deformation under transverse and eccentric loading, torsional stress, combined stress, stress concentration, and the stability of columns.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGT 2331 or ENGR 2331)

ENGT 2331. Applied Engineering Statics. 3 Credit Hours.

Provides an understanding and application of principles of equilibrium of particles and rigid bodies that are subjected to concentrated and distributed forces using vector mechanics. Subjects covered include vector mathematics, force and moment systems in two dimensions, free body diagrams and the static equilibrium of structures, centroids, moments of inertia, frictional systems, shearing force, and bending moment diagrams.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1031 (may be taken concurrently), MATH 1042 (D- or higher; may be taken concurrently), 'Y' in MATW, or 'Y' in METW) and (PHYS 1021 or PHYS 1061)

ENGT 2521. Applied Fluid Mechanics. 3 Credit Hours.

Fluid properties, fluid statics, fluid flow concepts, dynamic similitude, fluid resistance, ideal flow, compressible flow, pneumatic and hydraulic applications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGT 2331 or ENGR 2331)

ENGT 3182. Independent Study in Engineering Technology. 1 to 5 Credit Hour.

Students may complete a regular course during semesters in which the course is not offered to meet prerequisite or graduation requirements. An instructor is assigned to supervise the student.

Repeatability: This course may be repeated for additional credit.

ENGT 3201. Applied Materials Technology. 3 Credit Hours.

Atomic and molecular structures, bonding and interatomic forces, thermodynamics and kinetics of solid state reactions, mechanical and electronic properties.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 or CHEM 1035), (PHYS 1022, PHYS 1062, or PHYS 1962), and (ENGT 2322 (may be taken concurrently) or ENGR 2333 (may be taken concurrently))

ENGT 3323. Applied Dynamics. 3 Credit Hours.

A non-vector approach to the kinematics and kinetics of a particle employing the methods of force-mass acceleration, work-energy, and impulse momentum. Kinematics of rigid bodies in general plane motion using methods of force-mass acceleration and work-energy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (ENGT 2331 or ENGR 2331) and (MATH 1031, MATH 1042 (D- or higher), MATH 1942 (D- or higher), 'Y' in MATW, or 'Y' in METW)

ENGT 3532. Thermodynamics. 3 Credit Hours.

Properties of a substance, work and heat interaction, first law of thermodynamics, carnot cycle, entropy, ideal gases, irreversibility, and efficiency. NOTE: Special Authorization for Non-Technology Majors. Approved for ENGT, MET, CMT, ENVT.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Civil & Construction Eng Tech, Construction Mgt Tech, Engineering Technology, Mechanical Engineering Tech.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1031, MATH 1042 (D- or higher), 'Y' in MATW, or 'Y' in METW) and (PHYS 1022 or PHYS 1062)

ENGT 3651. Manufacturing Control Systems. 3 Credit Hours.

A survey course covering pneumatic and hydraulic controls, programmable controllers, digital circuits, electro-mechanical servos and industrial instrumentation, and transducers. Laboratory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ECE 2112.

ENGT 3652. CAD/CAM/CNC. 3 Credit Hours.

Solids modeling, geometric tolerancing, welds, threads, dimensions, numerical control simulation, and post processing. Basic components of NC systems, coordinate systems, motion control, programming languages, CNC and DNC, laboratory and demonstrations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGR 1117 or MEE 1117)

ENGT 4040. Special Topics. 1 to 5 Credit Hour.

A course designed to present new and emerging areas of engineering technology. The course may also be used to present areas not normally taught in the college. Course requirements vary with the topic and instructor. Offered as needed or as appropriate.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may be repeated for additional credit.

ENGT 4119. Professional Seminar. 1 Credit Hour.

Preparation for entering the working and professional worlds of engineering and the job market. Includes preparation of résumés, interviewing techniques, securing and holding a job, advancement, professional registration, ethics, and professional societies.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

ENGT 4129. Professional and Industrial Seminar. 3 Credit Hours.

Preparation for entering the working and professional worlds of engineering and the job market. Includes preparation of résumés, interviewing techniques, professional registration, and ethics. There will also be presentations by engineers from the local business community on technical topics of current interest in engineering.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

ENGT 4196. Capstone Project. 3 Credit Hours.

Team-oriented engineering technology capstone projects of various types. Topics proposed and presented by students in the initial stage of the semester. At completion, the project is demonstrated during an oral presentation. Project results are submitted in a final report. Offered Fall, Spring, and Summer.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Engineering Technology.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ENGT 4119.

ENGT 4261. Engineering Technology Project II. 3 Credit Hours.

Team-oriented engineering system design problems of various types. Topics proposed and orally presented by students in the initial stage of the course sequence. At completion, the project is demonstrated during an oral presentation and a final written report.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGT 4161 or ENGT 4196)

ENGT 4278. Cardiac Devices. 3 Credit Hours.

Intended for electrical engineering, biology, and bioengineering students. No course prerequisites. This course will cover cardiac anatomy and physiology, the hearts electrical system in health and disease, cardiac ecg rhythm interpretation, design and function of ecg monitoring devices, pacemakers and external and implanted defibrillators, and arrhythmia detection algorithms. The course will include observation of pacemaker implants, and troubleshooting in a pacemaker follow-up clinic. The course will prepare students to take the Heart Rhythm Society Allied Professional Pacemaker Certification examination. It is intended to put students in a competitive advantage for getting jobs in the expanding pacemaker and other medical electronics device industries.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 1022 to 4999, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC6T, or 'Y' in METW) and any PHYS course numbered 1021 to 4999.

ENGT 4342. Machine Elements. 3 Credit Hours.

Survey of the design and application fundamentals underlying the sound selection and use of common machine elements such as shafts, bearings, clutches, brakes, gears, chain and belt drives, etc. Term design project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (ENGR 1117 or MEE 1117), (ENGT 2322 or ENGR 2333 (C- or higher)), and (ENGT 3323 or ENGR 2332 (C- or higher))

ENGT 4532. Heating, Ventilating, and Air Conditioning. 3 Credit Hours.

Establishment of design requirements for environmental comfort conditioning. Heating, heat pumps, humidity control, cooling, ventilation, integrated systems, controls and instrumentation, computer-aided design. Design project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (ENGT 2521 and ENGT 3532)

ENGT 4641. Production Tooling. 3 Credit Hours.

Fundamentals of the design of work-holders and of tooling for inspection and gauging, welding and joining processes, and punch presses. A weekly practicum covers applications of fundamentals to typical tool design problems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in ENGR 1117, (ENGR 2333 (C- or higher) or ENGT 2322 (C- or higher)), and ENGT 3652.

ENGT 4642. Quality Control. 3 Credit Hours.

Fundamental engineering methods for product and process quality assurance and control. Standard statistical tools are used for quality control methods used in industry. Acceptance sampling, statistical process control, quality measurement, and quality management topics are covered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (STAT 2101 or STAT 2103)

ENGT 4643. Fundamentals of Manufacturing. 3 Credit Hours.

A course designed to present new and emerging areas of engineering technology. This course covers fundamental manufacturing processes under the classification of processing operations and the assembly operations, and the basic parameters involved in these processes. This course combines lectures and intensive lab activities with a design project component.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ENGT 4342.

English (ENG)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENG 0701. Introduction to Academic Discourse. 4 Credit Hours.

English 0701 focuses on writing within a single theme, working on ungraded multiple drafts for assignments, developing skills in summary and textual support presented in appropriate context. Students create a portfolio of their work, including at least four sequenced assignments that culminate in a final project that pulls together critical and literary texts. Multiple individual conferences with the instructor. NOTE: Students placed in English 0701 must earn a final grade of C- or higher in order to be eligible to enroll in English 0802 or English 0812. Students cannot receive credit for this course if they have successfully completed any of the following courses: English 0711, 1001, 1002, 1011, 1012, 0040, 0041, C050, C051, or R050.

Repeatability: This course may not be repeated for additional credits.

ENG 0711. Introduction to Academic Discourse ESL. 4 Credit Hours.

The guidelines for English 0701 are followed in this course, but in the ESL writing classroom there are cross-cultural implications both of what it means to do academic work and also what it means to share historical and cultural knowledge. Oral participation is encouraged as a way of developing fluency and enhancing comfort with participation in American academic settings. Classes are smaller than in English 0701, and teachers spend extended time in tutorial conferences with students. NOTE: English 0711 is designed to accommodate the needs of the ESL learner. Students placed in English 0711 must earn a final grade of C- or higher in order to be eligible to enroll in English 0802 or English 0812. Students cannot receive credit for this course if they have successfully completed any of the following courses: English 0701, 1001, 1002, 1011, 1012, 0040, 0041, C050, C051, or R050.

Repeatability: This course may not be repeated for additional credits.

ENG 0802. Analytical Reading and Writing. 4 Credit Hours.

Duplicate Courses: This course may not be taken for credit by students who have successfully completed English 0812, 0902, 1002, 1012, 1022, 1977, 1978, C050, C051, H090, or R050. English 0802 takes a broader perspective than 0701 (formerly 0040), requiring students to explore a single theme from the point of multiple disciplines. Early in the semester, English 0802 students work on research and the evaluation of sources, moving through a sequence of papers that develop argumentation and the synthesis of materials. Library research is required, and sessions with librarians are part of the course. Individual and small group conferences will be held during the semester. Evaluation is predicated on a passing final portfolio of at least four assignments that are developed through multiple revisions. NOTE: English 0802 is a prerequisite for IH 0851/0852 (formerly Intellectual Heritage 1196 and 1297), any writing intensive courses, and any course in the College of Liberal Arts numbered 2000-4999.

Course Attributes: GW

Repeatability: This course may not be repeated for additional credits.

ENG 0812. Analytical Reading and Writing: ESL. 4 Credit Hours.

Duplicate Courses: English 0812 may not be taken for credit by students who have successfully completed English 0802, 0902, 1002, 1012, 1022, 1977, 1978, C050, C051, H090, or R050. English 0812 is designed to accommodate the needs of the ESL learner. The guidelines for English 0802 are followed in this course, but in the ESL writing classroom there are cross-cultural implications both of what it means to do academic work and also what it means to share historical and cultural knowledge. Oral participation is encouraged as a way of developing fluency and enhancing comfort with participation in American academic settings. NOTE: English 0812 is a prerequisite for IH 0851/0852 (formerly Intellectual Heritage 1196 and 1297), any writing intensive courses and any courses in the College of Liberal Arts numbered 2000-4999. Classes are smaller than in English 0802, and teachers spend extended time in tutorial conferences with students.

Course Attributes: GW

Repeatability: This course may not be repeated for additional credits.

ENG 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815/0915, Italian 0815, PSY 0815, Russian 0815, or Spanish 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ENG 0822. Shakespeare in the Movies. 3 Credit Hours.

This course examines film adaptations, one major way that a canonical author - William Shakespeare - remains relevant and appealing to artists and audiences today. Students study several major plays and various film adaptations, including their cultural, social, and historical contexts, and learn to use appropriate technical terms for discussing drama and film. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd. Students cannot receive credit for this course if they have successfully completed English 0922.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

ENG 0824. The Quest for Utopia. 3 Credit Hours.

The concept of utopia - a better or more just society - has existed for centuries, but utopia has never been achieved. In fact, both imaginary and historical utopias often devolve into dystopia - a worse or unjust society. This course examines utopia and dystopia in literature, philosophy and history, focusing on relationships between individual and community. NOTE: This course fulfills the Human Behavior (GB) GenEd requirement. Students cannot receive credit for this course if they have successfully completed English 0924.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ENG 0826. Creative Acts. 4 Credit Hours.

This course focuses on the art of writing, finding one's voice, and writing for different genres. In a small classroom setting, you will work with the faculty member and other students to improve your writing through work-shopping. Other readings will allow you to develop your craft. By the end of the semester, you will produce a portfolio of your work. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed English 0926.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

ENG 0834. Representing Race. 3 Credit Hours.

From classical Greeks and Romans, who saw themselves under siege by the "barbarian hordes," to contemporary America and its war on "Islamic extremism," from "The Birth of a Nation" to "Alien Nation," Western societies have repeatedly represented some group of people as threats to civilization. This course will examine a wide range of representations of non-Western people and cultures in film, literature, scientific and legal writings, popular culture and artistic expression. What is behind this impulse to divide the world into "us" and "them"? How is it bound up with our understanding of race and racial difference? And what happens when the "barbarian hordes" talk back? NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed African American Studies 0834, Africology & African American Studies 0834, Anthropology 0834/0934, Asian Studies 0834, English 0934, or History 0834.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

ENG 0837. Eating Cultures. 3 Credit Hours.

You are what you eat, they say, but what, precisely, determines our eating habits and what, exactly, do they say about us? How do these habits influence our relations with others in our communities and beyond? Eating is an activity common to all human beings, but how do the particularities and meanings attributed to this activity vary across different times and places? Using literature, visual media, cookbooks, food-based art, and advertisements as our starting point, we will examine how food perception, production, preparation, consumption, exchange, and representation structure individual and communal identities, as well as relations among individuals and communities around the globe. Our focus on this most basic of needs will allow us to analyze how food conveys and limits self-expression and creates relationships as well as delimits boundaries between individuals and groups. Materials will be drawn from a wide range of disciplines including, but not limited to, literary and gender studies, psychology, anthropology, history, sociology, and economics. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed Spanish 0837 or Spanish 0937.

Course Attributes: GB, SI

Repeatability: This course may not be repeated for additional credits.

ENG 0849. Dissent in America. 3 Credit Hours.

Throughout American history individuals and groups of people, have marched to the beat of a different drummer, and raised their voices in strident protest. Study the story and development of dissent in America. How has dissent shaped American society? In addition to studying the historical antecedents of dissent students will have first-hand experience visiting and studying a present-day dissent organization in the Philadelphia area to investigate connections between the history of dissent and the process of making dissenting opinion heard today. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for English 0849/0949 if they have successfully completed History 0849/0949 or SOC 0849.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

ENG 0855. Why care about College: Higher Education in American Life. 3 Credit Hours.

You have decided to go to college. But why? What role will college and in particular Temple University play in your life? Reflect on this important question by looking at the relationship between higher education and American society. What do colleges and universities contribute to our lives? They are, of course, places for teaching and learning. They are also research centers, sports and entertainment venues, sources of community pride and profit, major employers, settings for coming-of-age rituals (parties, wild times, courtship, etc.), and institutions that create lifetime identities and loyalties. Learn how higher education is shaped by the larger society and how, in turn, it has shaped that society. Become better prepared for the world in which you have chosen to live for the next few years. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AMST 0855 or EDAD 0855.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

ENG 0857. The Detective Novel. 3 Credit Hours.

The detective novel remains the most popular of literary forms since its American origins in Edgar Allan Poe. The form has spread to virtually every part of the world, taking on different perspectives in the different societies where it has prospered. Our course analyzes the global travels of this prolific literary genre, paying particular attention to the manner in which its formula of crime-detection-resolution has evolved from its classic phase in the Sherlock Holmes mysteries, to its hard-boiled phase in the 1940's US, to the transformation of the private detective working outside the formal apparatus of the law into the police detective working within the law in places as different as Sweden, Holland, Nigeria, and India. We will read bestselling detective novels by figures such as Emile Gaboriau, Poe, Arthur Conan Doyle, Wilkie Collins, Agatha Christie, Raymond Chandler, Jorge Borges (Argentina), Vikram Chandra (India), Henning Mankell (Sweden), Janwillem van de Wetering (Holland), Kole Omotosho (Nigeria), and Soji Shimada (Japan). We will pay special attention to the conventions of the form and analyze its evolution as it travels the world. In exploring its global travels, we will attend to a number of issues, including: the changing definition of crime; the evolving representation of the criminal; the changing methods for "solving" the crime; the ideology of justice; the conflicts between community and individuality; and the varying social and national anxieties that the form reveals. **DUPLICATE CREDIT WARNING:** Students who have received credit for Asian Studies 0857 or Critical Languages 0857 will not receive additional credits for this course.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ENG 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. **NOTE:** This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ENG 0902. Honors Writing About Literature. 4 Credit Hours.

This course centers on a specific theme or topic. Reading assignments may include various literary modes, forms, and genres, as well as historical, technological, and social context. Students will read extensively, conduct original research, write multiple drafts of major writing assignments, participate in class discussion, and give feedback to peers. This course focuses on the same critical competencies as English 0802: Analytical Reading and Writing. **Duplicate Credit Warning:** This course was previously titled Honors Literature/Reading/Writing and may not be taken for credit by students who have successfully completed English 0802 or equivalent.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GW, HO

Repeatability: This course may not be repeated for additional credits.

ENG 0922. Honors Shakespeare in the Movies. 3 Credit Hours.

This course examines film adaptations, one major way that a canonical author - William Shakespeare - remains relevant and appealing to artists and audiences today. Students study several major plays and various film adaptations, including their cultural, social, and historical contexts, and learn to use appropriate technical terms for discussing drama and film. **NOTE:** This course fulfills the Arts (GA) requirement for students under GenEd. Students cannot receive credit for this course if they have successfully completed English 0822.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

ENG 0924. Honors: The Quest for Utopia. 3 Credit Hours.

The concept of utopia - a better or more just society - has existed for centuries, but utopia has never been achieved. In fact, both imaginary and historical utopias often devolve into dystopia - a worse or unjust society. This course examines utopia and dystopia in literature, philosophy and history, focusing on relationships between individual and community. NOTE: This course fulfills the Human Behavior (GB) GenEd requirement. Students cannot receive credit for this course if they have successfully completed English 0824.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

ENG 0926. Honors Creative Acts. 4 Credit Hours.

This course focuses on the art of writing, finding one's voice, and writing for different genres. In a small classroom setting, you will work with the faculty member and other students to improve your writing through work-shopping. Other readings will allow you to develop your craft. By the end of the semester, you will produce a portfolio of your work. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed English 0826.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

ENG 0934. Honors Representing Race. 3 Credit Hours.

From classical Greeks and Romans, who saw themselves under siege by the "barbarian hordes," to contemporary America and its war on "Islamic extremism," from "The Birth of a Nation" to "Alien Nation," Western societies have repeatedly represented some group of people as threats to civilization. This course will examine a wide range of representations of non-Western people and cultures in film, literature, scientific and legal writings, popular culture and artistic expression. What is behind this impulse to divide the world into "us" and "them"? How is it bound up with our understanding of race and racial difference? And what happens when the "barbarian hordes" talk back? NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed African American Studies 0834, Africology & African American Studies 0834, Anthropology 0834/0934, Asian Studies 0834, English 0834, or History 0834.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

ENG 0949. Honors Dissent in America. 3 Credit Hours.

Throughout American history individuals and groups of people, have marched to the beat of a different drummer, and raised their voices in strident protest. Study the story and development of dissent in America. How has dissent shaped American society? In addition to studying the historical antecedents of dissent students will have first-hand experience visiting and studying a present-day dissent organization in the Philadelphia area to investigate connections between the history of dissent and the process of making dissenting opinion heard today. (This is an Honors course.) NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for English 0849/0949 if they have successfully completed History 0849/0949 or SOC 0849.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

ENG 0968. Honors World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

ENG 0973. Honors Women in Modern Bengali Film. 3 Credit Hours.

We will discuss the work of contemporary Bengali film directors, as also that of a few non-Bengali directors of parallel and diasporic cinema, with a particular focus on culturally constructed roles for women in the Indian social context. The several films that we view in class, to analyze women's movements out of such prescribed spaces into more liberating ones, will focus on assault; incest as taboo; the predicaments of the subaltern, the prostitute, and the widow; and the more recent issue of immigration. How do questions we raise in our course intersect with current international discussions of the treatment of women and class in film? Is the work done by women's activist groups changing entrenched perceptions of gender worldwide and, thus, representations of women in film? What is the impact of significant events in Indian colonial and postcolonial history on women? How do key concepts addressed by major Western thinkers such as Karl Marx and Sigmund Freud affect depictions of women in cinema? You will look up websites on cinema and do group oral presentations to engage directly with these questions. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

ENG 0975. Honors Transnational Cinema. 3 Credit Hours.

As he recently commented on the sad state of globalized affairs in which "the cosmopolitanism of international filmmaking is matched by the parochialism of American film culture," New York Times film critic A.O. Scott asked, "The whole world is watching, why aren't Americans?" This course will use Scott's question as a point of departure to investigate the ostensible reasons why Americans, or in our case, Philadelphians, aren't watching "transnational cinema" - international films that gain distribution outside of their country of production, and that depict transnational movements of people, capital, and social values. Are transnational films playing at a theatre near you? Perhaps they are, but if not, why not? Which "foreign films" are allowed to cross the border into our country? How, when, and where do we get to "see the world" and why does that matter in today's globalized, interconnected world? Learn "how to see the world" - not as a one-dimensional quaint or exotic representation of the "other" - but instead through the ways in which these films engage critical contemporary issues of nation, transnation, and globalization in an increasingly interconnected transnational public sphere. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

ENG 1009. Discovering English. 1 Credit Hour.

Designed for freshmen, sophomores, new transfer students, and those who have not declared a major, this course is an introduction to the English major at Temple. It offers an overview of the field of English Studies and the various options, resources, and opportunities available to majors, with an emphasis on academic and professional planning.

Repeatability: This course may not be repeated for additional credits.

ENG 1801. Career Seminar. 1 Credit Hour.

This course is designed to provide students with the resources and support to help them make informed decisions about career development. The course aims to provide its members the opportunity to meet faculty members representing the diversity of the major, professionals from the city who were English majors, and recent graduates who can talk about what the major has done for them and how they use it. Thus, one of the primary goals of this course is for English majors to learn how to become professionals and to assess a range of career opportunities. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

ENG 2000. Special Topics. 3 Credit Hours.

Each section of this course explores a carefully defined theme, topic, or type of literature or writing, such as Asian-American literature, editing and publishing a literary magazine, etc. NOTE: Variable content; consult the Undergraduate English Office or English web page for details.

Repeatability: This course may be repeated for additional credit.

ENG 2001. Interpreting Literature. 3 Credit Hours.

This introductory course is designed for English majors, English minors, and any student interested in interpreting poetry, fiction, and drama. Students will learn to identify and name aspects of literary form, to describe relationships among literary texts, and to write original arguments about the meaning and value of specific literary works. In addition to their role in academic study, these analytic and writing skills are useful in many employment and creative contexts today.

Repeatability: This course may not be repeated for additional credits.

ENG 2003. Creative Writing: Poetry. 3 Credit Hours.

Workshop in which students read and discuss one another's material and develop skills as both writers and readers. Students may read selected contemporary American poets, but the main texts will be those produced by members of the class.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Note: This course is not designated writing intensive.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 2004. Creative Writing: Fiction. 3 Credit Hours.

Workshop in which students read and discuss one another's material and develop skills as both writers and readers. Students may read selected contemporary American works of fiction, but the main texts will be those produced by members of the class. Beginning writers welcome, but thorough grounding in the conventions of grammar, spelling, and punctuation is essential.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Note: This course is not designated writing intensive.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 2005. Creative Writing: Plays. 3 Credit Hours.

Workshop in which students read and discuss one another's material and develop skills as both writers and readers. Students may consider dramatic and stylistic problems in selected contemporary American plays, but the main texts will be those produced by members of the class.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Note: This course is not designated writing intensive.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 2006. Non-Fiction Writing. 3 Credit Hours.

This course introduces students to the demands of writing articles and stories drawn from observation, reflection, and analysis for a public audience. Genres highlighted in the course may include personal essays, lyric essays, research-based reportage, and various hybrid forms that make up the current practice of creative non-fiction. This course was previously offered as ENG 2496 and ENG 2006 under the title "Introduction to Non-Fiction". Students who have taken prior iterations of this course will not earn additional credit.

Repeatability: This course may not be repeated for additional credits.

ENG 2007. Writing for Business and Industry. 3 Credit Hours.

Meets the writing needs of people in business and industry and students who plan professional careers. Extensive practice in various forms of writing appropriate to all levels of management, including reports, proposals, memoranda, and letters. Instruction in research techniques and the writing of a formal researched report on a business topic. Job applications, letters of inquiry, and resumé. Students who have earned credit for English 2596 will not earn additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

ENG 2008. Technical Writing. 3 Credit Hours.

For students in engineering and related fields. Covers style, organization, and mechanics of technical papers, with emphasis on special problems that face the technical writer: analyses and descriptions of objects and processes, reports, proposals, business correspondence, and research papers. Students write a number of short reports and one long research paper. By the end of the course, professional standards of accuracy in mechanics and presentation are expected. Some impromptu writing exercises. Note: Students who have earned credit in ENG 2696 or SCTC 2396 will not earn additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

ENG 2009. Writing the Research Essay. 3 Credit Hours.

Designed to improve writing skills in general and teach students to use library and online resources, conduct research, and organize and present the acquired information effectively. Readings may be assigned, but class and conference time are devoted principally to analysis and discussion of research and writing problems. Students write a total of approximately 5000 words in essays and exercises related to a research project. Students who have earned credit for English 2796 will not earn additional credit for English 2009.

Repeatability: This course may not be repeated for additional credits.

ENG 2012. Literature and Criticism. 3 Credit Hours.

This course will study some of the main approaches and theories used to interpret texts. Readings will include literature, exemplary criticism, and theory.

Repeatability: This course may not be repeated for additional credits.

ENG 2013. Literature and Philosophy. 3 Credit Hours.

An introduction to the intellectual climate which has shaped literary studies. This course was previously taught as "Intellectual Contexts of Literary Study." Students who have earned credits under the prior title will not earn additional credits.

Repeatability: This course may not be repeated for additional credits.

ENG 2014. Myth and Symbol. 3 Credit Hours.

A study of certain literary ideas and patterns that have persisted from ancient times to the present in varying forms. Readings may begin with classical texts in translation, and will include selected works of English and American literature from various periods. NOTE: Students will only receive credit one time for either ENG 2014 or GRC 2011.

Repeatability: This course may not be repeated for additional credits.

ENG 2022. Beyond the Field: Sports and Storytelling. 3 Credit Hours.

This is a course about storytelling, about trying to turn the raw materials of a game into something more interesting than just the final score. Although the particulars change, there are only a handful of plots in sport: troubled athlete seeks redemption, old champion past her prime, young challenger on the rise, athlete plays through the pain (or not), hopeless team seeks hope, bad luck occurs, good luck occurs. There is challenge and opportunity in the familiarity of sports narratives; the writer needs to work harder than ever to avoid cliché, but they also have many models for instruction. In this course, we will study what makes contemporary sports writing work, how to develop your voice, and how to hone your writing to tell the most compelling and unique possible stories about the games we play.

Repeatability: This course may not be repeated for additional credits.

ENG 2096. Introduction to English. 3 Credit Hours.

This introductory course for English majors serves as a gateway to the study of literature and other texts in related subfields undertaken by those in English. This course is also designated as writing intensive and special attention will be given to the writing and research process, including locating secondary sources and how to use them correctly and effectively. Spirited discussion and individual conferences will be a distinctive feature of this course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 2110. Dark Academia: The Literature of College Life. 3 Credit Hours.

Dark academia is an emerging literary genre that resists prevailing notions of institutions of higher education as idyllic settings and, instead, depicts colleges and universities as eerie, gothic-like establishments. Readings take the form of coming-of-age novels, murder mysteries, and campus thrillers -- all involving students in academic settings intensely dedicated to romanticized pursuits of knowledge. Dark and twisty themes prevail: plots typically include secret societies, ancient rituals, and danger of all kinds. Attention will be paid both to classics and newer titles that define and diversify the genre and may include related film, television, and social media. Note: The content of this course will vary and may be repeated for additional credits.

Repeatability: This course may be repeated for additional credit.

ENG 2111. The Short Story. 3 Credit Hours.

This course will concentrate on a variety of approaches to the short story, including classic, modernist and experimental.

Repeatability: This course may not be repeated for additional credits.

ENG 2112. Children's Literature and Folklore. 3 Credit Hours.

A study of selected works that have been written or adapted for children from the eighteenth century to the present, including subgenres such as fairy tales, nonsense literature, fantasy and historical fiction, and graphic novels. Focuses primarily on literary texts but may also include film and other media.

Repeatability: This course may not be repeated for additional credits.

ENG 2113. Popular Fiction. 3 Credit Hours.

Readings in recent popular fiction, including science fiction, detective novels, fantasy, horror and romance.

Repeatability: This course may not be repeated for additional credits.

ENG 2114. Social Justice and Literature. 3 Credit Hours.

What is the role of literature in social change? How do literary texts perpetuate or reinforce certain forms of social justice? How do they shed light on or give voice to the experience of marginalized individuals for the purposes of social justice? This course will answer these questions by considering the increased role in storytelling and exploring how particular forms of social justice are represented in literary texts. Material to be examined will include various genres of literature and related texts: film, television, music recordings and social media. Particular social justices will vary depending on course material, but the course is designed for students to learn about and engage vigorously with the realities of social injustice and political struggle.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ENG 2115. Young Adult Literature. 3 Credit Hours.

A study of young adult literature from the genre's commercial emergence in the 1950s to the present, including subgenres such as fantasy and speculative fiction, historical fiction, graphic novels and mystery. Focuses primarily on literary texts but may also include film and other media, as well as work on adolescent psychology and youth culture.

Repeatability: This course may not be repeated for additional credits.

ENG 2116. Disability and Literature. 3 Credit Hours.

This course brings a Disability Studies perspective to a wide range of literature and considers how disability and its representations intersect with other social identities such as race, gender, nation and class.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ENG 2118. The End: Literature of the Apocalypse. 3 Credit Hours.

In this course students will read a survey of literature that will be organized around various apocalyptic and post-apocalyptic themes (nuclear, ecological, technological, extraterrestrial, contagious diseases, etc.). Readings may take the form of novels, short fiction, poetry, drama, and graphic novels. Topics to be covered include imminent crises, unthinkable catastrophes, and oppressions of all forms in numerous cultural and political contexts. Course members will read both classic and newer titles that define and diversify the genre, and attention may be paid towards related popular media.

Repeatability: This course may not be repeated for additional credits.

ENG 2160. Topics in Women's Literature. 3 Credit Hours.

Variable content course which examines the representation of women and the literature created by English, American, or other countries' women writers. This course has been offered with many specific topics combining biography and literary texts; neglected masterpieces of American literature by black and white women; woman as hero/woman as heroine; the questions of love, marriage, and vocation for women from 1850 to 1940 and other thematic motifs of 20th and 21st century women's literature. Note: Formerly known as Women in Literature WMST 2197 and ENG 2197. Students may earn up to 6 credits of coursework taken from the following courses: ENG 2160, ENG 2197, GSWS 2160, WMST 2160, WMST 2197.

Course Attributes: SI

Repeatability: This course may be repeated for a total of 6 credit.

ENG 2206. The City in Literature. 3 Credit Hours.

This course investigates literary representations of the city, considering how poems, novels and other texts are shaped by urban spaces, and how urban spaces are shaped by texts.

Repeatability: This course may not be repeated for additional credits.

ENG 2211. Literature and Legend. 3 Credit Hours.

An exploration of the mythological and historical aspects of legend. Subjects may include King Arthur, Lancelot, Guinevere, and the Grail; Celtic folklore; and modern fantasy.

Repeatability: This course may not be repeated for additional credits.

ENG 2221. Introduction to Shakespeare. 3 Credit Hours.

A study of the major plays of Shakespeare, including comedies, tragedies, and histories. May focus primarily on the plays as literature, or may study them as performed texts. Note: Formerly known as Shakespeare (Writing Intensive) ENG 2297. Students may receive credit for only one of the following courses: ENG 2297 or ENG 2221.

Repeatability: This course may not be repeated for additional credits.

ENG 2222. Banned Books: The Politics of Reading. 3 Credit Hours.

This course will focus on books that have faced obscenity charges or been successfully banned from schools and public libraries because of content deemed inappropriate, transgressive, forbidden, or too provocative. Topics to be covered include forms of censorship, first amendment rights, and reading as a political act. The course may be organized around a particular theme or genre, and students will read books that have been and remain controversial.

Repeatability: This course may not be repeated for additional credits.

ENG 2341. American Playwrights. 3 Credit Hours.

A study of American playwrights from O'Neill to the present. Principles of dramatic analysis, the distinctively American qualities of the plays and their debt to modern European drama. Writers may include Williams, Miller, Hellman, Hansberry, Baraka, Fuller, Wilson, Mamet, Rabe, Fornes, Shepard.

Repeatability: This course may not be repeated for additional credits.

ENG 2401. African-American Literature I. 3 Credit Hours.

A survey of African-American literature from its beginnings to the early 20th century--poetry, prose, slave narratives, and fiction--including the works of authors such as Phyllis Wheatley, Frederick Douglass, W. W. Brown, Harriet Wilson, Frances E. W. Harper, Charles Chesnutt, B.T. Washington, J.W. Johnson, and W.E.B. DuBois. An examination of racial consciousness as a theme rooted in social and historical developments, with special emphasis on national, cultural, and racial identity, color, caste, oppression, resistance, and other concepts related to race and racism emerging in key texts of the period. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

ENG 2402. African-American Literature II. 3 Credit Hours.

A survey of African-American literature from 1915 to the present, including poetry, prose, fiction, and drama. Analysis of developments in racial consciousness, from "race pride" to the Black Aesthetic and the influences on literature brought about by interracial conflicts, social and historical concepts such as assimilation and integration, and changing notions of culture. Authors such as Toomer, Hughes, McKay, Hurston, Brown, Larsen, Wright, Baldwin, Hansberry, Ellison, Baraka, Morrison, and others. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

ENG 2501. Introduction to British Writing. 3 Credit Hours.

This course studies selected British texts over a period of 150 years or more, in their historical context. It considers how history can shape writing and how writing can influence history.

Repeatability: This course may not be repeated for additional credits.

ENG 2502. Introduction to American Writing. 3 Credit Hours.

This course studies selected American texts over a period of 150 years or more, in their historical context. It considers how history can shape writing and how writing can influence history.

Repeatability: This course may not be repeated for additional credits.

ENG 2503. Introduction to Global Writing. 3 Credit Hours.

This course studies selected Global texts, whether from the Anglophone world or from foreign cultures and translated into English, over a period of 150 years or more, in their historical context. It considers how history can shape writing and how writing can influence history.

Repeatability: This course may not be repeated for additional credits.

ENG 2511. Modern Poetry. 3 Credit Hours.

An introduction to 20th century poetry which views Modernist poetry in light of postmodern perspectives. Topics may include innovation, formalism, contemporary alternatives to Modernism, new directions in post-War and postmodern poetry.

Repeatability: This course may not be repeated for additional credits.

ENG 2512. The Modern Novel. 3 Credit Hours.

An introduction to Modernism in the work of several major novelists, such as James, Conrad, Lawrence, Joyce, Faulkner, Proust, Mann, and Kafka. Emphasis on social and intellectual background, literary methods, and psychological, philosophical and political implications of Modernism.

Repeatability: This course may not be repeated for additional credits.

ENG 2513. Modern Drama. 3 Credit Hours.

A study of major works of representative late 19th century and early 20th century playwrights, such as Ibsen, Strindberg, Chekhov, Pirandello, O'Neill, Shaw. Emphasis on social and intellectual background, dramatic art, and the role of theater in social controversy.

Repeatability: This course may not be repeated for additional credits.

ENG 2521. Contemporary Literature. 3 Credit Hours.

An examination of important trends through selected literary works of the late 20th century. Emphasis on American fiction, with a sampling of works from other countries and genres. Authors may include Bellow, Coover, Pynchon, DeLillo, Morrison, Hughes, Calvino, Garcia Marquez.

Repeatability: This course may not be repeated for additional credits.

ENG 2601. Introduction to Postcolonial Literatures. 3 Credit Hours.

An introduction to modern world literatures in English (or in translation) within the context of colonialism, anti-colonial resistance, and postcolonial movements. Content and geographical focus vary each semester: a sample of authors to be studied might include Clarice Lispector, Gabriel Garcia Marquez, Assia Djebar, Ama Ata Aidoo, Maryse Conde, Zoe Valdes, Derek Walcott, Chinua Achebe, Anita Desai, Salman Rushdie, Michael Ondaatje, among others. The course can be repeated for credit with different topics. Students should consult the department's "Announcement of Classes" for current offerings before registering in the class.

Repeatability: This course may not be repeated for additional credits.

ENG 2696. Technical Writing. 3 Credit Hours.

For students in engineering and related fields. Covers style, organization, and mechanics of technical papers, with emphasis on special problems that face the technical writer: analyses and descriptions of objects and processes, reports, proposals, business correspondence, and research papers. Students write a number of short reports and one long research paper. By the end of the course, professional standards of accuracy in mechanics and presentation are expected. Some impromptu writing exercises.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 2702. Film History I: 1890-1945. 3 Credit Hours.

This course introduces students to the major periods and technological developments in film history from its origins in various 19th century technologies and amusements to the end of World War II. The course will address some of the fundamental phases and international movements in cinema history, focusing on film as a technology, institution, and art form. A range of genres and national cinemas representative of the aesthetic and economic contexts of global media cultures will be examined. The course will be framed by a variety of critical issues in film historiography.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2097.

ENG 2703. Film History II: 1946-Present. 3 Credit Hours.

This course introduces students to the major periods and technological developments in film history from the end of World War II to the present. The course will address some of the fundamental phases and international movements in cinema history, focusing on film as a technology, institution, and art form. A range of genres and national cinemas representative of the aesthetic and economic contexts of global media cultures will be examined. The course will be framed by a variety of critical issues in film historiography.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2097.

ENG 2710. Special Topics in Film Studies I. 4 Credit Hours.

Topics alternate from semester to semester.

Repeatability: This course may be repeated for additional credit.

ENG 2711. Introduction to Film Studies. 3 Credit Hours.

This course introduces students to the fundamentals of film analysis. Students will learn about the construction of film narrative, as well as about formal elements of film, including principles of editing, mise-en-scene, and sound. The course also provides an introduction to issues in film studies including the meaning of film genre, the role of the film star, and authorship in the cinema. The course will focus on narrative feature films from the Classical Hollywood cinema, but will include attention to nonfiction practice as well as avant-garde European and Soviet alternatives to Hollywood. Films discussed include works by Hitchcock, Porter, Griffith, Vertov, Lang, Renoir, Hawks, Deren, and Welles. NOTE: In conjunction with English 2297 (W133), may be offered as Shakespeare in Film. Duplicate credit warning: Students who have completed this course under the old title, "Introduction to Cinema Studies," should not take this course as they will not receive duplicate credit.

Repeatability: This course may not be repeated for additional credits.

ENG 2712. International Film. 3 Credit Hours.

An examination, through masterpieces of world cinema, of international film cultures and national cinemas, with emphasis on the cultural, sociopolitical, and theoretical contexts. Offers a global context for film and other arts. NOTE: Variable content; may be given as post-World War II European film, French film, Third World film; consult the Undergraduate English Office or English web page for details.

Repeatability: This course may not be repeated for additional credits.

ENG 2713. Art of the Film. 3 Credit Hours.

An exploration of the black presence in American films from the racist portrayals in "The Birth of a Nation," the Stepin Fetchit films, and "Gone with the Wind," through the blaxploitation films like "Shaft" and "Superfly," culminating in recent black cinema from directors such as Melvin Van Peebles, Spike Lee and John Singleton. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

ENG 2714. Writing for the Arts. 3 Credit Hours.

This course will provide students with experience in the types of writing practiced in careers that support the arts. Students will research both individual artists (writers, visual artists, and performers such as actors, dancers, musicians, and comedians) and the companies, organizations and cultural institutions that present their work to the public. By the end of the semester, students will have compiled a portfolio of professional pieces in multiple genres of arts writing: a reader's report, a profile, a press release, a review, and posts across a variety of media platforms.

Repeatability: This course may not be repeated for additional credits.

ENG 2720. Special Topics in Film Studies II. 4 Credit Hours.

Topics alternate from semester to semester.

Repeatability: This course may be repeated for additional credit.

ENG 2821. Introduction to Linguistics. 3 Credit Hours.

The nature and structure of human language: the universal properties of language, how languages resemble each other, how children learn languages, how sound and meaning are related to each other, how the mind processes language, and how geographic and social factors affect language. Attention to the scientific methods linguists use to test hypotheses. NOTE: Not recommended for students who have had Anthropology 2507 (0127) and Communication Sciences 1108 (0108), or the equivalent.

Repeatability: This course may not be repeated for additional credits.

ENG 2822. Language and Race. 3 Credit Hours.

An investigation of language and race in order to evaluate accurately and objectively many common beliefs about the connections between the two. How all languages systematically organize sounds, grammar, and meanings, with a special emphasis on the structure of African American English; how particular ways of speaking may or may not affect one's thought patterns or social identity; public policy issues involving language and race. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

ENG 2831. Literacy and Society. 3 Credit Hours.

An exploration of the social context for reading and writing: how concepts of literacy can reinforce, elaborate, or threaten established social orders. Experiential study of how the written word is used; self-observation of our own writing practices and observation of others engaged in puzzling out the world through books, letters, pamphlets, flyers, newspapers, textbooks, billboards, signs, and labels. The purpose is to see literacy in action, see written documents shaping lives and see lives shaping written language. Reading about literacy, and a service or experiential component. Students who earned credit for English 2897 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ENG 2832. Science Writing. 3 Credit Hours.

How is science written and how is scientific writing read? Classwork will include the writing and analysis of scientific texts for popular and learned audiences. We will study popular magazine, newsletters, and research journal writing, scientific web sites, museum exhibits and even science fiction, learning to address differing levels of scientific interest and literacy. This course was formerly known as ENG 2898 and entitled "Texts/Cultures of Science." Students who successfully completed the prior version of this course will not receive additional credit for "Science Writing."

Repeatability: This course may not be repeated for additional credits.

ENG 2833. Medical Writing. 3 Credit Hours.

How are experiences of pain and illness represented in writing? How are acts of medical diagnosis and treatment complex, expressions of conflicting values and understandings of the human? How does writing about disease engage biomedical ethical debates? This writing workshop will explore how different kinds of writing are intertwined with medical practice. We will study popular magazine, website, and research journal writing about illness and medicine to develop our own medical writing practice.

Repeatability: This course may not be repeated for additional credits.

ENG 2900. Honors Special Topics. 3 Credit Hours.

Continuity in Community: Poetry and Art Since 1950. This course is a hybrid: a study of the arts and community as well as a poetry writing workshop. As such, the class is intended for students interested in creative writing, art, and music. Baseline readings will most likely include Daniel Kane's *All Poets Welcome: the Lower East Side Poetry Scene in the 1960's*, which will be used to survey a sampling of arts groups/movements since 1950 such as Black Mountain, the San Francisco Renaissance, the New York School, and the Black Arts Movement. The poetry workshop will entail in-class creative and critical writing exercises. Student work will also be presented to the class for commentary and critique.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENG 2901. Intermediate Honors: Developing Advanced Literacy in College. 3 Credit Hours.

Although a variable content course, it often serves to prepare students to be peer tutors for first-year students in Temple's basic composition courses. As part of the course requirements, students are required to keep journals, deliver reports, and write research papers. NOTE: Variable content; consult the Undergraduate English Office or English web page for details.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ENG 2903. Honors Creative Writing: Plays. 3 Credit Hours.

Workshop in which students read and discuss one another's material and develop skills as both writers and readers. Students may consider dramatic and stylistic problems in selected contemporary American plays, but the main texts will be those produced by members of the class.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ENG 3001. History of Criticism. 3 Credit Hours.

A survey of literary criticism from Plato to the mid-20th century. Key questions in literary theory: What is literature compared to other forms of discourse? Does literature mimic or create? Does literary value adhere to or challenge standards of philosophical or empirical truth? What is the source of literary creation? How does literary value shape social change? These and other questions are addressed through readings in literary and theoretical texts.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3002. Contemporary Criticism. 3 Credit Hours.

Comparative study of literary theories from the 1960s to the present. Survey of several contemporary critical schools, including deconstructionist, neo-psychological, neo-Marxist, new historical, feminist, sociological, and aesthetic criticism.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3003. Intermediate Poetry Workshop. 3 Credit Hours.

Workshop intended to help advanced writers produce, revise, and critique poetry. The premise is that in order to learn to make poems, one needs to learn to read like a poet; in addition to producing original work, therefore, students may read and discuss work by certain contemporary poets.

Note: Prior to Fall 2023, this course was titled "Advanced Creative Writing: Poetry." This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Note: This course is not designated writing intensive.

Repeatability: This course may be repeated for a total of 6 credit.

Pre-requisites: Minimum grade of C- in ENG 2003.

ENG 3004. Intermediate Fiction Workshop. 3 Credit Hours.

Workshop intended to help advanced writers produce, revise and critique fiction. In addition to producing original work, students may read and discuss certain contemporary writers and theories of fiction.

Note: Prior to Fall 2023, this course was titled "Advanced Creative Writing: Poetry." This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Note: This course is not designated writing intensive.

Repeatability: This course may be repeated for a total of 6 credit.

Pre-requisites: Minimum grade of C- in ENG 2004.

ENG 3005. Advanced Creative Writing: Plays. 3 Credit Hours.

Workshop intended to help advanced writers produce, revise, and critique plays. In addition to writing original work, students may read and discuss work by certain contemporary playwrights.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Note: This course is not designated writing intensive.

Repeatability: This course may be repeated for a total of 6 credit.

Pre-requisites: Minimum grade of C- in ENG 2005.

ENG 3009. Building Electronic Portfolios. 3 Credit Hours.

This course is designed to support advanced professional writing students' work on a web portfolio. Major course projects other than the portfolio will include work in conceptualizing and designing writing portfolios, reflecting on the role of electronic portfolios in education, and drafting portfolio designs. This course will also use instructional time to help participants revise writings for their portfolio and learn the principles and practices of Web design.

Repeatability: This course may not be repeated for additional credits.

ENG 3010. Special Topics I. 3 Credit Hours.

Advanced study in a specific area, usually concentrating on pre-1900 works. NOTE: Variable content; consult undergraduate office or English web page for details.

Repeatability: This course may be repeated for additional credit.

ENG 3011. The History of Ancient Greek Theater. 3 Credit Hours.

This course traces the development of the ancient Greek theater, from its invention when Thespis stepped out of the chorus to sing solos, through the important tragedies of Aeschylus, Sophocles and Euripides that addressed the great questions of individual, the gods and society, through the early comedies of Aristophanes, to the final evolution of the ancient theater into something we would call melodrama and sit-com. We will study the development of the physical theaters in Athens and the wider Mediterranean, ancient staging techniques, the development of the early acting profession, the portrayal of women in Athenian theater, and the complex relationship between Athenian theater and democracy, as well as with religion. As the scholarly ground of the ancient Greek theater has shifted radically over the past forty years and continues to move, students will participate in the fundamental questions in this exciting field. This course is a "Pre-1800" elective for English majors. Duplicate Credit Warning: This course is cross-listed with GRC 3011. Students who have earned credits for GRC 3011 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ENG 3020. Special Topics II. 3 Credit Hours.

Advanced study in a specific area, usually concentrating on post-1900 works. NOTE: Variable content; consult Undergraduate Office or English web page for details.

Repeatability: This course may be repeated for additional credit.

ENG 3082. Independent Study. 1 to 3 Credit Hour.

Allows students in their junior and senior year to pursue serious independent research in a subject too specialized or too advanced to appear as a regular course offering.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ENG 3085. Career Internship. 1 to 12 Credit Hour.

The mission of English 3085 is to assist and prepare students in securing hands-on work experience related to their career goals and interests and to provide students with an opportunity to acquire experience and skills needed to gain a competitive advantage upon entering the workforce. The course may be taken one time for 1-12 credits, depending on the number of hours worked. If taken for 3 or more credits, this course may count as one elective in the English major, minor, or Certificate in Professional Writing.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3096. Texts and Criticism. 3 Credit Hours.

Focusing on three or four major texts, this course will teach students how to analyze and respond to critical essays about the texts. It prepares students to do advanced research using library and online sources, and to use the results of their research to develop their own arguments about the text.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2001.

ENG 3097. Feminist Theory. 3 Credit Hours.

Readings in contemporary theorists who describe how the values of a culture are encoded in its language and who analyze the difficulty of escaping the prison house of language. How gender roles are created in and enforced by our symbol systems; how specific discourses change, how those changes can be facilitated, and how a new discourse is then read. Along with theoretical readings, some consideration of feminist applications of these strategies in politics, literature, music, and film. NOTE: Students will earn credit only one time for either ENG 3097 or GSWS 3097.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

ENG 3101. Themes and Genres in Women's Literature. 3 Credit Hours.

In-depth study of ideas, languages, and cultural stances in literature written by women. Students who have earned credit for English 3197 will not earn additional credit for this course. NOTE: Variable content; consult Undergraduate English Office or English web page for details.

Repeatability: This course may not be repeated for additional credits.

ENG 3103. Advanced Poetry Workshop. 3 Credit Hours.

This course is meant to serve as a culmination of the Creative Writing minor for students who have taken one introductory level poetry workshop and one intermediate-level poetry workshop. This is an intensive, advanced reading and writing creative workshop. The coursework will generate a semester project that has both creative and critical components. Students outside of the minor, or who have followed the fiction sequence, may take this course with instructor permission.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2003 and ENG 3003.

ENG 3104. Advanced Fiction Workshop. 3 Credit Hours.

This course is meant to serve as a culmination of the Creative Writing minor for students who have taken one introductory level fiction workshop and one intermediate-level fiction workshop. This is an intensive, advanced reading and writing creative workshop. The coursework will generate a semester project that has both creative and critical components. Students outside of the minor, or who have followed the poetry sequence, may take this course with instructor permission.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2004 and ENG 3004.

ENG 3111. Italian Renaissance. 3 Credit Hours.

This course covers major writers and works of the Italian Middle Ages and Renaissance: Dante, Petrarch, Boccaccio, Machiavelli, and Ariosto. Focus is placed on the rebirth of classical values and ideas, and their new forms of expression, which shall be known as the Renaissance. Due attention is given to such themes as the new concept of art and the new image of the artist through the study of Michelangelo's poetry and Cellini's Autobiography, as well as the concept of a united Italy, idealized from Dante through Machiavelli, but never historically achieved.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3112. Masterpieces of European Drama. 3 Credit Hours.

A reading and analysis of a wide range of continental European drama. Representative works from such great ages of drama as classical Greek and Roman, French neoclassic, and modern. Readings may include plays by Aeschylus, Euripides, Terence, Calderon, Racine, Moliere, Goethe, Ibsen, Chekhov, Brecht, and Beckett.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3211. Old English. 3 Credit Hours.

An introduction to the language, literature, and culture of Anglo-Saxon England. Short poems, excerpts from sermons, Bede, the Bible, and Beowulf. All works read in the original Old English. NOTE: No previous knowledge of Old English necessary.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3212. Literature of the Medieval Period. 3 Credit Hours.

Literature of the Middle English period, as well as the relation of the literature to the traditions of medieval literature throughout Western Europe. Works may include *The Owl and the Nightingale*, *Pearl*, *Piers Plowman*, *Sir Gawain and the Green Knight*, and selections from the mystery and morality plays, all usually read in the original in well-annotated texts. NOTE: No previous knowledge of Middle English necessary.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3213. Chaucer. 3 Credit Hours.

This study of the first major poet of the English tradition will focus on the theoretical as well as practical problems he poses for the modern reader. Readings include early dream visions and the *Canterbury Tales* and selections from Chaucer's sources and contemporaries to help students understand literary and social contexts. NOTE: No previous experience with Middle English required.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3221. Advanced Shakespeare I. 3 Credit Hours.

In-depth readings of selected major plays, usually including histories, comedies, and tragedies. Close textual analysis, social context, and philosophical background. NOTE: Assumes completion of at least one 2000-level literature course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3222. Advanced Shakespeare II. 3 Credit Hours.

Readings in a small number of plays by Shakespeare which have presented special critical problems to scholars, general readers, and performers alike. How such problems define critical perspectives on the plays, and how some current critical modes of reading Shakespeare address these texts. Reading may include such plays as *Troilus and Cressida*, *Measure for Measure*, *King Lear*, *Antony and Cleopatra*, *The Tempest*, *Cymbeline*.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3223. Elizabethan and Jacobean Drama. 3 Credit Hours.

Study of the extraordinarily talented and productive group of playwrights of the late 16th and early 17th centuries; such dramatists as Kyd, Marlowe, Jonson, Middleton, Webster, Ford, Dekker. Some attention to the plays as performances, and some consideration of social and intellectual contexts of the plays.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3224. Renaissance Writers. 3 Credit Hours.

Studies in Tudor and Stuart literature. May focus on a single author or group of authors or be organized generically or thematically. Possible topics include Spenser, Elizabethan courtly literature, lyric, pastoral, and prose fiction. NOTE: Variable content; see the Undergraduate English Office or English web page for details.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3225. Milton. 3 Credit Hours.

A study of John Milton's poetry and prose in its cultural and historical context. The course will begin with shorter poems, such as "Lycidas," and spend the majority of the semester on "Paradise Lost." Selected prose will highlight Milton's views on religion, divorce, and censorship.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3231. Restoration and 18th Century Literature. 3 Credit Hours.

Readings in the major texts, authors, genres, and cultural institutions of the period, 1660-1800. Classes may focus on more specialized time periods (like The Restoration) or topics (colonialism and literature) or genres (forms of comedy) or range more widely. Authors may include: Behn, Milton, Dryden, Rochester, Defoe, Swift, Finch, Pope, Addison, Steele, Montagu, Fielding, Richardson, Johnson, Boswell, Collins, Gray, and Burns.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3232. English Novel to 1832. 3 Credit Hours.

A study of the complex emergence of the novel as a genre in English. Begins in the latter part of the 17th century and early 18th century with authors such as Bunyan and Behn and Defoe and then considers various foundational and revisionary texts, by authors including Richardson, Fielding, Lennox, Burney, and Sterne. Concludes with figures key to the Gothic, the novel of manners, and the historical novel, such as Radcliffe, Austen, and Scott. Key topics may include the relationship of the novel to changing understandings of fact and fiction, to shifting ideas of gender roles, to colonial expansion, and contests over national identity major novelists of the 18th century, beginning with authors Defoe, extending through Richardson, Fielding, Burney, and Sterne, and ending with Mary Shelley, Walter Scott, and Jane Austen. Emphasis on the social and cultural contexts, narrative form and style, and factors leading to the emergence of the novel as a genre in English.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3241. English Romanticism. 3 Credit Hours.

First and second generation romantics, especially Blake, Wordsworth, Coleridge, Byron, Shelley, and Keats; their literary, historical, social, and cultural milieu; and the ideas and issues that contributed to shaping their imaginations and their work.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3251. Victorian Literature. 3 Credit Hours.

An introduction to the range of Victorian literature, including writers such as Alfred Tennyson, Robert Browning, Elizabeth Barrett Browning, Thomas Carlyle, the Brontës, Charles Dickens, George Eliot, Matthew Arnold, Christina Rossetti, Walter Pater, Oscar Wilde, and Thomas Hardy.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3252. Victorian Novel. 3 Credit Hours.

A study of works by Bronte, Dickens, Thackeray, Trollope, Eliot, Meredith, and Hardy, among others. These writers wrote novels intended to entertain and instruct, and were not above appealing to laughter and tears or causing their readers to share their moral fervor or indignation. The goal is an understanding of the social and artistic significance of these works in light of the world in which they emerged.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3261. Modern British Fiction. 3 Credit Hours.

A reading of great novels from the first quarter of the 20th century, the high point of English modernism. May include Conrad's *Lord Jim*, Woolf's *To The Lighthouse*, and Joyce's *Ulysses*. A reevaluation of the achievement of modernism from the perspective of the postmodern age, with the focus on kinds of modernism, kinds of irony, the reinvention of narrative form, and the works' social and moral implications.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3262. Irish Literature. 3 Credit Hours.

A study of selected modern Irish writers, emphasizing close reading, psychological concepts, and cultural history. Writers may include Wilde, Shaw, Yeats, Joyce, Beckett, Kinsella, and Heaney.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3321. American Romanticism. 3 Credit Hours.

A study of the development of a distinctively American character in American literature from 1830 to 1865. Traces the literary expression of America's growing consciousness of its own identity; the literary romanticism of Poe and Emerson, the darker pessimism of Hawthorne and Melville, the affirmative optimism of Thoreau and Whitman; technical innovations in poetry, including that of Emily Dickinson.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3322. American Realism and Naturalism. 3 Credit Hours.

A study of the diverse styles, subject matters, and theories of prose fiction in the late 19th century in terms of their challenge to and/or incorporation of earlier prose styles. Included will be the early realists (Chesnutt, Davis, Cahan, Sedgwick), later realists (James, Jewett, Howells, Garland, Chopin, Cable), and the naturalists (Crane, Norris, Wharton, Frederic, Dreiser).

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3323. 19th Century American Fiction. 3 Credit Hours.

A study of the development of American fiction from the antebellum period through the end of the century: Hawthorne, Melville, James, and others.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3331. Modern American Fiction. 3 Credit Hours.

Technique and subject -- the how and the what -- of a group of American novels from the first half of the 20th century, by such writers as Stein, Anderson, Hemingway, Fitzgerald, Faulkner, Hurston, West, and H. Roth.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3332. Contemporary American Fiction. 3 Credit Hours.

A reading and analysis of representative works of late 20th century fiction, some realistic, some experimental, some mid-way between, leading to a sense of the options available to a writer now. Texts may include Bellow, Updike, Barth, Vonnegut, and such recent writers as Morrison, Auster, Mukherjee, Cisneros, Alexie.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3341. American Literature and Society. 3 Credit Hours.

A study of social issues as explored in U.S. literature and the social context in which literature is produced. May be offered as *The Arts in America*, *Literature of Slavery*, etc. Note: Variable content; consult the English Department's web page for details.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 3401. Intermediate Writing: Non-Fiction. 3 Credit Hours.

A further exploration of creative and observational non-fiction for a non-academic audience. Classroom discussions will focus on published pieces as well as workshop considerations of student writing.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3411. Studies in African-American Literary Genre. 3 Credit Hours.

This variable content course will explore traditions, themes, or periods in African-American literature by foregrounding issues of genre. The focus may be on a single genre or set of generic conventions, such as drama, the protest novel, biography and letters, or the slave narrative, or on such topics as the influence of oral culture or the figure of testimony in diverse literary genres.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3412. The Harlem Renaissance. 3 Credit Hours.

The Harlem Renaissance represents the first period in Black productivity in all of the arts. The purpose of this course is to explore the themes, genres, and authors that define the literary arena of the Harlem Renaissance. This course will include the ideas and works of such figures as W.E.B. DuBois, Jean Toomer, Langston Hughes, Claude McKay and Zora Neale Hurston.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3413. African-American Literary Criticism. 3 Credit Hours.

This course is designed to give students a basic background in the foundation of African-American literary criticism. While the late 1970s mark the beginning of an exodus of Black academicians trained as literary critics, most of the critics of African-American literature before the 1970s were creative writers, such as W.E.B. DuBois, Alain Locke and Langston Hughes. This course will begin by exploring the fiction, poetry and critical essays by these and other writers. This work will function as a background for an examination of the works of poets from the Black Arts Movement. We shall also give attention to Black feminist scholarship, and the course will end with an analysis of African-American post-structuralist literary theorists such as Henry Louis Gates, Jr.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3414. Blacks/Literature/Drama/Media. 3 Credit Hours.

An exploration of representations of racial difference in the fiction and drama of African-American and European-American authors. Primary texts will be read in conjunction with screenings of films, to examine the role of visual media in shaping perceptions. How image-making in theater, film, and television has influenced the way racial difference is characterized in literature, with an emphasis on the relationship between criticism and creative process. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

ENG 3511. Modern British and American Poetry. 3 Credit Hours.

A study of the major works and writers of the first half of the 20th century. Such poets as Yeats, Eliot, Stein, Williams, Pound, examined in their social and political contexts, and with reference to their contributions to the development of Modernism.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3512. Issues in Modern Literature. 3 Credit Hours.

A study of selected literary, cultural, and political issues as they affect recent writing in diverse cultures and nations; offered variously as Postcolonial Literature, Resistance Literature, Literature of Exile, and the like. Note: Consult the Undergraduate English Office or English web page for details. Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 3513. Modern World Fiction. 3 Credit Hours.

A study of significant literary works and developments in fiction in the modern period. Such writers as Flaubert, Joyce, Mann, Proust, and Kafka; or, in the last half of the 20th century, Garcia Marquez, Borges, Saramago, Walcott, Mahfouz, Soyinka, and Grass.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3521. Contemporary Poetry. 3 Credit Hours.

Exploration of the major issues in world poetry of the late 20th century. Theories and practice of postmodernism; the relation of poetry to other arts; the cultural contexts in which poetry is produced.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3522. Contemporary World Fiction in English. 3 Credit Hours.

Recent Anglophone novels and short stories from India, Africa, Canada, Australia, and multicultural England. Memory and self-invention, new forms of narrative, the politics of language, and the forging of national and international conscience in work by such writers as Salman Rushdie, Arundhati Roy, Nuruddin Farah, J.M. Coetzee, Nadine Gordimer, Michael Ondaatje, Peter Carey, Hanif Kureishi, Kazuo Ishiguro, Ben Okri.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3523. Contemporary Drama. 3 Credit Hours.

A study of European and American drama in the latter part of the 20th century, with equal attention to dramatic and theatrical values. May include Wilder, Miller, Williams, Ionesco, Genet, Pinter, Brecht, Duerrenmatt, Shepard, and Mamet.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3524. Advanced Contemporary Literature. 3 Credit Hours.

An examination of important developments in late 20th century literature. May be offered as Post-Modernist literature (such figures as Barth, Pynchon, Borges, Robbe-Grillet, Butor, Duras, Gombrowicz, Kundera, Garcia Marquez, Coover, Winterson) or as Magic Realism (Garcia Marquez, Calvino, Okri, Rushdie). Note: Variable content; consult the Undergraduate English Office or English web page for details.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 3610. Topics in Postcolonial Literature. 3 Credit Hours.

This junior-level seminar takes a focused approach to the literature and cultural production of one or two regions of the formerly colonized world: Africa, the Caribbean, Asia, the Middle East, Latin America, Australia, and the Pacific. Specific concentrations may center around the emergence and future of the postcolonial literature in question, or on the evolution of a genre (novel, Bildungsroman, poetry, or theater) in light of a selected topic (gender, hybridity, exile, nationalism, or globalization, among others). Please consult individual course listings for specific topics.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ENG 3611. Postcolonial Theory. 3 Credit Hours.

This is a research intensive junior-level class that examines postcolonial theory with a particular focus on the methods and approaches that postcolonial theory has made available to literary studies. The theoretical and historical readings will be drawn from a number of foundational texts in the field and are likely to include the work of Edward Said, Frantz Fanon, Aime Cesaire, Ngugi wa Thiong'o, Gayatri Spivak, Homi Bhabha, Eric Hobsbawm, Mary Louise Pratt, Ashis Nandy, among others. Topics of study vary by instructor and might include the politics of culture; the psychology of colonialism; imperialism and popular representation; refusing and resisting empire; narrating territories; aestheticizing empire; inventing the Other; imagining nationalism.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3710. Special Topics in Film. 4 Credit Hours.

Topics vary. Please consult the English Department or instructor for more information.

Repeatability: This course may be repeated for additional credit.

ENG 3711. Intermediate Film. 3 Credit Hours.

In-depth study of particular issues and questions related to cinema history, culture, and theory. Focus may be on a specific period in film history (such as German Expressionist Cinema), an interdisciplinary topic (such as Women and Film), a film genre (such as American Documentary Film), or a textual problem (such as The Development of Film Narrative). Note: Consult the Undergraduate English Office or English web page for details.

Note: This course may be taken a maximum of two times for credit, and all attempts will be factored into a student's cumulative GPA.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for a total of 6 credit.

ENG 3810. Topics in Professional Writing, Editing, and Publishing. 3 Credit Hours.

This course will be a hands-on, practical class in editing and producing a literary journal, with crash courses in typography, copyediting, and Web design. Initially students will edit, copyedit, proofread, typeset, design, print, and bind a chapbook of a fellow student's poetry or fiction. They will then design or redesign an author website. Finally, students will present a mockup of a dream online magazine.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ENG 2001, ENG 2003, ENG 2004, or ENG 2005)

ENG 3811. Theories of Language and Literacy. 3 Credit Hours.

An examination of theories related to language use, both written and oral. This course introduces students to the field of rhetoric and composition. Will include projects that apply theories to classroom and non-academic literacy settings.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3812. Language Variation: Research in Language and Literacy. 3 Credit Hours.

An examination of differences in language practices that reflect the linguistic register in which one is operating or the community to which one belongs. Study of a variety of informal and formal settings, including one-of-a-kind sites; such variations as regional, social, cultural, and gender-related differences, including the English of ESL, African-American, Hispanic-American, and working-class students.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3813. Writers at Work. 3 Credit Hours.

An examination of problems and issues associated with particular kinds of writing - e.g., biography, memoir, political essays. May include reading in contemporary works, but the intention is for students to bridge the gap between theory and practice by producing texts of their own. NOTE: Variable content; consult the Undergraduate English Office or English web page for details.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3814. Topics in Professional Writing. 3 Credit Hours.

This course will be a hands-on, practical class in editing and producing a literary journal, with crash courses in typography, copyediting, and Web design. Initially students will edit, copyedit, proofread, typeset, design, print, and bind a chapbook of a fellow student's poetry or fiction. They will then design or redesign an author website. Finally, students will present a mockup of a dream online magazine.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2001.

ENG 3821. Linguistics and Grammar. 3 Credit Hours.

A review of traditional grammar parts of speech, subordination, pronoun case, parallelism, modifier placement, punctuation, etc., using the theories and techniques of modern theoretical linguistics. Students perfect their own grammatical knowledge by writing and by exploring linguistic analyses of common writing errors and how to correct them. The linguistic properties of effective prose also discussed.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3822. Semantics. 3 Credit Hours.

"You can't cook eggplant too long." Nobody who speaks English has any trouble understanding that sentence. However, it can mean both one thing (perhaps that eggplant is best eaten rare) and its opposite (eggplant can be cooked indefinitely long with no bad effects). This course on meaning in language will investigate meaning that arises from the structure of sentences and their use, as well as the meanings of words and phrases.

Repeatability: This course may not be repeated for additional credits.

ENG 3823. History of the English Language. 3 Credit Hours.

How and why did the language of Beowulf become, successively, the language of Chaucer, of Shakespeare, of Swift, James, and Hemingway? In surveying the historical development of English language and style, this course will focus where possible on literary texts, and seek to demonstrate how useful a historical grasp of language can be to the appreciation of literature.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ENG 3824. Forensic Linguistics. 3 Credit Hours.

A kidnapper leaves a ransom note. Can the writing style be used to identify a suspect? How do we know if someone has consented to a vehicle search? Can an implication count as a refusal? Every step of the legal process involves a close look at language, from creating laws, analyzing spoken or written evidence, interrogating suspects, or determining language crimes such as perjury or threats of violence. This course provides an introduction to forensic linguistics, or the application of linguistics within legal settings, using real life examples of language from forensic evidence, interactions between police and suspects, and courtrooms.

Repeatability: This course may not be repeated for additional credits.

ENG 3900. Honors Special Topics I. 3 Credit Hours.

In this course, we will explore the social context for reading and writing. We want to ask questions that will lead us to see how concepts of literacy can reinforce, elaborate, or threaten established social orders. We want to peek at ourselves in the act of using the written word, and we want to listen in while others are puzzling out the world through books, letters, pamphlets, flyers, newspapers, textbooks, billboards, signs and labels. We will read about the history and anthropology of literacy, and consider closely at least two ethnographic studies that highlight the acquisition of literacy. In short, we will try to see that which is usually invisible: the transparent assumptions and associations that twine through literacy acts.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENG 4096. Studies in Creative Writing. 3 Credit Hours.

This course is meant to serve as a capstone for students who have taken one beginning-level creative writing workshop and one intermediate-level creative writing workshop. The amount of work is equivalent to that required by a senior seminar, including both critical and literary readings in the field, as well as both critical and creative writing responses. The course will culminate in a final project that has both creative and critical components. The organizing theme of the course will change from year to year.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENG 2097, (ENG 2003, ENG 2004, ENG 2005, or ENG 2903), and (ENG 3003, ENG 3004, or ENG 3005)

ENG 4097. Studies in Criticism. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4098. Studies in Modern British Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4196. Studies in Language and Literacy. 3 Credit Hours.

This senior seminar is the culminating course for a concentration or focus on composition and rhetoric. Students will develop a research project based on theoretical approaches to language use and present their findings orally in class and in an extended essay in the style of a journal in the field. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4197. Studies in Poetry. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4198. Studies in Irish Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4297. Studies in Drama. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4298. Studies in Early American Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4397. Studies in Medieval Language and Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4398. Studies in 19th Century American Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4497. Studies in Shakespeare. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4498. Studies in Modern American Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4597. Studies in Renaissance Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4598. Studies in African-American Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4697. Studies in Restoration and 18th Century Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4698. Studies in World Literature. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4797. Studies in Romanticism. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4798. Advanced Topics in Postcolonial Studies. 3 Credit Hours.

A senior seminar, this course re-visits the foundational texts of postcolonial studies addressing such issues as representation, resistance, nationalism, feminism, education, immigration, and globalization. Theoretical texts will be studied in conjunction with colonial and postcolonial literary works and film that exemplify a particular trend or theme. These may include the development of alternate cinemas, re-adaptations of classic literary works, the question of history, the art of revolution, and transnational feminisms. Students will be guided through the completion of a 15-20 pp research paper. Please consult individual course listings for specific topics.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4897. Studies in the Victorian Age. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENG 4898. Studies in Film. 3 Credit Hours.

All 4000-level courses are senior capstone courses designed for advanced English majors. These courses make a close study of a defined body of literary work, using current critical and research methods. Students will be engaged in independent research, reading and critical thought and may be required to write research papers. NOTE: Required for all English majors. Should be taken during the senior year. Variable content; consult the Undergraduate English Office or English web page for details.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

English Education (Elementary) (ENEE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENEE 3296. Tch Lang Arts N:6. 3 Credit Hours.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENEE 3297. Teaching Integrated Language, Reading and Writing. 6 Credit Hours.

An in-depth acquaintanceship and exploration of current theories and programmatic application of sound classroom practices for quality balanced literacy programs. Emphasis will be upon becoming familiar with the separate facets of the language arts/communication skills/literacy skill areas with a strong focus upon the diagnosis and effective teaching of high quality reading and writing programs.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: ELED 3287.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ENEE 3341. Second Language Development across the Curriculum. 3 Credit Hours.

This course begins with an overview of the basic components of English syntax, phonology, morphology, the lexicon, and pragmatics. Subsequently, the course examines the processes of first and second language acquisition and of bilingual & biliterate development. Students will apply this knowledge as they examine English language learners' language and literacy development through academic content areas. The course also offers an overview of multiple assessment models, which will allow students to document English language learners' progress and address their needs with particular instructional methods and strategies. To this end, each student in the course will be required to make and analyze several audio-recordings of the oral speech of one learner and to collect their written work in order to assess their progress both in spoken and written English. Students will be asked to assess the learners' strengths and weaknesses and to develop instructional adaptations/modifications to assist their learner. This field experience will allow students to deepen their theoretical understanding of the structure of English, to apply their knowledge of assessment of language and literacy development and verbal and non-verbal communication, and to learn how to select resources and instructional approaches to address instructional needs of particular English language learners.

Repeatability: This course may not be repeated for additional credits.

English Education (Secondary) (ENES)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENES 3338. Foundations of Language Teaching: Teaching English Language Learners in Grades 4 to 12. 3 Credit Hours.

This course offers students an introduction to theory, research and practice in teaching English language learners in the middle grades. The course begins with an overview of sociocultural characteristics of ELLs, legal responsibilities, and educational and language policies in the United States. Students will also learn the basic theories and principles associated with second language acquisition. Students will explore the philosophies of bilingual and ESL education as well as different program models that address the education of linguistically diverse students. Students will be introduced to an array of contemporary, research-based instructional approaches, including content-based instruction, task-based language teaching, and sheltered English instruction. As a result, they will gain an understanding of how to adapt standards-based lessons for English language learners. Through a practicum component, students will learn to design lessons and assessments for small-group instruction. Students will also develop cross-cultural competence through interactions with ELLs, teachers and school staff in the middle grades. NOTE: Background clearances required.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

ENES 4366. Teaching Literature and Reading 7-12. 3 Credit Hours.

An investigation of what texts ought to be taught in secondary schools, of how to teach them most effectively, and of the extent to which different student populations require different approaches. NOTE: As part of the course, students spend 2-3 hours each week assisting in a language arts classroom.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

ENES 4371. Teaching Oral and Written Communication: 7-12. 3 Credit Hours.

An examination of the knowledge that writers employ when they compose different kinds of texts, of the instructional contexts that are most effective in helping secondary students develop that knowledge, and of the extent to which different student populations require different approaches. NOTE: As part of the course, students spend 2-3 hours each week assisting in a language arts classroom.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Co-requisites: EDUC 4389.

Repeatability: This course may not be repeated for additional credits.

Environmental Engineering Technology (ENVT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENVT 0845. The Environment. 3 Credit Hours.

In today's world characterized by rapid and global environmental changes, it is crucial that citizens have an understanding of the key concepts in environmental science. This course provides students with an introduction to the science behind critical environmental debates and breaks down the requirements for creating and maintaining sustainable ecosystems. A major focus of the course is to develop critical thinking skills and apply them to assess relevant questions such as: How do we predict trends in the growth of populations or climate change? How do human activities impact the nitrogen and phosphorus cycles and how does this in turn affect the environment? How can we quantify and value biodiversity? Should we eat lower on the food chain or are genetically modified crops a sustainable solution? What were the key outcomes of the 2015 U.N. Climate Change Conference in Paris and how will various countries carry out their commitments to protect the environment? This course will enhance awareness of the impacts that our everyday decisions have on the environment and will provide students with strategies to become better environmental stewards. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed CEE 0845, CEE 0945, CEE 1051, ENVT 0945, or ENVT 1051.

Course Attributes: GS, SE, SF

Repeatability: This course may not be repeated for additional credits.

ENVT 0945. Honors: The Environment. 3 Credit Hours.

In today's world characterized by rapid and global environmental changes, it is crucial that citizens have an understanding of the key concepts in environmental science. This course provides students with an introduction to the science behind critical environmental debates and breaks down the requirements for creating and maintaining sustainable ecosystems. A major focus of the course is to develop critical thinking skills and apply them to assess relevant questions such as: How do we predict trends in the growth of populations or climate change? How do human activities impact the nitrogen and phosphorus cycles and how does this in turn affect the environment? How can we quantify and value biodiversity? Should we eat lower on the food chain or are genetically modified crops a sustainable solution? What were the key outcomes of the 2015 U.N. Climate Change Conference in Paris and how will various countries carry out their commitments to protect the environment? This course will enhance awareness of the impacts that our everyday decisions have on the environment and will provide students with strategies to become better environmental stewards. (This is an Honors course.) NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed CEE 0845, CEE 0945 CEE 1051, ENVT 0845 or ENVT 1051.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO, SE, SF

Repeatability: This course may not be repeated for additional credits.

ENVT 1051. Introduction to the Environment. 3 Credit Hours.

Basic environmental issues, systems and change; biogeochemical cycles; human population; ecosystems and their management and restoration; biological diversity, productivity and energy flow; biogeography; environmental health, pollution and toxicology; energy; and global warming. Hands on laboratory exercises are an integral part of the course. The lab exercises are conducted within the class schedule at each campus. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. Students cannot receive credit for this course if they have successfully completed CEE 0845, CEE 0945, CEE 1051, ENVT 0845 or ENVT 0945.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

ENVT 1117. Sanitary Chemistry and Microbiology. 3 Credit Hours.

Wet chemical analysis of environmental importance, sampling, data handling, standard tests, microbiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 and CHEM 1033)

ENVT 2124. Environmental Instrumentation. 3 Credit Hours.

Optical, electrochemical, and instrumental methods of analysis, environmental applications.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENVT 1117.

ENVT 2133. Environmental Field Operations. 4 Credit Hours.

Field aspects of environmental engineering, air and water sampling, stack sampling, bioassay, and environmental aspects of planning.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENVT 2124.

ENVT 4711. Air Pollution Control Systems. 3 Credit Hours.

Principles of design and operation of the major categories of air pollution control equipment. Theory and principles are presented to reinforce extensive application and design components.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENGT 2521 and PHYS 1062)

ENVT 4721. Water and Wastewater. 3 Credit Hours.

Water treatment theory and design including sedimentation, coagulation, softening, iron removal, and chlorination, wastewater treatment theory and design, including grit chambers, activated sludge, trickling filter, and anaerobic digester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ENGT 2521.

ENVT 4731. Hazardous Waste Management. 3 Credit Hours.

Collection and disposal: incineration, landfill, composting, recycling, special wastes, permitting.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENVT 1117.

ENVT 4741. Environmental Modeling. 3 Credit Hours.

Theory and modeling of pollutant transport and diffusion with particular emphasis on air. Applicable principles of boundary layer meteorology, plume rise, air pollution climatology, data selection, and modeling for design. Survey of available models. Demonstrations and student projects with computer applications.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1042 or 'Y' in MATW), PHYS 1062, and ENGT 2521 (D- or higher)

ENVT 4761. Environmental Regulations. 3 Credit Hours.

Environmental regulations at the federal, state, and local levels. Emphasis on procedures for compliance with surveillance and permit requirements.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

ENVT 4982. Honors Independent Study in Environmental Engineering Technology. 2 to 4 Credit Hours.

Student may complete a regular course during a semester in which the course is not offered to meet prerequisite or graduation requirements. An instructor is assigned to supervise the student.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENVT 4983. Honors Directed Study in Environmental Engineering Technology. 1 to 4 Credit Hour.

An opportunity to study specialized topics not covered in currently available courses and providing significant progress towards the technical/professional objectives of the program. An instructor is assigned to define the scope and direct, supervise, and evaluate student progress.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENVT 4991. Honors Independent Research in Environmental Engineering Technology. 2 to 4 Credit Hours.

A project conducted under the supervision of a faculty sponsor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Environmental Health (ENVH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENVH 1103. International Health. 3 Credit Hours.

This course examines avenues of international cooperation in health and explores the most significant health problems and resources in developing and developed countries by focusing on international differences in health status, social/economic/political factors in health care, varied approaches to providing health services, the role of health workers, and the involvement of foundations and multilateral and bilateral agencies. Public Health majors, minors or students studying the Public Health concentration must complete this course with a C or better.

Course Attributes: SI, SS

Repeatability: This course may not be repeated for additional credits.

ENVH 1903. Honors International Health. 3 Credit Hours.

This course examines avenues of international cooperation in health and explores the most significant health problems and resources in developing and developed countries by focusing on international differences in health status, social/economic/political factors in health care, varied approaches to providing health services, the role of health workers, and the involvement of foundations and multilateral and bilateral agencies. Public Health majors, minors or students studying the Public Health concentration must complete this course with a C or better.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SI, SS

Repeatability: This course may not be repeated for additional credits.

ENVH 2102. Environmental Health. 3 Credit Hours.

This introductory course incorporates not only the common concepts associated with environmental health (such as population dynamics, air pollution, water pollution, and land pollution) but also emerging and controversial issues associated with environmental threats to human health, such as emerging diseases, global warming, and biological and chemical weapons. Emphasis is on biological, chemical, and physical sources of exposures, the effects on human health, and the methods of limiting exposures and effects. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HRPR 1001 (may be taken concurrently), PBHL 1101 (may be taken concurrently), 'Y' in PBH1, or 'Y' in CRHR01)

Environmental Science (CST) (ENVS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENVS 3000. Special Topics in Environmental Science. 3 to 4 Credit Hours.

This course is not offered every year.

Variable offerings on special topics that are not part of the standard roster of courses. Check with the Earth & Environmental Science office and/or web site (www.temple.edu/cst/env-sci) for details on Special Topics courses.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (EES 2001, BIOL 1111, BIOL 1911, CHEM 1032, CHEM 1042, CHEM 1952, or 'Y' in BIOW), (GUS 1051, BIOL 1111, BIOL 1911, CHEM 1032, CHEM 1042, CHEM 1952, or 'Y' in BIOW), and (EES 2021, BIOL 1111, BIOL 1911, CHEM 1032, CHEM 1042, CHEM 1952, or 'Y' in BIOW)

ENVS 3027. HAZWOPER Training and the Regulatory Environment. 3 Credit Hours.

This course is typically offered in Spring.

This course is designed to prepare students for working on hazardous waste sites and meet the required training for HAZWOPER certification. Topics include: toxicology, chemical reactivity, monitoring, personal protective equipment, site control, decontamination of equipment, and regulations related to waste sites. Hands-on activities are included based on typical scenarios that working professionals might encounter.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (EES 3021, EES 3025, or 'Y' in CRES01), (CHEM 1031 or 'Y' in CRCH01), (CHEM 1032 or 'Y' in CRCH02), (CHEM 1033 or 'Y' in CRCH03), and (CHEM 1034 or 'Y' in CRCH04)

ENVS 4082. Independent Study: Environmental Science. 1 to 3 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Duplicate Course: This course can only be counted one time for Environmental Science elective credit. Directed reading and research on a specific topic in Environmental Science agreed to by student and faculty member.

Repeatability: This course may be repeated for additional credit.

ENVS 4085. Internship: Environmental Science. 1 to 3 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Duplicate Course: This course can only be counted one time for Environmental Science elective credit. Student gains practical experience by working in a government agency, private industry, or non-governmental organization. NOTE: The student's advisor and a faculty sponsor in a related field arrange internship placement and evaluation.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Environmental Science.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SF

Repeatability: This course may be repeated for additional credit.

ENVS 4198. Environmental Science Senior Seminar. 3 Credit Hours.

This course is typically offered in Spring.

This is the capstone class for the Environmental Sciences major. In this class students will move beyond textbooks and delve into the primary literature by reading, analyzing, and discussing a series of papers that have significantly influenced our understanding of environmental science. These papers will also serve as models for the major assignment of the semester: the preparation of a scientific review paper on a topic chosen by the student. NOTE: For B.S. students only. Senior standing and permission of instructor are required to register for this course.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SF, WI

Repeatability: This course may not be repeated for additional credits.

Environmental Studies (CLA) (ENST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ENST 0842. Sustainable Environments. 3 Credit Hours.

Humans are at a critical juncture in their relationship with the environment. Many of the global changes occurring in the atmosphere, climate, and oceans can be attributed to human activity. While the standard of living has increased for many people across the globe, the technological advancements that have made this possible endanger future generations because of their environmental impacts. Environmental toxins and air pollution are increasing, and fossil fuels and forests are being depleted at unsustainable rates. Now more than ever, the viability of human life depends on the scientific understanding of global environmental change, and on developing science-based policies to both protect the environment and promote human well-being in a just and sustainable manner. Course mission: enhance your capability to be environmentally informed consumers and citizens based on a sound understanding of the ecological, technological, economic, political, and ethical dimensions of environmental sustainability. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed EES/Geology 0842, ENST 0942, or GUS 0842/0942.

Course Attributes: GS, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ENST 0942. Honors Sustainable Environments. 3 Credit Hours.

Humans are at a critical juncture in their relationship with the environment. Many of the global changes occurring in the atmosphere, climate, and oceans can be attributed to human activity. While the standard of living has increased for many people across the globe, the technological advancements that have made this possible endanger future generations because of their environmental impacts. Environmental toxins and air pollution are increasing, and fossil fuels and forests are being depleted at unsustainable rates. Now more than ever, the viability of human life depends on the scientific understanding of global environmental change, and on developing science-based policies to both protect the environment and promote human well-being in a just and sustainable manner. Course mission: enhance your capability to be environmentally informed consumers and citizens based on a sound understanding of the ecological, technological, economic, political, and ethical dimensions of environmental sustainability. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed EES/Geology 0842, ENST 0842 or GUS 0842/0942.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ENST 2001. Environment and Society. 3 Credit Hours.

This course emphasizes the human dimensions of the relationship between societies and their natural environments. Students will be introduced to those ecological principles that are necessary to understand cultural, social, political, and economic questions at a variety of geographic scales.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ENST 2002. Physical Geography. 4 Credit Hours.

Physical Geography is a foundational course for Geography and Environmental Studies, providing a basic introduction to physical phenomena and processes. It is about the earth's spheres: the atmosphere, hydrosphere, biosphere, and lithosphere. We will spend about two-thirds of our time on the basics of earth-sun relations, the earth's atmosphere and oceans, climate and weather, and water resources. The other third of the course is principally about tectonic processes and geomorphology, as well as a culminating section on the earth's biomes (major geographic regions defined mainly by climate and characterized by distinct communities of flora and fauna). The main objectives are to broaden and deepen your understanding of our physical environment. Moreover, you should be able to apply what you've learned to critical analysis of various timely and important issues - such as climate change, vulnerability to environmental hazards, and approaches to mitigating and adapting to environmental change. Though this course focuses on the physical environment, the geographic approach is very much about the relationships between humans and their environments, between nature and society. We will not view the physical environment in isolation from human dimensions and interactions.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 2017. Population Geography. 3 Credit Hours.

This course provides an introduction to human populations with respect to size, composition and spatial distribution, and the issues surrounding the geographic distribution of populations at the world, regional, and local level. Emphasis will be placed on the role of population processes (mortality, fertility, migration), and population structures (age, gender, ethnicity), on economic, social, technological and political development and changes in different parts of the world. Topics covered in this course include: population policies, theories of population change, international and domestic migration flows, cultural and economic influences on population processes, urbanization, and population related issues such as food insecurity, political conflict, poverty, health and disease, and environmental degradation. Lectures and exercises will also familiarize students to publicly available population data and introduce basic analytical techniques used to measure fertility, mortality and migration.

