The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2

This course has a co-requisite of BIOL 2207.

3

See course descriptions for exceptions.

4

All students are required to take a minimum of one credit.

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

Suggested Academic Plan

Bachelor of Science in Biology with Teaching

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	4
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
SCTC 1001	CST First Year Seminar	1
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
SCTC 1389	Step 1 and 2: Inquiry-Based Lesson Design in Science and Mathematics Modified for English Learners	2
GenEd Breadth Course		3
Credit Hours		17
Spring		
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes or Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology or Honors Introduction to Cellular and Molecular Biology	
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Credit Hours		16
Year 2		
Fall		
Select one of the following:		3
BIOL 2227 BIOL 3101	Principles of Ecology Evolution (F)	
Select one of the following:		4
CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	
EDUC 2179	Knowing and Learning in Mathematics and Science	3
SPED 2231	Introduction to Special Education	3
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
Credit Hours		16

Spring

Select one of the following: 4

MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	
---------------------------	--------------------------------------	--

MATH 1044	Introduction to Probability and Statistics for the Life Sciences	
-----------	--	--

BIOL 2207	Genetics (S)	3
-----------	--------------	---

BIOL 2297	Research Techniques in Genetics (S)	3
-----------	-------------------------------------	---

Select one of the following: 4

CHEM 2202 & CHEM 2204	Organic Chemistry II and Organic Chemistry Laboratory II	
--------------------------	---	--

CHEM 2922 & CHEM 2924	Organic Chemistry for Honors II and Organic Honors Laboratory II (S)	
--------------------------	---	--

MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3
-----------	--	---

Credit Hours		17
---------------------	--	-----------

Year 3**Fall**

Select one of the following: 3-4

BIOL 3204	Cell Structure and Function (F)	
-----------	---------------------------------	--

BIOL 3324	Molecular Biology	
-----------	-------------------	--

BIOL 4375	General Biochemistry I	
-----------	------------------------	--

Select one of the following: 4

PHYS 1021	Introduction to General Physics I	
-----------	-----------------------------------	--

PHYS 1061 or PHYS 1961	Elementary Classical Physics I or Honors Elementary Classical Physics I	
---------------------------	--	--

PHYS 2021 or PHYS 2921	General Physics I or Honors General Physics I	
---------------------------	--	--

SCTC 3001	History of Science	3
-----------	--------------------	---

IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
-----------------------	--	---

GenEd Breadth Course		3
----------------------	--	---

Elective		1-0
----------	--	-----

Credit Hours		17
---------------------	--	-----------

Spring

BIOL 3091	Research Methods (S)	3
-----------	----------------------	---

Select one of the following: 4

PHYS 1022	Introduction to General Physics II	
-----------	------------------------------------	--

PHYS 1062 or PHYS 1962	Elementary Classical Physics II or Honors Elementary Classical Physics II	
---------------------------	--	--

PHYS 2022 or PHYS 2922	General Physics II or Honors General Physics II	
---------------------------	--	--

Select one of the following: 3

MGSE 2189	Classroom Interactions (S)	
-----------	----------------------------	--

SCTC 3485	Science and Mathematics in the Classroom	
-----------	--	--

GenEd Breadth Course		3
----------------------	--	---

Elective		2
----------	--	---

Credit Hours		15
---------------------	--	-----------

Year 4**Fall**

Upper-Level 2200+ Biology Elective ¹		3
---	--	---

Upper-Level 2200+ Biology Elective ¹		3-4
---	--	-----

SCTC 3312	Coding STEM Lessons ²	1
-----------	----------------------------------	---

Select one of the following: 3

MGSE 4189	Project-Based Instruction (F)	
-----------	-------------------------------	--

SCTC 4485	Integrating STEM Practice in Diverse Teaching Environments	
GenEd Breadth Course		3-4
Elective		2-0
Credit Hours		15
Spring		
Upper-Level 2200+ Biology Elective ¹		3
EDUC 4388	TUteach Apprentice Teaching	4
EDUC 4802	TUteach Apprentice Teaching Seminar	3
Elective		1
Credit Hours		11
Total Credit Hours		124

Code	Title	Credit Hours
(F) - Fall only course		
(S) - Spring only course		

1

See course descriptions for exceptions. If the student has taken the necessary prerequisite courses, some of the Biology elective courses may be taken before the Fall semester of Year 4.

2

All students are required to take a minimum of one credit.

Biophysics BS

Overview

The **Bachelor of Science in Biophysics**, offered by the Department of Physics, explores the fundamental principles of biology, chemistry, mathematics and physics and how these fields work together to advance scientific discovery. Biophysics students are prepared to pursue professional degrees in medicine and pharmacy, or advanced degrees in biology, biophysics, molecular biology or neuroscience, as well as the combined MD/PhD degree in medical physics, health physics or nuclear medicine.

Campus Location: Main

Program Code: ST-BIOP-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA and
- carry out an independent study or undergraduate thesis project.

Consult the undergraduate physics faculty advisor for more details.

Learn more about the Bachelor of Science in Biophysics.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3
CHEM 3398	Physical Chemistry Laboratory II	2
CHEM 4196	Techniques of Chemical Measurement II	5
MATH 3098	Modern Algebra (F)	3
MATH 4096	Senior Problem Solving	3
PHYS 2796	Introduction to Modern Physics (S)	4
PHYS 4796	Experimental Physics	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (77-81 s.h.)

At least 10 courses required for the major must be completed at Temple. At least 3 Biology and 4 Physics courses must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology	4
BIOL 2207	Genetics (S) ¹	3
BIOL 2297	Research Techniques in Genetics (S) ¹	3
BIOL 3204	Cell Structure and Function (F)	4
Physics		
	Select one of the following:	4

PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I (F)	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I (F)	
Select one of the following:		4
PHYS 1062	Elementary Classical Physics II	
PHYS 1962	Honors Elementary Classical Physics II (S)	
PHYS 2022	General Physics II	
PHYS 2922	Honors General Physics II (S)	
PHYS 2502	Mathematical Physics (S)	4
PHYS 2796	Introduction to Modern Physics (S)	4
PHYS 3301	Electricity and Magnetism (F)	4
PHYS 4101	Thermal Physics (F)	3

Chemistry

Select one of the following: 4

CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	

Select one of the following: 4

CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	

Select one of the following: 4

CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2211 & CHEM 2213	Organic Chemistry for Majors I and Organic Majors Laboratory I (F)	
CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	

Select one of the following: 4

CHEM 2202 & CHEM 2204	Organic Chemistry II and Organic Chemistry Laboratory II	
CHEM 2212 & CHEM 2214	Organic Chemistry for Majors II and Organic Majors Laboratory II (S)	
CHEM 2922 & CHEM 2924	Organic Chemistry for Honors II and Organic Honors Laboratory II (S)	

Mathematics

MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4
MATH 1042 or MATH 1942	Calculus II Honors Calculus II	4
MATH 2043 or MATH 2943	Calculus III Honors Calculus III	4

Biophysics Electives

Four 2000+ Biophysics Electives chosen in consultation with the Physics faculty advisor. At least two of the electives must be Physics courses. 12-16

Total Credit Hours 77-81

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

The research and independent study courses shown below do not count as Biology electives, but they may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

1

Four electives must be chosen in consultation with the physics advisor. All courses must be 2000-level or above. At least two electives must be Physics courses. Choose courses in Physics, Biology (Neuroscience, Genetics, Cell Structure, Physiology), Chemistry (Physical Chemistry), Biochemistry and Biophysics. Recommended for graduate school in Physics: PHYS 2101, PHYS 3302, PHYS 3701 and PHYS 4796 and as much of the BS program in Physics as time allows. Students planning to go to medical school should complete BIOL 1111 Introduction to Organismal Biology.

Chemistry BA

Overview

The Department of Chemistry is one of the oldest departments in the university and has a long record of preparing students for careers in science. Since a significant portion of America's chemical industry is centered in the Philadelphia region, there is a wide range of career opportunities locally available. Although most of our students have gone on to medicine, dentistry or the chemical industry, recent graduates have also gone on to careers in law, forensics and even art restoration.

The **Bachelor of Arts in Chemistry** is designed for students who are planning for a non-research career in a field related to chemistry. Students learn a wide array of topics in chemistry, mathematics and physics. Students learn how to write scientific reports, analyze data and place these results in a broader scientific context.

Campus Location: Main

Program Code: ST-CHEM-BA

Distinction in Major

To graduate with distinction in this major, a student must have a minimum 3.33 GPA in all the Chemistry courses required for the major.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Chemistry.

- BA in Chemistry / MEd in Middle Grades Education with a Concentration in Science
- BA in Chemistry / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BA or BS in Chemistry / PSM in Forensic Chemistry
- Dental 3+4 Program (p. 1438)
- Pharmacy 3+4 Program (p. 1444)
- Podiatry 3+4 Program (p. 1447)

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CHEM 3398	Physical Chemistry Laboratory II	2
CHEM 4196	Techniques of Chemical Measurement II	5

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (53 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 5 Chemistry courses must be completed at Temple.

Suggested Academic Plan

All prospective majors should schedule an appointment with one of the departmental advisors (names of current faculty advisors are available in the Overview section) to plan a program of study. The recommended order of courses for the major is listed below; a different order is acceptable as long as the student adheres to prerequisite requirements.

Bachelor of Arts in Chemistry

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		
Fall		Credit Hours
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
SCTC 1001	CST First Year Seminar	1
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Elective		2
Credit Hours		15

Spring		
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	4
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
Elective		4
Credit Hours		15

Year 2		
Fall		
Select one of the following:		4
CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2211 & CHEM 2213	Organic Chemistry for Majors I and Organic Majors Laboratory I (F)	

CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	
Select one of the following:		4
PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I (F)	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I (F)	
MATH 2043 or MATH 2943	Calculus III or Honors Calculus III	4
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
Credit Hours		15
Spring		
Select one of the following:		4

1

It is strongly encouraged that CHEM 3103/CHEM 3105 be taken before all chemistry laboratory courses numbered above 3105.

Chemistry BS

Overview

The Department of Chemistry is one of the oldest departments in the university and has a long record of preparing students for careers in science. Since a significant portion of America's chemical industry is centered in the Philadelphia region, there is a wide range of career opportunities locally available. Although most of our students have gone on to medicine, dentistry or the chemical industry, recent graduates have also gone on to careers in law, forensics and even art restoration.

The **Bachelor of Science in Chemistry** prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological or pharmaceutical industries. Students learn a wide array of topics in chemistry, mathematics and physics. The program emphasizes the "hands-on" nature of chemistry in laboratory courses, giving students the tools that chemists need to pursue research. They also learn how to write scientific reports, analyze data and place these results in a broader scientific context. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

Campus Location: Main

Program Code: ST-CHEM-BS

Distinction in Major

To graduate with distinction in this major, a student must have a minimum 3.33 GPA in all the Chemistry courses required for the major.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Chemistry.

- BS in Chemistry / MEd in Middle Grades Education with a Concentration in Science
- BS in Chemistry / MEd in Middle Grades Education with a Concentration in Mathematics and Science
- BS in Chemistry / MS in Chemistry
- BA or BS in Chemistry / PSM in Forensic Chemistry

Learn more about the Bachelor of Science in Chemistry.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
CHEM 3398	Physical Chemistry Laboratory II	2
CHEM 4196	Techniques of Chemical Measurement II	5
CHEM 4496	Research Techniques in Biochemistry	4
EES 2096	Climate Change: Oceans To Atmosphere (S - even years)	4
MATH 3098	Modern Algebra (F)	3
MATH 4096	Senior Problem Solving	3
PHYS 2796	Introduction to Modern Physics (S)	4
or PHYS 4796	Experimental Physics	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).

- A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.
3. Major Requirements for Bachelor of Science (70-74 s.h.)
At least 9 courses required for the major must be completed at Temple. At least 7 Chemistry courses must be completed at Temple.
4. American Chemical Society (ACS) Certification Requirements (optional, see Footnote 2 below for more details)
- A foundational course in each of the 5 areas of chemistry (analytical, biochemistry, inorganic, organic, and physical). General chemistry courses do not count as foundational courses.
 - In-depth courses in at least 4 of the 5 areas, where an in-depth course is defined as a second semester of study in that particular area. For example, CHEM 2202 Organic Chemistry II qualifies as an in-depth course in organic chemistry.
 - 400 laboratory hours.

Total Credit Hours **70-74**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

CHEM 4881 and CHEM 4891 will not fulfill an Advanced Chemistry elective for the Chemistry BA or BS degree.

2

There are several course choices that can be used to meet the ACS certification requirements. See an advisor if you have any questions. The most straightforward pathway is for students to take the elective courses CHEM 4401 Biochemistry I and CHEM 4003 Inorganic Synthesis. Alternately, students could take CHEM 4401 Biochemistry I and CHEM 4002 Advanced Inorganic Chemistry, but this pathway would require additional lab courses (see a Chemistry faculty advisor). Another option is for students to take the elective courses CHEM 4401 Biochemistry I and CHEM 4196 Techniques of Chemical Measurement II or BIOL 4344 Research Techniques in Biochemistry. In order to fulfill the ACS-mandated requirement of 400 laboratory hours, students must complete either CHEM 4207 Synthesis and Identification of Organic and Medicinal Compounds OR any two (2) of the following: CHEM 3881 Cooperative Research and/or CHEM 3891 Undergraduate Research, CHEM 4004 Crystallography and Diffraction, CHEM 4103 Instrumental Design, CHEM 4107 Drug Analysis, CHEM 4108 Investigative Chemistry, or CHEM 4503 Introduction to Polymer Chemistry.

3

One advanced science course, for a total of 4 credits, may be satisfied by a total of 4 credits of any combination of CHEM 2891, CHEM 3881, CHEM 3891, CHEM 4881, or CHEM 4891. No more than 1 credit of CHEM 2891 may be used toward this total. The research courses may only be used as one advanced science course.

4

BIOL 2207 and BIOL 2297 are co-requisites to each other.

Suggested Academic Plan

All prospective majors should schedule an appointment with one of the departmental advisors (names of current faculty advisors are available in the Overview section) to plan a program of study. The recommended order of courses for the major is listed below; a different order is acceptable as long as the student adheres to prerequisite requirements.

Bachelor of Science in Chemistry

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
SCTC 1001	CST First Year Seminar	1
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Elective		2
Credit Hours		15
Spring		
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	4
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
Electives		5
Credit Hours		16
Year 2		
Fall		
Select one of the following:		4

CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2211 & CHEM 2213	Organic Chemistry for Majors I and Organic Majors Laboratory I (F)	
CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	
Select one of the following:		4
PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I (F)	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I (F)	
MATH 2043 or MATH 2943	Calculus III or Honors Calculus III	4
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
Credit Hours		15
Spring		
Select one of the following:		4
CHEM 2202 & CHEM 2204	Organic Chemistry II and Organic Chemistry Laboratory II	
CHEM 2212 & CHEM 2214	Organic Chemistry for Majors II and Organic Majors Laboratory II (S)	
CHEM 2922 & CHEM 2924	Organic Chemistry for Honors II and Organic Honors Laboratory II (S)	
Select one of the following:		4
PHYS 1062	Elementary Classical Physics II	
PHYS 1962	Honors Elementary Classical Physics II (S)	
PHYS 2022	General Physics II	
PHYS 2922	Honors General Physics II (S)	
GenEd Breadth Course		3
Electives		5
Credit Hours		16
Year 3		
Fall		
CHEM 3103	Techniques of Chemical Measurement I ¹	3
CHEM 3105	Introduction to Chemical Research Techniques ¹	1
CHEM 3302	Physical Chemistry Lecture II	3
GenEd Breadth Course		3
GenEd Breadth Course		3
Elective		2
Credit Hours		15
Spring		
CHEM 3001	Inorganic Chemistry	3
CHEM 3301	Physical Chemistry Lecture I	3
CHEM 3398	Physical Chemistry Laboratory II	2
GenEd Breadth Course		3
Electives		5
Credit Hours		16
Year 4		
Fall		
CHEM 3303	Physical Chemistry Laboratory I	2
Advanced Chemistry Course - 4002 or above ^{2,3}		3-4
Advanced Science Course ³		3-4

GenEd Breadth Course		3-4
Elective		4-1
Credit Hours		15
Spring		
CHEM 4196	Techniques of Chemical Measurement II	5
Advanced Chemistry Course - 4002 or above ^{2,3}		3-4
Advanced Science Course ³		3-4
Elective		4-2
Credit Hours		15
Total Credit Hours		123

1

It is strongly encouraged that CHEM 3103/CHEM 3105 be taken before all chemistry laboratory courses numbered above 3105.

2

Advanced Chemistry Courses for B.S. students consist of all courses in Chemistry having a number of 4002 or above (except CHEM 4881 and CHEM 4891). If the student has successfully completed the appropriate prerequisite course, a graduate course in Chemistry may be included in this category.

3

There are several course choices that can be used to meet the ACS certification requirements. See an advisor if you have any questions. The most straightforward pathway is for students to take the elective courses CHEM 4401 Biochemistry I and CHEM 4003 Inorganic Synthesis. Alternately, students could take CHEM 4401 Biochemistry I and CHEM 4002 Advanced Inorganic Chemistry, but this pathway would require additional lab courses (see a Chemistry faculty advisor). Another option is for students to take the elective courses CHEM 4401 Biochemistry I and CHEM 4196 Techniques of Chemical Measurement II or BIOL 4344 Research Techniques in Biochemistry. In order to fulfill the ACS-mandated requirement of 400 laboratory hours, students must complete either CHEM 4207 Synthesis and Identification of Organic and Medicinal Compounds OR any two (2) of the following: CHEM 3881 Cooperative Research and/or CHEM 3891 Undergraduate Research, CHEM 4004 Crystallography and Diffraction, CHEM 4103 Instrumental Design, CHEM 4107 Drug Analysis, CHEM 4108 Investigative Chemistry, or CHEM 4503 Introduction to Polymer Chemistry.

Advanced Science Courses for BS students consist of:

Code	Title	Credit Hours
Advanced Science Courses		6-8
Only one Advanced Science course may be satisfied by a total of 4 credits in any combination of the following:		4
CHEM 2891	Introduction to Undergraduate Research ¹	
CHEM 3881	Cooperative Research	
CHEM 3891	Undergraduate Research	
CHEM 4881	Cooperative Research	
CHEM 4891	Undergraduate Research	
All other Chemistry courses numbered 4002 or above		3-4
BIOL 2296	Genetics (S)	4
BIOL 3096	Cell Structure and Function (F)	4
BIOL 3265	Developmental Biology (F)	3
BIOL 3334	Mammalian Physiology	4
All other Biology courses numbered above 3334		3-4
EES 2011	Mineralogy I	4
All other EES courses numbered above 2011		3-4
MATH 2101	Linear Algebra	3
MATH 3031	Probability Theory I	3
All other Math courses numbered above 3031		3-4
PHYS 2101	Classical Mechanics (S)	3
PHYS 2502	Mathematical Physics (S)	4
PHYS 2796	Introduction to Modern Physics (S)	4
PHYS 3101	Analytical Mechanics (F)	3
PHYS 3301	Electricity and Magnetism (F)	4
PHYS 3302	Classical Electromagnetism (S)	3

PHYS 4101	Thermal Physics (F)	3
PHYS 4301	Electronics	3
All other Physics courses numbered above 4301		3-4

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

No more than one credit of CHEM 2891 may be used toward this total.

Chemistry Minor

Overview

Offered by the Department of Chemistry, the **Minor in Chemistry** is designed for students who are interested in acquiring basic knowledge in chemistry but not wishing to major in the subject. Biochemistry majors may not declare this minor.

Minor Requirements

All courses listed below have prerequisites. For more information, please check the course descriptions or ask an advisor.

At least 12 credits required for the minor must be completed at Temple. At least 12 Chemistry credits must be completed at Temple.

Code	Title	Credit Hours
CHEM 1031 or CHEM 1951	General Chemistry I Honors General Chemical Science I	3
CHEM 1032 or CHEM 1952	General Chemistry II Honors General Chemical Science II	3
CHEM 1033 or CHEM 1953	General Chemistry Laboratory I Honors Chemical Science Laboratory I	1
CHEM 1034 or CHEM 1954	General Chemistry Laboratory II Honors Chemical Science Laboratory II	1
CHEM 2201 or CHEM 2921	Organic Chemistry I Organic Chemistry for Honors I	3
CHEM 2202 or CHEM 2922	Organic Chemistry II Organic Chemistry for Honors II	3
CHEM 2203 or CHEM 2923	Organic Chemistry Laboratory I Organic Honors Laboratory I	1
CHEM 2204 or CHEM 2924	Organic Chemistry Laboratory II Organic Honors Laboratory II	1
At least 7 credit hours from the following list:		7
CHEM 3001	Inorganic Chemistry	
CHEM 3103 & CHEM 3105	Techniques of Chemical Measurement I and Introduction to Chemical Research Techniques	
CHEM 3301	Physical Chemistry Lecture I	
CHEM 3302	Physical Chemistry Lecture II	
CHEM 3303	Physical Chemistry Laboratory I	
CHEM 3398	Physical Chemistry Laboratory II	
CHEM 3401	Applications of Biochemistry	
CHEM 3405	Physical Chemistry of Biomolecules	
CHEM 3881	Cooperative Research ¹	
CHEM 3891	Undergraduate Research ¹	
CHEM 4002	Advanced Inorganic Chemistry	
CHEM 4003	Inorganic Synthesis	
CHEM 4004	Crystallography and Diffraction	
CHEM 4103	Instrumental Design	
CHEM 4107	Drug Analysis	
CHEM 4108	Investigative Chemistry	
CHEM 4196	Techniques of Chemical Measurement II	
CHEM 4201	Organic Structure and Mechanisms	
CHEM 4202	Organic Synthesis Methodology	
CHEM 4207	Synthesis and Identification of Organic and Medicinal Compounds	
CHEM 4401	Biochemistry I	
CHEM 4496	Research Techniques in Biochemistry	
CHEM 4503	Introduction to Polymer Chemistry	

Total Credit Hours

23

1

One semester of research within the Chemistry department is approved to satisfy three elective credits toward the minor.

Chemistry with Teaching BS

Overview

The Department of Chemistry is one of the oldest departments in the university and has a long record of preparing students for careers in science. Since a significant portion of America's chemical industry is centered in the Philadelphia region, there is a wide range of career opportunities locally available. Although most of our students have gone on to medicine, dentistry or the chemical industry, recent graduates have also gone on to careers in law, forensics and even art restoration.

The **Bachelor of Science in Chemistry with Teaching** is part of Temple's innovative "TUteach" secondary education teacher-training program. The BS in Chemistry with Teaching provides broad training in chemistry and prepares students for a career in secondary school teaching, graduate study or an entry level position as a chemist. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Chemistry with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-CHTC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA;
- achieve a minimum 3.33 GPA in all Chemistry courses required for the major; and
- achieve a minimum 3.9 GPA in the following courses:
 - SCES 2189 or SCTC 3485
 - SCES 4189 or SCTC 4485
 - EDUC 4802
 - EDUC 4388.

Learn more about the Bachelor of Science in Chemistry with Teaching.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)
 - Students must complete all University requirements including those listed below.
 - All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CHEM 4196	Techniques of Chemical Measurement II	5
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TTeach majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (88 s.h.)¹

At least 9 courses required for the major must be completed at Temple. At least 5 Chemistry courses and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

Code	Title	Credit Hours
Chemistry		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I

---------------------------	--	-----------

Code	Title	Credit Hours
-------------	--------------	---------------------

(F) - Fall only course

(S) - Spring only course

1

The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2

All students are required to complete a minimum of one credit.

Computer Science and Physics BS

Overview

The **Bachelor of Science in Computer Science and Physics** is an interdisciplinary program offered by the Department of Physics in conjunction with the Department of Computer and Information Sciences. This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four-year career. The program will prepare students for a career in a computer-related field and/or physics research.

Campus Location: Main

Program Code: ST-CSPH-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- have a minimum 3.50 major GPA and
- carry out an independent study or undergraduate thesis project.

Consult the faculty advisor for more details.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CIS 3296	Software Design	4
CIS 4397	Independent Research in Computer Science	3
CIS 4398	Projects in Computer Science	3
PHYS 2796	Introduction to Modern Physics (S)	4
PHYS 4796	Experimental Physics (S)	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for the Bachelor of Science (77-78 s.h.)

At least 11 courses required for the major must be completed at Temple. At least 4 Computer Science and 5 Physics courses must be completed at Temple.

Computer Science BA

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

The **Bachelor of Arts in Computer Science** provides an in-depth study of the science of computing, including mathematical/theoretical foundations as well as systems and application software development. Students are prepared (but not required) to take electives in topics such as artificial intelligence, machine learning, robotics, computer vision, graphics, game programming, bioinformatics, databases, big data, mobile and web application development, cloud computing, high performance computing, wireless and sensor networks, network and information security, and digital forensics. Students who select the BA in Computer Science can often have a second major and still be able to graduate within four years. This program is for students with an interest in the fundamentals of computing, who want to apply their computer science knowledge to a second area of interest and/or contribute to innovative research and product development. Our students have careers in software development, systems analysis and consulting; they are also prepared for graduate study and research in Computer and Information Sciences.

Campus Location: Main

Program Code: ST-CSCI-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- have a minimum 3.50 major GPA and
- have a minimum 3.50 cumulative GPA.

1

Must select one Lab Science Sequence from the options listed below. Lab Science A and Lab Science B must be taken from the same department.

Sequenced Computer Science BA Laboratory Science Requirements

Code	Title	Credit Hours
Biology Sequence		
Select one Biology Lab Science A:		
BIOL 1011	General Biology I	
BIOL 1111	Introduction to Organismal Biology	
BIOL 1911	Honors Introduction to Organismal Biology (S)	
Select one Biology Lab Science B:		
BIOL 1012	General Biology II	
BIOL 1112	Introduction to Biomolecules, Cells and Genomes	
BIOL 1912	Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112	Introduction to Cellular and Molecular Biology	
BIOL 2912	Honors Introduction to Cellular and Molecular Biology (F)	
Chemistry Sequence ¹		
Select one Chemistry Lab Science A:		
CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one Chemistry Lab Science B:		
CHEM 1022 & CHEM 1024	Introduction to Chemistry II and Introduction to Chemistry Laboratory II	
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
Earth & Environmental Science Sequence ²		
Select this Lab Science A:		
EES 2001	Physical Geology	

Select one Lab Science B:

EES 2011	Mineralogy I (with CHEM 1031 prerequisite)
EES 2021	Sedimentary Environments (no CHEM 1031 prerequisite)
EES 2061	Introduction to Geochemistry (with CHEM 1031 prerequisite)

Physics Sequence³**Select one Physics Lab Science A:**

PHYS 1021	Introduction to General Physics I
PHYS 1061	Elementary Classical Physics I
PHYS 1961	Honors Elementary Classical Physics I (F)
PHYS 2021	General Physics I
PHYS 2921	Honors General Physics I (F)

Select one Physics Lab Science B:

PHYS 1022	Introduction to General Physics II
PHYS 1062	Elementary Classical Physics II
PHYS 1962	Honors Elementary Classical Physics II (S)
PHYS 2022	General Physics II
PHYS 2922	Honors General Physics II (S)

1

Students can choose to mix-and-match the Chemistry Sequence A and B courses. However, they must take at least 1 course from Chemistry Sequence A and 1 from Chemistry Sequence B. Note: Chemistry courses consist of a three-credit lecture plus a one-credit lab.

2

For the EES Sequence, two of the three Lab Science B options require students to take CHEM 1031 as a prerequisite, but EES 2021 does not.

3

Students can choose to mix-and-match the Physics Sequence A and B courses. However, they must take at least 1 course from Physics Sequence A and 1 from Physics Sequence B.

Computer Science BS

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

The **Bachelor of Science in Computer Science** provides an in-depth study of the science of computing, including mathematical/theoretical foundations as well as systems and application software development. Students take electives (4-5 courses) in topics such as artificial intelligence, machine learning, robotics, computer vision, graphics, game programming, bioinformatics, databases, big data, mobile and web application development, cloud computing, high performance computing, wireless and sensor networks, network and information security, and digital forensics. The program is for students with an interest in the fundamentals of computing, who want to be able to contribute to innovative research and product development. Our graduates have careers in software development, systems analysis, and consulting; they are also prepared for graduate study and research in Computer and Information Sciences.

Campus Location: Main

Program Code: ST-CSCI-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- have a minimum 3.50 major GPA and
- have a minimum 3.50 cumulative GPA.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Computer Science.

- BS in Computer Science / MS in Computer Science (p. 1437)
- BS in Computer Science / MS in Computational Data Science

Learn more about the Bachelor of Science in Computer Science.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
 - Students must complete all University requirements including those listed below.
 - All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
All students MUST take:		
CIS 3296	Software Design	4

Second writing-intensive course can be chosen from:

CIS 4397	Independent Research in Computer Science	3
CIS 4398	Projects in Computer Science	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (73-74 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 7 CIS courses must be completed at Temple.

Code	Title	Credit Hours
Computer & Information Science courses		
CIS 1001	Introduction to Academics in Computer Science	1
CIS 1051	Introduction to Problem Solving and Programming in Python	4
or CIS 1057	Computer Programming in C

CIS 4398	Projects in Computer Science ¹	3
or CIS 4397	Independent Research in Computer Science	
Computer Science Electives		
Select 15-16 credits from the following CS elective courses: ²		15-16
CIS 3100	Special Topics in CIS	
CIS 3203	Introduction to Artificial Intelligence	
CIS 3211	Automata, Computability, and Languages	
CIS 3217	Computer Architecture	
CIS 3219	Computer Graphics and Image Processing	
CIS 3242	Discrete Structures	
CIS 3308	Web Application Programming	
CIS 3319	Wireless Networks and Security	
CIS 3374	Quality Assurance & Testing	
CIS 3381	Cooperative Education Experience in Computer Science ³	
CIS 3441	Software Security	
CIS 3515	Introduction to Mobile Application Development	
CIS 3603	User Experience Design	
CIS 3605	Introduction to Digital Forensics	
CIS 3715	Principles of Data Science	
CIS 4282	Independent Study ³	

CIS 4305	Real Time Computer Systems (Not offered every year)	
CIS 4307	Introduction to Distributed Systems and Networks (Not offered every year)	
CIS 4308	Development of Multi-tier Client/Server Systems (Not offered every year)	
CIS 4319	Computer Networks and Communications	
CIS 4324	Compiler Design (Not offered every year)	
CIS 4331	Principles of Database Systems	
CIS 4345	Introduction to Cloud Computing	
CIS 4350	Seminar on Topics in Computer Science	
CIS 4360	Seminar on Topics in Computer Science	
CIS 4382	Independent Study ³	
CIS 4397 or CIS 4398	Independent Research in Computer Science (if not taken as capstone requirement) ¹ Projects in Computer Science	
CIS 4419	Securing the Internet of Things	
CIS 4515	Advanced Mobile Application Development	
CIS 4517	Data-Intensive and Cloud Computing	
CIS 4523	Knowledge Discovery and Data Mining	
CIS 4524	Analysis and Modeling of Social and Information Networks	
CIS 4526	Foundations of Machine Learning	
CIS 4615	Ethical Hacking and Intrusion Forensics	
Mathematics		
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4
MATH 1042 or MATH 1942	Calculus II Honors Calculus II	4
Laboratory Science courses		
Two (2) laboratory science courses ⁴		8
Total Credit Hours		73-74

1

GPA and other requirements are needed to register for CIS 4397.

2

Students can count one of the following as a CS elective course: MATH 2101 Linear Algebra, MATH 2103 Linear Algebra with Computer Lab, MATH 2043 Calculus III.

3

A maximum of eight (8) credits may be taken from CIS 3381, CIS 4282 and/or CIS 4382 to fulfill Computer Science elective requirements. In addition, a maximum of four (4) credits may be taken from CIS 3381 to fulfill Computer Science elective requirements.

4

Must select one Lab Science Sequence from the options listed below. Lab Science A and Lab Science B must be taken from the same department.

Sequenced Computer Science BS Laboratory Science Requirements

Code	Title	Credit Hours
Biology Sequence		
Select one Biology Lab Science A:		
BIOL 1011	General Biology I	
BIOL 1111	Introduction to Organismal Biology	
BIOL 1911	Honors Introduction to Organismal Biology	
Select one Biology Lab Science B:		
BIOL 1012	General Biology II	
BIOL 1112	Introduction to Biomolecules, Cells and Genomes	
BIOL 1912	Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112	Introduction to Cellular and Molecular Biology	

BIOL 2912 Honors Introduction to Cellular and Molecular Biology

Chemistry Sequence ¹

Select one Chemistry Lab Science A:

CHEM 1021 Introduction to Chemistry I
& CHEM 1023 and Introduction to Chemistry Laboratory I

CHEM 1031 General Chemistry I
& CHEM 1033 and General Chemistry Laboratory I

CHEM 1951 Honors General Chemical Science I
& CHEM 1953 and Honors Chemical Science Laboratory I

Select one Chemistry Lab Science B:

CHEM 1022 Introduction to Chemistry II
& CHEM 1024 and Introduction to Chemistry Laboratory II

CHEM 1032 General Chemistry II
& CHEM 1034 and General Chemistry Laboratory II

CHEM 1952 Honors General Chemical Science II
& CHEM 1954 and Honors Chemical Science Laboratory II

Earth & Environmental Science Sequence ²

Select this Lab Science A:

EES 2001 Physical Geology

Select one Lab Science B:

EES 2011 Mineralogy I (with CHEM 1031 prerequisite)

EES 2021 Sedimentary Environments (no CHEM 1031 prerequisite)

EES 2061 Introduction to Geochemistry (with CHEM 1031 prerequisite)

Physics Sequence ³

Select one Physics Lab Science A:

PHYS 1021 Introduction to General Physics I

PHYS 1061 Elementary Classical Physics I

PHYS 1961 Honors Elementary Classical Physics I

PHYS 2021 General Physics I

PHYS 2921 Honors General Physics I

Select one Physics Lab Science B:

PHYS 1022 Introduction to General Physics II

PHYS 1062 Elementary Classical Physics II

PHYS 1962 Honors Elementary Classical Physics II

PHYS 2022 General Physics II

PHYS 2922 Honors General Physics II

1

Students can choose to mix-and-match the Chemistry Sequence A and B courses. However, they must take at least 1 course from Chemistry Sequence A and 1 from Chemistry Sequence B. Note: Chemistry courses consist of a three-credit lecture plus a one-credit lab.

2

For the EES Sequence, two of the three Lab Science B options require students to take CHEM 1031 as a prerequisite, but EES 2021 does not.

3

Students can choose to mix-and-match the Physics Sequence A and B courses. However, they must take at least 1 course from Physics Sequence A and 1 from Physics Sequence B.

Computer Science Minor

Overview

Having a **Minor in Computer Science (CS)** can enhance your employment opportunities. Offered by the Department of Computer and Information Sciences, the CS minor's coursework consists of three programming courses, one introductory theory course and one CS elective course. Prior to starting the CS minor's courses, students must take (or place out of) precalculus and an introductory programming course. Many of our CS minors come from related fields, such as Engineering, Information Science and Technology, and Math. Students on both Main Campus and Temple University Japan Campus may declare this minor.

Campus Location: Main and Japan

Undergraduate Contact Information

Main Campus

Jamie Payton, Chair
 Science, Education and Research Center, Room 304
 215-204-8450

Gene Kwatny, Vice Chair
 Science, Education and Research Center, Room 304
 215-204-8450

Sally Kyvernitis, Faculty Advisor
 Science, Education and Research Center, Room 330

Temple Japan Campus

Hani Karam, PhD, Computer Science Coordinator
 hkaram@tuj.temple.edu

Minor Requirements

Students desiring a minor in Computer Science are required to satisfy the following:¹

Code	Title	Credit Hours
Select one of the following: ²		4
CIS 1051 or CIS 1951	Introduction to Problem Solving and Programming in Python Honors Introduction to Problem Solving and Programming in Python	
CIS 1057	Computer Programming in C	
CIS 1068 or CIS 1968	Program Design and Abstraction Honors Program Design and Abstraction	4
CIS 1166 or CIS 1966	Mathematical Concepts in Computing I Honors Mathematical Concepts in Computing I	4
CIS 2107	Computer Systems and Low-Level Programming	4
CIS 2168	Data Structures	4
Select one of the following: ³		3-4
CIS 2033	Computational Probability and Statistics	
CIS 2082	Independent Research I	
CIS 2166	Mathematical Concepts in Computing II	
CIS 3203	Introduction to Artificial Intelligence	
CIS 3207	Introduction to Systems Programming and Operating Systems	
CIS 3211	Automata, Computability, and Languages	
CIS 3217	Computer Architecture	
CIS 3219	Computer Graphics and Image Processing	
CIS 3308	Web Application Programming	
CIS 3319	Wireless Networks and Security	
CIS 3441	Software Security	
CIS 3513	Introduction to iOS Application Development	
CIS 3515	Introduction to Mobile Application Development	
CIS 3603	User Experience Design	
CIS 3605	Introduction to Digital Forensics	
CIS 3715	Principles of Data Science	
CIS 4319	Computer Networks and Communications	
CIS 4331	Principles of Database Systems	
CIS 4350	Seminar on Topics in Computer Science	
CIS 4360	Seminar on Topics in Computer Science	
Total Credit Hours		23-24

1

All of the listed CIS courses have Math course prerequisites of MATH 1022 Precalculus or higher.

2

Students may earn placement credit for this introductory programming course requirement. Please see the Computer Science faculty advisor for more information.

3

Some of the listed electives have prerequisites in addition to the core requirements.

Although the Computer Science minor can be completed in three semesters, it is best to allocate at least four semesters.

Residency Requirements: At least 3 courses required for the minor must be completed at Temple.

Computer Security and Digital Forensics Certificate

Overview

The **Certificate in Computer Security and Digital Forensics**, offered by the Department of Computer and Information Sciences (CIS), is appropriate for CIS majors¹ or experienced industry professionals² who are interested in focusing in the security area. Students can add this to their existing Computer Science, Information Science and Technology, or Mathematics/Computer Science major. At least two of these courses CANNOT count

towards the electives for the major. In other words, you need to have two distinct courses for the certificate that are not counting towards any major elective courses; one of the electives can count for both.

1

Matriculated students are primarily CIS majors due to prerequisites.

2

Non-matriculated students must have 2+ years of experience in the IT sector working in systems and network administration and/or security domains. Requires instructor permission.

Campus Location: Main

Program Code: ST-CSDf-CERT

Certificate Requirements

Prerequisites

Students desiring a Certificate in Computer Security & Digital Forensics must have already completed the following or have equivalent industry experience:

Code	Title	Credit Hours
CIS 1068 or CIS 1968	Program Design and Abstraction Honors Program Design and Abstraction	4
CIS 1166 or CIS 1966	Mathematical Concepts in Computing I Honors Mathematical Concepts in Computing I	4
CIS 2229 or CIS 2107	Architecture, Operating Systems and Networking Computer Systems and Low-Level Programming	4
CIS 2168	Data Structures	4
Total Credit Hours		16

Required Courses

Students desiring a Certificate in Computer Security & Digital Forensics must complete the following courses:

Code	Title	Credit Hours
CIS 3605	Introduction to Digital Forensics	3
Select two of the following:		6-8
CJ 1001 or CJ 3007	Introduction to Criminal Justice Cybercrime	
CIS 3319	Wireless Networks and Security	
CIS 3441	Software Security	

Residency Requirements: At least 2 courses required for the certificate must be completed at Temple.

Data Science BS with Computation and Modeling Concentration

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

Data Science is an interdisciplinary field of study about methods and systems to extract knowledge or insights from large quantities of data coming in various forms. The **Bachelor of Science in Data Science** is designed for students interested in developing expertise in data science.

Data Science students **must select one of the following concentrations:**

- Computation and Modeling
- Computational Analytics
- Genomics and Bioinformatics

The **Concentration in Computation and Modeling** provides the tools necessary to create accurate, robust and detailed models of real systems in a scientific or professional field. A strong core of mathematics, physics, computational methods and techniques, and data analysis will enable students to model any complex physical system. Elective courses will allow students to specialize in a specific area of interest.

Campus Location: Main

Program Code: ST-DTSC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- have a minimum 3.50 major GPA and
- have a minimum 3.50 cumulative GPA.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Data Science.

Data Science BS with Computational Analytics Concentration

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

Data Science is an interdisciplinary field of study about methods and systems to extract knowledge or insights from large quantities of data coming in various forms. The **Bachelor of Science in Data Science** is designed for students interested in developing expertise in data science.

Data Science students **must select one of the following concentrations**:

- Computation and Modeling
- Computational Analytics
- Genomics and Bioinformatics

The **Concentration in Computational Analytics** provides a strong background in mathematics, algorithmic and computational thinking, computer systems, and data analysis, and will enable students to analyze large quantities of data to discover new knowledge and facilitate decision making.

Campus Location: Main

Program Code: ST-DTSC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- have a minimum 3.50 major GPA and
- have a minimum 3.50 cumulative GPA.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Data Science.

- BS in Data Science / MS in Computational Data Science

Learn more about the Bachelor of Science in Data Science.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CIS 3296 or ENG 2696	Software Design Technical Writing	3-4
CIS 4496	Projects in Data Science	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (81-86 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 6 CIS courses must be completed at Temple.

Code	Title	Credit Hours
Introductory Science Requirements		
Must select either the Chemistry sequence or the Physics sequence		8
CHEM 1031 & CHEM 1032 & CHEM 1033 & CHEM 1034	General Chemistry I and General Chemistry II and General Chemistry Laboratory I and General Chemistry Laboratory II

Data Science BS with Genomics and Bioinformatics Concentration

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

Data Science is an interdisciplinary field of study about methods and systems to extract knowledge or insights from large quantities of data coming in various forms. The **Bachelor of Science in Data Science** is designed for students interested in developing expertise in data science.

Data Science students **must select one of the following concentrations**:

- Computation and Modeling
- Computational Analytics
- Genomics and Bioinformatics

The **Concentration in Genomics and Bioinformatics** provides a strong background in mathematics, computational thinking and biological data analysis, and will enable students to analyze large quantities of data to discover new knowledge and facilitate decision making. This specialization is intended for students interested in biology, ecology, evolution, human health and disease, and precision medicine. Over the past decade, the emergence of next-generation sequencing technologies has facilitated the rapid growth of genomic data; however, undergraduate training in big data management, big data processing and big data analysis has not kept up with this rapid growth in large-scale biological data generation.

Data Science: Computational Analytics Certificate

Overview

Offered by the Department of Computer and Information Sciences, the **Certificate in Data Science: Computational Analytics** is designed to allow students with strong mathematical and programming backgrounds to develop expertise in big data analytics and machine learning. This certificate is available to all undergraduate students and professional non-degree-seeking students.

Campus Location: Main

Program Code: ST-DSCA-CERT

Residency Requirements: At least 3 courses required for the minor must be completed at Temple. At least 3 CIS courses must be completed at Temple.

Digital Media Technologies Minor (CST)

Overview

The **Minor in Digital Media Technologies** is an interdisciplinary minor offered through the Department of Media Studies and Production (MSP) within the Lew Klein College of Media and Communication and the Department of Computer and Information Sciences (CIS) within the College of Science and Technology. This minor is designed to expand students' knowledge of the information age and enable them to share communications over the internet using fast evolving, emerging technologies.

The minor is available to undergraduate students in Media Studies and Production, Computer and Information Science, as well as other departments and colleges. Upon completion of the minor, students should be able to demonstrate the following competencies:

- Use technology to integrate internet content with computers and mobile devices.
- Design and implement content for various digital media, utilizing database technologies.
- Critically analyze decisions made regarding the use of technology, specifically in the social and ethical domains.
- Understand the impact of current and emerging technologies on communications, both locally and globally.
- Create effective written communications make professional presentations.
- Analyze and solve problems efficiently.

Campus Location: Main

Note: Transfer credits are not accepted for credit for the minor.

Contact Information

Sally Kyvernitis, CIS Faculty Advisor
 Science Education and Research Center, Room 330
 215-204-2030
 sallyk@temple.edu

Hector Postigo, MSP Faculty Advisor
 Annenberg Hall, Room 115
 215-204-7398
 hector.postigo@temple.edu

Minor Requirements

- Students with a GPA of 2.00 or more may declare this minor by contacting either CST advising (215-204-2890) or Klein advising (215-204-5273). See additional Grade Requirements below.
- Three (3) of the Digital Media Technologies minor courses must be distinct from the student's major. Students should see their CST or Klein advisor for course substitutions.
- Students without a CIS background should begin their CIS courses in their Junior year or earlier.

Code	Title	Credit Hours
Two Required MSP Courses:		
Select one of the following:		3-4
MSP 1701	Introduction to Media Production	
MSP 2701	Intermediate Video Production ¹	
MSP 2751	Audio for Media ¹	
MSP 2741	Introduction to Internet Studies and Web Authoring ¹	3
Two Required CIS Courses:		
Select two courses from the following:		8
CIS 1052	Introduction to Web Technology and Programming	
CIS 1056	Advanced Web Technology and Programming	
CIS 2305	Mobile Computing Technologies ¹	
CIS 3308	Web Application Programming ¹	
CIS 3342	Server-Side Web Application Development ¹	
CIS 3344	Client-Side Scripting for the Web ¹	
CIS 3515	Introduction to Mobile Application Development ¹	

Two Electives:

One CIS elective and one MSP elective are required. However, MSP students may choose two CIS electives instead and CIS students may choose two MSP electives instead.

Select two courses from the following:

7-9

MSP Elective Options

MSP 4741	Emergent Media Production
MSP 4221	Information Technology Policy ¹
MSP 4252	Law and Ethics of Digital Media
MSP 4541	Mobile Media
MSP 4614	Creating a Media Business

CIS Elective Options

CIS 2305	Mobile Computing Technologies ^{1,2}
any other CIS 2000+ level course ¹	

Total Credit Hours**21-24**

1

This course requires additional prerequisites outside of the Digital Media Technology Minor coursework.

2

May satisfy a CIS Elective only if CIS 2305 was not taken as a Required CIS Course.

Elective Requirements

- All prerequisites must be completed to enroll in minor courses or permission from both the faculty advisor and instructor must be obtained prior to registration.

Grade Requirements

- Minor credit is not given for grades below C-.
- Students must maintain at least a 2.00 grade point average in the program to successfully complete this minor.

Residency Requirements

At least 4 courses required for the minor must be completed at Temple. At least 2 CIS courses and at least 2 MSP courses must be completed at Temple.

Earth and Space Science with Teaching BS**Overview**

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

The **Bachelor of Science in Earth and Space Science with Teaching** is part of Temple's innovative "TUteach" secondary education teacher-training program. The BS in Earth and Space Science with Teaching provides broad training in earth and space science and prepares students for a career in secondary school teaching or an entry level position in environment science. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Earth and Space Science with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are

encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-ESTC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA;
- achieve a minimum 3.5 GPA in the content area courses required for the major; and
- achieve a minimum 3.9 GPA in the following courses:
 - SCES 2189 or SCTC 3485
 - SCES 4189 or SCTC 4485
 - EDUC 4802
 - EDUC 4388.

Learn more about the Bachelor of Science in Earth and Space Science with Teaching.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)
 - Students must complete all University requirements including those listed below.
 - All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere (S)	
EES 2097	Process Geomorphology (F)	
EES 4696	Vertebrate Paleontology and Taphonomy (Fall of odd years)	
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TTeach majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (88-89 s.h.)¹

At least 9 courses required for the major must be completed at Temple. At least 5 EES courses and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

Total Credit Hours**88-89**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology, to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2

All students are required to complete a minimum of one credit.

(S) - Spring only course.

Ecology, Evolution and Biodiversity BS

Overview

The Earth harbors an incredible diversity of life, linked through webs of intricate ecological relationships and connected by deep evolutionary histories spanning millions of years. Human societies depend upon this biodiversity, yet much of it remains poorly understood by science and faces unprecedented threats from global change. The **Bachelor of Science in Ecology, Evolution and Biodiversity (EEB)**, offered by the Department of Biology, trains the next generation of scientists to pioneer new insights into the natural world, clarify the processes that maintain and change it, and develop innovative approaches to its conservation. The EEB program prepares students to forge new understandings of the ecological interactions among species and their evolutionary adaptations to their environments. Graduating students can launch their career as a research scientist, a science policy advisor, an environmental analyst or a science communicator. In education, graduates can aim for university professor, K-12 science teacher or environmental program director. Out in the field, graduates can enter jobs as a restoration ecologist, park naturalist and conservation or natural resource manager.

Campus Location: Main

Program Code: ST-EEB-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.2 cumulative grade point average (GPA);
- achieve a minimum 3.2 major GPA;
- successfully complete BIOL 4391 Accelerated Research in Biology or BIOL 4291 Extradepartmental Research for a total of 6 credits over two semesters;
- write a final research paper; and
- present their research at a departmental research poster session.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 4396	Advanced Study in Biology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.

- SCTC 1001 CST First Year Seminar for every entering first-year CST student.
- SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (74-82 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 6 Biology courses must be completed at Temple.

Total Credit Hours **74-82**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

2

Additional course prerequisites may be required.

3

Students may fulfill one upper-level elective by completing a total of 6 credits of research. A maximum of 3 credits may come from the junior level research course BIOL 3082 and the remaining 3 credits must come from a senior level (**4000+**) research course. Students may also complete all 6 credits using two semesters of the senior research course if they prefer. **Research must be appropriate to fulfill one of the upper-level elective categories (Ecology, Evolution, or Biodiversity)** and may be used for a maximum of 4 credits toward the elective. Consult with the EEB program advisor to determine 1) which labs are participating, 2) if your research is appropriate for one of the category choices and 3) which research course you should register for. Not all research courses are appropriate for EEB credit. Once 6 hours of research are completed, students must seek approval from a CST advisor to obtain the waiver for credit towards one upper-level elective in the appropriate category.

JRN 3253	Health and Environmental Writing	3

1

Additional course prerequisites may be required.

2

Courses in CST and CLA will count towards the College Requirements for overall and upper-level credits in CST, CLA, or ENG.

With the exception noted in footnote 3 above, the research and independent study courses shown below do not count as EEB electives. The research and independent study courses shown below do not count as Biology electives, but they may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Science in Ecology, Evolution and Biodiversity

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	4
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
SCTC 1001	CST First Year Seminar	1
GenEd Breadth Course		3
Credit Hours		16
Spring		
BIOL 2227	Principles of Ecology	3
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3

ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Elective		1

Credit Hours**15****Year 2****Fall**

Select one of the following: 4

BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes or Honors Introduction to Biomolecules, Cells and Genomes
---------------------------	--

BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology or Honors Introduction to Cellular and Molecular Biology
---------------------------	--

Select one of the following: 4

CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I
--------------------------	---

CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)
--------------------------	---

Select one of the following: 4

PHYS 1021	Introduction to General Physics I
-----------	-----------------------------------

PHYS 1061 or PHYS 1961	Elementary Classical Physics I or Honors Elementary Classical Physics I
---------------------------	--

PHYS 2021 or PHYS 2921	General Physics I or Honors General Physics I
---------------------------	--

IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
-----------------------	--	---

Credit Hours**15****Spring**

BIOL 2207	Genetics (S)	3
-----------	--------------	---

BIOL 2297	Research Techniques in Genetics (S)	3
-----------	-------------------------------------	---

Select one of the following Quantitative Methods courses: 3-4

BIOL 3113	Genome Analytics
-----------	------------------

BIOL 3312	Biostatistics
-----------	---------------

BIOL 3323	Global Change Science: Analytics with R
-----------	---

EES 3011	Remote Sensing and GIS
----------	------------------------

MATH 1042 or MATH 1942	Calculus II or Honors Calculus II
---------------------------	--------------------------------------

MATH 1044	Introduction to Probability and Statistics for the Life Sciences
-----------	--

Select one of the following: 4

PHYS 1022	Introduction to General Physics II
-----------	------------------------------------

PHYS 1062 or PHYS 1962	Elementary Classical Physics II or Honors Elementary Classical Physics II
---------------------------	--

PHYS 2022 or PHYS 2922	General Physics II or Honors General Physics II
---------------------------	--

IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
-----------------------	--	---

Elective		1-0
----------	--	-----

Credit Hours**17****Year 3****Fall**

BIOL 3101	Evolution	3
-----------	-----------	---

Select one of the following Quantitative Methods courses: 3-4

BIOL 3113	Genome Analytics
-----------	------------------

BIOL 3312	Biostatistics
-----------	---------------

BIOL 3323	Global Change Science: Analytics with R
-----------	---

EES 3011	Remote Sensing and GIS	
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	
MATH 1044	Introduction to Probability and Statistics for the Life Sciences

(F) - Fall only course

(S) - Spring only course

1

See the Ecology, Evolution, and Biodiversity (EEB) Electives list under Requirements for course options. At least one course from each Elective category (Ecology, Evolution, and Biodiversity) must be selected.

2

Either BIOL 4396 or EEB elective 5 may be completed in the fall term. Whichever is not chosen in the fall, must then be completed in the spring term.

Environmental Professional Training Certificate

Overview

Offered by the Department of Earth and Environmental Science, the **Certificate in Environmental Professional Training** is designed to provide Geology and Environmental Science majors or continuing education students holding similar degrees with additional skills that will help them prepare for work in environmental consulting.

Campus Location: Main

Program Code: ST-EPT-CERT

Certificate Requirements

Prerequisites

Students desiring a Certificate in Environmental Professional Training must have already completed the following or have equivalent industry experience:

Code	Title	Credit Hours
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
EES 2001	Physical Geology	4
EES 2021	Sedimentary Environments	4
Select one of the following: ¹		4
EES 3021	Groundwater Hydrology (S)	
EES 3025	Physical Hydrology (F)	
MATH 1022	Precalculus	4

Required Courses

Students desiring a Certificate in Environmental Professional Training must complete the following courses:

Code	Title	Credit Hours
EES 2031	Introduction to Field Methods in the Earth and Environmental Sciences	1
ENVS 3027	HAZWOPER Training and the Regulatory Environment	3
Select two of the following: ¹		6-8
EES 2061	Introduction to Geochemistry	
EES 2067	Introduction to Environmental Toxicology	
EES 3011	Remote Sensing and GIS	
EES 3021	Groundwater Hydrology	

EES 3025	Physical Hydrology
EES 3065	Nanoscience & the Environment
EES 4502	Ice and Global Climate
EES 5454	Introduction to Geophysics

Total Credit Hours**10-12**

1

Majors are required to take either EES 3021 Groundwater Hydrology or EES 3025 Physical Hydrology. For the certificate, only one such course will be counted for these majors (i.e., if the student takes both courses, only one will be counted toward the certificate). For non-majors, both courses can count.

Residency Requirements: At least 2 courses required for the certificate must be completed at Temple.

Environmental Science BS with Applied Ecology Concentration

Overview

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

The department offers the **Bachelor of Science in Environmental Science**. Students **must select one of the following concentrations**:

- Applied Ecology
- Climate
- Environmental Geochemistry
- Hydrology

Students in the **Concentration in Applied Ecology** will be equipped with the scholarly background and intellectual skills to understand a wide range of pressing environmental issues, and they will come to appreciate the physical, economic, political, demographic and ethical factors that define those issues. Our graduates find employment with government environmental agencies, citizens' organizations, consulting firms and corporate environmental affairs departments.

Environmental problems are among the most urgent issues facing our civilization. The Environmental Science with concentration in Applied Ecology offers interdisciplinary coursework in biology, geology, chemistry and mathematics and combines this with classes from geography and economics to explore the relationships between living things and their environment.

Campus Location: Main

Program Code: ST-ENVS-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA
 - if the difficulty of courses chosen as electives is high, then a 3.3 GPA will suffice. This determination will be made by the appropriate faculty
- no grade below C in a major requirement

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere	4
EES 2097	Process Geomorphology	4
ENVS 4198	Environmental Science Senior Seminar	3
ECON 3596	Energy, Ecology, and Economy	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (74-78 s.h.)

At least 10 courses required for the major must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology Honors Introduction to Cellular and Molecular Biology	
BIOL 2227	Principles of Ecology	3
Select one of the following: ¹		3
BIOL 3115	Disturbance Ecology	
BIOL 3275	Ecology of Invasive Species	
BIOL 3389	Field Research in Community Ecology	
Chemistry

(F) - Fall only course

(S) - Spring only course

1

This program requires one of the following: BIOL 3115, BIOL 3275, or BIOL 3389. The remaining courses not selected to fulfill the major requirement can be taken to satisfy an Environmental Science Elective.

2

HRPR 1001 is a prerequisite for this course.

3

One hydrology course is a required course. The course not selected may be taken as an Environmental Science Elective (Water Elective).

Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

Bachelor of Science in Environmental Science with Concentration in Applied Ecology

(F) - Fall only course

(S) - Spring only course

1

Select from the Environmental Science Electives lists under Requirements. At least one of the Electives must be a writing-intensive (WI) course.

2

For the Science Electives, at least two from Biology must be selected.

3

Either hydrology course EES 3021 or EES 3025 can be taken. One will be offered in the Fall and one in the Spring. The course not selected may be taken as an Environmental Science Elective (Water Elective).

Environmental Science BS with Climate Concentration

Overview

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

The department offers the **Bachelor of Science in Environmental Science**. Students **must select one of the following concentrations**:

- Applied Ecology
- Climate
- Environmental Geochemistry
- Hydrology

Students in the **Concentration in Climate** will be equipped with the scholarly background and intellectual skills to understand a wide range of pressing environmental issues, and they will come to appreciate the physical, economic, political, demographic and ethical factors that define those issues. Our graduates find employment with government environmental agencies, citizens' organizations, consulting firms and corporate environmental affairs departments.

Global climate change is a major challenge of this century. The Environmental Science with concentration in Climate establishes the science and tools used to assess our changing climate and opportunities to mitigate its impacts on human societies and environmental systems. Students completing this concentration will understand the essential attributes of resilient environments, infrastructure, and sustainable resource management.

Campus Location: Main

Program Code: ST-ENVS-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA
 - if the difficulty of courses chosen as electives is high, then a 3.3 GPA will suffice. This determination will be made by the appropriate faculty
- no grade below C in a major requirement

(F) - Fall only course

(S) - Spring only course

1

Select from the Environmental Science Electives lists under Requirements.

2

Either EES 3021 or EES 3025 can be taken. One will be offered in the Fall and one in the Spring.

Environmental Science BS with Environmental Geochemistry Concentration

Overview

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

The department offers the **Bachelor of Science in Environmental Science**. Students **must select one of the following concentrations**:

- Applied Ecology
- Climate
- Environmental Geochemistry
- Hydrology

Students in the **Concentration in Environmental Geochemistry** will be equipped with the scholarly background and intellectual skills to understand a wide range of pressing environmental issues, and they will come to appreciate the physical, economic, political, demographic and ethical factors that define those issues. Our graduates find employment with government environmental agencies, citizens' organizations, consulting firms and corporate environmental affairs departments.

Anthropogenic activities have disrupted natural geochemical cycles and introduced contaminants that may affect the environment and human health. Students completing the Environmental Geochemistry concentration will understand fundamental principles that control the composition and reactions of water and materials in the environment; learn and practice methods for collection and interpretation of geochemical datasets; and integrate such datasets into broader pictures of environmental change.

Campus Location: Main

Program Code: ST-ENVS-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA
 - if the difficulty of courses chosen as electives is high, then a 3.3 GPA will suffice. This determination will be made by the appropriate faculty
- no grade below C in a major requirement

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere	4
EES 2097	Process Geomorphology	4
ENVS 4198	Environmental Science Senior Seminar	3
ECON 3596	Energy, Ecology, and Economy	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (74-78 s.h.)

At least 10 courses required for the major must be completed at Temple.

Environmental Science BS with Hydrology Concentration

Overview

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

The department offers the **Bachelor of Science in Environmental Science**. Students **must select one of the following concentrations**:

- Applied Ecology
- Climate
- Environmental Geochemistry
- Hydrology

Students in the **Concentration in Hydrology** will be equipped with the scholarly background and intellectual skills to understand a wide range of pressing environmental issues, and they will come to appreciate the physical, economic, political, demographic and ethical factors that define those issues. Our graduates find employment with government environmental agencies, citizens' organizations, consulting firms and corporate environmental affairs departments.

Water is fundamental to life, but humans are altering the water cycles in ways never before measured. The Environmental Science with concentration in Hydrology offers coursework in geosciences, biology, chemistry, plus hydrology to train students in environmental monitoring approaches for tackling environmental problems.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere	4
EES 2097	Process Geomorphology	4
ENVS 4198	Environmental Science Senior Seminar	3
ECON 3596	Energy, Ecology, and Economy	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (75-79 s.h.)

At least 10 courses required for the major must be completed at Temple.

Code	Title	Credit Hours

(F) - Fall only course

(S) - Spring only course

1

Select from the Environmental Science Electives lists under Requirements. One Elective must be a writing-intensive (WI) course if EES 2021 is taken instead of EES 2097 as one of the Earth & Environmental Science requirements.

2

For the Science Electives, at least one each from Climate and Geochemistry must be selected.

3

The course not selected may be taken as an Environmental Science Elective (Land Elective).

Fundamentals of Physics Certificate

Overview

Offered by the Department of Physics, the **Certificate in Fundamentals of Physics** provides students the opportunity to build quantitative and modeling skills by learning to analyze physical systems, including data and error analysis as well as dimensional analysis. Students will study physical models using mathematical methods, including coordinate systems, single and multivariate calculus, and vector algebra, and will begin to understand the fundamental principles of physics.

This certificate is open to all students.

Campus Location: Main

Program Code: ST-FPHY-CERT

Undergraduate Contact Information

Peter Riseborough, Chair
Science, Education and Research Center, Room 444
215-204-5655

Zbigniew Dziembowski, Faculty Advisor
Science, Education and Research Center, Room 412
215-204-7639
zbig.dziembowski@temple.edu

Certificate Requirements

All courses listed below have prerequisites. For more information, please check the course descriptions or ask an advisor.

Students desiring a certificate in the Fundamentals of Physics are required to satisfy the following:

Code	Title	Credit Hours
Select one of the following: ¹		4
PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I	
Select one of the following: ¹		4
PHYS 1062	Elementary Classical Physics II	
PHYS 1962	Honors Elementary Classical Physics II	
PHYS 2022	General Physics II	
PHYS 2922	Honors General Physics II	
PHYS 2796	Introduction to Modern Physics ²	4
Total Credit Hours		12

1

An upper level Physics course may be substituted for this requirement with approval of the faculty advisor.

2

PHYS 2796 has a concurrent prerequisite of MATH 2043 or MATH 2943.

Fundamentals of Programming Certificate

Overview

Offered by the Department of Computer and Information Sciences, the **Certificate in Fundamentals of Programming** is appropriate for anyone interested in adding technology to their existing studies. Computer Science, Information Science and Technology, Math and Computer Science, or Math and Computer Science with Teaching majors cannot get this certificate. The certificate provides knowledge and skills in two programming languages as well as database knowledge.

Campus Location: Main

Program Code: ST-FPRG-CERT

Certificate Requirements

This certificate program is not open to Computer Science, Information Science and Technology, Math and Computer Science, or Math and Computer Science with Teaching majors. Students desiring a certificate in Fundamentals of Programming are required to satisfy the following:

Code	Title	Credit Hours
CIS 1051 or CIS 1057	Introduction to Problem Solving and Programming in Python Computer Programming in C	4
CIS 1068 or CIS 1968	Program Design and Abstraction Honors Program Design and Abstraction	4
CIS 2109	Database Management Systems	4
Total Credit Hours		12

- If a student has taken CIS 1068 and CIS 2168, CIS 2168 should be substituted for CIS 1051/CIS 1057 to prevent backtracking.
- Additional courses needed to complete a CS minor are CIS 1166, CIS 2107, CIS 2168, and one CS elective.
- Additional courses needed to complete an IS&T minor are any two of CIS 1166, CIS 2168, CIS 2229 or a CIS 3xxx class approved by the IS&T Advisor.

Residency Requirements: At least 2 courses required for the certificate must be completed at Temple. At least 2 CIS courses must be completed at Temple.

General Science and Technology with Teaching BS

Overview

NOTE: Pending the approval of the Department of Education, this program may be available to students sometime during the 2023-2024 academic year. Students should see an advisor to verify that approval has been received prior to attempting to select this program.

The **Bachelor of Science in General Science and Technology with Teaching** is part of Temple's innovative "TUteach" secondary education teacher-training program. The BS in General Science and Technology with Teaching provides broad training in general science and prepares students for a career in secondary school teaching or an entry level laboratory position. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in General Science and Technology with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-GSTT-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA;
- achieve a minimum 3.33 GPA in the content area courses required for the major;
- complete at least one internship or laboratory project based course;
- achieve a minimum 3.9 GPA in the following courses:
 - SCES 2189 or SCTC 3485
 - SCES 4189 or SCTC 4485
 - EDUC 4802
 - EDUC 4388.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3

Alternative disciplinary writing-intensive course substitutions for SCTC 2396 may be approved by both the TTeach Program Director and CST faculty advisors in Biology, Chemistry, Earth and Environmental Science, or Physics. Following is a list of these alternative writing-intensive courses:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S) ¹	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3
CHEM 4196	Techniques of Chemical Measurement II	5
CHEM 3398	Physical Chemistry Laboratory II	2
PHYS 2796	Introduction to Modern Physics (S)	4
PHYS 4796	Experimental Physics (S)	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TTeach majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (92-96 s.h.)²

At least 9 courses required for the major must be completed at Temple. At least 6 courses in CST and 3 courses in Education must be completed at Temple. In addition, 2 of the 4 concentration area courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

1		
	This course has a co-requisite of BIOL 2207.	
2		
	The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUTEACH Advisor in the College of Science and Technology, to affirm the requirements that pertain to their specific major. In addition, students should check the <i>Undergraduate Bulletin</i> web site for the most current information about these programs, or the TUTEACH web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.	
3		
	These courses are not required if MATH 1031 is completed.	
4		
	All students are required to take a minimum of one credit.	
5		
	This course may be selected from one of four Research Methods courses in Biology, Chemistry, EES or Physics numbered 3091.

or SCTC 4485	Integrating STEM Practice in Diverse Teaching Environments	
SPED 2231	Introduction to Special Education	3
Research Methods		
Select one of the following: ⁵		3
BIOL/CHEM/EES/PHYS 3091	Research Methods (S)	
Total Credit Hours		84-92

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

2

The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUTEACH Advisor in the College of Science and Technology, to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUTEACH web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

3

The four science electives chosen to satisfy the science concentration must be taken from the same department. The departments from which you can choose electives are: Biology, Chemistry, Earth & Environmental Science or Physics. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.

4

All students are required to take a minimum of one credit.

5

The course must be selected from the same department as the four science electives.

Suggested Academic Plan

Bachelor of Science in General Science with Teaching

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one of the following:		4
MATH 1031	Differential and Integral Calculus	
MATH 1041	Calculus I	
MATH 1941	Honors Calculus I	
SCTC 1001	CST First Year Seminar	1
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
SCTC 1389	Step 1 and 2: Inquiry-Based Lesson Design in Science and Mathematics Modified for English Learners	2
Elective		2
Credit Hours		16
Spring		
Select one of the following:		4

CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
Select one of the following: ¹		0-4
MATH 1044	Introduction to Probability and Statistics for the Life Sciences	
MATH 1042	Calculus II	
MATH 1942	Honors Calculus II	
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
GenEd Breadth Course		3
Elective		4-0
Credit Hours		15
Year 2		
Fall		
BIOL 1011	General Biology I (F)	4
SPED 2231	Introduction to Special Education	3
EDUC 2179	Knowing and Learning in Mathematics and Science	3
Select one of the following:		4
EES 1001	Introductory Geology	
EES 2001	Physical Geology	
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
Credit Hours		17
Spring		
BIOL 1012	General Biology II (S)	4
Science 2000+ Elective ²		3-4
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3

Genomic Medicine BS

Overview

Develop a deep understanding of the role of the genomes of humans and pathogens in the development, prevention, and treatment of disease with the **Bachelor of Science in Genomic Medicine**, offered by the Department of Biology. Scientific innovations and technologies allow us to collect genetic information at unprecedented size and scale. At the center of this advancement is the study of the genome. Information from thousands—and soon to be millions—of genomes is revealing the root causes of our genetic and infectious diseases. Due to the growing clinical emphasis on genomic medicine in medical colleges, students in the Genomic Medicine program will acquire a valuable basis for understanding and working with modern biological data. Graduates also gain a foundation in the life sciences that emphasizes the medical relevance of genomics, evolutionary biology, and informatics. This degree will prepare students for growing trends in research and medical careers focused on genomic medicine that use the power of changes in genes, proteins, and next generation technologies to make clinical diagnoses, treat patients, and understand diseases. Additionally, graduates are positioned for careers across multiple research areas, including disease, evolution, genomics, and informatics.

Students may select an **optional** concentration in **Pre-Medicine**.

Campus Location: Main

Program Code: ST-GCMD-BS

Distinction in Major

To graduate with distinction in this major, a student must achieve a minimum 3.33 GPA in all the Biology and Chemistry courses required for the major.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (80-85 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 6 Biology courses must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4

PHYS 1022	Introduction to General Physics II
-----------	------------------------------------

PHYS 1062	Elementary Classical Physics II
or PHYS 1962	Honors Elementary Classical Physics II
PHYS 2022	General Physics II
or PHYS 2922	Honors General Physics II

Total Credit Hours **80-85**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

2

Additional course prerequisites may be required.

3

Students may fulfill one upper-level elective by completing a total of 6 credits of research. A maximum of 3 credits may come from the junior level research course BIOL 3082 and the remaining 3 credits must come from a senior level (**4000+**) research course. Students may also complete all 6 credits using a two semesters of the senior research course if they prefer. Consult with your departmental advisor to determine which course(s) are appropriate. Once completed, students must seek approval from a CST advisor to obtain the waiver for credit towards one upper-level elective.

With the exception noted in footnote 3 above, the research and independent study courses shown below do not count as Genomic Medicine electives, but they may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

Genomic Medicine BS with Pre-Medicine Concentration

Overview

Develop a deep understanding of the role of the genomes of humans and pathogens in the development, prevention, and treatment of disease with the **Bachelor of Science in Genomic Medicine**, offered by the Department of Biology. Scientific innovations and technologies allow us to collect genetic information at unprecedented size and scale. At the center of this advancement is the study of the genome. Information from thousands—and soon to be millions—of genomes is revealing the root causes of our genetic and infectious diseases. Due to the growing clinical emphasis on genomic medicine in medical colleges, students in the Genomic Medicine program will acquire a valuable basis for understanding and working with modern biological data. Graduates also gain a foundation in the life sciences that emphasizes the medical relevance of genomics, evolutionary biology, and informatics. This degree will prepare students for growing trends in research and medical careers focused on genomic medicine that use the power of changes in genes, proteins, and next generation technologies to make clinical diagnoses, treat patients, and understand diseases.

Blending psychology and sociology courses with an increased focus on coursework required by most medical schools—biochemistry, cell structure, and function, and bioinformatics or biostatistics—the **optional Pre-Medicine Concentration** prepares graduates for entry into medical school and STEM research careers in medicine.

Total Credit Hours		87-89

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

This course has a co-requisite of BIOL 2207.

2

Either BIOL 3212 or BIOL 3312 must be taken to satisfy degree requirements. The course not selected may be chosen as a Genomic Medicine Elective.

3

Additional course prerequisites may be required.

4

Students may fulfill one upper-level elective by completing a total of 6 credits of research. A maximum of 3 credits may come from the junior level research course BIOL 3082 and the remaining 3 credits must come from a senior level (**4000+**) research course. Students may also complete all 6 credits using two semesters of the senior research course if they prefer. Consult with your departmental advisor to determine which course(s) are appropriate. Once completed, students must seek approval from a CST advisor to obtain the waiver for credit towards one upper-level elective.

With the exception noted in footnote 4 above, the research and independent study courses shown below do not count as Genomic Medicine electives, but they may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

Note: Grades of C- or higher are required unless otherwise specified in all course for the major, including prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

Suggested Academic Plan

Bachelor of Science in Genomic Medicine with Pre-Medicine Concentration

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	4
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
SCTC 1001	CST First Year Seminar	1
Select one of the following:		4

Genomic Medicine Certificate

Overview

Offered by the Department of Biology, the **Certificate in Genomic Medicine** program is designed with maximum flexibility to accommodate students with different backgrounds and interests, including medicine, science, technology, and public health. Two core classes and 6 to 8 credits of related elective courses are required. This certificate is available to all undergraduate students and professional non-degree-seeking students.

Campus Location: Main

Program Code: ST-GCMD-CERT

Certificate Requirements

Prerequisites

Students desiring a Certificate in Genomic Medicine must have already completed the following or have equivalent industry experience:

Code	Title	Credit Hours
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology Honors Introduction to Cellular and Molecular Biology	
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
Select one of the following:		4
CHEM 2201 & CHEM 2203	Organic Chemistry I and Organic Chemistry Laboratory I	
CHEM 2211 & CHEM 2213	Organic Chemistry for Majors I and Organic Majors Laboratory I (F)	
CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I (F)	
MATH 1022	Precalculus	4
Total Credit Hours		24

Required Courses

Students desiring a Certificate in Genomic Medicine must complete the following courses:

Code	Title	Credit Hours
Biology		
BIOL 3111	Genomics in Medicine (F)	3
BIOL 3112	Fundamentals of Genomic Evolutionary Medicine (S)	3
Genomic Medicine Electives		
Select two from the following: ¹		6-8
ANTH 3743	Human Biology of Modern Populations	
ANTH 3746	Human Reproduction: Evolutionary Perspectives	

ANTH 3772	Evolutionary Medicine
ANTH 3796	Methods in the Study of Evolution
ANTH 4796	Biocultural Adaptations in Human Populations
ANTH 4798	Seminar in Human and Primate Evolution
BIOL 2207	Genetics (S) ²
BIOL 2297	Research Techniques in Genetics (S) ²
BIOL 2512	Genomic Foundations of Medicine (S)
BIOL 3101	Evolution (F)
BIOL 3113	Genome Analytics
BIOL 3128	Genomics and Infectious Disease Dynamics (F)
BIOL 3201	Human Genetics (F)
BIOL 3211	Human Evolution
BIOL 3212	Introduction to Bioinformatics and Computational Biology
BIOL 3225	Evolutionary Genetics (S)
BIOL 3241	Genomics and Evolutionary Biology of Parasites and Other Dependent Species (S)
BIOL 3352	Systems Neuroscience
BIOL 3368	Biology of Cancer (S)
BIOL 3379	Biotechnology
BIOL 3403	Genomic Biology
BIOL 3511	Pathophysiology of Genomic Medicine (F)
CHEM 3401	Applications of Biochemistry
CHEM 3405	Physical Chemistry of Biomolecules (S)
CHEM 4401	Biochemistry I
CIS 1051	Introduction to Problem Solving and Programming in Python
or CIS 1951	Honors Introduction to Problem Solving and Programming in Python
CIS 1057	Computer Programming in C
CIS 1068	Program Design and Abstraction
or CIS 1968	Honors Program Design and Abstraction
CIS 2033	Computational Probability and Statistics
CIS 3223	Data Structures and Algorithms
CIS 3308	Web Application Programming
CIS 3715	Principles of Data Science (S)
CIS 4330	Current Topics in Information Science & Technology
CIS 4331	Principles of Database Systems (F)
CIS 4517	Data-Intensive and Cloud Computing (S)
CIS 4523	Knowledge Discovery and Data Mining
CIS 4526	Foundations of Machine Learning (F)
ECE 3522	Stochastic Processes in Signals and Systems
ECE 3822	Engineering Computation II
ECE 4532	Data and Computer Communication
EES 4696	Vertebrate Paleontology and Taphonomy (F)
EPBI 3101	Introduction to Epidemiology
EPBI 3102	Introduction to Research Methods
HIM 3101	Health Record Documentation
HIM 3106	Pathophysiology
HIM 3111	Statistics and Research in Health Care
HIM 3113	Healthcare Database Design and Development
HIM 3203	Electronic Health Record Systems
HIM 3208	International Classification of Diseases
HIM 4101	Health Informatics: Infrastructure and Standards
HIM 4121	Healthcare Data Analytics
MATH 3031	Probability Theory I

MATH 3032	Mathematical Statistics (S)
MATH 3043	Numerical Analysis I (F)
MATH 3046	Differential Equations with Computer Lab (S)
MATH 4033	Probability Theory II (F)
MATH 4043	Applied Mathematics (F)
PSY 3003	Advanced Undergraduate Statistics
SOC 3201	Statistical Methods in Sociology
SOC 3525	Urban Health
SOC 3559	Health and Reproduction
SOC 4002	Data Analysis
STAT 3501	Statistics for Engineers
STAT 3502	Regression and Predictive Analytics
STAT 3503	Applied Statistics and Data Science
STAT 3504	Time Series and Forecasting Models
STAT 3506	Nonparametric and Categorical Data Analysis

Total Credit Hours **12-14**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

Many of these courses require additional prerequisites and/or possible co-requisites.

2

BIOL 2207 has a co-requisite of BIOL 2297.

Residency Requirements: At least 2 courses required for the certificate must be completed at Temple.

Geology BA

Overview

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

Students in the **Bachelor of Arts in Geology** acquire a solid foundation in the Earth and Environmental Sciences.

Delve into the physical, chemical and biological processes of Earth, from the remote past to the distant future. Learn how humans are impacted by and are impacting our planet. Explore climate change, energy resources and natural planetary forces.

The BA offers the opportunity to complete a second major or to prepare for post-graduate degrees in law, medicine or education. The BA program is not intended for prospective geologists, but for pre-med or pre-law students, or for those planning to teach earth science in secondary school.

Campus Location: Main

Program Code: ST-GEOL-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a 3.5 GPA in EES and Upper-Level Science Electives for the major, and
- no grade below C in the remaining courses required for the major.

Senior Research Project

Students whose cumulative GPA is at least 3.25 at the end of the first semester of their junior year are eligible to undertake a senior research project. In the second semester of their junior year, students must select a faculty research advisor and, with the advisor, prepare a written research proposal. After the research advisor and the undergraduate Earth and Environmental Science advisor approve the proposal, the student may register for up to four

(4) hours of EES 4082 Individual Study Program II for a grade. Additional credits may be offered in subsequent semesters, but only for Credit/No-Credit (CR/NC), to carry out the research project. Normally, the project will involve field or laboratory work in the summer between the junior and senior years and lead to presentation of the results at a departmental seminar.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Geology.

- BA in Geology / MEd in Middle Grades Education with a Concentration in Science
- BA in Geology / MEd in Middle Grades Education with a Concentration in Science and Language Arts

Learn more about the Bachelor of Arts in Geology.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere	4
EES 2097	Process Geomorphology	4
EES 4696	Vertebrate Paleontology and Taphonomy	3
EES 4796	Soils and Paleosols	4
EES 4896	Planetary Geology	4

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).

- A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (51-56 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 4 EES courses must be completed at Temple.

Code	Title	Credit Hours
Chemistry		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)

Geology BS

Overview

The Department of Earth and Environmental Science provides students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques.

Students in the **Bachelor of Science in Geology** acquire a solid foundation in the Earth and Environmental Sciences.

Delve into the physical, chemical and biological processes of Earth, from the remote past to the distant future. Learn how humans are impacted by and are impacting our planet. Explore climate change, energy resources and natural planetary forces.

Career opportunities for geologists span industry and government including environmental planning, mitigation of natural hazards, resource assessment, monitoring and management of water resources. The BS prepares students for graduate study and careers in research, teaching, industry or government and thoroughly prepares students for professional licensure examinations.

The BS program includes 5-6 credits of Field Geology coursework, which may be fulfilled through a combination of several specialized Temple courses, or through an external intensive 4–6 week field course taken in the summer following the junior or senior year.

Campus Location: Main

Program Code: ST-GEOL-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a 3.5 GPA in EES and Upper-Level Science Electives for the major, and
- no grade below C in the remaining courses required for the major.

Senior Research Project

Students whose cumulative GPA is at least 3.25 at the end of the first semester of their junior year are eligible to undertake a senior research project. In the second semester of their junior year, students must select a faculty research advisor and, with the advisor, prepare a written research proposal. After the research advisor and the undergraduate Earth and Environmental Science advisor approve the proposal, the student may register for up to four (4) hours of EES 4082 Individual Study Program II for a grade. Additional credits may be offered in subsequent semesters, but only for Credit/No-Credit (CR/NC), to carry out the research project. Normally, the project will involve field or laboratory work in the summer between the junior and senior years and lead to presentation of the results at a departmental seminar.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Geology.

- BS in Geology / MEd in Middle Grades Education with a Concentration in Science
- BS in Geology / MEd in Middle Grades Education with a Concentration in Mathematics and Science

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere	4
EES 2097	Process Geomorphology	4
EES 4696	Vertebrate Paleontology and Taphonomy	3
EES 4796	Soils and Paleosols	4
EES 4896	Planetary Geology	4

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (69-74 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 6 courses from EES 2002+, BIOL 2112/2912, CHEM 2201 & 2203 / CHEM 2211 & 2213 / CHEM 2921 & 2923, MATH 2043/2943 must be completed at Temple.

Code	Title	Credit Hours
Chemistry		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Mathematics		
MATH 1041 or MATH 1941	Calculus I Honors Calculus I	4

or CHEM 2921 & CHEM 2923	Organic Chemistry for Honors I and Organic Honors Laboratory I	
MATH 2043	Calculus III (or higher)	
or MATH 2943	Honors Calculus III	

Total Credit Hours**69-74**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

(SS) - Summer Session

1

Science Foundation Electives (SFE) and Science Upper-Level Electives (SUE) courses cannot be double-counted. Students may also select the honors versions of the courses listed.

2

Students may elect to take some or all of their Field Elective credits through other institutions and transfer credits in as EES 4589. The Earth and Environmental Science faculty advisor must approve the choice(s) of external field course(s). Note that a typical 5-6 credit field course ranges from 4-6 weeks in length with tuition typically ranging from \$2,000 to \$4,000. The Department of Earth and Environmental Science holds fundraisers throughout the year to help defray the costs. Students may also apply for research scholarships at CST and at the university.

3

Elective courses must be 3 or 4 credits. At most, one of the EES electives or SUEs may be a graduate-level course with permission of the faculty advisor.

(F) - Fall only course

(S) - Spring only course

(SS) - Summer Session

1

The Honors versions of these courses are Fall-only courses. If the Honors versions are desired, it is recommended to switch positions with the Science Foundations Electives in the following Spring semesters.

2

Select from the Science Foundation Electives list under Requirements.

3

Select from the Earth and Environmental Science or Science Upper-Level Electives lists under Requirements.

4

Select from the EES Field Electives list under Requirements.

5

Majors must take either EES 3025 or EES 3021. If both courses are taken, one may count as an elective.

Geology Minor

Overview

Offered by the Department of Earth and Environmental Science, the **Minor in Geology** is designed for students who are interested in acquiring basic knowledge in geology but not wishing to major in the subject.

Campus Location: Main

Undergraduate Contact Information

Nicholas Davatzes, Chair
Beury Hall, Room 307

215-204-3635
coast@temple.edu

Steven Chemtob, Faculty Advisor for Environmental Science
Beury Hall, Room 325B
215-204-3958
chemtob@temple.edu (grand@temple.edu)

Minor Requirements

Students interested in acquiring a basic knowledge of Geology but not wishing to major in Geology may pursue a minor in Geology by successfully completing the following courses:

Code	Title	Credit Hours
EES 2001	Physical Geology	4
Select one of the following:		4
CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I (F)	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
PHYS 1021	Introduction to General Physics I	
PHYS 1061	Elementary Classical Physics I	

PHYS 1961	Honors Elementary Classical Physics I (F)	
PHYS 2021	General Physics I	
PHYS 2921	Honors General Physics I (F)	
Select one of the following:		4
MATH 1022	Precalculus	
MATH 1041	Calculus I (or higher)	
MATH 1941	Honors Calculus I (F)	
Four 3 to 4 credit Earth & Environmental Science electives numbered above 2001, with a minimum of 14 credits, chosen with the approval of the undergraduate Earth & Environmental Science advisor.		14
Total Credit Hours		26

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

Residency Requirements: At least 4 courses required for the minor must be completed at Temple. At least 3 Earth & Environmental Science courses must be completed at Temple.

Information Science and Technology BA

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

Students in the **Bachelor of Arts in Information Science and Technology** (IS&T) develop the skills and the knowledge necessary to analyze information problems and to apply current technology to their solution. The emphasis is to develop problem-solving and communication skills.

The technologies and methods include databases, web and mobile application development, client-server computing, network security, project management, software engineering principles, and quality assurance methodologies. A two-semester capstone project course is required. This course is designed to help students integrate what they have learned in other courses and apply this knowledge in the design and implementation of a software application.

The program is targeted for students who have a strong interest in applying computing technologies to solving problems in business, education, science and government agencies. Our IS&T graduates are also involved in innovative product developments. They hold jobs as consultants, network engineers, business and systems analysts, database administrators, and web and application developers.

Campus Location: Main

Program Code: ST-IST-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- have a minimum 3.50 major GPA and
- have a minimum 3.50 cumulative GPA.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CIS 4296	Information Systems Analysis and Design	4
CIS 4396	Information Systems Implementation	4

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
 - Successful completion or waiver from the second level of a foreign language.
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (64 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 6 CIS courses must be completed at Temple.

Code	Title	Credit Hours
Computer & Information Science		
CIS 1001	Introduction to Academics in Computer Science	1
CIS 1051	Introduction to Problem Solving and Programming in Python	4
or CIS 1057	Computer Programming in C

or CIS 1966	Honors Mathematical Concepts in Computing I	
CIS 2109	Database Management Systems	4
CIS 2168	Data Structures	4
CIS 2229	Architecture, Operating Systems and Networking	4
CIS 3309	Component-Based Software Design	4
CIS 3329	Network Architectures	4
CIS 3342	Server-Side Web Application Development	4
CIS 3344	Client-Side Scripting for the Web	4
CIS 4296	Information Systems Analysis and Design	4
CIS 4396	Information Systems Implementation	4
Mathematics		
MATH 2031	Probability and Statistics	3
Select one of the following: ¹		4
MATH 1031	Differential and Integral Calculus	
MATH 1041	Calculus I	

MATH 1941	Honors Calculus I	
Laboratory Science courses		
Two (2) laboratory science courses ²		8
Total Credit Hours		64

1

IS&T majors are required to have completed MATH 1022. They can then choose either MATH 1031, MATH 1041 or MATH 1941.

2

Must select within a Sequence for Laboratory Science A and Laboratory Science B. See the Sequenced Laboratory Science list below for the science options.

Sequenced Information Science and Technology Laboratory Science Requirements

Code	Title	Credit Hours
Biology Sequence		
Select one Biology Lab Science A:		
BIOL 1011	General Biology I	
BIOL 1111	Introduction to Organismal Biology	
BIOL 1911	Honors Introduction to Organismal Biology (S)	
Select one Biology Lab Science B:		
BIOL 1012	General Biology II	
BIOL 1112	Introduction to Biomolecules, Cells and Genomes	
BIOL 1912	Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112	Introduction to Cellular and Molecular Biology	
BIOL 2912	Honors Introduction to Cellular and Molecular Biology (F)	
Chemistry Sequence ¹		
Select one Chemistry Lab Science A:		
CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I	
Select one Chemistry Lab Science B:		
CHEM 1022 & CHEM 1024	Introduction to Chemistry II and Introduction to Chemistry Laboratory II	
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II	
Earth & Environmental Science Sequence ²		
Select this Lab Science A:		
EES 2001	Physical Geology	
Select one Lab Science B:		
EES 2011	Mineralogy I (with CHEM 1031 prerequisite)	
EES 2021	Sedimentary Environments (no CHEM 1031 prerequisite)	
EES 2061	Introduction to Geochemistry (with CHEM 1031 prerequisite)	
Physics Sequence ³		
Select one Physics Lab Science A:		
PHYS 1021	Introduction to General Physics I	
PHYS 1061	Elementary Classical Physics I	
PHYS 1961	Honors Elementary Classical Physics I (F)	
PHYS 2021	General Physics I	

PHYS 2921	Honors General Physics I (F)
Select one Physics Lab Science B:	
PHYS 1022	Introduction to General Physics II
PHYS 1062	Elementary Classical Physics II
PHYS 1962	Honors Elementary Classical Physics II (S)
PHYS 2022	General Physics II
PHYS 2922	Honors General Physics II (S)

1

Students can choose to mix-and-match the Chemistry Sequence A and B courses. However, they must take at least 1 course from Chemistry Sequence A and 1 from Chemistry Sequence B. Note: Chemistry courses consist of a three-credit lecture plus a one-credit lab.

2

For the EES Sequence, two of the three Lab Science B options require students to take CHEM 1031 as a prerequisite, but EES 2021 does not.

3

Students can choose to mix-and-match the Physics Sequence A and B courses. However, they must take at least 1 course from Physics Sequence A and 1 from Physics Sequence B.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CIS 4296	Information Systems Analysis and Design	4
CIS 4396	Information Systems Implementation	4

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (76 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 8 CIS courses must be completed at Temple.

Code	Title	Credit Hours
Computer & Information Science		
CIS 1001	Introduction to Academics in Computer Science	1
CIS 1051	Introduction to Problem Solving and Programming in Python	4
or CIS 1057	Computer Programming in C

CIS 4296	Information Systems Analysis and Design	4
CIS 4396	Information Systems Implementation	4
Mathematics		
MATH 2031	Probability and Statistics	3
Select one of the following: ¹		4
MATH 1031	Differential and Integral Calculus	
MATH 1041	Calculus I	
MATH 1941	Honors Calculus I	
Information Science & Technology Related Electives		
Select 12 credits from the following IS&T elective courses:		12
CIS 3100	Special Topics in CIS	
CIS 3281	Cooperative Education Experience in Information Science & Technology ²	
CIS 3374	Quality Assurance & Testing (F)	
CIS 3376	Enterprise Resource Planning (ERP) Design and Implementation	
CIS 3441	Software Security	
CIS 3515	Introduction to Mobile Application Development	
CIS 3603	User Experience Design	
CIS 3605	Introduction to Digital Forensics	
CIS 3715	Principles of Data Science	
CIS 3775	Information Technology Project Management	
CIS 4105	Information Technology Process Management (F)	
CIS 4106	System Development Process	
CIS 4108	Emerging Technologies and Tools for Enterprise Management (S)	
CIS 4282	Independent Study ²	
CIS 4330	Current Topics in Information Science & Technology	
CIS 4340	Seminar in Information Science & Technology (S)	
CIS 4344	Advanced Web Application Design & Scripting	
CIS 4350	Seminar on Topics in Computer Science (F)	
CIS 4362	Application System Development Using Relational Technology (Not offered every year)	
CIS 4376	E-Commerce System Development	
CIS 4378	Computer and Network Security	
CIS 4419	Securing the Internet of Things	
CIS 4515	Advanced Mobile Application Development	
CIS 4615	Ethical Hacking and Intrusion Forensics	
CIS 4625	Audit and Compliance for Security and Digital Forensics	

Other courses communicated to the students from the IS&T Faculty Advisor.

Laboratory Science courses

Two (2) laboratory science courses ³ 8

Total Credit Hours 76

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

IS&T majors are required to have completed MATH 1022. They can then choose either MATH 1031, MATH 1041 or MATH 1941.

2

A maximum of two sections may be taken from CIS 3281 and CIS 4282. CIS 3281 may be taken once within this two-section sequence.

3

Must select within a Sequence for Laboratory Science A and Laboratory Science B. See the Sequenced Laboratory Science list below for the science options.

- Students may also select other 3000-level or higher Computer & Information Science courses for which they meet the prerequisites as long as that course is not already used for the IS&T degree.
- No more than two courses that do not have formal classes and a text, such as Independent Study, Directed Study, and co-op may be used to satisfy the elective requirement. In addition, the co-op course may only be taken once.
- Students with senior standing and a minimum overall 3.25 GPA may also request permission from both the IS&T advisor and course instructor to use graduate courses (5xxx level) as electives.

Sequenced Information Science and Technology Laboratory Science Requirements

Code	Title	Credit Hours
------	-------	--------------

Biology Sequence**Select one Biology Lab Science A:**

BIOL 1011	General Biology I
BIOL 1111	Introduction to Organismal Biology
BIOL 1911	Honors Introduction to Organismal Biology (S)

Select one Biology Lab Science B:

BIOL 1012	General Biology II
BIOL 1112	Introduction to Biomolecules, Cells and Genomes
BIOL 1912	Honors Introduction to Biomolecules, Cells and Genomes
BIOL 2112	Introduction to Cellular and Molecular Biology
BIOL 2912	Honors Introduction to Cellular and Molecular Biology (F)

Chemistry Sequence ¹**Select one Chemistry Lab Science A:**

CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I

Select one Chemistry Lab Science B:

CHEM 1022 & CHEM 1024	Introduction to Chemistry II and Introduction to Chemistry Laboratory II
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II

Earth & Environmental Science Sequence ²

Select this Lab Science A:

EES 2001 Physical Geology

Select one Lab Science B:

EES 2011 Mineralogy I (with CHEM 1031 prerequisite)

EES 2021 Sedimentary Environments (no CHEM 1031 prerequisite)

EES 2061 Introduction to Geochemistry (with CHEM 1031 prerequisite)

Physics Sequence³**Select one Physics Lab Science A:**

PHYS 1021 Introduction to General Physics I

PHYS 1061 Elementary Classical Physics I

PHYS 1961 Honors Elementary Classical Physics I (F)

PHYS 2021 General Physics I

PHYS 2921 Honors General Physics I (F)

Select one Physics Lab Science B:

PHYS 1022 Introduction to General Physics II

PHYS 1062 Elementary Classical Physics II

PHYS 1962 Honors Elementary Classical Physics II (S)

PHYS 2022 General Physics II

PHYS 2922 Honors General Physics II (S)

1

Students can choose to mix-and-match the Chemistry Sequence A and B courses. However, they must take at least 1 course from Chemistry Sequence A and 1 from Chemistry Sequence B. Note: Chemistry courses consist of a three-credit lecture plus a one-credit lab.

2

For the EES Sequence, two of the three Lab Science B options require students to take CHEM 1031 as a prerequisite, but EES 2021 does not.

3

Students can choose to mix-and-match the Physics Sequence A and B courses. However, they must take at least 1 course from Physics Sequence A and 1 from Physics Sequence B.

1

IS&T majors are required to have completed MATH 1022. They can then choose either MATH 1031, MATH 1041 or MATH 1941.

2

Select from the Information Science & Technology Related Electives list under Requirements.

Information Science and Technology Minor

Overview

Offered by the Department of Computer and Information Sciences, the **Minor in Information Science and Technology** provides students with a choice of 5 courses that focus on programming, operating systems and database technologies that can be applicable for a technological foundation to complement any major. Students on both Main Campus and Temple University Japan Campus may declare this minor.

Campus Location: Main and Japan

Undergraduate Contact Information

Main Campus

Jamie Payton, Chair
Science, Education and Research Center, Room 304
215-204-8450

Gene Kwatny, Vice Chair
Science, Education and Research Center, Room 304
215-204-8450

Dominic Letarte, Faculty Advisor
Science, Education and Research Center, Room 372
215-204-6439
istadvsr@temple.edu

Temple Japan Campus

Hani Karam, PhD, Computer Science Coordinator
hkaram@tuj.temple.edu

Minor Requirements

Students desiring a minor in Information Science and Technology are required to satisfy the following:

Code	Title	Credit Hours
CIS 1051 or CIS 1951 or CIS 1057	Introduction to Problem Solving and Programming in Python Honors Introduction to Problem Solving and Programming in Python Computer Programming in C	4
CIS 1068 or CIS 1968	Program Design and Abstraction Honors Program Design and Abstraction	4
Select 3 of the following: ¹		11-12
CIS 1166 or CIS 1966	Mathematical Concepts in Computing I Honors Mathematical Concepts in Computing I	
CIS 2004	Sci+Tech Scholars Seminar ²	
CIS 2109	Database Management Systems	
CIS 2168	Data Structures	
CIS 2229	Architecture, Operating Systems and Networking	
Total Credit Hours		19-20

1

A 3000-level CIS course may replace one of the courses above with faculty advisor approval. CS majors who want an IS&T minor must take CIS 2109, CIS 3309 and a 3000-level IS&T course distinct from the CS courses (selected with IS&T faculty advisor). If a student has taken CIS 4331, that student may not take CIS 2109 and will need to see the faculty advisor for a replacement course.

Only students in the Sci+Tech Scholars program may take the 1-credit CIS 2004 course each semester for three semesters and substitute the 3 combined credits for one of the required electives. Sci+Tech Scholars students would then need to choose two additional electives from the list to complete the three electives requirement.

Residency Requirements: At least 3 courses required for the minor must be completed at Temple. At least 3 CIS courses must be completed at Temple. Sci+Tech Scholars students should note that taking 3 CIS 2004 seminars constitutes 1 course for the residency requirement.

Materials Science BS

Overview

The **Bachelor of Science in Materials Science**, offered by the Department of Physics, provides both a strong preparation for those wishing to attend graduate school in materials science or related disciplines and for those who intend to enter the scientific workforce upon completion of a bachelor's degree. Students who wish to transfer into this program should consult first with the Physics faculty advisor.

The Bachelor of Science in Materials Science stands at the interface between physics, chemistry, computer and information science, and applied mathematics, with innovation and technology applications bridging to applied sciences. Its foundational structure is embedded in multiple College of Science and Technology (CST) disciplines. Indeed, the frontiers of the subject now demand participation of artificial intelligence/machine learning methodologies. Materials science is important as a research and education driver that reaches students in almost every discipline of science and technology. Graduates proficient in this area are more and more in demand. Indeed, the national initiative in Quantum Information Science makes it clear that Quantum Materials will be a focus for industry and academia. Temple's Bachelor of Science in Materials Science focuses on the science behind materials science, and is not an engineering program.

As a discipline, materials science represents the confluence of quantum theory, computational design, synthesis and characterization, in a feedback loop to produce advanced materials for technology applications and subsequent processing by industry. Importantly, the theory and computational design component now harnesses artificial intelligence and machine learning to create heretofore unknown "designer" materials. These ideas are prominent in Department of Energy (DOE) and National Science Foundation "big ideas" such as the "Quantum Leap" that establish an understanding of complex matter-energy relationships, leading to next-generation quantum materials and technologies for sensing and computing, modeling, and communicating, from the micro- or nano-structure of materials to their physical, mechanical and chemical properties.

Materials Science evolved historically from the metallurgy of naturally occurring elements and their alloys (and glass) to embrace not only an enormous variety of "hard" elemental (metallic and semiconducting) alloys and oxide-based materials (superconductors, catalysts, etc.) that underpin technology applications, but also a vast array of "soft" materials including synthetic and natural polymers, as well as more recently the two-dimensional graphene-like constructs, which will be needed for future advanced/strategic technologies.

Campus Location: Main

Program Code: ST-MSCI-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA and
- carry out an independent study or undergraduate thesis project.

Consult the undergraduate physics faculty advisor for more details.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
PHYS 2796	Introduction to Modern Physics	4
SCTC 2396	Writing for Science and Technology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (76-80 s.h.)

A least 9 courses required for the major must be completed at Temple. At least 8 Physics courses must be completed at Temple.

Code	Title	Credit Hours

Mathematical Economics BA (CST)

Overview

The College of Liberal Arts' Department of Economics and the College of Science and Technology's Department of Mathematics jointly offer the **Bachelor of Arts in Mathematical Economics** as a platform for systematic concentration in the mathematical approach to economics. Economics has progressed in the last several decades by making extensive use of mathematical techniques. As a result, students who wish to pursue graduate study in economics, finance, accounting and other disciplines that make an extensive use of economics need a thorough grounding in both economics and mathematics. The Mathematical Economics curriculum provides this grounding with a broad selection of courses that cover all important areas of economics and the mathematical tools required for a critical, deep mastery of these areas.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
ECON 3596	Energy, Ecology, and Economy	3
ECON 3597	Health Economics	3
ECON 3598	Economics Writing Seminar	3
ECON 3696	Behavioral Economics	3
ECON 3697	The Economics of Sports	3
ECON 3698	Economic Inequality	3
MATH 3096 or MATH 3098	Introduction to Modern Algebra Modern Algebra	3
MATH 4096	Senior Problem Solving	3

- Students must complete the General Education (GenEd (p. 83)) requirements. Students who complete this major typically receive a waiver for 1 Quantitative Literacy (GQ) GenEd course.

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (60-62 s.h.)

Code	Title	Credit Hours
Computer & Information Science		
Select one of the following:		3-4

CIS 1051 or CIS 1951	Introduction to Problem Solving and Programming in Python Honors Introduction to Problem Solving and Programming in Python

1

One of the Mathematics or Economics electives must be a writing-intensive course in order to satisfy the University requirement that each student must fulfill two writing-intensive courses within the major.

2

MATH 2041, MATH 2941, MATH 2045, or MATH 2121 may be used to fulfill the Mathematics elective at the 3000 level or above.

3

You must complete the year-long sequence of either MATH 3043 and MATH 3044; or MATH 3137 and MATH 3138; or MATH 3141 and MATH 3142.

Mathematics and Computer Science BS

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

The **Bachelor of Science in Mathematics and Computer Science** is intended for students who are interested in computer science and mathematical computing. It provides a solid knowledge of theoretical computer science and its mathematical foundations and compares favorably with other theoretically-oriented computer science programs. The program is particularly recommended to those students who are interested in pursuing a graduate degree in computer science or computational mathematics.

Campus Location: Main

Program Code: ST-MACS-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.50 cumulative GPA
- achieve a minimum 3.50 GPA in the 3000+ Computer Science courses required for the major
- achieve a minimum 3.50 GPA in the 3000+ Mathematics courses required for the major
- successfully complete MATH 3098 and one of the following two-semester analysis sequences
 - MATH 3043 and MATH 3044
 - MATH 3137 and MATH 3138
 - MATH 3141 and MATH 3142

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
CIS 3296	Software Design	
CIS 4397	Independent Research in Computer Science	
CIS 4398	Projects in Computer Science	
MATH 3096 or MATH 3098	Introduction to Modern Algebra Modern Algebra	
MATH 4096	Senior Problem Solving	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.
- #### 3. Major Requirements for Bachelor of Science (72-74 s.h.)

At least 10 courses required for the major must be completed at Temple. At least 5 Math and 4 Computer Science courses must be completed at Temple.

Mathematics and Computer Science with Teaching BS

Overview

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology.

The **Bachelor of Science in Mathematics and Computer Science with Teaching** is part of Temple's innovative "TUteach" teacher-training program. The BS in Mathematics and Computer Science with Teaching provides broad training in mathematics and computer science and prepares students for a career in secondary school teaching or an entry level position in a mathematics field or computer science. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Mathematics and Computer Science with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-MCTC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.25 cumulative GPA;
- achieve a minimum 3.50 major GPA;
- achieve a minimum 3.50 in the Mathematics and Computer Science with Teaching content courses required for the major;
- successfully complete MATH 3141, MATH 3142 and MATH 4051 instead of MATH 3137 and MATH 3138;
- successfully complete MATH 3098 instead of MATH 3096;
- achieve a minimum 3.50 GPA in the following courses:
 - MATH 3098
 - MATH 3141
 - MATH 3142
 - MATH 4051
 - Any additional course from the following:

- MATH 3043
- MATH 3044
- MATH 3101; and
- achieve a minimum 3.90 GPA in the following courses:
 - MAES 2189 or SCTC 4385
 - MAES 4189 or SCTC 4485
 - EDUC 4388
 - EDUC 4802.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
MATH 3096	Introduction to Modern Algebra	
MATH 4096	Senior Problem Solving	
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TUtch majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (97-99 s.h.)¹

At least 10 courses required for the major must be completed at Temple. At least 6 Math, 2 Computer Science, and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

(S) - Spring only course

1

The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2

All students are required to take a minimum of one credit.

Mathematics and Physics BS

Overview

The **Bachelor of Science in Mathematics and Physics**, a program administered jointly between the Department of Physics and the Department of Mathematics, is an interdisciplinary program providing a foundation in physical sciences with a strong emphasis on the mathematical techniques needed for analysis and modeling. It prepares the student for science or analysis careers which use these mathematical tools along with problem-solving skills, as well as for graduate studies in either mathematics or physics.

Campus Location: Main

Program Code: ST-MAPH-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.50 cumulative GPA;
- achieve a minimum 3.50 GPA in all Physics and Math courses required for the major;
- achieve a minimum 3.50 GPA in the following courses:
 - MATH 3098,
 - MATH 3141,
 - MATH 3142,
 - MATH 4051,
 - Any 4000-level course other than Individual Study; and,
- carry out an independent study, undergraduate research or undergraduate thesis project.

Consult the undergraduate Physics faculty advisor for more details.

Learn more about the Bachelor of Science in Mathematics and Physics.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must meet all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
MATH 3098	Modern Algebra	3
MATH 4096	Senior Problem Solving	3
PHYS 2796	Introduction to Modern Physics	4
PHYS 4796	Experimental Physics	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (76 s.h.)

At least 10 courses required for the major must be completed at Temple. At least 6 Math and 5 Physics courses must be completed at Temple.

Mathematics and Technology with Teaching BS

Overview

The Department of Mathematics prepares students for careers, graduate study and professional programs requiring solid mathematical, quantitative or analytical skills.

The **Bachelor of Science in Mathematics and Technology with Teaching** is part of Temple's innovative "TUteach" secondary education teacher-training program. The BS in Mathematics and Technology with Teaching provides broad training in mathematics and prepares students for a career in secondary school teaching or an entry level position as a mathematics specialist. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Mathematics and Technology with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-MTTC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.25 cumulative GPA;
- achieve a minimum 3.50 major GPA;
- achieve a minimum 3.50 in the Mathematics courses required for the major;
- achieve a minimum 3.50 in the Engineering courses required for the major;
- successfully complete MATH 3141, MATH 3142 and MATH 4051 instead of MATH 3137 and MATH 3138;
- successfully complete MATH 3098 instead of MATH 3096;
- achieve a minimum 3.50 GPA in the following courses:
 - MATH 3098
 - MATH 3141
 - MATH 3142
 - MATH 4051
 - Any additional course from the following:
 - MATH 3043
 - MATH 3044
 - MATH 3101
 - Any 4000-level course other than Individual Study; and
- achieve a minimum 3.90 GPA in the following courses:
 - MAES 2189 or SCTC 4385
 - MAES 4189 or SCTC 4485
 - EDUC 4388
 - EDUC 4802.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
MATH 3096	Introduction to Modern Algebra	
MATH 4096	Senior Problem Solving	
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TUteach majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (98-101 s.h.)¹

At least 10 courses required for the major must be completed at Temple. At least 7 Math, 2 Engineering, and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

(F) - Fall only course

(S) - Spring only course

1
The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2
MATH 2041, MATH 2941, MATH 2045, or MATH 2121 may be used to fulfill the Mathematics elective at the 3000 level or above.

3
Most engineering concentration courses require either Chemistry or Physics as a prerequisite, so students should choose the course that best prepares them for their intended track. The Environment and Bioengineering tracks cannot be completed without the chemistry sequence, and the Robotics and Energy tracks cannot be completed without the physics sequence.

4
All students are required to take a minimum of one credit.

GenEd Breadth Course		3
Credit Hours		10
Total Credit Hours		124

1

The two (2) Engineering concentration electives must be chosen from the same track. See major requirements for details. Most engineering concentration courses require either Chemistry or Physics as a prerequisite, so students should choose the course that best prepares them for their intended track. The Environment and Bioengineering tracks cannot be completed without the chemistry sequence, and the Robotics and Energy tracks cannot be completed without the physics sequence.

2

MATH 2041, MATH 2941, MATH 2045, or MATH 2121 may be used to fulfill the Mathematics elective at the 3000 level or above.

3

All students are required to take a minimum of one credit.

Code	Title	Credit Hours
(F) - Fall only course		
(S) - Spring only course		

Mathematics BA

Overview

The **Bachelor of Arts in Mathematics**, offered by the Department of Mathematics, provides a solid mathematical foundation and also allows for the most flexibility. This program prepares students for a variety of jobs in business and industry, as well as for graduate study in fields related to mathematics.

Campus Location: Main

Program Code: ST-MATH-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.25 cumulative GPA;
- achieve a minimum 3.50 major GPA;
- successfully complete MATH 3141, MATH 3142 and MATH 4051 instead of MATH 3137 and MATH 3138;
- successfully complete MATH 3098 instead of MATH 3096; and
- achieve a minimum 3.50 GPA in the following courses:
 - MATH 3098
 - MATH 3141
 - MATH 3142
 - MATH 4051
 - Any additional course from the following:
 - MATH 3043
 - MATH 3044
 - MATH 3101
 - Any 4000-level course other than Individual Study.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Mathematics.

- BA in Mathematics / MEd in Middle Grades Education with a Concentration in Mathematics
- BA in Mathematics / MEd in Middle Grades Education with a Concentration in Mathematics and Language Arts
- BA in Mathematics / MEd in Secondary Education with a Concentration in Mathematics Education
- BA in Mathematics / MS in Mathematics (p. 1441)

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
MATH 3096	Introduction to Modern Algebra	3
MATH 4096	Senior Problem Solving	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year seminar or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (53-55 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 7 Math courses must be completed at Temple.

Mathematics BS

Overview

The **Bachelor of Science in Mathematics**, offered by the Department of Mathematics, provides an in-depth theoretical background focusing on the traditional core areas of mathematics. This program provides a foundation for graduate study or careers in fields using sophisticated quantitative and mathematical analysis. In particular, this program is suitable preparation for graduate study in mathematics.

Campus Location: Main

Program Code: ST-MATH-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.25 overall GPA;
- achieve a minimum 3.50 GPA in the Mathematics courses required for the major; and,
- achieve a minimum 3.50 GPA in the following courses:
 - MATH 3098
 - MATH 3141
 - MATH 3142
 - MATH 4051
 - Any additional course from the following:
 - MATH 3043
 - MATH 3044
 - MATH 3101
 - Any 4000-level course other than Individual Study.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Mathematics.

Mathematics Minor

Overview

Offered by the Department of Mathematics, the **Minor in Mathematics** is intended for students interested in the logical thinking and problem solving skills that are gained in studying mathematics. This minor is ideal for students seeking to apply mathematical methods in other disciplines, particularly in the sciences, engineering, social sciences, computing, or business.

One of the following courses may be used to fulfill one of the Mathematics courses at the 3000 level or above: MATH 2111, MATH 2121, MATH 2041, or MATH 2045.

Residency Requirements: At least 4 courses required for the minor must be completed at Temple. At least 4 Mathematics courses must be completed at Temple.

Mathematics with Teaching BS

Overview

The Department of Mathematics prepares students for careers, graduate study and professional programs requiring solid mathematical, quantitative or analytical skills.

The **Bachelor of Science in Mathematics with Teaching** is part of Temple's innovative "TUteach" secondary education teacher-training program. The BS in Mathematics with Teaching provides broad training in mathematics and prepares students for a career in secondary school teaching or an entry level position in a mathematical field. The education courses in this major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Mathematics with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-MATC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.25 cumulative GPA;
- achieve a minimum 3.50 major GPA;
- achieve a minimum 3.50 in the Mathematics courses required for the major;
- successfully complete MATH 3141, MATH 3142 and MATH 4051 instead of MATH 3137 and MATH 3138;
- successfully complete MATH 3098 instead of MATH 3096;
- achieve a minimum 3.50 GPA in the following courses:

- MATH 3098
- MATH 3141
- MATH 3142
- MATH 4051
- Any additional course from the following:
 - MATH 3043
 - MATH 3044
 - MATH 3101; and
- achieve a minimum 3.90 GPA in the following courses:
 - MAES 2189 or SCTC 4385
 - MAES 4189 or SCTC 4485
 - EDUC 4388
 - EDUC 4802.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)
 - Students must complete all University requirements including those listed below.
 - All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
MATH 3096	Introduction to Modern Algebra	
MATH 3098	Modern Algebra	
MATH 4096	Senior Problem Solving	
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TTeach majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (90-92 s.h.)¹

At least 9 courses required for the major must be completed at Temple. At least 7 Math courses and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

(S) - Spring only course

1

The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2

MATH 2041, MATH 2941, MATH 2045, or MATH 2121 may be used to fulfill the Mathematics elective at the 3000 level or above.

3

All students are required to take a minimum of one credit.

Suggested Academic Plan

Bachelor of Science in Mathematics with Teaching

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall

Mobile Application Development Certificate

Overview

Mobile devices are the computers that we carry with us at all times. Our mobile devices are our source for news and entertainment, our method of getting around, the way we record experiences, and is our conduit to the rest of the world. However, we use this computer in different ways than we use any other computer. Our interactions with it are frequent, frequently interrupted, and becoming ever more necessary. Offered by the Department of Computer and Information Sciences, the **Certificate in Mobile Application Development** will introduce students to advanced concepts in application development for mobile devices. Students will learn to leverage the various novel components found in modern mobile devices such as sensors, wireless communication, and global navigation systems, to build applications that are aware of and act based on their environment. Students will learn to work in teams to design and implement complex applications and learn how to address challenges in hardware and user interfaces by incorporating software design and user-interaction design principles.

Programmers proficient in this area are in increasing demand.

Certificate Requirements

Prerequisite Courses

Students desiring a Certificate in Mobile Application Development must have already completed the following courses:

Code	Title	Credit Hours
CIS 1068 or CIS 1968	Program Design and Abstraction Honors Program Design and Abstraction	4
CIS 1166 or CIS 1966	Mathematical Concepts in Computing I Honors Mathematical Concepts in Computing I	4
CIS 2168	Data Structures	4
Total Credit Hours		12

Required Courses

Students desiring a Certificate in Mobile Application Development must complete the following courses:

Code	Title	Credit Hours
CIS 3515	Introduction to Mobile Application Development	4
CIS 4515	Advanced Mobile Application Development	4
Select one of the following:		3-4
CIS 2109	Database Management Systems	
CIS 3374	Quality Assurance & Testing	
CIS 3603	User Experience Design	

Residency Requirements: At least 2 courses required for the certificate must be completed at Temple.

Natural Sciences BA with Biology Concentration

Overview

The Natural Sciences program provides students more breadth than traditional science programs.

Natural Sciences students **must select one of the following concentrations:**

- Biology
- Chemistry
- Earth and Environmental Sciences
- Physics

Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. The **Bachelor of Arts in Natural Sciences with a concentration in Biology** helps students to explore both domestic and international culture through the foreign language and upper-level liberal arts course requirements.

Students planning graduate study or technical careers in one of these interdisciplinary areas, as well as students preparing for careers in health sciences, legal professions, science education, science-related business, or social service might be well served by the BA in Natural Sciences. This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Students in this program can apply to our Professional Science Master's (PSM) programs in Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 BA/PSM accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

Campus Location: Main

Program Code: ST-NATS-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.33 GPA in major or
- achieve a minimum 3.0 cumulative GPA and successfully complete six credits of internship coursework (SCTC 1385, SCTC 2385, or SCTC 3185) with approval by the program director.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Natural Sciences.

- BA or BS in Natural Sciences / PSM in Scientific Writing
- BA or BS in Natural Sciences / PSM in Bioinnovation
- BA or BS in Natural Sciences / PSM in Biotechnology
- BA in Natural Sciences / MEd in Middle Grades Education with a Concentration in Science
- BA in Natural Sciences / MEd in Middle Grades Education with a Concentration in Science and Language Arts

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (63-72 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 2 courses in the chosen concentration must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4

Biology Electives

Four Upper-level (numbered 2200 and above) Biology Electives ⁵	12-16
---	-------

Total Credit Hours **63-72**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

It is recommended that SCTC 1501 or SCTC 1502 be completed before SCTC 4396.

2

It is recommended that students take CIS 1051 (or CIS 1951) as Python is the language of choice for most science programming needs.

3

SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact CSTbce@temple.edu to have an advisor change the credits to 3.

4

These courses are not required if MATH 1031 is completed.

5

The four electives (numbered 2200 and above) must all be taken from within the Biology department and must satisfy elective criteria of the department. **Note the Exception:** Natural Science majors in the Biology concentration are permitted to take BIOL 2001 Clinical Microbiology as an elective. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.

Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
College of Science & Technology		
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
Select one of the following: ¹		4
SCTC 1501	STEM Challenge: The World Around Us	
SCTC 1502	STEM Challenge: The World Within	
SCTC 2396	Writing for Science and Technology	3
SCTC 3001	History of Science	3
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3
Computer Programming/Physics		
Select one of the following: ²		3-4
CIS 1051 or CIS 1951 or CIS 1057	Introduction to Problem Solving and Programming in Python Honors Introduction to Problem Solving and Programming in Python Computer Programming in C	
CIS 1052	Introduction to Web Technology and Programming	
CIS 1053	Programming in Matlab	
PHYS 1004	Introduction to Astronomy (F)	
SCTC 3312	Coding STEM Lessons ³	
Earth & Environmental Science		
EES 2001	Physical Geology	4
Mathematics		
Select one of the following:		4-8
MATH 1031	Differential and Integral Calculus	

MATH 1041 & MATH 1044	Calculus I and Introduction to Probability and Statistics for the Life Sciences ⁴
MATH 1041 & MATH 1042	Calculus I and Calculus II ⁴
MATH 1941 & MATH 1942	Honors Calculus I and Honors Calculus II ⁴

Physics

Select one of the following: 4

PHYS 1021	Introduction to General Physics I
PHYS 1061 or PHYS 1961	Elementary Classical Physics I Honors Elementary Classical Physics I
PHYS 2021 or PHYS 2921	General Physics I Honors General Physics I

Select one of the following: 4

PHYS 1022	Introduction to General Physics II
PHYS 1062 or PHYS 1962	Elementary Classical Physics II Honors Elementary Classical Physics II
PHYS 2022 or PHYS 2922	General Physics II Honors General Physics II

Chemistry Electives

Four Upper-Level (2000+) Chemistry Electives ⁵ 12-16

Total Credit Hours 63-72

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

It is recommended that SCTC 1501 or SCTC 1502 be completed before SCTC 4396.

2

It is recommended that students take CIS 1051 (or CIS 1951) as Python is the language of choice for most science programming needs.

3

SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact CSTbce@temple.edu to have an advisor change the credits to 3.

4

These courses are not required if MATH 1031 is completed.

5

The four electives must all be taken from within the Chemistry department and must satisfy elective criteria of the department. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective. Note: If CHEM 3103 is selected as an elective, it is recommended that students register for CHEM 3105 as it would be considered a complementary lab to CHEM 3103.

Suggested Academic Plan

Bachelor of Arts in Natural Sciences with Concentration in Chemistry

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1

Fall **Credit Hours**

Select one of the following: 4

CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)

Select one of the following:		4
MATH 1031	Differential and Integral Calculus	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	
SCTC 1001	CST First Year Seminar	1
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
Select one of the following: ¹		4
SCTC 1501	STEM Challenge: The World Around Us	
SCTC 1502	STEM Challenge: The World Within	
Credit Hours		16

Spring

Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
Select one of the following: ²		0-4
MATH 1044	Introduction to Probability and Statistics for the Life Sciences	
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Elective		3
Elective		4-0
Credit Hours		15

Year 2**Fall**

Select one of the following:		4
BIOL 1011	General Biology I (F)	
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	
EES 2001	Physical Geology	4
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
GenEd Breadth Course		3
Credit Hours		14

Spring

Select one of the following:		4
BIOL 1012	General Biology II (S)	
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes or Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology or Honors Introduction to Cellular and Molecular Biology	
Chemistry Elective (2000+) ³		3-4
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3
GenEd Breadth Course		3
Elective		3-2
Credit Hours		16

Year 3**Fall**

Select one of the following:		4
PHYS 1021	Introduction to General Physics I	

PHYS 1061 or PHYS 1961	Elementary Classical Physics I or Honors Elementary Classical Physics I	
PHYS 2021 or PHYS 2921	General Physics I or Honors General Physics I	
SCTC 3001	History of Science	3
Chemistry Elective (2000+)	³	3-4
Foreign Language 1001 - First Level		4
Elective		1-0
Credit Hours		15
Spring		
Select one of the following:		4
PHYS 1022	Introduction to General Physics II	
PHYS 1062 or PHYS 1962	Elementary Classical Physics II or Honors Elementary Classical Physics II	
PHYS 2022 or PHYS 2922	General Physics II or Honors General Physics II	
SCTC 2396	Writing for Science and Technology	3
Foreign Language 1002 - Second Level		4
GenEd Breadth Course		3
Elective		3
Credit Hours		17
Year 4		
Fall		
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3
Select one of the following:		⁴ 3-4
CIS 1051 or CIS 1951 or CIS 1057	Introduction to Problem Solving and Programming in Python or Honors Introduction to Problem Solving and Programming in Python or Computer Programming in C	
CIS 1052	Introduction to Web Technology and Programming	
CIS 1053	Programming in Matlab	
PHYS 1004	Introduction to Astronomy (F)	
SCTC 3312	Coding STEM Lessons ⁵	
Chemistry Elective (2000+)	³	3-4
GenEd Breadth Course		3
Elective		3-1

Natural Sciences BA with Earth and Environmental Sciences Concentration

Overview

The Natural Sciences program provides students more breadth than traditional science programs.

Natural Sciences students **must select one of the following concentrations:**

- Biology
- Chemistry
- Earth and Environmental Sciences
- Physics

Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. The **Bachelor of Arts in Natural Sciences with a concentration in Earth and Environmental Sciences** helps students to explore both domestic and international culture through the foreign language and upper-level liberal arts course requirements.

Students planning graduate study or technical careers in one of these interdisciplinary areas, as well as students preparing for careers in health sciences, legal professions, science education, science-related business, or social service might be well served by the BA in Natural Sciences. This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Students in this program can apply to our Professional Science Master's (PSM) programs in Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 BA/PSM accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

Campus Location: Main

Program Code: ST-NATS-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.33 GPA in major or
- achieve a minimum 3.0 cumulative GPA and successfully complete six credits of internship coursework (SCTC 1385, SCTC 2385, or SCTC 3185) with approval by the program director.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Natural Sciences.

- BA or BS in Natural Sciences / PSM in Scientific Writing
- BA or BS in Natural Sciences / PSM in Bioinnovation
- BA or BS in Natural Sciences / PSM in Biotechnology
- BA in Natural Sciences / MEd in Middle Grades Education with a Concentration in Science
- BA in Natural Sciences / MEd in Middle Grades Education with a Concentration in Science and Language Arts

Learn more about the Bachelor of Arts in Natural Sciences.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
- Successful completion or waiver from the second level of a foreign language.
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (63-72 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 2 courses in the chosen concentration must be completed at Temple.

Code	Title	Credit Hours
(F) - Fall only course		
(S) - Spring only course		

1

It is recommended that SCTC 1501 or SCTC 1502 be completed before SCTC 4396.

2

It is recommended that students take CIS 1051 (or CIS 1951) as Python is the language of choice for most science programming needs.

3

SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact cstcmp@temple.edu to have an advisor change the credits to 3.

4

MATH 2043 is approved to satisfy one of the four concentration electives. The remaining concentration electives must all be taken from within the Physics department and must satisfy elective criteria of the department. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.

Suggested Academic Plan

Bachelor of Arts in Natural Sciences with Concentration in Physics

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall

Natural Sciences BS with Biology Concentration

Overview

The Natural Sciences program provides students more breadth than traditional science programs.

Natural Sciences students **must select one of the following concentrations:**

- Biology
- Chemistry
- Earth and Environmental Sciences
- Physics

Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. The **Bachelor of Science in Natural Sciences with a concentration in Biology** prepares students for these trans-disciplinary programs.

With careful selection of laboratory-based courses, students are well prepared for entry-level science positions, and a variety of graduate programs both disciplinary and interdisciplinary. In particular, this is an excellent background for students wishing to enter graduate programs in education, forensic science, scientific writing or editing, or related science technology areas. Students may also select many of the courses required for a variety of pre-health and professional school programs.

In the Bachelor of Science degree, there is greater emphasis on depth of science content knowledge and application of knowledge compared with the Bachelor of Arts in Natural Sciences. The BS degree requires additional science coursework and offers more advanced study in natural sciences. This option provides more flexibility for students declaring the BS in Natural Sciences later in their undergraduate course of study as they can apply more disciplinary science courses to meet the additional science requirements of this degree.

This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Students in this program can apply to our Professional Science Master's (PSM) programs in Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 BS/PSM accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

Campus Location: Main

Program Code: ST-NATS-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.33 GPA in major or
- achieve a minimum 3.0 cumulative GPA and successfully complete six credits of internship coursework (SCTC 1385, SCTC 2385, or SCTC 3185) with approval by the program director.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Natural Sciences.

- BA or BS in Natural Sciences / PSM in Scientific Writing
- BA or BS in Natural Sciences / PSM in Bioinnovation
- BA or BS in Natural Sciences / PSM in Biotechnology

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (76-88 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 2 courses in the chosen concentration must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
Select one of the following:		4
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology Honors Introduction to Cellular and Molecular Biology	

Chemistry

Select one of the following:

4

CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)

Select one of the following:

4

CHEM 1022 & CHEM 1024	Introduction to Chemistry II and Introduction to Chemistry Laboratory II

Total Credit Hours 76-88

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

Students may **not** take both CIS 1051 and CIS 1057 as their two CIS electives. They must choose one and then make another choice from the list for their second elective. Note: It is recommended that students take CIS 1051 as Python is the language of choice for most science programming needs.

2

SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact CSTbce@temple.edu to have an advisor change the credits to 3.

3

These courses are not required if MATH 1031 is completed.

4

The four electives (2200+) must all be taken from within the Biology department and must satisfy elective criteria of the department. **Note the Exception:** Natural Science majors in the Biology concentration are permitted to take BIOL 2001 Clinical Microbiology as an elective. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.

PHIL 2157	Environmental Ethics	
SCTC 2100	Special Topics in Science and Technology	
SCTC 2101	Medical Imaging Physics - Seeing Through Ourselves	
SCTC 2102	SERC: Science of Energy Resource Consumption	
Select one of the following:		3-4
Any Upper-Level (2000+) CST Course		

Total Credit Hours **76-88**

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

Students may **not** take both CIS 1051 and CIS 1057 as their two CIS electives. They must choose one and then make another choice from the list for their second elective. It is recommended that students take CIS 1051 (or CIS 1951) as Python is the language of choice for programming in most sciences.

2

SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact CSTbce@temple.edu to have an advisor change the credits to 3.

3

These courses are not required if MATH 1031 is completed.

4

The four electives must all be taken from within the Chemistry department and must satisfy elective criteria of the department. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective. Note: If CHEM 3103 is selected as an elective, it is recommended that students register for CHEM 3105 as it would be considered a complementary lab to CHEM 3103.

Suggested Academic Plan

Bachelor of Science in Natural Sciences with Concentration in Chemistry

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
Select one of the following:		4
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
Select one of the following:		4
MATH 1031	Differential and Integral Calculus	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	
SCTC 1001	CST First Year Seminar	1
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
SCTC 1501	STEM Challenge: The World Around Us	4
Credit Hours		16
Spring		
Select one of the following:		4
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	

Select one of the following: ¹		0-4
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	
MATH 1044	Introduction to Probability and Statistics for the Life Sciences	
SCTC 1502	STEM Challenge: The World Within	4
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Elective		4-0
Credit Hours		16
Year 2		
Fall		
Select one of the following:		4
BIOL 1011	General Biology I (F)	
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	
EES 2001	Physical Geology	4
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
GenEd Breadth Course		3
Credit Hours		14
Spring		
Select one of the following:		4

Natural Sciences BS with Earth and Environmental Sciences Concentration

Overview

The Natural Sciences program provides students more breadth than traditional science programs.

Natural Sciences students **must select one of the following concentrations:**

- Biology
- Chemistry
- Earth and Environmental Sciences
- Physics

Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. The **Bachelor of Science in Natural Sciences with a concentration in Earth and Environmental Sciences** prepares students for these trans-disciplinary programs.

With careful selection of laboratory-based courses, students are well prepared for entry-level science positions, and a variety of graduate programs both disciplinary and interdisciplinary. In particular, this is an excellent background for students wishing to enter graduate programs in education, forensic science, scientific writing or editing, or related science technology areas. Students may also select many of the courses required for a variety of pre-health and professional school programs.

In the Bachelor of Science degree, there is greater emphasis on depth of science content knowledge and application of knowledge compared with the Bachelor of Arts in Natural Sciences. The BS degree requires additional science coursework and offers more advanced study in natural sciences. This option provides more flexibility for students declaring the BS in Natural Sciences later in their undergraduate course of study as they can apply more disciplinary science courses to meet the additional science requirements of this degree.

This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Students in this program can apply to our Professional Science Master's (PSM) programs in Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 BS/PSM accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

Campus Location: Main

Program Code: ST-NATS-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.33 GPA in major or
- achieve a minimum 3.0 cumulative GPA and successfully complete six credits of internship coursework (SCTC 1385, SCTC 2385, or SCTC 3185) with approval by the program director.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Natural Sciences.

- BA or BS in Natural Sciences / PSM in Scientific Writing
- BA or BS in Natural Sciences / PSM in Bioinnovation
- BA or BS in Natural Sciences / PSM in Biotechnology

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (76-88 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 2 courses in the chosen concentration must be completed at Temple.

Code	Title	Credit Hours
Biology		
Select one of the following:		4
BIOL 1011	General Biology I (F)	
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	
Select one of the following:		4
BIOL 1012	General Biology II (S)	
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes Honors Introduction to Biomolecules, Cells and Genomes

or PHYS 2921	Honors General Physics I	

Select one of the following: 4

PHYS 1062	Elementary Classical Physics II	
or PHYS 1962	Honors Elementary Classical Physics II	
PHYS 2022	General Physics II	
or PHYS 2922	Honors General Physics II	

Science Electives

Four Upper-Level (2000+) Physics Electives ³ 12-16

Science Breadth Electives

Select one of the following: 3-4

ANTH 2705	Introduction to Evolutionary Anthropology	
ENST 2001	Environment and Society	
MATH 2031	Probability and Statistics	
PHIL 2157	Environmental Ethics	
SCTC 2100	Special Topics in Science and Technology	
SCTC 2101	Medical Imaging Physics - Seeing Through Ourselves	
SCTC 2102	SERC: Science of Energy Resource Consumption	

Select one of the following: 3-4

Any Upper-Level (2000+) CST Course

Total Credit Hours 80-88

Code	Title	Credit Hours
------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

Students may **not** take both CIS 1051 and CIS 1057 as their two CIS electives. They must choose one and then make another choice from the list for their second elective.

2

SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact cstcmp@temple.edu to have an advisor change the credits to 3.

3

MATH 2043 is approved to satisfy one of the four concentration electives. The remaining concentration electives must all be taken from within the Physics department and must satisfy elective criteria of the department. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.

Suggested Academic Plan

Bachelor of Science in Natural Sciences with Concentration in Physics

Suggested Plan for New Students Starting in the 2023-2024 Academic Year

Year 1		Credit Hours
Fall		
Select one of the following:		4
CHEM 1021 & CHEM 1023	Introduction to Chemistry I and Introduction to Chemistry Laboratory I	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
CHEM 1951 & CHEM 1953	Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)	
MATH 1041 or MATH 1941	Calculus I or Honors Calculus I	4
SCTC 1001	CST First Year Seminar	1
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
SCTC 1501	STEM Challenge: The World Around Us	4
Credit Hours		16
Spring		
Select one of the following:		4
CHEM 1022 & CHEM 1024	Introduction to Chemistry II and Introduction to Chemistry Laboratory II	
CHEM 1032 & CHEM 1034	General Chemistry II and General Chemistry Laboratory II	
CHEM 1952 & CHEM 1954	Honors General Chemical Science II and Honors Chemical Science Laboratory II (S)	
MATH 1042 or MATH 1942	Calculus II or Honors Calculus II	4
SCTC 1502	STEM Challenge: The World Within	4
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
Credit Hours		16
Year 2		
Fall		
Select one of the following:		4
PHYS 1061 or PHYS 1961	Elementary Classical Physics I or Honors Elementary Classical Physics I	
PHYS 2021 or PHYS 2921	General Physics I or Honors General Physics I	
Select one of the following:		4
BIOL 1011	General Biology I (F)	

BIOL 1111 or BIOL 1911	Introduction to Organismal Biology or Honors Introduction to Organismal Biology	
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life or Honors Intellectual Heritage I: The Good Life	3
GenEd Breadth Course		3

Credit Hours **14**

Spring

Select one of the following: 4

PHYS 1062 or PHYS 1962	Elementary Classical Physics II or Honors Elementary Classical Physics II	
PHYS 2022 or PHYS 2922	General Physics II or Honors General Physics II	

Select one of the following: 4

BIOL 1012	General Biology II (S)	
BIOL 1112 or BIOL 1912	Introduction to Biomolecules, Cells and Genomes or Honors Introduction to Biomolecules, Cells and Genomes	
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology or Honors Introduction to Cellular and Molecular Biology	
IH 0852 or IH 0952	Intellectual Heritage II: The Common Good or Honors Intellectual Heritage II: The Common Good	3

GenEd Breadth Course 3

Elective 2

Credit Hours **16**

Year 3**Fall**

EES 2001	Physical Geology	4
SCTC 3001	History of Science	3
Physics Elective (2000+) ¹		3-4
GenEd Breadth Course		3-4
Elective		2-0

Credit Hours **15**

Spring

Select one of the following: 3-4

CIS 1051 or CIS 1951 or CIS 1057	Introduction to Problem Solving and Programming in Python or Honors Introduction to Problem Solving and Programming in Python or Computer Programming in C	
CIS 1052	Introduction to Web Technology and Programming	
CIS 1053	Programming in Matlab	
SCTC 3312	Coding STEM Lessons (Must be taken for 3 credits)	
SCTC 2396	Writing for Science and Technology	3

Physics Elective (2000+)² 3-4

GenEd Breadth Course 3

Elective 3-1

Credit Hours **15**

Year 4**Fall**

Select one of the following: 3-4

PHYS 1004	Introduction to Astronomy (F)	
CIS 1051 or CIS 1951 or CIS 1057	Introduction to Problem Solving and Programming in Python or Honors Introduction to Problem Solving and Programming in Python or Computer Programming in C	
CIS 1052	Introduction to Web Technology and Programming	
CIS 1053	Programming in Matlab	
SCTC 3312	Coding STEM Lessons (Must be taken for 3 credits)	

Physics Elective (2000+) ²		3-4
Science Breadth Elective ²		3-4
GenEd Breadth Course		3
Elective		3-0
	Credit Hours	15
Spring		
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3
Physics Elective (2000+) ²		3-4
Science Breadth Elective ²		3-4
Elective		3
Elective		4-2
	Credit Hours	16
	Total Credit Hours	123

1

MATH 2043 is recommended as it is a prerequisite and / or co-requisite of most Physics Concentration Electives.

2

See Requirements for course options.

(F) - Fall only course		
(S) - Spring only course		

Natural Sciences Minor

Overview

Modeled after the existing Natural Sciences bachelor's degree programs, the **Minor in Natural Sciences** is available to students from both the College of Science and Technology (CST) and other colleges. For students outside of CST who have previously taken a small number of CST classes either for their major or to gain exposure to one or more of the natural science disciplines, this minor offers opportunities to explore further and gain a natural science credential. For CST students switching programs to another college, the Natural Sciences minor allows them to document completed science coursework.

Campus Location: Main

Undergraduate Contact Information

Susan Varnum, Program Director and Professor of Chemistry
 Senior Associate Dean for Undergraduate Affairs and Science Education
 College of Science and Technology
 Gladfelter Hall, Room 629
 215-204-4073
 susan.varnum@temple.edu

Minor Requirements

To earn a minor in Natural Sciences, students must meet the requirements listed below. Please note that many of these courses have Math course prerequisites that, if not already satisfied by major degree requirements, may add to the Total Credit Hours for the minor. For more information, please consult the course descriptions or ask an academic advisor.

Residency Requirements: At least 12 credits required for the minor must be completed at Temple. At least 12 SCTC credits must be completed at Temple.

Code	Title	Credit Hours
College of Science and Technology		
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
SCTC 1301	Problem Solving in Science	2

Total Credit Hours**23-24**

1

The two laboratory science courses must be from the same department.

Neuroscience: Cellular and Molecular BS

Overview

Offered by the Department of Biology, the **Bachelor of Science in Neuroscience: Cellular and Molecular** is designed to provide rigorous preparation in scientific knowledge at the molecular and cellular level to those students interested in pursuing advanced studies and professional development in neuroscience, medicine or a related field in life sciences. In addition to neuroscience, graduates in the major will be well prepared for graduate or professional studies in cell or molecular biology, biochemistry, biophysics, biomedical sciences, medicine, pharmacy, dentistry, and many allied health fields. Neuroscience graduates who do not pursue graduate studies will be prepared to accept technical positions in industry (pharmaceutical, biotech) or government and university laboratories. Graduates will be ready to conduct research on a range of neuroscience and related topics at the level of cells or molecules, including nervous system function, development, disease or injury.

Campus Location: Main

Program Code: ST-NSCM-BS

Distinction in the Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.2 cumulative GPA;
- successfully complete two semesters of BIOL 4591;
- submit final research paper; and
- present their research at a departmental research poster session.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Neuroscience: Cellular and Molecular.

- BS in Neuroscience: Cellular and Molecular / PSM in Biotechnology
- BS in Neuroscience: Cellular and Molecular / PSM in Bioinformatics and Biological Data Science
- BS in Neuroscience: Cellular and Molecular / PSM in Bioinnovation

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
BIOL 2297	Research Techniques in Genetics (S)	3
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	3
BIOL 4396	Advanced Study in Biology	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - Complete a one-credit first-year or transfer seminar.

- SCTC 1001 CST First Year Seminar for every entering first-year CST student.
- SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (77-84 s.h.)

At least 9 courses required for the major must be completed at Temple. At least 4 Biology courses must be completed at Temple.

Code	Title	Credit Hours
Biology		
BIOL 1111 or BIOL 1911	Introduction to Organismal Biology Honors Introduction to Organismal Biology	4
BIOL 2112 or BIOL 2912	Introduction to Cellular and Molecular Biology Honors Introduction to Cellular and Molecular Biology	4

CHEM 2201 & CHEM 2203 or CHEM 2211 & CHEM 2213 or CHEM 2921 & CHEM 2923	Organic Chemistry I and Organic Chemistry Laboratory I Organic Chemistry for Majors I and Organic Majors Laboratory I Organic Chemistry for Honors I and Organic Honors Laboratory I	4
CHEM 2202 & CHEM 2204 or CHEM 2212 & CHEM 2214 or CHEM 2922 & CHEM 2924	Organic Chemistry II and Organic Chemistry Laboratory II Organic Chemistry for Majors II and Organic Majors Laboratory II Organic Chemistry for Honors II and Organic Honors Laboratory II	4
Mathematics		
Select one of the following:		4
MATH 1041	Calculus I	
MATH 1941	Honors Calculus I	
Select one of the following:		4
MATH 1044	Introduction to Probability and Statistics for the Life Sciences	
MATH 1042	Calculus II	
MATH 1942	Honors Calculus II	
Neuroscience		
Neuroscience electives - select five of the following: ²		15-20
BIOL 3265	Developmental Biology	
BIOL 3312	Biostatistics	
BIOL 3324	Molecular Biology	
BIOL 3325	Research Techniques in Molecular Biology (S)	
BIOL 3333	Advanced Techniques in Microscopy (S)	
BIOL 3334	Mammalian Physiology (S)	
BIOL 3337	Comparative Biomechanics	

BIOL 3354	Neural Basis of Animal Behavior (F)
BIOL 3356	Organization and Development of the Nervous System (S)
BIOL 3361	Molecular Neuropharmacology (F)
BIOL 3365	The New Neuroimmunology (S)
BIOL 4364	Biochemistry of Embryogenesis
BIOL 4375	General Biochemistry I
BIOL 4396	Advanced Study in Biology (WI)
NSCI 3087	Techniques in Neuroscience (non-CST course)
PSY 2501	Foundations of Behavioral Neuroscience (non-CST course)
PSY 2502	Foundations of Cognitive Neuroscience (non-CST course)

Neuroscience Research/Independent Study courses ³

Take the following for a total of 6-8 credits: 6-8

BIOL 4591	Research in Neuroscience
BIOL 3082	Independent Research II

Physics

PHYS 2021	General Physics I	4
or PHYS 2921	Honors General Physics I	
PHYS 2022	General Physics II	4
or PHYS 2922	Honors General Physics II	

Total Credit Hours **77-84**

1

This course has a co-requisite of BIOL 2207.

2

Three of the five electives must be within the College of Science & Technology.

3

Research in Neuroscience (BIOL 4591)/Independent Research II (BIOL 3082) course choice should be determined in consultation with the Neuroscience faculty advisor. Students are required to have BOTH a B- or above in BIOL 3352 AND a Science GPA of 3.2 to take BIOL 4591 Research in Neuroscience. Students are required to have BOTH a B- or above in BIOL 3352 AND a Science GPA of 3.0 to take BIOL 3082 Independent Research II. The Science GPA consists of all required courses in Biology, Calculus, Chemistry, and Physics.

Code	Title	Credit Hours
(F) - Fall course only		
(S) - Spring only course		

With the exception in footnote 3 above, the research and independent study courses shown below do not count as Neuroscience electives, but may count as free elective credits toward graduation. Most research courses can only be taken ONCE for a letter grade. Check individual course descriptions for details and/or exceptions.

Code	Title	Credit Hours
BIOL 2082	Independent Research I	1 to 4
BIOL 3082	Independent Research II	1 to 4
BIOL 3181	Cooperative Research in Biochemistry	3
BIOL 3681	Cooperative Studies	2 to 4
BIOL 3685	Externship Studies	3
BIOL 4291	Extrdepartmental Research	1 to 4
BIOL 4391	Accelerated Research in Biology	1 to 4
BIOL 4483	Accelerated Research in Biochemistry	3
BIOL 4491	Research in Biochemistry	3
BIOL 4591	Research in Neuroscience	1 to 4

Note: Grades of C- or higher are required unless otherwise specified in all courses for the major, including course prerequisites. The College of Science and Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA to graduate.

------	-------	--------------

(F) - Fall only course

(S) - Spring only course

1

Select from the Neuroscience Electives list under Requirements.

2

Research in Neuroscience (BIOL 4591)/Independent Research II (BIOL 3082) course choice should be determined in consultation with the Neuroscience faculty advisor. Students are required to have BOTH a B- or above in BIOL 3352 AND a Science GPA of 3.2 to take BIOL 4591 Research in Neuroscience. Students are required to have BOTH a B- or above in BIOL 3352 AND a Science GPA of 3.0 to take BIOL 3082 Independent Research II. The Science GPA consists of all required courses in Biology, Calculus, Chemistry, and Physics.

3

Either BIOL 4396 or a Neuroscience elective can be chosen in the fall term. The course not completed in the fall must be completed in the spring term.

Pharmaceutical Sciences BS

Overview

The **Bachelor of Science in Pharmaceutical Sciences** is designed for students who are planning to obtain both a Bachelor of Science in Pharmaceutical Sciences and a Doctor of Pharmacy degree in seven years. It provides a solid science foundation and broad liberal arts education while preparing students for careers in the areas of research/laboratory work, quality control, and administration in pharmaceuticals, biotechnology, and healthcare industries.

This major is open to incoming first year students who are direct admits to the Temple University School of Pharmacy. Current students who have been admitted to the Pharmacy School and can complete this major within their first year of Temple University School of Pharmacy are welcome to declare this major.

The BS in Pharmaceutical Sciences is a 4-year, non-licensure, undergraduate bachelor's degree program, and does not qualify the student for state board examination to become a registered pharmacist.

Students must meet the admissions requirements for early admission to the Temple University School of Pharmacy.

Campus Location: Main

Program Code: ST-PS-BS

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
And one additional writing-intensive course		3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above). Up to 33 credits taken during the first year at the School of Pharmacy can be used toward this requirement.
 - Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (47-50 s.h.)

At least 9 courses required for the major must be completed at Temple. Pharmacy courses will count towards this requirement.

NOTES:

- 62-65 credits - required undergraduate prerequisites for admission to the Pharmacy Program.
- 28-25 credits - required to complete undergraduate degree requirements, including GenEd and Writing Intensive requirements not satisfied with the 62-65 credits required for admission to the Pharmacy Program.
- 33 credits - School of Pharmacy credits.

Physics BA

Overview

The **Bachelor of Arts in Physics**, offered by the Department of Physics, is designed for students who are planning for a non-research career in a field which nevertheless has an important science component. Examples include patent law, environmental law enforcement, medicine, or sales or management in a high-technology industry. Physics students learn how the natural world works. The laboratory, math and problem-solving skills they pick up are great for the job market. Physics majors teach, work on Wall Street and serve in the military. They also perform well on the admission tests for law and medical schools.

Campus Location: Main

Program Code: ST-PHYS-BA

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA and
- carry out an independent study or undergraduate thesis project.

Consult the undergraduate physics faculty advisor for more details.

Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BA in Physics.

- BA in Physics / MEd in Middle Grades Education with a Concentration in Science
- BA in Physics / MEd in Middle Grades Education with a Concentration in Science and Language Arts
- BA in Physics / MS in Physics (p. 1446)

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Arts Requirements

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
PHYS 2796	Introduction to Modern Physics	4
PHYS 4796	Experimental Physics	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
 - Students must satisfy general Temple University residency requirements (p. 1838).
- #### 2. College Requirements
- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
 - A minimum of 6 of these credits must be upper-level (courses numbered 2000 and above) CLA credits.
 - Successful completion or waiver from the second level of a foreign language.
 - Complete a one-credit first-year seminar or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Arts (56 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 5 Physics courses must be completed at Temple.

PHYS 3301	Electricity and Magnetism (F)	4

or ECE 3712	Introduction to Electromagnetic Fields and Waves	
PHYS 2796	Introduction to Modern Physics (S)	4
Six additional semester hours of Physics courses at or above the 2000-level chosen with the approval of the undergraduate Physics advisor		6
Total Credit Hours		22

Residency Requirements: At least 3 courses required for the minor must be completed at Temple. At least 3 Physics courses must be completed at Temple.

Physics with Teaching BS

Overview

The **Bachelor of Science in Physics with Teaching**, offered by the Department of Physics, is part of Temple's innovative "TUteach" teacher-training program. The BS in Physics with Teaching provides broad training in physics and prepares students for a career in secondary school teaching or an entry level position as a physicist. The education courses in major include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the BS in Physics with Teaching degree program become *eligible* for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors. In order to be *recommended* for Pennsylvania teacher certification, students must graduate with:

1. a BS with Teaching degree and
2. meet GPA and testing requirements of the state of Pennsylvania.

Students will be scheduled once each semester to meet with the TUteach advisor to ensure that students have knowledge of academic programming, internships opportunities and testing options that include test preparation. The state of Pennsylvania has specific candidacy requirements. The TUteach advisor will also help the students complete and submit the candidacy documents. All students joining the program in their freshman year must complete the PAPA examination or acquire the PAPA waiver within their first 72 credits. Transfer students, from within Temple and those from other institutions, will build a tailored program with the academic and testing benchmarks structured for efficient degree completion with the TUteach advisor. Students are encouraged to complete the appropriate PRAXIS II examination prior to student teaching. Students are encouraged to take internship courses to expand their teaching portfolio or select elective courses that will extend their knowledge of science and teaching practice.

Campus Location: Main

Program Code: ST-PHTC-BS

Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.5 major GPA;
- achieve a minimum 3.5 GPA in all Physics courses required for the major;
- achieve a minimum 3.9 GPA in the following courses:
 - SCES 2189 or SCTC 3485
 - SCES 4189 or SCTC 4485
 - EDUC 4802
 - EDUC 4388;
- write a final research paper either in a topic combining both major content and pedagogy; and
- present at a departmental research poster session.

Consult the undergraduate TUteach advisor for more details.

Learn more about the Bachelor of Science in Physics with Teaching.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Bachelor of Science Requirements

Summary of Requirements for the Degree

1. University Requirements (124 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
EES 2096	Climate Change: Oceans To Atmosphere	
EES 4696	Vertebrate Paleontology and Taphonomy	
PHYS 2796	Introduction to Modern Physics	
PHYS 4796	Experimental Physics	
MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	

- Students must complete the General Education (GenEd) requirements.
 - See the General Education (p. 83) section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete TUTEACH majors receive a waiver for 1 Human Behavior (GB), 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements (p. 1838).

2. College Requirements

- A minimum of 90 total credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
 - A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
 - SCTC 1001 CST First Year Seminar for every entering first-year CST student.
 - SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (90 s.h.)¹

At least 9 courses required for the major must be completed at Temple. At least 6 Physics courses and 3 Education courses must be completed at Temple. Though not required, students are strongly encouraged to increase training and field work experience by enrolling in SCTC 1385, SCTC 2385, or SCTC 2389. Students will also benefit from directed laboratory projects offered through SCTC 3185. These courses are offered every semester.

MGSE 3796	Differentiated Literacy Instruction in the Disciplines (grades 7-12)	3
MGSE 4189	Project-Based Instruction (F)	3
or SCTC 4485	Integrating STEM Practice in Diverse Teaching Environments	
SPED 2231	Introduction to Special Education	3
Total Credit Hours		90

1

The certification requirements need to meet Pennsylvania Department of Education standards and are subject to change. All students are strongly recommended to check with the TUteach Advisor in the College of Science and Technology to affirm the requirements that pertain to their specific major. In addition, students should check the *Undergraduate Bulletin* web site for the most current information about these programs, or the TUteach web site. It is also recommended that all students meet with an advisor before enrolling in classes specific to these majors and leading to certification as a teacher. This is to assure that a candidate's intended program of study will be compatible with the new requirements.

2

Students are required to take a two-semester sequence of laboratory science electives not within physics. The science courses can be chosen from Biology, Chemistry or Earth & Environmental Science.

3

All students are required to take a minimum of one credit.

Code	Title	Credit Hours
(F) - Fall only course		
(S) - Spring only course		
1	Students are required to take three advanced physics electives selected from the list in the requirements section.	
2	Students are required to take a two-semester sequence of laboratory science electives not within physics. The science courses can be chosen from Biology, Chemistry or Earth & Environmental Science from the list in the requirements section.	
3	All students are required to take a minimum of one credit.	

Science and Technology Writing Certificate

Overview

In an era of accelerating scientific discovery and new challenges to society and the world, an understanding of science and technology (scientific literacy) is essential for the support of a well-informed public and enabling rational policies. The effective communication of science and technology is integral to science literacy. Individuals with skills in communicating and writing in the sciences and technology, and having a strong foundation in the sciences or related field, can gain rewarding careers in the private and public sector, in bringing to the public scientific matters at a variety of levels.

The **Certificate in Science and Technology Writing** provides a foundational step for individuals seeking careers in this area. As science and technology writing necessarily requires a strong foundation in the sciences, the certificate program is taken alongside a major in a science field. The program is open to students from any college provided their major is STEM-based.

Campus Location: Main

Program Code: ST-SATW-CERT

Certificate Requirements

Prerequisites

Prerequisites for BIOL 4522, BIOL 4532 and BIOL 4533 include the requirement that students will have completed at least one of the following upper-level courses.

Code	Title	Credit Hours
Select one of the following:		
BIOL 3114	Evolutionary Ecology	3-4
BIOL 3201	Human Genetics	
BIOL 3204	Cell Structure and Function (F)	
BIOL 3225	Evolutionary Genetics	
BIOL 3232	Behavioral Genetics	
BIOL 3241	Genomics and Evolutionary Biology of Parasites and Other Dependent Species	
BIOL 3245	Marine Ecology	
BIOL 3254	Animal Behavior	
BIOL 3265	Developmental Biology	
BIOL 3275	Ecology of Invasive Species	
BIOL 3307	Conservation Biology	
BIOL 3316	Tropical Marine Biology	
BIOL 3321	Plant Community Ecology	
BIOL 3323	Global Change Science: Analytics with R	
BIOL 3324	Molecular Biology	
BIOL 3325	Research Techniques in Molecular Biology	
BIOL 3327	Immunology	
BIOL 3328	Virology	
BIOL 3329	Developmental Genetics	
BIOL 3336	Freshwater Ecology	
BIOL 3352	Systems Neuroscience	
BIOL 3364	Theory and Applications of Cancer Biology	
BIOL 3379	Biotechnology	
BIOL 3389	Field Research in Community Ecology	
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	
BIOL 3403	Genomic Biology	
CHEM 3001	Inorganic Chemistry	
CHEM 3301	Physical Chemistry Lecture I	
CHEM 3302	Physical Chemistry Lecture II	
CHEM 4401	Biochemistry I	
CIS 3207	Introduction to Systems Programming and Operating Systems	
CIS 3223	Data Structures and Algorithms	
CIS 3309	Component-Based Software Design	
CIS 3329	Network Architectures	
EES 2022	Paleontology and Stratigraphy	
EES 3001	Igneous and Metamorphic Petrology	
EES 4101	Structural Geology	
MATH 3043	Numerical Analysis I	
MATH 3096	Introduction to Modern Algebra	
MATH 3098	Modern Algebra	
MATH 3137	Real & Complex Analysis I	
MATH 3141	Advanced Calculus I	
PHYS 3301	Electricity and Magnetism	
PHYS 3302	Classical Electromagnetism	

PHYS 3701	Introduction to Quantum Mechanics I	
PHYS 4101	Thermal Physics	
Total Credit Hours		3-4

Required Courses

Students pursuing a Certificate in Science and Technology Writing must complete the following courses:

Code	Title	Credit Hours
College of Science and Technology		
SCTC 2396	Writing for Science and Technology	3
Discipline-Based Writing Intensive Course from Biology, Chemistry, Earth and Environmental Science, Computer and Information Sciences, Mathematics, Physics or other Science Major		
Select one of the following:		3-6
BIOL 2207 & BIOL 2297	Genetics and Research Techniques in Genetics (S) ¹	
BIOL 3396	Scientific Writing for Biology: The Art of Communicating	
BIOL 4396	Advanced Study in Biology	
CHEM 4196	Techniques of Chemical Measurement II	
CIS 3296	Software Design	
CIS 4397	Independent Research in Computer Science	
CIS 4398	Projects in Computer Science	
EES 2096	Climate Change: Oceans To Atmosphere	
EES 2097	Process Geomorphology	
ENVS 4198	Environmental Science Senior Seminar	
MATH 3096	Introduction to Modern Algebra	
MATH 3098	Modern Algebra	
MATH 4096	Senior Problem Solving	
PHYS 2796	Introduction to Modern Physics	
PHYS 4796	Experimental Physics	
Electives		
Select two of the following: ²		6
BIOL 4522	Introduction to Scientific and Regulatory Writing	
BIOL 4532	Introduction to Grant Writing	
BIOL 4533	Communicating Science to a Broader Audience / Non-Scientists	
SCTC 2105	Best Selling Science and Mathematics	
SCTC 2106	Learning Science with New Media	
Total Credit Hours		12-15

1

BIOL 2207 and BIOL 2297 are co-requisites of each other. Must be taken together.

2

Students may take only one of the following SCTC courses as an elective: SCTC 2105 or SCTC 2106. The other elective must be chosen from BIOL 4522, BIOL 4532 or BIOL 4533.

Residency Requirement: At least two courses for the certificate must be completed at Temple.

School of Sport, Tourism and Hospitality Management

Overview

Established in 1998, the School of Sport, Tourism and Hospitality Management (STHM) has a distinguished tradition preparing leaders in the sport, recreation, tourism and hospitality industries. Our innovative approach to learning combined with our location in the heart of Philadelphia fosters transformational education experiences and prepares students for the "experience economy." The total experience within the School of Sport, Tourism and Hospitality Management enables students to have an excellent fundamental education and exposure to working professionals, internships, and personalized placement services. As a result, students are given a competitive advantage in a job market projected to double in the next decade.

STHM's Department of Sport, Tourism and Hospitality Management offers three undergraduate major programs:

- Sport and Recreation Management
- Tourism and Hospitality Management
- Event and Entertainment Management

The focus of the undergraduate programs is to provide a broad educational foundation and to prepare students for entry into the sport and recreation management, event management, or tourism and hospitality occupations at the professional level.

The Sport and Recreation Management program prepares students interested in sport and recreation careers in the private/commercial sector, public recreation and park agencies, professional sports, interscholastic/intercollegiate athletics, youth sport agencies, voluntary agencies, campus services, armed forces and corporate/industrial settings.

The Tourism and Hospitality Management program prepares students for entry-level to mid-level positions in tourism, hospitality and event management. The program prepares students to work in convention and visitors' bureaus, destination management organizations, conference centers, resorts, casinos, hotels, theme parks, theaters and clubs.

The Event and Entertainment Management program provides students with the theoretical and practical knowledge, skills and tools to become leaders in the event and entertainment industries. Graduates will be able to pursue careers in a variety of areas related to the event and entertainment industries, including fairs, festivals, meetings, trade shows, live performances within events, historical/cultural/educational exhibits, online events, hybrid events, digital media events, film events, weddings, social events and special events.

All programs consist of coursework in the University's General Education (GenEd (p. 83)) program, the Fox School of Business and Management, STHM's major course requirements, and two supervised field experiences / internships.

Admissions

If you are applying for admission to Temple University as a freshman or a transfer student and wish to major in one of the above programs, you should select the School of Sport, Tourism and Hospitality Management as your school/college. Then choose your major—Sport and Recreation Management, Tourism and Hospitality Management, or Event and Entertainment Management—as your curriculum. Submit the required materials to the Office of Undergraduate Admissions. Once you apply, you will receive an AccessNet Username and Password to check your application status online on the Student TUportal System.

Information regarding the admissions process should be directed to the School's Enrollment Management team at asksthm@temple.edu.

Financial Aid and Scholarships

Information regarding financial aid and scholarships is available from the Office of Student Financial Services. For additional information pertaining to specific scholarships within the School's disciplines, refer to the Center for Student Services.

Honors Community

Students admitted to the University Honors Program are by default part of the School of Sport, Tourism and Hospitality Management's Honors Community. Students participate in pre-approved Fox School of Business and Management Honors courses and work with their STHM faculty to create honors versions of courses within the School of Sport, Tourism and Hospitality Management.

Student Association Information

Professional development begins with membership to associations/organizations for all School of Sport, Tourism and Hospitality Management students. We encourage our students to consider joining one of the below listed groups during their academic tenure in STHM. More information about each STHM Student Professional Organization (SPO) is available on Owl Connect.

Undergraduate Student Professional Organizations

Event Planning Association (EPA)

The Event Planning Association of STHM plans and engages all SPOs in social, bonding and informational activities, to ensure that the students are networking throughout STHM to help better their future careers.

Society of Minorities in Sport (SMS)

SMS is a professional organization that seeks to bring together undergraduate students in the community of sport who are underrepresented in the area of sport, leisure and recreation management. SMS empowers people to proactively advocate and encourage diverse experiences and opportunities that we as students bring together while working with professionals in the industry. Through conversations with minorities in leadership, as well as the facilitation of networking opportunities, SMS looks to expose students to a variety of learning and volunteer opportunities across our industry. From working with the Best Buddies initiative on their annual Friendship Walk, to programs with professors about the lack of representation among sports journalists, the experiences SMS provides for students help build awareness of issues facing minorities in sport. SMS believes in creating open and respectable environments to discuss issues within sport. SMS wants to ensure students receive the most up-to-date information possible to inspire them to make a difference in the world of sport.

Sport and Governance Association (SAGA)

The purpose of the Sport and Governance Association is to expose its members to the following opportunities: networking events with established professionals in the sports law industry, information sessions on the potential careers available, guest speaker engagements, and access to LSAT preparatory resources. All of these opportunities guide the members throughout the process of becoming successful sport business professionals. As a member of the Sport and Governance Association, individuals will gain an understanding of all the legal implications of business.

Tourism and Hospitality Student Professional Organization

This SPO will allow students an active role within their area(s) of interest as part of the Tourism and Hospitality industry. Partnering with several professional organizations, this is a great way to extend your network, become more involved, strengthen your resume and much, much more.

Women in Sport and Recreation Management

Women in Sport and Recreation Management is dedicated to uplifting women in sport and providing culminating experiences with a focus on creating connections and a positive culture for women in all areas of sport given the underrepresentation of women in the sport industry. This organization will aim to help students grow personally and professionally by having social events as well as professional development events (e.g., networking, guest speakers).

Honors Societies

Eta Sigma Delta (ESD)

Eta Sigma Delta is an international honor society that recognizes exceptional academic achievement among hospitality and tourism students. Eta Sigma Delta is administered by the International Council on Hotel, Restaurant and Institutional Education (International CHRIE), the leading international association devoted to hospitality and tourism education. To earn this membership, students have to hold at least a 3.0 minimum in a 4.0 grade point average system and be in the top 20% of their class to be eligible for this invitation. With the expansion of International CHRIE, membership is no longer limited to those who are studying in the United States.

Rho Phi Lambda (RPL) Professional Honorary Fraternity

Rho Phi Lambda is a National Honorary Recreation, Parks and Leisure Services Fraternity. Rho Phi Lambda strives to recognize Sport and Recreation Management majors who have exemplified academic excellence in scholarship, leadership and service. Membership in Rho Phi Lambda cultivates student professional development through networking opportunities, scholarship eligibility, résumé building, and campus and community service initiatives.

Special Facilities and Programs

Center for Student Services (CSS)

The CSS encourages a collaborative relationship between advisor and student, ultimately empowering the student to make sound and responsible decisions concerning their education. The student takes an active role in the utilization of the services offered by the School, and the University at large, while the academic advisor strives to assist the student with their academic, cultural, emotional and pre-professional needs.

Center for Industry Engagement (CIE)

The CIE links classroom learning to successful career development. The CIE resources offer students the latest internship and job opportunities through counseling on résumés, cover letters, interviewing skills and selection criteria.

Sport Industry Research Center (SIRC)

SIRC provides opportunities for academics, students and practitioners to explore the potential of sport to impact the communities within which they exist. Through a series of initiatives, SIRC attempts to conduct and disseminate research, educate and train executives, and function as a think tank and informational resource for those involved in the sport industry. Included among the initiatives that SIRC is involved in are: executive workshops, doctoral student training, community-based programming, event management and program consulting, and academic dissemination of cutting-edge research and managerial best practices.

U.S.-Asia Center for Tourism & Hospitality Research

Temple University's U.S.-Asia Center for Tourism & Hospitality Research was established to be a leading braintrust that advances the development of the U.S. and Asian tourism and hospitality industries, education, and research. With extensive connections across the globe and deep roots in the city of Philadelphia—the first World Heritage City in the U.S.—the Center is uniquely positioned to propel Temple University and STHM's international presence.

The U.S.-Asia Center conducts cutting-edge multidisciplinary research and consultancy specific to the tourism, hospitality and related industries in the U.S., Asia, and the entire Asia-Pacific region. It aims to establish and enhance connections between government, industry and other public entities in the tourism and hospitality areas. A few research areas include:

- destination marketing
- big data analytics
- consumer profile analysis
- yield and revenue management
- hospitality asset evaluation

Members of the Center are STHM faculty with national and international recognition, and come from broad disciplinary and industry backgrounds.

Undergraduate Programs

- Esports Certificate (p. 1758)
- Event and Entertainment Management BS (p. 1759)
- Event and Entertainment Management Certificate (p. 1763)
- Event and Entertainment Management Minor (p. 1764)
- Sport and Recreation Management BS (p. 1764)
- Sport Management Certificate (p. 1769)
- Sport Management Minor (p. 1770)
- Sport Marketing Certificate (p. 1771)
- Tourism and Hospitality Management BS (p. 1772)
- Tourism and Hospitality Management Certificate (p. 1776)
- Tourism and Hospitality Management Minor (p. 1777)

Academic Policies & Regulations

Please see Undergraduate Academic Policies (p. 1835) in this *Bulletin*. Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions for the School of Sport, Tourism and Hospitality Management, appear below.

All advising issues regarding academic policies and regulations should be directed to the School of Sport, Tourism and Hospitality Management's Center for Student Services (CSS) in Speakman Hall Suite 108, 1810 N. 13th Street.

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Student Code of Conduct, Good Neighbor Policy, and STHM Students' Doctrine of Responsibility

All students in the School of Sport, Tourism and Hospitality Management are expected to abide by Temple University's Student Code of Conduct, Good Neighbor Policy, and the STHM Students' Doctrine of Responsibility.

The School of Sport, Tourism and Hospitality Management (STHM) represents a high degree of scholastic excellence. In turn, the School expects an enhanced level of responsibility and preparation from its students. STHM students represent the School in a variety of forums, including, but not limited to, the classroom, internships and workplace settings. These environments require professionalism, commitment, knowledge and mutual respect. The STHM Students' Doctrine of Responsibility policy will assist students in their pursuit of excellence while earning their degrees in Event and Entertainment Management, Sport and Recreation Management, or Tourism and Hospitality Management.

Grievance Procedures and Ombudsperson

University Ombudspersons are designated annually by the provost and vice presidents of the University. They are knowledgeable about harassment matters and trained to assist in understanding and resolving informal complaints. Ombudspersons are sensitive to the feelings, rights, and interests of all parties, and have demonstrated ability to handle confidential and sensitive matters in a discreet manner.

STHM's Academic Grievance Procedures are detailed in the STHM Academic Grievance Procedures. Additional information can be obtained from Temple University's Student and Faculty Academic Rights and Responsibilities policy.

For further information, contact:

Debra Blair, Ombudsperson
368 Speakman Hall
1810 North 13th Street
215-204-1077
dblair@temple.edu

Temple University's Statements and Policies can be found on the Office of Institutional Diversity, Equity, Advocacy and Leadership (IDEAL) web site.

Program Performance

Students not in good standing are subject to collegial warning and/or probation, or they may be academically dismissed and will be so notified by the Undergraduate Studies Office. See the University policy on Academic Standing (p. 1840) for details on academic warning, academic probation, academic dismissal and reinstatement.

Transfer Between Colleges Within the University

Students may initiate transfer to STHM from another school or college of the University if they are in academic good standing, holding a minimum cumulative GPA of 2.0.

How to Change Your Major

As you begin or make your way through your academic journey, you may find something else more suited to your interests and goals. If you are interested in a major within the School of Sport, Tourism and Hospitality Management, see below for the options available to you.

Step 1: Review the School overview in the university change of major Canvas course.

Students interested in declaring a major in STHM should review the STHM Change of Program PowerPoint presentation within the "Welcome to Temple University's Change of Program (COP) Process!" Canvas dashboard via TUPortal.

Step 2: Consult with STHM Representative.

After reviewing the school overview in Canvas, students who want to proceed with a major change or find out more information on the programs and process, should schedule an appointment with STHM assistant dean, Heather Blackburn. Students may e-mail Heather Blackburn (hblackburn@temple.edu) to setup an appointment and/or for an advisor referral.

Step 3: Complete Change of Program Request Form.

After meeting with the assistant dean, students who want to proceed with the major change should complete the Change of Program Request form online; a change of program will be processed through the registrar's office. Please allow one week for the change to be processed. Student records will be updated only during a drop/add period or the start of the next academic semester.

Step 4: Meet with an STHM Academic Advisor.

Once the Change of Program Request form is processed, students should meet with their new academic advisor to discuss their prior course history, future course registration, and graduation planning. Students will need to e-mail their advisor to make an appointment. The new advisor will be identified during the change of major meeting.

How to Add a Minor or Certificate for Non-STHM Majors

Guidelines for Non-Majors interested in STHM coursework:

- Non-Major students should, upon expressing interest in STHM coursework, seek advising guidance from their home school/college first to ensure availability within their graduation plan.
- Determine which STHM minor or certificate you wish to pursue by reviewing the Undergraduate Bulletin (p. 1753) (minors/certificates are listed under the Programs tab).
- If you would like to discuss the STHM minor or certificate more in-depth, please e-mail sthmcss@temple.edu to setup an appointment with an academic advisor assigned to the certificate of interest (see Advising (p. 1756) tab in *Bulletin*).
- You can officially declare your STHM minor or certificate via our GoogleForm. If course overrides are needed to register for certain courses, please e-mail sthmcss@temple.edu for approval.
- Students who elect to take STHM 0857 should consult with an STHM academic advisor in reference to the courses' applicability to their curriculum. There are multiple cross-listed courses with other colleges that will only apply once to a student's academic plan.
- In instances where a minor and certificate are offered with the same program titles, such as the certificate and minor in Event and Entertainment Management, the certificate and minor in Sport Management, and the certificate and minor in Tourism and Hospitality Management, students may not earn both credentials. If a student completes the certificate requirement and wishes to upgrade to the minor, then the certificate would need to be rescinded.

School Graduation Requirements

The information below is for new freshmen and transfer students admitted fall 2023 - spring 2024. For information prior to this time, refer to the catalog year for your matriculation semester and year. Click on the Archives link to see Bulletins from previous years.

- Students seeking a Bachelor of Science degree from the School of Sport, Tourism and Hospitality Management (STHM) must complete 124 semester hours of coursework and have a cumulative GPA of 2.0 and a major GPA of 2.0. Per university requirements, a letter grade of C- or better must be earned for all required coursework.
- Certain courses may fulfill multiple requirements. In consultation with an advisor, students will be able to plan their curriculum more effectively.
- The total number of credit hours at graduation may vary for some students based on initial placement exams, transfer evaluations, individual curricular choices, and academic progress.
- Students are required to ensure that they have fulfilled the necessary prerequisites for any given course or course sequence. Students may read the entire policy in the section on university-wide Academic Policies (p. 1835).
- To expose students to the wide variety of opportunities in their chosen fields and prepare for future internship opportunities, STHM requires students to complete 250 Industry-Related Hours by the start of their senior year. Students must complete a minimum of four (4) unique experiences across their 250 accumulated hours. Students are encouraged to pursue their Industry-Related Hours in diverse areas including non-profit/community support needs as well as industry specific needs. Industry Hours are submitted to the CIE via their Canvas site. Students should submit their hour submissions each semester or at minimum annually to the CIE.
- Student Professional Organizations (SPOs) exist to provide students further engagement with industry partners, events, and leadership opportunities not provided in the classroom environment. STHM offers several SPOs for students that complement our industry-focused curriculum. To ensure students are professionally ready and competitive in the internship and job market, STHM students are strongly encouraged to join and be actively engaged in an STHM- or Fox-specific SPO and are strongly encouraged to join others that meet their interests. Benefits include meeting industry leaders, attending industry conferences and expanding your network of contacts.

Awarding of Certificates and Minors after Third Attempt Dismissals

- Students dismissed from STHM due to a failure at a third course attempt may still qualify to receive a minor or certificate for their STHM course credits based on the criteria below.

- **CERTIFICATE**
 - STHM students who took four or more courses (12-17 credits) can be awarded the Sport Management (excluding Sport Marketing) certificate or the Tourism and Hospitality Management (excluding Event and Entertainment Management) certificate, if they complete a declaration form.
 - For the certificate, two or more courses at minimum should be at the 2000 level or higher (i.e., the student completes STHM 1113, THM 1311, THM 2311, and THM 3311).
 - Students need a 2.00 GPA across all certificate courses with no grade lower than a C- for an applicable certificate course.
- **MINOR**
 - STHM students who took six or more courses (18+ credits) can be awarded the Sport Management minor or the Tourism and Hospitality Management minor, if they complete a declaration form.
 - For the minors, two or more courses at minimum should be at the 2000 level or higher (i.e., the student completes STHM 1113, THM 1311, THM 2311, THM 3311, and THM 3312).
 - Students need a 2.00 GPA across all minor courses with no grade lower than a C- for an applicable minor course.

Academic Advising

Dariq Cobb, MEd

dariq.cobb@temple.edu

Students interested in any of the minors and certificates in STHM may e-mail sthmcass@temple.edu to meet with an advisor.

Services Provided Through the Center for Student Services

Center for Student Services
Speakman Hall, Suite 108
1810 N. 13th Street
Philadelphia, PA 19122
215-204-8905

The School of Sport, Tourism and Hospitality Management's advising unit, the Center for Student Services (CSS), provides individualized information on placement exams and results, majors, minors, course sequence and load, scheduling, career planning, and academic resources. As a result, students are better equipped to make well-informed decisions regarding their futures.

The CSS encourages a collaborative relationship between advisor and student, ultimately empowering the student to make sound and responsible decisions concerning his or her education. The student takes an active role in the utilization of the services offered by the School, and the University at large, while the academic advisor strives to assist the student with his or her academic, cultural, emotional and pre-professional needs.

Special Advising Policies and Procedures

The school utilizes a variety of advising sessions, such as workshops, asynchronous presentation/quiz format, virtual and walk-in sessions; however, students are encouraged to schedule individualized appointments to cater to their specific academic needs.

Faculty

John Allgood, Assistant Professor of Practice, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; MS, University of Oklahoma.

Benjamin Altschuler, Associate Professor of Practice, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Utah.

Bradley J. Baker, Assistant Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, Temple University.

Heather A. Blackburn, Assistant Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; EdD, Drexel University.

Debra K. Blair, Associate Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; EdD, Temple University.

Christine Ann Cleaver, Assistant Professor of Practice, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; MEd, Cabrini College.

George Diemer, Associate Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, Temple University.

Daniel C. Funk, Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

Ashley Gardner, Assistant Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, University of Tennessee.

Amy Giddings, Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, Temple University.

Caroline Heffernan, Assistant Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, University of Minnesota.

Jonathan E. Howe, Assistant Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

Gareth J. Jones, Assistant Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, North Carolina State University.

Jeremy S. Jordan, Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

R. Aubrey Kent, Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, The Ohio State University.

Thilo Kunkel, Associate Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, Griffith University.

Lindsey Lee, Assistant Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Houston.

Xiang Li, Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, Texas A and M University.

Lu Lu, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Washington.

Joseph Mahan III, Associate Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, University of Maryland College Park.

Chihyung Michael Ok, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, Kansas State University.

Richard Ridall, Associate Professor of Instruction, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; MEd, Temple University.

Wesley S. Roehl, Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, Texas A and M University.

Ira L. Rosen, Associate Professor of Practice, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; MA, Montclair State University.

Michael F. Sheridan, Associate Professor of Practice, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; EdD, Temple University.

Elizabeth Taylor, Assistant Professor, Department of Sport and Recreation Management, School of Sport, Tourism and Hospitality Management; PhD, University of Tennessee.

Luorong Wu, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, The Pennsylvania State University.

Yang Yang, Associate Professor, Department of Tourism and Hospitality Management, School of Sport, Tourism and Hospitality Management; PhD, University of Florida.

Esports Certificate

Overview

Consumer demand for esports and the growth of organized video game competitions has generated considerable attention from sport, event and entertainment industries. Esports has grown from a fringe activity to a popular sport entertainment product fueled both by participants and spectators with competitions involving both professional and amateur participants. Esports represents a sport entertainment product requiring management expertise related to events, merchandise, sponsorship, endorsements, marketing, technology, human resources, social media, governance, legal issues, celebrity culture and athlete well-being.

The four courses within the **Certificate of Esports** serve as the foundation for understanding business and managerial elements of esports. Esports courses are taught by industry professionals and faculty with knowledge of esports. Each of the four courses involve synchronous and asynchronous learning delivered in seven-week online intensive formats.

The Esports certificate is open to all undergraduate majors except students in the Sport and Recreation Management (SRM) major. SRM students may declare Esports as a concentration as an alternative pathway.

Campus Location: Main and Japan

Program Code: TH-ESPT-CERT

Declare Your Certificate

Students interested in declaring this certificate in the School of Sport, Tourism and Hospitality Management (STHM) should follow these steps:

1. First, meet with your home academic advisor to confirm the minor will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcss@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.
2. Submit a Change of Program Request form to officially add the certificate.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

Requirements

Code	Title	Credit Hours
Required Courses		
SRM 3233	Esports Management and Industry Trends	3
SRM 3234	Esports: Legal and Ethical Challenges	3

Elective Courses

Select two from the following courses:

6

SRM 3220	Special Topics in Sport and Recreation Management ^{1,2}
SRM 3235	Esports Social Media Management and Fan Engagement
SRM 3236	Esports Revenue Production

Total Credit Hours**12**

1

As approved by the SRM department.

2

Course may only be applied once toward the certificate.

A grade point average of 2.0 in the certificate is required as well as a minimum grade of C- in each course.

Event and Entertainment Management BS

Overview

The **Bachelor of Science in Event and Entertainment Management** provides students with the theoretical and practical knowledge, skills and tools to become leaders in the event and entertainment industries. Graduates will be able to pursue careers in a variety of areas related to the event and entertainment industries, including fairs, festivals, meetings, trade shows, live performances within events, historical/cultural/educational exhibits, online events, hybrid events, digital media events, film events, weddings, social events and special events.

Students may complete one of the following **optional concentrations**:

- Live Entertainment
- Tourism and Hospitality Management

Campus Location: Main**Program Code:** TH-EVEM-BS

Leadership and Contact Information

Daniel Funk, PhD, Associate Dean
215-204-1972
dfunk@temple.edu

Heather A. Blackburn, EdD, Assistant Dean
215-204-4503
heather.blackburn@temple.edu

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

University Requirements

All new students are required to complete the University's General Education (GenEd (p. 83)) curriculum (35-36 credits).

School of Sport, Tourism & Hospitality Management Foundation Requirements

Code	Title	Credit Hours
STHM 1113	Foundations of Experience Design and Management	3
STHM 2114	Leisure and Tourism for a Diverse Society	3
STHM 2001	Career Exploration and Development Seminar	1
STHM 3185	Internship I	3
STHM 4185	Internship II	6 to 12
One of the following Approved Professional Development Electives (if STHM 4185 is taken for 6 credits):		0-3
CSI 1111	Introduction to Public Speaking	
PR 1552	Introduction to Public Relations	

ADV 2104	Personal Branding
SGM 3501	Entrepreneurial and Innovative Thinking

All students must earn a C- or higher in all courses required in the School of Sport, Tourism, and Hospitality Management (STHM) curriculum.

Designated Writing Intensive Courses

All Temple students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are as follows:

Code	Title	Credit Hours
THM 3396	Marketing in Tourism and Hospitality	3
THM 4398	Contemporary Issues in Tourism, Hospitality and Event Management	3

Major Requirements

Code	Title	Credit Hours
STHM 2401	Foundations of Event and Entertainment Management	3
STHM 3425	Event and Entertainment Operations	3
STHM 3428	Event and Entertainment Revenues	3
THM 2312	Tourism and Hospitality Sales	3
THM 2313	Financial Issues in Tourism and Hospitality	3
THM 3311	Organization Management in Tourism and Hospitality	3
THM 3314	Legal Issues in Tourism and Hospitality	3
THM 3325	Food and Beverage Management	3
STHM 3429	Entertainment Management	3
STHM 4401	Digital Portfolio Creation	3
STHM 4415	The Event Experience	3

Major Electives (12 Credits Required)

Students are required to take 12 Major Elective credits. They may take any 12 credits from the below optional concentrations or 12 credits of approved courses within the School of Sport, Tourism, and Hospitality Management.

Optional Concentrations (12 Credits Required)

Tourism and Hospitality Management Concentration Requirements

Code	Title	Credit Hours
Select 4 of the following:		12
STHM 3424	Business of Social Events and Weddings	
THM 3321	Tourism Planning and Development

STHM 3428	Event and Entertainment Revenues	3
Concentration Elective or Approved Elective		3
Concentration Elective or Approved Elective		3
Credit Hours		18
Spring		
THM 3325	Food and Beverage Management	3
STHM 3429	Entertainment Management	3
Concentration Elective or Approved Elective		3
GenEd Breadth Course		3
GenEd Breadth Course		3
Free Elective		3
Credit Hours		18
Year 4		
Fall		
STHM 4415	The Event Experience	3
THM 4398	Contemporary Issues in Tourism, Hospitality and Event Management	3
GenEd Breadth Course		3
Free Elective ³		3
Approved Professional Development Elective ¹		3-0
Credit Hours		15-12
Spring		
STHM 4401	Digital Portfolio Creation	3
THM 3314	Legal Issues in Tourism and Hospitality	3
STHM 4185	Internship II ^{1,2}	6 to 12
Credit Hours		12-18
Total Credit Hours		124-127

1

If the student selects 6 credits of STHM 4185 for their Senior Internship, the student must select one of the following approved Professional Development courses for 3 credits and also take a total of 5-6 credits of free elective (5 credits if 4-credit GenEd Arts is done). The approved Professional Development courses are: CSI 1111, PR 1552, ADV 2104, SGM 3501.

2

Students only need 6 senior internship credits (STHM 4185), but they are allowed to take up to 12 senior internship credits.

3

If students select the 12-credit STHM 4185 Internship II version they do not need to complete a second free elective. The free elective in senior year is only if a student pursues the 6-credit option of STHM 4185 and needs to reach the minimum 124 degree credits.

4

If a student takes a 4-credit GenEd Arts course, they will be 1 credit over the required 124 total needed to graduate. This total number would then equal 125 credits.

This additional credit will be applied to the Free Elective area, thus reducing the needed Free Electives from 6 to 5 credits.

Event and Entertainment Management Certificate

Overview

The **Certificate in Event and Entertainment Management** allows students across Temple University to augment their major degrees with exposure to a program that prepares students to lead and succeed in the event management industry. This program is based on the "Pinnacle" award-winning, comprehensive events planning program in our Continuing Education program and it is designed to increase student's marketable skills in their events career, and will prepare students for future success in the event planning business.

The Event and Entertainment Management certificate is open to all undergraduate majors at Temple except for School of Sport, Tourism and Hospitality Management (STHM) students. STHM students may declare a concentration instead of the certificate option.

The certificate provides a good foundation for students who wish to apply to the School of Sport, Tourism and Hospitality Management's Master of Science in Sport Business or specialize their expertise in management events. The certificate consists of a total of four required courses (12 credits).

Campus Location: Main

Program Code: TH-EVEM-CERT

Declare Your Certificate

Students interested in declaring this certificate in the School of Sport, Tourism and Hospitality Management (STHM) should follow these steps:

1. First, meet with your home academic advisor to confirm the certificate will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcss@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.
2. Submit a [Change of Program Request form](#) to officially add the certificate.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R.). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

Please note that STHM offers both a certificate and a minor in Event and Entertainment Management. Students may pursue one or the other, but not both credentials. Students in the certificate program who wish to upgrade to the minor will need to rescind the certificate. Students who are in the minor, but unable to complete it may be eligible for the certificate if all four courses and 12 credits are completed.

Contact Information

Questions? Contact us at sthmcss@temple.edu or at 215-204-8701.

Requirements

Code	Title	Credit Hours
Required Courses		
STHM 2401	Foundations of Event and Entertainment Management	3
STHM 3425	Event and Entertainment Operations	3
STHM 3428	Event and Entertainment Revenues	3
STHM 4415	The Event Experience	3
Total Credit Hours		12

A grade point average of 2.0 in the certificate is required as well as a minimum grade of C- in each course.

Note: This is designed so that any student doing a Certificate in Event and Entertainment Management would only need to declare and take two additional courses to earn the Minor in Tourism and Hospitality Management.

Event and Entertainment Management Minor

Overview

The **Minor in Event and Entertainment Management** provides students with the theoretical and practical knowledge, skills and tools to become leaders in the event and entertainment industries. The minor prepares students to pursue careers in a variety of areas related to the event and entertainment industries, including fairs, festivals, meetings, trade shows, live performances within events, historical/cultural/educational exhibits, online events, hybrid events, digital media events, film events, weddings, social events and special events.

The Event and Entertainment Management minor is open to all undergraduate students at Temple, including School of Sport, Tourism and Hospitality Management (STHM) students. However, STHM students may not do both a concentration and a minor in Event and Entertainment Management. STHM students may double count three major electives toward the minor. The other minor courses must come from free electives.

Campus Location: Main

Declare Your Minor

Students interested in declaring this minor in the School of Sport, Tourism and Hospitality Management (STHM) should follow these steps:

1. First, meet with your home academic advisor to confirm the minor will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcss@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.
2. Submit a Change of Program Request form to officially add the minor.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

Major Management Electives (12 Credits Required)

All students are required to take a minimum of 12 Major Management Elective (MME) credits from SRM or STHM subject codes. As part of the 12 credit MME requirement, students may opt to earn a concentration from the offerings below. To have a **Concentration designation** on a transcript, students must **declare the concentration through the STHM Center for Student Services (CSS) process** and follow the requirements below.

Two concentrations, Governance & Policy and Sport & Recreation Promotion, require 9 credits of specified coursework with one additional MME course of the students choosing, for a total of 12 credits. The Event Management and the Esports concentrations both require all four courses/12 credits specified below.