Repeatability: This course may not be repeated for additional credits.

ENST 2022. Gender, Race, Class, and the City. 3 Credit Hours.

This course will focus on the ways that race, class, and gender significantly shape US cities and urban life. The course will explore how urban spaces reflect and perpetuate different relations of power, inequity, and identity. How do multiple and contradictory identities shape one's experience of the city? How are economic, social, and political processes interacting with public policy (or the lack thereof) to determine how resources and power are unequally distributed? How are contemporary urban sustainability initiatives imbued with racial, gender, and class politics? First, we explore critical geographic frameworks for urban analysis that help to explain the social and spatial organization of US cities. We will develop a framework for urban analysis that integrates race, class, and gender, and draws upon the geographic concepts of place and scale. Second, we will use qualitative methods to apply our integrated framework to contemporary metropolitan processes and problems in the Philadelphia area. Key topics that we will address include: everyday experiences of urban life in public and private spaces; environmental (in)justice; neoliberal urban governance; urban social movements; and urban policy and planning. NOTE: The following course numbers are cross-listed: GUS 2022, ENST 2022, or GSWS 2022; students may receive credit for only one of these instances.

Repeatability: This course may not be repeated for additional credits.

ENST 2025. Environmental Law and Regulation. 3 Credit Hours.

This course analyzes how our society protects (or fails to protect) the environment through law and regulation. Students will examine and compare several U.S. environmental laws that are designed to redress environmental damage and to protect the environment. In doing so, they will analyze the relative costs and benefits of various forms of environmental regulation within the context of the American political, administrative, and legal systems. The course focuses on U.S. environmental law, but will also consider the increasingly important field of international environmental law and agreements. Duplicate credit warning: This course was previously taught under ENST 3025. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Course Attributes: SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ENST 2051. The Urban Environment. 3 Credit Hours.

This course examines the interactions between theory, policy, and the urban environment. Students have the opportunity to study the urban environment not only as a physical landscape or natural ecosystem, but also as a constructed landscape shaped by local, regional and global social, economic and political processes. The course addresses issues that continue to challenge urban society, including environmental injustice and racism, degradation of local environmental quality, the impact of local-global relationships on community-scale environments and the commodification of nature.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ENST 2096. Problems of Environmental Quality. 3 Credit Hours.

Specific environmental problems, especially in the Philadelphia area. Students acting as research teams seek better understanding of such problems and practical solutions to them. Duplicate credit warning: This course was previously taught under GUS and ENST 4096. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Course Attributes: SF, WI

Repeatability: This course may not be repeated for additional credits.

ENST 2097. Research Design in Environmental Studies. 3 Credit Hours.

This course is an introductory survey of research design in Environmental Studies. It is designed to allow students to explore what it means to conduct social science research, particularly around issues of sustainability. Students have the opportunity to learn how to research using scholarly articles, write a literature review, and collect and analyze primary and secondary data. Methods covered include case study research, interview design and technique, analysis of census data, and tools commonly used in community and participatory action research. Individual assignments will focus on researching sustainability. This is a writing intensive course and will require extensive writing and revision of your assignments in a semester long assignment sequence.

Course Attributes: SF, WI

Repeatability: This course may not be repeated for additional credits.

ENST 2157. Environmental Ethics. 3 Credit Hours.

A study of the ethical dimensions of several contemporary environmental controversies. The course examines the major theoretical approaches to environmental ethics, including human-centered (anthropocentric), animal-centered (zoocentric), and nature-centered (biocentric and ecocentric) value systems, as well as the most important critiques of these ethical approaches. The course will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption. NOTE: Students will receive credit only one time for any of the following course numbers: ENST 2157, ENST 2957, PHIL 2157, or PHIL 2957.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 2957. Honors Environmental Ethics. 3 Credit Hours.

A study of the ethical dimensions of several contemporary environmental controversies. The course examines the major theoretical approaches to environmental ethics, including human-centered (anthropocentric), animal-centered (zoocentric), and nature-centered (biocentric and ecocentric) value systems, as well as the most important critiques of these ethical approaches. The course will also address specific issues such as biodiversity and wilderness preservation; human use of animals as food, entertainment, and research subjects; environmental racism and toxic dumping; sustainable development, population and consumption.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3000. Special Topics in Environmental Studies. 3 Credit Hours.

Variable offerings on special topics that are not part of the standard roster of courses. Check with the Environmental Studies office and/or web site (www.temple.edu/cla/es) for details on Special Topics courses.

Course Attributes: SF

Repeatability: This course may be repeated for additional credit.

ENST 3001. Earth Ethics. 3 Credit Hours.

What ethical relationship do human beings have to the natural world? What cultural and religious values, conceptions, and assumptions have shaped human interactions with the environment? Through also examining practical issues such as sustainability, technology, and urban living, students will assess individual life-styles and alternative visions of the good life on planet Earth. Note: This course is cross-listed with Religion 3001 and Asian Studies 3001. Students may only receive credit once for these courses: ASST 3001, ASST 3904, ENST 3001, ENST 3904, REL 3001, or REL 3904.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3004. Geography of Natural Resources. 3 Credit Hours.

The material goods you use on a daily basis (e.g. food, phones, furniture) are linked to the production of natural resources. This course helps us to understand how our everyday consumption patterns are connected to resource production and distribution on a global scale and what the social, environmental, and economic impacts of natural resource production are. To explore the complicated intersection of resource management, economics, and development, we examine the literature on natural resource development, allocation, management, and geopolitics as they relate to economic systems and "development." We draw on case studies that include production for the global market, as well as local subsistence systems. Through these cases, we examine the geography of resource flows, from the sites of extraction to the sites of consumption. We consider the role of technology and capital investment in the production of resources, property institutions and regulatory regimes, commodity chains, and sustainability concerns associated with resource production. The production of and competition for the control of key natural resources, by corporations, societies, and states, are critical processes in constructing the global economy. These processes materially transform the conditions of societies, as well as, contribute to the shaping of those societies, politically and economically.

Course Attributes: SE, SI, SP, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENST 2001.

ENST 3015. The Geographic Basis of Land Use Planning. 3 Credit Hours.

An examination of the forces that influence land use planning in and around American metropolitan regions. Considers economic perspectives (land values), public interest perspectives (zoning subdivision, housing and building codes, redevelopment and renewal programs, etc.), and social perspectives of land use. Also examines separately housing, commercial locations, and industrial development. Duplicate credit warning: This course was previously taught under GUS and ENST 4015. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

ENST 3023. Police, Prisons, and Pollution. 3 Credit Hours.

In 2001, a group of farmworkers, environmental justice activists, and anti-prison organizers in California held a conference called "Joining Forces: Environmental Justice and the Fight against Prison Expansion." The goal was to interrogate prisons as forms of environmental racism and injustice and to build coalitions between the anti-prison and environmental justice movements. This course takes as a starting point an insight made by a group of youth participants at that conference: that the greatest threats to their communities constituted "three Ps," police, prisons, and pollution. We will explore critical texts and organizing surrounding police, prisons, and pollution. How do struggles for environmental justice intersect with organizing against police and prisons? How are racial and class disparities heightened through overlapping geographies of policing, incarceration, and environmental pollution? How do policing and imprisonment operate as environmental toxins themselves, much like pesticides and greenhouse gas emissions? As a major component of the course, students will work on group projects examining the intersections of policing, incarceration, and pollution.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3051. Environmental Policy Issues. 3 Credit Hours.

How are environmental policies formulated and implemented in the U.S.? Topics include the role of citizen participation in decision-making, the place of environmental impact assessment, environmental justice and equity, intergovernmental relations, and environmental obligations of the U.S. toward less developed countries.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3052. Environmental Problems in Asia. 3 Credit Hours.

Japan is used as an introduction and model for examining environmental issues in several East and Southeast Asian countries. Emphasis is on deforestation, river basin development, urban planning, ecotourism, and the role of non-governmental organizations. Note: This course is cross-listed with Geography and Urban Studies 3052 and Asian Studies 3052. Students may only receive credit once for these courses: ASST 3052, ENST 3052, or GUS 3052.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3053. Climatology. 3 Credit Hours.

In this course, we study global climate patterns and the underlying processes that shape them. Among the specific topics we examine are: global distribution of individual climate elements, upper-atmospheric waves and jet streams, use of web-based maps and data, construction of climate models, U.S. climate regions, and major global climatic regions. In the course's final weeks, we consider historic climates, climate change mechanisms, and forecasted future climates.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

ENST 3054. Energy, Resources and Society. 3 Credit Hours.

Vital nonrenewable resources are identified and their global and North American distribution, character, and utilization studied. Special attention to energy sources now in short supply and to benign renewable sources for future needs. NOTE: This course was previously titled "Energy, Resources, and Conservation" and students can receive credit only once for GUS 3054 or ENST 3054.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

ENST 3055. Environmental Hazards and Disasters. 3 Credit Hours.

This course provides a synthesis of the social and natural dimensions of disasters. Students become familiar with the concept that disasters emerge when the specific characteristics of hazards (e.g. volcanoes, droughts, floods, tsunamis) intersect with social vulnerability (e.g. class, race, gender). Case studies from around the world are used to elaborate and explore this concept. Duplicate credit warning: This course was previously taught under GUS and ENST 4051 and was previously titled "Geography of Hazards." Students who have earned credit under the prior number(s)/title will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

ENST 3056. Political Ecology. 3 Credit Hours.

This course addresses the broad themes of political ecology as an academic discipline as well as a set of theoretical and methodological tools. Historically political ecology has focused on the rural developing world, but more recent work has branched out into environmental justice and resource use in industrialized societies. The course covers the concepts that have distinguished political ecology from other types of analysis like cultural and human ecology. It also introduces students to the construction of theory including a consideration of space, scale, justice, feminism, property, and nature. Finally, the course presents students with diverse case studies that may include topics like resource use, mining, bio-prospecting, forestry, conservation, fisheries, "sustainable" development, and eco-tourism. Duplicate credit warning: This course was previously taught under GUS and ENST 4056. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated.

Course Attributes: SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3057. Sustainable Cities. 3 Credit Hours.

This course introduces the concept of urban sustainability and explores environmental problems linked to urbanization, drawing on historical analysis, social theory, landscape ecology, and city planning/design practice. Can we make cities sustainable places to live? If so, how? The goal of this course is to provide students with an opportunity to learn about the major environmental challenges facing cities in the developed and developing world and to learn about innovative solutions that cities are adopting to address them. We will also explore how the political, social, and environmental context affects a city's ability to implement sustainable policies. The course will cover topics such as sustainable city strategies, ecological footprints, urban metabolism, mega-cities, urban ecology, cities and climate change adaptation and mitigation, water management, urban gardening/farming, measuring sustainability, planning strategies, smart growth, carbon neutral cities, metropolitan governance, green buildings, environmental justice, green infrastructure, and green investment strategies, etc.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3058. Environment and Development. 3 Credit Hours.

Is capitalism at the heart of environmental change? What does it mean to divide nations into "developed" and "developing" countries? Whose definition of progress guides policy promoting sustainable urbanization and development? How do we create parks and green infrastructure without displacing people? This course will contextualize these and related questions to understand and think critically about environment and development. By the end of the semester, you will be able to speak, read and write with fluency about contemporary nature-society relations using concrete examples drawn from historical and contemporary contexts. This course is cross-listed with GUS 3058. Duplicate Credit Warning: This course was previously offered as ENST 3097. Students may receive credit for one of the following course numbers: ENST 3097, GUS 3097, ENST 3058 or GUS 3058.

Course Attributes: SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

ENST 3061. Fundamentals of Cartography. 3 Credit Hours.

This course is designed to introduce students to cartography and computer mapping. Through hands-on exercises, students will manipulate data, compare map projections, design, execute, and reproduce small-scale thematic maps suitable for publication using computer software. A final project involves the production of maps in color. NOTE: No prior computer knowledge is necessary.

Repeatability: This course may not be repeated for additional credits.

ENST 3062. Fundamentals of Geographic Information Systems. 3 Credit Hours.

This course teaches the theory and practical use of Geographic Information Systems (GIS). Major components of the course include vector and raster spatial data models and operations, including vector overlay and raster map algebra. At the end of the course students are expected to have an understanding of elementary GIS theory, working knowledge of a GIS software package, and the ability to develop GIS-based solutions to geographic modeling and analysis tasks. Note that students who take GUS 3062 will not receive duplicate credit if they register for ENST 3062.

Repeatability: This course may not be repeated for additional credits.

ENST 3063. Environmental Remote Sensing. 3 Credit Hours.

This course will teach the basic principles of environmental remote sensing using aerial photography and satellite imagery. Topics covered include the mechanics of aerial photography and satellite remote sensing systems, photointerpretation, image rectification, and image processing and classification. Emphasis will be on urban and environmental applications.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENST 3062 or GUS 3062)

ENST 3064. Qualitative Methods. 3 Credit Hours.

This class is designed to expose students to the purpose, scope and procedures of qualitative research, applied in different disciplines but especially in environmental studies, geography, and urban planning. It provides an opportunity for students to create qualitative research design schemes, and critically analyze research using these methods. Note: This course is equivalent to GUS 3064; students may receive credit for either ENST 3064 or GUS 3064.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 2197 or ENST 2097)

ENST 3065. Census Analysis with GIS. 3 Credit Hours.

Introduction to analysis with Census data products for the US, including Decennial Census and American Community Survey. Methods for analyzing segregation, environmental justice, migration and mobility, commuting trends, etc. Students will learn how to combine Census data with data from other sources using incommensurate geographies. Heavy emphasis on open source tools. Note: Formerly offered as GUS/ENST 4068. Students who have received credit for GUS 4068, ENST 4068 or GUS 3065 will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ENST 3067. GIS and Location Analysis. 3 Credit Hours.

This course examines the concepts and techniques of location analysis - how to 1) describe the spatial arrangements of features on the earth's surface and 2) prescribe the best location or spatial arrangement of features for a particular activity - for economic and social service applications. The course introduces concepts in Geographic Information Systems (GIS) and spatial statistics to address issues of location. NOTE: Students who have already earned credit for GUS 3067 will not earn additional credit for ENST 3067.

Repeatability: This course may not be repeated for additional credits.

ENST 3068. Environmental Impact Assessment. 3 Credit Hours.

This course addresses the methods of environmental impact assessment (EIA). During the course of your environmental careers, most of you will be expected to conduct, reference, evaluate, or otherwise incorporate EIA into your work. Most EIA's incorporate a diverse set of research methods - and an understanding of a wide-ranging set of research methodologies, and when and how to deploy them - is a central objective for this course.

Repeatability: This course may not be repeated for additional credits.

ENST 3069. GIS for Health Data Analysis. 3 Credit Hours.

Geographic Information Systems (GIS) has emerged as an essential tool for health researchers and practitioners. This course provides an introduction to the most common geographic methods utilized in health research and spatial epidemiology for mapping and analyzing health disparities, disease risk factors, health services and geographic variation in health outcomes and disease. Through lecture and laboratory exercises students will learn how to create and edit spatial data, create disease maps, develop neighborhood-based measures, conduct geographic cluster detection and point pattern analysis, map geographic health disparities, measure access to health services, and critically assess potential study bias introduced from missing geographic data or positional accuracy. Selected case studies will be presented in order to highlight methods and techniques and hands-on experience will be gained through laboratory exercises and real-world applications. Guest speakers will be invited to share their real-world examples of GIS in health research and practice.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3161, ENST 3161, SOC 3201, STAT 2103, PBHL 2219, CJ 2602, or ANTH 3771)

ENST 3071. Health Geography. 3 Credit Hours.

Health geography applies concepts and methods from the discipline of geography to study medical and health related events and topics. Health geography has a close disciplinary tie with epidemiology, biostatistics, medical ecology and medical anthropology, but it is differentiated by its focus on the spatial distributions of health/medical related events. By focusing on geographic scale and the location of health events we can more accurately account for data variability and provide a more accurate representation of a population's health. Throughout the course, we will examine numerous examples of how geographic scale and measurement can influence study results or how health resources or events appear to be distributed. The class will provide a broad introduction to medical geography touching on the topics of disease ecology, geographical information systems for public health, disparities in health and healthcare, and various methods and data sources for analyzing health/medical data. Duplicate credit warning: This course was previously taught under ENST and GUS 4071. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated. NOTE: This course was previously titled "Medical Geography." Students who completed the course under the prior title will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

ENST 3085. Internship in Environmental Studies. 3 Credit Hours.

This course is offered in both fall and spring semesters to accompany on-the-job training with local consulting firms, planning agencies, private companies, non-profits, and various state, local and federal agencies of government, mostly but not exclusively in the Philadelphia metro area. Students will apply the knowledge and skills they have acquired in an array of both natural and social science courses to address some of the major environmental challenges on local, regional, and international scales. Students need to arrange their own positions, usually after consulting with the department's internship coordinator. The search for a placement should start several months in advance of the semester or summer session when the internship will take place. The course is available to GUS/ES majors only. NOTE: The student's advisor and/or Environmental Studies Internship Coordinator arrange internship placement and evaluation. Duplicate credit warning: This course was previously taught under GUS 4085/ENST 4085. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

ENST 3152. U.S. Environmental Policy. 3 Credit Hours.

An analytical examination of the development and execution of governmental policies in such areas as air and water pollution control, control of atomic energy, and planning of space exploration program.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3161. Spatial Statistics. 3 Credit Hours.

This course provides an introduction to statistical analysis with an emphasis on urban applications. The course covers basic statistical principles of sampling, probability, and tests of significance, measures of association; ordinary least squares regression; factor, principal component and cluster analysis and an introduction to spatial applications of these tools. The course is focused on the practical application of these techniques through exposure to the rationale and principles underpinning them. Students will attend lectures and complete problem sets that provide practical experience in the application of the theoretical concepts and methodologies. Note: This course is equivalent to GUS 3161; students may receive credit for either ENST 3161 or GUS 3161.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, MATH 1021, MATH 1022, MATH 1041, MATH 1941, 'Y' in MC3, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3A, 'Y' in MC3S, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

ENST 3170. Methods in Archaeology. 3 Credit Hours.

A series of practical, topical courses which deal with aspects of archaeological fieldwork and laboratory analysis. The topic or focus of the course varies by semester and includes: field methods; ceramic analysis; lithic analysis; soils and stratigraphy.

Repeatability: This course may be repeated for additional credit.

ENST 3175. Heritage Management in Archaeology. 3 Credit Hours.

The United States and other governments of the world have legal mandates to manage cultural resources on behalf of the public. This course focuses on the archaeological component of cultural resources management in the United States and its linkage with environmental and developmental planning. Participants are given a working knowledge of how the system works, and how to work within it as a professional through a series of readings, classroom discussions, and hands-on exercises. Topic coverage includes: relevant legislation; the phased approach to archaeological and historical research; state and federal review procedures; proposal writing; interacting with clients, native peoples, and the public; professional ethics and standards. The nature of heritage management in other countries is considered for comparative purposes and as a way of illuminating the historical, socio-economic, and legal factors that have shaped the practice in the United States. NOTE: This course helps to satisfy topical requirements in the Anthropology major and the Environmental Studies major.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ENST 3189. Field Session in Archaeology. 3 Credit Hours.

Techniques and concepts of field archaeology. Students will be expected to spend the greatest part of the session in the field during the excavation of prehistoric and historic sites.

Repeatability: This course may be repeated for additional credit.

ENST 3214. North American Environmental History. 3 Credit Hours.

This course examines the interactions between human societies and the natural world in North America. That relationship is complex: the environment both reflects people's influences and affects human history. Through lectures, readings, and discussion, participants in this course will examine this reciprocal relationship. Issues to be discussed in the course include Native American management of the environment; the effects of the European ecological invasion; resource exploitation in the industrial era; the foundations of the preservationist and conservationist movements at the beginning of the 20th century; the evolution of 20th century environmentalism; and the historical context of current environmental problems.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3221. Land System Science. 3 Credit Hours.

This course will provide scientific and theoretical foundations and practical applications of land system science. The course will include a description of the main theories and conceptual frameworks used to understand complex interactions between human decisions and ecological processes that derive into changes in the land system. The course also explores the sustainability implications of such changes for biodiversity conservation and people's wellbeing across different locations and scales. Students will become familiar with available technologies for monitoring, modeling and predicting land system change. The course will also draw on concepts and techniques from landscape ecology, land system modeling and scenario building to teach students how to assess social and ecological consequences of land system change and to inform land use decisions. This course is cross-listed with GUS 3221.

Repeatability: This course may not be repeated for additional credits.

ENST 3265. International Environmental Policy. 3 Credit Hours.

International negotiations and agreements on environmental problems, and comparisons of domestic environmental policymaking among selected countries. Special attention to negotiations on atmospheric and oceanic policies, international regulation of nuclear materials, and environmental aspects of international trade agreements. NOTE: Students will receive credit only once for either POLS 3265 or ENST 3265.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3307. Transportation and Culture. 3 Credit Hours.

Students will learn to approach the modern geography of transportative possibility from a critical standpoint. Rather than accepting this contemporary geography as being the outcome of supposedly "superior" transport technologies' rendering marginalized technologies obsolete, students will examine how processes of cultural, political, and environmental struggle have shaped, opened up, and in some cases limited the modern array of possibilities for human mobility. Waterborne, animal-based, and human-powered modes of transportation will receive special attention, as will ongoing debates and struggles over automobile planning and mass transit. The history of transportation will be presented as necessarily entangled with parallel histories of public protest, working-class knowledge, emergency logistics, human-animal relations, guerilla warfare, unrealized technologies, and political oppression. The course readings will look at many parts of the world: the United States, Canada, Southeast Asia, North Africa, the Middle East, China, Western Europe, the Caribbean, and Polynesia.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3314. Food Studies: A Geographical Perspective. 3 Credit Hours.

This course introduces students to key issues in food studies from a geographical and environmental perspective. The course includes an overview of the agricultural transitions, and examines issues of food security, access and control, ultimately focusing attention on the question of how to produce more just food systems. A major goal of this course is to give students a basic foundation from which to understand and interpret food systems as well as to familiarize students with today's major issues in research on food. Note: This course is equivalent to GUS 3314; students may receive credit for either ENST 3314 or GUS 3314.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 3511. Sociology of the Environment. 3 Credit Hours.

In the first half of the course, we will focus on the interaction among four components: population size, social organization, environmental conditions and available technology. We will consider issues such as the relationships among the technology of farming, the volume of agricultural production and the availability of labor for economic development. We will also learn about "input-output" models focusing on the intensity of resource use as well as problems of waste management. In the second half of the course, we will concentrate on issues of social organization. What kinds of political arrangements do we see for the management of waste? How does the transfer of natural resources from resource-rich but economically underdeveloped countries to the United States and other industrial societies affect the social, economic and political arrangements of both groups of countries? Finally, we will address the question of whether the social will can be organized in such a way as to reduce the pressure on the environment and remaining natural resources.

Repeatability: This course may not be repeated for additional credits.

ENST 3596. Energy, Ecology, and Economy. 3 Credit Hours.

After surveying the elements of energy and ecology, and reviewing the basics of economics, this course investigates the interaction of the three. Each of the major nonrenewable and renewable energy sources is examined in light of its "eco-feasibility." The potential of energy conservation is examined, and the need for energy/environmental/economic (3-E) policy is debated. Some speculations about future 3-E scenarios are offered, as the U.S. and the rest of the world face their energy, ecological, and economic problems.

Course Attributes: SE, SF, SP, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901) and (ECON 1102 or ECON 1902)

ENST 3900. Honors Special Topics. 3 Credit Hours.

Variable Honors offerings on special topics that are not part of the standard roster of courses. Check with the Environmental Studies office and/or web site (www.temple.edu/cla/es) for details on Special Topics courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ENST 3904. Honors Earth Ethics. 3 Credit Hours.

What is, or should be, our relation to the natural world? Especially since we are presently living in a modern urban environment, have we perhaps outgrown nature? Is it something we have mastered? Is it primarily a luxury of sorts that we can go to for periodic enjoyment or relaxation? On the other hand, why do we seem to be in a burgeoning environmental crisis? Is it just greed? Too many people? Insufficient technology? How did we get to where we are? Or more immediately--and perhaps deeply--what fundamental beliefs, attitudes, and values shape our everyday actions, how we perceive and use (or misuse) the earth? What creative alternatives can we find, and how can we apply them? In addressing these kinds of questions we will explore both Western and Asian ways of conceiving and interacting with the natural world, past and present. Our approach will also be interdisciplinary, including materials from art, film and literature, as well a range of academic disciplines. NOTE: This is an University Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 4000. Special Topics in Environmental Studies. 3 Credit Hours.

Seminars on special topics vary according to the instructor. Check the course schedule for specific seminar topics.

Repeatability: This course may be repeated for additional credit.

ENST 4017. Health and Environment Seminar. 3 Credit Hours.

This course addresses the relationship between community-level characteristics, such as neighborhood socioeconomic disadvantage, with health outcomes, with an emphasis on health behaviors such as substance use, exercise, and healthy eating. Access to resources such as health services and nutritious food will be examined, as will exposure to harmful or risky environment conditions that can promote disease. A methodological focus will address how environmental influence on health is analyzed, as well as how individual-level characteristics such as age, sex, and race/ethnicity may moderate such influences. The role of community level factors in health disparities will also be examined. NOTE: Students can receive credit only once for either: ENST 4017, GUS 4017, ENST 4917, or GUS 4917.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ENST 4061. Cartographic Production. 3 Credit Hours.

A course concerned with aspects of storage, retrieval, and display of information within geographic information systems. Emphasis will be placed on computer mapping. NOTE: This course is cross-listed with GUS 4061; students will only receive credit for one course from GUS 4061 and ENST 4061.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENST 3061 or GUS 3061)

ENST 4064. Web Mapping and GIS. 3 Credit Hours.

In this course, students will explore theoretical and practical concepts of Web Mapping (GIS and spatial data visualization on the Internet). From a theoretical perspective they will study advantages and techniques for publishing, visualizing and accessing maps and data on the Internet. This entails examining architectures of Web GIS/Web mapping systems, markup languages (e.g. HTML, XML, SVG, and KML), scripting languages, screen cartography, data sharing and geoportals, as well as social and critical perspectives toward web mapping. From a practical perspective they will learn to develop Web mapping applications including static and interactive platforms. They will also learn and work with some well-known open source software and libraries.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

ENST 4065. Urban Geographic Information Systems. 3 Credit Hours.

The purpose of this course is to build on the basic principles of the introductory GIS course to demonstrate how GIS may be applied to the analysis of physical and human systems. Topics of the course include vector and raster data integration; address matching, geocoding, and network analysis; terrain and hydrological analysis; and interpolation of environmental and population data. At the end of the course the student is expected to grasp advanced GIS analysis and modeling concepts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

ENST 4066. Environmental GIS. 3 Credit Hours.

Geographic Information Systems are widely used to investigate environmental processes and to develop solutions to environmental issues. This course will build upon concepts introduced in Fundamentals of GIS to investigate how the techniques, data, and interpretations from GIS analysis are applied across a variety of environmental fields. Topics to be covered include natural hazard vulnerabilities, global climate change, renewable energy potential, environmental health, and conservation.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

ENST 4068. Census Analysis with GIS. 3 Credit Hours.

Introduction to analysis with Census data products for the US, including Decennial Census and American Community Survey. Methods for analyzing segregation, environmental justice, migration and mobility, commuting trends, etc. Students will learn how to combine Census data with data from other sources using incommensurate geographies. Heavy emphasis on open source tools.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

ENST 4072. Advanced Remote Sensing. 3 Credit Hours.

This hands-on course will provide skills and knowledge for the effective and efficient processing and analysis of satellite data for advanced applications with emphasis in the application of remote sensing for detecting and monitoring social and environmental changes. The course will include a semester-long project where students will apply the concepts and procedures learned to their own research or a particular topic of their interest.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062) and (GUS 3063 or ENST 3063)

ENST 4073. Geovisualization. 3 Credit Hours.

Maps can be powerful devices for communication, but also tools for exploration of relationships among social and physical processes manifesting in space. This computer-intensive course will focus on this dual purpose of maps as tools for visual communication and visual thinking. You will create data-driven products that combine geographic and statistical visualizations for static, interactive, and animated display. Previous experience with a programming language will be helpful. A previous course in cartography is recommended but not required. Heavy emphasis on open source tools.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3161 or ENST 3161)

ENST 4082. Independent Study: Environmental Studies. 1 to 3 Credit Hour.

Duplicate Course: This course can only be counted one time for Environmental Studies elective credit. Directed reading and research on a specific topic in Environmental Studies agreed to by student and faculty member.

Repeatability: This course may be repeated for additional credit.

ENST 4117. Seminar in Environmental Archaeology. 3 Credit Hours.

This course introduces the student to the techniques and disciplines used in conjunction with archaeology to understand the environmental context and paleo-ecology of prehistoric cultures, as well as the nature of the archaeological record itself. Included in this survey are geology, soil and sediment analysis, geomorphology, palynology, ethnobotany and general floral analysis, phytolith analysis, zooarchaeology, and the analysis of blood and other residues found on artifacts. The range of contributions possible from interdisciplinary research will be explored in addition to how to design such research, how to communicate with specialists in other fields, and how to use existing sources of data to solve archaeological problems.

Repeatability: This course may not be repeated for additional credits.

ENST 4198. Senior Research Seminar. 3 Credit Hours.

Students engage in research projects, either as individuals or part of a team. Seminar meetings are devoted to analysis of a small set of readings, common discussion of research issues, and preparation for life beyond the baccalaureate. NOTE: Open only to Environmental Studies students.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Environmental Studies.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENST 2097.

ENST 4917. Honors Health and Environment Seminar. 3 Credit Hours.

This course addresses the relationship between community-level characteristics, such as neighborhood socioeconomic disadvantage, with health outcomes, with an emphasis on health behaviors such as substance use, exercise, and healthy eating. Access to resources such as health services and nutritious food will be examined, as will exposure to harmful or risky environment conditions that can promote disease. A methodological focus will address how environmental influence on health is analyzed, as well as how individual-level characteristics such as age, sex, and race/ethnicity. The role of community level factors in health disparities will also be examined. NOTE: Students can receive credit only once for either: ENST 4017, GUS 4017, ENST 4917, or GUS 4917.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO, SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

Epidemiology and Biostatistics (EPBI)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

EPBI 2219. Biostatistics and Public Health. 3 Credit Hours.

This course is designed to provide students with a solid background in applied biostatistics in the field of public health. Specifically, the course includes an introduction to the application of biostatistics and a discussion of key statistical tests. Appropriate techniques to measure the extent of disease, the development of disease, and comparisons between groups in terms of the extent and development of disease are discussed. Techniques for summarizing data collected in samples are presented along with limited discussion of probability theory. Procedures for estimation and hypothesis testing are presented for means, for proportions, and for comparisons of means and proportions in two or more groups. Multivariable statistical methods are introduced but not covered extensively in this undergraduate course. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

EPBI 2301. Public Health Beyond Borders. 3 Credit Hours.

Public Health Beyond Borders is a course that will introduce you to the world of disease detectives to solve public health challenges in global (i.e., global and local) communities. You will learn about conducting disease investigations to support public health actions relevant to affected populations. You will discover what it takes to become a field epidemiologist through hands-on activities focused on promoting health and preventing disease in diverse populations across the globe.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

EPBI 2361. Epidemiology 360: Determinants, Disease and Health-related Outcomes. 3 Credit Hours.

This course will provide introductions to the major causes of morbidity and mortality in the US and key determinants of those diseases from an epidemiologic perspective. The course will familiarize students with the major sources of data, the basic methods for estimating burden of diseases or prevalence of exposures, the key risk factors for diseases or outcomes of determinants, and the strengths and limitations of surveillance systems and data collection methods, as well as public health efforts to address these issues. This class will encourage students to decide for themselves what the most pressing health issues facing populations today are and think critically about initiatives that are intended to address those issues.

Repeatability: This course may not be repeated for additional credits.

EPBI 3101. Introduction to Epidemiology. 3 Credit Hours.

This course explores the application of epidemiology practices in public health including using and interpreting data, calculating measures of health status, and identifying various research study designs used in epidemiologic studies. Additionally, the course will apply the steps in epidemiological disease investigation in order to become familiar with the methodology used in studying an epidemic outbreak. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

EPBI 3102. Introduction to Research Methods. 3 Credit Hours.

This course will cover the basic concepts of public health research, including study designs, human subjects protection, quantitative and qualitative research techniques, and data collection. These concepts will be applied to public health settings and topics. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

EPBI 3203. Applied Survey Methods. 3 Credit Hours.

This course addresses theoretical and practical aspects of conducting survey research in human populations. We will discuss various types of self-report data, including questions to assess knowledge, attitudes, behaviors, and perceived health and well-being. Design issues include wording of items and response scales, sampling, and respondent and interviewer/staff burden. Implementation issues include methods of administration, interviewer training, and participant recruitment. The primary focuses of this course are observational study designs using probability and non-probability sampling.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (EPBI 3101 or 'Y' in CREP02) and (EPBI 2219 or 'Y' in CREP01)

EPBI 3205. Introduction to Statistical Computing. 3 Credit Hours.

This course is designed to provide students with a solid foundation in statistical computing using SAS and R programming software, which are standard analytic packages in research, business, and public health practice. The course includes an introduction to data management principles and data documentation followed by a series of SAS and R modules. These modules cover syntax and logic for writing SAS and R code to: manipulate datasets, including but not limited to data cleaning and recoding continuous and categorical variables; conduct descriptive analyses; and interpret output for statistical tests for measures of disease frequencies.

Repeatability: This course may not be repeated for additional credits.

EPBI 3382. Independent Study in Public Health. 1 to 6 Credit Hour.

Students in this course pursue supervised independent projects on issues related to public health. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: Registration must be preapproved by faculty before registration.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

Film and Media Arts (FMA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

FMA 0843. Race and Ethnicity in the Cinematic Arts. 3 Credit Hours.

Movies, cinematic arts, episodic narrative, and media arts have played a central role in how we understand diverse racial and ethnic identities. The course will study Hollywood as well as more recent streaming studios such as Amazon and Netflix as they engage in evolving portrayals of African American, Indigenous, Asian American, South American and Mexican descent, Italian American identities and more. From early cinema to the present the course will ask critical questions such as: How are stereotypes built upon century-old cinematic and moving image traditions and how are they functioning still today? What cinematic representations of "self" have creators from marginalized racial and ethnic groups developed as a source of engagement and resistance to mainstream commercial views? How do diverse racial and ethnic cinematic representations intersect with gender, class, sexual orientation, religion, disability, and age? The course will trace the impact of racism throughout the history of cinematic arts as well as provide opportunities for group discussion to share personal experiences with diversity through viewing, researching, and critiquing cinematic and media arts. Note: Prior to Fall 2023, this course was titled "Race and Ethnicity in American Cinema." NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed FMA 0943.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

FMA 0869. The Cinematic City. 3 Credit Hours.

This course takes students to cities around the world, and across time, examining how national cinemas have richly depicted and interpreted urban life during the last hundred years. We will study both screen images as well as the business structure that produces them and the audiences that view them. The urban focus of the course is international, including Tokyo, London and Rome, but the "home" setting is Philadelphia itself. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed FMA 0969. Also, prior to fall 2023, the title for FMA 0869 was "Imaginary Cities."

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

FMA 0943. Honors Race and Ethnicity in the Cinematic Arts. 3 Credit Hours.

Movies, cinematic arts, episodic narrative, and media arts have played a central role in how we understand diverse racial and ethnic identities. The course will study Hollywood as well as more recent streaming studios such as Amazon and Netflix as they engage in evolving portrayals of African American, Indigenous, Asian American, South American and Mexican descent, Italian American identities and more. From early cinema to the present the course will ask critical questions such as: How are stereotypes built upon century-old cinematic and moving image traditions and how are they functioning still today? What cinematic representations of "self" have creators from marginalized racial and ethnic groups developed as a source of engagement and resistance to mainstream commercial views? How do diverse racial and ethnic cinematic representations intersect with gender, class, sexual orientation, religion, disability, and age? The course will trace the impact of racism throughout the history of cinematic arts as well as provide opportunities for group discussion to share personal experiences with diversity through viewing, researching, and critiquing cinematic and media arts. (This is an Honors course.) Note: Prior to Fall 2023, this course was titled "Honors Race and Ethnicity in American Cinema." NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed FMA 0843.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

FMA 0969. Honors: The Cinematic City. 3 Credit Hours.

This course takes students to cities around the world, and across time, examining how national cinemas have richly depicted and interpreted urban life during the last hundred years. We will study both screen images as well as the business structure that produces them and the audiences that view them. The urban focus of the course is international, including Tokyo, London and Rome, but the "home" setting is Philadelphia itself. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed FMA 0869. Also, prior to fall 2023, the title for FMA 0969 was "Honors Imaginary Cities."

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

FMA 1141. Film, Video and Interactive Foundations I. 4 Credit Hours.

An introductory course in media arts which examines the history, theory and practice of image making, sound production, and new technologies. Students will explore both hands-on production processes and theoretical foundations of film, video, and audio in a range of technologies including digital video and photographic formats, studio, and computerized digital settings. Coursework will emphasize individual students' rigorous exploration of creative, personal visions, along with mainstream applications.

Repeatability: This course may not be repeated for additional credits.

FMA 1142. Film, Video and Interactive Foundations II. 4 Credit Hours.

A continuation of media arts theory and practice with an increased emphasis on aesthetics, genres, writing, and project design. Assigned production projects and readings include documentary, fictional, and experimental formats.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1141 or 'Y' in CRFM01)

FMA 1143. Media Arts Combined. 4 Credit Hours.

An accelerated introductory course in media arts production and theory, which examines image making, sound, and new technology for those students who already have a production background. The course will further develop hands-on production processes, while relating them to the theoretical and expressive foundations of media arts. Course work will include production projects, readings and written assignments. NOTE: This course is for Honors candidates or FMA transfer students only. FMA 1143 (0110) counts in place of FMA 1141 (0100) and FMA 1142 (0101).

Repeatability: This course may not be repeated for additional credits.

FMA 1144. Media Arts for Non-Production Majors. 4 Credit Hours.

This course introduces basic media arts production to non-production majors. The focus will be on developing technical and conceptual skills in a manner that will enhance the student's understanding of the medium firsthand. This practical experience will provide a deeper understanding of the close relationship between media theory and media practice. This course will explore the aesthetics and mechanics of shooting digital video, the importance of sound and how to record and mix it, and how to develop a project from concept to final cut. Course work will include classical theoretical readings and written assignments, which will address a range of narrative, documentary and experimental approaches to moving the image. The class will also offer an historical and theoretical context in which to think about technique and form, and general media literacy. The projects will cover the basic stages of short video production, diverse visual strategies, and how to apply them in several camera and sound exercises, short production exercises, and one final project that grows out of one or more theoretical and formal approaches we explored during the semester. A fundamental premise of the course is that we are exploring the moving image as an art form: an intellectual process with creative choices.

Repeatability: This course may not be repeated for additional credits.

FMA 1171. Media & Culture. 3 Credit Hours.

An overview of cultural production, distribution, and reception explored through lectures, readings, and screenings. Equally oriented towards practical concerns such as the economics of the arts and the mass media, and theoretical debates on the social, political, economic and aesthetic forces that shape culture.

Repeatability: This course may not be repeated for additional credits.

FMA 1172. Introduction to Film and Video Analysis. 3 Credit Hours.

This course will provide students with a conceptual and theoretical tools to analyze film, television, and video. Screenings, lectures, and readings will emphasize critical analysis, form, and content.

Repeatability: This course may not be repeated for additional credits.

FMA 1241. Mobile Media Filmmaking. 4 Credit Hours.

This course is a workshop designed to allow students to explore ideas of culture, art and national identity using the city as their backdrop. Using "pocket" technology such as smart phones, digital cameras, iPads, etc., students will produce topical and conceptual film projects and develop an individual mode of expression. All projects will be collected at a class website for worldwide dissemination. The course requires no media production background and will use mobile technology for production, editing, and distribution. In doing so, the course will explore the blurring lines between high and low culture, and between professional and amateur media production.

Repeatability: This course may not be repeated for additional credits.

FMA 1451. Survey of New Media. 3 Credit Hours.

An introduction to the history, theory and aesthetics of digital and networked media arts. This course explores critical perspectives on how new technologies have shaped our world, as well as aesthetic and interactive strategies for alternative ways of seeing, understanding and reconfiguring our world via digital media. The course includes readings in history, theory and artists writings, as well as screenings and interactive exercises.

Repeatability: This course may not be repeated for additional credits.

FMA 1972. Honors Introduction to Film and Video Analysis. 3 Credit Hours.

This course will ask what it means to "read" a film or video: How can we analyze moving image media in the manner that we interpret literary texts or appreciate form in the fine arts? What are the differences between film, video, and these older media? This course introduces basic analytical tools and concepts to begin to answer these questions. It surveys the broad artistic, social, and political dimensions of the cinema, with some attention to newer moving image media. As an Honors course, the readings and discussion will further emphasize the intersection between film studies and other areas of academic inquiry.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

FMA 2071. Creative Industry Head Start. 3 Credit Hours.

This course, best suited to sophomores and juniors, provides students with a general overview of internship, job, and career options in the entertainment industry, as well as current industry trends and professional practices. Students will explore media hubs and companies of interest to them, and examine how their creative goals and skills can be applied to internships and jobs. Students will develop comprehensive resumes and cover letters, create professional online profiles, and hone job search, networking, and interviewing strategies designed to help them gain experience and break into the field.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 2241. Filmmaking. 4 Credit Hours.

The art, theory, and technology of 16mm film and digital cinema production with special attention paid to exposure, lenses, cameras, location lighting, location sound, cinematic composition, and film structure. Coursework will consist of individual and collaborative exercises and projects. NOTE: This course is for majors only. Permission of the instructor is required for non-majors.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Film and Media Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2242. Videography. 4 Credit Hours.

Intensive instruction and practice with the tools of recording and structuring video. Coursework will consist of individual and group exercises and projects conducted in the studio and in the field. NOTE: This course is for majors only. Permission of the FMA chair required for non-majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2243. Audio: Production and Aesthetics. 4 Credit Hours.

An introduction to audio production and audio as a form of aesthetic expression. Students will explore theoretical concepts as they use digital audio recording and editing systems to complete projects. Coursework will consist of lectures, hands on instruction, and discussion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2244. Still Photography for Filmmakers. 4 Credit Hours.

Using a single lens reflex camera, the student will learn technical and aesthetic considerations regarding natural and artificial light, exposure, shutter speeds, f/stops, framing, composition, lens selection and how these factors affect perspective and depth of field. The course will relate concepts in still photography to parallel practices in motion pictures.

Repeatability: This course may not be repeated for additional credits.

FMA 2245. Video Production for Non-Production Majors. 1 Credit Hour.

This supplemental, one credit course is geared towards students with no background in film and video production. It is designed to be taken in conjunction with FMA 3247 and to provide non-FMA majors sufficient training in video production for FMA 3247. Students will study and practice both field and studio production skills (camera, lighting, sound recording), non-linear editing, sound editing and mixing, as well as different modes of filmmaking such as documentary, fiction, experimental, notebooks, diaries, and essay films. It cannot be taken for credit by FMA majors.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Film and Media Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 2341. Directing Fundamentals. 4 Credit Hours.

This class provides students with a general overview of the functionality of an episodic director in the television industry, which will then give them the language to understand the role of a director in the larger film industry. Students will learn that a great director in television is able to stay under budget and make their days while interpreting the screenplay and breaking it down for all their collaborators, choosing every element within the frame, shaping their actors' performances, and telling the whole story with the camera. Students will learn what it takes to be a great director - a leader and collaborator who is able to multitask and work with several crew members at once with very little time and money.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 2396. Screenwriting I. 4 Credit Hours.

Seminar and workshop exploring various approaches to fiction and nonfiction media writing. NOTE: This course is for majors only. Permission of the FMA chair required for non-majors. Prior to Spring 2009, the course title was "Writing for Media."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Film and Media Arts.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2451. Experimental Video and Multi-Media. 4 Credit Hours.

Intensive laboratory and field experience exploring personal, aesthetic, and social applications of video utilizing digital camcorders, editing, and multi-media facilities. This course includes regularly scheduled screenings of significant experimental video and multimedia projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2452. Web Art & Design. 4 Credit Hours.

In this production course, students learn how to conceptualize and produce digital media works on the web, using both Web 2.0 applications and more nuts & bolts technical means. The course will explore new aesthetic forms of web-based narrative, imaging and interaction. Through screenings, talks, readings and guest lectures, the course will consider issues of design, mixed reality media works, social media, locative media, virtual world-building. Students will receive a solid grounding in website construction and content development for the web.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2453. Introduction to Animation. 4 Credit Hours.

This course will introduce a variety of fundamental concepts and techniques in animation. Students will learn the basic principles of creating animation in a variety of forms, focusing primarily on hand-drawn, digital, and stop motion with overviews on various hardware and software. Coursework will consist of discussing animation film examples, individual exercises that practice animation forms and concepts, and workshopping student-made animations. By the end of the course, students will have created a festival- and/or portfolio-ready animation and be able to create their own independent animations while having gained a foundation to serve advanced animation topics in subsequent coursework.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2471. New Media Colloquium. 1 Credit Hour.

A seminar for New Media students, which will host guests from the New Media professions and arts. The course will critique student and professional work and focus on a topic related to this discipline. Class will seek to integrate student's work across the New Media concentration.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in ((FMA 1141 and FMA 1142), FMA 1143, (FMA 1141 and 'Y' in CRFM02), (FMA 1142 and 'Y' in CRFM01), or ('Y' in CRFM01 and 'Y' in CRFM02)) and ((FMA 1171 and FMA 1172), (FMA 1171 and 'Y' in CRFM04), (FMA 1172 and 'Y' in CRFM03), or ('Y' in CRFM03 and 'Y' in CRFM04))

FMA 2551. Editing Film and Video. 4 Credit Hours.

Techniques, practices, equipment, procedures, and theories involved in achieving structure in film and video.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 2670. Topics in Film Study. 4 Credit Hours.

An intermediate exploratory seminar in film study. Topics may include: the creative process, film and politics, directors, genres, and periods. NOTE: Open to FMA majors and non-majors.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

FMA 2671. Film Noir. 3 Credit Hours.

This course examines the concept of "Film Noir" in its cultural context using a body of films (literature, photography, art, music) to analyze predominant themes and the history of the concept in film scholarship. Directors, producers and writers of Noir; the industrial process by which these films were produced, marketed and exhibited; and a variety of cultural/historical issues (e.g. race, gender, class, urban development, national morale) will be examined. The first part of the class will focus on "Classic" Noir (1940-60), while the second will concentrate on the evolution of Noir, scrutinizing 1960-contemporary films that have appropriated Film Noir characteristics, paying particular attention to international examples. NOTE: Open to FMA majors and non-majors.

Repeatability: This course may not be repeated for additional credits.

FMA 2672. Film Comedy. 4 Credit Hours.

This course will examine American Comedy, with a particular focus on several significant directors/producers: Harold Lloyd, Preston Sturges, Frank Tashlin, Woody Allen. We will approach this class in equal parts as a directors study, a genre study, an American culture study. Some of the questions we'll address are: How does comedy function/work? What personal styles emerge from the genre? Are these films and their critical concerns reflective of larger patterns and tendencies in American life? NOTE: Open to FMA majors and non-majors.

Repeatability: This course may not be repeated for additional credits.

FMA 2673. Independent Film/Video. 4 Credit Hours.

Lectures, screenings and critical assignments will survey and analyze significant narrative, documentary and experimental works that challenge the assumptions and practices of mainstream media.

Repeatability: This course may not be repeated for additional credits.

FMA 2674. History of Photography. 4 Credit Hours.

An examination of the history and aesthetics of fine art, documentary and commercial photography within their cultural contexts. The course will cover the works of major photographers and will relate historical and contemporary concepts in still photography to parallel practices in motion pictures.

Repeatability: This course may not be repeated for additional credits.

FMA 2675. Film History I (1895-1950). 4 Credit Hours.

This course surveys the broad trends in the development of cinema as an art and as an industry. Spanning from the beginning of cinema to the immediate post-World War II years, it will ask how a popular art arose and how cinema finds its expression either with or against its commercial nature. Topics to include the Hollywood studio system, European national and international cinema traditions, the avant-garde, the role of documentary and propaganda, and the role of women in the film industry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172 (may be taken concurrently), ENG 2711 (C- or higher; may be taken concurrently), or 'Y' in CRFM04)

FMA 2676. Film History II (1950-Present). 4 Credit Hours.

This course surveys the broad trends in the development of cinema as an art and as an industry. Spanning from 1950 to the present, it will particularly examine how notions of film art and social protest defined national cinemas, including American film, against the traditional Hollywood studio film. Topics to include the decline of the studio system, the international art film, the New Hollywood, oppositional countercinema, independent cinema, and transnational and global exchange of cinematic style and language.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172 (may be taken concurrently), ENG 2711 (C- or higher; may be taken concurrently), or 'Y' in CRFM04)

FMA 2678. History of Experimental Film and Video Art. 4 Credit Hours.

This course surveys major movements, artists, and works made outside the traditions of fiction and documentary filmmaking. It will chart experimental film's relation to the avant-garde art movements and cultural upheavals of the mid-20th century. In addition to experimental film, the course will provide an introduction to video art history and aesthetics and will examine installation based work, "expanded cinema," the gallery film, and recent work in digital media.

Repeatability: This course may not be repeated for additional credits.

FMA 2771. Producing. 4 Credit Hours.

Producing presents an overview of the processes of developing, line producing and distributing a documentary, fiction, or experimental media production. Emphasis is on projects produced independently, outside the commercial mainstream. Students will produce a comprehensive proposal for a viable film or media project.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Film and Media Arts.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and ((FMA 1142 and FMA 1141), FMA 1143, (FMA 1142 and 'Y' in CRFM01), (FMA 1141 and 'Y' in CRFM02), or ('Y' in CRFM01 and 'Y' in CRFM02))

FMA 3085. Internship. 1 to 4 Credit Hour.

Students selected on the basis of special qualifications are assigned as interns on an unpaid basis with organizations professionally engaged in broadcasting and film. NOTE: Enrollment subject to availability of openings. Contact FMA's internship director.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

FMA 3241. BFA Junior Directing Projects. 4 Credit Hours.

BFA Junior Directing Projects is a required course for BFA Directing majors. Integrating and building upon what they have previously learned, it will take students through all the elements of the production process at a smaller scale than they will face in their senior BFA Directing projects. The course will include both fiction and non-fiction production. Topics will include developing scripts or documentary proposals, organizing and managing productions, narrative coverage and non-fiction camera work, directing actors and social actors, directing the camera, interview techniques and fieldwork and post-production. Course will culminate in each student producing a 3-7 minute short film.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Directing.

Class Restrictions: Must be enrolled in one of the following Classes: Sophomore 30 to 59 Credits, Junior 60 to 89 Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 3242. Experimental Media Workshop. 4 Credit Hours.

An advanced workshop to develop projects in experimental, documentary, or narrative forms using portable video, TV studio, and editing facilities. NOTE: This course is repeatable for credit. Prior to fall 2009, this course was called "Experimental TV."

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (FMA 2241, FMA 2242, FMA 2451, 'Y' in CRFM05, or 'Y' in CRFM08)

FMA 3244. Lighting for Film and Video. 4 Credit Hours.

This workshop will explore the technical, aesthetic, and compositional aspects of lighting for cinematic, photographic, and electronic media for all students, as well as advanced issues of cinematography and synchronous sound for those students who wish to continue study of filmmaking. The course will analyze the evolution of lighting styles (such as classical Hollywood, neorealist, film noir, and expressionism) in fiction and non-fiction moviemaking. Each student will complete an individual and/or group portfolio of different lighting exercises. Students with an advanced interest in filmmaking will substitute camera and synchronous sound exercises for some of the lighting exercises.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 2242, FMA 2241, THTR 2511 (C- or higher), FMA 2244, 'Y' in CRFM05, or 'Y' in CRFM06)

FMA 3245. Cinematography: Junior Projects. 4 Credit Hours.

Cinematography: Junior Projects is a suggested elective course for BA Cinematography Concentration candidates. Integrating and building upon what they have previously learned, this course is designed to help junior level students secure skills and experiences necessary to lead a production crew as a Director of Photography (DP). The course will explore production strategies for both fiction and non-fiction motion pictures. Topics include planning camera setups and coverage, advanced lighting design, light plots, creating a "look", field monitors and LUTs, high dynamic range RAW files, workflows, and crew organization. Designed to work in conjunction with the BFA Junior Directing course, this class will culminate with each cinematography student serving as the lead DP for a BFA Junior Directing Projects Film (FMA 3241).

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Cinematography.

Repeatability: This course may not be repeated for additional credits.

FMA 3246. Documentary Workshop I. 4 Credit Hours.

An intermediate workshop in the theory, practice, and ethics of documentary production. The workshop will feature exercises in oral history and interview techniques, camerawork, field-sound recording, and music research, specialized editing assignments, and a final project. These skills will be integrated with documentary screenings along with readings and discussion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2396 or 'Y' in CRFM07), (FMA 2551 or 'Y' in CRFM09), and (FMA 2241, 'Y' in CRFM05, FMA 2242, or 'Y' in CRFM15)

FMA 3247. Cross-Cultural Image Making. 3 Credit Hours.

This advanced production course will focus on cross-cultural image making. It is designed specifically to address the challenges of making films while immersed in a foreign culture and/or language. How do we make films about places that are unfamiliar to us often with limited resources and technology? How do time restraints such as being on the move and constantly changing locations affect the types of images selected and gathered? How does one assemble a future archive from which to draw at a future date in a short period of time? What happens to a culture when it is perceived as "other" and how does the lens of defamiliarization, dislocation, and disorientation translate into audiovisual production? What images, sounds and techniques represent the culture and history of a place? Which are site specific and which are transferable? What is the tension between the local and the global? At the end of the course, each student will be asked to produce their own short film based on their experiences and observations living away from home and out of their comfort zone. The course is open to majors and non-majors alike. However students without filmmaking experience must take the accompanying FMA 2245, Video Production for Non-Production Majors.

Repeatability: This course may be repeated for additional credit.

FMA 3249. Documentary Workshop II. 4 Credit Hours.

This second semester of documentary workshop will expand the original documentary short produced in Documentary Workshop I. The course will explore creative editing strategies and introduce a Post-Production workflow process to identify the main thread and ideas for our final film. At the start of the semester, students will evaluate their footage (logging) and define a set of steps called Milestones, which will guide their project towards completion. Each completed Milestone is developed with the instructor's assistance and is presented according to class assignment deadlines. By the end of the semester, each student will have completed their final documentary.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FMA 3246.

FMA 3341. Scene Analysis for Writers and Directors. 4 Credit Hours.

Analysis and exercises dealing with the conventional language of mainstream narrative film, including how this language, traditionally presented as the only way to organize narrative films, actually serves to circumscribe the kind of stories that may be told.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2396 or 'Y' in CRFM07) and (FMA 2241, FMA 2242, FMA 2451, 'Y' in CRFM05, or 'Y' in CRFM08)

FMA 3342. Serial Writing. 4 Credit Hours.

This is a writing workshop focusing on dramatic serial writing in which students learn to work in close collaboration with other class members. In preparation for the class, students will be required to read or view several dramatic serials as well as read several pilot scripts. The class itself will hear "pitches" for a serial, select one story, and then begin to develop it. The course is limited to BFA students with a concentration in Screenwriting.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Screenwriting.

Class Restrictions: Must be enrolled in one of the following Classes: Sophomore 30 to 59 Credits, Junior 60 to 89 Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 3343. Screenwriting II. 4 Credit Hours.

An advanced course concentrating on the preparation of a complete television, motion picture, or non-fiction script.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2396 or 'Y' in CRFM07)

FMA 3344. Adaptation and Docudrama: Screen and Television Writing from Pre-Existing Source Material. 4 Credit Hours.

This will be an exercise course leading to a final written project. It will focus on screenplays for film and television based on literature, drama and historical events. Because the material pre-exists, the course will be able to focus on the nuances of translation to screen including the visual representation of internal life, time, levels of reality, "voice," historical context, and social change.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2396 or 'Y' in CRFM07)

FMA 3361. Screen Performance. 3 Credit Hours.

This course is designed to develop performance skills before the camera. Actors are given experience in texts for commercials, soap operas, sit-coms, and film scenes, so that they are prepared for auditions in these areas. Individual and ensemble exercises may be on location or in the studio.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (any FMA course numbered 2241 to 2244, FMA 2396, FMA 2451, THTR 1231 (C- or higher), 'Y' in CRFM13, 'Y' in CRFM07, or 'Y' in CRFM08)

FMA 3451. Animation Workshop. 4 Credit Hours.

A workshop on the art, techniques and concepts of animation, exploring several approaches from cards and cells to computer image making.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 3452. New Technologies Lab. 4 Credit Hours.

A creative laboratory for exploring new media arts and interactive technologies for producing a variety of experimental, documentary, narrative and genre blended projects. Generating from classical traditions (film, video, and performing arts) to contemporary forms of interactive media: video games, blogs & You Tube, the projects range from the production of websites to interdisciplinary multi-media installations and performances. Successful NewTechLab productions have included individual and collaborative works by students from FMA, Art, Architecture, Dance, Music, Theater, Computer & Information Sciences. NOTE: Open to all FMA majors with suggested prerequisites that include: FMA 1451 (0196), FMA 2451 (0241), FMA 2451 (0245). Permission of the instructor required for students with equivalent prerequisites in other departments.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1451 or 'Y' in CRFM14)

FMA 3453. Interdisciplinary Media Studio. 4 Credit Hours.

This production course provides the opportunity for exploring media arts in an interdisciplinary context. It is intended to introduce a broad interdisciplinary media toolbox, including developing competency in a range of technical skills, but more importantly, students are challenged to develop interdisciplinary conceptual skills. Starting with video and audio as the basis, students will follow a series of exercises that situate media in different cultural and disciplinary contexts: as installation with one or more screens (Media and Sculpture); as an element of performance (Media Projection Design for Theater and Dance); as narrative mapping (Internet-based Interactive Narrative with community partners); as location-based virtual architecture viewed through the smartphone or tablet (Virtual Public Art/Design for Civic Engagement); as engaged by an interactive sensor (Design for Physical Computing, in conjunction with Engineering).

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Sophomore 30 to 59 Credits, Junior 60 to 89 Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 3455. 3D Modeling. 4 Credit Hours.

This course introduces the concepts and techniques of three-dimensional digital graphics, using Lightwave3D software. The first half of the semester introduces a broad palette of techniques and formal ideas, while the second half is spent on a major project of your own design. Previous experience with graphics or animation software is not required. The course offers a unique skill set and formal perspective. The course is open to juniors and seniors, including non-majors and upper-level students from other colleges, with the specific aim of fostering an interdisciplinary, collaborative workshop environment.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 3456. 3D Animation. 4 Credit Hours.

This course introduces the concepts and techniques of three-dimensional digital imagery and motion graphics, using Lightwave3D software. The first half of the semester introduces a broad palette of techniques and formal ideas, while the second half is spent on a major project of your own design. The course offers a unique skill set and formal perspective for upper-level students. Open to juniors and seniors, including non-majors and upper-level students from other colleges, with the specific aim of fostering an interdisciplinary, collaborative workshop environment.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 3457. Video Game and Playable Media Design. 4 Credit Hours.

This course introduces the many different disciplines that make up video game development and illustrate how they all come together to form a final product. Rather than emphasize any one specific subject, our focus will be broad and include introductory lessons across many aspects of development. The goal of the course is to provide as many components of development as possible to give a holistic view of everything that goes into making games. While students may not leave this course with all the specific skills needed to build their own dream games, they should come away with a strong understanding of how all the pieces fit together and where to get started in each area.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 3473. Moving Camera. 4 Credit Hours.

Moving Camera is a workshop course that explores the art and practice of moving camera media production. The course covers the range of techniques including handheld, dolly, jib, virtual/motion sensors and particularly focus on Steadicam operation. Class time will be spent on group discussion/exercises, lectures/screenings, lab instruction and critiquing work. Through a series of production projects, students will work through the aesthetics of moving camera and gain the technical and physical expertise necessary for successful projects. This course will also explore the theory and history of camera movement as well as blocking & directing techniques. Locative & mobile media projects will extend the work outside the classroom.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2241, FMA 2242, 'Y' in CRFM05, or 'Y' in CRFM15)

FMA 3551. Advanced Editing. 4 Credit Hours.

Screenings, discussions, critiques, and individual as well as collaborative workshop exercises build upon editing techniques and aesthetic concepts introduced in FMA 2551. Through projects, lectures and screenings students will be exposed to professional editing methods, approaches and techniques while completing individual projects in picture montage, sound design and digital effects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2551 or 'Y' in CRFM09)

FMA 3553. Color Correction. 4 Credit Hours.

This course is an introduction to the aesthetic considerations and technical aspects of color in modern post-production and cinematography. Color has a subconscious influence on emotion in storytelling. With the advent of modern digital cinema, every film and television production undergoes some level of color grading. Cinematographers must understand the process to maintain creative control of the images they produce. Editors must understand the process to perform basic color correction on low budget productions. This class is a combination of lecture and workshop with each student striving to efficiently navigate the art and practice of color correction.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2551 or 'Y' in CRFM09)

FMA 3670. Topics in Media Culture. 4 Credit Hours.

An exploratory seminar with varying special topics, which might include Gender, Theories of Subjectivity, and Marginalization and Representation. NOTE: Course may be repeated.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1171, FMA 1172, ENG 2711 (C- or higher), CMST 2111, 'Y' in CRFM03, 'Y' in CRFM04, or 'Y' in CRFM02)

FMA 3671. Theory and Practice of Media Culture. 4 Credit Hours.

The course will describe how cultural studies have grown out of film and media studies, combining intellectual and social history with changing representational practices. Students will analyze the dynamic relationship between ideas, socio-cultural, practices and technologies. NOTE: This course is for majors only. Permission of the FMA chair required for non-majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in ((FMA 1171 and FMA 1172), ENG 2711 (C- or higher), CMST 2111, (FMA 1171 and 'Y' in CRFM04), (FMA 1172 and 'Y' in CRFM03), ('Y' in CRFM03 and 'Y' in CRFM04), or 'Y' in CRCM02)

FMA 3677. American Film. 4 Credit Hours.

This course studies the American cinematic tradition from its inception in the 1890s to the present. We will examine the development of film as an aesthetic medium and a technical language, and we will connect the issues and ideas that films deal with to changes in American culture and society during this time period. We will be especially concerned with how films are used in the major value debates that shape America.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA major prerequisites: (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04) and (FMA 2675, 'Y' in CRFM18, FMA 2676, FMA 2671, FMA 2670, FMA 3670, FMA 3671, FMA 3871, 'Y' in CRFM10, or 'Y' in CRFM11) or Comm Studies prerequisites: (CMST 2111 or 'Y' in CRCM02) and (FMA 1172 or 'Y' in CRFM04))

FMA 3679. Film Directors, Periods, and Genres. 4 Credit Hours.

This course offers an in-depth study of a film director, a period of film history, or a film genre. It will address the recurring thematic and aesthetic concerns of these films, as well as the historical and social context in which they were made. Different topics may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04) and (FMA 2675, FMA 2676, 'Y' in CRFM11, or 'Y' in CRFM18)

FMA 3680. Foreign Studies in FMA. 3 to 6 Credit Hours.

This course is a seminar in one of Temple's study abroad locations. It uses study of cinema and moving-image arts as a mean to more deeply understand another national culture. Reading, screenings, and field trips will connect the study of cinematic arts to other material in the study-away program. NOTE: FMA students may only count four credits towards the FMA major.

Repeatability: This course may be repeated for additional credit.

FMA 3696. Writing-Intensive Seminar: Film Directors, Periods, and Genres. 4 Credit Hours.

A writing-intensive seminar with varying special topics to offer an in-depth study of a film director, a period of film history, or a film genre. Students will use a deeper exploration of the focused topic as a chance to develop research and critical writing skills. NOTE: Course may be repeated.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04)

FMA 3770. Topics in Film Study. 4 Credit Hours.

Lectures and screenings on a special topic arranged each semester. Topics may include Film and the City, War and Film, Black Women and Film, Utopias and Dystopias, Documentary Fiction, Terrorism and Film, Gay and Lesbian Identity on Film, Philadelphia Cinema History, and Horror. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), CMST 2111, 'Y' in CRFM04, or 'Y' in CRCM02)

FMA 3771. Exhibition and Distribution of Independent Media. 3 Credit Hours.

The objective of this course is to expose students to methods and approaches for exhibition and distribution of independent media. Students will investigate popular media outlets such as film/video festivals, microcinemas and internet exhibition possibilities, to name only a few. The course will serve dual functions in that it will prepare students to distribute their own work while also exposing them to industry opportunities in exhibition and distribution. FMA 3771 is considered an advanced studies course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Film and Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 3772. Fundraising for Independent Media. 3 Credit Hours.

This course is a workshop class where students must come prepared with a project around which they will create a fundraising campaign. During the course of the semester students will be exposed to information on grant writing, non-profit and for-profit media entities and the legalities of media producing. At the conclusion of the course, students will have a full funding proposal ready for dissemination to various funding sources. FMA 3772 is considered an advanced studies course.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 3773. Contemporary Screen Studies. 4 Credit Hours.

In this course, students will examine contemporary cinema, media, and film criticism, in order to articulate their own artistic, scholarly, and professional practice. Readings in film and media history, visual theory, and aesthetics will help make sense of the contemporary mediascape, with an emphasis on cinema and media arts work in the new millennium. The course will use theory and history to contextualize artistic and industrial practices from both "high" and "low" culture. Possible areas for exploration are digital cinema; "slow cinema"; multimedia installation; the gallery film; video game aesthetics; comics and film; episodic cinema; interactive, animated, and hybrid documentary; and long-form serial television.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Film and Media Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 3775. Entertainment Industry Perspectives. 4 Credit Hours.

This course explores career paths and current trends in the entertainment industry through visiting guest lecturers who are working in fields including scriptwriting, directing, editing, distribution, production design, advertising and more. Weekly visits offer students a chance to learn from and converse with established professionals while reflecting upon their own personal internship experiences within the entertainment industry.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 3871. Film Theory. 4 Credit Hours.

This course introduces key ideas and debates in film theory. Covering work from classical film theory through the 1970s Screen theory to contemporary approaches, the course asks how best to understand film as an art form and social document. It will interrogate the nature of cinema as a medium and the direction of film in a digital age. Key ideas to include film aesthetics, signification, textuality, ideology, narration, political modernism, and feminist and postcolonial critique. Film screenings will illuminate concepts in the readings.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04) and (FMA 2675, FMA 2676, FMA 2671, FMA 2670, FMA 3670, FMA 3671, FMA 3677, 'Y' in CRFM10, 'Y' in CRFM11, 'Y' in CRFM12, or 'Y' in CRFM18)

FMA 4240. Topics in Production. 4 Credit Hours.

A workshop in film, video, audio, or emerging new technologies. The course will address a particular production issue (an aspect of technology or an aesthetic approach) each time it is offered, such as production design, color correction, 3-D computer imagery, special effects, audio experimentation, video verité, and film/video diary.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Film and Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

FMA 4241. BFA Directing Projects I. 4 Credit Hours.

Advanced pre-production and production of film, high definition video, or emerging technologies with specific emphasis on producing an ambitious work of artistic and social consequence, with critiques and evaluations by faculty and visiting professionals. Intensive field and laboratory work leading towards a year-long individual or collaborative final project for exhibition. NOTE: First semester of a two-semester sequence (4241-4242).

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2396 or 'Y' in CRFM07), (FMA 2551 or 'Y' in CRFM09), and (FMA 2241, FMA 2242, 'Y' in CRFM05, or 'Y' in CRFM15)

FMA 4242. BFA Directing Projects II. 4 Credit Hours.

Continuation of FMA 4241 (0382) with an emphasis on completing the field production and post-production phases of a year-long project in film, high definition video or an emerging new technology. NOTE: Second semester of a two-semester sequence (4241-4242).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FMA 4241.

FMA 4243. Film and Video Sound. 4 Credit Hours.

Theory and practice of sound as it relates to film and video production location recording techniques, wild sound pick-up, Foley and sound effects, sound sweetening, scoring for film, and sound mixing for film.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FMA 2243.

FMA 4245. Cinematography Master Class I. 4 Credit Hours.

An advanced production workshop that combines theory and practice in the making of personal films and crewing each other's productions in Super 16mm or High Definition 24P digital video, along with technical and aesthetic exercises deconstructing cinematographic/videographic moviemaking.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FMA 3244.

FMA 4246. Cinematography Master Class II. 4 Credit Hours.

This course is a continuation of the fall semester as a practicum in completing projects in super 16mm and 24P digital advanced productions as well as introducing new exercises. This course will have professional visitors and will continue to deconstruct cinematography and various cinematic forms in the treatment of fiction/non-fiction portraiture in observational/direct cinema, avant-garde (burst and unconventional filming), and autobiographical styles of moviemaking.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FMA 4245.

FMA 4248. Introduction to 3D: Modeling. 4 Credit Hours.

This course introduces the concepts and techniques of three-dimensional digital graphics, using Lightwave3D software. The first half of the semester introduces a broad palette of techniques and formal ideas, while the second half is spent on a major project of your own design. Previous experience with graphics or animation software is not required. The course offers a unique skill set and formal perspective. The course is open to juniors and seniors, including non-majors and upper-level students from other colleges, with the specific aim of fostering an interdisciplinary, collaborative workshop environment.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 4249. Introduction to 3D: Animation. 4 Credit Hours.

This course introduces the concepts and techniques of three-dimensional digital imagery and motion graphics, using Lightwave3D software. The first half of the semester introduces a broad palette of techniques and formal ideas, while the second half is spent on a major project of your own design. The course offers a unique skill set and formal perspective for upper level students. Open to juniors and seniors, including non-majors and upper-level students from other colleges, with the specific aim of fostering an interdisciplinary, collaborative workshop environment.

Repeatability: This course may not be repeated for additional credits.

FMA 4250. Topics in Production. 4 Credit Hours.

A workshop with a changeable technological or artistic topic in film or video post-production, multimedia, or 3-D computer animation.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Film and Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

FMA 4251. Producing Master Class I. 4 Credit Hours.

Producing Master Class I is the first semester in the year-long capstone experience of the BA degree in Producing. Students will apply knowledge they have learned about producing independent film work by serving as a lead producer for a BFA directing project. The course will be structured as a workshop and will be coordinated with the capstone courses for the BFA in Directing, BA in Cinematography and BA in Post Production. This capstone course will give students a comprehensive experience in producing that will prepare them to begin a career in industry and independent film producing.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Producing.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 4252. Producing Master Class II. 4 Credit Hours.

Producing Master Class II is the second semester in the year-long capstone experience of the BA degree in Producing. Producing students will serve as the hub around which the director, cinematographer and editor will collaborate, as they guide their directing project through production, post-production and strategizing audience outreach and distribution.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Producing.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FMA 4251.

FMA 4253. Advanced Post Production Techniques. 4 Credit Hours.

This course expands on theories and techniques developed in FMA 3551 Advanced Editing. Topics covered include best practices for digital convergence, advanced HD workflow and advanced audio for narrative short filmmaking. This is a recommended class for BA Post Production concentration students.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Post Production.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FMA 3551.

FMA 4254. Post Production Master Class. 4 Credit Hours.

This course is the capstone experience of the BA Post Production concentration. Students will serve as the lead editor and post supervisor of a BFA/BA Master Class thesis film.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Post Production.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FMA 3551 and (FMA 4253, FMA 4451, FMA 3553, FMA 2452, FMA 4243, FMA 4248, or FMA 4249)

FMA 4282. Special Projects. 1 to 4 Credit Hour.

Individual projects proposed by advanced students. NOTE: Candidates submit a detailed project plan on prescribed form before registration.

Repeatability: This course may be repeated for additional credit.

FMA 4341. Screen Directing. 4 Credit Hours.

Theories of directing, dramatic form, and acting are examined through lectures, demonstrations, readings, and applied exercises to establish a theoretical and practical foundation in film and television directing.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Film and Media Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2241, FMA 2242, FMA 2451, 'Y' in CRFM05, 'Y' in CRFM08, or 'Y' in CRFM15)

FMA 4342. BFA Screenwriting Projects I. 4 Credit Hours.

The first half of the senior year capstone in the BFA in Screenwriting. Students will integrate in practice everything they have learned about film, screenwriting and story by developing the first draft of a feature-length screenplay or television serial pilot and bible. The course will be structured as a workshop and will present students with the opportunity to further hone their critical skills and introduce them to the discipline of the writer's life.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Screenwriting.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 4343. BFA Screenwriting Projects II. 4 Credit Hours.

The second half of the senior year capstone in the BFA in Screenwriting. Students will focus on rewriting as an essential part of the writing process, as they rewrite and polish the first drafts of their feature scripts or television serial plot and bible developed in FMA 4342 BFA Screenwriting Projects I. They will be expected to cultivate their ability to give and receive a high level of criticism.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Screenwriting.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FMA 4342.

FMA 4345. The Director-Actor Collaboration. 4 Credit Hours.

This course is designed to develop performance skills in front of, and directing techniques behind, the camera. An emphasis will be placed on the collaboration and exchange of techniques between actors and directors. Directors have the opportunity to learn what works from the actors' perspective during acting exercises. Likewise, actors will learn about the directors' perspective during directing technique exercises. Students will develop skills in each craft through acting and experiencing what it feels like to take direction; learning rehearsal flexible techniques; practicing directing techniques that are suited specifically to film and TV productions; and studying script analysis techniques that allow directors to prepare thoroughly prior to actual production.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 4440. Topics in Production. 4 Credit Hours.

A workshop in film, video, audio, or emerging new technologies. The course will address a particular production issue (an aspect of technology or an aesthetic approach) each time it is offered, such as color correction, 3-D computer animation, special effects, digital audio applications, and multimedia.

Repeatability: This course may be repeated for additional credit.

FMA 4441. Physical Computing. 4 Credit Hours.

Physical Computing is a studio class in which students build electronic interfaces for interactive media projection and exhibition. This class mingles media-making with simple engineering, developing students' skills in designing new ways to access and experience video and audio media.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2451, FMA 1451, 'Y' in CRFM08, or 'Y' in CRFM14)

FMA 4442. BFA Media Arts Project I. 4 Credit Hours.

This course is the first part of the two semester Senior Capstone in the Media Arts BFA. In this production course, students will develop a substantial interdisciplinary media arts project in dialogue with BFA cohort and faculty. They will create prototypes of proposed projects with an interdisciplinary team of collaborators from the Media Arts BFA and relevant programs in parallel arts, humanities and sciences disciplines. The development of the prototype projects will engage interdisciplinary media arts skills and concepts mastered in the sophomore and junior years of the BFA.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

FMA 4443. BFA Media Arts Project II. 4 Credit Hours.

This course is the second part of the two semester Senior Capstone in the Media Arts BFA. In this production course, students will continue to develop a substantial interdisciplinary media arts project in dialogue with BFA cohort and faculty. Each student will use the project prototype created in the fall Media Arts Project I course as a blueprint for the realization of the final capstone project. Students will continue to work with the interdisciplinary team of collaborators they put together during the first semester of the course to complete their media arts project, including the finalizing, testing and development of hardware, software, content, implementation and documentation.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Media Arts.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FMA 4442.

FMA 4451. Digital Animation, Compositing and Modeling. 4 Credit Hours.

Animation, image compositing and object modeling have facilitated the crossover between animation and photographic imaging, mingling the fictive and the realistic image in digital film and videomaking. This workshop explores the techniques and effects of processing and layering the moving image within film/video language and within non-linear structures. Primary focus is on 2D animation and compositing using Adobe AfterEffects with other software packages introduced as time permits.

Repeatability: This course may not be repeated for additional credits.

FMA 4453. Interactive Exhibition Design. 3 to 4 Credit Hours.

The course explores the use of interactive media for the public exhibition of historical and artistic materials in libraries, museums, or other cultural institutions. The course will teach interactive applications such as video motion tracking, projection design, VR environments and mobile Augmented Reality. Thematically, the course will explore the challenges of cultural visibility and access and aim for critical forms of public engagement with cultural production and presentation.

Repeatability: This course may not be repeated for additional credits.

FMA 4461. Interactive Narrative. 4 Credit Hours.

A creative course within a critical frame in which students make and study interactive worlds; textual, audio, graphical and video based stories, environments and games that incorporate explicit user choice. The course will be structured around a series of weekly exercises and readings, followed by a substantial final project. Students will learn necessary software. NOTE: An emphasis on interactive environments and games.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 2241, FMA 2242, 'Y' in CRFM05, or 'Y' in CRFM15), (FMA 2396 or 'Y' in CRFM07), and (FMA 2451, FMA 2452, 'Y' in CRFM08, or 'Y' in CRFM16)

FMA 4462. Video Game Theory and Writing. 4 Credit Hours.

This course will look at both the critical literature that has developed around video games and other interactive environments, as well as the practice of writing video games. Student's work will combine critical essays and written game or interactive creation that explores some of the theories addressed in the course. The course will look at some of the major issues in video game studies, such as simulation, representation, play, narrative, the ergotic, cut-scenes, and interactive space and time, as well as considering how video games may engage some long-standing aesthetic and philosophic questions that predate these games themselves.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FMA 1172.

FMA 4471. Media Arts Projects at the Kimmel: The Virtual City. 4 Credit Hours.

Graduate and undergraduate students will work with Prof. Roderick Coover and visiting artists at the Kimmel Center to create works using emerging cinematic technologies including virtual reality (VR). The course aims to produce highly experimental and collaborative media arts works oriented around themes of the city. The course will take place at main campus, center city campus and at the Kimmel Center. This course is open to students from across the arts and it encourages interdisciplinary and cross-genre collaborations of image, sound, movement and performance.

Repeatability: This course may be repeated for additional credit.

FMA 4475. The Artist in the Business World. 4 Credit Hours.

Freelance/independent contracting is the most common type of work for any emerging artist or filmmaker but newly graduated alumni often do not know how to find work or how to protect their self-interests. This seminar class is created to help juniors and seniors prepare to move from school into the working world of media production as independent contractors/freelancers. Topics to be covered include: Creating your unique brand, negotiating rates, understanding insurance and taxes for freelancers, and understanding contracts and other legal concerns of freelancing.

Repeatability: This course may not be repeated for additional credits.

FMA 4670. Topics in Film Study. 4 Credit Hours.

Lectures and screenings on a special topic arranged each semester. Topics may include: Advanced Film Theory, Third Cinema, Soundtracks, Exile Cinema, The Idea of Art Cinema, Hollywood Cinematographers, Hybrid Cinema, Gender and Sexuality. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (FMA major prerequisites: (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02) or Comm Studies prerequisites: (CMST 2111 or 'Y' in CRCM02) and (FMA 1172 or 'Y' in CRFM04))

FMA 4671. Senior Media Culture Thesis I. 4 Credit Hours.

The planning, conceptualization, and design of a written research project that combines skills in theory, criticism, and historiography, or a producible script based on research.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 3671 or FMA 3871)

FMA 4672. History of Documentary Film. 4 Credit Hours.

This course surveys broad trends in the history of non-fiction cinema from 1895 to present. Covering movements like the city symphony film, the postwar essay film, direct cinema, the personal documentary, and animated documentary, it will explore the conceptual issues facing documentary makers and introduce key debates around documentary representation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04)

FMA 4673. International Cinema. 4 Credit Hours.

The course will survey and examine the various cultural determinants of international film forms through screenings, lectures, and readings. It will attempt to define the differences and similarities between mainstream Hollywood cinema and the range of international film forms from Africa, Latin America, Asia, Europe, and the Middle East.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), CMST 2111, 'Y' in CRFM04, or 'Y' in CRCM02)

FMA 4674. Anthropological Film/Media. 3 Credit Hours.

Anthropological perspectives on media studies in terms of both cultural organization and anthropological research tools; includes anthropological and communication theory, history of ethnography, and research methods with special emphasis on visual recording modes.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA major prerequisites: (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02) or Comm Studies prerequisites: (CMST 2111 or 'Y' in CRCM02) and (FMA 1172 or 'Y' in CRFM04))

FMA 4675. Women Film/Video Artists. 4 Credit Hours.

This seminar will examine closely the work of women filmmakers and video artists and their dialogue with theories of gender representation. Working outside or against the currents of mainstream commercial practices, these media artists have taken up alternate cinematic forms, whether the independently produced feature film to experimental film and video art. Readings, screenings, and writing assignments will explore the historical, theoretical and aesthetic concerns that inform and respond to groundbreaking work by women such as Martha Rosler, Mira Nair, Trinh T. Minh-Ha, Chantal Akerman, Julie Dash, Claire Denis, Ngozi Onwurah, Sadie Benning, Samira Makmalbaf, and Miranda July, among others.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), CMST 2111, 'Y' in CRFM04, or 'Y' in CRCM02)

FMA 4676. Sound Studies. 4 Credit Hours.

This course is an advanced study of the aesthetics and meaning of sound in film, media, and moving-image arts. Examining the acoustic across a broad spectrum of genres and media - radio, film, video, sound art - it introduces the interdisciplinary field of Sound Studies and its relevance for the history and study of cinematic sound.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FMA 1172, ENG 2711, or 'Y' in CRFM04)

FMA 4678. Climate and the Arts. 4 Credit Hours.

This seminar class examines how film, video, visual art, architecture, music, dance, theater, literature, and social media have responded to long-term shifts in climate. Drawing on primary sources in the arts and sciences, we will explore a range of issues related to the changing climate: natural, cultural and virtual forces affecting global, socio-political and economic factors including race, class, ethnicity, gender, etc. We begin with these fundamental questions about Climate Change: What? Why? When? Who? How?... and proceed with informed research through readings and screenings to produce journal notes and a final project.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 4680. Advanced Topics in Media Arts Studies. 4 Credit Hours.

Advanced Topics in Media Arts Studies is a variable-content topics history/theory course in such media art topics as new technologies, sound, interactive video, mobile media, visual ethnography and other areas of interdisciplinary media art. This is an upper level studies course for undergraduate seniors, and students in the Film and Media Arts BFA with a concentration in Media Arts.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Film and Media Arts.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (FMA 1451 or 'Y' in CRFM14), (FMA 1141 or 'Y' in CRFM01), (FMA 1142 or 'Y' in CRFM02), and (FMA 1171 or 'Y' in CRFM03)

FMA 4696. Senior Media Culture Thesis II. 4 Credit Hours.

The completion of the research project or script begun in FMA 4671 (0380).

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FMA 4671.

FMA 4697. Advanced Film History. 4 Credit Hours.

Throughout its century-plus of existence, the cinema has been at once a popular entertainment, a major art form, a culture industry, and a basis for social and national identity. This course goes into depth into historical case studies to examine what film history means as an attempt to explain the richness of cinema's past. The emphasis will be on research and argumentation. Possible topics to include the political economy of the film industry, reception study, social history of cinema going, national cinema, and auteur or star agency in the studio system. NOTE: Prior to spring 2010, the course title was "History of Narrative Film."

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04) and (FMA 2675, FMA 2676, 'Y' in CRFM11, or 'Y' in CRFM18)

FMA 4698. Writing-Intensive Study in Documentary Film. 4 Credit Hours.

An advanced course in the history, theory, and aesthetics of nonfiction film and media. The seminar will use documentary films as a starting point for a student-led research and writing projects. The emphasis may vary, but the course will examine more advanced debates in ethics, representation, and history posed by nonfiction cinema.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FMA 1172, ENG 2711 (C- or higher), or 'Y' in CRFM04)

FMA 4770. Topics in Producing. 3 Credit Hours.

A workshop in film and media art producing. The course will address a particular producing issue each time it is offered, such as budgeting, scheduling, project development or entertainment law.

Department Restrictions: Must be enrolled in one of the following Departments: CA:Film & Media Arts.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in FMA 2771.

FMA 4771. Pathways to Media Careers. 2 Credit Hours.

This course is designed to assist FMA Juniors and Seniors in transitioning from the insulation of the classroom to "real world" careers in media production. It will provide insight into the diverse opportunities available in media at independent, corporate, and industry levels.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FMA 1171 or 'Y' in CRFM03), (FMA 1172 or 'Y' in CRFM04), and (FMA 1142, FMA 1143, or 'Y' in CRFM02)

FMA 4772. Art of the Sell. 4 Credit Hours.

In this course, students will examine the pragmatic details of the producer's role and responsibilities during each stage of a project's life, from development to distribution, utilizing a case study of a produced feature film. Concurrently, this course will foster students' development of pitching techniques that creators in the media and entertainment industry use to "sell" projects - as well as themselves - to potential collaborators, investors and consumers during a project's life cycle.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

FMA 4940. Honors Topics in Film. 4 Credit Hours.

An advanced seminar or workshop in film or video. Topics vary each semester. NOTE: Reserved for University Honors students.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

FMA 4950. Honors Topics in Media. 4 Credit Hours.

An advanced seminar or workshop in multimedia, digital media, or new technologies. Topics vary each semester. NOTE: Reserved for University Honors Students.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

FMA 4983. Honors Reading. 1 to 4 Credit Hour.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

FMA 4991. Honors Research/Project. 1 to 4 Credit Hour.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Finance (FIN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

FIN 0822. Investing for the Future. 4 Credit Hours.