Note: If students select the six-credit option for STHM 4185 Internship II, then they must take an additional six credits of major coursework at the 3000 level or above or repeat STHM 4185 for an additional six credits (CSS and CSPD approvals required).

Optional Sport and Recreation Management Concentrations (9 Credits Required)

Governance and Policy Concentration Requirements

Code	Title	Credit Hours
Select three of the following:		9
SRM 3215	Stadium/Arena Design and Management	
SRM 3221	Athletics Administration	
SRM 3222	Global Sport Management	
SRM 3225	Recreation and Leisure Service Management	
SRM 3233	Esports Management and Industry Trends	

Sport and Recreation Promotion Concentration Requirements

Code	Title	Credit Hours
Select three of the following:		9
SRM 3224	Media and Communications in Sport and Recreation	
SRM 3226	Consumer Behavior in Sport and Recreation	
SRM 3227	Advanced Marketing for Sport and Recreation	
SRM 3228	Sales Management in Sport and Recreation	
SRM 3233	Esports Management and Industry Trends	

Event Management Concentration Requirements - All Four Courses Required

Code	Title	Credit Hours
STHM 2401	Foundations of Event and Entertainment Management	3
STHM 3425	Event and Entertainment Operations	3
STHM 3428	Event and Entertainment Revenues	3
STHM 4415	The Event Experience	3

Esports Concentration Requirements - All Four Courses Required

Code	Title	Credit Hours
SRM 3233	Esports Management and Industry Trends	3
SRM 3234	Esports: Legal and Ethical Challenges	3

SRM 3235	Esports Social Media Management and Fan Engagement	3
SRM 3236	Esports Revenue Production	3

Fox School of Business & Management Requirements

Code	Title	Credit Hours
ACCT 2501	Survey of Accounting	3
Select one of the following:		1
STHM 1115	Foundations of Excel for Sport and Tourism	
BA 2104	Excel for Business Applications	
ECON 1101	Macroeconomic Principles	3
MKTG 2101	Marketing Management	3
HRM 1101	Leadership and Organizational Management	3
Total Credit Hours		13

These four classes, with the exception of BA 2104, complete the required lower-division courses of the Business Minor.

School of Sport, Tourism & Hospitality Management Non-Credit Requirements

Code	Title	Credit Hours
Industry-Related Experience (Minimum 250 hours of participation required prior to STHM 4112).		
Students are encouraged to join an STHM student professional organizations (SPOs) and maintain active membership in the organization.		

Free Electives (12 Credits)

Students must take 12 credits of Free Electives. In some cases, this number may vary to meet the 124 credits required for graduation. Students can use these Free Elective credits to take any courses at Temple University. (Please contact the STHM Center for Student Services [CSS] for additional information.)

SRM Major Management Elective 2		3
SRM Major Management Elective 3		3
SRM Major Management Elective 4		3
Credit Hours		15
Spring		
STHM 4185	Internship II ¹	6-12
Free Elective 4 ²		3
SRM Major Management Elective 5 ¹		3-0

SRM Major Management Elective 6 ¹	3-0
Credit Hours	15
Total Credit Hours	124

1

If students select the 6-credit option of STHM 4185, then they must select an additional six credits of major electives at the 3000 level or above or repeat STHM 4185 for an additional six credits (CSS and CSPD permission required).

2

If a student takes a 4-credit GenEd Arts course, s/he will be 1 credit over the required 124 total needed to graduate. This total number would then equal 125 credits.

This additional credit will be applied to the Free Elective area, thus reducing the needed Free Electives from 12 to 11 credits.

Please consult your assigned STHM academic advisor.

Sport Management Certificate

Overview

The **Certificate in Sport Management** allows students across Temple University to augment their major degrees with exposure to a program that prepares students to lead and succeed in the fast-paced world of sport, recreation and leisure management. The sport management program integrates foundational business principles with innovative concepts related directly to the distinct industry of sport. Temple's Sport and Recreation Management program is one of the oldest and most distinguished programs of its kind in the country.

The Sport Management certificate is open to all Temple undergraduate majors except for Sport and Recreation Management majors.

The certificate consists of four courses in total (12 credits), with three required courses and one elective option. Students who desire additional sport and recreation courses should consider the Sport Management minor. The Sport Management minor requires students to complete six courses.

Campus Location: Main

Program Code: TH-SM-CERT

Declare Your Certificate

Students interested in declaring this certificate in the School of Sport, Tourism and Hospitality Management (STHM) should follow these steps:

1. First, meet with your home academic advisor to confirm the certificate will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcass@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.
2. Submit a Change of Program Request form to officially declare the certificate.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R.). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

Please note that STHM offers both a certificate and a minor in Sport Management. Students may pursue one or the other, but not both credentials. Students in the certificate program who wish to upgrade to the minor will need to rescind the certificate. Students who are in the minor, but unable to complete it may be eligible for the certificate if all four courses and 12 credits are completed.

SRM 3228	Sales Management in Sport and Recreation
SRM 3231	Leadership in Sport and Recreation
SRM 3233	Esports Management and Industry Trends
SRM 3237	Personal Branding of Athletes: Name, Image, and Likeness

Total Credit Hours**12**

1

Sections of this course offered by other Temple departments may be substituted.

2

Offered online.

3

Course may only be applied once toward the certificate.

Note: This is designed so that any student doing a Certificate in Sport Management would only need to declare and take two additional courses to earn the Minor in Sport Management. However, students may not receive both the certificate and the minor. If a student pursues the minor, they would need to rescind the certificate.

A grade point average of 2.0 in the certificate is required as well as a minimum grade of C- in each course.

Sport Management Minor

Overview

The **Minor in Sport Management** allows students across Temple University to augment their major degrees with exposure to a program that prepares students to lead and succeed in the fast-paced world of sport, recreation and leisure management. The sport management program integrates foundational business principles with innovative concepts related directly to the distinct industry of sport. Temple's Sport and Recreation Management program is one of the oldest and most distinguished programs of its kind in the country. The required courses serve to provide students an overview of different sectors of the sport industry; elective courses offer more in-depth exploration of the support segments across multiple industry sectors.

The Sport Management minor is open to all undergraduate majors at Temple except for Sport and Recreation Management majors. It provides a good foundation for students who wish to apply to the School of Sport, Tourism and Hospitality Management's Master of Science in Sport Business program.

Campus Location: Main

Declare Your Minor

Students interested in declaring this minor in the School of Sport, Tourism and Hospitality Management (STHM) should follow these steps:

1. First, meet with your home academic advisor to confirm the minor will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcss@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.
2. Submit a Change of Program Request form to officially add the minor.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R.). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

1

As approved by the SRM department; repeatable; current list of approved special topics courses are: Personal Branding of Athletes: Name, Image and Likeness; Esports Social Media Management and Engagement; and Emerging Multimedia Roles in the Sport Industry.

Note: This is designed so that any student doing a Certificate in Sport Marketing would only need to declare and take two additional courses to earn the Minor in Sport Management. However, students may only do either the certificate or minor. If a student enrolls in the minor, they would need to rescind the certificate.

A grade point average of 2.0 in the certificate is required as well as a minimum grade of C- in each course.

Tourism and Hospitality Management BS

Overview

The **Bachelor of Science in Tourism and Hospitality Management** prepares students for entry-level to mid-level positions in tourism, hospitality and event management. The program prepares students for careers in tourism and destination management, hospitality operations, food and beverage, gaming and event leadership and other professional opportunities in the experience economy.

Students may complete one of the following **optional concentrations**:

- Destination Management
- Event Management
- Hospitality Operations

Campus Location: Main and Japan

Program Code: TH-STHM-BS

Leadership and Contact Information

Daniel Funk, PhD, Associate Dean
215-204-1972
dfunk@temple.edu

Heather A. Blackburn, EdD, Assistant Dean
215-204-4503
heather.blackburn@temple.edu

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

University Requirements

All new students are required to complete the University's General Education (GenEd (p. 83)) curriculum (35-36 credits).

School of Sport, Tourism & Hospitality Management Foundation Requirements

All students must earn a C- or higher in all courses required in the School of Sport, Tourism and Hospitality Management (STHM) curriculum.

Code	Title	Credit Hours
STHM 1113	Foundations of Experience Design and Management	3
STHM 2001	Career Exploration and Development Seminar	1
STHM 2114	Leisure and Tourism for a Diverse Society	3
STHM 3185	Internship I (180 Hours)	3
STHM 4112	Senior Professional Development Seminar	3
STHM 4185	Internship II (600 Hours) ¹	6-12
Total Credit Hours		19-25

1

Students selecting the six-credit version of STHM 4185 Internship II must also take six credits of major electives at the 3000 level or higher or may repeat STHM 4185 for six credits in a final term. CSS and Center for Industry Engagement (CIE) approvals are required if students want to repeat STHM 4185.

Designated Writing Intensive Courses

All Temple students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are as follows:

Code	Title	Credit Hours
THM 3396	Marketing in Tourism and Hospitality	3
THM 4398	Contemporary Issues in Tourism, Hospitality and Event Management	3

Major Requirements

Code	Title	Credit Hours
THM 1311	The Business of Tourism and Hospitality	3
THM 2311	Global Issues in Travel	3
THM 2312	Tourism and Hospitality Sales	3
THM 2313	Financial Issues in Tourism and Hospitality	3
THM 3311	Organization Management in Tourism and Hospitality	3
THM 3312	Strategic Decision Making in Tourism and Hospitality Management	3
THM 3314	Legal Issues in Tourism and Hospitality	3
THM 3396	Marketing in Tourism and Hospitality	3
THM 4398	Contemporary Issues in Tourism, Hospitality and Event Management	3
Total Credit Hours		27

Major Management Electives (12 Credits Required)

All students are required to take a minimum of 12 Major Management Elective (MME) credits in STHM or THM subject codes. As part of the 12 credit MME requirement, students may opt to earn a concentration from the offerings below. To have a **Concentration designation** on a transcript, students must **declare the concentration through the STHM Center for Student Services (CSS) process** and follow the requirements below.

Two concentrations, Hospitality Operations and Destination Management, require 9 credits of specified coursework with one additional MME course of the students choosing, for a total of 12 credits. The Event Management concentration requires all four courses/12 credits specified with no elective options.

Note: If students select the six-credit option for senior internship, STHM 4185 Internship II, then they must take an additional six credits of major coursework at the 3000 level or above or repeat STHM 4185 for an additional six credits (CSS and Center for Industry Engagement approvals required).

Optional Tourism and Hospitality Management Concentrations (9 Credits Required)

Hospitality Operations Concentration Requirements

Code	Title	Credit Hours
Select three of the following:		9
THM 3320	Special Topics in Hospitality Management	
THM 3324	Hospitality Operations	
THM 3325	Food and Beverage Management	
THM 3328	Gaming and Casino Management	
THM 3329	Revenue Management in Tourism and Hospitality Management	
STHM 3425	Event and Entertainment Operations	

Destination Management Concentration Requirements

Code	Title	Credit Hours
Select three of the following:		9
THM 3321	Tourism Planning and Development	
THM 3322	Destination Management Organizations	
THM 3327	Advanced Destination Marketing Systems	
THM 3330	Special Topics in Destination and Event Management	

Event Management Concentration Requirements

Code	Title	Credit Hours

THM Major Management Elective ²		3-0
Credit Hours		15

Total Credit Hours **124**

¹

If a student takes a 4-credit GenEd Arts course, s/he will be 1 credit over the required 124 total needed to graduate. This total number would then equal 125 credits.

This additional credit will be applied to the Free Elective area, thus reducing the needed Free Electives from 12 to 11 credits.

Please consult your assigned STHM academic advisor.

²

Students selecting the six-credit version of STHM 4185 Internship II must also take six credits of major electives at the 3000 level or higher or may repeat STHM 4185 for six credits in a final term. CSS and Center for Industry Engagement (CIE) approvals are required if students want to repeat STHM 4185.

Tourism and Hospitality Management Certificate

Overview

The **Certificate in Tourism and Hospitality Management** allows students across Temple University to enhance their major degrees with exposure to a program that prepares students for success in the hospitality industry as well as the realm of tourism. The Tourism and Hospitality Management certificate integrates foundational business principles, tourism and destination specific knowledge as well as innovative concepts relevant to success within hospitality operations, food and beverage, gaming and event leadership.

The Tourism and Hospitality Management certificate is open to all undergraduate majors at Temple except for students in the Tourism and Hospitality Management major.

The certificate consists of four courses (12 credits); one required course with three additional courses to be selected from the list of electives.

Campus Location: Main

Program Code: TH-STHM-CERT

Declare Your Certificate

Students interested in declaring this certificate in the School of Sport, Tourism and Hospitality Management (STHM) should follow these steps:

1. First, meet with your home academic advisor to confirm the certificate will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcss@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.
2. Submit a Change of Program Request form to officially add the certificate.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R.). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

Please note that STHM offers both a certificate and a minor in Tourism and Hospitality Management. Students may pursue one or the other, but not both credentials. Students in the certificate program who wish to upgrade to the minor will need to rescind the certificate. Students who are in the minor, but unable to complete it may be eligible for the certificate if all four courses and 12 credits are completed.

Contact Information

Questions? Contact us at sthmcss@temple.edu or at 215-204-8701.

Requirements

Students should select courses in consultation with an STHM advisor.

Code	Title	Credit Hours
Required Course		
THM 2311	Global Issues in Travel	3
Electives		
Select 3 of the following:		9
STHM 2401	Foundations of Event and Entertainment Management	
THM 3321	Tourism Planning and Development	
THM 3324	Hospitality Operations	
THM 3325	Food and Beverage Management	
THM 3328	Gaming and Casino Management	
Total Credit Hours		12

Note: This is designed so that any student doing a Certificate in Tourism and Hospitality Management would only need to declare and take two additional courses to earn the Minor in Tourism and Hospitality Management. However, students may not receive both the minor and certificate. Students would need to rescind the certificate to upgrade to the minor.

A grade point average of 2.0 in the certificate is required as well as a minimum grade of C- in each course.

Tourism and Hospitality Management Minor

Overview

The **Minor in Tourism and Hospitality Management** allows students across Temple University to enhance their major degrees with additional exposure to a program that prepares students to lead and succeed in one of the world's largest and most exciting industries. The tourism and hospitality management program integrates foundational business principles with innovative concepts related directly to the distinct industry of tourism and hospitality. Temple University's Tourism and Hospitality Management program is one of the most established and distinguished programs of its kind in the country. The required courses serve to provide students an overview of different foundational elements of the industry, while elective courses offer more in-depth exposure of the support segments across a number of sectors within the industry.

The Tourism and Hospitality Management minor is open to all undergraduate majors at Temple except for Tourism and Hospitality Management majors.

Campus Location: Main

1. First, meet with your home academic advisor to confirm the minor will fit into your present academic and graduation plan. After confirming plan fit, please e-mail sthmcss@temple.edu to meet with an academic advisor or attend our peer advising hours in 108 Speakman Hall.

2. Submit a Change of Program Request form to officially add the minor.
3. Once approved, the form will be submitted electronically to the Office of the University Registrar (O.U.R). In 3-5 business days, the request will be processed and then visible within Self-Service Banner (Student Information tab).

Questions? Contact us at sthmcss@temple.edu or at 215-204-8701.

Requirements

Students should select courses in consultation with an STHM advisor.

Code	Title	Credit Hours
Required Courses		
THM 2311	Global Issues in Travel	3
THM 3324 or THM 3322	Hospitality Operations Destination Management Organizations	3
Electives		
Select 4 of the following:		12
STHM 2401	Foundations of Event and Entertainment Management	
THM 3321	Tourism Planning and Development	
THM 3322	Destination Management Organizations	
THM 3324	Hospitality Operations (if not taken as a required course)	
THM 3325	Food and Beverage Management	
THM 3328	Gaming and Casino Management	
Total Credit Hours		18

A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course.

University College

Overview

The University College offers the following programs and certificates:

- Bachelor of General Studies in General Studies (p. 1779)
- Certificate in Sustainability (p. 1783)
- Temple Science and Mathematics Scholars Program's Certificate in Specialized Studies in Science and Mathematics (p. 1782)

For information about the University College, go to <https://universitycollege.temple.edu/>.

General Studies BGS

Overview

University College offers an undergraduate **Bachelor of General Studies** (BGS) for adult learners who have earned previous college credits and have some work/life experience.

The BGS is an interdisciplinary program which consists of major coursework offered by Temple's highly esteemed schools and colleges. Students can customize their degree by choosing either an academic grouping, or by completing a minimum of 2 minors and/or credit certificates.

Academic groupings include:

- Arts and Architecture;
- Business, Sports and Communications;
- Health and Human Services;
- Humanities, Education and Social Sciences;
- Science, Technology, Engineering and Mathematics; and
- Interdisciplinary (complete at least 2 existing minors and/or credit certificates).

A combination of major coursework (including 2 writing-intensive (WI) courses), General Education courses and electives will prepare students with the critical thinking skills, effective communication abilities, and interdisciplinary knowledge necessary for achieving both academic and professional goals. The final writing-intensive (WI) course taken is a capstone (UC 4096) that provides students with opportunities to reflect on their development as learners, integrate learned knowledge, skills, and experiences, and communicate effectively by way of an original research-based project aligned with their career goals. This course must be taken in a student's last semester of study and requires advisor approval. In addition, students must have successfully completed a minimum of 27 credits in the major coursework prior to enrolling in the UC 4096.

Campus Location: Courses are offered in the day and evening at Temple's Main, Ambler and Center City campuses plus online, providing adult learners with the flexibility needed while balancing work and life priorities.

Program Code: UC-GS-BGS

Contact Information

For more information, contact a University College advisor at BGSadvising@temple.edu or Schedule an Appointment.

Learn more about the Bachelor of General Studies.

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

Summary of Requirements

University Requirements

MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.

All Temple students must take a minimum of two writing-intensive (WI) courses as part of the major. The writing-intensive courses required for this major are CLA 2096 and UC 4096. CLA 2096 is a prerequisite course for UC 4096.

Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 83) section of the *Undergraduate Bulletin* for more details.

University College (UC) Program Requirements

Completion of a minimum of 120 credits.

A minimum of 30 credits must be at the upper level (numbered 2000-4999).

A minimum GPA of 2.0, cumulative, and in the major.

Unless otherwise specified within the program requirements of a minor or certificate, a grade of C- or higher is required for all major coursework. Please consult with your advisor for additional information.

Major Requirements

Students fulfill the academic requirements by completing a minimum of 36 credits. Choose one of two options:

- Complete two minors and/or certificates offered by Temple's Schools and Colleges.
Note: Students will adhere to the School/College academic policies and requirements for the chosen minors and certificates.

OR

- Complete coursework from academic groupings such as: arts and architecture; business, sports and communications; health and human services; humanities, education and social sciences; science, technology, engineering and mathematics.
Note: A minimum of 18 credits within one academic discipline must be completed. Students should consult with an academic advisor regarding the academic discipline options.

The following applies to all BGS students:

- A minimum of 12 credits in the major must be at the upper level (2000-4999).
- A minimum of 12 credits in the major must be completed at Temple University.
- With academic advisor approval, courses at the 0800 level may be counted toward the major if not used to satisfy a General Education (GenEd) requirement.
- Alternative WI courses taken at Temple University may be considered for substitution of CLA 2096 with academic advisor approval.
- Credits for the 2 WI courses will count toward the 36 credits in the major.
- The final capstone course (UC 4096) may only be taken in the final semester of the BGS program. Advisor approval is required.
- A minimum of 27 credits in the major coursework must be taken prior to enrolling in UC 4096.

Note: The academic plan reflects a traditional 8-semester format; however, individualized academic plans are developed for each student based on transfer credits and academic/professional goals. See an academic advisor for assistance in developing a plan for all courses.

Specialized Studies in Science and Mathematics Certificate

Overview

The Temple Science and Mathematics Scholars Program is a 12-credit certificate program designed for college-bound high school juniors and seniors who have an interest in science or mathematics. All courses taken are offered through the College of Science and Technology (CST) and taught by CST faculty at Temple's Ambler Campus. This program allows high school students to take college-level courses in a small campus environment that will provide academic support, mentoring and advising to help foster success.

Once accepted into the program, students are required to take a math placement exam that will help determine appropriate courses. Students will engage in lectures and hands-on laboratories to earn college credit which may be eligible for transfer credit to a variety of two- and four-year colleges and universities, including bachelor's degrees at Temple from the College of Science and Technology. Courses will typically be offered in the afternoon or early evening to allow students to attend classes at their high school in the morning.

Once all courses/12 credits are successfully completed, students earn a **Certificate in Specialized Studies in Science and Mathematics**. Students may then continue to take higher level courses and are encouraged to apply to Temple University as an undergraduate student.

This program prepares students for future employment in fields such as health sciences, legal professions, science education, science-related business and technology, and research, and prepares students for graduate school.

Program Highlights

- A minimum of 12 credits must be earned to receive the certificate
- High school tuition rate offered
- Classes will be offered in cohorts of approximately 15-20 students
- Prepares students for a variety of majors within the College of Science and Technology
- Opportunity to work closely with faculty mentors and academic success staff
- Spend time on a college campus

Program Criteria

- Current 11th or 12th grade student
- GPA of 3.0 or better
- Strong attendance record
- Students must successfully complete all required courses to earn the certificate
- Permission from parent/guardian required for all minors
- Recommendation letter from high school guidance counselor or science/math faculty member
- Approval of a modified roster from current high school (if pursuing as dual enrollment)

Student Expectations

- Attendance
- Communication and participation
- Professional and ethical behavior
- Willingness to learn and work hard
- Positive outlook and attitude
- Interest in the fields of science and math

Campus Location: Ambler

Program Code: UC-SSSM-CRHS

 ambler@temple.edu (amblerreg@temple.edu)

Requirements

The Certificate in Specialized Studies in Science and Mathematics requires four (4) courses and a minimum of twelve (12) credit hours.

Math and science courses are dependent upon how a student scores on the Temple University math placement exam.

Code	Title	Credit Hours
SCTC 1001	CST First Year Seminar	1
SCTC 1013	Elements of Data Science for the Physical and Life Sciences	3
Select one of the following:		4
MATH 0702	Intermediate Algebra	
MATH 1021	College Algebra	
MATH 1022	Precalculus	
Select one of the following:		4
SCTC 1501	STEM Challenge: The World Around Us	
SCTC 1502	STEM Challenge: The World Within	
CHEM 1027	Applications of Chemistry	
CHEM 1031 & CHEM 1033	General Chemistry I and General Chemistry Laboratory I	
Total Credit Hours		12

Sustainability Certificate

Overview

University College offers a twelve-credit, four-course interdisciplinary **Certificate in Sustainability**. This undergraduate certificate provides an opportunity for students to advance their knowledge of sustainability from the orientation of different disciplines, to introduce them to concepts of systems thinking to make them more competitive in a job market that increasingly is requiring sustainability expertise and skills.

Students will select from an existing array of courses in various disciplines. A faculty committee will regularly review new courses proposed by the schools and colleges to be included in available offerings for the certificate.

The certificate is available to all undergraduate degree-seeking students to complete as part of their studies. Consult a school academic advisor about how the required classes fit into academic and career plans.

This certificate may be conferred upon a student upon satisfactory completion of the required credits with a minimum cumulative GPA of 2.0.

Program Code: UC-SUST-CERT

Contact Information

For questions about the Certificate in Sustainability contact sustainabilitycertificate@temple.edu.

Certificate Requirements

- The undergraduate Certificate in Sustainability will require four (4) courses and a minimum of twelve (12) credit hours.
- The four courses will be selected as follows:
 - One course (or 3 credits) from the Sustainable Environment category (SE).
 - One course (or 3 credits) from the Sustainable Social and Culture category (SS).
 - One course (or 3 credits) from the Sustainable Economics and Politics category (SP).
 - The final course taken will be Sustainability in Action (UC 3101).
- One course may be from the student's major department if it is not fulfilling a requirement within that major.

4. General Education courses can be included in the array of courses, but can constitute no more than one of the four courses toward the certificate.
5. The certificate courses in sustainability can satisfy other minors and/or certificates.

Approved Courses

Students will select from an existing array of courses in various disciplines (see course list below). The three categories (Sustainable Environment (SE), Sustainable Social and Culture (SS), and Sustainable Economics and Politics (SP)) within the Certificate of Sustainability have a list of courses that satisfy the requirements for that area. To find courses offered in a specific term, see the "Finding Courses" instructions below. The codes (SE, SS, and SP) indicate which categories the course will fulfill. Please note that some courses may be offered only once a year.

Finding Courses

To find the Certificate in Sustainability courses offered in a semester within each area, students may locate the information in two primary ways:

- Go directly to the Class Schedule Search page on the university's web site. Select a semester, click Continue and click Advanced Search. Use the Attribute filter to find courses that are available in any of the following areas: Sustainable Environment (SE), Sustainable Social and Culture (SS), and/or Sustainable Economics and Politics (SP).
- Go to the TUportal. Students must log into TUportal with their username and password. Select the **Student** tab. Select **Browse Class Schedule** in the Registration channel. Select a semester and click Advanced Search. Use the Attribute filter to find courses that are available in either Sustainable Environment (SE), Sustainable Social and Culture (SS), and/or Sustainable Economics and Politics (SP).

Division of University Studies

Overview

Recognizing that not all students can or should declare an academic major upon entering college, University Studies is the academic home for students who have not yet decided on a major and students in transition between majors.

Goals and Objectives

University Studies, formed in 1998, serves any Temple student who has not chosen a collegiate home or declared a major or who needs assistance while changing from one college to another. University Studies is not a degree-granting college. Rather it is an academic unit that exists to help students explore academic options and to gain admission to a degree-granting school or college at Temple. Students can remain in University Studies until completion of 60 credits, or approximately their first two years at the university.

Admissions

Transfer students with more than 60 credits cannot be admitted to Temple as an undeclared student in the Division of University Studies. Students admitted to Temple as a University Studies student can remain in the division until they select a school/college major or upon completion of 60 credits.

Financial Aid and Scholarships

Division of University Studies Sophomore Scholarship - The DUS Sophomore Scholarship is awarded each fall to a current or former University Studies student who will be entering the sophomore year with a declared major. Students should be rising sophomores with a cumulative GPA of 3.5 or higher and a minimum of 30 completed credits. For more information and for an application, go to <https://undergradstudies.temple.edu/arc>.

Special Programs

The **Peer Mentor program** is an exciting program whose purpose is to create a community for undeclared students. It's an opportunity for current undeclared students to meet with former undeclared students with the goal of sharing their major declaration story. This includes what worked for them, what didn't work, challenges, and successes. The idea is that there is hope that every University Studies student will declare a major that's a good fit for them. Furthermore, by hearing someone else's story, each student will feel empowered and motivated to actively participate in their own journey.

Peer Mentors participate in an intense training where they learn communication skills, policies, resource referral, and understand the resources available to undeclared students. They are a guide, a non-judgmental listener, a supporter, an encourager, and a resource.

The **Major Exploration Academy** or MEA is a non-credit program aimed at guiding students toward developing a clearer picture of the major that is right for them. Students are invited to apply each spring semester. The program includes a series of four progressively focused advising sessions, with assigned exercises in between.

The Major Exploration **First Year Seminar** is an academic course designed to support student learning and development in the critical first semester of college. The course has a focus on academic and career exploration. University Studies students take the course together with members of their cohort, with shared goals of exploring major options.

Academic Distinctions

Eligibility for the University Studies' Distinguished Honors list is determined by the semester grade point average (GPA) corresponding to cut-off points that will yield the top 16% of GPAs based on the five previous fall and spring semesters for each school or college. Students must have 12 graded credits (A to F grades) in order to be eligible for dean's list for the fall or the spring semesters.

Students who begin in the fall as part-time (i.e., registered for fewer than 12 credits) and continue as part-time in the spring will be eligible for dean's list in the spring if they accumulate at least 12 graded credits (A to F grades) over the fall and spring semesters and meet the GPA criteria listed on the chart for the school or college. If a student is enrolled part-time in the fall but full-time in the spring, eligibility for dean's list will be based on spring semester grades.

The dean's list cut-offs for this academic year are calculated and published in the section on Academic Policies (p. 1849).

Contact Information

Neal Conley, Director, Academic Advising
Mitten Hall, Suite 110
Philadelphia, PA 19122-6029

dus@temple.edu
<https://undergradstudies.temple.edu/arc>

Academic Policies and Regulations

Please see the *Undergraduate Bulletin's* Academic Policies (p. 1835) section. Students are responsible for complying with all University-wide academic policies that apply to their individual academic status. Additional and unique policies or exceptions for the Division of University Studies appear below.

Academic Course Load

Academic overloads during the fall and spring semesters, students who want to take 19 or more semester hours, need special approval of the Director of Academic Advising.

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria are placed on the Distinguished Honors list. See the Dean's List (p. 1849) policy for specific GPA and credit-hour requirements.

Program Performance

Students who are placed on Academic Warning or Academic Probation will be required to meet with their advisor to discuss and develop alternative academic plans as well as discuss strategies for improving their academic performance. (See Academic Standing, Policy # 02.10.11)

Transfer between Colleges within the University: Change of Program into the Division of University Studies

Students who have earned fewer than 60 credits currently enrolled in other schools or colleges who are reconsidering their choice of major or who wish to explore other academic options may process a change of program request to enter University Studies as an undeclared major. All students interested in transferring into the Division of University Studies must meet with an academic advisor to discuss this transfer.

Students who are compelled to change their major for exhausting the permitted number of attempts in a required course (See Repeating a Course, Policy # 02.10.12) are permitted to enter University Studies as an undeclared major, regardless of the number of credits earned. Division of University Studies students who have earned 60 or more credits must consult with an advisor each term until they declare a degree-bearing major.

Grievances

Students can bring grievances to the Director of Academic Advising. Grievances regarding instructors and grades are referred to the grievance protocol for the school/college offering the course.

General Requirements

The Division of University Studies is not a degree-granting college. It is an academic unit which exists to help students explore academic programs.

Individual Program Requirements

- The total number of credit hours needed to graduate may be greater for some students based on initial placement exams, transfer evaluations, individual curricular choices (including declaration of major and student's credit totals at time major is declared), and academic progress.
- Certain courses fulfill multiple requirements. Consult your advisor to plan your curriculum more effectively.
- Students must fulfill the necessary prerequisites for any given course or course sequence. See the Prerequisites and Co-requisites Policy (p. 1860) in the University-wide Academic Policies section of this *Bulletin*.

Division of University Studies: Undeclared Option

Recognizing that not all students can or should declare an academic major upon entering college, Temple University established University Studies—the academic home for students who have not yet decided on a school/college or major. University Studies is not a degree-granting college. Rather, it is an academic unit that exists to help students explore academic options. All students must declare a major in one of Temple's degree-granting undergraduate schools and colleges upon completion of 60 credits, including any credits transferred from other institutions.

University Studies offers undeclared students a variety of services and programs to help them select an appropriate major. Students can use online resources in our Academic Information Center to research majors and careers and can participate in student success and academic exploration workshops held throughout the year. Upon declaring a major, students are required to fulfill the school/college and department requirements of that program.

University Studies does not grant degrees and students cannot graduate with an "undeclared" curriculum designation.

Suggested First-Year Academic Plan for the Undecided Student

This sample academic plan allows students to satisfy General Education requirements while exploring academic interests and majors. (Note: Entering students, particularly freshmen, are encouraged to enroll in a learning community. See Learning Communities (p. 49) and University Seminars (p. 48) for more information.)

Course	Title	Credit Hours
Year 1		
Fall		
ENG 0802 or ENG 0812 or ENG 0902	Analytical Reading and Writing ¹ or Analytical Reading and Writing: ESL or Honors Writing About Literature	4
GenEd Quantitative Literacy course ^{GQ} or Major Math Course ²		4
GenEd Breadth Course or Major Exploration Course ³		3-4
GenEd Breadth Course or Major Exploration Course ³		3
UNVS 1001	First Year Seminar I	1
Credit Hours		15-16
Spring		
IH 0851 or IH 0951	Intellectual Heritage I: The Good Life ⁴ or Honors Intellectual Heritage I: The Good Life	3
GenEd Breadth Course or Major Exploration Course ³		3-4
GenEd Breadth Course or Major Exploration Course ³		3
GenEd Breadth Course or Major Exploration Course ³		3
GenEd Breadth Course or Major Exploration Course ³		3
Credit Hours		15-16
Total Credit Hours		30-32

1

Depends on placement exam; some students may be required to take ENG 0701 or ENG 0711.

2

Depends on placement exam and potential choice of major.

3

Select an appropriate GenEd course or a class in potential choice of major in consultation with an academic advisor.

4

Note: Non-native speakers can opt for an ESL version of this course.

Academic Advising

The Academic Resource Center
Mitten Hall, Suite 110
215-204-2500
dus@temple.edu

Goal and Objectives

Students enrolled in University Studies use the advising services of the Academic Resource Center, an academic support program established in 1997 to meet the needs of deciding students. Any student at Temple, whether enrolled in University Studies or not, is welcome and encouraged to use the services of the Academic Resource Center.

Academic advisors are important sources of information on University policies and procedures, the General Education curriculum (GenEd (p. 83)) requirements, and degree programs. While students must assume primary responsibility for knowing the requirements for their degree and for acquiring information about their academic status, academic advisors are a valuable resource. Advisors introduce students to the various sources of information available on academic programs, enabling students to be well-informed partners in their own education.

At the Academic Resource Center, a staff of professional and peer advisors works closely with students from the time they arrive at Temple through their successful transitions into schools/colleges and declared majors. Advisors meet with students on walk-in and appointment bases in both individual and group advising sessions.

Students are strongly encouraged to meet regularly with academic advisors to discuss academic plans, course selection, and registration. Students not eligible for online registration are required to see an advisor for course selection and registration.

Academic advisors attempt to avoid errors when advising students about their program requirements, but schools and colleges cannot assume liability for errors in advising. Therefore, students must assume primary responsibility for knowing the requirements for their degree and for acquiring current information about their academic status.

Services Provided through the Advising Office

- Individualized advising geared towards helping students declare majors and complete the intra-university transfer process (transferring from one Temple school/college to another)
- The *Major Exploration Academy*, a four-step, non-credit program in which a dedicated academic advisor helps guide students toward selecting a major through self-reflection activities, the completion of major and career worksheets, and investigating career options
- UNVS 1002 First Year Seminar II, a one-credit course designed to help undeclared students explore possible career and major paths at Temple
- Workshops on academic planning and choosing a major
- Assistance with accessing online information regarding Temple schools/colleges and majors

Special Advising Policies and Procedures

Enrollment in the Division of University Studies: Beginning fall 2002 and after, undergraduates matriculated in the Division of University Studies as undeclared majors and who entered University Studies as either freshmen, transfer students, or intra-university transfers from another Temple school or college prior to the completion of 45 credits, can remain in University Studies up to the completion of 60 credits. Students entering University Studies having completed between 45-59 credits can remain in University Studies up to two academic-year semesters if enrolled full-time or until completion of 60 credits if attending part-time.

University Studies students can declare majors throughout the year in accordance with the declaration of major standards set forth by the individual schools and colleges and the intra-university transfer guidelines established by the University. University Studies students can also request a change in status from undecided to an academic program within a college during their New Student Orientation visit.

Note: University Studies students must meet the University's minimum standard for academic progress to remain enrolled in the Division of University Studies.

Accelerated Degree Programs

Temple University offers several Accelerated Degree Programs arranged between undergraduate and graduate or professional schools and colleges. These programs enable academically qualified students to earn a bachelor's and an advance degree—graduating sooner than they would have completing two distinct programs.

+1 Undergraduate/Graduate Accelerated Programs

Eligible undergraduate students use up to 12 specified graduate credits approved by the school/college to fulfill requirements for their undergraduate degree. Upon graduation from their undergraduate program, students move seamlessly into their graduate program, which they complete, in most cases, in one additional year. Students should meet with their advisor as soon as possible to discuss requirements for eligibility and the application process.

Fox School of Business and Management

BBA or BS / MS in Actuarial Science
BBA or BS / MS in Business Analytics
BBA or BS / MS in Information Technology Auditing and Cyber Security
BBA or BS / MS in Innovation Management and Entrepreneurship

3+3, 3+4 Undergraduate/Professional Accelerated Programs

Pre-Professional Accelerated Programs allow Pre: Medicine, Dentistry, Pharmacy, and Podiatry (3+4 Tracks) students as well as Physical Therapy (3+3 Track) students the option of earning both their Bachelor's degree and Graduate Degrees in a shorter period of time after successfully passing all courses in the first year of professional school at Temple University.

Students interested in the Pre-Med 3+4 Accelerated Track must be previously accepted to Temple University as a Pre-Med Health Scholar and contact Pre-Professional Health Advising during their first semester to confirm eligibility. Students interested in all other accelerated programs should contact Pre-Professional Health Advising during the first semester of their undergraduate academic career to discuss eligibility, as well as the professional school application process.

Intercollegial Programs

Temple University offers intercollegial and interdisciplinary academic programs that involve students and departments in more than one of the university's schools, colleges and divisions. These programs provide students with opportunities to cross the boundaries of traditional academic disciplines, combine a variety of perspectives, and take advantage of faculty expertise in different departments throughout the University. The programs are designed to accommodate students' interests and prepare students for success in a variety of career fields. The schools, colleges and divisions collaborating in these programs are indicated in each description. Each college's degree requirements are described in the Schools, Colleges, and Divisions section of this *Bulletin*. Students should consult the contact person of an intercollegial program for more information about both collegial policies and requirements, as well as the program itself.

- Digital Media Technologies Minor (p. 1796)
- Environmental Programs (p. 1798)
- Mathematical Economics (p. 1798)

Digital Media Technologies Minor

Overview

The **Minor in Digital Media Technologies** is an interdisciplinary minor offered through the Department of Media Studies and Production (MSP) within the Low Klein College of Media and Communication and the Department of Computer and Information Sciences (CIS) within the College of Science and Technology. This minor is designed to expand students' knowledge of the information age and enable them to share communications over the internet using fast evolving, emerging technologies.

The minor is available to undergraduate students in Media Studies and Production, Computer and Information Science, as well as other departments and colleges. Upon completion of the minor, students should be able to demonstrate the following competencies:

- Use technology to integrate internet content with computers and mobile devices.
- Design and implement content for various digital media, utilizing database technologies.
- Critically analyze decisions made regarding the use of technology, specifically in the social and ethical domains.
- Understand the impact of current and emerging technologies on communications, both locally and globally.
- Create effective written communications make professional presentations.
- Analyze and solve problems efficiently.

Campus Location: Main

Note: Transfer credits are not accepted for credit for the minor.

hector.postigo@temple.edu

Learn more about the Digital Media Technologies minor.

Minor Requirements

- Students with a GPA of 2.00 or more may declare this minor by contacting either CST advising (215-204-2890) or Klein advising (215-204-5273). See additional Grade Requirements below.
- Three (3) of the Digital Media Technologies minor courses must be distinct from the student's major. Students should see their CST or Klein advisor for course substitutions.
- Students without a CIS background should begin their CIS courses in their Junior year or earlier.

Code	Title	Credit Hours
Two Required MSP Courses:		
Select one of the following:		3-4
MSP 1701	Introduction to Media Production	
MSP 2701	Intermediate Video Production ¹	
MSP 2751	Audio for Media ¹	
MSP 2741	Introduction to Internet Studies and Web Authoring ¹	3
Two Required CIS Courses:		
Select two courses from the following:		8
CIS 1052	Introduction to Web Technology and Programming	
CIS 1056	Advanced Web Technology and Programming	
CIS 2305	Mobile Computing Technologies ¹	
CIS 3308	Web Application Programming ¹	
CIS 3342	Server-Side Web Application Development ¹	
CIS 3344	Client-Side Scripting for the Web ¹	
CIS 3515	Introduction to Mobile Application Development ¹	
Two Electives:		
One CIS elective and one MSP elective are required. However, MSP students may choose two CIS electives instead and CIS students may choose two MSP electives instead.		
Select two courses from the following:		7-9
MSP Elective Options		
MSP 4741	Emergent Media Production	
MSP 4221	Information Technology Policy ¹	
MSP 4252	Law and Ethics of Digital Media	
MSP 4541	Mobile Media	
MSP 4614	Creating a Media Business	
CIS Elective Options		
CIS 2305	Mobile Computing Technologies ^{1,2}	
any other CIS 2000+ level course ¹		
Total Credit Hours		21-24

1

This course requires additional prerequisites outside of the Digital Media Technology Minor coursework.

2

May satisfy a CIS Elective only if CIS 2305 was not taken as a Required CIS Course.

Elective Requirements

- All prerequisites must be completed to enroll in minor courses or permission from both the faculty advisor and instructor must be obtained prior to registration.

Grade Requirements

- Minor credit is not given for grades below C-.
- Students must maintain at least a 2.00 grade point average in the program to successfully complete this minor.

Residency Requirements

At least 4 courses required for the minor must be completed at Temple. At least 2 CIS courses and at least 2 MSP courses must be completed at Temple.

Environmental Programs

Overview

Temple University offers two degrees in the Environmental Program: a Bachelor of Science degree that emphasizes scientific courses needed to understand environmental problems, and a Bachelor of Arts degree that emphasizes policy and societal impacts. The College of Science and Technology offers the Bachelor of Science in Environmental Science and the College of Liberal Arts offers the Bachelor of Arts in Environmental Studies. A minor also is offered through the College of Liberal Arts.

Requirements for the Bachelor of Science in Environmental Science

Please see the following College of Science and Technology *Bulletin* pages for details on the requirements for the Bachelor of Science degree in Environmental Science.

- Environmental Science BS with a concentration in Applied Ecology (p. 1558)
- Environmental Science BS with a concentration in Climate (p. 1564)
- Environmental Science BS with a concentration in Environmental Geochemistry (p. 1569)
- Environmental Science BS with a concentration in Hydrology (p. 1574)

Requirements for the Bachelor of Arts in Environmental Studies

Please see the College of Liberal Arts *Bulletin* page for details on the requirements for the Bachelor of Arts in Environmental Studies (p. 1014).

Requirements for the Minor in Environmental Studies

Please see the College of Liberal Arts *Bulletin* page for details on the requirements for the minor in Environmental Studies (p. 1020).

Mathematical Economics

Overview

The Department of Economics in the College of Liberal Arts and the Department of Mathematics in the College of Science and Technology offer the **Bachelor of Arts in Mathematical Economics** program as a platform for systematic concentration in the mathematical approach to economics. Economics has progressed in the last several decades by making extensive use of mathematical techniques. As a result, students who wish to pursue graduate study in economics, finance, accounting and other disciplines that make an extensive use of economics need a thorough grounding in both economics and mathematics. The Mathematical Economics curriculum provides this grounding with a broad selection of courses that cover all important areas of economics and the mathematical tools required for a critical, deep mastery of these areas. This program is especially recommended for those students who intend to pursue graduate studies in Economics.

View the requirements and academic plan for the BA in Mathematical Economics in the College of Liberal Arts (p. 1112).

Cost and Aid

Tuition and Fees

Conrad Muth, Assistant Vice President & Bursar
115 Carnell Hall
215-204-7269
conrad.muth@temple.edu
bursar.temple.edu

Registration for courses is not optional, and students must not attend courses for which they are not registered. Once a student registers for a course—or is registered by an advisor at the student's request—the student remains financially obligated for the course unless and until he or she drops the course by the prescribed deadlines for dropping and adding courses. Prior to registering for the first time each semester, students are required to accept Temple University's Financial Responsibility Agreement, which outlines the financial terms and conditions associated with course registration.

Students may drop courses and otherwise modify their registrations in Self-Service Banner (SSB) or by working with an academic advisor. Please see the Academic Calendars on the Office of the University Registrar's web site for add/drop and withdrawal deadlines for each semester and summer session.

Once registered, students must pay tuition and fees according to the Bursar's Office due date schedule. Failure to satisfy financial obligations may result in withholding of official transcripts and diplomas; denial of the right to register for future sessions; and the assessment of late fees and collection costs.

Students who are not planning to attend the semester must drop their course registration. Students who do not drop classes by the end of the official drop/add period (See Academic Calendar for specific dates) remain financially obligated for the balance due. Instructors are advised to issue letter grades (typically "F") for students who have not been attending but are on their roster of registered students.

Students who drop classes by the end of the drop/add period of a semester or summer session will have their courses dropped. This will relieve them of academic responsibility and in most instances financial responsibility associated with the course.

Students who withdraw from classes after the drop/add period are responsible for full payment of all tuition and fee charges, along with any payment plan fees, and late payment charges. These courses will be recorded on the transcript with the notation of "W," indicating that the student withdrew. Unpaid tuition balances may be referred for collection, and students may be held liable for paying all associated collection costs and/or legal fees.

Students who do not withdraw by the published deadline are responsible for payment of all tuition and fee and/or collection costs. Temple University will first apply all payments received to the oldest outstanding balance, if applicable, then to the current semester charges.

Temple University notifies students via their TUmail account to view their student account balance in TUpay. Students are required to pay the current balance by the due date in TUpay.

Acceptable forms of payment include tuition remission forms, checks (paper and electronic), cash, credit cards and money orders. Checks or money orders should be made payable to Temple University. Credit cards accepted for online payment only through TUpay include Visa, MasterCard, American Express and Discover. Please note that credit card payments are subject to a 2.75% convenience fee by the university's processor.

Payment must be **received** by the due date to assure proper crediting and to remain in good financial standing.

Payment Plans

Students are encouraged to pay the total account balance by the due date. In doing so, students avoid any payment plan fees and late payment fees. However, if students are unable to do so, Temple University offers two payment plans to assist students and their families.

Please note that payment plans are offered for the fall and spring semesters only. Payment plans are not offered in the summer semesters.

For the fall and spring semesters, students that do not pay the total account balance will be automatically enrolled in the University's Deferred Payment Plan. The Deferred Payment Plan provides additional time to pay your balance. Students will be assessed a \$50 non-refundable payment plan fee each semester if the total account balance is not paid by the semester due date. Students do not have to sign up for this payment plan. If students are automatically enrolled in the Deferred Payment Plan for fall and spring, the annual fee is \$100.

The University also offers the Temple Installment Payment Plan (TIPP) for those students who need an extended payment option. The plan allows students to make up to ten regularly scheduled monthly payments starting in May towards their future charges (five payments for fall and five payments for spring). The annual fee to sign up for this payment plan is \$80. For more information about this plan, offered through Nelnet, go to bursar.temple.edu.

Financial Counseling

Students who need assistance financing their education should speak with the Office of Student Financial Services (sfs.temple.edu/about). For more information on financing your education, visit payingforcollege.temple.edu/.

Student Loan Counseling

All students who receive federal student loans are required by federal regulations to complete the Annual Student Loan Acknowledgment, a Master Promissory Note and Entrance Interview, studentaid.gov/. The Office of Student Financial Services can assist all students with their federal loan requirements.

The Credit and Collections unit in the Bursar's Office is responsible for all non-federal student loan entrance and exit counseling, bursar.temple.edu/loan-services/loan-counseling.

Assessing Tuition Charges

Tuition assessment at Temple University is based on full-time or part-time status, student college, student level status (undergraduate, graduate, or professional), student class level for undergraduates and in-state/out-of-state residency status. The level of the courses is not a factor in how students are assessed.

All students are placed into one of the University's schools or colleges, based on their major or program.

Full-Time Status

Undergraduate students are considered full-time students when carrying between 12–18 semester hours (s.h.). Credits in excess of 18 s.h. are additionally assessed at the per semester credit hour tuition rate.

International students, holders of non-immigrant visas, are required to pay out-of-state tuition fees and register as full-time students.

There is no distinction between full-time and part-time graduate tuition rates. All graduate students are assessed at a credit hour rate, regardless of the number of credit hours they are taking.

Part-Time Status

Undergraduates are considered part-time students when taking fewer than 12 s.h. per semester. Tuition is charged by the semester credit hour for part-time undergraduates.

In-State/Out-of-State Residency Status

A student is classified as a Pennsylvania resident for tuition purposes if his or her permanent, legal residence is in Pennsylvania. In-state residency is generally established within the context of the following overall guidelines:

- An individual who has not lived in Pennsylvania for a continuous 12-month period immediately prior to registration as a student at a Pennsylvania college or university is presumed not to be a Pennsylvania resident. A student may rebut this presumption with convincing evidence.
- A student under 22 years of age is presumed to have the residency of his or her parents or legal guardians. A student may rebut this presumption by presenting convincing evidence of emancipation and independent domicile.
- A student who receives financial aid based on residence in a state other than Pennsylvania will not be considered a resident of Pennsylvania.
- A student who is not a United States citizen or does not have an immigrant visa is presumed not to be a resident of Pennsylvania for tuition purposes; however, a student may rebut this presumption with clear and convincing evidence.

Visit the Office of the University Registrar's web site for more information about residency and a copy of the Resident Tuition Eligibility Guidelines.

Tuition Schedule

The Bursar's Office's web site contains the latest tuition schedule. It also contains a tuition calculator, which provides an estimate of your tuition rate by selecting your specific student characteristics, such as school or college, student level, residency, etc. You can also choose "Add Housing and Meal Plan" to estimate those costs, if applicable. Lastly, within the calculator, you can self-input your payment methods to help determine how you will finance your Temple education.

University-Wide Fees

The Bursar's Office's web site contains the latest copy of the fee schedule.

Please note that Tuition and Fees are subject to change by action of the university's Board of Trustees.

Temple University 2023-2024 Tuition Rate Schedule by School/College:

	Pennsylvania Residents	Out-of-State Residents

----------------------------	----------	----------

1

The full-time semester tuition is assessed to students who register for 12–18 credit hours per academic semester.

2

The full-time annual tuition consists of the fall and spring semesters. There are additional charges associated with summer registration.

3

The full-time overload is assessed to full-time students who register for credit hours exceeding 18 per academic semester. Each credit hour over 18 is assessed at this per credit hour rate.

4

The part-time rate is assessed to students who register for less than 12 credit hours per academic semester. Each credit hour registered is assessed at the part-time rate.

5

One-time program fee in first semester is \$750.

All students are assessed the University Services Fee during each academic semester based upon the number of credit hours they register for. The fee breakdown can be found under the "University Services Fee" heading below.

Disclaimer: Tuition and fees are set annually each summer, regardless of the method of instruction. Temple University expressly reserves the right to deliver some or all instruction remotely at its discretion. Tuition, the university services fee and certain other fees are required to be paid in full and will not be refunded regardless of the method of instruction, the inability to access university-maintained facilities, or any disruption to or cancellation of classes, activities, events, services or programs.

Temple's refund (p. 1808) policy is available below.

By registering for classes, the student and anyone paying on their behalf acknowledges and accepts these terms.

Description of Special Charges and Fees

Students may be required to pay some or all of the following (subject to change):

Application Fee

The admissions application fee is \$55.00.

Matriculation Fee

A one-time charge is assessed of all first-year students who are degree-seeking candidates in their initial semester after admittance. This fee includes the student orientation program. The rate for undergraduate students is \$218.00 and the rate for graduate students is \$85.00. Professional students should check with their respective college as the rates vary per school.

University Services Fee

All students are assessed the non-refundable University Services Fee every semester. The University Services Fee is a single, comprehensive fee that helps fund a number of university services, including

- Funding for state-of-the art computer equipment and technologies to provide support for the students' academic experiences, including e-mail access and modern lab facilities;
- Access to all student activities, events and recreational facilities;
- Expansion and maintenance of recreational and academic facilities to enhance and improve student life; and
- Availability of basic student health and treatment services provided by nurses and physicians on campus.

The fee structure for the fall and spring semesters is:

- Enrolled for 9 or more credits: \$484.00
- Enrolled for 5.0 to 8.9 credits: \$347.00
- Enrolled for 1.0 to 4.9 credits: \$177.00

The fee structure for each summer session is:

- Enrolled for 9 or more credits: \$244.00
- Enrolled for 5.0 to 8.9 credits: \$184.00
- Enrolled for 1.0 to 4.9 credits: \$111.00

Please direct all questions about the University Services Fee to the Office of Student Financial Services at 215-204-2244 or sfs@temple.edu.

International Student Fee

All international students are assessed a \$178.50 international student fee in the fall and spring semesters.

Course Fees

Certain courses charge additional fees such as lab fees, etc. The charge is assessed at the time of registration for that particular course.

Late Registration Fee Policy

All students will be assessed a \$100.00 late registration fee for initial registrations beginning the first day of the term. No new registrations or registration revisions will be processed after the end of the twelfth week of classes during the fall and spring semesters and after the end of the fourth week of summer sessions.

Late Payment Fee

Tuition payments not received by the final semester due date will be subject to a \$100.00 late payment fee. Students who fail to pay their initial semester bills by the due date will automatically be enrolled in the University's Deferred Payment Plan and assessed the appropriate payment plan fees as noted above in the "Payment Plans" section.

Returned Check Penalty

If a paper or electronic check payment is returned by the bank because of insufficient funds, a closed account, an invalid account number or other reasons, a \$25.00 returned check fee will be assessed. If an account indicates a history of returned checks, the University reserves the right to suspend a student's check payment privileges. Returned checks that remain unpaid and/or cases where there are multiple returned checks may be referred to the University Disciplinary Committee and/or Temple University Campus Safety Services for further action.

Transcript Fee

Consult the Office of the University Registrar's web site for ordering instructions.

Health Insurance

Group medical insurance to defray certain medical expenses at hospitals is offered to full-time students during a limited period of time at the start of each semester. Students should consult the Human Resources Benefits Department, e-mail studentinsurance@temple.edu, or call 215-926-2270 for details

concerning costs and application procedures. International students are required to buy medical insurance or show proof of comparable coverage to the Human Resources Benefits Department.

Veteran/Military Education Benefits

Temple University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33.

Temple University will impose a late fee and financial hold for those students who have an outstanding balance beyond the amount of expected VA tuition and fee payment for the term.

Tuition and Fees Policy

I. Policy

A. Tuition charges and fees are based upon the student's enrollment status in the respective schools or colleges. Refunds are made in accordance with the student's academic records.

B. Students will be charged 100% of their semester bill unless a course drop form is processed by a registration office of the university or the student successfully drops courses through Self Service Banner by the Drop/Add deadline date. See registrar.temple.edu/academic-calendar for add/drop and withdrawal deadlines for each semester (please note that deadlines may vary according to the Part of Term in which the course is scheduled). Students who process their course drops by the deadline date will be issued a 100% refund.

C. No complete financial credit will be made if a student does not process course drops for all registered classes.

D. Students who are still registered for classes after the Drop/Add deadline date are responsible for paying all related tuition and fees. The record for students who withdraw will reflect withdrawal ('W').

II. Exceptions

A. Failure to Process Drop or Withdrawal Form by Deadline

Under extreme, extenuating circumstances, an appeal may be made to the Office of the University Registrar if the drop transaction is not completed by the deadline, and the student did not attend classes after the deadline date. All appeals must be signed by an academic advisor or a program coordinator and accompanied by the following information:

1. A statement explaining the extenuating circumstances of the appeal.
2. A properly-signed registration schedule revision or official withdrawal form available from the Dean's Office.
3. Supporting documentation that will establish that the student never attended the semester in question or that he/she did not attend beyond the official refund period.
4. Appeals for retroactive course deletions must be filed prior to the end date of the semester for refunds to be considered. If the above conditions are met, the Office of the University Registrar will direct the removal of the semester's records from the academic history. This automatically results in a 100% refund of tuition and fee charges for the semester.

B. Death of a Student

In the event of death during a semester, the student's account will be credited with a 100% refund of tuition and fee charges for the semester. The student's record will reflect excused withdrawals ('WE').

C. Serious Extenuating Circumstance Which Prevents a Student from Attending All Classes

In the event of a serious extenuating circumstance (medical, family emergency, military deployment, or other) that prevents the student from completing all courses, the following steps can be taken within one (1) year from the end date of the semester:

1. The student should provide the Office of the University Registrar with a complete Petition for Excused Withdrawal, containing the following as appropriate:
 - a. A personal statement from the student listing the reason(s) for their excused withdrawal request.
 - b. Medical Provider's Statement from a licensed physician verifying that the student or family member was ill. NOTE: For purposes of this policy, a family member is defined as the student's parents, spouse, child(ren), or any other family member noted under the federal Family Leave Act.
 - c. Verification from the student's instructor(s) or department chairperson(s) of last known date of participation in or attendance at an academically related activity (online or in person).
 - d. Supporting documentation for serious family emergency.
 - e. United States military deployment orders.

2. If the above criteria in C.1 are met and the petition is approved, the student's record will reflect excused withdrawals ('WE' or 'M' for military deployments) and the bill will reflect an adjusted tuition charge (if any) in accordance with the attached schedule. A credit will be issued on a pro-rated basis after:
 - a. Confirming that the student has no other outstanding balances, and
 - b. Having the Department of Student Financial Services adjust any financial aid awards, where applicable, in accordance with state and federal regulations.
3. The effective date for all credits will be based on the earlier of either:
 - a. The official date of withdrawal, as established by the Office of the University Registrar, or
 - b. The physician's date of certification, if the student is physically unable to complete a withdrawal by the end of the semester.

D. Employment Change/Relocation

1. If a student must withdraw from classes because of a mandatory job change or shift in work hours that prevents the student from attending classes, the student may request a pro-rata credit, based on the actual withdrawal date and in accordance with the Fee Schedule of Adjusted Tuition Charges, if documentation from the employer is provided showing that the individual is no longer able to take classes because of a change in job scheduling or relocation.
2. This provision applies solely for the student and only after the student has totally withdrawn from all registered courses.

III. Authority

- A. The Office of the University Registrar will have authority for determining the student's academic records.
- B. The Office of the University Registrar will have authority for approving financial exceptions to the policy.
- C. Appeals of any decision outlined under this policy will be made to the Office of the University Registrar, whose decision is final.

Tuition and Fees Refund Policy

Fee Schedule of Adjusted Tuition Charges in the Event of an Exception to the General Policy

Date of Official Excused Withdrawal	Adjusted Tuition/ Charges You Pay
Fall and Spring Semesters

18th through 21st calendar day after the end of the Drop/Add deadline date	80%
22nd through 24th calendar day after the end of the Drop/Add deadline date	90%
Thereafter	100%

Financial Aid

Emilie Van Trieste, Director
 Office of Student Financial Services
 Carnell Hall, Ground Floor
 215-204-2244
sfs.temple.edu/
sfs@temple.edu

Application Procedures

Documents Needed to Apply

The Free Application for Federal Student Aid (FAFSA) is the only document required by Student Financial Services (SFS) and **MUST** be filed online each year at studentaid.gov/h/apply-for-aid/afsa. The federal code for Temple University is 003371. Locations and phone numbers for Temple University's SFS offices are listed at sfs.temple.edu/about.

Application Deadline

February 1

Priority consideration is given to new and renewal applications received by the federal processor by this date. Late applicants will be considered, but all funding sources may not be available.

Verification and Financial Aid Requirements

Federal regulations require that the Office of Student Financial Services reviews all student financial aid applications (FAFSA information) for accuracy. The Office of Student Financial Services is required to resolve any conflicting information, inconsistencies or errors made on FAFSA applications to ensure the integrity of federal student financial aid programs.

More information on all financial aid requirements and the Federal Verification process is available at sfs.temple.edu/eligibility/eligibility-requirements/federal-verification.

Submission of requested requirements is required within thirty days. If all documents are not received by the deadline, all federal and university need-based aid will be removed from the financial aid offer.

Your financial aid eligibility will be outlined in the financial aid offer. All students (new, transfer, and continuing) will receive an e-mail notification when the financial aid offer is available to review online via the Costs and Aid Tab located within the student's TUportal.

International Students

The Office of International Services, 215-204-7229, offers limited financial assistance to persons holding non-immigrant visas. Federal regulations limit most financial aid to U.S. citizens or eligible non-citizens. Learn about eligibility requirements at studentaid.gov/understand-aid/eligibility/requirements.

Please contact International Student and Scholars Services for more information.

Academic Requirements

Applicants for Federal, State and University financial aid programs administered by Temple University must be accepted for admission or currently enrolled as a matriculated student in a degree program.

A student may apply for a Federal Direct Loan, or a parent may apply for a Federal Parent Loan on behalf of a dependent student, for coursework that is documented as a prerequisite for admission into a degree-seeking Temple University program. If enrolled at least half time in these prerequisite courses, the student may be eligible for loans for one consecutive 12 month period.

Satisfactory Academic Progress

Financial aid funds are restricted to students who make satisfactory academic progress. The qualitative standard is defined as being in good academic standing as defined by the school or college in which the student is enrolled. The quantitative component of the satisfactory academic progress standard requires students to successfully complete 67% of all attempted credits. For more information, see sfs.temple.edu/policies/satisfactory-academic-progress-sap.

Enrollment Status

Some financial aid programs are restricted to full-time students. Other aid programs are available to both full-time and part-time students. (NOTE: High school students accepted under the Early Admissions Program are not eligible for financial aid until they receive their high school diploma.)

Students should be aware that dropping and adding courses can affect financial aid eligibility, and they must notify the Office of Student Financial Services, sfs@temple.edu, of any change in enrollment status.

Academic Dismissal/Reinstatement

Eligibility for financial aid, including federal work-study, ends if a student is academically dismissed or ceases to be enrolled.

Financial Aid Eligibility -- Need Analysis

Some financial aid is offered to students based on financial need. Financial need is determined by the following U.S. Department of Education formula:

(Estimated cost of attendance) minus (Expected Family Contribution¹) minus (Expected Financial Aid) equals Financial Need

1

The Expected Family Contribution (EFC) is determined by a federal formula based on information reported on the student's FAFSA application. The EFC is the number that's used to determine a student's eligibility for federal student financial aid. This number results from the financial information a student and/or parent provided in the FAFSA application. The student's EFC is reported to the student on the Student Aid Report (SAR).

The result of a need determination is met by a combination of awards called a financial aid package.

Other sources exist that may be available to students for educational assistance. Some of these are private scholarship programs, Cooperative Education programs, Veterans Administration benefits, public assistance, and Social Security benefits. If outside assistance is received, financial aid offered by the university may be adjusted.

Independent Student Definition

Federal Financial Aid regulations define a student as independent if they meet the FAFSA criteria. For more information, see studentaid.gov/apply-for-aid/fafsa/filling-out/dependency

Federal regulations require that a student not meeting the definition of independent apply as a dependent. These students must provide income, asset, and household information for themselves and their parent(s). For more information, see studentaid.gov/apply-for-aid/fafsa/filling-out/parent-info

Estimated Financial Aid Cost of Attendance

Financing a college education takes planning and budgeting. Students should try to plan ahead, anticipating costs and resources, and should request aid for the entire academic year. The basic budget for a year at Temple should include tuition and fees, housing and meals, books and supplies, living expenses, and transportation. Tuition shown in the following example is an estimate for undergraduates attending Main Campus. Financial aid offers will be adjusted accordingly for programs having different tuition rates. The figures in the table are based on estimates from the U.S. Bureau of Labor Statistics. The economy and one's style of living may make actual costs higher or lower.

Estimated Undergraduate Financial Aid Cost of Attendance for the 2023-2024 Academic Year

	In-state	Out-of-state
Tuition and Fees (Estimated)	\$17,372	\$30,607
Housing and Meals (Estimated)	\$15,148	\$15,148
Books/Supplies (Estimated)	\$1,515	\$1,515
Living Expenses/Transportation/Personal/Miscellaneous (Estimated)	\$4,030	\$4,030
Totals	\$38,065	\$51,300

NOTE: Sample above is meant for a student living on campus in a dorm or off campus in an apartment paying rent. A student living at home or with family/friend will have a lower financial aid cost of attendance. Actual rates will vary depending on school/college, program, housing selection and meal plan option. See bursar.temple.edu/tuition-and-fees/tuition-rates. **All rates above are estimates.**

Financial Aid Notification and Refund Policy

Applicants are notified of aid eligibility by e-mail after applications have been reviewed. Financial aid may consist of a combination of scholarship, grant, loan, and/or a work study opportunity.

A refundable credit balance may result on your student account because of financial aid / loan disbursements, over-payments and/or account adjustments. If the credit balance is created because of an over-payment made by check or electronic check, the refund will not be processed for at least ten (10) business days to allow time for the check payment to clear the bank.

If the credit balance results from a credit card payment made within the last 90 days, the credit card will be refunded up to the amount of the payment first. Any remaining credit card balance will be refunded through direct deposit or paper check.

Financial aid disbursements can occur as early as two days prior to the start of the semester and refunds are processed continually during the semester as aid is credited to the student account.

Students can access Student Choice Refunds within TUpay and select their refund option as soon as they pay a deposit to the University. TUpay is located in the Cost and Aid Tab of a student's TUportal account.

Using Title IV Financial Aid Refunds to Pay Prior Year Charges

Because of U.S. federal financial aid regulations, Temple University can only automatically apply a maximum of \$200 from the current academic year to pay any outstanding prior year charges.

In these cases, student could consider securing a private student educational loan, sfs.temple.edu/financial-aid-types/private-student-loans, for the prior term balance. A financial hold will remain on your student account until the outstanding balance is resolved. This hold will restrict many University services and only the Bursar's Office is able to make decisions on a student's hold status.

Federal Parent PLUS Refunds

Refunds are issued to the student. However, if the credit balance is the result of a Federal Parent PLUS loan and the parent selected the option on **the loan application** to receive the refund rather than the student and provided a valid address on the loan application, then the refund for the Federal Parent PLUS refund will be sent to the parent.

It is very important to note that parents are not always sent the refund from a Parent PLUS loan because the Parent PLUS refund MUST be the payment that causes the credit balance on the student account.

If you are an Authorized Payer in TUpay, you may elect to receive your Parent Plus refund via direct deposit. To sign-up for direct deposit for Parent PLUS refunds, select 'Student Choice Refunds' from the TUpay menu and follow the instructions. If you do not sign-up for direct deposit, your Parent PLUS refunds will be issued via paper check to the address you provided on the FAFSA.

If you are not an Authorized Payer on your student's account, the default refund method is paper check and there is no action you need to take. However, if you wish to become an Authorized Payer and sign-up for direct deposit, your student must create your access.

Student Employment

Academic Year

Federal Work-Study (FWS) allows students to earn money to help cover non-billable educational expenses by working within Temple University or at an approved non-profit, off-campus employer. Students are awarded a set amount to use for each semester. Please note that funding is limited so requests for increases are based on available funding.

Work-Study jobs are available at both on- and off-campus locations. Before seeking a position, a student must receive an award letter with a work study award and accept it within the TUportal. If an employer hires a student without confirming the student's eligibility for Federal Work-Study, the employer will be responsible for all wages the student has earned.

On-campus positions are posted on the Temple University Human Resources web site.

Off-campus positions are posted on the Work-Study Job Bank. All students who wish to work at an off-campus employer must first meet with Student Financial Services to see if their employer is approved for participation in our program. Temple University cannot pay work-study funds toward hours worked with an unauthorized employer.

Summer Sessions

Summer Federal Work-Study Program allows students to earn funding toward educational expenses for the upcoming academic year. Students wanting to work during the summer must e-mail Student Financial Services, wkstudy@temple.edu, to request a summer work-study award.

Eligibility Requirements:

- Students must have a valid FAFSA on file for the current year and the upcoming academic year.
- Students must qualify for Title IV Aid (meet Satisfactory Academic Progress).
- Students must have unmet financial need.
- Students must be either enrolled for summer term or preregistered at least part-time for the upcoming fall term.

Awarding Information

- Student Financial Services will determine a student's eligibility for a summer Federal Work-Study award based on remaining annual eligibility and summer session(s) or upcoming fall preregistration. Amounts awarded are determined based on available funding.
- Students that are not enrolled during the summer session(s), but are preregistered for the upcoming fall semester are required to adhere to the federal regulation that governs FWS. The regulation requires a portion of summer earnings to be used to meet education expenses during the upcoming academic year. These attributed earnings are considered a resource offsetting calculated need for the upcoming FAFSA award year.

Employment Information

Students working On-Campus will be hired through the department hiring the position.

Students wanting to work Off-Campus must contact Student Financial Services (wkstudy@temple.edu) to ensure the position is an approved off-campus partner.

- Off-Campus employers must be an approved partner with SFS (up to date contract on file and approved). *Temple's Off-Campus work-study program only contracts with local non-profits that provide services to the community. We do not contract with private organizations or organizations that do not meet our community service definition.*
- Students who begin working without prior authorization off-campus will not be paid through the Federal Work-Study grant. *Please note that outside organizations do not have access to Temple's HR or payroll system.*
- Please note that having a work-study offer on your account does not guarantee that it can be used towards an internship position. As stated previously work-study offers can only be used towards Temple contracted non-profit organizations. Students should contact SFS via e-mail wkstudy@temple.edu prior to working off-campus.

Students who are not performing to the expectations of their employers do not have special protection under Federal Work-Study. An employer may terminate students failing to meet expectations.

Workman's Compensation insurance covers students employed on each Temple University campus. If you are injured on the job, you should inform your supervisor immediately.

Temple University will not bear responsibility for injuries occurring at off-campus employers. Students should inquire about Workman's Compensation insurance coverage prior to accepting employment.

Grants, Scholarships and Loans

The following grants and scholarships have individual eligibility requirements and procedures. Be sure to read the requirements for each carefully.

Temple University Need-based Grants

Eligibility

- Temple University Grants (TUG) are university-funded, need-based grants for full-time (12 credits or more) undergraduate students pursuing their first bachelor's degree.
- Temple University Grants (TUG) are not guaranteed to continue year to year, or for the same amount. The amount of the grant can change year to year as your Expected Family Contribution (EFC) from the FAFSA changes year to year, or as other grants and scholarships are added to your financial aid funding offer.
- Students may receive a maximum of 8 full-time semester grants.
- To apply for the Temple University grant a student must submit the Free Application for Federal Student Aid (FAFSA) and have it completed with a calculated EFC each year by the February 1 priority deadline.
- Continuing students must also meet the Temple University's Satisfactory Academic Progress standards each semester to retain eligibility.
- Temple University and Hospital employee dependents receiving tuition remission are not eligible to receive the Temple University grant (TUG).
- You must report additional funding sources not listed on your financial aid offer, including Tuition Remission, University or non-University scholarships and grants such as Academic Merit scholarships, outside Scholarships, and Grants from all sources to Student Financial Services (SFS). These additional sources of funding can impact your current financial aid funding offer and eligibility (i.e., Temple University Grant, Federal, and State Grants and Federal Student Loans).
 - Temple University Grant (TUG) will be reduced or eliminated if we learn of outside scholarship after you are initially packaged. If your financial aid offer does change you will be notified via your Temple University e-mail account when the revised aid offer is ready to view in Self-Service Banner.
- Enrollment changes during the first few weeks of the semester (drop/add) can affect a student's Temple University grant eligibility. Notify the Student Financial Services office if you are considering reducing your enrollment.

Fly in 4

Fly in 4 is a partnership between incoming students and the university to promote graduation in four years. Graduating in four years reduces student debt and helps control college costs.

The Fly in 4 grants are provided to 500 incoming freshman and eligible transfer students with the greatest demonstrated financial need based on the FAFSA application.

Fly in 4 grant renewal criteria (for up to 4 full-time, continuously enrolled years) require eligible students to:

- meet all designated Fly in 4 checkpoints;
- meet financial aid Satisfactory Academic Progress (SAP) guidelines;
- attend full-time each fall and spring semester;
- continue to file and complete the annual FAFSA by the February 1 priority filing deadline;
- continue to show documented financial need on the annual FAFSA; and
- complete all financial aid requirements by specified deadlines.

Temple University Academic Merit Scholarships

Eligibility

- To be considered for an academic undergraduate scholarship, submit a complete undergraduate admission application by the February 1 deadline. Late applicants might be considered for an academic scholarship based on fund availability.
- For scholarship purposes, a first year applicant is defined as a current high school student who will graduate prior to the start of the fall semester and will not earn any college credits after graduation.
- Scholarship notification will be made no later than March 1 on TUportal.
- The nonrefundable undergraduate tuition deposit must be submitted by May 1 in order to secure a scholarship. A deposit made later will cancel the scholarship.
- Academic merit scholarships for undergraduate students are limited to eight consecutive undergraduate semesters of full-time enrollment. The scholarship is guaranteed for the first four consecutive undergraduate semesters, at the end of which a minimum cumulative GPA must be achieved and maintained in order to renew the scholarship annually. Merit scholarships are designated for *undergraduate tuition* only. Specific details will be provided in the student's undergraduate scholarship notification letter from the Office of Undergraduate Admissions. Information on the **renewal criteria** can be found in the SFS Policies.
- Students awarded our full-tuition undergraduate scholarship, the President's Scholar Award, may also apply for one \$4,000 summer educational enhancement stipend, to be used toward approved study away, research, internship or other academic activity.
- Temple University Academic Merit undergraduate scholarships are tuition only and combined with the other tuition only scholarships cannot exceed the total cost of tuition per term.

Amount

Academic scholarships for undergraduate students range from \$2,000 to full undergraduate tuition. The availability of funding and the size, quality and characteristics of the overall applicant pool will determine the number and the value of academic scholarships awarded.

Application/Selection

No separate application required. Recipients are selected by the Office of Undergraduate Admissions.

Athletic Scholarships

Athletic scholarships are available in all varsity sports. The number of scholarships, requirements, standards, and awards are controlled by Temple University and by the National Collegiate Athletic Association (NCAA). For further information, contact the Department of Intercollegiate Athletics, 215-204-2571.

ROTC Scholarships

See Military Science (p. 50) in the Academic Opportunities section of this *Bulletin*.

ROTC tuition scholarship, Temple University Academic Merit scholarship and tuition remission funding (and/or any other tuition restricted funding) combined cannot exceed the total cost of tuition per term.

State and Federal Grant Programs

To be eligible for the following grants, students must complete the Free Application for Federal Student Aid (FAFSA).

Pennsylvania State Grant

The Commonwealth of Pennsylvania funds a grant program for undergraduate Pennsylvania residents who will be matriculated students enrolled full-time (12 or more credit hours per semester) and part-time (6-11 credits) during the academic year. This program is administered by the Pennsylvania Higher Education Assistance Agency (PHEAA). Please see more information at pheaa.org/grants/state-grant-program/index.shtml

Basic Eligibility Criteria

- Grant amounts are dependent upon enrollment and classroom and/or online credit hours per semester.
- Be enrolled in a program of study where at least 50 percent of the total credit hours needed for completion of the program are earned through classroom instructions. Funding may be reduced if student's enrollment mode does not meet the PA State grant standard.
- Students must maintain PA state grant satisfactory academic progress which is different from Federal Title IV financial aid satisfactory academic progress. PA state grant progress is reviewed annually after the spring semester, and is defined as successfully completing a minimum of 12 new credits for each full-time semester of PA state grant received (6 new credits for each half-time semester grant received) during the preceding academic year. Students may receive a maximum of 8 full-time semester grants (or its equivalent).

Non-Pennsylvania residents should check with their respective state agency for state grant information. The U.S. Department of Education provides a full list of higher education agencies by state at www2.ed.gov/about/contacts/state/index.html

Students residing in states other than Pennsylvania can contact their state education department directly to inquire about scholarship and grant opportunities. A directory of state educational grant agencies can also be found online through the U.S. Department of Education

Not all state grant programs are transferable if a student is attending a school outside of their home state.

Federal Pell Grants

To be eligible for a Pell Grant, a student must be enrolled in an undergraduate degree program who has not earned a bachelor's or professional degree and has significant financial need. Notification of awards will be made in the student's financial aid offer. See more information at sfs.temple.edu/financial-aid-types/grants/federal-pell-grant.

Federal Supplemental Educational Opportunity Grant (FSEOG)

FSEOG is a federal grant program administered by the university. Awards are based on exceptional need (Pell Grant recipients) and availability of funding is limited. See more information at sfs.temple.edu/financial-aid-types/grants/federal-supplemental-education-opportunity-grant-seog.

Student Loans

Federal Direct Student Loans

Direct Loans are available to undergraduate students enrolled for at least six (6) credits per semester.

Annual Subsidized Limits:

- 1 Year Undergraduates = \$3,500
- 2nd Year Undergraduates = \$4,500
- Remaining Undergraduate Years = \$5,500
- Preparatory Coursework Needed to Enroll as Undergraduate = \$2,625

Annual Unsubsidized Limits:

- Dependent undergraduates whose parents can borrow PLUS = \$2,000
- 1 and 2nd year undergraduate dependent students whose parents cannot borrow PLUS and independent students = \$6,000
- Remaining undergraduate years for dependent students whose parents cannot borrow PLUS and independent students = \$7,000

Direct Parent Loans for Undergraduate Students (PLUS)

PLUS loans are available to the parents of undergraduate students. A credit check is required for eligibility for the Parent PLUS loan. Parents may borrow amounts not to exceed the cost of attendance.

All PLUS loans are processed for the full year, and are split evenly between the fall and spring semesters.

Alternative Private Educational Loans

Student loans are available from private lenders. The majority of the lenders of these loans require the student borrower to have a credit worthy cosigner, and the interest rate is variable and determined by the credit score of the borrower and cosigner. These loans also require school certification, and the student must be enrolled at least half time and making satisfactory academic progress. Consult with the lender for specific eligibility requirements.

All alternative/private loans are processed for the full year, and are split evenly between the fall and spring semesters.

More information is available at sfs.temple.edu/financial-aid-types/private-student-loans.

Entrance/Exit Interviews

New Federal Direct loan borrowers must complete the Annual Student Loan Acknowledgment, a Master Promissory Note and Entrance Interview. An online exit interview will be required just prior to graduation or if a student attends less than half time or takes a leave of absence. Direct loan funds will not be released without the entrance counseling requirement. Any student withdrawing from the university before graduation must complete an exit interview.

More information is available on the SFS web site at sfs.temple.edu/financial-aid-types/federal-student-loans.

Other Programs

A number of Temple's schools and colleges have privately-sponsored scholarships available for students in their programs. Details may be found in the individual school or college descriptions.

In addition to the scholarships available through Temple University, a wide range of scholarships, fellowships, and internships are available on a competitive basis to students during and immediately after their undergraduate careers. The Undergraduate Studies Office provides information about these opportunities and support for students interested in preparing applications. For more information, visit undergradstudies.temple.edu/fellowships.

Campuses

University Campuses

Convenience and accessibility are two of the benefits that draw people to Temple University. Our eight distinct campuses offer an array of diverse learning environments—from urban to suburban and local to international—that are sure to fit your needs, schedule and personality.

- Ambler Campus (p. 1816)
- Main Campus (p. 1823)
- Health Sciences Center (p. 1822)
- Podiatric Medicine
- Temple University Center City (p. 1824)
- Temple University Harrisburg (p. 1826)
- Temple University, Japan Campus (p. 1827)
- Temple University Rome

Ambler Campus

General Information

Temple University Ambler, located in Montgomery County, just 17 miles north of the Main Campus (and minutes from Route 309, the Pennsylvania Turnpike and Route 476), offers the benefits of a small college campus with the resources of a large university. Several high-quality undergraduate, graduate and non-credit courses and programs are offered to meet the educational and workforce development needs of the region.

Campus facilities include the Ambler Arboretum of Temple University, the Temple Ambler Field Station, the Tyler School of Art and Architecture Greenhouse Research and Education Complex, the Ambler Research and Collaboration Building, Ambler Campus Technology Center, the Ambler Campus Library, Red Barn Gym and fitness center, design/build studios, a 300-seat auditorium, a Low Ropes Challenge Course, Aramark P.O.D. (Provisions on Demand) Market and an Esports gaming area.

Also located on the Ambler Campus are the Fox School of Business and Management's Small Business Development Center, the College of Liberal Arts' Temple Infant and Child Lab, and the College of Liberal Arts' Criminal Justice Training Programs. Students benefit from these unique facilities as well as several academic and student services, which are listed below.

Administration

Vicki L. McGarvey, Ed.D.
Vice Provost for University College and Interim Campus Director
Temple University Ambler
580 Meetinghouse Road
Ambler PA 19002

Contact Information

267-468-8000
<https://ambler.temple.edu>

Undergraduate Degree Programs

- Accounting (online classes required)
- Business Management (online classes required)
- Horticulture (Associate and Bachelor's Degrees available)
- Human Resource Management (online classes required)
- General Studies (online classes required)
- Landscape Architecture (Note: Studio courses in the first and second year offered at Main Campus only)
- Liberal Studies (online classes required)
- Marketing (online classes required)
- Psychology (some online classes may be required)
- Supply Chain Management (online classes required)

Graduate Degree Programs

- Landscape Architecture

Undergraduate Certificate Programs

- Business Basics Certificate (for non-degree students only)
- Business Plus Certificate (for non-degree students only)
- Environmental Sustainability Certificate (requires Main Campus courses)
- Horticultural Therapy Certificate
- Landscape Plants Certificate (requires Main Campus courses)
- Management Career Certificate
- Native Perennial Garden Design Certificate (requires Main Campus courses)
- Sustainability Certificate (requires Main Campus courses)
- Sustainable Food Systems Certificate (requires Main Campus courses)

For more information about undergraduate majors, minors, and certification programs that can be completed at the Ambler Campus, visit: <https://ambler.temple.edu/academics/academic-programs>.

First-year Experience at Temple Ambler Program

Newly admitted first-year students who enroll full-time at Temple Ambler for two semesters and remain in good academic standing are eligible to receive a First-year Experience Campus Grant. After successfully completing their first year at Temple Ambler, students may then choose to continue their studies at Ambler Campus, transition to Main Campus for their remaining three years of undergraduate coursework or take courses at multiple campuses in the same semester, depending on their major. Learn more about the First-year Experience.

Non-Credit Programs

ncc@temple.edu

<https://noncredit.temple.edu>

The Office of Non-Credit and Continuing Education provides quality, professional and accessible education and lifelong learning opportunities at every stage of your career or life. Courses and programs are available in the areas of Professional Development and Personal Enrichment.

Educational opportunities offered through Youth and Summer Programs and the Osher Lifelong Learning Institute (OLLI) are also available at the Ambler Campus. For more information on these and other programs, see the Special Programs section of this *Bulletin*.

Criminal Justice Training Programs (CJTP)

Haines House

215-204-7930

<https://liberalarts.temple.edu/research/labs-centers-and-institutes/criminal-justice-training-program>

Criminal Justice Training Programs, a division of the College of Liberal Arts' Department of Criminal Justice, has conducted professional training for a variety of criminal justice agencies and occupations since 1968. It is located at the Temple University Law Enforcement Training Center (TULETC) at Temple Ambler. Each year, more than 3,000 criminal justice employees attend programs offered by CJTP, including police personnel, sheriffs and deputy sheriffs, constables, school security officers, and park rangers. Other activities include the development of training curricula and the delivery of online learning.

Park Ranger Law Enforcement Academy (PRLEA)

215-468-8600

<https://universitycollege.temple.edu/academics/park-ranger-law-enforcement-academy>

The Temple University Park Ranger Law Enforcement Academy (PRLEA) was established in 2010 and is one of six law enforcement academies in the U.S. certified to provide the 680-plus hour basic training program which is required for a person to be commissioned as a seasonal law enforcement park ranger with the National Park Service and with Pennsylvania's Department of Conservation and Natural Resources. The curriculum is designed to impart the knowledge, skills, and abilities to preserve and protect our nation's local, state, and national parks for public use today, and for many years to come.

Academic Awards and Scholarships at Ambler

For details and application procedures about the various scholarships available to Ambler Campus students, visit: <https://ambler.temple.edu/admissions/cost-aid-and-scholarships/ambler-campus-scholarships>.

Academic and Student Services

Our mission is to provide students with personalized academic and student support, as well as unique leadership and service-learning opportunities, at a conveniently located suburban campus. We strive to complement the University's mission by promoting and offering social, cultural, educational and developmental programs for Ambler Campus students.

Admissions

Learning Center, Room 102 / Welcome Center
267-468-8100
<https://ambler.temple.edu/admissions>

Prospective and admitted students can connect with Ambler Campus staff and current students to learn more about the admissions process and options for beginning or completing a degree program at Ambler Campus. Campus events and tours are held throughout the year to engage with current high school students, students looking to transfer to Temple from other institutions and non-traditional students returning to the classroom.

Academic Advising and Student Success

Learning Center
267-468-8200
ambleradvising@temple.edu
<https://ambler.temple.edu/campus-resources/advising-and-student-success>

Dedicated professional advisors help students choose a program of study that is suited to their educational and career goals, assist with information about program requirements and university policies and procedures. Transfer students can discuss transfer credit evaluations and whether these credits meet Temple program requirements.

Undergraduate Advising - Fox School of Business & Management

267-204-7672
<https://ambler.temple.edu/campus-resources/advising-and-student-success>
<https://www.fox.temple.edu/advising>

Ambler Campus business students are advised by Fox School of Business and Management advisors and can make an appointment online.

Inter-campus Bus Service

Learning Center, Room 102 / Welcome Center
267-468-8423
<https://campusoperations.temple.edu/parking-transportation/shuttle-services>

Temple University provides free inter-campus bus service between Ambler, Health Science, and Main campuses (fall and spring) for students who take classes at the Ambler Campus. Inter-campus bus schedules are available in the Welcome Center and online.

Computer Center

Ambler Campus Technology (ACT) Center
Learning Center, Room 106
Help Desk: 267-468-8324
<https://ambler.temple.edu/campus-resources/technology>

The Ambler Campus Technology (ACT) Center has Windows and Macintosh computers equipped with software for all Temple programs; 3D, color and black-and-white laser printers; a plotter; and standard and wide format scanners. A Help Desk is located within the ACT Center. A breakout room is available for students to reserve and there is a Zoom room upstairs in Learning Center, Room 206.

Counseling Services

Main Campus: 215-204-7276
<https://counseling.temple.edu/>

Free and confidential virtual counseling services are available for Temple Ambler students by appointment. Emergencies and/or "walk-ins" and psychiatric services are managed on the Main Campus at Tuttleman Counseling Services located at 1700 N. Broad Street, Second Floor.

Disability Resources and Services

Learning Center, Room 102 / Welcome Center
267-468-8200

<https://ambler.temple.edu/campus-resources/disability-resources-and-service>

The Office of Academic and Student Services, in conjunction with Disability Resources and Services (Division of Student Affairs) at Main Campus, assists with providing accommodations for students with disabilities at Temple Ambler.

Student Financial Services (SFS)

Learning Center, Room 109

267-468-8443

<https://ambler.temple.edu/admissions/cost-aid-and-scholarships>

Temple University's Student Financial Services Office readily assists all Temple students in making their college education affordable. Financial Aid counselors are available to meet with students at the Ambler Campus. See the Financial Aid (p. 1809) section in this *Bulletin* for more information.

Library

Learning Center, Room 106

267-468-8648 (Library Service Desk)

<https://ambler.temple.edu/campus-resources/library>

The Ambler Campus Library supports students and faculty with an on-site collection of print resources and online journals and reference material. As part of the Temple University Libraries system (<https://library.temple.edu>), the Ambler academic community may request materials to be sent to Ambler from the vast, deep discipline-based collections of all of Temple's libraries. Librarians are on site for research help and take appointments for "face to face" or Zoom appointments for research consultations.

Off-Campus Housing

Learning Center, Room 102 / Welcome Center

267-468-8423

<https://ambler.temple.edu/campus-resources/campus-housing>

While Ambler Campus is a commuter campus, the Office of Student Life provides a listing of apartments and houses to rent or share and brochures on local apartment complexes.

OWLcard Access and ID

Learning Center, Room 102 / Welcome Center

267-468-8200

<https://ambler.temple.edu/campus-resources/id-cards>

Your OWLcard is Temple University's ID card and gives you access to Temple buildings, parking lots and services, including libraries and gyms. You can also use your OWLcard to access Diamond Dollars, the University's debit-card program. Learn more about how to obtain a mobile OWLcard.

Parking at Ambler Campus

Learning Center, Room 102 / Welcome Center

267-468-8000

<https://ambler.temple.edu/about/maps-and-directions/parking>

All faculty, staff and students at the Ambler Campus are required to purchase parking hangtags, which can be purchased online and mailed to you. Campus visitors should register their vehicles in order to avoid parking citations.

Re-enrollment

Learning Center

267-468-8200

<https://ambler.temple.edu/admissions/request-re-enroll>

Degree students who have not attended Temple for one semester or more may request to re-enroll. Once a student has submitted a Request to Re-enroll form, an academic advisor will assist with choosing and registering for courses.

Recreation, Outdoor Education & Wellness (ROW)

Red Barn Gym and Recreation Center

267-468-8151

<https://ambler.temple.edu/campus-resources/recreation-and-wellness/recreation>

ROW offers a holistic approach to health and wellness through a range of programs including open recreation, intramural sports, team building programs and special events. Facilities include a multi-purpose gymnasium and a fitness room with both cardiovascular and free weight equipment. Outdoor facilities include the new 15-element challenge course lab, a swimming pool, and basketball, tennis and volleyball courts. The Ambler Campus also has more than two miles of wooded trails for walking and running. Students may also participate in Main Campus recreational activities.

Student and Campus Life

Learning Center, Room 102 / Welcome Center
267-468-8423
<https://ambler.temple.edu/campus-resources/student-life>

This office oversees student programs, events and student organizations. Students can get involved on campus in order to gain leadership experience, develop special skills and interests, and build community with their fellow students. Students may also obtain information regarding the inter-campus bus service, as well as Main Campus events.

For information about student organizations in the Fox School of Business and Management, please refer to the Fox section (p. 789) of the *Bulletin*.

Student Success Center

215-204-0702
<https://studentsuccess.temple.edu/>

Temple Ambler students have access to a wide variety of virtual tutoring services for writing, math and science through the Student Success Center at Main Campus. Learn more about the services, workshops and programs offered.

Unique Facilities and Programs at Temple Ambler

Ambler Arboretum of Temple University

<https://ambler.temple.edu/arboretum>

Temple University's 187-acre Ambler Campus is an Arboretum, or a public garden with a significant focus on a tree collection. Comprised of a unique mix of naturalistic and formal landscapes, including botanic collections, horticulture displays, woodlands and meadows, the Ambler Arboretum is a platform for scientific research; teaching, learning and practical training; and environmental responsibility and conservation.

The University is a leader in modeling the art and science of horticulture. Arboretum staff are horticulturists and curators who steward the living collections. Staff are available to assist faculty and students with teaching and research. They also provide information about the University's woody-plant collection to scholars and professionals around the world. Staff actively engage collection development to fulfill a mission to conserve tree and genetic diversity.

The Ambler Arboretum is open every day of the year from sunrise to sunset. Faculty and students are encouraged to visit to experience the beauty and health benefits of nature, plants and gardening. The Arboretum is known for its 4 seasons of interest—from the Barbara F. and Philip R. Albright Winter Garden to the Louise Bush-Brown Formal Perennial Garden. Of particular interest is the Ernesta Ballard Healing Garden, which includes a labyrinth for contemplation and enjoyment and doubles as a storm-water management garden as does the Sustainable Wetland Garden.

The Ambler Campus was established as the Pennsylvania School of Horticulture for Women in 1911. This historic public garden is now known as the Ambler Arboretum of Temple University which serves as the public garden, outdoor classroom and living laboratory for Temple University.

Temple University Field Station at Ambler

<https://ambler.temple.edu/fieldstation>

Temple University's 187-acre Ambler Campus is a Field Station, a platform for environmental field research and education that spans multiple disciplines, from the natural sciences, to engineering and the liberal arts. The Field Station serves as an ecological observatory that aids in the scientific documentation of fundamental changes in our natural environments. The Field Station's research initiatives provide data to a broad community of scientists and educators, and advance the understanding of global change impacts, as well as innovative and meaningful solutions to these changes.

The Temple University Field Station at Ambler offers a diversity of natural habitats including older growth and secondary forests; aquatic and wetland environments including ponds and ephemeral streams; meadows and turf; and natural and designed garden landscapes.

Faculty may teach and offer experiential opportunities in the Field Station's varied environments. Field Station faculty and staff are available to aid in the creation of modules or pedagogical tools. Field Station courses, offered in conjunction with Temple's schools and colleges, provide hands-on training in field methodologies and applications. Internships integrate students into ongoing research activities that deepen scientific knowledge and enrich students' academic experience, preparing them for further study and careers. Current research initiatives include the Temple Forest Observatory, a collaboration with the Smithsonian Institution's Forest Global Earth Observatory (ForestGEO) program.

Undergraduate and graduate students may participate directly in research through the Field Station's Ecological Observatory Program, which advances understanding of local ecosystems and facilitates large-scale comparative study of dozens of observatories across the country. The Global Change Program enables students to conduct research on ecological impacts of climate change and invasive species. The Field Station also welcomes students and researchers to pursue their own explorations of the natural world.

Athletic Facilities

The Ambler Campus has several facilities for collegiate sports, including NCAA soccer fields, an NCAA softball field and an NCAA baseball field. Ambler fields are used by various club sports including soccer, rugby, softball and baseball.

The Ambler Campus Intercollegiate Athletics Field House, located off Woods Drive, includes "green roof" structures. A green roof is a living biological community of plants that provides an environmentally sound alternative to a traditional roof system. The green roof garden allows for educational and research opportunities for students and faculty. The Field House has locker rooms, training facilities, offices and game-day concessions.

Auditorium

The 300-seat Learning Center Auditorium, with smart technology and performance space, provides opportunities to offer cultural, educational and entertaining events for our students and the surrounding community. Reserve the Auditorium by contacting the Ambler Campus Scheduling and Events Office at 267-468-8223.

Challenge Course Lab

TUA_ROW@temple.edu

<https://ambler.temple.edu/campus-resources/recreation-and-wellness>

A state-of-the-art challenge course facility was built in 2022 featuring 15 elements. This facility can be utilized to enhance experiential learning opportunities for academic courses and for departmental team building programs. In addition to the outdoor facility, the program has multiple "portable" elements and a highly trained staff that can deliver programs at any location indoor or out.

Temple Ambler EarthFest

<https://ambler.temple.edu/community/earthfest>

Temple Ambler EarthFest, in collaboration with the Ambler Arboretum, the Temple Ambler Field Station and other partners, provides meaningful, impactful educational experiences for all ages throughout the year related to citizen science, sustainability and protecting, preserving and connecting with the environment. Join us to celebrate the Earth, stargaze, camp out and explore outdoor biodiversity.

Tyler School of Art and Architecture Greenhouse Education and Research Complex

267-468-8180

<https://ambler.temple.edu/campus-resources/greenhouse>

The Tyler School of Art and Architecture Greenhouse Education and Research Complex provides faculty and students with first-class facilities to study plant and soil science and conduct horticultural research. The energy-efficient greenhouse includes computerized climate controls and thermal blankets to protect the plants in the winter and shade them in the summer. Modern fertilizer injection systems water and fertilize plants simultaneously. The Complex includes a one-acre research garden with an apiary, a shade house and a hoop house.

Institutional Research and Assessment Testing Center

Learning Center, Room 210

<https://ira.temple.edu/>

The testing center is certified by the National College Testing Association (NCTA) and is managed by Temple's Office of Institutional Research and Assessment. The facility administers several computer-based school entrance exams such as GRE, LSAT, MAT, MPRE and Praxis, as well as the GED and other exams.

Law Enforcement Training

Located at Temple Ambler, the Temple University Law Enforcement Training Center is the home to the College of Liberal Arts' Criminal Justice Training Programs and the University College Park Ranger Law Enforcement Academy. Ambler Campus has unique facilities and resources to facilitate highly specialized training for first responders, which enables the Center to serve municipal, state and federal agencies.

Temple Infant and Child Laboratory

Widener Hall

267-468-8610

infantlab@temple.edu

<https://templeinfantlab.com>

The College of Liberal Arts' Infant and Child Laboratory invites parents and their children to shape the future by participating in research at the frontier of science. Directed by nationally recognized child development authorities and professors Dr. Kathy Hirsh-Pasek and Dr. Nora Newcombe, the lab provides fun-filled activities for children who become part of cutting-edge scientific discoveries. Parents learn more about their children's first words and ability to create mental maps. At the lab, infants, toddlers and older children teach scientists new ways to optimize education and advance learning.

Temple Small Business Development Center

Widener Hall

<https://www.fox.temple.edu/faculty-research/institutes-centers/small-business-development-center>

The Fox School of Business' Small Business Development Center (SBDC) has a branch at Ambler Campus, offering general business consultants who work with pre-venture, start-up, and existing small business clients. Most services are provided free to clients, due to grant funding from the Small Business Administration. In addition to one-on-one consulting, classes, workshops and training opportunities, the SBDC offers a unique program called Warrior Rising, a Small Business Special Forces Incubator.

Health Sciences Center

Step onto the Health Sciences Center and be immersed in the future of health care. Home to four of Temple's medical-related schools and colleges, as well as the nationally ranked Temple University Hospital, the Health Sciences Center is a hub of academic, clinical and research activities.

Programs and services of the Lewis Katz School of Medicine, the Maurice H. Kornberg School of Dentistry, the School of Pharmacy, the College of Public Health, and Temple University Hospital are at the Health Sciences Center. Buildings and facilities, covering some 20 acres, extend to either side of North Broad Street from Allegheny Avenue to above Tioga Street. Public transportation to the campus includes SEPTA bus routes 4 and 16 on Broad Street, the Broad Street subway (Allegheny stop to the south, Erie stop to the north); the North Broad and the North Philadelphia stations of the Regional High-Speed transit lines are between the Health Sciences Center and Main Campus.

Each of the schools and colleges located at the Health Sciences Center offers student and academic services. For a specific program or service of the undergraduate schools, refer to the appropriate section of this *Bulletin*, or inquire at the Office of the Dean. For information about the schools of Medicine and Dentistry, contact their respective dean's offices.

Housing and Dining Options

Residential housing is provided on the Main Campus and is accessible by a Temple University shuttle bus or convenient public transportation. Dining options are available at the Student Faculty Conference Center, the hospital cafeteria, and the Main Campus dining centers.

Podiatric Medicine

The School of Podiatric Medicine is located on its own campus at 8th and Race Streets. This campus was the first-ever developed specifically for podiatric education and treatment. The complex includes student housing, educational facilities and the comprehensive Foot and Ankle Institute, all just steps away from Philadelphia's historic and entertainment attractions.

Main Campus

General Information

Temple's bustling Main Campus crackles with energy, thanks to its location in the heart of Philadelphia, numerous new building projects and the 10,000 students who live on or around our increasingly residential campus. On- and off-campus activities abound, including more than 300 registered student organizations; NCAA Division I sporting events; and nearby restaurants, shops and entertainment.

Temple's Main Campus serves students from the Delaware Valley area, from throughout the United States, and from 116 foreign nations.

The Main Campus can be reached easily by public transportation using SEPTA bus routes 4 or 16 on Broad Street, the Broad Street Subway (Cecil B. Moore Avenue stop), AMTRAK at North Broad Street Station and SEPTA Commuter Rail Lines at the Temple/Cecil B. Moore Station (Ninth and Berks Streets).

The major facilities of the Main Campus are located between 10th and 16th Streets and between Oxford and Diamond Streets. Twelve Temple schools and colleges with undergraduate programs have their central administrative offices at the Main Campus, as well as most of their classrooms. These include:

- The Fox School of Business and Management;
- The College of Education and Human Development;
- The College of Engineering;
- The College of Liberal Arts;
- The Lew Klein College of Media and Communication;
- The College of Public Health;
- The School of Social Work;
- The College of Science and Technology;
- The School of Sport, Tourism and Hospitality Management;
- The Tyler School of Art and Architecture; and
- The Center for the Performing and Cinematic Arts, which consists of the Esther Boyer College of Music and Dance and the School of Theater, Film and Media Arts.

The Graduate School and the James E. Beasley School of Law are also located on Main Campus. Many of these schools and colleges offer programs and courses on other campuses and at various extension centers. Those offerings are described in each individual college section.

Location and Contact Information

1801 N. Broad Street
Philadelphia, PA 19122
215-204-7000 (general number)
www.temple.edu

Programs Offered

All of the programs listed in the Academic Programs chart (p. 2908) are offered on the Main Campus except select programs within the Tyler School of Art and Architecture (Landscape Architecture, Horticulture and Community Development); most of the programs of the College of Public Health, the Maurice H. Kornberg School of Dentistry, the Lewis Katz School of Medicine, and the School of Pharmacy, which are offered at the Health Sciences Center only; the programs of the School of Podiatric Medicine, which are offered at 8th and Race Streets; and those programs only offered in Temple University Japan.

Physical Facilities

In addition to housing the major classroom and administrative facilities of twelve of the schools and colleges of Temple, the Main Campus is also the central location of the university's Library System and Computer Center. Other facilities include two stages for theatrical productions (Tomlinson Theater and Randall Theater), two music recital halls (Klein Recital Hall and Rock Hall), a dance laboratory theater (Conwell Dance Lab), and the Temple Performing Arts Center.

The Main Campus is home to the Media Learning Center for the study of Critical Languages and other self-study courses and the Presser Learning Center, a nationally-known multimedia laboratory for teacher education in music. The university's 24-hour classical and jazz radio station, WRTI-FM, is located at the Entertainment and Community Education Center, behind the Liacouras Center at 1509 Cecil B. Moore Avenue, Third Floor, Philadelphia, PA 19121-3410.

The Liacouras Center is a 10,000-seat multi-purpose venue for sports, entertainment, cultural, and educational activities and is home to the Temple Owls Basketball teams, the Esther Boyer Theater, the Independence Blue Cross Student Recreation Center, the Entertainment and Community Education Center, and a 1,200-car garage.

The world-class TECH Center, located on 12th and Montgomery, features many technology resources available to students. The facility includes hundreds of computers, a help desk, the university Welcome Center, faculty wing, specialty labs, an internet lounge, social spaces, and private breakout rooms for studying.

The Howard Gittis Student Center includes the Food Court, the Graphics Media Center, a Barnes & Noble Bookstore, The UPS Store, Philadelphia Federal Credit Union, the Student Activities office, The Reel Cinema, an information center, the student newspaper, Temple Student Government Offices, Main Campus Program Board, the school yearbook, the Office of the Dean of Students, television lounge, quiet lounge and student organizational space.

Recreation facilities include a student fitness complex in the Independence Blue Cross Student Recreation Center, with free weights and racquetball courts; two Olympic-size swimming pools, weight-training rooms, including a cardiovascular fitness center, in Pearson and McGonigle Halls; an eight-lane, 400-meter outdoor track; an indoor track in the Independence Blue Cross Student Recreation Center; a lighted outdoor recreation and sports complex that includes four acres of artificial turf and a 4,500 seat arena. The Main Campus also has a student recreation facility consisting of a 39,000-square foot Student Pavilion with lighted tennis courts and an outdoor in-line skating surface. Main campus also houses TU Fitness (TUF), a fitness facility with over 16,000 square feet of space that includes cardio equipment, strength training equipment, an 11-piece selectorized equipment circuit, and a stretching area.

Tuttleman Learning Center is a hub for emerging learning technologies, with flexible classrooms, distance learning sites, student lounges, and personalized areas for small group activities, and is home to the University Writing Center, the University Honors Program, and International Programs.

Liacouras Walk, a major pedestrian way running through the center of campus, provides retail shops, food service, and the Conwell Inn.

Temple University Center City

General Information

Located across the street from City Hall and surrounded by the home offices of major national corporations, Temple University Center City offers a wide selection of undergraduate and graduate courses and full degree programs in the evening, as well as stimulating non-credit workshops and seminars during the day, in the evening, and on weekends.

Location and Contact Information

1515 Market Street
215-204-8822
<https://centercity.temple.edu/>

Administration

Melanie Ellison-Roach, Associate Director
Ramon Rios, Senior Academic and Student Services Coordinator

Credit Programs

Most of Temple University's schools and colleges offer courses at Temple University Center City (TUCC). It is possible to complete the following undergraduate degree programs at TUCC in the evening:

- Business Administration
- Bachelor of General Studies (some courses may be offered online)

Students can also complete *many* of their general education requirements at the campus.

Student Services

Hours of Operation

During regular semesters, the TUCC administration office (suite 215) is open 8:30 a.m. to 8:00 p.m., Monday through Thursday, and 8:30 a.m. to 5:00 p.m. on Friday. When Temple University is not in session, please call 215-204-8822 for hours.

Academic Advising and Registration

TUCC's Senior Academic and Student Services Coordinator can give you the information and support you need to succeed. Office hours are scheduled into the evening so that you can make an appointment during your lunch hour or after work. You can also discuss transfer options and career-related topics. Below are the current advising hours:

Monday: 9:00 a.m. to 5:30 p.m.

Tuesday: 10:00 a.m. to 6:45 p.m.

Wednesday - Friday: 9:00 a.m. to 5:30 p.m.

Call 215-204-4358 or e-mail ramon.rios@temple.edu for information or to schedule an appointment.

You must be advised by a representative of your school or college if you are admitted to a degree program. If you are a student in the Fox School of Business and Management, use the Fox Online Appointment System, accessed through the Fox Center for Undergraduate Advising web site. Specify that you want an appointment at TUCC. The Senior Academic and Student Services Coordinator can register non-matriculated students.

Career Advising

TUCC's Senior Academic and Student Services Coordinator can help you utilize the many online career services tools that the University offers. You can obtain information regarding your options. Call 215-204-4358 for an appointment or more details.

Center City Technology Center

Accessing a computer is as easy as a trip to the Center City Technology Center located on the fourth floor. Many resources are available including a help desk, laser printing and scanners. A battery share kiosk is available for students to check out a battery bank to use in their classrooms and recharge their mobile devices while in class. Call 215-204-1521 for more information about available resources or hours of operation.

Student Photo ID Cards

Students registering for the first time can have a photo ID card made in the TUCC administration office (suite 215). Call 215-204-8822 for more information or hours of operation.

Parking

As a service to our students, Temple University has negotiated parking discounts with participating garages at the listed locations on our web site. Temple University Center City has no business relationship with these garages and does not play a role in making their policies. In order to receive the discount, students must have their parking ticket validated and show their Temple ID card. The validation and list of participating garages are available at the security desk in the ground floor lobby area.

Facilities

The TUCC campus occupies six floors at 1515 Market Street. There are over 60 classrooms, conference rooms, and computer classrooms. All classrooms have access to the internet and computer technology.

Meeting and Training Space

The next time your organization needs meeting or training space, consider Temple University Center City. We offer classrooms, conference rooms, and computer labs in a wide range of capacities and a variety of configurations. Every room is equipped with white boards, a ceiling-mounted LCD projector, and a computer. A selection of media equipment is available to enhance your event. All rooms have large windows that provide plenty of natural light and beautiful views. Clients value our convenient location and the professional quality of the space. Affordable rates make TUCC an attractive option to non-profit organizations and government agencies, and you are free to choose your own caterer. Rooms can be rented for full or half days. There is no charge to Temple student organizations. Call 215-204-4357 for information, or to meet with a representative and view the facility.

Lounges and Vending areas

Lounges, seating and vending areas are located on all floors and provide good places to relax or study.

Vending Machines

Vending machines are located in the seating and vending areas on the second, third, fourth, and fifth floors. Call 215-204-0589 if there is a problem with the machines.

Internet Access

Wireless Internet access is available throughout the TUCC campus. In addition, Ethernet connections and power outlets are located around the perimeter of all lounge areas. For more information, contact Center City Technology Center, 215-204-1521.

Non-Credit Programs

TUCC hosts a wide variety of non-credit programs including the Real Estate Institute, the Osher Lifelong Learning Institute, the Boyer Music and Dance Preparatory Program (Music Prep) and a selection of professional development programs offered by Temple's schools and colleges. For detailed information on these programs, see the Special Programs (p. 32) section of this *Bulletin* or go to <https://noncredit.temple.edu>.

Real Estate Institute

Non-credit real estate programs for professionals and consumers. Call 215-204-1539 for more information.

Music Prep

Dynamic non-credit music and dance programs for infants through adults. Call 215-204-1512 for more information.

Osher Lifelong Learning Institute at Temple University (OLLI)

A membership organization that offers non-credit learning and enrichment programs for retirees. Call 215-204-1505 for more information.

Temple University Harrisburg

General Information

At Temple Harrisburg, you will find an active community of students improving their professional knowledge and skills. Temple Harrisburg is engaged in improving the central Pennsylvania community through academic degrees, certificate programs, and professional development programs.

The mission of Temple University Harrisburg (TUH) is to serve as the leading academic and professional development center in the areas of social work, education, public policy and public service in central Pennsylvania.

The campus location in the capital region allows the opportunity to share Temple's commitment to social justice, innovative research and community service with legislative, governmental decision makers and the public. TUH strives to support the university's role in the public discourse on social and policy issues through the provision of excellent graduate programs, professional development opportunities, public policy discussion and innovative research.

Administration

Link Martin, MSW
Director
Temple University Harrisburg

Programs Offered

For further information regarding the programs highlighted below, please visit the Temple University Harrisburg web site.

Certificate Programs

- Post Graduate Certificate in Play Therapy
- Clinical Supervision
- Strengths-based Leadership Certificate
- Grant Writing Certificate Program
- Certificate in Working with Veterans and Their Families

Non-Credit Programs/Professional Development

- Credential for Strengths-based Family Workers
- Network of Evaluation Services and Training (NEST)
- Non-Profit Management Training Program & Enhancing Communities Lunch Series
- International Nonprofit Training and Leadership Training Program (INTL)
- Institute on Protective Services
- Certified Investigator Training Program
- Institute on Adolescent Sexual Health
- Teacher Professional Development
- Personal Care Home Administrator Training
- Medication Administration Training Program
- Community Health Worker Training Program

Undergraduate Programs

Capital Semester

The Institute for Public Affairs sponsors an internship semester in association with Temple University Harrisburg. Students have the opportunity to gain experience in government affairs, policymaking and policy implementation first-hand at the State Capital.

Transfer Degree: Liberal Studies

Temple University Harrisburg is committed to building transfer programs to serve the needs of the Capital area community. Potential transfer students are encouraged to contact the Assistant Director for Academic Programs about opportunities. Transfer students may apply for the Liberal Studies program in Harrisburg with a focus on social sciences. The requirements are designed to be flexible and allow for a significant number of transfer credits. Students enroll in a combination of online, face-to-face or hybrid courses.

Facilities

The Temple University Strawberry Square facility is 20,000 square feet located across from the capitol in an office/shopping complex and offers a wide range of classrooms, conference rooms and computer labs equipped with the latest technology for meeting, video conferencing and presentation needs.

Temple University, Japan Campus

Overview

Mission Statement

Truly International: Temple University, Japan Campus (TUJ) is committed to providing a superior education in Japan, grounded on the traditions and contemporary practices of American higher education. Through innovative teaching, exceptional care, and rewarding opportunities in a multicultural setting, we equip students to thrive in an interconnected world. TUJ prioritizes students and strives to provide them with the tools to imagine, explore, and succeed in an ever-changing global workplace. While offering a truly international education in a multicultural and inclusive environment, we embrace the values, rigor and community spirit of our Main Campus in Philadelphia.

Our Vision: TUJ supports internationally-minded learners in the pursuit of their educational and career goals while encouraging a multicultural, cooperative, innovative, and entrepreneurial mindset. For the benefit of our learners, TUJ also seeks to build bridges across cultures and advance the globalization of higher education. It is our vision to cultivate excellence and foster student success through the following actions.

- Provide a rigorous American-style undergraduate liberal arts education (bachelor's and associate's degrees) and graduate programs (master's and doctorate degrees) within a student-centered learning environment infused with global views and intercultural perspectives.
- Elevate learners in degree and non-degree programs through an educational experience that focuses on the development of global competencies, critical thinking, problem-solving, communication, creativity, artistry, leadership, interpersonal intelligence, integrity, research, and practical skills.
- Furnish a global, multicultural, and inclusive environment composed of students, staff, and outstanding faculty from the U.S., Japan, and other parts of the world.

- Offer individualized student attention, smaller class sizes, and regular interactions with faculty.
- Develop pathways to careers and graduate studies through TUJ stakeholders and connections.
- Forge cooperative relationships and engage with partners in education, government, and industry.

Brief History

TUJ is the **oldest and largest foreign university in Japan**. Founded in 1982, TUJ has developed into a nationally recognized institution offering an extensive range of educational programs.

TUJ is the first educational institution in Japan to be **officially recognized as a Foreign University, Japan Campus** by Japan's Ministry of Education, Culture, Sports, Science and Technology. This status allows TUJ to sponsor student visas, enabling international students to study at the university on either a short-term basis (one or two semesters) or a long-term basis (such as to complete a full four-year program).

Learn more about the history of TUJ.

Accreditation

Departments and programs at TUJ are accredited by the Middle States Commission on Higher Education (MSCHE). The Tyler School of Art and Architecture's Bachelor of Arts in Art program is accredited by the National Association of Schools of Art and Design (NASAD).

Scholarships, Financial Aid and Awards

TUJ provides a variety of scholarships for incoming and continuing undergraduate students. Learn more about these opportunities at TUJ's Scholarships and Loans.

Study Away Opportunities

TUJ students are encouraged to participate in programs abroad including attending Temple Main Campus, Temple Rome, and other Exchange programs with partner institutions. Learn more about Study Abroad.

In addition to programs abroad, TUJ students who are interested in experiencing student life and education at a Japanese university can take advantage of exchange programs with local Japanese partner institutions.

Facilities and Resources

Classroom Studios

TUJ's building houses studio facilities for the Art Program including a printmaking/bookmaking studio, 3D design/sculpture studio, digital studio (Mac labs), and a painting/drawing studio.

The Media Room at TUJ is an excellent facility that provides students with the tools and resources necessary to create high-quality video, audio, and new media projects. Featuring state-of-the-art equipment, including professional-grade cameras, microphones, and editing software, the Media Room offers students the opportunity to hone their skills and unleash their creativity. With the guidance of experienced faculty and staff, students can access the resources they need to produce compelling and engaging media content. The Media Room at TUJ is an invaluable resource for students who are looking to develop their skills in media production and build a portfolio of impressive work.

Academic Advising Center (Room 102)

Jenika Kaul, MA, Director

Shota Fujii, MA, MEd, Assistant Director

TUJ's Academic Advising Center (AAC) works with all undergraduate students in any major at any level. See the Advising (p. 1831) section for more details.

Registrar's Office (Room 102)

Yoko Namima, Registrar, Temple Japan Campus

TUJ Registrar's Office (RO) is responsible for academic record maintenance (e.g. manual registration input, certified document issuance, etc.) in order to assist students in achieving their academic goals.

The RO handles various registration-related data input and release for TUJ staff members and students, and is also committed to collaborating with the Main Campus Office of the University Registrar to share mutual issues and work to continuously improve processes and procedures.

The Learning Center

Ryan Rashotte, PhD, Director

The Learning Center (TLC) at TUJ offers free online and in-person peer-tutoring in a variety of subjects, resources for self-access independent study, and support for faculty.

Free peer-tutoring for students in any TUJ program is available from Monday through Friday. Every semester, tutoring generally begins sometime during the second week of classes, and the last day of undergraduate classes is the last day of TLC tutoring. In-person tutoring is held in Room 402, Showa Building 10 (the building next to the TUJ cafeteria).

Accessibility Services / Disability Resources and Services (Room 603A)

Michelle Bridges, MFA, Accessibility Services Coordinator

The Accessibility Services / Disability Resources and Services (DRS) team ensures that students with diverse educational needs can access the full university experience. DRS collaborates with both instructors and students to secure appropriate classroom accommodations and provide students with equal access to educational opportunities.

Counseling Services (Room 603B-D)

The aim of the TUJ Counseling Office is to help students increase their self-awareness, improve their problem-solving skills, and accomplish their personal and academic goals. Services provided by professional counselors include individual counseling, group counseling, and workshops and seminars. Counseling service is available both in English and Japanese.

Bursar's Office (Room 105)

The Bursar's Office at Temple University, Japan Campus assists students with inquiries related to making or confirming payments for classes and questions related to tuition statements and invoices. The Bursar's Office also works with other university departments in processing financial aid and arranging refunds. For inquiries, please e-mail tujbursar@tuj.temple.edu.

Career Development Office (Room 107)

Erica Adams, Director

The Career Development Office (CDO) at TUJ provides comprehensive career development services to empower each student to confidentially launch their individual careers after university. CDO provides career advising, seminars on job hunting strategies, and guidance on internships, resumes, and interviewing techniques.

Internship Program

The Internship Program, coordinated by the CDO, is one of the distinctive features of a TUJ education. Students find it useful to not only gain valuable work experience, but also to build their future career plan. In fact, many students choose to find the same kind of job as they undertake during their internship.

A credit internship is a valuable way to gain practical work experience, often in a student's field of interest, while earning academic credits. Since a credit internship is treated as an academic course, you will need to register with the Academic Advising Center. Students usually work from 10 to 20 hours per week on site under managerial supervision.

Not only TUJ students but also qualified Main Campus students are welcome to apply for the Internship Program through Study Abroad. Main Campus students who are interested in applying for TUJ's Internship Program should contact Education Abroad and Overseas Campuses, 200 Tuttleman Learning Center.

Office of Student Services and Engagement (Room 104)

Nicole Despres, Assistant Dean of Students

Paul Gaspari, Director

Luis Navarro García, Assistant Director of Student Engagement

The Office of Student Services and Engagement (OSSE) supports TUJ's diverse student population as they become members of the university community. In addition to providing assistance with the visa application process and coordinating financial aid and housing, OSSE provides orientations to help students adapt to the academic and social life at TUJ. OSSE also works with the Student Government and other student organizations to encourage social interaction among students with different backgrounds by creating events and activities that appeal to all TUJ students.

Other Spaces for Students

In addition to the facilities and resources listed above, TUJ also provides student space for a variety of activities such as group or individual study, exercise, prayer and more. TUJ students also have access to Showa Women's University (SWU) facilities. While some of these spaces are freely open, others require a reservation. Learn more about student spaces.

Student Organizations and Other Student Engagement Opportunities

Student Organizations

Student organizations—created and run by students—are overseen by Student Activities which is housed within the Office of Student Services and Engagement (OSSE). These organizations help students identify others with similar interests, as well as promote affinity towards other students while enhancing their TUJ experience.

Student Events and Activities

TUJ sponsors a variety of events and activities throughout the semester, including culture and language exchange programs, day outings and overnight trips. These activities are designed to cultivate social relations among our diverse university community and advance the university's mission as an international institution in Japan.

Student Government

The TUJ Student Government (TUJ SG) serves as the voice of the student body, and assists in matters of academia and student life. Student Government also organizes events during the semester to help promote active student life amongst the general student body. Their office is located on the first floor of TUJ within the Cafeteria space, Meeting Room 110-B. They can be reached by e-mail at stugv@tuj.temple.edu.

Emerging Leaders Program

The Emerging Leaders Program is designed to help participating students develop leadership skills, gain life-long friendships, find opportunities to network, and prepare for the global marketplace.

TUJ LEAD

TUJ LEAD | Leading in Equity, Acceptance, and Diversity, focuses on supporting efforts to raise cultural awareness, equity and inclusion of all members of the TUJ community and for the public, acknowledging differences in beliefs, gender, identity, nationality, race and sexual orientation. The group endeavors to develop resources, policies and initiatives that foster greater inclusion for all members of the community. TUJ LEAD aims to be your partner in promoting inclusion, access and opportunities for open exchange among students, faculty, staff and alumni.

Learn more about Student Engagement, as well as activities and organizations.

Research Opportunities for Students and Faculty

Mariko Nagai, MA, Director

As the only fully accredited American university in Tokyo, TUJ is uniquely positioned and committed to supporting research opportunities for both students and faculty, especially in Teaching English as a Second Language, Law, the Humanities, Art, Business Studies, Communications Studies, and the Social Sciences. Learn more about research opportunities.

Institute of Contemporary Asian Studies

Robert Dujarric, MBA, Co-Director
Kyle Cleveland, PhD, Co-Director

The Institute of Contemporary Asian Studies (ICAS) provides lectures, seminars and discussions of issues related to Japanese politics, society and economics. Participants include a wide range of individuals from both the foreign and Japanese business, government and academic communities. ICAS also publishes articles on Asian and US affairs, hosts adjunct and visiting fellows, and coordinates undergraduate and graduate student internships. Its events and publications are in English. Details about ICAS seminars, events and publications are available at the ICAS web site listed above.

Academic Advising

TUJ Academic Advising Center (AAC)

Room 102, TUJ Building

1-14-29 Taishido, Setagaya-ku, Tokyo 154-0004

+81-3-5441-9862 (from overseas) / 03-5441-9862 (in Japan)

aac@tuj.temple.edu

Jenika Kaul, MA, Director of Academic Advising

Shota Fujii, MA, MEd, Assistant Director of Academic Advising

Academic advising is a series of supportive activities provided for students to accomplish their academic and career goals through assistance such as:

- choosing an appropriate major based on their interests;
- selecting appropriate courses for their program of study;
- monitoring their academic progress;
- informing about the university's deadlines, policies, and regulations; and
- assisting students on exploring academic options and opportunities.

Please also see AAC's full mission statement.

The Academic Advising Center works with all undergraduate students as a primary support unit. Major coordinators are also available to assist students in course selection for the major and minor requirements based on their academic interest and needs.

Advising by Professional Advisors

Undergraduate students in all majors at any level can get assistance from the AAC staffed with full-time professional academic advisors. The AAC uses a caseload advising system so that all students have an assigned academic advisor to work with through the duration of their academic careers. Students will be ensured by the AAC advisors to satisfy all of the University's graduation requirement areas, such as General Education, major and college requirements. Advising is available on an appointment basis throughout the semester except for certain designated periods in which advising is limited, such as Graduation Review and Clearance or New Student Orientation.

Advising Appointments

Appointments are typically available between 10:00 a.m. and 5:00 p.m. on Monday through Friday. In order to make an appointment, students simply can stop by the AAC or submit a request through the online form. Each advising slot typically lasts for 30 minutes. The AAC also provides drop-in advising and workshops throughout the semester.

Major Coordinators

While the AAC serves as the primary unit for advising to TUJ undergraduate students, major coordinators are also available for students to discuss their course selection particularly for major and minor requirements. Students should remember that major coordinators are specifically responsible for the respective major and minor requirements only, and not General Education or other college requirements. Students who seek assistance in comprehensive academic advising to cover all degree requirements should meet with a professional academic advisor from the AAC in combination with their major coordinator.

Prospective Study Abroad Students

Students from Temple Main Campus or other U.S. colleges and universities who are interested in studying at TUJ should first discuss their options with Education Abroad and Overseas Campuses, 200 Tuttleman Learning Center.

Academic Policies

As one of the campuses run by Temple University, TUJ also follows the university's Academic Policies. See Academic Policies (p. 1835) and the TUJ web site.

Academic Calendar

Course Schedule

Available on TUJ web site: Course Schedules

Faculty

Sunghee Ahn, Assistant Professor, Department of First Year Writing Program; MA, Columbia University.

Ada Angel, Associate Professor, Department of Psychology; EdD, Temple University.

Mark Azzopardi, Associate Professor, Department of Intellectual Heritage; PhD, University of Sydney.

Dennis Bacani, Associate Professor, Department of Mathematics; PhD, Sophia University.

James D.J. Brown, Professor, Department of International Affairs; PhD, University of Aberdeen.

Ronald Carr, Professor, Department of Communication Studies; MFA, University of California Los Angeles.

Jeremy S. Chambers, Instructor, Department of First Year Writing Program; PhD, University of Phoenix.

Sunghee Cho, Assistant Professor, Department of International Affairs; PhD, Syracuse University.

William Clark, Associate Professor, Department of American Studies; PhD, University of Minnesota.

Kyle Cleveland, Associate Professor, Department of Asian Studies; PhD, Temple University.

Michael Thomas Cucek, Assistant Professor, Department of Asian Studies; BA, Stanford University.

Prachi Gupta, Assistant Professor, Department of Economics; PhD, Indira Gandhi Institute of Development Research.

Erhan Selcuk Haciomeroglu, Professor, Department of Mathematics; PhD, Florida State University.

Irene Herrera, Associate Professor, Department of Communication Studies; MA, Nihon University.

May May Ho, Assistant Professor, Department of Economics; MSc, Lancaster University.

Sachiko Horiguchi, Professor, Department of Asian Studies; PhD, University of Oxford.

Leonard Horton, Professor, Department of Music; DMA, Boston University.

Yoshiko Ichimura, Assistant Professor, Department of Japanese; MSc, The University of Edinburgh.

Hady George Kahy, Associate Professor, Department of Economics; PhD, University of Tsukuba.

Masaki Kakizaki, Professor, Department of Political Science; PhD, University of Utah.

Hani Karam, Assistant Professor, Department of Computer Science; PhD, University of Tsukuba.

Jeff Kingston, Professor, Department of Asian Studies; PhD, Columbia University.

Takayuki Kubota, Assistant Professor, Department of Art; MFA, City University of New York.

John Lipartito Jr., Assistant Professor, Department of Communication Studies; BA, Temple University.

Ian Lynam, Associate Professor, Department of Art; MFA, California Institute of the Arts.

Yuka Matsuhashi, Assistant Professor, Department of Japanese; MA, University of Oregon.

Johnathan McCaskill, Assistant Professor, Department of Law; JD, University of Wisconsin.

Shimpei Miyagawa, Assistant Professor, Department of International Business Studies; PhD, Kobe University.

Mariko Nagai, Professor, Department of Japanese; MA, New York University.

Farid Nakhle, Assistant Professor, Department of Computer Science; MS, American University of Science and Technology.

Marco Narducci, Assistant Professor, Department of International Business Studies; PhD, International Christian University.

Taro Nettleton, Associate Professor, Department of Art History; PhD, University of Rochester.

Karl Neubert, Associate Professor, Department of Communication Studies; MFA, Musashino Art University.

Yukiko Oki, Assistant Professor, Department of First Year Writing Program; EdD, Anaheim University.

Ryoko Osada, Assistant Professor, Department of Japanese; MA, University of Wisconsin-Milwaukee.

Ryan Rashotte, Assistant Professor, Department of First Year Writing Program; PhD, University of Guelph.

Patrick Rosenkjar, Professor, Department of Intellectual Heritage; EdD, Temple University.

Lee Roser, Assistant Professor, Department of Intellectual Heritage; MS, MEd, Temple University.

Junko Saito, Associate Professor, Department of Japanese; PhD, University of Hawaii at Manoa.

Kaoru Sakurai, Associate Professor, Department of Art; MFA, Cranbrook Academy of Art.

Morgan Schulz, Lecturer, Department of Intellectual Heritage; MFA, Brooklyn College.

Dariusz Skowronski, Associate Professor, Department of Psychology; PhD, Adam Mickiewicz University.

Vasileios Tserolas, Assistant Professor, Department of Computer Science; PhD, Nihon University.

Shinya B Watanabe, Associate Professor, Department of Art; MFA, Temple University.

Darryl Wharton-Rigby, Assistant Professor, Department of Communication Studies; MFA, Dodge College of Film and Media Arts.

Mike Williams, Assistant Professor, Department of American Studies; MA, Boston University; MEd, Temple University.

Asako Yamaguchi, Assistant Professor, Department of Japanese; MA, The Ohio State University.

Zhaocheng Zeng, Assistant Professor, Department of International Business Studies; PhD, McMaster University.

Suzi K. Zimmerman, Associate Professor, Department of Psychology; PhD, University of Illinois.

Academic Policies

These academic policies and regulations generally apply to all undergraduate students and provide a framework within which schools and colleges may specify further conditions or variations appropriate to students in their courses or programs. Statements of academic policies and regulations apply to both degree-seeking and non-degree-seeking students unless explicitly noted otherwise.

The information in this bulletin is subject to change by Temple University at any time. Neither this bulletin nor any parts of it may be relied upon as a contract between Temple University and any student, applicant, or other user of this site. All prospective and current students should consult with appropriate University Offices to verify current information and the status of policies, programs, descriptions of curricula, or other information in this bulletin.

The texts of some of these policies are available on the Temple University Policies & Bylaws web site at <https://secretary.temple.edu/policies>.

Students should consult their advisors and dean's offices for any changes in policy that affect them.

- Transfer Between Schools/Colleges Within the University (Change of Program) (p. 1864)
- Transfer Credit (p. 1864)
- Undergraduates Taking Graduate Level Courses (p. 1864)

Academic Course Load

The average semester load for full-time students is 15 to 17 semester (or credit) hours. Students must carry at least 12 semester hours to be classified as full time.

Academic overloads (19 or more semester hours) during fall and spring semesters need special approval of the dean or dean's designee of the school or college in which a student is matriculated. Tuition for full-time students covers 12 to 18 hours. Credits over 18 carry additional tuition charges. See Tuition and Fees (p. 1800) in the Financial Information section of the *Bulletin*.

Summer Sessions

Undergraduates must get overload approval for 9 credits or more.

Academic Forgiveness

NOTE: This policy is currently under review. If a new version is approved during the 2023-2024 academic year, the policy document link below and this Bulletin page will be updated accordingly.

Scope of Policy & Rationale

The Academic Forgiveness policy allows students approved for re-enrollment an opportunity to return with a reset grade point average. If they apply for and are approved for Academic Forgiveness, these students re-enroll with a 0.00 cumulative grade point average and the opportunity to apply credits from courses completed previously at Temple with a "C-" or higher towards their degree.

Former undergraduate, degree-seeking students who have not taken any coursework at Temple University for a minimum of four consecutive years are eligible for Academic Forgiveness (policy # 02.10.17). Students are also eligible to petition for Academic Forgiveness after three consecutive years of non-enrollment at Temple if, during that time, they have completed at least 15 transferable credits elsewhere with a cumulative grade point average of 3.00 or higher.

Definitions

1. **Re-enrolled** - Students are re-enrolled when they are approved to return to the university after a period of separation from the university or following academic dismissal. These students follow the then-current degree requirements.
2. **Academic Forgiveness** - Academic Forgiveness is a status that enables students to return to the university with a reset cumulative grade point average (GPA) of 0.00.
3. **Four Consecutive Years** - A total of eight consecutive fall and spring semesters.
4. **Three Consecutive Years** - A total of six consecutive fall and spring semesters.

Policy Statement

Undergraduate, degree-seeking students who re-enroll following a minimum absence from the university defined by this policy may petition to have their cumulative GPA reset at the time of re-enrollment to the university. Once applied, Academic Forgiveness cannot be reversed.

Upon successful application for Academic Forgiveness:

- Cumulative grade point average will be reset to 0.00 after the Drop/Add period of the semester of reenrollment.
- All prior courses and grades will remain on the student's academic record and transcript.
- The notation of "Academic Forgiveness" will be recorded on the student's transcript.

- Courses previously earned at Temple University with grades of CD, D+, D, D-, F, NC, NR, MG, PI will not be used for credit towards the student's degree. Credit will be considered for courses with grades of A, A-, B+, B, B-, C+, C, C- and CR. The student's department has final approval of credits that will count towards graduation. Schools/Colleges may disallow credits towards graduation for courses that are no longer applicable to the current degree, per applicable major rules.

Re-enrolled students electing the forgiveness option may repeat a course one additional time if they previously exhausted their repeat options for that course under the policy on Repeating a Course (policy # 02.10.12).

Students who choose Academic Forgiveness and wish to qualify for Latin Honors at Graduation must complete a minimum of 60 earned credit hours at Temple following their reinstatement, i.e., excluding their earned credit hours allowed at the time of academic forgiveness.

Students are afforded one opportunity for Academic Forgiveness.

Notes

1. Dates of official enactment and amendments

Adopted by the president on February 8, 2011. Effective August 30, 2011 (Fall 2011).

The January 2021 amendment adds a three-year option for students who complete credits elsewhere; specifies that once Academic Forgiveness is applied it cannot be reversed; and students can only be approved for Academic Forgiveness once.

It also adds the grade CD to the grades that cannot be used for credit towards the student's degree.

2. History

This policy was amended in January 2021.

Supersedes

Previous policies concerning Withdrawal; Repeat; and Academic Warning, Probation and Dismissal with effective dates prior to May 16, 2011.

Procedures related to this policy can be found in the Academic Policies section of the *Undergraduate Bulletin*.

Academic Progress for Undergraduate Courses

Students in undergraduate courses receive a mid-semester rating report indicating that their work to date is satisfactory or unsatisfactory or that they have not been attending the course. This report is available on Self-Service Banner by the end of the sixth week of fall and spring semesters. For further information, see the full policy below.

Policy on Academic Progress for Undergraduate Courses

(Policy # 02.10.15)

Scope of Policy

The transition from high school to college is challenging. There are fewer classroom hours, and time is less structured. Study and other academic work are undertaken more independently than in secondary school. Evaluations of performance are less frequent. As a result, students may be unaware that they are not meeting academic expectations.

The current program of midsemester "early warnings" is restricted to courses in the lower division. The positive benefits of this feedback system to students, faculty and university support services are clear. Extending the system to include all undergraduate courses underscores the University's commitment to improving the academic performance of all undergraduate students by providing timely feedback, guidance and assistance thereby enhancing overall student performance in classes in the University.

This policy's purpose is to provide students in upper division courses with the same early warning of University concern as is currently provided for lower division courses. This will enable them to seek early guidance and assistance when their performance in a course is not satisfactory.

Policy

Effective Fall semester 2014, courses offered principally for undergraduates shall include one or more evaluations of student progress prior to the completion of approximately one-third of the course (equivalent to the end of the fifth week of a standard 14-week semester). Evaluation(s) may include quizzes, exams, papers, essays, performances, presentations, laboratory or studio demonstrations or experiments, or other activities determined by the instructor to be subject to evaluation or grading.

The instructor shall enter Midterm Progress Ratings in Self-Service Banner (SSB) for each course included in the process. A rating will be entered for each student by selecting the appropriate rating in the drop down box in the "Rating" column on the electronic form. During and after the rating

period, ratings can be viewed on the 'Grade History' page. The rating period will begin when approximately 45% of the course is completed and end when approximately 55% of the course is completed (equivalent to the beginning of the sixth week and end of the eighth week of a standard 14-week semester, respectively).

Reports of unsatisfactory ratings submitted by the faculty may be used by the University, including its schools or colleges and its central academic offices, to advise students that their academic performance in certain courses is a cause for concern and to counsel students to seek appropriate assistance in their studies, including assistance from the instructor in the course. Exceptions to this policy may be granted by Deans if early evaluation of student progress is inconsistent with the purpose of the course or presents a significant burden in meeting course objectives. Each Dean shall report such exceptions each semester to the Provost.

Notes

1. Dates of Official Enactment and amendments:

Adopted by the President on February 6, 2003. Effective on September 1, 2003.

Amended by the President on August 27, 2014. Effective Fall 2014 semester.

2. History:

Secretary's Note: This policy was previously identified as #02.78.15.

The August 2014 amendment changes the courses covered by the policy and updates the language to reflect the shift from paper to an online rating process.

3. Cross References

None

Academic Residency Requirements

Temple University requires that all undergraduate degree candidates complete 45 hours of the last 60 hours of the degree or program as matriculated students at Temple University. If a matriculated student previously took Temple courses on a non-matriculated basis, those courses are counted towards this requirement. See the policy on Transfer Credits (p. 27).

Students admitted to the University with a large number of transfer credits who want to participate in a Temple Exchange or approved external study abroad program in their junior or senior year should meet with their academic advisors to discuss eligibility.

To graduate with Latin Honors, a student must complete at least 60 semester hours of the program matriculated at Temple. See Honors (p. 1855).

Students should consult their school or college for additional academic residency requirements.

This policy was last updated in Fall 2014. Students following Catalog Terms prior to Fall 2014 are subject to the residency requirements indicated in the Bulletin of their Catalog Year.

Academic Rights and Responsibilities

Summary

Temple University students who believe that instructors are introducing extraneous material into class discussions or that their grades are being affected by their opinions or views that are unrelated to a course's subject matter can file a complaint under the university's policy on academic rights and responsibilities (Temple Policy 03.70.02).

The policy encourages students to first discuss their concerns with their instructor. If a student is uncomfortable doing so, or if discussions with the instructor do not resolve the student's concerns, an informal complaint can be made to the Student Ombudsperson for the student's school or college. Unresolved complaints may be referred to the dean for handling in accordance with the school or college's established grievance procedure. Final appeals will be determined by the Provost.

Go to the Student Rights and Responsibilities section of this *Bulletin* for additional information.

See below for the full policy text.

Student and Faculty Academic Rights and Responsibilities

(Policy # 03.70.02)

Scope of Policy and Rationale

As an academic institution, Temple University exists for the transmission of knowledge, the pursuit of truth, the development of students, and the general well-being of society. Free inquiry and free expression are indispensable to the attainment of these goals. As members of the academic community, students should be encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search for truth.

Freedom to teach and freedom to learn are inseparable facets of academic freedom. The freedom to learn depends upon appropriate opportunities and conditions in the classroom, on the campus, and in the larger community. The university and the faculty have a responsibility to provide students with opportunities and protections that promote the learning process in all its aspects. Students similarly should exercise their freedom with responsibility.

Temple University therefore reaffirms its commitment to academic freedom, and adopts the following statement of academic freedom principles applicable to faculty and students.

Policy Statement

1. Faculty are entitled to freedom in the classroom in discussing their subjects, but they should be careful not to introduce into their teaching controversial (or other) matters which have no relation to their subject. The faculty member is responsible, however, for maintaining academic standards in the presentation of course materials.
2. As members of the academic community, students should be encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search for the truth.
3. Faculty members in the classroom and in conference should encourage free discussion, inquiry, and expression. Student performance should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards.
4. Students should be free to take reasoned exception to the information or views offered in any course of study and to reserve judgment about matters of opinion, but students are responsible for learning the content of the course of study in which they are enrolled. The validity of academic ideas, theories, arguments, and views should be measured against the relevant academic standards.
5. Students should have protection through orderly grievance procedures against prejudice or capricious evaluations that are not intellectually relevant to the subject matter under consideration. At the same time, students are responsible for complying with the standards of academic performance established for each course in which they are enrolled.

Procedures

Student Grievance Procedure

Except in cases in which a student challenges a grade received in connection with a course, the following procedures shall apply when a student believes that a faculty member has infringed upon the student's academic rights as set forth in this policy. In cases in which the student is challenging a grade in connection with a course, the student shall follow the grade appeal procedure applicable to the school or college in which the course is offered.

1. If a student grievance for an alleged violation of academic rights cannot be resolved between the faculty member and the student, or if the student does not feel comfortable in discussing the matter directly with the faculty member, the student may bring an informal complaint to the student ombudsperson of the school or college to try to affect an informal resolution.
2. If a resolution satisfactory to the student is not obtained through an informal mediation process with the student ombudsperson, the student may submit a formal, written grievance to the dean or the dean's designee.
3. The dean or the dean's designee may attempt informal resolution through discussion with the student and faculty member. If a mutually agreeable resolution is not achieved through informal discussion, the dean shall refer the matter for consideration in accordance with the procedures for resolution of student grievances as set forth in the bylaws of the school or college.
4. The dean will consider the recommendation of the school or college's student grievance committee and issue a written decision and remedy. Appropriate precautions should be developed to safeguard the confidentiality of the grievance proceedings, including information about the outcome.
5. Either party to a grievance may appeal the decision of the dean to the provost, in writing, within ten (10) days following notice of the dean's decision. A written reply by the other party must be filed within ten (10) days after receipt of the appeal. The dean's decision shall be held temporarily pending appeal. The provost has discretion to determine the information and procedure that he/she will utilize in deciding each appeal. The decision of the provost shall be in writing and shall be final.

Recordkeeping and Reporting

The officers should develop mechanisms and procedures for developing and maintaining records in a confidential manner of all grievances brought pursuant to this policy. In addition, the officers shall provide a report on all grievances pursuant to this policy each semester to the chairs of the Academic Affairs, Student Success, and Diversity Committees of the Board of Trustees, and establish a mechanism for annual reviews of this policy and its effectiveness by appropriate university officials and the board.

Notes

1. History:

Last Amended:

Adopted by the Executive Committee, acting on behalf of the Board of Trustees on July 19, 2006.
November 2022: Updated to reflect current Bylaws and job titles.

Initial Policy Effective Date:

August 1, 2006

Academic Standing

NOTE: This policy is currently under review. If a new version is approved during the 2023-2024 academic year, the policy document link below and this Bulletin page will be updated accordingly.

Scope of Policy & Rationale

Undergraduate baccalaureate and associate degree-seeking students are subject to the academic standing rules addressed in this policy.¹ (Policy # 02.10.11)

Definitions

1. **Academic Term** - A fall, spring, summer I or summer II semester in which a student registers for one or more courses.
2. **Academic Good Standing** - A student is in Academic Good Standing if enrolled in a degree-seeking program and not in the first term of Academic Recovery.
3. **Academic Warning** - A student is on Academic Warning status when:
 - a. the student's most recent semester grade point average is less than 2.0 **or**
 - b. the student's cumulative grade point average is less than 2.0 prior to accruing 30 cumulative hours (or 20 cumulative hours for an associate degree program) or completing a 4th Academic Term.
4. **Academic Probation** - A student is on Academic Probation when the student's cumulative grade point average is below 2.0 after accruing 30 or more cumulative hours (or 20 or more cumulative hours for an associate degree program) or completing a 4th Academic Term. First-year and transfer students in the first matriculated semester are not subject to Academic Probation.
5. **Academic Dismissal** - The status of Academic Dismissal is applied to a student with:
 - a. more than 30 credit hours (or more than 20 credit hours for an associate degree program) or after completion of the 4th Academic Term; and
 - b. the status of Academic Probation in the most recent completed semester; and
 - c. a cumulative GPA equal to or below the Dismissal GPA (See Appendix 1: Dismissal GPA by Total Institutional GPA Hours + Total Transfer Earned Hours).
6. **Academic Recovery** - A student on Academic Dismissal status can apply to the applicable advising office for the status of Academic Recovery. The status of Academic Recovery is available, upon approved application, provided that the student:
 - a. is on Academic Dismissal status for the first time; and
 - b. has a cumulative GPA equal to or below the Dismissal GPA (See Appendix 1: Dismissal GPA by Total Institutional GPA Hours + Total Transfer Earned Hours); and
 - c. has a cumulative GPA that can be raised above the Dismissal GPA (See Appendix 1) within two calendar years or 150 total attempted credit hours, whichever comes first.
7. **Institutional GPA Hours** - include credit hours in all courses graded "A" through "F". Credit hours for repeated courses are calculated according to the policy on Repeating a Course (Undergraduate and Graduate) (Policy # 02.10.12).

Policy Statement

The university assesses academic standing and the statuses of Academic Warning, Academic Probation, Academic Dismissal and Academic Recovery based on academic performance following each Academic Term.

A student on Academic Warning or Academic Probation or a student who is granted Academic Recovery status must meet with an advisor to discuss his/her academic standing. An advisor will help in planning a schedule of courses to assist the student in achieving above the Dismissal GPA. A student on Academic Warning will be able to self-register after this meeting; a student on Academic Probation or Academic Recovery must be registered by his/her advisor.

If a student is on Academic Dismissal status for the first time, the student has two options:

1. *Apply for Reinstatement*

A student on Academic Dismissal status for the first time may apply for reinstatement not less than four years from the date of last enrollment at Temple University. At the time of application, all credit hours will be evaluated. Final determination of the acceptability of such credit hours is the responsibility of the applicable academic unit.

A student may also apply for Academic Forgiveness (Policy # 02.10.17) at this time.

2. *Reinstatement through Academic Recovery*

A student on Academic Dismissal status for the first time may apply for Academic Recovery status through their respective advising unit. Academic Recovery would be applicable the next immediate semester or summer term unless the student is granted a Leave of Absence pursuant to university

policy. Students granted Academic Recovery status will be required to meet with advisors, complete for a grade a minimum of six credit hours, and achieve a minimum semester GPA requirement.

During the student's first semester or summer session of Academic Recovery status, the student will not be in Academic Good Standing and therefore will be ineligible for aid of any kind, including without limitation federal loans or grants, tuition remission and scholarships.

Students who successfully complete the requirements of the first semester or summer session on Academic Recovery status will:

- a.) return to Academic Good Standing
- b.) be permitted to attend classes during the next summer session or semester.

Students may only continue on Academic Recovery if they meet the Target Semester GPA. (See Appendix 2.) The student must maintain a GPA at or above the Target Semester GPA in Appendix 2 for each semester or session they are on Academic Recovery. Students on Academic Recovery must register for a minimum of six (6) credit hours per term. Course overloads are not permitted while on Academic Recovery.

Students may not remain on Academic Recovery status for more than two calendar years² following their original dismissal or 150 attempted credits, whichever comes first.

A student on Academic Recovery who achieves above the Dismissal GPA (as determined by Appendix 1) will be removed from Academic Recovery status.

Students who do not meet requirements of their Academic Recovery status during any summer session or semester will be Academically Dismissed for a second time. Upon the second Academic Dismissal a student must wait and apply for reinstatement not less than four years from the date of the first Academic Dismissal in accordance with this policy. The student will also be eligible for Academic Forgiveness (Policy # 02.10.17).

In the event a student is removed from Academic Recovery status after achieving above the Dismissal GPA, but is subsequently Academically Dismissed for a second time, the student must wait and apply for reinstatement four years from the date of the second Academic Dismissal. The student will also be eligible for Academic Forgiveness.

1

Academic Standing is determined by calculating Total Earned Transfer Hours plus Total Institutional GPA Hours. For Academic Forgiveness Students calculation includes Forgiveness Institutional Earned Hours (grades A through C- preceded by an asterisk) + Total Institutional GPA Hours + Total Transfer Earned Hours. Not included in Total Institutional GPA Hours for all calculations: AU, CR, NC, HC, I, IC, IP, MG, M, NR, P, PI, R, S, W, WE, WF, WS. See your academic advisor for assistance.

2

A calendar year begins the date of dismissal and is equivalent to one fall, one spring, and two sequential summer sessions.

Notes

1. Dates of official enactment and amendments

Adopted by the President on June 12, 2003.

Amended by the President on September 7, 2006. Effective immediately.

Amended by the President on September 26, 2007. Effective immediately.

Amended by the President on August 1, 2011. Effective May 16, 2011 (Summer Session I). Beginning May 10, 2012 (End of Spring Semester 2012), students will be dismissed when they fail to complete English 0701, English 0802, IH 0851, IH 0852, and Math 0701 or other equivalent versions of these courses in the requisite number of times per Policy 02.10.12, Repeating a Course.

Amended by the President on May 18, 2012. Beginning end of Spring Semester 2012 and applying retroactively to end of Fall 2011 semester, admitted transfer students in first matriculated semester and who are registered for 18 or fewer credits and whose semester grade point average is less than 2.0 will be applied the status of warning.

Amended by the President on June 1, 2015, effective immediately. Students on Academic Dismissal status at the end of the 2012 spring semester are eligible to apply for Academic Recovery status, if necessary, or return to such other academic status as permitted by university policy. (For example, a student placed on Academic Dismissal for failure to complete English 0701, but who had a cumulative GPA above 2.0 would be eligible to return to Academic Good Standing.)

Students on Academic Dismissal status for the first time at the end of the 2012 spring semester may apply for Academic Recovery status through their respective advising unit for return to the university no later than the 2016 spring semester. The two calendar year limit for the Academic Recovery status for these students will apply from the date of their first registered term.

2. History

September 7, 2006 amended the provisions regarding eligibility for institutional financial aid and university housing.

September 26, 2007 amended the requirements for academic good standing and dismissal.

August 1, 2011 amended language describing the method by which dismissal is determined and the requirements for reinstatement.

May 18, 2012 amended the requirements for academic warning and probation for first-semester transfer students.

June 2015 amended the dismissal requirements for certain courses and created Academic Recovery status.

October 2021 defined Academic Term and clarified policy application to part-time students.

Supersedes

This policy supersedes all policies and procedures related to academic warning, dismissal and reinstatement for undergraduates, and specifically "Undergraduate Policy on Academic Warning, Probation, Dismissal and Reinstatement."

Appendix 2 - Target GPA Calculation

$$\frac{[(\text{Max recovery hours available} + \text{Current GPA hours}) * (\text{New Dismissal GPA} + 0.01)] - [\text{Current GPA hours} * \text{Current GPA}]}{\text{Max recovery hours available}}$$

Where:

1. Max recovery hours available is the lesser of: hours remaining to the 150 attempted hours ceiling OR 68 (which represents 4 major semesters at 17 hours per semester)
2. Current GPA hours is the cumulative GPA hours after the most recent semester completed
3. New Dismissal GPA is the projected Dismissal GPA threshold at the end of the Academic Recovery period, when the 2-year period and/or available hours to the 150 attempted credit ceiling have been exhausted
4. Current GPA is the cumulative GPA after the most recent semester completed.

Assessment of Student Learning

Temple University is committed to providing superior educational opportunities to its students. To help us maintain quality academic offerings, the University and its programs regularly examine the effectiveness of the curricula, teaching, services, and programs the University provides. *As Temple University sees appropriate, it may retain representative examples or copies of student work.* This might include papers, exams, creative works, or portfolios developed and submitted in courses or to satisfy the requirements for degree program(s).

In addition to regularly collecting and reviewing student work, Temple University may summarize the results of this review, and use the information to improve programs and enhance student learning. Some of this assessment may also be necessary for Temple University or its programs to demonstrate it meets the standards of external review or accrediting bodies.

Typically, results will be reported in a general, summary format and students' names will not appear on the collected examples. Cohorts may be tracked for specific educational purposes, but the expectation is that assessment will be anonymous. Identifiers will only be used when there is a compelling reason and educational value.

Questions about the assessment of student learning at Temple University may be directed to the Office of Institutional Research and Assessment, 215-204-8277 or assessment@temple.edu.

Attendance

Enrollment in a course presupposes intention to attend regularly. Attendance requirements should be announced by the instructor at the beginning of the course. The student who is absent for any reason is responsible for work missed. If a pattern of excessive absences develops, the instructor may report this fact to the student's advisor through the department in which the student is enrolled.

The student should understand that excessive absences may, at the option of the instructor, jeopardize the grade and/or continuance in the course. Although attendance is basically a matter between the student and the instructor, either may request the counsel of the advisor or the Office of the Dean in special cases.

Students should consult the policies and regulations of their own school or college for any further specifications of attendance policy.

Audit

There may be circumstances under which a student will wish to audit a course, i.e., participate in the class without earning academic credit, credit hours, or grades.

Written permission of the instructor and of the school/college dean (or designee) is required on the Special Registration Approval Form. Full tuition is charged, and standard payment procedures apply.

Change of registration from credit to audit, or from audit to credit, must be processed prior to the add/drop deadline for the respective part of term in which the course is scheduled. Course credits in audit status will not count in the following:

- Calculation of full-time, part-time, or half-time enrollment status.
- Eligibility for financial aid.
- Eligibility for loan deferment.
- Full-time status for international students to satisfy visa requirements.
- Full-time status for student-athletes to satisfy eligibility requirements.
- Military and/or veteran education benefits.
- Credits attempted.

Audited courses will be transcribed with a grade designation of 'AU'.

Continuing Degree Seeking Students

Continuing degree seeking students are those who have applied, been accepted, and enrolled in a degree program of the university during the semester for which they were admitted.

Completion of course credits before becoming a continuing degree seeking student does not assure the acceptance of those credits into the program of study.

Course Numbering System

Course Numbering Rules and Conventions

All courses have full four-digit numbers. The first digit of a course identifies its level.

- Courses numbered A000 - U000 are reserved for transferred elective and generic credits.
- Courses numbered 0700 - 0999 are reserved for preparatory courses, General Education courses and Honors General Education courses.
- Courses numbered 1000 - 1999 are appropriate for undergraduate students in their first year of study.

Courses numbered 2000 - 5999 are considered "upper level" for undergraduates.

- Courses numbered 2000 - 2999 are appropriate for undergraduate students in their second year of study.
- Courses numbered 3000 - 3999 are appropriate for undergraduate students in their third year of study.
- Courses numbered 4000 - 4999 are appropriate for undergraduate students in their fourth year of study.
- Courses numbered 5000 - 5999 are primarily for graduate students, but undergraduate students in their third or fourth year may enroll with permission of their instructors and the dean's designee.
- Courses numbered 8000 - 9999 are for graduate students.

Other Classifications and Definitions

Undergraduate Courses

- **0700 - 0799 Preparatory Courses:** Courses numbered from 0700-0799 are appropriate for undergraduate, first-year math and writing courses. Students' math and writing placement assessment results determine these course-level selections.
- **0800 - 0899 General Education Courses:** Courses numbered from 0800-0899 are appropriate for any undergraduate General Education course requirements.
- **0900 - 0999 General Education Honors Courses:** Courses numbered 0900-0999 are appropriate for any undergraduate General Education Honors course requirements.
- **xxx0 Special Topics:** Regularly-scheduled courses (not individualized instruction) offered with variable content, and repeatable for credit.
- **x9xx Honors Courses:** Undergraduate Honors courses will be identified by a 9 as the second digit of the course number and will have "Honors" as the first word of the title. The 9 in the second position will not be used by any non-Honors undergraduate course. General Education Honors courses are designated 09xx.
- **xx81 Cooperative Assignment:** Increasingly complex, experiential learning with supervision external to the university. Usually these courses include learning experiences over more than one semester - as part of a defined program.
- **xx82 Independent Study:** Explorative study or research initiated by an undergraduate student with faculty sponsorship and an approved Independent Study contract.
- **xx83 Directed Reading/Study:** Mentored reading/study between a faculty member and an undergraduate student.
- **xx84 Performance:** Concert performance, juried art exhibition or other performance taken as a requirement for the degree.
- **xx85 Internship/Externship:** Pre-professional clinical or experiential traineeships contracted by the student's department, including experiences with a clinical, research, or other special concentration in a specific area. Students must have faculty sponsorship and an approved Internship/Externship contract.
- **xx86 Internship/Externship:** Reserved for a continuation of an internship/externship experience, following xx85.
- **xx87 Practicum:** Programs that are traineeships contracted by the student's department to meet the educational, geographic, and specific interests of the student. Settings generally have on-site clinical supervision.
- **xx88 Student Teaching:** Practical experiences in student teaching designed to support and lead to teacher certification.
- **xx89 Field Study:** On-site, observational study or data collection and analyses which deepen practical knowledge in the discipline. The purpose of the Field Study is to integrate and apply academic theories to on-site experiences.
- **xx91 Directed Research:** Mentored research between a faculty mentor and an undergraduate student.
- **xx92 Undefined**
- **xx93 Undefined**

- **xx94 Undefined**
- **xx95 Undefined**
- **xx96 Writing-Intensive Course:** Courses fulfilling the requirement of the General Education Program that each undergraduate major designates at least two courses as "writing-intensive." The designated courses shall require students to edit and rewrite papers to achieve a high level of clarity and cogency, use a variety of methods to find appropriate materials to support written work and to make proper attribution of those sources.
- **xx97 Writing-Intensive Course**
- **xx98 Writing-Intensive Course**
- **xx99 Undergraduate Thesis:** Sustained research, performance or artistic project resulting in a substantial, finished written report or other product in a format appropriate to the project. Assumes faculty sponsorship and mentorship.

Graduate Courses

- **xxx0 Special Topics:** Regularly-scheduled courses (not individualized instruction) offered with variable content, and repeatable for credit.
- **5x81 and 9x81 Co-operative Assignment:** An experiential learning experience with supervision external to Temple University.
- **5x82 and 9x82 Independent Study:** Explorative study or research initiated by a graduate student with faculty sponsorship and an approved Independent Study contract.
- **5x83 and 9x83 Directed Reading/Study:** Mentored reading/study between a faculty member and a graduate student.
- **5x84 and 9x84 Performance:** Concert performance, juried art exhibition, or other performance taken as a requirement for the degree.
- **5x85 and 9x85 Internship/Externship:** Professional clinical or experiential traineeships.
- **5x86 and 9x86 Internship/Externship:** Reserved for continuation of Internship/Externship experiences numbered 5x85 and 9x85.
- **5x87 and 9x87 Practicum:** Programs that are traineeships contracted by the student's department to meet the educational, geographic and specific interests of the student. Settings generally have on-site clinical supervision.
- **5x88 and 9x88 Practicum:** Reserved for continuation of practicum experiences 5x87 and 9x87.
- **5x89 and 9x89 Field Study:** On-site observational study or data collection/analyses in the transition from the academic to the professional environment. The purpose of Field Study is to integrate and apply academic theories to the professional arena.
- **5999 Research Experience**
- **9991 Directed Research:** Mentored research between a faculty mentor and a graduate student.
- **9992 Master/Doctoral Leveling Exam(s):** Competency examinations that must be satisfied prior to sitting for the master's or doctoral preliminary/candidacy exam.
- **9993 Master Comprehensive Exams**
- **9994 Doctoral Preliminary/Candidacy Exam**
- **9995 Thesis/project Credits: Master of Fine Arts**
- **9996 Thesis Credits: Masters**
- **9997 Reserved for future use**
- **9998 Doctoral Proposal/Candidacy**
- **9999 Dissertation Credits**

For more specific policies, consult individual schools, colleges, or programs.

Courses Inapplicable to Graduation

Semester hours earned in some courses are excluded from the total minimum semester hours or earned credit hours required for graduation from some schools and colleges. While policies vary among schools and colleges, courses inapplicable to graduation requirements generally are ELECT, Mathematics 0015 (formerly Mathematics 0001), Russell Conwell Center courses, and lower-level Military Science (ROTC) courses.

For specific information, see Policies and Regulations: Courses Inapplicable to Graduation in each school and college's section in this *Bulletin*, or consult academic advisors.

Courses Over Ten Years Old

In admitting transfer or returning students, the university will, when possible, allow credit for courses taken ten or more years prior to the date of admission or re-enrollment.

However, academic units may choose not to accept courses regardless of age for credit in the major. Courses of a technical nature or courses in a particularly dynamic field may not be accepted for credit.

Final determination of the acceptability of such courses is the responsibility of academic units in the schools and colleges and generally occurs after the student has matriculated or been re-enrolled.

Credit for Prior Learning

For information on credit for prior learning, refer to the Transfer Students (p. 27) section of this *Bulletin*.

Credit Hours

Scope of Policy & Rationale

This policy (Policy # 02.10.19) applies to all credit-bearing academic programs and courses within the university.

Definitions

The semester credit hour is the basic unit of academic credit granted by Temple University. One semester credit is equivalent to one hour (50 minutes) of faculty instruction time per week for 15 weeks, which includes one week for exams; and a minimum of two hours of out of class student work each week per credit hour. An equivalent amount of work is required for other academic activities such as laboratory work, internships, practica, studio work, or other academic work leading to the award of credit hours.

Note: Temple University follows a semester system with the fall and spring semesters consisting of approximately 16 weeks, which includes one week for exams and one week per semester for a fall and spring break. Summer semesters vary in length and adhere to this policy.

Policy Statement

Temple University's credit hour policy is consistent with guidelines set by the Pennsylvania Department of Education for determining the amount and level of credit awarded for courses, regardless of instructional method or mode of delivery. These guidelines are in compliance with policies set forth by both the US Department of Education and the Middle States Commission on Higher Education.

1. Determination of amount and level of credit

The faculty is responsible for the curriculum. Credit values are determined at the department level based on course goals, learning outcomes, instructional needs and faculty expertise. Once a course is approved it is included in the University course catalog. It is then the responsibility of the school/college to verify that it is scheduled for the minimum number of minutes.

2. Credit hours by instructional method

Lecture and seminar: Courses with multiple students that meet to engage students in various forms of group instruction. A typical 3 hour course will meet 2100 minutes over 14 weeks (excluding the exam period and scheduled breaks).

Lecture Hours Per Required Credit:

Credits awarded	Minimum contact time per week for 14 weeks	Minimum instructional time
1	50 contact minutes	700 contact minutes
2	100 contact minutes	1400 contact minutes
3	150 contact minutes	2100 contact minutes
4	200 contact minutes	2800 contact minutes

Laboratory and studio: Courses with a focus on experimental learning where in the student performs substantive work in a laboratory or studio setting. The minimum contact time per credit is twice that of a lecture (2:1 ratio).

Laboratory/Studio Hours Per Required Credit:

Credits awarded	Lab studio minimum instruction time per week for 14 weeks	Minimum instructional time
1	100 contact minutes	1400 contact minutes
2	200 contact minutes	2800 contact minutes
3	300 contact minutes	4200 contact minutes
4	400 contact minutes	5600 contact minutes

Independent study: Courses offered as directed studies with approval and supervision of faculty member. Student(s) meet periodically as agreed upon during the duration of the course. Semester hour credit awarded must be comparable in scope, content, academic rigor and student study time as courses offered in lecture format.

Internships, Practicum/clinical/field experience, Externships: Courses developed for independent learning or experience involving self-directed and often off-site learning. These courses are taught on a minimum 2:1 ratio (see laboratory / studio chart above).

Accelerated Courses: Courses offered in terms of length less than a traditional 15 week semester. These courses offer the same semester credit hours as traditional semester-length classes. Within the shortened time frame, accelerated courses must meet the minimum contact hour requirements of the lecture format.

Online: Courses offered entirely online without regard to face-to-face meetings. Students are expected to be academically engaged with comparable learning outcomes of a standard lecture course with alternate delivery methods. Contact time is satisfied through several means which can include but is not limited to the following: a) regular instruction or interaction with a faculty member once a week for each week the course runs;

b) academic engagement through interactive tutorials, group discussions moderated by faculty, virtual study/group projects, engaging with class peers and computer tutorials graded and reviewed by faculty. Departments must document through scheduling of classes or syllabi that they are meeting the minimum credit hour requirement for the credit awarded.

Hybrid: Courses offered in a blended format with one or more required face-to-face class sessions and with one or more required online sessions. Departments must document through scheduling of classes or syllabi that they are meeting the minimum credit hour requirement for the credit awarded.

3. Courses evaluated for transfer from colleges and universities with different credit systems

Courses evaluated for transfer from colleges and universities with different credit systems (quarter hours, units) are converted to semester hours (i.e., 2 quarter hour credits are equivalent to 1.5 semester hour credits; 3 quarter hour credits are equivalent to 2.0 semester hour credits; 4 quarter hour credits are equivalent to 2.5 semester hour credits).

4. Review

The Banner Student Competency Center, in consultation with the appropriate administrative offices including the Office of the Registrar and the Office of Digital Education, regularly audits scheduled course offerings to ensure compliance with credit hour requirements through its processes for scheduling each semester, including compliance with the university's scheduling matrix. This review is conducted across all schools, disciplines, course levels and modes of instruction.

Notes

1. **Dates of official enactment and amendments**

Adopted by the President on February 16, 2015.

2. **History**

Supersedes previous guidelines and protocols in the *Undergraduate Bulletin* for students.

3. **Cross References**

Procedures related to this policy can be found in the Academic Policies section of the Undergraduate Bulletin.

Credit/No Credit Courses

Eligible students may want to take a course in an area in which they are not proficient or about which they are curious, while not risking their grade point average. Such students, with certain provisions, may be graded using the Credit/No Credit (CR/NC) grading option. Students will then receive one of three grades:

CR = Credit, equivalent to C- or above

CD = Credit with D, equivalent to D-, D, D+

NC = No Credit, equivalent to F.

Students may select the CR/NC grading option or return to the traditional grading option prior to the add/drop deadline for the Part of Term in which the course is scheduled (as published on the Academic Calendar) with the authorization of their advisor and/or dean's designee.

Eligibility is limited to:

- undergraduate matriculated students
- those in academic good standing.

Courses are restricted to:

- any non-General Education course
- one CR/NC course per semester
- maximum of four CR/NC courses toward the degree (not including any courses graded with CR/NC in Spring term 2020).

Students need to consider the following when selecting the CR/NC grading option:

- No grade points are assigned to the CR, CD, or NC grade, so they have no impact on the calculation of the grade point average.
- Semester hours earned are counted toward the total required for graduation.
- CR/CD/NC grading options are not included in calculating cumulative credits for determining academic actions specified in the Academic Standing policy # 02.10.11.
- CR/CD/NC grading options do count as an attempt as defined in the Repeating a Course policy # 02.10.12.

Note:

1. CR/NC grading option may not be an appropriate option for required courses in the major due to minimum grade requirements.
2. Transfer students who retake a course at Temple for which they have already received transfer credit and earned a "NC" in the Temple course, can use the transfer course to satisfy a requirement according to the School/College transfer rules.
3. If a "CD" or "NC" grade is earned in a course, this course will not satisfy prerequisite requirements that require at least a C- grade.

Dean's List

Dean's List eligibility is determined by the semester grade point average (GPA) corresponding to cut-off points that will yield the top 16% of GPAs based on the five previous fall and spring semesters for each school or college. Students must have 12 graded credits (A to F grades) in order to be eligible for dean's list for the fall or the spring semesters.

Students who begin in the fall as part-time (i.e., registered for fewer than 12 credits) and continue as part-time in the spring will be eligible for dean's list in the spring if they accumulate at least 12 graded credits (A to F grades) over the fall and spring semesters and meet the GPA criteria listed on the chart for the school or college. If a student is enrolled part-time in the fall but full-time in the spring, eligibility for dean's list will be based on spring semester grades.

For fall 2023 and spring 2024, the cut-offs for dean's list eligibility are:

College	GPA Cut-off
Boyer College of Music & Dance	3.97
College of Education & Human Development	4.00
College of Engineering	3.78
College of Liberal Arts	3.94
College of Public Health	3.93
College of Science & Technology	3.89
Fox School of Business & Management	3.78
Klein College of Media & Communication	3.94
School of Social Work	3.97
School of Sport, Tourism & Hospitality Management	3.84
School of Theater, Film & Media Arts	3.95
Tyler School of Art & Architecture	3.94
University College	3.86
University Studies	3.80

Declaration of Major and/or Concentration

Students admitted to Temple for fall 2002 and after must be enrolled as a major in a degree-granting program in a school or college by the time they have completed 60 credits, including any credits transferred from another institution.

Students admitted to Temple with 60 or more transfer credits will be matriculated directly into a degree-granting program, rather than as "undeclared" in a school or college or the Division of University Studies.

Students declare a major either by completing their school's or college's declaration of major process (see specific school or college section in this *Bulletin* or the policy on Transfer between Schools/Colleges within the University (p. 1864)). Individual schools and colleges may require students to declare a major earlier than 60 credits. Students should consult the policies of their own school/college for any additional guidelines regarding declaration of major.

The catalog year is important in reviewing requirements in the current or past University Bulletins or in the Degree Audit Reporting System (DARS). The catalog year dictates the program requirements for both a major and a concentration. When students declare or change their major, they follow the program requirements established in the current catalog year (which displays as a Fall term of the academic year). This may or may not be the same year as when they were first admitted to the University:

Semester Major is Declared	Catalog Year of Major
Current Fall Semester	Current Fall Semester
Subsequent Spring Semester	Current Fall Semester
Summer Session I	Current Fall Semester
Summer Session II	Current or Subsequent Fall Semester

Effective Fall 2021, when students declare a required or optional concentration in a term after declaring their major, the catalog term and requirements associated with the concentration will match the catalog year of the major if the concentration was active during that catalog year.

However, if a student declares a required or an optional concentration that was not in existence when the major was declared, the student's record will update as follows:

- The catalog term for the major and the concentration will reflect the current catalog year.
- The student will have to follow the major and the concentration requirements established in the updated catalog year.

Disciplinary Action

The Office of Student Conduct and Community Standards is responsible for administering the Student Conduct Code. Violations of the university's Conduct Code, including among other things, stealing, cheating, disorderly conduct, plagiarism, and illegal possession/use of alcohol and other drugs, may result in a student being brought before one of the Student Conduct Boards, as outlined in the Student Conduct Code. Student Conduct and Community Standards facilitates the student conduct process striving to create a campus environment conducive to learning. The process is designed to help students realize their role in maintaining campus civility through educational programming and sanctioning as well as through the participants on the student conduct boards.

The Student Conduct Code can be found online at the Temple University's Policies web site as policy # 03.70.12.

Double Major Across Colleges

A student who meets the major requirements of two departments may declare, and have recorded on his or her transcript, a double major. Students who graduate with a double major across two colleges are required to complete all university requirements (General Education) and the requirements of both majors (including two Writing Intensive courses for each major), but only one set of college graduation requirements. The student must obtain prior approval from both schools or colleges. One department must be declared the primary department for the purpose of registration and college graduation requirements. (Students considering a double major across colleges should ask academic advisors in both colleges about college policies related to choosing the primary department.)

Dropping or Withdrawing from Courses

Discontinuation of Registration: Dropping or Withdrawing from Courses

(Policy # 02.10.14)

Scope of Policy & Rationale

This policy defines how undergraduate and graduate students may discontinue registration in a course or courses using a "Drop" or "Withdrawal."

Dropping or withdrawing from one or more courses may impact eligibility for financial aid, including work study, loans, grants, scholarships and third-party payments, as well as visa eligibility in current and future semesters. Dropping or withdrawing may also impact student status in programs that require continuous enrollment.

Policy Statement

Drop refers to an action taken by a student during the "drop and add period" to remove a course from their schedule without incurring a financial penalty or notation on the transcript. This transaction can be performed by the student using the self-service method or with the assistance of an advisor. Drop and add deadlines vary by course and term duration and are posted on the academic calendar by the Office of the University Registrar.¹ When dropping a course, a student should be aware of the following:

- **Financial Responsibility:** Students may be eligible for a tuition refund. (See Undergraduate and Graduate Bulletin for more information.) When, however, the university is required to return grant or loan funds to the federal government on behalf of the student, the student may be financially responsible to Temple University for the returned funds.
- **Participation and Attendance:** Once a student drops a course, the student is no longer enrolled and is no longer permitted to participate in or attend the course.
- **Transcript:** Dropped courses are not recorded on the transcript.
- **Academic Dishonesty:** If a student has been informed that academic misconduct is suspected, the student may not drop the course during the investigation and adjudication process or if a failing grade for the course is given as a sanction. Any drop during this time may be reversed and the course registration reinstated. If the student is found to be not responsible, the student may drop the course provided that the allegation of misconduct predates the deadline for the requested action. This policy may be superseded in exceptional circumstances. To make this assessment, the Office of Student Conduct and Community Standards will confer with the appropriate offices to determine if the drop is warranted. See Student Conduct Code, policy #03.70.12.

Withdraw refers to an action taken by a student to discontinue enrollment in a course once the drop and add period has ended. This transaction can be performed by the student using the self-service method or with the assistance of an advisor. Withdrawal deadlines vary by course and term duration and are posted on the academic calendar by the Office of the University Registrar.¹ When withdrawing from the course, a student should be aware of the following:

- **Financial Responsibility:** The student remains financially responsible for the tuition charges for the course.
- **Participation and Attendance:** The student is no longer enrolled and is no longer permitted to participate in or attend the course. The student's withdrawal date is the last date that the student participated in any academic activity related to the course.
- **Transcript:** The course is recorded on the transcript with the notation of "W".
- **Course attempt:** The course will be included in the course attempt count under Temple's policy on Repeating a Course, policy #02.10.12.
- **Incomplete:** Students pursuing an Incomplete are not eligible for course withdrawal. See also Temple's Incomplete Coursework Policy, policy #02.10.13.
- **Academic Dishonesty:** If a student has been informed that academic misconduct is suspected, the student may not withdraw from the course during the investigation and adjudication process or if a failing grade for the course is given as a sanction. Any withdrawal during this time may be reversed and the course registration reinstated. If the student is found to be not responsible, the student may withdraw from the course provided that the allegation of misconduct predates the deadline for the requested action. This policy may be superseded in exceptional circumstances. To make this assessment, the Office of Student Conduct and Community Standards will confer with the appropriate offices to determine if the withdrawal is warranted. See Student Conduct Code, policy #03.70.12.

Excused Withdrawal refers to an approved petition to withdraw from a full semester of classes prior to the last day of class in the term in which the course is taken due to extenuating circumstances beyond the student's control that prohibit continued enrollment throughout the term.

- Extenuating Circumstances are limited to the following:
 - a. Incapacitating medical conditions
 - b. Family emergencies
 - c. Other catastrophic circumstances
- Students may file a Petition for Excused Withdrawal within one (1) year from the end date of the term in which the student experienced documented extenuating circumstances beyond their control that prohibited continued enrollment for the term in all courses.
- In rare circumstances, a student may receive a partial excused withdrawal from individual courses when the documented extenuating circumstances specifically prohibited continued enrollment in only those courses.

When seeking an excused withdrawal from all courses for the term in progress or a prior term, the student must:

1. Establish the extenuating circumstances;
 2. Provide documentation supporting the extenuating circumstance (for example, a medical provider's statement for medical conditions); if seeking a partial excused withdrawal, the student must provide documentation establishing extenuating circumstances that specifically prohibited enrollment in only those courses;
 3. Show evidence of discontinued enrollment, participation in, and attendance at academically related activities (online and/or in-person) in the course(s) prior to the last published class meeting of the term;
 4. Not have taken any final exams or submitted any assignments during the final exam period;
 5. Not have passing grades (D- or higher) or Incomplete grade notations for the term in question; and
 6. Not have an open academic dishonesty student conduct case. (See Student Conduct Code, policy #03.70.12.)
- **Financial Responsibility:** A student seeking an excused withdrawal for the entire term may be eligible for a pro-rated refund in accordance with the refund schedule published by the Office of the Bursar. If the university is required to return financial aid funds on the student's behalf, the student will owe those funds to the University.
 - **Participation and Attendance:** The calculation for the return of federal student financial aid funds is based upon the student's verified attendance or participation in academically related activities. This includes attendance, course participation, learning management system activities, exam or assignment completion, and other course related activities. The student's withdrawal date is the last date that the student participated in any academic activity related to the course.
 - **Transcript:** The course is recorded on the transcript with a "WE" grade notation.
 - **Course attempt:** "WE" grades are not included in the course repeat count under Temple's policy on Repeating a Course, policy #02.10.12.
 - **Incomplete:** Students pursuing an Incomplete are not eligible for excused withdrawal. See also Temple's Incomplete Coursework Policy, #02.10.13.
 - **Appeals:** Students may appeal a denied petition by providing documents supporting their appeal to the Office of the University Registrar. Appeals must be filed within 30 calendar days after initial decision.

1

Courses scheduled in the Short Duration Course part of term vary in their start and end meeting dates. Students may drop such a course prior to the first scheduled meet date or withdraw between the first scheduled meeting date and three days prior to the last scheduled meeting date, as long as a final grade is not reported.

Notes

1. Dates of official enactment and amendments

Adopted by the president on February 4, 2003. First effective on September 1, 2003.

Amended by the president on February 8, 2011. Effective May 16, 2011 (Summer Session I).

Amended by the president on August 15, 2014. Effective August 25, 2014 (Fall 2014 semester).

Amended by the president on August 15, 2018. Effective August 27, 2018 (Fall 2018 semester).

Amended by the president in May 2019. Effective Summer 2019 semester.

Amended by the president in March 2021. Effective Fall 2021.

2. History

The February 8, 2011 amendment addressed the change in #02.10.12, Repeating a Course.

The July 2014 amendment added a one-year limit to petition the University Registrar for an Excused Withdrawal.

The August 2018 Amendment added a provision that a student may not drop a course once a student has been informed that academic misconduct is suspected.

The March 2021 amendment changed the title of the policy from Withdrawal from Classes (Undergraduate and Graduate) to Discontinuing Registration: Dropping or Withdrawing from Classes (Undergraduate and Graduate), added and defined the term "Drop", and clarified language for the Excused Withdrawal.

Supersedes

This policy supersedes all previous policies and procedures concerning drop or withdrawal from classes with effective dates prior to March 15, 2021.

3. Cross References

- Policy #02.10.12, Repeating a Course (Undergraduate)
- Policy #02.10.13, Incomplete Coursework Policy
- Policy #03.70.02, Student Conduct Code
- Tuition and Refunds
- Undergraduate (p. 21) and Graduate Bulletin

Family Educational Rights & Privacy Act (FERPA)

For information on the Family Educational Rights and Privacy Act (FERPA) of 1974, see the FERPA (p. 45) text in the Student Rights section of this *Bulletin*.

Final Examinations

University policies require that final examinations for sections scheduled in the Full Term Courses part of term for fall or spring be given only during the university-approved final examination days as noted on the academic calendar posted by the Office of the University Registrar. Final examinations for courses of shorter duration (e.g., 7-week Courses) should be given before the conclusion of the part of term.

For Full Term Courses day classes on Main campus, a detailed examination schedule, by day and time, is available on the Office of the University Registrar's web site; this information is also circulated at the beginning of each semester.

Final examinations for evening classes on Main and Ambler campuses, Temple Center City classes, and Health Sciences Center classes are given at the regular class time during final examination week.

For both day and evening Ambler classes, a detailed examination schedule, by day and time, is circulated to the faculty and may be posted to the Ambler web site.

Some courses have common final examination times. (Consult the registrar's final examination schedule for a complete list.)

Instructors are encouraged to make individual accommodations with students who have more than two (2) examinations scheduled on one day.

Grade Change

No change of final grade for a completed course will be made without the approval of the instructor's dean or designee. Deans will consider the grade change upon receipt of the instructor's written explanation. No grade will be changed after the baccalaureate degree is awarded.

Grade Point Average (GPA)

Each student's transcript indicates the credit hours completed and passed, grade points, and grade point average (GPA).

The GPA also appears on a student's DARS reports or the academic advising document as well as the Self-Service Banner (SSB) and official transcripts.

A student's GPA may be useful in assessing academic progress, in determining eligibility for specific programs, or in determining eligibility for Honors or other awards.

No change in a student's GPA is made after the baccalaureate degree is awarded.

To Compute Semester Grade Point Average:

1. Multiply the value of the grade (see Grades and Grading (p. 1853)) by the course's number of credit hours to get quality points (QPs).
2. Add the total quality points.
3. Divide total number of quality points by the total number of GPA hours completed in courses that yield quality points.

Note: Not included in GPA computations: AU, CR, CD, NC, HC, I, IC, IP, MG, NR, P, PI, R, S, W, WE, WF, WS. Also see policy on Repeating a Course (p. 1860).

To Compute Cumulative Grade Point Average:

Divide the total number of quality points by the total number of GPA hours completed in courses that yield quality points.

Note: Not included in GPA computations: I, IC, IP, MG, NR, CR, CD, NC, R, P, AU, W, WE, WS, PI. Also see policy on Repeating a Course (p. 1860).

For credit transferred from other institutions, no grade points are allowed. See also Repeating a Course (p. 1860).

Grades and Grading

Semester Grades

The work of all undergraduate students is graded and reported at the end of each semester. Students may access their semester grades on Self Service Banner within 48 hours of the end of the examination period for that semester.

Three systems are in use for grading and reporting students' work:

Letter Grades and Points

A	4.00 Excellent
A-	3.67
B+	3.33
B	3.00 Good
B-	2.67
C+	2.33
C	2.00 Fair
C-	1.67
D+	1.33
D	1.00
D-	.67 Passing
F	.00 Failed

Note: Although D- is a passing grade, a minimum grade of C- is required in General Education courses and, in many programs, courses required by the major.

Credit/No Credit

CR	Equivalent to A, A-, B+, B, B-, C+, C, or C-
CD	Equivalent to D+, D or D-
NC	Equivalent to F

Note: In the Credit/No Credit system, no grade points are assigned, but a limited number of credits in courses in which students earn the CR or CD¹ designation counts toward the total credit hours completed. See Credit/No Credit Courses (p. 1848).

1

The CD grade was implemented in Spring 2020.

Other Transcript Notations

AU	Audit
I	Incomplete
IC	Incomplete in a Credit/No Credit course
IP	Incomplete pass/fail course
M	Military Leave of Absence
MG	Grade temporarily missing
NR	Grade not reported
P	Passed grade
PI	Permanent incomplete
W	Withdrawal from course
WE	Withdrawal with approved excuse
WS	Withdrawal from the semester (historical)

For more information, see the policies on Audit (p. 1844), Credit/No Credit Courses (p. 1848), Incomplete Coursework (p. 1856), and Dropping or Withdrawing from Courses (p. 1850) in this *Bulletin*.

Graduation Procedures

As students approach the end of their undergraduate careers, they must make sure that they are eligible for, and can participate in, graduation ceremonies.

In their junior year, or when 80 semester hours have been completed, students should begin an ongoing graduation check with their academic advisors in order to determine that they are meeting the university, college, departmental, and program requirements for their degree and for graduation.

Fly in 4 students must have a graduation review in their school or college prior to the start of their senior year to remain eligible for the program.

Early in the semester in which graduation requirements will be completed, students complete an Application for Graduation.

Questions about this process or graduation status should be directed to the student's Advising Office or Academic Dean's Office.

Application deadlines are:

- February 1 for Spring graduation
- June 1 for Summer graduation
- October 1 for Fall graduation

Note: *Earlier deadlines may be in effect in some academic units.*

The Application for Graduation must be properly completed, particularly the areas relating to the resolution of incompletes and diploma instructions. Information concerning commencement activities (such as time, place, invitations, rental of academic regalia) is available to students once they have submitted their completed Application for Graduation. Students will not have their diploma or transcript released until all university tuition and fees have been paid.

Petition for Non-graduates to Attend University and/or School/College Graduation Ceremonies: Students within 2 courses or 8 credits of meeting their degree requirements may petition to attend University Commencement and/or School/College graduation ceremonies. Completed petition forms (available on TUportal) must be submitted directly to the student's Advising Office by the graduation application deadline.

Grievances

See Grievances (p. 47) in the Student Rights section of the *Bulletin*.

Honors for Academic Achievement

Temple University recognizes academic achievement in several ways.

Dean's Lists

Dean's Lists record the names of those full-time students in each school or college who completed a semester's work with 12 graded credits and meet the GPA criteria as outlined in the Dean's List (p. 1849) policy. In addition, part-time students who have accumulated at least 12 graded credits across an academic year (fall and spring semesters) are eligible to be considered for Dean's List recognition in the spring.

For further information, see the Dean's List (p. 1849) policy in the Academic Policies section of the *Bulletin*, check under your school or college listing in the *Bulletin*, or contact your school or college Advising Center.

Graduation (Latin) Honors

Latin Honors are awarded based on estimation procedures that are intended to yield 2% Summa, 5% Magna, and 9% Cum Laude awards for baccalaureate recipients from each Temple school and college. Graduates who have completed at least 60 credits at Temple are eligible for the appropriate honor if their cumulative grade point average (CGPA) is equal to or greater than the cut-off value established for the honor. (Students returning to the university following Academic Forgiveness may qualify for Latin Honors if they have a minimum of 60 earned hours in addition to the approved earned hours allowed at the time of Academic Forgiveness.)

Awards for August 2023, January 2024 and May 2024 graduates are based on five-year average cutoff scores computed from 2018 to 2023.

The cut-off values for calculating eligibility for Summa, Magna, and Cum Laude Honors for August 2023, January 2024 and May 2024 graduates are listed in the table below along with the schedule for updating the cut-off values.

Latin Honors Minimum Cumulative Grade Point Averages by College (for August 2023, January 2024 and May 2024 Graduations)

College	Summa Cum Laude GPA (lower threshold)	Magna Cum Laude GPA (lower threshold)	Cum Laude GPA (lower threshold)
Boyer College of Music & Dance	3.98	3.96	3.93
College of Education & Human Development	3.99	3.97	3.94
College of Engineering	3.95	3.88	3.80
College of Liberal Arts	3.98	3.95	3.91
College of Public Health	3.97	3.92	3.87
College of Science & Technology	3.97	3.93	3.88
Fox School of Business & Management	3.93	3.86	3.79
Lew Klein College of Media & Communication	3.97	3.93	3.88
School of Social Work	3.98	3.95	3.92
School of Sport, Tourism & Hospitality Management	3.94	3.86	3.81
School of Theater, Film & Media Arts	3.98	3.96	3.93
Tyler School of Art & Architecture	3.98	3.95	3.91

Award and Update Schedule for Latin Honors

For Honors awarded in:	Cut-offs based on CGPAs for Graduates:
August 2023, January 2024, May 2024	August 2018 through May 2023 (calculated July 2023)
August 2024, January 2025, May 2025	August 2019 through May 2024 (calculated July 2024)
August 2025, January 2026, May 2026	August 2020 through May 2025 (calculated July 2025)

August 2026, January 2027, May 2027
 August 2027, January 2028, May 2028

August 2021 through May 2026 (calculated July 2026)
 August 2022 through May 2027 (calculated July 2027)

Incomplete Coursework

NOTE: This policy is currently under review. If a new version is approved during the 2023-2024 academic year, the policy document link below and this Bulletin page will be updated accordingly.

An instructor will file an "I" (Incomplete) only if the student has completed the majority of the work of the course at a passing level, and only for reasons beyond the student's control.