This class will teach you about seemingly complicated financial topics in a very comprehensible manner that will help you make informed financial decisions to ensure a secure financial future. We begin with identification of common financial problems among the "young, fabulous and broke" and how to avoid them. After thinking about life and financial priorities, we address why thinking about retirement now must be at the top of your list. We examine how to compute your retirement needs and how to get there, primarily with a focus on investing in common stock. You will learn how to think smart about big ticket purchases such as cars, housing, and graduate/professional education. Finally we will make sure you understand how to create a safety net to protect your future. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed ECE 0822, FIN 0922 or RMI 0822.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

FIN 0922. Honors Investing for the Future. 4 Credit Hours.

This class will teach you about seemingly complicated financial topics in an understandable manner that will help you make well-informed "money" decisions to ensure a secure financial future. At the same time, we will use the tools learned to analyze important current events such as the constant dollar (or inflation-adjusted) minimum wage and unfunded pension liabilities. We begin with identification of common financial problems among the "young, fabulous and broke" and how to think about addressing them. After addressing life and financial priorities, you will learn why retirement savings must be at the top of your list. We examine how to compute your retirement needs and how to get there, primarily with a focus on investing in the stock market. You will learn how to think smart about big ticket purchases such as cars, housing, and graduate/professional education. Finally we will make sure you understand how to create a safety net to protect your future. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed ECE 0822, FIN 0822 or RMI 0822.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO

Repeatability: This course may not be repeated for additional credits.

FIN 2501. Introduction to Careers in Finance I. 1.5 Credit Hour.

This is the first 1.5 credit course in a two-course career orientation sequence offered over the fall and spring semesters. The course introduces students to various career paths in finance and prepares them for internships. The discussion of each career path covers general responsibilities, required skills, and desired academic background. The course includes various activities specific to different careers to provide students with a high level "hands-on" experience. The majority of discussed problems require Excel, and students obtain a working knowledge of it through in-class activities. Students also familiarize themselves with professional platforms used in the finance industry including Bloomberg, Capital IQ, and FactSet and learn how to find relevant information on company websites and in the SEC filings. Many classes have guest speakers who describe their own careers and job responsibilities. Note: Prior to fall 2023, the course title was "Finance Fellows I."

Class Restrictions: May not be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

FIN 2502. Introduction to Careers in Finance II. 1.5 Credit Hour.

This is the second 1.5 credit course in a two-course career orientation sequence offered over the fall and spring semesters. The course introduces students to various career paths in finance and prepares them for internships. The discussion of each career path covers general responsibilities, required skills, and desired academic background. The course includes various activities specific to different careers to provide students with a high level "hands-on" experience. The majority of discussed problems require Excel, and students obtain a working knowledge of it through in-class activities. Students also familiarize themselves with professional platforms used in the finance industry including Bloomberg, Capital IQ, and FactSet and learn how to find relevant information on company websites and in the SEC filings. Many classes have guest speakers who describe their own careers and job responsibilities. Note: Prior to fall 2023, the course title was "Finance Fellows II."

Class Restrictions: May not be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

FIN 2527. Digital Disruption in Financial Services. 3 Credit Hours.

The course provides students exposure to the current technological advances reshaping the financial services industry, using research papers, business news articles and guest speakers to highlight topics. The course focuses on blockchain, digital currencies, artificial intelligence, machine learning and the regulatory environment surrounding these innovations. The course requires intensive reading and reflection on the class speaker content. An important deliverable is a team project where students develop a fintech application.

Repeatability: This course may not be repeated for additional credits.

FIN 3101. Financial Management. 3 Credit Hours.

This course provides a survey of the financial problems associated with the life cycle of a business firm. Topics include: financial analysis and planning, capital budgeting, cost of capital, and the sources and uses of business funds. While the emphasis is on decision making within a corporate environment, the tools taught in this course are just as relevant to other forms of business organization and to personal financial management.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Construction Engr Tech, Construction Mgt Tech, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901), (ECON 1102 or ECON 1902), (ACCT 2101 or ACCT 2103), and (STAT 2103 (may be taken concurrently), STAT 2903 (may be taken concurrently), STAT 2104 (may be taken concurrently), or MATH 3031 (may be taken concurrently))

FIN 3102. Financial Management Lab. 1 Credit Hour.

This online course is for finance majors and minors only. It is designed to provide a more in-depth study and application of topics covered in the FIN 3101/3901 courses, such as time value of money; bond and stock pricing, risk and return, financial analysis and planning, capital budgeting, cost of capital, capital structure. The course will be Excel intensive and focus on problems that require a higher level of critical problem solving skills beyond simple one-step solutions.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Finance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101 (may be taken concurrently), FIN 3901 (may be taken concurrently), 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3504. Intermediate Corporate Finance. 3 Credit Hours.

This course covers several areas of corporate financial management such as capital budgeting, capital structure, and firm valuation. Students learn how firms make investment decisions, determine the cost of capital, set the target leverage, and use financial statement forecasting and free cash flows to find the firm's value. Students demonstrate their proficiency in each area through an exam and case analysis using Excel.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3505. Bank Enterprise Risk Management. 3 Credit Hours.

This course covers the management of banks and other financial institutions. Topics include the risk-return tradeoffs, regulatory constraints, performance analysis, asset-liability management, and management of liquidity, interest rate, and credit risks.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3506. Derivatives and Financial Risk Management. 3 Credit Hours.

This course introduces students to derivative securities. Students learn how to use, how to price, and how to trade financial derivatives such as futures, options, and swaps. Topics also include speculative and hedging strategies and financial risk management. Although the material of the course is quite quantitative, the focus is on the general principles of derivative pricing and practical use of derivatives rather than on mathematical technicalities.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3507. Security Analysis and Portfolio Management. 3 Credit Hours.

This course covers the main principles of investing in financial assets. Topics include the portfolio theory, asset pricing models, fundamental security analysis, and valuation of equity and fixed income securities. Students also learn how securities are traded in the financial markets and how to evaluate the investment performance.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3508. Fixed Income Modeling and Analysis. 3 Credit Hours.

This course provides a theoretical and applied analysis of the spot markets for fixed income instruments. Topics include: Estimation of zero coupon spot curves, computation of forward rates, day count conventions, valuation of bonds with embedded options, duration and convexity of bond yields, default risk probabilities, interest rate volatility, bond portfolio management strategies, and securitization. Note: Prior to fall 2017, the course title was "Money and Fixed Income Markets."

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3509. Real Estate Investment and Finance. 3 Credit Hours.

This course provides theoretical and practical analysis of investments in real estate assets. Topics include real estate interests, forms of ownership, market and site analysis, financing alternatives, and valuation techniques.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3512. Financial Modeling. 3 Credit Hours.

This course teaches how to apply Excel to capital budgeting and financial statement modeling for the purposes of forecasting and valuation. Students will learn how to calculate various project performance measures, construct financial statements from trial balances, develop financial statement forecasting models, and assess the sensitivity of the obtained results to forecasting assumptions. Other topics include bond valuation, beta analysis, and optimization methods. All techniques will be illustrated by applying them to real market data from Capital IQ and FactSet.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3513. Financial Statement Analysis. 3 Credit Hours.

This course teaches students to use and interpret economic and accounting information that is essential in financial analysis and valuation. By the end of the course, students should be able to use financial statements to evaluate a firm's performance, indicate key financial reporting issues, identify potential sources of financial statement manipulation, calculate and interpret financial ratios and their trends, and prepare a comprehensive financial assessment of a firm.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3514. Commercial Real Estate Analysis. 3 Credit Hours.

This course is designed to give students an understanding of activities and decisions that result in the man-made environment by introducing students to the complex world of commercial real estate analysis and development. Of primary interest are principles of sound development and the procedures and interactions of the analyst/developer that are necessary to coordinate with governmental officials, community leaders, and neighbors, while meeting the needs of users of commercial real estate space. Of importance is the integration of community preferences including environmental and sustainable development issues. An understanding of commercial real estate markets and development dynamics requires an understanding of real estate assets; complex urban dynamics; pertinent laws and regulations; the use of public and private financing; and the marketing of space within an urban context. Students should also develop the skills necessary to determine the requirements for the successful financial analysis of commercial real estate development including the forecasts of future cash flows and application of appropriate financial analysis techniques.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3515. Financial Markets and Institutions for Business. 3 Credit Hours.

This course provides finance majors with a survey of financial instruments (with a focus on fixed income and money markets), markets, and institutions with a strong current events perspective. The course will have an applied managerial perspective that focuses on both how the markets are viewed by companies who need access to funding as well as the professionals that work in the financial services industry. The course is intended not only for those interested in careers in financial markets and institutions, but also for those who wish to extend their institutional industry specific knowledge.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101 (may be taken concurrently), FIN 3901 (may be taken concurrently), 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3516. Corporate Valuation. 3 Credit Hours.

This course covers the valuation of public and private companies using discounted cash flow methods, market multiples, and hybrid models. Valuation techniques based on discounted cash flows include dividend discount models, free-cash flow models, and residual income models. Multiples-based methods use both market prices and enterprise values. The instructional format of the course is lecture supplemented with case analysis. The course extends the basic concepts of financial management beyond textbook fundamentals to practical applications. NOTE: Prior to Fall 2023, this course was titled "Advanced Corporate Finance."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3517. Financial Data Analysis. 3 Credit Hours.

This course applies the core materials in statistics and econometrics to the analysis of large financial data sets. The course covers three areas with intensive finance application: 1) statistical inference: distributions, hypothesis testing, confidence interval; 2) regression analysis: simple and multiple linear regressions, and probit/logit regression; and 3) big data and data mining: Monte Carlo simulation, and SQL. Students completing this course should be well prepared for the level of analysis required in the capstone for the asset pricing track.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3519. Introduction to Financial Planning. 3 Credit Hours.

This course provides an overview of the professional approach to personal financial planning. Topics include client/planner interactions; time value of money applications to retirement planning needs; personal financial statement development and assessment; cash flow and debt management; education planning; risk management and insurance; investment planning; employee benefits, tax and estate planning; ethics and practices standards; and practice management concepts. Note: This course only counts towards the Financial Planning major. It can't be used to satisfy any requirements for the Finance major.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3522. Advanced Portfolio Analysis. 3 Credit Hours.

This course provides majors in the asset pricing track with hands-on experience to a variety of portfolio management skills. In this course students are exposed to Capital Asset Pricing Model (CAPM), estimating betas and the Security Market Line (SML), backtesting portfolio allocation, portfolio optimization, risk parity, asset correlation, efficient frontier, Fama-French factor regression analysis, factor performance attribution and stress tests. CapitalWave's Portfolio Asset Simulator will be used as the primary means of instruction giving students an opportunity to create and adjust portfolios to different events and evaluate their performance in response to simulated news feeds using the techniques described above.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3523. Real Estate Financial Modeling. 3 Credit Hours.

The fundamentals of understanding real estate involve a combination of market conditions and economics, legal and environmental due diligence, marketing, and finance. The course is on real estate financial modeling, but will review the accompanying components involving legal and environmental due diligence. This course mixes theory and practice. The financial analysis occurs while obtaining and tracking an actual property. That property is proposed to be an apartment building, since a residential investment is the most likely that small investors can acquire. The class continues to examine real estate financial modeling, but with the use of Argus. The remainder of the class is on financing and capital structure for the project. These include remaining material on depreciation, amortization and loan financing, mezzanine and cash flow waterfalls.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3524. Real Estate Finance and Mortgage Markets. 3 Credit Hours.

This course explores real estate finance and quantitative methods that are used in the valuation of real estate. Students develop an understanding of real estate financing and valuation as well as related topics such as underwriting, risk analysis, and financial leverage. In addition, students learn about the mortgage market including a review of the government-sponsored enterprises including Fannie Mae and Freddie Mac, and the securitization process for residential and commercial mortgages. The course includes analysis of both residential and commercial real estate markets. Students will be able to set up a term sheet to attract equity capital, prepare an offering memorandum for lenders to propose financing packages, and evaluate between competing loan proposals.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3525. Real Estate Development. 3 Credit Hours.

This course evaluates ground-up development on vacant sites as well as rehabilitation, redevelopment, and acquisition investments. The course examines raw and developed land and the similarities and differences of traditional real estate product types including office, R & D, retail, warehouses, single family and multi-family residential, mixed use, and land as well as specialty uses like golf courses, assisted living, and fractional share ownership. Emphasis is on concise analysis and decision making. The course discusses the development process with topics including market analysis, site acquisition, due diligence, zoning, entitlements, approvals, site planning, building design, construction, financing, leasing, and ongoing management and disposition. Special topics like workouts and running a development company are discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3526. Commercial Credit Essentials. 3 Credit Hours.

This course will introduce you to commercial credit risk analysis undertaken by financial services firms. The topics range from financial statement analysis to loan structuring and detecting problem loans. Case studies are used extensively along with mini-assignments to reinforce the learning goals for each topic. The culmination of the course is a final case study exercise that is a turn-key underwriting exercise.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3551. International Finance. 3 Credit Hours.

The course surveys theoretical and institutional aspects of international finance. Topics include the structure of global financial systems, foreign exchange markets, exchange rate risk management, and international corporate finance.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3571. Owl Fund Seminar. 3 Credit Hours.

This course provides select students with the in-depth training required to manage the William C. Dunkelberg Owl Fund.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3580. Special Topics. 3 Credit Hours.

Special topics in the field of Finance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, FIN 3504, 'Y' in CRFI01, 'Y' in CRFI07, or 'Y' in CRFI02)

FIN 3581. Field Experience in Finance. 3 Credit Hours.

This course allows finance majors to apply what they have learned in the classroom coupled with any professional skills they may have acquired in the workplace. The requirements of the course include: (1) an expectation that you can demonstrate a synthesis of finance concepts through the preparation of a final paper; (2) student responsibility to arrange meetings every other week with their faculty sponsor to track progress throughout the semester; and (3) a strong work ethic including self-motivation and self-discipline as well as an ability to meet deadlines is critical.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3504 or 'Y' in CRFI02) and (FIN 3507 or 'Y' in CRFI03)

FIN 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or research paper under the supervision of a faculty member.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Finance, Real Estate.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3671. Advanced Owl Fund Seminar. 3 Credit Hours.

This course is a continuation of Finance 3571 that will focus on improving the students' skills in value investing and applied portfolio analysis. Students may register for this class only with the permission of the instructor.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in FIN 3571.

FIN 3682. Independent Study. 1 to 6 Credit Hour.

Readings and/or research paper under the supervision of a faculty member.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Finance, Real Estate.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07)

FIN 3901. Honors Financial Management. 3 Credit Hours.

This course provides a survey of the financial problems associated with the life cycle of a business firm. Topics include: financial analysis and planning, capital budgeting, cost of capital, and the sources and uses of business funds. While the emphasis is on decision making within a corporate environment, the tools taught in this course are just as relevant to other forms of business organization and to personal financial management. Finance 3901 is the honors section of Finance 3101 and meets the FSBM Finance 3101 requirement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Construction Mgt Tech, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ECON 1101 or ECON 1901), (ECON 1102 or ECON 1902), (ACCT 2101 or ACCT 2103), and (STAT 2103 (may be taken concurrently), STAT 2903 (may be taken concurrently), STAT 2104 (may be taken concurrently), or MATH 3031 (may be taken concurrently))

FIN 3999. Honors Thesis I. 1 to 3 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Finance department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Finance 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Finance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

FIN 4596. Seminar in Corporate Finance. 3 Credit Hours.

This course integrates the knowledge and skills obtained by students from other finance courses and teaches how to holistically apply them to real-world situations. The focus of the course is on financial decisions made by corporate executives. Using realistic cases, the students will learn how to perform financial analysis of a firm, compute a firm's cost of capital using publicly available data, value a firm using various methods, assess potential capital structure changes, and evaluate takeover alternatives. This is a writing intensive course that will help students further develop professional communication skills as well as satisfy the writing requirements for their degree.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Finance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in ((FIN 3504 and FIN 3507), (FIN 3504 and 'Y' in CRFI03), (FIN 3507 and 'Y' in CRFI02), or ('Y' in CRFI02 and 'Y' in CRFI03)) and (BA 2196 (C- or higher; may be taken concurrently) or BA 2996 (C- or higher; may be taken concurrently))

FIN 4597. Seminar in Real Estate Asset Analysis. 3 Credit Hours.

This course is designed to provide students with an integrative experiential learning opportunity in real estate finance that is an ideal preparation for entry into the workplace. It covers a variety of topics including the acquisition and cash flow analysis, lease analysis, asset and property management strategies, financing strategies, disposition strategies, federal income taxation issues, risk management strategies, and standard valuation techniques for commercial real estate. Over the semester, students work on a real estate project that requires a holistic application of the skills learned in the other courses. NOTE: FIN 4597 is the required capstone course for Real Estate majors. It is also a writing intensive course that helps students further develop business communication skills as well as satisfy the writing requirements for their degree.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Real Estate.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FIN 3509 or 'Y' in CRFI04), (RE 3501 or 'Y' in CRRE01), and (BA 2196 (C- or higher; may be taken concurrently) or BA 2996 (C- or higher; may be taken concurrently))

FIN 4598. Seminar in Financial Planning. 3 Credit Hours.

This course integrates the knowledge obtained by students throughout their studies in six areas: fundamentals of financial planning, risk management, investments, income tax planning, retirement planning, and estate planning. Over the semester, students develop and present a financial plan for a hypothetical client that requires a holistic application of the skills learned in the other financial planning courses. NOTE: FIN 4598 is the required capstone course for Financial Planning majors. It is also a writing intensive course that helps students further develop professional communication skills as well as satisfy the writing requirements for their degree.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FIN 3507 or 'Y' in CRFI03), (FIN 3519 or 'Y' in CRFI05), and (BA 2196 (C- or higher; may be taken concurrently) or BA 2996 (C- or higher; may be taken concurrently))

FIN 4696. Seminar in Investment Analysis. 3 Credit Hours.

This course integrates the knowledge and skills obtained by students from other finance courses and teaches how to holistically apply these to real-world situations. The focus of the course is on investing in financial markets. Through realistic cases, students learn how to value stocks using fundamental and technical analysis, perform asset allocation, and evaluate a fund manager's performance. Over the semester, students complete their own investment research project that requires statistical techniques to analyze large financial data sets. This is a writing intensive course that helps students further develop professional communication skills as well as satisfy the writing requirements for their degree.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (FIN 3101, FIN 3901, 'Y' in CRFI01, or 'Y' in CRFI07), (FIN 3504 or 'Y' in CRFI02), (FIN 3507 or 'Y' in CRFI03), and (BA 2196 (C- or higher; may be taken concurrently) or BA 2996 (C- or higher; may be taken concurrently))

FIN 4999. Honors Senior Thesis II. 1 to 3 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Finance Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Finance 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Finance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in FIN 3999.

Foundation Program (FDPR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

FDPR 1501. Introduction to Art and Design. 1 Credit Hour.

This course, for all Tyler first year students in art, design, and architecture, investigates the context for emerging ideas and issues relevant to contemporary practice.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1502. Investigations of Art and Design. 1 Credit Hour.

This course, for Tyler BFA students, continues course 1501 and addresses the area in which undeclared students may pursue majors at Tyler School of Art.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1503. Woodshop Fundamentals. 1 Credit Hour.

This 7 week intensive lab course will orient and train students in proper use and safety protocol in the All School Wood Shop. This class is directed at creating etiquette and knowledge that will be a guide for future courses through a student's career at the Tyler School of Art and Architecture. A thorough overview of shop safety and tool function will be introduced to students in the first weeks of this course. As this class progresses, projects will be introduced that establish woodworking joinery while implementing safe and proper use of hand tools and stationary shop equipment. By the end of this 7 week course students will attain a proper understanding and skills of basic construction methodology and terms that will act as a reference aid throughout their career. By the end of this course students will attain access to the All School Wood Shop during open hours.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1511. Foundation Drawing. 3 Credit Hours.

An introduction to drawing course that concentrates on developing basic formal, conceptual, and technical skills. The course examines varied media in the study of the figure, landscape, and other observational subjects. A discussion of technology in studio practice is part of all Foundation courses.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1512. Foundation Drawing. 3 Credit Hours.

An introduction to foundation drawing course that concentrates on developing basic formal, conceptual, and technical skills. The course examines varied media in the visualization of invented forms, use of research, and exploration of media. A discussion of technology in studio practice is part of all Foundation courses.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1521. 2D Foundation Principles. 3 Credit Hours.

This course introduces students to the fundamental principles of visual language, including formal, technical, and conceptual aspects of image making in two-dimensions. The emphasis is on acquiring a basic vocabulary for the discussion of 2D art and design across media, and projects focus on the construction of meaning through a variety of representational strategies. Projects in this course are carried out in black and white to emphasize value, contrast, and figure ground relationships. A discussion of technology in studio practice is part of all Foundation courses. NOTE: Enrollment is limited to students accepted for Tyler BFA programs.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1522. 2D Foundation Principles. 3 Credit Hours.

This course introduces students to the fundamental principles of visual language, including formal, technical, and conceptual aspects of image making in two-dimensions. The emphasis is on acquiring a basic vocabulary for the discussion of 2D art and design across media, and projects focus on the construction of meaning through a variety of representational strategies. Each 2D project provides a unique theoretical and practical context from which students are introduced to the mechanics of color. NOTE: Enrollment limited to students accepted for Tyler BFA programs.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1531. 3D Foundation Principles/W. 3 Credit Hours.

A foundation course, paired with BFA Foundation 1532, which teaches students the fundamentals of working with 3D form and space. The course emphasizes the utilization of a variety of basic materials, and an intensive introduction to the woodshop. A discussion of technology in studio practice is part of all Foundation courses.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Co-requisites: FDPR 1503.

Repeatability: This course may not be repeated for additional credits.

FDPR 1532. 3D Foundation Principles/C. 3 Credit Hours.

A foundation course, paired with BFA Foundation 1531, which introduces the fundamentals of working with 3D form and space. Simple materials such as paper, cardboard, wire, plaster, and clay are used, and moldmaking is introduced. A discussion of technology in studio practice is part of all Foundation courses. NOTE: Enrollment is limited to students accepted for Tyler BFA programs.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1541. Foundation Computer. 2 Credit Hours.

This course introduces Foundation students to the fundamentals of digital imaging and research, including research on the World Wide Web, imaging software (such as Adobe Photoshop and Adobe Illustrator), and concepts inherent in the digital image.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

FDPR 1542. Foundation Computer Lab. 0 Credit Hours.

This course introduces Foundation students to the fundamentals of digital imaging and research, including research on the World Wide Web, imaging software (such as Adobe Photoshop and Adobe Illustrator), and concepts inherent in the digital image.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

French (FREN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

FREN 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

FREN 1001. Introduction to French I. 4 Credit Hours.

Introduction to the basic skills of French speaking, listening comprehension, reading, and writing in authentic cultural contexts using multimedia resources. At the end of the course students should be able to converse, write and read at the Novice Low level (ACTFL Rating Scale - see the proficiency guidelines at www.actfl.org).

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

FREN 1002. Introduction to French II. 4 Credit Hours.

A continuation of the activities of French 1001. The basics already learned are practiced, and new patterns of oral communication and writing are introduced. Additional fundamentals of grammar, graded readings, listening and viewing activities provide further insight into Francophone cultures using multimedia resources. At the end of the course students should be able to converse, write and read at the Novice Mid-level (ACTFL Rating Scale).

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 1001, 'C1002' in LCFR, 'B1002' in LCFR, 'C1003' in LCFR, 'B1003' in LCFR, or 'EXMPT' in LCFR)

FREN 1003. Introduction to French III. 3 Credit Hours.

Reinforces previously acquired language skills. Introduction of more subtle points of grammar, more sophisticated conversation, readings, listening and viewing activities provide deeper awareness of Francophone cultures using multimedia resources. At the end of the course students should be able to converse, write and read at the Intermediate Low level (ACTFL Rating Scale).

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 1002, 'C1003' in LCFR, 'B1003' in LCFR, or 'EXMPT' in LCFR)

FREN 1703. Cours Pratique de Langue Française - Elements. 3 Credit Hours.

This course is offered by the Sorbonne in Paris, France. See the French advisor for placement and a full description.

Repeatability: This course may not be repeated for additional credits.

FREN 1704. Cours Pratique de Langue Française - Elements. 4 Credit Hours.

Introduction to the basic structures and vocabulary of written and oral French. Emphasis is placed on the four skills - speaking, understanding, reading, and writing. Includes 10 hours of phonetics in a phonetics laboratory. Course given in France and taught by native French speakers. Placement determined by examination administered in Paris.

Repeatability: This course may not be repeated for additional credits.

FREN 2001. Intermediate. 3 Credit Hours.

Reinforces and enhances the activities of French 1003 (C061). The student completing the course should be able to converse and write at the Intermediate Low level, and to read literary works in French at the Intermediate Mid level (ACTFL Rating Scale). NOTE: Intended as a bridge to upper-level courses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 1003 or 'EXMPT' in LCFR)

FREN 2021. Conversation I. 3 Credit Hours.

Study of French language with intensive work in skills required for understanding and speaking. Stress on phonetics, practical vocabulary, idioms, and useful sentence structures. At the end of the course, students should be able to converse at the Intermediate Mid level (ACTFL Rating Scale - see the proficiency guidelines at www.actfl.org).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 2001.

FREN 2041. Reading I. 3 Credit Hours.

Intensive work on skills required for reading. Emphasis on techniques to allow understanding of French texts without translating them into English. At the end of the course, students should be able to read at the Intermediate High level (ACTFL Rating Scale).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 2001.

FREN 2096. Composition I. 3 Credit Hours.

Intensive work on skills required for writing. Stress on vocabulary and sentence patterns helpful in writing French. Use of source materials (dictionaries, reference works, specialized vocabularies, etc.). At the end of the course, students should be able to write at the Intermediate Mid level (ACTFL Rating Scale).

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 2001.

FREN 2501. French for Business I. 3 Credit Hours.

Intensive work in spoken and written French needed by business personnel and other travelers to Francophone areas. Vocabulary, idiomatic usage and special terminology for professional needs. Cultural aspects, practice in personal contact and letter writing. At the end of this course students should be able to converse, write and read at the Intermediate Mid level (ACTFL Rating Scale).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 2001.

FREN 2703. Cours Pratique de Langue Francaise - Intermediate Level. 3 Credit Hours.

This course is offered by the Sorbonne in Paris, France. See the French advisor for placement and a full description.

Repeatability: This course may not be repeated for additional credits.

FREN 2704. Cours Pratique de Langue Francaise - Intermediate Level. 4 Credit Hours.

This course reinforces the basic skills of speaking, understanding, reading, and writing French. Emphasis on composition, conversation and some textual analysis. Introduction to French culture and civilization. Includes 10 hours of phonetics in a phonetics laboratory. Course given in France and taught by native French professors. Placement is determined by examination administered in Paris.

Repeatability: This course may not be repeated for additional credits.

FREN 3001. Advanced Grammar. 3 Credit Hours.

Review and enhancement of French grammar to ensure mastery of the structures of the written and spoken language needed for effective performance in other courses at the 3000 and 4000 levels.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 2096 and any FREN course numbered 2000 to 4999.

FREN 3021. Conversation II. 3 Credit Hours.

Enhancement of the skills developed in French 2021. At the end of this course students should be able to converse at the Intermediate High level (ACTFL Rating Scale - see the proficiency guidelines at www.actfl.org).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 2021.

FREN 3096. Composition II. 3 Credit Hours.

Writing-intensive Capstone Course required for all French majors. Challenging reading and writing assignments. Builds on writing skills acquired at the lower intermediate level, with emphasis on composition, register and style. Students do considerable writing of different types and expand active vocabulary appropriate to style and register. At the end of this course students should be able to write at the Intermediate High level (ACTFL Rating Scale).

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 2041 and FREN 2096)

FREN 3101. Survey of French Literature I. 3 Credit Hours.

Movements, trends, and events which constitute the evolution of French literature from the Middle Ages to the Enlightenment, and an examination of the contributions of major authors in each period.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 2041 and FREN 2096)

FREN 3102. Survey of French Literature II. 3 Credit Hours.

Movements, trends and events which constitute the evolution of French literature in the 19th and 20th centuries, and an examination of the contributions of major authors in each period.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 2041 and FREN 2096)

FREN 3201. Culture and Civilization I. 3 Credit Hours.

Study of the historical, geographical, artistic, psychological, and social bases of contemporary France. This course is essential for students seeking teaching certification.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 2041 and FREN 2096)

FREN 3240. Topics in French Cinema and Literature (in English). 3 Credit Hours.

This course is designed to deepen understanding of French culture, ethnicity, and universal themes as they are portrayed in French film and literature. It explores commonality and difference between two different forms of creative expression, in particular novels that were then adapted for film, as well as works of authors and filmmakers that are not directly linked. Topics vary. Viewing of films, readings. Taught in English.

Repeatability: This course may be repeated for additional credit.

FREN 3241. French Culture through Film. 3 Credit Hours.

This course examines contemporary French cinema in the context of its relationship to modern France. Students will analyze the socio-political and cultural commentary found in selected films.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FREN 2041 and FREN 2096)

FREN 3703. Cours Pratique de Langue Francaise - Upper Level. 3 Credit Hours.

This course is offered by the Sorbonne in Paris, France. See the French advisor for placement and a full description.

Repeatability: This course may not be repeated for additional credits.

FREN 3704. Cours Pratique de Langue Francaise - Upper Level. 4 Credit Hours.

Refines and improves oral and written proficiency in French. Emphasis on tenses, moods, syntax, and the use of language types (informal, colloquial, refined). Grammar review, composition, and textual analysis. Focus on French culture and civilization. Includes 10 hours of phonetics in a phonetics laboratory. Course given in France and taught by native French professors. Placement is determined by examination administered in Paris.

Repeatability: This course may not be repeated for additional credits.

FREN 4140. Topics in French Literature. 3 Credit Hours.

Different topics in the analysis of prose, poetry and drama. These topics include: major works considered in the aesthetic, philosophical and historical context of the Renaissance, the Classical Age and the Enlightenment; the social, political and intellectual changes as revealed in the works of the Romantics, the Realists, the Naturalists and the Symbolists; major figures of contemporary French literature, representative of the various traditional genres as well as the new approaches to both genres and criticism which the modern/post-modern authors have brought to these traditions. NOTE: This course is repeatable for credit under different topics.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FREN 3101 and FREN 3102) and (FREN 3096 or FREN 3001)

FREN 4161. Francophone Literatures and Cultures. 3 Credit Hours.

A course in contemporary Francophone literature designed to give students an understanding of the literary, political, and cultural issues that dominate contemporary Francophone fiction from Africa, Canada and the Caribbean. Six novels will be studied with a special focus on autobiography and the position of women in different cultures. The course will be taught in French.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in FREN 3096, (FREN 3101 or FREN 3102), and FREN 3001.

FREN 4182. Independent Study. 3 Credit Hours.

Topics in French and/or Francophone literature. Considered only for extraordinary reasons. Written petition to be submitted by student and instructor before the end of the pre-registration period. NOTE: Does not replace required courses, unless specified and approved by the French advisor and department chair.

Repeatability: This course may be repeated for additional credit.

FREN 4240. Topics in French Cinema and Literature. 4 Credit Hours.

This course is designed to deepen understanding of French culture, ethnicity, and universal themes as they are portrayed in French film and literature. It explores commonality and difference between two different forms of creative expression, in particular novels that were then adapted for film, as well as works of authors and filmmakers that are not directly linked. Topics vary. Viewing of films, readings. This course is taught in English and includes a tutorial hour conducted in French.

Repeatability: This course may be repeated for additional credit.

FREN 4703. Cours Pratique de Langue Francaise - Advanced Level. 3 Credit Hours.

This course is offered by the Sorbonne in Paris, France. See the French advisor for placement and a full description.

Repeatability: This course may not be repeated for additional credits.

FREN 4704. Cours Pratique de Langue Francaise - Advanced Level. 4 Credit Hours.

Focuses on perfecting oral and written skills in French. Emphasis on the subtle points of grammar, syntax, semantics, and nuances and registers of the French language. Critical analysis of literary passages. Substantial written work. Includes 10 hours of phonetics in a phonetics laboratory. Course given in France and taught by native French professors. Placement is determined by examination administered in Paris.

Repeatability: This course may not be repeated for additional credits.

Gender, Sexuality and Women's Studies (GSWS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GSWS 0801. Border Crossings: Gendered Dimensions of Globalization. 3 Credit Hours.

This course explores the ways in which gender manifests in a variety of cultural and national contexts and the impact of globalization on gendered social relationships. Gender indicates the ways in which our social lives are organized around gender categories - in relation to work, family, sexuality, immigration, crime, culture, and nation-state. Globalization indicates the transnational flow of capital, goods, people, ideas, militaries, cultures, media, diseases, ecologies, and more. Questions we will explore include: How does globalization relate to settler colonialism, white supremacy, patriarchy, and racialized slavery? How do women, men, transgender, and non-binary people experience globalization differently? For example, how are their wages, compensation, and value negotiated in the global labor market? How different are experiences of women in the Global North from those of women in the Global South? We will explore these issues and others by reading scholarly studies, watching films/documentaries, and engaging in classroom discussion. The course will take an intersectional approach in considering the complex interactions between gender and other social categories such as race, religion, class, sexuality, age, ability, and nationhood in a range of geographic contexts. This intersectional approach to gender informs the course's exploration of global strategies for decolonization and collective liberation. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed LAWU 0801 or WMST 0801.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 0824. Gender and World Societies. 3 Credit Hours.

Learn about the history of feminine and masculine gender roles from comparative and international perspectives. Using case studies from Ancient Greece, Medieval Europe, West Africa, Victorian Britain, Modern Europe, the Middle East, South Asia, East Asia, and/or Latin America, we will explore certain themes - The State, The Sacred, Work, The Family, The Body and Sexuality, Modern Revolutionary Movements - to investigate how gender and gender roles have changed over time, and their significance today. Readings include primary sources written both by men and by women, secondary sources, novels, and films. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Gender, Sexuality & Women's Studies 0824; History 0824, 1708, C065; Women's Studies 0824, 1708, or C065.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 0832. Politics of Identity in America. 3 Credit Hours.

Gay or straight. Black or white. Male or female. What do these different group identities mean to Americans? How do they influence our politics? Should we celebrate or downplay our diversity? This course explores how we think about others and ourselves as members of different groups and what consequences it has for how we treat one another. Our fundamental social identities can be a source of power or of powerlessness, a justification for inequality or for bold social reform. Students learn about the importance of race, class, gender and sexual orientation across a variety of important contexts, such as the family, workplace, schools, and popular culture and the implications these identities have on our daily lives. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed Gender, Sexuality & Women's Studies 0932, History 0832, Political Science 0832/0932, Sociology 0832 or Women's Studies 0832/0932.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 0851. Gender in America. 3 Credit Hours.

Being a man or a woman means feeling like a man or a woman. People display gender by learning the routines and expectations associated with being male or female. How do people learn gender? How does living in a gendered society lead to differences in power and opportunities between men and women? How do race, ethnicity and sexuality affect the way gender is experienced for these different groups? How does gender acquire such important meaning in terms of identity and behavior? Using a variety of written materials including novels that explore gender identity construction, this course looks at how gender has become such a prominent feature of life in America. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Gender, Sexuality & Women's Studies 0851; Sociology 0851, 1676, 1696, C081, X081; Women's Studies 0851, 1676, 1696, C081, X081.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 0863. Living for Change: Autobiographies of Women in Radical Social Movements. 3 Credit Hours.

This course explores women's involvement in, and influences on, political culture in the U.S. through autobiographical narratives of women in social movements from the mid-20th century to the present. Historically, women's roles in society have been restricted to the private, domestic sphere, where they have been expected to fulfill their duties as wives and mothers, tasked with imparting the values of their communities to the next generation of citizens. Broader social change, however, unfolds through political activism in the public sphere, which is traditionally considered the realm of men. Consequently, across the historical record and within today's political landscape, the most visible activists and change-makers tend to be men, while women's leadership is often overlooked. In this course, we will learn about how women have consistently served as radical agents of change. We will read and discuss women's accounts of their life stories, supplemented by scholarly studies on gender and social movements. The focus of the course will be on six movements that typically are not associated with women's political and cultural work: the Black Power Movement, the American Indian Movement, the Farmworkers Movement, student and anti-war movements, disability rights movements, and LGBTQ+ movements. Questions we will consider include: Why did these women get politically involved? How were their experiences in social movements shaped by their gender? What is their cultural and political legacy? Why did they write about their lives? Why do we read their narratives? And, most importantly, what can we learn from them about what it means to live an activist life? NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: GSWS 0863/0963; WMST 0863/0963.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 0963. Honors Living for Change: Autobiographies of Women in Radical Social Movements. 3 Credit Hours.

This course explores women's involvement in, and influences on, political culture in the U.S. through autobiographical narratives of women in social movements from the mid-20th century to the present. Historically, women's roles in society have been restricted to the private, domestic sphere, where they have been expected to fulfill their duties as wives and mothers, tasked with imparting the values of their communities to the next generation of citizens. Broader social change, however, unfolds through political activism in the public sphere, which is traditionally considered the realm of men. Consequently, across the historical record and within today's political landscape, the most visible activists and change-makers tend to be men, while women's leadership is often overlooked. In this course, we will learn about how women have consistently served as radical agents of change. We will read and discuss women's accounts of their life stories, supplemented by scholarly studies on gender and social movements. The focus of the course will be on six movements that typically are not associated with women's political and cultural work: the Black Power Movement, the American Indian Movement, the Farmworkers Movement, student and anti-war movements, disability rights movements, and LGBTQ+ movements. Questions we will consider include: Why did these women get politically involved? How were their experiences in social movements shaped by their gender? What is their cultural and political legacy? Why did they write about their lives? Why do we read their narratives? And, most importantly, what can we learn from them about what it means to live an activist life? NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: GSWS 0863/0963; WMST 0863/0963.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 1076. Introduction to Gender Studies. 3 Credit Hours.

An interdisciplinary course covering a variety of perspectives on gender and sexuality, and their intersections with race, gender identity, class and other identities in U.S. society. This course explores the institution of family, the sexual division of labor, the ideologies of femininity and masculinity, and the political, economic and cultural bases of these ideologies. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Note: Students who earned credit for "Introduction to Women's Studies" will not receive additional credits for taking "Introduction to Gender Studies."

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

GSWS 1096. Introduction to Women's Studies. 3 Credit Hours.

An interdisciplinary course covering a variety of perspectives on women and gender. Emphasis on women in American society with consideration of special conditions of women in third world societies. Studies the central institutions of gender-including family, sexuality and love, the sexual division of labor, the ideology of femininity, and the structural basis of this ideology - women's social roles, and symbolic representations of women in culture. Special emphasis on class and racial differences and similarities. NOTE: This course can be used to satisfy a university Core Individual and Society (IN) and Writing Intensive (WI) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN, SI

Repeatability: This course may not be repeated for additional credits.

GSWS 1301. Foundations in Women's Studies. 3 Credit Hours.

This course explores the essential texts that define the history of Women's Studies and its evolution into the more expansive field of Gender, Sexuality and Women's Studies. The course will address how gender difference is constituted, the diversity of women's experiences in relation to class, race, sexuality, and gender identity providing the student with a common body of knowledge agreed upon by experts in the field of Gender, Sexuality and Women's Studies. The course functions as the foundation for future courses in Gender, Sexuality and Women's Studies. Students will study the works of historical contributors to feminist thought such as Sojourner Truth, Elizabeth Cady Stanton, Betty Friedan, Simone de Beauvoir, Kate Millet, bell hooks, Angela Davis, Judith Butler and others. Though this course is designed particularly with the needs of Gender, Sexuality and Women's Studies majors in mind, it will introduce to both majors and non-majors the intellectual issues, topics, and figures that embody the history of feminist struggle from its first wave in the 19th and early 20th centuries to the present day.

Repeatability: This course may not be repeated for additional credits.

GSWS 2000. Special Topics. 3 Credit Hours.

Specific cultural or social studies in gender and sexuality issues with an emphasis on interdisciplinary analyses. NOTE: A variable topics course.

Repeatability: This course may be repeated for additional credit.

GSWS 2001. Women in Religion and Society. 3 Credit Hours.

Study of both the roles and the understanding of women in primitive and major modern religious traditions, particularly of the West, including an investigation of the authoritative writings and practices of the various traditions.

Repeatability: This course may not be repeated for additional credits.

GSWS 2002. Gender in the Cinema. 3 Credit Hours.

This course uses feminist and queer film theories to critically explore how gender, queer and trans identities are depicted in Hollywood, independent, documentary, international, and experimental films. The course examines feminism's relationship to racial, class, sexuality, gender identity and other differences through the medium of film. NOTE: Students who earned credit for "Sexual Differences in the Cinema" will not receive additional credits for "Gender in the Cinema."

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 2003. Gender in Classical Antiquity. 3 Credit Hours.

What can we learn about the lives of ancient Greek and Roman women from ancient literature - literature written primarily by men? Can we piece together the everyday lives of Greek or Roman women of any social class? Even if we believe in the equality of the sexes, would a word like "equality" have had any meaning to the ancients? In this class, we will find answers to these questions by reading Greek and Latin sources in translation as well as the works of modern Classicists. While focusing on women's lives, we will gain a greater understanding of what was expected of both genders in the ancient world.

Repeatability: This course may not be repeated for additional credits.

GSWS 2007. Creative Writing: Fiction: LGBTQ Lives. 3 Credit Hours.

In this course, students will grapple with all areas essential to the craft of writing fiction, especially as they are used to tell LGBTQ-centered stories. As LGBTQ identities have not always been accepted in the mainstream, we will also examine the use of subtext to inform plot and/or character development. Through the use of class discussion, individual and group writing activities, and workshopping peer drafts, students will hone their writing tools. By class' end, students will achieve stronger reading and writing skills as well as develop a deeper appreciation and understanding of how to apply elements of fiction to LGBTQ subject matter. Last: this classroom is a brave space, in which writers - regardless of how they identify in terms of gender or sexuality - should feel welcome to work with material that speaks their truth; as such, as peers, we will listen and respond without judgment to the various work we discuss. NOTE: Students can receive credit only once for either GSWS 2007 or LGBT 2007.

Repeatability: This course may not be repeated for additional credits.

GSWS 2022. Gender, Race, Class, and the City. 3 Credit Hours.

This course will focus on the ways that race, class, and gender significantly shape US cities and urban life. The course will explore how urban spaces reflect and perpetuate different relations of power, inequity, and identity. How do multiple and contradictory identities shape one's experience of the city? How are economic, social, and political processes interacting with public policy (or the lack thereof) to determine how resources and power are unequally distributed? How are contemporary urban sustainability initiatives imbued with racial, gender, and class politics? First, we explore critical geographic frameworks for urban analysis that help to explain the social and spatial organization of US cities. We will develop a framework for urban analysis that integrates race, class, and gender, and draws upon the geographic concepts of place and scale. Second, we will use qualitative methods to apply our integrated framework to contemporary metropolitan processes and problems in the Philadelphia area. Key topics that we will address include: everyday experiences of urban life in public and private spaces; environmental (in)justice; neoliberal urban governance; urban social movements; and urban policy and planning. NOTE: The following course numbers are cross-listed: GUS 2022, ENST 2022, or GSWS 2022; students may receive credit for only one of these instances.

Repeatability: This course may not be repeated for additional credits.

GSWS 2051. Critical Race Feminist Theory. 3 Credit Hours.

Building from the ground breaking critical race theory texts that emerged within legal academia during the early 1990s this course will consider the historical underpinnings of this literature and its implications for future feminist theory and practice. The course will investigate the limits of liberal legal remedies in addressing the severe social realities faced by many women, men, trans and non-binary people of color of various sexual identities. We will pay particular attention to the persistence of structural, institutional and everyday racism despite the rejection of race as a viable biological human concept, and its intersection with gender, gender identity and sexuality. The course will also consider how core concepts from critical race theory are deployed within transnational feminist thought and activism. Note: Students who earned credit for "Critical Race Theory and Feminist Implications" will not receive additional credits for "Critical Race Feminist Theory."

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GSWS 1301.

GSWS 2128. Men and Masculinities. 3 Credit Hours.

This course examines and interrogates masculinity by drawing upon the diverse voices and experiences of men and boys across age, race, ethnicity, class, sexuality, ability and religion. This course will explore the social and personal meanings of "manhood" and its impact on relationships, institutions and in our public and private lives.

Repeatability: This course may not be repeated for additional credits.

GSWS 2152. Introduction to Feminist Philosophy. 3 Credit Hours.

This course covers major themes in feminist philosophy through canonical and recent texts. Themes include the sex/gender distinction; oppression, equality and justice; work and family; feminist care ethics; pornography and prostitution; sex-positivity and sex-negativity; feminist epistemology and feminist critiques of science. Throughout the course, discussions will consider the intersection of gender with race, class, disability, global location, sexuality, and age.

Repeatability: This course may not be repeated for additional credits.

GSWS 2159. Sex/Gender/Film/History. 3 Credit Hours.

Students will analyze mainstream, popular films produced in the post-WWII 20th century U.S., treating them as cultural texts that shed light on the ongoing historical struggles over gender identity and appropriate sexual behaviors.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 2160. Topics in Women's Literature. 3 Credit Hours.

Variable content course which examines the representation of women and the literature created by English, American, or other countries' women writers. This course has been offered with many specific topics combining biography and literary texts; neglected masterpieces of American literature by black and white women; woman as hero/woman as heroine; the questions of love, marriage, and vocation for women from 1850 to 1940 and other thematic motifs of 20th and 21st century women's literature. Note: Formerly known as Women in Literature WMST 2197 and ENG 2197. Students may earn up to 6 credits of coursework taken from the following courses: ENG 2160, ENG 2197, GSWS 2160, WMST 2160, WMST 2197.

Course Attributes: SI

Repeatability: This course may be repeated for a total of 6 credit.

GSWS 2202. Religion and Human Sexuality. 3 Credit Hours.

The goal of this course is to examine the attitudes and practices of the major world religions regarding human sexuality. Topics to be covered will include marriage and procreation, and such controversial issues as abortion, homosexuality and sexual activity outside of marriage. Note: Religion and Human Sexuality is taught as a cross-listed course in Religion; Gender, Sexuality & Women's Studies; and LGBT Studies. Students may receive credit for only one of the following courses: REL 2002, LGBT 2002, GSWS 2202, WMST 2202.

Repeatability: This course may not be repeated for additional credits.

GSWS 2207. Creative Writing: Non-Fiction: Queer Lives. 3 Credit Hours.

For people who identify as members of the LGBTQIA community, queer stories carry a particular significance. In part, these stories allow members of the community to process how their sexuality has influenced their lives but also how these stories have influenced the degree to which they accept and express their sexuality. To people outside the LGBTQIA community, these stories offer a glimpse into what queer individuals have experienced. Because writing about queer lives is inherently political, these stories have often been fashioned into confining structures, such as the "coming out" story. And although this particular approach to telling these stories is important, queer lives often extend well beyond this particular moment in the development of their sexual identity - and some individuals even lack such a "moment" to serve as the core of their story. This course examines a variety of ways to approach telling these stories, for both people without and within the LGBTQIA community. NOTE: Students can receive credit only once for either LGBT 2207 or GSWS 2207.

Repeatability: This course may not be repeated for additional credits.

GSWS 2305. LGBTQ Film: The Coming of Age Genre. 3 Credit Hours.

A number of films examine how queer youth do grapple with their LGBTQIA identity in their adolescent years, thus representing the typical sociological understanding of "coming-of-age." But a number of films instead explore how members of the LGBTQIA community explore their queer identity later in life. These films focus on the more psychological understanding of "coming-of-age", a point when people, mentally, fully accept who they are, inclusive of their sexual identity. Regardless of the timing in a person's life, this life stage focuses on a shift from innocence to a more "adult" or "realistic" take on the world around us. This course explores how the queer coming of age genre renders the often-unique approach queer individuals face as they come of age. NOTE: Students can receive credit only once for either GSWS 2305 or LGBT 2305.

Repeatability: This course may not be repeated for additional credits.

GSWS 2306. LGBTQ Film: Queer Representation. 3 Credit Hours.

This course explores the way in which film has portrayed LGBTQ individuals. Drawing from a diverse slate of films, the class examines not just the various ways in which LGBTQ sexual expression has been rendered but also the political and sociological implications of this depiction over various decades. In addition, the class explores the ways in which those who have fought for LGBTQ visibility and equal rights have been framed through various films, whether they are recognizable figures in LGBTQ history or not. The class explores the ways in which these films have accomplished their goals and discusses the ways in which these films have been received. NOTE: Students can receive credit only once for either GSWS 2306 or LGBT 2306.

Repeatability: This course may not be repeated for additional credits.

GSWS 2405. Queer Lives. 3 Credit Hours.

In this course we will read autobiographical accounts (memoirs, essays, diaries, and poems) in which a significant portion of the narrative focuses on same-sex erotic attraction and/or gender difference, identified in contemporary society by the label Lesbian/Gay/Bisexual/Transgender/Intersex or the generic (and contested) Queer. The works were selected both to examine how gay and lesbian lives have been defined and altered over the course of the last sixty years and to provide a perspective of national, ethnic, religious, and racial diversity. Our main focus in the classroom will be discussion of these texts and their contexts. The classroom will be augmented by a research assignment focused on a gay or lesbian life we have not examined together in class. NOTE: This course was previously titled "Gay and Lesbian Lives." Students can earn credit only once for either "Queer Lives" or "Gay and Lesbian Lives."

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 2406. LGBTQ Social Movements. 3 Credit Hours.

Starting in the 1950s forward, using a social science lens, this class examines the collective experience of LGBTQ-identifying lives. Focusing on various LGBTQ social movements, the course explores the various perspectives, targets, strategies, and goals of these various movements. The course also examines issues impacting the various factions within the LGBTQ community and how these factions have employed various tactics to effect social change. Starting with a basic foundation in social movement theory, class readings will explore the various targets addressed by social movements - such as science (medicine), culture, courts (legal), and states (not physical states, per se). The course will also address various ideologies (such as assimilation versus liberation). Students will leave the class with a clear sense of how to define a social movement, understand how it coalesces as a movement, how it operates, how it effects change, as the lasting impact of these various changes within society. Because not every moment that happens within the LGBTQ community happens as a consequence of one prior, the various movements we explore will not be examined chronologically. NOTE: Students can receive credit only once for either GSWS 2406 or LGBT 2406.

Repeatability: This course may not be repeated for additional credits.

GSWS 2815. Love, Marriage, and Family. 3 Credit Hours.

It is easy to assume that love, marriage, and family go together, but this has not always been the case. These concepts have a history. This course is a comparative examination of love, marriage, and family and the related themes of gender and sexuality in different historical periods and geographical areas. It includes ancient, medieval, and modern texts and materials and covers both western (European and American) and non-western (Asian, African, and perhaps Middle Eastern and Latin American) case studies. NOTE: Each instructor may place a different emphasis among those topics and regions.

Repeatability: This course may not be repeated for additional credits.

GSWS 3000. Special Topics. 3 Credit Hours.

Specific cultural, social, or political studies in gender and sexuality issues with an emphasis on interdisciplinary analyses.

Repeatability: This course may be repeated for additional credit.

GSWS 3003. Women Writers In Black Literature. 3 Credit Hours.

Examines the concerns of black women writers: philosophical overtones, universal statements, literary structures, dominant themes. Will be taught from a comparative perspective by examining representative black women writers in the United States, the Caribbean and Africa. Will include the poetry, drama, short stories and the novels of major writers including Zora Neale Hurston, Buchi Emecheta, Lorraine Hansberry, Eflia Sutherland, Sonia Sanchez, and many others. The readings will attempt to demonstrate that, notwithstanding the diversity in cultural, historical, and political backgrounds of the writers, a common thread runs through the works of black women writers.

Repeatability: This course may not be repeated for additional credits.

GSWS 3006. The American Woman: Visions and Revisions. 3 Credit Hours.

An examination of images and roles of women in American culture. Using fiction, poetry, and autobiography, we develop an understanding of stereotypes and myths and we relate these images to the real-life experiences of American women. The readings include all classes and many ethnic groups, and focus primarily on the 20th century. NOTE: Students will receive credit only once for either AMST 3096, AMST 3006, GSWS 3096, or GSWS 3006.

Repeatability: This course may not be repeated for additional credits.

GSWS 3015. Sexuality and Disability. 3 Credit Hours.

This course explores the relationship between sexuality and disability, both visible and invisible. It focuses on gender identity, sexual orientation, wellness, pleasure, technology, inequality, and sexual and erotic agency in relation to the sexual lives of persons living with disabilities. Drawing on critical disability and critical sexuality studies, the course examines historical and modern approaches to understanding how sexuality and disability intersect to impact everyone, both disabled and able-bodied.

Repeatability: This course may not be repeated for additional credits.

GSWS 3016. Sexuality Education. 3 Credit Hours.

When, where and how do we learn about sex? How does what we know about sex shape the way we understand ourselves and our relationship with others? This course explores current and historical approaches to sexuality education and its impact on constructing individual and societal sociosexual and gendered scripts and norms. We will analyze and critique formal K-12 and adult sex education programs as well as the informal ways we learn about sexuality from family, friends and the media. Students will have the opportunity to examine a range of sexuality education curricula that are in use within and outside of the United States as well as to develop their own sexuality education curriculum.

Repeatability: This course may not be repeated for additional credits.

GSWS 3017. Social Perspectives on Digital Pornography: The Other Sex Ed. 3 Credit Hours.

In the 2003 hit Broadway musical, Avenue Q, characters excitedly sing, "The Internet is for Porn!" Over the last 20 years, despite the proliferation and increasing availability of digital pornography, or pornography accessed via the internet, little is known about its impact on sociosexual and gender scripts, gender-based violence, relationships, and sexual pleasure. Using an intersectional, feminist framework, this course explores how and what pornography teaches us about, for example, gender, sexual orientation, consent, and sexual behavior. Additionally, it examines and critiques the newly emerging fields of pornography literacy and pornography studies as well as the rapidly changing legal landscape of digital privacy and censorship and their effect on consumers, creators, and distributors. Note: This course is regularly cross-listed with LGBT 3017; please be advised students can receive credit only one time for either LGBT 3017 or GSWS 3017.

Repeatability: This course may not be repeated for additional credits.

GSWS 3031. Women in Chinese Literature. 3 Credit Hours.

This course focuses on women writers and women as characters in premodern, modern, and contemporary Chinese literature. Texts will include poetry, novels, short stories, and drama. Gender, representation, and women's roles in the history of Chinese literature are among the topics that will be covered. Knowledge of Chinese is not required. The class will be conducted in English, and all readings will be in English translation. Note: This course is cross-listed with Chinese 3031 and Asian Studies 3031. Students may only receive credit once for these courses: ASST 3031, CHI 3031, or GSWS 3031.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 3040. Special Topics. 4 Credit Hours.

Specific cultural, social, or political topics in gender and sexuality issues with an emphasis on interdisciplinary analyses.

Repeatability: This course may be repeated for additional credit.

GSWS 3082. Independent Study. 1 to 6 Credit Hour.

For students who would like to pursue topics on gender and sexuality not offered within existing courses. Original research and projects encouraged. Students will work closely with faculty in designing and carrying out the independent study. NOTE: Students must have selected a faculty advisor and submitted a formal proposal approved by their faculty advisor before registering for the course.

Repeatability: This course may be repeated for additional credit.

GSWS 3097. Feminist Theory. 3 Credit Hours.

An examination of contemporary feminist theory as it applies to various fields of academic and social discourse. The course encourages critical analysis of the foundation of knowledge. NOTE: Students will earn credit only one time for either ENG 3097 or GSWS 3097.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

GSWS 3124. Politics of Sexual Orientation and Gender Identity. 3 Credit Hours.

This course examines the emergence and development of the movement to secure rights for gays, lesbians and bisexuals; how gays, lesbians and bisexuals are socially constructed and the influence this has on political discourse; how political issues that are relevant to the lives of gays and lesbians reach the political agenda; and the patterns of conflict and cooperation that exist among actors in and outside of government over issues such as employment discrimination, marriage, child adoption, and military service. Note: Prior to Summer 2019, this course was offered as "Politics, Rights, and Sexual Orientation." Students who earned credit for this course number under that title will not earn additional credits under the new title "Politics of Sexual Orientation and Gender Identity." This course is cross-listed with Political Science and LGBT Studies; students may only receive credit for one of the following course numbers: POLS 3124, GSWS 3124, LGBT 3124.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 3205. Queer Novels of the 20th Century. 3 Credit Hours.

In this course, we will investigate what LGBT-themed novels of the 20th century convey about gender identity, how individuals form this identity, how an understanding (both conscious and unconscious) of this identity impacts individuals, and how the expression of sexuality dictates behavior, particularly in the LGBTQIA community. Beginning with a foundation in queer theory and various literary devices, students will build a theoretical vocabulary and lens through which to analyze a series of novels from both the US and International. The chosen novels reflect authors or works considered part of the literary LGBT "canon." Note: Students can receive credit only once for either GSWS 3205 or LGBT 3205.

Repeatability: This course may not be repeated for additional credits.

GSWS 3206. Queer Novels of the 21st Century. 3 Credit Hours.

In this course, we will investigate what various LGBTQ-themed novels tell us about LGBTQ life in the 21st Century. Starting with a historical approach of how LGBTQ novels were shaped by attitudes about LGBTQ life in the 20th century, we will determine how the representation of LGBTQ lives have evolved in novels. Our novels will explore the lives of people from across the LGBTQ spectrum. A number of the protagonists' identities also represent important intersectional identities as well, such as nationality, religion, and race. Beginning with a foundation in LGBTQ theory and various literary devices, students will build a theoretical vocabulary and lens through which to analyze a series of contemporary LGBTQ novels. NOTE: Students can receive credit only once for either GSWS 3206 or LGBT 3206.

Repeatability: This course may not be repeated for additional credits.

GSWS 3225. Women in U.S. History. 3 Credit Hours.

Explores the ways in which women have both been affected by, and helped to shape, this nation's history. Emphasis will be on how women of different socio-economic backgrounds, races, and ethnic groups have experienced colonization, American expansion, sectionalism, the industrial revolution, urbanization, immigration, war, economic depression, cultural transformations and political change. Commonalities and differences among women, as well as conflicts between them, in a society based on male supremacy will be explored. Issues on how race, ethnicity, and class affect the experience of gender will be highlighted. NOTE: Students will receive credit only once for either GSWS 3225 or HIST 3225.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 3231. German Minority Identities: Gendered and Cultural Dimensions (in English). 3 Credit Hours.

Germany has vibrant migrant communities with ethnic and racial groups from places as diverse as Turkey, Italy, Greece, Morocco, East Africa, and Russia. This course looks at the presence of minority communities in Germany today, their history and cultural influences as well as economic contributions. Our main analytical lens will be gender - how the German host culture is shaped by concepts of femininity and masculinity, sexuality, family, and a gendered division of labor and how these concepts are challenged (and/or shored up) by the various ethnic communities. We will look at both the perception of migrants by white/native Germans (how are they portrayed in the media, film, and politics?) and we will explore the voice of the "other," i.e. the experience of minority communities living in Germany and how this influences their own cultural identities. Questions we will ask include: How does the experience of immigration affect the identity of minorities living in Germany? What does "Deutsche Kultur" (German culture) mean today? Our focus will be on how gender shapes and underlies much of these discussions on minorities in Germany as well as their negotiations of conflicting expectations of community and larger "German" culture. Course material will include critical readings, films, and other cultural texts. Taught in English. Note: Students who earned credit for "German Minorities and Cultural Identities: Gendered Dimensions" will not receive additional credits for "German Minority Identities: Gendered and Cultural Dimensions."

Repeatability: This course may not be repeated for additional credits.

GSWS 3235. Weimar Culture: Race, Gender, Sexuality and Nation (in English). 3 Credit Hours.

This class explores the contradictions in German culture during the Weimar Republic (1918-33), with particular attention to its urban centers. Berlin was considered the European capital of artistic and experimental subcultures as well as the hotbed for radical politics, whose decadent Bohemian culture of sexual experimentation, drug use, women's liberation and cabaret existed side by side with abject poverty and street violence. We will ask questions such as how Hitler could come to power in a Germany that was considered to have the most advanced science, technology, literature, philosophy and art of its time, and whose Jewish citizens contributed to all areas of society? How did a new consumerism contribute to the complacency of many Germans in the face of a violent fascism? Thereby we will pay attention to how concepts of race, gender, sexuality and nation shaped the debates of the time. We will watch movies, read literature and graphic novels, and learn about the Weimar Republic's political landscape and history. This course is conducted in English. All films are subtitled and readings are in English. Note: Students who earned credit for "Race, Gender, Sexuality, and Nation in Weimar Culture" will not receive additional credits for "Weimar Culture: Race, Gender, Sexuality and Nation."

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 3236. Technology in Popular Culture: A Gender Analysis. 3 Credit Hours.

The wider context of this seminar is how science and technology influence and shape the world we live in. The focus is on gender related approaches - in what way does technology and its representations shape gender identity - and how this is reflected in popular culture, such as in the science fiction novel and film. Some points of discussion will be feminist critiques of technology, reproductive technologies, virtual reality, and alternative technologies as they are developed as theoretical concepts on the one hand, and are mirrored in science fiction, on the other. Note: Students who earned credit for "Gender and Technology in Popular Culture" will not receive additional credits for "Technology in Popular Culture: A Gender Analysis."

Repeatability: This course may not be repeated for additional credits.

GSWS 3259. Women and Poverty. 3 Credit Hours.

This course focuses on women's poverty in the U.S. and the social welfare policies designed to address it. We begin with an overview of poverty in the U.S., ways to measure poverty, and how to read census tables on poverty and income. We then dive into the history of the welfare state in America, starting with the Poorhouse Era and moving through 1996's welfare reform legislation. The second part of the course addresses major issues and themes in poverty scholarship: the culture of poverty thesis, low-wage work, teenage motherhood effects, marriage and single motherhood, social capital, and neighborhood effects. We conclude with a comparative analysis of U.S. and international welfare states.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 3431. Women's Lives Modern Europe. 3 Credit Hours.

This course treats issues related to women's status and power in modern European history from the 18th century to the present. The emphasis of the course will be on the experiences of women in England, France, Germany, and Russia where many economic and political changes have occurred in the last few centuries. The purpose of this course is to discuss important issues that women have confronted in the past, and that continue to influence problems that women face today such as: personal, economic, and political power, education, sexuality, psychology, and social esteem, women's position in the home and the workplace plus the continuing question of conventional versus unconventional gender roles in Western societies. To supplement a general text and several published sources in European history, students will be reading memoirs and essays written by women on economic, political, and social issues pertaining to women, work, and the family during the past two centuries.

Repeatability: This course may not be repeated for additional credits.

GSWS 3542. Women and Society in Japan. 3 Credit Hours.

This course analyzes the changing position of women in Japanese society from ancient times to the present. Through discussions, lectures, and audiovisual materials, students learn about goddesses, female diviners, empresses, the classical female writers, women in warrior culture, women in industrializing Japan, and Japanese women's movements. NOTE: Students will receive credit only once for either GSWS 3542, ASST 3542, ASST 3942, or HIST 3542.

Repeatability: This course may not be repeated for additional credits.

GSWS 3546. Sexuality and Gender. 3 Credit Hours.

This is a historically oriented course focused on competing views of sexuality, in particular, essentialist theories and those which take a social constructionist approach. The first part of the course will lay the groundwork for the analysis of particular areas of sexuality by focusing on the transition from 19th century views of sexuality to the 20th century and on the learning of sexual scripts. The second part of the course will apply these perspectives to a variety of issues including rape, pornography, abortion, and prostitution.

Repeatability: This course may not be repeated for additional credits.

GSWS 3548. Intimate Partner Violence: Gender and Social Justice. 3 Credit Hours.

This course addresses gender-based violence, in particular, intimate partner violence. We will use intersectionality as a feminist tool in understanding how violence is mediated through the nexus of social power and control in which race, ability, sexuality, class, and other variables play a big part. Students will learn the impact of this gender-based violence on young girls, immigrants, women of color, elderly women, trans populations, lesbians and other marginalized groups within the U.S. NOTE: Students can receive credit only once for either LGBT 3548 or GSWS 3548.

Repeatability: This course may not be repeated for additional credits.

GSWS 3551. Critical Race Feminist Theory. 3 Credit Hours.

Building from the ground breaking critical race theory texts that emerged within legal academia during the early 1990s this course will consider the historical underpinnings of this literature and its implications for future feminist theory and practice. The course will investigate the limits of liberal legal remedies in addressing the severe social realities faced by many women, men, trans and non-binary people of color of various sexual identities. We will pay particular attention to the persistence of structural, institutional and everyday racism despite the rejection of race as a viable biological human concept, and its intersection with gender, gender identity and sexuality. The course will also consider how core concepts from critical race theory are deployed within transnational feminist thought and activism. Note: Students who earned credit for "Critical Race Theory and Feminist Implications" will not receive additional credits for "Critical Race Feminist Theory." This course was formerly known as GSWS 2051; students who have received credit for GSWS 2051 will not receive additional credits for GSWS 3551. Please be advised that students who have already received credit for SOC 3551 cannot receive duplicate credit for GSWS 3551.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GSWS 1301 and (GSWS 3097 or ENG 3097)

GSWS 3559. Health and Reproduction. 3 Credit Hours.

This course will focus on health and human reproduction in the United States. We will view reproduction as both a biological and social event and will be particularly concerned with the medical and health aspects of reproduction. Decisions about child bearing, the medicalization of child bearing, fecundity, birth control, fetal and neonatal health, maternal health and new reproductive technologies are among the topics that will be considered in the research-intensive course. The course will also cover technical, methodological and statistical issues arising in the study of reproduction. NOTE: This is a research-intensive course.

Repeatability: This course may not be repeated for additional credits.

GSWS 3606. Asian Women in Transition. 3 Credit Hours.

This course introduces and compares the experiences of women in Asia and Asian women in migration to the United States in the modern period, including rural and urban women, and ordinary and elite women in the late 19th and 20th centuries. Topics include women in households, women and work, and women's activism. Duplicate credit warning: Students may only receive credit for one of the following: ASST 3696, HIST 3696, GSWS 4696, HIST 3606, GSWS 3606, or ASST 3606.

Repeatability: This course may not be repeated for additional credits.

GSWS 3722. Women and Political Violence. 3 Credit Hours.

This course examines debates on gender and political violence that usually present violence as masculine, while femininity is associated with non-violence. Particular focus is on the participation of women in left terrorist and other militant groups in the U.S. and Europe between the 1960s and 1980s, and in the Middle East in the 2000s. Female terrorists and militants in various cultural settings are generally demonized as being more dangerous and violent than their male counterparts or their roles are de-politicized as misguided, seduced lovers of the "real" male terrorist. In this course we examine gendered cultural assumptions about women's "natural" role as mothers and peacemakers and how these cultural beliefs have been translated into a feminist definition of women's political activism as non-violent. We will discuss this contradiction.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 3900. Honors: Special Topics. 3 Credit Hours.

A variable topics course. Additional work arranged by the instructor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

GSWS 4000. Seminar in Gender, Sexuality, and Women's Studies. 3 Credit Hours.

A variable content course which selects one of the topics necessary for a comprehensive understanding of women in society and studies it in depth. The course may focus on a particular group of women, the study of women from a specific perspective, or the position of women in a particular institution.

Repeatability: This course may be repeated for additional credit.

GSWS 4004. Women and Criminal Justice. 3 Credit Hours.

The aims are to develop an understanding of the status of women in the Criminal Justice System as offenders, victims, and workers. We will examine the extent to which status is a reflection of stereotypes of women currently in vogue or a reflection of social structural arrangements in society. Patterns of female crime, treatment within the criminal justice system, victimization, and career opportunities will be studied and compared with those of males, as well as within other societies, where data is available.

Repeatability: This course may not be repeated for additional credits.

GSWS 4389. Field Work. 3 Credit Hours.

An internship in a public or private organization or company whose mission includes advocacy on the basis of gender, sexuality and/or gender identity. This course is required for Gender, Sexuality and Women's Studies majors, but is also open to non-majors in the College of Liberal Arts. Students must write a paper or create a project related to their internship. NOTE: Placement and faculty advisors arranged prior to registration. Requires a designated supervisor at the field placement, a minimum of 7.5 internship hours per week, and a faculty advisor.

Repeatability: This course may be repeated for additional credit.

GSWS 4396. Research Seminar. 3 Credit Hours.

This course serves as the capstone for the Gender, Sexuality and Women's Studies major. Students write a substantial research paper (5000-6250 words) either drawn from and expanding upon their Gender, Sexuality and Women's Studies internship, or on another selected topic. They work closely with the instructor and each other in increasing and applying their understanding of the writing process, scholarly research, and feminist and queer methodologies. NOTE: Capstone writing course. For majors only. Note: Students who earned credit for "Research Seminar in Women's Studies" will not receive additional credits for "Research Seminar."

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Gender/Sexuality/Womens St, Lesbian Gay Bi and Transgender.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

GSWS 4411. Secularism: Jewish and Muslim Women. 3 Credit Hours.

In its three-hundred-year history as a Western concept, secularism is often defined as the opposite of religion. Religious women have alternately found western secularism to be a source of liberation (as it grants them greater civil rights) and a source of oppression (as it putatively shrinks the religious sphere). In creating feminisms through Jewish and Muslim experience, feminisms that are both secular and religious, these religious women have complicated the meanings of secularism. They have also challenged the notion that feminism is necessarily secular. This course looks at examples of Jewish and Muslim women's lives and feminist thought in the US, Europe, and the Middle East. The course will compare and contrast the feminism of these two groups of religious women, in order to more fully understand the role of concepts like secularism, feminism, and religion. NOTE: Students will earn credit only one time for either GSWS 4411, REL 4411, or JST 4411.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GSWS 4999. Honors Thesis. 3 Credit Hours.

Individually supervised research and writing, in partial fulfillment of the requirements for graduating with Honors in Gender, Sexuality and Women's Studies. NOTE: Permission of program director required.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Geography and Urban Studies (GUS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GUS 0821. Digital Mapping: From Mercator to Mashups. 4 Credit Hours.

Almost all of us interact with digital maps regularly for finding directions and the locations of services, like the nearest coffee shop. Yet for most, the inner workings of digital maps remain a mystery. This course provides an in-depth exploration of how digital maps work - what technologies support location tracking, where do the mapped data come from, and how digital maps are used to analyze geographic problems in urban and environmental planning and policy, health, and business. Along the way, you will develop quantitative literacy by learning how to acquire spatial data, make digital maps, and critically evaluate mapping applications. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed CTRP 0821, CRP 0821 or GUS 0921.

Course Attributes: GQ, SI

Repeatability: This course may not be repeated for additional credits.

GUS 0829. The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

GUS 0831. Global Cities. 3 Credit Hours.

As globalization accelerates, the world becomes smaller and is transformed to an extended urban network. Even though there are places and people off the global grid in both rich and poor countries, we live in a single, interdependent urban world. This course seeks to understand this urban world. We ask questions like: How do changes in the global economy affect the lives of people from Cairo to Chicago? As 50 million people per year move into cities around the world how do those cities change? How will the massive rural to urban migration in China and India affect resources and the global environment? What is life like in cities for the majority of the world's poor? What types of plans and policies could improve cities in this century? Are wages in Philadelphia being influenced by what happens in Beijing and Bangalore? The answers will come from a wide range of perspectives, from geographers, urban planners, sociologists, and economists. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

GUS 0842. Sustainable Environments. 3 Credit Hours.

Humans are at a critical juncture in their relationship with the environment. Many of the global changes occurring in the atmosphere, climate, and oceans can be attributed to human activity. While the standard of living has increased for many people across the globe, the technological advancements that have made this possible endanger future generations because of their environmental impacts. Environmental toxins and air pollution are increasing, and fossil fuels and forests are being depleted at unsustainable rates. Now more than ever, the viability of human life depends on the scientific understanding of global environmental change, and on developing science-based policies to both protect the environment and promote human well-being in a just and sustainable manner. Course mission: enhance your capability to be environmentally informed consumers and citizens based on a sound understanding of the ecological, technological, economic, political, and ethical dimensions of environmental sustainability. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed EES/Geology 0842, ENST 0842/0942, or GUS 0942.

Course Attributes: GS, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

GUS 0861. Urban Dynamics: Global, Regional, and Local Connections. 3 Credit Hours.

Cities are a study in contrast - both a source of opportunity and a place where great wealth and poverty coincide. U.S. cities face enormous challenges as globalization has sparked a new era of urban innovation, yet has also intensified inequality and spurred new technologies of social control. This course asks: How have U.S. cities changed over the last century? How is globalization impacting the lives and opportunities of city dwellers? How do gender, age, race/ethnicity, class, and citizenship affect urban residents' experiences? How do urban policies and social movements advance or impede social justice across groups and places? Course topics include the social, economic, and political forces restructuring cities, inequality and diversity in the city, cities in the global economy, and the future of cities. Students cannot receive credit for this course if they have successfully completed CTRP 0861, CRP 0861 or SOC 0861.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

GUS 0862. Development & Globalization. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: History 0862, POLS 0862/0962, or SOC 0862/0962.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

GUS 0867. World Regions and Cultures: Diversity & Interconnections. 3 Credit Hours.

What is globalization? Are we now all citizens of a global capitalist economic and truly international political order? Or do we still live mostly under the economic constraints and governmental policies of the nation states of which we are citizens? How do different regions of the world experience and negotiate cultural continuity and change in different ways due to their distinctive historical and political-economic experiences? Focusing on different regions of the world, we will investigate how cultures and societies are connected to each other, how they relate to each other, and how they compare or contrast with each other. In particular, we will examine topics such as economic development, urbanization, immigration, labor, neoliberalism, citizenship, religion, gender, democracy and human rights. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Anthropology 0867, 1061, C061 or Geography and Urban Studies 0867.

Course Attributes: GG, SF

Repeatability: This course may not be repeated for additional credits.

GUS 0921. Honors Digital Mapping: From Mercator to Mashups. 4 Credit Hours.

Almost all of us interact with digital maps regularly for finding directions and the locations of services, like the nearest coffee shop. Yet for most, the inner workings of digital maps remain a mystery. This course provides an in-depth exploration of how digital maps work - what technologies support location tracking, where do the mapped data come from, and how digital maps are used to analyze geographic problems in urban and environmental planning and policy, health, and business. Along the way, you will develop quantitative literacy by learning how to acquire spatial data, make digital maps, and critically evaluate mapping applications. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed CTRP 0821, CRP 0821 or GUS 0821.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GQ, HO, SI

Repeatability: This course may not be repeated for additional credits.

GUS 0942. Honors Sustainable Environments. 3 Credit Hours.

Humans are at a critical juncture in their relationship with the environment. Many of the global changes occurring in the atmosphere, climate, and oceans can be attributed to human activity. While the standard of living has increased for many people across the globe, the technological advancements that have made this possible endanger future generations because of their environmental impacts. Environmental toxins and air pollution are increasing, and fossil fuels and forests are being depleted at unsustainable rates. Now more than ever, the viability of human life depends on the scientific understanding of global environmental change, and on developing science-based policies to both protect the environment and promote human well-being in a just and sustainable manner. Course mission: enhance your capability to be environmentally informed consumers and citizens based on a sound understanding of the ecological, technological, economic, political, and ethical dimensions of environmental sustainability. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed EES/Geology 0842, ENST 0842/0942 or GUS 0842.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO, SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

GUS 1021. Urban Society: Race, Class, and Community. 3 Credit Hours.

This course provides an introduction to the contemporary American city, emphasizing the major social trends and public issues that affect individuals and communities in urban settings. We emphasize a cross-disciplinary approach that includes examination of political, economic, spatial, social and historical aspects of city life. We also pay special attention to how racial, ethnic, and social class divisions shape the fabric of urban life. NOTE: This course can be used to satisfy the university Core Studies in Race and Individual & Society (RN) requirements. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RN, SI

Repeatability: This course may not be repeated for additional credits.

GUS 1022. Urban Society. 1 Credit Hour.

This course provides an introduction to the contemporary American city, emphasizing the major social trends and public issues that affect individuals and communities in urban settings. We emphasize a cross-disciplinary approach that includes examination of political, economic, spatial, social and historical aspects of city life.

Repeatability: This course may not be repeated for additional credits.

GUS 1025. World Urban Patterns. 3 Credit Hours.

This course provides an introduction to cities around the world. We begin by asking basic questions about the nature of cities and the different approaches to studying them. We explore factors driving urban growth and how this growth affects urban environments. We examine questions of social organization and governance and topics related to planning and the future of the city. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

GUS 1031. Geography of World Affairs. 3 Credit Hours.

This course examines environmental, social, demographic and economic issues in selected world regions. The course may change from semester to semester as we select a range of current topics from each part of the world, which may include, for example, the impact of drought in Africa, tourism in the Caribbean, and rapid economic growth in East Asia. We also address geopolitical themes that reflect the interaction of culture and territory, such as the conflict between ethno-religious groups for control of places that range from Sri Lanka or the Sudan. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

GUS 1052. Introduction to the Physical Environment. 4 Credit Hours.

An environmental approach to the study of earth as a globe, earth-sun relations, weather, climate, vegetation, soils, and the hydrosphere. Abundantly illustrated by slides and films, this course brings to life the causal connections among climate, vegetation, and soils. Natural and human-induced climate change, groundwater and surface water management, and soil erosion are among the environmental problems covered. The laboratories provide hands-on experience on most topics. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

GUS 1171. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1172. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1173. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1174. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1175. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1176. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1177. Urban Affairs. 2 Credit Hours.

A special topic of current interest in American cities frequently taught by a special lecturer from outside Temple University. Emphasis on a timely public policy issue confronting Philadelphia or its region. NOTE: Topics vary each semester. Contact the department for offerings.

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

GUS 1651. Environment and Society. 3 Credit Hours.

This course emphasizes the human dimensions of the relationship between societies and their natural environments. Students will be introduced to those ecological principles that are necessary to understand cultural, social, political, and economic questions at a variety of geographic scales. The course will consider several global, national, and local issues such as siting of noxious facilities, land use conflicts, equality of access to resources, and environmental justice.

Repeatability: This course may not be repeated for additional credits.

GUS 1961. Honors World Urban Patterns. 3 Credit Hours.

This is an honors section of World Urban Patterns. This course surveys urbanization as a global phenomenon. We examine urbanization in different cultures and societies and the analysis of problems of urban areas and related to urbanization in developed and developing countries, both western and non-western. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

GUS 2001. Cities. 3 Credit Hours.

This course is an interdisciplinary introduction to U.S. cities in the context of contemporary globalization. Students will be introduced to key concepts in the field of urban studies. We will explore different theoretical frameworks for analyzing urban patterns, processes, and daily life. In addition to globalization we will explore social justice.

Repeatability: This course may not be repeated for additional credits.

GUS 2002. Space and Place. 3 Credit Hours.

This course is an introduction to the fundamental principles of human geography and examines the relationships among space, place, environment, and culture in an effort to understand why events and processes occur at specific locations, as well as how those events and processes influence activities elsewhere. Human geography studies flows of people, money, information, cultures, and biophysical processes across space and time especially as these flows are becoming global. The unique convergence of flows in a certain location is what geographers call place. This course will explore some of the key drivers of geographic outcomes including human migration, citizenship, cultural identity, political participation or exclusion, urban life, various understandings of nature and environment, and the effects of global networks and capital on local practices and people.

Repeatability: This course may not be repeated for additional credits.

GUS 2012. Urban Ethnicity. 3 Credit Hours.

This course examines the diversity of ethnic enclaves in American cities, with a special emphasis on experiences from communities and neighborhoods in Philadelphia. This course examines sources of prejudice and discrimination, and the impact of the changing economic structure and social organization on the emergence of ethnic groups in the city. NOTE: Formerly known as GUS 4012, Urban Ethnicity. Students may receive credit for only one of the following courses: GUS 2012 or GUS 4012.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GUS 2014. Urban Geography. 3 Credit Hours.

This course seeks to familiarize students with the new urban geography - emphasizing ecological (sustainable cities, urban donuts), economic (post Fordist accumulation), cultural (images of the city), and post modern perspectives (hi-tech corridors, mass produced aesthetic/architectural styles). It explores contemporary urban crises and challenges and examines how cities are responding. The course is designed to provide students with an understanding of (a) the new geographical patterns forming in cities; (b) the economic and cultural transformations currently underway in urban areas; (c) how geographers are responding to the transformations; (d) urban responses to global challenges; and (e) how economic systems impact the lives of urban residents, images of the cities, and spatial patterns.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

GUS 2017. Population Geography. 3 Credit Hours.

This course provides an introduction to human populations with respect to size, composition and spatial distribution, and the issues surrounding the geographic distribution of populations at the world, regional, and local level. Emphasis will be placed on the role of population processes (mortality, fertility, migration), and population structures (age, gender, ethnicity), on economic, social, technological and political development and changes in different parts of the world. Topics covered in this course include: population policies, theories of population change, international and domestic migration flows, cultural and economic influences on population processes, urbanization, and population related issues such as food insecurity, political conflict, poverty, health and disease, and environmental degradation. Lectures and exercises will also familiarize students to publicly available population data and introduce basic analytical techniques used to measure fertility, mortality and migration.

Repeatability: This course may not be repeated for additional credits.

GUS 2021. Philadelphia Neighborhoods. 3 Credit Hours.

This course provides an introduction to Philadelphia, its history, its people, and its problems as seen in a cross-section of urban neighborhoods. It combines lectures, readings, and slides with frequent field trips to different parts of the city.

Repeatability: This course may not be repeated for additional credits.

GUS 2022. Gender, Race, Class, and the City. 3 Credit Hours.

This course will focus on the ways that race, class, and gender significantly shape US cities and urban life. The course will explore how urban spaces reflect and perpetuate different relations of power, inequity, and identity. How do multiple and contradictory identities shape one's experience of the city? How are economic, social, and political processes interacting with public policy (or the lack thereof) to determine how resources and power are unequally distributed? How are contemporary urban sustainability initiatives imbued with racial, gender, and class politics? First, we explore critical geographic frameworks for urban analysis that help to explain the social and spatial organization of US cities. We will develop a framework for urban analysis that integrates race, class, and gender, and draws upon the geographic concepts of place and scale. Second, we will use qualitative methods to apply our integrated framework to contemporary metropolitan processes and problems in the Philadelphia area. Key topics that we will address include: everyday experiences of urban life in public and private spaces; environmental (in)justice; neoliberal urban governance; urban social movements; and urban policy and planning. NOTE: The following course numbers are cross-listed: GUS 2022, ENST 2022, or GSWS 2022; students may receive credit for only one of these instances.

Repeatability: This course may not be repeated for additional credits.

GUS 2025. American Place. 3 Credit Hours.

This course explores several basic themes on the variety of human landscapes that characterize the United States. A representative selection of places across the country is examined in lectures, readings, film, slides, and short field trips to learn about the cultures and social characteristics of the American people.

Repeatability: This course may not be repeated for additional credits.

GUS 2031. Geography of the Global Economy. 3 Credit Hours.

This course introduces students to the complex economic patterns of the world. It examines why economic activities are distributed in particular ways and the consequences of economic location decisions. It examines a variety of economic activities and geographic perspectives on economic and settlement diversity. Note: This course was previously offered under the title "Economic Geography." Please note that students can receive credit only one time for either "Economic Geography" or "Geography of the Global Economy."

Repeatability: This course may not be repeated for additional credits.

GUS 2032. Urban Systems in a Global Economy. 3 Credit Hours.

This course looks at how the global economy shapes urban society, and how people adapt to the changing global urban world. We begin examining theories, facts and debates on globalization and the development of the global economy. We then look at how cities function within an interdependent global urban system and how people actively respond to the changing economic conditions in cities around the world.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GUS 2051. Urban Environment. 3 Credit Hours.

This course examines the interactions between theory, policy, and the urban environment. Students have the opportunity to study the urban environment not only as a physical landscape or natural ecosystem, but also as a constructed landscape shaped by local, regional and global social, economic and political processes. The course addresses issues that continue to challenge urban society, including environmental injustice and racism, degradation of local environmental quality, the impact of local-global relationships on community-scale environments and the commodification of nature.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

GUS 2061. Map Interpretation. 3 Credit Hours.

This course provides students with the basic principles of mapping and spatial data handling. Topics covered include geographic scale, projections and coordinate systems, cartographic generalization, spatial data encoding, and map design and production. Emphasis will be on a variety of geographic data technologies, including cartographic production, geographic information systems, global positioning systems, environmental remote sensing, and photogrammetry.

Repeatability: This course may not be repeated for additional credits.

GUS 2071. Geography of the United States and Canada. 3 Credit Hours.

An introduction to the major regions of the United States and Canada with emphasis on changing population and economic activity patterns, the distribution of important resources, and the characteristics of major cities and metropolitan areas. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

GUS 2073. African Development. 3 Credit Hours.

This course begins with a historical synopsis of the different forms of development that have taken place on the African continent. Moving beyond preconceived notions of the continent, students will delve into the social, political, economic, and biophysical realms of Africa. Students will read and debate about issues concerning African development, including, colonialism, independence movements, political conflict, globalization, neo-liberalism, society, and health. Ultimately, in this course, students will gain a deeper appreciation of the social, economic, environmental, and political development of Africa and the challenges and opportunities it faces in the future. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS, SI

Repeatability: This course may not be repeated for additional credits.

GUS 2074. East and South Asia. 3 Credit Hours.

Introduction to the natural environments and diverse contemporary societies that comprise East, Southeast, and South Asia. Emphasis on such topics as poverty, economic development, and social conditions in India, Thailand, and the Philippines, as well as China, Japan, and Korea. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors. Note: This course is cross-listed with Asian Studies 2074. Students may only receive credit for one of these courses: GUS 2074 or ASST 2074.

Course Attributes: IS, SF

Repeatability: This course may not be repeated for additional credits.