An instructor may file an "I" when a student has not completed the work of a course by the time grades must be submitted, but has completed the majority of the work at a passing level and has a written agreement with the instructor and the department regarding completion of the work, including the nature of the work to be completed, the means by which the final grade will be determined, and the date by which the work must be completed. The completion date may be no later than one year from the end of the semester in which the student took the course. The agreement shall also specify a default grade to be received if the work is not completed by the date indicated. One copy of the agreement shall be retained by the instructor, one shall be given to the student, and one shall be filed with the department office or, in colleges or schools without departments, the Dean's office.

When reporting the grade of "I" for a student, the instructor shall also file a report of the default grade in the electronic grading system. If the instructor does not change the grade of "I", pursuant to the agreement with the student, by the end of one year from the time the grade of "I" was awarded, the appropriate University official shall automatically change the grade of "I" to the reported default grade, and the default grade shall appear on the transcript and be used for all other grading purposes as the actual grade received in the course.

Faculty advisors and staff advisors have the option of not permitting a student to register for an "overload" if the student is carrying one or more active incomplete courses, or for a "full load" if the student is carrying two or more active incompletes.

For more information, read policy # 02.10.13.

Leave of Absence

Policy #02.10.16

Scope of Policy & Rationale

A Leave of Absence (LOA) for up to a total of two consecutive semesters of non-enrollment (summer sessions excluded) is permitted one time during a student's degree program.

An LOA allows active baccalaureate or associate degree students to interrupt enrollment without having to apply for re-enrollment and without changing the requirements of their degree program. A degree candidate who does not register for consecutive semesters and is not on a LOA must apply for re-enrollment.

Policy Statement

An LOA may be filed through October 1 for fall terms and March 1 for spring terms. Any extension of the LOA from one semester to two semesters must be filed by October 1 for fall term extensions and March 1 for spring term extension. Students currently registered for or withdrawn from courses are not eligible for an LOA or LOA extension for that term. Under special circumstances, exceptions to the duration of a LOA or additional LOA's may be considered, but, if granted, some of the privileges listed below may not be preserved.

Courses taken at other colleges or universities during the LOA period, or taken between two consecutive LOA semesters, may not be used for transfer credit at Temple University.

New students who wish to defer enrolling in their first semester are not eligible for an LOA and, instead, must contact the Office of Undergraduate Admissions to discuss their options.

International students who seek an LOA must obtain additional advising from the Office of International Services.

Fly in 4 participants must meet with an advisor to discuss potential effects of the LOA on time to degree and their eligibility for the Fly in 4 program.

Students on an LOA retain their admitted student status and remain eligible for the following privileges:

- Retention of the academic program requirements in place at the time of their matriculation at Temple, including the requirements in place at the time they declared their major, concentration, minor and/or certificate.
- Temple e-mail access.

- Priority registration for the semester of return.
- Library access and borrowing privileges.

Students on a LOA are not considered registered students and, as non-enrolled students, are **not** eligible for:

- Financial aid disbursements, including work study funds, during the semesters while on LOA. Students on a LOA are reported to lenders and loan servicing agencies as "not enrolled" and should contact lenders for information on possible repayment requirements.
- Student employment.
- Enrollment verification. Students on LOA are reported as "not enrolled," which could affect eligibility for health insurance and other programs and services.
- Use of Student Health Services and Tuttleman Counseling during the semesters while on LOA or any other university services not listed in the previous section.
- On-Campus Housing.
- Programs requiring continuous enrollment or academic progress.

Students may return earlier than the original return date by registering for courses, keeping in mind applicable deadlines for registration, financial aid, etc.

Students who do not return from their LOA on the expected return date, or those students who ceased enrollment without an LOA, must submit an application for re-enrollment to their schools/colleges in order to continue their coursework. These students must follow the most current requirements for their schools/colleges, majors, and the university.

Students taking an approved medical withdrawal in a current semester are not considered to be on LOA. Medical or excused withdrawals are governed by Policy #02.10.14, Discontinuation of Registration: Dropping or Withdrawing from Courses (Undergraduate and Graduate).

To access the Leave of Absence form, students can sign in to the TUportal and under TUapplications, select Enrollment Services, and then select Services. Select Leave of Absence from the Services menu and complete the necessary information.

Notes

1. Dates of official enactment and amendments

Adopted by the president on February 8, 2011. Effective August 30, 2011 (Fall 2011).

Amended by the president in November 2019; effective Spring 2020.

Amended by the president in December 2021; effective Spring 2022.

2. History

Policy created to in absence of standard procedures at the undergraduate level.

The November 2019 amendment adds eligibility of part-time students for LOA, clarifies language, and aligns policy with practice.

The December 2021 amendment extends the deadline to file an LOA or an extension of an LOA.

Supersedes

This policy supersedes all prior school/college policies and procedures related to undergraduate Leave of Absence.

3. Cross References

Policy #02.10.14, Discontinuation of Registration: Dropping or Withdrawing from Courses (Undergraduate and Graduate)

Policy #02.10.11, Academic Standing (Undergraduate)

Policy #02.10.17, Academic Forgiveness (Undergraduate)

Policy #03.70.11, Temple University Policy for Students Called to Military Service Obligation (all Students)

Procedures related to this policy can be found in the Academic Policies section of the Undergraduate Bulletin.

Non-Degree Seeking Students

Non-degree seeking students are those who have not been admitted formally to a degree program. For information and academic advising for non-degree seeking students, see Programs with Academic Credit (p. 37) in the Special Programs section of the *Bulletin* and the Office of Continuing Studies web site. Effective Summer 2018, non-degree seeking students with previously earned undergraduate degrees at Temple will have their coursework transcribed under the NU (NonDegree Continuing Undergrad) level.

Enrolling as a non-degree undergraduate student:

For an applicant who intends to enroll in undergraduate courses as a non-degree student:

- The applicants must have earned a high school diploma or a G.E.D. certificate.
- An applicant who attended another college or university must have earned at least a 2.00 GPA and provide a transcript (official or unofficial) of their previous academic work.

- An applicant with a previously earned undergraduate degree at Temple who intends to enroll as a non-degree student must contact the Office of Continuing Studies to begin the enrollment process. Grades earned in non-degree coursework will not count toward or against the previously earned undergraduate cumulative grade point average at Temple University.
- An applicant must satisfy all prerequisite requirements and other restrictions placed on courses by the academic departments offering the courses.

Non-degree seeking undergraduate students who wish to pursue a degree are required to apply for admission to a degree program before they complete 30 (attempted or earned) credits. Non-degree seeking undergraduate students accepted into an undergraduate degree program may count their non-degree credits toward their residency requirements. Credits earned at Temple as a non-degree student cannot be counted towards eligibility for the 45+ GenEd.

For all non-degree seeking students:

Non-degree seeking students are not eligible for priority registration. Likewise, many academic policies do not apply to non-degree students. Additionally, non-degree seeking undergraduate students are not permitted to take more than 11 credits during their semester. More information can be found in the Office of Continuing Studies.

Permission to Complete a Course at another Institution after Matriculation

The policies and procedures stated below are defined in the Transfer Credit Policy for Matriculated Undergraduate Students (Policy # 02.10.18).

Scope of Policy & Rationale

Undergraduate, degree-seeking students are expected to take their courses at Temple in order to fulfill their Temple degree requirements. This policy defines the criteria and circumstances in which transfer credit may be accepted toward the requirements of Temple undergraduate degrees.

Policy Statement

Undergraduate students at Temple may receive credit for courses taken elsewhere if they receive permission in advance, pursuant to this policy.

This policy applies only to transfer credits for courses taken by degree-seeking students after matriculation.

Information on transfer policies and the admissions process is available at

<http://bulletin.temple.edu/undergraduate/about-temple-university/general-admissions-information/transfer-students/#transfercredit>

Undergraduate, degree-seeking students may receive credit for two types of transfer courses:

1. **Courses from a Temple-approved study abroad program sponsored by another** university or other formal program of study offered jointly by Temple and another **institution**

Successful completion of an approved, external study abroad program or formal joint program will be awarded transfer credit.

To ensure that students appropriately transfer credit for their study abroad, they must complete the approval process prior to registering for the course(s), including any required evaluation of the external program courses: <https://studyabroad.temple.edu/course-approval>.

2. **Courses from another institution**

Students in good academic standing who meet all student and course eligibility criteria may, in accordance with this policy, transfer credit **for two (2) summer or special session courses (up to a maximum of 8 credits) taken elsewhere toward their Temple baccalaureate or associates degrees. For certain courses, higher credit totals (up to a maximum of 10 credits in transfer) may be approved, but the equivalent Temple courses must not exceed 8 credits in total.**

In order to be approved for transfer credit by their school or college advising unit:

- The student must submit a petition to take courses elsewhere.
- The student must have a cumulative grade point average of 2.00 or above at the time of the request.
- All courses taken elsewhere must have established course equivalencies at Temple.
- After completion of the course, the student must still meet the Academic Residency Requirements policy (p. 1838) (all undergraduate degree candidates must complete 45 of the last 60 credit hours of the degree as matriculated students at Temple).
- The course cannot be a duplicate of a course for which the student has already received credit.
- The course cannot be a duplicate of a course previously attempted (earned a letter grade, CR, CD, NC, W or I) at Temple. If a student takes a Temple course after receiving transfer credits for the same course, the transfer credits will be removed.

- The course cannot be used to satisfy General Education course requirements.
- Students must have satisfied all prerequisites for courses they are seeking to take elsewhere. Failure to satisfy prerequisites may result in credits not transferring.
- Completion of the course with a grade of C or better is required for transfer credit to be awarded.
- The course must comply with all Temple school, college, or department program requirements.
- Transfer credit is not awarded for internships, practice, field studies or independent studies not supervised by Temple University faculty. Students should check with their school or college academic advisor for exceptions.

Approval Process

To ensure transfer of credit for courses taken at another institution, students should complete the approval process prior to registering for courses elsewhere. Students access the "Petition to Take Courses Elsewhere" form by logging into the TUportal, selecting the Student Tools tab, and under the University Forms channel, selecting Permission to Take Courses Elsewhere. This form will be routed to the student's advising unit for approval.

Additional information can be found by contacting your advising unit or at <https://undergradstudies.temple.edu/advising/forms>.

Students should also note the following:

- Credits can only be added after an official transcript is received by Temple University's Admissions Office.
- Some Temple schools and colleges have additional limitations on the kind or number of transfer credits accepted. For example, some majors have additional residency requirements in addition to the Academic Residency Requirements policy.
- To be eligible for Latin Honors at graduation, a student must complete a minimum of 60 semester hours of the program while matriculated at Temple.

Notes

1. Dates of official enactment and amendments

Adopted by the President on December 12, 2012. First effective January 1, 2013.

Amended by the President on December 5, 2014. Effective August 1, 2015.

Amended by the Provost/President on May 2, 2022. Effective May 1, 2022.

2. History

Prior to 2014, guidelines and protocols were published in the *Undergraduate Bulletin* for students seeking permission to take courses elsewhere, entitled "Permission to Take Courses at Another Institution after Matriculation".

Guidelines and protocols were published in the 2014-2015 *Undergraduate Bulletin* under Transfer Credit Policy. <https://bulletin.temple.edu/archives/2014-2015/undergraduate/about-temple-university/general-admissions-information/transfer-students/#transfercredit>

The February 2015 amendment changes the allowable grade required for credits taken elsewhere from C- to C. "C-" transfer grades, regardless of when they were earned, will not be accepted for students admitted for fall 2015 and after. For currently enrolled students, C- grades earned after summer session II 2015 will not be accepted.

The May 2022 amendment removed the restriction on students admitted to Temple with 60 or more transfer credits, removed the restriction on courses available through the Temple distance learning program, and clarified language.

Supersedes

This policy supersedes all previous policies and procedures concerning transfer credit for matriculated undergraduate students with effective dates prior to May 2022.

3. Cross References

Academic Residency Requirements (p. 1838) policy published in the *Undergraduate Bulletin*

Policy #02.10.16, Leave of Absence

Placement Assessments

Success at Temple University does not follow one particular pathway, as our students are varied and diverse in their backgrounds. For incoming students, it is important that they start on the right track, beginning with determining the appropriate courses for their first semester. Placement Assessments are offered in English, math, and foreign languages and are taken after students have been admitted to the University and have paid the tuition deposit. Assessments may be taken up through the first week of the student's incoming term.

Some incoming students will be automatically placed into math and English courses using their student data, including but not limited to: high school grade point average, SAT/ACT scores, and/or AP scores (English only) while others will need to take placement assessments. **Only scores from SAT/ACT tests taken up to two years prior to the start of the incoming student's first semester are considered for automatic course placement.**

Students who applied test-optional but have submitted SAT or ACT scores are automatically placed with the option to take an assessment. Some students will be required to take an assessment. For example, if Temple does not have enough information to automatically place a student, the student will need to take an assessment. Students in some majors may also be required to take placement assessments.

For English, students with an autoplacement are eligible to take an assessment. Students who are required to take an assessment for English or choose to take an assessment for math or a foreign language may also take an assessment (one additional attempt for English and foreign language and two additional attempts for math). **If a student has more than one course placement, the student may use the highest course into which they place.**

Course placements into English 0701/0711, French 1001, German 1001, Italian 1001, Spanish 1001, Math 0701/0702, GQ, Math 1015, and Statistics 1001 do not expire. **Placement Assessment results into all other courses are valid for two years from the term for which they were taken.** Current students who need to take or retake a placement assessment should contact their advisor.

Students who take a course in the math sequence (Math 0702, 1021, 1022, 1041/1941) are bound by their performance in the course for future course eligibility (rather than performance on previous or future placement assessments).

For more information about Placement Assessments, go to the Institutional Research and Assessment web site at <https://ira.temple.edu/placement-assessments>.

Plagiarism and Academic Cheating

See Academic Honesty (p. 42) in the Student Responsibilities section of the *Bulletin*.

Prerequisites and Co-requisites

Prerequisites

A course **prerequisite** is any requirement an academic department identifies as essential for a student to complete before taking a course. The university is responsible for publishing prerequisite requirements. All prerequisites, whether they apply to an individual course or to all courses in a department, should be stated in the electronic version of the university's Course Catalog. They should also be stated in the course syllabus.

Course prerequisites consist of one or more of the following: completion of placement or proficiency tests or other assessments; achievement of specified scores on placement or proficiency tests or other assessments; possession of specified knowledge or skills; approval after audition; approval of portfolio; declaration of major or admission to restricted program; completion of specific courses, sets of courses, and/or kinds of courses; completion of a specified number of semester hours or achievement of a specified class level; achievement of specified grades in prerequisite courses or sets of courses; achievement of a specified GPA; approval of an application or proposal; permission of the instructor, department, or other person or office; satisfaction of other specified requirements.

Students are responsible for knowing and completing all published prerequisite requirements for a course before taking that course. The university has the obligation to inform students of prerequisite requirements. It has the right to cancel a student's registration in a course if the student has not satisfied the published prerequisite requirements for that course.

Co-requisites

A course **co-requisite** is a requirement that must be completed at the same time as the course for which it is required. The university is responsible for publishing co-requisite requirements. All co-requisites, whether they apply to an individual course or to all courses in a department, should be stated in the electronic version of the university's Course Catalog. They should also be stated in the course syllabus. Co-requisites may be specified courses, permissions, admission to programs, and/or other requirements. Students are responsible for knowing and completing all published co-requisite requirements for a course. The university has the obligation to inform students of co-requisite requirements and the right to cancel a student's registration in a course if the student has not arranged to satisfy the co-requisite requirements for that course.

Probation and Dismissal

See Academic Standing (Undergraduate) (p. 1840).

Registration

See the Registration (p. 39) section of the *Bulletin*.

Repeating a Course

Repeating a Course (Undergraduate and Graduate)

(Policy # 02.10.12)

Scope of Policy & Rationale

This policy allows undergraduate and graduate students to repeat a course to earn a higher grade. Except for courses designated to be taken multiple times ("repeatable"), such as an independent study or research course, credit will be granted only once for each course and only the highest grade earned for that course will be used to calculate a student's grade point average. In order to ensure student progress towards graduation, the number of attempts will be limited to a maximum of three (3).

Definitions

An attempt is defined as registration in a class resulting in a grade or a withdrawal (indicated by the W grade notation). Standard grading options include: A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F. (See Bulletin for other grading options.)

Policy Statement

All students are permitted to attempt a course a second time. A student seeking a third attempt must obtain the approval of the student's home school or college. Approval of a third attempt is not guaranteed. Except as permitted by this policy, no student may attempt a course more than three times. This policy does not apply to English 0701, English 0802, IH 0851, IH 0852, or Math 0701 and their course equivalents, which may be taken more than three times.

If a course was taken previously with a standard grading option, it cannot be repeated with a credit/no credit or pass/fail grading option. If a course was taken previously with a credit/no credit or pass/fail grading option, it may be repeated with a standard grading option if a standard grade is needed to satisfy prerequisite requirements. Each instance of the course with the credit/no credit grading option or pass/fail grading option counts as a course attempt as defined above. Students are responsible for choosing the appropriate grading option for repeated attempt(s) of the course.

All occurrences of a course appear on the transcript with the grade received, but only the highest grade received in a course is used in calculating a student's grade point average.

Since credits are awarded only once for a course, repeating a course can affect athletic eligibility, academic standing and financial aid status.

Once matriculated at Temple University, a student cannot receive transfer credit for a course that they have already attempted at Temple (See Policy # 02.10.18, Transfer Credit Policy for Matriculated Undergraduate Students.)

All course withdrawals, with the exception of "withdrawal with approved excuse," are included in the course attempt count (see Policy # 02.10.14, Discontinuation of Registration: Dropping or Withdrawing from Courses).

Courses with the grade notation of AU (audit) are not considered an attempt as defined by this policy.

Second attempt: Undergraduate students are strongly encouraged to meet with an academic advisor prior to registration for a second attempt to discuss academic and financial implications.

Graduate students seeking a second attempt are required to meet with the graduate coordinator in their school/college.

Third attempt: Students must obtain the approval of the dean or the dean's designee of their home school or college for a third attempt and can only be registered for a third attempt by their home school or college.

Students unable to successfully complete courses in the allotted number of attempts necessary to satisfy major or school/college requirements or prerequisites must meet with their academic advisors to discuss alternate graduation plans. Undergraduate students who have exhausted course attempts for course(s) required for their major will be required to change majors and, depending on the course, may also be required to change their school or college. Graduate students who have exhausted course attempts for course(s) required for their major will be unable to graduate from their program.

Following the awarding of a degree, no changes in the grade average point average will be made through the repeat process.

Notes

1. Dates of official enactment and amendments

Adopted by the president on November 13, 2002. First effective on September 1, 2003.

Amended by the president on February 8, 2011. Effective May 2011 (for Summer Session I) - GPA calculation with highest grade. Effective March 2012 (for Summer I, II and Fall 2012 registrations) - maximum number of course repeats including their course equivalencies.

Amended by the president in June 2015. Effective as of May 2015. Effective as of Spring 2019.

Amended by the president in November 2019. Effective as of Spring 2020.

2. History

The February 8, 2011 amendment added the limit on the number of repeats.

The May 18, 2012 amendment clarified that students who have exhausted allowable course attempts in courses required for the major or school/college degree requirements may be required to change majors or transfer internally within Temple to another school or college.

The June 2015 amendment eliminated the university dismissal for failure to successfully complete certain courses.

The November 2019 amendment includes updates and clarification of current policy.

Supersedes

This policy supersedes all other policies and procedures related to repeating a course.

3. Cross References

Policy # 02.10.11, Academic Standing (Undergraduate)

Policy # 02.10.14, Discontinuation of Registration: Dropping or Withdrawing from Courses (Undergraduate and Graduate)

Policy # 02.10.17, Academic Forgiveness (Undergraduate)

Policy # 02.10.18, Transfer Credit Policy for Matriculated Undergraduate Students

Reverse Transfer

Students who are one or two courses short of completing the requirements for an Associate degree approved for GenEd/Core-to-GenEd from a partner community college are eligible for Conditional GenEd (limited reverse transfer). Students will need approval from their community college to complete their Associate degree using one or two courses from their first semester roster at Temple University.

For more information, see the Conditional GenEd/Core-To-GenEd (Protocols) form at <https://undergradstudies.temple.edu/advising/forms>.

Satisfactory Academic Progress

Satisfactory academic progress is determined by a number of factors, including a student's semester grade point average, cumulative grade point average, and the number of semester hours attempted and completed. A student's progress is reviewed at the end of each semester by the student's Temple school or college and may affect the student's ability to continue in a program or major and eligibility for financial aid. Students should be advised that course withdrawals and incompletes will affect their progress and thus their academic standing. See Academic Standing (p. 1840) and Grade Point Average (p. 1853).

Second Degrees

A second baccalaureate degree may not be the only option available to enhance academic credentials, to prepare for a change in career, or to obtain a professional certification. In some cases, all that may be needed are additional undergraduate courses. Professional schools and organizations, Temple's Career Center, Graduate School, Continuing Studies, Pre-Professional Health Advising, as well as the advising units of the schools and colleges may have more information on alternative paths. In other cases, the student may be encouraged to begin graduate-level academic work in the new discipline.

If a second bachelor's degree is sought, this is possible in some, but not all, schools and colleges of Temple University when the second degree is in a sufficiently different field of study. Students should consult with the Office of the Dean of the school or college offering the desired degree.

A student may earn a second baccalaureate degree provided the requirements for the second degree include a minimum of 45 new semester hours beyond those required for the first degree. Students approved for the second baccalaureate degree will be waived from University requirements (i.e., General Education (GenEd) requirements). Note: This GenEd waiver does not apply to students with an international baccalaureate degree. Students must provide documentation of equivalency to a domestic bachelor's degree, and upon review, may be approved to complete the 45+ GenEd curriculum. Students with a Temple baccalaureate degree will be waived from the 45 new semester hour requirement, since they will already have met the residency requirements. However, in all cases, students must fulfill all non-waived requirements for the second degree.

Students at the undergraduate level may not be enrolled in concurrent undergraduate degree programs, but may regularly have second majors (p. 1850), or might consider an approved accelerated or joint program with a Temple graduate or professional school, if they meet admissions qualifications. For more information, refer to the list of accelerated programs (p. 1792) and requirements.

Simultaneous Enrollment

Matriculated students at Temple University may not be enrolled simultaneously at another institution in the same semester or summer session and receive permission to transfer those credits to Temple. Certain exceptions are allowed, if permission is given in advance, for courses unavailable at Temple but needed to complete degree requirements for the next scheduled awarding of degrees; or for specialized study where alternatives are not available at Temple; or as part of established programs. Students taking a Temple online course during the summer and living well beyond commuting distance of a Temple campus may also be approved for simultaneous enrollment at another institution. See Permission to Complete a Course at Another Institution after Matriculation (p. 1858).

Student Conduct Code

The Temple University Student Conduct Code (policy # 03.70.12) can be viewed in full at University Policies & Bylaws. Further information is available at the Office of the Dean of Students and the Office of Student Conduct and Community Standards. Other information about the Student Conduct Code may also be found in the Student Responsibilities (p. 42) section of this *Bulletin*.

Students Called to Military Service Obligation

Scope of Policy & Rationale

Temple University is governed by federal and state law on the duties to and the rights of students who are members of the US Armed Forces, including the National Guard and the reserves, when they are temporarily unable to attend classes or have to suspend their studies due to service requirements. This policy (policy # 03.70.11) is intended to conform fully to pertinent federal and state laws.

Policy Statement

I. Withdrawal from classes for a military service obligation:

1. Students called to a military service obligation should contact the Office of the University Registrar, Second Floor, Conwell Hall. Each such student has the following options:
 - a. If prior to official drop/add deadline, drop classes and receive a full refund.
 - b. If after the official drop/add deadline, drop from classes and receive a full refund. A grade notation of "M" will be applied to each course to indicate drop due to military obligation.
 - c. Receive an "Incomplete (I)" if eligible according to university policy. If the student chooses this option, then if the student is not able to fulfill the course completion requirement(s), regardless of the circumstances, the student cannot later choose option (a) above. (See Incomplete Coursework, Policy 02.10.13).
2. Students should provide advance written notice with supporting documents of their military service obligation to the Office of the University Registrar.
 - a. If unable to provide advance notice of the military service due to military necessity, students will submit at the time of reenrollment an attestation that the student performed service in the uniformed services that necessitated the student's absence from the institution.

II. Reenrollment for service members after a military service obligation:

1. Students will be promptly reenrolled with the same academic status¹ when last in attendance or last admitted, subject to paragraphs 2 and 3 below. Temple will make reasonable efforts² at no extra cost to the students to help them become prepared or to enable the student to complete their program. However, if it is determined after reasonable efforts, that any such student is unable to complete their program or that there are no reasonable efforts that can be taken to prepare the student to resume the program at the point where he or she left off or to enable the student to complete the program, Temple is not required to readmit the student on his or her return.
2. Students will be promptly reenrolled if the cumulative length of the absence and of all previous absences by reason of service in the uniformed services does not exceed five years. Students whose previous absences cumulatively exceed five years are subject to the established reenrollment policy and procedures.
3. Students who seek reenrollment will provide to Temple documentation to establish that the student has not exceeded the service limitation of total cumulative absence of five years.

III. Additional Services

Graduate students may have special problems resulting from a military service obligation, such as a maximum number of years permitted to complete a particular academic program. Graduate students who need an extension or adjustment to their programs due to military service obligations should contact the Graduate School, Fifth Floor, Carnell Hall.

Veterans' tuition benefits at Temple are administered by the Office of the University Registrar.

1

"Academic status" is defined by the Code of Federal Regulations, 34 CFR 668.18, et seq.

2

"Reasonable efforts" is defined by the Code of Federal Regulations, 34 CFR 668.18, et seq.

Notes

1. **Dates of official enactment and amendments:**

Amended by the President on September 20, 2001. First effective Fall 2001.
Amended by the President on May 2015. First effective December 3, 2014.

2. **History:**

Supersedes Presidential Policy Statement No. I-23, Temple University Policy for Students Called to Active Military Service.

Supersedes previous version designated as Presidential Policy 03.70.11, Temple University Policy for Students Called to Military Action.

The December 2014 amendment aligns Temple's policy with requirements of the Department of Defense Readmission policies and Department of Education requirements for returning Service members (ED 34 C.F.R. 668.8 and 668.18 respectively).

3. Cross References:

Presidential Policy Statement # 04.14.11, Employment & Reemployment Rights of Temple University Employees Who Serve on Active Military Duty.

Presidential Policy Statement # 02.10.16, Leave of Absence (Undergraduate).

Incomplete Coursework Policy # 02.10.13.

Study Abroad Approval Procedures for External Programs

To receive credit for courses taken on an external study abroad program, students are required to complete Temple's External Program Approval process, which includes seeking permission from Education Abroad, having any anticipated courses evaluated and approved by appropriate academic departments, and receiving academic approval from their Temple school/college academic advising office.

A list of approved External Programs can be found on the Education Abroad web site. Temple University strongly encourages students to consider these program options prior to exploring other possibilities. In addition to the suggested list, students also have the ability to enroll directly at any accredited foreign university or petition to participate in a program that is not on the approved list.

Students should discuss their study abroad plans with their academic advisor. Permission to study abroad is rescinded if the student is placed on academic warning or probation. As with all courses accepted in transfer, only a grade of C or higher is acceptable.

Transcripts

A student's academic history is contained in the official transcript, which is maintained by the Office of the University Registrar. Learn more about transcripts.

Transfer Between Schools/Colleges Within the University (Change of Program)

Transfer between academic units is not automatic. If students decide to earn their degrees in an academic unit other than the one in which they are matriculated, they must submit a Change of Program (may also be referred to as an Intra-University transfer or IUT).

To be eligible to complete a Change of Program (CoP), a student should be in academic good standing. Please consult the individual school or college policy in the *Bulletin* for specific school/college CoP requirements. In addition the Tyler School of Art and Architecture requires a portfolio and Esther Boyer College of Music and Dance requires an audition.

Students who are compelled to change their program after exhausting the number of permitted attempts for a required course under the Repeating a Course policy (p. 1860) may consult another school or college or the Division of University Studies, regardless of grade point average, academic standing, or the number of credits completed.

Students interested in changing programs should initiate the process via their TUportal. On TUportal, select the Student Tools tab. In the Registration Box, click on the Change of Program (Major) link to begin the CoP process. If you need additional information, contact the school/college advising office to which you would like to transfer.

Transfer Credit

See Admissions: Transfer Credit (p. 27).

Undergraduates Taking Graduate Level Courses

Undergraduate students can be approved to register for graduate level coursework. There are three distinct options. Students may take advantage of more than one option except for Options 1 and 3, which are mutually exclusive.

Option 1: To fulfill both undergraduate and graduate degree requirements:

- Students must be accepted into an approved +1 accelerated degree program.
- Students accepted into an approved +1 accelerated degree program must complete at least 6 credits and no more than 12 credits of graduate coursework.
- For more information on accelerated degree programs and eligibility, go to Accelerated Degree Programs (p. 1792) in the *Undergraduate Bulletin*.

Option 2: To fulfill undergraduate degree requirements:

- Students may take 5000-level graduate courses with the permission of the instructor and the dean's designee for undergraduate credit.
- Students who wish to take higher-level graduate courses (>5000-level) must have the permission of the instructor, the dean's designee for undergraduate credit, the Office of Undergraduate Studies, and the Graduate School.
- After receiving the required approvals, students must meet with their academic advisor for assistance with the registration process.
- The credits and grades appear on the undergraduate transcript and count toward the undergraduate grade point average (GPA) only. The courses (credits and grades) cannot be applied to satisfy any graduate degree requirements.

Option 3: To take in addition to undergraduate degree requirements for graduate credit only:

- Students not enrolled in an approved +1 accelerated degree program (Option 1) may take up to three courses totaling no more than 9 credits at the graduate level for graduate credit. No more than 6 credits of graduate coursework may be taken in any one academic term.
- To be eligible, students must be seniors who have an overall cumulative GPA of at least 3.0.
- The courses (credits and grades) cannot be applied to satisfy any undergraduate degree requirements. The credits and grades appear on the graduate transcript and count toward a graduate GPA only. The grade earned in each graduate course must be a B or better to count toward a Temple University graduate degree.
- If students are enrolled in fewer than 12 undergraduate credits, their financial aid may be impacted. For more information consult the Office of Student Financial Services.
- Students must complete the "Permission for Undergraduate Student to Register for Graduate Course(s) for Graduate Credit" form and obtain the required approvals. After receiving the required approvals, students must submit the form to the Graduate School (501 Carnell Hall) prior to the end of the add/drop period of the academic term in which the course(s) is being taken.
 - Go to Student tools on the Portal, Find University Forms; Filter by Graduate School and search for this form from the list.
- Permission to enroll in graduate courses under Option 3 does not constitute a commitment on the part of any department to accept students as graduate students in the future.

About Courses

Overview

This page serves as a resource for understanding the structure of the course descriptions contained within this Bulletin.

About the Course Descriptions

Course descriptions contain the following elements:

- **Subject Code:** A two-to-four letter code preceding the course number.
- **Course Number**
- **Title:** The name of the course
- **Credit Hours**
- **Description** (if one exists)
- **Registration Restrictions** (if any exist): A course may contain more than one type of registration restriction, such as college restrictions and cohort restrictions, which allows or prevents certain student populations from registering for the course. If more than one restriction type appears on a course, students must satisfy each type of restriction to register for the course. If more than one restriction appears within the same type, students only need to satisfy one within that type.
- **Co-requisites** (if any exist): Courses that must be taken in the same term as the course for which the student is attempting to register.
- **Course Attributes** (if any exist): Typically used to denote that a course fulfills a writing intensive (WI), honors (HO), or General Education (GA, GB, GW, etc.) requirement. *See the list of Course Attributes below.*
- **Repeatability** statement: Specifies if a course may be repeated for additional credits.
- **Prerequisites** (if any exist): Courses that must be successfully completed (by earning the specified minimum grade) prior to the term as the course for which the student is attempting to register unless prerequisites are followed by the phrase "may be taken concurrently." Courses listed as concurrent prerequisites may be taken in the same term as this course. In addition to courses, prerequisites may include test codes. *See Prerequisite and Test Codes below for further information.*

Course Attributes

Some courses contain one or more of the following attribute codes:

- ANON: Anonymous Grading (for Law School courses only)
- DI: Dissertation Full Time Status
- GA: General Education Arts course
- GB: General Education Human Behavior course
- GD: General Education Race & Diversity course
- GG: General Education Global/World Society course
- GQ: General Education Quantitative Literacy course
- GS: General Education Science & Technology course
- GU: General Education US Society course
- GW: General Education Analytical Reading & Writing course
- GY: General Education Intellectual Heritage I course
- GZ: General Education Intellectual Heritage II course
- HO: Honors course
- SE: Sustainable Environment course
- SF: Sustainability Focused course
- SI: Sustainability Inclusive course
- SP: Sustainable Economics & Politics course
- SS: Sustainable Social & Culture course
- WI: Writing Intensive course

Registration Restrictions

Courses may have one or more of the following types of registration restrictions:

- Department
- Field of Study (major, minor, certificate, concentration)

- Class (e.g., freshman, senior, etc.)
- Level (e.g., graduate, undergraduate, Law, Medicine, Postbaccalaureate, etc.)
- Degree (BA, MS, PhD, etc.)
- Program (specific program codes listed)
- Campus (Main, Japan, Ambler, etc.)
- College
- Student Attribute (CLER - Clearance for Education, DWS - Dissertation Writing Student, etc.)
- Cohort (UHONORS - University Honors, etc.)

Prerequisites

Prerequisites displayed in this Bulletin are presented in a more simplistic "plain text" format than what is found in Self-Service Banner (SSB) Browse Courses and Browse Classes, but the intent is the same. Watch for qualifying words such as "and" and "or" between prerequisites. For example, the prerequisites for MATH 1034 are:

Minimum grade of C (except where noted) in (MATH 1022, MATH 1039 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in CRMA05, 'Y' in CRMA07, or 'Y' in MC6T) and MATH 1033 (C- or higher)

To look at the prerequisites in another way, think of them in a list view:

Minimum grade of C (except where noted) in
 (MATH 1022,
 MATH 1039 (may be taken concurrently),
 'Y' in MC6,
 'Y' in MA04,
 'Y' in MC6A,
 'Y' in CRMA05,
 'Y' in CRMA07,
 or 'Y' in MC6T)
 and MATH 1033 (C- or higher)

MATH 1034 requires the student to satisfy two prerequisites: one course or a test code listed within the parentheses **and** MATH 1033.

If the prerequisite statement includes the phrase "except where noted" after the specified minimum grade, this means that students must earn that minimum grade in all the course prerequisites except for any courses that list a different minimum grade in parentheses after them. In the above example, MATH 1033 is followed by (C- or higher). If students are taking MATH 1022 or MATH 1039 to satisfy the first prerequisite, they must earn a C or higher, but only a C- or higher is required to satisfy the second prerequisite, MATH 1033.

Students could also satisfy the first prerequisite for MATH 1034 by having one of the **test codes** (such as MC6, CRMA05, etc.), which they could have received by either a placement assessment or a course that was transferred from another institution. For example, if a prerequisite requires 'Y' in MC6, this means a student needs the corresponding description of MATH PLMT CRS 1041 listed in their Test Scores. Current students can find their personal test scores by navigating to Student Tools in TUportal, selecting "View Full Profile" and then clicking on "Prior Education and Testing" from the menu on the left. Placement assessments results, some transfer test scores, and any relevant test scores related to credit/no credit grades are listed by their description.

Test Codes and Their Meanings

The following is a comprehensive list of test codes that can be found within course prerequisites.

- ACC1: ACC1, C or above in ACCT 2101; meaning that student transferred in ACCT 2101 with a grade of C or higher.
- AR01: AR01, C- or above in ARCH 1001; meaning that student transferred in ARCH 1001 with a grade of C- or higher.
- AR11: AR11, C- or above in ARCH 1011; meaning that student transferred in ARCH 1011 with a grade of C- or higher.
- AR12: AR12, C- or above in ARCH 1012; meaning that student transferred in ARCH 1012 with a grade of C- or higher.
- AR21: AR21, C- or above in ARCH 2121; meaning that student transferred in ARCH 2121 with a grade of C- or higher.
- AR22: AR22, C- or above in ARCH 2122; meaning that student transferred in ARCH 2122 with a grade of C- or higher.
- AR23: AR23, C- or above in ARCH 2123; meaning that student transferred in ARCH 2123 with a grade of C- or higher.
- AR31: AR31, C- or above in ARCH 3152; meaning that student transferred in ARCH 3152 with a grade of C- or higher.
- AR32: AR32, C- or above in ARCH 3251; meaning that student transferred in ARCH 3251 with a grade of C- or higher.
- AR41: AR41, C- or above in ARCH 2141; meaning that student transferred in ARCH 2141 with a grade of C- or higher.
- AR42: AR42, C- or above in ARCH 2142; meaning that student transferred in ARCH 2142 with a grade of C- or higher.
- AR51: AR51, C- or above in ARCH 2151; meaning that student transferred in ARCH 2151 with a grade of C- or higher.

- BCP: Business Computer Pass; applied to students who pass the Fox business computer assessment.
- BIO3: BIO3, C or above in BIOL 1111; meaning that student transferred in BIOL 1111 or BIOL 1911 with a grade of C or higher.
- BIO4: BIO4, C or above in BIOL 2112; meaning that student transferred in BIOL 2112 or BIOL 2912 with a grade of C or higher.
- BIO5: BIO5, C or above in BIOL 2227; meaning that student transferred in BIOL 2227 with a grade of C or higher.
- BIO6: BIO6, C or above in BIOL 2296; meaning that student transferred in BIOL 2296 with a grade of C or higher.
- BIO7: BIO7, C or above in BIOL 3096; meaning that student transferred in BIOL 3096 with a grade of C or higher.
- BIO9: BIO9, C or above in BIOL 2001; meaning that student transferred in BIOL 2001 with a grade of C or higher.
- BIOW: BIOL 1111&2112 transfer waiver; meaning that student meets BIOL 1111 and BIOL 2112 transfer waiver.
- CHM1: CHM1, C or above in CHEM 1031; meaning that student transferred in CHEM 1031 or CHEM 1041 or CHEM 1951 with a grade of C or higher.
- CHM2: CHM2, C or above in CHEM 1032; meaning that student transferred in CHEM 1032 or CHEM 1042 or CHEM 1952 with a grade of C or higher.
- CHM4: CHM4, C or above in CHEM 1021; meaning that student transferred in CHEM 1021 with a grade of C or higher.
- CHM5: CHM5, C or above in CHEM 1023; meaning that student transferred in CHEM 1023 with a grade of C or higher.
- CISA: CISA, CIS 1051/1057 assessment; CISA, CIS 1051/CIS 1057 assessment (used as prerequisite for CIS 1058 only; test code is applied to students who pass the CIS1051/1057 assessment and therefore tested out of CIS 1051 and/or CIS 1057).
- CRAC01: ACCT2101 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC02: ACCT2521 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC03: ACCT2901 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC04: ACCT3511 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC05: ACCT3512 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC06: ACCT3526 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC07: ACCT3531 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAC08: ACCT3596 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD01: ADV1001 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD02: ADV1101 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD03: ADV1102 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD04: ADV1103 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD05: ADV1196 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD06: ADV2001 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD07: ADV2111 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD08: ADV2121 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD09: ADV2131 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD10: ADV2141 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD11: ADV2151 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CRAD12: ADV3022 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.

- CRVS04: VS2002 - CR Grade; used for students who opted for a CR/NC grade instead of letter grade during COVID pandemic; attached to courses where the prerequisite course minimum grade is C since CR does not equal C in Banner.
- CS04: CS04, C or above in CIS 1055; meaning that student transferred in CIS 1055 with a grade of C or higher.
- E812: E812, Registered English 0812; applied to students who are registered for ENG 0812.
- ENG1: ENG1, C or above in ENG 2821; meaning that student transferred in ENG 2821 with a grade of C or higher.
- ENGW: ENGR1101&1102 transfer waiver; meaning that student meets ENGR 1101 and ENGR 1102 transfer waiver.
- FIN3: FIN3, C or above in FIN 3503; meaning that student transferred in FIN 3503 with a grade of C or higher.
- HIM1: HIM1, C or above in HIM 1101; meaning that student transferred in HIM 1101 with a grade of C or higher.
- HIM2: HIM2, C or above in HIM 2203; meaning that student transferred in HIM 2203 with a grade of C or higher.
- HIM3: HIM3, C or above in HIM 2215; meaning that student transferred in HIM 2215 with a grade of C or higher.
- JRN1: JRN1, C or above in JRN 1111; meaning that student transferred in JRN 1111 with a grade of C or higher.
- KIN1: KIN1, C or above in KINS 1223; meaning that student transferred in KINS 1223 with a grade of C or higher.
- KIN2: KIN2, C or above in KINS 1224; meaning that student transferred in KINS 1224 with a grade of C or higher.
- KIN3: KIN3, C or above in KINS 1201; meaning that student transferred in KINS 1201 with a grade of C or higher.
- KIN4: KIN4, C or above in KINS 2204; meaning that student transferred in KINS 2204 with a grade of C or higher.
- LCFR: LANG COURSE PLMT - FRENCH; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCGE: LANG COURSE PLMT - GERMAN; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCGR: LANG COURSE PLMT - GREEK; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCIT: LANG COURSE PLMT - ITALIAN; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCJP: LANG COURSE PLMT - JAPAN; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCLA: LANG COURSE PLMT - LATIN; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCRU: LANG COURSE PLMT - RUSSIAN; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- LCSP: LANG COURSE PLMT - SPANISH; meaning that student places into the course indicated by their test score (e.g., B1002, C1002, C2001, etc.); the B#### test scores are considered "borderline"; EXMPT is used for transfer students.
- MA01: MA01, C or above in MATH 0701/2; meaning that student transferred in MATH 0701 to MATH 0702 with a grade of C or higher.
- MA02: MA02, C or above in MATH 1015; meaning that student transferred in MATH 1015 with a grade of C or higher.
- MA03: MA03, C or above in MATH 1021; meaning that student transferred in MATH 1021 with a grade of C or higher.
- MA04: MA04, C or above in MATH 1022; meaning that student transferred in MATH 1022 with a grade of C or higher.
- MA05: MA05, C or above in MATH 1031; meaning that student transferred in MATH 1031 with a grade of C or higher.
- MA06: MA06, C or above in MATH 1041; meaning that student transferred in MATH 1041 with a grade of C or higher.
- MA07: MA07, C or above in MATH 1042; meaning that student transferred in MATH 1042 with a grade of C or higher.
- MA08: MA08, C or above in MATH 2043; meaning that student transferred in MATH 2043 with a grade of C or higher.
- MA09: MA09, C or above in MATH 2101; meaning that student transferred in MATH 2101 with a grade of C or higher.
- MA10: MA10, C or above in MATH 2103; meaning that student transferred in MATH 2103 with a grade of C or higher.
- MA11: MA11, C or above in MATH 2196; meaning that student transferred in MATH 2196 with a grade of C or higher.
- MA12: MA12, C or above in MATH 3138; meaning that student transferred in MATH 3138 with a grade of C or higher.
- MATW: MATH 1041&1042 transfer waiver; meaning that student meets MATH 1041 and MATH 1042 transfer waiver.
- MC2: MATH PLMT CRS 701/702; meaning that student is placed into MATH 0701 or MATH 0702.
- MC2A: AUTO MATH PLMT CRS 701/702; meaning that student is auto-placed into MATH 0701 or MATH 0702.
- MC2D: ADM AUTO MATH PLMT CRS 701/702; meaning that student is auto-placed into MATH 0701 or MATH 0702 via admissions data.
- MC2T: TO AUTO MATH PLMT CRS 701/702; meaning that student is auto-placed into MATH 0701 or MATH 0702 via Temple Option.
- MC3: MATH PLMT GQ/1015/1021and1019; meaning that student is placed into any GQ course, MATH 1015, or MATH 1021 and MATH 1019.
- MC3A: AUTO MATH PLMT CRS GQ/1015; meaning that student is auto-placed into any GQ course, MATH 1015, or MATH 1021 and MATH 1019.
- MC3D: ADM AUTO MATH PLMT GQ/1015; meaning that student is auto-placed into any GQ course, MATH 1015, or MATH 1021 and MATH 1019 via admissions data for non-STEM majors.
- MC3O: TO AUTO MATH PLMT GQ/1015-ST; meaning that student is auto-placed into any GQ course, MATH 1015, or MATH 1021 and MATH 1019 via Temple Option for STEM majors.

- MC3S: AUTO MATH PLMT GQ/1015 - STEM; meaning that student is auto-placed into any GQ course, MATH 1015, or MATH 1021 and MATH 1019 for STEM majors.
- MC3T: TO AUTO MATH PLMT GQ/1015; meaning that student is auto-placed into any GQ course, MATH 1015, or MATH 1021 and MATH 1019 via Temple Option for non-STEM majors.
- MC4: MATH PLMT CRS 1021; meaning that student is placed into MATH 1021.
- MC5: MATH PLMT CRS 1022/1031; meaning that student is placed into MATH 1022 or MATH 1031.
- MC6: MATH PLMT CRS 1041; meaning that student is placed into MATH 1041.
- MC6A: AUTO MATH PLMT CRS 1041; meaning that student is auto-placed into MATH 1041.
- MC6T: TO AUTO MATH PLMT CRS 1041; meaning that student is auto-placed into MATH 1041 via Temple Option.
- MK01: MK01, C or above in MKTG 2101; meaning that student transferred in MKGT 2101 with a grade of C or higher.
- MP1: MATH PLMT SCORE PART 1; math placement test score for part 1.
- MP2: MATH PLMT SCORE PART 2; math placement test score for part 2.
- MP3: MATH PLMT SCORE PART 3; math placement test score for part 3.
- MTP: Music Theory Placement Test; places students into MUST 1711.
- PBH1: PBH1, C or above in PBHL 1101; meaning that student transferred in PBHL 1101 with a grade of C or higher.
- PBH2: PBH2, C or above in PBHL 1104; meaning that student transferred in PBHL 1104 with a grade of C or higher.
- PBH3: PBH3, C or above in PBHL 1105; meaning that student transferred in PBHL 1105 with a grade of C or higher.
- PBH4: PBH4, C or above in PBHL 1106; meaning that student transferred in PBHL 1106 with a grade of C or higher.
- PBH5: PBH5, C or above in PBHL 2101; meaning that student transferred in PBHL 2101 with a grade of C or higher.
- PBH6: PBH6, C or above in PBHL 2102; meaning that student transferred in PBHL 2102 with a grade of C or higher.
- PMC: Math Placement Test Composite; combined score for math placement parts 1, 2 and 3.
- PRAX: PRAXIS TEST 1; score for PRAXIS test 1.
- PSY1: PSY1, C or above in PSY 1061,1001; meaning that student transferred in PSY 1061 or PSY 1001 with a grade of C or higher.
- PSY2: PSY2, C or above in PSY 2201; meaning that student transferred in PSY 2201 with a grade of C or higher.
- PSY3: PSY3, C or above in PSY 2301; meaning that student transferred in PSY 2301 with a grade of C or higher.
- RM01: RM01, C or above in RMI 2101; meaning that student transferred in RMI 2101 with a grade of C or higher.
- SOC1: SOC1, C or above in SOC 1176; meaning that student transferred in SOC 1176 with a grade of C or higher.
- ST1A: AUTO MATH PLMT STAT 1001; meaning that student is auto-placed into STAT 1001.
- ST2A: AUTO MATH PLMT STAT 1102; meaning that student is auto-placed into STAT 1102.
- STA1: MATH PLMT STAT 1001; meaning that student is placed into STAT 1001.
- STA2: MATH PLMT STAT 1102; meaning that student is placed into STAT 1102.
- STT2: STT2, C- or above in STAT 1001; meaning that student transferred in STAT 1001 with a grade of C- or higher.
- STT3: STT3, C- or above in STAT 1102; meaning that student transferred in STAT 1102 with a grade of C- or higher.
- STT4: STT4, C SOC1167, MTH1013, PSY1003; meaning that student transferred in SOC 1167 or MATH 1013 or PSY 1003 or STAT 2101 with a grade of C or higher.
- STT5: STT5, C SC/PSY1167, M1013, ST2101; meaning that student transferred in SOC 1167 or PSY 1167 or MATH 1013 or STAT 2101 with a grade of C or higher.
- STT6: STT6, C SOC/PSY1167, SOC3201; meaning that student transferred in SOC 1167 or PSY 1167 or SOC 3201 with a grade of C or higher.
- SW03: SSWG 5003: Satisfied by exam; meaning that student tested out of SSWG 5003.
- SW05: SSWG 5005: Satisfied by exam; meaning that student tested out of SSWG 5005.
- SW06: SSWG 5006: Satisfied by exam; meaning that student tested out of SSWG 5006.

Course Descriptions

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

- Accounting (ACCT) (p. 1884)
- Actuarial Science (AS) (p. 1890)
- Adult & Organizational Development (AOD) (p. 1894)
- Advanced Core Medical Science (ACMS) (p. 1898)
- Advertising (ADV) (p. 1898)
- Aerospace Studies - Air Force ROTC (AIRF) (p. 1909)
- Africology and African American Studies (AAAS) (p. 1911)
- American Studies (AMST) (p. 1919)
- Anthropology (ANTH) (p. 1928)
- Applied Behavior Analysis (ABA) (p. 1948)
- Arabic (ARBC) (p. 1949)
- Architecture (ARCH) (p. 1951)
- Art (ART) (p. 1963)
- Art - Japan Campus (ARTU) (p. 2003)
- Art Education (ARTE) (p. 2011)
- Art History (ARTH) (p. 2014)
- Art Therapy (ARTT) (p. 2030)
- Asian Studies (ASST) (p. 2031)
- Audio and Live Entertainment (ALE) (p. 2040)
- Basic Core Medical Science (BCMS) (p. 2041)
- Bioengineering (BIOE) (p. 2041)
- Biology (BIOL) (p. 2050)
- Botany (BOT) (p. 2077)
- Boyer College of Music & Dance (BCMD) (p. 2078)
- Business Administration (BA) (p. 2078)
- Business Education (BSED) (p. 2083)
- Career and Technical Education (CTE) (p. 2083)
- Center for the Performing and Cinematic Arts (CFA) (p. 2085)
- Chemistry (CHEM) (p. 2085)
- Chinese (CHI) (p. 2099)
- City and Regional Planning (CTRP) (p. 2102)
- Civil Engineering (CEE) (p. 2106)
- College of Education (COED) (p. 2118)
- College of Liberal Arts (CLA) (p. 2118)
- College of Public Health & School of Social Work (CHP) (p. 2123)
- College of Science and Technology (SCTC) (p. 2124)
- Communication and Social Influence (CSI) (p. 2133)
- Communication Sciences and Disorders (CSCD) (p. 2140)
- Communication Studies (CMST) (p. 2148)
- Communications and Theater (COMM) (p. 2148)
- Community Arts (CART) (p. 2149)
- Community Development (CDEV) (p. 2151)
- Computer & Information Science (CIS) (p. 2155)
- Construction Management Technology (CMT) (p. 2175)
- Counseling Psychology (CPSY) (p. 2178)
- Criminal Justice (CJ) (p. 2179)
- Cultural Studies (CLST) (p. 2189)

- Dance (DANC) (p. 2189)
- Early Childhood Education (ECED) (p. 2209)
- Earth & Environmental Science (EES) (p. 2219)
- Economics (ECON) (p. 2229)
- Education (EDUC) (p. 2240)
- Educational Administration (EDAD) (p. 2251)
- Educational Psychology (EPSY) (p. 2252)
- Electrical Engineering (ECE) (p. 2252)
- Electrical Engineering Technology (EET) (p. 2265)
- Elementary Education (ELED) (p. 2266)
- Engineering (ENGR) (p. 2266)
- Engineering (General) (ENGG) (p. 2278)
- Engineering Technology (ENGT) (p. 2278)
- English (ENG) (p. 2281)
- English Education (Elementary) (ENEE) (p. 2307)
- English Education (Secondary) (ENES) (p. 2307)
- Environmental Engineering Technology (ENVT) (p. 2308)
- Environmental Health (ENVH) (p. 2310)
- Environmental Science (CST) (ENVS) (p. 2311)
- Environmental Studies (CLA) (ENST) (p. 2312)
- Epidemiology and Biostatistics (EPBI) (p. 2323)
- Film and Media Arts (FMA) (p. 2325)
- Finance (FIN) (p. 2343)
- Foundation Program (FDPR) (p. 2352)
- French (FREN) (p. 2354)
- Gender, Sexuality and Women's Studies (GSWS) (p. 2357)
- Geography and Urban Studies (GUS) (p. 2368)
- German (GER) (p. 2385)
- Global Studies (GBST) (p. 2392)
- Graphic Arts and Design (GAD) (p. 2394)

- Virtual Media Management (VMM) (p. 2894)
- Visual Studies (VS) (p. 2895)

Accounting (ACCT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ACCT 2101. Financial Accounting. 3 Credit Hours.

Basic concepts and principles underlying the preparation and use of financial statements. Among the topics covered are basic accounting theory, transactional analysis, income determination, asset and liability valuation, and the preparation of financial statements. NOTE: Accounting majors who started as freshmen in fall 2008 need a C or better to progress in the Accounting major.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Facilities Management, Actuarial Science, Business Management, Business, Business Basics, Construction Engr Tech, Construction Mgt Tech, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Pre Business, Real Estate, Risk Management and Insurance, Supply Chain Management, Sport & Recreation Management, Statistical Sci + Data Analyt, Tourism and Hospitality Mgmt, Undeclared-Business & Mngt, Undeclared-University Studies.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, SCTC 1021, 'Y' in STA1, 'Y' in STA2, MATH 1011, MATH 1021, STAT 1001 (may be taken concurrently), 'Y' in STT2, any course with attribute "QA", any course with attribute "QB", any course with attribute "GQ", 'Y' in ST1A, or 'Y' in ST2A)

ACCT 2102. Managerial Accounting. 3 Credit Hours.

Basic concepts related to the manager's role in making business decisions using accounting data. Topics include cost classification, behavior, and allocation, cost-volume-profit analysis, operating and capital budgeting, variance analysis, performance evaluation and responsibility accounting. NOTE: The Accounting major changed as of fall semester 2008 for freshmen. The changes are effective for transfer students beginning in fall 2010. Accounting majors admitted as freshmen in fall semester 2008 or after should register for Accounting 2521 instead of Accounting 2102 and need a C or better to progress in the major.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Business Plus, Construction Engr Tech, Construction Mgt Tech, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, Intrnl Bus - TUJ, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ACCT 2101 or ACCT 2901)

ACCT 2103. Financial and Managerial Accounting for Decision Making. 4 Credit Hours.

This course introduces you to basic concepts in financial accounting and managerial accounting. Financial accounting involves gathering information, summarizing it, and creating reports about an organization's financial activities, financial performance, and financial position. Groups outside of the organization such as investors and lenders analyze this information to make decisions such as whether to invest in or make a loan to the organization. Managerial accounting involves analyzing and communicating financial information to managers, who use the information to make decisions within the organization. Specifically, the course will provide you with an understanding of (1) the nature of the accounting function, (2) gathering, analyzing, and reporting information, and (3) how the information in accounting reports is used by various decision makers in their resource allocation decisions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, 'Y' in STA1, 'Y' in STA2, MATH 1011, MATH 1021, SCTC 1021, STAT 1001 (may be taken concurrently), 'Y' in STT2, any course with attribute "QA", any course with attribute "QB", any course with attribute "GQ", 'Y' in ST1A, or 'Y' in ST2A)

ACCT 2501. Survey of Accounting. 3 Credit Hours.

This is an introductory course that will introduce students to the fundamental concepts of financial accounting and managerial accounting. Financial accounting information is produced, in accordance with generally accepted accounting principles (GAAP). It reports the results of operations to external users (suppliers, customers, investors, regulatory agencies, etc.). Managerial accounting information is produced, in response to specific management needs. It does not follow GAAP. Managerial accounting reports the results of operations of an entity consistent with the needs of internal users (managers, supervisors, etc.). The first half of this course focuses on the accounting cycle, the structure of the financial statements, and profitability analysis. The second half of the course focuses on decision making based on accounting data. Tools for analysis and the ability to apply those tools to various data sets will be developed. NOTE: There is no expectation that students should possess prior accounting knowledge.

College Restrictions: May not be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

ACCT 2521. Cost Accounting. 3 Credit Hours.

The accumulation and analysis of cost accounting information for the valuation of products and services, internal decision making, and measurement of financial performance. NOTE: The Accounting major changed as of fall semester 2008 for freshmen. The changes are effective for transfer students beginning in fall 2010. New freshmen Accounting majors who were admitted in fall semester 2008 or after are not required to take Accounting 2102. You should register for Accounting 2521.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ACCT 2101, ACCT 2901, ACCT 2103, or ACCT 2903)

ACCT 2901. Honors Financial Accounting. 3 Credit Hours.

Course develops knowledge of financial accounting theory, financial statement preparation, and the use of accounting data by managers and external users. Honors version of 2101 (0001). NOTE: May be used to fulfill the first portion of the accounting requirement for the Fox School of Business and Management. Accounting majors who started as freshmen in fall 2008 need a C or better to progress in the Accounting major.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, SCTC 1021, 'Y' in STA1, 'Y' in STA2, MATH 1011, MATH 1021, STAT 1001 (may be taken concurrently), 'Y' in STT2, any course with attribute "QA", any course with attribute "QB", any course with attribute "GQ", 'Y' in ST1A, or 'Y' in ST2A)

ACCT 2902. Honors Managerial Accounting. 3 Credit Hours.

Course provides an introduction to managerial accounting concepts and techniques and their use by decision makers. Honors version of 2102 (0002). NOTE: May be used to fulfill the second portion of the accounting requirement for the Fox School of Business and Management. The Accounting major has changed beginning fall semester 2008 for freshmen. These changes are effective for transfer students beginning in fall 2010. Accounting majors admitted as freshmen in fall semester 2008 or after are not required to take Accounting 2902. You should register for Accounting 2521.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Business, Career and Technical Education, Economics, Economics, Entrprnrship & Innovation Mgt, Engineering Technology, Entrepreneurship, Finance, Financial Planning, General Business Studies, Horticulture, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ACCT 2101 or ACCT 2901)

ACCT 2903. Honors Financial and Managerial Accounting. 4 Credit Hours.

This course introduces you to basic concepts in financial accounting and managerial accounting. Financial accounting involves gathering information, summarizing it, and creating reports about an organization's financial activities, financial performance, and financial position. Groups outside of the organization such as investors and lenders analyze this information to make decisions such as whether to invest in or make a loan to the organization. Managerial accounting involves analyzing and communicating financial information to managers, who use the information to make decisions within the organization. Specifically, the course will provide you an understanding of (1) the nature of the accounting function, (2) gathering, analyzing and reporting information, and (3) how the information in accounting reports is used by various decision makers in their resource allocation decisions.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, 'Y' in STA1, 'Y' in STA2, MATH 1011, MATH 1021, STAT 1001 (may be taken concurrently), 'Y' in STT2, any course with attribute "QA", any course with attribute "QB", any course with attribute "GQ", 'Y' in ST1A, or 'Y' in ST2A)

ACCT 3511. Intermediate Accounting I. 3 Credit Hours.

Accounting principles as they relate to financial reporting. Income determination, asset and liability valuation, and the form and content of financial statements are examined. NOTE: This course meets an upper-level major or business-elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 2101, ACCT 2901, ACCT 2103, ACCT 2903, 'Y' in ACC1, 'Y' in CRAC01, or 'Y' in CRAC03)

ACCT 3512. Intermediate Accounting II. 3 Credit Hours.

A continuation of material begun in Accounting 3511. Stockholders' equity, earnings per share, and long-term investments will be covered along with complex revenue-recognition problems, pensions, leases, inter-period tax allocation, and cash flows. NOTE: This course meets an upper-level major or business-elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 3511, ACCT 2511, ACCT 3911, or 'Y' in CRAC04)

ACCT 3526. Accounting Information Systems. 3 Credit Hours.

An introduction to the evaluation and design of accounting information systems and the documentation and analysis of a client's hardware and software needs. Internal controls, networking options and security issues also are examined. Students receive hands-on experience with accounting software.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 2521 or 'Y' in CRAC02)

ACCT 3531. Federal Taxes on Income. 3 Credit Hours.

An introduction to the concepts and logic underlying federal income tax law. Emphasis is given to the determination of income and allowable deductions for both individual and business entity taxpayers. The course also integrates some financial accounting and finance theory with federal tax law.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 3511, ACCT 2511, ACCT 3911, or 'Y' in CRAC04)

ACCT 3532. Topics in Taxation. 3 Credit Hours.

This course builds and extends on topics covered in Federal Taxes on Income. It is designed to reflect the need to exercise professional judgement and provide relevant information and advice to individuals and businesses on the impact of major taxes on financial decisions and situations. Problem-solving using the source materials of tax law and tax research are important components of the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 3531 or 'Y' in CRAC07)

ACCT 3533. Advanced Financial Accounting. 3 Credit Hours.

The major topics covered in this course include: business combinations, intercompany transactions, and other aspects of inter-corporate stock ownership necessary for the preparation of consolidated financial statements. Foreign currency transactions, foreign currency translation, partnership accounting, governmental accounting and not-for-profit accounting topics are introduced and discussed.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 3512 or 'Y' in CRAC05)

ACCT 3534. Information Systems and Controls for Accounting Professionals. 3 Credit Hours.

This course will include topics relating to IT audit, IT governance, controls, risks to accounting information systems, SOC engagements, and Blockchain technology. The course will also cover cybersecurity threats facing organizations and various risk frameworks for managing these threats.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in ACCT 3526 and ACCT 3596.

ACCT 3561. International Accounting. 3 Credit Hours.

The purpose of this course is to provide an understanding of accounting issues arising from the increased globalization of business. Topics covered include: comparative cross-national financial reporting; efforts to harmonize cross-national accounting standards and practices and to develop international accounting standards; taxation and transfer pricing issues; and managerial control of global operations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 2521 or 'Y' in CRAC02)

ACCT 3580. Special Topics - Accounting. 1 to 3 Credit Hour.

Special topics in current developments in the field of accounting.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

ACCT 3581. Co-operative Experience in Accounting. 3 Credit Hours.

This course is designed for students who have an Accounting Internship or Co-op Experience, either in the fall, spring or summer session. The course can also be taken by students accepted into the Volunteer Income Tax Assistance program, which runs only in spring semester. Course admittance is selective and requires an interview with the instructor.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (ACCT 3511, ACCT 2511, ACCT 3911, or 'Y' in CRAC04)

ACCT 3582. Independent Study. 1 to 6 Credit Hour.

Students will prepare research papers under supervision of a faculty member. NOTE: Students who want to sit for the CPA exam or other professional designations may have to petition to have independent study credit accepted by the examining authority toward satisfying minimum education requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

ACCT 3596. Auditing. 3 Credit Hours.

A study and critical appraisal of current auditing standards related to the examination of financial statements by an independent auditor. The significance of the audit report; the nature, accumulation, and evaluation of evidence for balances and transaction cycles; and the moral and ethical problems of the auditor are some of the topics covered. An introduction to the provisions of the Sarbanes-Oxley Act and assurance services also is provided. This is a writing intensive course. Students must earn a grade of C in this course if they are using it to fill the writing intensive course requirement for their degree.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (ACCT 3511, ACCT 2511, ACCT 3911, or 'Y' in CRAC04), (ACCT 3526 or 'Y' in CRAC06), and (BA 2196 (C- or higher) or BA 2996 (C- or higher))

ACCT 3911. Honors Intermediate Accounting I. 3 Credit Hours.

Honors version of ACCT 3511 (2511/0011). Accounting principles as they relate to financial reporting. Income determination, asset and liability valuation, and the form and content of financial statements are examined. NOTE: This course meets an upper-level major or business-elective requirement.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Undeclared-Business & Mngt.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 2101, ACCT 2901, 'Y' in ACC1, 'Y' in CRAC01, or 'Y' in CRAC03) and (ACCT 2521 (may be taken concurrently) or 'Y' in CRAC02)

ACCT 3999. Honors Thesis I. 1 to 3 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Accounting department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Accounting 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Accounting.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ACCT 4501. Accounting Analytics Senior Seminar. 3 Credit Hours.

Capstone course designed to enable students to evaluate generally accepted accounting principles, to relate accounting theory to accounting practice and to examine accounting issues with new technologies. The course is intended to serve as a transition from academe to professional practice.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 3512 or 'Y' in CRAC05), (ACCT 3531 or 'Y' in CRAC07), and (ACCT 3596 or 'Y' in CRAC08)

ACCT 4502. Strategic Financial Management Accounting. 3 Credit Hours.

The strategic financial management course builds on the base of the substantial knowledge you have acquired in previous courses in accounting. We will identify current issues in accounting, use the textbook as reference, and supplement it with information from other sources. The course has the following specific objectives: (1) Develop the ability to analyze current issues in accounting and their effects on financial statement analysis and management decision making; (2) Develop an understanding of the ethical issues in accounting and the ability to deal with ethical dilemmas; (3) Develop the communication skills necessary for success as an accounting professional; (4) Prepare students to transition from the Fox Business School to the business world; and (5) Prepare students for the Certified Management Accounting exam (CMA).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 3511 or 'Y' in CRAC04) and (ACCT 2521 or 'Y' in CRAC02)

ACCT 4999. Honors Senior Thesis II. 1 to 3 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Accounting Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Accounting 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Accounting.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ACCT 3999.

Actuarial Science (AS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

AS 1501. Actuarial Probability. 3 Credit Hours.

The course discusses probability theory and its application to insurance and risk management problems. Topics covered include: probability laws, combinatorics, conditional probability and independence, Bayes' Theorem, discrete and continuous random variables, common discrete and continuous distributions and their applications, multivariate discrete random variables, distribution of order statistics, linear combinations of independent random variables, and basic insurance concepts of deductibles, coinsurance, benefit limits, and inflation. Prior to spring 2016, the course title was "Introduction to Actuarial Science." Prior to fall 2022, the course title was "Actuarial Probability and Statistics I."

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW)

AS 1601. Introduction to Actuarial Spreadsheets and Programming. 1 Credit Hour.

The course introduces students to the use of spreadsheets and to the fundamentals of programming, as these skills are becoming crucial for entry-level actuarial positions. Topics covered include: managing workbooks, preparing workbooks for collaboration, cell filling, formatting, data validation, advanced conditional formatting and filtering, logical operations in formulas, advanced lookups, advanced date and time functions, data analysis through what-if analysis and forecasting, formula troubleshooting, advanced charting, Pivot Tables, Pivot Charts, create and modify macros, and an introduction to programming concepts.

Repeatability: This course may not be repeated for additional credits.

AS 1901. Honors Introduction to Actuarial Science. 3 Credit Hours.

Honors version of Actuarial Science 1501 (0001). NOTE: Students need to earn a grade of C or better in this course to be eligible to register for all other required courses in the Actuarial Science major.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042 (may be taken concurrently), MATH 1942 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW)

AS 2101. Actuarial Probability and Statistics II. 3 Credit Hours.

In this course, probability theory and its application to insurance and risk management problems are discussed in the context of continuous random variables. Among the topics to be covered are: Random variables, probabilities, and percentiles on a continuum; specific continuous distributions such as Uniform, Gamma and Exponential, Normal, and Beta; moments and moment generating functions; conditional and marginal distributions; transformations of one or two random variables; order statistics; and the Central Limit Theorem.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 2043 (may be taken concurrently), 'Y' in MA08, or 'Y' in CRMA12) and (AS 1501, AS 1901, or 'Y' in CRAS01)

AS 2502. Theory of Interest. 3 Credit Hours.

This course covers one of the foundational concepts of actuarial science: the time value of money. Students learn about simple, compound, and effective interest rates, and use them to calculate present values and future values of deterministic cash flows, both discrete and continuous. These techniques are then applied to value annuities, loans and bonds. The course also includes a thorough discussion of interest rate risk, how it can be measured, and how insurers can mitigate this risk through asset-liability management.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1042, MATH 1942, MATH 2043 (C- or higher; may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11)

AS 2503. Actuarial Corporate Finance. 3 Credit Hours.

The course develops the conceptual framework for corporate finance and option pricing from an actuarial perspective. Topics include capital budgeting, project analysis, efficient market hypothesis, capital asset pricing model, cost of capital, behavioral finance, capital structure, equity financing and debt financing. The course also provides an introduction to financial options, including option strategies, put-call parity, Binomial trees, the Black-Scholes model and Delta hedging, along with their applications to insurance products. NOTE: This course should be taken in place of Finance 3101. Prior to fall 2022, the course title was "Corporate Finance for Actuarial Science."

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1042, MATH 1942, MATH 2043 (C- or higher; may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11), (AS 1501 or 'Y' in CRAS01), (ACCT 2101, ACCT 2901, ACCT 2103, ACCT 2903, 'Y' in ACC1, 'Y' in CRAC01, or 'Y' in CRAC03), and (AS 2502 or 'Y' in CRAS03)

AS 2505. Actuarial Statistics. 3 Credit Hours.

The course covers advanced probability concepts and the fundamentals of mathematical statistics, as well as their insurance applications. Topics include multivariate continuous distribution, sampling and central limit theorem, estimation methods, construction of confidence interval, hypothesis testing, analysis of variance, and analysis of categorical data.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (MATH 1042, MATH 1942, any MATH course numbered 2043 to 3080, 'Y' in MATW, 'Y' in CRMA09, or 'Y' in CRMA11) and (AS 1501 or 'Y' in CRAS01)

AS 3501. Long-Term Actuarial Modeling. 3 Credit Hours.

The heart of the traditional actuarial science curriculum, this course examines the pricing of life insurance products by integrating concepts from probability and interest theory. It introduces random variables measuring the future lifetime of a person - from distributions or life tables - and the present values of life insurance and life annuity products, in both discrete-time and continuous-time settings. Students learn to calculate and interpret the mean, variance and probability functions for these random variables. In addition, students learn to determine actuarially fair premiums and reserves for long-term insurance products. Prior to fall 2022, the course title was "Actuarial Modeling I."

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (AS 2502 or 'Y' in CRAS03) and (AS 1501 or 'Y' in CRAS01)

AS 3502. Advanced Long-Term Actuarial Modeling. 3 Credit Hours.

The course introduces Markov Chains to extend the pricing and reserving concepts of AS 3501 to multiple lives (e.g. life insurance for a married couple or business partners) and multiple decrements (e.g. modeling different health statuses). The course also includes actuarial applications to pension valuation and profit testing, as well as embedded options in life insurance and annuity products. Prior to fall 2022, the course title was "Actuarial Modeling II."

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (AS 3501 or 'Y' in CRAS05)

AS 3503. Short-Term Actuarial Modeling. 3 Credit Hours.

Focusing on short-term actuarial modeling, the course introduces a variety of frequency, severity, and aggregate loss models. Students learn to select suitable models for a given data set, to parameterize the models to the data, to assess the predictive quality of the models through various measures of confidence, and to estimate losses using credibility theory. Pricing and reserving techniques for short-term insurance products will also be discussed. Prior to fall 2022, the course title was "Actuarial Modeling III."

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (AS 2505 or STAT 2512)

AS 3504. Actuarial Analytics. 3 Credit Hours.

Predictive analytics is a key component of actuarial work. It helps improve solutions to traditional actuarial problems such as forecasting mortality, setting loss reserves, predicting policyholder behavior, and establishing classification ratemaking schemes. Actuaries also use these techniques for improving insurance operations through data-driven decision making. This course introduces students to statistical learning and linear models, with a focus on applying these tools to actuarial business decisions in an insurance or consulting environment. Topics covered include: types of modeling problems, methods of assessing model accuracy, exploratory data analysis, exponential family of distributions, parameter estimation, diagnostic tests of model fit and assumptions, model selection and interpretation, calculation of predicted values and confidence/prediction intervals in the context of ordinary least squares regression, k-nearest neighbors, and generalized linear models. In addition, the course aims to enhance students' programming skills.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (AS 2505 or STAT 2512)

AS 3580. Special Topics: Actuarial Science. 3 Credit Hours.

Special topics in current developments in the field of Actuarial Science and exam preparation.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

AS 3582. Independent Study. 1 to 6 Credit Hour.

Readings and/or research paper under the supervision of a faculty member.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

AS 3596. Actuarial Practice: Property and Liability. 3 Credit Hours.

This highly participative course is designed to broaden perspectives on the business environment in which actuaries work. In addition to analyzing the issues behind daily events, several continuing issues will be analyzed including insurance pricing cycles, regulatory developments, the role of the actuary as an educator, advisor, objective information source and problem solver, insurance company financial rating and solvency issues, accounting fraud and questionable financial transactions, insurance and the financial markets managing insurance operations, professional ethics, and the impact of current developments in underwriting, and reinsurance on the actuarial function. NOTE: This is the writing-intensive course for Actuarial Science majors. Students must earn a grade of C- or better in this course if they are using it to fill the writing intensive course requirement for their degree. Also note: Prior to fall 2017, the course title was "Casualty Contingencies."

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 2101, ACCT 2901, ACCT 2103, ACCT 2903, 'Y' in CRAC01, or 'Y' in CRAC03), (AS 1501, AS 1901, or 'Y' in CRAS01), (RMI 2101, RMI 2901, 'Y' in RM01, 'Y' in CRRM01, or 'Y' in CRRM02), and (BA 2196, BA 2996, 'Y' in CRBA01, or 'Y' in CRBA02)

AS 3597. Actuarial Practice: Group & Health Benefits. 3 Credit Hours.

This highly participative and writing intensive course is designed to expose students to certain group health and welfare benefits, the legal and regulatory environment in which they operate, and the fundamentals of group insurance pricing, rating and funding. Benefits examined include traditional benefits such as medical and disability insurance in addition to dental and prescription drug plans, HMOs, PPOs, ACOs, and other managed care systems. Emphasis will be on the design and structure of these plans, development and pricing of group products, experience rating and funding methods, and current problems and issues associated with the provision of these benefits. The salient features of state and federal regulation will be examined, along with an examination of the Affordable Care Act (ACA) major provisions of interest to practicing actuaries and employers. Students must earn a grade of C- or better in this course if they are using it to fill the writing intensive course requirement for their degree.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ACCT 2101, ACCT 2901, ACCT 2103, ACCT 2903, 'Y' in CRAC01, or 'Y' in CRAC03), (AS 1501, AS 1901, or 'Y' in CRAS01), (RMI 2101, RMI 2901, 'Y' in CRRM01, or 'Y' in CRRM05), and (BA 2196, BA 2996, 'Y' in CRBA01, or 'Y' in CRBA02)

AS 3999. Honors Thesis I. 1 to 3 Credit Hour.

The first of a two-part sequence of courses in which independent research is conducted under the supervision of a thesis advisor from the Actuarial Science department resulting in a substantial piece of original research, roughly 30 to 50 pages in length upon completion of Actuarial Science 4999. The student must publicly present his/her findings at a Temple University Research Forum session or the equivalent during one of the two semesters during which these courses are undertaken.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Actuarial Science.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

AS 4503. Advanced Short-Term Actuarial Modeling. 3 Credit Hours.

Building on AS 3503, the course continues the discussion of short-term actuarial modeling. It introduces students to advanced frequency, severity, and aggregate claim models, as well as concepts of pricing and reserving. Topics covered include: commonly used severity, frequency distributions, aggregate risk models, coverage modifications, construction and selection of parametric models, estimate losses using advanced credibility procedures, and pricing and reserving methods for short-term insurance contracts.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in AS 3503.

AS 4504. Advanced Actuarial Analytics. 3 Credit Hours.

This course continues the discussion of AS 3504. Statistical analysis has become part of the modern actuary's day-to-day responsibilities as they help improve solutions to traditional actuarial problems and quantify insurance operations and business processes that have traditionally relied largely on managers' judgment. Topics to be covered include: ridge regression, LASSO regression, weighted/partial least squares models, KNN regression, stochastic time series processes, common time series models including predictions, confidence intervals, and interpretation, principal components analysis, decision trees, including classification trees, bagging, boosting, and random forests, k-means and hierarchical clustering, and simulation. The course will further develop students' programming skills in data analytics.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in AS 3504.

AS 4999. Honors Senior Thesis II. 1 to 3 Credit Hour.

Independent research conducted under the supervision of a thesis advisor from the Actuarial Science Department resulting in a substantial piece of original research, roughly 30 to 50 pages in length. Student must publicly present his/her findings at a Temple University Research Forum session or the equivalent if this was not done in Actuarial Science 3999.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Actuarial Science.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in AS 3999.

Adult & Organizational Development (AOD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

AOD 0836. Interpersonal Communication: Critical Competencies for Professional and Personal Success. 3 Credit Hours.

The primary goal of this course is to help you enhance your interpersonal communication competence so you have successful interpersonal communication with your family, friends and work colleagues. In the first phase of the course you will assess your own communication skills. You will develop and set personal goals and an action plan by which to create the change you wish to see. In the course you will learn the basic components of interpersonal communication situations (communicators, content, and contexts) and you will investigate how interpersonal communication needs and effectiveness change throughout life (in early childhood, adolescence, young adulthood, middle age, and old age). The course includes frequent small group discussions which will allow you to integrate course and research information for personal skill development. The course will provide a reflective and supportive environment in which to expand your communication skills and knowledge. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

AOD 1001. Practical Application in Adult and Organizational Development. 1 Credit Hour.

This course is a 1-credit course aimed at helping students become familiar with the career opportunities, create network contacts and develop a deeper understanding of the breadth and depth of the Adult and Organizational Development Field. Various professionals and industry leaders will speak to the students so that students are able to understand the trends and foreseeable changes in this dynamic field. This course will help students understand the curricula structure of the program. It will also allow students to understand how the curricula structure aligns with their unique career interests.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

AOD 1016. Introduction to Adult Learning and Training. 3 Credit Hours.

Provides a basis for understanding human behavior in professional and personal settings from a communication perspective. Emphasis is given to skills and analytical abilities related to challenges professionals face in a wide range of settings including: interpersonal and professional relationships, public presentations, team leadership roles and responsibilities, and organizational change in management roles.

Repeatability: This course may not be repeated for additional credits.

AOD 1166. Interpersonal Processes through the Life Span. 3 Credit Hours.

Examines the development of effective interpersonal interactions in relationships in family, work, and social settings. Examines how interaction preferences, demands, and skills change across the age spectrum, with an emphasis on talking, thinking, and listening abilities central to interactive situations across life situations. Assists students in developing professional skills needed to manage interpersonal challenges in diverse personal and professional settings.

Repeatability: This course may not be repeated for additional credits.

AOD 2115. Conflict Resolution in Education. 3 Credit Hours.

Introduces students to the broad field of conflict resolution education, including social and emotional learning, anti-bullying programs, peer mediation, negotiation processes, expressive arts and conflict resolution education, restorative justice programs, and bias awareness programs. It provides students with examples of programs, gives them an opportunity to interact with experts in the field, and encourages them to consider how they can support these programs as teachers and administrators.

Repeatability: This course may not be repeated for additional credits.

AOD 2176. Team Process in Education. 3 Credit Hours.

Examines ways of managing the communication process in small group, decision-making settings. The course covers core concepts and theories of group interaction and emphasizes their practical implications for understanding and influencing small group decision-making. Topics include cohesion, social influence, facilitation, group tasks, and group/team development. Students develop their personal skills in being effective team members and team leaders.

Repeatability: This course may not be repeated for additional credits.

AOD 2201. Research Methods. 3 Credit Hours.

Introduces quantitative and qualitative research methods in organizational settings. Covers a variety of study domains including field/descriptive, correlational, survey, clinical, ethnographic, and experimental research designs. Students learn various research methods for addressing particular types of research questions.

Repeatability: This course may not be repeated for additional credits.

AOD 2214. Conflict Processes. 3 Credit Hours.

Covers conflict process in interpersonal and organizational relationships. Concepts examined include conflict styles, phases of conflict, face-saving, attribution and conflict, cooperative and competitive approaches to negotiation, and methods of third party intervention. This course provides a basis for managing and intervening in difficult conflicts that occur in schools, professional organizations, and interpersonal relationships.

Repeatability: This course may not be repeated for additional credits.

AOD 2215. Mediation: Principles and Practice. 3 Credit Hours.

Provides an overview of the development and use of mediation in diverse conflict settings. Students learn the various models of mediation that third parties rely on to intervene in conflicts in organizational, family, school and community settings. Emphasis is placed on the communication skills and practices that form the basis for the mediator's role in two-party or multiparty disputes.

Repeatability: This course may not be repeated for additional credits.

AOD 2218. Leadership in Organizations. 3 Credit Hours.

Examines the theories and research on effective leadership in organizational, school, and community contexts. Concentrates on skills critical for leading change processes in a wide range of organizational environments. Attention is given to the personal leadership development of students enrolled in the course.

Repeatability: This course may not be repeated for additional credits.

AOD 2307. Interaction Analysis. 3 Credit Hours.

This course teaches a system of verbal communications that examines individual style and its effect on the listener. The purpose of the system is to teach those in power positions, such as teachers, supervisors, team leaders, psychologists and other medical professionals, how to communicate with others so that their messages are fully understood and the consequences of misunderstandings and misinterpretations are minimized.

Repeatability: This course may not be repeated for additional credits.

AOD 2900. Honors Special Topics. 3 Credit Hours.

Special topics. Content varies.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

AOD 2915. Honors Mediation: Principles and Practice. 3 Credit Hours.

This is the Honors version of AOD 2215. Provides an overview of the development and use of mediation in diverse conflict settings. Students learn the various models of mediation that third parties rely on to intervene in conflicts in organizational, family, school and community settings. Emphasis is placed on the communication skills and practices that form the basis for the mediator's role in two-party or multiparty disputes.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

AOD 3316. Negotiation Processes. 3 Credit Hours.

Teaches students about collaborative and competitive approaches to negotiation. The emphasis is on the integration of negotiation theory and practice as applied to two-party and multi-party negotiation situations. Students learn to diagnose a conflict situation to prepare an effective negotiation strategy. Examples in the class focus on educational contexts to encourage students to apply class material to their work as teachers and administrators.

Repeatability: This course may not be repeated for additional credits.

AOD 3317. Adult and Workforce Development. 3 Credit Hours.

Adult and Workforce Development is a course that focuses on the lifespan years following young adulthood, with a particular emphasis on adults and their relationship with their work and career. The need for this course is clear: research shows that population aging will be the major demographic phenomenon affecting the nation's health and social institutions over the next half century. Professionals will need to have an understanding of adulthood, aging and workforce development in order to effectively lead and support for-profit and non-profit organizations. This course will help students to understand aging as a dynamic process that is complex and allows adults to choose a wide variety of life paths. The course will cover adult development topics including relationships, learning, problem-solving, coping, adaptation, and spirituality. A continuing thread of discussion and debate will be the social policy implications of aging and career development. Work and career development is a process that is no longer only a young adult developmental milestone. Adults are retiring later and many individuals work well into their older years. The skills of workforce development are no longer only for those in specific career development positions: the skills and knowledge will serve any individual both in terms of their own career development and their abilities to support others as they progress through adulthood. Students will explore the historical, sociological, psychological and ethical implications of work force development. Learners will engage in discussions and in-class activities examining adult development theories about stability and change and how these theories relate to workforce motivation, performance, and professional development planning. The course will also have a focus on the inter-generational workplace which they will be joining as they find their own career path. This course requires 3 to 5 hours of fieldwork and clearances are required.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

AOD 3318. Systems Approach to Organizational Change. 3 Credit Hours.

This course aims to help students understand organizations - the various types (e.g., public, private, profit, non-profit) and to learn to "see" systems, linear and nonlinear in how organizations are managed and changed. Students will explore various roles and how they can be an agent having influence. This class will consist of experiential in-class activities in large and small groups. The aim is to explore how organizations can better serve society and improve social conditions.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

AOD 3319. Skill Building for Social Entrepreneurship and Community Engagement. 3 Credit Hours.

This course is designed for students who want to gain community engagement and leadership skills in a context of social entrepreneurship. Viewing community engagement as an entrepreneurial venture encourages ideas and strategies to be forward thinking, creative and grounded in a business-oriented change model. Utilization of the change model encourages project funding diversity, long-term sustainability, and widespread scalability. This course will prepare students to effect community change through a variety of entry points. These starting points may be current service within or outside of the university, enrollment in a social service related major or minor, or a desire to develop creative solutions to community challenge: now or in the future. Becoming an entrepreneur and/or a community change agent is a challenging task. This course is built on the premise that many of these obstacles can be successfully mitigated if students have developed and practiced a core set of knowledge, skills, and attitudes related to community change. This course will focus on leadership, communication, conflict management, teamwork, community needs, and assets identification, and working within a community change model. A continuous thread throughout the course is the focus on leadership as a starting point of any entrepreneurial, civic engagement initiative.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Course Attributes: SI, SP, SS

Repeatability: This course may not be repeated for additional credits.

AOD 3376. Facilitating Group Decision-Making. 3 Credit Hours.

Focuses on the various approaches to facilitating decision-making in task-oriented groups. Students learn how to facilitate groups that follow voting and consensus decision-making formats and how to meet the challenges of being an internal or external facilitator in any group process. Special attention is given to learning how to lead groups through difficult conflicts in schools and other professional organizational settings.

Repeatability: This course may not be repeated for additional credits.

AOD 3396. Organizational Processes. 3 Credit Hours.

This course examines classical and contemporary theories of organizational structure and management and their relationship to interpersonal and group processes with an emphasis on organizations as cultures and analysis of cases and real life situations. AOD 3396 supports students' ability to act as effective managers and change agents in a wide array of school and organizational settings. We live and work in large and small organizations. As our relationships are intricately interwoven within formal and informal social systems we may be unaware of or challenged by the nature of these relationships and of our capacity to influence how we view and may affect these relationships. Organizational processes shape us and our organizations. Conversely, we shape relationships and organizations through our interactions. Our capacity to be effective in social systems is affected profoundly by our understanding and action. This course is designed to facilitate learning alternate ways of assessing and understanding organizations, so also increasing awareness of varying process/influence possibilities as organizational members in diverse role relationships. Students will examine assumptions about self and social systems that may limit or enhance collective and individual contributions.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

AOD 4016. Advanced Adult Learning and Training. 3 Credit Hours.

This course is an in-depth study of the methods, tools and techniques employed in facilitating adult learning and designing and implementing training programs. The focus is on the preparation and process of delivering leader led effective group training activities in workshops, seminars, and project meetings. Students will gain the advanced knowledge and skills which are necessary for the professional roles of an instructional specialist such as a facilitator, trainer, or teacher of adults. Students will learn the basics of performing as an internal or external trainer. The course requires that students have completed the AOD 1016, Introduction to Adult Learning and Training course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in AOD 1016.

AOD 4376. Innovation and Mission-Driven Organizations. 3 Credit Hours.

This class will explore the field of Social Entrepreneurship and provide students with a set of skills that will be crucial as participants move into the non-profit sector and become social change agents. We will explore the idea of social entrepreneurship as a way of solving social problems through innovative approaches. Social entrepreneurship is a rapidly developing and changing business field in which business and nonprofit leaders design, grow, and lead mission-driven enterprises. It is important that students understand the opportunities and challenges in this new landscape.

Repeatability: This course may not be repeated for additional credits.

AOD 4382. Independent Study. 1 to 3 Credit Hour.

Provides students an opportunity to explore topics not fully covered in coursework. Under faculty supervision, the student will identify and read relevant literature in the theory and research of the topic area.

Repeatability: This course may be repeated for additional credit.

AOD 4385. Internship in Adult and Organizational Development. 3 Credit Hours.

Work experience in a communication-related job in schools, business, government, or private agency. Analysis of the work experience in light of the skills and abilities obtained in students' prior coursework in AOD.

Repeatability: This course may be repeated for additional credit.

AOD 4396. Field Research: Practice in Professional Settings. 3 Credit Hours.

Provides students an opportunity to discover how their knowledge and skills in relationship, team, and organizational change processes are managed by designated professionals in schools, agencies, organizations or other work settings. Students are guided through the design of an individualized professional development plan and an approach to exploring the link between their own backgrounds and the professional roles they seek to obtain. Special attention is given to development of personal presentation in writing, interviewing, and interning roles.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Advanced Core Medical Science (ACMS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ACMS 4004. Fundamentals of Physiology for Pre-Health Postbaccalaureates. 4 Credit Hours.

Fundamentals of Physiology addresses important topics including membranes and membrane transport, excitation and contraction of skeletal, smooth and cardiac muscle, the heart and blood flow, renal physiology and lung physiology. Important medically related examples will be discussed. Course syllabus will be provided by the course director.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Postbaccalaureate.

Repeatability: This course may not be repeated for additional credits.

ACMS 4005. Fundamentals of Physiology Lab for Pre-Health Postbaccalaureates. 1 Credit Hour.

This course is designed for pre-Physician Assistant students enrolled in the Advanced Core Health Sciences program and provides hands-on laboratory exercises related to the various body systems. The laboratory exercises will expose students to the cardiovascular, digestive, excretory, hematopoietic, neurological, and respiratory systems. Students will conduct laboratory activities designed to emphasize the function and measurement of outputs of each system. Students are expected to complete both pre- and post-laboratory written exercises.

Co-requisites: ACMS 4004.

Repeatability: This course may not be repeated for additional credits.

ACMS 4006. Cellular and Molecular Basis of Immunology and Microbiology for Pre-Health Postbaccalaureates. 4 Credit Hours.

This course is designed for upper level undergraduates and will cover the fundamentals of human immunology and pathogenic microbiology. Students should have taken as prerequisites college level biology and chemistry. The course does not assume any prior knowledge of either microbiology or immunology. Topics will cover the basic material needed to achieve high scores on the MCAT and other standardized tests required for admission to professional degree programs. A wealth of interesting and relevant areas will be covered in the course including the organization, function, and regulation of innate and adaptive immune responses; diseases associated with malfunction of the immune system such as allergy and autoimmunity, and immune-based therapies (for Cancer and Arthritis). The course will also cover the disease syndromes and the molecular and biochemical characteristics of significant pathogenic bacteria, viruses, fungi and parasites. Topics will include, among others, bacterial toxins, Tuberculosis, sexually transmitted diseases, Malaria, and Lyme disease.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Postbaccalaureate.

Repeatability: This course may not be repeated for additional credits.

Advertising (ADV)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ADV 0853. Advertising and Globalization. 3 Credit Hours.

Explore the current global scope and reach of advertising in our connected, digital age. Study major interdisciplinary themes related to the spread of consumerism, self and social identity, global consciousness, and cross-cultural effects as a result of the worldwide spread of advertising as part of the free market system. Particular attention is given to cross-cultural issues related to cultural imperialism, legal and societal constraints, ethical questions, universal values and green marketing. Course work includes comprehensive survey of print and broadcast advertising found in other countries. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed ADV 0953.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

ADV 0953. Honors Advertising and Globalization. 3 Credit Hours.

Explore the current global scope and reach of advertising in our connected, digital age. Study major interdisciplinary themes related to the spread of consumerism, self and social identity, global consciousness, and cross-cultural effects as a result of the worldwide spread of advertising as part of the free market system. Particular attention is given to cross-cultural issues related to cultural imperialism, legal and societal constraints, ethical questions, universal values and green marketing. Course work includes comprehensive survey of print and broadcast advertising found in other countries. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed ADV 0853.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO, SI

Repeatability: This course may not be repeated for additional credits.

ADV 1000. Topics in Advertising 1. 3 Credit Hours.

This course number is reserved for Special Topics courses.

Repeatability: This course may be repeated for additional credit.

ADV 1001. Introduction to Digital Design Tools for Advertising. 3 Credit Hours.

This introductory course of study is computer graphics for advertising students and other majors. Focus is on achieving working knowledge of Adobe Photoshop and Illustrator. The Adobe Creative Suite is a major tool of the art direction trade. We use these tools to execute thoughtful advertising concepts. To be a competitive job candidate, graduates will need proficiency in Photoshop, Illustrator and InDesign with working knowledge of Acrobat and Bridge. Over the course of the semester we will spend approximately 6 weeks each with Illustrator and Photoshop and 1.5 weeks with InDesign at an introductory level. Practice makes perfect. Instruction, exposure and experience with software will lead to mastery. We use advertising projects as an opportunity to develop portfolio work while practicing software lessons. Although we will discuss and critique design and concept for personal development, it will not be a part of student evaluation.

Repeatability: This course may not be repeated for additional credits.

ADV 1005. Introduction to Computer Graphics for Advertising. 1 to 3 Credit Hour.

The course of study is an introduction to digital design for projects related to advertising. Focus is on the basics of digital workflows and the Adobe Creative Suite: Illustrator, InDesign and Photoshop.

Repeatability: This course may be repeated for additional credit.

ADV 1010. Topics in Advertising 10. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

ADV 1101. Introduction to Media and Society. 3 Credit Hours.

The history, organization, creation, economics, control and effects of mass communications in the United States, including the relationships of media to one another and to the community at large with special emphasis on the roles and responsibilities of advertising, advertisers and agencies.

Repeatability: This course may not be repeated for additional credits.

ADV 1102. Introduction to Advertising. 3 Credit Hours.

This course introduces students to the function of advertising in the economy, to the strategic identification of markets and targets, to the creation and placement of advertising, and to the relationship of advertising agencies to advertisers and the media.

Repeatability: This course may not be repeated for additional credits.

ADV 1103. Digital Media and Advertising. 3 Credit Hours.

Explores the development of digital media and their impact on integrated marketing communications and consumer behavior. Analyzes the use of digital media in brand building, advertising communications, direct response and database marketing, and sales promotions. Includes examinations of strategic planning, and communication aspects of websites, online advertising, email marketing, mobile advertising, interactive kiosks, and more. Provides principles such as user experience, content organization, navigation development, and interface design necessary to develop persuasive digital marketing materials. This course is designed to immerse you in the world of interactive media and user-centered design focusing on digital branding and strategy with extreme focus on how marketers leverage this powerful medium for their brands. NOTE: This class is cross listed with ADV 4101. Students cannot receive duplicate credit for both classes.

Repeatability: This course may not be repeated for additional credits.

ADV 1196. Persuasive Writing. 3 Credit Hours.

Students learn the rhetoric of writing intended to affect behavior. The basic crafts of grammar and composition are reviewed. Students explore consumer motivation as the focus of powerful, exciting advertising and written argument.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ADV 1901. Honors Media and Society. 3 Credit Hours.

This Honors course will provide Honors students with a broad, comprehensive overview of the revolutionary role of media in society throughout history. This course will examine both traditional mass media as well as digital media. We will utilize contemporary sources and examine current events to enhance your understanding of the way media shapes your world. Students will be challenged to think critically about the power, persuasiveness and ethical issues related to the media in general and the advertising industry in particular.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ADV 2000. Topics in Advertising 2000. 3 Credit Hours.

This course number is reserved for special topics courses.

Repeatability: This course may be repeated for additional credit.

ADV 2001. Intermediate Digital Design Tools for Advertising. 3 Credit Hours.

Focus is on achieving proficiency in Adobe Photoshop, InDesign and Illustrator for advertising art direction majors. The Adobe Creative Suite is a major tool of the art direction trade. We use these tools to execute thoughtful advertising concepts. To be a competitive advertising art direction candidate, graduates need proficiency in Photoshop, Illustrator, and InDesign with working knowledge of Acrobat and Bridge. Over the course of the semester we will spend 4 weeks each with Illustrator and Photoshop at an intermediate level and 6 weeks with InDesign at a beginner level. Practice makes perfect. Instruction, exposure and experience with the software will lead to mastery. We use advertising projects as an opportunity to develop portfolio work while practicing software lessons. Although we will discuss and critique design and concept for personal development, it will not be a part of student evaluation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1001 or 'Y' in CRAD01)

ADV 2002. Search Engine Optimization. 3 Credit Hours.

Search Engine Optimization (SEO) has become a fundamental part of the marketing mix. 80 percent of people go to Google first when searching for information online. This gives companies the opportunity to be present in the search engine results with content and solutions. We can use search insights to make smarter marketing decisions and be present with the right content in the moments that matter to users. This improves user experience and allows for more meaningful engagement between brands and their target market. With the right content strategy, a website can also serve as a personal shopper for users and a strong intermediary between potential customers and sales teams. Throughout this course, you will gain a solid understanding of the fundamentals of search and how companies use search to make money and drive leads. You will learn from real world case studies, hear from top search experts in the field, and develop your own strategies in a fast-paced learning environment. Although this is not a social media or PR class, search is a fundamental part of everything we do as digital advertisers and marketers. As such, we will be dipping our toes in social, PR and digital journalism as it relates to search.

Repeatability: This course may not be repeated for additional credits.

ADV 2005. Social Media Marketing. 3 Credit Hours.

Learn the strategy behind social media marketing plans. Topics include examination of social etiquette, organization and operation of social media strategies, and the historical lead-up to this brave new world. Over the last 5 years, social media marketing has grown from a fad to the go-to paradigm for reaching millions of consumers. While corporations, non-profits, and government institutions struggle to successfully connect with larger communities on social channels, it is imperative to understand the challenges, opportunities, and relationships that exist in the social spectrum. Focusing on the "social" and remembering the "marketing" - the class, students, and instructor will all practice what they preach, by incorporating social and digital efforts into their classwork, quizzes and assignments.

Repeatability: This course may not be repeated for additional credits.

ADV 2010. Topics in Advertising 2010. 1 to 3 Credit Hour.

This course number is reserved for special topics courses.

Repeatability: This course may be repeated for additional credit.

ADV 2052. Introduction to Typography. 3 Credit Hours.

This course offers art direction track students an exploration of basic typography. Topics covered include typographic history, specification and recognition of existing typefaces, typographical style, and letterform design covering both print and digital applications. Students will learn through a combination of homework assignments, projects, and class critiques. The primary objective is to master basic typographic principles and apply them in the appropriate context through both hand done and digital executions. It is suggested, but not required, that students take ADV 3052 Art Direction I: Concept and Layout prior to enrolling in this course, as an understanding of concept and layout is expected.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Art Direction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1001 (may be taken concurrently), ADV 2001 (may be taken concurrently), 'Y' in CRAD01, or 'Y' in CRAD06) and (ADV 2151 or 'Y' in CRAD11)

ADV 2057. Creating and Filming Advertising from Script to Screen. 3 Credit Hours.

This hands-on course is designed to teach students how to take their advertising concepts through to final execution. Starting from the conceptual ideas for television commercials initially put down on paper, students are guided in following the steps toward visualizing how the idea would actually be shot. Students are coached in developing the skill of using their "mind's eye" in picturing the sequential frames of both short and long form television commercials. In addition to producing shooting boards for the commercials for several brands assigned throughout the course, students will learn the process of casting, location scouting, acquiring clearances and permits, and the basic economics related to making a commercial. The intended end product for each student will be a completed 30-second television commercial.

Repeatability: This course may not be repeated for additional credits.

ADV 2102. Introduction to Pharmaceutical Advertising. 3 Credit Hours.

Many of the advertising and marketing-related jobs in the Philadelphia region are in pharmaceutical ad agencies. This course will introduce students to the pharmaceutical advertising industry and its many opportunities for advertising professionals, and prepares interested students to pursue opportunities in the industry. You'll learn how companies market branded and generic drugs, vaccines, blood products, medical devices and other biologics. You'll learn about targeting health care professionals, patients and other consumers. You'll learn about global conglomerates, Fortune 500 companies, and startups and about vital regulatory issues.

Repeatability: This course may not be repeated for additional credits.

ADV 2103. Introduction to Web Design and Development for Advertising. 3 Credit Hours.

Web Design and Development will give you the necessary tools to get you ahead of the competition when you graduate. In this class, you will take your skills to the next level by creating interactive websites that ad agencies and their clients demand. You will learn the theory of website design: color theory, imagery, layout, typography, etc. and then apply these concepts into a fully functioning website using HTML and CSS. Your final project will become a key component of your advertising portfolio.

Repeatability: This course may not be repeated for additional credits.

ADV 2104. Personal Branding. 3 Credit Hours.

This course will look at the new channels of communication that make up the social media and Web 2.0 space. The Internet is making personal branding accessible to everyone. Personal branding means promoting your own skills and strengths. Blogging and social networks are ways of reaching your target audience. Through the use of case studies and real-life media examples, you will learn how to embrace social networks, user generated content, and blogs, to name just a few channels. These channels will enable you to manage your online reputations and create your own "personal buzz."

Repeatability: This course may not be repeated for additional credits.

ADV 2111. Introduction to Marketing. 3 Credit Hours.

This course will introduce students to the marketing process, including creating customer value and building profitable customer relationships. Students will learn how organizations develop a strong value proposition to enable them to win, retain and grow their customer base. This course will also examine the relationship between marketers and advertising agencies, and will focus on the role of advertising in the marketing process. Note: Students cannot receive duplicate credit for this course and ADV 1004.

Repeatability: This course may not be repeated for additional credits.

ADV 2121. Introduction to Copywriting. 3 Credit Hours.

This course focuses on writing effective advertising messages for print and broadcast media. Emphasis is on craft, writing ability and style. Composition and the integration of graphic elements are explored. Practical assignments teach students how to use the most common copy techniques effectively to create advertising with stopping power.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1196 or 'Y' in CRAD05)

ADV 2131. Introduction to Media Planning. 3 Credit Hours.

In this basic course, students learn the analysis and understanding of communication vehicles as advertising media, the concepts and resources involved in developing media objectives and strategies, as well as media selection criteria and vehicle purchasing. Note: Prior to fall 2015, the course title was Advertising Media Planning I.

Repeatability: This course may not be repeated for additional credits.

ADV 2141. Introduction to Brand Strategy and Research. 3 Credit Hours.

The course covers the range of areas in which advertising research participates, or has the primary responsibility for, in the advertising process. Focus is on the role of research in the development of strategic advertising messages and the design of research using various methods to acquire useful insights. We will explore how these insights lead to strategies that inform effective and dynamic creative communications, and ultimately be the foundation of lasting successful brands. Students will have the unique opportunity to learn the fundamentals of branding (from theory to creative execution), how to build brand equity through proper brand positioning, how to use creative brief and strategy documents, and how to guide and inspire the creation of effective advertising. Note: Students cannot receive duplicate credit for this class and ADV 2101. Also note: Prior to fall 2017, the course title was "Introduction to Advertising Research and Strategy."

Repeatability: This course may not be repeated for additional credits.

ADV 2151. Introduction to Art Direction: Visual Communication. 3 Credit Hours.

This course develops an understanding of the methods employed in solving communications problems in advertising with visuals. Students will explore the creative process of making images that can move ideas and information to the minds of others. (Prior to fall 2015, the course title was Visual Communication.)

Repeatability: This course may not be repeated for additional credits.

ADV 2451. The Influence of Media on Children. 3 Credit Hours.

How are children affected by the media they consume? This course will explore the key areas in which media affect children, including consumerism, violence, sexuality, representation of body image, gender, race, ethnicity, etc. The course will analyze the research on how media affects children and will include basic child development. This course will incorporate a production assignment to introduce students to production for children as an audience.

Repeatability: This course may not be repeated for additional credits.

ADV 3000. Topics in Advertising 3000. 3 Credit Hours.

This course number is reserved for special topics courses.

Repeatability: This course may be repeated for additional credit.

ADV 3001. Advanced Digital Design Tools. 1 to 3 Credit Hour.

This advanced course of study is web design for advertising majors. Focus is on achieving working knowledge of Adobe Dreamweaver, HTML and CSS. We use these advanced tools to execute thoughtful concepts. The web is a major discipline of advertising art direction. To be a competitive job candidate, graduates need mastery of Photoshop, Illustrator and InDesign as well as a proficient working knowledge of HTML and CSS. As the third in the Digital Design Tools sequence, this challenging course offers a professional level tutorage in mastering the requisite software and platform packages one needs in order to enter the digital realm of advertising. Over the course of the semester we will spend 4 weeks each with Dreamweaver and HTML at an intermediate level and 6 weeks with CSS at a beginner level. Practice makes perfect. Instruction, exposure and experience with the software will lead to mastery. We will use course projects as an opportunity to develop portfolio work while practicing software lessons. Although we will discuss and critique design and concept for personal development, it will not be a part of student evaluation.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Advertising.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Media & Comm, Klein College.

Repeatability: This course may not be repeated for additional credits.

ADV 3002. Advertising and Society. 3 Credit Hours.

Advertising plays an important role in driving business success, but its impact can extend beyond the corporate bottom line. Advertising is also not created in a vacuum but is instead shaped by a myriad of social forces. As such, this course examines the dynamic and interactive relationship between advertising and its broader societal context. In particular, the course will direct students to consider the merits and critiques of a variety of advertising practices and product categories from cultural, economic, and ethical perspectives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1101 or 'Y' in CRAD02), (ADV 1102 or 'Y' in CRAD03), (ADV 1196 or 'Y' in CRAD05), (ADV 1103 or 'Y' in CRAD04), and Complete 3 of the following: (ADV 2111 (may be taken concurrently) or 'Y' in CRAD07), (ADV 2121 (may be taken concurrently) or 'Y' in CRAD08), (ADV 2131 (may be taken concurrently) or 'Y' in CRAD09), (ADV 2141 (may be taken concurrently) or 'Y' in CRAD10), and (ADV 2151 (may be taken concurrently) or 'Y' in CRAD11)

ADV 3003. National Student Advertising Competition Preparation. 3 Credit Hours.

This elective is only offered in the fall semester. Students conduct research and develop strategic plans in preparation for the spring semester class ADV 4103 National Student Advertising Competition (NSAC). In the fall class, students analyze the case study provided by the American Advertising Federation (AAF), conduct market research (both primary and secondary) on the target brand, competitive brands, and consumer behavior related to the category. The objective for the class is to master a comprehensive knowledge of the brand and its position in the marketplace to uncover insights that lead to a successful strategy for the NSAC advertising campaign. Permission of the instructor is required. NOTE: Enrollment in this class does not guarantee a place in ADV 4103 and on the NSAC team. Students must apply for a place in that class and are chosen by the spring instructor following a highly competitive process. Selected students will be notified before the start of the spring semester. This course is not required for students who wish to enroll in ADV 4103.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (ADV 2141 or 'Y' in CRAD10)

ADV 3004. Klein Online Marketing Challenge. 3 Credit Hours.

The Klein Online Marketing Challenge is a unique opportunity for students to experience and create online marketing campaigns using Google AdWords and Google+. Students develop and run an online advertising campaign for a business or non-profit organization over a three week period. Students compete against other teams of Temple students. There is a \$30 fee per student to enroll in this course to offset the cost of Google AdWords, but this is in place of a textbook.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1102 or 'Y' in CRAD03), (ADV 1103 or 'Y' in CRAD04), ADV 2002, ADV 2005, and (ADV 2131 or 'Y' in CRAD09)

ADV 3006. Representation in the Media. 3 Credit Hours.

What are media representations, and why do they matter? What is the relationship between media representations and stereotypes? How do media represent diversity and its issues? What responsibility do we have - as media consumers, scholars, and future practitioners - to think about and address the problems of representation? This course will explore these questions by examining the relationship between media and representation. Looking at media such as advertising, news, TV, music, and social media, we will explore how media representations get created and circulated, how stereotypes are formed and understood, and what might be done to challenge or dismantle negative representations.

Repeatability: This course may not be repeated for additional credits.

ADV 3007. Psychology of Advertising. 3 Credit Hours.

This course provides an overview of key underlying psychological theories and research that can explain how advertising affects people. The focus is on psychological theories over more socially oriented approaches. Understanding psychological perspectives on how advertising works offers a critical foundation for developing advertising strategy and making decisions as a consumer.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1101 or 'Y' in CRAD02), (ADV 1102 or 'Y' in CRAD03), (ADV 1196 or 'Y' in CRAD05), (ADV 1103 or 'Y' in CRAD04), and Complete 3 of the following: (ADV 2111 or 'Y' in CRAD07), (ADV 2121 or 'Y' in CRAD08), (ADV 2131 or 'Y' in CRAD09), (ADV 2141 or 'Y' in CRAD10), and (ADV 2151 or 'Y' in CRAD11)

ADV 3008. Television Promotion: On-Air, Online, On Social. 3 Credit Hours.

The course will allow students to develop advertising strategy, produce and air promos, teases, and advertising campaigns for TUTV shows under deadline pressure. Students will also learn to master social media to promote and brand various shows.

Repeatability: This course may not be repeated for additional credits.

ADV 3009. ECHO Competition. 3 Credit Hours.

Now in its 32nd year, the Collegiate ECHO Marketing Challenge gives students the special opportunity to turn theory into practice. It provides hands-on learning and real-world experience. Students are challenged to combine their knowledge, research, and creativity as they work in teams on a marketing assignment from a corporate sponsor, their client.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1101 or 'Y' in CRAD02), (ADV 1102 or 'Y' in CRAD03), (ADV 1196 or 'Y' in CRAD05), (ADV 1103 or 'Y' in CRAD04), and Complete 3 of the following: (ADV 2111 or 'Y' in CRAD07), (ADV 2121 or 'Y' in CRAD08), (ADV 2131 or 'Y' in CRAD09), (ADV 2141 or 'Y' in CRAD10), and (ADV 2151 or 'Y' in CRAD11)

ADV 3010. Topics in Advertising 30. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

ADV 3011. Data Visualization and Advertising. 3 Credit Hours.

The purpose of this course is to teach you how to communicate effectively using data. You'll learn how to do explanatory analysis and use storytelling techniques to engage, inform, and persuade an audience. In this course, you will be required to present publicly (using data to establish credibility and charts to support your arguments) in efforts to sell your ideas. This course builds on the exploratory analysis techniques taught in Digital Analytics and Reporting, which is a prerequisite for this course. Upon completion of this course, you will be a stronger presenter with a firm handle on data visualization best practices.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 3031 or 'Y' in CRAD14)

ADV 3012. Legal and Moral Issues in Advertising. 3 Credit Hours.

The focus of this course is on the legal and ethical constraints on advertising practice. Federal laws and regulations, media standards and practices and professional ethics establish what can or cannot be said or done in advertising but, after all that, there is corporate and personal social responsibility and morality. Topics include deception, copyright infringement, right of publicity, comparative advertising and moral philosophy. Do not take this course if you have previously successfully completed Advertising 4196.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1101 or 'Y' in CRAD02), (ADV 1102 or 'Y' in CRAD03), (ADV 1196 or 'Y' in CRAD05), (ADV 1103 or 'Y' in CRAD04), and Complete 3 of the following: (ADV 2111 or 'Y' in CRAD07), (ADV 2121 or 'Y' in CRAD08), (ADV 2131 or 'Y' in CRAD09), (ADV 2141 or 'Y' in CRAD10), and (ADV 2151 or 'Y' in CRAD11)

ADV 3013. The User Experience. 3 Credit Hours.

The User Experience course will explore the art of designing usable, useful and enjoyable human-computer interfaces, with an emphasis on user-centered design techniques. The importance and necessity of effective interaction design techniques will be highlighted, and current design methodologies and principles across multiple platforms will be discussed.

Repeatability: This course may not be repeated for additional credits.

ADV 3022. Copywriting for Print and Web. 3 Credit Hours.

The emphasis of this advanced writing course is on perfecting copywriting skills, encompassing the web, newspapers, magazines, direct mail, and outdoor posters. Students will learn both short and long body copy applications. Students will also learn the characteristics of each medium allowing them to create compelling advertising for these media. Students will learn to combine words and visuals into one coherent message. A knowledge of Adobe InDesign, Adobe Photoshop and/or Adobe Illustrator is suggested. NOTE: Advertising majors and Content Creation minors only.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Advertising, Content Creation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2121 or 'Y' in CRAD08)

ADV 3023. Copywriting for Radio, TV and Video. 3 Credit Hours.

The emphasis of this advanced writing course is on perfecting copywriting skills specifically for radio and television and video applications. Students are taught conceptual and production aspects of the broadcast media, including the importance of message, music, sound effects and visual storytelling. The course also enhances students' creative abilities with techniques of script writing, storyboarding and production vocabulary. NOTE: Advertising majors only.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Advertising.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2121 or 'Y' in CRAD08)

ADV 3030. Innovations in Advertising Tech. 3 Credit Hours.

This course will provide students with the opportunity to learn data-driven forms of marketing and media planning. Students will learn how digitization is shifting media buying from mass media to personal media, how data powers these transactions and how data can be used to help identify and optimize audiences.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (ADV 2131 or 'Y' in CRAD09) and (ADV 3031 or 'Y' in CRAD14)

ADV 3031. Digital Analytics and Reporting. 3 Credit Hours.

This course will examine how traditional, internet and mobile advertising differ in their ability to track and analyze responses. What key measurement metrics are used by each form of media? What analytic tools are used? What is the impact of social media and electronic word-of-mouth marketing, and how can these be measured? Students will learn key digital measurement terms and methods of analysis.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Account Management, Brand Strategy and Research, Digital Media Engagement, Media Planning, Research and Strategy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2111 (may be taken concurrently), ADV 2131 (may be taken concurrently), ADV 2141 (may be taken concurrently), 'Y' in CRAD07, 'Y' in CRAD09, or 'Y' in CRAD10)

ADV 3033. Advertising Sales. 3 Credit Hours.

This course focuses on the development and positioning of media franchises for print and video products, plus the marketing and sale of broadcast and web-based products to consumers and advertisers. All media types are addressed. Students will learn how to articulate and present media vehicles, the conduct of sales calls, and negotiation techniques. For students in the Advertising major's Media Planning and Account Management concentrations only. (Prior to fall 2015, the course title was "Marketing Media Products.")

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Account Management, Media Planning.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2131 (may be taken concurrently), ADV 2111 (may be taken concurrently), 'Y' in CRAD09, or 'Y' in CRAD07)

ADV 3042. Quantitative Advertising Research. 3 Credit Hours.

Delving more closely into the planning and execution of effective quantitative advertising research, the objective of this course is to provide students with direct learning experience through the use of discussion, case studies and projects. Focus is on understanding the uses of quantitative research in the advertising development and tracking process, and executing projects with a specific goal in mind. This course will investigate the design, execution, and analysis of various kinds of surveying, including copy tests and campaign tracking, and is a foundation for students who wish to pursue a career in advertising research and planning. NOTE: Advertising majors only. Must have prerequisite: ADV 1141 (0070).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2141, ADV 1141, or 'Y' in CRAD10)

ADV 3043. Qualitative Advertising Research. 3 Credit Hours.

This course will concentrate on the role of qualitative research in advertising. Through the use of discussion, case studies and projects, it focuses on how advertisers and agencies use qualitative methods like focus groups, in-depth interviews, and ethnography to uncover consumer insights. This course will investigate the design and execution of these various kinds of qualitative research techniques, and is a foundation for students who wish to pursue a career in advertising research and planning.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Brand Strategy and Research, Research and Strategy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2141 or 'Y' in CRAD10)

ADV 3050. Advanced Topics in Art Direction. 3 Credit Hours.

This course gives upper level art direction students a chance to more deeply explore specific topics in advertising that will help prepare them for a wider range of opportunities post graduation. Students will be given a chance to experience a variety of subject matter, such as creating multimedia advertising specifically on social media, creating motion media and other topics that will give students a creative edge. Topics will vary each semester.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Art Direction.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (ADV 1001 or 'Y' in CRAD01), ADV 2101, and (ADV 3052 or 'Y' in CRAD17)

ADV 3052. Art Direction I: Concept & Layout. 3 Credit Hours.

As the first in the Advertising Art Direction track, students gain a comprehensive understanding of how ideas become branded visual communications that engage, capture and persuade audiences. Through regular lecture, reading and project critique, emphasis is placed on combining the fundamental tools of graphic design with creative brainstorming to arrive at fresh, branded concepts. This course focuses primarily on concept and layout for the print medium, and lays the foundation for Art Direction II. NOTE: Students are expected to be proficient in the computer graphics programs (Adobe Photoshop, Illustrator and InDesign) necessary to produce print work for this course. Students are encouraged to take a computer graphics course before or concurrently with 3052. NOTE: Advertising majors only. REQUIREMENTS: Students must have a working knowledge of Adobe PhotoShop in order to enroll in this course. An overall knowledge of the Adobe Creative Suite is recommended.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Art Direction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2151 or 'Y' in CRAD11) and (ADV 1001 (may be taken concurrently), ADV 2001 (may be taken concurrently), 'Y' in CRAD01, or 'Y' in CRAD06)

ADV 3053. Art Direction II: Narrative and Multimedia. 3 Credit Hours.

This course is designed to increase your fluidity with advertising design and conceptualizing in multiple mediums. As the second level course for your Art Direction concentration, this course again focuses on thinking creatively, cleverly, and unconventionally. We will focus on applying these strengths toward working in a variety of both traditional and non-traditional mediums.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Art Direction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2151 or 'Y' in CRAD11), (ADV 3052 or 'Y' in CRAD17), and (ADV 1001 (may be taken concurrently), ADV 2001 (may be taken concurrently), 'Y' in CRAD01, or 'Y' in CRAD06)

ADV 3082. Special Projects. 1 to 4 Credit Hour.

A special course of study in a particular area of advertising. Student works under the supervision of faculty, who approves and guides the study.

Repeatability: This course may be repeated for additional credit.

ADV 3101. Creative Thinking for Advertising. 3 Credit Hours.

This course uses team oriented sessions to develop the creative skills necessary for solving advertising problems. A cross discipline approach is utilized and "creatives" from various advertising and non-advertising disciplines participate as guest facilitators and speakers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (any 2000-level ADV course (may be taken concurrently), CMST 2111, 'Y' in CRAD19, or 'Y' in CRCM02)

ADV 3171. Diamond Edge Communication. 3 Credit Hours.

Student operation of an advertising agency for nonprofit accounts in the Philadelphia market area with advertising faculty supervision. Hands-on learning in creative, media, research and management. Students work in teams to solve real world advertising and marketing communication problems for real clients.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in ((ADV 3052 and ADV 3053), (ADV 3022 and ADV 3023), (ADV 3031 and ADV 3033), (ADV 3031 and ADV 3043), (ADV 3052 and 'Y' in CRAD18), (ADV 3053 and 'Y' in CRAD17), (ADV 3022 and 'Y' in CRAD13), (ADV 3023 and 'Y' in CRAD12), (ADV 3031 and 'Y' in CRAD15), (ADV 3033 and 'Y' in CRAD14), (ADV 3031 and 'Y' in CRAD16), (ADV 3043 and 'Y' in CRAD14), ('Y' in CRAD17 and 'Y' in CRAD18), ('Y' in CRAD12 and 'Y' in CRAD13), ('Y' in CRAD14 and 'Y' in CRAD15), or ('Y' in CRAD14 and 'Y' in CRAD16))

ADV 3185. Advertising Internship. 1 to 4 Credit Hour.

This course offers hands-on, organized, professional work, under supervision in selected advertising agencies, marketing communications or advertising departments within corporations. NOTE: This course may be substituted for ADV 3171. Open to juniors and seniors only.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

ADV 3900. Honors Special Topics. 3 Credit Hours.

Honors Special Topics Course in Advertising.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ADV 4034. Account Management. 3 Credit Hours.

This course teaches the management of the agency-client relationship, involving account executives and brand managers. Students will learn how to adapt to client corporate cultures, cooperative strategy development, account coordination, profit management, people management and the evaluation, presentation and sale of advertising concepts, executions and services. Note: Account Management majors only.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Account Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2111 (may be taken concurrently) or 'Y' in CRAD07), (ADV 3031 (may be taken concurrently) or 'Y' in CRAD14), and (ADV 3033 (may be taken concurrently) or 'Y' in CRAD15)

ADV 4044. Account Planning. 3 Credit Hours.

This course will concentrate on the roles and responsibilities of account planners in advertising. It will focus on how research uncovers consumer insights, and probe how these findings are applied throughout the process of developing marketing communications. The course addresses how account planners work with the creative and management teams to ensure that the voice of the consumer is a constant focus in the advertising process. The course replicates this experience in a brand's lifespan, and provides a hands-on exposure to this multi-faceted career.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Brand Strategy and Research, Research and Strategy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2141 or 'Y' in CRAD10), (ADV 3031 (may be taken concurrently) or 'Y' in CRAD14), and (ADV 3043 or 'Y' in CRAD16)

ADV 4054. Advanced Media Planning. 3 Credit Hours.

This advanced course focuses on the art and craft of media planning for large budget brands competing in today's complex media environment. Rooted in a concrete understanding of social communications as economic communications, students explore the conceptual foundations of media planning and produce professional quality media plans. Note: The student cannot receive duplicate credit for this course and ADV 3032.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Media Planning.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 2131 or 'Y' in CRAD09), (ADV 3031 (may be taken concurrently) or 'Y' in CRAD14), and (ADV 3033 (may be taken concurrently) or 'Y' in CRAD15)

ADV 4064. Advertising Portfolio. 3 Credit Hours.

This course brings together copywriters and art directors in two person teams. They work together to create exciting examples of advertising from initial conceptual schemes to comprehensive finished ads. The ads include full treatments of copy and art executed as take-home assignments and discussed in class.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Field of Study Restrictions: Must be enrolled in one of the following Concentrations: Art Direction, Copywriting.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in ((ADV 3052 and ADV 3053), (ADV 3022 and ADV 3023), (ADV 3052 and 'Y' in CRAD18), (ADV 3053 and 'Y' in CRAD17), (ADV 3022 and 'Y' in CRAD13), (ADV 3023 and 'Y' in CRAD12), ('Y' in CRAD17 and 'Y' in CRAD18), or ('Y' in CRAD12 and 'Y' in CRAD13))

ADV 4102. Advertising Campaigns. 3 Credit Hours.

This capstone course involves the preparation and production of an advertising campaign for a brand or service. Competing teams of students produce marketing analysis, consumer research, advertising strategies, media plans, and design and produce print advertisements and broadcast commercials.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in ((ADV 3031 and ADV 3033), (ADV 3022 and ADV 3023), (ADV 3031 and ADV 3043), (ADV 3052 and ADV 3053), (ADV 3031 and 'Y' in CRAD15), (ADV 3033 and 'Y' in CRAD14), (ADV 3022 and 'Y' in CRAD13), (ADV 3023 and 'Y' in CRAD12), (ADV 3031 and 'Y' in CRAD16), (ADV 3043 and 'Y' in CRAD14), (ADV 3052 and 'Y' in CRAD18), (ADV 3053 and 'Y' in CRAD17), ('Y' in CRAD14 and 'Y' in CRAD15), ('Y' in CRAD12 and 'Y' in CRAD13), ('Y' in CRAD14 and 'Y' in CRAD16), or ('Y' in CRAD17 and 'Y' in CRAD18))

ADV 4103. National Student Advertising Competition. 3 Credit Hours.

Students develop a comprehensive marketing and advertising campaign for a major advertiser and compete with universities across America for first place in this National College Competition. Teams work under supervision of advertising faculty in researching the account and in developing strategy, creative and media. This is an alternative Capstone course. NOTE: Selection for the NSAC team is a highly competitive process. Students must apply and are registered only with the permission of the instructor. Students are not required to take the NSAC Strategy and Positioning course (ADV 3003: NSAC Preparation) to enroll in ADV 4103.

Department Restrictions: Must be enrolled in one of the following Departments: KCMC:Adv and Public Relations.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in (2 3000-level ADV courses (may be taken concurrently) or 'Y' in CRAD20)

ADV 4196. Morality, Law and Advertising. 3 Credit Hours.

The focus of this course is on the legal and ethical constraints on advertising practice. Federal laws and regulations, media standards and practices and professional ethics establish what can or cannot be said or done in advertising but, after all that, there is corporate and personal social responsibility and morality. Topics include deception, copyright infringement, right of publicity, comparative advertising and moral philosophy.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (2 3000-level ADV courses (may be taken concurrently), CMST 2111, 'Y' in CRAD20, or 'Y' in CRCM02)

ADV 4197. Advanced Writing for Academic and Professional Communication. 3 Credit Hours.

Throughout your career, you will discover that your ability to evaluate arguments, write persuasively and communicate clearly will help determine how successful you are in your chosen profession. In this course, we will explore and study a variety of writing styles including both academic writing and business communication. You will learn how to readily switch from one voice or writing style to another. This course will build on the knowledge students acquired in ADV 1196, Persuasive Writing.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ADV 1101 or 'Y' in CRAD02), (ADV 1102 or 'Y' in CRAD03), (ADV 1196 or 'Y' in CRAD05), (ADV 1103 or 'Y' in CRAD04), and Complete 3 of the following: (ADV 2111 or 'Y' in CRAD07), (ADV 2121 or 'Y' in CRAD08), (ADV 2131 or 'Y' in CRAD09), (ADV 2141 or 'Y' in CRAD10), and (ADV 2151 or 'Y' in CRAD11)

ADV 4571. International Studies in Media and Communication. 1 to 6 Credit Hour.

This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. Available only to student participating in a Klein GO! Program.

Repeatability: This course may be repeated for additional credit.

ADV 4882. Independent Study. 1 to 4 Credit Hour.

Supervised reading, research, report or special project on an advanced level related to advertising management, media, research or creative.

Repeatability: This course may be repeated for additional credit.

Aerospace Studies - Air Force ROTC (AIRF)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

AIRF 1011. Foundations of the United States Air Force I. 1 Credit Hour.

A survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force career opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with hands-on experience. NOTE: This course is taken at Saint Joseph's University. There is a \$100 per semester hour fee payable to Saint Joseph's University. Please call 610-660-3190 or visit www.sju.edu/academics/cas/afrotc for more information.

Repeatability: This course may not be repeated for additional credits.

AIRF 1012. Air Force Leadership Laboratory I. 0 Credit Hours.

LLAB is an interactive environment that constitutes up to 50 percent of the contact hours of the AFROTC college curriculum. It is an integral part of preparing cadets to serve as Air Force officers. LLAB provides the opportunity for cadets to practice their officership and develop leadership and management techniques. LLAB centers on the organized cadet wing where activities are planned and conducted by cadets and supervised by detachment officers. NOTE: This course is taken at Saint Joseph's University. Please call 610-660-3190 or visit www.sju.edu/academics/cas/afrotc for more information.

Repeatability: This course may be repeated for additional credit.

AIRF 1021. The Foundation of the United States Air Force II. 1 Credit Hour.

A survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force Core Values, teambuilding, interpersonal communications, diversity, and the Oath of Office. Leadership Laboratory is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with followership experiences. NOTE: This course is taken at Saint Joseph's University. There is a \$100 per semester hour fee payable to Saint Joseph's University. Please call 610-660-3190 or visit www.sju.edu/academics/cas/afrotc for more information.

Repeatability: This course may not be repeated for additional credits.

AIRF 1022. Air Force Leadership Laboratory II. 0 Credit Hours.

LLAB is an interactive environment that constitutes up to 50 percent of the contact hours of the AFROTC college curriculum. It is an integral part of preparing cadets to serve as Air Force officers. LLAB provides the opportunity for cadets to practice their officership and develop leadership and management techniques. LLAB centers on the organized cadet wing where activities are planned and conducted by cadets and supervised by detachment officers. NOTE: This course is taken at Saint Joseph's University. Please call 610-660-3190 or visit www.sju.edu/academics/cas/afrotc for more information.

Repeatability: This course may be repeated for additional credit.

AIRF 2031. The Evolution of U.S. Aerospace Power I. 1 Credit Hour.

A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Featured topics include: Air Force heritage, Air Force leaders, an introduction to ethics and values, introduction to leadership, group leadership problems, and continuing application of communication skills. Leadership Laboratory is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with their first opportunity for applied leadership experiences discussed in class. NOTE: This course is taken at Saint Joseph's University. There is a \$100 per semester hour fee payable to Saint Joseph's University. Please call 610-660-3190 or visit www.sju.edu/academics/cas/afrotc for more information.

Repeatability: This course may not be repeated for additional credits.

AIRF 2041. The Evolution of U.S. Aerospace Power II. 1 Credit Hour.

A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Featured topics include: Air Force heritage, Air Force leaders, an introduction to ethics and values, introduction to leadership, group leadership problems, and continuing application of communication skills. Leadership Laboratory is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with their first opportunity for applied leadership experiences discussed in class. NOTE: This course is taken at Saint Joseph's University. There is a \$100 per semester hour fee payable to Saint Joseph's University. Africology and African American Studies (AAAS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

AAAS 0829. The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

AAAS 0834. Representing Race. 3 Credit Hours.

From classical Greeks and Romans, who saw themselves under siege by the "barbarian hordes," to contemporary America and its war on "Islamic extremism," from "The Birth of a Nation" to "Alien Nation," Western societies have repeatedly represented some group of people as threats to civilization. This course will examine a wide range of representations of non-Western people and cultures in film, literature, scientific and legal writings, popular culture and artistic expression. What is behind this impulse to divide the world into "us" and "them"? How is it bound up with our understanding of race and racial difference? And what happens when the "barbarian hordes" talk back? NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed African American Studies 0834, Anthropology 0834/0934, Asian Studies 0834, English 0834/0934, or History 0834.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

AAAS 0857. Sport & Leisure in American Society. 3 Credit Hours.

Explore the complexity and diversity of American society through the study of sport and leisure. To what extent does the way we play or spectate sports, the way we plan or experience leisure time, reflect American values? As we trace a brief history of the United States through the lens of sport and leisure, we will observe how concepts of freedom, democracy and equality are tested through time. Issues of race, ethnicity, gender, age, disability, and socio-economic class will be prominent as we observe American ideals both upheld and contradicted in the context of the way Americans recreate. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AAS 0857, STHM 0857, SOC 0857 or REL 0957.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

AAAS 1124. Elementary Yoruba. 3 Credit Hours.

An introductory course in the understanding, reading, and speaking of Yoruba, an African language that has had a major impact on the African cultures of Brazil, Haiti, Cuba, Puerto Rico, Jamaica, and the United States. Students will be taught grammar, vocabulary, and conversation in the language.

Repeatability: This course may not be repeated for additional credits.

AAAS 1125. Elementary Hausa. 3 Credit Hours.

An introductory course in the understanding, reading and speaking of Hausa, a language spoken by more than 70 million people in West Africa. Students will be taught grammar, vocabulary, and conversation in the language.

Repeatability: This course may not be repeated for additional credits.

AAAS 1152. Introduction to African Aesthetics. 3 Credit Hours.

An overview of the cultural experience of African peoples. An examination of the culture of peoples in Africa, America, and the Caribbean in a comprehensive and structurally integrated manner. An introduction to Black aesthetics and the interrelationship of the humanities in African American Studies. Designed to acquaint students with important historical and philosophical investigations of the creative process and to explore interrelationships, similarities, and differences in the various cultural expressions of African peoples.

Repeatability: This course may not be repeated for additional credits.

AAAS 1253. Blacks in World History. 3 Credit Hours.

Prerequisite for all history courses to be applied to the major. An introduction to the entire field of Black history, both in Africa and the New World. A basic course, comprehensive in scope, to provide a firm grounding for students interested in taking subsequent history courses.

Repeatability: This course may not be repeated for additional credits.

AAAS 1261. Africa in the 20th Century. 3 Credit Hours.

A summary of the major political, economic, social, and cultural developments in Africa since 1900. The impact of indigenous and foreign philosophies on industrialization, urbanization, and peasantization during the 20th century. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

AAAS 1268. African American History Since 1900. 3 Credit Hours.

A general treatment of the turbulent 20th century in African American history. Attention given to the rise of the Ku Klux Klan, the anti-lynching campaigns, northern migration, the Marcus Garvey Movement, the Harlem Renaissance, and the Civil Rights Movement. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC, SI

Repeatability: This course may not be repeated for additional credits.

AAAS 1271. Urban Black Politics. 3 Credit Hours.

This course examines Black political activity in cities--the socio-historical condition of Blacks in cities; the city within the larger political arena; the nature of urban politics/politicians, and the place and future of Blacks in urban politics with a particular emphasis on Philadelphia.

Repeatability: This course may not be repeated for additional credits.

AAAS 1500. Special Topics. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

AAAS 1968. Honors Africa in the 20th Century. 3 Credit Hours.

A summary of the major political, economic, social, and cultural developments in Africa since 1900. The impact of indigenous and foreign philosophies on industrialization, urbanization, and peasantization during the 20th century. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

AAAS 2044. The Black Church. 3 Credit Hours.

This course is an exploration of the significant role the Black Church has played in creating an African American response to social, political, and economic obstacles and barriers in America. "Black Church" is defined broadly as African descended communities of spiritual worship, including but not limited to Christian, Islamic and Indigenous/African-derived religious groups. Students will be introduced to some of the African cosmologies that informed the worldview of people who were forcibly removed from their homelands and dispersed across the globe and enslaved in the Americas.

Repeatability: This course may not be repeated for additional credits.

AAAS 2058. African American Music I. 3 Credit Hours.

An overview of the history, spirituality and sociology of African/African-American music, with main emphasis on important and dynamic forms, styles and concepts that have formed the core of African and African American music culture. Distinct themes and phenomena that define African/Black music will be presented and discussed. The goal of this course is to develop critical thinking and writing skills during our exploration of the origins, themes, and direction of African/African-American music in the context of Black politics, history and culture.

Repeatability: This course may not be repeated for additional credits.

AAAS 2100. Special Topics. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

AAAS 2111. Tupac Shakur and the Hip Hop Revolution. 3 Credit Hours.

Rapper, Tupac Amaru Shakur (June 16, 1971 - September 13, 1996) has been described as one of the most influential personalities in the history of Hip-Hop music and culture. His early years as a child of The Black Panther Party for Self Defense provided a unique political insight and edge to his music. Posthumously, Shakur continues to sell millions of records and inspire millions of listeners internationally and his increasing reputation as a pivotal figure has been acknowledged by some of the major African American philosophers. This course will explore the charismatic, conscious and controversial artist in terms of his poetic influence on issues such as Black Power, pain, poverty, and the rhetoric of Black Consciousness.

Repeatability: This course may not be repeated for additional credits.

AAAS 2131. Creative Writing Workshop. 3 Credit Hours.

This course provides an opportunity for students to explore and develop their writing talents under the influence and direction of an established writer. African and African American subjects, themes, and materials used. Students read works of African American writers.

Repeatability: This course may not be repeated for additional credits.

AAAS 2133. The African American Lesbian, Gay, Bisexual, Transgender Experience. 3 Credit Hours.

With advancement made through the modern civil rights movement and the emergence of progressive views on sexuality in contemporary society, African American lesbian, gay, bisexual, transgender, and questioning LGBTQs individuals have made gains in social mobility and recognition. However, homophobia, heterosexism, sexism, and racism continue to intersect within the lives of African American LGBTQs, shaping the way in which they are perceived and interact within the larger society. This upper level undergraduate course explores the experiences of African American (LGBTQ) individuals through an interdisciplinary approach. The course enlists both narratives and empirically based research in conceptualizing the experiences of African American LGBTQs within the United States. While not limited to a specific theoretical perspective; students will be expected to understand the experiences of African American LGBTQs using conceptual frameworks informed by the use of an intersectional analysis.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AAAS 2134. The Literature of American Slavery. 3 Credit Hours.

Slaves, slave owners, and abolitionists, men and women, perceived slavery in distinctive ways and recorded those perceptions in songs and poems, folk tales, autobiographical narratives and novels, speeches and tracts, travel accounts, journals, diaries, and letters. Through an examination of this rich oral and written literature, such themes as the character of slave culture, the relations between slaves and masters, the oppression of women under slavery, and the connection between abolitionism and feminism are explored. Lectures provide historical background and a context in which to read the selections.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AAAS 2142. The Black Male Experience. 3 Credit Hours.

This course will review and analyze experiences of African American men from a variety of perspectives. This will allow students to look at contemporary African American male and examine factors that have contributed to his present condition including: examination of the black male within the present social system, their role in ghetto and street culture, the status and role performances of black fathers and the historical and contemporary myths about the physiology and biology of African American males.

Repeatability: This course may not be repeated for additional credits.

AAAS 2151. History of Blacks in Cinema. 3 Credit Hours.

An overview of the history of Black Cinema and the portrayals of persons of African descent in cinema from the early 1900s to the present, including developments from Hollywood, independent filmmakers, and experimental foreign films. Treats in depth the story of race movies and contemporary trends such as the independent Black film movement in the African Diaspora and the United States.

Repeatability: This course may not be repeated for additional credits.

AAAS 2165. History and Culture of the Caribbean. 3 Credit Hours.

This course presents a historical survey of the cultural, economic, and political developments of the Caribbean people from the enslavement and colonial periods to independence and post-independence with particular emphasis on Haiti, Jamaica, Guyana, Trinidad-Tobago, Barbados, and the Bahamas. Students will explore the historical and cultural roots of contemporary Caribbean societies, as well as the main discourses on Caribbean identity, nationality, and culture. It is expected that by the end of the semester students should have a sound knowledge of the history and culture of the Caribbean and should be able to establish parallels between the Caribbean experiences and that of other Diasporic Africans.

Repeatability: This course may not be repeated for additional credits.

AAAS 2168. African Americans in Sports. 3 Credit Hours.

This course examines the issues surrounding African Americans in the world of sports. The course will highlight African American pioneers in sports and the historical context of their struggle, study the events which helped break racial barriers in sports, examine the socio-cultural influence of the African American Athletes, study African American culture and the role and significance of sports in it, and observe current African American Athletes. The course will also study the contribution of sports in facilitating change in the larger racial and social context of African Americans in American Society.

Repeatability: This course may not be repeated for additional credits.

AAAS 2175. Hip Hop and Black Culture. 3 Credit Hours.

Hip Hop and Black Culture will lead its students into an in-depth analysis of hip-hop culture, hip-hop music, other cultural expressions that contributed to the culture's development and evolution, as well as the relevance of hip-hop's role as the preeminent modern black aesthetic. The primary focus of the course is to provide a comprehensive foundation for understanding the relevance of hip-hop's role in the modern African-American experience, its representation and misrepresentation of African Americans as well as its role as a vehicle of expression that articulates cultural norms translated into socially acceptable sounds.

Repeatability: This course may not be repeated for additional credits.

AAAS 2200. Topics in African-American Studies. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

AAAS 2201. African Civilization. 3 Credit Hours.

A survey of Africa's contributions to world history and civilization from 5000 B.C. to 1800 A.D. An intensive analysis of the major issues in African civilization.

Repeatability: This course may not be repeated for additional credits.

AAAS 2205. Black Politics in America. 3 Credit Hours.

An introduction to the fundamental concepts and principles of American government and politics, with a focus on the ways in which American political institutions have influenced and have been influenced by Black Americans' quest for political self-determination.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AAAS 2208. Black Folklore: African and African-American. 3 Credit Hours.

An overview of the folk literature and oratory of African peoples on the African continent and in the Americas. Covers tales, stories, myths, and proverbs, and their function in society. Brer Rabbit, Ananse, the Flying African, High John de Conquerer, John Henry, Shine, and many other characters are examined.

Repeatability: This course may not be repeated for additional credits.

AAAS 2211. African Politics. 3 Credit Hours.

This course is intended to provide students with the necessary historical background to understand and analyze socio-political issues in African society. Topics to be covered will include: the pre-colonial political systems, causes and effects of enslavement and colonialism, liberation movements, and independence.

Repeatability: This course may not be repeated for additional credits.

AAAS 2218. Psychology of the African American Experience. 3 Credit Hours.

Examines contemporary perspectives and research on the African experience in America and the relationship of that experience to social and psychological functioning among African Americans. The course also examines the origins of some of the traditional psychological theories about persons of African descent, and examines emerging theories shaped by new perspectives.

Repeatability: This course may not be repeated for additional credits.

AAAS 2242. Afrocentricity. 3 Credit Hours.

This is an intellectual inquiry into the origin, critiques, and arguments surrounding African agency in social, political, psychological, and economic contexts. Consequently the course concentrates on the concepts of centeredness, cultural location, orientation, and historical disorientation. Students will study the origin and evolution of Afrocentricity and its relationship to Negritude, Quilombismo, Kawaida, Pan Africanism, and Postmodernism. Students engage in an expansive reading and location of theoretical and critical texts such as responses to forms of intellectual marginalization and cultural oppression. Authors such as Asante, Chinweizu, Diop, Karenga, and Mazama are analyzed in the contexts of on-going African and African American struggles for liberation from all hegemony. Note: This course was previously offered as AAAS 1252 and students will not be able to receive duplicate credit for both courses.

Repeatability: This course may not be repeated for additional credits.

AAAS 2248. Public Policy and the Black Community. 3 Credit Hours.

This course examines the various dimensions of public policies and their impacts on the Black community in the United States. Using historical, economic, political, sociological and psychological analytic lenses, students will analyze policy within a systems framework, being sure to engage the domains of economics, education, criminal justice, housing and health care. Students will engage/interact with Philadelphia participants in the policy-making process, and will debate key policy issues highlighted during this course.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AAAS 2251. Mass Media and the Black Community. 3 Credit Hours.

An examination of the role mass media plays in the African American community. Ownership, access, and image making are a few of the topics discussed. The aim is to develop an appreciation and awareness of the role media play in shaping opinions.

Repeatability: This course may not be repeated for additional credits.

AAAS 2255. Introduction to Research Methods. 3 Credit Hours.

Introduction to basic methods of research and methodological issues in African American Studies. This course provides an overview of social research methods, addresses sociocultural issues in research conceptualization, operationalization and design, and introduces basic analytic concepts and operations. Students work in small groups to design an original, IRB-compliant multi-method study to address an issue that local communities deem important to their quality of life. NOTE: Offered during Fall semester only. Students should complete AAAS 4096 in the Spring immediately after this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (AAAS 1296 or AAAS 2296)

AAAS 2296. Introduction to Africology. 3 Credit Hours.

This course offers a multidimensional and critical discussion of the history, philosophy and seven core subject areas, [i.e., (1) history; (2) religion; (3) sociology; (4) politics; (5) economics; (6) creative production - art, music, literature; and (7) psychology] of the discipline of Africology (Black Studies, African American Studies, Africana Studies). In its dedication to cultural grounding, academic excellence and social responsibility, the discourse and practice of the discipline are informed by four basic concerns: (1) the critical and persistent search for meaning and truth in history and social reality; (2) a rigorous intellectual challenge to established ways of viewing social and human reality; (3) a moral critique of the social constraints of human freedom, especially those rooted in race, class and gender considerations; and (4) cultivation of commitment to the historical project of creating a truly multicultural, democratic and just society based on mutual respect of persons or peoples and mutual cooperation for mutual benefit. Undergirding these four basic concerns is the insistence on discovering the agency of African people within their own experiences. Note: This course was previously offered as AAAS 1296, and credit for this course will only be given one time. Students who take 2296 after completing 1296 will not receive duplicate credit.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

AAAS 2405. Introduction to Afro-Jewish Studies. 3 Credit Hours.

This course will introduce students to the study of African and African-Diaspora Jews. Students will examine and critically assess the various past and present methods used to study Africana Jewish communities. The research and readings will provide students with a basic introduction to Afro-Jewish history, culture and religion. It will also analyze the effects of race and racism on the construction of Afro-Jewish identities.

Repeatability: This course may not be repeated for additional credits.

AAAS 2934. Honors Literature of American Slavery. 3 Credit Hours.

Slaves, slave owners, and abolitionists, men and women, perceived slavery in distinctive ways and recorded those perceptions in songs and poems, folk tales, autobiographical narratives and novels, speeches and tracts, travel accounts, journals, diaries, and letters. Through an examination of this rich oral and written literature, themes such as the character of slave culture, the relations between slaves and masters, the oppression of women under slavery, and the connection between abolitionism and feminism are explored. Lectures provide historical background and a context in which to read the selections. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, RS, SI

Repeatability: This course may not be repeated for additional credits.

AAAS 3000. Special Topics. 3 Credit Hours.

Topics vary from semester to semester. Please check with the faculty advisor for a course description and topic.

Repeatability: This course may be repeated for additional credit.

AAAS 3010. Special Topics in African Languages. 3 Credit Hours.

Languages vary by semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

AAAS 3176. Contemporary Black Poets. 3 Credit Hours.

An examination of the major works of contemporary poets of African descent. Students are introduced to the writings of poets such as Sonia Sanchez, Amiri Baraka, Rita Dove, Askia Toure, Audre Lorde, June Jordan, Quincy Troupe, Michael Harper, Atukwei Okai, Haki Madhubuti, Gwendolyn Brooks, Mari Evans and other selected African American poets.

Repeatability: This course may not be repeated for additional credits.

AAAS 3205. The Black Woman. 3 Credit Hours.

This course will review and analyze experience and representation of African American women from a variety of feminist, psychological, and African-centered perspectives. Students will apply theoretical and research findings from selected scholarly and anecdotal sources to understanding the unique challenges of African-American women's treatment and methods of coping, resistance, and survival in legal, educational and social systems steeped in racism, sexism, homophobia and patriarchy. Class assignments (e.g., reaction, papers, group project.) will help students develop the skills necessary to communicate effectively and professionally, in both oral and written form, about these important issues.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AAAS 3215. Languages and Cultures of West Africa. 3 Credit Hours.

This course is an introduction to the indigenous languages and cultures of West African peoples. Aspects of their geographical locations, history, social organization, worldview, values, customs, oral traditions, and communities will be discussed. A review of the impact of major historical events on these languages, and on their speakers' life styles, identity, and customs will be undertaken. The role of these languages in the development of African and African-Caribbean languages and cultures will also be examined. In the latter part of the course, students will be introduced to the basic structure of these languages, and will be taught how to read, write, and speak some phrases in each language. The course will focus on location, worldview, history and culture as contexts for the three major languages chosen from Akan, Bamanankan (Bambara/Mande/Mandinka/Mandingo), Ewe, Fulfude (Fulani), Ga, Hausa, Wolof, and Yoruba. This is not a languages course per se, but a course about the relationship between culture, customs, and language.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in AAAS 2201.

AAAS 3257. Black Social and Political Thought. 3 Credit Hours.

The thoughts and philosophies of Black leaders as they relate to the struggle of Black people for liberation. Covers individuals such as Frederick Douglass, Booker T. Washington, W.E.B. DuBois, Huey P. Newton, Ella Baker, Angela Davis, Ida B. Wells, Fannie Lou Hamer, Malcolm X, Marcus Garvey, Nkrumah, Toure, Shirley Chisolm, A. Philip Randolph and Dr. Martin Luther King, Jr. and other Black thinkers.

Repeatability: This course may not be repeated for additional credits.

AAAS 3268. Critical Readings in African American History. 3 Credit Hours.

Using primary source material and with special attention to the United States, students will examine the African experience in the Americas from the 14th century to the present. Movements, periods, events and people that represent major social, economic and political African American thought will be surveyed.

Repeatability: This course may not be repeated for additional credits.

AAAS 3271. History of Pan-African Thought. 3 Credit Hours.

A study of the works and thoughts of Sylvester Williams, W.E.B. DuBois, Kwame Nkrumah, Julius Nyerere, M.K.O. Adiola, and others. Analysis of the Pan African Congresses from 1919 to 1987.

Repeatability: This course may not be repeated for additional credits.

AAAS 3296. The Black Family. 3 Credit Hours.

This course examines historical and contemporary issues relevant to the functioning of African American families. Students write critiques of selected text chapters and work in small groups to interview local community members; use interview and other research sources to develop and implement a community action plan (CAP) for improving some aspect of family life.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

AAAS 4000. Special Topics. 3 Credit Hours.

Topics vary from semester to semester. Please check with the faculty advisor for a course description and topic.

Repeatability: This course may be repeated for additional credit.

AAAS 4082. Independent Study. 3 Credit Hours.

Field research in an African American Studies issue. Each student identifies a task in a problem area and develops a research project around it. Student must first find a faculty member to supervise the project and must submit written details about the project to the department chair for approval in advance of registration for the course.

Repeatability: This course may be repeated for additional credit.

AAAS 4091. Junior/Senior Directed Research. 1 to 3 Credit Hour.

In-depth study of a specific topic central to the discipline of African American Studies for two consecutive semesters. Culminates in a concise, well-documented senior essay paper.

Repeatability: This course may be repeated for additional credit.

AAAS 4096. Senior Seminar. 3 Credit Hours.

A seminar-style course in which seniors demonstrate, through their participation in a variety of activities, their mastery of knowledge bases, skills and concepts central to the discipline and critical to post-baccalaureate opportunity. Students also work in small groups to conduct, analyze, write and publicly present the social research studies they designed in AAS 2255 or AAAS 2255: Introduction to Research Methods and each student submits a Senior Portfolio that contains documents and demonstrates skills commonly expected/demanded of new college graduates. NOTE: Capstone course for majors. Offered in Spring only.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Africology + African Amer St, African American Studies.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in AAAS 2255.

AAAS 4115. Black Aesthetics. 3 Credit Hours.

Repeatability: This course may not be repeated for additional credits.

AAAS 4146. Women Writers in Black Literature. 3 Credit Hours.

A comparative exploration of the nature, form, themes, and techniques of major Black women writers from Africa, the U.S., and the Caribbean.

Repeatability: This course may not be repeated for additional credits.

AAAS 4161. Studies in African-American Literature. 3 Credit Hours.

This course is an examination of African American literary forms with certain emphasis on poetry, drama, fiction, and autobiography. Texts from earlier decades and contemporary movements are included. The aim is to develop an understanding and appreciation of African American literary experience. Phillis Wheatley, Zora Neale Hurston, Langston Hughes, Richard Wright, Amiri Baraka, Maya Angelou, Toni Morrison, Chester Himes, James Baldwin, Henry Dumas, Paul Laurence Dunbar, John Killens, Wallace Thurman, Ann Petry, Alice Walker, Bebe Moore Campbell, and Nikki Giovanni are among writers whose works are studied.

Repeatability: This course may not be repeated for additional credits.

AAAS 4221. The Black Child: Development and Socialization. 3 Credit Hours.

A study of the development and socialization of the African American child. Discussion of family, peer group relationships, formal and informal education, and early racial consciousness.

Repeatability: This course may not be repeated for additional credits.

AAAS 4248. Dimensions of Racism. 3 Credit Hours.

The course will explore interracial interactions from an African centered conceptual framework. It will examine various theoretical approaches to racial prejudice and will analyze the prejudiced personality. The course will examine the historical growth of racism and racist thought as well as seek common explanations for and effects of racism on African Americans. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS, SI

Repeatability: This course may not be repeated for additional credits.

AAAS 4389. Seminar in Community Service. 3 Credit Hours.

Seminar in Community Service allows African American Studies majors to acquire hands-on experience in, and provide unpaid on-site services to, a community-based agency, organization, or program selected and pre-screened by the instructor. The selected community site must provide a significant social service to the larger community. Students will spend Phase I of the course in class reading and discussing empirical and theory-based literature relevant to the services provided by the instructor-selected site. Students will spend Phase II in service to the agency, and will return to the classroom in Phase III to deliver the final report--an empirically-based research report analyzing agency goals and processes, and where appropriate, making evidence-based suggestions for improving agency policy as it affects successful delivery of services.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (AAAS 2248 and AAAS 2255)

American Studies (AMST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

AMST 0801. Philadelphia Arts & Culture. 4 Credit Hours.

What and where is the real Philadelphia? How can we get past the clichés to better understand and experience the city's historic and legendary sense of itself? For more than three centuries, Philadelphia's unique identity has been defined and redefined by a prodigious and prolific creative community: painters, sculptors, writers, performers, architects, planners, thinkers, and more. We'll explore Philadelphia's evolving sense of itself through a broad range of examples of creative works from the 17th through the 20th centuries. And through this prism of expression, and the institutions that present and protect it, we'll develop a deep understanding of Philadelphia as one of the nation's most creative cities. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed American Studies 0901.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

AMST 0847. American Military Culture. 3 Credit Hours.

You live in a country that possesses the world's strongest military forces. Up through the Vietnam War, Americans viewed military service in wartime as a basic obligation for all adult male citizens - the ultimate test of their patriotism and manhood - but a temporary sacrifice that ceased for most on the return of peace. Today, the American people have outsourced their awesome war-making power to a restricted number of men and women - many of whom consider military service their career. We will explore the distinctive culture that shapes the composition and behavior of America's armed forces and probe how it reflects the strengths and weaknesses of American society. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed History 0847.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

AMST 0848. American Revolutions. 3 Credit Hours.

From the first encounters with Native Americans to the present, a series of pivotal moments have had an enduring influence on American society, culture, and politics. In each class, three modules will focus on three pivotal moments, such as King Philip's War, Nat Turner's Rebellion, the Scopes trial, the Civil Rights movement, the women's movement, the emergence of Elvis Presley, the sexual revolution, the rise of environmentalism, the Reagan Revolution, and 9-11. In each module, students will first place the main subject of the module in context, and then seek to understand how it changed American society. The last week of each module will be devoted to a consideration of how the subject of that module has become part of American collective memory. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0848 or History 0848.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

AMST 0855. Why care about College: Higher Education in American Life. 3 Credit Hours.

You have decided to go to college. But why? What role will college and in particular Temple University play in your life? Reflect on this important question by looking at the relationship between higher education and American society. What do colleges and universities contribute to our lives? They are, of course, places for teaching and learning. They are also research centers, sports and entertainment venues, sources of community pride and profit, major employers, settings for coming-of-age rituals (parties, wild times, courtship, etc.), and institutions that create lifetime identities and loyalties. Learn how higher education is shaped by the larger society and how, in turn, it has shaped that society. Become better prepared for the world in which you have chosen to live for the next few years. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed Educational Administration 0855 or English 0855.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

AMST 0859. The Making of American Society: Melting Pot or Culture Wars?. 3 Credit Hours.

Terrorism, illegal immigration, gay marriage, religious conflict, political in-fighting, corporate corruption, racial animosities, civil liberties assaults, media conglomeration, Wal-Mart goes to China and the rich get richer. America in the 21st Century is a contentious society. How did we get to this place in time? Examine what makes American society distinctive from other advanced industrial democracies as we study the philosophical origins of America, the development of social and economic relationships over time, and the political disputes dominating contemporary American life. The course relies heavily on perspectives from History, Sociology and Political Science to explain the challenges facing contemporary American society. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: History 0859, PHIL 0859, POLS 0859, or SOC 0859.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

AMST 0862. First Person America. 3 Credit Hours.

Examine the private and public lives of a diverse cast of Americans over a long sweep of the nation's history. Along the way, look at how fundamental conflicts - between the local and the national, freedom and equality, inclusion and exclusion, community and the individual - have driven U.S. history from its very beginnings, how they have shaped these individual lives and how these individuals have molded the debates. Learn to use a range of sources - including autobiographies, biographies, memoirs, personal narratives, profiles, bio-pics, self-portraits, visual and performance pieces - as you investigate these American stories and American tensions. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AMST 0962.

Course Attributes: GU

Repeatability: This course may not be repeated for additional credits.

AMST 0901. Honors: Philadelphia Arts and Culture. 4 Credit Hours.

What and where is the real Philadelphia? How can we get past the clichés to better understand and experience the city's historic and legendary sense of itself? For more than three centuries, Philadelphia's unique identity has been defined and redefined by a prodigious and prolific creative community: painters, sculptors, writers, performers, architects, planners, thinkers, and more. We'll explore Philadelphia's evolving sense of itself through a broad range of examples of creative works from the 17th through the 20th centuries. And through this prism of expression, and the institutions that present and protect it, we'll develop a deep understanding of Philadelphia as one of the nation's most creative cities. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed American Studies 0801.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GA, HO

Repeatability: This course may not be repeated for additional credits.

AMST 0962. Honors: First Person America. 3 Credit Hours.

Examine the private and public lives of a diverse cast of Americans over a long sweep of the nation's history. Along the way, look at how fundamental conflicts - between the local and the national, freedom and equality, inclusion and exclusion, community and the individual - have driven U.S. history from its very beginnings, how they have shaped these individual lives and how these individuals have molded the debates. Learn to use a range of sources - including autobiographies, biographies, memoirs, personal narratives, profiles, bio-pics, self-portraits, visual and performance pieces - as you investigate these American stories and American tensions. (This is an Honors course.) NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd and American Culture (AC) for students under Core. Students cannot receive credit for this course if they have successfully completed AMST 0862.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO

Repeatability: This course may not be repeated for additional credits.

AMST 1042. Work in America. 3 Credit Hours.

A broad discussion of work in the United States, which takes a historical look at worker-management relationships, the organization of workplaces, the experiences of ordinary workers, and the experiences of different groups of people (e.g., ethnic minorities) in the workplace. The course will provide students with a perspective on major historical and cultural developments in the U.S. from the late 19th century to the present, using primary documents, literature, and secondary readings on the nature of work in America. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

AMST 1901. Honors American Lives. 3 Credit Hours.

This course is an introduction to American Studies through the study of autobiographical writings--life stories--that give us insight into American values, conditions, aspirations, and conflicts. By looking closely at these American lives, students will meet people of various periods and backgrounds and become familiar with the way history has shaped lives, and the way individuals have both created and resisted the forces of change. The conflicting images and realities of American society will be explored. NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AC, HO

Repeatability: This course may not be repeated for additional credits.

AMST 2001. Tourism in America. 3 Credit Hours.

A booming multinational industry, tourism is a powerful medium of transnational encounter. There is hardly a place on earth not part of the recreational geography of tourism. In practical terms, tourism is seen as an engine of economic growth both in the cities and in the countryside. While it moves people from one place to another, tourism produces itself with ever-greater complexity. This course will undertake an analysis of tourist productions, including tourist discourse, settings, events, experiences, and artifacts. An exemplary case of cultural invention and commodification, tourism is implicated in the histories of pilgrimage, travel, colonialism, and ethnography, retracing their trips and replicating their discourse. As a result, tourism offers some of the richest material for exploring the semiosis of cultural production on a global scale. In this course, therefore, we will pay special attention to the political economy of tourism as seen through a close analysis of actual sites.

Repeatability: This course may not be repeated for additional credits.

AMST 2003. The American Sexual Past. 3 Credit Hours.

This course will explore the history of sexuality in America. The purpose of this course is to familiarize the student with important historical events/periods in the development of sexuality in the United States and major themes and issues in the American cultural history of sex and sexuality. Its purpose is to survey the ways in which sexuality has changed and shifted over the course of colonial and American history. It will also connect sexuality to the social, political, and economic realities that helped to shape it in different eras. The focus of the course will consist of major themes that illuminate aspects of sexuality in colonial and American culture and history. These may include, but are not limited to: censorship, family and sex, marriage and sex, female sexuality, male sexuality, homosexuality, birth control, bisexuality, the state use of sterilization, transgender/transsexual sexuality, sex workers, sexually transmitted infections, and sex in the media and arts. The approach taken in the class will cut across racial, class, gender, transgender, and ethnic boundaries. In order to better understand our own society, it is necessary to be aware of events that shaped the world as we know it today.

Repeatability: This course may not be repeated for additional credits.

AMST 2011. The Arts in America. 3 Credit Hours.

This course will examine the place of the arts in contemporary America, with an emphasis on the politics of culture. We will take a broad view of "art," encompassing popular arts, high arts, and what's in between. And we will look at some examples of how artists and writers have functioned within the contemporary art environment, and within a popular culture and material environment that undermines distinctions between reality and fantasy and between past and present (e.g., Disneyland). Representative figures will be examined from various art forms (literature, music, architecture, painting, photography) within an interdisciplinary context.

Repeatability: This course may not be repeated for additional credits.

AMST 2012. American Things: Introduction to Material Culture. 3 Credit Hours.

The things we produce are fraught with cultural meaning, from the household object to the building to the automobile. This course explores the meanings of things through a historical examination of objects, both handmade and manufactured. The way things have served as repositories of meaning, and as expressions of social class, gender, and ethnicity, will be explored through discussion and observation.

Repeatability: This course may not be repeated for additional credits.

AMST 2021. Philadelphia Neighborhoods. 3 Credit Hours.

Students will be introduced to the development of the city of Philadelphia as seen from a neighborhood perspective. From Colonial times to the present, neighborhood and community are the primary means by which the city's residents experienced the growth and change of the Philadelphia metropolitan area. Using archival resources over the World Wide Web, as well as the rich historical legacy of the region's museums, students will explore the development of the city's neighborhoods.

Repeatability: This course may not be repeated for additional credits.

AMST 2022. Museums and American Culture. 3 Credit Hours.

The museum holds itself to the preserver of cultural memory, yet museums as we know them are a 19th century invention. Their function as shapers of cultural practice and national identity will be explored through this course, which takes us up to the present, when museums have reached out to represent communities that were previously excluded from the elite culture of museums. How museums work as classifiers of knowledge, how they represent culture, as commodity and experience, will also form part of the course. Cross-Listed with ANTH 2022. Students may only receive credit for one of the following course numbers: ANTH 2022 or AMST 2022.

Repeatability: This course may not be repeated for additional credits.

AMST 2031. Radicalism in the United States. 3 Credit Hours.

A study of issues and traditions in the history of radical thought and behavior. Emphasizing the 20th century, the course focuses on major social contexts and ideologies such as anarchism, militant unionism, socialism, and communism, each of which has had a long and vibrant history in the U.S.

Repeatability: This course may not be repeated for additional credits.

AMST 2041. Technology and American Culture. 3 Credit Hours.

This course explores the way American values have shaped technology and how technology has shaped American life, placing contemporary problems in a historical perspective. Materials are drawn from social history, literature, visual arts, film, advertising, and polemical prose. May also include working with collections at the Franklin Institute.

Repeatability: This course may not be repeated for additional credits.

AMST 2051. American Places: Home, City, Region. 3 Credit Hours.

This course explores the importance of place in determining the character of American culture. A variety of materials, visual and textual, are used to examine the way our lives are shaped by the home, the design of the city, and the suburban and regional areas beyond the city. The extent to which places hold their identities in the face of mass culture and megalopolis is also explored.

Repeatability: This course may not be repeated for additional credits.

AMST 2052. The Class Experience in America. 3 Credit Hours.

This course surveys the enduring importance of class in the United States as well as the enduring myth of American classlessness. We will start with the myths themselves, where they came from and how they were constructed. From there, we will examine theories of social class (in some ways attempts to explain why the myths weren't true) and efforts to objectively measure poverty, inequality, and the distribution of wealth. At the outset, we will also examine social mobility patterns and how these objective categories of class are related to race, region, sex, and gender. We will then spend time looking at how class is lived and how it is represented in the larger culture. We will explore how social class shapes the daily lives of ordinary Americans in cities, suburbs, small towns, and rural hinterlands through such things as housing, community, work, leisure activities, shopping tastes, dress, diet, language, education, and family. We will examine how class has been represented, reproduced, and contested, in literature, art, music, film, television, and the broader popular culture.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AMST 2061. American Music. 3 Credit Hours.

This class is designed as a survey course that looks at the cultural, historical, technological, industrial, artistic, and mythic attributes of American Music, primarily from after the Civil War until the present. The 20th century is highlighted, with special emphasis on the period from the 'Tin Pan Alley' era to today. Definitions of 'American' music and 'Popular' music will be discussed and analyzed. Movie musicals, soundies, concert films, and videos will be studied as well as audio recordings. Attention will be paid to socio-historical ramifications of American popular music as a cultural force and cultural expression.

Repeatability: This course may not be repeated for additional credits.

AMST 2065. Global America. 3 Credit Hours.

This distance-learning course is designed to help students examine the United States' role in the modern, industrial, and then, post-industrial world. At the same time, we will look at how the larger world shaped the United States and individual citizens. We will do this through a topics based approach. Each week, moving in roughly chronological order, we will explore a discreet and revealing interaction between the United States - whether this side of the equation is represented by the government, corporate leaders, or culture brokers - and another part of the world - and this side might be other nations, groups of people, or intellectual concepts. Not only will students encounter a broad range of contacts on a wide front, but they will also be asked to write and think about each of these topics and moments from a broad and wide range of different vantage points.

Repeatability: This course may not be repeated for additional credits.

AMST 2071. Immigrant Experiences in America. 3 Credit Hours.

A study of major issues concerning immigrant experience in the U.S., such as legislation regarding immigration, anti-immigrant social and political movements, immigrant efforts to assimilate (or to resist assimilation, or to accommodate to one degree or another). Students will be provided with basic history of the subject. They will also read accounts of life in the U.S. by immigrants and fiction about immigrant experiences. Most of the course will stress 20th century immigration.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AMST 2072. Puerto Ricans in Philadelphia. 3 Credit Hours.

Puerto Ricans constitute the second largest Hispanic group in the country. This course examines the specific community of Puerto Ricans in Philadelphia and its relationship with other racial and ethnic groups and the social, political, and economic situation of Puerto Ricans in the city. Note: This course is equivalent to LAS 2072; students may receive credit for either AMST 2072 or LAS 2072.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AMST 2098. Reading Culture. 3 Credit Hours.

As an introduction to the methods and scope of American Studies, Reading Culture will present an in-depth, interdisciplinary look at either a defined period in the American past, or a specific social or political movement or moment. Subjects could include, for example, the 1920s, the American Civil War era, the Civil Rights movement, McCarthyism, or the AIDS epidemic in the US. Our purpose will be to explore how culture in its many forms and manifestations shaped how people lived their daily lives and created meaning in a specific moment or set of circumstances. How was culture formed by the context, and how was the context created by cultural production? Particular emphasis will be placed on looking at the relationship, and even the disconnect, between different kinds of culture - knowledge production and education, visual culture, including art, photography, and film, music, landscapes, and built environments. In order to do that, we will learn how to read, broadly construe, and understand how different cultural forms convey messages and how distinct ways of seeing and hearing relate to other cultural forms. Through discussion, research, and writing, class members will investigate these varied dimensions of culture. They will learn to understand them in their broader social, aesthetic, ethical, and political contexts. In addition, this class, as an introduction, will prepare students to take more advanced courses in American Studies. This is also a writing-intensive class, so students will be engaged in extensive and varied writing (and rewriting) assignments and projects that will help them to hone these crucial skills.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CLA 2096 or any AMST course numbered 2000 to 4999)

AMST 2107. Asian American Experiences. 3 Credit Hours.

An introduction to the varied historical and contemporary experiences of Chinese, Japanese, Filipino, Korean, South, and Southeast Asian immigrants and their descendants in the United States. Explores economic, social, political, and cultural developments, beginning with the arrival of the Chinese in the 1830s and ending with the experiences of Asian-American immigrants and their communities today. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Note: This course is cross-listed with Asian Studies 2107, History 2107, and Sociology 3223. Students may only receive credit for one of these courses: ASST 2107, AMST 2107, HIST 2107, or SOC 3223.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

AMST 2108. Growing Up in America. 3 Credit Hours.

This course will examine the changing perception and experience of growing up in the United States from colonial times to the present, assuming that childhood and adolescence are social constructions that change over time. The course will explore the emergence of childhood and adolescence as distinct stages in the life cycle, the evolving role of the family in the process of growing up, and the increasing importance of social institutions other than the family in the lives of the young. Particular attention will be paid to the difference between growing up rich or poor, black or white, male or female, and rural or urban. Finally, it will consider the reciprocal relationship between popular culture and the lives of young Americans.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AMST 2120. Topics in American Culture. 3 Credit Hours.

A special topics course, used for materials and approaches to American Studies that are either experimental in nature or not yet a regular part of the curriculum. NOTE: Course content varies and students can obtain a description of the current version at the American Studies office.

Repeatability: This course may be repeated for additional credit.

AMST 2217. The Vietnam War. 3 Credit Hours.

An attempt to probe one of the most significant and controversial episodes of American history. Beginning with the history of Vietnam since the 19th century, including the preceding Indochina Wars, this course will explore the impact of the Vietnam War of the '60s and '70s on the domestic and international scenes, together with its multiple legacies to later American culture. Will make use of television and film from the period. Note: This course is cross-listed with Asian Studies 2217 and History 2217. Students may only receive credit once for these courses: AMST 2217, ASST 2217, or HIST 2217.

Repeatability: This course may not be repeated for additional credits.

AMST 2742. Work in America. 1 Credit Hour.

Work - labor - stands at the very center of the American story. The nation was settled by people looking for work. That was true in the past and it is true today. This class, then, examines work and the meaning of work from Jamestown to the advent of McWorld. How has work changed over time? How have perceptions of laborers shifted over the last 300 hundred years? Students will explore labor-management relations, the organization of work, the experience of ordinary workers, and the lives of different groups of workers - millhands, immigrant farm laborers, clerical workers, and fast food employees. In the end, this course will use primary and secondary sources to provide students with a broad historical and cultural understanding of the nature of work and the American experience. NOTE: Offered at Temple University Japan only.

Repeatability: This course may not be repeated for additional credits.

AMST 2818. American Icons. 3 Credit Hours.

The Statue of Liberty. Lincoln. Barbie. Route 66. Disneyland. Elvis. Ali. These are all American Icons. This course will explore iconic images of America as a way to understand the central myths, promises, and ideas behind the nation - ideas about freedom, individuality, democracy, mobility, second chances, masculinity and femininity, race and class. Each unit will focus on an individual icon, its origins, what it represented, and how this representation has changed over time and place. The course will invite a critical analysis of these icons and their economic and cultural impact in a global context.

Repeatability: This course may not be repeated for additional credits.

AMST 2900. Honors Topics in American Culture. 3 Credit Hours.

A special topics course, used for materials and approaches to American Studies that are either experimental in nature or not yet a regular part of the curriculum. NOTE: Course content varies and students can obtain a description of the current version at the American Studies office.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

AMST 2901. Honors Quest for the American Dream. 3 Credit Hours.

This class examines the quest for the American dream among the many populations of America by looking at its consequences for the Native American, for the African American, and for the immigrant Chinese, Italians, and Puerto Ricans. Members of all these ethnic groups will be interviewed to try to understand their perspectives.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

AMST 2941. Honors Technology and American Culture. 3 Credit Hours.

This course explores the way American values have shaped technology and how technology has shaped American life, placing contemporary problems in a historical perspective. Materials are drawn from social history, literature, visual arts, film, advertising, and polemical prose. May also include working with collections at the Franklin Institute. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

AMST 2951. Honors American Places: Home, City, Region. 3 Credit Hours.

This course explores the importance of place in determining the character of American culture. A variety of materials, visual and textual, are used to examine the way our lives are shaped by the home, the design of the city, and the suburban and regional areas beyond the city. The extent to which places hold their identities in the face of mass culture and megalopolis is also explored.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

AMST 3006. The American Woman: Visions and Revisions. 3 Credit Hours.

An examination of images and roles of women in American culture. Using fiction, poetry, and autobiography, we develop an understanding of stereotypes and myths and we relate these images to the real-life experiences of American women. The readings include all classes and many ethnic groups, and focus primarily on the 20th century. NOTE: Students will receive credit only once for either AMST 3096, AMST 3006, GSWS 3096, or GSWS 3006.

Repeatability: This course may not be repeated for additional credits.

AMST 3011. Photography in America. 3 Credit Hours.

An overview of the history of photography in America from its beginning in the 1840s to the present, emphasizing its relation to society and the arts. The course will cover both documentary and aesthetic movements, including such figures as Brady, Muybridge, Riis, Hine, Evans, Stieglitz, Steichen, Strand, Robert Frank, Diane Arbus, Duane Michals, Cindy Sherman, etc. The cultural meaning of the Civil War, of westward expansion, of the Great Depression, of the Civil Rights movement, will be studied in relation to photography. Slides and readings on photography and American culture and on how the camera affects our seeing and thinking.

Repeatability: This course may not be repeated for additional credits.

AMST 3012. Film and American Society. 3 Credit Hours.

This course explores the way visual media (film, video, television) have in various ways recorded or documented the social and historical "reality" of American life. A number of issues will be explored: What is the place of documentary within American society, as information and as entertainment? And why are we so attracted to it? How close to "reality" can visual media come? How does documentary compare with non-documentary film in its effort to represent American culture and history?

Repeatability: This course may not be repeated for additional credits.

AMST 3021. Historic Preservation in Philadelphia. 3 Credit Hours.

This course uses Philadelphia as a case study to show how history can be read from the fabric of a city and why and how we go about preserving these buildings and structures. We will trace Philadelphia history from the counting houses and markets of the Colonial period through the factories of the 19th century, up to the automobile-oriented architecture of today. Students will become familiar with the battles to save our built history with the use of tax credits, easements, and the historic registers. NOTE: The class may include several walking tours of Philadelphia.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

AMST 3022. Architecture, Urban Design, and American Culture. 3 Credit Hours.

An exploration of ways U.S. cities have been physically shaped over the past 100 years, paying special attention to the leading movements and theories concerning the growth and design of urban space. Readings are from topics such as: Olmsted and the park movement; the city beautiful movement; the modern city and the skyscraper; Lewis Mumford and the garden city movement; the organic city of Jane Jacobs; the postmodern city of Robert Venturi; the dystopian city. In addition to studying the literature of cities, the class explores Philadelphia as a case study, with students developing techniques of observation and analysis, in an effort to understand the city of Philadelphia within the broader framework of thinking about American cities.

Repeatability: This course may not be repeated for additional credits.

AMST 3031. Political Protest and Culture in the '60s. 3 Credit Hours.

Many see the 1960s as a time America fell apart - drugs, sex, anti-Americanism, and the loss of the work ethic. Yet the '60s produced the Civil Rights Movement, the anti-Vietnam War Movement, a revolution in music, Vatican II, and the Counterculture. Martin Luther King, the Kennedys, Marilyn Monroe, and the astronauts - fame and untimely death. What was it like when America still had hope? How did it change us as a society and not change us? Why are so many still so angry about all that or miss it?

Repeatability: This course may not be repeated for additional credits.

AMST 3032. Literature and Political Change. 3 Credit Hours.

A study of significant works of fiction, poetry and non-fiction that voice concerns of the alienated and the dispossessed with emphasis on the struggle against conformity and for social and economic justice from the Great Depression to the election of Ronald Reagan. Some research required. NOTE: Equivalent to English 2114 (0152).

Repeatability: This course may not be repeated for additional credits.

AMST 3033. Courtroom in American Society. 3 Credit Hours.

This course will examine the relationship between our legal system and American society. Does the law shape social mores or is it merely a reflection of them? What role should the court play in protecting individual rights? We will study the evolution of American jurisprudence in the area of abortion, affirmative action, freedom of expression, separation of church and state, and examine emerging areas of legal debate including the right to same sex marriage, the legalization of prostitution and the constitutionality of Megan's law.

Repeatability: This course may not be repeated for additional credits.

AMST 3041. Contemporary Trends in the American Workplace. 3 Credit Hours.

This course will focus on the development of new work arrangements, the attitudes of employees toward their jobs or careers, work expectations and rewards, and issues having to do with the meanings of work in the lives of individuals. "Contemporary trends" is intended to provide students with a clear perspective on what they can expect in their years at work.

Repeatability: This course may not be repeated for additional credits.

AMST 3051. American Frontiers. 3 Credit Hours.

Reexamined from the perspective of the late 20th century, the American frontier becomes contested terrain between diverse groups of settlers and natives. With a geographic focus on America west of the Mississippi, this course looks at elements that were used to construct the myth of the frontier and the many elements that were left out. It incorporates Euro-American women, and persons of Latin American heritage, Asians, African Americans, and especially Native Americans into the story of the frontier of the 19th century and the west of the 20th.

Repeatability: This course may not be repeated for additional credits.

AMST 3061. Media and American Popular Culture. 3 Credit Hours.

This course will explore the role of media in the development of American popular culture, with particular emphasis on the cultural transformations brought about by mass media after 1880. Historical analysis will demonstrate the profound shift in media roles within the past century; from media expressions of popular culture before 1889, to media as generators of popular culture after that point. A by-product of this analysis will be the formulation of a critical definition of mass media in terms of a specific relationship between the media and the audience.

Repeatability: This course may not be repeated for additional credits.

AMST 3071. African American Experiences. 3 Credit Hours.

A survey of historical, social, political, and cultural developments in African American experience in the U.S. Topics include: enslavement, the Civil War and Reconstruction, Harlem Renaissance, Garveyism, the great migration, depression and labor unions, the New Deal and the WPA, African-American involvement in the nation's wars, Civil Rights, Black Power, black arts movement, and Black Panthers. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

AMST 3074. Introduction to Asian American Literature. 3 Credit Hours.

Asian American literature will be considered from the perspective of the social, political, and economic experiences of Asian Americans. Prose, poetry, fiction, and plays will be read from an interdisciplinary perspective, through examinations of writers such as Sui Sin Far, Carlos Bulosan, Toshio Mori, Mary Paik Lee, Frank Chin, Bharati Mukherjee, Maxine Hong Kingston, Amy Tan, and Sara Suleri.

Repeatability: This course may not be repeated for additional credits.

AMST 3075. Literature of American Slavery. 3 Credit Hours.

What kinds of arguments did people use to attack - and support - slavery, and what difference did those literatures make? This course examines the intersection of persuasive writing and the institution of slavery from 1680 to the Civil War, with a special focus on the antebellum period, when the problem of slavery came to occupy a central role in American politics and American literature. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

AMST 3082. Independent Study. 1 to 4 Credit Hour.

The student devises a program for independent study with his advisor and an instructor. Designed for those students whose research interests are not met in any established course. NOTE: Special authorization required for all students. Interested students should first consult with the Director of American Studies.

Repeatability: This course may be repeated for additional credit.

AMST 3089. Field Work in American Studies. 1 to 4 Credit Hour.

The Field Study internship offers students the opportunity to relate academic interests to a variety of cultural and civic institutions in the Philadelphia area. Individual readings and a final report or research paper provide a perspective on American culture. NOTE: Each three credits earned normally requires ten hours of work per week (during the summer sessions the number of hours is doubled) under faculty and institutional supervision. Interested students should first consult with the Director of American Studies.

Repeatability: This course may be repeated for additional credit.

AMST 3101. Latino Identity in the United States. 3 Credit Hours.

Latino Identity in the U.S. is a general survey of the cultural-historical experiences of Latinos in the United States from pre-colonization to the present with concentration on the time period of the civil rights movement to the present. The course will explore the impact of Latinos in U.S. cultural-history and artistic expressions, across all disciplines; specifically on how this impact has reflected itself in the development of Latino identity formation and how Latinos fit within race/ethnic/gender cultural politics in the United States. Note: This course is equivalent to LAS 3101; students may receive credit for either AMST 3101 or LAS 3101.

Repeatability: This course may not be repeated for additional credits.

AMST 3120. Topics in American Culture. 3 Credit Hours.

A special topics course, used for presenting material and approaches to American Studies that are either experimental in nature or not yet a regular part of the curriculum. NOTE: Course content varies and students can obtain a description of the current version at the American Studies office.

Repeatability: This course may be repeated for additional credit.

AMST 3931. Honors Political Protest and Culture in the 60's. 3 Credit Hours.

Many see the 1960s as a time America fell apart - drugs, sex, anti-Americanism, and the loss of the work ethic. Yet the '60s produced the Civil Rights Movement, the anti-Vietnam War Movement, a revolution in music, Vatican II, and the Counterculture. Martin Luther King, the Kennedys, Marilyn Monroe, and the astronauts - fame and untimely death. What was it like when America still had hope? How did it change us as a society? And not change us? Why are so many still so angry about all that or miss it!

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

AMST 4097. Senior Seminar in American Studies. 3 Credit Hours.

The capstone class required of all American Studies majors. Open to others with permission of the Director of American Studies. Students write a major paper. Should be taken in the Fall of the senior year. NOTE: This is a Capstone writing course. Special authorization required for all students. Interested students should first consult with the Director of American Studies.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

AMST 4098. Senior Independent Study. 1 to 4 Credit Hour.

Students who, because of special circumstances, are unable to take 4097 (formerly W393) in the Fall of senior year may fulfill the Capstone requirement through an independent study. The senior essay will be written on a topic or theme related to the student's program of study. NOTE: American Studies majors only. Special authorization required for all students. Interested students should first consult with the Director of American Studies.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Anthropology (ANTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ANTH 0814. Human Ecology. 3 Credit Hours.

The study of human ecology focuses on understanding how ecosystems affect, and are affected by, human biology, behavior, technology and social organization. Students will learn about basic ecological principles, and the way humans have adapted both culturally and biologically to different ecosystems. We will explore ecological models for the origin of human cooperation, human cultural diversity and social complexity - and investigate how limited ecosystem resources ignite competition among humans and human groups. We will review the evidence for significant past environmental changes caused by people living in simple societies; and how ancient civilizations often caused irreparable collapses of their ecosystem. We will conclude by examining modern climate change, and the impact that recent changes have had on resources in different ecosystems, as well as on the sustainability of local indigenous societies and nation states. NOTE: Students cannot receive credit for this course if they have successfully completed GUS 0814.

Course Attributes: GB, SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ANTH 0815. Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: ANTH 0915, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815/0915, English 0815, Italian 0815, PSY 0815, Russian 0815, or Spanish 0815.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ANTH 0817. Youth Cultures. 3 Credit Hours.

Do you listen to hip hop, spend all your time in Second Life, dress up like a cartoon character and go to anime fairs, or go skateboarding every day with your friends? Then you're part of the phenomenon called youth culture. Often related to gender, race, class and socio-economic circumstances, youth cultures enable young people to try on identities as they work their way to a clearer sense of self. Empowered by new technology tools and with the luxury of infinite virtual space, young people today can explore identities in ways not available to previous generations. Students in this class will investigate several youth cultures, looking closely at what it means to belong. They will also come to appreciate how the media and marketing construct youth identities and define youth cultures around the world. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed ASST 0817, EDUC 0817/0917 or SOC 0817.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ANTH 0825. Quantitative Methods in the Social Sciences. 4 Credit Hours.

Psychological, political, social, and economic arguments and knowledge frequently depend on the use of numerical data. A psychologist might hypothesize that I.Q. is attributable to environmental or genetic factors; a politician might claim that hand gun control legislation will reduce crime; a sociologist might assert that social mobility is more limited in the United States than in other countries, and an economist might declare that globalization lowers the incomes of U.S. workers. How can we evaluate these arguments? Using examples from psychology, sociology, political science, and economics, students will examine how social science methods and statistics help us understand the social world. The goal is to become critical consumers of quantitative material that appears in scholarship, the media, and everyday life. NOTE: This course fulfills the Quantitative Literacy (GQ) requirement for students under GenEd and a Quantitative Reasoning (QA or QB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed SOC 0825, SOC 0925, POLS 0825, POLS 0925, or PSY 0825.

Course Attributes: GQ

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0701, MATH 0702, 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

ANTH 0829. The History & Significance of Race in America. 3 Credit Hours.

Why were relations between Native Americans and whites violent almost from the beginning of European settlement? How could slavery thrive in a society founded on the principle that "all men are created equal"? How comparable were the experiences of Irish, Jewish, and Italian immigrants, and why did people in the early 20th century think of them as separate "races"? What were the causes and consequences of Japanese Americans' internment in military camps during World War II? Are today's Mexican immigrants unique, or do they have something in common with earlier immigrants? Using a variety of written sources and outstanding documentaries, this course examines the racial diversity of America and its enduring consequences. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: African American Studies 0829, Africology and African American Studies 0829, Anthropology 0829, Geography and Urban Studies 0829, History 0829, Political Science 0829/0929, Sociology 0829, 0929, 1376, 1396, R059, or X059.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

ANTH 0831. Immigration and the American Dream. 3 Credit Hours.

As a Temple student, you go to school and live in a city full of immigrants. Perhaps your own relatives were immigrants to the United States. But have you ever listened to their stories? With an historical and sociological framework as a basis, we will take an in-depth and more personal look at the immigrant experience as expressed through the immigrants' own voices in literature and film. Topics explored include: assimilation, cultural identity and Americanization, exploitation and the American Dream, ethnic communities, gender, discrimination and stereotyping. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: CRIT 0831, History 0831, Italian 0831/0931, Russian 0831, SOC 0831, or SPAN 0831/0931.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

ANTH 0833. Race & Poverty in the Americas. 3 Credit Hours.

The transatlantic slave trade was one of the most brutal and momentous experiences in human history. Attitudes toward Latino, Caribbean, African, and Asian immigrants in the United States today can only be fully understood in the contexts of slavery and the "structural racism," "symbolic violence" (not to mention outright physical violence), and social inequalities that slavery has spawned throughout the region. Although focusing primarily on the United States, we will also study the present entanglements of poverty and race in Brazil, Haiti, and other selected nations of "The New World," placing the U.S. (and Philadelphia in particular) experience in this historical context. NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed LAS 0833/0933, REL 0833/0933, or SOC 0833.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

ANTH 0834. Representing Race. 3 Credit Hours.

From classical Greeks and Romans, who saw themselves under siege by the "barbarian hordes," to contemporary America and its war on "Islamic extremism," from "The Birth of a Nation" to "Alien Nation," Western societies have repeatedly represented some group of people as threats to civilization. This course will examine a wide range of representations of non-Western people and cultures in film, literature, scientific and legal writings, popular culture and artistic expression. What is behind this impulse to divide the world into "us" and "them"? How is it bound up with our understanding of race and racial difference? And what happens when the "barbarian hordes" talk back? NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed African American Studies 0834, Africology & African American Studies 0834, Anthropology 0934, Asian Studies 0834, English 0834/0934, or History 0834.