GUS 2096. Problems of Environmental Quality. 3 Credit Hours.

Specific environmental problems, especially in the Philadelphia area. Students acting as research teams seek better understanding of such problems and practical solutions to them. Duplicate credit warning: This course was previously taught under GUS and ENST 4096. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Course Attributes: SF, WI

Repeatability: This course may not be repeated for additional credits.

GUS 2121. Russian Cities. 3 Credit Hours.

In this course we will study the Russian city, analyzing the nexus of physical geography, climate, natural resources, ethnography, history, commerce, politics and culture on the development of urban centers in Russia. The study of Moscow and St. Petersburg will occupy much of our attention in this course, but we will also examine Russia's medieval cities ("the Golden Ring"), as well as cities in Siberia and the Far East. We will read works from the disciplines of geography, history, anthropology, and sociology, as well as works of fiction; we will also view Russian films in which a city (or the city) plays an important role.

Repeatability: This course may not be repeated for additional credits.

GUS 2197. Research Design in Geography and Urban Studies. 3 Credit Hours.

This course is an introductory survey of research design in Geography and Urban Studies. It is designed to allow students to explore what it means to conduct social science research, particularly around urban and other geographic topics of study. Students have the opportunity to learn how to collect and analyze primary and secondary data. Methods covered include case study research, interview design and technique, analysis of spatial quantitative data, and tools commonly used in community and participatory action research. Individual assignments will focus on researching urban social and cultural topics. This is a writing intensive course and will require extensive writing and revision of your assignments in a semester long assignment sequence.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

GUS 3000. Special Topics in Geography and Urban Studies. 3 Credit Hours.

Seminars on special topics that vary according to the instructor. Check the course schedule for specific seminar topics.

Repeatability: This course may be repeated for additional credit.

GUS 3001. Images of the City in Popular Culture. 3 Credit Hours.

This course examines the representations of the city in the film, fiction, art, and music of the twentieth century. We look at images of cities in general as well as images of specific cities, especially Los Angeles and New York. (When taught in Rome or Tokyo the course focus changes to take advantage of the setting.) Imaginings about the city rely on metaphors - using a work or phrase to describe by referring to another thing not literally appropriate, e.g. urban jungle. We will discuss these metaphors and become familiar with their resonance in popular culture. A large part of the course will focus on methods of visual analysis. Active participation is required.

Repeatability: This course may not be repeated for additional credits.

GUS 3005. The City in History. 3 Credit Hours.

This course looks at the city as a product of human creativity in which the goals of collective life are debated and fought out. The workings of the city are examined in history by focus on the cultural, economic, and political significance of cities as well as on urban design. The course includes visual examples from cities in Europe, West Africa, India, and Southeast Asia as well as a walking tour in the Manayunk section of Philadelphia.

Repeatability: This course may not be repeated for additional credits.

GUS 3011. Historical Geography of North America. 3 Credit Hours.

This course examines the evolution of the spatial structure of North America from the early stage of predominantly rural, localized economies to conditions that could be characterized as interconnected and urbanized. Several themes will be emphasized: 1) changes in the structure of rural settlements, 2) the expansion of the transport network, 3) the emergence of an industrial economy, and 4) changes in both the internal structure of urban places and the distribution of such places.

Repeatability: This course may not be repeated for additional credits.

GUS 3013. African Americans in Philadelphia. 3 Credit Hours.

This course examines the historical and contemporary circumstances and roles of African Americans in the Philadelphia context. A critical look at African American migration to Philadelphia, the emergence of African American ethnicity, and the nature and workings of predominantly African American institutions in the city (e.g., families, churches, education, media, cultural and recreational institutions, gangs, political movements, and organizations).

Repeatability: This course may not be repeated for additional credits.

GUS 3014. Urban Social Geography. 3 Credit Hours.

This course is designed to introduce students with the major issues in urban social geography. The general questions addressed in the course include (a) how do racial and income groups come to occupy certain sections of the city?; (b) who decides who lives where?; (c) how does a person's area of residence affect his/her behavior?; (d) what are the constraints on choosing where one lives?; and what groups are able to manipulate the geography of the city and who benefits? The course highlights interpretations associated with the cultural turn in geography and accordingly focuses on the cultural/ social vs. the "economic." Duplicate credit warning: This course was previously taught under GUS 4014. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3015. The Geographic Basis of Land Use Planning. 3 Credit Hours.

An examination of the forces that influence land use planning in and around American metropolitan regions. Considers economic perspectives (land values), public interest perspectives (zoning subdivision, housing and building codes, redevelopment and renewal programs, etc.), and social perspectives of land use. Also examines separately housing, commercial locations, and industrial development. Duplicate credit warning: This course was previously taught under GUS and ENST 4015. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3016. Contemporary Issues in City Planning. 3 Credit Hours.

Detailed analysis of a specific issue affecting cities and metropolitan areas, usually with a focus on the Philadelphia metropolitan area. Issues such as sprawl, redevelopment, and sustainability are often the focus of the course.

Course Attributes: SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3018. Economic Development Planning for Cities. 3 Credit Hours.

Causes of economic decline in American cities, the history of governmental policies to promote urban economic development, and the major tools available to economic planners. Duplicate credit warning: This course was previously taught under GUS 4018. Students who have earned credit under the prior number will not earn additional credits if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3019. Community Development Workshop. 3 Credit Hours.

Students apply the insights, skills and techniques acquired during undergraduate coursework to a number of case studies and assignments drawn from different planning contexts. As in a professional office, students will work in teams to obtain experience in cooperative action and in the management of time and effort. Projects will be selected in order to expose students to the complexity of real problems, and to suggest the range of policy and planning issues which students might encounter after graduation. Senior practitioners in the Philadelphia region work with students in the workshop. Duplicate credit warning: This course was previously taught under GUS 4019. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3021. International Urbanization. 3 Credit Hours.

Each year the cities of the world increase by about 50 million people with most of the increase coming from cities in middle and lower income countries in Asia, South Asia and Africa. This course provides an opportunity for students to focus specifically on urbanization outside the mature urban societies of the United States, Europe and Japan. This course examines issues confronted by planners, policy makers and citizens in rapidly urbanizing areas, as well as the social and cultural tensions related to urban change. NOTE: This course is generally offered every other year. Prior to Spring 2009, the course title was "Urbanization in Developing Areas." Duplicate credit warning: This course was previously taught under GUS 4021. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3023. Police, Prisons, and Pollution. 3 Credit Hours.

In 2001, a group of farmworkers, environmental justice activists, and anti-prison organizers in California held a conference called "Joining Forces: Environmental Justice and the Fight against Prison Expansion." The goal was to interrogate prisons as forms of environmental racism and injustice and to build coalitions between the anti-prison and environmental justice movements. This course takes as a starting point an insight made by a group of youth participants at that conference: that the greatest threats to their communities constituted "three Ps," police, prisons, and pollution. We will explore critical texts and organizing surrounding police, prisons, and pollution. How do struggles for environmental justice intersect with organizing against police and prisons? How are racial and class disparities heightened through overlapping geographies of policing, incarceration, and environmental pollution? How do policing and imprisonment operate as environmental toxins themselves, much like pesticides and greenhouse gas emissions? As a major component of the course, students will work on group projects examining the intersections of policing, incarceration, and pollution.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3025. Urban Crime Patterns. 3 Credit Hours.

The spatial dimensions and patterns of crime and how they vary with respect to other variables in the urban environment. Possible explanations of crime, using both current literature and Philadelphia statistics.

Repeatability: This course may not be repeated for additional credits.

GUS 3044. Urban Housing. 3 Credit Hours.

An overview of the economic, social, physical, and political forces that structure current urban housing conditions and prospects. Examination of the implications of present trends for the future and the development of rational housing policies, emphasizing the Philadelphia metropolitan area. Duplicate credit warning: This course was previously taught under GUS 4044. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3051. Environmental Policy Issues. 3 Credit Hours.

How are environmental policies formulated and implemented in the U.S.? Topics include the role of citizen participation in decision-making, the place of environmental impact assessment, environmental justice and equity, intergovernmental relations, and environmental obligations of the U.S. toward less developed countries.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3052. Environmental Problems in Asia. 3 Credit Hours.

Japan is used as an introduction and model for examining environmental issues in several East and Southeast Asian countries. Emphasis is on deforestation, river basin development, urban planning, ecotourism, and the role of non-governmental organizations. Note: This course is cross-listed with Asian Studies 3052 and Environmental Studies 3052. Students may only receive credit once for these courses: ASST 3052, ENST 3052, or GUS 3052.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3053. Climatology. 3 Credit Hours.

In this course, we study global climate patterns and the underlying processes that shape them. Among the specific topics we examine are: global distribution of individual climate elements, upper-atmospheric waves and jet streams, use of web-based maps and data, construction of climate models, U.S. climate regions, and major global climatic regions. In the course's final weeks, we consider historic climates, climate change mechanisms, and forecasted future climates.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

GUS 3054. Energy, Resources and Society. 3 Credit Hours.

Vital nonrenewable resources are identified and their global and North American distribution, character, and utilization studied. Special attention to energy sources now in short supply and to benign renewable sources for future needs. NOTE: This course was previously titled "Energy, Resources, and Conservation" and students can receive credit only once for GUS 3054 or ENST 3054.

Repeatability: This course may not be repeated for additional credits.

GUS 3055. Environmental Hazards and Disasters. 3 Credit Hours.

This course provides a synthesis of the social and natural dimensions of disasters. Students become familiar with the concept that disasters emerge when the specific characteristics of hazards (e.g. volcanoes, droughts, floods, tsunamis) intersect with social vulnerability (e.g. class, race, gender). Case studies from around the world are used to elaborate and explore this concept. Duplicate credit warning: This course was previously taught under GUS and ENST 4051 and was previously titled "Geography of Hazards." Students who have earned credit under the prior number(s)/title will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3056. Political Ecology. 3 Credit Hours.

This course addresses the broad themes of political ecology as an academic discipline as well as a set of theoretical and methodological tools. Historically political ecology has focused on the rural developing world, but more recent work has branched out into environmental justice and resource use in industrialized societies. The course covers the concepts that have distinguished political ecology from other types of analysis like cultural and human ecology. It also introduces students to the construction of theory including a consideration of space, scale, justice, feminism, property, and nature. Finally, the course presents students with diverse case studies that may include topics like resource use, mining, bio-prospecting, forestry, conservation, fisheries, "sustainable" development, and eco-tourism. Duplicate credit warning: This course was previously taught under GUS and ENST 4056. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated.

Course Attributes: SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3057. Sustainable Cities. 3 Credit Hours.

This course introduces the concept of urban sustainability and explores environmental problems linked to urbanization, drawing on historical analysis, social theory, landscape ecology, and city planning/design practice. Can we make cities sustainable places to live? If so, how? The goal of this course is to provide students with an opportunity to learn about the major environmental challenges facing cities in the developed and developing world and to learn about innovative solutions that cities are adopting to address them. We will also explore how the political, social, and environmental context affects a city's ability to implement sustainable policies. The course will cover topics such as sustainable city strategies, ecological footprints, urban metabolism, mega-cities, urban ecology, cities and climate change adaptation and mitigation, water management, urban gardening/farming, measuring sustainability, planning strategies, smart growth, carbon neutral cities, metropolitan governance, green buildings, environmental justice, green infrastructure, and green investment strategies, etc.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3058. Environment and Development. 3 Credit Hours.

Is capitalism at the heart of environmental change? What does it mean to divide nations into "developed" and "developing" countries? Whose definition of progress guides policy promoting sustainable urbanization and development? How do we create parks and green infrastructure without displacing people? This course will contextualize these and related questions to understand and think critically about environment and development. By the end of the semester, you will be able to speak, read and write with fluency about contemporary nature-society relations using concrete examples drawn from historical and contemporary contexts. This course is cross-listed with ENST 3058. Duplicate Credit Warning: This course was previously offered as ENST 3097. Students may receive credit for one of the following course numbers: ENST 3097, GUS 3097, ENST 3058 or GUS 3058.

Course Attributes: SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

GUS 3061. Fundamentals of Cartography. 3 Credit Hours.

This course is designed to introduce students to cartography and computer mapping. Through hands-on exercises, students will manipulate data, compare map projections, design, execute, and reproduce small-scale thematic maps suitable for publication using computer software. A final project involves the production of maps in color. NOTE: No prior computer knowledge is necessary.

Repeatability: This course may not be repeated for additional credits.

GUS 3062. Fundamentals of Geographic Information Systems. 3 Credit Hours.

This course teaches the theory and practical use of Geographic Information Systems (GIS). Major components of the course include vector and raster spatial data models and operations, including vector overlay and raster map algebra. At the end of the course students are expected to have an understanding of elementary GIS theory, working knowledge of a GIS software package, and the ability to develop GIS-based solutions to geographic modeling and analysis tasks. Note that students who take ENST 3062 will not receive duplicate credit if they register for GUS 3062.

Repeatability: This course may not be repeated for additional credits.

GUS 3063. Environmental Remote Sensing. 3 Credit Hours.

This course will teach the basic principles of environmental remote sensing using aerial photography and satellite imagery. Topics covered include the mechanics of aerial photography and satellite remote sensing systems, photointerpretation, image rectification, and image processing and classification. Emphasis will be on urban and environmental applications.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ENST 3062 or GUS 3062)

GUS 3064. Qualitative Methods. 3 Credit Hours.

This class is designed to expose students to the purpose, scope and procedures of qualitative research, applied in different disciplines but especially in environmental studies, geography, and urban planning. It provides an opportunity for students to create qualitative research design schemes, and critically analyze research using these methods. Note: This course is equivalent to ENST 3064; students may receive credit for either ENST 3064 or GUS 3064.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 2197 or ENST 2097)

GUS 3065. Census Analysis with GIS. 3 Credit Hours.

Introduction to analysis with Census data products for the US, including Decennial Census and American Community Survey. Methods for analyzing segregation, environmental justice, migration and mobility, commuting trends, etc. Students will learn how to combine Census data with data from other sources using incommensurate geographies. Heavy emphasis on open source tools. Note: Formerly offered as GUS/ENST 4068. Students who have received credit for GUS 4068, ENST 4068 or ENST 3065 will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

GUS 3067. GIS and Location Analysis. 3 Credit Hours.

This course examines the concepts and techniques of location analysis - how to 1) describe the spatial arrangements of features on the earth's surface and 2) prescribe the best location or spatial arrangement of features for a particular activity - for economic and social service applications. The course introduces concepts in Geographic Information Systems (GIS) and spatial statistics to address issues of location.

Repeatability: This course may not be repeated for additional credits.

GUS 3069. GIS for Health Data Analysis. 3 Credit Hours.

Geographic Information Systems (GIS) has emerged as an essential tool for health researchers and practitioners. This course provides an introduction to the most common geographic methods utilized in health research and spatial epidemiology for mapping and analyzing health disparities, disease risk factors, health services and geographic variation in health outcomes and disease. Through lecture and laboratory exercises students will learn how to create and edit spatial data, create disease maps, develop neighborhood-based measures, conduct geographic cluster detection and point pattern analysis, map geographic health disparities, measure access to health services, and critically assess potential study bias introduced from missing geographic data or positional accuracy. Selected case studies will be presented in order to highlight methods and techniques and hands-on experience will be gained through laboratory exercises and real-world applications. Guest speakers will be invited to share their real-world examples of GIS in health research and practice.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3161, ENST 3161, SOC 3201, STAT 2103, PBHL 2219, CJ 2602, or ANTH 3771)

GUS 3071. Health Geography. 3 Credit Hours.

Health geography applies concepts and methods from the discipline of geography to study medical and health related events and topics. Health geography has a close disciplinary tie with epidemiology, biostatistics, medical ecology and medical anthropology, but it is differentiated by its focus on the spatial distributions of health/medical related events. Duplicate credit warning: This course was previously taught under ENST and GUS 4071. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated. NOTE: This course was previously titled "Medical Geography." Students who completed the course under the prior title will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3073. Geography of Travel and Tourism. 3 Credit Hours.

This course examines the fastest growing industry in the world from a geographic perspective. Among the topics to be covered are spatial tourism models, tourism landscapes and the built environment and the impact of tourism on local cultures and economies. Several types of tourism are compared, including rural vs. urban travel, heritage tourism and ecotourism. There is also a special project that focuses on the problems of developing a tourist industry in areas that are prone to political or environmental crises. The course presents examples of both domestic and international travel destinations.

Repeatability: This course may not be repeated for additional credits.

GUS 3074. Sicily: The Land, People and Identity. 3 Credit Hours.

An introduction to the physical and social geography of Sicily, looking at its land, history, culture, and current problems as represented in literature and on film.

Repeatability: This course may not be repeated for additional credits.

GUS 3075. Comparative Regional Development. 3 Credit Hours.

This course examines the transformations that, beginning with the European expansion 500 years ago, have, to a large extent, created much of the regional variation we see in the world today. We consider theoretical approaches to understanding "modernization" and "development" and build on this foundation to look at the historic factors that have shaped different parts of the world. We also examine the political, economic, social, spatial and environmental processes that have influenced those countries that share a colonial past (our primary focus) but also may examine the transition economies of Eastern Europe, Asia and North America and Japan. NOTE: This course is generally offered every other year. Prior to Spring 2009, the course title was "Regional Development in the Third World." Duplicate credit warning: This course was previously taught under GUS 4075. Students who have earned credit under the prior number will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3076. Metropolitan Tokyo. 3 Credit Hours.

The growth and development of Tokyo, Japan, past and present. The course includes a profile of the city's many neighborhoods, economic activities, architecture, and challenges for urban planners. NOTE: Usually offered at Temple Japan.

Repeatability: This course may not be repeated for additional credits.

GUS 3085. Internship in Geography and Urban Studies. 3 Credit Hours.

This course provides coursework during both the fall and spring semester to accompany on-the-job training with local consulting firms, planning agencies, private companies, non-profits, and various state, local and federal agencies of government, mostly but not exclusively in the Philadelphia metro area. Students apply the knowledge and skills they have acquired in such courses as GIS, cartography, data handling, land use analysis, economic development of cities and others. Students need to arrange their own positions, usually after consulting with the department's internship coordinator. The search for a placement should start several months in advance of the semester or summer session when the internship will take place. The course is available to GUS majors and minors only. NOTE: Must arrange internship independently. Duplicate credit warning: This course was previously taught under GUS 4085/ENST 4085. Students who have earned credit under the prior number(s) will not earn additional credit if the course is repeated.

Repeatability: This course may not be repeated for additional credits.

GUS 3161. Spatial Statistics. 3 Credit Hours.

This course provides an introduction to statistical analysis with an emphasis on urban applications. The course covers basic statistical principles of sampling, probability, and tests of significance, measures of association; ordinary least squares regression; factor, principal component and cluster analysis and an introduction to spatial applications of these tools. The course is focused on the practical application of these techniques through exposure to the rationale and principles underpinning them. Students will attend lectures and complete problem sets that provide practical experience in the application of the theoretical concepts and methodologies. Note: This course is equivalent to ENST 3161; students may receive credit for either ENST 3161 or GUS 3161.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, MATH 1021, MATH 1022, MATH 1041, 'Y' in MC3, any course with attribute "QA", any course with attribute "QB", 'Y' in MC3A, 'Y' in MC3S, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

GUS 3221. Land System Science. 3 Credit Hours.

This course will provide scientific and theoretical foundations and practical applications of land system science. The course will include a description of the main theories and conceptual frameworks used to understand complex interactions between human decisions and ecological processes that derive into changes in the land system. The course also explores the sustainability implications of such changes for biodiversity conservation and people's wellbeing across different locations and scales. Students will become familiar with available technologies for monitoring, modeling and predicting land system change. The course will also draw on concepts and techniques from landscape ecology, land system modeling and scenario building to teach students how to assess social and ecological consequences of land system change and to inform land use decisions. This course is cross-listed with ENST 3221.

Repeatability: This course may not be repeated for additional credits.

GUS 3307. Transportation & Culture. 3 Credit Hours.

Students will learn to approach the modern geography of transportative possibility from a critical standpoint. Rather than accepting this contemporary geography as being the outcome of supposedly "superior" transport technologies' rendering marginalized technologies obsolete, students will examine how processes of cultural, political, and environmental struggle have shaped, opened up, and in some cases limited the modern array of possibilities for human mobility. Waterborne, animal-based, and human-powered modes of transportation will receive special attention, as will ongoing debates and struggles over automobile planning and mass transit. The history of transportation will be presented as necessarily entangled with parallel histories of public protest, working-class knowledge, emergency logistics, human-animal relations, guerrilla warfare, unrealized technologies, and political oppression. The course readings will look at many parts of the world: the United States, Canada, Southeast Asia, North Africa, the Middle East, China, Western Europe, the Caribbean, and Polynesia.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3314. Food Studies: A Geographical Perspective. 3 Credit Hours.

This course introduces students to key issues in food studies from a geographical and environmental perspective. The course includes an overview of the agricultural transitions, and examines issues of food security, access and control, ultimately focusing attention on the question of how to produce more just food systems. A major goal of this course is to give students a basic foundation from which to understand and interpret food systems as well as to familiarize students with today's major issues in research on food. Note: This course is equivalent to ENST 3314; students may receive credit for either ENST 3314 or GUS 3314.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 3900. Honors Special Topics. 3 Credit Hours.

Variable Honors offerings on special topics that are not part of the standard roster of courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

GUS 3928. Honors Metropolitan Tokyo. 3 Credit Hours.

This is an honors version of Metropolitan Tokyo. The course looks at the growth and development of Tokyo, Japan, past and present. It includes a profile of the city's many neighborhoods, economic activities, architecture, and challenges for urban planners. NOTE: Usually offered at Temple Japan.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

GUS 4000. Special Topics in Geography and Urban Studies. 3 Credit Hours.

Seminars on special topics that vary according to the instructor. Check the course schedule for specific seminar topics.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

GUS 4013. Drugs in Urban Society. 3 Credit Hours.

This course will provide an introduction to and overview of how illicit drugs have affected communities and individuals in American cities. It will focus on the history of drug use in America, the individual and social consequences of drug use, the lifestyles of crack and heroin addicts, the relationship between drugs and crime, as well as an examination of public policy options to address this problem.

Repeatability: This course may not be repeated for additional credits.

GUS 4017. Health and Environment Seminar. 3 Credit Hours.

This course addresses the relationship between community-level characteristics, such as neighborhood socioeconomic disadvantage, with health outcomes, with an emphasis on health behaviors such as substance use, exercise, and healthy eating. Access to resources such as health services and nutritious food will be examined, as will exposure to harmful or risky environment conditions that can promote disease. A methodological focus will address how environmental influence on health is analyzed, as well as how individual-level characteristics such as age, sex, and race/ethnicity may moderate such influences. The role of community level factors in health disparities will also be examined. NOTE: Students can receive credit only once for either: ENST 4017, GUS 4017, ENST 4917, or GUS 4917.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 4061. Cartographic Production. 3 Credit Hours.

A course concerned with aspects of storage, retrieval, and display of information within geographic data systems. Emphasis will be placed on computer mapping. NOTE: This course is cross-listed with ENST 4061; students will only receive credit for one course from GUS 4061 and ENST 4061.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3061 or ENST 3061)

GUS 4064. Web Mapping and GIS. 3 Credit Hours.

In this course, students will explore theoretical and practical concepts of Web Mapping (GIS and spatial data visualization on the Internet). From a theoretical perspective they will study advantages and techniques for publishing, visualizing and accessing maps and data on the Internet. This entails examining architectures of Web GIS/Web mapping systems, markup languages (e.g. HTML, XML, SVG, and KML), scripting languages, screen cartography, data sharing and geoportals, as well as social and critical perspectives toward web mapping. From a practical perspective they will learn to develop Web mapping applications including static and interactive platforms. They will also learn and work with some well-known open source software and libraries.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

GUS 4065. Urban Geographic Information Systems. 3 Credit Hours.

The purpose of this course is to build on the basic principles of the introductory GIS course to demonstrate how GIS may be applied to the analysis of physical and human systems. Topics of the course include vector and raster data integration; address matching, geocoding, and network analysis; terrain and hydrological analysis; and interpolation of environmental and population data. At the end of the course the student is expected to grasp advanced GIS analysis and modeling concepts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

GUS 4066. Environmental GIS. 3 Credit Hours.

Geographic Information Systems are widely used to investigate environmental processes and to develop solutions to environmental issues. This course will build upon concepts introduced in Fundamentals of GIS to investigate how the techniques, data, and interpretations from GIS analysis are applied across a variety of environmental fields. Topics to be covered include natural hazard vulnerabilities, global climate change, renewable energy potential, environmental health, and conservation. NOTE: Students who received credit for ENST 4066 will not receive duplicate credit for completing GUS 4066.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

GUS 4068. Census Analysis with GIS. 3 Credit Hours.

Introduction to analysis with Census data products for the US, including Decennial Census and American Community Survey. Methods for analyzing segregation, environmental justice, migration and mobility, commuting trends, etc. Students will learn how to combine Census data with data from other sources using incommensurate geographies. Heavy emphasis on open source tools.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062)

GUS 4072. Advanced Remote Sensing. 3 Credit Hours.

This hands-on course will provide skills and knowledge for the effective and efficient processing and analysis of satellite data for advanced applications with emphasis in the application of remote sensing for detecting and monitoring social and environmental changes. The course will include a semester-long project where students will apply the concepts and procedures learned to their own research or a particular topic of their interest.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3062 or ENST 3062) and (GUS 3063 or ENST 3063)

GUS 4073. Geovisualization. 3 Credit Hours.

Maps can be powerful devices for communication, but also tools for exploration of relationships among social and physical processes manifesting in space. This computer-intensive course will focus on this dual purpose of maps as tools for visual communication and visual thinking. You will create data-driven products that combine geographic and statistical visualizations for static, interactive, and animated display. Previous experience with a programming language will be helpful. A previous course in cartography is recommended but not required. Heavy emphasis on open source tools.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 3161 or ENST 3161)

GUS 4078. Research Methods in Environmental Studies. 3 Credit Hours.

This course covers basic research design and methods for environmental research, consulting, and practice. We build this around the theme of environmental impact assessment (EIA). During the course of your environmental careers, most of you will be expected to conduct, reference, evaluate, or otherwise incorporate EIA into your work. Most EIA's incorporate a diverse set of research methods - and an understanding of a wide-ranging set of research methodologies, and when and how to deploy them - is a central objective for this course. The first third of the course covers project design and methods; the second third addresses the environmental impact assessment process and especially its methodological components; and the final section is a highly interactive (with much peer review) approach to the development and defense of the methodologies you employ in the research prospectus that you develop for this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GUS 1051, GUS 1951, ENST 1051, or ENST 1951) and (SOC 1167, PSY 1167, MATH 1013, STAT 2101, GUS 3161, or SOC 1967)

GUS 4082. Independent Study Environmental Geography. 3 Credit Hours.

Reading and/or papers undertaken by the student wishing to study a specific topic, under the active supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

GUS 4087. Mapping Practicum I. 3 Credit Hours.

Complements theoretical studies by directing advanced students through real-world cartographic experiences. The student is assigned cartographic projects and is encouraged to plan, design, and execute them for University faculty and outside firms and agencies.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GUS 3061.

GUS 4182. Independent Study Research. 1 to 3 Credit Hour.

Reading and/or papers undertaken by the student wishing to study a specific topic, under the active supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

GUS 4198. Senior Seminar in Geography and Urban Studies. 3 Credit Hours.

A topically organized seminar for senior majors or those obtaining a concentration in Geography and Urban Studies. NOTE: This course is for majors only. Students should take this course during their last semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Environmental Studies, Geography/Urban Studies.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GUS 2197.

GUS 4282. Independent Study Human Geography. 1 to 3 Credit Hour.

Reading and/or papers undertaken by the student wishing to study a specific topic, under the active supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

GUS 4382. Independent Study Urban Policy. 1 to 3 Credit Hour.

Reading and/or papers undertaken by the student wishing to study a specific topic, under the active supervision of a faculty member.

Repeatability: This course may be repeated for additional credit.

GUS 4917. Honors: Health and Environment Seminar. 3 Credit Hours.

This course addresses the relationship between community-level characteristics, such as neighborhood socioeconomic disadvantage, with health outcomes, with an emphasis on health behaviors such as substance use, exercise, and healthy eating. Access to resources such as health services and nutritious food will be examined, as will exposure to harmful or risky environment conditions that can promote disease. A methodological focus will address how environmental influence on health is analyzed, as well as how individual-level characteristics such as age, sex, and race/ethnicity may moderate such influences. The role of community level factors in health disparities will also be examined. NOTE: Students can receive credit only once for either: ENST 4017, GUS 4017, ENST 4917, or GUS 4917.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO, SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

GUS 4982. Honors Independent Study Environmental Geography. 1 to 3 Credit Hour.

Reading and/or papers undertaken by the student wishing to study a specific topic, under the active supervision of a faculty member.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

German (GER)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GER 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

GER 0968. Honors World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

GER 1001. Introduction to German I. 4 Credit Hours.

Classroom work devoted to understanding and speaking German and the reading of graded texts. Laboratory and videotape work stress pronunciation, aural, and oral drills based on an elementary workbook, aimed at communication.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

GER 1002. Introduction to German II. 4 Credit Hours.

Emphasis on understanding, speaking, reading, and writing German. Laboratory and videotapes stress communication skills.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 1001, 'C1002' in LCGE, 'B1002' in LCGE, 'C1003' in LCGE, 'B1003' in LCGE, or 'EXMPT' in LCGE)

GER 1941. Honors Literature and Culture of Central Europe in the 20th Century. 3 Credit Hours.

An introduction to the principal issues, ideas, and genres in the literature of Central Europe since 1900. Through the study of literature, cinema, and the artistic avant-garde, it explores a unique cultural history. Readings include works from Austrian, Croatian, Czech, Hungarian, and Serbian fiction. Course materials will also include the screening of feature films from the region. NOTE: (1) Offered in English. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

GER 2001. Intermediate I. 3 Credit Hours.

Review of grammar. Reading and discussion of texts of intermediate difficulty.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 1002, 'C2001' in LCGE, 'B2001' in LCGE, 'C1003' in LCGE, 'B1003' in LCGE, or 'EXMPT' in LCGE)

GER 2002. Intermediate II. 3 Credit Hours.

Continued refinement of grammar. Reading and discussion of textbook and newspaper articles. Increasing vocabulary and practice of basic writing skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2001, GER 1003, or 'EXMPT' in LCGE)

GER 2011. Immersion in German. 1 to 3 Credit Hour.

A one-credit course for students who participate in our Summer Intensive German Program in Leipzig after the German II [German 1002 (0052)] level in order to reward the extra time and exposure they receive during the program.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GER 1002, 'C1003' in LCGE, 'B1003' in LCGE, or 'EXMPT' in LCGE)

GER 2041. Reading I. 3 Credit Hours.

This course focuses on developing reading strategies for the advanced intermediate student. Through theory and practice using a broad range of documents, this course provides a bridge from foundation courses to those dealing with more sophisticated primary texts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 2122. Conversation I. 3 Credit Hours.

Study of German language with intensive work in skills required for understanding and speaking. Stress on pronunciation, practical vocabulary, idioms, and useful sentence structures. At the end of the course, students should be able to converse at the Intermediate Mid level (ACTFL Rating Scale).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 2131. The Contemporary German-Speaking World. 3 Credit Hours.

This course concentrates on familiarizing the student with the German-speaking countries: Germany, Switzerland, and Austria. Students explore contemporary history, geography, provinces, products, industries, customs, and cuisine of these countries. Use of the computer facilitates mapmaking, visualizing famous people and places, and accessing immediate events. Communication will be in German on such topics as contemporary politics, the environment, history, film, music, art, literature, and technology--and will improve reading, writing, speaking, and listening skills at the same time.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 2141. Hesse, Kafka, Mann, and Rilke. 3 Credit Hours.

This course focuses on the literary giants of modern German literature. A reading knowledge in German is required since all primary and most secondary texts will be in German, although English translation of the texts may also be used. Course readings will focus on selected stories and novels by Franz Kafka; Rainer Maria Rilke; and Nobel Prize winners Hermann Hesse and Thomas Mann.

Repeatability: This course may not be repeated for additional credits.

GER 2501. German for Business I. 3 Credit Hours.

German for Business is an advanced language course for students who wish to continue their study of German while focusing on current issues in economics and business in the German-speaking countries of Europe. The goal of the course is to advance communication and comprehension skills and to introduce the specialized vocabulary of business. Some of the topics include: German unification, the European Union, transportation and infrastructure, labor unions, the major industries and companies in Germany, taxes, workers' benefits, banking and environmental policy, travel industry, and office procedures.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 3011. Intensive German in Germany. 3 Credit Hours.

A course intended for German Language students who are enrolled to study abroad in a German-speaking country for a semester of the year, and need to obtain credit for courses taken at that German University.

Repeatability: This course may not be repeated for additional credits.

GER 3021. Conversation II. 3 Credit Hours.

This second level course is designed to build on skills in German oral expression acquired in German Conversation I through special focus on expanding vocabulary and idiomatic fluency, honing listening skills, improving pronunciation and awareness of different linguistic registers, and increasing the ease of oral expression through frequent practice.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 2122.

GER 3096. Composition I. 3 Credit Hours.

Improvement in using the language through intensive written practice, grammar review, and study of problems in syntax and style. Use of current materials from German-speaking countries. NOTE: Capstone writing course. Required for major, minor, and language certificate in German.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 3101. Introduction to German Literature I. 3 Credit Hours.

This is an introduction to German literature through analysis and discussion of selected texts within the context of German literary and cultural history. The course provides an overview of significant periods, authors, genres, and topics in German literature from the earliest periods, Old High German through Middle High German to Early Modern German of the Renaissance. The course is taught in German with discussion, reading and writing components. Students are encouraged to formulate their interpretations of literary texts both orally and in written form. The course provides ample opportunity for students to strengthen their speaking and writing skills in the German language. NOTE: Conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 3102. Introduction to German Literature II. 3 Credit Hours.

This course is a continuation of the introduction to German literature through analysis and discussion of selected texts within the context of German literary and cultural history. The course provides an overview of significant periods, authors, genres, and topics in German literature from the "Baroque" period through the Golden Ages of the 18th and 19th centuries to Modern German Literature. The course is taught in German with discussion, reading and writing components. Students are encouraged to formulate their interpretations of literary texts both orally and in written form. The course provides ample opportunity for students to strengthen their speaking and writing skills in the German language. It is recommended that the courses be scheduled in succession.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 3140. Special Topics in German Culture. 3 Credit Hours.

Unique topics arranged each term; subtitle and course description is added to each section for students to review. For more information, consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 3182. Independent Study I. 3 Credit Hours.

Supervised study of a topic area agreed upon by the student and instructor.

Repeatability: This course may be repeated for additional credit.

GER 3201. Culture and Civilization I. 3 Credit Hours.

This course will examine the German-speaking peoples through the broad spectrum of their culture, history, art and literature; explore the great events and personalities who contributed to German Culture, from the Romans and earliest records of the Germanic tribes up to the Renaissance and Reformation; and continue efforts to understand, speak, read and write German with increasing proficiency and facility. NOTE: Required for major, minor, and language certificate in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 3202. Culture and Civilization II. 3 Credit Hours.

This course continues the examination of the German-speaking peoples through the broad spectrum of their culture, history, art and literature; explores the great events and personalities who contributed to German Culture, from the religious wars of the 17th Century and Baroque period up to Post-War modern Germany; and continues efforts to understand, speak, read and write German with increasing proficiency and facility.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 3220. Topics in German History and Culture (taught in English). 3 Credit Hours.

This course is designed to deepen understanding of history, culture, ethnicity, and other universal themes as they are portrayed in various German-language cultural texts, including film and literature. It explores commonality and difference between different forms of creative expression, and the ways in which historical events are portrayed and discussed in culture. Topics vary. Viewing of films, readings. Taught in English. Can be taken as a cognate course for the German major.

Repeatability: This course may be repeated for additional credit.

GER 3221. German Culture through Film. 3 Credit Hours.

The course examines German cinema in the context of its relationship to German culture and history. Because film is an art form of creative expression as well as a vehicle for promoting awareness of social concerns, the course will introduce techniques of viewing, analyzing, and evaluating films as expressions of the contemporary culture. Basing our work on films of historical significance and those by premier directors, the course will explore the beginnings of the film industry, Nazi propaganda, the impact of the Oberhausen Manifesto, New German Films, and issues of gender and politics since the Wende.

Repeatability: This course may not be repeated for additional credits.

GER 3231. German Minority Identities: Gendered and Cultural Dimensions (in English). 3 Credit Hours.

Germany has vibrant migrant communities with ethnic and racial groups from places as diverse as Turkey, Italy, Greece, Morocco, East Africa, and Russia. This course looks at the presence of minority communities in Germany today, their history and cultural influences as well as economic contributions. Our main analytical lens will be gender - how the German host culture is shaped by concepts of femininity and masculinity, sexuality, family, and a gendered division of labor and how these concepts are challenged (and/or shored up) by the various ethnic communities. We will look at both the perception of migrants by white/native Germans (how are they portrayed in the media, film, and politics?) and we will explore the voice of the "other," i.e. the experience of minority communities living in Germany and how this influences their own cultural identities. Questions we will ask include: How does the experience of immigration affect the identity of minorities living in Germany? What does "Deutsche Kultur" (German culture) mean today? Our focus will be on how gender shapes and underlies much of these discussions on minorities in Germany as well as their negotiations of conflicting expectations of community and larger "German" culture. Course material will include critical readings, films, and other cultural texts. Taught in English. Note: Students who earned credit for "German Minorities and Cultural Identities: Gendered Dimensions" will not receive additional credits for "German Minority Identities: Gendered and Cultural Dimensions."

Repeatability: This course may not be repeated for additional credits.

GER 3235. Weimar Culture: Race, Gender, Sexuality and Nation (in English). 3 Credit Hours.

This class explores the contradictions in German culture during the Weimar Republic (1918-33), with particular attention to its urban centers. Berlin was considered the European capital of artistic and experimental subcultures as well as the hotbed for radical politics, whose decadent Bohemian culture of sexual experimentation, drug use, women's liberation and cabaret existed side by side with abject poverty and street violence. We will ask questions such as how Hitler could come to power in a Germany that was considered to have the most advanced science, technology, literature, philosophy and art of its time, and whose Jewish citizens contributed to all areas of society? How did a new consumerism contribute to the complacency of many Germans in the face of a violent fascism? Thereby we will pay attention to how concepts of race, gender, sexuality and nation shaped the debates of the time. We will watch movies, read literature and graphic novels, and learn about the Weimar Republic's political landscape and history. This course is conducted in English. All films are subtitled and readings are in English. Note: Students who earned credit for "Race, Gender, Sexuality, and Nation in Weimar Culture" will not receive additional credits for "Weimar Culture: Race, Gender, Sexuality and Nation."

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

GER 3275. Fin-de-Siecle Vienna: Birthplace of Modernity around 1900. 3 Credit Hours.

An interdisciplinary approach to the cultural and political transformations taking place in Vienna around 1900 (art, architecture, literature, psychoanalysis, music). The common contexts and interconnections between writers such as Schnitzler, Hofmannsthal, Altenberg, and Kraus, Freud's psychoanalysis, Klimt and Schiele's "Jugendstil," the architectural innovations of Wagner, Loos and the Ringstrasse, and the music of Mahler, R. Strauss, and Schoenberg. Focus on issues such as sexuality, disease, desire, and modernity. The rise of mass politics and modern anti-Semitism will also be discussed.

Repeatability: This course may not be repeated for additional credits.

GER 3282. Independent Study II. 3 Credit Hours.

The theme for this course will be decided by the Core-Coordinators based on the needs and interests of the students enrolled. The course is intended for German majors/minors.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GER 2001.

GER 3363. Diabolical Dilemmas: The Faust Theme in German Literature. 3 Credit Hours.

What is meant by the term "Faustian"? Since ancient times, western societies have fostered the idea that one should strive constantly to achieve all that is in one's power. At the same time, we have been careful to set ethical and cultural limits and punish those who have overstepped these boundaries. Focusing on tracing the development and permutations of the themes of the Faust legend in Germany over the past 200 years, this course investigates literary treatments of such transgressors in German literature and film, and compares them to actual situations presenting ethical dilemmas. NOTE: (1) The course is conducted in German. (2) In Fall 2010, this course will focus on historical, literary, and philosophical aspects of the concept Faustian through literary works including Goethe's Faust, Duerrenmatt's Physicists, and Thomas Mann's Mario and the Magician, as well as representations in art, music, and film. Discussion, reports, periodic examinations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3102.

GER 4140. Seminar in Special Topic. 3 Credit Hours.

Topic varies each semester. NOTE: Offered in English.

Repeatability: This course may be repeated for additional credit.

GER 4141. German Expressionism. 3 Credit Hours.

German Expressionism (ca. 1910-1920) is certainly one of the most innovative artistic movements in the history of German culture; it is certainly the most revolutionary. The course will trace the development of Expressionism in the arts with the major emphasis on literature. Authors such as Kafka, Trakl, Wedekind, and Werfel, will be read. The course also focuses on the beginnings of German cinema as seen in the works of F. Lang, E. Lubitsch, and F. Murnau. The rich art production of Beckmann, Kandinsky, Marc, and others will add to our understanding of the revolutionary nature of German Expressionism. This course is conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3102.

GER 4142. Novelle. 3 Credit Hours.

By reading, discussing, and writing about novellas recognized as significant representative works of the genre, the course aims to provide students with tools to: locate the novella's place in German literature within cultural settings; become acquainted with research into the genre; and practice, refresh and expand all language skills, especially reading, writing, and vocabulary development skills. All of the selected texts share thematic aspects of the supernatural or surreal as integral to development of the hallmark novella twist of plot. NOTE: The course is conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3102.

GER 4144. The Golden Age: Goethe and Schiller. 3 Credit Hours.

The course provides an introduction to the literary and philosophical developments of the classical period in German literature through an intensive reading and analysis of the prose, plays, and poems of Goethe and Schiller. The examination of this critical period in German literature/culture will be carried out by also scrutinizing representative works from the Storm and Stress period, as well as Early Romanticism. NOTE: The course is conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3102.

GER 4145. Twentieth Century Drama: From Expressionism to the Absurd and Beyond. 3 Credit Hours.

A selection of representative German theatrical works from Expressionism to the present (Hauptmann, Hofmannsthal, Brecht, Goering, Kaiser, Duerrenmatt, Frisch, Peter Weiss, Handke, Turrini), focusing on historical and cultural contexts as well as literary and linguistic analysis. Discussion, reports, and videos. NOTE: The course is conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3102.

GER 4146. Twentieth Century Prose: Searching for Identity. 3 Credit Hours.

In various types of writing - novel, novelle, short story, epistolary literature - German-speaking poets of the past century revealed a continuing, but not necessarily satisfying, search for identity. This course aims to trace that trajectory by studying representative works from Germany, Austria, and Switzerland. Readings include works by Thomas Mann, Hesse, Kafka, Seghers, Brussig, Borchert, Boell, Heym, Grass, Oezdamar, and Werfel. Discussion, videos, oral and written reports. NOTE: The course is conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 4147. Kafka. 3 Credit Hours.

Franz Kafka is justly regarded as one of the seminal writers of the 20th century. The simplicity of his language, combined with fantasy-based situations, produces texts with surprising twists, dark humor, and great spiritual depth. They capture the deliberations of a man both fascinated and imprisoned by language and life. Issues of freedom/restrictions and imprisonment/liberation are central to Kafka's writings. Works to be read are: Amerika, Der Prozess, Gesammelte Erzaehlungen, etc. NOTE: This course is conducted in German.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3102.

GER 4182. Advanced Independent Study I. 3 Credit Hours.

Supervised reading, research, and reports on an advanced level in German language, literature, and civilization.

Repeatability: This course may be repeated for additional credit.

GER 4220. Topics in German History and Culture (taught in German). 4 Credit Hours.

This course is designed to deepen understanding of German history, culture, ethnicity, and universal themes as they are portrayed in various cultural texts, including film and literature. It explores commonality and difference between different forms of creative expression, and the ways in which historical events are portrayed and discussed in culture. Topics vary. Viewing of films, readings. Three hours taught in English, with the fourth hour taught in German. Written work and readings in German for Majors, Minors, Certificate Students.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GER 3096 or GER 2041)

GER 4221. German Culture Through Film. 4 Credit Hours.

This course examines German cinema in the context of its relationship to German culture and history. Because film is an art form of creative expression as well as a vehicle for promoting awareness of social concerns, the course will introduce techniques of viewing, analyzing, and evaluating films as expressions of the contemporary culture. Basing our work on films of historical significance and those by premier directors, the course will explore the beginnings of the film industry, Nazi propaganda, the impact of the Oberhausen Manifesto, New German Film, and issues of gender and politics since the Wende. It includes an additional hour of instruction in German for German Majors and Minors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 4231. German Minority Identities: Gendered and Cultural Dimensions. 4 Credit Hours.

Germany has vibrant migrant communities with ethnic and racial groups from places as diverse as Turkey, Italy, Greece, Morocco, East Africa, and Russia. This course looks at the presence of minority communities in Germany today, their history and cultural influences as well as economic contributions. Our main analytical lens will be gender - how the German host culture is shaped by concepts of femininity and masculinity, sexuality, family, and a gendered division of labor and how these concepts are challenged (and/or shored up) by the various ethnic communities. We will look at both the perception of migrants by white/native Germans (how are they portrayed in the media, film, and politics?) and we will explore the voice of the "other," i.e. the experience of minority communities living in Germany and how this influences their own cultural identities. Questions we will ask include: How does the experience of immigration affect the identity of minorities living in Germany? What does "Deutsche Kultur" (German culture) mean today? Our focus will be on how gender shapes and underlies much of these discussions on minorities in Germany as well as their negotiations of conflicting expectations of community and larger "German" culture. Course material will include critical readings, films, and other cultural texts. This course includes a tutorial hour conducted in German. Note: Students who earned credit for "German Minorities and Cultural Identities: Gendered Dimensions" will not receive additional credits for "German Minority Identities: Gendered and Cultural Dimensions."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 4235. Weimar Culture: Race, Gender, Sexuality and Nation. 4 Credit Hours.

This class explores the contradictions in German culture during the Weimar Republic (1918-33), with particular attention to its urban centers. Berlin was considered the European capital of artistic and experimental subcultures as well as the hotbed for radical politics, whose decadent Bohemian culture of sexual experimentation, drug use, women's liberation and cabaret existed side by side with abject poverty and street violence. We will ask questions such as how Hitler could come to power in a Germany that was considered to have the most advanced science, technology, literature, philosophy and art of its time, and whose Jewish citizens contributed to all areas of society? How did a new consumerism contribute to the complacency of many Germans in the face of a violent fascism? Thereby we will pay attention to how concepts of race, gender, sexuality and nation shaped the debates of the time. We will watch movies, read literature and graphic novels, and learn about the Weimar Republic's political landscape and history. This course includes a tutorial hour that will be conducted in German. Note: Students who earned credit for "Race, Gender, Sexuality, and Nation in Weimar Culture" will not receive additional credits for "Weimar Culture: Race, Gender, Sexuality and Nation."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 3096 or GER 2041)

GER 4282. Advanced Independent Study II. 3 Credit Hours.

Supervised reading, research, and reports on an advanced level in German language, literature, and civilization.

Repeatability: This course may be repeated for additional credit.

GER 4296. Composition II. 3 Credit Hours.

This course builds on the skills mastered in German 3096 (W231) (Composition I) by fostering more sophisticated use of the language through written practice and study of advanced problems in syntax and style. Use of contemporary materials from German-speaking countries. NOTE: The course is conducted in German.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GER 3096.

GER 4301. History of the German Language. 3 Credit Hours.

Origins and development of the German language, including changes in sounds, grammar and vocabulary. NOTE: Taught in English.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GER 2041 or GER 3096)

GER 4940. Honors: Special Topics. 3 Credit Hours.

This course requires an advanced level of proficiency in German. Prerequisite is the successful completion of a 2000-level German course, an intensive writing experience, or with instructor approval. The topic will be an advanced study of various literary genres to be selected by the Core-Coordinators, and to be announced before enrollment.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GER 2000.

Global Studies (GBST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GBST 2000. Special Topics in Global Studies. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 2001. Introduction to Global Studies. 3 Credit Hours.

The 21st century is an age of globalization. Individuals no longer live their lives exclusively within local and national communities, but are touched by, and interact with, states, groups, firms and individuals across the world. In the area of international security, states have always fought, and prepared to fight, wars with other states, but in the 21st century these interstate wars have been joined by both increasingly destructive civil wars within countries, and by international and global terrorism perpetrated by non-state actors. In the economic realm, recent decades have witnessed a dramatic opening of almost all the world's economies to flows of international trade, finance, and people, such that all of us are now touched, in one way or another, by developments in the global economy. In the realm of culture, centuries-old national cultures, languages and traditions that have shaped people's world views are increasingly coming into contact - via increased travel, mass communications, and the internet - with cultural impacts from other countries.

Repeatability: This course may not be repeated for additional credits.

GBST 2010. Special Topics in Global Security. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the security track of the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 2020. Special Topics in Global Economy. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the economy track of the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 2030. Special Topics in Global Cultures. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the cultural track of the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 2082. Independent Study. 1 to 6 Credit Hour.

Arranged each semester; please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

GBST 2096. Introduction to Global Studies. 3 Credit Hours.

The 21st century is an age of globalization. Individuals no longer live their lives exclusively within local and national communities, but are touched by, and interact with, states, groups, firms and individuals across the world. In the area of international security, states have always fought, and prepared to fight, wars with other states, but in the 21st century these interstate wars have been joined by both increasingly destructive civil wars within countries, and by international and global terrorism perpetrated by non-state actors. In the economic realm, recent decades have witnessed a dramatic opening of almost all the world's economies to flows of international trade, finance, and people, such that all of us are now touched, in one way or another, by developments in the global economy. In the realm of culture, centuries-old national cultures, languages and traditions that have shaped people's world views are increasingly coming into contact - via increased travel, mass communications, and the internet - with cultural impacts from other countries.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

GBST 2197. Research Skills for Global Studies. 3 Credit Hours.

This is an introductory course on research skills. It is designed to provide an overview of the research process and a broad introduction to a range of research methods used in the liberal arts. The goal is to acquaint students with the key aspects of research design: thinking and learning about a problem, defining a specific answerable question, situating the question in theory and existing research, identifying relevant data sources (primary and secondary), and devising a method to find an answer to that problem. Given the interdisciplinary foundations of Global Studies, this course is decidedly interdisciplinary, drawing on methods from several disciplines in the liberal arts, including Anthropology, Economics, English, Geography, History, Political Science, and Sociology.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

GBST 2900. Honors Special Topics. 3 Credit Hours.

Topics vary each semester, please consult with the instructor for more information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

GBST 3000. Special Topics in Global Studies. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 3010. Special Topics in Global Security. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the security track of the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 3020. Special Topics in Global Economy. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the economy track of the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 3030. Special Topics in Global Cultures. 3 Credit Hours.

Topics vary each semester; please consult with the instructor for more information. Note: This course will count towards an elective for students declared in the cultural track of the Global Studies major.

Repeatability: This course may be repeated for additional credit.

GBST 3082. Independent Study. 1 to 6 Credit Hour.

Arranged each semester; please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

GBST 3083. Directed Readings. 1 to 6 Credit Hour.

Arranged each semester; please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

GBST 3085. Internship. 1 to 6 Credit Hour.

Arranged each semester; please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

GBST 3089. Fieldwork. 1 to 6 Credit Hour.

Arranged each semester; please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

GBST 3900. Honors Special Topics. 3 Credit Hours.

Topics vary each semester, please consult with the instructor for more information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

GBST 4096. Capstone Seminar in Global Studies. 3 Credit Hours.

This capstone research seminar is designed for seniors in Global Studies, with the specific aim of helping students carry out and complete an independent research project in their areas of concentration. Over the course of this semester, you will select a research topic, formulate a research question, engage with the scholarly literature on this question, generate hypotheses for empirical testing (if appropriate), and set out a research design and methodology that will allow you to test and present compelling findings about your chosen research question. Whether you are coming to the seminar with well established ideas about the possible topic of your research paper, or are starting from scratch, the course will give you the skills you need to select a research question and move, step by step, to a completed work of original global studies scholarship.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GBST 2096.

Graphic Arts and Design (GAD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GAD 0822. Human Behavior and the Photographic Image. 3 Credit Hours.

How do photographs become more than just a pile of disparate images? Is there more to photography than that single "decisive moment" in the hunt and capture of an image? How do photographers comment on issues that are important to them? How can photographs tell a story? Is there a way one can use the art of photography to elicit change? In this class, students will use their digital cameras to investigate individual photographs, as well as series of photographs. We will look at photography in its historical context -- at the advent of documentary photography and photojournalism, and at narrative photography in its more contemporary form, as photographers use it to chronicle their own lives and to tell a story. Through the exercises of looking at and making photographic images, several core concepts of social work, along with theories of human behavior in the social environment, will be introduced. Students will learn not only about the place photography holds in our culture, but our culture itself, and the students' place in that culture. Students will critically analyze published photographs, as well as photographs made during the class. The semester will culminate in a class exhibition where students will be given the opportunity to present their photographs to the public, demonstrating their understanding of human behavior in the social environment. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed SSWU 0822 or PHOT 0822.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

GAD 2001. Graphic Design. 3 Credit Hours.

This course introduces students to graphic design as a conceptual and visual discipline. Projects focus on solving visual problems from a wide range of topics in a variety of media. Graphic Design 2001 is the prerequisite for the Graphic and Interactive Design (GAID) major.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1521, FDPR 1522, or VS 1651)

GAD 2002. Graphic Design. 3 Credit Hours.

In this advanced sophomore level course students work on a variety of projects focusing on visual communication through type and image.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 2001.

GAD 2021. Computers for Design. 3 Credit Hours.

This course introduces students to the computer as a tool for design. Students learn the fundamentals of software most commonly found in design and imaging studios. Students work primarily in Adobe Photoshop, Illustrator and InDesign (Mac platform). Basic working knowledge of Adobe Photoshop and Illustrator is required. Students will be tested for basic competency in these programs on the first day of class.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1521, FDPR 1522, or VS 1651)

GAD 2071. Mac Design Programs I. 3 Credit Hours.

This course introduces students to the computer as a tool for graphic design and image making. Students learn the fundamentals of software most commonly found in graphic design studios and used for both print and interactive/web applications: Adobe Photoshop, Illustrator and InDesign (MAC platform). This course is not recommended for students who plan to major in Graphic & Interactive Design. Those students should contact an advisor for information about the appropriate alternative. NOTE: Prior to spring 2011, the course title was "Introduction to Computers for Design" and prior to fall 2015, the title was "Introduction to Mac Design Programs."

Repeatability: This course may not be repeated for additional credits.

GAD 2073. Introduction to Web Design. 3 Credit Hours.

This course instructs students in the fundamentals of interactive design with a focus on the use of interactive software, layout, typography, hierarchy and organization. Basic working knowledge of Adobe Photoshop and Illustrator required (MAC platform). Students will be tested for basic competency in these programs on the first day of class.

Repeatability: This course may be repeated for additional credit.

GAD 2075. Communication Through Graphic Design. 3 Credit Hours.

This course introduces students to creative thinking processes and techniques as they relate to visual communication. Students will present ideas and information on a wide range of topics through visual rather than verbal language. Very basic drawing skills will be needed for this course.

Repeatability: This course may be repeated for additional credit.

GAD 2076. Introduction to Web Programming and Production. 3 Credit Hours.

Students will learn how to program and produce a simple web site from provided design templates. The web site will be completed using Adobe Dreamweaver as the main production tool, and will also include an introduction to the programming languages, CSS, HTML, and Javascript fundamentals. Students will complete a fully functioning web site, programmed in the professional, industry-standard model. NOTE: A strong basic knowledge of Photoshop and Illustrator is required. Students will be tested on the first day of class to ensure that they have sufficient knowledge to succeed in the class. This course is open to Tyler students only from all BA, BS and BFA majors. It can be taken for graduate credit with permission of an advisor. Permission from the GAID Area Head is required for students outside of Tyler.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

GAD 2077. Introduction to Illustration. 3 Credit Hours.

This course introduces students to concept and technique in illustration. Basic drawing skills will be needed for this course. Priority will be given to students outside the Graphic & Interactive Design major.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2078. The Art of Infographics. 3 Credit Hours.

This course is an introduction to data visualization and infographic design. It explores the history of data visualization and infographic design, from cave paintings to contemporary design, covering static, animated and interactive solutions. Lectures on visual literacy and graphic design foundations will help the students develop the vocabulary necessary to critically analyze contemporary infographics. Students receive basic instruction in the creation of infographics and develop their own infographic utilizing supplied data. This course will include readings from Edward Tufte's *The Visual Display of Quantitative Information*. Tutorials may also be used for outside software instruction.

Repeatability: This course may not be repeated for additional credits.

GAD 2079. Mobile Apps: Design/Prototype. 3 Credit Hours.

This course will walk students through the creative process of concept development, design and prototyping a mobile application. The audience for this class includes, but is not limited to: entrepreneurs, business students, computer science/programming majors, advertising students, and anyone interested in design thinking and creative problem solving. Students do not need any prior design knowledge, though some basic Adobe Photoshop skills would be helpful. The course will work through the creative process of identifying a problem, conducting research, brainstorming a solution, studying the user experience, creating a wireframe and executing many iterations to design a working prototype. This course will not involve the actual development of the app. After engaging in group brainstorming and concept development sessions, students will understand how group work can help them arrive at the best possible solution for a problem. User experience exercises investigate how a user interacts with a product to create a positive experience. Wireframe exploration and design iterations will establish an overall plan for the mobile app. A study of color, composition and typography will also enhance the visual execution of the app. The final apps will be created as working prototypes.

Repeatability: This course may not be repeated for additional credits.

GAD 2401. Introduction to Photography (Online Digital Course). 3 Credit Hours.

This is an introductory course in photography. We will concentrate on learning the basic camera functions, proper exposure of an image, and the formal and conceptual considerations in composition. Although there will be an emphasis on the technical aspects of photography, this course will also introduce students to many contemporary artists working in photography, as well as the history of the photographic medium and how to appropriately approach the critique setting.

Repeatability: This course may not be repeated for additional credits.

GAD 2441. Photo I: Digital. 3 Credit Hours.

An introduction to the fundamental vocabulary and techniques of digital photography with an emphasis on developing skills of perception and visual competence in both the creation and consumption of lens-based imagery. Students will explore the complex relationship between content, composition, technical execution, and visual ideas that communicate with intent. Course topics include digital workflow methods for exhibition quality output using digital cameras, scanners, contemporary imaging software, and printers. Projects will include both color and black and white imagery. Prior to fall 2016, the course title was "Photography I."

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2451. Photo I: Digital. 3 Credit Hours.

In this class, students will explore the visual language of digital photography using Rome as their studio. Rome's many layered history juxtaposed with its current global urban landscape offers a unique opportunity to photograph an important European city. The technical component of the class consists of mastering manual digital camera operation and exposure. Students also learn to use contemporary imaging software and to produce digitally-generated output. Students will gain an understanding of the aesthetic possibilities of photography through assignments, lectures on both historic and contemporary photographers, photo field trips in Rome, and visits to photo galleries and museums. Critiques are conducted through a shared website. Students will be expected to complete a final project in which they choose one aspect of Rome's multi-layered landscape to visually explore in depth. Prior to fall 2016, the course title was "Photography I."

Repeatability: This course may be repeated for additional credit.

GAD 2461. Digital Imaging. 3 Credit Hours.

This course deals with photographic images and how ideas can be expressed through the manipulation of these images using the computer as a tool for creative expression. Excellent basic course in image software use and introduction to the use of the computer.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2701. Survey of Printmaking Techniques. 3 Credit Hours.

A beginning survey of basic techniques of lithography and screenprinting. The course introduces a number of short projects designed to give a broad experience with the media. Additional topics include print presentation, care of tools and materials, and a historical survey in slides and actual examples.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2702. Survey of Printmaking Techniques. 3 Credit Hours.

A beginning survey of the basic techniques of etching and relief printing. The course introduces a number of short projects designed to give a broad experience with the media. Additional topics include print presentation, care of tools and materials, and a historical survey in slides and actual examples.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2703. Book Structures. 3 Credit Hours.

This course introduces a variety of hand bookbinding techniques, including folded, sewn and adhesive binding structures as well as a variety of protective enclosures and custom boxes. Projects will allow students to explore the book as a means to organize, structure, and present visual information in a variety of media.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1521, FDPR 1522, or VS 1151)

GAD 2704. Book Structures. 3 Credit Hours.

This course is an introduction to the art of the book: a significant format for the expression of information and creativity. Bookbinding has a long history in Europe and a particularly rich history in Rome. Students will engage first hand with the historical tradition and contemporary possibilities of this craft. The course will cover traditional binding techniques including folded, sewn, and adhesive structures, as well as custom portfolio design. Emphasis will be placed on utilizing the unique format of the hand-bound book to engage with students' visual and psychological experience of Rome. Course projects will incorporate a range of media including drawing, photography, collage, graphic design and printmaking in the execution of both traditional and modern book structures. Each project will provide an opportunity for students to plan and execute unique book designs reflecting their personal Roman experience.

Repeatability: This course may be repeated for additional credit.

GAD 2711. Serigraphy. 3 Credit Hours.

The fundamentals of screenprinting as a fine art print medium. This course introduces various handmade stencil methods as well as the photo processes. Students use non-toxic acrylic inks with projects that emphasize color organization and conceptual challenge.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2731. Etching. 3 Credit Hours.

The beginning level course in intaglio and relief printing processes. This course covers traditional methods of platemaking, such as etching, drypoint, and aquatint, as well as explorations into photo transfer and color viscosity printing.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2741. Intaglio Printmaking. 3 Credit Hours.

This introductory studio course engages students in historic and contemporary printmaking concepts and technologies, while encouraging a multi-disciplinary approach to fine art print production. Students are introduced to a broad range of ideas, methods and materials that focus upon the intaglio printmaking processes, but also include monoprints and monotypes. Initial projects are structured around the more traditional drawing, plate making and printing processes. As students become more comfortable with the fundamentals of the medium, they are encouraged to develop a more personal approach to concept, subject, scale, material and process. Studio projects will be supplemented by field trips to museums, galleries and artist studios to give students first hand experience of the historic and contemporary context of printmaking in Italy. Field trips may include the National Print Cabinet, where students may closely examine original prints by Italian masters, which may include Da Carpi, Canaletto, Tiepolo, Piranesi and others.

Repeatability: This course may be repeated for additional credit.

GAD 2751. Lithography. 3 Credit Hours.

A basic course in metal plate lithography. Preparation, processing, and printing are studied with the intention of giving the beginning student control over a medium that is often thought to be complicated. Students work with traditional hand-drawn imagery as well as transfer and photo-litho, in black and white and color.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2761. Lithography. 3 Credit Hours.

A basic course in metal plate lithography. Preparation, processing, and printing are studied with the intention of giving the beginning student control over a medium that is often thought to be complicated. Students work with traditional hand-drawn imagery as well as transfer and photo-litho, in black and white and color.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 2961. Honors Digital Imaging: Seeing Photographically. 3 Credit Hours.

Life is full of wonder when you simply open your eyes to it. All it takes is an open mind and a shift in your way of seeing. The primary objective of this course is to introduce students to the act of seeing photographically, creative problem solving, and thinking visually while learning contemporary digital technology and practices. Students will be instructed on the use of a variety of input and output devices (cameras, scanners, printers) and software applications. Lecture and research on historical and contemporary artwork inform creative approaches to visual thinking and assignments build on creative problem-solving skill sets. Emphasis is placed on image making, proper workflow, interpretation, and output. Students produce a portfolio that demonstrates critical visual thinking and effective skill development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

GAD 3001. Advanced Graphic Design. 3 Credit Hours.

Class assignments focus on visual communication in a variety of forms: logo design, packaging, brochures, invitations, posters, magazine illustration and layout, and/or environmental design. NOTE: GAD 3001 and 3002 must be taken in sequence and are required for all graphic design majors. GAD 3001 (0253) is offered in the fall semester only; GAD 3002 (0254) is offered in the spring semester only. Both courses are open to GAID majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2001 and GAD 2021)

GAD 3002. Advanced Graphic Design. 3 Credit Hours.

Class assignments focus on visual communication in a variety of forms: logo design, packaging, brochures, invitations, posters, magazine illustration and layout, and/or environmental design. NOTE: GAD 3001 and 3002 must be taken in sequence and are required for all graphic design majors. GAD 3001 (0253) is offered in the fall semester only; GAD 3002 (0254) is offered in the spring semester only. Both courses are open to GAID majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design, Grphc + Intrctv Dsgn w Entr St.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001.

GAD 3010. Special Topics. 3 Credit Hours.

This course introduces students to various areas of design practice. Areas of focus in a given semester could include one of the following: animation, art direction, branding, corporate communications, design for the public good, environmental design, exhibition design, game design, motion graphics, publication design, sustainability, typographic design, etc. The topic(s) for the course will be determined by the expertise of the instructor(s).

Course Attributes: SI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in GAD 3001, (GAD 3011 or 'Y' in CRGA02), and (GAD 3021 or 'Y' in CRGA03)

GAD 3011. Typography. 3 Credit Hours.

This course focuses on the expressive and functional use of typography in design, one of the most important tools in visual communication for both print and interactive media. This course includes instruction in Adobe InDesign, (Mac platform), a standard typesetting program in the design industry. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2001 and GAD 2021)

GAD 3012. Typographic Principles. 3 Credit Hours.

This course will focus on the fundamentals of typography in design - typefaces, their history, development and characteristics, typographic hierarchy, layout, rhythm, proportion and harmony, and the technical aspects of working with type in software that meets industry standards (Adobe InDesign/Mac platform). Specific topics include the formal characteristics of typography; historic typography; information hierarchies and layout; typographic systems; punctuation and special characters; setting text; legibility and readability; setting charts and tables; and preparation of typographic files for print. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2001 and GAD 2021)

GAD 3013. Advanced Typography. 3 Credit Hours.

This course focuses on advanced applications of typography in design. Projects include logo design, book covers, posters, brochures and/or catalogues. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 3001 and GAD 3011)

GAD 3015. Advanced Typography. 3 Credit Hours.

This course focuses on advanced applications of typography in design. Projects include logo design, book covers, posters, brochures and/or catalogues. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 3001 and GAD 3011)

GAD 3021. Intermediate Computer Graphics. 3 Credit Hours.

This course for Graphic and Interactive Design majors focuses on the computer as an essential tool in both print and digital media. (Mac platform) NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2001 and GAD 2021)

GAD 3023. Interactive Design. 3 Credit Hours.

This course focuses on design for web and motion graphics. A good working knowledge of Adobe Photoshop and Illustrator (Mac Platform) is necessary. Flash and After Effects will be explored from basic to intermediate levels. While staying current with the latest technologies, the emphasis will be on design for communication through interactive media. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 3001 and GAD 3021)

GAD 3025. Interactive Design. 3 Credit Hours.

This course focuses on design for web and motion graphics. A good working knowledge of Adobe Photoshop and Illustrator (Mac Platform) is necessary. Flash and After Effects will be explored from basic to intermediate levels. While staying current with the latest technologies, the emphasis will be on design for communication through interactive media. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 3001 and GAD 3021)

GAD 3027. Digital Narratives. 3 Credit Hours.

The purpose of this course is to focus on the creation of a short digital animation/movie based on a supplied narrative. Strong conceptual and technical skills as well as a solid grasp of typography will be necessary for this course. Students will learn one vector based and one video based application to create this design. This course is not cell based animation. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- (except where noted) in GAD 3001 and (GAD 3021 (C or higher) or 'Y' in CRGA03)

GAD 3029. Programming and Production for Web Sites. 3 Credit Hours.

The focus of this course is the technical production and programming aspects of producing a fully functioning web site. Topics covered will be the best-practices use of Dreamweaver for site production with an emphasis on CSS, HTML and Javascript programming languages. Students will also be introduced to the fundamentals of the ActionScript language. Students will cover the process of creating a web site and its many considerations such as flowcharts, sitemaps, and wireframes. Students will be introduced to fundamentals of information architecture and search engine optimization (SEO) for use within their site and discuss best-practices for uploading and maintaining their final site. Open to Graphic & Interactive Design BFA and MFA majors only.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GAD 2001, GAD 2021, and GAD 3021)

GAD 3031. Illustration. 3 Credit Hours.

This course introduces students to concept and technique in illustration. NOTE: This course is open to students in all studio majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1511, FDPR 1512, or VS 1651), GAD 2001, and GAD 2021.

GAD 3033. Illustration. 3 Credit Hours.

This course introduces students to concept and technique in illustration. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2001 and GAD 2021)

GAD 3041. Advertising Design. 3 Credit Hours.

Students will develop overall strategies as well as specific visual and verbal content for advertising campaigns. Strong conceptual ability and writing skills are necessary in addition to a solid grasp of typography and layout. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001 and (GAD 3011 or GAD 3021)

GAD 3045. Introduction to Visual Communication. 3 Credit Hours.

This course introduces students to creative thinking processes and techniques as they relate to visual communication. Students will present ideas and information on a wide range of topics through visual rather than verbal language. NOTE: This course is open to all students sophomore through senior level.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3053. Art Careers Promotion. 3 Credit Hours.

This course offers instruction in the design and content of materials needed by fine artists in professional practice. This course will cover a number of topics including: resume content and design, personal stationery packages for business communication (cover letters, professional inquiries, etc.), presentation formats for print and web. NOTE: Open to all studio majors to include: GAD, Art, and Art Education.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3096. The Business of Design. 3 Credit Hours.

The focus of this course is the practice of design for communication in a business context. This course will cover a number of topics, including: personal marketing, freelance practice, working with artists and vendors, business models for design entrepreneurs, sustainability, and presentation skills. This course fulfills a studio elective requirement for juniors and seniors in the GAID major. NOTE: This course is open to Graphic and Interactive Design majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: SI, WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001 and (GAD 3011 or GAD 3021)

GAD 3097. Graphic Design Theory. 3 Credit Hours.

This course will introduce students to contemporary design theories and discourse. It will examine the theoretical aspects of artifacts through their making, reading and dissemination. Graphic design and visual communication theories will be compared to those in literature and architecture. Students will use discussion, writing, presentations and design to investigate contemporary design issues. Emphasis will be placed on forming and articulating an individual point-of-view (POV) in discussion and writing.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

GAD 3101. Collaborative Design Workshop in Rome. 3 Credit Hours.

The six week course is geared toward design students interested in immersing themselves in the culture of Italy and producing, by the end of the workshop, a printed project about design, art, and culture in Rome. Students will have a choice of topics to research, design, and produce. Among the many topics that students could focus on are Roman decorative arts, cuisine, theatre, architecture, fashion, music, and film. Students will also be encouraged to study how the Italian design aesthetic and philosophy might be applied to their own work. An integral part of this project will be both digital and traditional image making. Students will photograph and/or illustrate an article that will be incorporated into the final collaboratively produced printed piece. NOTE: Open to majors in the following disciplines - Graphic and Interactive Design, Photography, Illustration, Fashion Design, Interior Design, Industrial Design, Landscape Architecture, Architecture, Journalism, Advertising.

Repeatability: This course may be repeated for additional credit.

GAD 3111. Graphic Design Workshop in Japan. 3 or 6 Credit Hours.

The six week course is geared toward graphic design students interested in immersing themselves in the culture of Japan and producing a design project about this experience. Students will have a choice of projects to design and produce. They will be encouraged to study how Japanese design aesthetic and philosophies might be applied to their own work. NOTE: A basic knowledge of design industry-standard print software is required for this course.

Repeatability: This course may be repeated for additional credit.

GAD 3123. Introduction to Interactive. 3 Credit Hours.

This studio elective instructs students in the fundamentals of interactive design with a focus on the use of interactive software, layout, typographic principles, including typographic hierarchy and organization as well as the balance of aesthetic and functional considerations in layout and typography. NOTE: The course is open to students from all majors at Tyler. It fulfills a studio elective requirement.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3182. Independent Study. 1 to 3 Credit Hour.

The proposal for a large-scale independent project must be approved by a faculty member who agrees to oversee the project prior to registration for the course. For photography students justification for course work outside the Photography curriculum will be required.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3185. Field Internship. 3 Credit Hours.

A field internship must provide practical professional experience in a setting which is relevant to the student's course of study, such as in a gallery, museum, design studio or agency, or community art center, etc. A comprehensive paper must be written. An internship is designed to give the student valuable real world career experience. Guidelines for specific area requirements are available through the GAD office. NOTE: The GAID Internship Coordinator must receive and approve a written proposal prior to the start of the internship, describing the setting and the time commitment, which must equal at least 10 hours per week for a full semester.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3282. Independent Study. 1 to 3 Credit Hour.

The proposal for a large-scale independent project must be approved by a faculty member who agrees to oversee the project prior to registration for the course. For photography students justification for course work outside the Photography curriculum will be required.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3400. Special Topics in Photography. 3 Credit Hours.

This course explores special topics in photographic and imaging practices including new and emerging methods of research and production. Special topics courses can include lectures, demonstrations, readings, and student presentations in support of field and studio research. Both individual and collaborative practices may be addressed.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441, GAD 2461, GAD 2961, GAD 2401, ARTU 2811, ARCH 1011, or ARCH 1017)

GAD 3401. Color Photography I. 3 Credit Hours.

An introduction to basic skills in color photography. This course includes camera work and understanding of light, processing and printing with an emphasis on color theory, the development of personal imagery and the history of color photography.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 2441.

GAD 3402. View Camera. 3 Credit Hours.

This course provides an introduction to large format photography using a 4x5 view camera. Basic camera operation, various functions, specific uses, and potential as a creative tool are studied. A variety of specific exercises lead the student to proficient use of the view camera. Emphasis is on creative use as well as technical development. NOTE: Open to Photo majors only - special authorization required for non-majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3412.

GAD 3411. Digital Photography. 3 Credit Hours.

Digital photography explores advanced applications in digital imaging with an emphasis on photographic output. Emphasis will be placed on more sophisticated methods of capture and production including large format printing, advanced color management, cataloging, and archival storage practices. The development of a personal vision and lines of inquiry will be central. A professional portfolio will be required.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451)

GAD 3412. Darkroom Photography. 3 Credit Hours.

An introduction to the fundamental vocabulary and techniques of darkroom photography. Skills of perception, visual competence, and black and white film-based photographic practice will be emphasized with an introduction to digital and darkroom hybrid techniques. Projects will address technical development as well as the development of personal vision through the photographic medium. Prior to fall 2016, the course title was "Photography II."

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3413. Photographic Lighting. 3 Credit Hours.

At the core of any commercial or fine art photographer's practice is an in-depth understanding of lighting. This course is a thorough investigation of artificial lighting techniques (strobe and continuous) both in the studio and on location. Additional topics include advanced methods of exposure and the different approaches required in lighting for digital and film based images. A final portfolio is required. This course is repeatable for credit.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451)

GAD 3414. Darkroom Photography. 3 Credit Hours.

This course will introduce students to the historic methods and materials of pre-digital black and white darkroom photography on location in Rome. Students will become familiar with Italian culture and with the techniques they are using to capture it deepening their understanding of the city and the creative process. Along with photo field trips the class will consist of lectures, demonstrations and group discussions. Weekly assignments will be given and a final portfolio of silver gelatin prints will be completed by the end of the semester. Images will be printed from negatives produced during the course. NOTE: Students are strongly encouraged to bring their own 35mm camera. A small number of basic film cameras will be available for limited student use.

Repeatability: This course may not be repeated for additional credits.

GAD 3421. Digital Projects. 3 Credit Hours.

The emphasis of this course will be on creating a professional digital portfolio. Throughout the semester, students will learn a series of multimedia software applications and develop interactive presentations that will promote themselves as artists with contemporary and professional portfolios. NOTE: The course is limited to seniors and graduate students.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 2461.

GAD 3422. Contemporary Photography. 3 Credit Hours.

We live in an extraordinary moment in the history of photography, a moment much hoped for and anticipated by many champions of the medium. Finally one can say without qualification that photography is a medium fully embraced by the contemporary art world. While there has always been a movement to look at and discuss photography as art, photography has never played a more central, critical and vital role in contemporary art than it does now. This course will look at both the role that photography plays in contemporary art and the role that contemporary art plays in photography. By surveying contemporary trends in photography, students in this class will develop an understanding of what exactly photography is now. At the same time the class will attempt to answer questions about what it means to be contemporary, about what the relationship between the contemporary and the historical is, and why this might be important. Through these problems students will be encouraged to develop personal work that addresses themes and ideas discussed in the class. NOTE: Open to Junior/Seniors. Special authorization required for non-majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451)

GAD 3431. Color Photography I. 3 Credit Hours.

An introduction to basic skills in color processing and printing with an emphasis on development of personal imagery and the history of color picture making.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 2441.

GAD 3432. Color Photography II. 3 Credit Hours.

Advanced projects in color photography to include either chemical processes or digital technology. Research will focus on contemporary trends in color photography with an emphasis on the development of a personal portfolio.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3431.

GAD 3441. Advanced Photo Workshop. 3 Credit Hours.

A continuation of advanced black and white photography with an introduction to the zone system and a variety of professional techniques. Emphasis will be on the development of a professional portfolio, classical black and white photographic history, and focused development of personal vision. Digital photographic techniques may also be included.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451) and GAD 3412.

GAD 3451. Advanced Photography Workshop. 3 Credit Hours.

This course is for students who have previously studied photography and who wish to use historic methods to complement their ideas. The primary medium will be black and white film and will emphasize the development of a personal vision of each student. Projects may also include the production and use of pin-hole or other alternative cameras and investigate their relationship to 16th and 17th century optical devices and images found in Rome. There will be experimentation and investigation with a variety of methods and materials that are not commonly used such as lumen prints, contact printing, and large format film. Along with studio time the class will consist of lectures, technical demonstrations, field trips and group critiques. Students will produce a series of printed images for their final portfolio.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451) and (GAD 3412 or GAD 3414)

GAD 3461. Photo Process Workshop. 3 Credit Hours.

This course is a survey covering a wide range of experimental and historical photographic processes that extend beyond traditional silver printing. Workshop orientation emphasizes a diverse exposure to many creative possibilities from hand applied photographic emulsions to artists' book production, culminating in a professional final project.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451) and GAD 3412.

GAD 3471. Photo Process Workshop. 3 Credit Hours.

Studio orientation to a wide range of experimental and historical photographic processes beyond traditional silver printing. Workshop orientation emphasizes a diverse exposure to many creative possibilities from hand applied photographic emulsions to artists' book production.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2441 or GAD 2451) and GAD 3412.

GAD 3711. Advanced Serigraphy. 3 Credit Hours.

Advanced screen printing with emphasis on expanding the students' stencil making and printing skills as well as personal artistic growth. Students work with non-toxic acrylic inks in projects that emphasize scale, color, and use of material.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 2711.

GAD 3731. Advanced Etching. 3 Credit Hours.

Advanced problems in intaglio and relief processes. While the emphasis is on personal artistic development, the students are also encouraged to work toward professional standards in platemaking and printing skills. Projects often include, multi-plate color printing, copper engraving, mezzotint, various relief methods, and embossing.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GAD 2731 or GAD 2741)

GAD 3751. Advanced Lithography. 3 Credit Hours.

This course is designed to improve the students' technical skills toward professional standards and to develop the students' personal vision through the use of lithography. Study will include stone and plate lithography, color theory and practice, photo processes and editing.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2751 or GAD 2761)

GAD 3811. Printmaking Workshop. 3 Credit Hours.

Studies in all printmaking media, emphasizing individual instruction for students of varied backgrounds.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2701 or GAD 2702) and (GAD 3711, GAD 3731, or GAD 3751)

GAD 3821. Printmaking Workshop. 3 Credit Hours.

Students will expand upon the historic and contemporary printmaking concepts and technologies through a multi-disciplinary approach to studio practice that emphasizes individual conceptual and technical growth. Rome is rich with examples of innovative and dynamic printmaking: from the traditional Italian masterworks housed at the National Cabinet of Prints and Drawings, to the exciting prints produced by contemporary Italian artists. This course will draw upon these uniquely Italian art forms to strengthen the content of students' work and hone their technical abilities. As students develop a more personal approach to concept, subject, scale, material and process, they are introduced to more advanced printmaking topics. Frequent off-site expeditions, discussion and research will further engage students with the concepts and aesthetics underlying each process.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 2731 or GAD 2741)

GAD 3831. Relief and Monoprint Workshop. 3 Credit Hours.

The directness of both relief printing and monotype give the artist a unique opportunity to concentrate on the image possibilities. Students will work with non-traditional and traditional cutting methods, materials, and printing methods.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

GAD 3841. Color Print Workshop. 3 Credit Hours.

A methodical study of color printing problems as they are presented by the intaglio, relief, lithographic and screen printing media. Color theory and practical techniques are combined, giving experience in all phases of multicolor and intermedia graphic production.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GAD 2701 or GAD 2702), (GAD 3711, GAD 3731, or GAD 3751), and Two Introductory Printmaking: (GAD 2711, GAD 2731, GAD 2741, GAD 2751, or GAD 2761)

GAD 3896. Art Career Workshop. 3 Credit Hours.

Creative and practical solutions to career problems of the artist; preparation of the art student for postgraduate challenges.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

GAD 4000. Senior Design: Special Topics. 3 Credit Hours.

This course focuses on topics in design not covered in the regular senior level course offerings. Topics may include, but are not limited to, Environmental Design and Signage, Type Design, Promotion Design, etc. Classroom instruction and assignments will include projects appropriate to the specific topic being offered. NOTE: This course is open to GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4001. Senior Graphic Design: Senior Design Workshop. 3 Credit Hours.

Students work on projects for the Tyler Design Incubator. This includes project development and management, research on topics specific to entrepreneurial design practice, and assigned tasks for Incubator activities and events.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4002. Senior Graphic Design: Hybrid Design. 3 Credit Hours.

Students work on large assignments that have components in both print and interactive media. Instruction in the advanced use of software applications for print and/or interactive media is a significant part of the course. NOTE: This course is for GAID majors only. It can fulfill the studio requirements in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4003. Senior Graphic Design: Art Direction. 3 Credit Hours.

This course focuses on concept development with an emphasis on image making and image editing in a variety of forms including, book publishing, advertising and signage. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4004. Senior Graphic Design: Packaging. 3 Credit Hours.

This course focuses on package design for a variety of products. Students work with concept, surface design, typography, materials and the physical construction of three-dimensional forms. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4005. Senior Graphic Design: Publishing. 3 Credit Hours.

Students work on large-scale publications with a strong emphasis on the development of typographic formats and the inventive use of illustration and/or photographic imagery to create periodicals and/or books that are functional, conceptually sophisticated and visually distinctive. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4006. Senior Graphic Design: Brand Identity. 3 Credit Hours.

In this course students develop two large scale identities that include logo design, stationary and collateral materials in a variety of forms that can include booklets, brochures, posters, advertising, signage and/or packaging. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4007. Senior Interactive Design. 3 Credit Hours.

The focus of this course is interactive design for a large-scale website. This project will involve in-depth exploration of interface design, navigation, audio, digital animation and organization of information. Includes instruction in intermediate through advanced programming skills and the use of video composition. A strong grasp of the fundamentals of interactive design is required. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, GAD 3021, and (GAD 3023, GAD 3025, or GAD 3029)

GAD 4008. Senior Graphic Design: Projects in Authorship. 3 Credit Hours.

This course encourages students to express perceptions and positions on current issues and events through large-scale projects. Parameters of assignments are generated by individual approaches, challenging each student to engage in decision making to develop unique content and form. The work from this class expands the boundaries of the design discipline beyond traditional client-based practice. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts, Master of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4009. Senior Graphic Design: Projects in Authorship. 3 Credit Hours.

In this course, the designer as author creates a large-scale Senior Thesis on a topic and in the form(s) of his or her choice. The Senior Thesis is required for all Graphic and Interactive Design majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, GAD 3021, and Two Senior Specialized Courses: (GAD 4000, GAD 4010, GAD 4011, GAD 4111, GAD 4112, GAD 3013, GAD 3015, GAD 3027, GAD 3041, GAD 4001, GAD 4002, GAD 4003, GAD 4004, GAD 4005, GAD 4006, GAD 4007, or GAD 4008)

GAD 4010. Senior Design: Special Topics. 3 Credit Hours.

This course focuses on topics in design not covered in the regular senior level course offerings. Topics may include, but are not limited to, Environmental Design and Signage, Type Design, Promotion Design, etc. Classroom instruction and assignments will include projects appropriate to the specific topic being offered. NOTE: This course is open to GAID majors only. It can fulfill a studio elective requirement or a required studio course in the major.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4011. Senior Graphic Design: Design for the Public Good. 3 Credit Hours.

Students work on a wide variety of projects for arts and educational groups, social welfare and environmental organizations, and other clients in the nonprofit sector. Projects done in the class will actually be produced--either in print or, in the case of web sites, posted online. Students will be responsible for production preparation and supervision for course projects which could include identities, brochures, posters, invitations, and advertising campaigns. NOTE: This course is for GAID majors only. It can fulfill the studio requirement in the major or a studio elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, and GAD 3021.

GAD 4111. Senior Illustration. 3 Credit Hours.

Assignments focus on image-making for communication. Strong concepts, the development of a personal visual approach or style and professional process will be the focus of this course. NOTE: This course can fulfill an elective requirement or a senior course requirement for GAID majors.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in GAD 3001, (GAD 3002 or 'Y' in CRGA01), (GAD 3011 or 'Y' in CRGA02), and (GAD 3021 or 'Y' in CRGA03)

GAD 4112. Senior Illustration. 3 Credit Hours.

Assignments focus on image-making for communication. Strong concepts, the development of a personal visual approach or style and professional process will be the focus of this course. NOTE: This course can fulfill an elective requirement or a senior course requirement for GAID majors.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in GAD 3001, (GAD 3002 or 'Y' in CRGA01), (GAD 3011 or 'Y' in CRGA02), and (GAD 3021 or 'Y' in CRGA03)

GAD 4113. Senior Illustration Portfolio. 3 Credit Hours.

This course offers students from disciplines outside of the Graphic and Interactive Design area the opportunity to develop illustration portfolios that meet professional standards and to develop strategies for promoting their work to art directors in agencies, studios and publications. This course covers several topics, including: developing stylistic consistency, conceptually driven assignments, presentation formats, pacing work within the portfolio, customizing portfolios to potential clients, and self promotional pieces.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (GAD 4111 or GAD 4112)

GAD 4196. Senior Portfolio. 3 Credit Hours.

This course focuses on the development of the senior portfolio in preparation for entering professional design practice. Students assemble and design the presentation of their work in electronic and print formats. Assignments also include personal marketing pieces and the development of writing skills specific to the design profession. NOTE: This course is offered in Spring semesters only and is open to GAID majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Graphic and Interactive Design.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GAD 3001, GAD 3002, GAD 3011, GAD 3021, and Two Senior Specialized Courses: (GAD 4000, GAD 4009, GAD 4010, GAD 4011, GAD 4111, GAD 4112, GAD 3013, GAD 3015, GAD 3027, GAD 3041, GAD 4001, GAD 4002, GAD 4003, GAD 4004, GAD 4005, GAD 4006, GAD 4007, or GAD 4008)

GAD 4441. Senior Photography. 3 Credit Hours.

Development of a contemporary theoretical and conceptual foundation for long-range involvement with professional photographic image-making and processes. The course includes research, field trips, critical theory and the organization of a final portfolio of work using various photographic materials. Career options within the field are emphasized.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Photography.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in 9 credits in 3400-level GAD courses.

GAD 4496. Senior Seminar in Photography. 3 Credit Hours.

The primary objective of this advanced writing intensive/studio course is to investigate the concept of photography both technically and conceptually. Students will research, revise, and present an extended, articulate, and professionally accomplished body of writings and artwork. Students will learn the professional standards of writing that are expected in the different avenues of photography. Writing and vocabulary skills appropriate to fine arts venues are different than those needed in a commercial endeavor. Students will learn how to identify and use the appropriate language, references, and resources in the photography world. This course is required for all photography majors.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in 9 credits in 3400-level GAD courses.

GAD 4511. Senior Projects Workshop/Seminar. 3 Credit Hours.

A combination workshop/seminar course in which the senior printmaker, through classroom and individual discussion with the instructor, develops and produces a major print project. The course includes a formal presentation of all the projects.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Greek (Ancient) (GRKA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GRKA 1001. Ancient Greek 1. 4 Credit Hours.

Ancient Greek was spoken not just in Athens and Sparta but also on the shores of the Black Sea, in Egypt, Sicily, and Spain. Ancient Greek is the language of the first philosophers, the first scientists, the first dramatists, as well as the New Testament. At the end of a single year of Greek, students can read these texts, and this course, combined with 1002, will prepare them to do so. In addition to studying grammar and word forms, students learn Greek by reading it in a text that starts simply and gradually increases in difficulty until they are reading authentic Plato and Greek historians late in the second semester. Most of the early adapted readings are important texts from Greek mythology, literature, philosophy, and history. Students thus learn both the Greek language and about the ancient Greek world.

Repeatability: This course may not be repeated for additional credits.

GRKA 1002. Ancient Greek 2. 4 Credit Hours.

Building on Greek 1001, Greek 1002 continues to develop knowledge of the Greek language with readings of gradually increasing difficulty, mainly based on Herodotus, until students are reading authentic Plato and Greek historians late in the semester. By the end of the course, students are prepared to read a wide range of ancient Greek authors and the New Testament.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GRKA 1001.

GRKA 1003. Intensive Ancient Greek. 7 Credit Hours.

This course provides the equivalent of a full year of the study of Ancient Greek in one semester. Students learn the fundamentals of Greek grammar and syntax and read progressively more difficult passages adapted from ancient authors. Upon completion of this course students will be able to enter second-year Greek.

Repeatability: This course may not be repeated for additional credits.

GRKA 2001. Ancient Greek 3. 3 Credit Hours.

This course consolidates the understanding of the language of the ancient Greeks through the close reading of unadapted texts. Readings in ancient Greek prose, usually Greek oratory (such as a political speech from the Athenian Assembly or a legal speech from a trial), a short dialogue by Plato, or a satirical piece by Lucian (a Syrian who lived during the Roman Empire).

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GRKA 1002 or GRKA 1003)

GRKA 2002. Ancient Greek 4. 3 Credit Hours.

Readings in ancient Greek poetry: Homeric epic or a Greek tragedy by Euripides (Medea, Alcestis or Bacchae). The course will examine in detail not just the poetic language of each text but also their broader genres and the contexts of their performance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GRKA 2001.

GRKA 3002. Readings in Greek Literature II. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GRKA 2002.

GRKA 3096. Readings in Greek Literature I. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GRKA 2002.

GRKA 4082. Independent Study. 1 to 6 Credit Hour.

Concentrated work at an advanced level on a topic chosen by student and teacher. Weekly tutorial sessions.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GRKA 2002.

GRKA 4182. Independent Study. 3 Credit Hours.

Concentrated work at an advanced level on a topic chosen by student and teacher. Weekly tutorial sessions.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in GRKA 2002.

Greek (Modern) (GRKM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GRKM 1001. Modern Greek Elements I. 4 Credit Hours.

First semester of modern spoken Greek.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

GRKM 1002. Modern Greek Elements II. 4 Credit Hours.

Second semester of modern spoken Greek.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GRKM 1001, 'C1002' in LCGR, 'B1002' in LCGR, 'C2001' in LCGR, 'B2001' in LCGR, or 'EXMPT' in LCGR)

GRKM 2001. Modern Greek Intermediate I. 3 Credit Hours.

Third semester of Modern Greek.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (GRKM 1002, 'C2001' in LCGR, 'B2001' in LCGR, or 'EXMPT' in LCGR)

GRKM 2002. Modern Greek Intermediate II. 3 Credit Hours.

Fourth semester of Modern Greek.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in GRKM 2001.

Greek and Roman Classics (GRC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

GRC 0803. The Art of Sacred Space. 3 Credit Hours.

From curse tablets to animal sacrifice to places where the divinity was approached, human beings in every period and culture have communicated with the divine. We will explore together how a given culture used art to communicate with the deity, interrogate the meaning of sacred space itself, and look closely at the literary and material evidence for rituals and beliefs. Through the lens of a chosen time period, we will analyze and critique practices and behaviors through topics such as festivals, burial practices, magical ceremonies, and rites of passage, with a view to understanding the place of sacred space in our own lives. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for GRC 0803 if they have successfully completed GRC 0903, REL 0803 or ARTH 0803.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

GRC 0804. Race in the Ancient Mediterranean. 3 Credit Hours.

Learn about ancient thinking about race and ethnicity and how ancient thinking remains current and influential today. Investigate how categories of race and ethnicity are presented in the literature and artistic works of Greece and Rome. Our case studies will pay particular attention to such concepts as: notions of racial formation and racial origins; ancient theories of ethnic superiority; and linguistic, religious and cultural differentiation as a basis for ethnic differentiation. We will also examine ancient racism through the prism of a variety of social processes in antiquity: slavery, trade and colonization, migrations, imperialism, assimilation, native revolts, and genocide. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for GRC 0804 if they have successfully completed GRC 0904.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

GRC 0811. Greek Theater & Society. 3 Credit Hours.

Through close readings of surviving texts, through viewings of modern productions of ancient theatrical works, and through your own recreations of Greek performative media, we will examine and experience ancient Greek drama both as a product of its own historical period and as a living art form. We will ask fundamental questions about the nature and purpose of theater in the ancient world: Is this art just entertainment or does it engage and comment on the problems of Athens? How and why did this society invent theater in the Western world? We will also investigate the relationship of Greek drama to the modern world: Why do new versions of plays about Oedipus, Antigone and Dionysus keep popping up in places as diverse as New York, Utah, South Africa and China? How can ancient drama be staged now in a way that is both responsible to the surviving texts and stimulating to contemporary audiences? NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for GRC 0811 if they have successfully completed GRC 0911.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

GRC 0829. Ancient War Games: Sport and Spectacle in Greece and Rome. 3 Credit Hours.

Every four years the world stages athletic contests that are based on the practices of ancient Greece. Every year the NFL assigns a Roman numeral to the Super Bowl and suggests its players are modern gladiators. Greek athletic games and Roman gladiatorial battles developed from the practice of warfare in their societies. American sports may be viewed as the descendants of these ancient "war games." This class examines the similarities and differences in such sports and the societies that enjoyed (and enjoy) them. The Greek games replaced the blood of the battlefield with dramatic displays of military physicality, while the Roman games replicated this blood with armed combat before crowds of thousands. We begin by examining the origins, events, architecture, and rules of the Greek games, from Homer's funeral contests to the development of the circuit of athletic festivals. Next we look at the "re-foundation" of the modern Olympics and its romanticized mythology in several important films. Then we turn to Roman blood-sports (animal fights, gladiatorial contests and spectacular criminal punishments) and chariot-racing, considering also the filters of modern Hollywood. We end with the rise of modern spectator sports, especially football.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

GRC 0903. Honors Art of Sacred Space. 3 Credit Hours.

From curse tablets to animal sacrifice to places where the divinity was approached, human beings in every period and culture have communicated with the divine. We will explore together how a given culture used art to communicate with the deity, interrogate the meaning of sacred space itself, and look closely at the literary and material evidence for rituals and beliefs. Through the lens of a chosen time period, we will analyze and critique practices and behaviors through topics such as festivals, burial practices, magical ceremonies, and rites of passage, with a view to understanding the place of sacred space in our own lives. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for GRC 0903 if they have successfully completed GRC 0803, REL 0803 or ARTH 0803.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

GRC 0904. Honors Race in the Ancient Mediterranean. 3 Credit Hours.

Learn about ancient thinking about race and ethnicity and how ancient thinking remains current and influential today. Investigate how categories of race and ethnicity are presented in the literature and artistic works of Greece and Rome. Our case studies will pay particular attention to such concepts as: notions of racial formation and racial origins; ancient theories of ethnic superiority; and linguistic, religious and cultural differentiation as a basis for ethnic differentiation. We will also examine ancient racism through the prism of a variety of social processes in antiquity: slavery, trade and colonization, migrations, imperialism, assimilation, native revolts, and genocide. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for GRC 0904 if they have successfully completed GRC 0804.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

GRC 0911. Honors Greek Theater & Society. 3 Credit Hours.

Through close readings of surviving texts, through viewings of modern productions of ancient theatrical works, and through your own recreations of Greek performative media, we will examine and experience ancient Greek drama both as a product of its own historical period and as a living art form. We will ask fundamental questions about the nature and purpose of theater in the ancient world: is this art just entertainment or does it engage and comment on the problems of Athens? How and why did this society invent theater in the Western world? We will also investigate the relationship of Greek drama to the modern world: why do new versions of plays about Oedipus, Antigone and Dionysus keep popping up in places as diverse as New York, Utah, South Africa and China? How can ancient drama be staged now in a way that is both responsible to the surviving texts and stimulating to contemporary audiences? NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for GRC 0911 if they have successfully completed GRC 0811.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

GRC 0929. Honors Ancient War Games: Sport and Spectacle in Greece and Rome. 3 Credit Hours.

Every four years the world stages athletic contests that are based on the practices of ancient Greece. Every year the NFL assigns a Roman numeral to the Super Bowl and suggests its players are modern gladiators. Greek athletic games and Roman gladiatorial battles developed from the practice of warfare in their societies. American sports may be viewed as the descendants of these ancient "war games." This class examines the similarities and differences in such sports and the societies that enjoyed (and enjoy) them. The Greek games replaced the blood of the battlefield with dramatic displays of military physicality, while the Roman games replicated this blood with armed combat before crowds of thousands. We begin by examining the origins, events, architecture, and rules of the Greek games, from Homer's funeral contests to the development of the circuit of athletic festivals. Next we look at the "re-foundation" of the modern Olympics and its romanticized mythology in several important films. Then we turn to Roman blood-sports (animal fights, gladiatorial contests and spectacular criminal punishments) and chariot-racing, considering also the filters of modern Hollywood. We end with the rise of modern spectator sports, especially football.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

GRC 2000. Special Topics. 3 Credit Hours.

Topics will be arranged each semester; please consult with the instructor for more information.

Repeatability: This course may be repeated for additional credit.

GRC 2002. Gender in Classical Antiquity. 3 Credit Hours.

What can we learn about the lives of ancient Greek and Roman women from ancient literature - literature written primarily by men? Can we piece together the everyday lives of Greek or Roman women of any social class? Even if we believe in the equality of the sexes, would a word like "equality" have had any meaning to the ancients? In this class, we will find answers to these questions by reading Greek and Latin sources in translation as well as the works of modern Classicists. While focusing on women's lives, we will gain a greater understanding of what was expected of both genders in the ancient world.

Repeatability: This course may not be repeated for additional credits.

GRC 2004. The City of Rome. 3 Credit Hours.

"The City of Rome" examines the features and development of the physical world of the ancient Romans. Beginning with the earliest evidence for material culture in and around the city of Rome, we examine how both the Roman city and the material objects associated with Roman life (including art, architecture, and technology), developed and changed as Roman influence expanded, Roman culture came into contact with neighboring cultures, and Roman rule came to dominate the Mediterranean basin.

Repeatability: This course may not be repeated for additional credits.

GRC 2011. Classical Greek and Roman Mythology. 3 Credit Hours.

An overview of the major myths of Greek and Roman antiquity including appropriate gods, heroes and heroines, and the stories told about them. The course examines the nature and social function of mythology, studying a number of different ancient and modern theories that attempt to account for this seemingly universal phenomenon. Also considered is the legacy of classical mythology in modern art and literature, including popular culture. This course provides students with the tools to understand other myths, both ancient and modern. Students encounter ancient myths through a variety of primary sources. NOTE: Formerly known as GRC 3001 Classical Greek and Roman Mythology. Students may receive credit for only one of the following courses: GRC 3001 or GRC 2011.

Repeatability: This course may not be repeated for additional credits.

GRC 2101. The Greeks. 3 Credit Hours.

This course explores who the ancient Greeks were, what they did, how they lived and what they believed. It focuses on both what we owe to the Greeks and how radically different they are from us. This is not a history of ancient Greece, but a journey through a series of connected units that explore different facets of ancient Greek civilization, from the Trojan War, to the ancient Olympics, to slavery, the family life and other topics. These topics are pursued in an interdisciplinary manner so that students examine evidence from Greek art, literature, history and philosophy. This course can serve the needs of students who seek a broad background in ancient Greek civilization and those who seek an introduction to this subject before pursuing more advanced work in Classics. NOTE: Prior to fall 2009, the course title was "Ancient Greek Civilization."

Repeatability: This course may not be repeated for additional credits.

GRC 2102. The Romans. 3 Credit Hours.

This course explores in an interdisciplinary manner who the ancient Romans were, what they did, how they lived and what they believed. Students will read some of the great works of Roman historians, poets and novelists, as well as study the physical and artistic culture of Rome, with a view to understanding the Romans' beliefs about themselves and their world. Each week, one class will be devoted to learning about larger issues of Roman daily life (education, spectacles), history (civil wars, the Augustan world) and people (men, women, slaves, Christians), and one class to learning about the authors who wrote on these subjects or during these historical periods. This course can serve the needs of students who seek a broad background in ancient Roman civilization and those who seek an introduction to this subject before pursuing more advanced work in Classics. NOTE: Prior to fall 2009, the course title was "Ancient Roman Civilization."

Repeatability: This course may not be repeated for additional credits.

GRC 2900. Honors Special Topics in Classical Culture. 3 Credit Hours.

Topics from classical antiquity which are of general and current interest based on reading Greek and Roman texts in translation. Lectures, audiovisual presentations, and large and small group work used to explore the significance of the texts.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

GRC 2902. Honors Gender in Classical Antiquity. 3 Credit Hours.

What can we learn about the lives of ancient Greek and Roman women from ancient literature - literature written primarily by men? Can we piece together the everyday lives of Greek or Roman women of any social class? Even if we believe in the equality of the sexes, would a word like "equality" have had any meaning to the ancients? In this class, we will find answers to these questions by reading Greek and Latin sources in translation as well as the works of modern Classicists. While focusing on women's lives, we will gain a greater understanding of what was expected of both genders in the ancient world.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

GRC 2911. Honors Classical Greek and Roman Mythology. 3 Credit Hours.

An overview of the major myths of Greek and Roman antiquity including appropriate gods, heroes and heroines, and the stories told about them. The course examines the nature and social function of mythology, studying a number of different ancient and modern theories that attempt to account for this seemingly universal phenomenon. Also considered is the legacy of classical mythology in modern art and literature, including popular culture. This course provides students with the tools to understand other myths, both ancient and modern. Students encounter ancient myths through a variety of primary sources. NOTE: Formerly known as GRC 3901 Honors Classical Greek and Roman Mythology. Students may receive credit for only one of the following courses: GRC 3901 or GRC 2911.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

GRC 3000. Topics in Classical Culture. 3 Credit Hours.

Topics from classical antiquity which are of general and current interest based on reading Greek and Roman texts in translation. Lectures, audiovisual presentations, and large and small group work used to explore the significance of the texts.

Repeatability: This course may be repeated for additional credit.

GRC 3002. Ancient City: Augustan Rome. 3 Credit Hours.

As first princeps (emperor of Rome) Augustus claimed to re-establish republican Rome after years of external and internal wars. We will study the city that emerged from the efforts of architects, engineers and artists of all kinds enlisted to assist Augustus in the new founding of Rome.

Repeatability: This course may not be repeated for additional credits.

GRC 3003. Ancient City: Byzantium. 3 Credit Hours.

The Greek colony Byzantium found new life as capital of the Christianized Roman Empire from the 4th century to the 15th century CE. This course explores the art, architecture, literature, military, political and social history of Constantinople from its re-founding by Constantine I through the early centuries of its eminence.

Repeatability: This course may not be repeated for additional credits.

GRC 3011. The History of Ancient Greek Theater. 3 Credit Hours.

This course traces the development of the ancient Greek theater, from its invention when Thespis stepped out of the chorus to sing solos, through the important tragedies of Aeschylus, Sophocles and Euripides that addressed the great questions of individual, the gods and society, through the early comedies of Aristophanes, to the final evolution of the ancient theater into something we would call melodrama and sit-com. We will study the development of the physical theaters in Athens and the wider Mediterranean, ancient staging techniques, the development of the early acting profession, the portrayal of women in Athenian theater, and the complex relationship between Athenian theater and democracy, as well as with religion. As the scholarly ground of the ancient Greek theater has shifted radically over the past forty years and continues to move, students will participate in the fundamental questions in this exciting field. Duplicate Credit Warning: This course is cross-listed with English 3011. Students who have earned credits for ENG 3011 will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

GRC 3102. Comparative Mythology. 3 Credit Hours.

Materials from a variety of cultures will show how human beings deal with such ideas as the creation of the universe and mankind, the definition of the hero, order in the cosmos, and eschatology. Greek and Roman myths will serve throughout as the basis for comparison with a varying selection of myths from other cultures. This course was formerly known as GRC 3296 and GRC 3996. Students who have taken GRC 3296 or GRC 3996 may not receive additional credit for this course.

Repeatability: This course may not be repeated for additional credits.

GRC 3311. Ancient Greek Historians. 3 Credit Hours.

This course will survey Greek history from 800 BCE until the death of Alexander the Great (323 BCE) and the works of two of the most important Greek historians: Herodotus and Thucydides. A major component of the course will be an examination of the historiographical methods of these writers, but attention also will be paid to the other types of sources that are available.

Repeatability: This course may not be repeated for additional credits.

GRC 3312. Ancient Roman Historians. 3 Credit Hours.

This course will survey Roman history from the founding of Rome in the 8th century BCE through the fall of Rome in the 5th century CE. A major component of the course will be an examination of the texts and historiographical methods of important Roman historians such as Livy, Sallust and Tacitus, but attention also will be paid to other types of sources.

Repeatability: This course may not be repeated for additional credits.

GRC 3496. Writing Seminar. 3 Credit Hours.

Topics from classical antiquity which are of general and current interest based on reading Greek and Roman texts in translation. Lectures, audiovisual presentations, and large and small group work used to explore the significance of the texts.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

GRC 3596. Ancient City: Periclean Athens. 3 Credit Hours.

This course will survey Athens in the 5th and 4th centuries BCE, examining the accomplishments and failures of one of the few truly participatory democracies the world has known. In addition to studying the history of the city as it gained and lost an empire, we will explore its arts (including theater, philosophy, and architecture) and the everyday life of its denizens.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in any GRC course numbered 0800 to 3400.

GRC 3696. Ancient City: Hellenistic Alexandria. 3 Credit Hours.

At the death of Alexander his general Ptolemy moved the capital of Egypt from Memphis to Alexandria, which soon became renowned for buildings such as the Library and the Lighthouse, and as a center for commerce and arts. We will survey the art, literature, philosophy, social and economic foundations, and urban problems of this largest of Greek cities.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in any GRC course numbered 0800 to 3400.

GRC 3796. Ancient City: Augustan Rome. 3 Credit Hours.

Upon achieving mastery of the Roman world through key military victories, Octavian ostensibly returned control of the restored Republic to the Senate and People of Rome in exchange for the quasi-religious, honorific title Augustus (worthy of honor). But he retained command of Rome's armies and transformed himself into the first true emperor of a vast territory that encompassed the entire Mediterranean basin. To legitimate and raise popular support for his rule, he instituted a massive building and beautification program in Rome, promoted the literary arts, and instituted legal and religious reforms, all of which ushered in Rome's Golden Age. In this course we will study--and interact with--the influential history, physical structures, ideals, social institutions and arts of Augustan Rome.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in any GRC course numbered 0800 to 3400.

GRC 3897. Ancient City: Jerusalem. 3 Credit Hours.

This course will investigate the history, society, culture, topography and art of this immensely important city during one of its most historically significant periods, focusing mainly on the period after Jerusalem fell into the ambit of the Roman Empire (63 BCE) to its destruction by the armies of Titus (70 CE). It will also consider the development of the relationship between Jerusalem and Rome, and the important role played by ethnic, cultural, and religious differences in the ultimate failure of Romano-Judaean relations, with a view to understanding how overcoming such differences today is necessary to create a successful and functioning global community. Source material will include the historical writings, contemporary non-literary sources such as coins and inscriptions, and articles or videos by modern historians and archaeologists on relevant topics.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in any GRC course numbered 0800 to 3400.

GRC 3900. Honors Topics in Classical Culture. 3 Credit Hours.

Topics from classical antiquity which are of general and current interest based on reading Greek and Roman texts in translation. Lectures, audiovisual presentations, and large and small group work used to explore the significance of the texts.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

GRC 4082. Independent Study. 1 to 6 Credit Hour.

Intensive study under individual guidance in a specific area suggested by the student and approved by the department advisor.

Repeatability: This course may be repeated for additional credit.

GRC 4182. Independent Study. 3 Credit Hours.

Intensive study under individual guidance in a specific area suggested by the student and approved by the department advisor.

Repeatability: This course may be repeated for additional credit.

Health Information Management (HIM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HIM 1005. International Classification of Disease, 10 Revision, CM & PCS Coding Systems for Experienced Coders. 3 Credit Hours.

The course is designed to provide individuals with ICD-9-CM coding experience with the requisite knowledge and skills to be proficient with the ICD-10-CM and ICD-10-PCS code sets. An overview of diagnosis and procedural coding conventions and guidelines will be provided. Emphasis will be placed on application of coding guidelines and conventions to intermediate and advanced coding cases.

Repeatability: This course may not be repeated for additional credits.

HIM 1006. Electronic Documentation for Health Care Providers. 3 Credit Hours.

This course will explore introductory concepts related to electronic health record information and the use and importance of health care documentation as it related to research, reimbursement and continuum of care. Content related to electronic health record interoperability, privacy and security will be examined. Examples of various health care settings/providers and their specific use of electronic health records will be explored.

Repeatability: This course may not be repeated for additional credits.

HIM 1055. IT Applications for Health. 3 Credit Hours.

This course gives students an overview of several key areas of information technology they will face in their healthcare career. Students will learn about current trends and applications used in health information management settings and public health sectors. Topics to be explored in this course include, but are not limited to: HIPPA, privacy and security, mobile apps, healthcare website design, video creation, social media management, MS Office applications and presentation software. Other current trends is health technology will be covered as appropriate.

Repeatability: This course may not be repeated for additional credits.

HIM 1101. Medical Terminology. 3 Credit Hours.

An introduction to the language of medicine, including medical and anatomical terminology, definitions, the process of word construction, and analysis of terms. The focus is on the use of prefixes, suffixes, and combining forms that facilitate the ability to translate medical terms. Symptoms, diseases, operative procedures, laboratory tests, diagnostic and treatment terms, and abbreviations are studied.

Repeatability: This course may not be repeated for additional credits.

HIM 2031. Global Development of Health Information Systems. 3 Credit Hours.

Health information systems (HIS) use healthcare technology to acquire, store, deliver and analyze medical data, which is also critical to medical facilities and personnel management, medical error reduction, professional training, and quality improvement. This course will introduce the different HIS/HIT developed worldwide and the various governments' roles in supporting the HIS development. Students will also learn how HIS/HIT is used in clinical care, patient monitoring, pandemic monitoring, and emerging global health areas.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIM 2203. U.S. Health Care System. 3 Credit Hours.

The health care delivery system is studied, with a focus on issues related to access, cost and quality. System components are examined including: important values and beliefs; the historical development of the health care system and the current status; health services financing; the role of health care professionals; the use of technology; outpatient, primary care, inpatient, managed care, long-term care and integrated services; issues for special populations; the process and purpose of health policy; and, future options for the delivery system. The role of the health information management professional is examined within the context of the health care system, including the importance of the professional Code of Ethics.

Repeatability: This course may not be repeated for additional credits.

HIM 2215. Health Information Management IT Fundamentals. 3 Credit Hours.

The course will provide a foundation in information technology (IT) concepts related to the HIM Practitioner. Content related to IT architecture, computer hardware, software, and networking systems, security, IT valuation, types of computer systems, centralized versus decentralized design, data capture technologies, and emerging technologies will be explored in the context of the health care industry. Specific attention will be addressed to the application of information technologies on the ability of health care organizations to respond to changes in the environment including regulatory, legislative, and accrediting agency initiatives.

Repeatability: This course may not be repeated for additional credits.

HIM 3020. Special Topics in Health Information Management. 1 to 3 Credit Hour.

This course provides students the opportunity to explore new and emerging areas in the field of health information management and to gain a deeper understanding of a specific area within the field. This course may also be used to present areas of study not normally taught in the program

Repeatability: This course may be repeated for additional credit.

HIM 3031. Health Technology Assessment. 3 Credit Hours.

Technological innovation has improved health care delivery and patient outcomes. Examples of breakthroughs include vaccines, targeted cancer therapies, joint replacement, pain management, infection control, and health information technology. Manufacturers, regulators, clinicians, patients, hospital managers, payers, policy makers, and others increasingly demand evidence to support decisions about technology's development, regulation, purchasing, utilization, and reimbursement to ensure its appropriate use, and more. This course introduces fundamental aspects and issues of the dynamic field of health technology assessment (HTA), from an international perspective. The course will cover HTA's growth and development in the public and private sectors, HTA methodologies and processes, and reporting to diverse users. Students will learn about how HTA impacts the development, adoption, and diffusion of health technology in the health care sector.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in HIM 2031.

HIM 3082. Independent Study in Health Information Management. 1 to 3 Credit Hour.

Exploration of an aspect of health information management, in accordance with a student's learning objectives. NOTE: Permission of the faculty member is required.

Repeatability: This course may be repeated for additional credit.

HIM 3101. Health Record Documentation. 3 Credit Hours.

The purposes and uses of health record documentation will be explored including the primary and secondary uses of healthcare data. The development, content, format, and standards of health record will be studied for various healthcare settings. Documentation requirements including accreditation, regulatory, and licensure standards and required data sets will be examined. An introduction to Health Information Management functions (including storage and retrieval, classification systems, access and release of health information, transcription, electronic document management systems) will be provided.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 1101 or 'Y' in CRHI01), HIM 1055, (HPM 2214 or 'Y' in CRHP01), ((KINS 1223 and KINS 1224), (KINS 1221 and KINS 1222), (KINS 1223 and 'Y' in CRKI03), (KINS 1224 and 'Y' in CRKI02), ('Y' in CRKI02 and 'Y' in CRKI03), or (KINS 1221 and 'Y' in CRKI17)), and (EPBI 2219, MATH 1013, PSY 1167, SOC 1167, STAT 2101, 'Y' in CREP01, 'Y' in CRMA02, or 'Y' in CRSO02)

HIM 3106. Pathophysiology. 3 Credit Hours.

An introduction to basic concepts of disease processes. Clinical course, related diagnostic and therapeutic procedures and expected outcomes for commonly occurring medical conditions are addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 1101, 'Y' in HIM1, or 'Y' in CRHI01), (KINS 1223, 'Y' in KIN1, or 'Y' in CRKI02), and (KINS 1224, 'Y' in KIN2, or 'Y' in CRKI03)

HIM 3107. Healthcare Leadership and Strategic Management. 3 Credit Hours.

The course is designed to explore the characteristics and functions of management in the healthcare environment with specific attention to leadership and strategic management. This course includes the study of traditional management functions including planning, organizing, leading, and controlling, with an emphasis on the administrative role of the health information management professional. Students will also explore how HIM practitioners support the organization's initiatives, mission, vision and objectives through the development of policies, procedures, and allocation of resources. Change management theories and best practices will be evaluated.

Repeatability: This course may not be repeated for additional credits.

HIM 3111. Statistics and Research in Health Care. 3 Credit Hours.

Course addresses medical research methodologies; computation of routine health care institutional statistics; the United States vital statistics system; and, presentation and interpretation of health care data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (STAT 2101, MATH 1013, PSY 1167, SOC 1167, 'Y' in STT5, 'Y' in CRMA02, or 'Y' in CRSO02)

HIM 3113. Healthcare Database Design and Development. 3 Credit Hours.

Efficient and effective database design is critical to a healthcare organization's ability to collect, report, analyze and use data. In this course, students will effectively design and build relational databases in 3NF using multiple relational database management systems with specific attention to design which facilitates performance of daily operations. In addition, students will become adept at a wide range of data definition functions including updating, deleting, saving, and reverting to older versions of databases. Significant attention is devoted to the data manipulation language. Query development will include simple and complex queries such as conditions, aggregation, string functions, nested queries, mathematical functions, and joins using traditional forms and ANSI standard forms. An introduction in data analysis and migration will also be explored with pivot tables and data exports and imports. This course requires extensive hands on laboratory assignments.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 1055, CIS 1055, 'Y' in CS04, or 'PASS' in BCP)

HIM 3203. Electronic Health Record Systems. 3 Credit Hours.

The role of the electronic health record systems (EHRS) as they support improvements in the quality of patient care and reduction of healthcare costs will be addressed. This class offers an overview of the features and functions in electronic health record systems and their application across the healthcare continuum with emphasis on the acute care and ambulatory care settings. The course will explore the history of the development of interoperable EHRS, the drivers and impediments for adoption, and the development of nationwide health information exchange. The course will cover the various types of health information systems that serve as feeders to clinical repositories.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 2215 (may be taken concurrently) or 'Y' in HIM3)

HIM 3208. International Classification of Diseases. 3 Credit Hours.

An intensive coding course based on the International Classification of Diseases diagnosis and procedural classification systems, as modified for use in the United States. The emphasis of instruction will be on application of coding principles for the acute care inpatient setting. The Medicare inpatient prospective payment system and the determination of diagnostic related groups (DRGs) for hospital reimbursement will also be addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3106 or 'Y' in CRHI08)

HIM 3216. Clinical Procedures and Pharmacology. 3 Credit Hours.

The course is designed to develop an understanding of pharmacology and the technical aspects of commonly performed surgical and medical procedures and diagnostic tests. Detailed descriptions of procedures, approaches, equipment and implanted devices used will be analyzed. The procedural objective in terms of diagnosis versus treatment will also be discussed. An introduction to the principles of pharmacology, including drug terminology, drug origins, forms, and actions; routes of administration; and the use of generic name drugs, trade name drugs and categories of drugs to treat various body systems will also be addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3106 or 'Y' in CRHI08)

HIM 3271. Professional Development. 1 Credit Hour.

This course is designed to help prepare students for career planning. The emphasis is on interview preparation (including behavioral event interviewing), expected behaviors and legal issues. Career options and resume preparation in the context of life long career development will be explored.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

HIM 3297. Health Information Management Human Resource Management. 3 Credit Hours.

Personnel policies and practices are evaluated for the healthcare environment, including: recruitment, selection and retention; personnel training and development; job design and analysis; performance management; employee and labor relations; compensation and benefits programs; and health and safety issues. NOTE: Writing Intensive course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3107 or 'Y' in CRHI09)

HIM 4101. Health Informatics: Infrastructure and Standards. 3 Credit Hours.

This course will explore the purpose, use, benefits and challenges of various standards to achieve semantic interoperability for health information exchange. Healthcare standardization related to privacy, security, clinical vocabularies, data communication, architectural framework, and data content will be evaluated in the context of meaningful use of electronic health record systems (EHRS). National and international standards development efforts are also discussed. Gaps between adopted standards and existing practice will be evaluated. Key content and data standards will be explored.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3203 or 'Y' in CRHI03)

HIM 4102. Legal Aspects of Health Information Management. 3 Credit Hours.

This course provides a foundation of the legal, ethical and regulatory requirements that affect the use, access and disclosure of health information. The U.S. legal system, sources of laws and regulations, elements of case law, civil procedures and trial processes will be addressed. Emphasis will be on issues related to privacy and confidentiality; negligence, malpractice and liability; informed consent and contracts.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3101 or 'Y' in CRHI07) and (HPM 2214 or 'Y' in CRHP01)

HIM 4104. Health Information Management Operations Management. 3 Credit Hours.

This course will explore methods and management tools used in the analysis of health information systems. Students will develop objectives, policies and procedures and will perform benchmarking, productivity measurement, and workflow and layout analyses. Traditional business process analysis and redesign tools such as data flow diagramming, flow charting, and swimlanes, will be evaluated including the benefits and challenges of each technique. A survey of functional requirement specification gathering approaches will be reviewed and evaluated. Contract management, resource allocation, and workflow process redesign within the context of health information systems will also be addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3297 or 'Y' in CRHI06) and (HIM 3203 or 'Y' in CRHI03)

HIM 4105. Current Procedural Terminology Coding. 3 Credit Hours.

A coding course, based on the Current Procedural Terminology (CPT) coding system that is used for classifying physician and hospital outpatient services. The course examines the role of CPT codes in claim submission, benefit adjudication and provider reimbursement. The Healthcare Common Procedure Coding System (HCPCS) II is also addressed and coding skills for the application of coding principles are developed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3106 or 'Y' in CRHI08) and (HIM 3216 or 'Y' in CRHI05)

HIM 4113. Healthcare Reimbursement Systems. 3 Credit Hours.

Reimbursement methodologies are studied, as they relate to a variety of health care settings, payers and patient populations. Case mix analysis, charge master description, revenue cycle management, claims processing and fraud and abuse are discussed. Provides an overview of accounting and financial terms used by health care managers.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Co-requisites: HIM 4105.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3208 or 'Y' in CRHI04) and (HPM 2214 or 'Y' in CRHP01)

HIM 4121. Healthcare Data Analytics. 3 Credit Hours.

Healthcare organizations have an ever increasing need to access, interpret, and analyze information from a multitude of data sources to respond quickly to changes in clinical practices, legislative, regulatory, and accrediting body initiatives, and the competitive marketplace. This course will explore data mining and analytic tools which facilitate the analysis of complex healthcare data. Students will review computer tools for manipulation, analysis and presentation of data using real-world examples across a wide range of healthcare settings.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3113 or 'Y' in CRHI02)

HIM 4202. Health Information Management Project Management. 3 Credit Hours.

Managing EHRS projects centers on managing uncertainty at all stages. In this course, students will be introduced to the concepts of managing EHR projects by focusing on initiating, planning, executing, controlling, and closing projects in the context of topics such as integration, scope, timing, cost, quality, human resource, technology, communication, contracts, risk and procurement. The System Development Life Cycle of the EHRS development will be explored in depth. Topics surrounding cost-benefit analysis, return on investment, requests for proposal, and vendor selection will be emphasized.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Co-requisites: HIM 4104.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in HIM 4101.

HIM 4206. Intermediate Coding. 3 Credit Hours.

This course focuses on advanced topics in diagnosis and procedural coding using the ICD-10-CM, ICD-10-PCS, CPT and HCPCS coding systems. Emphasis will be placed on applying official coding guidelines, and health record documentation analysis and reimbursement optimization. Students will be able to code inpatient, ambulatory surgery and physician encounter cases. Computerized coding and grouping software will be used. The emerging role of computer assisted coding will also be addressed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3208 or 'Y' in CRHI04), (HIM 4105 or 'Y' in CRHI11), and (HIM 4113 or 'Y' in CRHI12)

HIM 4207. Healthcare Quality Improvement. 3 Credit Hours.

This course provides a foundation in quality and patient safety management processes in healthcare. The role of performance measurement and reporting, professional staff credentialing, registries, risk and utilization management, data analysis, and presentation in healthcare quality management will be discussed.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HIM 3208 or 'Y' in CRHI04) and HIM 3111.

HIM 4286. Management Internship. 4 Credit Hours.

Intensive professional practice experience on a full-time basis for 4 weeks at selected affiliated institutions; emphasis on administrative aspects of health information management services.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in HIM 4101, (HIM 4102 or 'Y' in CRHI10), (HIM 4105 or 'Y' in CRHI11), (HIM 4113 or 'Y' in CRHI12), (HIM 4207 or 'Y' in CRHI13), and HIM 4121.

HIM 4298. Health Information Management Senior Seminar. 3 Credit Hours.

Writing intensive capstone course that requires a formal paper regarding an important and current health information management issue. Problems and cases are also used for the development of critical thinking, problem-solving, and decision-making skills. The assignments facilitate the application of health information management expertise and the skills needed for a professional career path. NOTE: Writing intensive course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Information Management.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in HIM 4101, (HIM 4102 or 'Y' in CRHI10), (HIM 4105 or 'Y' in CRHI11), (HIM 4113 or 'Y' in CRHI12), HIM 4121, and (HIM 4207 or 'Y' in CRHI13)

Health Policy and Management (HPM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HPM 2202. Man-Made Disasters: Radiological, Chemical & Biological Terrorism. 3 Credit Hours.

This course is designed to introduce students to the concepts and models of public health preparedness, mitigation, and evaluation in the context of man-made disasters, including radiological, chemical, and biological incidents. The course addresses identified core competencies of emergency preparedness for public health professionals that include: disaster management, risk assessment, risk communication, governmental resources, functional roles, surveillance, and preparedness evaluation. Man-made disasters will be looked at in a historical, environmental, and psychological context in order to elucidate the role of public health in man-made disaster preparedness and evaluation. In addition the role of cultural competency and the needs of special populations will be addressed. Public perception of risk and media views of man-made disasters will be explored. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: This course is only offered online.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HPM 2208. Natural Disasters: Response and Recovery. 3 Credit Hours.

This course is designed to introduce students to the concepts and models of public health response and recovery in the context of natural disasters. It will assist health care and allied health professionals, public health professionals, and emergency responders to work together to respond effectively and to facilitate recovery in a natural disaster. The course will enable students to meet identified core competencies of emergency health preparedness for public health professionals that include functional roles, resource identification, problem solving, and appropriate response. Students will utilize problem-based learning by analyzing actual disaster events and applying the theories, principles, and practices of response and recovery. In addition, students will learn about the issues faced by special populations and how to address these special needs in natural disaster response and recovery. Public Health majors and minors must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HPM 2214. Politics and Payments in US Healthcare System. 3 Credit Hours.

The course provides an overview of the finances and infrastructure on which the U.S. health care system is based as well as a basic overview of the health policy process. Students will learn about private and public health insurance, including Medicare, Medicaid, and SCHIP, as well as discuss the growing problem of uninsured populations. In addition, students will explore the policy process behind our current health system, focusing on the role of the legislative, executive, and judicial systems, as well as special interest groups and the role of public opinion in health policy. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

HPM 2216. Introduction to Health Policy. 3 Credit Hours.

This course introduces students to policy and its influence on public health. Students will gain an understanding of the policymaking process, focusing on prescriptive policy analysis, and will develop fluency in current debates in health policy, both in the context of health care policy and health-relevant social policy. They will also focus on analytical and communication skills for the practice of public health policy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in HPM 2214.

HPM 3131. Global Health Systems. 3 Credit Hours.

Health systems around the world can look very different. Some provide high-quality, advanced services to everyone within a country - and result in very good population health outcomes. Others struggle to provide even minimal health services or fulfill basic public health functions - and result in relatively poor population health outcomes. This course examines healthcare and public health systems around the world and their impact on population health. The course will also explore the role of the World Health Organization, the World Bank, and financing mechanisms like the Global Fund to Fight AIDS, Tuberculosis, and Malaria and the President's Emergency Plan for AIDS Relief (PEPFAR). Students will learn to produce assessments of health systems and assess health system performance.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HPM 3207. Principles of Emergency Management: A Public Health Perspective. 3 Credit Hours.

This course is designed to introduce students to the concepts and models of public health preparedness and response for all hazards emergency management. It will enable health care and allied health professionals, public health professionals, and emergency responders to work together to plan and respond effectively to both natural and man-made disasters. The course will introduce students to the identified core competencies of emergency health preparedness for public health professionals which include: functional roles, communication, resource identification, problem solving, and evaluation. The issues of mental health and special populations will be introduced in an emergency management context. Students will utilize problem-based learning by analyzing actual disaster events and applying the theories, principles, and practice of preparedness, response, mitigation, and recovery. In addition, students will learn about the importance of personal emergency preparedness, which will include the development of their own emergency plan. Public Health majors or minors or students pursuing the Certificate in Emergency Management with Special Populations must complete this course with a C or better.

Repeatability: This course may not be repeated for additional credits.

HPM 3208. History of U.S. Public Health. 3 Credit Hours.

To advance public health in the United States, it is important to understand the history of public health and how public health evolves. This course surveys the history of public health in the U.S. over the past 300 years and issues relevant to the 21st century. Each class session will focus on a history of public health theme, including shifting patterns of disease and illness; the emergence of public health as a profession; and the development of the U.S. public health systems. The class will focus on the dual nature of public health, encompassing both the biological basis of medicine and the economic, political, and cultural characteristics of societies in which public health operates. We will highlight how the beliefs and priorities in U.S. society have influenced both response to public health challenges and the activities by public health professionals to address these challenges. This includes scientific standards; religious or moral beliefs; and the political, cultural, economic, and sociodemographic gender context of society. Understanding historical interrelationships among context, issues, and decisions can help public health professionals better recognize and address today's challenges.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

College Restrictions: Must be enrolled in one of the following Colleges: College of Public Health.

Repeatability: This course may not be repeated for additional credits.

HPM 3215. Special Populations: Strategic Community Outreach. 3 Credit Hours.

This course is designed to introduce students to the concepts and models of strategic community outreach as it pertains to the special population communities, within the context of emergency management planning, response, and recovery. It assists health care and allied health professionals, public health professionals, and emergency responders to understand how accessible information and technology is part of the community outreach strategy. The course enables students to meet identified core competencies of emergency preparedness for public health and emergency professionals, which include functional roles, resource identification, problem-solving, and appropriate response. Students utilize problem-based learning by analyzing actual and scenario based disaster events and applying the theories, principles, and practices of strategic community outreach pertaining to emergency response and recovery. In addition, students learn about the issues faced by special population communities and how to address these special needs in all hazard response and recovery. Public Health majors or minors or students pursuing the undergraduate Certificate in Emergency Management with Special Populations must complete this course with a C or better.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HPM 2207 or HPM 3207)

HPM 3216. Public Health Advocacy and Policy Change. 3 Credit Hours.

This course provides students with the knowledge of different approaches to doing public health advocacy and realizing policy change to improve the health of communities. Students will learn to identify public health issues and how to advocate for policy change at local, state, national and global levels.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in HPM 2214.

HPM 3231. Global Health Policy. 3 Credit Hours.

Health policy has profound implications for public health and health inequity. It determines who lives long, who dies early, and how we engage with social issues like access to healthcare, economic inequality, environmental pollution, and emerging infectious disease. This course introduces students to comparative policy and explores different policy responses to pressing global public health issues in the context of high-, middle-, and low-income countries. Students will identify one global health issue and conduct a health policy analysis that examines the effectiveness of policy responses around the world.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HPM 3382. Independent Study in Public Health. 1 to 6 Credit Hour.

Students in this course pursue supervised independent projects on issues related to public health. Public Health majors, minors or students studying in the Public Health concentration must complete this course with a C or better. NOTE: Registration must be preapproved by faculty before registration.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

Health Related Professions (HRPR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HRPR 1001. Public Health: The Way We Live, Work and Play. 3 Credit Hours.

Public Health: The Way We Live, Work and Play is designed to help students think about contemporary health issues from an interdisciplinary perspective. The course includes an introduction to the five core areas of public health - biostatistics, epidemiology, environmental health, health services administration, and social and behavioral sciences - and how these areas relate to various health, health care, and human service professions. Public health helps inform decisions that shape the behavior of individuals and communities. Students will analyze health issues such as health promotion, disease prevention, and health care policy from a variety of perspectives. As part of the course, students will work in small interdisciplinary teams to access and evaluate information about a particular individual or population-level health issue, and learn to argue persuasively, both orally and in writing, for interdisciplinary approaches to that health issue. The focus of the course is to engage students' curiosity about how the discipline of public health and interdisciplinary approaches apply to issues students may confront in their future professional work.

Course Attributes: SI, SS

Repeatability: This course may not be repeated for additional credits.

HRPR 1005. Introduction to Mindfulness. 3 Credit Hours.

This 3-credit course is designed for undergraduate students in the College of Public Health. The course will review the history of mindfulness and then move to modern approaches and applications of mindfulness. A personalized mindfulness practice will be explored for relevance to a student's life. The course will focus on the neuro-biological influence of stress, the gut-brain axis, and the epigenetic nature of the human experience. It will explore issues such as conflict, approach versus withdrawing behaviors, and resilience. Students will deepen their understanding of concepts such as compassion fatigue, burnout, cognitive empathy, and vulnerability. The course serves as a springboard for future learning and deeper exploration into specific areas of mindfulness application, at a personal or population level.

Repeatability: This course may not be repeated for additional credits.

HRPR 1101. Contemporary Aspects of Disability. 3 Credit Hours.

An examination of psychological and social issues related to individual and social-cultural perspectives of disability, including social stigma and discrimination, portrayal by media, self-advocacy, family and other social relationship issues that impact the culture of disability and an individual's quality of life. NOTE: This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN, SI

Repeatability: This course may not be repeated for additional credits.

HRPR 1222. Introduction to Clinical Health Professions. 1.5 Credit Hour.

The purpose of this course is to introduce students to the range of clinical health professions outside of being a medical doctor or nurse. The health system is composed of a range of clinical professions that can work in harmony to provide for the prevention and treatment of illness and chronic conditions. In this course, students will get a hands-on and up-close look at five clinical professions, including athletic training, occupational therapy, physical therapy, recreational therapy, and speech therapy. By the end of the course, students will be able to describe the core functions of each profession and reflect on opportunities that may be a best fit for them.

Repeatability: This course may not be repeated for additional credits.

HRPR 1444. Movement Injuries: Prevention and Care. 3 Credit Hours.

This lecture course introduces students to the care and prevention of movement injuries. The content includes a review of pertinent anatomical structures and their relationship to injuries. The course also covers mechanisms, extrinsic and intrinsic factors, as well as basic preventative and treatment measures for common sports-related injuries. Lastly, an overview of legal issues related to sports health care is also discussed.

Repeatability: This course may not be repeated for additional credits.

HRPR 2106. An Introduction to Holistic Practices and Integrative Medicine. 3 Credit Hours.

The purpose of this course is to explore the use of Complementary and Alternative Medicine (CAM) and health practices, and integrative medicine within a holistic framework of care. The holistic/integrative approach incorporates traditional (Western Medicine) and CAM practices into the mental, emotional, physical, social, and spiritual dimensions of a person's functioning. The integrative approach uses standard treatments in combination with such adjuncts as nutrition, herbal therapy, and healing touch, among modalities.

Repeatability: This course may not be repeated for additional credits.

HRPR 2421. First Aid and CPR for Health and Exercise. 3 Credit Hours.

This skills-based course will introduce first aid and cardiopulmonary resuscitation for health and exercise students. Topics include management of acute injuries and illnesses and emergency response. Students will have the opportunity to earn first aid and CPR certification. Prior to Fall 2023, the course title was "Emergency Medical Care for Health Professionals."

Repeatability: This course may not be repeated for additional credits.

HRPR 2442. Basic Assessment of Musculoskeletal Injuries. 3 Credit Hours.

This three-hour course will focus on the assessment and basic treatment of musculoskeletal injuries of the upper and lower extremity. The use of hands-on clinical evaluation techniques will be emphasized. For those in pre-health studies, this introduction to such techniques does not imply clinical expertise and should not be used as such. For EMTs taking this course, all such knowledge should be used in accordance with your state practice act. Fall only.

College Restrictions: Must be enrolled in one of the following Colleges: College of Public Health.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223 or 'Y' in CRK102) and (KINS 1224 or 'Y' in CRK103)

HRPR 2800. Special Topics in Health Professions. 3 Credit Hours.

The Health Professions Special Topics course is designed to emphasize current trends and contemporary topics of interest within the various health professions. Topics will vary by semester.

Repeatability: This course may be repeated for additional credit.

HRPR 2900. Honors Special Topics. 3 Credit Hours.

This is an Honors course. Topics vary from semester to semester. Please consult with the instructor and/or check the class schedule for specific topic(s) being offered.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HRPR 3001. Emergency Medical Technician. 6 Credit Hours.

The Emergency Medical Technician curriculum will follow the National Registry of Emergency Technician standards in a traditional course setting. This material will be taught in a dynamic classroom environment where hands-on skills are heavily integrated. Students will utilize an assigned textbook and associated interactive supplements to complete readings, assignments, presentations, and non-psychomotor skill labs. Students will complete field clinical hours with an affiliated pre-hospital and hospital facilities. Throughout the course, and through application of skills in the clinical setting, students will be proficient in Basic Life Support (BLS) care. Upon successful completion, the student will be eligible to take the National Registry Examination to become certified as an Emergency Medical Technician.

College Restrictions: Must be enrolled in one of the following Colleges: College of Public Health.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223 or 'Y' in CRKI02)

HRPR 3087. Emergency Medical Technician. 6 Credit Hours.

The Emergency Medical Technician curriculum will follow the National Registry of Emergency Technician standards in a traditional course setting. This material will be taught in a dynamic classroom environment where hands-on skills are heavily integrated. Students will utilize an assigned textbook and associated interactive supplements to complete readings, assignments, presentations, and non-psychomotor skill labs. Students will complete field clinical hours with an affiliated pre-hospital and hospital facilities. Throughout the course, and through application of skills in the clinical setting, students will be proficient in Basic Life Support (BLS) care. Upon successful completion, the student will be eligible to take the National Registry Examination to become certified as an Emergency Medical Technician.

Repeatability: This course may not be repeated for additional credits.

HRPR 3096. Cultural Competency in Health and Healthcare. 3 Credit Hours.

Cultural competence goes beyond language, ethnicity, race and sex. This course will examine those components in the context of cultural traditions, gender issues, aging, and (dis)ability. There is a need for such background knowledge to develop the skills to effectively interact with diverse groups of people to improve the patient experience in healthcare, eliminate cultural and linguistic barriers during clinical encounters, develop sensitivity to gender/age/ability bias, ensure compliance with all care requirements and protocols, and improve the overall quality of care. This interaction includes (but is not limited to) patients, patients' families, and the health care team. This course is reflective of the needs expressed by the National Institutes of Health to best prepare the future public health and healthcare workforce.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Studies, Health Professions.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

HRPR 3197. Understanding and Applying Research in Health Professions. 3 Credit Hours.

This 3-credit, writing intensive course will introduce the fundamentals of research design and interpretation in literature around clinical practice issues. Students will read, summarize, and interpret current literature and determine how it applies to clinical practice and health outcomes. Students will engage in multiple opportunities to draft and re-write.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Health and Rehab Sciences.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (EPBI 2219, STAT 2101, MATH 1013, PSY 1167, SOC 1167, 'Y' in CREP01, 'Y' in CRMA02, or 'Y' in CRSO02)

HRPR 3443. Assessment of Head, Neck, and Spine Injuries in Sport. 3 Credit Hours.

Study of athletic injury assessment principles and techniques. Specific areas include head, face, and neck injuries, and orthopedic injuries of the spine. Students will have the opportunity to practice manual skills related to the assessment, extraction, and immobilization of patient-athletes in challenging sports settings such as gymnastic pits, hockey rinks, etc. For those in pre-health studies, this introduction to such techniques does not imply clinical expertise and should not be used as such. For EMTs taking this course, all such knowledge should be used in accordance with your state practice act.

College Restrictions: Must be enrolled in one of the following Colleges: College of Public Health.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223 or 'Y' in CRKI02) and (KINS 1224 or 'Y' in CRKI03)

HRPR 4096. Introduction to the Narrative in Patient-Centered Health Care. 3 Credit Hours.

This is a multidisciplinary course that uses a variety of ways to help students understand the human experience in the context of health and illness and explore the linkage between the story and the body. In order to help develop narrative competence, students will learn how a narrative approach to health and disease is different from the conventional biomedical approach. The focus of narrative medicine is on the individual patient, a person with a past, a person with pain, and a person with agency. Students will learn about the ways in which the patient's story and physiology are related, how the story can be used in a clinical setting, and how to improve their ability to interpret narratives. It will provide students with the skills of respecting multiple perspectives. It will help them hear and mediate competing voices (e.g. those of authority, the patient, the patient's family), and it will help them engage in the dynamics of movement between empathy and emotional detachment. The goal for this course is interprofessional, patient-centered, and humanistic; and it is intended to promote compassionate clinical care through valuing the patient's, and the practitioner's, own unique experiences.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Studies, Health Professions.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 3096, HRPR 3096, or 'Y' in CRKI09) and (HRPR 2103, HPM 2214, or 'Y' in CRHP01)

HRPR 4282. Independent Study in Health Professions. 1 to 6 Credit Hour.

This course provides an opportunity for independent investigation and analysis of the intellectual, physical, social, psychological, and ethical bases of issues related to health professions.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Professions.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (KINS 1223 or 'Y' in CRKI02), (KINS 1224 or 'Y' in CRKI03), and HRPR 3096.

HRPR 4283. Directed Readings and Study in Health Professions. 1 to 6 Credit Hour.

This course provides an opportunity to participate in a variety of independent experiences (readings and study) in health professions as directed by a faculty mentor.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Health Professions.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: minimum GPA of 3 in: courses numbered 0700 to 4999.

HRPR 4821. LGBTQ+ Health Through the Lifespan. 3 Credit Hours.

Students in this 3-credit course will examine prevalent healthcare needs and barriers to care across the lifespan for those in the LGBTQ+ community. During the course, students will evaluate community health needs data, engage with patients and experts in the field, and deliberate research and case studies from across medical and healthcare specialties.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in HRPR 3197.

Healthcare Management (HCM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HCM 3501. Introduction to Health Services Systems. 3 Credit Hours.

Introduction to the organization, delivery and financing of health care. An overview of management issues designed for those preparing for careers as risk and insurance, public health, or healthcare professionals, or business majors interested in career opportunities in the healthcare industry. NOTE: This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Healthcare Management, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Public Health, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mnngt.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

HCM 3502. Healthcare Financing and Information Technology. 3 Credit Hours.

The insurance, payment mechanisms, contractual arrangements and control mechanisms related to the provision of health services with an emphasis on what the financial manager can do to enhance financial position of the healthcare institution. The course emphasizes information technology applications and hands-on exercises using web-based information resources. NOTE: This is an information management/technology approved course for FSBM majors.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Healthcare Management, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mnngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HCM 3501 or 'Y' in CRHC02)

HCM 3580. Special Topics - Healthcare Management. 3 Credit Hours.

Special topics in current developments in the field of healthcare management.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mnngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

HCM 4596. Healthcare Quality and Risk Management. 3 Credit Hours.

The course focus is on the relationships among risk management, quality improvement and patient safety and how these impact the business of healthcare and patient health. The foundation of the study of these topics is the nature of risk and the risk management process as it pertains to health and healthcare organizations. The course emphasizes independent business research, independent and group problem solving, professionally prepared written and oral presentations and refining one's ability to prioritize multiple assignments/tasks. The learning environment is structured to approximate the business setting. To bridge the gap between the classroom and the actual practice of risk management, patient safety, and quality, students attend Healthcare Risk Management Grand Rounds at an area healthcare institution. The Grand Rounds include real time risk management, patient safety and quality improvement rounds with practicing leaders in these disciplines. NOTE: Must be a Risk Management and Insurance major, Healthcare Management minor or Business Management major with a Healthcare Management concentration. Students must earn a grade of C- or higher in this course if they are using it to fill the writing intensive course requirement for their degree.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Healthcare Management, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (HCM 3502, (HCM 3501 and RMI 3501), 'Y' in CRHC01, (HCM 3501 and 'Y' in CRRM03), (RMI 3501 and 'Y' in CRHC02), or ('Y' in CRHC02 and 'Y' in CRRM03))

Hebrew (HEBR)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HEBR 1001. Elements I. 4 Credit Hours.

Introducing the Hebrew alphabet (print and cursive), functional grammar, basic vocabulary for daily life and basic sentence structures. The goal is to set up a solid base for the communication skills of reading unvocalized text, writing and basic conversation.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

HEBR 1002. Elements II. 4 Credit Hours.

Continuation of Hebrew 1001. Introducing more advanced sentence structures and three additional grammar paradigms and the past tense. The emphasis is on expansion of vocabulary to aid in understanding more varied texts and facilitating more ease in speaking, writing and reading.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HEBR 1001.

HEBR 2001. Intermediate I. 3 Credit Hours.

Reading of moderately difficult Hebrew texts with discussion in Hebrew. Introducing more advanced sentence structures, the rest of the grammar paradigms and the future tense. Class is conducted mostly in Hebrew with the goal of strengthening communication skills.

Course Attributes: LB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HEBR 1002.

HEBR 2002. Intermediate II. 3 Credit Hours.

Reading of moderately difficult Hebrew texts with discussions in Hebrew. Learning more advanced sentence structures, the rest of the grammar paradigms in all tenses. Class is conducted mostly in Hebrew with strong emphasis on understanding text and speaking with more ease.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HEBR 2001.

Hindi (HIN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HIN 1001. Hindi Elements I. 4 Credit Hours.

First semester level of Hindi.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

HIN 1002. Hindi Elements II. 4 Credit Hours.

Second semester level of Hindi.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HIN 1001.

HIN 2001. Hindi Intermediate I. 3 Credit Hours.

Third semester of Hindi.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HIN 1002.

HIN 2002. Hindi Intermediate II. 3 Credit Hours.

Fourth semester of Hindi.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HIN 2001.

History (HIST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HIST 0824. Gender and World Societies. 3 Credit Hours.

Learn about the history of feminine and masculine gender roles from comparative and international perspectives. Using case studies from Ancient Greece, Medieval Europe, West Africa, Victorian Britain, Modern Europe, the Middle East, South Asia, East Asia, and/or Latin America, we will explore certain themes - The State, The Sacred, Work, The Family, The Body and Sexuality, Modern Revolutionary Movements - to investigate how gender and gender roles have changed over time, and their significance today. Readings include primary sources written both by men and by women, secondary sources, novels, and films. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Gender, Sexuality & Women's Studies 0824; History 0824, 1708, C065; Women's Studies 0824, 1708, or C065.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0829. The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0831. Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? With an historical and sociological framework as a basis, we will take an in-depth and more personal look at the immigrant experience as expressed through the immigrants' own voices in literature and film. Topics explored include: assimilation, cultural identity and Americanization, exploitation and the American Dream, ethnic communities, gender, discrimination and stereotyping. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0831, CRIT 0831, Italian 0831/0931, Russian 0831, SOC 0831, or SPAN 0831/0931.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0832. Politics of Identity in America. 3 Credit Hours.

Gay or straight. Black or white. Male or female. What do these different group identities mean to Americans? How do they influence our politics? Should we celebrate or downplay our diversity? This course explores how we think about others and ourselves as members of different groups and what consequences it has for how we treat one another. Our fundamental social identities can be a source of power or of powerlessness, a justification for inequality or for bold social reform. Students learn about the importance of race, class, gender and sexual orientation across a variety of important contexts, such as the family, workplace, schools, and popular culture and the implications these identities have on our daily lives. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed Gender, Sexuality & Women's Studies 0832/0932, Political Science 0832/0932, Sociology 0832 or Women's Studies 0832/0932.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0834. Representing Race. 3 Credit Hours.

From classical Greeks and Romans, who saw themselves under siege by the "barbarian hordes," to contemporary America and its war on "Islamic extremism," from "The Birth of a Nation" to "Alien Nation," Western societies have repeatedly represented some group of people as threats to civilization. This course will examine a wide range of representations of non-Western people and cultures in film, literature, scientific and legal writings, popular culture and artistic expression. What is behind this impulse to divide the world into "us" and "them"? How is it bound up with our understanding of race and racial difference? And what happens when the "barbarian hordes" talk back? NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed African American Studies 0834, Africology & African American Studies 0834, Anthropology 0834/0934, Asian Studies 0834, or English 0834/0934.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0847. American Military Culture. 3 Credit Hours.

You live in a country that possesses the world's strongest military forces. Up through the Vietnam War, Americans viewed military service in wartime as a basic obligation for all adult male citizens - the ultimate test of their patriotism and manhood - but a temporary sacrifice that ceased for most on the return of peace. Today, the American people have outsourced their awesome war-making power to a restricted number of men and women - many of whom consider military service their career. We will explore the distinctive culture that shapes the composition and behavior of America's armed forces and probe how it reflects the strengths and weaknesses of American society. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AMST 0847.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

HIST 0848. American Revolutions. 3 Credit Hours.

From the first encounters with Native Americans to the present, a series of pivotal moments have had an enduring influence on American society, culture, and politics. In each class, three modules will focus on three pivotal moments, such as King Philip's War, Nat Turner's Rebellion, the Scopes trial, the Civil Rights movement, the women's movement, the emergence of Elvis Presley, the sexual revolution, the rise of environmentalism, the Reagan Revolution, and 9-11. In each module, students will first place the main subject of the module in context, and then seek to understand how it changed American society. The last week of each module will be devoted to a consideration of how the subject of that module has become part of American collective memory. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: AMST 0848 or ANTH 0848.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0849. Dissent in America. 3 Credit Hours.

Throughout American history individuals and groups of people have marched to the beat of a different drummer, and raised their voices in strident protest. Study the story and development of dissent in America. How has dissent shaped American society? In addition to studying the historical antecedents of dissent, students will have first-hand experience visiting and studying a present-day dissent organization in the Philadelphia area to investigate connections between the history of dissent and the process of making dissenting opinion heard today. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed English 0849/0949, History 0949 or SOC 0849/0949.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0859. The Making of American Society: Melting Pot or Culture Wars?. 3 Credit Hours.

Terrorism, illegal immigration, gay marriage, religious conflict, political in-fighting, corporate corruption, racial animosities, civil liberties assaults, media conglomeration, Wal-Mart goes to China and the rich get richer. America in the 21st century is a contentious society. How did we get to this place in time? Examine what makes American society distinctive from other advanced industrial democracies as we study the philosophical origins of America, the development of social and economic relationships over time, and the political disputes dominating contemporary American life. The course relies heavily on perspectives from History, Sociology and Political Science to explain the challenges facing contemporary American society. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: AMST 0859, PHIL 0859, POLS 0859, or SOC 0859.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0861. Global Slavery. 3 Credit Hours.

Investigate global slavery as an historic phenomenon and a current reality. How is it that after the great emancipation movements of the 19th century and the International Geneva Convention (1926) outlawing slavery there are still 27 million slaves and counting? This course argues that any critique of globalization requires an understanding of why it has taken several millennia for anti-slavery law to emerge and why such legislation continues to have limited reach and effectiveness. It argues that there is no modernity and no globalization without slavery. Explore this problem by asking a basic question: By what techniques, abstract and concrete, do masters make themselves as visible by constructing slaves as invisible? With film viewings, carefully selected readings, debates and group projects, you will be led to make your own connections to these themes, and to consider global slavery as part of the past and the present. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0862. Development & Globalization. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: GUS 0862, POLS 0862/0962, or SOC 0862/0962.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0864. War and Peace. 3 Credit Hours.

Total war, weapons of mass destruction, genocide. These were not solely inventions of the 20th century nor are they the natural consequences of a violent human nature. Leaders, armies, and the strategies they pursue are rooted in their social and political context. Weapons are the products of not merely technological but also historical and cultural development. Battles occur on a political and historical terrain. Learn how ancient ideology, medieval technology, modern propaganda, and more have changed how humans wage war and make peace. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for History 0864 if they have successfully completed History 0964 or POLS 0864.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

HIST 0865. The Global Crisis: Power, Politics and the Making of Our Times. 3 Credit Hours.

Are we living in a time of global crisis? This course will provide you with the tools you need to find out. The course focuses on world politics over the past century, up to today. We will examine a number of key global problems as they have changed over time. We will adopt an historical approach, which means we will read texts and documents about the past as a way to understand the present. Together we will explore debates like: Is America an empire? What is ideology and is it a factor in world politics today? What role do diplomacy, strategy, and military power play in world affairs? How have non-western peoples and states challenged the power of the West, and with what results? What are the roots of ethnic and religious conflict? And what can we as citizens do to address truly global problems? Drawing on examples from 20th century world history, this course introduces you to world politics and the great debates of our time. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

HIST 0867. Founding Philadelphia. 3 Credit Hours.

This course will explore the important role of Philadelphia in the founding of the United States. It will not be, however, a mostly nostalgic visit to patriotic historical sites that glorify the founding fathers, but an in-depth examination into the actual social, cultural, and political events that shaped a city and a nation, as well as an evaluation of how we view these historical events and figures today. Is there a great discrepancy between myth and reality? What does our view of the past say about the present? In what ways can Philadelphia be viewed as a microcosm of the United States and in what ways does the development of Philadelphia, through political turmoil, industrial growth, and the creation of ethnic neighborhoods by a constant flood of immigrants tie in with global developments?

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

HIST 0872. Turning Points in Human History: The Modern World. 3 Credit Hours.

"Turning Points in Human History: The Modern World" explores six of the most significant transformations in human life in the modern world which include 1) the establishment of world trade networks following Columbus' voyages, 2) slavery, colonization, and race in the making of the modern world, 3) the democratic, nationalist, and socialist revolutions from the seventeenth to the twentieth centuries, 4) the industrial revolution in global perspective, 5) the growing significance of ecological balance, and 6) the search for identity in contemporary history. The course looks at world history whole, asking how we have become who we are through our global history. It compares societies to foster analysis. It also examines interactions among societies to foster synthesis. The analysis of primary and secondary documents will be central to the course, along with study of secondary sources commenting on them. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0874. Confronting Empire: Voices of Resistance. 3 Credit Hours.

What is "empire"? For millions of people throughout history, this is not just an academic question but a lived reality. In this class, you will confront the realities of empire, and you will observe ways that many others have confronted empire in the past. To find out what empire means, this class will introduce students to Asian, African and Latin American people whose lives have been shaped by Western colonial rule from the 18th to the 20th centuries. What was it like to live as a colonized person in the age of empire? What kind of power did one have to lead a free life? What sorts of opposition and resistance was available to colonized peoples? How has the struggle between colonized peoples and the powerful imperial states shaped the world we live in today? And do we still live in a world that has colonial dimensions to it? In this class, we will listen to the voices of those who experienced Western imperialism and follow them as they confronted and challenged that process. We bring together a variety of sources including speeches, newspapers, novels, films, and government documents to reconstruct specific moments of collective action on the part of the colonized. We will explore how this struggle carries on today. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0876. Religion in Philadelphia. 3 Credit Hours.

The argument is sometimes made that religion in dense urban spaces is characteristically very different from religion as it appears elsewhere. A study of religion in Philadelphia provides numerous ways to explore that idea, especially since the city encompasses a variety of ethnic and immigrant groups, encouraging the generation of new and hybrid forms of religious life that are less possible in smaller populations. Learn how ideas of toleration and freedom, the urban environment, and immigration helped to define the role of religion in the life of this city. Study various religious traditions as they are manifested in the greater Philadelphia area and look at the influences religion has had on the fabric of Philadelphia's history and cultural life including politics, art, education, journalism and popular culture. You will visit and write about various religious sites and institutions. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed REL 0876, 0976, 1003, 1903, C052, H092 or History 0976.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

HIST 0929. Honors: The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

HIST 0949. Honors Dissent in America. 3 Credit Hours.

Throughout American history individuals and groups of people have marched to the beat of a different drummer, and raised their voices in strident protest. Study the story and development of dissent in America. How has dissent shaped American society? In addition to studying the historical antecedents of dissent, students will have first-hand experience visiting and studying a present-day dissent organization in the Philadelphia area to investigate connections between the history of dissent and the process of making dissenting opinion heard today. (This is an Honors course.) NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed English 0849/0949, History 0849 or SOC 0849/0949.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

HIST 0961. Honors: Global Slavery. 3 Credit Hours.

Investigate global slavery as an historic phenomenon and a current reality. How is it that after the great emancipation movements of the 19th century and the International Geneva Convention (1926) outlawing slavery there are still 27 million slaves and counting? This course argues that any critique of globalization requires an understanding of why it has taken several millennia for anti-slavery law to emerge and why such legislation continues to have limited reach and effectiveness. It argues that there is no modernity and no globalization without slavery. Explore this problem by asking a basic question: By what techniques, abstract and concrete, do masters make themselves as visible by constructing slaves as invisible? With film viewings, carefully selected readings, debates and group projects, you will be led to make your own connections to these themes, and to consider global slavery as part of the past and the present. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students can receive credit only once for either HIST 0861 or 0961.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

HIST 0964. Honors War and Peace. 3 Credit Hours.

Total war, weapons of mass destruction, genocide. These were not solely inventions of the 20th century nor are they the natural consequences of a violent human nature. Leaders, armies, and the strategies they pursue are rooted in their social and political context. Weapons are the products of not merely technological but also historical and cultural development. Battles occur on a political and historical terrain. Learn how ancient ideology, medieval technology, modern propaganda, and more have changed how humans wage war and make peace. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for History 0964 if they have successfully completed History 0864 or POLS 0864.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

HIST 0976. Honors Religion in Philadelphia. 3 Credit Hours.

The argument is sometimes made that religion in dense urban spaces is characteristically very different from religion as it appears elsewhere. A study of religion in Philadelphia provides numerous ways to explore that idea, especially since the city encompasses a variety of ethnic and immigrant groups, encouraging the generation of new and hybrid forms of religious life that are less possible in smaller populations. Learn how ideas of toleration and freedom, the urban environment, and immigration helped to define the role of religion in the life of this city. Study various religious traditions as they are manifested in the greater Philadelphia area and look at the influences religion has had on the fabric of Philadelphia's history and cultural life including politics, art, education, journalism and popular culture. You will visit and write about various religious sites and institutions. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed REL 0876, 0976, 1003, 1903, C052, H092 or History 0876.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

HIST 1012. Professional Development for History Majors. 1 Credit Hour.

This course is designed to introduce history majors to the wide array of career possibilities their skills make available to them. One of the keys to turning a history major into a career is understanding just what skills one possesses after all the coursework, the research, the reading and writing one does during college. These skills are very marketable and lead to very rewarding work in medicine, government, education, law, museums, journalism, public service, and the corporate world. Because there is significant overlap in course content, students will receive credit for only one of these courses: CLA 1002, CJ 1002, ENG 1801, HIST 1012, NSCI 1002, POLS 1002, PSY 1002, SOC 1002.

Repeatability: This course may not be repeated for additional credits.

HIST 1101. U.S. History to 1877. 3 Credit Hours.

This course, United States History to 1877, traces the historical roots of what is now the United States of America: the Mississippian development of agriculture and urban life, the competition of various empires over land and peoples, the successes and failures of European settlements, the forced migration of West Africans and the invention of enslavement and race. By 1776, the United States of America was formed under promises of liberty, equality, property rights, and tolerance. But who would benefit? Who should rule? Partial industrialization, the consolidation of slavery, agricultural specialization, and expansion to the west, along with demands for reform and democracy, made these questions ever more vexed and led to a Civil War and a flawed attempt to reconstitute the Union by 1877. There are no prerequisites. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

HIST 1102. U.S. History since 1877. 3 Credit Hours.

This is a general survey of the main currents in American history since 1877. Since the 1870s, the people of the United States have struggled over the meaning of equality, the practice of democracy, the politics of economic development, and the role of the United States in the world. This course will explore these themes and others in order to analyze the history of the modern United States. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

HIST 1701. World History Ancient. 3 Credit Hours.

An introduction to world history from earliest times until the 15th century. The course surveys the birth of agriculture, early human settlements, the establishment of cities and "civilizations," the organization of global cultural and religious systems, the power and authority of massive empires, the influence of business interests, and "border peoples" on the fringes of the great systems. The scope is global, and we always ask "How do we know?" and "What is its significance?" NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

HIST 1702. World History Modern. 3 Credit Hours.

This course begins with Columbus' voyages, which linked the major trading regions of the world together, and continues through the expansion of imperialism, the revolts against excessive government power and authority, and the invention of astonishing new technologies of creativity and destruction. The course concludes with the formation of new international, national, religious, and gender identities in the last few decades. We analyze economics, politics, technology, culture, religion, and innovative ideas as formative influences. We always ask "How do we know?" and "What is its significance?" as well as "What do we know?" The course serves as an introduction to modern world history that students can build upon in subsequent course work. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

HIST 1900. Honors Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 1980. Honors: Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 2001. The Historian's Craft. 3 Credit Hours.

What does it mean to think like a historian? What can we know about the past, how do we know it, and what do we do with that knowledge? "The Historian's Craft" is an introduction to the practice of history. It is intended to be the starting point for students interested in historical thinking and serves as the gateway to upper level research and writing. The tools of the historian - analyzing and critiquing sources, in-depth research, working with different source bases, making arguments, writing clearly and persuasively - are the focus of this class. Using a wide variety of topics, we will examine how historians work and students will cultivate the skills they need to do historical research and writing.

Repeatability: This course may not be repeated for additional credits.

HIST 2010. Special Topics. 1 Credit Hour.

Variable content course; this one credit seminar is not an elective for history majors and minors; it does not count for the CLA distribution requirement. It is a free upper level elective for any student.

Repeatability: This course may be repeated for additional credit.

HIST 2102. History of Nazi Germany. 3 Credit Hours.

This course studies the rise and decline of Hitler's Third Reich, from its intellectual origins in the 19th century and World War I, through the meteoric rise of the National Socialist movement during the early 1930's, to its demise in the ruins of Berlin in 1945. Special attention is given to the sources of support for Nazism among German voters, the structure of the National Socialist state, the role of Adolf Hitler, the Holocaust, and the causes and consequences of the Second World War. Duplicate credit warning: Students who have taken HIST 1046 or 2902 will not receive credit for taking HIST 2102.

Repeatability: This course may not be repeated for additional credits.

HIST 2103. African American History to 1865. 3 Credit Hours.

This course will examine the activities of African Americans in America from slavery to 1865. Among the topics to be studied are: Slavery, The American Revolution, and the Civil War. In addition, much attention will be devoted toward emphasizing the multi-dimensional aspect of the African American Community, and the crucial role which African American women have played in America will be stressed. The course will focus on themes and questions which are essential to an understanding of the past and to an understanding of the present struggles for full citizenship on the part of African Americans. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

HIST 2104. African American History 1865-Present. 3 Credit Hours.

This course will examine the activities of African Americans in America from Reconstruction to the present. Among the topics to be studied are: Reconstruction, the evolution of African American leadership, the Harlem Renaissance, the Civil Rights Movement, and Black Power. In addition, much attention will be devoted toward emphasizing the multi-dimensional aspect of the African American Community, and the crucial role that African American women have played in America will also be stressed. The course will focus on themes and questions, which are essential to an understanding of the past and to an understanding of the present struggles for full citizenship on the part of African Americans. This course meets the university Studies in Race requirement. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

HIST 2105. Race and the U.S. Constitution. 3 Credit Hours.

The central focus of the course is how the issue of race has shaped the history of the United States Constitution and how constitutional law contributed to the history of ideas about race in the United States. We study the origins of the law of race and slavery in the pre-revolutionary period and end with understanding the origins of affirmative action in the post-World War II period. Students will read various books about U.S. Constitutional history in order to understand various interpretations of historical events and ideas about race. Student will also read original court cases about racial minorities in order to develop an understanding of original historical texts. Many of the skills emphasized in the class prepare students for law school, public service, and analyzing the historical roots of contemporary issues. Class discussion about constitutional issues is designed to give students confidence and precision in public speaking. Students will also write book reviews in order to develop an understanding of how historians collect evidence in order to construct historical interpretations and to develop their own interpretations of historical events and their personal writing skills. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

HIST 2106. Trials in America. 3 Credit Hours.

This course will examine American history through the lens of significant trials. Most trials are legal actions that settle quarrels or determine the guilt or innocence of an individual or group accused of a crime. But during the course of American history there have been numerous trials that reflect cultural/social/political issues much more than the ostensible guilt or innocence of the defendant. The Salem Witchcraft trials, for example, tell us much more about the cultural and social milieu of colonial Massachusetts than they do about the practice of witchcraft. The Dred Scott case was not about the status of one man, but about the legitimacy of slavery. The Scopes trial was a battle between forces of modernism versus forces of traditionalism, not about John Scopes. The O.J. Simpson trial was more about race and the legacy of racism than about murder. These are a few of the trials we shall examine. How important are such trials as a force in history? Do trials resolve conflict or do they fuel conflict? When do trials reflect state, or federal, coercion? When does public opinion determine the outcome of a trial? Duplicate credit warning: Students who have taken HIST 2906 will not receive credit for taking HIST 2106.

Repeatability: This course may not be repeated for additional credits.

HIST 2107. Asian American History. 3 Credit Hours.

An introductory survey of the historical experiences of Chinese, Japanese, Filipino, Korean, South, and Southeast Asian immigrants in the United States. Considers economic, social, political, and cultural trends, beginning with the arrival of the Chinese in the 1830s and ending with issues facing Asian-Americans today. Includes the development and significance of Asian-American communities and culture as well as approaches to the study of Asian-Americans in racial hierarchies. The aims of the course are to analyze commonalities and differences in the historical and contemporary experiences of Asian ethnic groups and to explore perspectives on the position of Asians in U.S. society - assimilation, model minority, institutional racism, and internal colonialism. Instructional methods include lectures and audio-visual materials, but they also emphasize active student participation in learning through discussion, oral reports, and written assignments. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Note: This course is cross-listed with Asian Studies 2107, American Studies 2107, and Sociology 3223. Students may only receive credit for one of these courses: ASST 2107, AMST 2107, HIST 2107, or SOC 3223.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

HIST 2108. Growing Up in America. 3 Credit Hours.

This course will examine the changing perception and experience of growing up in the United States from colonial times to the present. It will argue that childhood and adolescence are social constructions that change over time. The course will explore the emergence of childhood and adolescence as distinct stages in the life cycle, the evolving role of the family in the process of growing up, and the increasing importance of social institutions other than the family in the lives of the young. Particular attention will be paid to the difference between growing up rich or poor, black or white, male or female, and rural or urban. Finally, it will consider the reciprocal relationship between popular culture and the lives of young Americans.

Repeatability: This course may not be repeated for additional credits.

HIST 2109. Sexuality and Gender in American History. 3 Credit Hours.

How do sexuality and gender shape the way a society views the behavior of men and women? How do they create images and stereotypes of ideal or "typical" female and male behavior? And how do the ways in which people actually act compare to the society's conventional ideas about how they ought to act? This course takes us from the beginning of the 19th century to the present, exploring the social, cultural, and political dimensions of the public and private roles of women and men in the United States. It examines changing cultural values and social norms of masculinity and femininity and considers the actual behavior of women and men in the family, at work and at play, in love, and in the life of the nation. It also probes the ways in which race, social class, and sexual orientation have affected the experience of gender.

Repeatability: This course may not be repeated for additional credits.

HIST 2111. Recent American History. 3 Credit Hours.

The purpose of this course is to describe the political, social, and economic changes that the United States has experienced in making the transition from the Cold War era to the post-Cold War (and post-industrial) society of the late 20th century. The subject matter should be of interest to students in Education, Journalism, Urban Studies, and Psychology, as well as History majors. The course covers the entire period since World War II, but there is more emphasis on social change since 1970. Topics covered include: the origins of the Cold War; anti-Communism in American society and politics; the Civil Rights movement; the Vietnam War and anti-war movement; conservative backlash; Nixon and Watergate; the rise of a post-industrial economy; post-industrial social trends (gender, race, and the new immigration); and the growing impact of media on society and politics.

Repeatability: This course may not be repeated for additional credits.

HIST 2112. Native American History. 3 Credit Hours.

This course introduces students not only to the history of Native Americans after first contact (invasion?) with Europeans, but also how we write the history of peoples who left little or no written records for much of the time period under consideration. It begins with pre-contact societies and cultures and charts how native peoples were affected by Spanish, French, English, Dutch, and American exploration and settlement. Thereafter the course examines how Indian peoples resisted and adapted in the face of encroachment upon their land and assaults upon their way of life. Finally, the course examines the strategies of native peoples in the twentieth and twenty-first centuries as they fought (and continue to fight) for Indian political, economic, and cultural rights.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 2116. Baseball and American History. 3 Credit Hours.

This is not a course about baseball. This is a course that uses the game of baseball to try to make sense of a complicated last 175 years of American history. It is a course about the place of baseball in American society and how the game both reflected and influenced American society. We will examine issues of race, gender, class, immigration, suburbanization, urban planning, capitalism, and identity in American history using America's National Pastime, baseball, as our lens. You do not need to love (or even understand) baseball to enjoy this class. All you need is a curiosity about the American past!

Repeatability: This course may not be repeated for additional credits.

HIST 2117. History of Global Soccer. 3 Credit Hours.

In 2010, Franklin Foer published a book with the audacious title: "How Soccer Explains the World: An Unlikely Theory of Globalization." In it, Foer explained how certain features of our "globalized" world can be better understood by better understanding soccer. This course will examine how soccer's past and present connect to forces and trends that have shaped history since the modern game's "invention" in England in 1863. Soccer tells us about race, economics, empire, gender, and of course sports in the modern world. It is connected to nation and tradition, to international business, to organized crime, to hooligan violence. Readings and assignments drawn from Europe, South America, Africa, and the United States will inform expert and novice students alike about "the beautiful game" (as it is known in Portuguese) and at the same time the world around them.

Repeatability: This course may not be repeated for additional credits.

HIST 2151. Introduction to Public History. 3 Credit Hours.

This course introduces the field of public history. It begins by surveying the history of the field and its various realms of professional practice. Subsequent units concern the challenges of doing history with diverse audiences, the value of historical interpretation in public contexts, and best practices for public historians. Throughout, special emphasis is placed on issues such as historical resource management, museum practice, digital history, and other facets of the dissemination of public memory. Students discover who manages our shared heritage while learning to think critically about its place in society. And because Philadelphia has figured so prominently in the history and practice of public history, the city will play a central role in readings and assignments.

Repeatability: This course may not be repeated for additional credits.

HIST 2152. Museum History. 3 Credit Hours.

This course examines the history of museums, from their origins in the memory theaters and curiosity cabinets of Renaissance Europe to their recent place in conversations about nation, power, and the future of public funding for arts and culture. Although our focus will sometimes be theoretical--especially with regard to the philosophy of collecting, the construction of memory, and competing concepts of the "public"--we will also consider the practicalities of museum management with an eye toward exploring career paths for students. Philadelphia is itself a museum of museums and will therefore provide the backdrop for our investigation. As a result, we will pay particular attention to the history of the museum in America and especially the place of history museums in shaping our ideas about the nation's past and its future.

Repeatability: This course may not be repeated for additional credits.

HIST 2153. Memory and Commemoration. 3 Credit Hours.

This course examines the history of memory and remembering, particularly in the United States from the American Revolution to the present. We will undertake a broad survey of the various ways that Americans have gone about remembering their past(s) while exploring why and how those memories are made real by monuments, museums, and other commemorative architecture. A central concern of this course is to understand how memory functions in the construction of American nationalism. Special attention will also be given to contests of memory wherein competing ways of remembering collide along lines of gender, race, class, and ethnicity.

Repeatability: This course may not be repeated for additional credits.

HIST 2207. Religion in the Modern United States. 3 Credit Hours.

This course explores the ways in which religious beliefs and practices have influenced the history of the United States in the years between 1898 and the present. Special attention is paid to lived religion, church-state relations, the relationships between religion and social power, the invention of the Judeo-Christian tradition, and the rise of new religious movements (such as Pentecostalism, the Nation of Islam, and Wicca).