Course Attributes: GD, SI

Repeatability: This course may not be repeated for additional credits.

ANTH 0856. Evolution of Culture. 3 Credit Hours.

The roots of many contemporary cultures around the globe reach deep into human history. This course examines the evolution of these cultures through the use of paleoanthropological and archaeological data ranging from 2.5 million years ago through the beginnings of written history. Topics include the initial emergence and development of culture, the growth and expansion of human populations, the origins and dispersals of food production (particularly agriculture) and the rise and collapse of early civilizations. In addition we will examine the persistence of hunter-gatherers and other small-scale societies into the 19th and 20th centuries using ethnological data as well as the lessons to be learned from the successes and failures of early civilizations for predicting the future of the modern world. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ANTH 0867. World Regions and Cultures: Diversity and Interconnections. 3 Credit Hours.

What is globalization? Are we now all citizens of a global capitalist economic and truly international political order? Or do we still live mostly under the economic constraints and governmental policies of the nation states of which we are citizens? How do different regions of the world experience and negotiate cultural continuity and change in different ways due to their distinctive historical and political-economic experiences? Focusing on different regions of the world, we will investigate how cultures and societies are connected to each other, how they relate to each other, and how they compare or contrast with each other. In particular, we will examine topics such as economic development, urbanization, immigration, labor, neoliberalism, citizenship, religion, gender, democracy and human rights. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Duplicate Credit Warning: Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Anthropology 0867, 1061, C061, Geography and Urban Studies 0867, or Sociology 0867.

Course Attributes: GG, SF

Repeatability: This course may not be repeated for additional credits.

ANTH 0915. Honors Language in Society. 3 Credit Hours.

How did language come about? How many languages are there in the world? How do people co-exist in countries where there are two or more languages? How do babies develop language? Should all immigrants take a language test when applying for citizenship? Should English become an official language of the United States? In this course we will address these and many other questions, taking linguistic facts as a point of departure and considering their implications for our society. Through discussions and hands-on projects, students will learn how to collect, analyze, and interpret language data and how to make informed decisions about language and education policies as voters and community members. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Anthropology 0815, Asian Studies 0815, Chinese 0815, CSCD 0815, EDUC 0815/0915, English 0815, Italian 0815, PSY 0815, Russian 0815, or Spanish 0815.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO

Repeatability: This course may not be repeated for additional credits.

ANTH 0934. Honors Representing Race. 3 Credit Hours.

From classical Greeks and Romans, who saw themselves under siege by the "barbarian hordes," to contemporary America and its war on "Islamic extremism," from "The Birth of a Nation" to "Alien Nation," Western societies have repeatedly represented some group of people as threats to civilization. This course will examine a wide range of representations of non-Western people and cultures in film, literature, scientific and legal writings, popular culture and artistic expression. What is behind this impulse to divide the world into "us" and "them"? How is it bound up with our understanding of race and racial difference? And what happens when the "barbarian hordes" talk back? NOTE: This course fulfills the Race & Diversity (GD) requirement for students under GenEd and Studies in Race (RS) for students under Core. Students cannot receive credit for this course if they have successfully completed African American Studies 0834, Africology & African American Studies 0834, Anthropology 0834, Asian Studies 0834, English 0834/0934, or History 0834.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO, SI

Repeatability: This course may not be repeated for additional credits.

ANTH 1009. Discovering Anthropology. 1 Credit Hour.

This course is designed to allow students to explore Anthropology as a possible major and/or career path. It introduces the field of Anthropology in general and, subsequently, the sub-fields of the discipline (Sociocultural Anthropology, Linguistics, Biological Anthropology, Archaeology), and the specialized tracks that exist within the department (Human Biology and Visual Anthropology) in addition to the general anthropology major. Career paths and opportunities will be discussed and students will develop hypothetical course plans for a B.A. in Anthropology and subsequent career plans in conjunction with the faculty member/advisor in charge of the course. Students will sample departmental functions, may sit in on a class of a selected course, participate in a field trip, or attend a relevant lecture or public presentation at area museums or professional gatherings.

Repeatability: This course may not be repeated for additional credits.

ANTH 1055. Introduction to Physical Anthropology. 4 Credit Hours.

An anthropological perspective of scientific knowledge about humans as physical systems, will be used to assess a variety of issues in human biology related to vital current or future student interests and concerns. The purpose is to alert you to these important issues and to provide you with a sufficient background in the basics of human biology and methods of scientific inquiry that will enable you to understand the causes for their occurrence and to be able to apply this knowledge for your own benefit. NOTE: (1) This course cannot be taken to satisfy any of the requirements for majors in the Human Biology Track. (2) This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

ANTH 1061. Cultures of the World. 3 Credit Hours.

An introductory survey of various cultures from different regions of the world. Ethnographic case studies will be compared to show diversity and continuity in human lifestyles. A major emphasis will be placed on the impact of transglobal economic, political, and sociocultural change in the 20th century. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

ANTH 1062. Introduction to Anthropology. 3 Credit Hours.

This introductory Anthropology course is designed to introduce students to important scholarly and practical concepts in the study of race and racism historically and across cultures. It builds upon the important contributions of four-field anthropological practice to our understanding of the ways societies have constructed racial categories and meanings and deployed racialized hierarchies. Students will be asked to read a variety of basic materials in linguistics, biological anthropology, ethnology, and archaeology. This will be supplemented with student efforts to analyze popular representations of race to acquire a familiarity with the important debates in contemporary social science and politics. NOTE: This course can be used to satisfy the university Core Studies in Race and Individual & Society (RN) requirements. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: RN

Repeatability: This course may not be repeated for additional credits.

ANTH 1064. American Culture. 3 Credit Hours.

This course will introduce students to an anthropological perspective on the changing character and complexity of American culture. We will examine the key symbols and core values of American society and how these are differentially understood and encountered in everyday life by diverse peoples in the United States. Topics include the experience of race, ethnicity, and gender in various local settings and how these categories intersect with economic, political, and historic forces. The course will examine the role of patriotism, migration, and social class in shaping the life worlds of Americans. We will ask, how are ideas about race made and unmade? Why is it often so difficult to speak of social class? What influences does "American culture" have and how is it shaped by material and symbolic practices beyond the borders of the United States? NOTE: This course can be used to satisfy the university Core American Culture (AC) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AC

Repeatability: This course may not be repeated for additional credits.

ANTH 1065. Origins of Cultural Diversity. 3 Credit Hours.

Many non-U.S. cultures have long, distinguished histories which can be traced ultimately to a common origin. This course examines the evolution of these cultures through the use of archaeological and paleoanthropological data, which ranges from four million years ago to the time of recorded history. Topics include the emergence of culture, the spread of human populations throughout the world, the origins of agriculture, and the rise of cities, states, and civilizations. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

ANTH 1074. Anthropology through Film. 3 Credit Hours.

An introductory survey course employing the medium of ethnographic film to address the diverse issues that anthropologists engage with. Through watching and analyzing films on issues as varied as Azande witchcraft, Trobriand cricket, and Balinese water-temples, students will gain understanding not only of the issues that anthropologists study, but also of anthropological film and filmmaking. The course is organized as a film presentation followed by discussion of the film based upon critical understanding of the film combined with the reading material for that aspect of the course.

Repeatability: This course may not be repeated for additional credits.

ANTH 1079. Anthropology of Food. 3 Credit Hours.

This class will examine the interrelationship of biological, cultural, and historical influences on what we eat and how we eat it. Topics will link biological, ecological, social and symbolic cultural perspectives and examine the dietary implications of foraging, crop domestication, state formation and industrial capitalism. We will look at the sociocultural practices relating to the uses of food in marking social differences, maintaining social relationships, and dealing with cultural constructions of health, illness, and the body. Throughout the class we will examine the impact of globalization on the transformation of food meanings, practices and availability.

Repeatability: This course may not be repeated for additional credits.

ANTH 1261. Cultures of the World. 1 Credit Hour.

A companion course to Anthropology 1061 (C061) for first-term freshmen. This course provides guidance with the assignments of the core course. Emphasis is on reading, listening, speaking, and writing within the context of the core course. Assistance is also given in the continued development of English-language skills, especially academic reading and the acquisition of a general academic vocabulary. NOTE: Offered at Temple University Japan only.

Repeatability: This course may not be repeated for additional credits.

ANTH 1262. Introduction to Anthropology. 1 Credit Hour.

A companion course to Anthropology 1062 (R060) for first-term freshmen. This course provides guidance with the assignments of the core course. Emphasis is on reading, listening, speaking, and writing within the context of the core course. Assistance is also given in the continued development of English-language skills, especially academic reading and the acquisition of a general academic vocabulary. NOTE: Offered at Temple University Japan only.

Repeatability: This course may not be repeated for additional credits.

ANTH 1961. Honors Cultures of the World. 3 Credit Hours.

An introductory survey of various cultures from different regions of the world. Ethnographic case studies will be compared to show diversity and continuity in human life styles. A major emphasis will be placed on the impact of transglobal economic, political, and sociocultural change in the 20th century. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, IS

Repeatability: This course may not be repeated for additional credits.

ANTH 2001. Evolution and Human Environments. 3 Credit Hours.

This course traces the story of humans beginning with the fossil evidence for human ancestors and the earliest evidence for cultural behavior, through the spread and adaptation of human populations to almost all parts of the world. We will consider how ancient societies adapted to their environments, and reasons that cultures changed and became more complex over time. We will review the evidence for significant past environmental changes caused by people living in simple societies; and how ancient civilizations often caused irreparable collapses of their ecosystem. We will conclude by examining modern climate change, and the impact that recent changes have had on human societies living in different ecosystems, as well as on the sustainability of local indigenous societies and nation states.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

ANTH 2002. Mobility and Global Inequality. 3 Credit Hours.

Mobility and inequality are fundamental realities of human life that underlie myriad social processes and institutions. Examining them raises a variety of anthropological questions both old and new: How do people negotiate unevenly distributed resources? Why do people move to new places? As people move, what is lost and what is retained? What effects will large-scale human migration have on prevailing political and economic systems? Is radical social change possible under capitalism? This course considers mobility and inequality as grounded, embodied processes and experiences in order to introduce students to a range of foundational concepts, questions, and problems in anthropology.

Repeatability: This course may not be repeated for additional credits.

ANTH 2022. Museums and American Culture. 3 Credit Hours.

The museum holds itself to the preserver of cultural memory, yet museums as we know them are a 19th century invention. Their function as shapers of cultural practice and national identity will be explored through this course, which takes us up to the present, when museums have reached out to represent communities that were previously excluded from the elite culture of museums. How museums work as classifiers of knowledge, how they represent culture, as commodity and experience, will also form part of the course. Cross-Listed with AMST 2022. Students may only receive credit for one of the following course numbers: ANTH 2022 or AMST 2022.

Repeatability: This course may not be repeated for additional credits.

ANTH 2087. Practicum in Curation and Collections Management. 1 Credit Hour.

This is an applied course emphasizing acquisition of practical skills in curation and collections management. Students enrolled will participate in a variety of projects (i.e. cataloging archaeological collections, developing digital collections, artifact photography and documentation, developing new exhibits) related to the long-term care and preservation of ethnographic and archaeological collections housed in the Anthropology Laboratory. Because the specific skillsets learned will vary by project and semester, students may enroll in the course more than once.

Repeatability: This course may be repeated for additional credit.

ANTH 2098. The Legacy of Mesoamerica. 3 Credit Hours.

The course briefly reviews the nature of Prehispanic Mexico and Central America by examining its earliest manifestations in the Pre-Classic Period through the Late Post-Classic Period, right before European contact. Cultures examined will include the Maya, Nahua, Tarascan, and Mixtec among others. We will then study the Spanish Conquest of the region and how the indigenous peoples adapted to Spanish rule during the Colonial period. Following independence from Spain, indigenous peoples of Mesoamerica dealt with a new sort of adaptation. Specifically, that of integration into the new nation-states of Mexico and Guatemala will be examined. Modern Mesoamerica will also be discussed, particularly in terms of how the indigenous peoples have adapted to a new "globalized" world.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ANTH 2102. Frauds, Myths, and Pseudoscience in Archaeology. 3 Credit Hours.

This course critically examines pseudoscience, cult archaeology, and creationism from a scientific perspective. We will consider how a strong adherence to scientific investigation can uncover facts about prehistory that are as interesting as the myths, but we will also discuss the appeal and root causes of these myths about human history. We will focus on why it is important to separate pseudoscience from science, and the very different and often complementary roles that are served by faith and evidence. We will specifically address questions about evolution vs. creationism in a cross-cultural context, the archaeology of climate change and climate change skepticism, and how archaeology is sometimes used by nationalist movements to misrepresent the past in the service of controlling narratives in the present.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ANTH 2104. Introduction to Archaeology. 3 Credit Hours.

An introduction to the theories and methods used in archaeological anthropology and the ways in which questions about life in the past are framed and investigated. Topics include the nature of archaeological evidence, the importance of context, excavation techniques, analysis of material remains, and reconstruction of ancient cultural patterns. (Formerly known as "Fundamentals of Archaeology." Students will not receive additional credits for taking this course under the new title.)

Repeatability: This course may not be repeated for additional credits.

ANTH 2169. South American Archaeology. 3 Credit Hours.

A survey of prehistoric cultures of South America. Concentrates on (1) the initial entry and spread of human populations into South America and the West Indies, (2) origins of tropical and highland agriculture, (3) the rise of urbanism, civilization, and the state in the Andes, and (4) the impact of prehistoric cultures on the environment.

Repeatability: This course may not be repeated for additional credits.

ANTH 2172. Archaeology of North America. 3 Credit Hours.

This course surveys the cultural development of native peoples from the time of the initial colonization of North America to the historic period and the arrival of European explorers and settlers. Coverage is organized by cultural/geographic regions, or areas, and chronological periods. Common and contrasting themes in cultural development are stressed. The course develops an appreciation of: the debates and data surrounding the initial colonization of North America; the cultural diversity and complexity evident in Native American cultures across space and through time; the interaction of Native cultures with different and changing environments, and the impact that each had on the other; the range of environmental, social, and cultural issues capable of being addressed with archaeological data.

Repeatability: This course may not be repeated for additional credits.

ANTH 2173. Ancient Mesoamerica. 3 Credit Hours.

Ancient Mesoamerica is a general survey of the pre-Columbian cultures of Mexico and Middle America before the Spanish Conquest of the Aztec Empire in A.D. 1521. In this course we will examine the long history of Mesoamerica beginning with the first peopling of the Americas at least 15,000 years ago and ending with the Spanish Conquest and the creation of "Latin America."

Repeatability: This course may not be repeated for additional credits.

ANTH 2227. Popular Culture in Modern Italy. 3 Credit Hours.

The course explores popular culture in Italy, starting from the Italian historical awareness of popular culture that emerged in the 19th century foundation of the nation up to the present day. The course focuses especially on popular culture in the 20th century using a variety of approaches, from lectures to readings, from the screening of video material to the study of audio recordings. By the end of the course, students will have attained a significant understanding of the variety of popular culture in modern Italy and will have mastered an analytical framework for understanding these phenomena. The course carries up to contemporary times with an exploration of the impact global trends have had on popular culture, making particular reference to contemporary popular music.

Repeatability: This course may not be repeated for additional credits.

ANTH 2238. Visual Anthropology of Modern Japan. 3 Credit Hours.

An anthropological approach to systems of visual communication that are central to understanding Japanese society and culture. Visual sign systems of everyday life such as writing, food, and clothes plus visual aspects of popular culture such as comic books and ads. Ethnographic films, feature films, and network TV programs plus field trips to Japanese cultural sites. Duplicate credit warning: This course is regularly cross-listed with ASST 2238. Students may receive credit for only one course, either ASST 2238 or ANTH 2238.

Repeatability: This course may not be repeated for additional credits.

ANTH 2305. Introduction to Cultural Anthropology. 3 Credit Hours.

An introduction to the basic concepts, methods, and theories of cultural anthropology. Through a variety of case studies from different parts of the world, the course will focus on the connections between culture, power, and representation. Emphasis will be placed on analyzing the process of ethnographic fieldwork and producing ethnographic texts. (Formerly known as ANTH 2396 Fundamentals of Cultural Anthropology; students who earned credits under the original title will not receive additional credits for this course.)

Repeatability: This course may not be repeated for additional credits.

ANTH 2310. Topics in Cultural Anthropology. 3 Credit Hours.

Varies each semester. Contact instructor for more information.

Repeatability: This course may be repeated for additional credit.

ANTH 2319. Anthropology of Food. 3 Credit Hours.

This class will examine the interrelationship of biological, cultural, and historical influences on what we eat and how we eat it. Topics will link biological, ecological, social and symbolic cultural perspectives and examine the dietary implications of foraging, crop domestication, state formation and industrial capitalism. We will look at the sociocultural practices relating to the uses of food in marking social differences, maintaining social relationships, and dealing with cultural constructions of health, illness, and the body. Throughout the class we will examine the impact of globalization on the transformation of food meanings, practices and availability.

Repeatability: This course may not be repeated for additional credits.

ANTH 2322. Outlaws, Law and Culture. 3 Credit Hours.

This class conceptualizes law from an anthropological and sociological perspective. The course acquaints students with key concepts in the anthropology of law and develops an introduction to theories that continue to guide an ethnographic approach to formal and informal dispute processes. We will learn what qualitative research methods can reveal about why and when people do or do not conform to law. In lectures, discussions, readings, and films, we will explore the critical and complex relationships between culture and law, crime, policing, and punishment. The course provides students with examples of field research in a variety of legal, illegal, and extralegal arenas in our own and in other societies.

Repeatability: This course may not be repeated for additional credits.

ANTH 2332. Medical Anthropology. 3 Credit Hours.

This course explores both biocultural and sociocultural approaches within the rapidly expanding interdisciplinary anthropological field of critical medical anthropology (CMA). Topics addressed include evolutionary approaches to understanding health and disease (including diet and nutrition), as well as sociocultural CMA approaches to such topics as ethnomedicine, medicine and social control, international health development, medical pluralism, science and technology studies, and the anthropology of the body.

Repeatability: This course may not be repeated for additional credits.

ANTH 2358. Anthropology of American Culture. 3 Credit Hours.

This course may serve as a starting point for undergraduate majors in Visual Anthropology. We will question the idea that American culture is best characterized as a variety of many immigrant cultures; specific institutions have produced a shared conception of the American Dream and how fault lines based on race, ethnicity, gender, and generation have come to be "made in America." Emphasis will be given to the contrast between the ways in which American popular culture is represented through media and the way in which ethnographic studies present insights into the ways in which Americans live. Special emphasis will be given to the ways in which fault lines between groups have been socially and culturally constructed and transcended over time and the role that overarching institutions like schools, public policies and media representations play in producing both the diversity and homogeneity of American culture. NOTE: Course is appropriate for students in American Studies, Media Studies, Sociology and Education.

Repeatability: This course may not be repeated for additional credits.

ANTH 2361. Peoples of Latin America. 3 Credit Hours.

Starting in 1492, Native American isolation from Europe and Africa ended in the region of the Americas that became Latin America. Despite five hundred years of colonial and nation-state domination, indigenous peoples in Latin America continue to assert their basic human right to resist cultural hegemony. Not only have indigenous populations survived, they are also growing. Today they constitute a majority in Bolivia, Ecuador, Guatemala, and Peru and a substantial plurality in Brazil, Mexico, and Colombia. The focus here is on this remarkable struggle for physical and cultural survival. Attention will be given to the lived experiences of people struggling for human dignity on the lowest strata of regional class structures. Issues of land rights, environmental, health, political, and economic self-determination will be examined.

Repeatability: This course may not be repeated for additional credits.

ANTH 2362. Peoples and Cultures of the Caribbean. 3 Credit Hours.

Shaped by conquest and colonial transnational desires, first of sugar and then of tourism, the Caribbean has been wrought since its very inception by the displacement of people, goods and ideas from Africa, Asia, Europe, and Latin America, presenting a challenge for the anthropological study of socio-cultural change through time and space. In this introductory course on the Caribbean we will critically examine "creolization" processes at social, religious, political, economic, and artistic levels as they were driven by various groups, from pirates, privateers, maroons, exiles, to tourists, in the context of colonialism, nation building, and globalization. Examining specific sites such as music, display events, folklore, and religion we will ponder about, for instance, the effects of European revolutions on the creation of elites in the Caribbean, and the impact of slave cultures and peasantries on the formation of creole religions. How has the image of the sensuous/threatening mulatta evolved since the plantation? On what kind of histories and emotions do "zombies" feed upon? Why did Reggae and Merenge succeed on the global stage? How does the display of national icons in Trinidadian carnival reflect on their socio-political conflicts? How is the colonial past re-packaged for global consumption?

Repeatability: This course may not be repeated for additional credits.

ANTH 2364. People and Cultures of the Middle East and North Africa. 3 Credit Hours.

This course examines the major aspects of social life in the Middle East and North Africa from an anthropological perspective. Selected topics to be investigated include: kinship, social stratification, urbanization, colonialism, nationalism, migration, the state, violence, gender, sexuality, religious practice, popular culture, and neoliberalism. Emphasis will be placed on understanding the connections between cultural practices and political, economic, and social power. (Formerly titled as "People and Culture of the Middle East"; students may not earn additional credit under the new title.)

Repeatability: This course may not be repeated for additional credits.

ANTH 2366. Urban America: An Anthropological Perspective. 3 Credit Hours.

This course offers both an introduction to the dominant questions in urban Anthropology and provides an opportunity to do fieldwork in the city, to explore how anthropologists do urban work. The purpose of this course is to connect students' field experiences with ideas and readings from the academic perspective of anthropology. Students will write a final paper for the course in which they incorporate material from the academic readings, their own field notes and any other relevant sources (agency reports, news articles, etc.).

Repeatability: This course may not be repeated for additional credits.

ANTH 2367. Peoples of South Asia. 3 Credit Hours.

An introduction to the peoples and cultures of the Indian subcontinent. The course will focus on the indigenous religions of India: Hinduism, Jainism, and Buddhism as well as Islam, Christianity, and Zoroastrianism as brought to western India by migrants. Note: This course is cross-listed with Asian Studies 2367. Students may only receive credit once for these courses: ASST 2367 or ANTH 2367.

Repeatability: This course may not be repeated for additional credits.

ANTH 2368. Peoples of the Pacific. 3 Credit Hours.

This is an upper level undergraduate course designed to engage students in studying the indigenous cultures of Australia, Melanesia, Polynesia, and Micronesia. There will be two primary emphases: first, the major issues in cultural anthropology that have been formed and informed by ethnographic data from Pacific societies; and second, the processes of change experienced by Pacific peoples in the last few decades. Specific topics include: (1) How the complexity of kin-based social organization among Australian aborigines influenced anthropological understanding of relationships among individuals and the formation of communities; (2) How and why the traditional sacred art of aboriginal Australia became a valued commodity in the global art market; (3) How the complex ceremonial exchange networks of Melanesia influenced theory in anthropology; (4) The dimensions and range of Melanesian ideas and behavior concerned with gender and sexuality; (5) How class stratification and political hierarchy developed in traditional Polynesian states such as Tahiti, Tonga, and Hawai'i; and (6) How colonialism and post-colonialism has been experienced across the Pacific. The course will be conducted as a seminar with some lectures by the instructor but with proportionately more discussions based on a core of shared readings and students' shared and individual explorations of Pacific cultures.

Repeatability: This course may not be repeated for additional credits.

ANTH 2373. Japanese Culture. 3 Credit Hours.

Introduction to traditional and contemporary Japanese culture. Topics covered include: early literature, aesthetic principles as expressed in art and architecture, religion, gender roles, Japan's shifting relationships with the outside world, rural communities and urban centers in the 20th century, and the construction of the self in modern Japan. Note: This course is equivalent to Asian Studies 2373. Students will only receive credit for one of these courses: ANTH 2373, ASST 2373.

Repeatability: This course may not be repeated for additional credits.

ANTH 2374. The Anthropology of Modern China. 3 Credit Hours.

This course offers an introduction to the culture and society of the contemporary People's Republic of China. The first half of the course provides a historically and ethnographically contextualized examination of the dramatic transformations undergone by Chinese society over the last century, juxtaposing the pre-1949 Republican period against the tumultuous sociocultural and political economic changes in China in the decades immediately following the 1949 Chinese Communist Revolution, and, in particular, examining the impact of Maoist period and post-Mao period political-economic and sociocultural movements on the everyday lives of Chinese people in both rural and urban contexts. During the second half of the course, we will focus on recent ethnographic writings published by China anthropologists which, taken together, encompass such key issues as the contours of China's distinctive narrative of socialist modernity, the profound significance of the rural/ urban divide in the post-1949 PRC; shifting PRC constructions of gender and sexuality and the impact of Maoist and post-Mao transformations on women's status, the statuses and representations of the more than 55 minority peoples who reside in China alongside Han Chinese and the emergence of ethnic tourism, the politics of rural health care, the nature of the relationship between Traditional Chinese Medicine and biomedicine, and the politics of HIV/ AIDS in the PRC. We will also utilize a number of excellent ethnographic films throughout the course.

Repeatability: This course may not be repeated for additional credits.

ANTH 2408. Introduction to Visual Anthropology. 3 Credit Hours.

A survey of theoretical approaches to an anthropological understanding of visual/pictorial communication. Among the topics explored: theories of culture and communication, models of both social and visual communication, perception, cross-cultural aesthetics, non-verbal communication as well as photography, film, and mass media. Emphasis will be placed on the value of constructing ethnographies of visual/pictorial communication. This course has been designed for anthropology majors specializing in the studies of visual communication, but it is also useful for Sociology, FMA, and Mass Communication majors. Course consists of required readings, screenings, and active class participation. No exams. Students keep a journal and write several short papers. Formerly known as "Fundamentals of the Anthropology of Visual Communication." Students who earned credits under the original title will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ANTH 2409. Introduction to the Production of Anthropological Media. 3 Credit Hours.

Formerly known as Introduction to Visual Production. Students who have completed Introduction to Visual Production will not receive additional credit for taking Introduction to the Production of Anthropological Media.

As the decreasing cost and increasing accessibility to visual technologies, such as DSLR cameras and video cameras, makes their inclusion in research projects a given rather than a rarity, the importance of training in their use increases proportionately. Through a series of lectures and practical exercises, students will gain skills in the uses and techniques of several important visual technologies, such as photography, videography (shooting footage), and video editing. Further, this course will contextualize these techniques within qualitative research (e.g. documentary filmmaking) more generally and anthropological and ethnographic research (e.g. participant-observation) more specifically. As the ethical and disciplinary demands of anthropology necessitate specific aesthetic and technical implementations by the visual anthropologist, the latter aspect is a crucial part of the course and will be of significant benefit to students wishing to conduct ethnographic research integrating visual methods and technologies.

Repeatability: This course may not be repeated for additional credits.

ANTH 2432. Indigenous Media. 3 Credit Hours.

This course critically reviews the relationships between ethnographic film and indigenous forms of self-representation in diverse media. Visual texts from several societies will be compared with each other and with examples of visual representation in contemporary Western societies. In the course we will examine pictorial forms by viewing and analyzing films and video programs made by indigenous individuals and associations. Examples will come from North and South America, Australia, and New Zealand. Through these examples issues of authorship and authority, the politics of representation and autonomy, and the values and limits of indigenous self-representation will be analyzed.

Repeatability: This course may not be repeated for additional credits.

ANTH 2434. Anthropology of Feature Films. 3 Credit Hours.

Formerly known as Anthropology in Feature Films. Students who have completed Anthropology in Feature Films will not receive additional credit for taking Anthropology of Feature Films.

Students will critically review a series of feature films that include topics, themes, and subject matter often treated within anthropology. It is clear that American feature films usually thought of as "Hollywood films" can be very influential in establishing or reinforcing social and cultural stereotypes of "states of knowledge" about peoples living in various parts of the world. The potential for influence and false senses of familiarity is enormous. In today's globalized community that is influenced by feature films from all regions of the world, this course attempts to incorporate many expressions of the feature film genre to form a composite whole. Japanese, Indian, Indonesian and other national cinemas will be shared, as will the emergent films made by the Naliput peoples of the 4th world. Peoples who are frequently known as natives, aborigine, local, indigenous, primitive, underdeveloped and tribal, are now makers of feature films and bring new dynamism to the genre to foster new perspectives of culture and communication.

Repeatability: This course may not be repeated for additional credits.

ANTH 2501. Language, Power, & Identity. 3 Credit Hours.

This course focuses on recent research by leading scholars in linguistic anthropology, examining the crucial role of language in issues of power, representation, and identity. The primary goal is to cultivate critical thinking about the complex relationships among language, society, and culture.

Repeatability: This course may not be repeated for additional credits.

ANTH 2507. Language and Culture. 3 Credit Hours.

An introduction to linguistic anthropology, one of the four subdisciplines of American anthropology. This course takes an ethnographically informed approach to the relationships among language, culture, and society. It also examines the diversity of the world's 6,000+ languages as well as the enormously varied ways in which groups of people around the world use language and other communicative resources in their everyday lives. (This course was formerly entitled "Fundamentals of Linguistic Anthropology"; students who earned credit under the original title are not eligible to repeat it for additional credits.)

Repeatability: This course may not be repeated for additional credits.

ANTH 2522. Spanish Conquest of the Americas. 3 Credit Hours.

In 1492, Columbus sailed the ocean blue and ... either discovered or destroyed America, depending on your point of view. By 1542, Spain had claimed most of the Americas and Lopez de Gomara, the private secretary of Hernan Cortes, wrote, "The greatest event since the creation of the world." Later, in the 18th and 19th centuries, both Adam Smith and Karl Marx would make the same claim in their writings. From the very beginning, not only the magnitude but also the meaning of the Conquest of the Americas has been a point of controversy and acclaim. In this class, we will examine the Indigenous societies of the Americas and the Iberian Peninsula on the eve of their cataclysmic encounter, the processes by which the Spanish Conquistadors overran Indigenous territories, the ways in which each of these distinct societies impacted one another, and the hybrid societies that emerged on the other side. **DUPLICATE CREDIT WARNING:** Students can receive credit only once for either HIST 2522, ANTH 2522, or LAS 2522.

Repeatability: This course may not be repeated for additional credits.

ANTH 2525. Maya Language and Culture. 3 Credit Hours.

This course will introduce students to the language and cultures of the Maya area of Mesoamerica. Students will acquire basic conversational elements of one of the Maya languages, study Maya culture, including the indigenous literature of the area where applicable, and generally gain a deeper understanding of this diverse part of Latin America.

Repeatability: This course may not be repeated for additional credits.

ANTH 2535. Language, Thought, and Reality. 3 Credit Hours.

This course will examine the role of language in shaping thought and individuals' experiences of reality. We will build on linguistic anthropology, linguistics, and sociolinguistics in order to explore linguistic relativity and various interpretations of the "Sapir-Whorf Hypothesis." Does language shape our habits of thinking and affect our view of reality, our emotions, and our actions? This course will draw on studies of various regions and cultural contexts in order to examine the complex interactions between language, culture, and thought.

Repeatability: This course may not be repeated for additional credits.

ANTH 2536. Language in the City. 3 Credit Hours.

This course examines the linguistic and cultural diversity of contemporary global cities from ethnographic perspectives. Drawing on the work of anthropologists as well as sociologists, geographers, sociolinguists, and others, we consider such issues as immigration, transnationalism, assimilation, multiculturalism, and the politics of space and place in urban environments, in addition to such classic linguistic anthropological issues as bilingualism and multilingualism, language contact, language socialization, and language maintenance, shift, and revitalization. Seminar participants will conduct small-scale fieldwork in local settings. Note: Formerly known as ANTH 3536 Urban Dialects and ANTH 3536 Language in the City prior to Summer 2018. Students will not receive credit for both courses (ANTH 3536 or ANTH 2536).

Repeatability: This course may not be repeated for additional credits.

ANTH 2705. Introduction to Evolutionary Anthropology. 3 Credit Hours.

An introduction to evolutionary theory and its applications to understanding the biology of past and present human populations. Includes basic principles of inheritance and molecular genetics, the genetics of human groups, and genetic models used to explain human biological variability and change. Our place in nature is illustrated by comparison with our non-human primate relatives and a consideration of evolutionary changes in human lineage illustrated by the fossil record. Evolutionary aspects of human development and an evolutionary perspective on epidemiology are also covered. NOTE: Students should complete this course before enrolling in any other upper-level biological anthropology course. Formerly known as "Fundamentals of Biological Anthropology." Students who earned credits under the original title will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ANTH 2763. Anthropological Genetics. 3 Credit Hours.

This course is designed to acquaint the undergraduate major in Anthropology (especially those in the Human Biology specialization) with the fundamental concepts of population genetics with particular relevance to human genetics. Although the course, as indicated, has a particular emphasis on genetics, the influence of environmental effects will be especially appreciated in this course, as the impact of culture is so dramatic, even with respect to human genetic evolution. Formerly known as "Human Population Genetics". Students who earned credits under the original title will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ANTH 2764. Primate Behavior. 3 Credit Hours.

This course provides an overview of the social behavior of our closest living relatives, and presents principles and current thinking in the field of behavioral ecology. We review the great taxonomic diversity of living primates, their geographic distribution, general ecology, and conservation status. The course introduces the theoretical approaches used to interpret non-human primate life-ways and social behavior and considers the application of evolutionary theory to interpreting human behavior.

Repeatability: This course may not be repeated for additional credits.

ANTH 2765. Human Osteology. 4 Credit Hours.

This course, presented in lecture/lab format, is designed to train advanced undergraduates to identify all of the components of the human skeleton. Students will learn the uses of the human skeleton in physical anthropology and archaeology and, for those going on to clinical health programs, the course will provide a detailed understanding of the morphology and variation in the human skeleton that will be highly valuable in the gross and dental anatomy courses taught in clinical post-graduate programs. Also included are discussions of bone growth, kinesiology, individual reconstruction, forensic anthropology, and the use of regression analysis and discriminate functions. Some comparative (between-species) skeletal anatomy is also included.

Repeatability: This course may not be repeated for additional credits.

ANTH 2801. Grant Writing in the Social and Health Sciences. 3 Credit Hours.

How can undergraduate students generate funding to undertake interesting summer research? How can students learn to become Grant Writers for non-profit organizations? The key is to learn the art of Grantsmanship! Learning the components of a grant proposal, research methodology, and the peer-review process are the keys to success. Students will learn how to develop a research question, research hypotheses, the development of a literature review, and how to develop a research design and data analysis for their grant proposal. For those students interested in working for a non-profit organization, designing evaluation research will be emphasized. Overall, this course will provide students with the knowledge and skill to develop grant proposals for academia and the private sector.

Repeatability: This course may not be repeated for additional credits.

ANTH 2907. Honors Language and Culture. 3 Credit Hours.

Linguistic anthropology, one of the four subfields of anthropology, is the interdisciplinary study of the relationships among language, culture, and society. Linguistic anthropology shares many of its basic units of analysis, and some of its working concepts, with linguistics, especially the subfield of sociolinguistics. However, unlike most linguistic approaches, which are mainly concerned with language structure, linguistic anthropology is rooted in ethnography and is primarily concerned with how the everyday use of language structures, and is structured by, socio-cultural forces. In Fundamentals of Linguistic Anthropology, we will pose, and seek to answer, a variety of questions about language and its relationships to culture and society. Possible questions include: Why do children all over the world acquire their first languages at about the same rate and age? How do children learn to use language in culturally specific, culturally appropriate ways? Why do groups of people who apparently share "the same language" speak and use it very differently? Does the language that one speaks affect the ways in which one thinks and experiences the world? How and why does a particular language variety come to be regarded as the "standard" variety, while others are regarded as "non-standard"? How and why does language use relate to important social variables, such as ethnicity, class, gender, age, education, and religion? What is the relationship between language and power? Why and how does cross-cultural miscommunication occur and what are its consequences? Formerly known as Honors Fundamentals of Linguistic Anthropology; students who earned credit for the prior title may not repeat this course for credit.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ANTH 3170. Techniques in Archaeology. 3 Credit Hours.

A series of practical, topical courses that deal with aspects of archaeological fieldwork and laboratory analysis. The topic or focus of the course varies by semester and includes: field methods; pottery analysis; lithic analysis; sediments, soils and stratigraphy. Because the topic changes by semester, students may take Anthropology 3170 more than once.

Repeatability: This course may be repeated for additional credit.

ANTH 3171. Comparative Early Civilizations. 3 Credit Hours.

This comparative analysis of the rise of early civilizations uses archaeological and historical information to examine the development of ancient societies. It focuses on problems of the Neolithic revolution, the autochthonous transformation of kin-based communities into stratified societies and the subsequent formation and development of early class-based societies/states.

Repeatability: This course may not be repeated for additional credits.

ANTH 3172. Seminar in Northeastern Prehistory. 3 Credit Hours.

The archaeology and prehistory of the native peoples of the Middle Atlantic Region are examined in detail, and in the broader context of cultural developments in the Northeast and Eastern Woodlands of the United States. Although the seminar employs cultural historical periods as a way to present information, cultural diversity across time and space are emphasized. Basic descriptive data dealing with prehistoric cultures are presented, as well as the variety of interpretations of native lifeways upon which they are based. Included in the course is information derived from cultural resource management studies, the results of which are infrequently published.

Repeatability: This course may not be repeated for additional credits.

ANTH 3175. Heritage Management in Archaeology. 3 Credit Hours.

The United States and other governments of the world have legal mandates to manage cultural resources on behalf of the public. This course focuses on the archaeological component of cultural resources management in the United States and its linkage with environmental and developmental planning. Participants are given a working knowledge of how the system works, and how to work within it as a professional through a series of readings, classroom discussions, and hands-on exercises. Topic coverage includes: relevant legislation; the phased approach to archaeological and historical research; state and federal review procedures; proposal writing; interacting with clients, native peoples, and the public; professional ethics and standards. The nature of heritage management in other countries is considered for comparative purposes and as a way of illuminating the historical, socio-economic, and legal factors that have shaped the practice in the United States. NOTE: This course helps to satisfy topical requirements in the Anthropology major and the Environmental Studies major.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ANTH 3177. Approaches to Historical Sites in Archaeology. 3 Credit Hours.

Students examine the central questions, values, and goals of historical archaeology, gaining a working knowledge of its basic concepts and methods. A material culture approach is used as archaeological objects are presented in sites where they express a series of concepts related to our understanding of status, wealth, self identity, consumerism, and symbolism. A holistic framework is used to present material evidence together with documentary, oral, and other data. A variety of sites will be examined in order to introduce many important subfields of historical archaeology such as battlefield archaeology, urban archaeology, industrial archaeology, and underwater archaeology. The course will also demonstrate how such evidence illuminates the modern world and its relevance to our own time and place.

Repeatability: This course may not be repeated for additional credits.

ANTH 3180. Topics in Archaeology. 3 Credit Hours.

A variable topic course that highlights the specialized interests and research of faculty and current trends in archaeological analysis, interpretation, and theory. Some examples of anticipated topics include: Northeastern Native American Prehistory, Origins of Food Production, Battlefield Archaeology, and the Archaeology of Philadelphia.

Repeatability: This course may be repeated for additional credit.

ANTH 3189. Field Session in Archaeology. 3 Credit Hours.

Techniques and concepts of field archaeology. Students will be expected to spend the greatest part of the session in the field during the excavation of prehistoric and historic sites. During summer sessions this course is taught in conjunction with Methods in Archaeology (Anthropology 3170).

Repeatability: This course may be repeated for additional credit.

ANTH 3196. Methods in Environmental Archaeology. 3 Credit Hours.

This course introduces the student to the techniques and disciplines used in conjunction with archaeology to understand the environmental context and paleo-ecology of prehistoric cultures, as well as the nature of the archaeological record itself. Included in this survey are geology, soil and sediment analysis, geomorphology, palynology, ethnobotany and general floral analysis, phytolith analysis, zooarchaeology, and the analysis of blood and other residues found on artifacts. The range of contributions possible from interdisciplinary research will be explored in addition to how to design such research, how to communicate with specialists in other fields, and how to use existing sources of data to solve archaeological problems.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ANTH 3301. History of Anthropological Theory. 3 Credit Hours.

This course historicizes, contextualizes, and explores the major theoretical schools in anthropology from the mid-19th century up through the present, including social evolutionism, historical particularism, structural-functionalism, cultural materialism, structuralism, symbolic anthropology, political-economy approaches, postcolonial critiques, feminist critiques, the crisis in ethnographic representation, and poststructuralist approaches.

Repeatability: This course may not be repeated for additional credits.

ANTH 3321. Folklore and Culture. 3 Credit Hours.

Far from being hidden or "dying," folklore thrives in public and private spheres both in everyday life and in extraordinary situations. It is invoked in nationalist and post-colonialist practices and, lately, also in global cultural productions. This course will explore the cultural attributes and functionings of folklore in its own terms and as a part of anthropology in various spaces, times, and groups. We will begin with a brief theoretical discussion on the connection between folklore, nationalism, and ethnic and regional identity, as well as popular and mass culture. Placing special emphasis on the emergent, unofficial aspects of vernacular culture, we will then examine how different groups communicate and construct their identity through folk narratives, proverbs, and jokes; folk art; spontaneous memorials; displays of the body, yards; the exchange of food; and the performance of music and dance during festivals, parades, and processions. In light of the currency of "tradition" and "heritage" in the public sphere - in school curricula, state sponsored programs, advertisement and museums - we will also look critically at the production of culture in the context of multiculturalism and identity politics, and the often ambiguous relation established between dominant or elite cultures and unofficial, vernacular cultures. Class discussions will be conducted in a seminar style and complimented with audio-visual materials. Short research exercises will provide students with first hand experiences with the cultural-anthropologist's craft of documenting and analyzing current folklore materials.

Repeatability: This course may not be repeated for additional credits.

ANTH 3322. Anthropology of the Global Economy. 3 Credit Hours.

Formerly known as Economic Anthropology. Students who have completed Economic Anthropology will not receive additional credit for taking Anthropology of the Global Economy.

Anthropology of the Global Economy is the study of how economic systems articulate with culture on a variety of scales. This class examines basic paradigms of study in economic anthropology, theories of money and value, and ethnographies of exchange. We will look at how the commodification, production and/or sale of goods in formal, informal and black markets affect people in very different ways. We think through the role of the state, of religion, power struggles and advertising in shaping these markets. Format includes readings, lectures, film screenings, and discussions.

Repeatability: This course may not be repeated for additional credits.

ANTH 3324. Anthropology and Art. 3 Credit Hours.

This course examines the anthropology of art and "artworlds." While its emphasis is on non-western art, it maintains a comparative stance between unfamiliar and familiar visual traditions. Thus, by implication it raises questions about western arts and their cultural contexts. Specific topics and cultures vary according to the interests and expertise of the instructor. Topics can include comparative aesthetics, authenticity and "primitiveness," the commodification of art, tourist art, gender in the production and consumption of art, the influence of non-Western art objects and performances on European and North American cultures, conceptual systems and modes of viewing, the circumstance of encounter with objects, the modes of production and how objects are shared and valued, both in the culture in which they are initially made and in the culture they may be in now. Cultural contexts may include people and art from Aboriginal Australia, Africa, India, Indonesia, Japan, and Native America.

Repeatability: This course may not be repeated for additional credits.

ANTH 3325. Political Anthropology. 3 Credit Hours.

This course will examine anthropological approaches to political structure, political organization, and political action. We will begin by familiarizing ourselves with some of the basic attributes and cultural commitments of Enlightenment projects as well as liberal political theory. Topics may include anthropological analyses of colonialism, nationalism, state formation, development, corruption, social movements, and human rights. We will consider the culture of politics and the politics of culture in disparate contexts around the world. Throughout the course we will remain attentive to how anthropologists historically have studied politics, and how anthropological notions of politics have changed through time.

Repeatability: This course may not be repeated for additional credits.

ANTH 3326. Religion in Non-Western Cultures. 3 Credit Hours.

This course examines Creole religions in the Americas and the Caribbean, focusing on the often-misunderstood practices of Cuban Santería, Haitian Voodoo, Brazilian Candomblé, and U.S Orisha-Voodoo. By exploring their colonial, national, and transnational trajectories, differences in Portuguese, Spanish, and French colonial rule will become evident as we look at the historical, political, and religious conditions shaping processes of syncretism and mimesis. The unique multi-channeled, performative aspects of these creole religions will be explored in great detail and illustrated through video and music recordings of spiritual events in which divination, drumming, myth, dance, trance and healing come to life. Confronting practitioners' insider experiences with outsiders' exoticizing perceptions - stemming from either frightening Hollywoodian representations or romanticizing state and tourist productions - we will critically address the problematic, highly contested place that these heterodox religions and their practitioners occupy in contemporary societies.

Repeatability: This course may not be repeated for additional credits.

ANTH 3327. Globalization and Localization. 3 Credit Hours.

This course addresses issues of theory and method by means of an examination of cultural globalization processes and current debates about their effects on local cultures - one of the key tropes shared by both anthropological and nationalist projects. One of the main aims of this course is to question the unidirectionality implied in most global theories, and assess via combined macro and micro lenses not only the impact of global processes on particular local histories, but also how the sets of voices that are marginalized by global discourses re-enter them, speaking in them and to them. In other words, we will explore the relation between structured choices and agency. From this vantage point we will examine selected issues on nationalism, postcolonialism, modernity, transnationalism, and diaspora, as well as consumption, technology, tradition, heritage, ethnicity, and tourism. The first part of this course will examine the relation between theory and method in anthropological research on cultural globalization, especially the challenges for fieldwork in complex societies. The second part will test their applicability and validity through a close reading of ethnographic works and the screening of videos that examine various dilemmas arising from processes of cultural contact in complex societies. In addition to exploring globalization and localization issues in anthropology, this course should enable students to think through and apply different methodologies in writing their research projects for the course.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ANTH 3328. Anthropology of the Family. 3 Credit Hours.

This course investigates the family as a key social unit across cultures. We will consider the role of kinship and reproduction through ethnographic studies of reproductive politics and policy, healthcare provision, reproductive technologies, and public health. By approaching the family through the lens of reproductive justice, we as a class will engage in sustained reflection on the place of reproduction within health, healthcare, and activism. The course situates reproduction and reproductive health within historical trajectories of health activism and governance, including but not limited to abortion, assisted reproduction, and immigration. Note: This course was previously known as "Comparative Social Organization." Students will receive credit only once for either "Anthropology of the Family" or "Comparative Social Organization."

Repeatability: This course may not be repeated for additional credits.

ANTH 3331. Anthropology and Culture Change. 3 Credit Hours.

For the last three centuries, intellectual and popular discourses have advanced conflicting ideas about culture change as either a welcome sign of progress or a detrimental process of irremediable loss. Considering this tension as constitutive of the topic at hand, the first part of the course will critically examine various theoretical explanations for culture change, its causes and results, as well as the social currency of "culture" and "change" in various social projects; for example in social, religious, and artistic movements. This examination will also include the testing the conceptual vigor of terms such as acculturation, syncretism, creolization, and transculturation, some of which have been recently revamped by some social theorists to depict the flux, indeterminacy, and heterogeneity of the world under globalization, while ignoring their past use within discriminatory social tactics. Contemporary ethnographic case studies will offer an opportunity to examine these issues, particularly the ways in which flows of, as well as restrictions upon, capital, people, commodities, media, and ideologies are affecting the lives of diverse social groups in different parts of the world, some of which eagerly embrace change while others strategically resist it.

Repeatability: This course may not be repeated for additional credits.

ANTH 3333. The Anthropology of Tourism. 3 Credit Hours.

The anthropology of Tourism is an anthropology of peoples on the move, an in encounter with the alien, the unfamiliar, the forgotten and the other. These journeys are anchored in an educational ethos and serve to make identity and opinion. Tourism today includes the pursuit of imagined and historic pasts, of transformational places of alterity, of the sensual and the experiential where knowing and part taking are constitutional and integral to learning about one's place in the world, one's community place as a unit of one among many, and where notions of a shared humanity often come face to face with an alien and sometimes forbidding other. Students will study the anthropological understanding of place, of travel, of history, of performance, of cuisine, of pilgrimage, of adventure, of ecology, of philanthropy, of alternate medicine, all expressions of the present day offerings of Tourism. They will engage with anthropological films that have examined the phenomenon of tourism in different parts of the world, in a discourse that recognizes the porosity of boundaries and the inherent hybridity of cultures.

Repeatability: This course may not be repeated for additional credits.

ANTH 3335. Anthropology and Social Policy. 3 Credit Hours.

This course explores the critical anthropology of social policy, an emerging new field. First, we will compare this kind of anthropology to closely related "applied anthropology" and "activist anthropology." The critical approach examines the disjunctures between the cultural constructions of policy targets created by experts (and the public) and the actual lived experiences of the targets themselves. Along with other critiques of the bureaucratic structures of national and international "helping" institutions and their assumptions of technocratic professionalization, we will explore the hidden aspects of power and control which lurk within the massive structures of policymaking and implementation in the past six decades.

Repeatability: This course may not be repeated for additional credits.

ANTH 3336. Sex Roles in Cross-Cultural Perspective. 3 Credit Hours.

A cross-cultural survey of the ways in which gender is used to define roles and statuses, with particular attention to the changing nature of sex roles in many contemporary cultures.

Repeatability: This course may not be repeated for additional credits.

ANTH 3337. Anthropology of War and Conflict. 3 Credit Hours.

This course examines anthropological approaches to war, conflict, and peace. After briefly unpacking media representations of tribalism, savagery, anarchy, etc. and familiarizing ourselves with anthropological responses to such representations, we then turn to ethnographic considerations of warfare and other examples of conflict in the contemporary world. Potential topics include state violence, civil war, terrorism, indigenous rights struggles, militarism, and peacemaking, both failed and successful. NOTE: This course was previously titled "Violence, War, and Revolution" and students can receive credit only once for ANTH 3337.

Repeatability: This course may not be repeated for additional credits.

ANTH 3355. Anthropology of Sexuality and Gender. 3 Credit Hours.

Formerly known as Gender Theory.

Gender is arguably universally the primary category of social difference into which we (as humans) are socialized. This course takes an historically and ethnographically situated approach to understanding how sociocultural anthropologists have theorized gender, with a particular focus on feminist anthropology approaches to culture, power, and history. Throughout the course we will additionally explore the intersection of gender with such other statuses of social difference as sexuality, class, race, ethnicity, generation, education, and rural versus urban residence in a variety of global contexts.

Repeatability: This course may not be repeated for additional credits.

ANTH 3366. Violence: An Anthropological Approach. 3 Credit Hours.

In this course, we will develop an anthropological approach to violence, querying the experience of violence and the ways in which it is generative and destructive of social structures and cultural meaning. We will consider violence's relationship to morality, politics, and inequality, as well as the ways in which violence is affirmed or denied as part of collective experience. Throughout the semester, our work will be grounded in political and anthropological theory and ethnographic material from the United States and elsewhere, as well as students' independent research and analyses.

Repeatability: This course may not be repeated for additional credits.

ANTH 3396. Fieldwork and Ethnographic Methods. 3 Credit Hours.

As a writing-intensive course focusing on fieldwork methods, this is an important course that contributes to the new theme "Mobility and Global Inequality" by promoting the six program goals. Through written assignments and readings, students learn necessary skills to develop critical analysis, disciplinary knowledge, grasp of sociocultural diversity, communication and problem-solving skills, and technological literacy. Students are assessed through workshops, evaluation of their grasp of ethnographic methods through target projects, and their written assignments.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ANTH 3433. Ethnographic Film. 3 Credit Hours.

Formerly known as Anthropological Film. Students who have completed Anthropological Film will not receive additional credit for taking Ethnographic Film.

A review of major film styles useful for anthropological film and video in conjunction with an analysis of the role of film/video in anthropology. Topics will include relationships of anthropological and ethnographic films, the significance of historical and ideological contexts, comparisons to indigenous video and feature films, and problems in the communication of anthropological theory and insight through the film/video medium. A broad range of ethnographic films will be screened to illustrate a progression of work and variety in relationships of theory, subject matter, cultural context, production techniques and style, and expected audiences.

Repeatability: This course may not be repeated for additional credits.

ANTH 3436. Anthropology of New Media. 3 Credit Hours.

This course will expose students to the anthropological theory of New Media as well as traditional and newly emerging socio-cultural methodology. Building on long-standing anthropological analyses of media as a vehicle for cultural expression and a means for articulating and defining human culture, this course will train students both to analyze and produce New Media forms. Students will be required to combine the central methodologies of socio-cultural anthropology, such as interviewing and participant observation, with New Media participatory and interactive technologies for producing and analyzing data.

Repeatability: This course may not be repeated for additional credits.

ANTH 3438. Anthropology of Mass Media. 3 Credit Hours.

Mass media is a comparatively new topic of study for anthropology, which a century ago focused on supposedly pre-literate, pre-modern, traditional societies. Now, of course, anthropologists study people in cities as well as villages, in the U.S. and Europe as well as on remote islands, and even supposedly "exotic" groups have access to media, as rainforest residents wield video cameras and Africa is the world's fastest-growing cell phone market. Today the social life of media (books, magazines, TV, films, videos, audiocassettes, radio, e-mail, the Internet, telephones, billboards, etc.) is a vibrant and growing topic of interest within anthropology. Some of the questions anthropologists ask: What roles do media play in the circulation, transmission, and contestation of culture? How do media (and new media technologies) affect people's lives, and how do people transform and adapt media to fit their needs? What is the relation of the media to economic and political systems? What can we learn by paying attention to the specific details of how media are produced, used, and talked about? This course provides an introduction to theoretical and methodological tools used by anthropologists in studying media; a forum for critical analysis of media processes in the U.S. and around the world; and opportunities to do ethnographic research of media processes.

Repeatability: This course may not be repeated for additional credits.

ANTH 3439. Anthropology of Photography. 3 Credit Hours.

A critical examination of an anthropological approach to photography. Special attention will be given to a socio-cultural history of photography in the U.S. Examples from documentary, fine art, and commercial photographic genres will be shown, discussed, and compared to ethnographic studies. Field methods, models of analysis, and ethical issues will also be included. Required readings, active class participation. No exams. Students keep a journal and write several short essays. NOTE: Knowledge of camera technology and darkroom procedures is helpful but not required.

Repeatability: This course may not be repeated for additional credits.

ANTH 3444. Advanced Production of Anthropological Media. 3 Credit Hours.

Formerly known as Anthropological Problems in Visual Production. Students who have completed Anthropological Problems in Visual Production will not receive additional credit for taking Advanced Production of Anthropological Media.

The introduction of visual recording techniques to a sample of problems in the anthropology of visual communication. Discussions will include ways anthropologists construct problems, develop observational strategies, select appropriate image-making technology, work in field conditions, among others. Strategies of representation connected to the integration of cultural and film theories will be explored in conjunction with a wide range of film examples. Students will be introduced to the department's production facilities and do short exercises in image making, viewing, and interpretation.

NOTE: A lab fee may be necessary depending on the extent of each semester's assignments.

Repeatability: This course may not be repeated for additional credits.

ANTH 3509. Language Socialization and Cultural Reproduction. 3 Credit Hours.

This course examines how children and other novices, through interaction with older or otherwise more "expert" persons, acquire the culturally specific forms of knowledge, skills, orientations, and practices that enable them to become competent members of their communities. Topics explored include cross-cultural variation in ways of teaching and learning; socialization of children and of older novices (such as adult immigrants and job trainees) into new identities, roles, and statuses; and socialization processes as sites of cultural reproduction, innovation, and change. Ethnographic case studies from around the world are discussed and compared. Throughout the semester, using the resources of the Linguistic Anthropology Teaching Laboratory, students collect and analyze ethnographic audio-video data from various local settings (schools, churches, community organizations, workplaces, etc.) in which language socialization can be observed.

Repeatability: This course may not be repeated for additional credits.

ANTH 3537. Language and the Immigrant Experience. 3 Credit Hours.

This course examines the role of language in the experiences of immigrant communities across the globe, and the ways in which language issues, broadly constructed, shape cultural politics of representation and everyday life in migration settings, including: how language is inextricably intertwined with identity formation and social belonging; how language is crucial to understanding how migrants are stratified; and how the experience of migrants in society is formed in the course of everyday interactional engagements.

Repeatability: This course may not be repeated for additional credits.

ANTH 3589. Language as Social Action. 3 Credit Hours.

A variably themed seminar dealing with collection, analysis, and presentation of ethnographic data, emphasizing observation and audio-video recording of communicative practices, both verbal and non-verbal. Each seminar participant develops an independent research project involving fieldwork in local settings.

Repeatability: This course may be repeated for additional credit.

ANTH 3596. Research Methods in Culture and Communication. 3 Credit Hours.

This course is designed to acquaint the undergraduate majors in Anthropology with the methods of linguistic anthropology. This course satisfies the Methods requirement for the major in Anthropology. This course is designed to expose you to culturally diverse perspectives on how these methodological approaches are used in the research design and development of full-fledged ethnographies. From a programmatic perspective, this is an important class that rests firmly on the line between the two themes: "Evolution and Human Environments" and "Mobility and Global Inequality."

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ANTH 3742. Human Origins and Evolution. 3 Credit Hours.

Designed to familiarize students with both theoretical and methodological frameworks for interpreting the human fossil record with a review of the synthetic theory of evolution, socio-biological concepts, and procedures in taxonomy and phylogenetic reconstruction. Attention given to the origin of the human lineage and what the fossils of that lineage tell us about the evolution of anatomical systems that are peculiar to humans. Formerly known as "Human Paleontology". Students who earned credits under the original title will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ANTH 3743. Human Biology of Modern Populations. 3 Credit Hours.

An investigation of how advances in genomics have shaped the way physical anthropologists approach the study of living human populations. Students are introduced to basic concepts in the regulation of genetic expression and developmental genetics. Concepts from these two fields are discussed within the framework of evolutionary developmental biology, and we explore the implications of this new synthesis for the evolution of modern humans and modern human variation. Variation caused by changes in developmental timing is explored in terms of genetics (using selection and life history models) and non-genetic (epigenetic, phenotypic plasticity) response pathways to environmental conditions.

Repeatability: This course may not be repeated for additional credits.

ANTH 3746. Human Reproduction: Evolutionary Perspectives. 3 Credit Hours.

This course surveys classic and contemporary literature on human life history evolution, reproductive physiology, and reproductive ecology. It begins by covering some basic information in life history theory and comparative reproductive biology. Secondly, it surveys key issues in the field organized by the stages and events of the life cycle using the following approach: what is the underlying physiology, how do humans compare to the non-human primates and what explanations have been proposed to account for our differences, what factors modulate the expression of life history characteristics among human populations? Duplicate Credit Warning: Students cannot receive credit for this course if they have successfully completed ANTH 4797.

Repeatability: This course may not be repeated for additional credits.

ANTH 3747. Human Growth and Development. 3 Credit Hours.

Understanding growth and development is essential to many aspects of the study of biological anthropology. In this course we will explore the biological processes that lead to the development of the bony skeleton, teeth, and various aspects of body composition. These measures of human growth and development are used in biological anthropology to understand human biological diversity, as well as to appreciate the influence of the genetics, the environment, and human behavior. Students will learn standard methods of assessment of growth and development used with studies of living and past human populations. After learning the basic principles of growth and development and how to measure them, we will explore specific anthropological applications.

Repeatability: This course may not be repeated for additional credits.

ANTH 3770. Methods in Physical Anthropology. 4 Credit Hours.

Advanced undergraduate students will have the opportunity to develop individual research projects in biological anthropology, utilizing materials in the department collections and from department expeditions. Students will be introduced to problems in research design, sampling theory, research paper writing, and commonly used statistical techniques in biological anthropology, and will apply them in their project analyses.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ANTH 2705.

ANTH 3771. Quantitative Analysis in Anthropology. 3 Credit Hours.

The primary goal of this course is to provide students with a solid grounding in basic statistical techniques/methods as applied to anthropological data. Such data is highly variable in form due, in part, to the diversity of research questions being asked and to the methods of collection. The ultimate goal of this course is to bring together various datasets and methods so that students might better assess the results/interpretations presented in the anthropological literature. New quantitative concepts will be presented each week along with examples/applications of the concepts and practice problems. The problems associated with the texts and other data sets will be solved using SPSS, statistical software which resides on all publically available university machines. Formerly known as "Quantitative Methods in Anthropology". Students who earned credits under the original title will not receive additional credits for this course.

Repeatability: This course may not be repeated for additional credits.

ANTH 3772. Evolutionary Medicine. 3 Credit Hours.

This course explores the new field of evolutionary medicine which seeks adaptive explanations for why humans as a species are susceptible to certain diseases that are rare among other mammals. The course also asks why certain human populations are susceptible to disease and illness whereas others are not. In contrast, when physicians and biomedical researchers ask "why" a patient is sick they usually seek an explanation in the effect of a pathogen, the role of anatomical anomaly, a genetic mutation, exposure to an environmental toxin, the cause of physiological dysregulation, or other proximate mechanisms including behavioral and cultural causes. Knowledge of how our biological adaptations and patterns of human biological variation contribute to disease susceptibility is beginning to inform therapeutic approaches in biomedicine and sometimes provokes extraordinary controversy and claims of racism or biological determinism. This course will conclude with a series of discussions and debates about the legitimacy of such critiques after students in the course have learned about evolutionary explanations for disease susceptibility.

Repeatability: This course may not be repeated for additional credits.

ANTH 3774. Environmental Physiology and Health. 3 Credit Hours.

There are two interrelated goals to this course. The first is to understand the nature of human physiological responses to environmental extremes. Here, in addition to understanding basic physiological responses to nutritional stress, climactic temperature and high altitude hypoxia, we will examine genetic and environmental causes of population differences. We also will critically evaluate adaptive hypotheses used to explain differences between human populations. The second goal is to write a scientific paper in a format acceptable for publication. To accomplish this, students will learn how to formulate and justify a hypothesis related to human physiological variation, develop an appropriate analytical strategy, test the hypothesis using a population-based data set, and interpret the results.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ANTH 2705.

ANTH 3796. Methods in the Study of Evolution. 3 Credit Hours.

This course will critically evaluate the ways evolutionary theory has been used to explain human and primate evolution and modern human biological diversity. Included will be lectures on, and discussion of, the history of evolutionary thinking, the sources of variation in human populations, evolutionary processes, behavioral ecology, the levels of selection and problems in phylogenetic reconstruction. Anthropologically relevant models will be used throughout the course. Formerly known as "Evolutionary Biology". Students who earned credits under the original title will not receive additional credits for this course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ANTH 2705.

ANTH 3910. Honors: Special Topics. 3 Credit Hours.

A variable topic Honors course. The topic of the course may vary by section number. Be sure to check with the instructor who is offering the given course and section to find out the specific course description in a given semester.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ANTH 4082. Independent Study. 1 Credit Hour.

Directed reading and research on a specific anthropological topic. NOTE: Does not count toward major requirements in Anthropology.

Repeatability: This course may be repeated for additional credit.

ANTH 4083. Independent Study. 3 Credit Hours.

Directed reading and research on a specific anthropological topic. NOTE: Does not count toward major requirements in Anthropology.

Repeatability: This course may be repeated for additional credit.

ANTH 4096. Capstone in Evolution and Human Environments. 3 Credit Hours.

This is a writing intensive capstone course designed for senior anthropology majors or other qualified students who have taken courses (or who are interested) in the theme of "Evolution and Human Environments". With an understanding of how evolutionary and ecological processes influence past socio-cultural and biological change and how they affect modern population bio-cultural diversity, students will identify a research hypothesis and then develop a proposal that could be submitted to a private or public funding agency. This will involve the identification of articles that will be used to write a literature review related to the hypothesis, and then move through the steps of writing a research proposal: explaining the methodology that will be used to test the hypothesis, the type of results that are anticipated, the strategy that will be used to analyze the results, and the ways in which results will be disseminated to the public. The result will be a complete research proposal based on a format from a specific funding agency.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ANTH 2001 and (ANTH 3196, ANTH 3396, ANTH 3596, or ANTH 3796)

ANTH 4097. Capstone in Mobility and Global Inequality. 3 Credit Hours.

This writing-intensive course is the capstone requirement for the undergraduate major in anthropology. It is intended for advanced undergraduate anthropology students who are interested in issues of mobility and global inequality. The course will focus on the application of discipline-specific methods and modes of analysis to contemporary problems relating to movements of persons, objects, and ideas, and to inequalities of power and access to resources at multiple levels, from local to global. It is most appropriate for students who are interested in applying ethnographic methodologies to such problems, but it is open to all anthropology students who have completed a methods course in the Department of Anthropology. Advanced students in related fields may take it with the permission of the instructor.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ANTH 2002 and (ANTH 3196, ANTH 3396, ANTH 3596, or ANTH 3796)

ANTH 4185. Internship in Anthropology. 3 Credit Hours.

This course provides hands-on, professional level work experiences for Anthropology majors focusing on the study of archaeology. It is designed for students who have already completed basic course work in archaeology, including the department's field school [Anthropology 3189 (0320) & 3170 (0321)]. Students will be placed with one of a number of firms in the region involved in cultural resource management studies where they will be employed in a variety of laboratory and field activities. The intensity and focus of the experience will be tailored to the particular needs or interests of the student, but minimally will involve 8 hours of effort per week.

Repeatability: This course may be repeated for additional credit.

ANTH 4796. Biocultural Adaptations in Human Populations. 3 Credit Hours.

An evaluation of adaptation, selection, and ecological concepts as the bases for models integrating human biology and culture, and for explaining change.

Course Attributes: SI, WI

Repeatability: This course may not be repeated for additional credits.

ANTH 4798. Seminar in Human and Primate Evolution. 3 Credit Hours.

An in-depth review of the synthetic theory of evolution and special topics in evolutionary theory. Emphasis will be placed on human evolution, human bio-cultural adaptation, and evolutionary biology.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ANTH 4897. Research in Biological Anthropology. 3 Credit Hours.

This is a writing-intensive capstone course in biological anthropology. It is designed to provide students with an opportunity to formulate a data-specific and testable research hypothesis concerning the cause of variation within human populations, or across primate species. Students will have access to a large number of faculty-generated data sets; and can therefore select a research project that fits their interests. Each phase of the research project (the development of hypotheses, the strategy used to test the hypothesis on one of the data sets, the selection of statistics used to analyze data, and the interpretation of results) will coincide with the construction of a section of a scientific paper. After each phase of the paper is written, it will be evaluated, discussed in class, revised, and re-presented. The result will be a final paper based on the research project, in a format that is suitable for presentation at a scientific meeting or publication in a scientific journal.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ANTH 4982. Honors: Independent Study. 3 Credit Hours.

Directed reading and research on a specific anthropological topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Applied Behavior Analysis (ABA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ABA 2103. Concepts and Principles of Behavior Analysis. 3 Credit Hours.

This course provides the student with an introduction to the concepts and principles of Behavior Analysis. Core concepts including motivation, reinforcement, punishment, extinction, and rule-governed and verbal behavior will be covered, along with examples of behavior change techniques that employ these concepts. This course satisfies 45 hours in philosophical underpinnings (concepts and principles) required by the Behavior Analyst Certification Board (BACB) in a free-standing course.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ABA 3301. Understanding Autism. 3 Credit Hours.

This course provides an overview of Autism Spectrum Disorders (ASD). Students will learn the cases, prevalence, diagnostic criteria, and related characteristics of the disorder, as well as behavioral manifestations. Students will also be introduced to the evidence-based practices developed to help children and adolescents with ASD to reach their full potential.

Repeatability: This course may not be repeated for additional credits.

ABA 3302. Analyzing and Changing Behavior. 3 Credit Hours.

This is an undergraduate level foundation course in using the science of Applied Behavior Analysis to change behavior for the better of society. The course will cover basic principles of Applied Behavior Analysis and methods for implementing principles to produce socially significant behavior. Some of the principles reviewed are positive and negative reinforcement, extinction, motivating operations, punishment, discrimination, and stimulus control. Additionally, this course will review procedures and techniques used to change behavior. Examples of procedures and techniques that will be covered are prompting, fading, shaping, chaining, reinforcement schedules, time out, response cost, behavioral contracts, and token economy. Following the course you will have an understanding, using the science of Applied Behavior Analysis, about how to analyze and change behavior.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ABA 3303. Evaluating Behavior Change Intervention. 3 Credit Hours.

This course provides an overview of strategies for measuring and evaluating changes in behavior. Many fields, including applied behavior analysis, implement interventions to change a person's behavior and then seek to determine if those interventions are effective. The purpose of the course is to teach the skills involved in measuring a behavior that has been targeted for an intervention and utilizing specific analytic skills to evaluate whether that intervention was effective. Competencies include selection of dependent variables for measurement, measurement tactics, single case research design, etc. In addition to learning how to collect and analyze data, students will learn to analyze the validity of existing data and research already conducted. The methods discussed are not specific to any handicapping condition or age level; rather, they are a general set of methods for conducting and interpreting single-subject data analysis.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ABA 3304. Ethics and Applied Behavior Analysis. 3 Credit Hours.

During this course, we will explore the issue of ethics in Applied Behavior Analysis by engaging in various activities including: case study discussions, role plays, functional analyses of unethical behavior, and article presentations. Some in-class activities will require preparation prior to arriving to class. This course satisfies 45 hours of the content in BACB Compliance Code and Disciplinary Standards in a freestanding course required by the Behavior Analyst Certification Board (BACB). This course addresses specific guidelines for responsible conduct according to the Behavior Analyst Certification Board: <http://bacb.com/ethics-code/>.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Arabic (ARBC)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ARBC 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture by taking a guided tour of its literature and film. You don't need to speak a language other than English to take this exciting course, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film include family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0968, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ARBC 0968. Honors World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture by taking a guided tour of its literature and film. You don't need to speak a language other than English to take this exciting course, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film include family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. (This is an Honors course.) NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868, Asian Studies 0868, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GG, HO

Repeatability: This course may not be repeated for additional credits.

ARBC 1001. Arabic Elements I. 4 Credit Hours.

First semester level of Arabic.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

ARBC 1002. Arabic Elements II. 4 Credit Hours.

Second semester level of Arabic.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARBC 1001.

ARBC 1401. Spoken Syrian Colloquial I. 1 Credit Hour.

This is an elementary course in spoken Syrian colloquial, which is closely related to other Arabic colloquials spoken in the Levant region. The goal is to become aware of and acquire skills in the basic linguistic shifts from modern standard Arabic (MSA) to the regional colloquial. Arabic is characterized as diglossic, meaning that most speakers of the language utilize two registers, the spoken and the formal written. There is a considerable gap between the two on a number of levels: pronunciation, word choice, grammar and syntax.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARBC 1002.

ARBC 2000. Special Topics I. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

ARBC 2001. Arabic Intermediate I. 3 Credit Hours.

Third semester of Arabic.

Course Attributes: LC

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARBC 1002.

ARBC 2002. Arabic Intermediate II. 3 Credit Hours.

Fourth semester of Arabic.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARBC 2001.

ARBC 2012. Modern Arabic Literature in Translation. 3 Credit Hours.

Formerly known as Contemporary Arabic Literature (in Translation)

This course will survey some of the most important contemporary narratives of Arabic literature, with emphasis on their socio-political context. The timeline of the course runs from the end of World War II, the creation of Israel in 1948, and the 1952 Free Officers Revolution in Egypt up to the present. Historic events give us a framework for referencing the literary works. At the same time, we will consider novels, short stories, and poems as works of art on their own, inquiring into their narrative framework, aesthetic strategies, and position within the Arabic literary heritage. Critical and background readings will supplement literary texts. Occasionally we will have the opportunity to watch films that supplement the literature. All works will be in English and all films will be subtitled.

Repeatability: This course may not be repeated for additional credits.

ARBC 2021. Contemporary Arab Society in Film (in Translation). 3 Credit Hours.

This course uses film as a medium to explore contemporary social and political issues in the Arab Middle East. It investigates how filmmakers from the region narrate, represent and navigate particular historical events and conditions of the region. The films are coupled with readings that provide background and help to facilitate historical, cultural and, at times, aesthetic understandings of the narratives. The narratives begin roughly in the middle of the 20th century, and are arranged thematically - though a sense of historic consequence is evident. The films cover issues such as: feudalism and "socialist" revolution; Palestine after 1948 and the consequences in the Arab world; pan-Arabism; women, modernity, and the city; authoritarian states; religious extremism; war; immigration; and identity.

Repeatability: This course may not be repeated for additional credits.

ARBC 2900. Honors Special Topics I. 3 Credit Hours.

This is an Honors course. It is arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ARBC 3001. Arabic Advanced I. 3 Credit Hours.

Fifth semester of Arabic.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARBC 2002.

ARBC 3002. Arabic Advanced II. 3 Credit Hours.

Sixth semester of Arabic.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARBC 3001.

ARBC 3010. Special Topics IV. 3 Credit Hours.

Arranged each semester. Please consult with the instructor and/or check the course schedule for specific topic.

Repeatability: This course may be repeated for additional credit.

ARBC 4183. Arabic Directed Readings I. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ARBC 3002.

ARBC 4283. Arabic Directed Readings II. 3 Credit Hours.

Arranged each semester. Please consult with the instructor.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ARBC 3002.

Architecture (ARCH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ARCH 0835. Guerrilla Altruism: A Mini-Manual of Subversive Activism. 3 Credit Hours.

A multi-disciplinary investigation into the unorthodox strategies deployed by contemporary guerrilla artists and activists, reformers and humanitarians, eventually culminating in the design and realization of one or more small-scale humanitarian interventions within Temple's surrounding communities.

NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core.

Course Attributes: GB, SI

Repeatability: This course may not be repeated for additional credits.

ARCH 0875. Architecture and the American Cultural Landscape. 3 Credit Hours.

This course explores the relation of the physical environment, understood as both given and constructed, to the larger and more ephemeral cultural context which it at once delimits and enables. The resultant scene-like spatial situations have been described within some academic disciplines as "cultural landscapes," a term meant to describe distinct geographical areas or properties uniquely representing the combined work of nature and humans. Deploying this concept of cultural landscapes as a framework, the course will plumb American culture with an emphasis on its physical dimension, exploring the ways that culture is engaged, reflected, and modified in the substance and configuration of those places wherein and through which we live our individual and collective lives. The course will ask students to explore how geography, topography, ecology, landscape, economics, and politics have influenced the reading and making of the American cultural landscape, and, perhaps more importantly, how the corporeal characteristics of constructed places have in turn shaped cultural developments and impacted, by extension, our world. At base, then, the course facilitates consideration of the fundamental interdependencies of nature, human nature, and the constructed environment in the context of U.S. culture. The politics of place are central to these explorations, but do not encompass them, since place intersects U.S. culture and society on many extra-political levels. The course will be founded on historical precedent and case studies, considered in light of key texts from various disciplines including urbanism, architecture, geography, film, philosophy, fiction, anthropology, and sociology, topical discussion, site visits, and the students' own analyses. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd. Students cannot receive credit for this course if they have successfully completed ARCH 0975.

Course Attributes: GU, SI

Repeatability: This course may not be repeated for additional credits.

ARCH 0935. Honors Guerrilla Altruism: A Mini-Manual of Subversive Activism. 3 Credit Hours.

A multi-disciplinary investigation into strategies deployed by contemporary community based architects, artists and activists. The course engages community groups and results in collaborative planning and design strategies, proposals, and projects in Philadelphia and surrounding communities. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GB, HO, SI

Repeatability: This course may not be repeated for additional credits.

ARCH 0975. Honors Architecture & the American Cultural Landscape: Physical Dimensions of Cultural Settings. 3 Credit Hours.

This course explores the relation of the physical environment, understood as both given and constructed, to the larger and more ephemeral cultural context which it at once delimits and enables. The resultant scene-like spatial situations have been described within some academic disciplines as "cultural landscapes," a term meant to describe distinct geographical areas or properties that represent the combined work of nature and humans. Deploying this concept of cultural landscapes as a framework, the course will plumb American culture with an emphasis on its physical dimension, exploring the ways that culture is engaged, reflected, and modified in the substance and configuration of those places wherein and through which we live our individual and collective lives. The course will ask students to explore how geography, topography, ecology, landscape, economics, and politics have influenced the reading and making of the American cultural landscape, and, perhaps more importantly, how the corporeal characteristics of constructed places have in turn shaped cultural developments and impacted, by extension, our world. At base, then, the course facilitates consideration of the fundamental interdependencies of nature, human nature, and the constructed environment in the context of U.S. culture. The politics of place are central to these explorations, but do not encompass them, since place intersects U.S. culture and society on many extra-political levels. The course will be founded on historical precedent and case studies, considered in light of key texts (from various disciplines including urbanism, architecture, geography, film, philosophy, fiction, anthropology, and sociology), topical discussion, site visits, and the students' own analyses. NOTE: This course fulfills the U.S. Society (GU) requirement for students under GenEd. Students cannot receive credit for this course if they have successfully completed ARCH 0875.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GU, HO, SI

Repeatability: This course may not be repeated for additional credits.

ARCH 1001. Introduction to Design and the Environment. 3 Credit Hours.

An introduction to the complex and contingent relationship between architects and the environments in which they intervene. Using contemporary and historical materials, students will begin to understand how architects establish and position design processes in response to their social, technological, and material situations. Coursework includes both position papers in response to particular reading topics as well as diagrammatic interrogations of the city around us. NOTE: (1) Open to non-majors. (2) A required course for all students interested in majoring in architecture and an elective university Core course in the Arts category. (3) This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university Gen Ed requirements. See your advisor for further information.

Course Attributes: AR, SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

ARCH 1011. Visual Literacy for Architects 1. 3 Credit Hours.

This course focuses on the development of visual literacy, graphic techniques, and 3D formal exploration. Through projects supported by research, graphically-based exercises, and formal investigations, students will be exposed to the process of representation in architecture. Units dealing with line, patterning, surface articulation, form, and assembly will be explored through 2D and 3D analog constructions. Thematic concepts linked to each unit will be presented through the work and representation of architects and artists.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

ARCH 1012. Visual Literacy for Architects 2. 3 Credit Hours.

This course continues to focus on the development of visual literacy, graphical techniques, and 3D formal exploration. Through projects supported by research, graphically-based exercises, and formal investigations, students will be exposed to the process of representation in architecture. Methods of deconstruction and filtering, narrative assemblies, motion systems, propositional imagery, and visual assembly will be explored through 2D and 3D analog and digital constructions. Thematic concepts linked to each unit will be presented through the work and representation of architects and artists.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

ARCH 1013. Architectural Representation for Non-Majors. 3 Credit Hours.

Introduction to architectural representation and design. This is a studio based course for non-majors. Students are introduced to 2D and 3D architectural design graphic techniques, and engage in drawing and model making in a studio setting. Note: This course may not count as an Architecture elective course for the BS in Architecture, BS in Facilities Management, BS in Architectural Preservation, BS in Historic Preservation or Certificate in Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

ARCH 1017. Photography and Visual Literacy. 3 Credit Hours.

Photography is explored as a visual language, complete with vocabulary, syntax, and modes of expression. This course introduces the principles of visual design that are particularly important for creating articulate and aesthetically engaging photographs. Using their own digital cameras, students develop sufficient technical competence to be able to make photographs that investigate the fundamental issues of visual design, in the context of environmental studies. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARCH 1196. History of Form of Cities. 3 Credit Hours.

Study of the physical design of cities with particular emphasis on the emergence of settlement patterns and their relationship to landforms and social intentions. NOTE: This course can be used to satisfy a university Core Arts (AR) and Writing Intensive (WI) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARCH 1502. Investigations into Built Environment Professions. 1 Credit Hour.

This course for entry level students in Architecture and Environmental Design introduces students to educational and career paths in the built environment professions (architecture, architectural preservation, community development, facilities management, horticulture, landscape architecture, and city planning). Note: Prior to fall 2017, the course title was "Investigations in Architecture."

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ARCH 1996. Honors History of Form of Cities. 3 Credit Hours.

Study of the physical design of cities with particular emphasis on the emergence of settlement patterns and their relationship to landforms and social intentions. NOTE: This course can be used to satisfy a university Core Arts (AR) and Writing Intensive (WI) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

ARCH 2121. Foundation Architectural Design 1. 4 Credit Hours.

The development of design logics drawn from natural systems, processes and measurement; introduction to landscape research and site analysis; development of the desk crit as a teaching method; craft based modes of drawing, model making, and visualization; emphasis on graphic and spatial relationships, active plotting and site analysis. Scale: the body in the natural landscape.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 1011 or 'Y' in AR11) and (ARCH 1012 or 'Y' in AR12)

ARCH 2122. Foundation Architectural Design 2. 4 Credit Hours.

Developing rigorous design thinking through making and the integration of material, craft, tectonic and visual practice. Further development of the design crit plus methods of communicating design objectives. Scale: artifact, body and spatial envelope.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 1011 or 'Y' in AR11), (ARCH 1012 or 'Y' in AR12), and (ARCH 2121 or 'Y' in AR21)

ARCH 2123. Facility Management Foundation I. 3 Credit Hours.

Studio with a focus on interior architecture, space occupation, and qualities of space. Analysis and practical application of use of space, adjacencies, to provide a general understanding of place making, methods of construction, tectonics and detailing as design concerns; introduction to precedent study as research technique.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Co-requisites: ARCH 2153.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 1011 or 'Y' in AR11) and (ARCH 1012 or 'Y' in AR12)

ARCH 2124. Facility Management Foundation II. 3 Credit Hours.

Studio with environmental sustainability focus for facility management - energy and resource use, hydrology, sustainable materials, infrastructure and building methods, recycling, environmental performance and quality; emphasis on systems and details (very large and very small); development of techniques for environmental analysis (observation, data analysis, etc.); development of ecological and environmentally responsive design proposals; program development; introduction to design collaboration.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Co-requisites: ARCH 2154.

Course Attributes: SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2121, 'Y' in AR21, ARCH 2123, or 'Y' in AR23)

ARCH 2141. Architectural History: Ancient through Renaissance. 3 Credit Hours.

Traces the history of Western architecture from the ancient world to the high renaissance and mannerism of the late 16th century. The evolution of architectural thought, various formal languages (styles) and theoretical concepts are studied through the examination of selected buildings within their specific political, social, economic, and cultural milieu. Emphasis on the analysis of the ancient temple and the Christian church. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARCH 2142. Architectural History: 17th Century through 20th Century. 3 Credit Hours.

Traces the history of architecture from the 17th century through the present time. The evolution of architectural thought, various languages (styles) and theoretical concepts from cultures around the world are studied through the examination of selected buildings within their specific political, social, economic, and cultural milieu. The course introduces analytical methods for the study of significant buildings across a range of architectural styles and significant periods of development. Note: Prior to Fall 2023 this course was titled "Architectural History: Renaissance through 20th Century."

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARCH 2151. Architecture, Technology, and the Environment. 3 Credit Hours.

Introduction to behavioral, environmental and technological factors in relation to the building design process. Basic exploration of functional, sustainable and material aspects of architecture.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Course Attributes: SE, SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 1001 or 'Y' in AR01) and (ARCH 1011 or 'Y' in AR11)

ARCH 2153. Facility Management Case Study Research I. 1 Credit Hour.

Case study research course focused on available products and applications of architectural interiors. This is a one-credit lab component for ARCH 2123: Facility Management Foundation I.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Co-requisites: ARCH 2123.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 1011 or 'Y' in AR11) and (ARCH 1012 or 'Y' in AR12)

ARCH 2154. Facility Management Case Study Research II. 1 Credit Hour.

Case study research course focused on available products, applications, and issues pertaining to sustainable architecture. This is a one-credit lab component for ARCH 2124: Facility Management Foundation II.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Co-requisites: ARCH 2124.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2121, 'Y' in AR21, ARCH 2123, or 'Y' in AR23)

ARCH 2941. Honors Architectural History: Ancient through Renaissance. 3 Credit Hours.

Traces the history of Western architecture from the ancient world to the high renaissance and mannerism of the late 16th century. The evolution of architectural thought, various formal languages (styles) and theoretical concepts are studied through the examination of selected buildings within their specific political, social, economic, and cultural milieu. Emphasis on the analysis of the ancient temple and the Christian church. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

ARCH 2942. Honors Architectural History: Renaissance through the 20th Century. 3 Credit Hours.

Traces the history of Western architecture from the 17th century through the 20th century. The evolution of architectural thought, various languages (styles) and theoretical concepts studied through the examination of selected buildings within their specific political, social, economic, and cultural milieu. Analysis of the significant buildings of the baroque and rococo, the neo-classic and the romantic, modernist, and post-modernism periods. NOTE: This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

ARCH 3010. Seminar: Special Topics in Communications. 1 to 3 Credit Hour.

Special seminar dealing with current topics in communications in the field of architecture. NOTE: Course may be taken more than once for credit when each topic is unique.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3012. Computer Aided Facility Management. 3 Credit Hours.

Consideration of current trends and practices in computer aided facility management (CAFM), computerized maintenance management systems (CMMS) and integrated computer-aided design (CAD) applications and databases.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Facilities Management.

Repeatability: This course may not be repeated for additional credits.

ARCH 3013. Project Planning & Programming. 3 Credit Hours.

A course covering the general processes related to the planning, programming, design, construction and occupancy of facilities, including long range, strategic and tactical planning, the relationship between facility planning and business planning, organization of sites, buildings and interiors. Also covered are specific tools and techniques for these functions, including design and construction documentation and contracts, facility inventories, space planning and relocation management, construction and installation specifications, value engineering, post-occupancy evaluation, contract management and cost estimating techniques.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 1011 or 'Y' in AR11), (ARCH 1012 or 'Y' in AR12), and (ARCH 2121, 'Y' in AR21, or (ARCH 2123 and ARCH 2153))

ARCH 3020. Special Topics Studio. 6 Credit Hours.

Special design studio. Topics vary with year and instructor. Consult Architecture office for more information.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3030. Special Topics in Design. 3 to 6 Credit Hours.

Special studio dealing with issues of architectural design. Topics vary with year and instructor. Consult Architecture office for more information. May be taken more than once for credit when each topic is unique. NOTE: Architecture majors only.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3040. Seminar: Special Topics in History and Theory. 1 to 3 Credit Hour.

Special seminar dealing with history and theory of architecture. Topics vary with year and instructor. Consult Architecture Program office for more information. NOTE: Course may be taken more than once when each topic is unique.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3050. Seminar: Special Topics in Building Technology. 1 to 3 Credit Hour.

Special seminar dealing with building technology in architecture. Topics vary with year and instructor. Consult Architecture Program office for more information. NOTE: Course may be taken more than once when each topic is unique.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3060. Special Topics in Digital Technology. 1 to 3 Credit Hour.

Special seminar dealing with digital technology in architecture. Topics vary with year and instructor. Consult Architecture Program office for more information. NOTE: Course may be taken more than once when each topic is unique.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3070. Seminar: Special Topics in Site and Context. 1 to 3 Credit Hour.

Special seminar dealing with current topics in site and context in the field of Architecture. NOTE: Course may be taken more than once for credit when each topic is unique.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3080. Seminar: Special Topics in Human Factors and Environment. 1 to 3 Credit Hour.

Special topics seminar dealing with current topics in environment and human factors in the field of architecture.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3090. Special Topics in Professional Practice. 1 to 3 Credit Hour.

Special seminar dealing with professional practice in architecture. Topics vary with year and instructor. Consult Architecture Program office for more information. NOTE: Course may be taken more than once when each topic is unique.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 3096. Vernacular Architecture. 3 Credit Hours.

Study of vernacular architecture as an embodiment of site, culture, indigenous materials and craft.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Facilities Management, Architectural Preservation, Historic Preservation.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARCH 3097. Introduction to Facility Management. 3 Credit Hours.

Overview of the profession of facility management, including the organizational, managerial, ethical and legal principles behind facility management services. The course includes the history of facility management and related professions, concepts, roles and responsibilities of the profession, basic facility management functions and techniques, organizational issues (including corporate culture, relationships between facility units and other organizational divisions, facility management and industry structure, etc.) and codes and other regulatory issues. The course is writing intensive.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Facilities Management.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Science.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARCH 3111. Introduction to Historic Preservation. 3 Credit Hours.

This course introduces students to the scope of architectural conservation, preservation and adaptive reuse, their histories, philosophies and theoretical bases. It introduces techniques for the preservation of buildings, including those for observation, recording and intervention.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Architectural Preservation, Historic Preservation.

Course Attributes: SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ARCH 3146. Engaging Places: Observations. 2 Credit Hours.

This course introduces students to the study of buildings and public places in Philadelphia using a set series of investigative and observation methods.

Repeatability: This course may not be repeated for additional credits.

ARCH 3152. Materials and Methods. 4 Credit Hours.

Introduction to construction materials, fundamentals of building construction, methods of assembling building systems in an integrated manner, and costing. Introduces specific regulatory issues dealing with zoning regulations, building codes, and barrier-free access requirements within the context of contemporary building techniques. Methods of construction in wood, masonry, concrete, and steel are described in detail and issues of enclosure, roofing, insulation, and finishes are presented. The course carries technical drawing requirements.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2151 or 'Y' in AR51), MATH 1031, and (PHYS 1021 or ECE 2142)

ARCH 3174. Site Investigations. 3 Credit Hours.

The course focuses on the discourse on urban form, the environment and design process that has emerged since the middle of the 20th century. It will examine theories and projects that address the integration of architecture, landscape and urbanism, so that students will be better prepared to address complex issues surrounding building sustainable environments. The subject is explored through readings, lectures, and case studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2121 or 'Y' in AR21) and (ARCH 2122 or 'Y' in AR22)

ARCH 3212. Introduction to Architectural Documentation. 3 Credit Hours.

This lecture and hands-on lab course will introduce students to techniques of architectural documentation through the use of computer-aided drafting, building information modeling, and other software within the field of Architecture.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 3231. Architectural Design III. 6 Credit Hours.

House and Community Studio. This studio will introduce students to the design of domestic space, including the relationships between program, culture, society, and form making.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bach of Sci in Architecture.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2121 or 'Y' in AR21) and (ARCH 2122 or 'Y' in AR22)

ARCH 3232. Architectural Design IV. 6 Credit Hours.

Introduction to Integrated Design Studio. This studio will focus on integrated and sustainable building design with particular attention given to the design of the building envelope system, considering building energy transactions, site issues and user experience. Secondary issues will include rain/storm water management, sustainable material evaluation, and coordination with structural and (primarily passive) environmental systems.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bach of Sci in Architecture.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARCH 3231.

ARCH 3233. Architecture Design Studio in Tokyo (Undergraduate). 6 Credit Hours.

Complex design investigation incorporating analysis of urban systems, observational research, data collection and analysis and the study of architectural precedent. This course aims to develop understandings of a foreign architectural and urban culture and how to engage it and promotes cosmopolitan values. Scale: variable.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 3234. Architectural Design Studio in Rome. 6 Credit Hours.

Architectural design studio at the Rome Campus with noted architectural faculty from Italy. Special application required. Consult Architecture Department office for more information. Course may be used to satisfy one of the upper level studios [Architecture 3231 (0231), 3232 (0232), or 4332 (0332)] but may only be taken once.

Repeatability: This course may not be repeated for additional credits.

ARCH 3241. Seminar Analysis of Urban Structure in Rome. 3 Credit Hours.

Research on urban systems and forms that have marked the development of Italian and Roman architecture from the 15th to the 18th century and that are now a reference point in every Western city: the piazza, the Roman palazzo, the theater, the garden. The course is intended to be a theoretical and analytical complement to the Rome Campus design course.

Repeatability: This course may not be repeated for additional credits.

ARCH 3242. Urban Seminar in Tokyo (Undergraduate). 3 Credit Hours.

This course provides students an overview of architecture and urbanization in historic and contemporary Japan. Economic, socio-political and technological forces that have shaped the built environment and architecture are discussed and the work of contemporary Japanese architects are studied and analyzed. The course is a theoretical and analytical complement to the Architecture Design Studio.

Repeatability: This course may not be repeated for additional credits.

ARCH 3251. Structural Analysis for Architects. 3 Credit Hours.

This course covers loadings determination and evaluation, resolution and equilibrium of force systems, truss analysis, centroids, moments of inertia, shear and bending moment diagrams, basic beam, column, and system design.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MATH 1031 and (PHYS 1021 or ECE 2142)

ARCH 3255. The Art of Detailing. 3 Credit Hours.