Repeatability: This course may not be repeated for additional credits.

HIST 2211. United States at War. 3 Credit Hours.

This course is a survey of the rise of the American military establishment from its origins as a small, neglected cadre of coastal and frontier guardians to a mighty world police force and the most expensive concern of the federal government. Emphasis will be placed on the development of military policy, the principles of war, and the inter-relationship between military affairs, technology, politics, and social change.

Repeatability: This course may not be repeated for additional credits.

HIST 2212. History of the American Presidency. 3 Credit Hours.

This course examines historical developments in the office of the U.S. president from its establishment to contemporary times. Through lectures, discussions, class projects, and outside assignments, we will explore the historical literature dealing with the creation and evolution of the office; the presidents who have shaped the office; the powers and limitations of the office in both foreign and domestic affairs; the president's relationship to the courts, the Congress, the people, and the press; and the broad political developments essential to our understanding of the place of the presidency within our changing political culture. This course asks: How has our most important national political institution come to be what it is? Two themes permeate the course: (1) What is the source and nature of presidential power? (2) Who are the men who have held the office and why have they failed or succeeded? This course prepares students for further historical or other academic studies and for related professional careers in law, journalism, or executive management. More importantly, the course engages students' concerns as life-long participants in American democracy. Duplicate credit warning: Students who have taken HIST 1013 will not receive credit for taking HIST 2212.

Repeatability: This course may not be repeated for additional credits.

HIST 2213. History of the American Economy and American Business. 3 Credit Hours.

This course is intended to provide the student with a history of the development of the American economy with an emphasis on the part which business played in its development. Topics covered include the agricultural economy; the rise of manufacturing; the development of the corporation, the stock exchanges, finance capitalism, and the rise of banking; 19th century business cycles; the expansion of the American corporation in the years between the Civil War and the Great Depression; the overseas expansion of business and the development worker's capitalism in the 1920s; the changes produced by the Great Depression and the Second World War; and the rise of the modern economy with its trans-national connections, the movement towards deregulation, and the move from manufacturing to a service economy. Students will be introduced to a number of skills aimed at making them better able to understand the current American economy, to the use of historical data as a means of judging current trends in finance and business, and to some of the major web sites and journal literature on the subject. They will make written and oral presentations in which they defend their ideas, take a mid-term and a final exam, both of which will require students to answer essay questions, and write a short paper (10-15 pages) on a historical topic dealing with business or economic issues.

Repeatability: This course may not be repeated for additional credits.

HIST 2214. History of the National Park Service. 3 Credit Hours.

This course will examine ideas that have shaped the National Park Service and its mission. It will introduce students to key events and figures responsible for creating the National Park Service that played critical roles in its development. Particular focus will be placed on significant legislation bearing on the agency's function, turning points in its institutional evolution, genesis of bureaucratic hierarchies and process, origins and evolution of its interpretive strategies and the relationship over time between the agency and broad currents in American history. Note: For history majors, this course is in the American history category.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 2215. Imperiled Promise: An Introduction to Heritage Interpretation in the National Park Service. 3 Credit Hours.

This course surveys theory and method in heritage interpretation, which refers broadly to the various techniques used by the National Park Service to communicate the significance of its historical resources. Students will study the history of heritage interpretation, examine the challenges that confront it today, and consider new paths forward. Although this course serves Temple's ProRanger program, it will also appeal to students interested in public history, museum studies, communication studies, and education.

Repeatability: This course may not be repeated for additional credits.

HIST 2216. U.S. Civil War. 3 Credit Hours.

This course will present a detailed survey of the causes, conduct, and immediate consequences of the American Civil War, the bloodiest conflict in United States history. Special emphasis will be placed on the sectional, racial, political, and economic differences that culminated in the dissolution of the Union, the formation of the Confederate nation, strategy and tactics, the personalities of major Union and Confederate commanders and statesmen, the role of Abraham Lincoln in preserving the Union, and the federal government's conflicting and ultimately unsuccessful efforts to reconstruct Southern politics and society.

Repeatability: This course may not be repeated for additional credits.

HIST 2217. Vietnam War. 3 Credit Hours.

The Vietnam War is a microcosm of the forces that have shaped the 20th century world: colonialism, imperialism, nationalism, revolution, modernization, nation building, Third World development, capitalism, communism, the cold war, and more. It was a defining moment for both Americans and Vietnamese, although the peoples of neither nation can agree on what precisely it defined. For the United States, the loss of the war produced a crisis of national identity. For Vietnam, the victory meant the culmination of thirty years of revolutionary struggle. To the present day both suffer from the failure to resolve problems inherent in these outcomes. This course is designed to emphasize the war as a problem for both Americans and Vietnamese. The question will be why almost complete strangers prior to World War II became such bitter enemies so soon thereafter, and as a consequence engaged in mortal combat for more than a decade. The strategy will be to explore the social, political, economic, military, and diplomatic dimensions and ramifications from the perspective of each. Note: This course is cross-listed with American Studies 2217 and Asian Studies 2217. Students may only receive credit once for these courses: AMST 2217, ASST 2217, or HIST 2217.

Repeatability: This course may not be repeated for additional credits.

HIST 2219. Cold War Culture in America. 3 Credit Hours.

In the years following World War II, the United States held a position of unprecedented global power. Yet many Americans experienced a sense of insecurity about the world as never before. Anxieties about communism at home and abroad as well as the constant fear of a nuclear Armageddon shaped American daily life in the early postwar period. This seminar traces the correlation between America's foreign relations and its culture and society between 1945 and 1960. Participants will discuss the influence of the atomic bomb on American culture, the emergence of the national security state, the effect of anticommunism on individual liberties at home as well as containment policies abroad, cold war gender relations, and the international dimensions of the civil rights movement.

Repeatability: This course may not be repeated for additional credits.

HIST 2280. Topics in American History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 2301. Pre-Modern Europe. 3 Credit Hours.

The evolution of Europe from Roman times until 1750. The different cultures that went to make up Europe-Roman, Christian, "Barbarian," Muslim; formation of proto-states; technological and economic change; contact with non-Europeans; social and cultural movements over the medieval and early modern periods. Europe before the modern era was not a static, fossilized culture but rather a dynamic one marked by important discontinuities as well as continuities.

Repeatability: This course may not be repeated for additional credits.

HIST 2303. History of Central Europe, 1618-1871. 3 Credit Hours.

This course will examine the political, social, and cultural history of Central Europe from the Thirty Years War until the unification of Germany in 1871. Although Central European history is dominated by German history, this course will cover Central Europe broadly defined. In addition to German and Habsburg history, we will be looking at the important historical changes taking place in Poland, Hungary, and the other non-German regions of the Habsburg lands. In the course of the term we will concentrate on a number of overarching questions: the structure and political traditions of the early modern state (absolutism, rise of bureaucracies and modern state structures, development of political parties); the questions of backwardness, modernization, and relative economic and social development; the rise of nationalism and the emergence of unification politics; and the broad implications of profound changes in the way people in Central Europe thought about and lived their lives.

Repeatability: This course may not be repeated for additional credits.

HIST 2304. 20th Century Europe: A Continent in Crisis. 3 Credit Hours.

This course explores Europe's tumultuous history during the past century. Over the course of the semester, we will study important moments, stories, groups and individuals from this period, and try to understand why Europeans fought two devastating wars within thirty years, wars that reshaped modern world history. We will explore Europe's gradual recovery from war and the paths it has taken toward unification and democratization. We will pay significant attention to the histories of Germany, France, and the United Kingdom and some attention to Eastern Europe and Russia/the Soviet Union. We will also look at Europe's global role, especially its imperial and colonial legacies, as well as the construction of the European Union.

Repeatability: This course may not be repeated for additional credits.

HIST 2308. Black Europe. 3 Credit Hours.

Recent waves of immigration seem to be challenging European identities; the darker the skin tone of the immigrant, the more her presence threatens a sense of Europe as a region defined by whiteness. But there is a long history of people defined as black living in Europe and contributing to European nation-states. If we focus our attention on their stories, we can see the fragility of the white identity in Europe. The goal of this course is to explore a deeper history of black lives in modern Europe than we see presented in the news. Through a combination of primary sources, history books, fiction, and movies, we will discover what it has meant to be black in various countries since the late eighteenth century. In the process, we will question the historical basis of a white identity in the European region.

Repeatability: This course may not be repeated for additional credits.

HIST 2317. Central Europe Through Wars and Revolution, 1848-1989. 3 Credit Hours.

This course introduces students to new narratives of European nationalism and identity. The traditional courses on European history have relied on an understanding of European politics that divides the continent between east and west, and relies on Great Power perspectives. Using the concept of Central Europe, and the ways that it has been interpreted, this course encourages students to restore Central and Eastern Europe to the broader histories of the continent. Narratives of Eastern European peoples, Germans, Slavs, Hungarians, and others, were defined by the struggle between forces of nationalism and geopolitical realities, conflicting desires of sovereignty and security, freedom and social justice. This region, now part of the European Union, is rich in history and culture, as well as cultural and religious diversity. This course will highlight how East Europeans went from objects of high politics to subjects of European and world history.

Repeatability: This course may not be repeated for additional credits.

HIST 2319. The Mafia in Modern Italy. 3 Credit Hours.

Organized crime emerged in modern Italy at the same time as the 19th century process of unification, and it remains a topic of heated debate and controversy in Italy today. In this course, we will trace the history of organized crime as a portal to underlying issues at the heart of the modern Italian nation: the relationship between state and society; tensions between national and regional identities; gender, work, and the family; party politics and the rise of fascism. Our study of the history of the mafia also necessitates a study of the history of anti-mafia movements in Italy. Who claims to represent the interests of the Italian nation and why? What is the image of organized crime in Italy today?

Repeatability: This course may not be repeated for additional credits.

HIST 2353. Early Modern Italy - From Columbus to Beccaria. 3 Credit Hours.

This course will present an overview of "Italy without Italy," that is of the consolidation of an Italian cultural identity in the absence of a unified state, and in the presence of foreign occupation in Lombardy and Naples. Other topics will include the rebirth of the empire under the Habsburgs, tensions with the papacy, the impact of Luther's and Henry's challenges, the Turkish threat and the Counterreformation. The course will conclude with the 18th century and an Italian enlightenment on par with the rest of Europe, with Cesare Beccaria, who had an impact on the American founding fathers as its most significant representative. The broader European and global context will be the consistent emphasis of the course.

Repeatability: This course may not be repeated for additional credits.

HIST 2400. Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 2411. Film in European History. 3 Credit Hours.

The renowned film historian Anton Kaes once wrote: "Historical films interpret national history for the broad public and thus produce, organize, and, to a large degree, homogenize public memory. Surpassing schools and universities, film, and television have become the most effective (and paradoxically least acknowledged) institutional vehicles for shaping historical consciousness." This course seeks to right that imbalance by acknowledging and studying the way that films (and other visual media) teach us about history. Using prominent American and European films (primarily), students will learn to critically analyze visual media, examining them for content, bias, and interpretation. The course will cover key episodes in modern European history and will provide historical background/context for the period necessary to evaluate and study films as historical documents.

Repeatability: This course may not be repeated for additional credits.

HIST 2415. Russian History in Literature and Film. 3 Credit Hours.

Students will read and study a short history of Russia and then read literary works and watch films depicting various periods, topics, events, figures, and issues in Russian history.

Repeatability: This course may not be repeated for additional credits.

HIST 2480. Topics in European History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 2501. Introduction to East Asia: China. 3 Credit Hours.

Overview from ancient times to the present. Designed to provide students with a basic understanding of major themes and broad processes of social change in Chinese history. Emphasizes those aspects of continuity and change that are particularly relevant to contemporary China. Topics include: state formation; the development of characteristic institutions, thought, and cultural practices; long term trends in social dynamics and the economy; imperialism and semi colonialism; revolutionary transformation in the early 20th century; the Maoist road to socialism after 1949; and the post-socialist trajectory of the past two decades and its critique. Course materials include films, primary documents, and literature. Note: This course is cross-listed with Asian Studies 2501. Students may only receive credit once for these courses: ASST 2501 or HIST 2501.

Repeatability: This course may not be repeated for additional credits.

HIST 2502. Introduction to East Asia: Japan. 3 Credit Hours.

A survey of Japanese history from early times to the 20th century. Major themes include religious, political, and social change. Major topics are: early state and religion; classical government, culture and society; emergence of the warrior class in medieval Japan; and the modern transformation into an urban, industrial empire. Course emphasizes broad historical themes of continuity and change and analysis of short primary documents in translation. Generally offered in alternate spring semesters. Note: This course is cross-listed with Asian Studies 2502. Students may only receive credit once for these courses: ASST 2502 or HIST 2502.

Repeatability: This course may not be repeated for additional credits.

HIST 2503. Introduction to Southeast Asia: Insular. 3 Credit Hours.

This course covers the histories of the Philippines, Indonesia, Malaysia, and Singapore from the 16th century until modern times. It will introduce students to the island worlds of Southeast Asia, its peoples, their histories, societies, and economies. To familiarize students with non-Western worlds, lectures will be illustrated with videotapes, slides, and transparencies. Excerpts of articles and indigenous documents will also be used for discussion. Course work will include readings, discussions, examinations, and book reviews. Note: This course is cross-listed with Asian Studies 2503. Students may only receive credit once for these courses: ASST 2503 or HIST 2503.

Repeatability: This course may not be repeated for additional credits.

HIST 2504. Introduction to Southeast Asia: Mainland. 3 Credit Hours.

This course covers the histories of Burma, Thailand, Laos, Cambodia, and Vietnam, from the 16th century until modern times. It is a course designed to introduce students to the analysis of such forces as religion, statecraft, ideology, and trade, and the manner in which they have shaped the mainland countries of Southeast Asia. Mainland Southeast Asia's role in world politics and economy will also be analyzed. Reference will be made to contemporary events taking place in the region, and students will be encouraged to follow these developments through the media and integrate their knowledge in class discussions. Note: This course is cross-listed with Asian Studies 2504. Students may only receive credit once for these courses: ASST 2504 or HIST 2504.

Repeatability: This course may not be repeated for additional credits.

HIST 2505. East Asian Environmental History. 3 Credit Hours.

This course explores the modern environmental histories of East Asian societies. Starting long before the contemporary era of ecological crisis, the natural world in East Asia shaped and was shaped by human activity. The course begins with an overview of environmental change, demographic growth, and imperial expansion in China and Japan in the early modern period. We will also make a brief survey of East Asian ideas about nature before proceeding to cover a wide range of topics relevant to history since 1850, such as the environmental impact of modern agriculture, environmental changes caused by warfare and agrarian revolution, the environmental significance of rapid industrialization, East Asian energy regimes, the rise of environmental movements, and recent ecological disasters. As we study environmental histories of China, Japan, and Taiwan, we will have the chance to consider how patterns of environmental and social change in East Asian societies set them apart from other places around the world. We will also have an opportunity to evaluate the historical roots of the contemporary ecological crisis.

Repeatability: This course may not be repeated for additional credits.

HIST 2511. Introduction to African History. 3 Credit Hours.

This course is an introduction to the study of African history. History is the record of human activities transmitted to posterity either in written or oral form. Africa has the longest record of human habitation, making African history the oldest in the family of human history. Given the immense complexity and richness of African history, we could only scan through the major themes of African history by studying the intertwining of African culture with African history proper. The reading materials are drawn from interdisciplinary sources in anthropological, gender, and historical studies.

Repeatability: This course may not be repeated for additional credits.

HIST 2512. Mexican Migration to the United States. 3 Credit Hours.

Illegal immigration remains a volatile and divisive question for the United States. Most discussions in the political system and in the mass media ignore the extensive history of Mexican migration to the United States. We will examine the pervasive influence of that history upon the present as well as the tight connections that exist between Mexican labor migration and phenomena that most US citizens prize-- the spread of American culture and influence abroad, international political stability, reliable domestic economic growth, and the availability of inexpensive goods and services. Instruction takes place through discussion, lecture, film, and computer projection. Readings include both primary documents stemming from historical events themselves as well as secondary academic studies. NOTE: Students will receive credit only one time for either HIST 2512 or LAS 2512.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 2513. Cold War Africa. 3 Credit Hours.

This course explores African societies and politics during the Cold War. We pay close attention to the ways in which the politics of the Cold War were played out through proxy wars, interventionist policies, and the exploitation of natural resources in newly independent and emergent African nations. At the same time, we examine the ways in which African leaders and nations used the Cold War to define their own post-colonial experiences and identities. In addition, we investigate the significance of African nationalism and independence for redefining race and race relations in South Africa and the United States. Although we use examples from throughout the continent to explore issues of nationalism, sovereignty, race, socialism, and development within the Cold War context, we pay particular attention to Guinea-Bissau, Angola, Congo, South Africa, Ghana, and Ethiopia. Note: For history majors, this course is in the "Global/Comparative" category.

Repeatability: This course may not be repeated for additional credits.

HIST 2514. Introduction to Latin America. 3 Credit Hours.

An overview of Latin American history from pre-Hispanic civilizations through the Spanish and Portuguese colonial periods and nationhood to the present. Organized both chronologically and thematically, the course probes such issues as the rise and fall of political systems; matters of race, gender, and class; the economic conditions of work and survival; and patterns of social and cultural change. Methods of instruction include paperback readings, the Internet, and video clips.

Repeatability: This course may not be repeated for additional credits.

HIST 2515. Civilization and Modernity in the Caribbean. 3 Credit Hours.

This course surveys post-Emancipation Caribbean history, regarding it as a complex process dominated by notions of "civilizing" and "modernizing." We will address the significance of both terms, exploring what they have meant for the diverse peoples inhabiting the region. What did civilizing mean for the labor practices and religious expressions of free blacks and indentured Indians in the late 19th century? What did modernizing mean for concepts of peoplehood, cultural production and representation in the 20th century? Who have been the primary agents of "civility" and "modernity"? And how have others responded to - resisted, embraced, negotiated - their efforts and ambitions? In answering these questions, we will turn to a range of disciplines including history, anthropology, literature and political science. NOTE: Students will receive credit only once for either HIST 2515 or LAS 2515.

Repeatability: This course may not be repeated for additional credits.

HIST 2516. Modern Islamic History. 3 Credit Hours.

This course studies Sunni Islam in terms of its modernist tendencies and its more traditional ones, comparing it to other major trends in the religion, Shi'ism and Sufism. Some emphasis is placed on Egyptian cultural history. The course encourages analytic skills through class participation and written work.

Repeatability: This course may not be repeated for additional credits.

HIST 2517. Cuba: War, Hope, and Revolution. 3 Credit Hours.

This course examines Cuba's history, culture and politics, from its remote past of the Taino people, to its major economic and political changes of the 20th century, to the end of the Cold War and renewed relations with the United States. Students explore Cuba's rich multicultural and multiethnic society and its leading artists, writers, and musicians, from writer and revolutionary Jose Marti, to visionary songstress Celia Cruz to Fidel Castro.

Repeatability: This course may not be repeated for additional credits.

HIST 2518. The Ancient Near East. 3 Credit Hours.

A survey of ancient Mesopotamian culture starting with the end of the neolithic period and covering Sumerian, Akkadian, Babylonian, Assyrian, Neo-Babylonian and Persian civilizations. Students will be introduced to the literature and the archaeology of these cultures and their influence on the Bible and later civilizations.

Repeatability: This course may not be repeated for additional credits.

HIST 2519. Pre-Colonial Africa. 3 Credit Hours.

This course examines the events and processes that shaped African history prior to European colonial rule. Specifically, we explore the changing nature of African cultures; Islam as a political force; the relationship between Christianity, culture, and politics; slavery and the slave trades; and migration and the transformation of the African cultural landscape. Our goal is to understand the forces that shaped African material and political culture prior to European political domination and the relationship between African societies and the wider world to 1900. Note: For history majors, this course is in the "Global/Comparative" category.

Repeatability: This course may not be repeated for additional credits.

HIST 2521. Global Terrorism. 3 Credit Hours.

This course will examine the rise of modern global terrorism from the rise of left-wing Marxist/Leninist terrorism in the 1960s to Jihadi terrorism in the 21st century. The first half of the course will touch on the historical antecedents of terrorism and then look more deeply at such terrorist groups as the IRA in Ireland, ETA in Spain, the Brigade Rosse in Italy, the Red Army Faction in Germany, the FARC and ELN in Colombia, and Shining Path (Sendero Luminoso) and Tupac Amaru in Peru. The second half of the course will examine the transition to the beginnings of a different kind of terrorism that emerged in the 1990s and continues, ever more violently and more effectively, to this day. We will also look at the role of state terrorism. Repeat credit warning: This course is equivalent to HIST 2921. Students may only earn credit for either HIST 2521 or HIST 2921.

Repeatability: This course may not be repeated for additional credits.

HIST 2522. Spanish Conquest of the Americas. 3 Credit Hours.

In 1492, Columbus sailed the ocean blue and ... either discovered or destroyed America, depending on your point of view. By 1542, Spain had claimed most of the Americas and Lopez de Gomara, the private secretary of Hernan Cortes, wrote, "The greatest event since the creation of the world." Later, in the 18th and 19th centuries, both Adam Smith and Karl Marx would make the same claim in their writings. From the very beginning, not only the magnitude but also the meaning of the Conquest of the Americas has been a point of controversy and acclaim. In this class, we will examine the Indigenous societies of the Americas and the Iberian Peninsula on the eve of their cataclysmic encounter, the processes by which the Spanish Conquistadors overran Indigenous territories, the ways in which each of these distinct societies impacted one another, and the hybrid societies that emerged on the other side. **DUPLICATE CREDIT WARNING:** Students can receive credit only once for either HIST 2522, ANTH 2522, or LAS 2522.

Repeatability: This course may not be repeated for additional credits.

HIST 2611. Third World Issues through Film. 3 Credit Hours.

Films bring alive the texture of society and the context of ideas, events, lives, and conflicts in a way that standard textbooks and readings cannot. This survey course introduces repeating, powerful, and important themes in modern history through the study of issues raised in Asian, African, and Latin American cinema. Unit I presents issues of Colonialism, Nationalism, and Independence Movements. Unit II, Post-Colonial Themes, includes nation building, neocolonialism, and responses to neocolonialism as well as issues of cultural reconstruction, political leadership, class, gender, race, and ethnicity in post-independence eras. Written texts complement the films; class discussion and assignments focus on analysis of the characters, events, institutions, and ideas represented in the films and readings.

Repeatability: This course may not be repeated for additional credits.

HIST 2670. Topics in African History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 2680. Topics in Asian History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 2702. Imperialism, Race, and Empire. 3 Credit Hours.

This course introduces key themes and issues central to an understanding of race in modern history. Examining the intersection of race and imperialism-empire over the last two centuries, it places special importance on: how ideas about race were profoundly affected by the colonial encounter; how rationalizations for imperialism have often depended on race; and the resistance of subordinated people to racist discourses and forms of rule. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

HIST 2703. African Diaspora. 3 Credit Hours.

This course deals with the history of the African Diaspora in the Americas for the last five hundred years. How this African presence impacted upon the social, economic, cultural, religious, and demographic set-up of the Americas will be addressed. Themes like pan-African nationalism and racial discourse will also be discussed. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

HIST 2705. Anti-Semitism/Holocaust/Racism. 3 Credit Hours.

This course examines the history of antisemitism with a focus on the Holocaust and racism. It investigates the development and implementation of racial antisemitism in Germany and compares Nazi antisemitism with other forms of racism and antisemitism in Europe and America. The course also explores the social construction of race, the connection between antisemitism and anti-Zionism, the growth of neo-Nazism, the complex relationship between American Jews and African Americans, and racism in the world today. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Be advised that students will only receive credit once for JST 2705, REL 2705, or HIST 2705.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

HIST 2803. Soldiers, Wars, and Societies: The British Army. 3 Credit Hours.

This course will trace the history of the British Royal Army from its founding in 1660-61 to the present. Emphasis will be placed on organization, recruitment, wars, battles, campaigns, prominent commanders, and how changes in the British Army mirrored changes in British society. Other important themes will be the army's role in conquering and defending the British Empire and major developments in British military policy and strategy.

Repeatability: This course may not be repeated for additional credits.

HIST 2804. Peace, Conflict, and Social Change. 3 Credit Hours.

This course addresses the question of conflict/violence in terms of local, domestic, national, and international issues. Course material will consider conflict/violence using the following subtopics: weapons proliferation and peacekeeping; racism, the global economy; women, children, and the family; conflict and cooperation over the environment. Guest lecturers will offer their expertise on particular case studies related to the topic. In the final weeks of the semester, students will be asked to submit a paper and give presentations that address conflict and options for conflict resolution using selected case studies from one of the above topics.

Repeatability: This course may not be repeated for additional credits.

HIST 2805. Nationalism and Revolution. 3 Credit Hours.

Beginning with the establishment of civil and political rights during the French Revolution, the course will address the relationship of the individual to the nation-state in Western Europe from the French Revolution to World War I. The course will include problematical issues that emerged during this period such as: the Napoleonic wars and the emergence of the modern nation-state; the development of the industrial revolution and its socio-economic impact on members of the working and middle classes; the consolidation of the nation-state and its impact on personal and political freedom. But in addition to considering the expansion of liberal political developments in the West, the course will consider the effects of imperialism on Asian and African countries during the final decades of the century. The final unit will consider how nationalism and imperialism contributed to the outbreak of the First World War and to the breakdown of old political states and traditional values in the Western societies.

Repeatability: This course may not be repeated for additional credits.

HIST 2806. Colonial North Africa in European History. 3 Credit Hours.

The Mediterranean has always been a crossroads between peoples and religions, traversed by commodities, ideas, and conquerors, and it remains so today. Yet at the beginning of the 19th century, Europeans increasingly described North Africa - and its people - as starkly foreign, wholly 'other'. This course will examine European and North African interactions over the period of 1798 to the present, with a particular focus on European invasions and colonizations - including Napoleon in Egypt, Lyautey in Morocco, and Mussolini in Libya. How did Europeans shape North African history and how did colonizing North Africa form modern European institutions and ideas? The class will examine these questions by focusing on both sides of the Mediterranean 'divide', including recent debates in Europe on North African immigrants, political invocations of Islam, and Islamophobia.

Repeatability: This course may not be repeated for additional credits.

HIST 2807. Battleground Cinema. 3 Credit Hours.

Films play an important and often unacknowledged role in shaping our understanding of historical events. The influence of war films is especially pronounced in this regard. The vicarious experience of battle leaves strong impressions on the viewer, more often than not mixing fact and fallacy in ways that create a particular, peculiar notion of historical reality. This course will examine war films from the United States, Germany, Great Britain, and the Soviet Union to see how these cinematic representations actually make important historical arguments about hotly contested topics such as the nature, meaning, and causes of war, moral responsibility for atrocities committed in war, and other issues. Students will be expected to view the films outside of class time, which will be devoted to brief lectures and discussions of the issues the films raise.

Repeatability: This course may not be repeated for additional credits.

HIST 2811. World War I. 3 Credit Hours.

The First World War (1914-1918) did more to shape the history of the 20th century than any other military conflict. It led to the destruction of empires, the outbreak of revolutions, and gave rise to Communism, Fascism and Nazism. The war catapulted the United States into a position of global dominance that it still maintains today. The war also transformed modern arts and culture. This course surveys not just the military history of the conflict, but its political, social, and cultural impact on Europe, the Middle East, the United States, Africa, and Asia. Extensive use is made in this course of primary sources, including soldiers' diaries, memoirs, poetry, novels, propaganda, and photographs. Research projects will draw upon extensive online collections.

Repeatability: This course may not be repeated for additional credits.

HIST 2812. World War II. 3 Credit Hours.

This course offers a survey of World War II, the largest and most destructive armed conflict in human history, with coverage of its causes and consequences. It utilizes the prism of grand strategy to analyze national policy and military strategy. In addition to detailed descriptions of major military operations, the course will assess the impact that Adolph Hitler, Benito Mussolini, Winston S. Churchill, Joseph Stalin, and Franklin D. Roosevelt had on the war. While this course emphasizes military events and wartime diplomacy, some attention will be paid to the internal politics of the major belligerents and economic factors. There are no prerequisites for this course.

Repeatability: This course may not be repeated for additional credits.

HIST 2816. Gender, Class, Nation. 3 Credit Hours.

An exploration of social and economic roles of women and men in modern Europe. Comparison of the impact of gender, class, and nationality on middle-class, working-class and peasant women and men in England, France, Germany, Italy, and Russia. The effects of industrialization, nationalism, war, fascism, communism, and the welfare state on women's and men's lives. The evolution of the role of girls and women in the family and the changing status of single and married women in the home and the workplace.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 2817. Gender, War, and Society. 3 Credit Hours.

In wartime, the traditional organization of society is often radically altered to meet the pragmatic and ideological needs of triumphing in the ongoing conflict. Ideas about gender - i.e., how masculinity and femininity are defined - are frequently subject to radical revision in the context of a society at war. This course examines the European and, to a lesser extent, the American experiences of war during the two World Wars and the intervening 20 year period, to understand how war and ideas of gender are related. Using both primary and secondary source materials, as well as films about World Wars I and II, the course looks at the experiences of men and women on the front lines and on the home front, those who participated in the wars and those who resisted them, those who benefited from war and those who were its victims. The course examines not only how wartime experiences construct and revise ideas about gender, but also how the rhetoric of gender is often used to further wartime aims.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 2818. American Icons. 3 Credit Hours.

The Statue of Liberty. Lincoln. Barbie. Route 66. Disneyland. Elvis. Ali. These are all American Icons. This course will explore iconic images of America as a way to understand the central myths, promises, and ideas behind the nation - ideas about freedom, individuality, democracy, mobility, second chances, masculinity and femininity, race and class. Each unit will focus on an individual icon, its origins, what it represented, and how this representation has changed over time and place. The course will invite a critical analysis of these icons and their economic and cultural impact in a global context.

Repeatability: This course may not be repeated for additional credits.

HIST 2819. Global Connections. 3 Credit Hours.

This course introduces students to major themes in global history over the past two centuries. It will chart the trajectory of transnational human relations from the overlapping cosmopolitan webs of the early nineteenth century to the global webs of the early twenty-first century. The course will place equal weight on economic, political, and cultural transformations. Students will explore the economic, political, social, and cultural changes that attended the growth and increasing integration of these webs. They will study the constant tension between conflict and cooperation that simultaneously brought them closer together and pulled them farther apart. The course will help students understand the origins of the current world system by exploring global transformations since the American and French revolutions. Themes include the rise of nationalism; the revolutions of 1848; American expansion; industrialization; the opening of Japan; colonialism; imperialism; world migrations; the decline of the British and the rise of the American empire in the first half of the 20th century; the two World Wars; the cold war; decolonization movements in the 1950s; cultural and economic globalization; and the transportation and communication revolutions of the last third of the 20th century.

Repeatability: This course may not be repeated for additional credits.

HIST 2870. Topics in Women's History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 2882. Independent Study. 1 to 3 Credit Hour.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

HIST 2900. Honors Special Topics I. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 2902. Honors Nazi Germany. 3 Credit Hours.

This course studies the rise and decline of Hitler's Third Reich, from its "intellectual" origins in the 19th century and World War I, through the meteoric rise of the National Socialist movement during the early 1930's, to its demise in the ruins of Berlin in 1945. Special attention is given to the sources of support for Nazism among German voters, the structure of the National Socialist state, the role of Adolf Hitler, the Holocaust, and the causes and consequences of the Second World War. Duplicate credit warning: Students who have taken HIST 1046 or 2102 will not receive credit for taking HIST 2902.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 2906. Honors Trials in America. 3 Credit Hours.

This course will examine American history through the lens of significant trials. Most trials are legal actions that settle quarrels or determine the guilt or innocence of an individual or group accused of a crime. But during the course of American history there have been numerous trials that reflect cultural/social/political issues much more than the ostensible guilt or innocence of the defendant. The Salem Witchcraft trials, for example, tell us much more about the cultural and social milieu of colonial Massachusetts than they do about the practice of witchcraft. The Dred Scott case was not about the status of one man, but about the legitimacy of slavery. The Scopes trial was a battle between forces of modernism versus forces of traditionalism, not about John Scopes. The O.J. Simpson trial was more about race and the legacy of racism than about murder. These are a few of the trials we shall examine. How important are such trials as a force in history? Do trials resolve conflict or fuel conflict? When do trials reflect state, or federal, coercion? When does public opinion determine the outcome of a trial? Duplicate credit warning: Students who have taken HIST 2106 will not receive credit for taking HIST 2906.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 2910. Honors Special Topics II. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 2915. Honors Russian History in Literature and Film. 3 Credit Hours.

In this honors course, students read and study a short history of Russia and then read literary works and watch films depicting various periods, topics, events, figures, and issues in Russian history. Students in the course develop an understanding of the depiction of history in literature and film as contingent on the ideological perspective of the storyteller; students also learn to identify ideological perspective through attention to symbol, metaphor, and theme in both literature and film and, in addition, in film, through attention to lighting, sound and other filmic devices.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 2918. Honors American Icons. 3 Credit Hours.

The Statue of Liberty. Lincoln. Barbie. Route 66. Disneyland. Elvis. Ali. These are all American Icons. This course will explore iconic images of America as a way to understand the central myths, promises, and ideas behind the nation - ideas about freedom, individuality, democracy, mobility, second chances, masculinity and femininity, race and class. Each unit will focus on an individual icon, its origins, what it represented, and how this representation has changed over time and place. The course will invite a critical analysis of these icons and their economic and cultural impact in a global context.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 2919. Honors Global Connections. 3 Credit Hours.

This course introduces you to major themes in global history over the past two centuries. It will chart the trajectory of transnational human relations from the overlapping cosmopolitan webs of the early nineteenth century to the global connections of the early twenty-first century. We will explore the economic, political, social, and cultural transformations that came with the increasing integration of the world. You will study conflict and cooperation, developments that simultaneously brought people closer together and pulled them farther apart. The course will help you understand the origins of the current world system by exploring global connections since the American and French Revolutions. Themes include the rise of nationalism; the revolutions of 1848; American expansion; industrialization; the opening of Japan; colonialism; imperialism; world migrations; the decline of the British and the rise of the American empire; the two World Wars; the cold war; decolonization movements; political, cultural and economic globalization; and the transportation and communication revolutions of the last third of the 20th century.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 2920. Honors Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 2921. Honors Global Terrorism. 3 Credit Hours.

This course will examine the rise of modern global terrorism from the rise of left-wing Marxist/Leninist terrorism in the 1960s to Jihadi terrorism in the 21st century. The first half of the course will touch on the historical antecedents of terrorism and then look more deeply at such terrorist groups as the IRA in Ireland, ETA in Spain, the Brigade Rosse in Italy, the Red Army Faction in Germany, the FARC and ELN in Colombia, and Shining Path (Sendero Luminoso) and Tupac Amaru in Peru. The second half of the course will examine the transition to the beginnings of a different kind of terrorism that emerged in the 1990s and continues, ever more violently and more effectively, to this day. We will also look at the role of state terrorism. Repeat credit warning: This course is equivalent to HIST 2521. Students may only earn credit for either HIST 2521 or HIST 2921.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 2930. Honors Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 2940. Honors Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 3096. Intermediate Writing Seminar. 3 Credit Hours.

The Intermediate Writing Seminar builds on the skills developed in The Historian's Craft. This seminar is writing intensive. The goal of the class is to cultivate research and writing skills to prepare students for the Capstone Seminar in History. Students will complete a variety of projects to build their research and writing skills. Students will work with the instructor and with peer writing partners to revise and edit their work.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HIST 2001.

HIST 3101. Colonial America. 3 Credit Hours.

Many important aspects of U.S. society developed significantly before the Revolution. The purpose of this course is to understand better how this society took shape in that formative early era. The first classes deal with some general issues that colonizers faced as they tried to form and develop settlements in North America, and the way the English entered into this process. Then characteristics of how three regions of the colonies evolved are examined: the South, New England, and the Middle Atlantic. The final few weeks of the course take up changes in political life, economics, and culture that all parts of the colonies experienced in the 1700s and which tended to bring them together towards becoming one new nation, though not a nation without differences and conflicts.

Repeatability: This course may not be repeated for additional credits.

HIST 3102. American Revolution and Republic, 1754-1789. 3 Credit Hours.

This course examines the transformations in politics, culture and society that we call the American Revolution. What was revolutionary and not revolutionary about the period? What did the Revolution mean to the people who lived through it, and how might the answer be different for different groups of people? What was the relationship between the famous, enduring ideals of the Revolution and the realities of life in late 18th century America? And what kind of republic came out of the process? We will also consider the revolution as, among other things, a crisis in the first British empire, the creation of independent states and a nation, a civil war, and a massive slave rebellion, the aftershocks of which reverberated in the 19th century.

Repeatability: This course may not be repeated for additional credits.

HIST 3103. The Early United States, 1787-1846. 3 Credit Hours.

This course covers the political, social, and cultural history of the U.S. from ratification of the Constitution to the beginnings of the crisis over expansion and slavery. It examines the democratization of politics and the problems of national independence; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era's deep and lasting changes.

Repeatability: This course may not be repeated for additional credits.

HIST 3104. 19th Century America. 3 Credit Hours.

This is an advanced level history course aimed at giving history majors and students in other disciplines such as English and Political Science an understanding of the changes in American life during the 19th century. This is truly a "World We Have Lost," a society dominated by agriculture, but becoming increasingly industrial and urbanized. But even though a visit to the world of 100 years ago is as foreign to contemporary students as the visit by the anthropologist to a non-western culture, the consequence for modern American life is immense. The topics discussed in this course are related to the changes in the United States that promoted its development as a multicultural democracy and an economic superpower.

Repeatability: This course may not be repeated for additional credits.

HIST 3105. 20th Century America. 3 Credit Hours.

This course analyzes American politics, society and culture in the 20th century. Among the topics to be analyzed are the changing role of the presidency from McKinley to Clinton, progressivism, World War I, the conflictive 1920s, the depression and the New Deal, World War II, affluence in the 1950s, the Cold War, antiCommunism, racism, the civil rights movement, the rebellious 1960s, the war in Vietnam, Nixon, the Great Society, the women's movement and gender issues, the conservative backlash, and the new diversity.

Repeatability: This course may be repeated for additional credit.

HIST 3107. American Cultural History. 3 Credit Hours.

This course will not attempt to cover all aspects of American cultural history in one semester. Instead, it will examine some important themes from the 19th and 20th centuries. It will use material drawn from elite and popular sources to explore the meaning of "culture" in a diverse, democratic society. It will ask when and why Americans began to think that there was such a thing as American culture. It will interrogate this culture for some basic elements, taking into account the role of such important features of American life as liberalism, pragmatism, patriotism, consumerism, and modernism as well as the impact of science, technology, the arts, and religion. It will distinguish between public culture, intended for the edification of all, and the private cultures of different subgroups.

Repeatability: This course may not be repeated for additional credits.

HIST 3108. Modern American Social History. 3 Credit Hours.

The purpose of this course is to provide an overview of the main elements of American social/economic development during the industrial period, approximately 1870-1945, with some attention to the transition to the post-industrial era after World War II. Topics covered include the growth of new industries and changing work conditions, urbanization, class divisions, immigration and black migration, the changing status of women and the family, and the impact of the Great Depression and the New Deal on American life. Both secondary and primary sources, including two important novels with social history themes, are used in the course, and students are required to write an essay (and give an in-class report) that analyzes a specific primary source dealing with one of the aspects of social history covered in the lectures and required readings. The take-home final exam essay also requires that students evaluate sources. Class participation in discussing the readings is also an important part of the course.

Repeatability: This course may not be repeated for additional credits.

HIST 3151. Local History. 3 Credit Hours.

This course provides an introduction to doing local and regional historical research, especially in collaborative partnership with community organizations such as museums and historical societies. We will learn how to design community research projects and how to harness resources that are particularly relevant to them, such as: census records, fire insurance maps, municipal archives, online databases, public records, images, artifacts, and recorded interviews. Along the way, we will consider the perils and possibilities of doing local history and the extent to which successful collaboration can pivot on competing notions of the past. This course is organized around an actual collaborative partnership with a Philadelphia-area cultural organization wherein you will provide the historical expertise.

Repeatability: This course may not be repeated for additional credits.

HIST 3152. Material Culture for Historians. 3 Credit Hours.

This course introduces students to the major themes, issues, and methods relevant to the study of material culture and the past. Although archaeologists have long concerned themselves with the study of prehistoric objects, only within recent decades have scholars focused their attention on the evidentiary value of historic objects. We will consider the variety of ways in which scholars from diverse fields have sought to infer historical meaning from things and then seek specifically to understand how historians have applied those ideas to their own work. Because this course is also concerned with the role objects play in exhibits and collections, it is particularly well suited to students considering careers in public history.

Repeatability: This course may not be repeated for additional credits.

HIST 3211. Development of the Modern American City. 3 Credit Hours.

The course examines the way that the American city has undergone two revolutionary changes in the 135 years since the Civil War. In the mid- to late 19th century the city went from a walking city to a streetcar city, altering the basic social and economic geography. Then in the 20th century American cities were transformed from streetcar cities to automobile cities, again revolutionizing the cities' basic geography. The two transformations were rooted in technological innovation in such areas as transportation, power, and building construction. But the changes also depended upon what American urban dwellers chose to make of the technologies. History, by examining the way that American cities have changed in the past, can illuminate what the American city has become and thus can provide insight into the factors that should be taken into account in influencing the future of cities.

Repeatability: This course may not be repeated for additional credits.

HIST 3214. North American Environmental History. 3 Credit Hours.

This course examines the interactions between human societies and the natural world in North America. That relationship is complex: the environment both reflects people's influences and affects human history. Through lectures, reading, and discussion, participants in this course will examine this reciprocal relationship. Issues to be discussed in the course include Native American management of the environment; the effects of the European ecological invasion; resource exploitation in the industrial era; the foundations of the preservationist and conservationist movements at the beginning of the 20th century; the evolution of 20th century environmentalism; and the historical context of current environmental problems.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

HIST 3215. Historical Roots of Urban Crime. 3 Credit Hours.

The course focuses on two aspects of the history of the underworld of American cities: The first aspect might be called the life within the underworld, or what it means to live the life of a criminal. The course examines how bookmakers or madams run their businesses, how pickpocket gangs pick pockets, how loan sharks collect their money, and what kind of culture and social life characterizes those who are part of the underworld life. The second aspect is the way that underworld activities both reflect and influence the wider society. The course, then, examines the interrelationships of crime, on the one hand, and ethnic groups, neighborhood structure, urban politics, criminal justice institutions, the rise of professional sports, the changing sexual mores of the society, and even such aspects as the changing role of the family and the impact of technology. Crime becomes a prism through which students will learn about the history of American urban society.

Repeatability: This course may not be repeated for additional credits.

HIST 3216. Media and American Culture, 1706-Present. 3 Credit Hours.

This course will explore the role of media in the development of American popular culture, with particular emphasis on the cultural transformations brought about by mass media after 1880. Historical analysis will demonstrate the profound shift in media roles within the past century; from media expressions of popular culture before 1889, to media as generators of popular culture after that point. A by-product of this analysis will be the formulation of a critical definition of mass media in terms of a specific relationship between the media and the audience.

Repeatability: This course may not be repeated for additional credits.

HIST 3217. African American Church and Black Liberation. 3 Credit Hours.

Race has been and is a central issue in America. Race has played a very important role in the lives of black people and in the history of African Americans. Historically the black church has been a central institution for addressing pressing societal issues that threaten the existence of black people. African Methodism, the first major black Christian organization came into existence as a liberation movement and a protest against racism and segregation in the Christian Church. Utilizing selected historic periods, i.e., ante-bellum, Civil War and Reconstruction, the 1920s and 1930s, and the 1960s, this course will explore the meaning of freedom and liberation as defined by the historic African American church and its leadership, and will examine the different ideologies and strategies employed by church leaders in addressing and resolving issues regarding the individual and collective freedom of black people. American and African American history will be used as the context, for examining issues, events, movements and personalities important to understanding the role and impact of the black church on the development of liberationist black thought and movements during different periods.

Repeatability: This course may not be repeated for additional credits.

HIST 3221. Jewish Experience in America. 3 Credit Hours.

This course considers the evolution of the Jewish community in the United States from its colonial beginnings to the present day. Topics include the immigrant experiences of various waves of migration, especially from Eastern Europe; the development of the major religious movements within Judaism; the role of Jews in American culture, economy, and politics; relationship between American Jews and Israel; assimilation and identity.

Repeatability: This course may not be repeated for additional credits.

HIST 3225. Women in U.S. History. 3 Credit Hours.

The principal theme of this course in women's history can be summed up in this phrase: "Unity, Difference, and Diversity: The Search for Sisterhood and Beyond." Working with a textbook, a number of scholarly articles, and documents that come from throughout American history, we will explore the ways in which women have both been affected by, and helped to shape, this nation's history. Our emphasis will be on how women of different socioeconomic backgrounds, races, and ethnic groups have experienced colonization, American expansion, sectionalism, the industrial revolution, urbanization, immigration, war, economic depression, cultural transformations and political change. We will be looking not only at commonalities but also differences among women as well as the conflicts between women and a society based on male supremacy. We will be exploring how race, ethnicity, and class affect the experience of gender. NOTE: Students will receive credit only once for either HIST 3225 or GSWS 3225.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 3228. America's Rise to Globalism. 3 Credit Hours.

This course will trace the contours of U.S. foreign policy from its colonial origins through the destruction of the myth of isolationism produced by the attack on Pearl Harbor. Although the syllabus proceeds chronologically, the lectures and readings emphasize thematic continuities and discontinuities. These themes include the ideological, strategic, economic, cultural, and racial influences on America's foreign relations; mission, manifest destiny, and continental expansion; issues of war, peace, and security; crisis management and mismanagement; the closing frontier and imperialism; Wilsonianism and its critics; independent internationalism; and personal versus coalition diplomacy. Because the study of diplomatic history is highly interpretative, and the assigned studies reflect competing interpretations, all students will be expected to question, comment upon, and yes, even criticize the readings and lectures. In doing so, emphasis will be placed on recognizing and assessing the strategies historians employ to collect and use evidence in order to advance arguments. Students will be required to "volunteer" at the start of each session to summarize briefly and cogently the primary issues and arguments covered in the preceding one, and students should be prepared to respond to questions and references to the readings that will be incorporated into each session's lectures.

Repeatability: This course may not be repeated for additional credits.

HIST 3229. Superpower America. 3 Credit Hours.

This course surveys the history of U.S. foreign relations from World War II to the present. It focuses on the ways that political, economic and cultural forces, both at home and abroad, helped shape America's relationship with the wider world. The course deals with issues such as the American response to the challenge of war; the impact of anti-Communism on American society and foreign policy; the role of economic interests in shaping U.S. foreign policy; and the creation of the national security state during the Cold War. This course shows the many ways that the United States has deployed its power during what is often called the American Century.

Repeatability: This course may not be repeated for additional credits.

HIST 3231. German Minority Identities: Gendered and Cultural Dimensions (in English). 3 Credit Hours.

Germany has vibrant migrant communities with ethnic and racial groups from places as diverse as Turkey, Italy, Greece, Morocco, East Africa, and Russia. This course looks at the presence of minority communities in Germany today, their history and cultural influences as well as economic contributions. Our main analytical lens will be gender - how the German host culture is shaped by concepts of femininity and masculinity, sexuality, family, and a gendered division of labor and how these concepts are challenged (and/or shored up) by the various ethnic communities. We will look at both the perception of migrants by white/native Germans (how are they portrayed in the media, film, and politics?) and we will explore the voice of the "other", i.e. the experience of minority communities living in Germany and how this influences their own cultural identities. Questions we will ask include: How does the experience of immigration affect the identity of minorities living in Germany? What does "Deutsche Kultur" (German culture) mean today? Our focus will be on how gender shapes and underlies much of these discussions on minorities in Germany as well as their negotiations of conflicting expectations of community and larger "German" culture. Course material will include critical readings, films, and other cultural texts. Taught in English.

Repeatability: This course may not be repeated for additional credits.

HIST 3235. Weimar Culture: Race, Gender, Sexuality and Nation (in English). 3 Credit Hours.

This class explores the contradictions in German culture during the Weimar Republic (1918-33), with particular attention to its urban centers. Berlin was considered the European capital of artistic and experimental subcultures as well as the hotbed for radical politics, whose decadent Bohemian culture of sexual experimentation, drug use, women's liberation and cabaret existed side by side with abject poverty and street violence. We will ask questions such as how Hitler could come to power in a Germany that was considered to have the most advanced science, technology, literature, philosophy and art of its time, and whose Jewish citizens contributed to all areas of society? How did a new consumerism contribute to the complacency of many Germans in the face of a violent fascism? Thereby we will pay attention to how concepts of race, gender, sexuality and nation shaped the debates of the time. We will watch movies, read literature and graphic novels, and learn about the Weimar Republic's political landscape and history. This course is conducted in English. All films are subtitled and readings are in English.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 3280. Topics in American History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 3311. Greek History. 3 Credit Hours.

The Greek History survey begins with the Bronze Age and ends shortly after the Peloponnesian Wars. Students will read a narrative history, a study of the art in historical context, and a selection of the ancient literary sources upon which our knowledge is based. Strong emphasis is placed on the archaeological material and how it is used to augment the literary sources. The philosophical and cultural achievements of ancient Greece will be put in historical context.

Repeatability: This course may not be repeated for additional credits.

HIST 3312. Roman History. 3 Credit Hours.

This survey of Roman History begins with the foundation of Rome in the 8th century B.C. and ends with the founding of the Christian capital of the Empire at Constantinople. Students will read a narrative history, a study of various aspects of Roman society and culture, and a selection of the ancient sources upon which our knowledge is based. Archaeological material will be used to augment the literary sources. The influence of Rome on later Western Civilization in government and law will be studied as well as its role in determining the foundation of Christianity.

Repeatability: This course may not be repeated for additional credits.

HIST 3321. Irish History. 3 Credit Hours.

Irish and Irish American culture, society, religion, and problems associated with minority status and oppression. Special questions relating to the changing structure of family ties and women and related issues; Irish American consciousness as exemplified by support over the recent troubles in Northern Ireland. The recent and dramatic improvements in the standard of living in the Republic and the growing disparity amongst the urban Irish will serve to complete this study.

Repeatability: This course may not be repeated for additional credits.

HIST 3331. History of England. 3 Credit Hours.

How the kingdom of England was created and how its government evolved from a feudal monarchy to a constitutional democracy that has been a model for other countries, especially the United States. How England became the first industrial nation and how its society and culture responded to this change.

Repeatability: This course may not be repeated for additional credits.

HIST 3332. Historic Britain, 1688-1815. 3 Credit Hours.

This course examines British history from the "Glorious Revolution" of 1688 through the end of the Napoleonic Wars in 1815. Using a variety of primary and secondary sources, including novels, the course will examine the debates and arguments that contributed to the establishment of the modern industrialized nation-state in Britain. The course examines such important events as the industrial revolution and its implications for Britain and the world, the development of a constitutional parliamentary form of government which was important for the nascent United States, as well as for Britain, the development of mass politics and radical politics, and Britain's involvement in European and world affairs.

Repeatability: This course may not be repeated for additional credits.

HIST 3333. Modern Britain: Empire, War, Rock and Roll. 3 Credit Hours.

This course examines the history of Britain from the end of the Napoleonic Wars in 1815 until the present. Using a variety of historical sources, including primary and secondary historical sources, as well as novels and journalistic reportage, the course looks at the critical questions that have faced Britain and have influenced world history over the course of the 19th and 20th centuries. Among the issues to be examined are the development of mass politics, and the inclusion of the working classes and women in the British polity, the development and Thatcherite decline of the welfare state, the construction and demise of the British Empire, Britain's military and diplomatic roles in the two world wars, and position in the emerging European Union. The course examines these questions from a variety of different angles, including political, cultural, economic and social.

Repeatability: This course may not be repeated for additional credits.

HIST 3341. French Revolution and Napoleon. 3 Credit Hours.

This course will treat the history of the French Revolution from the mid 18th century through the Napoleonic era (1750-1821). Material in the course will address varied interpretations of the revolution from classical Marxist to more recent cultural, feminist, and post-modern perspectives on the subject. In addition to various texts on the revolution, the course also includes a detailed discussion of Napoleon Bonaparte's military and political career with due consideration given to the French empire and its impact on the subsequent political configuration of 19th century Europe.

Repeatability: This course may not be repeated for additional credits.

HIST 3342. Revolutionary Europe. 3 Credit Hours.

This course treats major social, political, and cultural revolutions that occurred in Europe during the modern period (1789-1989). By addressing specific revolutions, the class will attempt to discern some patterns in the causes and occurrence of revolutionary events. More precisely, the course will consider historical factors related to the outbreak of revolutions due to rural economics, industrial transformation, class conflict, commercial changes, and ideological influence prior to or during revolutionary periods. Specific topics include: the French Revolution; the Industrial Revolution and Revolutions of 1848; the French Commune; the Russian Revolution, and the social and cultural revolutions of the 30's.

Repeatability: This course may not be repeated for additional credits.

HIST 3351. Rome and Italy: Renaissance to the Present. 3 Credit Hours.

A broad survey of Italian history from medieval to modern times. Although the unified Italian state is a modern creation little more than a century old, Italy gave birth to Europe's first urban civilization in its glorious renaissance cities. Italy finally achieved unity and played a major role in European affairs, which unfortunately included two world wars and the fascist dictatorship of Benito Mussolini. More than is the case with most countries Italian history is the history of its great cities like Rome, Florence, Venice, and Milan. We will focus on those centers, especially Rome, which is also the home of the Popes whose role in Italian and world history is immense, and Florence, the home of great artists and such great modern figures as Dante, Machiavelli, and Galileo.

Repeatability: This course may not be repeated for additional credits.

HIST 3352. Roman Archaeology. 3 Credit Hours.

In this course, students will discuss and examine the physical remains of Roman culture, and explore the ways these artifacts affect the study of history. After looking at the Greek and Etruscan contributions to Rome life and a brief look at the limited remains from Republican Rome, the material from the Roman Empire will be surveyed. Special attention will be paid to architecture, city planning and sculpture. Detailed examination of the ruins from the cities of Rome, Pompeii, Herculaneum and Ostia will comprise the bulk of the course. Students will be expected to do some work at area museums.

Repeatability: This course may not be repeated for additional credits.

HIST 3353. Modern Italy - From Napoleon to Hitler. 3 Credit Hours.

The formation and consolidation of a centralized Italian state - known as the Risorgimento - occurred relatively late in the history of European nation-state formation. In this course, we will examine the rise of Italian nationalism during the Napoleonic invasions of the 1790s to the proclamation of Rome as the Italian capital in 1871. From there, we will turn to an in-depth analysis of the cultural, social, and political legacies of the process of unification. From this perspective, we will explore issues of regionalism and national identity in Italy's position abroad including Italian imperial expansion and Italy's role in World War I and World War II. Finally, we will ask how legacies of Allied and Nazi invasions persist in post-War Italy.

Repeatability: This course may not be repeated for additional credits.

HIST 3362. Russia: Nationality and Empire. 3 Credit Hours.

This course examines factors and events that shaped Russia's history between 1700 and 1917. Special focus is on the role of "enlightened" autocracy, the rise of bureaucratic state, and spread of Western values, but also on various forms and ways of popular resistance, from peasant's rebellions to Populists and revolutionaries. Another emphasis is on placing Russian history in a broader context of modern European history, Enlightenment, liberalism, and progressivism. Lectures and reading projects are complimented by wide use of multimedia and Internet resources, films and music.

Repeatability: This course may not be repeated for additional credits.

HIST 3363. Russia: Revolution, State, and Empire. 3 Credit Hours.

This course focuses on the rise and fall of the Soviet Union, from the Russian Revolution of 1917 until the collapse of the Soviet Union in 1991. It deals with major factors and events, including Communism, two world wars, and the Cold War, that shaped Soviet history. The course explores Soviet impact on European and world developments, and Soviet motives in confrontation with the United States. Reading and lectures are complimented with multimedia and Internet sources, discussions and individual presentations. Cross-Listed with POLS 3363. Students will receive credit for only one course from: HIST 3363 or POLS 3363.

Repeatability: This course may not be repeated for additional credits.

HIST 3411. Belief and Society in Pre-Modern Europe. 3 Credit Hours.

An examination of changes in belief systems (both religious and ideological) and their impact on, and influence by, the society around them. The course will focus especially on beliefs as understood and interpreted by the wider society, not just a few intellectuals. Focus is on diversity of belief and practice within an overwhelmingly, but not monolithically, Christian society.

Repeatability: This course may not be repeated for additional credits.

HIST 3412. Power and Conflict in Pre-Modern Europe. 3 Credit Hours.

An examination of the kinds of power struggles that took place in Europe during the medieval and early modern period, and the military, legal, and other means used to resolve them. Struggles among monarchs and territorial magnates; the Crusades; heresy and its suppression; religious wars; and much more local and personal disputes as well.

Repeatability: This course may not be repeated for additional credits.

HIST 3422. Art, Culture, and European Societies. 3 Credit Hours.

This course examines the shift from elitist forms of representation in the arts to the increased popularization (and democratization) of European politics and culture from the 18th to the 20th centuries. Using both contextual (historical) and formal (art historical) tools for analysis, the class will trace stylistic changes in art, literature, music and the press. More specifically, this includes a consideration of political propaganda and neoclassicism during the revolutionary epoch to romanticism, realism, impressionism, and expressionism concurrent with the establishment and commercial expansion of the modern nation state. Additionally, the course will consider the "democratization" (or popularization) of visual and material culture through the lithographic press, the daily newspaper, photography, and poster publicity. The concluding unit will incorporate visual propaganda in particular European countries during the perilous decades that preceded and followed World War I.

Repeatability: This course may not be repeated for additional credits.

HIST 3423. Glitter and Doom: Europe, 1885-1914. 3 Credit Hours.

Known as the belle epoque (the beautiful era) to some, and the fin de siecle (the end of an era) to others, the period from 1885 to 1914 has been described in terms of promise and crisis, glitter and doom. On the one hand, this was a time characterized by urban growth, mass culture, modernisms, scientific and technological advances, as well as new genders and sexualities. On the other hand, it was the crisis-ridden period leading up to World War One, marked by imperialism in Africa, an arms race, rising anti-Semitism, fears of degeneration, as well political radicalism. In this course, we will explore this transformative period in greater detail, with particular emphasis placed on social, cultural, and gender historical approaches. We will also consider a range of primary sources from politics, literature, philosophy, science, feminism, as well as art and music.

Repeatability: This course may not be repeated for additional credits.

HIST 3428. Fascism, a History. 3 Credit Hours.

Europe between the First and Second World Wars (1918-1938) was riddled with political divisions, economic collapse, and the rise of extremist political movements. The most notorious was fascism. Perhaps no other term is used and misused with greater frequency in contemporary politics, but to understand what fascism really means, you have to examine where and when it developed in the past. This course will focus on the origins of fascism in interwar Italy. But we will also trace the connections between fascism in Italy and the Nazi regime in Germany as well as the proliferation of fascist movements and parties throughout Europe and beyond. We will delve into a variety of topics and historical debates concerning the popularity of fascism, the culture of fascism, and the legacies of fascism.

Repeatability: This course may not be repeated for additional credits.

HIST 3431. Women's Lives in Modern Europe. 3 Credit Hours.

This course treats issues related to women's status and power in Modern European History from the 18th century to the present. The emphasis of the course will be on the experiences of women in England, France, Germany, and Russia where significant economic and political changes have occurred in the past few centuries. The purpose of this course is to discuss important issues that women have confronted in the past, and that continue to influence problems that women face today such as: personal, economic, and political power, education, sexuality, psychology, and social esteem, women's position in the home and workplace plus the continuing question of conventional versus unconventional gender roles in Western Societies. To supplement a general text and several published sources in European history, students will be reading memoirs and essays written by women on economic, political, and social issues pertaining to women, work, and the family during the past two centuries.

Repeatability: This course may not be repeated for additional credits.

HIST 3433. Blood and Iron: 19th Century European Diplomacy. 3 Credit Hours.

This course will be a survey of the history of European diplomacy from the wars of the French Revolution until the outbreak of World War I in 1914. Modern warfare, nationalism, and tremendous economic, social, and technological upheaval shaped the 19th century and fundamentally altered the way nation-states interacted. Therefore, we cannot be content in this course to study the biographies of Metternich, Napoleon III, Bismarck, and other great diplomats of the 19th century, though they will receive due attention. In order to explain the events that in many ways laid the groundwork for the world situation in our own time, we will examine cultural and intellectual movements, military and scientific innovations, and political and social changes that still affect the way nations conduct diplomacy.

Repeatability: This course may not be repeated for additional credits.

HIST 3434. Cold War from the Other Side: The Communist Countries and International History, 1945-1991. 3 Credit Hours.

The course will explore the history of the Cold War from the perspective of the main U.S. adversaries in the Cold War: the Soviet Union and China. Also, the course provides secondary themes, covering the motives and actions of other communist countries, including Eastern European countries, Vietnam and Cuba.

Repeatability: This course may not be repeated for additional credits.

HIST 3480. Topics in European History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 3511. Southern Africa: A History. 3 Credit Hours.

This course deals with the history of Southern Africa focusing on South Africa. It also includes the history of Angola, Mozambique, Namibia, Zambia, and Zimbabwe. A good part of the course deals with a detailed study of the history of apartheid in South Africa from its inception to its political demise in 1994. It also deals with the history of African resistance against the Dutch-British racial order. Some of the themes of the course include: African societies in Southern Africa; European slave traders, settlers, and colonizers (Portuguese, Dutch, British, and German); racism and apartheid in South Africa and Southern Africa at large; African nationalism and the struggle against white domination; the demise of Portuguese colonialism in Angola and Mozambique; the political demise of apartheid and post-apartheid Southern Africa.

Repeatability: This course may not be repeated for additional credits.

HIST 3521. The Chinese Revolution. 3 Credit Hours.

This course is a general introduction to the Chinese Revolution (1921-49) from the perspective of sociopolitical history. Special emphasis on: the internal historical trends and external (semi-colonialist) interventions that shaped the struggle for revolutionary change in the 20th century; conditions in the countryside on the eve of revolution; the urban and rural contours of the Communist Movement; the evolution of Mao Zedong's thought; and revolutionary process and dynamics.

Repeatability: This course may not be repeated for additional credits.

HIST 3522. Contemporary China. 3 Credit Hours.

This course examines society, the state, and popular politics in the Peoples' Republic of China from 1949 to the present. Special emphasis on: revolutionary transformation and socialist construction during the Maoist years (1949-79); the postsocialist trajectory and its critique over the last two decades. Note: This course is cross-listed with Asian Studies 3522. Students may only receive credit once for these courses: ASST 3522 or HIST 3522.

Repeatability: This course may not be repeated for additional credits.

HIST 3531. Modern India. 3 Credit Hours.

Beginning with some of the basic social structures of village India, we move on to study changes introduced by the British during 200 years of colonial rule. An analysis of anti-imperial nationalism, headed by Gandhi, leads in turn to the study of India since independence in 1947, with special attention to international relations, non-governmental organizations, the politics of religious militance, and the causes and consequences of India's opening to the global economy. Note: This course is cross-listed with Asian Studies 3531. Students may only receive credit once for these courses: ASST 3531 or HIST 3531.

Repeatability: This course may not be repeated for additional credits.

HIST 3541. Japan Today. 3 Credit Hours.

This course examines important social, political, and economic trends in Japan from 1945 to the 1990s through lecture, discussion, audio-visual materials, and group oral reports. Topics include the Occupation, the "economic miracle," state and society, the world of work, women, and gender, international relations, impact of affluence, post-bubble Japan, and varying approaches to the study of postwar Japanese history and society. Note: This course is equivalent to ASST 3541; students may receive credit for either HIST 3541 or ASST 3541.

Repeatability: This course may not be repeated for additional credits.

HIST 3542. Women and Society in Japan. 3 Credit Hours.

This course analyzes the changing position of women in Japanese society from ancient times to the present. Through discussions, lectures, and audiovisual materials, students learn about goddesses, female diviners, empresses, the classical female writers, women in warrior culture, women in industrializing Japan, and Japanese women's movements. NOTE: Students will receive credit once for either HIST 3542, ASST 3542, ASST 3942, or GSWS 3542.

Repeatability: This course may not be repeated for additional credits.

HIST 3551. History of Vietnam. 3 Credit Hours.

Emphasizing cultural, social, and economic factors, the course traces Vietnamese history from its mythological origins to the 21st century. Topics include indigenous social formations, the period of Chinese domination, the rise of independent Vietnamese dynasties, the French colonial era, the Vietnamese Revolution, and the three Indochina Wars, including the Vietnam Conflict in the 20th century. It will close with consideration of life under the current Socialist Republic of Vietnam. Note: This course is cross-listed with Asian Studies 3551. Students may only receive credit once for these courses: ASST 3551 or HIST 3551.

Repeatability: This course may not be repeated for additional credits.

HIST 3561. History of Brazil. 3 Credit Hours.

Brazil is one of the world's largest nations being inferior in territorial size only to the United States, Russia, and China. With more than 150,000,000 people, Brazil is second in population among western hemisphere nations to the United States, and far larger than any Latin American nation. Brazilians can claim national unity solidly based on a common language and common cultural heritage. Brazilians are descended from Native Americans, Africans, and Europeans, but can claim a recent history relatively free of ethnic or racial strife. Brazil is rich in natural resources, and has one of the world's few natural resource frontiers. Finally, Brazil continues to produce outstanding architects, artists, writers, composers, social scientists and legal intellectuals, religious and political leaders, entrepreneurs and athletes. At the same time, persistent problems block Brazilian development. They include widespread racism and class bias, excessive dependence on foreign capital and technology, a shamefully inadequate public school system, a perverse distribution of income that favors the wealthy, and fragile democratic institutions. After 500 years of history, Brazilians have immense tasks before them, while the promise of national greatness remains unfulfilled.

Repeatability: This course may not be repeated for additional credits.

HIST 3562. Contemporary Mexico. 3 Credit Hours.

Over the past several years, Mexico has become increasingly integrated with the United States economically, socially, and culturally; a phenomenon that has presented new challenges to both countries to organize this irreversible process constructively. We will look at the present-day questions between the United States and Mexico through the experience of Mexico's history since 1940. This period includes decades of industrialization, city growth, labor migration to the United States, cultural flourishing, political restlessness, the emergence of narcotics trafficking, and incorporation into the North American Free Trade Agreement (NAFTA). This course concludes with some speculative considerations about the future. Instruction takes place through discussion, lecture, film, computer projection, and readings from the new historical scholarship that has emerged on post-1940 Mexico.

Repeatability: This course may not be repeated for additional credits.

HIST 3563. Puerto Rican History. 3 Credit Hours.

This course explores particular issues related to the political, economic, and social development of Puerto Rico with special emphasis given to the 19th and 20th centuries. The course will not only address historical paragons but also questions of interpretations. In each class a combination of readings, discussion, lectures, and videos will be used to view the various issues in a comprehensive manner.

Repeatability: This course may not be repeated for additional credits.

HIST 3564. Caliban's World: Cultural Politics in the 20th Century Americas. 3 Credit Hours.

This course considers the history of struggles for decolonization primarily but not exclusively in the Americas during the 20th century. It focuses particularly on the uses of "culture" and the significance of creative expression in movements dedicated to dismantling the hegemony of the "West." From writers wrestling with Shakespeare's *Tempest* to musicians arranging artful ways to "curse," we examine texts, music and films in which people work to imagine a world beyond colonialism.

Repeatability: This course may not be repeated for additional credits.

HIST 3566. Race, Gender, and Empire in the Iberian World. 3 Credit Hours.

Latin America is a culturally rich and diverse region. Its complex and fascinating history is the product of different worlds and cultures coming together in the 16th century. In this course we will analyze this encounter and its consequences by looking at two main topics: race and gender. Following a chronological order that starts with the conquest of the Americas by the Spaniards and Portuguese in the 16th century and ends with the breakdown of the Spanish empire in the early nineteenth century, the course will explore the ways in which different peoples have interacted. We will discuss the various roles men and women assumed in these societies and the significance of race. In so doing, we will attempt a deeper analysis of the social dynamics of Latin America in the past that will give us a better understanding of its present and future. Note: For history majors, this course is in the "Global/Comparative" category.

Repeatability: This course may not be repeated for additional credits.

HIST 3571. Israel: History, Politics and Society. 3 Credit Hours.

This course traces the political and social history of modern Israel/Palestine since the late 19th century, examining the evolution of Zionism; the relationship between Jews and Muslims; the conflict between Zionists and Arabs; the development of the Jewish settlement in Palestine; and the creation of the State of Israel. It explores Israeli politics, society and identity, especially the role of immigration, ethnicity and religion, and also discusses the wars and tensions between Israel and neighboring Arab states; the status of the Arab/Palestinian minority in Israel; and the growth of Palestinian nationalism, the PLO and Hamas. Through studying Israeli history, politics and society this course helps students gain an understanding of the ongoing conflict in the Middle East.

Repeatability: This course may not be repeated for additional credits.

HIST 3572. Modern Middle East. 3 Credit Hours.

This course surveys the history of the modern Middle East, analyzing some of the great controversies of the region. How the modern Middle East arose, why so many conflicts in the region in modern times have taken place, why the Great Powers have been so involved, and how the struggles of the working class have fared are among the questions to be addressed.

Repeatability: This course may not be repeated for additional credits.

HIST 3580. Topics in Asian History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 3606. Asian Women in Transition. 3 Credit Hours.

This course introduces and compares the experiences of women in Asia and Asian women in migration to the United States in the modern period, including rural and urban women, and ordinary and elite women in the late 19th and 20th centuries. Topics include women in households, women and work, and women's activism. Duplicate credit warning: Students may only receive credit for one of the following: ASST 3696, HIST 3696, GSWS 4696, ASST 3606, HIST 3606, or GSWS 3606.

Repeatability: This course may not be repeated for additional credits.

HIST 3675. Third World Women's Lives. 3 Credit Hours.

Explores the themes of imperialism, colonialism, class, race, interlocking oppressions, commitments to family and community, migration, resistance/insurgency/revolution, collective action, memory, and alternative visions as crossroads of identities in Third World women's lives. Utilizes a variety of source materials with emphasis on the voices of Third World women themselves (testimonies, oral interviews, and documentary visual media). Compares these life texts to those of other working women as they speak to the experiences of being women of color or poor white women in a late capitalist world. Develops the tools for understanding the experiences and perspectives of diverse groups of women to create liberating ways of thinking and living.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 3711. The City in History. 3 Credit Hours.

From Catal Huyuk and Sumer to Florence and Xian to Manchester and Ahmedabad to Los Angeles and Mexico City we examine the significance of the city in the economic, political, social, and cultural life of our planet. Why and how have people created such different kinds of cities? What interest groups have dominated them? What strategies have planners proposed for making them more liveable? For whom? How can studies of cities in other times and places help us understand our own cities? Extensive use of visual materials and some field trips.

Repeatability: This course may not be repeated for additional credits.

HIST 3741. Comparative Slavery. 3 Credit Hours.

This course deals with the study of comparative slavery in four distinct historical-cultural domains: Ancient Greece, "New World" slavery, Arab-Ottoman Islamic civilizations, and Africa. The course analyzes the four locales separately, and compares similarities in the general structure of slave societies as well as differences in their details. Issues pertaining to manumission or the lack of it and integration of ex-slaves into the larger society will be discussed.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 3751. Colonialism and Decolonization. 3 Credit Hours.

This course looks at the decline and fall of the modern European empires. It adopts a case study method to allow students to acquire in-depth knowledge of the colonial and post-colonial environment in four distinct regions of the world: Indonesia, North Africa, India and West Africa/Britain. The course examines the cultural construction of colonialism in Indonesia and North Africa, examining such issues as relations between the colonizers and the colonized peoples in terms of race and gender, construction of an imperial architecture and environment, and modes of resistance to the imperial project. Moving to India, the course looks at the rise of colonial nationalism, including the various discourses and tactics that are implemented to resist, modify, and ultimately abolish colonialism. Finally, the course examines the repercussions of imperialism for the contemporary, discussing post-colonial theory and the cultural, economic, political, and demographic effects of de-colonization on both Europe and its former colonies.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HIST 3811. World Economy Since 1945. 3 Credit Hours.

At the turn of the millennium, economic globalization is profoundly transforming many long-standing patterns of human existence. Public discussion about globalization, nevertheless, remains often shallow and misleading. This course aims to offer a deeper perspective on the present by examining the experience of the world economy over the formative period since World War II. It concentrates on two basic questions: 1) How did the domestic and global foundations of the current world economy come into being over the last half century? And 2) What are the implications of this historical process for our immediate and future lives? As an intermediate level course, it assumes no prior student backgrounds in either history or economics--only a lively interest in learning about broad historical trends and in developing intellectual skills. In addition to discussion, lecture, and common readings, methods of instruction in the course include use of a computer-assisted classroom to provide image and text projections, video clips, and Internet linkages.

Repeatability: This course may not be repeated for additional credits.

HIST 3860. Topics in World History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 3870. Topics in World History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 3880. Topics in Comparative History. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Repeatability: This course may be repeated for additional credit.

HIST 3900. Honors Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 3910. Honors Special Topics. 3 Credit Hours.

Arranged each semester, please consult with the instructor. See the history department web site (www.temple.edu/history) for the specific topics offered each semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 3911. Honors World Economy Since 1945. 3 Credit Hours.

At the turn of the millennium, economic globalization is profoundly transforming many long-standing patterns of human existence. Public discussion about globalization, nevertheless, remains often shallow and misleading. This course aims to offer a deeper perspective on the present by examining the experience of the world economy over the formative period since World War II. It concentrates on two basic questions: 1) How did the domestic and global foundations of the current world economy come into being over the last half century? And 2) What are the implications of this historical process for our immediate and future lives? As an intermediate level course, the World Economy Since 1945 it assumes no prior student backgrounds in either history or economics--only a lively interest in learning about broad historical trends and in developing intellectual skills. In addition to discussion, lecture, and common readings, methods of instruction in the course include use of a computer-assisted classroom to provide image and text projections, video clips, and Internet linkages.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 4096. Capstone Seminar in History. 3 Credit Hours.

This course is the culmination of the writing sequence in the Department of History. In this seminar, students will develop their skills as researchers and writers of history. Each student will define their own research project, write and revise a significant piece of research, collaborate with peers in improving their work, discuss history as a field, and present their research.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HIST 3096.

HIST 4282. Independent Study. 3 Credit Hours.

Arranged each semester, please consult with the instructor

Repeatability: This course may be repeated for additional credit.

HIST 4289. Fieldwork in History. 3 Credit Hours.

Arranged each semester, please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

HIST 4400. Special Topics in History. 3 Credit Hours.

Arranged each semester; please consult with the instructor for a specific course description. The history department web site (www.temple.edu/history) provides a listing of the specific topics offered each term.

Repeatability: This course may be repeated for additional credit.

HIST 4697. Modern Japan: Empire, War, Society. 3 Credit Hours.

Was early modern Japan (1600-1867) static or dynamic? Do the roots of Japan's modern achievements (1868-1945) lie in her early modern culture? What happened to Japan after the 1868 Meiji Restoration, and why? Was modernity a blessing or a curse? We'll find answers to questions like these as we survey Japanese society, culture, and events and trends at home and abroad from the Tokugawa shogunate to the Pacific War. Assignments focus on writing a comparative review. Note: This course is cross-listed with Asian Studies 4696. Students may only receive credit once for these courses: ASST 4696 or HIST 4697.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

HIST 4880. Special Topics: World/Comparative History. 3 Credit Hours.

Arranged each semester; please consult with the instructor for a specific course description. The history department web site (www.temple.edu/history) provides a listing of the specific topics offered each term.

Repeatability: This course may be repeated for additional credit.

HIST 4934. Honors Historiography and Research Methods. 3 Credit Hours.

This course is designed for upper-level history Honors majors, and for upper-level students more generally who are working on research projects that involve historical inquiry. The course has as a starting point three fundamental questions: 1) How do historians frame meaningful research problems? 2) What kinds of basic tools do historians use to carry out archival research? 3) How do they craft persuasive arguments? The precise topic of the course varies from year to year, but students will be able to pursue research topics of their own design. History Honors majors will use this course to develop the topic of their Honors Thesis.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HIST 4982. Honors Independent Study. 3 Credit Hours.

The Honors Independent Study is open to History majors pursuing Honors. It consists of an intensive research project, guided by a History Department faculty member, that will result in a significant piece of scholarship.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HIST 4997. Honors Thesis Seminar. 3 Credit Hours.

This course is the second part of the year-long thesis writing sequence for honors scholars. It will culminate in the completion of a major research paper. The seminar consists of workshops designed to help students organize their research material and draft and revise their thesis. Students will further refine their writing skills through presentations, peer critiques, and individual consultations with the instructor. The course fulfills the writing seminar requirement for history majors. It is open to honors scholars and history majors.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HIST 4934.

Honors Program (HNRS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HNRS 1901. Honors First Year Seminar I. 1 Credit Hour.

This course will attempt to provide you with the foundation necessary for success in and after college life. You will engage in interactive discussions and workshops to develop the academic, professional, and life skills required for University Honors Program students. Topics include: self-exploration, academic exploration, goal setting, financial literacy, embracing/understanding diversity, exploring university resources, and exploring the city of Philadelphia. This course meets for 7 weeks and requires some activity outside of class time.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HNRS 3900. Honors Special Topics. 3 Credit Hours.

Course content varies each semester. Please see the Honors Course Guide or contact the Honors office for details.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HNRS 3902. Honors Peer Mentor Development. 0 to 1 Credit Hours.

Honors Peer Mentor Development is a variable credit course that introduces students to content and communication skills identified as integral to serving as a peer mentor in the college setting. Through this course, students will become proficient guides to Temple and community resources, well-versed in college and academic success strategies, and equipped with interpersonal communication skills to deliver their message and reach fellow students. Course material will be grounded in student development theory. Focus will be paid to how peer mentors can contribute to the persistence of their peers in college by considering at-risk or other special student populations' needs. Students who successfully complete this course will be eligible to serve in the Honors Mentor Network - a collection of students devoted to helping their peers adjust and thrive at Temple University and in the Honors Program and who provide academic success outreach, transition assistance, and guidance for those unsure where to turn to for help. Students must apply and be selected as an Honors Peer Mentor to register for this course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HNRS 4901. Creating Knowledge: Honors Thesis Project Design. 0 to 1 Credit Hours.

This workshop-style seminar has one clear and overriding objective: To get students ready to write their interdisciplinary honors thesis. That's it. In this class, we will take a number of carefully laid out steps to get students on the right path by developing a do-able topic, laying out a clear research agenda, and thinking about the best ways to present their findings and observations.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HNRS 4999. Honors Thesis. 2 Credit Hours.

This class is for students to finish their approved and vetted senior honors thesis project. While students will work independently, they will regularly check in with the instructor and turn in parts of their thesis at regular intervals.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Horticulture (HORT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HORT 1001. Fundamentals of Horticulture. 2 Credit Hours.

Principles of horticultural science; basic techniques of horticulture, including soil management, plant propagation, selection and maintenance of plant materials, and landscape design. NOTE: Horticulture 1001 (0015), unless it is the student's first Landscape Architecture/ Horticulture course or part of a successful credit certificate, is not applicable toward degree credit.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HORT 1211. Woody Plants I. 3 Credit Hours.

The study of native and introduced trees, shrubs, and vines that are the foundation of our natural and designed landscapes with emphasis on identification, culture, association in plant communities, and appropriate use.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HORT 1212. Woody Plants II. 3 Credit Hours.

Study of native and introduced trees, shrubs, and vines that are the foundation of our natural and designed landscapes with emphasis on identification, culture, association in plant communities, and appropriate use. The focus of this course is on conifers and broadleaf evergreens.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HORT 1555. Equipment Maintenance. 3 Credit Hours.

This course covers proper operation, repair, and normal maintenance procedures for motorized equipment, including tractors, mowers, tillers, shredders, sprayers, chain saws, and hand-held trimmers and blowers.

Repeatability: This course may not be repeated for additional credits.

HORT 1566. Horticulture Business Management. 3 Credit Hours.

Emphasis on managerial philosophies and responsibilities including: ethics; development of staff; problem solving; scheduling; budgets; tax laws; personnel recruiting and networking; public relations and marketing; reading specifications and blueprints; estimating and bidding; and writing business plans.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 0701, any MATH course numbered 0702 to 4999 (D- or higher; may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

HORT 1651. Art of Floral Design I. 3 Credit Hours.

A lecture-studio course in which students learn the aesthetic principles of design firsthand as they create a series of floral compositions from natural and artificial materials. Development of a critical eye by analyzing and critiquing their own and each other's work. Also considers traditions of floral design as it has been practiced in Eastern and Western cultures. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

HORT 1652. Art of Floral Design II. 3 Credit Hours.

Applies the philosophy of the relationships of nature and creativity to commercial design and compositions for home and exhibition. Also engages students in further study and experimentation in assembling plant materials and found objects indigenous to classical styles as well as considering the influences of avant-garde design from the art world.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1651.

HORT 2114. Soils. 3 Credit Hours.

The physical, chemical, and biological properties of soils are examined, considering water/mineral, organism/air relationships. Soil morphology, classification, genesis, and geographic distribution are studied. An understanding of soil horizon from textbook to actual site soil pits is developed. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ((CHEM 1021 and CHEM 1023), EES 1001, or BOT 1111)

HORT 2221. Herbaceous Plants I. 3 Credit Hours.

The identification, culture, and appropriate designs for native and cultivated annuals, perennials, bulbs, and wildflowers; collaboration with nature in designing and maintaining ecologically sound gardens.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

HORT 2222. Herbaceous Plants II. 3 Credit Hours.

Topics include: identification, culture, and creation of environmentally appropriate designs for native and cultivated annuals, perennials, herbs, and roses; cost analysis; designing and maintaining ecologically sound gardens.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

HORT 2256. Interior Plantscaping. 3 Credit Hours.

Explores the culture and use of foliage and flowering plants indoors, management of the interior environment for plants, plant identification, and business practices for interior plantscapers.

Repeatability: This course may not be repeated for additional credits.

HORT 2323. Greenhouse Management. 3 Credit Hours.

Introduces the basic concepts and principles utilized in greenhouse operation and management. Centers on topics such as greenhouse structure, environmental control, substrate, fertilization, watering, light and temperature, pest and disease control, growth control, and post production management. Focuses on managing the greenhouse environment to maximize the productivity of crops and examines the latest trends in the greenhouse industry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in BOT 1111.

HORT 2324. Plant Propagation. 3 Credit Hours.

Principles and practices of sexual and asexual methods of propagation, including micropropagation.

Repeatability: This course may not be repeated for additional credits.

HORT 2334. Food Crops I. 3 Credit Hours.

An introductory hands-on course in sustainable food production, handling, and distribution of crops. Food tasting is an integral part of this course.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

HORT 2353. Food Crops II. 3 Credit Hours.

The focus of this course is on Community Supported (Sustainable) Agriculture (CSAs), food co-ops, farmers' markets, and restaurants.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

HORT 2356. Greenhouse Production. 3 Credit Hours.

Considers scheduling greenhouse crop production and cultural requirements of several major floricultural plants, finished plants, liners and plugs, including the latest cultivars used in urban nursery/garden centers. Identification of greenhouse grown plant material and field trips to innovative growers are also components of the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 2323.

HORT 2366. Nursery Operation, Management, and Production Techniques. 3 Credit Hours.

Includes an overview of the nursery industry and examines the management and operation of wholesale and retail nurseries, and the production of plants in both container and field-grown conditions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1212.

HORT 2552. Trees in the Urban Landscape. 2 Credit Hours.

Urban life is tough on trees - pollution, weather extremes, neglect, traffic accidents, construction, and vandalism all take their toll. This course provides an overview of Western civilization's efforts to integrate trees into the urban landscape, with a particular emphasis on Philadelphia's urban forest. Urban treescapes through the nineteenth and twentieth century are explored from the perspective of social, cultural, economic, political and ecological influences. Philadelphia's Center City and its adjacencies serve as a laboratory for field walks, tree identification exercises, and for exploring urban forestry practices and policies.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

HORT 2554. RejuviNATURE: Improving Health and Well-being. 1 Credit Hour.

The positive effects of natural environments on the health and well-being of humans is becoming well documented. This unique course combines overviews and discussions about relevant theories and research on the role of nature in health, as well as experiential learning via visits to the Ambler Arboretum and other self-chosen nature excursions. Students will read important works that span from early advocates for the natural environments and conservation such as Thoreau and Muir to modern areas of research on mood and psychological well-being. Students will explore the effect of natural environments on their own well-being and will write about their experiences.

Repeatability: This course may not be repeated for additional credits.

HORT 2555. Arboriculture. 3 Credit Hours.

Basic biology and care of trees; diagnosis of common pests, diseases, mechanical, nutritional, and environmental problems. Types and use of proper equipment for climbing, pruning, maintenance, and structural requirements. Professional training includes insurance, liability, tree evaluation, job estimates, tree inventories, record keeping, and working with municipalities and community groups.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1211.

HORT 2556. Introduction to Beekeeping. 3 Credit Hours.

Introduces students to the science and art of keeping honey bees and the critical role played by honey bees in sustaining our environment by pollinating food crops and wild flowers. Topics include: establishment of colonies; seasonal management; honey production; and environmental challenges to honey bee health, including pests, diseases, and insecticides/herbicides. The laboratory portion makes use of the apiary located on the Ambler Campus, allowing hands-on application of course topics.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

HORT 2565. Turf Management. 3 Credit Hours.

The establishment and maintenance of turf grasses under varying soil and environmental conditions, particularly urban conditions. The identification of species and newer strains of grasses and their appropriate uses. An environmental approach to lawn maintenance and the responsible use of fertilizers, pesticides, and herbicides is stressed.

Repeatability: This course may not be repeated for additional credits.

HORT 2575. Introduction to Public Horticulture. 3 Credit Hours.

Introduction to principles of horticultural management and administration in the public realm. Examines the activities of botanic gardens and societies, arboreta, zoos, community garden groups, and parks departments. Covers the basic principles of botanic garden management, plant curatorship, collection care, public education, facility design, business management, and long-range planning. NOTE: Designed for students considering a career in public horticulture and those already associated with non-profit institutions who would like to learn more about the field.

Repeatability: This course may not be repeated for additional credits.

HORT 2653. Art of Floral Design III. 3 Credit Hours.

Deeper exploration of the principles of composition and the study of symbolism, periods, and movements of design, as well as construction with plant materials, found objects, lighting, and other media.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1652.

HORT 2655. Flower Shop Management. 3 Credit Hours.

The business management of the retail flower shop; design of unusual floral displays; handling flowers, plants, and accessories; and making corsages, sprays, bouquets, and wedding decorations.

Repeatability: This course may not be repeated for additional credits.

HORT 2666. Designing with Perennials. 3 Credit Hours.

Perennial designs involve an understanding of the site, respect for adjacent areas, maintenance concerns, and client desires. Student's knowledge of herbaceous plants is used as a basis for developing creative, ecologically sensitive design solutions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 2221.

HORT 2753. Introduction to Horticultural Therapy. 3 Credit Hours.

Definition and history of Horticultural Therapy (HT). Presentation of HT programs, such as social, therapeutic and vocational. HT population types are discussed including physically and developmentally disabled, older adults, children, visually impaired, incarcerated populations, and those in healthcare settings. Design of therapeutic spaces, garden design characteristics, universal design and site assessment. Overview of the profession.

Repeatability: This course may not be repeated for additional credits.

HORT 2754. Horticultural Therapy Skills. 3 Credit Hours.

Developing horticulture skills and techniques for use in therapy programs for diverse client populations. HT programming to include: setting goals and objectives; assessment and evaluation; use of adaptive tools and devices; use of plant materials and supplies for HT programs.

Repeatability: This course may not be repeated for additional credits.

HORT 2755. Horticultural Therapy Program Management. 3 Credit Hours.

Examines Horticultural Therapy programs and the impact of gardening, plants, and nature on diverse client populations. Site visits to local facilities. Research into funding sources, writing proposals for programs, developing program budgets, and grant writing.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (HORT 2753 or HORT 2754)

HORT 2850. Special Topics in Horticulture/Landscape Architecture I. 3 Credit Hours.

Study of topics and problems in horticulture, landscape architecture, and related disciplines. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

HORT 2860. Special Topics in Horticulture/Landscape Architecture II. 3 Credit Hours.

Study of topics and problems in horticulture, landscape architecture, and related disciplines. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

HORT 2870. Special Topics. 1 to 3 Credit Hour.

Variable offerings from semester to semester of selected topics not part of the regular listing of courses. The topic can be in an area of specialization of a faculty member or an examination of a current development in the field. NOTE: Students may obtain a description of the current version at the department office and in the schedule of classes. This course may be repeated for credit.

Repeatability: This course may be repeated for additional credit.

HORT 2881. Cooperative Education. 3 Credit Hours.

A program of full-time summer work in horticulture or landscape design for a minimum of seven weeks. Cooperative Education gives the student the opportunity to integrate academic learning with practical work experience, thereby broadening his or her skills and perspectives.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture, Landscape Architecture.

Degree Restrictions: Must be enrolled in one of the following Degrees: Associate in Science, Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

HORT 2883. Directed Studies in Horticulture. 1 to 3 Credit Hour.

Specialized topics from various areas of horticulture in which individuals will work independently and be supervised by a faculty member.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture, Landscape Architecture.

Degree Restrictions: Must be enrolled in one of the following Degrees: Associate in Science, Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

HORT 2982. Honors Projects in Horticulture. 1 to 3 Credit Hour.

For exceptional students interested in pursuing independent, in-depth study. Credits based on the quantity and quality of work fulfilling the established course outline.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture.

Degree Restrictions: Must be enrolled in one of the following Degrees: Associate in Science, Bachelor of Science.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HORT 3256. Advanced Plant Materials. 3 Credit Hours.

Advanced studies in woody and herbaceous plants, including identification of less commonly used material, late spring and summer aspects of garden design, maintenance, and restoration. Practical aspects of this course include weekly field trips, actual garden seed sowing, and garden maintenance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (HORT 1212 and HORT 2221)

HORT 3423. Applied Entomology. 3 Credit Hours.

In lecture and laboratory, students learn the basic diagnostic skills for identifying pest problems. Integrated Pest Management (IPM) is emphasized as the approach for managing pests of plants grown in stressful environments.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1212.

HORT 3424. Applied Plant Pathology. 3 Credit Hours.

Explores plant pathological theories and practices. The causes of plant diseases, such as fungi, bacteria, virus, nematodes, plant parasites, as well as environmental stresses, also are examined. Diagnostic skills for determining causes and current management measures are highlighted through lectures and laboratory work. Prepares students to solve horticultural pathology problems.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in BOT 1111.

HORT 3456. Tree Pathology. 3 Credit Hours.

A study of tree health and management. Infectious and noninfectious diseases of shade trees are studied in lectures and in-depth field trips. Emphasizes the effects of urban stress, economically important diseases, and complex tree declines.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in BOT 1111.

HORT 3514. Landscape Restoration. 3 Credit Hours.

Develops an ecologically based understanding of how to establish, restore, and manage meadows, forest, and wetland systems. Emphasizes natural processes and integrating the built landscape with our natural systems, and also explores plant communities and wildlife habitats of Southeastern Pennsylvania. Students participate in the management of natural landscapes on the Ambler campus and nearby parkland.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1212.

HORT 3523. Landscape Management. 3 Credit Hours.

Students develop an understanding and practical experience with professional, innovative, and appropriate landscape management topics. Major focus is given to site analysis, pruning, pest identification and management, nutrition, watering and irrigation, and other maintenance techniques. Hands-on practical experience and theory combine in project-based educational opportunities.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HORT 1212.

HORT 3882. Independent Study. 1 to 3 Credit Hour.

Explorative study or research not met in any established course. Initiated by the student, the project must be sponsored by a faculty member with an approved agreement outlining the content and requirements, including readings, meetings, and papers. NOTE: Special authorization required for all students. Students must have the agreement of a faculty sponsor and must submit a formal proposal to this faculty member and Department before registering for the course.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture.

Degree Restrictions: Must be enrolled in one of the following Degrees: Associate in Science, Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

HORT 3885. Internship. 1 Credit Hour.

A minimum of one semester or 350 hours of employment is required in an area related to the student's horticultural field of interest. Should provide a meaningful work experience. NOTE: The internship should be taken between the sophomore and junior years.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Associate in Science, Bachelor of Science.

Repeatability: This course may be repeated for additional credit.

HORT 4896. Senior Seminar. 3 Credit Hours.

Using a broad range of critical thinking skills derived from previous course experiences, students write and present an in-depth research paper on a horticultural topic. In preparation for graduation, students develop a cover letter, resume, and curriculum vitae and discuss professional internships. NOTE: Fulfills the capstone writing intensive requirement for the B.S. in Horticulture.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Horticulture.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in BOT 2121.

Human Development and Community Engagement (HDCE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HDCE 2304. Families and the Community. 3 Credit Hours.

This course examines the historical and contemporary development of families with a focus on American trends. We explore the way families have changed over time with respect to class and racial/ethnic variations, the division of labor and social power within families, and communication patterns within households. We will also research the stressors affecting families (e.g., divorce, addiction, loss, immigration issues) and the types of family and community resources that support families through these times. We also devote a portion of our time to relating our own family autobiographies to the broader context of American families.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

HDCE 3332. Professional Seminar in Human Development and Community Engagement I. 1 Credit Hour.

Many students want to make a difference in children's lives in other ways besides being a teacher. There are several hundred charitable and educational foundations and agencies in the greater metro Philadelphia area alone. State, federal, and local governments also often have child-focused initiatives. The programs, policies, and practices of these agencies and governments could benefit from employees who understand the factors that impede or facilitate the cognitive, social, and physical development of children, particularly in urban communities. This course provides an orientation to the HDCE major and exposure to a variety of career options and organizations that are relevant to HDCE. It aims to help students develop a sense of their future career path and understand their role within a collective impact framework.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

HDCE 3333. Professional Seminar in Human Development and Community Engagement II. 1 Credit Hour.

Many students want to make a difference in people's lives in other ways besides being a teacher. There are several hundred charitable and educational foundations and agencies in the Philadelphia area alone. State, federal, and local governments also often have social service-focused initiatives. The programs, policies, and practices of these agencies and governments could benefit from employees who understand the factors that impede or facilitate the cognitive, social, and physical development of individuals, particularly in urban communities. This course provides an orientation to the HDCE major and exposure to a variety of career options and organizations that are relevant to HDCE. It aims to help students develop a sense of their future career path and understand their role within a collective impact framework. This course requires 3-hours of fieldwork. In order to register for this course, students must submit full clearances to the Office of Field Placement.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

HDCE 3334. Professional Seminar in Human Development and Community Engagement III. 1 Credit Hour.

This course is a 1-credit course aimed at helping students become familiar with the career opportunities, create network contacts, and develop a deeper understanding of the breadth and depth of the Human Development and Community Engagement field. This course will help students build upon or rethink the career path they identified in Seminar 1 (if taken) and craft a focused professional development plan and identify a professional with whom they can engage in that career field.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

HDCE 4185. Community Internship and Seminar. 6 to 12 Credit Hours.

The internship is meant to build on students' practicum experience, by providing a learning experience that unites prior coursework with professional organizational settings and the community as a whole, while also guiding students as they transition into their own professional lives. Students will continue at the site where they completed their practicum course. Having developed relationships and acquainting themselves with the organization, students can seamlessly transition into an internship at the same site. Students are required to complete a total of 65 - 390 hours at their site (depending on the number of credits). Additionally, students will meet eight times during the course of the semester to share observations and experiences gained from the internship placement. In order to register for this course, students must submit full clearances to the Office of Field Placement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Human Develop Commnty Engagemn.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HDCE 4187.

HDCE 4187. Practicum in Applied Development. 3 Credit Hours.

This course will give undergraduate students the opportunity to integrate and apply theory and coursework within a community organization working with children or other vulnerable populations. Students will be required to demonstrate increased knowledge and skills in practice, research, and evaluation across multi-level systems. Students will experience a practicum placement under the immediate supervision of a professional who functions as the student's Site Supervisor, and the overall supervision of the Practicum Instructor. The practicum will involve activities such as observing the members within the organization and conducting background research about the organization. Additionally, practicum students will meet five times during the course of the semester to share observations and experiences gained from the practicum placement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Human Develop Commnty Engagemn.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HDCE 3332, HDCE 3333, and HDCE 3334.

HDCE 4302. Economics for Education. 3 Credit Hours.

Education plays a central role in the economy through its effects on the labor force, distribution of income, and individuals' earnings and quality of life. This course will provide an introduction to the concepts of economics and how these can be applied to education. Topics to be discussed include education markets and financing (both K-12 and higher education), education production, teacher labor markets, school choice, and school accountability.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

HDCE 4305. Curriculum and Training Design. 3 Credit Hours.

This course focuses on helping students learn how to design and implement teaching and training programs in not-for-profit organizations. This course guides students through the process of designing curriculum to support out-of-school learning and training programs. Course activities include program and curriculum evaluation, analysis of existing training programs, a comprehensive research project on teaching and training, student-centered collaboration and group work, working with logic models and working with the Pennsylvania Academic Standards to develop curricula for teaching and training.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

HDCE 4333. Program Evaluation. 3 Credit Hours.

Program evaluation is a critical component in designing and operating effective programs and interventions. Evaluations supply information to program managers and policymakers that can assist them in making decisions about which programs to fund, modify, expand or eliminate. Evaluation can be an accountability tool for program managers and funders. Programs need answers to many questions (i.e., Who is a program intended to serve? What are its goals? What does the program actually look like? Who does it actually reach? What are the outcomes for those who received the intervention? How can a program be improved to better meet its goals? What needs to be adapted for a different population or setting? Why should a program continue to be funded? Which intervention works better? Which is more cost-effective?). This course serves as an introduction to evaluation methodology and evaluation tools commonly used to assess programs. Students will become familiar with the concepts, methods and applications of evaluation research; learn how to read evaluation research critically; understand how to use evaluation results to improve program performance; and be able to propose and execute an appropriate evaluation plan to assess the implementation and/or effectiveness of a program. There is no specific policy or sector focus to this course, as evaluation tools are used in all policy areas and by public (government) and private (foundation) funders as well as by public and private sector program managers. Students are encouraged to relate the general material of the course to their specific interests. Students taking this course will already have taken the following courses: (a) Child Development (that explain age trends in outcomes such as achievement and the factors that cause these outcomes), and (b) Statistics for Decision-Making. This course requires fieldwork. In order to register for this course, students must submit full clearances to the Office of Field Placement.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Clearance for Education.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EPSY 2325 (may be taken concurrently) and (ECED 2101, EDUC 2109, or AOD 3317)

Human Resource Management (HRM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HRM 1101. Leadership and Organizational Management. 3 Credit Hours.

This course prepares students to address the challenges of leading high performing organizations. Students will examine the enablers of principled organizational leadership and performance. Course topics include leadership, change management, decision-making, culture, team building, organizational structure and control, communication, social responsibility and sustainability, motivation, human resource management, and globalization.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Business, Business Basics, Corp Compliance + Reg Policy, Construction Engr Tech, Construction Mgt Tech, Career and Technical Education, Economics, Economics - Management Career, Economics, Entrprnrship & Innovation Mgt, Engineering, Engineering Technology, Entrepreneurship, Event and Entertainment Mgmt, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Management Consulting, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Sport & Recreation Management, Statistical Sci + Data Analyt, Tourism and Hospitality Mgmt, Undeclared-Business & Mngt, Undeclared-University Studies.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

HRM 1901. Honors Leadership and Organizational Management. 3 Credit Hours.

This course prepares students to address the challenges of leading high performing organizations. Students will examine the enablers of principled organizational leadership and performance. Course topics include leadership, change management, decision-making, culture, team building, organizational structure and control, communication, social responsibility and sustainability, motivation, human resource management, and globalization.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Business, Business Basics, Corp Compliance + Reg Policy, Construction Mgt Tech, Career and Technical Education, Economics, Economics - Management Career, Economics, Entrprnrship & Innovation Mgt, Engineering, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, International Business Admin, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Sport & Recreation Management, Statistical Sci + Data Analyt, Tourism and Hospitality Mgmt, Undeclared-Business & Mngt, Undeclared-University Studies.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SI

Repeatability: This course may not be repeated for additional credits.

HRM 2501. Introduction to Human Resource Management. 3 Credit Hours.

What role do human resources play in organizations? How can human resources strategically add value to organizations? In this course you will survey pertinent topics related to human resource management to better understand the essential function of HRM. For instance, you will learn processes and methods to recruit and select top talent and give your organization a competitive advantage; how to train employees, conduct performance appraisals, retain employees, and motivate employees with pay and benefits. HR processes and policies will be discussed with an appreciation for the legal environment dictating the practice of HRM.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics - Management Career, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 2511. Corporate Sustainability: People, Profits & Planet. 3 Credit Hours.

After completing this course, you should have a grasp of the nature and extent of the current global environmental crisis, an understanding of the concept of sustainability, an appreciation of how organizations can take action toward sustainability through the pursuit of the "triple bottom line," and a sense of how you can contribute to the emerging "green collar workforce." The course will feature short lectures, discussions, case analyses, team debates, guest experts, opinion papers and experiential exercises.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Corporate Social Responsibility, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

HRM 3501. Power, Influence and Negotiation. 3 Credit Hours.

Examines how influence, power, and politics are related to effective negotiation and leadership; practical and ethical issues related to negotiating tactics and conflict management are addressed. Experiential and applied exercises facilitate learning effective supervisor and negotiator strategies.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3502. Leading People at Work. 3 Credit Hours.

This course uses Emotional Intelligence (EI) as a foundation for exploring critical leadership and management skills needed in the work place. EI consists of self-awareness, self-management, relationship awareness and relationship management. Topics of study include: dealing with difficult people, time management, motivation, performance appraisal, and managing down and up the hierarchy.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3503. Communicating in Organizations. 3 Credit Hours.

Explores interpersonal and managerial communication strategies in an organizational setting. Emphasis is on understanding communication practices and structures consistent with prominent approaches to management. Students also examine the conceptual underpinnings of effective communication, enhance their presentation and writing skills, and conduct a communication audit in a local business.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3504. Leadership in the 21st Century. 3 Credit Hours.

This course helps guide students towards becoming effective and ethical leaders. Development will occur through self-assessments, experiential exercises, and critical examination of effective and ineffective approaches to leadership in the modern business environment and society at large. Major topics of study include: authentic leadership behavior, ethical leadership, abusive leadership, and cross-cultural considerations.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3505. Sustainable Organizational Leadership. 3 Credit Hours.

This course will help students understand and appreciate the dynamics of sustainable organizational leadership that engages with the human, financial, social, and natural environments to promote collective and individual prosperity.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrshp & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3506. HR Metrics: Using Data, Scorecards and Dashboards to Drive Business Performance. 3 Credit Hours.

This course is primarily designed to prepare individuals desiring to work in a corporate human resource function, especially those individuals responsible for recruiting, compensation, training and development, employee relations, HRIS (Human Resource Information Systems), or interaction with other corporate staff functions. It may also be of interest to students preparing for general management positions with responsibilities for managing human resources, and/or reliance on reporting metrics.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 2501.

HRM 3507. Intrapreneurship in the 21st Century. 3 Credit Hours.

You may identify a great opportunity for your organization to improve its products, services, sustainability, or treatment of employees or other stakeholders. Or you may see ways for your organization to adapt to threatening external events. Developing good ideas for change is only part of the solution. The most challenging aspect of change may lie in convincing your organization to act on your ideas. This course focuses on the challenges in implementing change in organizations, and overcoming these challenges - in other words, how to be an effective intrapreneur. Topics addressed include managing in all directions: downward, upward, and "sideways," personal assessment of strengths and weaknesses in ability to effect change, and organizational culture and reward systems that facilitate change. Coursework includes a hands-on project in which students propose a change initiative in a real-world organization.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3511. Compensation Management. 3 Credit Hours.

An applied examination of total reward systems in organizations in the context of relevant theoretical and legal perspectives. Topics include employee engagement, job analysis, job evaluation, performance evaluation, pay surveys, incentives, pay equity, benefits, and compensation strategy.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 2501.

HRM 3512. Human Resource Management and Public Policy. 3 Credit Hours.

Investigates the nature and impact of government and other external forces on human resource management. Specifically addresses the development, intent, and implications of a range of employment laws and regulations which affect corporate human resource policy.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 2501.

HRM 3513. Labor Relations: Strategy and Practice. 3 Credit Hours.

Examines the development and current operations of labor unions, the process and outcomes of collective bargaining and the impact of these institutions on management and society. Practical insights from National Labor Relations Board and grievance cases.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 2501.

HRM 3531. HR on the Ground. 3 Credit Hours.

Explores how good HR practices influence an organization/s success by working in teams on a real project at a real company. Topics covered include: consulting skills, communication, presentation skills, employee engagement, employee research techniques, leadership development, project management and more based on the consulting opportunity provided by the company. Part of the final grade comes from the company.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Management Consulting, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

HRM 3565. International Human Resource Management. 3 Credit Hours.

Focuses on the role of the manager in international organizations and creates awareness of differing legal environments and societal attitudes. Relates national differences to functional areas of human resource administration, including staffing, compensation, training, and labor relations.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3580. Special Topics - Human Resource Management. 3 Credit Hours.

Special topics in current developments in the field of human resource management.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3581. Co-op Experience in Human Resource Management. 3 Credit Hours.

This is an academic course intended to give students experience applying HRM concepts in a real world work environment. In a typical assignment, students work under the mentorship of an HR professional on HRM related project(s). As part of the class, students complete an evidence-based management paper based on their work experience, complete an interview with their mentor, and participate in weekly discussion boards. Students who have identified their own internships and would like to receive course credit can also register for HRM 3581. In these instances the student should first visit CSPD to learn about the "Credit for Internship Process." Once CSPD approval is give, the student will meet with the HRM 3581 professor for permission to register. Students must be prepared to work on-site at the organization for 8-9 hours/week, have a minimum 2.5 GPA, and be a Human Resource Management major. HRM 2501 is the prerequisite for this course. For more detailed information on the course, please visit the course web site at www.fox.temple.edu/HRMIndustryExperience.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in HRM 2501 and minimum GPA of 2.5 in: courses numbered 0700 to 4999.

HRM 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under the supervision of a faculty member. Arranged each semester.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3682. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under the supervision of a faculty member. Arranged each semester.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3902. Honors Managing People at Work. 3 Credit Hours.

Honors version of HRM 3502 (0320).

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

HRM 3903. Honors Management, Theory and Practice: The State of Labor in the Post-COVID Workplace. 3 Credit Hours.

The COVID-19 pandemic unveiled what were already deep fissures in the relationship between workers and capital. For some American workers, workplace shutdowns and stimulus checks granted a chance to pause and contemplate a life with less hustle. This novel experience of time reinvigorated the concept of "anti-work" and spawned the notion of "quiet quitting" among those who felt discomfort with their newfound consciousness of their labor utility. The Anti-work subreddit home of these nouveau Thoreaus boasts over 2.5 million "idlers" and a tag line that reads "unemployment for all, not just the rich!" On the other hand, workers deemed "essential" in health care, retail, education and human services were forced to hustle even harder, often at the expense of their own mental and physical health. This class will explore the resurgence of organized labor and the changing nature of work since the beginning of the pandemic, examining their causes and consequences, and offering implications for managers, employees, and union members and leaders. Note: Prior to Fall 2023, the course was titled "Honors - Management, Theory & Practice: From the Locker Room to the Board Room."

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HRM 3904. Honors, The Leadership Experience: Leading Yourself, Leading Change, Leading Communities. 3 Credit Hours.

Leadership is a hot topic in social sciences, management, and popular culture. Ask ten people "what makes a good leader?" and you might get ten different answers. Our subject is to explore leadership as a discipline, or as scholars. More specifically, as current Honors students, you represent our future leadership. To effectively lead, having a basic understanding of the core tenets and theoretical foundations is important, but insight into your strengths and capabilities as a potential leader is essential. Thus, this course will provide you with foundational knowledge on core principles of leadership. More importantly, this course will focus on reflection, assessment, and development on the core skill sets required of effective leaders. Finally, you will be challenged to leverage your unique strengths in a team setting to enact and inspire change within your community.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

HRM 3999. Honors Thesis I. 1 to 3 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Human Resource Management department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Human Resource Management 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Human Resource Management.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

HRM 4596. Organizational Staffing and Career Management. 3 Credit Hours.

Acquisition and development of human resources in organizations and career management for individuals. Emphasis on using computers to perform human resource planning, job analysis, recruitment, selection, training, socialization, career development, and withdrawal from work. Students must earn a grade of C- in this course if they are using it to fill the writing intensive course requirement for their degree.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Human Resource Management.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 2501, HRM 3511, HRM 3512, and (BA 2196 or BA 2996)

HRM 4597. Critical Skills for Effective Managers. 3 Credit Hours.

The purpose of this course is to bring together Human Resource Management (HRM) knowledge and skills learned in a final, capstone experience to make the student a more effective manager. Students will take a hands-on approach to assessing and improving their self-awareness, interpersonal and teamwork skills. The course will also test skills learned in other core business school courses such as your ability to identify problems, gather and analyze data to understand the problem, to develop alternative courses of action, and implement it. Because this is a writing intensive course, there will be several individual writing assignments that you will have the opportunity to draft, receive feedback and re-draft to improve your writing skills, as well as a group project. NOTE: Students cannot receive credit for this course if they have passed HRM 3502. Students must earn a grade of C- in this course if they are using it to fill the writing intensive course requirement for their degree.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in HRM 3501, HRM 3503, and (BA 2196 or BA 2996)

HRM 4999. Honors Senior Thesis II. 1 to 3 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Human Resource Management Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Human Resource Management 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Human Resource Management.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in HRM 3999.

Human Services (HS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

HS 4000. Special Topics. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

Industrial and Systems Engineering (ISE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ISE 2101. Applied Statistical Methods for Industrial and System Engineers. 3 Credit Hours.

Statistical analysis techniques and their applications in the field of industrial and systems engineering are presented. Topics include the statistical measures describing data, frequency distributions, probability distributions, sampling parameter estimation, hypothesis testing, regression analyses, and analyses of variance. Special emphasis on their application to field of industrial and systems engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), MATH 1031 (may be taken concurrently), 'Y' in MA07, 'Y' in MATW, or 'Y' in METW)

ISE 2102. Production Process Design and Laboratory. 4 Credit Hours.

Introduction to the theory and practice of manufacturing processes. Study covers the fabrication of metallic, plastic, and electrical products, operation of NC and other automatic equipment, and economics of the design and production process. Topics to be covered include introduction to manufacturing processes, metal forming processes, metal cutting processes and machine tools, metal finishing processes, introduction to AutoCAD, numerical control (NC) machining, processing of plastic products and an introduction to automated manufacturing processes. Lectures will be complemented by a laboratory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 1117.

ISE 2103. Deterministic Models in Operations Research. 3 Credit Hours.

The deterministic techniques of operations research. Topics include the applications of linear, nonlinear, integer, and dynamic programming methods and network flows analysis to solve industrial and systems engineering problems. Other topics include an introduction and overview of deterministic models, preliminaries of Linear Programming (LP), graphical solution of linear programming and introduction to simplex method, sensitivity analysis, marginal utility, computer applications and LP packages, transportation and assignment problems, network and graph theory introduction, spanning trees shortest route algorithm, Dijkstra's algorithm, formulation of shortest path as LP, maximum flow algorithms, nonlinear programming, classical optimization, integer programming introduction, Gomory's cutting plane, branch and bound method, complete methods, Dynamic Programming (DP), and recursive relationship of DP.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), or 'Y' in METW)

ISE 3101. Product Quality Assurance. 3 Credit Hours.

Methods used to achieve higher product quality, to prevent defects, to locate chronic sources of trouble, to measure process capability, and to use inspection data to regulate manufacturing processes are emphasized. Preparation of statistical control charts and selection of suitable sampling plans. Topics include review of probability distributions, control chart principles, control charts for variables (X, R charts), control charts for attributes (p, c, u charts), specifications and tolerances, fundamentals of acceptance sampling, acceptance sampling by attributes, special attribute sampling procedures, reliability, graphic methods for quality control, and TQM and ISO standards.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2101.

ISE 3102. Stochastic Models in Operations Research. 3 Credit Hours.

Probabilistic techniques of operations research. Topics include the applications of Markov chains, queueing and inventory control models to analyze and evaluate systems performance. Other topics include introduction to stochastic processes, review of probability, Markov chains and classification of their states, long-run Markov chains and applications, introduction to queueing theory, birth and death process, applications of queueing theory, introduction to inventory theory, components of inventory models, deterministic inventory models, stochastic inventory models, and introduction to forecasting.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2103.

ISE 3103. Systems Thinking and Modeling. 3 Credit Hours.

Utilizing a systems thinking approach in engineering design and development is necessary to understand the connections and dependencies that exist within the system. This course introduces the concept of systems thinking and computer modeling via system dynamics. Computer modeling can aid in understanding the complex feedback dynamics possible emergent behavior which can be found in the human, technological and organization systems. In addition, policy interventions and their effect on the behavior and structure of the system will also be addressed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2101 and (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW)

ISE 3185. Industrial and Systems Engineering Internship Experience. 1 to 3 Credit Hour.

The course provides industrial and systems engineering experience in an engineering service, industrial, or research setting. The internship should allow the student to apply knowledge learned, build upon that knowledge and assess outcomes.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ISE 4101. Human Factors (Ergonomics). 3 Credit Hours.

This course covers Human-machine systems analysis. The study of workplace layout, measurement of employee efficiency and productivity, criteria for tool and fixture design or selection, industrial fatigue, environmental influences on performance including the effects of illumination, noise, vibration, thermal, and other atmospheric factors. The basic ideas of industrial hygiene; the impact of OSHA; and special techniques for experimenting with human subjects, via demonstrations and supervised experiments are explored. Additional topics include human factor definitions, human factor research methodologies, human information processing, visual presentation - static and dynamic information, auditory and other displays; speech communication, motor skills, human control systems, data entry devices, physical work and manual materials handling, applied anthropometry, workplace environment; illumination and atmospheric conditions, noise, vibration and motion, human error, accidents and warnings, and usability and human-computer interaction.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

ISE 4102. Industrial Simulation. 3 Credit Hours.

Introduction to the application of simulation modeling for the analysis of complex industrial and manufacturing service systems. Examples are chosen from real-life situations such as warehousing, material handling, robotics, transportation, and hospital emergency rooms. Verification/validation as well as statistical analysis of both input/output data are introduced. Topics include Verification and validation, calibration of models, face validity, validity of assumptions, Turing/Delphi test, comparison and evaluation of alternative systems, simulation examples, queueing systems, inventory systems, object oriented programming, ARENA simulation software, random number generation, Input modeling and Output analysis, confidence intervals, and variance reduction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2103.

ISE 4103. Engineering Cost Analysis. 3 Credit Hours.

This course introduces the tools and techniques applicable for cost analysis and control including standard costs, variance analysis, cost volume relationships, cost estimation, and utilization of accounting data for control of operations. Topics include basics of financial/cost management; elements of financial accounting and development of income statements and balance sheets; cash flow statements, inventory valuation methods; cost-volume relationships, cost drivers; methods of measurement, application of regression analysis; product addition or deletion, target costing, pricing decision; cost allocation; activity based costing, job order cost systems and process cost systems and overhead, cost allocation, analysis and control.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ACCT 2501.

ISE 4104. Production Planning and Control. 3 Credit Hours.

This course introduces the study of the components and functioning of integrated production, planning, and control systems; forecasting, aggregate planning, scheduling, and recent models of production and inventory control for optimizing continuous and intermittent manufacturing operations. MRP basics and introduction to using a computer to apply scheduling models will be covered. Topics include functional modules in the control of a manufacturing organization, forecasting methods, aggregate planning and master scheduling, linear programming based methods, capacity requirements planning; machine scheduling, job sequencing and line balancing; job shop and flow shop models; material requirements planning and just-in-time production control.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2103 (may be taken concurrently)

ISE 4105. Facility Planning. 3 Credit Hours.

This course will study strategic planning of production facilities including location, planning, design and maintenance. Emphasis on production systems, machine selection, automation, material handling, storage and warehousing, quality, retrofitting and preventative maintenance.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2101, ISE 2102, and ISE 2103.

ISE 4106. Service Systems Engineering. 3 Credit Hours.

Services play a vital role in modern economies. In many economies they surpass their manufacturing counterparts in terms of contribution to the Gross Domestic Product, yet they cannot be handled in the exact same manner. The fundamentals of this sector as an engineering field will be discussed as well as the operations of service systems as a customer-centric environment. Topics will include service quality, strategies, operations, electronic services, queuing, service supply chains and managing service projects. Various projects will be handled during the course of the semester focusing on various aspects of the service industry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2101 and ISE 4104.

ISE 4107. Systems Engineering Fundamentals. 3 Credit Hours.

Complex system development requires both hard and soft skills to address the challenges in modern engineering. Systems engineering includes human, organization and technical variables that all must be considered in complex system development. This course will cover the foundations of systems science and systems thinking, as well as an overview of the methodology that systems engineers use to bring these systems to fruition. Topics in the methodology that will be covered include identification of needs, requirements development, design and design integration, verification and validation as well as tools used to perform these functions such as technical management, life cycle costing and risk analysis and management. This course will show the breadth of knowledge that is required of a systems engineer to address engineering challenges.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ISE 2101 and ISE 3103.

ISE 4176. Industrial and Systems Engineering Senior Design Project I. 3 Credit Hours.

Your undergraduate career culminates with the Senior Design Project and integrates the Industrial and Systems engineering concepts with a major design experience. Through this experience you will demonstrate your skills for managing and executing a design project in a team setting. Skills you will need include problem identification, constraint specification, alternative analysis selection, design development, analysis and recommendations. In addition, you will have practice learning how to manage impediments that arise in the project development. Through this culminating experience you will integrate knowledge and further your technical, critical thinking, writing and teamwork skills.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Industrial + Sys Engineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 2196 and Complete 2 of the following: ISE 3102, ISE 3103, and ISE 4104.

Intellectual Heritage (IH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

IH 0851. Intellectual Heritage I: The Good Life. 3 Credit Hours.

Students will read important works of world literature, philosophy, and religion, from ancient epics to graphic novels, with a focus on individual well-being. We will ask questions like: What do we value, and why? What makes for happiness? What's right and wrong? How is what's good for me defined by my relation to others? What is the purpose of life? Note: This course was formerly titled "Mosaic: Humanities Seminar I"; students who received credit for this title will not receive additional credits.

Course Attributes: GY

Repeatability: This course may not be repeated for additional credits.

IH 0852. Intellectual Heritage II: The Common Good. 3 Credit Hours.

Students will read important works of social, political, and scientific thought, with a focus on well-being for societies. We will ask questions like: Where does society come from? How do we balance individual liberty and the public good? What behaviors and practices perpetuate injustice? Can we create a better society? How do power and privilege define our capacity to make change? How do we find truth? Can facts be detached from cultural contexts? Note: This course was formerly titled "Mosaic: Humanities Seminar II"; students who received credit for this title will not receive additional credits.

Course Attributes: GZ, SI

Repeatability: This course may not be repeated for additional credits.

IH 0951. Honors Intellectual Heritage I: The Good Life. 3 Credit Hours.

Students will read important works of world literature, philosophy, and religion, from ancient epics to graphic novels, with a focus on individual well-being. We will ask questions like: What do we value, and why? What makes for happiness? What's right and wrong? How is what's good for me defined by my relation to others? What is the purpose of life? Note: This course was formerly titled "Honors Mosaic: Humanities Seminar I"; students who received credit for this title will not receive additional credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GY, HO

Repeatability: This course may not be repeated for additional credits.

IH 0952. Honors Intellectual Heritage II: The Common Good. 3 Credit Hours.

Students will read important works of social, political, and scientific thought, with a focus on well-being for societies. We will ask questions like: Where does society come from? How do we balance individual liberty and the public good? What behaviors and practices perpetuate injustice? Can we create a better society? How do power and privilege define our capacity to make change? How do we find truth? Can facts be detached from cultural contexts? Note: This course was formerly titled "Honors Mosaic: Humanities Seminar II"; students who received credit for this title will not receive additional credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GZ, HO, SI

Repeatability: This course may not be repeated for additional credits.

International Business Administration (IB)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

IB 2501. Fundamentals of Asian Business. 3 Credit Hours.

This course is designed to enable students to grasp broad knowledge on Asian business practices. The semester will begin by surveying the wide array of national characteristics that corporate decision-makers must consider prior to making economic decisions on foreign investment. During this section of the course, we will also analyze economic, social, and political conditions in India in order to provide practical examples of how the national characteristics impact the decision-making process. It will then examine the similarities and dissimilarities among Japanese, Chinese, and Korean businesses and the special features of Japanese business, such as the network relationships among companies and groups called keiretsu. Given our understanding of the above issues, we will examine how American companies should compete in Asia.

Repeatability: This course may not be repeated for additional credits.

IB 2502. Fundamentals of Latin American Business. 3 Credit Hours.

This course is designed to give students a solid basis to face a job assignment related to business in a Latin American country and to develop your ability to perceive the importance of cultural diversity and how it influences business activities across Latin American countries. Specifically, this course will help you understand the specific challenges of doing business in Latin America and enable you to perceive and understand the differences in the business environment, business customs, and business practices between countries of Latin America and of the rest of the world.

Repeatability: This course may not be repeated for additional credits.

IB 2503. Fundamentals of European Business. 3 Credit Hours.

This course offers an overview of the European business environment, highlighting its specific challenges and business opportunities. This course analyzes the dual process of European integration and enlargement of the European Union, and the tensions between the two. While mostly focusing on the European Union country members, this course will also examine non-EU countries in Europe. You will understand when and how multinational firms must adapt their business policies and organizations to the specific needs of national environments in Europe. In-depth cases and recent articles from the business press serve as the basis for many class discussions.

Repeatability: This course may not be repeated for additional credits.

IB 2504. Fundamentals of Business in Africa and the Middle East. 3 Credit Hours.

This is an exciting course for students interested in developing skills essential for effectively doing business in and with Africa and the Middle East. We will study the differences, challenges, and benefits that companies encounter when venturing in Africa and the Middle East, and use experiential learning to gain fluency in cultural and business practices.

Repeatability: This course may not be repeated for additional credits.

IB 2509. Short Study Trip Abroad: Doing Business in a Foreign Country. 1 to 3 Credit Hour.

This is a for-credit course paired with a trip to a foreign country, in order to study in depth this country's environment for doing business (cultural, social, economic, legal, political aspects), and how to navigate it successfully, both as a firm and as an individual. The in-country portion of the program will include mostly visits of companies and local organizations, as well as some touristic visits. The course aims to put the foreign country in the broader context of globalization, regional economic integration, and the mutual influence and relationships the country entertains with the rest of the world.

Repeatability: This course may be repeated for additional credit.

IB 3101. Fundamentals of International Business. 3 Credit Hours.

This course offers an introduction to the basic concepts and practices in international business. Topics to be covered include the economic, social, cultural, legal, and political environments of international trade and multinational corporations (MNCs), international institutions and agencies that impact on international business, the nature and characteristics of international business, strategy and structure of MNCs, problems of foreign direct investments, and conflicts between host countries and MNCs, and effects of MNCs on the economy.

Repeatability: This course may not be repeated for additional credits.

IB 3551. International Finance. 3 Credit Hours.

The course surveys the theory and practice of international finance, as it relates to both markets and firms. Topics include issues in international financial systems, currency market and risk management, and international corporate finance.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- (except where noted) in (FIN 3101, FIN 3901, FIN 3503 (C or higher), or 'Y' in FIN3)

IB 3552. International Financial Management. 3 Credit Hours.

The course provides a theoretical and practical analysis of the financing and investment decisions of multinational firms operating in international financial markets. Topics include: international asset valuation, international financing and investments, foreign exchange risk exposure, and country risk management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (FIN 3503 or 'Y' in FIN3)

IB 3553. International Marketing. 3 Credit Hours.

This course identifies and addresses the challenges of marketing and analysis of the internal marketing system of countries with various types of political-economic structures. The strategic impact of economic, cultural, political, and legal differences on marketing are emphasized while issues of international product, price, promotion, and distribution issues are also considered. NOTE: Marketing Majors must earn a grade of C or better in this course to be eligible to take the capstone Marketing course 4501.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MKTG 2101 or MKTG 2901)

IB 3562. International Law. 3 Credit Hours.

Fifty percent of the net profits of most large corporations are generated through international transactions. This course will explore the legal considerations that apply to U.S. businesses abroad and will explore issues of contract negotiations, enforcement of judgments, international conventions, sovereign immunity, and current multinational business issues such as dumping, products liability, and patents and copyrights.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

IB 3563. International Trade. 3 Credit Hours.

An examination of the basic theories of international trade, commercial policy, and factor movements. Topics may include the relation between trade and economic growth, global aspects of U.S. trade policy, international trade agreements, and protectionism.

Repeatability: This course may not be repeated for additional credits.

IB 3564. International Monetary Economics. 3 Credit Hours.

The analysis of the balance of payments and foreign currency markets. Topics include the international payments system, foreign investment and debt, and exchange rate regimes.

Repeatability: This course may not be repeated for additional credits.

IB 3565. International Human Resource Management. 3 Credit Hours.

Focuses on the role of the manager in international organizations and creates awareness of differing legal environments and societal attitudes. Relates national differences to functional areas of human resource management - staffing, compensation, training, and labor relations.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (HRM 1101 or HRM 1901)

IB 3580. Special Topics in International Business. 1 to 6 Credit Hour.

Special topics in current developments in the field of international business.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

IB 3581. International Business Internship. 3 Credit Hours.

The International Business internship is designed to provide experiential learning to students enrolled in the course. Students will apply what they have learned in the classroom to a project to be implemented within an international business environment. Students will engage a business owner or manager in defining and developing a project for mutual benefit and learning. This project will include an objective, a goal, and a work plan to implement work towards achieving that goal. Further, the project will be supervised by the business owner/manager and will be implemented by the student. The project will acquaint the students with a global business mindset and international business operations.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

IB 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under supervision of a faculty member. The student should pursue a topic of interest by getting a faculty member to agree to supervise the student's study. Possible topics of interest to the faculty in the department include: cross-border mergers and acquisitions, foreign direct investment, and global sourcing, among others.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

IB 3585. International Business Internship. 3 or 6 Credit Hours.

The course objective is to enable students to gain practical work experience on a project of relevance to their academic program, while providing the latest best practices and international business concepts on projects for employers. The course consists of an internship with a company involved in international business and the internship location is abroad. Students are encouraged to apply for currently developed internship programs including those with Temple University overseas programs or campuses, other global internship providers, as well as select a reputable organization of their interest. The student will produce a project paper and/or other assignments based on student's internship projects within the organization. NOTE: A minimum of a 2.5 GPA and approval by the professor is required.

Repeatability: This course may not be repeated for additional credits.

IB 3596. Global Entrepreneurship. 3 Credit Hours.

This course is based on a hands-on semester-long global entrepreneurship project that will require you to work through the whole process of setting up an import/export venture, from identifying a trade lead and foreign country to conduct business in, all the way to organizing the delivery of your imported or exported good to the final customer and choosing an appropriate payment method. This course will help you develop practical knowledge in the areas of international market research, cross-cultural negotiations, customs and trade regulations, global logistics, international pricing and payment methods in a foreign country. The course consists of lectures and videos, class discussions and exercises, as well as a group project.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (IB 3101 or IB 3901) and (BA 2196 (may be taken concurrently) or BA 2996 (may be taken concurrently))

IB 3682. Independent Study. 1 to 6 Credit Hour.

Readings and/or papers under supervision of a faculty member. The student should pursue a topic of interest by getting a faculty member to agree to supervise the student's study. Possible topics of interest to the faculty in the department include: cross-border mergers and acquisitions, foreign direct investment, and global sourcing, among others.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

IB 3901. Honors Fundamentals of International Business. 3 Credit Hours.

This course offers an introduction to the basic concepts and practices in international business. Topics to be covered include the economic, social, cultural, legal, and political environments of international trade and multinational corporations (MNCs), international institutions and agencies that impact on international business, the nature and characteristics of international business, strategy and structure of MNCs, problems of foreign direct investments, and conflicts between host countries and MNCs, and effects of MNCs on the economy. NOTE: Honors section of International Business Administration 3101.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

IB 3999. Honors Thesis I. 1.5 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the International Business Administration department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of International Business Administration 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

IB 4587. International Business Practicum. 3 Credit Hours.

This is the capstone senior course for the IBA major. This course covers strategic-level international business issues, such as choosing between local adaptation and international standardization of operations, HQs-subsidiaries relationships, design and coordination of an international supply chain. This course offers opportunities for practical applications of IB knowledge and techniques acquired across the IBA curriculum through two main assignments: an online international business simulation running a multinational corporation; as well as a consulting project requiring an in-depth analysis of an international business situation and practical recommendations. NOTE: This course is open only to IBA majors and must be taken by Senior students in their graduating semester.

Field of Study Restrictions: Must be enrolled in one of the following Majors: International Business.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in IB 3596.

IB 4999. Honors Thesis II. 1.5 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the International Business Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in International Business 3999.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in IB 3999.

Italian (ITAL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ITAL 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0815/0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815/0915, English 0815, PSY 0815, Russian 0815, or Spanish 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ITAL 0831. Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? With an historical and sociological framework as a basis, we will take an in-depth and more personal look at the immigrant experience as expressed through the immigrants' own voices in literature and film, and oral interviews. Topics explored include: assimilation, cultural identity and Americanization, exploitation and the American Dream, ethnic communities, gender, discrimination and stereotyping. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0831, CRIT 0831, History 0831, Italian 0931, Russian 0831, SOC 0831, or SPAN 0831/0931.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

ITAL 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

ITAL 1001. Italian Language I. 4 Credit Hours.

Introduction to the use of Italian as a spoken language. Fundamentals of grammar, basic patterns of oral communication, writing and reading, introduction to Italian culture.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

ITAL 1002. Italian Language II. 4 Credit Hours.

A continuation of the activities of Italian 1001. The basics already learned are practiced, and new patterns of oral communication, reading, and writing are introduced. Additional fundamentals of grammar.

Course Attributes: LA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 1001, ITAL 1901, 'C1002' in LCIT, 'B1002' in LCIT, 'C1003' in LCIT, 'B1003' in LCIT, or 'EXMPT' in LCIT)

ITAL 1011. Fundamentals - Intensive Basic Language. 6 Credit Hours.

This course meets four times per week and covers the equivalent of a full year of language study (Introductory Italian I and Introductory Italian II). The course is designed for highly motivated students who wish to develop communicative ability in Italian in a relatively short time. The course is conducted mainly in Italian.

Repeatability: This course may not be repeated for additional credits.

ITAL 1901. Honors Italian Language I. 4 Credit Hours.

Introduction to the use of Italian as a spoken language. Fundamentals of grammar, basic patterns of oral communication, writing and reading, introduction to Italian culture.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Italian.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ITAL 1902. Honors Italian Language II. 4 Credit Hours.

A continuation of the activities of Italian 1901. The basics already learned are practiced, and new patterns of oral communication, reading, and writing are introduced. Additional fundamentals of grammar.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, LA

Repeatability: This course may not be repeated for additional credits.

ITAL 2000. Special Topics. 3 Credit Hours.

Topics vary each semester. See advisor for more information.

Repeatability: This course may be repeated for additional credit.

ITAL 2001. Intermediate Italian I. 3 Credit Hours.

Using a variety of texts, the students will gradually broaden their vocabulary and understanding of culture, learn to organize ideas both in speaking and writing, and begin to appreciate the written text. Since the class will be conducted entirely in Italian, the students' communicative skill in speaking and writing will continue to expand. Grammatical points are reviewed as needed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 1002, 'EXMPT' in LCIT, or 'C2001' in LCIT)

ITAL 2002. Intermediate Italian II. 3 Credit Hours.

A continuation of Italian 2001, the course further develops students' communicative proficiency and encourages them to communicate confidently, clearly, and effectively in the target language through the cultivation of writing, speaking, reading, and listening skills. The course is a comprehensive review of grammar topics first introduced in Elementary Italian II, and introduces more complex grammar topics. In addition, the course expands and further cultivates a higher level of vocabulary.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 2001 or 'EXMPT' in LCIT)

ITAL 2041. Readings in Italian. 3 Credit Hours.

This course provides students with strategies designed to improve their reading skills. Students will also develop their ability to more effectively communicate ideas explored in the reading through discussion of problems of grammar, style, and composition. Elements of Italian culture, past and present, will also be examined in the context of this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 2096. Composition I: Italian Composition and Conversation. 3 Credit Hours.

Intensive work on communicative skills in speaking and writing. Students will expand their ability to express themselves conversationally both by building vocabulary used for debating, discussing, expressing a point of view, and obtaining information, and by engaging in role-playing and extemporaneous conversational situations. Formal and informal writing to improve written fluency in basic narrative prose.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 2100. Special Topics in Italian Culture. 3 or 4 Credit Hours.

Unique topics arranged each term; subtitle and course description is added to each section for students to review. For more information, consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ITAL 2001.

ITAL 2221. Italian Culture through Film. 3 Credit Hours.

This course will provide students with a study of Italian cinema from the time of Neorealism, which began in 1945, to the present. Through the vision of movies, students will be introduced to Italian culture, socio-economic conditions, political philosophies, history, and the transformation of the Italian society throughout the years. Taught in English.

Repeatability: This course may not be repeated for additional credits.

ITAL 2401. The Italian Origins of Classic Fairy Tales. 3 Credit Hours.

In this course we will trace the Italian origins of some of the best-known fairy tales of the Western tradition. We will compare versions from the sixteenth and seventeenth centuries with later French and German versions. Furthermore, we will discuss international screen adaptations, including Jean Cocteau's surrealist film *Beauty and the Beast* (1946), Pedro Almodovar's *Talk to her* (2002), and a few Disney adaptations. We will analyze such classics as *Beauty and the Beast*, *Cinderella*, *Sleeping Beauty*, *Jack and the Beanstalk*, and *Pinocchio*. The course will look at how fairy tales have shaped, strengthened or questioned gender stereotypes, normative gender and sexual identity, and traditional power relations through the lens of gender, feminist and queer theory, psychoanalysis, narratology, and social history.

Repeatability: This course may not be repeated for additional credits.

ITAL 2501. Italian for Business. 3 Credit Hours.

This course is designed for students who wish to develop language and professional skills in the context of an international business environment focused on Italy. Attention is also given to Italian culture, manners, and customs as they relate to business practices.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 3000. Special Topics in Italian Studies (Taught in English). 3 Credit Hours.

Topics vary each semester. See advisor for more information.

Repeatability: This course may be repeated for additional credit.

ITAL 3010. Special Topics in Italian (Taught in Italian). 3 Credit Hours.

Topics vary each semester. See advisor for more information.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 3020. Special Topics in Italian (Taught in Italian). 3 Credit Hours.

Topics vary each semester. See advisor for more information.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 3096. Composition II: Advanced Writing Skills. 3 Credit Hours.

This course has been designed to develop writing skills and reading comprehension, gradually and consistently. The emphasis of the course is practice in writing short essays, and in translating different types of language. Introduction to literary analysis. Attention to grammar, syntax and orthography.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ITAL 2096.

ITAL 3101. Survey of Italian Literature I. 3 Credit Hours.

Reading and discussion of representative works of Italian literature from the origins through the Renaissance. The course will cover such authors as Dante, Petrarch, Boccaccio, Machiavelli and Ariosto.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 2096, ITAL 2041, or ITAL 2501)

ITAL 3102. Survey of Italian Literature II. 3 Credit Hours.

Reading and discussion of representative works of Italian Literature from the Renaissance to modern times. The course will cover such authors as Marino, Metastasio, Alfieri, Goldoni, Leopardi, Manzoni, Ungaretti, Saba and Montale.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 2096, ITAL 2041, or ITAL 2501)

ITAL 3182. Independent Study I. 3 Credit Hours.

Arranged each semester, please consult with the instructor. NOTE: Considered only for extraordinary reasons. Does not replace required courses, unless specified and approved by the Italian Advisor.

Repeatability: This course may be repeated for additional credit.

ITAL 3201. Italian Culture and Civilization. 3 Credit Hours.

Depending on the expertise(s) of the teacher and the interests of the students, this multi-disciplinary course will cover major historical and cultural periods and phenomena. Examples: the emergence of Italian language and dialects; medieval, Renaissance, and baroque art and architecture; folk literature and music; opera; the history of the Risorgimento and the Unification; women and feminism; modern Italian culture and politics; and cinema.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 3202. Italian in the City. 3 Credit Hours.

This course is designed for students who wish to refine their Italian language skills and learn about contemporary Italian culture and society while exploring the neighborhoods of Rome off the beaten tracks. Each unit is introduced through clips from movies, historic documentaries, or passages from literary texts as well as songs, offering students a wide variety of authentic sources to develop their reading, writing, listening and speaking skills. The course includes visits to the neighborhoods under study, during which students will conduct guided observations, interaction with locals, guided research, and cultural "scavenger hunts".

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ITAL 2002.

ITAL 3240. Topics in Italian Cinema and Literature (in English). 3 Credit Hours.

This course is designed to deepen understanding of Italian culture, ethnicity, and universal themes as they are portrayed in Italian film and literature. It explores commonality and difference between two different forms of creative expression, in particular novels that were then adapted for film, as well as works of authors and filmmakers that are not directly linked. Topics vary. Viewing of films, readings. Taught in English. Can be taken as a cognate course for the Italian major.

Repeatability: This course may be repeated for additional credit.

ITAL 3282. Independent Study II. 3 Credit Hours.

Arranged each semester; please consult with the instructor. NOTE: Considered only for extraordinary reasons. Does not replace required courses, unless specified and approved by the Italian Advisor.

Repeatability: This course may be repeated for additional credit.

ITAL 4120. Special Topics. 3 Credit Hours.

Various topics in Italian studies. Arranged each semester. Please consult with the instructor. NOTE: Course offered to cover topics not currently available in the regular course inventory.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ITAL 2096, ITAL 2041, or ITAL 2501)

ITAL 4121. Nobel Prize Winners in Italian Literature. 3 Credit Hours.

Close reading and discussion of a selection of poetry and prose written by Italian authors who received the Nobel Prize in Literature.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 3101, ITAL 3102, or ITAL 3096)

ITAL 4122. Italian Theater and Performance. 3 Credit Hours.

Readings and discussion of the works of major Italian playwrights from Machiavelli to Goldoni, Pirandello and Eduardo De Filippo. The course culminates in the performance of Italian theater works.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ITAL 2096, ITAL 2041, or ITAL 2501)

ITAL 4130. Topics in Italian Literature. 3 Credit Hours.

This course is designed for students of Italian to concentrate on one period of literature or a particular topic in Italian literature. Topics vary. Taught in Italian.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ITAL 2096, ITAL 2041, or ITAL 2501)

ITAL 4161. Italian American Literature and Culture. 3 Credit Hours.

The focus of this course is the evolution of narrative and lyrical forms and contents of Italian American literature and film over the generations: the first, that wrote in various dialects of Italian and in nascent English with traces of Old World rhetoric; the semi-Americanized second that honored fathers and mothers in style and substance; the third and fourth that, now American, have embraced innumerable tendencies and modes of imagining and writing. Taught in English.

Repeatability: This course may not be repeated for additional credits.

ITAL 4240. Topics in Italian Cinema & Literature. 4 Credit Hours.

This course is designed to deepen understanding of Italian culture, ethnicity, and universal themes as they are portrayed in Italian film and literature. It explores commonality and difference between two different forms of creative expression, in particular novels that were then adapted for film, as well as works of authors and filmmakers that are not directly linked. Topics vary. Viewing of films, readings. Three hours taught in English, with the fourth hour taught in Italian. Written work and readings in Italian for Majors, Minors, Certificate Students.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ITAL 2096, ITAL 2041, or ITAL 2501)

ITAL 4401. Techniques of Translation. 3 Credit Hours.

An immersion in the theory and practice of translation with a focus on translating into English. The Italian texts, chosen in consultation with the instructor, can be drawn from not only prose fiction, poetry, and drama, but also such other genres as memoir, travel writing, and film soundtracks, as well as the gamut of text types in the human sciences, including cultural theory, philosophy, history, and ethnography. The aim is not just to translate, but to think deeply about translating, to develop writing practices by drawing on the resources of theory, past and present, and by examining translations written by professionals.

Repeatability: This course may not be repeated for additional credits.

ITAL 4920. Honors Special Topics. 3 Credit Hours.

Various topics in Italian studies. Arranged each semester. Please consult with the instructor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Japanese (JPNS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

JPNS 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

JPNS 1001. Japanese Elements I. 4 Credit Hours.

First semester level of Japanese. Assumes no prior knowledge.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

JPNS 1002. Japanese Elements II. 4 Credit Hours.

Second semester level of Japanese.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 1001, 'C1002' in LCJP, or 'B1002' in LCJP)

JPNS 1003. Oral Intensive Japanese I. 3 Credit Hours.

A bridge between beginning and intermediate Japanese levels, this course emphasizes vocabulary building and the use of spoken Japanese through situational conversational practice. Tests will be in the forms of listening and reading comprehension and structured interviews. An ability to read and write hiragana and katakana is required, as is a mastery of most basic grammatical rules.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 1002, 'C2701' in LCJP, or 'B2701' in LCJP)

JPNS 1301. Kanji I. 3 Credit Hours.

Kanji or Chinese characters are an integral part of Japanese orthography system, which is considered as a key factor to learners' reading comprehension and vocabulary building. However, Kanji is considered to be difficult and rather time-consuming to acquire, especially for learners from alphabetic orthography systems such as English speakers. This course is thus designed to promote students' understanding and mastery of 300 basic Kanji and to help them establish a solid foundation to learn novel and complex Kanji in the course of their learning Japanese. By mastering 300 basic Kanji, students will acquire the Kanji proficiency equivalent to JLPT (Japanese Language Proficiency Test) N4, and also improve their reading and writing skills in addition to vocabulary building. More important, students will learn how to "learn" novel Kanji.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 1001, 'C1002' in LCJP, or 'B1002' in LCJP)

JPNS 2000. Special Topics I. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

JPNS 2001. Intermediate Japanese I. 3 Credit Hours.

Third semester level of Japanese.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JPNS 1002.

JPNS 2002. Intermediate Japanese II. 3 Credit Hours.

Fourth semester level of Japanese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 2001 or JPNS 2701)

JPNS 2003. Oral Intensive Japanese II. 3 Credit Hours.

A bridge between intermediate and advanced Japanese levels, this course focuses on vocabulary acquisition in a variety of conversational situations. Throughout the semester, several vocabulary quizzes and structure tests will be given, while the final exam will be in the form of interviews. Students are required to complete one project involving various communication activities outside the classroom.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 1003, JPNS 2002, JPNS 2702, or 'C3001' in LCJP)

JPNS 2011. Survey of Japanese Literature: Pre-Modern. 3 Credit Hours.

A study of memoirs, poetry, novels, and other genres is included in this survey of classical Japanese literature. Knowledge of Japanese language is not required. Note: JPNS 2011 and ASST 2011 are equivalent courses and students will not be able to receive credit for both.

Repeatability: This course may not be repeated for additional credits.

JPNS 2012. Modern and Contemporary Japanese Literature in Translation. 3 Credit Hours.

A survey of modern Japanese literature focusing on novels and short stories. Authors include Tanizaki, Kawabata, and Mishima. Note that knowledge of Japanese language is not required. NOTE: Prior to fall 2009, the course title was "Survey of Japanese Literature: Modern." Note: This course is cross-listed with Asian Studies 2012. Students may only receive credit for one of these courses: ASST 2012 or JPNS 2012.

Repeatability: This course may not be repeated for additional credits.

JPNS 2015. Tokyo in Literature and Film. 3 Credit Hours.

Like all great cities, Tokyo simultaneously fascinates and frightens us. The course explores this fascination and fear through the work of leading writers and directors who have responded to and shaped the city in their work. Readings will include essays, short stories, and novels by authors such as Yasunari Kawabata, Fumiko Hayashi, Banana Yoshimoto, and Haruki Murakami. Films by directors such as Yasujiro Ozu, Satoshi Kon, and Shosuke Murakami will be reviewed and discussed. Note: This course is cross-listed with Asian Studies 2015. Students may only receive credit for one of these courses: ASST 2015 or JPNS 2015.

Repeatability: This course may not be repeated for additional credits.

JPNS 2016. Mystery and Crime Fiction in Japan. 3 Credit Hours.

This course examines mystery and crime fiction in Japan through the work of writers such as Edogawa Rampo, Matsumoto Seicho, and Kirino Natsuo. Through critical analysis of novels and short stories, we'll seek insights into the anxieties and tensions of life in modern and contemporary Japan. We'll explore a range of socio-cultural issues in areas such as family life, education, careers, and gender relations. All readings and discussions are in English. Note: This course is cross-listed with Asian Studies 2016. Students may only receive credit for one of these courses: ASST 2016 or JPNS 2016.

Repeatability: This course may not be repeated for additional credits.

JPNS 2017. Stories of Parents and Children in Japanese Literature and Film. 3 Credit Hours.

This course explores the portrayal of family relationships in modern and contemporary Japanese fiction and film. Topics for study and discussion include the tension between the older and younger generations, and changing understandings of the family within Japanese society. The work of writers and filmmakers such as Soseki Natsume, Yasujiro Ozu, Kafu Nagai, Hirokazu Kore-eda, and Haruki Murakami will be examined. Class discussions and activities, readings, and written assignments aim at developing students' critical skills. Knowledge of Japanese is not required. Note: This course is cross-listed with Asian Studies 2017. Students may only receive credit for one of these courses: ASST 2017 or JPNS 2017.

Repeatability: This course may not be repeated for additional credits.

JPNS 2021. Japanese Literature in Film. 3 Credit Hours.

A look at cinematic adaptations of Japanese novels and short stories. Discussions and assignments develop analytical and critical skills in reading literary and cinematic texts selected from the works of the principal figures of Japanese literature and film, such as Tanizaki, Mishima, and Kurosawa. Note that knowledge of Japanese language is not required. Note: This course is cross-listed with Asian Studies 2021. Students may only receive credit for one of these courses: ASST 2021, ASST 2921, JPNS 2021, or JPNS 2921.

Repeatability: This course may not be repeated for additional credits.

JPNS 2050. The Japanese Writer in Focus. 3 Credit Hours.

This special topics course offers students the opportunity for in-depth reading, study, and discussion of the novels and short stories of one or two modern or contemporary Japanese writers. The work of writers who are highly regarded both in Japan and globally - such as Haruki Murakami, Kenzaburo Oe, Natsume Soseki, and Yukio Mishima - will be the focus of the course. Students will also be introduced to published scholarship on the writer's work. All readings are English translations of work originally published in Japanese. Note: This course is cross-listed with Asian Studies 2050. Students may only receive credit for one of these courses: ASST 2050 or JPNS 2050.

Repeatability: This course may be repeated for additional credit.

JPNS 2111. Japanese Literature: From Classical to Contemporary. 3 Credit Hours.

Students taking this course will have the opportunity to learn about Japan's long literary history by reading, discussing, and analyzing selected novels, short stories, poems, and literary essays. The first half of the semester will focus on work produced up through the pre-modern period, with the second half covering the modern and contemporary periods. Writers ranging from Murasaki Shikibu and Yoshida Kenko to Natsume Soseki and Murakami Haruki will be introduced. Class discussions and assignments will help students become acquainted with current theoretical and methodological approaches in the fields of Japanese studies (and, more broadly, Asian Studies) and literary studies. All readings are English translations of work originally published in Japanese. NOTE: Students can receive credit only once for either ASST 2111 or Japanese 2111.

Repeatability: This course may not be repeated for additional credits.

JPNS 2301. Kanji II. 3 Credit Hours.

This course is a continuation of Kanji I and designed to promote students' understanding and mastery of an additional 300 (or more) Kanji at the intermediate level. By mastering the additional 300 Kanji, students will acquire the Kanji proficiency equivalent to JLPT N3, and also improve their reading and writing skills in addition to vocabulary building.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 1301, JPNS 2702, or 'C3001' in LCJP)

JPNS 2522. Basic Writing in Japanese. 3 Credit Hours.

Japanese 2522 is designed to introduce students whose native language is not Japanese to basic-level writing skills that go beyond mere sentence manipulation drills. With a focus on paragraph development, students will learn, step by step, the organizational principles that will help them express themselves effectively in Japanese on familiar topics, such as family, daily activities, personal possessions and experiences. Students will also learn to incorporate newly learned vocabulary and structures effectively into their writing to further enhance their overall Japanese language skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 2701 or 'C2702' in LCJP)

JPNS 2631. Structure of Japanese Language I. 3 Credit Hours.

This course is designed to accomplish three major objectives to further develop students' Japanese language proficiency. First, it will help students have a strong command of the basic and more complicated rules of Japanese grammar already introduced in Japanese 1001, 1002, 2001, & 2002. Second, it will also help students further improve their fluency in both comprehension and production. Lastly, it will also help students pass N4 of JLPT.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 2702 or 'C3001' in LCJP)

JPNS 2701. TUJ - Japanese Intermediate I. 4 Credit Hours.

This is a TUJ unique 2nd year, Intermediate Japanese course, and the first half of the intermediate Japanese language courses. It adopts an integrated approach to develop students' communicative competence for everyday communication. Upon successful completion of the intermediate courses, students will be able to demonstrate the proficiency level equivalent to N4 of JLPT. In addition to the course work and assignment, students are strongly recommended to spend at least one hour per week at the language lab.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 1002, 'C2701' in LCJP, or 'B2701' in LCJP)

JPNS 2702. TUJ - Japanese Intermediate II. 4 Credit Hours.

This is a TUJ unique 2nd year Intermediate Japanese course. This is the second half of the intermediate Japanese language courses. It adopts an integrated approach to develop students' communicative competence for everyday communication. Upon successful completion of the intermediate courses, students will be able to demonstrate the proficiency level equivalent to N4 of JLPT. In addition to the course work and assignments, students are strongly recommended to spend at least one hour per week at the language lab.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 2001, JPNS 2701, or 'C2702' in LCJP)

JPNS 2782. Independent Study in Japanese. 1 to 6 Credit Hour.

Independent study in Japanese.

Repeatability: This course may be repeated for additional credit.

JPNS 3000. Special Topics in Japanese I. 3 Credit Hours.

Topics will focus on aspects of the language, literature, or culture of Japan.

Repeatability: This course may be repeated for additional credit.

JPNS 3001. Advanced Japanese I. 3 Credit Hours.

Fifth semester level of Japanese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 2002, JPNS 2702, or 'C3001' in LCJP)

JPNS 3002. Advanced Japanese II. 3 Credit Hours.

Sixth semester level of Japanese.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 3001 or 'C3002' in LCJP)

JPNS 3003. Advanced Japanese Writing. 3 Credit Hours.

A course for students who feel secure in the fundamentals of writing in the Japanese language but who want additional instruction beyond the introductory composition courses to improve their writing. This course focuses on one of two writing styles depending on the semester: formal and academic essays (ronbun) and personal and impressionistic essays (zuihitsu). Ask the instructor which style will be focused on during the semester for which you are going to register. There will be a lot of speed writing in class for students to prepare for a company essay test. Note that this course may be taken by native speakers of Japanese.

Repeatability: This course may be repeated for additional credit.

JPNS 3010. Special Topics in Japanese II. 3 Credit Hours.

A continuation of Japanese 3000 (Critical Languages 0222). Topics will focus on aspects of the language, literature, or culture of Japan.

Repeatability: This course may be repeated for additional credit.

JPNS 3096. Intermediate Writing in Japanese. 3 Credit Hours.

Students will learn intermediate-level writing skills in Japanese built on their basic writing skills. They will learn to write multiple-paragraph essays appropriate for various Japanese writing styles. For many Japanese learners, not being able to write effectively in Japanese is a major concern, especially for college students. To this end, the course deals with elements that help improve the quality of a written product, including grammar, structure, logic, and most importantly, organization. In the intermediate writing course, students are required to write insightful essays incorporating their experiences and reading/researched materials using appropriate cohesive devices.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 3001 or 'C3002' in LCJP)

JPNS 3631. Structure of Japanese Language II. 3 Credit Hours.

This course is designed to accomplish four major objectives. First, it will help students have a strong command of the advanced rules of Japanese grammar already learned in Japanese 3001 and 3002 to practice with complete control. Second, it will help students further improve their fluency both in comprehension and production in academic discourse. Third, it will also help students further develop their communicative competence, focusing on sociolinguistic and pragmatic aspects of Japanese language. Students will learn how to appropriately deal with social dominance, the social distance, and a variety of situations in advanced discourse. Lastly, it will help students pass N3 of JPLT.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 3001 or 'C3002' in LCJP)

JPNS 3900. Honors Special Topics: Japanese. 3 Credit Hours.

Topics vary from semester to semester. This is an Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

JPNS 4001. Japanese Advanced III. 3 Credit Hours.

This course has 5 major goals. First, it will help students develop a higher level of reading and writing skills, and familiarize with socio-cultural topics. Second, it will help students improve their levels of formality in speaking in different situations of their everyday conversation and academic discourse. Third, it will also help students develop critical thinking and manners for discussion in Japanese. Fourth, it will help students learn idiomatic expressions and more involved syntactical forms. Lastly, it will help students pass N2 of the JLPT.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 3002 or 'C4001' in LCJP)

JPNS 4002. Japanese Advanced IV. 3 Credit Hours.

This is the last one of four courses in a series of Advanced Japanese courses which focuses on the levels of formality or politeness in conversation as well as on fifteen socio-cultural topics in the Japanese speaking community. This course covers chapters 13, 14, and 15 of the textbook. The course is designed to accomplish four major objectives. First, it will help students develop a higher level of reading and writing skills, and familiarize with haiku as well as socio-cultural topics. Second, it will also help students develop critical thinking, interview and debate skills in Japanese. Third, it will help students learn more involved idiomatic expressions and syntactical forms. Lastly, it will help students pass N2 of Japanese Language Proficiency Test (JLPT). To achieve these goals, this course will provide students with three reading topics: Japanese people and Nature, Politics in Japan, and the Future of World and Japan, in a variety of forms (i.e., reading and speaking based discussion). Each topic has its own focus in the speaking section such as interviewing, debating academic and social issues, and agreeing and disagreeing with others' opinions, to appropriately deal with the issues of politeness. Students are expected to use integrated skills to deal with each task presented in each chapter and also to build up their vocabulary and learn Chinese characters (Kanji) while completing reading, speaking, and grammar tasks. Moreover, students are required to conduct interviews with three people about a socio-cultural issue selected and to make a report on the results in two forms: an oral report in class and a written short paper.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 4001 or 'C4002' in LCJP)

JPNS 4003. Advanced Oral Japanese. 3 Credit Hours.

This course provides both oral and aural practice in Japanese by introducing theoretical and practical aspects of oral/aural skills. It is designed and intended for students who have successfully completed three years of Japanese language learning (Japanese Advanced II), and requires students' advanced reading/writing skills in order to prepare their speech scripts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JPNS 3002 or 'C4001' in LCJP)

JPNS 4182. Japanese Independent Study I. 3 Credit Hours.

An independent-study course arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in JPNS 3002.

JPNS 4196. Seminar in Japanese and Japan: Japanese Society and Culture through Newspaper. 3 Credit Hours.

Seminar in Japanese and Japan is a capstone course that builds on the solid foundation of advanced linguistics skills, socio-cultural knowledge, and critical thinking that students have acquired. It also marks their final stage of Japanese language learning. Three topics (Topic I: Socio-cultural, Topic II: Business, Topic III: Literature) are offered alternately and designed to allow students to select and pursue a topic of their interest. In the courses, students will learn to read critically and properly appreciate the original texts of a selected topic. While reading about socio-cultural aspects, topics/issues in business, or literature, students will further their understanding of Japanese language. This course focuses on reading on socio-cultural aspects of Japan by reading newspapers. Newspapers are one of the main sources of information to learn about the society's present status, social and political problems, and perspectives for future. In this course, students will learn the most up-to-date information of Japanese society and develop their reading skills and comprehension by reading newspapers. To achieve those goals, the course is divided into two parts. The first half of the course will be devoted to developing reading skills and building lexicon necessary to understand newspaper articles as well as the stylistics and format characteristic of newspapers (e.g., the use of abbreviations and technical terms in the headlines and leads). In order to increase readiness for reading newspapers, students will read 5-7 short passages a day (with a complete vocabulary list) on a variety of topics. Students' acquisition of new vocabulary and expressions will be tested on a daily basis. In the second half of the semester, students will read Japanese newspaper articles weekly. Each week, two articles will be chosen for a class reading followed by discussions. In addition, each student will choose an article for a weekly oral report. Through reading and class discussions, students are expected to gain in-depth understanding and analytical views of contemporary Japanese society and culture.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JPNS 4001.

JPNS 4282. Japanese Independent Study II. 3 Credit Hours.

An independent-study course arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in JPNS 3002.

JPNS 4296. Seminar in Japanese and Japan: Business. 3 Credit Hours.

Seminar in Japanese and Japan is a capstone course that builds on the solid foundation of advanced linguistics skills, socio-cultural knowledge, and critical thinking that students have acquired. It also marks their final stage of Japanese language learning. Three topics (Topic I: Socio-cultural, Topic II: Business, Topic III: Literature) are offered alternately and designed to allow students to select and pursue a topic of their interest. In the courses, students will learn to read critically and properly appreciate the original texts of a selected topic. While reading about socio-cultural aspects, topics/issues in business, or literature, students will further their understanding of Japanese language. Topic II has a special focus on business, and is designed to introduce students to basic concepts and current issues of business both in the domestic and international markets. Students will explore basic concepts of business, building up new vocabulary items, examining major and important terms used in discussing business and reading short articles on current topics. Moreover, students will explore a variety of short articles concerning current topics in economics, politics, and business law as well, for business is tightly connected with these three topics. Lastly, students will also learn how to conduct, write, and present a simple version of secondary research paper on one of the topics in business.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JPNS 4001.

Jewish Studies (JST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

JST 0802. Race & Identity in Judaism. 3 Credit Hours.

Investigate the relationship between race and Judaism from Judaism's early period through today, looking both at how Jews have understood their own racial identity and how others have understood Jews' racial identity. You will explore the idea of racial identity in Judaism in order to examine the complex network of connections between racism and anti-Semitism, as you read primary and secondary texts in Jewish philosophy and history and in the study of race and racism. We hope to illuminate these complex issues as well as to engage with them on a personal and political level, examining the relationship between issues of race, religion, identity, and social justice and injustice, and inquiring into how we, as informed citizens in a global society, can affect change for the better. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Jewish Studies 0902 or Religion 0802/0902.

Course Attributes: GD, SF

Repeatability: This course may not be repeated for additional credits.

JST 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about Israeli culture by taking a guided tour of its literature and film. You don't need to speak a language other than English to take this exciting course, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film include family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

JST 0902. Honors Race & Identity in Judaism. 3 Credit Hours.

Investigate the relationship between race and Judaism from Judaism's early period through today, looking both at how Jews have understood their own racial identity and how others have understood Jews' racial identity. You will explore the idea of racial identity in Judaism in order to examine the complex network of connections between racism and anti-Semitism, as you read primary and secondary texts in Jewish philosophy and history and in the study of race and racism. We hope to illuminate these complex issues as well as to engage with them on a personal and political level, examining the relationship between issues of race, religion, identity, and social justice and injustice, and inquiring into how we, as informed citizens in a global society, can affect change for the better. (This is an Honors course.) NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Jewish Studies 0802 or Religion 0802/0902.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SF

Repeatability: This course may not be repeated for additional credits.

JST 2000. Special Topics in Jewish Studies. 3 Credit Hours.

The specific topic of this course varies from term to term. Please contact the Jewish Studies advisor or the instructor for more information.

Repeatability: This course may be repeated for additional credit.

JST 2109. Jewish Voices in Russian Culture. 3 Credit Hours.

In this course we will study the Jewish experience in the Russian Empire, the Soviet Union, and Post-Soviet Russia, with an emphasis on the 20th century, debunking many of the myths with which many students may have been familiar from the film "Fiddler on the Roof." We will read, in translation, excerpts from memoirs, works of literature and history, and view films, with subtitles by Jewish and non-Jewish scholars, authors, poets, and filmmakers about what Russians have called "The Jewish Question" for more than two centuries. We will also take up issues of anti-Semitism and xenophobia and consider them in the context of European and American history.

Repeatability: This course may not be repeated for additional credits.

JST 2403. Introduction to Judaism. 3 Credit Hours.

This course introduces students to the beliefs, rituals, customs, and practices of the Jewish people in a historical context through an analysis of a variety of religious, cultural, and political texts and artifacts. Note: Formerly titled "What is Judaism?" Students who earned credit under the prior title will not receive additional credits for this course. This course is equivalent to REL 2403; students may receive credit for either JST 2403 or REL 2403.

Repeatability: This course may not be repeated for additional credits.

JST 2405. Introduction to Afro-Jewish Studies. 3 Credit Hours.

This course will introduce students to the study of African and African-Diaspora Jews. Students will examine and critically assess the various past and present methods used to study Africana Jewish communities. The research and readings will provide students with a basic introduction to Afro-Jewish history, culture and religion. It will also analyze the effects of race and racism on the construction of Afro-Jewish identities.

Repeatability: This course may not be repeated for additional credits.

JST 2408. Jewish Secular Thought and Culture from Spinoza to Seinfeld: A History of Jewish Secularism. 3 Credit Hours.

Non-religious Jews come in all shapes and sizes: political radicals, philosophers, scientists, psychoanalysts, feminists, stand-up comics. Secular Jews helped establish the modern age, gave voice to the critique of religion, pushed for separation of Church and State, developed a vibrant Yiddish culture and founded the State of Israel. This course is a survey of issues in modern Jewish history from the philosophical critique of the Bible to tensions between religious and secular Jews in Israel. We will pay close attention to the thinkers who helped frame the transformations of Jewish self-understanding in the West: Spinoza, Mendelssohn, Marx, Freud, Einstein, Arendt...and Seinfeld. [Duplicate Credit Warning: The prior title for this course was "Jewish Secularism/Jewish Civilization I"; students who successfully completed that version of the course will not earn additional credits for this course.]

Repeatability: This course may not be repeated for additional credits.

JST 2409. Secular Jewish Utopian Politics / Jewtopias: The Jewish Romance with Communism, Zionism, and America. 3 Credit Hours.

What is Jewish politics? Jews were involved with three grand political cultures in the 20th century: The Zionist Movement, Communism, and Liberal Democracy. The new "Promised Lands" for Jews in Europe, Russia, Israel, and America were secular and utopian. Through literature, manifesto, fiction and film this course will examine each of these movements and explore the dark side of the attempts to create perfect social justice—how those visionary dreams were tempered if not shattered. Readings will include: Theodor Herzl, Arthur Koestler, Michael Chabon, Michael Walzer, and Tony Kushner's Angels in America. [Duplicate Credit Warning: The prior title for this course was "Jewish Secularism/Jewish Civilization II"; students who successfully completed that version of the course will not earn additional credits for this course.]

Repeatability: This course may not be repeated for additional credits.

JST 2447. Kabbalah and Mysticism. 3 Credit Hours.

Introduction to the basic concepts, worldview and psychology of the Kabbalah. Mystical experiences and spiritual practices of the Kabbalists are situated within the context of comparative mysticism.

Repeatability: This course may not be repeated for additional credits.

JST 2705. Anti-Semitism/Holocaust/Racism. 3 Credit Hours.

A history of anti-Semitism with a focus on the Holocaust and racism. This course will investigate the development and implementation of racial anti-Semitism in Germany and compare Nazi anti-Semitism with other forms of racism and anti-Semitism in Europe and America. It will also explore the connection between anti-Semitism and anti-Zionism, the growth of neo-Nazism, and the complex relationship between American Jews and African Americans. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Be advised that students will only receive credit once for JST 2705, REL 2705, or HIST 2705.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

JST 2706. Jewish Diaspora/Survey of Jewish History. 3 Credit Hours.

Jewish history from the destruction of the Second Jewish Commonwealth to the creation of the State of Israel. The course will examine minority status, migration, persecution, economic adaptation, gender roles in different environments, acculturation and identity. The survey includes: the medieval Jewish experience under both Christian and Islamic rule; the development of Jewish communities in Eastern Europe, Western Europe, and the United States; the changing role of Jewish women; the rise of Zionism; and the Holocaust.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

JST 2779. Love Themes in Hebrew Literature. 3 Credit Hours.

The development of the different love themes from the "Song of Songs," through the golden age of Spain, Hebrew poetry in Italy, the Enlightenment, revival period, and Israeli literature. Among the themes will be great expectations, happiness and unity, and the happy hell of withered love. Changes in style, form, and content will be emphasized and recurring symbols will be discussed.

Repeatability: This course may not be repeated for additional credits.

JST 2900. Honors Special Topics. 3 Credit Hours.

Course content varies each semester. Honors students can obtain a description of the current version at the Jewish Studies office, Mazur Hall, Room 641.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

JST 3000. Topics in Jewish Studies. 3 Credit Hours.

Course content varies each semester. Students can obtain a description of the current version at the Jewish Studies office, Mazur Hall, Room 641.

Repeatability: This course may be repeated for additional credit.

JST 3082. Independent Jewish Studies. 3 Credit Hours.

This is a course for advanced undergraduates to do sustained work with a professor they have already worked with in the program. The content and scope of the course is determined by the individual professor and the student with the approval of the director of Jewish Studies.

Repeatability: This course may be repeated for additional credit.

JST 3085. Jewish Studies Internship. 3 Credit Hours.

The Jewish Studies internship course is designed to enable Temple students to work in the Jewish community both to do hands-on work in a Jewish cultural, historical, communal or religious organization in Philadelphia's vibrant Jewish community and do a research project on some aspect of their work. With the director of Jewish Studies, the students will work out a set of readings appropriate to their individual research project.

Repeatability: This course may be repeated for additional credit.

JST 3182. Independent Study. 1 to 4 Credit Hour.

Students make arrangements with faculty in their departments to take an individual program of study. Course is by arrangement. Contact department chair for information.

Repeatability: This course may be repeated for additional credit.

JST 3221. Jewish Experience in America. 3 Credit Hours.

This course considers the evolution of the Jewish community in the United States from its colonial beginnings to the present day. Topics include: the immigrant experiences of various waves of migration; the development of the major religious movements within Judaism: Reform, Conservative, Orthodox and Reconstructionist; the role of Jews in American life and politics; the changing roles of American Jewish women; American anti-Semitism; Black-Jewish relations; relationship between American Jews and Israel; assimilation and identity.

Repeatability: This course may not be repeated for additional credits.

JST 3250. Topics: Jews & Film. 3 Credit Hours.

This course will vary by semester offering various approaches to issues of Jews and film. It will include topics such as: Eastern and Central European Jewish films; American Jews and Hollywood; films about Jews, Israeli film, and selected Jewish filmmakers and their works. NOTE: Sometimes, depending on the topic, this course will be cross-listed with Hebrew or Religion.

Repeatability: This course may be repeated for additional credit.

JST 3406. Women in Judaism. 3 Credit Hours.

This interdisciplinary course will explore issues of gender in various Jewish texts and practices. Using feminist theory it will ask questions about how normative notions of Jewish masculinity and femininity have been constructed in different texts from different historical periods. Students will engage in close readings of contemporary and ancient texts.

Repeatability: This course may not be repeated for additional credits.

JST 3408. Israel in the Middle East. 3 Credit Hours.

Law, geography, education, religion, politics, eastern and western communities, and culture examined by experts in three fields. NOTE: This course will be offered in English.

Repeatability: This course may not be repeated for additional credits.

JST 3411. The Philosophies of Judaism. 3 Credit Hours.

Close study of works by one or more Jewish and political philosophers, stressing their relevance to an understanding of contemporary politics and issues of Jewish identity, culture, and religion.

Repeatability: This course may not be repeated for additional credits.

JST 3571. Israel, History, Politics and Society. 3 Credit Hours.

Development of Israel and its relationship with its Arab neighbors. Includes a discussion of the evolution of Zionism, the growth of Arab nationalism, the creation of the Jewish State, the plight of the Palestinian refugees, and an evaluation of peace prospects in the Middle East.

Repeatability: This course may not be repeated for additional credits.

JST 3711. Israelis and Palestinians. 3 Credit Hours.

The course explores the Israeli/Palestinian relationship, beliefs and feelings from the beginning of the 20th century till today, as it is represented in both Israeli and Palestinian literature and art. A strong emphasis is on the development of the image of the other in each group and its connection to self identity. NOTE: The course will be conducted in English. Previously titled "Mideast Literature in Translation."

Repeatability: This course may not be repeated for additional credits.

JST 3720. Topics in Hebrew Culture. 3 Credit Hours.

Topics from Hebrew culture, which are of general and current interest based on reading Hebrew texts in translation. Lectures, audiovisual presentations, and large and small group work used to explore the significance of the texts.

Repeatability: This course may be repeated for additional credit.

JST 3900. Honors Special Topics. 3 Credit Hours.

Course content varies each semester. Honors students can obtain a description of the current version at the Jewish Studies office, Mazur Hall, Room 641.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

JST 4096. Independent Study in Jewish Studies. 3 Credit Hours.

Intensive study under individual guidance in a specific area suggested by the student and approved by the faculty advisor from the Jewish Studies faculty. NOTE: Capstone course. This course is required for all Jewish Studies majors.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

JST 4406. Ancient Judaism. 3 Credit Hours.

This course will look at the processes and stages involved in the formation of the Torah/Pentateuch (the books of Genesis-Deuteronomy), the formation of the Talmud (the anthology of Rabbinic thought), and the historical, social, and intellectual forces that shaped both. While the Jewish religious tradition typically sees the Torah as written by Moses, the critical perspective adopted by the course will look at how different scribal and priestly groups in ancient Israel contributed to a work that would only later be regarded as authored by Moses. Likewise, while traditional Judaic religion views the Talmud as a direct outgrowth of the Torah, this course will explore the diverse factions, debates, and battles between groups that either accepted or rejected the Torah in various forms, leading up to the emergence of the Rabbinic movement and the preservation of different views within their literature. Note: Prior to summer 1, 2016, the course title was "Secular Study of Ancient Jewish History: Between the Torah and the Talmud." Duplicate credit warning: Students who took JST 4406 or REL 4406 under the previous title will not earn additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

JST 4411. Secularism: Jewish and Muslim Women. 3 Credit Hours.

In its three-hundred-year history as a Western concept, secularism is often defined as the opposite of religion. Religious women have alternately found western secularism to be a source of liberation (as it grants them greater civil rights) and a source of oppression (as it putatively shrinks the religious sphere). In creating feminisms through Jewish and Muslim experience, feminisms that are both secular and religious, these religious women have complicated the meanings of secularism. They have also challenged the notion that feminism is necessarily secular. This course looks at examples of Jewish and Muslim women's lives and feminist thought in the US, Europe, and the Middle East. The course will compare and contrast the feminism of these two groups of religious women, in order to more fully understand the role of concepts like secularism, feminism, and religion. NOTE: Students will earn credit only once for either JST 4411, GSWS 4411, or REL 4411.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Journalism (JRN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

JRN 1101. Elements of Writing. 2 Credit Hours.

This course focuses on the fundamentals of style and language usage necessary for effective writing.

Repeatability: This course may not be repeated for additional credits.

JRN 1111. Journalism and Society. 3 Credit Hours.

The purpose of this course is to acquaint students with concepts and functions of journalism and the related industries of advertising and public relations in American society. Students will gain knowledge about the history, economics and industry structure of these industries, focusing on how mass media content is determined and disseminated. We will explore underlying values associated with journalism, relationships between journalism and other social institutions, and current issues facing journalists. NOTE: (1) Departmental core course. Normally taken as the first Journalism course. A grade of C or higher is required in order to take higher-level Journalism courses. (2) This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN

Repeatability: This course may not be repeated for additional credits.

JRN 1113. Audio/Visual Newsgathering. 3 Credit Hours.

This course will present students with additional story-telling tools by introducing them to basic techniques of reporting with and editing sound and video. The emphasis of this course will be on the use of digital audio and video recorders in the field to produce news stories for radio, television and the web. This course requires that students use the computer software that is used in the industry. NOTE: Special authorization required for non-majors.

Repeatability: This course may not be repeated for additional credits.

JRN 1114. Design for Journalists. 3 Credit Hours.

This course introduces students to the fundamental elements of visual design and their application in various types of journalistic publications both in print and online. Students will learn and use a variety of tools that will allow them to think and create journalistic elements visually. NOTE: Special authorization required for non-majors.

Repeatability: This course may not be repeated for additional credits.

JRN 1196. Writing and Reporting. 3 Credit Hours.

Introduction to and practice in writing stories for various mass media. Effective writing, journalistic style, and language skills are emphasized. NOTE: Departmental core course. This course is the prerequisite for all department writing courses. A grade of C- or higher is required in order to take upper level journalism courses.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

JRN 2101. Journalism Research. 3 Credit Hours.

Introduction to research used in journalism, including library materials, the World Wide Web, and electronic databases. Course includes retrieval, analysis, and presentation of data with final projects. NOTE: Departmental advanced core course.

Repeatability: This course may not be repeated for additional credits.

JRN 2111. The Practice and Process of News. 3 Credit Hours.

This course gives students an understanding of the kinds of work and industrial practices that go into the news. Students will learn how to write news articles, learn about workflow inside the newsroom, and explore the business and industrial pressures news organizations face. This is different than JRN 1196 - Writing for Journalism in that it offers a window into the way news is produced, while giving students skills and experience with writing, editing, and producing news for a publication. This course will offer in-depth engagement with some of the professional issues students encounter in JRN 1111 - Journalism and Society, but taught in a smaller class size. Students receive reporting and production assignments for news stories alongside readings and assignments that cover legal, ethical, and sociological issues in the news industry.

Repeatability: This course may not be repeated for additional credits.

JRN 2114. Journalism Innovation and Design. 3 Credit Hours.

This course explores how news organizations (and some non-news organizations) are using innovative approaches to storytelling across platforms and devices. It extends prerequisites focused on writing, reporting, and audiovisual news production by exploring the interrelationship among storytelling, user experience, and design, with an increased emphasis on creative visual presentation and experimentation.

Repeatability: This course may not be repeated for additional credits.

JRN 2201. Public Affairs Reporting. 3 Credit Hours.

Reporting and writing public affairs news stories. NOTE: News-Editorial sequence requirement.

Repeatability: This course may not be repeated for additional credits.

JRN 2202. Editing the News. 3 Credit Hours.

Editing copy, writing headlines and picture captions. Some layout, coordinating news values with space limitations. Consideration of management and ethical problems. NOTE: News-Editorial sequence requirement.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1196.

JRN 2301. Introduction to Magazines. 3 Credit Hours.

Overview of industry structure; magazine markets and audiences; and what professionals do: editing, writing, design, and advertising, circulation, concept development. NOTE: Strongly recommended as preparation for Journalism 3304 (0381).

Repeatability: This course may not be repeated for additional credits.

JRN 2396. Magazine Article Writing. 3 Credit Hours.

Writing, analyzing, and marketing factual articles for general and specialized magazines. Subject research, investigation of editorial needs, ethical and legal problems, and manuscript preparation.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

JRN 2501. Broadcast Newswriting. 3 Credit Hours.

Students learn skills necessary to write for radio and television under deadline pressure, analyze how broadcast news is presented, develop interview skills, and write newscasts and editorials.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1111, 'Y' in JRN1, or 'Y' in CRJR01) and (JRN 1196 or 'Y' in CRJR04)

JRN 2551. Broadcast Performance. 4 Credit Hours.

Explores the variety of skills required to communicate effectively through radio and television. Emphasis on performance techniques, creativity, writing and analytical skills needed to communicate effectively using various formats, such as interviews, editorials, commercials, and newscasts.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1113 or 'Y' in CRJR02)

JRN 2701. Approaches to Research in Journalism Studies. 3 Credit Hours.

This course offers an overview of theories and methods that are used to undertake research in journalism studies. Theoretical inquiries related to audience, news content, and news production including news effects, agenda setting, and gatekeeping, are the focus of class discussion and student activities. Students are introduced to quantitative and qualitative methods such as surveys, content analysis, textual/discourse analysis, in-depth interviews, and focus groups, and learn to use them appropriately.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JRN 1111 or CMST 1111)

JRN 2702. News Literacy. 3 Credit Hours.

This course is designed to teach students how to take skillful possession of their power as citizens by becoming more discriminating news consumers. Armed with critical thinking skills, a firm grasp on the history of journalism, and practical knowledge about news media, students learn how to find the reliable information they need to make decisions, take action, or make judgments. At a time when the digital revolution is spawning an unprecedented flood of information and disinformation each day, this course seeks to help students recognize the differences between news and propaganda, news and opinion, bias and fairness, assertion and verification, and evidence and inference.

Repeatability: This course may not be repeated for additional credits.

JRN 2705. Journalism Goes to the Movies. 3 Credit Hours.

This course surveys how films have depicted journalism over the years, from the earlier sound era to contemporary times. Students will discover through screenings, discussions, lectures and written assignments how the press and news media have been depicted, the impact journalism has had on culture and society, and what relevance the portrayals have in today's chaotic media landscape. The films screened will cover such topics as investigative reporting ("All the President's Men"); the tabloid approach to news ("Park Row"); TV news ("Good Night, and Good Luck"); magazines ("Almost Famous"); photojournalism ("Under Fire"); media manipulation ("Wag the Dog"); and more.

Repeatability: This course may not be repeated for additional credits.

JRN 2800. Special Topics in Journalism. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 2810. Special Topics in Journalism. 1 Credit Hour.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3101. Journalism Law and Ethics. 3 Credit Hours.

This course should improve students' writing and critical-thinking skills and help them understand the legal foundation for freedom of speech and press in America. Students will discuss First Amendment cases, and their ethical implications, to better understand how judicial values are linked to the professional lives of journalists and the free-expression rights of citizens.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

JRN 3201. Investigative Reporting. 3 Credit Hours.

Advanced instruction and practice in writing news stories with emphasis on investigative and other in-depth reporting techniques. NOTE: Special authorization required for non-majors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1196.

JRN 3251. Business Writing. 3 Credit Hours.

This course focuses on news reporting and writing about business and finance. Topics of coverage may include reporting on personal finance issues, banking, government economic and regulatory policies, and corporations and other forms of business.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3252. Opinion Writing. 3 Credit Hours.

Conceptualizing, researching, and writing effective opinion pieces for the mass media.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JRN 1196 or 'Y' in CRJR04)

JRN 3253. Health and Environmental Writing. 3 Credit Hours.

Instruction and practice in writing popular science articles for newspapers and magazines. Translation of scientific language, familiarization with science literature, and interviewing scientists.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3254. International Reporting. 3 Credit Hours.

This course focuses on interpreting and reporting about governments, politics, and cultures outside of the United States and ethnic groups within the United States.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3255. Sports Writing. 3 Credit Hours.

Instruction and practice in reporting and writing stories on a variety of sports topics. Traditional play-by-play reporting and locker room interviewing; less traditional sports activities. Students attend sports events and write outside of class.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3256. Writing Humor. 3 Credit Hours.

Understanding various forms of humor: wit, satire, parody, and irony. Practical assignments in writing humor.

Repeatability: This course may not be repeated for additional credits.

JRN 3257. Advanced Sports Reporting. 3 Credit Hours.

The goal of this course is to produce off-the-beaten path sports stories in a variety of formats, honing your sports reporting and writing skills. You'll be heading into the surrounding communities and the city to unearth and report on under-reported sports stories. You'll improve your multi-media skills in terms of putting together both audio and video packages, and you'll learn more about writing sports features and longer format pieces.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 3255 or 'Y' in CRJR08)

JRN 3258. Solutions Journalism. 3 Credit Hours.

This course introduces students to the practice of solutions-oriented reporting, an outcome-focused form of journalism, and assesses its impact on communities and issues.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1196.

JRN 3261. Beyond the Lines: Producing Sports Journalism. 3 Credit Hours.

This is an ESPN style feature television course where students will develop long-form audio and video documentaries on various aspects of sports, from the games to the players and communities that support them. The focus is on producing sports personality stories "beyond the field" of individuals and communities that dare to dream, strive to advance and inspire others.

Repeatability: This course may not be repeated for additional credits.

JRN 3263. Travel Writing. 3 Credit Hours.

This course explores international communication, intercultural competence, and the nature of travel (why and how we travel, and what we can learn from it) through a travel writing curriculum.

Repeatability: This course may not be repeated for additional credits.

JRN 3297. Writing Arts Criticism. 3 Credit Hours.

The mission of the course is to explore critical reviewing in many areas, which may include theater, dance, music, film, art, museum exhibitions, books and food. In addition to reading the works of reviewers, students will consider the different dynamics at play in reviewing in each art or discipline, and will go on assignment to write reviews. Students will present their reviews in a writing-workshop setting led by the instructor. By the end of the course students should be able to think about arts and entertainment in ways that lead to solid assessments, and should be able to write clear and organized arts criticism.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3301. Magazine Editing. 3 Credit Hours.

This class will cover not only "macro" aspects of the magazine industry, but also the "micro" processes of article acquisitions and editing - how to evaluate query letters, shape a manuscript, work with designers - because those skills constitute the core of what all good editors must be able to do, issue after issue.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 2301.

JRN 3302. Longform Magazine Writing. 3 Credit Hours.

This class will help students develop story ideas, match those ideas with appropriate markets, write professional query letters and deliver publishable magazine articles. The focus is on longer articles and in-depth reporting. Note: Prior to spring 2017, the course title was "Advanced Magazine Writing."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1196.

JRN 3303. Magazine Design. 3 Credit Hours.

This course introduces students to the specifics of magazine design. There will be an emphasis on creating portfolio pieces including table of contents, features, departments, and cover designs. Current trends and historical, cultural, and ethical dimensions of magazine design are also explored. There will be extensive use of desktop publishing and image manipulation software. Some knowledge of InDesign software will be helpful preparation.

Repeatability: This course may not be repeated for additional credits.

JRN 3304. 14th Street Magazine. 3 Credit Hours.

This is an experiential class in the editorial and business aspects of magazine production and distribution. Students write, edit, photograph, and design both print and online versions of a magazine; they also conduct reader research and sell advertising space. Note: Prior to spring 2017, the course title was "Philadelphia People."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 2301.

JRN 3351. Magazine Fiction Workshop. 3 Credit Hours.

Fiction has been an integral part of magazine publishing since the medium's earliest days. This course teaches students how to write with power both within and beyond the short story form. Emphasis is given to a hands-on, working application of narrative forms and techniques central to both fiction and new literary journalism. Publication of worthy student stories is encouraged. NOTE: Previously titled "Short Story Writing."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3352. Ripped from the Headlines. 3 Credit Hours.

In this class we will learn how to use journalistic tools and techniques to craft fiction, where fiction can be in the form of a novel and/or short stories. Students will practice doing the work of an investigative journalist - story generation, reporting, interviewing, and research - but with the end goal of creating a work of fiction instead of a news article. We will study the work of other journalists turned novelists and take inspiration from the world of film, television and theater. Students will also consider how and why fiction is useful when trying to make sense of the events that fill the daily news cycle.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1196 or 'Y' in CRJR04)

JRN 3401. Photography. 4 Credit Hours.

An introductory course in digital photography where each student produces a portfolio of photographs based on weekly assignments covering a variety of topics. The course includes small-group field trips, weekly lab sessions focusing on digital darkroom applications and in-class critiques of student work. Historic, contemporary, legal and ethical considerations are also explored. Digital SLR cameras are available for semester-long checkout.

Repeatability: This course may not be repeated for additional credits.

JRN 3402. Photojournalism. 2 Credit Hours.

The practical side of working as a photographer for newspapers, magazines, and wire services as well as freelance. Picture editing and handling.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 3401.

JRN 3403. Documentary Photography. 3 Credit Hours.

This course will expose students to both the history and practice of documentary photography. This course offers students the opportunity to hone their research, shooting and editing skills and refine their portfolio through documentary projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JRN 3401 or CMST 1111)

JRN 3404. Photography Seminar I. 2 Credit Hours.

First of two seminar courses in the Photography for the Mass Media sequence. Current topics in photography. Participation in a long-term project documenting and presenting the works of various photographers representing a variety of genre. Start-to-finish production of a book, CD version of same, or both. NOTE: Generally taken in the junior year.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 3401.

JRN 3405. Photography Seminar II. 2 Credit Hours.

Second of two seminar courses in the Photography for the Mass Media sequence. Current topics in photography. Participation in a long-term web-based effort presenting the works of various photographers from earliest times to the present. Start-to-finish production of a book, CD version of same, or both. NOTE: Generally taken in the senior year.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 3401.

JRN 3451. Photographic Portfolio. 2 Credit Hours.

Production, organization, and presentation of a photographic portfolio.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 3401 or 'Y' in CRJR06)

JRN 3482. Photography Special Projects. 1 to 4 Credit Hour.

Individual work in areas of special interest including, but not limited to, formal and informal portraiture, nature of photography, underwater photography, medical or scientific photography, or special research in photography.

Repeatability: This course may be repeated for additional credit.

JRN 3501. Radio News Reporting. 3 Credit Hours.

The overall goal of this course is to help develop the technical skills and journalistic acumen necessary for reporting, writing, interviewing, recording, and editing news and news related audio stories. Students will work on storytelling techniques such as voicers, wraps, readers, sound portraits, and audio documentaries.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1113 or 'Y' in CRJR02) and (JRN 2501 or 'Y' in CRJR05)

JRN 3502. TV News Reporting. 3 Credit Hours.

The overall goal of this course is to help develop the journalistic acumen and technical skills necessary for reporting, writing, shooting/recording, field producing and editing news and news-related stories for television.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

JRN 3504. Broadcast News Documentary. 3 Credit Hours.

This course focuses on longer-term journalistic documentaries for broadcast outlets. Students will have the opportunity to develop several enterprise stories over the course of the semester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

JRN 3505. Experimental Journalism. 3 Credit Hours.

This course focuses on the evolving forms of broadcast journalism coverage, including blogs, podcasts and mobile media. Students will also create multimedia stories, and explore social media and its journalistic uses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JRN 1113 or CMST 1111)

JRN 3506. Broadcast News Producing. 3 Credit Hours.

This course focuses on the behind-the-scenes aspects of pulling a broadcast newscast together. Students will produce several newscasts during the semester. Topics will include stories assignments, newscast structure and pacing, and interaction with reporters and anchors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

JRN 3551. Advanced Video Newsgathering. 3 Credit Hours.

This course is designed to teach you advanced video news reporting techniques. You will research, produce, write, shoot, and edit video news stories. You will gain further understanding of field lighting and audio recording, and strengthen your abilities to produce journalistic video narrative.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1113 or 'Y' in CRJR02)

JRN 3552. Crossroads: TUTV News Magazine. 3 Credit Hours.

Crossroads is a TV news magazine program for TUTV. Students will produce story packages for multiple episodes of this program on topics which may include profiles of interesting people, political pieces, stories about arts, media and entertainment, or developments in medicine, law or social justice.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

JRN 3554. A Broader View. 3 Credit Hours.

This is a hands-on production course where students will produce and host the TV public affairs talk show, A Broader View, that will air on TUTV and an individual student-created show that will air live on Blog Talk Radio. Over the course of the semester, students will research topical issues, book relevant guests, produce video and audio segment set-up pieces and serve as hosts of the programs. Emphasis is on interviewing skills. PLEASE NOTE: Prior to taking this course, students should know how to use digital audio and video equipment and edit.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113.

JRN 3556. The Temp: A New Kind of News Show. 3 Credit Hours.

This class will produce a student-driven and student-conceived magazine-format news show about news, politics, lifestyle and entertainment. The presentation will be in the style of Vox and Vice, encouraging outside-the-box thinking to produce topical, edgy stories. In addition to a broadcast on TUTV, The Temp will have a strong online presence, particularly on social media. Enrollment is open to students in all majors. Students rotate through roles as anchor, reporter, producer and social media producer, graphics, camera operator etc. In this way, all students will learn some of the different roles involved in producing a news magazine show.

Repeatability: This course may not be repeated for additional credits.

JRN 3575. Podcasting and Audio Journalism. 3 Credit Hours.

Curious about podcasting? Want to sharpen your audio storytelling and interview skills? In this course we will work on the fundamentals of interviewing, producing and hosting programs, and audio editing. Students will have opportunities to produce podcast content, meet professional podcasters and community storytellers, and get feedback on their work. You will have an opportunity to work both in teams and individually.

Repeatability: This course may not be repeated for additional credits.

JRN 3587. WRTI Radio News Workshop. 3 Credit Hours.

In this course designed for majors focused on radio as a career area, students work in the newsroom at WRTI-FM, Temple's public radio station. Students hold positions as producers, reporters, and anchors, and cover stories alongside local journalists in the nation's fourth largest broadcast market.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

JRN 3605. Data Journalism. 3 Credit Hours.

In this class, students will learn the skills needed to create visually exciting and thought-provoking online journalism. Topics include data journalism, data analysis, computer-assisted reporting, [painless] coding for journalists, and data visualization. The class is designed for an interdisciplinary group of students interested in writing, editing, visual design, or technology. Student-created projects will influence the path of the class: in a given semester, we may create infographics, investigate current political or economic issues, or develop innovative news apps.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1196.

JRN 3696. Philadelphia Neighborhoods. 3 Credit Hours.

An advanced multimedia course examining the production and design of online journalistic content. Topics will include online storytelling, website planning, organization, and production. Students will produce a comprehensive multimedia news website, taking advantage of the convergence of print and broadcast media. Additionally, conceptual issues related to publishing on the Internet will be discussed.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113.

JRN 3700. Journalism Studies Special Topics. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (JRN 1111, 'Y' in JRN1, or 'Y' in CRJR01)

JRN 3701. Contemporary Issues in Journalism. 3 Credit Hours.

Discussion, research, and analysis of issues of current interest and importance in journalism, public relations, and advertising areas. Examples of topics include coverage of elections by news and advertising, First Amendment issues, and media and the courts. NOTE: Topics announced in advance.

Repeatability: This course may not be repeated for additional credits.

JRN 3702. Race and Racism in the News. 3 Credit Hours.

This online course explores how the media address issues of race and class. Students will develop critical skills and perspectives necessary for journalists and others to understand and report the news in our culturally diverse society. Students will examine the power of the media, how editorial decisions are made and by whom, and will begin to define the roles they can play as consumers or managers of media. Class discussions will take place through various online venues. NOTE: Special authorization required for non-majors.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

JRN 3703. History of Journalism. 3 Credit Hours.

Development of American media with emphasis on freedom of the press, the relationship of journalism to social, economic, and political history, and the growth of magazines, book publishing, radio, television, and the Internet.

Repeatability: This course may not be repeated for additional credits.

JRN 3704. Ethical Issues in Journalism. 3 Credit Hours.

This study of journalism ethics should give students a better understanding of ethical issues confronting journalists and systematic, well-reasoned ways to address those issues. Focus in this course is not on what journalists legally can and cannot do, but instead on how they decide what they should and should not do.

Repeatability: This course may not be repeated for additional credits.

JRN 3705. Gender and American Mass Media. 3 Credit Hours.

This course explores the role of gender in both media reception and media practice. While it focuses primarily on cultural and professional notions about women's roles in American society, it also considers masculine stereotypes in the media world. The course examines the history and current practice of various media, including newspapers, magazines, broadcast news and entertainment shows, advertising, online media, film, and music.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

JRN 3706. Journalism and Globalization. 3 Credit Hours.

An interdisciplinary and comparative approach to mass media systems of the world and their structures and functions. Topics include cultural exchange or invasion, international news flow, freedom of the press, socialist and developing nations' theories of press, mass media, and modernization.

Repeatability: This course may not be repeated for additional credits.

JRN 3707. Visual Communication. 3 Credit Hours.

This course requires students to examine the many roles that photographs, both still and motion images, play in society. Through the analytic study of visual expression (mainly journalistic, advertising and documentary) students will be introduced to the tools necessary to understand all forms of visual communication.

Repeatability: This course may not be repeated for additional credits.

JRN 3708. Newsroom Management. 3 Credit Hours.

This course enables students to develop their critical-thinking and problem-solving skills by working through key supervision and leadership issues facing managers in a typical newsroom setting. Students are provided with case studies, techniques and strategies for addressing team-building issues and the ethical and other concerns surrounding newsroom leadership, whatever the newsroom platform, print, broadcast, or online.

Repeatability: This course may not be repeated for additional credits.

JRN 3709. The Entrepreneurial Journalist. 3 Credit Hours.

With traditional news organizations in crisis, there have never been more opportunities for journalists to become entrepreneurs. This course will explore the future of news, from individual bloggers to digital startups, and how journalists can help shape this future.

Repeatability: This course may not be repeated for additional credits.

JRN 3710. Journalism Studies Special Topics. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3711. Ethnic and Alternative News Media. 3 Credit Hours.

This course focuses on ethnic, immigrant, and alternative media organizations and the communities and audiences they serve. Topics include: an overview of the cultural histories of ethnic, immigrant and alternative communities; the creation and development of media organizations that serve these communities; the functions of these media organizations; analyses of the ownership, culture, organizational structures, and newsroom operations.

Repeatability: This course may not be repeated for additional credits.

JRN 3712. The Business of Journalism. 3 Credit Hours.

This course examines the evolution of business models to support journalism, exploring not only how those models work but also why they have emerged and how new models are being envisioned and created for the future. By exploring how business models affect journalistic content, practice and audiences, this course prepares students to be more informed citizens as well as more innovative news producers.

Repeatability: This course may not be repeated for additional credits.

JRN 3719. Research Colloquium in Journalism Studies. 3 Credit Hours.

This course will enroll a small group of students interested in spending the semester dedicated to pursuing a research project and under the group supervision of a faculty member. It is analogous to a portfolio-creation course. Students in this course will produce papers for TURF-CreWS as well as regional and national conferences (e.g. Association for Education in Journalism and Mass Communication; Eastern Communication Association; National Communication Association).

Repeatability: This course may not be repeated for additional credits.

JRN 3720. Journalism Studies Special Topics. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3730. Journalism Studies Special Topics. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3751. Foreign Studies in Journalism. 3 or 6 Credit Hours.

Written report of research in journalism and mass communication by a student during a trip of at least two weeks abroad. NOTE: Paper must be presented by end of semester following return from trip.

Repeatability: This course may be repeated for additional credit.

JRN 3763. The Influence of Sports Media on Modern Society. 3 Credit Hours.

This course is mandatory for everyone in the Sports Media certificate. It examines how the media interpret the impact of sports on life in America. It serves as a reporting, writing and analytical guide for students in the sports certificate program with an emphasis on understanding and communicating the perspectives of race, ethnicity, gender, geography, age, and class. It features the history of sports from the early days of storytelling and public consumption. Students will study a range of media, from newspapers, radio and TV to the founding of ESPN, blogs, podcasts, advertising, marketing, publicity, and outlets operated by the MLB and NFL. The course will use a variety of demographic perspectives to study how to cover sports managers, business trends, career opportunities, fan groups, ethics, and how certain sports came to dominate American life.

Repeatability: This course may not be repeated for additional credits.

JRN 3764. Race, Ethnicity and Gender Influence on Sports Coverage. 3 Credit Hours.

Students will focus on emersion techniques required to understand the impact that race, ethnic, gender identities and various cultures have on how Americans view sports games, figures and decisions. This course will offer a variety of case studies and discussion projects, as well as writing, broadcast or web assignments dealing with a cross-section of professional and amateur sports.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

JRN 3790. Special Topics in Journalism. 1 Credit Hour.

Subject matter varies each semester. Please consult the Course Schedule for further information.

The course may be taken more than once for credit.

Repeatability: This course may be repeated for additional credit.

JRN 3800. Special Topics in Journalism. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3801. Business Practices for Writers and Editors. 1 Credit Hour.

This course will introduce students to a number of areas relevant to freelancing as a writer and/or editor. Issues to be covered will include marketing and branding, contracts, taxes, pricing, copyright and more.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1111, 'Y' in JRN1, or 'Y' in CRJR01)

JRN 3802. Business Practices for Visual Journalists. 1 Credit Hour.

The goal of this course is to introduce students to the best business practices for running a freelance media business. Topics will include marketing and branding, insurance, taxes, pricing, intellectual property rights and licensing, contracts and more.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (JRN 1111, 'Y' in JRN1, or 'Y' in CRJR01)

JRN 3805. Demo Reel Development. 2 Credit Hours.

This course helps students prepare a reel of their on-camera news stories, a critical part of their portfolio as they seek to enter the field of broadcast journalism. You will produce a professional demo reel and portfolio website while sharpening your shooting and editing skills. Students will work in the classroom and out in the field. Reporter standup shoots and coaching will also be included. This class should be your "last stop" before applying for a job at a television news station.

Repeatability: This course may not be repeated for additional credits.

JRN 3810. Special Topics in Journalism. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3820. Special Topics in Journalism. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3830. Special Topics in Journalism. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3840. Special Topics in Journalism. 2 Credit Hours.

Subject matter not covered by regular departmental course offerings. Courses are sometimes taught by distinguished professionals or visiting faculty. NOTE: Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

JRN 3850. Special Topics in Journalism. 3 Credit Hours.

Subject matter not covered by regular departmental course offerings. Courses are sometimes taught by distinguished professionals or visiting faculty. NOTE: Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

JRN 3860. Special Topics in Journalism. 4 Credit Hours.

Subject matter not covered by regular departmental course offerings. Courses are sometimes taught by distinguished professionals or visiting faculty. NOTE: Topics announced in advance.

Repeatability: This course may be repeated for additional credit.

JRN 3870. Special Topics in Journalism. 3 Credit Hours.

Subject matter varies each semester. Please consult the Course Schedule for further information.

Repeatability: This course may be repeated for additional credit.

JRN 3880. Special Topics in Journalism. 1 Credit Hour.

Subject matter not covered by regular departmental course offerings.

Repeatability: This course may be repeated for additional credit.

JRN 3882. Special Projects. 1 to 4 Credit Hour.

A special course of study in a particular area of Journalism. NOTE: Candidates should submit a detailed project outline prior to registration.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Journalism.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

JRN 3885. Internship. 1 to 3 Credit Hour.

Organized professional work, under supervision, on selected media or news organizations. NOTE: Candidates should have a 3.0 GPA. For Journalism majors only.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

JRN 3887. High School Journalism Workshop. 3 Credit Hours.

This course allows Temple students to work directly in Philadelphia high schools, helping students there develop their own journalistic products. Students will work with a high school teacher and local journalists in leading a journalism club. The course will meet once a week at Temple, and twice a week in an area high school. Students will examine issues facing public education, as well as media coverage of education issues.

Repeatability: This course may be repeated for additional credit.

JRN 3890. Special Topics in Journalism. 1 Credit Hour.

Subject matter not covered by regular departmental course offerings.

Repeatability: This course may be repeated for additional credit.

JRN 3900. Honors Special Topics in Journalism. 3 Credit Hours.

Subject matter not covered by regular departmental course offerings. Courses are sometimes taught by distinguished professionals or visiting faculty. NOTE: Topics announced in advance. This is an Honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

JRN 3901. Honors: Comics Journalism. 3 Credit Hours.

This course examines a new form of journalism that is quickly edging its way into broader awareness: comics journalism. This form marries nonfiction narratives (a genre pioneered by magazines) with sequential art to deliver important stories in a compelling way, a way that uniquely engages the reader's imagination. The new form is a natural fit for intensely personal stories.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

JRN 3902. Honors: Media, Memory, and Social Change. 3 Credit Hours.

"Honors: Media, Memory, and Social Change" is an Honors seminar on the role of media in the construction of "social memory." Our shared ideas about the past inform media content and production, allowing new voices to enter the public conversation and creating a sense of continuity between past and present activism. We will focus especially on how historical narratives function as foundations for social movements -- for instance, in the Black Lives Matter movement's reuses of iconic civil-rights images, in news coverage and political rhetoric about immigration and ethnicity, and in resistance to misogyny and violence, such as the #metoo and March for Our Lives campaigns, which gained support through a blend of social and mainstream media. We'll also take popular culture seriously, analyzing how "social-impact" advertising campaigns, celebrity tributes, and several new television shows and films tell the stories of "pioneers" to mobilize past struggles for present purposes. Finally, we'll explore the role that media play in everyday life, in ways that construct future memory of our families, our friends, and the places we live.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

JRN 3905. Honors: Gender and American Mass Media. 3 Credit Hours.

In this course, we'll study how gender ideals and identity are expressed in media, including news coverage, magazines, television, film, advertising, social media, and other forms of mediated communication. We also will learn about how gender affects people's experiences working in media industries. Our thematic focuses will range from political campaigns to popular music, from fashion to sports, and from reality TV stars to Supreme Court justices. Across all of those themes, we will focus on the role of gender in intersectional social change. There will be a mix of types and formats of assessment, and you'll have some choice about which assignments you do and how you complete them. Most of these involve class participation (synchronously and asynchronously), your responses to weekly readings (or listenings), and a series of case-study assignments. You also will complete an individual research project or creative work that you design.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

JRN 3908. Honors True Stories: Narrative Nonfiction Journalism. 3 Credit Hours.

This is a course in narrative nonfiction, which employs the techniques of fiction to tell true stories. Students read some of the best nonfiction of our time, by such writers as Joan Didion, Gay Talese, Truman Capote, David Foster Wallace, and Katherine Boo. Students also view a documentary and listen to podcasts.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

JRN 4173. Philadelphia Neighborhoods II: Audio Visual Storytelling. 4 Credit Hours.

The goal of this course is to deepen students' grounding in audio and visual journalism skills and give them opportunities to produce professional-quality work. Students will have hands-on opportunities to contribute to Philadelphia Neighborhoods on TV (PNTV), a Philadelphia Neighborhoods podcast, as well as additional online, social, and broadcast platforms via media partners. Students will produce work using a range of formats based on their interests. These may include: short video documentaries (1-3 min.) and news reports, long form video documentaries, and audio news reports, features, and documentaries. Students will also learn industry standards and best practices for television, radio, online, social media and podcast program production - as well as strategies for distribution of materials on social media.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 2101 and JRN 3601.

JRN 4174. Philadelphia Neighborhoods II: The Magazine. 4 Credit Hours.

This is a hands-on, semester-long project. In it, you will learn the interrelationship of all aspects of magazine editing and production, all the way through to the printing process. You will apply everything you have learned in lower-level magazine courses, including Introduction to Magazines, Magazine Article Writing, and Magazine Editing, as well as more specialized instruction from Publication Design, Innovation and Design, Photography and multimedia disciplines. The project is, simply, the publication of an ink-on-paper magazine and the iterations in digital and social media that are now a critical part of what the magazine industry itself terms "magazine media." The publication will be conceived, written, designed, edited and photographed entirely by students. Only the name is dictated in advance.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 2101 and JRN 3601.

JRN 4175. Philadelphia Neighborhoods II: Data, Development and Design. 4 Credit Hours.

This capstone course enables students to demonstrate their mastery of multimedia and immersive storytelling. During the semester, you will produce a significant piece (or pieces) of journalism utilizing a variety of media: text, images, video, data, graphics, interactives, etc. This could be one large project or a series of smaller pieces. The only requirement is that the student must utilize nontraditional story forms and methods in the process of reporting and/or publishing their project.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 2101 and JRN 3601.

JRN 4196. Philadelphia Neighborhoods Capstone: News Beat. 4 Credit Hours.

Consider this course a hands-on lab and field experience centered on the promises and pitfalls of a multimedia newsroom and urban news coverage. The course incorporates and builds upon the skills you acquired in previous courses, such as writing, video production, photography, data visualization, etc. Furthermore, the class is a functioning news operation - PhiladelphiaNeighborhoods.com. The stories you produce through your assignments for the class may be published on the site, but that is not a guarantee. The work must meet and adhere to journalistic standards and norms. NOTE: For Journalism majors only. Special authorization required for all. Prior to Fall 2010, the course title was "Multimedia Urban Reporting Lab." Prior to Fall 2019, the course title was "PhiladelphiaNeighborhoods.com."

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (JRN 3696 or JRN 3601)

JRN 4197. Philadelphia Neighborhoods II: The Magazine. 4 Credit Hours.

This is a hands-on, semester-long project. In it, you will learn the interrelationship of all aspects of magazine editing and production, all the way through to the printing process. You will apply everything you have learned in lower-level magazine courses, including Introduction to Magazines, Magazine Article Writing, and Magazine Editing, as well as more specialized instruction from Publication Design, Innovation and Design, Photography and multimedia disciplines. The project is, simply, the publication of an ink-on-paper magazine and the iterations in digital and social media that are now a critical part of what the magazine industry itself terms "magazine media." The publication will be conceived, written, designed, edited and photographed entirely by students. Only the name is dictated in advance.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 3696.

JRN 4203. Communicating Sports Statistics and Data. 3 Credit Hours.

This course is specifically designed for students who are completing the Klein College Sports Media certificate, but it is open to all undergraduate students. Students will learn how to understand, evaluate, and criticize sports statistics and data related to sports issues and game coverage. Examples will come from sports websites, social media, newspapers, magazines, broadcasts, and scholarly journals. The goal is to learn how to distinguish between informative and misleading uses of statistics and data in the popular media, and how to make informed decisions on relating information.

Repeatability: This course may not be repeated for additional credits.

JRN 4571. International Studies in Media and Communication. 1 to 6 Credit Hour.

This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. Available only to student participating in a Klein GO! Program.

Repeatability: This course may be repeated for additional credit.

JRN 4596. Broadcast Journalism Practicum. 4 Credit Hours.

This practicum exposes students to the skills and protocols required to conceptualize, produce and deliver television news. It is an intensive, hands-on production course simulating a newsroom operation in which students will learn to research and propose story ideas, conduct interviews, write, report and edit news stories and fill control room and studio positions including producer, director, audio, computer graphics, floor manager, studio camera operator and web producer. Students produce a weekly broadcast news show, Temple Update, created in cooperation with student volunteers. Note: Digital video editing is a skill students should know prior to taking this course. They should also be familiar with digital video cameras, tripods, and microphones for field production. Prior volunteer experience with Temple Update is strongly recommended.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

JRN 4597. Sports Production Practicum. 4 Credit Hours.

This Sports Update capstone class is a specialized, intensive hands-on production course for students interested in a career in the writing, producing, and directing of sports programming. Students will experience the real-world feel of a real sports programming environment that includes researching, writing and reporting, shooting, editing, producing and directing. By creating a weekly sports newscast aimed at informing viewers of important sports news, with an emphasis on the local college teams, including Temple, students learn, firsthand, the realities of enterprising their own stories, working postgame interviews, handling deadline pressure and writing in the clear and unique style specifically required to communicate effectively in the sports world.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in JRN 1113 and JRN 2501.

Kinesiology (KINS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

KINS 1000. Special Topics in Fitness. 1 or 2 Credit Hour.

The KPAP Special Topics courses are designed to educate students on how to become, and stay, physically fit through proper fitness and health related practices. This includes physical exercise through the exposure of, and instruction in, lifestyle based physical movement. Student learning outcomes include learning, developing and demonstrating the components of health-related fitness skills, while participating in a safe and healthy environment. The components of health-related fitness include muscular strength/endurance, aerobic fitness, flexibility and body composition. Course topics vary from one semester to another and may include topics such as: advanced yoga, bodyweight training, advanced Pilates, dance and suspension training. Please contact the KPAP Director for upcoming course offerings.

Repeatability: This course may be repeated for additional credit.

KINS 1001. Cardiovascular Fitness for a Healthy Lifestyle. 2 Credit Hours.

Cardiovascular Fitness for a Healthy Lifestyle is a course focused on the promotion of health through physical activity. Physical activity is defined as any bodily movement that results in energy expenditure. Through activities designed for the development and maintenance of the circulatory and respiratory systems aerobic capacity, participants engage in activities that increase muscular strength and flexibility through exercise. Additionally, participants will acquire information on developing and assessing aerobic fitness and the benefits of regular exercise on combating cardiovascular risk factors.

Repeatability: This course may not be repeated for additional credits.

KINS 1002. ZUMBA from Around the World. 2 Credit Hours.

ZUMBA is a course focused on the promotion of aerobic dance and fitness through physical activity. Designed for the development and maintenance of aerobic capacity, participants engage in activities that increase muscular strength and flexibility. Advanced practical knowledge on planning, choreography, skill building, physical assessment, and health and nutrition from a global perspective will be explored. Additionally, the physiological and psychological benefits of aerobic fitness and physical activity through aerobic fitness and dance will be investigated.

Repeatability: This course may not be repeated for additional credits.

KINS 1003. Adventure Climbing I. 2 Credit Hours.

This course focuses on the physical, cognitive, and social skills necessary to safely participate in climbing at ropes courses and related settings for a lifetime. Particular areas of emphasis include: safety and spotting, climbing equipment, knot tying, Prusik climbing, rappelling, and belaying. Psychological skills training and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1005. Aikido I. 2 Credit Hours.

This course introduces the art of self-defense based on non-resistance rather than strength. No attempt is made to stop attacks in Aikido; they are met and guided in a way that causes attackers to be thrown by the directional force of their own attack. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1006. Aikido II. 2 Credit Hours.

This course advances the basic skills learned in beginning Aikido to include the use of weapons and the history and philosophy of self-defense. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1007. Aqua Aerobics I. 2 Credit Hours.

This course deals with the theory and practice of aerobics using the water as the exercise environment. The course leads to the improvement of cardio-respiratory fitness and the knowledge and skills for developing and maintaining fitness using the water as the exercise medium.

Repeatability: This course may not be repeated for additional credits.

KINS 1009. Backpacking and Camping I. 2 Credit Hours.

This course introduces the techniques of low impact, all-weather backpacking and camping, including choosing equipment, planning trips, finding the way, cooking, and survival. Class meetings are rescheduled into weekend trips after initial instruction and planning meetings on campus. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1012. Badminton I. 2 Credit Hours.

This course introduces the skills, strategies, etiquette, knowledge of the rules and how to select proper equipment, as well as opportunities for participation in badminton. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1016. Fencing I. 2 Credit Hours.

This course introduces fencing for form and/or competition. It includes defensive and offensive strategies; care and selection of proper equipment; rules, officiating, injury prevention, and chivalry. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1018. Fitness for Life. 2 Credit Hours.

This course introduces the principles and activities for the development of optimal levels of cardiovascular endurance, muscular strength and endurance, flexibility, body weight, and body composition. Assessment of fitness level, development of an individual activity program commensurate with personal goals, and current research findings concerning exercise and nutrition are included. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1019. Golf I. 2 Credit Hours.

This course introduces the skills, strategies, etiquette, knowledge of the rules, and how to select proper equipment, as well as opportunities for participation in golf. Physical and psychological preparation and values of the sport are included. NOTE: Transport costs and greens fees are the responsibility of the student.

Repeatability: This course may not be repeated for additional credits.

KINS 1021. Golf II. 2 Credit Hours.

This course advances the skills learned in Golf I and is intended for the intermediate golfer wishing to enhance their knowledge, skills, and abilities on the golf course. Physical training and psychological skills training will also be included. NOTE: Transportation and greens fees must be supplied by the student.

Repeatability: This course may not be repeated for additional credits.

KINS 1022. Gymnastics I. 2 Credit Hours.

This course introduces the skills of floor exercise, tumbling, trampoline, and vaulting (for men and women); rings, horizontal bar, parallel bars, and side horse (for men); balance beam and uneven bars (for women). Physical and psychological preparation and values of the sport are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1024. Judo I. 2 Credit Hours.

This course introduces the principles and techniques of falling, throwing, grappling, and the rules and customs of judo as a sport. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1026. Karate I. 2 Credit Hours.

This course introduces the principles and techniques of striking, kicking, punching, blocking, the code of ethics of karate, and the rules of competition. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1027. Karate II. 2 Credit Hours.

This course advances the basic skills learned in beginning karate. New striking and kicking techniques are introduced and more advanced kata (forms) are taught. Emphasis includes: concentrating focus and power; pro per distancing in partner drills; moving, shifting and pivoting the body; and combining techniques smoothly and powerfully. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1028. Lifeguard Training. 3 Credit Hours.

This course introduces the skills and knowledge in water safety, rescue skills, and pool operation and management skills. Physical and psychological preparation and values of participation in the activity are included. NOTE: This course can lead to ARC Lifeguard Certification. Certification fee required.

Repeatability: This course may not be repeated for additional credits.

KINS 1029. Martial Arts I: Capoeira Angola (Brazilian Martial Arts). 2 Credit Hours.

Capoeira Angola can be described visually as an art, dance, fight, and game, which incorporates corporal expression in diverse movements with music, instruments, and song. It is a dialog of bodies in motion, questions and answers through bodily improvisation to musical rhythms that are unique to its appearance. To gain an authentic understanding of Capoeira's philosophy and practice, students will regularly engage in intense physical training and music instruction, while also discussing books, articles, and films that illuminate the cultural legacy of Africa and Brazil. Students will immerse themselves in a living lineage of tradition, history, and legendary masters. Special attention will be paid to the lineage of Mestre Pastinha, regarded by many as the guardian of Capoeira Angola.

Repeatability: This course may not be repeated for additional credits.

KINS 1031. Aquatics Workshop I. 1 Credit Hour.

This workshop is designed to enable students to develop the knowledge and skills needed to participate at a beginning level in aquatic activities: water safety, skin diving, swimming, synchronized swimming, etc. NOTE: For a list of activities offered each semester, contact the workshop coordinator in the Department of Kinesiology in Pearson Hall. Kinesiology 1031 begins on the first Tuesday of each semester and runs for the first seven weeks of the semester.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 1032. Fitness Workshop I. 1 Credit Hour.

This workshop is designed to enable students to develop the knowledge and skills needed to participate at a beginning level in fitness activities: weight training, aerobics, walking, etc. NOTE: For a list of activities offered each semester, contact the workshop coordinator in the Department of Kinesiology in Pearson Hall. Kinesiology 1032 begins on the first Tuesday of each semester and runs for the first seven weeks of the semester.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 1033. Lifestyle Workshop I. 1 Credit Hour.

This workshop is designed to enable students to develop the knowledge and skills needed to participate at a beginning level in lifestyle activities: volleyball, badminton, tennis, yoga, etc. NOTE: For a list of activities offered each semester, contact the workshop coordinator in the Department of Kinesiology in Pearson Hall. Kinesiology 1033 begins on the first Tuesday of each semester and runs for the first seven weeks of the semester.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 1034. Survival Workshop I. 1 Credit Hour.

This workshop is designed to enable students to develop the knowledge and skills needed to participate at a beginning level in survival activities: adventure climbing, personal defense, fencing, etc. NOTE: For a list of activities offered each semester, contact the workshop coordinator in the Department of Kinesiology in Pearson Hall. Kinesiology 1034 begins on the first Tuesday of each semester and runs for the first seven weeks of the semester.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 1036. Personal Defense for Women. 2 Credit Hours.

This course introduces a five-stage approach to personal protection (awareness, avoidance, prevention, physical action, and follow up). Physical defensive skills involve "live" simulations while focusing on the concerns and needs of women. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1043. Lifestyle Workshop II. 1 Credit Hour.

This workshop is designed to enable students to develop the knowledge and skills needed to participate at a beginning level in lifestyle activities: volleyball, badminton, tennis, yoga, etc. NOTE: For a list of activities offered each semester, contact the workshop coordinator in the Department of Kinesiology in Pearson Hall. Kinesiology 1043 begins on the eighth Tuesday of each semester and runs for the second seven weeks of the semester.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 1044. Survival Workshop II. 1 Credit Hour.

This workshop is designed to enable students to develop the knowledge and skills needed to participate at a beginning level in survival activities: adventure climbing, personal defense, fencing, etc. NOTE: For a list of activities offered each semester, contact the workshop coordinator in the Department of Kinesiology in Pearson Hall. Kinesiology 1044 begins on the eighth Tuesday of each semester and runs for the second seven weeks of the semester.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 1045. Pilates I. 2 Credit Hours.

The Pilates I course introduces the knowledge and skills necessary to plan and participate in a Pilates driven fitness program. Discussion and experiential learning of various types of exercises based on the Pilates method are discussed. Students will gain knowledge of the principles of physical fitness and exercise. Students will develop and obtain the ability to apply these skills in a safe, effective and responsible manner. Pilates, originally developed by Joseph Pilates, is designed to help strengthen and condition muscles. This mind-body exercise helps improve posture, flexibility, balance and enhance overall well-being.

Repeatability: This course may not be repeated for additional credits.

KINS 1046. SCUBA Diving I. 3 Credit Hours.

This course introduces the skills and knowledge necessary to develop into a competent, safe, and responsible scuba diver capable of making independent decisions. Specifically, students will develop the ability to recognize and implement alternative solutions for coping with stressful problems. Equipment is provided for campus coursework. Physical and psychological preparation and values of participation in the activity are included. NOTE: Lab fee required. Students can earn NAUI Certification by signing up for an open water trip. (The student at the end of the course must rent SCUBA equipment.)

Repeatability: This course may not be repeated for additional credits.

KINS 1048. Swimming for the Non-Swimmer. 2 Credit Hours.

This course introduces students to basic personal aquatic safety skills for the purpose of developing confidence in the water. Physical and psychological preparation and values of participation in the activity are included. NOTE: For students who are not comfortable in shallow water or with their faces in the water.

Repeatability: This course may not be repeated for additional credits.

KINS 1049. Swimming I. 2 Credit Hours.

This course introduces students to basic aquatic skills to assure confidence and mobility in aquatic activities as well as the development of confidence in deep water. Physical and psychological preparation and values of participation in the activity are included. NOTE: For students with little or no swimming ability.

Repeatability: This course may not be repeated for additional credits.

KINS 1051. Swimming II. 2 Credit Hours.

This course advances the skills learned in Swimming I and focuses on stroke improvement and swimming endurance. Physical and psychological preparation and values of participation in the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1052. Tae Kwon Do I. 2 Credit Hours.

This course introduces the skills and knowledge for using the hands, arms, legs, and feet to attack and defend oneself; breathing and muscle control; competitive rules; the ranking system; safety; fitness; and history, values, and etiquette. Tae Kwon Do is a Korean form of martial arts and is taught from a traditional perspective and supplemented by modern scientific principles. Physical and psychological preparation and values of participation in the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1053. Tae Kwon Do II. 2 Credit Hours.

This course advances the skills learned in Tae Kwon Do I and applies them in two areas. First, students will learn how to design and teach a complete martial arts class that will focus the material in a manner easily understood by students while at the same time keeping students stimulated, interested, and challenged. Second, students will be able to design a training regimen for martial arts students interested in competing in Olympic-style sport martial arts. Physical and psychological preparation and values of participation in the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1054. Tennis I. 2 Credit Hours.

This course provides opportunities to develop the skills, strategies, etiquette, knowledge of the rules and how to select proper equipment, as well as opportunities for participation in tennis. Physical and psychological preparation and values of the sport are included. Emphasis is on preparing students to be lifelong participants in tennis.

Repeatability: This course may not be repeated for additional credits.

KINS 1055. Tennis II. 2 Credit Hours.

This course advances the skills learned in Tennis I through the refinement of skills and techniques and by developing more sophisticated skills and strategies in tennis. Physical and psychological preparation and values of participation in the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1056. Volleyball I. 2 Credit Hours.

This course introduces the skills, strategies, etiquette, knowledge of the rules, and how to select proper equipment, as well as opportunities for participation in volleyball. Physical and psychological preparation and values of participation in the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1058. Walking/Jogging/Running I. 2 Credit Hours.

This course focuses on the physical, cognitive, and social skills necessary to safely participate in walking and jogging for a lifetime. Areas of emphasis include, but are not limited to, site selection, safety, equipment, heart rate and perceived exertion, different methods of training, fitness principles, and/or record keeping.

Repeatability: This course may not be repeated for additional credits.

KINS 1059. Yin Yoga: The Other Half of Yoga. 2 Credit Hours.

Yin Yoga is a complementary yoga practice to the more dynamic vinyasa (Yang) style that is predominant in today's western culture. These styles such as Bikram or Astanga are geared towards strengthening and stretching the muscles through rhythmic, flowing, and repetitive movements resulting in increased muscle strength and flexibility, and improved cardiovascular fitness. Yin Yoga is "the other half of yoga" with an emphasis on long-held passive stresses of the deeper connective tissues. A deceptively simple practice, yin yoga promotes the transformation of an asana (posture) into a static form where it is held, often with support of blocks and bolsters, anywhere from three to eight minutes, allowing the deep fascia that surrounds and interweaves muscles to be therapeutically and gently stretched and made more pliable resulting in a deeply relaxing practice preparing the mind and the body for a deeper experience of meditation. This course will be a combination of yin yoga and vinyasa flow practices.

Repeatability: This course may not be repeated for additional credits.

KINS 1061. Water Safety Instructor. 3 Credit Hours.

This course introduces skills in teaching aquatics through formal training in the American Red Cross methods of teaching the following types of aquatic programs: Adapted, Preschool, Competitive, Springboard Diving, Learn to Swim, and Water Safety. Physical and psychological preparation and values of participation in the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1062. Weight Training I. 2 Credit Hours.

This course introduces the knowledge and skills needed to train with weights for sport, recreation, health, and fitness. Muscular contraction, overload, specificity of training, progression, and various types of exercise and programs are taught. Students learn to develop and participate in personal weight training programs. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1063. Weight Training II. 2 Credit Hours.

This course furthers the knowledge and skills needed to train with weights for sport, recreation, health and fitness. Advanced forms of muscular contraction, overload, specificity of training, progression, and various types of exercise and programs are taught. Students further develop their ability to participate in personal weight training programs at more advanced levels. Psychological preparation and values of activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1064. Yoga I. 2 Credit Hours.

This course introduces the principles of yoga for developing fitness in the individual as a whole and for the reduction of stress. The concept of body image and developing the fundamental skills for making yoga a safe, daily practice is included. Physical and psychological preparation and values of the activity are included.

Repeatability: This course may not be repeated for additional credits.

KINS 1107. Bodyweight Training. 2 Credit Hours.

Bodyweight Training is an introductory course of progressive resistance exercise where students learn effective exercises, from simple to advanced, using your own body weight, biomechanics and simple to find items around your living environment. Muscular strength and muscular endurance will be studied, along with muscular structure and muscular function. Training techniques such as overload principle, specificity of training, progression, and various types of exercise training programs are taught. Students will develop personal goals for a personal bodyweight training program, and learn how to participate in and enjoy lifelong muscular endurance activities. Students will also examine the psychological preparation and values that accompany weight training. Students will apply these skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

KINS 1114. Advanced Yoga. 2 Credit Hours.

The Advanced Yoga course expands upon the principles of yoga introduced in KINS 1064 Yoga I and translates the knowledge from individual to instructional. This course will take the foundations, history and movements of yoga as it pertains to individual practice and direct students toward certification as a yoga instructor. The students in this course will learn ethics of yoga teaching, skill of sequencing, practice hours teaching poses, instructional methods, and classroom management. Anatomy, physiology, motor development and biomechanics are expanded from the basic principles in Yoga I. Individual practice and teaching practice will include asana (posture), pranayama (breathing), and meditation sometimes led by the instructor and sometimes by fellow students.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KINS 1064.

KINS 1139. Pickleball. 2 Credit Hours.

Pickleball is a racquet/paddle sport that combines the elements of tennis, badminton and ping-pong. The course introduces the skills, strategies, etiquette, knowledge of the rules and how to select proper equipment, as well as opportunities for participation in Pickleball. Physical and psychological preparation and values of the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

KINS 1152. Soccer. 2 Credit Hours.

This course introduces students to the playing skills, strategies, history, etiquette, and rules necessary for participation in soccer as a lifetime recreational sport. Physical, psychosocial factors and values of participation in the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

KINS 1153. Basketball. 2 Credit Hours.

This course introduces the skills, strategies, etiquette, knowledge of the rules, and how to prepare for opportunities for participation in basketball as a lifetime recreational sport. Physical and psychological preparation and values of participation in the activity are included. Students will apply skills in a safe, effective and responsible manner.

Repeatability: This course may not be repeated for additional credits.

KINS 1201. Introduction to Kinesiology in Public Health. 3 Credit Hours.

Introduction to Kinesiology in Public Health provides students with foundational knowledge about the discipline of Kinesiology within public health, and how Kinesiology serves society through the work of professionals who help people reap the benefits of physical activity to live healthy and fulfilling lives. The main topics of the course include: (a) an overview of the scientific basis of Kinesiology; (b) benefits of physical activity - physically, intellectually, socially, emotionally, and spiritually; (c) Kinesiology's role in public health, particularly in relation to addressing the major public health issue of physical inactivity; (d) primary approaches to promoting physical activity at the individual level (provider-to-client/patient) and population level (community-based); and (e) professional practice in Kinesiology, including career pathways in the fields of physical activity, health promotion, and fitness/wellness. The aim of the course is to expose students to how practitioners and researchers trained in Kinesiology work collaboratively with colleagues from other disciplines to promote the physical activity, health, and well-being of clients.

Repeatability: This course may not be repeated for additional credits.

KINS 1203. Introduction to Exercise and Sport Science. 3 Credit Hours.

The course explores in detail the relationship between physical activity and health. It also examines roles and responsibilities of the health-fitness specialist and the exercise specialist as defined by the American College of Sports Medicine. This course serves as an introduction of the professional applications in Exercise and Sport Science to include fitness promotion, preventative (wellness), and rehabilitative (clinical) exercise programming. The student will be encouraged to investigate the nature and scope of the health-fitness professional, to define applications of the physiology of exercise, and to integrate the concepts into their personal health-fitness, or exercise programs.

Repeatability: This course may not be repeated for additional credits.

KINS 1221. Principles of Anatomy and Physiology I. 3 Credit Hours.

Kinesiology 1221 is the first in a two course sequence dealing with the structure and functional systems of the human body. Emphasis is placed upon systems integration as well as the manner in which organ systems undergo homeostatic regulation. This course considers general body organization and the skeletal, muscular, nervous, and endocrine systems. NOTE: To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor. This course is not equivalent to Kinesiology 1223 (Anatomy and Physiology with Lab) and cannot be used to replace the grade earned in Kinesiology 1223.

Repeatability: This course may not be repeated for additional credits.

KINS 1222. Principles of Anatomy and Physiology II. 3 Credit Hours.

Kinesiology 1222 is the second in a two course sequence dealing with the structure and functional systems of the human body. Emphasis is placed upon systems integration as well as the manner in which organ systems undergo homeostatic regulation. This course considers the cardiovascular, respiratory, lymphatic, and reproductive systems to include nutrition, metabolism, and electrolyte balance. NOTE: To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor. This course is not equivalent to Kinesiology 1224 (Anatomy and Physiology with Lab II) and cannot be used to replace the grade earned in Kinesiology 1224.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KINS 1221.

KINS 1223. Human Anatomy and Physiology I. 4 Credit Hours.

This course is the first of a two-course sequence dealing with the anatomical and functional relationships of the human body. Emphasis is placed on systems integration leading to an understanding of the functions of the human organism. Kinesiology 1223 covers basic structure and function of the body (cells and tissues, organs, systems) through detailed investigations of the skeletal, muscular, and nervous systems. NOTE: To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor. This course is not equivalent to Kinesiology 1221 (Principles of Anatomy and Physiology I) and cannot be used to replace the grade earned in Kinesiology 1221.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

KINS 1224. Human Anatomy and Physiology II. 4 Credit Hours.

This course is the second in a two-course sequence dealing with the anatomical and functional relationships of the human body. Emphasis is placed on systems integration leading to an understanding of the functions of the human organism through detailed investigations of the endocrine, circulatory, digestive, urinary, and reproductive systems. NOTE: (1) Lab fee required. (2) To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor. This course is not equivalent to Kinesiology 1222 (Principles of Anatomy and Physiology II) and cannot be used to replace the grade earned in Kinesiology 1222.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in KINS 1223.

KINS 1225. General Human Anatomy & Physiology. 3 Credit Hours.

The purpose of this course is to provide an overview of the human body's general organization; and integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary and reproductive systems. NOTE: This course is for Social Work majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Social Work, Social Work - Undergraduate.

Repeatability: This course may not be repeated for additional credits.

KINS 1923. Honors Anatomy and Physiology I. 4 Credit Hours.

Kinesiology 1923 is the first of two courses dealing with the anatomical and functional relationships of the human body. As future clinicians and allied health professionals, students will focus on the integration of body systems leading to an understanding of the human body. Foundational knowledge about a healthy human organism will be introduced along with common human disease processes in order to challenge students to develop analytical skills and to further their understanding of the material. This first course deals specifically with the general organization of the body and the integumentary, skeletal, muscular, and nervous systems. The laboratory section of this course will involve the examination of models and the dissection of cadavers, along with other activities. NOTE: To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

KINS 2001. Social Determinants of Health and Physical Activity. 3 Credit Hours.

Social Determinants of Health (SDOH) are defined as the complex circumstances in which individuals are born and live that impact their health. They include political, socioeconomic, and cultural constructs, as well as access to healthcare and education systems, safe environmental conditions, well-designed neighborhoods, and availability of healthful food. Many issues pertaining to physical activity, nutrition, and other preventive health behaviors can be addressed through examining the SDOH that influence access to, and participation in, health behaviors. This course will provide students with a critical foundation in SDOH, health equity and social justice knowledge so they may apply this lens to future course work and in professional settings.

Repeatability: This course may not be repeated for additional credits.

KINS 2203. Physiology of Physical Activity. 4 Credit Hours.

This course is a fundamental course on the basic concepts and principles of the physiology of physical activity/exercise. It is one of the core courses required of Exercise and Sport Science (ESS) and Kinesiology majors and serves as a prerequisite for the advanced level course in exercise physiology (KINS 4311) required for the ESS majors. Organ functions (i.e., at the system, organ, and cellular level) that contribute to exercise will be described and contrasted for different exercise conditions. Description and explanation will be provided of the functional physiological changes brought about by single or repeated bouts of exercise sessions with the intent to improve the exercise responses and functional capacity and promote health-related physical fitness. Laboratory experiences include the measurement of muscular, metabolic, cardiovascular, and pulmonary functions during rest and exercise, as well as related topics of energy balance, body composition, and fitness assessments.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Exercise & Sport Science, Health Professions, Kinesiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1224 or 'Y' in CRK103)

KINS 2204. Motor Behavior. 3 Credit Hours.

This course provides an overview of the psychological and physiological basis of human movement behavior including motor development, motor learning, perceptual motor behavior, and individual differences.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Exercise & Sport Science, Health Studies, Health Professions, Kinesiology, Recreational Therapy, Therapeutic Recreation.

Repeatability: This course may not be repeated for additional credits.

KINS 2205. Exercise Assessment and Programming. 4 Credit Hours.

The course explores the roles and responsibilities of the exercise professional in performing exercise assessments and interpretation, and then prescribing appropriate exercise programs in both apparently healthy and diseased populations. Accordingly, the student will apply their knowledge, skills, and abilities (as defined in the ACSM's Guidelines for Exercise Testing and Prescription) in both lecture and laboratory experiences; and demonstrate competencies and proficiencies in standard exercise testing procedures of the various components of health- and skill-related fitness. Accordingly, students will learn to conduct a complete fitness evaluation according to the guidelines established by the ACSM and prescribe the appropriate exercise program. Methods of quantifying the energy cost of activity and the development of exercise / wellness programs for people with known disease, those at high risk, and the apparently healthy individual will be explored. As the penultimate class in the student's program of study, this class is designed to help students integrate and synthesize a large body of knowledge. Upon completion of this course, students should be prepared to successfully complete the American College of Sports Medicine (ACSM) Certified Exercise Physiologist credentialing exam, and have significant background in preparing for the Certified Clinical Exercise Physiologist credentialing exam.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRKI05)

KINS 2424. Functional Anatomy for Kinesiology. 3 Credit Hours.

This course is designed to introduce the student to the basic principles of kinesiology and functional anatomy as they relate to normal movement. Basic neuromusculoskeletal assessment techniques such as identification and palpation will be emphasized in the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223, 'Y' in KIN1, or 'Y' in CRKI02)

KINS 2501. Physical Activity Across the Lifespan. 3 Credit Hours.

Physical Activity Across the Lifespan will introduce students to the role of physical activity in promoting human health and well-being throughout life, starting in infancy through older adulthood. The main topics of the course include: (a) basic effects of physical activity on physical health, mental health, and disease conditions; (b) how physical activity relates to contemporary models of human well-being; (c) the role of physical activity in the prevention, management, and treatment of major chronic diseases; (d) approaches to promote physical activity in different age populations; (e) challenges/barriers to promoting physical activity among people of various ages; and (f) an introduction to physical activity surveillance and the primary ways physical activity levels are measured. An aim of the course is to engage students' imagination about how changes to the physical (built) environment of neighborhoods can help promote physical activity and quality of life for people of all ages.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

KINS 2502. Physical Activity for Individuals with Disabilities. 3 Credit Hours.

Physical Activity for Individuals with Disabilities examines the role of physical activity in promoting the health of individuals with intellectual, physical, and other developmental disabilities. The main topics of the course include: (a) an introduction to the area of Adapted Physical Activity; (b) health and functional benefits of physical activity for people with disabilities; (c) descriptions of common physical and intellectual disabilities, and the trajectory of these disabilities across the lifespan; (d) disability-related laws and advocacy efforts; and (e) planning and implementing physical activities that match with clients' specific disability needs. An aim of the course is to provide students with practical experience working with individuals of various ages who have disabilities.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

KINS 3096. Cultural Competency in Health and Healthcare. 3 Credit Hours.

Cultural competence goes beyond language, ethnicity, race and sex. This course will examine those components in the context of cultural traditions, gender issues, aging, and (dis)ability. There is a need for such background knowledge to develop the skills to effectively interact with diverse groups of people to improve the patient experience in healthcare, eliminate cultural and linguistic barriers during clinical encounters, develop sensitivity to gender/age/ability bias, ensure compliance with all care requirements and protocols, and improve the overall quality of care. This interaction includes (but is not limited to) patients, patients' families, and the health care team. This course is reflective of the needs expressed by the National Institutes of Health to best prepare the future public health and healthcare workforce.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

KINS 3101. Historical and Philosophical Dimensions of Physical Activity. 3 Credit Hours.

Historical and Philosophical Dimensions of Physical Activity examines how people's physical activity experiences are shaped by historical events and philosophical perspectives. The course will explore three main topics: (a) historical events surrounding the origin and development of physical activity pursuits in the U.S. and around the world, (b) branches of philosophy and worldviews used to explain why people engage in physical activity, and (c) ethical principles utilized in professional roles for Kinesiology related careers. The course will also help students argue persuasively about the importance of physical activity for human health and well-being.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

KINS 3196. Psychology of Physical Activity. 3 Credit Hours.

Psychology of Physical Activity examines the psychological factors that contribute to people's engagement in physical activity and exercise. Psychological factors such as attitude, motivation, and confidence will be presented as well as evidence-based ways to enhance them. In addition, students will learn about the important role of physical activity in the promotion of cognitive function and psychological well-being. The course will also introduce students to the types of behavior-change interventions that integrate psychological knowledge and skills to promote physical activity, health, and well-being among diverse populations.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

KINS 3202. Biomechanics of Physical Activity. 4 Credit Hours.

This course focuses on the anatomical and functional relationships among the skeletal and muscular systems and the basic mechanical principles involved in physical activity.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Exercise & Sport Science, Health Professions, Kinesiology, Pre-Health Professions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223, 'Y' in KIN1, or 'Y' in CRKI02)

KINS 3203. Exercise Assessment and Programming. 4 Credit Hours.

The course explores the roles and responsibilities of the exercise professional in performing exercise assessments and interpretation, and then prescribing appropriate exercise programs in both apparently healthy and diseased populations. Accordingly, the student will apply their knowledge, skills, and abilities in both lecture and laboratory experiences; and demonstrate competencies and proficiencies in standard exercise testing procedures of the various components of health-related fitness. Students will learn to conduct a complete fitness evaluation according to the guidelines established by the American College of Sports Medicine (ACSM) and prescribe the appropriate exercise program. Methods of quantifying the energy cost of activity and the development of exercise / wellness programs for people with known disease, those at high risk, and the apparently healthy individual will be explored.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRKI05)

KINS 3213. Human Movement and Development. 3 Credit Hours.

Human Movement and Development examines the processes by which people acquire and utilize movement skills across the lifespan, and how movement experiences contribute holistically to human development - physically, cognitively, socially, emotionally, spiritually, and culturally. Motor development from infancy through older adulthood will be presented as well as how aging affects the major body systems and the acquisition, maintenance, and loss of movement skills. In-class activities will give students hands-on practice with course content, including administering assessments of movement proficiency. An aim of the course is to expose students to real-world settings where movement experiences are used to support multiple areas of children and adults' development.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2204, 'Y' in KIN4, or 'Y' in CRKI06)

KINS 3252. Exercise Psychology and Adherence. 3 Credit Hours.

Exercise Psychology and Adherence examines how Kinesiology professionals help clients adopt and adhere to physical activity and exercise programs. The main topics of the course include: (a) conceptual models of exercise psychology and adherence; (b) physical, psychological, social, demographic, and cultural factors that affect exercise adoption and adherence; and (c) evidenced-based behavioral and motivational strategies for exercise adoption and adherence. The aim of the course is to expose students to how exercise psychology and adherence principles can be used to promote a physically active lifestyle that enhances self-concept, health, and well-being among diverse populations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 4596.

KINS 3316. Principles of Personal Fitness. 4 Credit Hours.

The course involves an in-depth study of neuromuscular anatomy and physiology with special attention to the acquisition and expression of muscular strength. The scientific basis of muscle performance will be thoroughly investigated. Contemporary training theories for the modification of strength, endurance, speed and power of human skeletal muscle will be reviewed and the results applied to special populations across the movement spectrum. This course is designed to help students integrate and synthesize a large body of knowledge in regard to the role of strength in people's lives and how to best construct exercise-training programs whose outcomes aim to improve neuromuscular function. Via the laboratory component of this course, students will develop experience in exercise performance and exercise programming for optimal strength, endurance, speed and power as well as help prepare students pursuing the NSCA-Certified Strength and Conditioning Specialist (CSCS) credential.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRK105)

KINS 3362. Olympic and Powerlifting. 3 Credit Hours.

Students pursuing careers in exercise and sports science must know how to perform and coach the events in Olympic and Powerlifting. The purpose of this course is to explain, demonstrate, and perform the Olympic (Snatch, Clean, Jerk) and Power (Squat, Bench, Deadlift) lifts. Technique, and teaching/coaching strategies for these events will be emphasized. This course will progress through sequences of teaching the various skill progressions. This course will also address the variety of training programs developed. Biomechanical, physiological, and psychological foundations of weightlifting technique and training will be introduced.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Exercise & Sport Science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRK105)

KINS 3363. Basic Electrocardiography. 3 Credit Hours.

Basic Electrocardiography (EKG) presents the fundamentals of electrocardiography. Structure and function of the heart and circulatory system, the electrical and mechanical events of the cardiac cycle, and normal and abnormal EKG responses at rest and during exercise will serve as the primary course content. The course is designed to provide the Exercise and Sport Science student with both a theoretical knowledge base about the heart and circulatory system and a practical working understanding of the resting and stress electrocardiogram. The student will develop the necessary skills to administer and interpret a 12-lead resting electrocardiogram as well as an exercise EKG as part of graded exercise testing.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3203 (may be taken concurrently)

KINS 3364. The Science of Health-Related Fitness. 3 Credit Hours.

The focus of this course is on how physical activity and exercise contribute to health-related fitness, and on the linkage between health-related fitness and optimal health/wellness. The components of health-related fitness will be presented as well as evidence-based ways to develop them. Students will engage in health-related fitness assessments, develop personalized health-related fitness programs, and identify the role of health-related fitness for people of all ages, including those with chronic conditions. The course will also introduce students to the topic of epidemiology of physical activity, including content about the prevalence and patterns of physical activity among Americans and the relationship between physical activity and certain chronic conditions. Laboratory activities are integrated into class meetings to give students hands-on practice with course content.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRK105)

KINS 3368. Principles of Health Fitness Program Management. 3 Credit Hours.

This course deals with the economics of health-fitness programs on personal, commercial, community, and corporate levels. Topics include: health care cost containment, absenteeism, productivity, and the public/personal relations value of corporate and community programs, along with financial and managerial considerations in successful commercial ventures. Students will study various models based upon specific objectives as well as investigate strategies for the implementation of the various models. Practical and theoretical aspects of designing and managing a health-fitness facility, along with techniques of marketing and promotion to ensure long term adherence and program success are also covered.

Repeatability: This course may not be repeated for additional credits.

KINS 3444. General Medical Conditions in Athletic Training. 3 Credit Hours.

This course examines current issues in athletic training and sports medicine not previously presented in the undergraduate athletic training curriculum to include conditions of the thorax and abdomen, and systemic diseases. Fall only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Athletic Training.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1224 or 'Y' in CRKI03)

KINS 3501. Research Methods in Kinesiology. 4 Credit Hours.

Research Methods in Kinesiology will introduce students to how the scientific method is applied to create the evidence base for the discipline of Kinesiology and how to interpret and use the evidence as a Kinesiology professional. The main topics of the course include: (a) scientific methods, (b) searching the literature and how to evaluate the literature, (c) types of research, (d) techniques for measuring physical activity, and (e) ethical issues in research. An aim of the course is to help students be good consumers of research about physical activity and exercise so they can accurately interpret information from media sources, magazines, and peer-reviewed scientific journals and critically assess the quality of that information. Laboratory activities will provide students with hands-on practice and opportunities to apply course concepts.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Kinesiology.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

KINS 4001. Physical Activity Promotion for Health Professionals. 3 Credit Hours.

This course will provide an overview of physical activity participation and promotion applied to various health settings. The class will include three units and topics areas: 1) Physical Activity Basics, 2) Physical Activity and Common Chronic Conditions, and 3) Physical Activity Promotion. Students will learn about physical activity recommendations across the lifespan, domains, and dimensions of physical activity, the role that physical activity plays in the prevention and treatment of common chronic conditions, and the application of behavior change theories used in physical activity promotion.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (Complete 2 of the following: (KINS 1223 or 'Y' in CRKI02) and (KINS 1224 or 'Y' in CRKI03), Complete 2 of the following: (BIOL 1111, BIOL 1911, 'Y' in CRBI02, or 'Y' in CRBI03) and (BIOL 2112, BIOL 2912, 'Y' in CRBI04, or 'Y' in CRBI10), or SBS 2001)

KINS 4096. Introduction to the Narrative in Patient-Centered Health Care. 3 Credit Hours.

This is a multidisciplinary course that uses a variety of ways to help students understand the human experience in the context of health and illness and explore the linkage between the story and the body. In order to help develop narrative competence, students will learn how a narrative approach to health and disease is different from the conventional biomedical approach. The focus of narrative medicine is on the individual patient, a person with a past, a person with pain, and a person with agency. Students will learn about the ways in which the patient's story and physiology are related, how the story can be used in a clinical setting, and how to improve their ability to interpret narratives. It will provide students with the skills of respecting multiple perspectives. It will help them hear and mediate competing voices (e.g. those of authority, the patient, the patient's family), and it will help them engage in the dynamics of movement between empathy and emotional detachment. The goal for this course is interprofessional, patient-centered, and humanistic; and it is intended to promote compassionate clinical care through valuing the patient's, and the practitioner's, own unique experiences.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 3096 or 'Y' in CRKI09) and (HRPR 2103, HPM 2214, or 'Y' in CRHP01)

KINS 4196. Sociology of Physical Activity. 3 Credit Hours.

Sociology of Physical Activity examines how people's engagement in physical activity and exercise is shaped by social factors and conditions within societies. Social factors such as race and ethnicity, gender, and social class will be presented as well as current research about how these factors are considered in interventions to promote physical activity, health, and well-being among diverse populations. The course will also help students develop an appreciation for the cultural influences and social inequalities surrounding access to and participation in physical activity experiences across the lifespan.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

KINS 4238. Sports in American Society. 3 Credit Hours.

The focus of this course is the unique role sports play in American society. The course deals with advanced theory in the sociology of physical activity. Topics include, but are not limited to, sexuality and sports, youth sports, violence in sports, mass media and sports, nationalism, and aging and physical activity.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 3296 or 'Y' in CRK111)

KINS 4239. Self-Development Through Physical Activity. 3 Credit Hours.

This course engages a group process-based experience in which students explore the impact of physical activity upon their lives. Emphasis is placed on interpreting past movement experiences from the present context and planning for a fit and active life.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 3296 or 'Y' in CRK111)

KINS 4242. Exercise, Nutrition and Behavior. 3 Credit Hours.

This course will provide an overview of the interaction among exercise, nutrition and behavior, specifically from a psychosocial approach. Students will learn about psychological factors, health behavior change, assessment and intervention strategies for exercise and nutrition. Course content is particularly relevant for undergraduate students in the social science and bioscience aspects of kinesiology, psychology, public health, and other health professions.

Repeatability: This course may not be repeated for additional credits.

KINS 4282. Independent Study in Kinesiology. 1 to 6 Credit Hour.

This course provides an opportunity for independent investigation and analysis of the intellectual, physical, social, psychological, and ethical bases of human movement.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (KINS 1201, 'Y' in KIN3, or 'Y' in CRK101), (KINS 3296 or 'Y' in CRK111), and Completed 2 of the following: (KINS 2203 or 'Y' in CRK105), (KINS 2204, 'Y' in KIN4, or 'Y' in CRK106), and (KINS 3202 or 'Y' in CRK110)

KINS 4283. Directed Readings and Study in Kinesiology. 1 to 6 Credit Hour.

This course provides an opportunity to participate in a variety of independent experiences (readings and study) in Kinesiology as directed by a faculty mentor.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

KINS 4290. Special Topics in Kinesiology. 3 Credit Hours.

The focus of this course is a topic important to the discipline of Kinesiology or one of its subdisciplines. Different topics will be covered in different semesters. The emphasis will be on current trends and new knowledge as it relates to one or more of the critical areas of investigation in Kinesiology.

Repeatability: This course may be repeated for additional credit.

KINS 4311. Advanced Physiology of Exercise. 3 Credit Hours.

This course examines the interactive mechanisms of regulation of the metabolic, cardiovascular, pulmonary, and muscular/skeletal systems in response to an acute bout of exercise and as chronic adaptation to various types of exercise training regimens. Training principles for human performance and health/fitness promotion are derived based on these interactive physiological mechanisms and responses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRK105)

KINS 4312. Exercise and Nutrient Metabolism. 3 Credit Hours.

This course applies the physiological principles controlling the relationship between exercise and nutrition to metabolism, weight control/management, human performance, and disease processes. The mechanisms whereby exercise can be used in the prevention and treatment of various disease processes are discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 4311 or 'Y' in CRK116)

KINS 4313. Exercise and Aging. 3 Credit Hours.

This course examines the influence of exercise interventions on the aging process as indicated in current research. An examination of the scientific principles that govern aging and the influences of various modalities on these processes are also discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRK105)

KINS 4314. Principles of Personal Fitness. 4 Credit Hours.

The course involves an in-depth study of neuromuscular anatomy and physiology with special attention to the acquisition and expression of muscular strength. The scientific basis of muscle performance will be thoroughly investigated. Contemporary training theories for the modification of strength, endurance, speed and power of human skeletal muscle will be reviewed and the results applied to special populations across the movement spectrum. This course is designed to help students integrate and synthesize a large body of knowledge in regard to the role of strength in people's lives and how to best construct exercise-training programs whose outcomes aim to improve neuromuscular function. Via the laboratory component of this course, students will develop experience in exercise performance and exercise programming for optimal strength, endurance, speed and power as well as help prepare students pursuing the NSCA-Certified Personal Trainer (CPT) credential.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 2203 or 'Y' in CRK105)

KINS 4315. Applied Performance Nutrition. 3 Credit Hours.

Applied Performance Nutrition seeks to address the unique nutritional demands of highly active and athletic populations. The course will provide undergraduate students who have an interest in working with a variety of athlete based populations the knowledge, skills, and abilities to perform a nutritional needs analysis for sport, develop a periodized nutrition plan, and differentiate the magnitude of factors leading to dietary success.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Exercise & Sport Science, Kinesiology, Nutrition.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 4242 or 'Y' in CRK112)

KINS 4316. Principles of Strength and Conditioning. 4 Credit Hours.

The course involves an in-depth study of how to achieve high levels of human performance through evidence based training practices. The course is designed to outline how the fitness characteristics needed for success in sport, including endurance, strength, power, and speed can be achieved through a systematic periodized approach. The course will provide undergraduate students with an interest in coaching, sport, strength and conditioning, and athletic training specific programming knowledge and practice to increase physical preparation for success in sport performance. This course will prepare students with the knowledge, skills, and abilities to sit for National Strength and Conditioning Association (NSCA) Certified Strength and Conditioning Specialist (CSCS).

Field of Study Restrictions: Must be enrolled in one of the following Majors: Exercise & Sport Science, Kinesiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 4314 or 'Y' in CRK119)

KINS 4333. Clinical Cardiovascular Pulmonary Exercise Physiology. 3 Credit Hours.

The course explores the roles and responsibilities of the clinical exercise professional in performing clinical exercise test procedures and programming exercise for populations with specific known cardiovascular and pulmonary diseases.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3203 (may be taken concurrently)

KINS 4334. Principles and Practices of Graded Exercise Testing and Exercise Program Development. 4 Credit Hours.

The course explores the role of exercise and wellness programming in health and disease. Techniques of functional capacity determination through exercise testing will be studied and practiced. Methods of quantifying the energy cost of activity and the development of exercise and wellness programs for people with known disease, those at high risk, and the apparently healthy individual will be emphasized. As the penultimate class in the student's program of study in Exercise and Sport Science, this class is designed to help students integrate and synthesize a large body of knowledge. The students will develop a strong rationale for the role of exercise and physical activity in the lives and health of all people. They will learn how to perform risk stratification and determine the necessity, if any, for closely supervised exercise programs. Specifically the students will develop expertise in exercise testing and exercise programming for one group or special population. They will demonstrate this expert knowledge through written as well as oral communication. NOTE: Lab fee required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 3363 or 'Y' in CRK118) and (KINS 4311 or 'Y' in CRK116)

KINS 4335. Clinical Exercise Physiology. 3 Credit Hours.

This course explores the roles and responsibilities of the clinical exercise professional in performing clinical exercise test procedures and prescribing exercise programs in populations with specific known chronic diseases. The course will cover the basic pathophysiology of a wide variety of chronic diseases and disorders, the effect on the exercise response, and common management and medications. A review of the effects of exercise training will be conducted and recommendations regarding exercise testing and programming will be discussed for each disease/disorder. Diseases/disorders covered include cardiovascular disease, pulmonary disease, metabolic disease, immunological and hematological disorders, orthopedic diseases/disabilities, and neuromuscular disorders.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3203 (may be taken concurrently)

KINS 4364. Business Management for Exercise Professionals. 3 Credit Hours.

This course will provide an overview of business management for exercise professionals. This course will build upon the foundational information that was introduced in Health Fitness Program Management and will provide students with critical skills for transitioning from an exercise professional to successful business manager. Topics will include managing human resources and financial resources, establishing policies for managing fitness facilities, and developing marketing plans to promote the business to potential clients. The use of effective communication for fostering an engaged workplace, as well as for developing professional relationships with other allied health professionals will be included.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3368.

KINS 4385. Exercise and Sport Science Internship I. 3 Credit Hours.

This internship is part one of a two-course, culminating experience designed to provide hands-on, practical experiences for undergraduate Exercise and Sport Science students. Students will have the opportunity to apply their knowledge and advance their practical skills in a physical activity-related field under the supervision of a department faculty member and a site preceptor. As part of their internship experience, students will spend 10-15 hours per week working at their internship site. Class sessions will allow students to reflect on their internship experiences and integrate knowledge gained from their previous coursework. Throughout the semester, students will also examine topics related to interprofessional practice, as well as diversity, equity and inclusion at the internship site and in the field of physical activity.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3203 and KINS 3316.

KINS 4396. Research and Writing in Exercise and Sport Science. 3 Credit Hours.

Research and Writing in Exercise and Sport Science introduces students to research methods and the application of research. The main topics of the course include a) developing research questions based on gaps in scientific literature, b) study designs, c) methods of data collection, d) statistical approaches to data analysis, e) writing a research grant proposal, f) presenting scientific literature, and e) ethical issues in research. This is a writing intensive course; writing assignments in this course will be completed and submitted in small groups to replicate the team writing approach most commonly used in the professional discipline of Exercise and Sport Science.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Exercise & Sport Science.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3196.

KINS 4485. Exercise and Sport Science Internship II. 3 Credit Hours.

This internship is part two of a two-course, culminating experience designed to provide hands-on, practical training for undergraduate Exercise and Sport Science students. Students will have the opportunity to apply their knowledge and advance their skills in a physical activity-related field under the supervision of a department faculty member and a site preceptor. As part of their internship experience, students will spend 10-15 hours per week working at their internship site. Class sessions will allow students to reflect on their internship experiences and integrate knowledge gained from their previous coursework as well as build upon the lessons learned from their first internship. Throughout the semester students will examine topics related to professional development in their chosen career path such as workplace competencies and certifications, communication strategies and leadership styles, and creating inclusive and equitable fitness environments.

Department Restrictions: Must be enrolled in one of the following Departments: CPH:Kinesiology.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 4385.

KINS 4501. Program Planning and Leading Physical Activity and Fitness. 3 Credit Hours.

Program Planning and Leading Physical Activity and Fitness examines how to effectively plan and safely lead physical activity and fitness programs for individuals with diverse backgrounds, abilities, and needs. The main topics of the course include: (a) determining clients' readiness to participate in physical activity and fitness programs, (b) planning physical activity and fitness programs, (c) instructional and motivational strategies for leading one-on-one and group-based physical activity and exercise sessions, and (d) safety precautions for leading physical activity and exercise sessions. The course will also introduce students to leadership roles and responsibilities of Kinesiology professionals whose work involves planning and leading physical activity and fitness programs in a variety of settings. Opportunities for students to plan and lead physical activity and exercise sessions are integrated into class meetings.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in KINS 3364.

KINS 4808. Sport Concussion. 3 Credit Hours.

This online course is designed to provide students information about sport concussion. It is designed for undergraduate and graduate students seeking to augment their sport concussion education. Students will receive targeted course lectures, readings, and online resources on topics such as concussion pathomechanics, pathophysiology, recognition, assessment, management, and return to play guidelines.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (KINS 1223, 'Y' in KIN1, or 'Y' in CRKI02)

Klein College of Media and Communication (KLN)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

KLN 0873. Media in a Hyper-Mediated World. 3 Credit Hours.

The Internet-fueled democratization of media creation has enabled anyone to be a publisher, and has given audiences almost infinite choices -- with both great and questionable effects. In a world of information abundance, it can be difficult to discern fact from opinion and truth from fiction. We need to know how to wade through this barrage of information with a critical eye, to be better informed and ultimately become creators of media ourselves. Media in a Hyper-Mediated World is designed to help students navigate 21st century media, starting by becoming active users of media, not just passive consumers. Students will employ principles of media literacy in analyzing and creating messages on a variety of topics using a combination of writing, image production, sound production and creative work with digital media. In order to become active participants in an information society, students will examine the factors that assist them in acting responsibly in media environments.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

KLN 1001. Klein First-Year Seminar. 1 Credit Hour.

The Klein First-Year Seminar introduces incoming students in the college to the purposes of higher education and to the skills needed to use academic resources and technology successfully, both in college and beyond. The course covers topics such as time management and study skills, as well as university support services and areas of interest specific to Klein students. Note: This course is for Klein College of Media and Communication students only.

Class Restrictions: Must be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Media & Comm, Klein College.

Repeatability: This course may not be repeated for additional credits.

KLN 1002. Klein College Introduction to Professional Development. 1 Credit Hour.

This course prepares students to explore professional development opportunities as part of their college experience. Students will use self-evaluation tools to determine strengths and possible career paths. Students will create and refine resumes and cover letters and explore the application process for internships. The class will introduce students to on-campus groups and organizations, internship opportunities, Klein career resources, curriculum, graduate school options, and global opportunities.

Repeatability: This course may not be repeated for additional credits.

KLN 1101. Field Experience. 1 Credit Hour.