Exploration of architectural details and their application and evolution in architectural works through a historical perspective. Students research, analyze, describe, and document their findings into a bound volume.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2122 or 'Y' in AR22) and (ARCH 2151 or 'Y' in AR51)

ARCH 3273. Housing and Community Design. 3 Credit Hours.

This course explores the context of housing and the design of communities in the Modern era and uses examples both local and world-wide as case studies.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 3296. Movements in Modern Architecture. 3 Credit Hours.

History and theories of the architecture and urbanism of the modern period, from the beginning of the 19th century until the 1960's. Key ideas, texts and iconic buildings from the USA, Europe and other sites of the modernist diaspora are discussed. NOTE: This is a writing-intensive course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2141 or 'Y' in AR41) and (ARCH 2142 or 'Y' in AR42)

ARCH 3354. Sustainability and Architecture. 3 Credit Hours.

The study of the ecological, environmental, socio-cultural, and behavioral principles of sustainable architecture, including climatic considerations, total energy systems, resource management, energy-efficient technologies, ecological design strategies, as well as issues of social equity and environmental justice.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Course Attributes: SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2151 or 'Y' in AR51), MATH 1031, and (PHYS 1021 or ECE 2142)

ARCH 3362. Architecture Workshop. 3 Credit Hours.

Support for K-12 classroom teaching experience that is carried out through the Architecture and Design Education (ADE) initiative administered by the Center for Architecture and Design (CFAD). Students work with an interdisciplinary team that introduces an awareness of the principles of architecture and the built environment to students in city schools. Teams are composed of architecture students, a practicing architect and a school teacher who are designated and guided by CFAD staff. Students develop and administer lesson plans and work with the team and students for 4-6 weeks in a classroom setting. Students enrolled in the course work on independent projects and meet during agreed upon weeks with the course instructor to reflect on their work.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 3391. Independent Research. 1 to 7 Credit Hour.

A project assigned with the approval of the Program Director and conducted under the supervision of a faculty sponsor.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may be repeated for additional credit.

ARCH 3411. Career Preparation. 1 Credit Hour.

In this course, students will learn essential strategies for career entry including strong communication, presentation, and networking skills. This will enable students to increase their marketability as prospective employees.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 3412. Portfolio Design and Career Preparation. 3 Credit Hours.

This seminar will assist students in the creation of a unique and successful portfolio for use in job placement or graduate program admissions. The course will provide an overview of design presentation tools necessary for effective communication.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 3970. Honors Special Topics in Architecture, Site and Context. 1 to 3 Credit Hour.

Special topics seminar dealing with issues of site and context in the field of Architecture. Topics vary with year and instructor. Consult Architecture program office and honors course catalog for more information. NOTE: May be taken more than once for credit when each topic is unique.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ARCH 4011. Research Methods for Facility Management. 3 Credit Hours.

Research and analytical methods for facility management, including literature searches, data collection, analysis and application, basic descriptive and inferential statistics, benchmarking, audits, post-occupancy evaluation and diagnostic, performance and needs assessment. The course is project based and will engage in working relationships with companies in the Philadelphia region.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Facilities Management.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARCH 3013 and ARCH 3097.

ARCH 4096. Professional Practice. 3 Credit Hours.

Administrative and business aspects of the architectural profession, professional relations between architect, engineer, owner, and contractor. Legal aspects of modern practice. Marketing architectural services, project organization, and production.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Facilities Management, Architectural Preservation, Historic Preservation.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARCH 4099. Capstone Research Seminar for Facility Management. 4 Credit Hours.

The capstone course for all B.S. Facility Management majors that focuses on a self defined individual research topic within the field of facility management based on case study analysis requiring investigative research, problem definition, alternative considerations and solution building. It has a seminar format with discussion and commentary expected from all participants. The course results in the development and presentation of a senior level thesis.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Facilities Management.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ACCT 2101 or ACCT 2901), ARCH 3012, ARCH 3013, ARCH 3097, (ARCH 3152 or 'Y' in AR31), ARCH 4011, and RE 3501.

ARCH 4141. Global Preservation Practice. 3 Credit Hours.

This course introduces the agencies, global, national and regional, operating in the fields of architectural conservation, preservation and adaptive reuse. Through global, national and regional case studies, it develops a knowledge base of contemporary practice.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARCH 3111.

ARCH 4145. Research Methods for Historic Preservation. 3 Credit Hours.

The first half of this course introduces students to sources and methods of investigation particular to historic preservation and develops techniques employed in the physical, verbal, and quantitative documentation of structures, buildings, and sites. Students become acquainted with archival resources, methods of graphical recording and annotation, and preparation of narrative and quantitative records. The second half of this course provides an overview of the physical processes that affect the stability of buildings, structures, and sites and the range of available remedial actions.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Architectural Preservation, Historic Preservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARCH 3111.

ARCH 4182. Independent Study in History and Theory. 1 to 7 Credit Hour.

Individual study of advanced nature exploring aspects of architectural history and theory, under the guidance of a faculty advisor.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may be repeated for additional credit.

ARCH 4199. Capstone Research Seminar for Historic Preservation. 4 Credit Hours.

The is the capstone course for all B.S. Architectural Preservation majors that focuses on a self defined individual research topic within the field of architectural preservation or adaptive re-use. Students are required to demonstrate competence through a reality-based case study. The course has a seminar format with discussion and commentary expected from all participants. It results in the development and presentation of a senior level thesis.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architectural Preservation, Historic Preservation.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARCH 3111, ARCH 4141, ARCH 4145, and CHEM 1011)

ARCH 4211. Advanced Architectural Representation. 3 Credit Hours.

This course involves lectures and hands-on lab experience in advanced use and applications of computers. The course focuses on graphic programs that allow animation, mapping, visualization, and special rendering techniques. NOTE: Special authorization required for non-majors.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may not be repeated for additional credits.

ARCH 4282. Independent Study in Technology. 1 to 7 Credit Hour.

Individual study of advanced nature exploring aspects of architectural history and theory, under the guidance of a faculty advisor.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may be repeated for additional credit.

ARCH 4285. Professional Internship. 1 to 3 Credit Hour.

This course expands students' knowledge and professional experience through internships in architectural and other built environment firms. Students will be exposed to methods of professional practice to help them advance their careers.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARCH 4296. Design, Behavior and Culture. 3 Credit Hours.

This course aims to develop students' understanding of how users perceive environments and adapt to them, to investigate the potential role of environmental psychology factors in architectural design; and to develop a working methodology for thinking about the environment based on behavioral and social science principles. The course is writing intensive.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 2141 or 'Y' in AR41)

ARCH 4331. Architectural Design V. 6 Credit Hours.

Urban Design Studio. This studio will focus on the scale of the neighborhood, developing a variety of techniques to analyze, map, represent and generate urban environments considering geographical, economic, social, cultural, and formal factors. Students will develop urban design proposals and urban architecture through collaborative group work, engaging aligned fields such as landscape architecture, planning, or real estate and stakeholders, such as civic groups, neighborhood associations, etc. as appropriate.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bach of Sci in Architecture.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARCH 3231.

ARCH 4332. Architectural Design VI. 6 Credit Hours.

Architecture Capstone Studio. Students will select from a range of the studio topics, with offerings depending on faculty expertise. Topics will be drawn from the following: Innovation, Materials and fabrication studio; Interdisciplinary studio; Big and complex building studio; Community design studio; Global urban systems studio. Not all topics will be offered every year.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bach of Sci in Architecture.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARCH 3231, ARCH 3232, and (ARCH 4331, ARCH 3233, or ARCH 3234)

ARCH 4351. Environmental Control Systems for Buildings. 3 Credit Hours.

Heating, ventilating, air conditioning, electric power, lighting, acoustics, vertical transportation, plumbing, and fire protection for buildings.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1021 and ARCH 3152)

ARCH 4382. Independent Study: Site and Context. 1 to 7 Credit Hour.

Individual study of advanced nature exploring aspects of site, context, or urbanism in architecture, under the guidance of a faculty advisor.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may be repeated for additional credit.

ARCH 4482. Independent Study in Human Factors and Environment. 1 to 7 Credit Hour.

Individual study of advanced nature exploring aspects of environment and human factors in architecture, under the guidance of a faculty advisor.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Repeatability: This course may be repeated for additional credit.

ARCH 4596. Seminar in Architectural Theory. 3 Credit Hours.

Theories of architecture and urbanism during the modern and contemporary periods; participation in critical theoretical discussions and the development of a research paper in response to critical feedback. The course serves to lay the ground for the theoretical development of thesis ideas.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Architecture, Architecture Undeclared, Facilities Management, Architectural Preservation, Historic Preservation.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARCH 3243 or ARCH 3296)

Art (ART)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ART 0822. Human Behavior and the Photographic Image. 3 Credit Hours.

How do photographs become more than just a pile of disparate images? Is there more to photography than that single "decisive moment" in the hunt and capture of an image? How do photographers comment on issues that are important to them? How can photographs tell a story? Is there a way one can use the art of photography to elicit change? In this class, students will use their digital cameras to investigate individual photographs, as well as series of photographs. We will look at photography in its historical context -- at the advent of documentary photography and photojournalism, and at narrative photography in its more contemporary form, as photographers use it to chronicle their own lives and to tell a story. Through the exercises of looking at and making photographic images, several core concepts of social work, along with theories of human behavior in the social environment, will be introduced. Students will learn not only about the place photography holds in our culture, but our culture itself, and the students' place in that culture. Students will critically analyze published photographs, as well as photographs made during the class. The semester will culminate in a class exhibition where students will be given the opportunity to present their photographs to the public, demonstrating their understanding of human behavior in the social environment. NOTE: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed SSWU 0822, GAD 0822 or PHOT 0822.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ART 1010. Special Topics. 1 to 3 Credit Hour.

In this studio art course, approaches to making and understanding images in various media will be addressed.

Repeatability: This course may be repeated for additional credit.

ART 1011. Introduction to Visual Language, 3-D Design. 3 Credit Hours.

A foundation course in 3-D design focusing on the principles, elements, and technical processes for visual understanding and creative expression.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ART 1012. Introduction to Visual Language, Design. 3 Credit Hours.

A foundation course in design focusing on the principles, elements, and technical processes for visual understanding and creative expression.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ART 1101. Introduction to Beginning Ceramics for Non-Tyler BFA Majors. 3 Credit Hours.

This course introduces the aesthetic, concept and design of functional objects. Investigates tactility and the process of realizing form, and the effective use of the wheel as a creative tool. Introduces historic and contemporary approaches, firing techniques, and glaze application. NOTE: This course does not fulfill Tyler BFA requirements.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1201. Introduction to Fibers for Non-Tyler BFA Majors. 3 Credit Hours.

This course focuses on the fundamental structural and surface techniques of fibers. Techniques including weaving, surface dyeing, felt making, embroidery, basketry, and basic hand and machine sewing will be introduced. Students will be encouraged to explore their own unique interpretations using alternative and traditional fiber materials to create contemporary works of art. NOTE: This course does not fulfill Tyler BFA requirements.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1301. Introduction to Glass for Non-Tyler BFA Majors. 3 Credit Hours.

This is a studio course that will introduce the student to a variety of glass studio methods and processes. It will include glassblowing, glass casting, and glass fabrication. NOTE: This course does not fulfill Tyler BFA requirements.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1401. Introduction to Jewelry for Non-Tyler BFA Students. 3 Credit Hours.

This course teaches the student to design and create objects in metal, and combine metal with other materials. The course focuses upon both design and technique. The student learns the fundamentals of design, current styles and formal characteristics of jewelry and metal objects through a series of design problems. Basic techniques of metal manipulation are covered from working with pre-existing metal forms as well as transforming objects into metal from non-metal models. The student learns to understand the field of metal as it relates to contemporary society, and the potentials of a career as an artist, working in metal and plastics. Students will be encouraged to design jewelry and/or objects that have personal meaning. Students will be asked to conceptualize each assignment, research historical precedents, and develop their ideas through a series of drawings and/or models. NOTE: This course does not fulfill Tyler BFA requirements.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1402. Introduction to CAD for Non-Tyler BFA Students. 3 Credit Hours.

Using Rhinoceros 3D CAD modeling software and Flamingo photorealistic rendering software the student will learn to customize the modeling environment and create basic graphic objects: lines, circles, arcs, curves, solids, and surfaces. Students will proceed to draw with precision using coordinate input and object snaps and modify objects with edit commands. This course will show students how to display any portion of the model, import and merge models and output models to different file formats. Creating, testing and verifying solid models in STL file format for production of rapid prototypes will be a focus of this course. Finally, photorealistic rendering of CAD models will be practiced. NOTE: This course does not fulfill Tyler BFA requirements.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1501. Painting on Paper for Non-Tyler BFA Students. 3 Credit Hours.

This introduction to watercolor and other water-based media course meets in the studio as well as on-site throughout the city. Subjects range from landscape to the model and still life with an emphasis on art historical and current references to subject matter. Painting from observation provides the structure for almost all the assignments but individual interpretation and fluency with color are the ultimate goals of the class. NOTE: This course will not fulfill Tyler BFA requirements.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1502. Introduction to Visual Language, Painting. 3 Credit Hours.

A foundation course in painting focusing on painting techniques, conceptual development, and the use of elements of design for creative expression.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ART 1503. Introduction to Visual Language, Drawing. 3 Credit Hours.

A foundation course in drawing focusing on drawing techniques, conceptual development, and the use of elements of design for creative expression.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ART 1504. Philadelphia Sketchbook. 3 Credit Hours.

This non-majors drawing course combines studio instruction in basic drawing skills as well as on-site drawing in Philadelphia's many historical sites and museums. Emphasis will be on improving observational skills and drawing techniques. Students will be encouraged to develop their own unique vision. This course has no prerequisites. Daily outings will be required to various significant Philadelphia sites.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

ART 1505. Intermediate Painting. 3 Credit Hours.

A second semester level course in oil painting that builds on the ideas introduced in ART 1502 (formerly ARTU 1101 (C079)) with emphasis on conceptual and technical growth. NOTE: This course is required for Art and Art Education majors.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 1502 or ARTU 1101)

ART 1506. Intermediate Drawing. 3 Credit Hours.

Figurative painting in pastel coupled with basic drawing approaches and techniques. A second level drawing course emphasizing more advanced drawing strategies and the use of chalk pastels. The model is used, although not exclusively.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 1503 or ARTU 1401)

ART 1601. Art Photography: Darkroom. 3 Credit Hours.

The student is expected to master the basic photographic skills quickly through the use of lecture/demonstration, critiques and independent lab and field work. The course then concentrates on the use of photography as a fine art medium.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1602. Art Photography: Digital. 3 Credit Hours.

The basic principles of digital photography, including shooting with a digital camera, manipulating images within the computer, and printing to inkjet printers are taught. The course focuses on black & white photo, including duotones. Emphasis is placed on technical expertise, creative development, and an understanding of the potential of imaging software.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1603. Art Photography / Digital On-Line. 3 Credit Hours.

This course teaches students the use of low-tech devices such as cell phones and point-and-shoot cameras for photography, video and sound recording. The results are posted to art-specific online visual communities similar to Facebook and YouTube. Responses from fellow students are evaluated in class critiques. This course raises the aesthetic bar above what is usually seen online. It teaches students how to see the world through a camera, organize the visual spaces found in their local community, and fill these photographs with meaningful content that can communicate the personal vision they develop during the semester to a broader audience.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1604. The Shared Image: Photography and Social Media. 3 Credit Hours.

This course will use smartphone photography to explore the relationship between conceptual aspects of photographic imagery and our use of social media. Students will be asked to consider their role as a cultural producer and contemporary uses of imagery in relation to Photography as an artistic medium. The use of social media platforms will provide students with real-world outlets to share ideas and interact with others, and encourage them to take account of the personal responsibility associated with how we use imagery to create meaning and represent ourselves in a virtual community.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1701. Screenprinting. 3 Credit Hours.

This course engages students in historic and contemporary approaches to water-based screenprinting concepts and technologies, while encouraging a multi-disciplinary approach to fine art print production. Students will begin with direct cut-paper and hand-painted stencils and move into more complex hand-drawn and digitally manipulated photographic techniques. There will be an emphasis on multi-colored, multi-layered prints as well as the print as image, book, poster, installation, and sculpture. Community and group-based activities will be an integral part of the course.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1702. Artist Books, Zines and Independent Publishing. 3 Credit Hours.

Throughout the semester, you will learn the basics of bookbinding, DIY independent publishing, and limited printmaking processes. This will include, but is not limited to: basic book binding terminology, tools, and structures; basic printmaking techniques, covering hand printing techniques and alternative printmaking processes; development and dissemination of work completed in class; and working knowledge of contemporary practices and working artists in the Book Arts and Zine fields.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Art, Tyler:Graphic Interactv Design.

Repeatability: This course may not be repeated for additional credits.

ART 1801. Non-Tyler BFA Woodworking. 3 Credit Hours.

Have you ever wanted to make furniture that doesn't come from Ikea? Have you ever looked at a beautifully crafted chair and asked, "How does that get made?" Have you ever tried to build a bookcase from scrap material only to have it fall apart a week later? Do you know the difference between a "hard" and a "soft" wood? (Hint, it has nothing to do with how easy it is to scratch.) This course is designed to familiarize students with the language and skills necessary to create both functional and aesthetic works out of wood. Through practical demonstrations, readings, project based assignments and group/individual critiques, students will advance their studio practice to utilize wood as a structural material and will have a deeper understanding of craft theory as it applies to wood. Each student will have the opportunity to construct several sculptural and functional furniture pieces over the course of the semester.

Repeatability: This course may not be repeated for additional credits.

ART 1802. Introduction to Welding. 3 Credit Hours.

This course introduces the basics of metal fabrication with an emphasis on sculptural design. Skills covered include cutting, bending, cold assembly methods, welding, and finishing. Students will become familiar with a range of metal shop tools - including hand tools, power and pneumatic tools, stationary equipment, and welders - and will demonstrate competency in these tools and related processes through individual skill assessments and project assignments. This course is designed to cultivate the enjoyment of hands-on practice and will provide a safe environment in which to build skills, experiment with materials and processes, and take creative risks. However, developing technical proficiency requires hard work and practice, and students will be held to a high standard. Students' work will culminate in a final project incorporating multiple fabrication processes learned over the course of the semester, developed in consultation with the instructor based on each student's goals and/or interests.

Department Restrictions: May not be enrolled in one of the following Departments: Tyler:Painting and Sculpture, Tyler:Art, Tyler:Crafts, Tyler:Graphic Interactv Design.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ART 2001. The Art of Infographics. 3 Credit Hours.

This course is an introduction to data visualization and infographic design. It explores the history of data visualization and infographic design, from cave paintings to contemporary design, covering static, animated and interactive solutions. Lectures on visual literacy and graphic design foundations will help the students develop the vocabulary necessary to critically analyze contemporary infographics. Students receive basic instruction in the creation of infographics and develop their own infographic utilizing supplied data. This course will include readings from Edward Tufte's *The Visual Display of Quantitative Information*. Tutorials may also be used for outside software instruction.

Repeatability: This course may not be repeated for additional credits.

ART 2002. Introduction to Illustration. 3 Credit Hours.

This course introduces students to concepts and techniques in illustration. Basic drawing skills will be needed for this course.

Repeatability: This course may not be repeated for additional credits.

ART 2003. Introduction to Web Design. 3 Credit Hours.

This course instructs students in the fundamentals of interactive design with a focus on the use of interactive software, layout, typography, hierarchy and organization. Basic working knowledge of Adobe Photoshop and Illustrator required.

Repeatability: This course may not be repeated for additional credits.

ART 2004. Mobile Apps: Design/Prototype. 3 Credit Hours.

This course will walk students through the creative process of concept development, design and prototyping a mobile application. The audience for this class includes, but is not limited to: entrepreneurs, business students, computer science/programming majors, advertising students, and anyone interested in design thinking and creative problem solving. Students do not need any prior design knowledge, though some basic Adobe Photoshop skills would be helpful. The course will work through the creative process of identifying a problem, conducting research, brainstorming a solution, studying the user experience, creating a wireframe and executing many iterations to design a working prototype. This course will not involve the actual development of the app. After engaging in group brainstorming and concept development sessions students will understand how group work can help them arrive at the best possible solution for a problem. User experience exercises investigate how a user interacts with a product to create a positive experience. Wireframe exploration and design iterations will establish an overall plan for the mobile app. A study of color, composition and typography will also enhance the visual execution of the app. The final apps will be created as working prototypes.

Repeatability: This course may not be repeated for additional credits.

ART 2010. Special Topics in Art. 3 Credit Hours.

In this studio art course, approaches to making and understanding images, objects and experiences in various media will be addressed. Each topic will be addressed through contextual, procedural, material and critical lenses.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 2011. Socially Engaged Arts Practices in Communities. 3 Credit Hours.

Community Arts brings artists together with people of a community of location, spirit, or tradition, to create art that is based in the life of that community. This course introduces students to the history and theory of Community Arts and current projects in Philadelphia and nationally, through field trips, guest speakers, readings and research. Students will engage in arts projects to orient to and re-discover their own communities of origin in relation to Community Arts and examine issues of race, class, and aesthetics. The course prepares students to become involved in the field internships that are being offered through Tyler/Temple's Arts in Community Program and is a prerequisite for other Arts in Community courses.

Repeatability: This course may not be repeated for additional credits.

ART 2061. Moving Image and Sound. 3 Credit Hours.

This foundational course introduces students to the possibilities of moving image and sound practice. Through screenings and readings by a diverse range of artists, filmmakers, and theorists, students will be introduced to critical concepts in contemporary time-based art practice. Assignments will explore the relationship between still and moving image, sound and deep listening, performance, film/video production, and post-production. Students will acquire a strong understanding of digital video and audio capture and contemporary digital editing practices.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2101. Beginning Ceramics. 3 Credit Hours.

Wheel thrown and hand formed pottery and sculpture, glazing, and firing, with an emphasis on design as an organic outgrowth of the ceramic process. NOTE: This course is a prerequisite for all other ceramic courses.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 2102. Intermediate Ceramics. 3 Credit Hours.

Creative problems in pottery for the student who has mastered use of the wheel and basic ceramic processes. Kiln firing techniques and simple glaze formulation will also be covered.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2101 or CRFT 2151)

ART 2201. Introduction to Fibers and Material Studies. 3 Credit Hours.

Students are introduced to a wide range of fiber processes, tools, materials, equipment, and ideas in relation to the contemporary discourse surrounding Fibers and Material Studies. Students will learn about contemporary artists working within the field as well as gain an understanding of its histories. This course includes an intro to dye and print on cloth, weaving, tapestry, sewing and various construction techniques. Emphasis is placed on material exploration as well as developing an awareness of the conceptual framework within which one can explore. Visits to local galleries, museums and artist studios will augment the class. Prior to fall 2016, the course title was "Off Loom Structure I".

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 2202. Dyeing for Color I. 3 Credit Hours.

This class is an investigation into the unique properties of dye and color. Over-dyeing and discharge processes are introduced as methods of adding layers of color. Applications will range from controlled immersion dyeing to expressive direct application and resist processes. The historical use of color, contemporary readings, philosophy of color, its political implications and critiques augment this class. Prior to fall 2016, the course title was "Fabric Pattern and Image I".

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1521 or VS 1151)

ART 2203. Alternative Materials. 3 Credit Hours.

This course involves the exploration of alternative materials. Products such as Tyvek, rubber, adhesives, found and recycled materials will be combined with processes such as collage, layering, stitching, and heating. These materials and processes will be used in conjunction with other media and uncommon methods of joining to create a sculptural surface. Students are encouraged to develop a personal vocabulary by combining these techniques with images and found, purchased and recycled materials as well as media from other disciplines. Emphasis on the process of collecting will be used as a basis for the creation of work which involves a contemporary, mixed-media approach to surface treatment and its relationship to structure, form and content. Historical and contemporary issues and practices involving alternative media are explored through readings, field trips, lectures and class discussions.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (VS 1351, ARCH 1011, FDPR 1531, FDPR 1521, or 'Y' in AR11)

ART 2204. Woven Structure I. 3 Credit Hours.

An introduction to weaving using the floor loom. Tapestry and other structural techniques will be taught. Both an historical and a contemporary approach will be encouraged.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2205. Book Structures. 3 Credit Hours.

This course is an introduction to Book Arts. It includes both traditional and contemporary approaches as well as working with the book as a sculptural medium. Students will be encouraged to experiment with a wide variety of materials and processes and will learn to make several book structures to use as a means of expressing narrative and sequential concepts through which they will develop conceptual abilities and technical proficiencies. NOTE: Formerly titled "Fiber Structures I: Dimensional Form."

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531 or VS 1351)

ART 2301. Introduction to Glass. 3 Credit Hours.

An introductory studio class for students who are interested in learning the basic processes of off-hand glass working techniques. A brief history of glass, studio operations and studio safety will be covered in slide lectures and studio demonstrations. Glassblowing, mold blowing, glass finishing and team work will be emphasized through demonstrations. NOTE: This course is a prerequisite for all glass courses. Studio work outside of class time is required.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 2302. Intermediate Glass. 3 Credit Hours.

An advanced introductory studio course for learning off-hand blowing techniques. Advanced team work, finishing glass objects, and studio operations will be demonstrated the use of color and its application to hot glass will be introduced.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2301.

ART 2303. Glass Construction, Topic: Cold Glass. 3 Credit Hours.

This studio course provides comprehensive instruction with regard to "cold" glass-working techniques. 2-D and 3-D glass objects will be constructed with the employment of a variety of procedures without the introduction of heat. The classes will encourage the areas of student expertise. Thus, information on surface treatment (glass texturing), joining (glass to glass, to other materials), and finishing processes will be covered. Proficiency in the creation of structurally and conceptually cohesive objects is stressed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 2401. Jewelry. 3 Credit Hours.

An introduction to the design and fabrication of small scale functional objects and jewelry, exploring metalsmithing, casting, mold making, machine use, anodizing, linkages, plastics and finishing. The course focuses upon both design and technique. The student learns the fundamentals of design, current styles and formal characteristics of jewelry and metal objects through a series of design problems. Basic techniques of metal manipulation are covered from working with pre-existing metal forms as well as transforming objects into metal from non-metal models. The student learns to understand the field of metal as it relates to contemporary society, and the potentials of a career as an artist, working in metal and plastics. Students will be encouraged to design jewelry and/or objects that have personal meaning. Students will be asked to conceptualize each assignment, research historical precedents, and develop their ideas through a series of drawings and/or models.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 2402. CAD-CAM I: Introduction to 3D Modeling. 3 Credit Hours.

In this introduction to CAD-CAM, the students learn to: customize the modeling environment; create basic graphic objects-lines, circles, arcs, curves, solids and surfaces; draw with precision; create, test and verify solid models in STL file format for production of rapid prototypes and render models. Students will learn to use professional-level software used for 3D modeling across many industries worldwide, including product design, architecture and jewelry. Students follow self-guided lessons/assignments to learn the basics of computer aided design (CAD), then use the digital tools learned in creating original projects. Generally, one session per week will be devoted to demonstrating the lessons and related CAD functionality, and the second session will be devoted to independent projects and scheduled one-on-one time with the instructor. NOTE: This course is sometimes offered as an online course under Section Number 701. Prior to Fall 2023, the course was titled "Introduction to 3D Modeling."

Repeatability: This course may not be repeated for additional credits.

ART 2403. Jewelry II. 3 Credit Hours.

This is a continuation of ART 2401 Jewelry.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2404. Intermediate 3D Modeling. 3 Credit Hours.

This course is a continuation of CAD/CAM I. The primary objective of this course is to create a solids model in Rhino. The model is then verified for accuracy using Magics RP and prepared for rapid prototyping (RP). Students create a ring model to be produced via the Sanders Model Maker wax rapid prototyping system. These models are verified using Sanders Model/Works and Bview software. The student is assisted in having the model produced and cast. The concepts and principles of computer rendering the 3-D models is a major component of this course. Photorealistic renderings of the student's Rhino models are produced using the NuGraf rendering system. Course Software: Rhinoceros, Magics RP, ModelWorks, Bview and NuGraf.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2402 or CRFT 2433)

ART 2405. Machine Tool Processes. 3 Credit Hours.

The lathe, milling machine, drill press, and other machines are examined for their creative potential.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2406. Metalsmithing. 3 Credit Hours.

Advanced metal forming techniques are explored. Students are encouraged to produce functional hollowware and objects of a non-traditional source.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2407. Casting. 3 Credit Hours.

Controlled inertial (centrifugal) casting, rubber moldmaking, wax injection, vacuum assisted casting, high frequency melting, sand casting, and other specialized casting processes are used to produce jewelry and other objects in precious and non-precious metal.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2408. Electroforming Workshop. 3 Credit Hours.

Students with prior metalworking experience have the opportunity to explore nontraditional electrochemical processes for the creation of unique forms in metal.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2409. Plastics for Jewelry and Objects. 3 Credit Hours.

An introduction to forming, fabricating, joining, and casting a variety of plastic materials. This 20th and 21st century material is studied for its visual and artistic potential, as well as its applications in product design. Students learn to combine these materials with metals and other media.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2411. Production Processes. 3 Credit Hours.

Introduction to production processes and marketing. Students will design and produce an object in quantity and be assisted in the marketing of that object.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2412. Color in Metals. 3 Credit Hours.

Aspects of applying color to metals or changing the existing color of metallic surfaces are explored. Students are introduced to the new techniques, color anodizing aluminum, and the space-age metals titanium and niobium. Application of color resin and vitreous enamels are also examined.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2413. Enameling. 3 Credit Hours.

All basic enameling techniques, which include Plique A Jour, Limoges, Champeleve, Bustail, etc. The course explores the use of synthetic resins as an addition to the enamelist's repertoire.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2414. Casting. 3 Credit Hours.

Controlled inertial (centrifugal) casting, rubber moldmaking, wax injection, vacuum assisted casting, high frequency melting, sand casting, and other specialized casting processes are used to produce jewelry and other objects in precious and non-precious metal.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2415. Lapidary and Stone Setting. 3 Credit Hours.

Advanced lapidary processes are demonstrated which include the cutting and polishing of faceted stones designed by the student. Traditional and innovative stone setting methods are also explored.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2416. Photo Processes and Etching Jewelry. 3 Credit Hours.

All aspects of the photographic processes that can be used with metals and plastics are introduced. This includes photo-resist techniques for metal etching, plating, and anodizing, along with photo embedments in plastics. NOTE: This course is for majors only.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 2501. Painting. 3 Credit Hours.

This studio-intensive course is designed to give the student a thorough grounding in the art and craft of oil painting. Lectures, group critiques and field trips are planned in order to establish a wide reference base and an historical and contemporary context.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2502. Intermediate Drawing. 3 Credit Hours.

Traditional and non-traditional approaches to drawing will be explored in this studio-intensive course. In addition to observational drawing, sources such as film, photography, and digital media will be investigated.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2503. Painting. 3 Credit Hours.

This studio-intensive course is designed to give the student a thorough grounding in the art and craft of oil painting. Lectures, group critiques and field trips are planned in order to establish a wide reference base and an historical and contemporary context.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2504. Intermediate Drawing. 3 Credit Hours.

Traditional and non-traditional approaches to drawing will be explored in this studio-intensive course. In addition to observational drawing, sources such as film, photography, and digital media will be investigated.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2505. Painting Materials and Techniques. 3 Credit Hours.

The course will address both traditional and contemporary topics in the materials and techniques of drawing and painting.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2506. Painting Workshop. 3 Credit Hours.

A studio painting course with emphasis on the development of a student's individual point of view. Class work will focus on the development of the student's ability to work at a conceptually advanced level. Experimentation is encouraged.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2507. Intermediate Figure Drawing. 3 Credit Hours.

An intermediate course focused entirely on the human figure as subject. There is emphasis on a variety of approaches to drawing the figure. Dynamics, proportion, anatomy, volume, and structure will be investigated through various drawing methods and selected materials. Frequent historical references will be made through reproductions and slides, and 20th century figure drawing will be thoroughly discussed.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2508. Digital Drawing. 3 Credit Hours.

This course engages students with the possibilities of the computer as a drawing tool. Digital Drawing expands the conceptual and pictorial fundamentals of drawing and painting.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2509. Drawing Workshop. 3 Credit Hours.

Studies in drawing emphasizing individual instruction for students of varied backgrounds.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2601. Photo I: Digital. 3 Credit Hours.

An introduction to the fundamental vocabulary and techniques of digital photography with an emphasis on developing skills of perception and visual competence in both the creation and consumption of lens-based imagery. Students will explore the complex relationship between content, composition, technical execution, and visual ideas that communicate with intent. Course topics include digital workflow methods for exhibition quality output using digital cameras, scanners, contemporary imaging software, and printers. Projects will include both color and black and white imagery. Prior to fall 2016, the course title was "Photography I."

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 2602. Digital Imaging. 3 Credit Hours.

This course deals with photographic images and how ideas can be expressed through the manipulation of these images using the computer as a tool for creative expression. Excellent basic course in image software use and introduction to the use of the computer.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 2603. Photo I: Digital. 3 Credit Hours.

In this class, students will explore the visual language of digital photography using Rome as their studio. Rome's many layered history juxtaposed with its current global urban landscape offers a unique opportunity to photograph an important European city. The technical component of the class consists of mastering manual digital camera operation and exposure. Students also learn to use contemporary imaging software and to produce digitally-generated output. Students will gain an understanding of the aesthetic possibilities of photography through assignments, lectures on both historic and contemporary photographers, photo field trips in Rome, and visits to photo galleries and museums. Critiques are conducted through a shared website. Students will be expected to complete a final project in which they choose one aspect of Rome's multi-layered landscape to visually explore in depth. Prior to fall 2016, the course title was "Photography I".

Repeatability: This course may be repeated for additional credit.

ART 2604. Introduction to Photography (Online Digital Course). 3 Credit Hours.

This is an introductory course in photography. We will concentrate on learning the basic camera functions, proper exposure of an image, and the formal and conceptual considerations in composition. Although there will be an emphasis on the technical aspects of photography, this course will also introduce students to many contemporary artists working in photography, as well as the history of the photographic medium and how to appropriately approach the critique setting.

Repeatability: This course may not be repeated for additional credits.

ART 2611. Eco-Friendly Plant Based Photo Printing. 3 Credit Hours.

This eco-friendly plant-based photo printing course focuses on sustainability using sunlight and common plant materials from your yard or the grocery store. Photographic processes covered are anotypes, chlorophyll printing, eco printing, phytograms and other plant-based printing methods. Students will print with and on plant materials, learn to make developers from plants rich in phenols and make prints using expired papers and film. Demonstrations and critiques will be synchronous and work will be completed outside of class. Troubleshooting and discussions will take place through Canvas between class sessions.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

ART 2701. Survey of Lithography and Serigraphy. 3 Credit Hours.

A beginning survey of basic techniques of lithography and screenprinting. The course introduces a number of short projects designed to give a broad experience with the media. Additional topics include print presentation, care of tools and materials, and a historical survey in slides and actual examples.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2702. Survey of Etching and Relief. 3 Credit Hours.

A beginning survey of the basic techniques of etching and relief printing. The course introduces a number of short projects designed to give a broad experience with the media. Additional topics include print presentation, care of tools and materials, and a historical survey in slides and actual examples.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2703. Book Structures. 3 Credit Hours.

This course is an introduction to the art of the book: a significant format for the expression of information and creativity. Bookbinding has a long history in Europe and a particularly rich history in Rome. Students will engage first hand with the historical tradition and contemporary possibilities of this craft. The course will cover traditional binding techniques including folded, sewn, and adhesive structures, as well as custom portfolio design. Emphasis will be placed on utilizing the unique format of the hand-bound book to engage with students' visual and psychological experience of Rome. Course projects will incorporate a range of media including drawing, photography, collage, graphic design and printmaking in the execution of both traditional and modern book structures. Each project will provide an opportunity for students to plan and execute unique book designs reflecting their personal Roman experience.

Repeatability: This course may be repeated for additional credit.

ART 2704. Serigraphy. 3 Credit Hours.

The fundamentals of screenprinting as a fine art print medium. This course introduces various handmade stencil methods as well as the photo processes. Students use non-toxic acrylic inks with projects that emphasize color organization and conceptual challenge.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2705. Etching. 3 Credit Hours.

The beginning level course in intaglio and relief printing processes. This course covers traditional methods of platemaking, such as etching, drypoint, and aquatint, as well as explorations into photo transfer and color viscosity printing.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2706. Intaglio Printmaking. 3 Credit Hours.

This introductory studio course engages students in historic and contemporary printmaking concepts and technologies, while encouraging a multi-disciplinary approach to fine art print production. Students are introduced to a broad range of ideas, methods and materials that focus upon the intaglio printmaking processes, but also include monoprints and monotypes. Initial projects are structured around the more traditional drawing, plate making and printing processes. As students become more comfortable with the fundamentals of the medium, they are encouraged to develop a more personal approach to concept, subject, scale, material and process. Studio projects will be supplemented by field trips to museums, galleries and artist studios to give students first hand experience of the historic and contemporary context of printmaking in Italy. Field trips may include the National Print Cabinet, where students may closely examine original prints by Italian masters, which may include Da Carpi, Canaletto, Tiepolo, Piranesi and others.

Repeatability: This course may not be repeated for additional credits.

ART 2707. Lithography. 3 Credit Hours.

A basic course in metal plate lithography. Preparation, processing, and printing are studied with the intention of giving the beginning student control over a medium that is often thought to be complicated. Students work with traditional hand-drawn imagery as well as transfer and photo-litho, in black and white and color.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 2745. Contemporary Papermaking in Rome. 3 Credit Hours.

Papermaking in Rome introduces the cycle of the paper making process, including various aspects of processing and contemporary innovations in Papermaking. There is a strong focus on the interaction between papermaking and printmaking and methods for the successful integration of both practices. This is a wet lab course which requires hands-on experimentation to observe the nuances and subtleties that occur between the hand-formed sheet and the subsequent printed matrix. Learners acquire the capacity to produce high quality papers and understand the potential for those papers to be applied meaningfully with monotype, relief, and collagraph print projects.

Repeatability: This course may not be repeated for additional credits.

ART 2801. Sculpture. 3 Credit Hours.

Develops the integration of sculptural concept and practice, and the critical analysis of completed sculpture through a series of projects that investigate basic sculptural processes and issues. Lectures on directions in sculpture, technical demonstrations, and group critiques are scheduled.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1351)

ART 2802. Video Workshop. 3 Credit Hours.

This course is an introduction to basic digital video editing.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2803. Installation. 3 Credit Hours.

Investigations into the intrinsic meaning of the site will be coupled with the effective channeling of those issues into the work of art. Ideas, material, and placement will be analyzed so as to achieve cogent integration into the site. Introduction to use of scale models and various types of models to analyze a site and plan work for a site is part of this course. Lectures, individual discussions, and group critiques are scheduled.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((FDPR 1531 and FDPR 1532) or VS 1351) and (ART 2801 or ART 2807)

ART 2804. Mold Making Technology. 3 Credit Hours.

Flexible moldmaking techniques are explored using foam, latex, RTV and silicone rubber, as well as alginate compounds for direct body casts. Non-flexible techniques include wood forms for cement castings. Positives are cast in cement, plaster, rubber and polyurethane using both solid and hollow casting methods. Students incorporate these techniques in directed projects, or for completing self-directed work.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1531 and FDPR 1532) or VS 1351) and (ART 2801 or ART 2807)

ART 2805. Figure Modeling. 3 Credit Hours.

This course stresses clinical observation as well as analytical response to issues pertaining to the body. The nature and aspects of representation in the sculptural tradition are considered. Work from the model in class.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1351)

ART 2806. Art Matters. 3 Credit Hours.

Art Matters is designed for the sophomore student intending to major in painting. The course objective is to incorporate a working understanding of art-historical precedents and their relationships to cultural, political, historical, and critical discourses as a complex and vital component of the development of a contemporary painting practice. This course combines a seminar approach of study using readings, film, field trips, and discussions in relation to studio practice.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 2807. Sculpture: Rome. 3 Credit Hours.

This is an introductory course on the basic principles of object making. Demos on specific material use and procedures will alternate with lectures and site visits that will link the course with the student's experience of Italian art and architecture. Working with a variety of methods and materials including plaster casting, clay and wax modeling and concrete fabricating process, students will learn to communicate technically as well as conceptually through three-dimensional form.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Art History.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1351)

ART 2808. Figure Modeling: Rome. 3 Credit Hours.

This course focuses entirely on the human figure as subject. Along with working from the model in class there will be visits to museums and sculptural sites introducing students to the figurative tradition in Rome: artwork ranging from ancient Greek and Roman carvings to Baroque figures in movement that characterize the cityscape. While the course is designed to help the student develop an understanding of the artistic representation of the human figure in historic and aesthetic terms, its ultimate goal is to have each student develop a personal interpretation of figuration as it relates to contemporary culture.

Repeatability: This course may be repeated for additional credit.

ART 2815. Social Practice and Socially Engaged Art. 3 Credit Hours.

This course introduces students to the many issues and ideas in Social Practice and Socially Engaged Art practices. These disciplines build on a lineage of contemporary art movements including public art, institutional critique, performance art, relational aesthetics, guerilla art and environmental art. We will investigate the role of accessibility, audience, participation, permanence, community, ownership, interactivity and politics in public works. The focus will be to create socially motivated and participatory art that engages non-art audiences and that exists outside of traditional art venues. This engagement with varying audiences, from passersby to targeted participants will take different forms, including collaborations, the creation of new experiences in familiar and known sites (i.e. Temple campus), the provision "services" in unexpected locations, the activation of historical sites and monuments, and the repurposing of unused and under-used locations around North Philadelphia and the city.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

Course Attributes: SF

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1511 (may be taken concurrently) or FDPR 1512 (may be taken concurrently)) and FDPR 1531.

ART 2900. Honors Special Topics. 3 Credit Hours.

In this studio art course, approaches to making and understanding images in various media will be addressed.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ART 2901. Honors Digital Imaging: Seeing Photographically. 3 Credit Hours.

Life is full of wonder when you simply open your eyes to it. All it takes is an open mind and a shift in your way of seeing. The primary objective of this course is to introduce students to the act of seeing photographically, creative problem solving, and thinking visually while learning contemporary digital technology and practices. Students will be instructed on the use of a variety of input and output devices (cameras, scanners, printers) and software applications. Lecture and research on historical and contemporary artwork inform creative approaches to visual thinking and assignments build on creative problem-solving skill sets. Emphasis is placed on image making, proper workflow, interpretation, and output. Students produce a portfolio that demonstrates critical visual thinking and effective skill development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ART 3010. Special Topics in Art. 3 Credit Hours.

In this studio art course, approaches to making and understanding images, objects and experiences in various media will be addressed. Each topic will be addressed through contextual, procedural, material and critical lenses. This course assumes a strong level of basic studio knowledge in one or more art disciplines.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3011. Interactive Projects. 3 Credit Hours.

The intent of this course is to broaden the studio practice through the use of interactive technologies. Students will create a portfolio web site and an animated, interactive Flash project to be shown on the web or CD-ROM. Software explored in this course includes DreamWeaver, Flash and SoundEdit 16. Basic HTML and Action Scripting is also included in the curriculum. The finished work will be burned onto a CD-ROM and posted on the web. NOTE: Special Authorization for Non-Majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3012. Optics and Light. 3 Credit Hours.

In this course, students will explore phenomena of optics and light through the use of glass. They will learn how to create optical objects such as water lenses and prisms, investigating how they transform and extend vision. Students will also learn how to create their own glass lenses and manipulate existing lenses. Use of glass optics in distortion, reflection, image making, and installation will be explored, and we will employ various light sources in combination with glass to make immersive environments. No glass experience is required for this course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 3085. Field Internship. 3 Credit Hours.

A field internship must provide practical experience in a setting which is relevant to the student's course of study, such as in a gallery, museum or community art center, etc. A comprehensive paper must be written.

Repeatability: This course may be repeated for additional credit.

ART 3101. Advanced Ceramics. 3 Credit Hours.

Problems in ceramics for the advanced student with emphasis on individual research projects and upon portfolio development.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3103. Two-Dimensional Ceramics. 3 Credit Hours.

The making and production of tiles and other essentially two-dimensional ceramic items for application to interior and exterior architecture. Several processes, techniques and firing methods are explored. These include both high and low temperature firing, mold, and hand pressing techniques. The history of tiles and ceramic wall reliefs are surveyed with concentration on relevant periods and countries.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3104. Ceramic Materials. 3 Credit Hours.

An advanced level examination of ceramic processes, the formulation of clay bodies and glazes, common firing practices, and the construction of kilns.
NOTE: The course required and intended for ceramic majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3105. Porcelain. 3 Credit Hours.

A ceramic course that covers the special properties of porcelain clay. Various hand building, throwing and casting techniques are explored as well as experiments in glazing and the preparation of clay bodies. Historical importance of porcelain is reviewed along with many contemporary uses of this material in vessel and sculptural forms.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3106. Advanced Throwing and Wheel Work. 3 Credit Hours.

A course concentrating on the use of the potter's wheel, using a problem-solving approach. Structured to develop the necessary skills to enable the student in making personal aesthetic choices with regard to three-dimensional ceramic forms created on the wheel.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3107. Ceramic Mold Making. 3 Credit Hours.

Students produce both two and three-piece plaster molds to be used in the slip casting process for the production of multiple ceramic items. The course examines both the historical and contemporary use of molds and slip casting. During the semester the students are encouraged to incorporate the use of slip casting into their current style of work.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2102.

ART 3108. Ceramic Structures. 3 Credit Hours.

The approach to this course is to utilize ceramic materials for the creation of sculpture. The history of ceramic sculpture as well as contemporary movements is stressed. Various techniques used in ceramic sculpture, techniques and materials used in conjunction with ceramics are explored.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3110. Ceramic Workshop. 3 Credit Hours.

Ceramic Workshop is a course where a variety of skill levels and aesthetic points of view can interact. The course itself rotates through several specialty topics corresponding to current themes in Ceramics.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2102 (may be taken concurrently)

ART 3201. Threading the Needle: Drawing with Stitch I. 3 Credit Hours.

This course focuses on stitch as a form of mark making, exploring surface applications such as embroidery, beading, collage, transfers and forms of layering through additive and subtractive processes. Using conventional and unconventional substrates students will explore the power of mark making as a form of disruption. Readings, lectures and critiques contribute to the development of conceptual concerns and provide knowledge of historical work and contemporary artistic practices. Prior to fall 2021, the course title was "Stitching I".

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201 and ART 2202.

ART 3202. Soft Sculpture. 3 Credit Hours.

This course examines the transformation of traditional and nontraditional materials to three-dimensional forms, surfaces, and spaces. The exploration of pliable materials will be realized through hand and machine stitching, mark making, embellishment, felting, stuffing, and manipulation of armature. Students are encouraged to develop a personal direction in soft sculptural practice, with emphasis on material investigation and research. Individual and group critiques and discussion of both historic and contemporary artists and concepts augment the course.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 3203. Alternative Materials II. 3 Credit Hours.

This class allows students to further develop their work and research in this area and introduce intermediate and more advanced techniques; working more independently students are able to pursue specific areas projects, developing their skills learned in Alternative Materials I.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2203.

ART 3204. Woven Structure II. 3 Credit Hours.

Exploration of dyeing and printing including space dyed ikat and printing on the woven surface.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2204.

ART 3205. Figurative Futures - Technology and the Body. 3 Credit Hours.

This course is the exploration of the histories and techniques involved in the construction of clothing, costume, fashion, and haute couture. The term clothing implies protection against the elements and to preserve modesty. Costume functions beyond simple utility, becoming a means of seduction by enhancing nature, or adding artificial attraction. Fashion and haute couture indulge the fantasy of the creator. Students will be encouraged to explore their own interpretations of these terms through construction: machine knitting, crochet, hand and machine sewing, and embroidery. Students may also experiment with documentation methods, including performance, fashion shows, photography, and video as media to exhibit cumulated work. Note: Prior to Fall 2023 this course was titled "Body Art and Adornment."

Repeatability: This course may be repeated for additional credit.

ART 3206. Sewn. 3 Credit Hours.

Sewn construction will be the focus of this class. Students will work with a myriad of sewing technologies including but not limited to the long arm sewing machine, industrial sergers and domestic machines and hand sewing. The focus is on manipulating pliable elements to create structure and form. This class will be augmented with readings, field trips, lectures and visiting artists.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 3207. Intermediate Fibers and Material Studies. 3 Credit Hours.

Intermediate Fibers and Material Studies allows students an opportunity to further develop their work and research through introducing intermediate and more advanced techniques; working independently students are able to pursue specific areas and projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2201 or ART 2202)

ART 3208. Jacquard I. 3 Credit Hours.

The Jacquard loom interfaces with a computer allowing for control of each thread. This allows for a multitude of possibilities. Students explore the Jacquard while also learning about its history and relationship to punched card systems and early computers. Working with digital sources and alternative materials students will create woven works. The class will include weaving, working on a computer, readings, lectures, writing and field trips.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2204 (may be taken concurrently)

ART 3209. Screen Print on Fabric I. 3 Credit Hours.

Screen-printing is a versatile printmaking technique that allows reproduction of an image and/or a repetition of an image. Students will be introduced to a vast array of processes including but not limited to silkscreen, digital printing, heat transfer, mono printing, stencil, stamp printing and block printing. The emphasis will be placed on conceptual development of language and using print in a contemporary art context. Final projects may take the form of installation, soft sculptures, yardage or site specific work. Prior to fall 2016, the course title was "Silkscreen on Fabric I".

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1521, FDPR 1522, or VS 1151)

ART 3210. Special Topics in Fibers and Material Studies. 3 Credit Hours.

This course varies from semester to semester; the class content responds to current themes in Fibers and Material Studies and the varying discourses associated. Special topics classes typically include studio work, readings, lectures, writing and field trips.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1521, FDPR 1522, FDPR 1531, or FDPR 1532)

ART 3211. Cultivating a Collection. 3 Credit Hours.

Through in-depth textile research and learned construction techniques, students will create a collection to be exhibited in the annual show. Visiting artists, independent studio time and critique will support the cumulative collection. At the end of the semester, students will debut their collection in the annual Wearable Art Show.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201.

ART 3212. Digital Drawing and Pattern Making. 3 Credit Hours.

Using the digital hand, students will design one-of-a-kind garments to be printed and constructed to make unique wearables. Students will have first-hand experience and participate in the industry standard in pattern drafting and construction. Students will utilize Adobe Suite and a large format fabric printer.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201.

ART 3213. Experimental Costume and Performance. 3 Credit Hours.

This class will explore garment construction through a performance lens, looking at artists who create silhouette extension or body distortion through both movement and pattern making. Students will learn necessary sewing skills and garment manipulation to facilitate performative workshops throughout the class.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201.

ART 3214. History of Wearable Art and Costume. 3 Credit Hours.

Through independent research, readings, and discussion, students will examine the extensive history of wearable art and garment. Introductions to the cultural, political, historical, and aesthetic dimensions of experimental costume will focus on examination in relation to contemporary art.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201.

ART 3301. Hot Glass, Topic: Blowing. 3 Credit Hours.

A glass course primarily for the glass major who wants to learn advanced skills in off-hand techniques for blowing traditional and non-traditional glass forms. Advanced color work, team work and advanced methods for combining complicated glass forms will be a major component of this studio class. NOTE: Six hours of studio work outside of class time is required.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2301 and ART 2302.

ART 3303. Glass Construction, Topic: Kiln Working. 3 Credit Hours.

Predominantly a course in glass object-making. This class will provide beginning instruction through advanced tutelage in kiln forming techniques. Traditional and contemporary processes covered include frit casting from both clay and wax positives, fusing, and slumping. Moldmaking is emphasized and a variety of refractory mold materials will be introduced. A repertoire of finishing processes will be offered to aid in taking the kiln worked object to its completed state.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 3304. Glass Construction, Topic: Cold Glass. 3 Credit Hours.

This studio course provides comprehensive instruction with regard to "cold" glass-working techniques. 2-D and 3-D glass objects will be constructed with the employment of a variety of procedures without the introduction of heat. The classes will encourage the areas of student expertise. Thus, information on surface treatment (glass texturing), joining (glass to glass, to other materials), and finishing processes will be covered. Proficiency in the creation of structurally and conceptually cohesive objects is stressed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2301 and ART 2302.

ART 3305. Glass Workshop. 3 Credit Hours.

An intensive daily studio course designed for beginning students through advanced glass majors. This studio course meets each day. Studio demonstrations in all hot glass applications are the focus. Individual problem solving through guided team work will be emphasized. NOTE: Three hours of studio work outside of class each day is required.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2301.

ART 3306. Hot Glass Casting. 3 Credit Hours.

A glass class that will provide beginning advanced instruction on using molten glass as a material for casting into a wide variety of mold materials. Methods of mold setup, methods for pouring hot glass and finishing glass will be provided and demonstrated. A survey of contemporary craft-artists using these materials and methods will be shown. Presentation and evaluation of finished work will be an important aspect of this studio course.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 3307. Advanced Glass Seminar. 3 Credit Hours.

This studio course is for the junior glass major. The emphasis is on historical glass research topics. A survey of glass making from ancient cultures to early American glass will be covered by slide lectures, museum visits, and research projects.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2301 and ART 2302.

ART 3308. Advanced Glass, Topic: Visiting Artist Series. 3 Credit Hours.

This course is for the junior glass major.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2301 and ART 2302.

ART 3401. Metals Workshop. 1 to 3 Credit Hour.

Summer classes for variable credit in specialized subjects: advanced fabrication, mechanisms, machine tool processes, advanced lapidary and stone setting, linkages and advanced casting. Students have the opportunity to learn and utilize specialized technologies. It is also an opportunity to complete projects or participate in a class designed for students who studied abroad. This class requires special permission from the instructor.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 3402. CAD-CAM I: Introduction to 3D Modeling. 3 Credit Hours.

In this introduction to CAD-CAM, the students learn to: customize the modeling environment; create basic graphic objects-lines, circles, arcs, curves, solids and surfaces; draw with precision; create, test and verify solid models in STL file format for production of rapid prototypes and render models. Students will learn to use professional-level software used for 3D modeling across many industries worldwide, including product design, architecture and jewelry. Students follow self-guided lessons/assignments to learn the basics of computer aided design (CAD), then use the digital tools learned in creating original projects. Generally, one session per week will be devoted to demonstrating the lessons and related CAD functionality, and the second session will be devoted to independent projects and scheduled one-on-one time with the instructor. This 3000-level course is offered for graduate and upper-level undergraduate students. NOTE: This course is sometimes offered as an online course under Section Number 701. Prior to Fall 2023 this course was titled "CAD/CAM I Computer-Aided-Design/Computer-Aided-Manufacture."

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ART 3404. CAD-CAM II: Intermediate 3D Modeling. 3 Credit Hours.

In this continuation from CAD-CAM I (ART 2402), students will continue learning computer aided design (CAD) software to create basic objects and 3D models for the production of rapid prototypes (3D printing); and rendering. CAD will supplement bench-based making techniques, such as casting and cold connections. Upon completion of the course, students will be able to use software to create three-dimensional models for virtual reality, rapid prototyping via 3D printing, patterns for use in bench work, and photorealistic rendering. The course will discuss and experiment with a multitude of materials, from wax to porcelain. This 3000-level course is offered for graduate and upper-level undergraduate students. Prior to Fall 2023 this course was titled "CAD/CAM II Computer-Aided-Design/Computer-Aided-Manufacture."

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2402 or ART 3402)

ART 3405. Advanced 3D Modeling. 3 Credit Hours.

This course is a continuation of Intermediate 3D Modeling. Students will be encouraged to produce Three-D CAD models for rapid prototyping and photo-realistic rendering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2404 or ART 3404)

ART 3406. Junior Metalsmithing. 3 Credit Hours.

Advanced problems exploring the design and fabrication of functional objects and jewelry. Three-dimensional sheet metal development, fabrication of hollow structures, mechanisms, linkage systems and mold making will be introduced. NOTE: This course is for majors only.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 3407. Junior Metalsmithing. 3 Credit Hours.

Advanced problems exploring the design and fabrication of functional objects and jewelry. Three-dimensional sheet metal development, fabrication of hollow structures, mechanisms, linkage systems and mold making will be introduced. NOTE: This course is for majors only.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 3406.

ART 3408. Electroforming Workshop. 3 Credit Hours.

Students with prior metalworking experience have the opportunity to explore nontraditional electrochemical processes for the creation of unique forms in metal.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 3409. Plastics for Jewelry and Objects. 3 Credit Hours.

An introduction to forming, fabricating, joining, and casting a variety of plastic materials. This 20th and 21st century material is studied for its visual and artistic potential, as well as its applications in product design. Students learn to combine these materials with metals and other media.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2401 or CRFT 2453)

ART 3411. Production Processes. 3 Credit Hours.

Introduction to production processes and marketing. Students will design and produce an object in quantity and be assisted in the marketing of that object.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2401 or CRFT 2453)

ART 3412. Color in Metals. 3 Credit Hours.

Aspects of applying color to metals or changing the existing color of metallic surfaces are explored. Students are introduced to the new techniques, color anodizing aluminum, and the space-age metals titanium and niobium. Application of color resin and vitreous enamels are also examined.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2401 or CRFT 2453)

ART 3413. Enameling. 3 Credit Hours.

All basic enameling techniques, which include Plique A Jour, Limoges, Champleve, Bustail, etc. The course explores the use of synthetic resins as an addition to the enamelist's repertoire.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2401 or CRFT 2453)

ART 3414. Plastics for Jewelry. 3 Credit Hours.

Introduction to the forming, fabricating, and casting of plastic materials. The student works with acrylics, polyesters, urethanes, epoxies, and silicones, and learns to combine these materials with metal. NOTE: This course is for majors only. Metals/Jewelry/CAD-CAM Major.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 3415. Lapidary and Stone Setting. 3 Credit Hours.

Advanced lapidary processes are demonstrated which include the cutting and polishing of faceted stones designed by the student. Traditional and innovative stone setting methods are also explored.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 3416. Photo Processes and Etching Jewelry. 3 Credit Hours.

All aspects of the photographic processes that can be used with metals and plastics are introduced. This includes photo-resist techniques for metal etching, plating, and anodizing, along with photo embeddings in plastics. NOTE: This course is for majors only.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2401.

ART 3417. Metalsmithing. 3 Credit Hours.

Advanced metal forming techniques are explored. Students are encouraged to produce functional hollowware and objects of a non-traditional source.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2401 or CRFT 2453)

ART 3501. Advanced Painting. 3 Credit Hours.

A studio painting course with emphasis on the development of a student's individual point of view. Class work focuses on the development of the student's ability to work at a conceptually advanced level. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3502. Advanced Painting. 3 Credit Hours.

A studio painting course with emphasis on the development of a student's individual point of view. Class work focuses on the development of the student's ability to work at a conceptually advanced level. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3503. Landscape. 3 Credit Hours.

An examination of painting problems involved in the variable light, space, and form of cityscape and landscape. Work from various sites and sources. NOTE: This course may fulfill an advanced Painting/Drawing Studio Major or Studio Elective.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3504. Figure Painting. 3 Credit Hours.

A painting course based on direct observation. Fundamentals of oil painting as well as an understanding of anatomy, composition, and the relationship of the figure to its environment are stressed. The development of an individualized approach and the use of content are explored through group discussion and assigned work.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3505. Color. 3 Credit Hours.

The study of color, its characteristics, and interaction, explored through studio painting experiences. NOTE: This course may fulfill an advanced Painting/Drawing Studio Major or Studio Elective.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PDS 2011, PDS 2111, ART 2501, or ART 2503) and (PDS 2311, PDS 2321, PDS 2331, ART 2502, ART 2504, ART 2507, ART 2508, or PDS 2341)

ART 3506. Color. 3 Credit Hours.

The study of color, its characteristics, and interaction, explored through studio painting experiences. NOTE: This course may fulfill an advanced Painting/Drawing Studio Major or Studio Elective.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PDS 2011, PDS 2111, ART 2501, or ART 2503) and (PDS 2311, PDS 2321, PDS 2331, ART 2502, ART 2504, ART 2507, ART 2508, or PDS 2341)

ART 3507. Painting on Paper. 3 Credit Hours.

A study of the uses of aqueous media beyond transparent watercolor. Opaque watercolor, collage, and transfer techniques, and oil and acrylic on paper are explored.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PDS 2011, PDS 2111, ART 2501, or ART 2503) and (PDS 2311, PDS 2321, PDS 2331, ART 2502, ART 2504, ART 2507, ART 2508, or PDS 2341)

ART 3508. Painting on Paper. 3 Credit Hours.

A study of the uses of aqueous media beyond transparent watercolor. Opaque watercolor, collage, and transfer techniques, and oil and acrylic on paper are explored.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PDS 2011, PDS 2111, ART 2501, or ART 2503) and (PDS 2311, PDS 2321, PDS 2331, ART 2502, ART 2504, ART 2507, ART 2508, or PDS 2341)

ART 3509. Painting Workshop. 3 Credit Hours.

A studio painting course with emphasis on the development of a student's individual point of view. Class work will focus on the development of the student's ability to work at a conceptually advanced level. Experimentation is encouraged.

Repeatability: This course may be repeated for additional credit.

ART 3511. Digital Drawing. 3 Credit Hours.

This course engages students with the possibilities of the computer as a drawing tool. Digital Drawing expands the conceptual and pictorial fundamentals of drawing and painting.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((FDPR 1511 and FDPR 1512) or VS 1151)

ART 3512. Rome Sketchbook. 3 Credit Hours.

Participants record their observations in sketchbook form on daily outings to significant sites. Rome - incomparably rich historically and visually - provides a host of subjects ideal for improving drawing technique. The concentration required in drawing directly from observation leads to a deeper understanding of the city's forms.

Repeatability: This course may not be repeated for additional credits.

ART 3513. Drawing Workshop. 3 Credit Hours.

Studies in drawing emphasizing individual instruction for students of varied backgrounds.

Repeatability: This course may be repeated for additional credit.

ART 3514. Advanced Drawing. 3 Credit Hours.

In this studio-intensive course students engage in an investigation of subject matter, sources, and strategies for generating work. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3515. Advanced Drawing: Rome. 3 Credit Hours.

This course combines studio work with the Rome experience as a way to explore ideas and materials as well as the development of an individualized approach to drawing. The goal of this studio course is not only to improve one's technical ability but to probe the limits of what can be done in drawing; defining the boundaries of what a drawing is, and how it relates to contemporary art and other studio practices.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PDS 2311, ART 2502, ART 2504, ART 2507, PDS 2321, or PDS 2331)

ART 3516. Advanced Drawing. 3 Credit Hours.

In this studio-intensive course students engage in an investigation of subject matter, sources, and strategies for generating work. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3517. Figure Drawing. 3 Credit Hours.

An advanced course focused entirely on the human figure as subject. There is emphasis on a variety of approaches to drawing the figure. Dynamics, proportion, anatomy, volume, and structure will be investigated through various drawing methods and selected materials. Frequent historical references will be made through reproductions and slides, and 20th century figure drawing will be thoroughly discussed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3518. Figure Drawing. 3 Credit Hours.

An advanced course focused entirely on the human figure as subject. There is emphasis on a variety of approaches to drawing the figure. Dynamics, proportion, anatomy, volume, and structure will be investigated through various drawing methods and selected materials. Frequent historical references will be made through reproductions and slides, and 20th century figure drawing will be thoroughly discussed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 3519. Advanced Painting: Rome. 3 Credit Hours.

This course emphasizes the development of an active and reflective studio practice combined with the Rome experience. As the semester progresses, students identify and pursue their own projects, working independently with a collective critical structure with an emphasis on the development of a student's individual point of view. Experimentation is encouraged and there are frequent class critiques. Individual studios are provided.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503)

ART 3521. Fresco Painting. 3 Credit Hours.

This studio art course is designed to give students an overview of fresco painting techniques as practiced in Italy from the Roman through the Renaissance periods. While this is a studio art course, we will use the resources of Rome's churches and museums to understand the physical and symbolic structure of fresco painting throughout history from domestic to sacred spaces. Stylistic influences will be examined to create a coherent and correct wall painting using the same materials and techniques used by craftspeople of antiquity. As part of this course students will take a weekend excursion outside of Rome to participate in completing a permanent fresco. This course is open to beginning and advanced students.

Repeatability: This course may be repeated for additional credit.

ART 3601. Color Photography I. 3 Credit Hours.

An introduction to basic skills in color photography. This course includes camera work and understanding of light, processing and printing with an emphasis on color theory, the development of personal imagery and the history of color photography.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2601, PHOT 2441, or GAD 2441)

ART 3602. View Camera. 3 Credit Hours.

This course provides an introduction to large format photography using a 4x5 view camera. Basic camera operation, various functions, specific uses, and potential as a creative tool are studied. A variety of specific exercises lead the student to proficient use of the view camera. Emphasis is on creative use as well as technical development. NOTE: Open to Photo majors only - special authorization required for non-majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 3603, PHOT 3412, or GAD 3412)

ART 3603. Darkroom Photography. 3 Credit Hours.

An introduction to the fundamental vocabulary and techniques of darkroom photography. Skills of perception, visual competence, and black and white film-based photographic practice will be emphasized with an introduction to digital and darkroom hybrid techniques. Projects will address technical development as well as the development of personal vision through the photographic medium. Prior to fall 2016, the course title was "Photography II."

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3604. Photographic Lighting. 3 Credit Hours.

At the core of any commercial or fine art photographer's practice is an in-depth understanding of lighting. This course is a thorough investigation of artificial lighting techniques (strobe and continuous) both in the studio and on location. Additional topics include advanced methods of exposure and the different approaches required in lighting for digital and film based images. A final portfolio is required. This course is repeatable for credit.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2601, ART 2603, PHOT 2441, PHOT 2451, GAD 2441, or GAD 2451)

ART 3605. Darkroom Photography. 3 Credit Hours.

This course will introduce students to the historic methods and materials of pre-digital black and white darkroom photography on location in Rome. Students will become familiar with Italian culture and with the techniques they are using to capture it deepening their understanding of the city and the creative process. Along with photo field trips the class will consist of lectures, demonstrations and group discussions. Weekly assignments will be given and a final portfolio of silver gelatin prints will be completed by the end of the semester. Images will be printed from negatives produced during the course. NOTE: Students are strongly encouraged to bring their own 35mm camera. A small number of basic film cameras will be available for limited student use.

Repeatability: This course may not be repeated for additional credits.

ART 3606. Digital Projects. 3 Credit Hours.

The emphasis of this course will be on creating a professional digital portfolio. Throughout the semester, students will learn a series of multimedia software applications and develop interactive presentations that will promote themselves as artists with contemporary and professional portfolios. NOTE: The course is limited to seniors and graduate students.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2602, PHOT 2461, or GAD 2461)

ART 3607. Contemporary Photography. 3 Credit Hours.

We live in an extraordinary moment in the history of photography, a moment much hoped for and anticipated by many champions of the medium. Finally one can say without qualification that photography is a medium fully embraced by the contemporary art world. While there has always been a movement to look at and discuss photography as art, photography has never played a more central, critical and vital role in contemporary art than it does now. This course will look at both the role that photography plays in contemporary art and the role that contemporary art plays in photography. By surveying contemporary trends in photography, students in this class will develop an understanding of what exactly photography is now. At the same time the class will attempt to answer questions about what it means to be contemporary, about what the relationship between the contemporary and the historical is, and why this might be important. Through these problems students will be encouraged to develop personal work that addresses themes and ideas discussed in the class. NOTE: Open to Junior/Seniors. Special authorization required for non-majors.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2601, ART 2603, PHOT 2441, PHOT 2451, GAD 2441, or GAD 2451)

ART 3608. Color Photography I. 3 Credit Hours.

An introduction to basic skills in color processing and printing with an emphasis on development of personal imagery and the history of color picture making.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2601, PHOT 2441, or GAD 2441)

ART 3609. Color Photography II. 3 Credit Hours.

Advanced projects in color photography to include either chemical processes or digital technology. Research will focus on contemporary trends in color photography with an emphasis on the development of a personal portfolio.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 3608, PHOT 3431, or GAD 3431)

ART 3610. Special Topics in Photography. 3 Credit Hours.

This course explores special topics in photographic and imaging practices including new and emerging methods of research and production. Special topics courses can include lectures, demonstrations, readings, and student presentations in support of field and studio research. Both individual and collaborative practices may be addressed.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2601, ART 2602, ART 2901, ART 2604, ART 1602, PHOT 2441, PHOT 2461, PHOT 2961, PHOT 2401, GAD 2441, GAD 2461, GAD 2961, GAD 2401, ARTU 2811, PHOT 2811, ARCH 1011, or ARCH 1017)

ART 3611. Advanced Photo Workshop. 3 Credit Hours.

A continuation of advanced black and white photography with an introduction to the zone system and a variety of professional techniques. Emphasis will be on the development of a professional portfolio, classical black and white photographic history, and focused development of personal vision. Digital photographic techniques may also be included.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PHOT 2441, PHOT 2451, ART 2601, ART 2603, GAD 2441, or GAD 2451) and (ART 3603, PHOT 3412, or GAD 3412)

ART 3612. Photo Process Workshop. 3 Credit Hours.

This course is a survey covering a wide range of experimental and historical photographic processes that extend beyond traditional silver printing. Workshop orientation emphasizes a diverse exposure to many creative possibilities from hand applied photographic emulsions to artists' book production, culminating in a professional final project.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (PHOT 2441, PHOT 2451, ART 2601, ART 2603, GAD 2441, or GAD 2451) and (PHOT 3412, ART 3603, or GAD 3412)

ART 3613. Digital Photography. 3 Credit Hours.

Digital photography explores advanced applications in digital imaging with an emphasis on photographic output. Emphasis will be placed on more sophisticated methods of capture and production including large format printing, advanced color management, cataloging, and archival storage practices. The development of a personal vision and lines of inquiry will be central. A professional portfolio will be required.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2601, ART 2603, PHOT 2441, PHOT 2451, GAD 2441, or GAD 2451)

ART 3614. The Photo Book: Making and Understanding. 3 Credit Hours.

Throughout photography's history artists have used the photo book to share their personal lives, create enduring documents of time and place, and shine a light on social injustices. In this course students will craft their own photo books while learning about the history and contemporary issues surrounding this particular form of expression. Students will learn how to edit, sequence, title, and bind their own photography books. Podcast assignments, photo book reviews, lectures, video demonstrations, and workshops, will round out the course.

Repeatability: This course may be repeated for a total of 6 credit.

Pre-requisites: Minimum grade of C- in (ART 2601, ART 2602, ART 2901, ART 2604, ART 1603, ART 1604, or ART 1602)

ART 3701. Printmaking Workshop. 3 Credit Hours.

Studies in all printmaking media, emphasizing individual instruction for students of varied backgrounds.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2701, ART 2702, PRNT 2701, PRNT 2702, GAD 2701, or GAD 2702) and (ART 3704, ART 3705, ART 3706, PRNT 3711, PRNT 3731, PRNT 3751, GAD 3711, GAD 3731, or GAD 3751)

ART 3702. Relief and Monoprint Workshop. 3 Credit Hours.

The directness of both relief printing and monotype give the artist a unique opportunity to concentrate on the image possibilities. Students will work with non-traditional and traditional cutting methods, materials, and printing methods.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3703. Color Print Workshop. 3 Credit Hours.

A methodical study of color printing problems as they are presented by the intaglio, relief, lithographic and screen printing media. Color theory and practical techniques are combined, giving experience in all phases of multicolor and intermedia graphic production.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2701, ART 2702, PRNT 2701, PRNT 2702, GAD 2701, or GAD 2702), (ART 3704, ART 3705, ART 3706, PRNT 3711, PRNT 3731, PRNT 3751, GAD 3711, GAD 3731, or GAD 3751), and Two Introductory Printmaking: (ART 2704, PRNT 2761, GAD 2731, GAD 2741, GAD 2751, GAD 2761, ART 2705, ART 2706, ART 2707, GAD 2711, PRNT 2711, PRNT 2731, PRNT 2741, or PRNT 2751)

ART 3704. Advanced Serigraphy. 3 Credit Hours.

Advanced screen printing with emphasis on expanding the students' stencil making and printing skills as well as personal artistic growth. Students work with non-toxic acrylic inks in projects that emphasize scale, color, and use of material.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2704, GAD 2711, or PRNT 2711)

ART 3705. Advanced Etching. 3 Credit Hours.

Advanced problems in intaglio and relief processes. While the emphasis is on personal artistic development, the students are also encouraged to work toward professional standards in platemaking and printing skills. Projects often include, multi-plate color printing, copper engraving, mezzotint, various relief methods, and embossing.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2705, ART 2706, PRNT 2731, PRNT 2741, GAD 2731, or GAD 2741)

ART 3706. Advanced Lithography. 3 Credit Hours.

This course is designed to improve the students' technical skills toward professional standards and to develop the students' personal vision through the use of lithography. Study will include stone and plate lithography, color theory and practice, photo processes and editing.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2707, PRNT 2751, PRNT 2761, GAD 2751, or GAD 2761)

ART 3796. Art Career Workshop. 3 Credit Hours.

Creative and practical solutions to career problems of the artist; preparation of the art student for postgraduate challenges.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

ART 3802. Advanced Video. 3 Credit Hours.

This course is geared towards students who are working with concepts best expressed through the various forms of video art. Projects will develop and challenge the students' ability to address technical, formal, and conceptual elements in their work. NOTE: Students are expected to have some prior knowledge of video production and/or postproduction.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3803. Installation. 3 Credit Hours.

Investigations into the intrinsic meaning of the site will be coupled with the effective channeling of those issues into the work of art. Ideas, material, and placement will be analyzed so as to achieve cogent integration into the site. Introduction to use of scale models and various types of models to analyze a site and plan work for a site is part of this course. Lectures, individual discussions, and group critiques are scheduled.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 3804. Mold Making Technology. 3 Credit Hours.

Flexible moldmaking techniques are explored using foam, latex, RTV and silicone rubber, as well as alginate compounds for direct body casts. Non-flexible techniques include wood forms for cement castings. Positives are cast in cement, plaster, rubber and polyurethane using both solid and hollow casting methods. Students incorporate these techniques in directed projects, or for completing self-directed work.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 3805. Advanced Sculpture. 3 Credit Hours.

Emphasis on development of an individual direction in sculpture through studio work, drawing, writing, and some research. Progress is reviewed through individual critiques. The development of critical analysis of completed work is emphasized in group critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2801, ART 2807, PDS 2611, PDS 2621, SCLP 2611, or SCLP 2621)

ART 3806. Advanced Sculpture. 3 Credit Hours.

Emphasis on development of an individual direction in sculpture through studio work, drawing, writing, and some research. Progress is reviewed through individual critiques. The development of critical analysis of completed work is emphasized in group critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 3807. Advanced Sculpture. 3 Credit Hours.

Emphasis on development of an individual direction in sculpture through studio work and special research on topics relative to contemporary practice. Progress is reviewed through individual critiques. The development of critical analysis of completed work is emphasized in group critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2801, ART 2807, SCLP 2611, SCLP 2621, PDS 2611, or PDS 2621)

ART 3808. Advanced Sculpture. 3 Credit Hours.

Emphasis on development of an individual direction in sculpture through studio work, drawing, writing, and some research. Progress is reviewed through individual critiques. The development of critical analysis of completed work is emphasized in group critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 3809. Public Art Projects. 3 Credit Hours.

The class will introduce the processes involved in designing actual site-specific public art projects. These will include site research, design development, architectural drawings and model building, and presentation techniques. Studio visits with architects, model-makers, sculptors, and project coordinators are an integral part of the course. Students work on an actual project that is juried by area arts professionals at the end of the semester. NOTE: Special authorization is required from the instructor in order to register for this class.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 3811. Sculpture Techniques and Materials. 3 Credit Hours.

This course is meant to give students the tools they need to acquire and produce and exhibit. Students will examine displays in multiple contexts, and will be introduced to presentation concepts in art, retail, and the home. They will gain skills in exhibit design, model-making, proper art handling, crate design, fabrication, and shipping. The course will culminate with an off-campus exhibit that is themed, designed, installed and publicized by the class. NOTE: Special authorization for all.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 3812. Foundry. 3 Credit Hours.

Ceramic shell bronze and aluminum casting techniques are emphasized, as well as a variety of hot and cold casting materials and processes. The course focuses on the way these techniques serve sculptural thinking. NOTE: Special authorization for all.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3813. Junior Sculpture Seminar. 3 Credit Hours.

This studio class is a bridge from lower level introductory courses to advanced studio work. Aspirations of the profession, studio principles, and critical thinking are stressed, along with readings and discussions in contemporary art theory.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2801, ART 2807, SCLP 2611, SCLP 2621, PDS 2611, or PDS 2621)

ART 3814. Sculpture Workshop. 3 Credit Hours.

The main focus of the course will be to help each student develop a well-considered and professional show of their own work.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 3815. Public of One, Public of Many. 3 Credit Hours.

What do we mean by the word public? General public? A public? The public? Or its plural, publics? In this course students create a range of works - objects, installations, actions, interventions, participatory events, and situations for varying publics. These will include works for an intimate audience of one (which is a public), our class (another public), our Tyler colleagues, the Temple community, and the City of Philadelphia. What questions should we ask to create works for these varying publics? Through an exploratory curriculum, students construct these questions and instigate inventive and meaningful responses.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bach of Science Educ.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1511 (may be taken concurrently) or FDPR 1512 (may be taken concurrently)) and FDPR 1531.

ART 3896. PDS Seminar. 3 Credit Hours.

Group discussion and individual presentation concerning formal, conceptual, historical, and personal creative issues in contemporary painting, drawing and sculpture. NOTE: Special Authorization for Non-Majors.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Painting, Sculpture.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

ART 4082. Independent Study. 1 to 3 Credit Hour.

Self-directed study and research for upper-level BFA students developed in conjunction with, and supervised by, a full-time faculty member in the major area of the student.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 4096. Professional Practices in Art. 3 Credit Hours.

Covers many aspects of career, business and professional practices as they relate to a range of contemporary modes of artistic production. The course includes information and resources relating to artist residencies, grants, internships, and jobs. Business-oriented topics include the pricing of work, taxes, contracts, bookkeeping for small businesses, marketing, legal problems, insurance, advertising, and publicity, artist-gallery relations, and studio operations. NOTE: This is a writing intensive course. Prior to fall 2023, the course title was "Professional Practices in Crafts."

Department Restrictions: Must be enrolled in one of the following Departments: Tyler:Art.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ART 4101. Advanced Ceramics. 3 Credit Hours.

Problems in ceramics for the advanced student with emphasis on individual research projects with emphasis upon portfolio development.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (6 credits in ART 3101, 6 credits in CRFT 3162, or (3 credits in ART 3101 and 3 credits in CRFT 3162))

ART 4102. Senior Ceramics. 3 Credit Hours.

Fourth-year concentration in ceramics and thesis work.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in 6 credits in ART 3101.

ART 4201. Threading the Needle: Drawing with Stitch II. 3 Credit Hours.

This class builds on techniques learned in Stitching I and includes a research component alongside the development of a studio practice. Students will create a proposal for their research and studio projects that will focus on involved projects that incorporate intermediate and more advanced techniques in the area. Faculty will work individually with students to develop their work, teaching them specific techniques relevant to their stated projects. Students will be expected to present their work to the department and be able to talk about their work and research.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 3201.

ART 4202. Dyeing for Color II. 3 Credit Hours.

This class allows students to further develop their work and research in dyeing and related processes through introducing intermediate and more advanced techniques; working independently students are able to pursue specific areas and projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201 and ART 2202.

ART 4203. Jacquard II. 3 Credit Hours.

This class allows students to further develop their work and research with the Jacquard Loom through introducing intermediate and more advanced techniques; working independently students are able to pursue specific areas and projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 3208.

ART 4204. Woven Structure III. 3 Credit Hours.

An exploration of advanced weaving techniques: computer loom drafting and weaving, three-dimensional investigations and structural manipulations.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2204 and ART 3204.

ART 4205. Senior Seminar in Fibers and Material Studies. 3 Credit Hours.

Seniors work independently on research and making work that addresses their individual interests within a contemporary art context. Through in-depth group discussions and critiques students sharpen their perceptions, research skills, conceptual concerns, and refine the content of their work. Students develop strategies for pursuing a professional career in the arts that goes beyond the standard resume writing and website development but rather into the muddy waters of the challenging ethics of being an artist in today's society. Group discussions, readings, field trips and visiting artists augment this class. Group critiques and individual critiques are an integral part of this course.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2201 and ART 2202.

ART 4209. Screen Print on Fabric II. 3 Credit Hours.

This class allows students to further develop their work and research in printing methods, including screen print, through introducing intermediate and more advanced techniques; working independently students are able to pursue specific areas and projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2202 and ART 3209.

ART 4210. Special Topics in Fibers and Material Studies. 3 Credit Hours.

This course varies from semester to semester; the class content responds to current themes in Fibers and Material Studies and the varying discourses associated. Special topics classes typically include studio work, readings, lectures, writing and field trips.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1521, FDPR 1522, FDPR 1531, or FDPR 1532)

ART 4301. Hot Glass Blowing. 3 Credit Hours.

A glass course primarily for the glass major who wants to learn advanced skills in off-hand techniques for blowing traditional and non-traditional glass forms. Advanced color work, team work and advanced methods for combining complicated glass forms will be a major component of this studio class. NOTE: Six hours of studio work outside of class time is required.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2301 or CRFT 2258) and (ART 2302 or CRFT 2261)

ART 4303. Glass Construction, Topic: Kiln Working. 3 Credit Hours.

Predominantly a course in glass object-making. This class will provide beginning instruction through advanced tutelage in kiln forming techniques. Traditional and contemporary processes covered include frit casting from both clay and wax positives, fusing, and slumping. Moldmaking is emphasized and a variety of refractory mold materials will be introduced. A repertoire of finishing processes will be offered to aid in taking the kiln worked object to its completed state.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 4304. Glass Construction, Topic: Cold Glass. 3 Credit Hours.

This studio course provides comprehensive instruction with regard to "cold" glass-working techniques. 2-D and 3-D glass objects will be constructed with the employment of a variety of procedures without the introduction of heat. The classes will encourage the areas of student expertise. Thus, information on surface treatment (glass texturing), joining (glass to glass, to other materials), and finishing processes will be covered. Proficiency in the creation of structurally and conceptually cohesive objects is stressed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2301 or CRFT 2258) and (ART 2302 or CRFT 2261)

ART 4306. Hot Glass Casting. 3 Credit Hours.

A glass class that will provide beginning advanced instruction on using molten glass as a material for casting into a wide variety of mold materials. Methods of mold setup, methods for pouring hot glass and finishing glass will be provided and demonstrated. A survey of contemporary craft-artists using these materials and methods will be shown. Presentation and evaluation of finished work will be an important aspect of this studio course.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (FDPR 1531, FDPR 1532, or VS 1351)

ART 4307. Advanced Glass Seminar: Visiting Artist Series. 3 Credit Hours.

This course is for the senior glass major.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2301 or CRFT 2258), (ART 2302 or CRFT 2261), (ART 3307 or CRFT 3243), and (ART 3308 or CRFT 3244)

ART 4308. Advanced Glass Seminar. 3 Credit Hours.

This studio course is for the senior glass major. The emphasis is on historical glass research topics. A survey of glass making from ancient cultures to early American glass will be covered by slide lectures, museum visits, and research projects.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 2301, ART 2302, ART 3307, and ART 3308.

ART 4401. Senior Metals and Plastics. 3 Credit Hours.

The course introduces the student to portfolio preparation. An independent senior project is also encouraged.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 3407 or CRFT 3466)

ART 4402. Senior Metals and Plastics. 3 Credit Hours.

The course introduces the student to portfolio preparation. An independent senior project is also encouraged.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ART 4401.

ART 4403. Senior Seminar in Metals. 3 Credit Hours.

This course provides seniors who are interested in going on to graduate school with an opportunity to experience the responsibilities and rewards of graduate education by participation in the graduate metals seminar. These students, selected by the faculty, are also provided with a workspace in the graduate metals studio.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Metals, Jewelry, CAD-CAM.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 3407 or CRFT 3466)

ART 4404. Rapid Prototyping: 3D Sculpting. 3 Credit Hours.

The advanced CAD/CAM student will learn to use the ZCorp, Z406 3D color printer to test computer-aided-design solid models. Students will also be encouraged to find innovative methods for using the Z406 in the creation of finished tangible objects.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 3405 or CRFT 3435)

ART 4501. Advanced Painting. 3 Credit Hours.

A studio painting course with emphasis on the development of a student's individual point of view. Class work focuses on the development of the student's ability to work at a conceptually advanced level. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 4502. Advanced Painting. 3 Credit Hours.

A studio painting course with emphasis on the development of a student's individual point of view. Class work focuses on the development of the student's ability to work at a conceptually advanced level. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503)

ART 4503. Landscape. 3 Credit Hours.

An examination of painting problems involved in the variable light, space, and form of cityscape and landscape. Work from various sites and sources.

NOTE: This course may fulfill an advanced Painting/Drawing Studio Major or Studio Elective.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 4504. Figure Painting. 3 Credit Hours.

A painting course based on direct observation. Fundamentals of oil painting as well as an understanding of anatomy, composition, and the relationship of the figure to its environment are stressed. The development of an individualized approach and the use of content are explored through group discussion and assigned work.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 4505. Color. 3 Credit Hours.

The study of color, its characteristics, and interaction, explored through studio painting experiences. NOTE: This course may fulfill an advanced Painting/Drawing Studio Major or Studio Elective.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503) and (ART 2502, ART 2504, ART 2507, or ART 2508)

ART 4506. Senior Painting Studio. 3 Credit Hours.

The senior painting studio program is designed to emphasize the development of an active and reflective studio practice. Students identify and pursue their own projects, working independently within a collective critical structure. Entry into this course is by faculty jury selection only.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2501 or ART 2503)

ART 4507. Senior Painting Studio. 3 Credit Hours.

The senior painting studio program is designed to provide an intensive studio experience while working in individual studio space. The group works with two faculty members in individual and group critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 4511. Critical Dialogues. 3 Credit Hours.

Each week a different visiting speaker delivers a public lecture about the history of their work. The speakers are culled primarily from artists, but also from curators and critics. Class members meet after the public lecture for a seminar on the work and ideas presented. Each class member has a private studio critique with a few of the visiting speakers.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 4514. Advanced Drawing. 3 Credit Hours.

In this studio-intensive course students engage in an investigation of subject matter, sources, and strategies for generating work. Experimentation is encouraged and there are frequent class critiques.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2502, ART 2504, or ART 2507)

ART 4517. Figure Drawing. 3 Credit Hours.

An advanced course focused entirely on the human figure as subject. There is emphasis on a variety of approaches to drawing the figure. Dynamics, proportion, anatomy, volume, and structure will be investigated through various drawing methods and selected materials. Frequent historical references will be made through reproductions and slides, and 20th century figure drawing will be thoroughly discussed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2502, ART 2504, or ART 2507)

ART 4518. Figure Drawing. 3 Credit Hours.

An advanced course focused entirely on the human figure as subject. There is emphasis on a variety of approaches to drawing the figure. Dynamics, proportion, anatomy, volume, and structure will be investigated through various drawing methods and selected materials. Frequent historical references will be made through reproductions and slides, and 20th century figure drawing will be thoroughly discussed.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ART 2502, ART 2504, or ART 2507)

ART 4601. Senior Photography. 3 Credit Hours.

Development of a contemporary theoretical and conceptual foundation for long-range involvement with professional photographic image-making and processes. The course includes research, field trips, critical theory and the organization of a final portfolio of work using various photographic materials. Career options within the field are emphasized.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Photography.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (9 credits in 3600-level ART courses, 9 credits in 3400-level GAD courses, or 9 credits in 3400-level PHOT courses)

ART 4602. Senior Projects Workshop/Seminar. 3 Credit Hours.

A combination workshop/seminar course in which the senior printmaker, through classroom and individual discussion with the instructor, develops and produces a major print project. The course includes a formal presentation of all the projects.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ART 4696. Senior Seminar in Photography. 3 Credit Hours.

The primary objective of this advanced writing intensive/studio course is to investigate the concept of photography both technically and conceptually. Students will research, revise, and present an extended, articulate, and professionally accomplished body of writings and artwork. Students will learn the professional standards of writing that are expected in the different avenues of photography. Writing and vocabulary skills appropriate to fine arts venues are different than those needed in a commercial endeavor. Students will learn how to identify and use the appropriate language, references, and resources in the photography world. This course is required for all photography majors.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (9 credits in 3400-level GAD courses, 9 credits in 3400-level PHOT courses, or 9 credits in 3600-level ART courses)

ART 4801. Senior Sculpture. 3 Credit Hours.

A combined studio and seminar course for senior majors in sculpture. Research of graduate schools and studio practice and career after the BFA is part of this course. Students will work on the preparation of a portfolio and statement of individual working philosophy for either graduate school or gallery/grant applications. The course emphasizes knowledge of contemporary issues in sculpture, and critical and analytical skills through research projects and group discussions and development of the focus of each participants' studio practice through individual and group critiques. The mounting of a group show and design of a catalog for the show are part of this class.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ART 2801 or ART 2807)

ART 4812. Foundry. 3 Credit Hours.

Ceramic shell bronze and aluminum casting techniques are emphasized, as well as a variety of hot and cold casting materials and processes. The course focuses on the way these techniques serve sculptural thinking. NOTE: Special authorization for all.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Fine Arts.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Art - Japan Campus (ARTU)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ARTU 1101. Painting for Non-Majors. 3 Credit Hours.

This Non-Major course in painting focuses on oil painting techniques, conceptual development, and the use of elements of design for creative expression. Note: See your advisor for information on the GenEd Arts waiver.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTU 1201. 3-D Design. 3 Credit Hours.

A foundation course in 3-D design focusing on the principles, elements, and technical processes for visual understanding and creative expression. Note: See your advisor for information on the GenEd Arts waiver.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTU 1401. Drawing I. 3 Credit Hours.

A foundation course in drawing focusing on drawing techniques, conceptual development, and the use of elements of design for creative expression. Note: See your advisor for information on the GenEd Arts waiver.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTU 1402. Drawing II. 3 Credit Hours.

A foundation course in drawing focusing on drawing techniques, conceptual development, and the use of elements of design for creative expression.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1401.

ARTU 1501. 2D Design. 3 Credit Hours.

A foundation course in design focusing on the principles, elements, and technical processes for visual understanding and creative expression. Note: See your advisor for information on the GenEd Arts waiver.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTU 2001. Philadelphia Sketchbook. 3 Credit Hours.

This non-majors drawing course combines studio instruction in basic drawing skills as well as on-site drawing in Philadelphia's many historical sites and museums. Emphasis will be on improving observational skills and drawing techniques. Students will be encouraged to develop their own unique vision. This course has no prerequisites. Daily outings will be required to various significant Philadelphia sites.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

ARTU 2102. Painting. 3 Credit Hours.

Introduces second-year students to painting techniques and conceptual framework while developing the procedural logic necessary to articulate the figure and still life in oil and acrylic media. The student is encouraged to explore invented as well as analytical form.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1401 and ARTU 1402.

ARTU 2111. Aqueous Media. 3 Credit Hours.

An introduction to color design theory and practice.

Repeatability: This course may not be repeated for additional credits.

ARTU 2121. Introduction to Landscape Painting. 3 Credit Hours.

This course introduces students to the rich traditions of painting outdoors. Focus will be on water-based medium. NOTE: Summer only. Ambler Campus only.

Repeatability: This course may not be repeated for additional credits.

ARTU 2122. Advanced Landscape Painting. 3 Credit Hours.

For students with some painting and drawing background, the course emphasizes painting outdoors on the Ambler Campus. NOTE: Summer only. Ambler campus only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2121.

ARTU 2202. Intermediate 3-D. 3 Credit Hours.

Three-dimensional design theory and practice through construction techniques in wood and other materials. Emphasis on conceptual growth. NOTE: Main Campus only. Prior to Fall 2008, this course was titled "3-D Structures."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1201.

ARTU 2301. Relief Printmaking. 3 Credit Hours.

An introduction to basic relief printmaking, black/white and color, in wood, linoleum, metal, and various other materials. NOTE: Main Campus only.

Repeatability: This course may not be repeated for additional credits.

ARTU 2302. Intermediate Printmaking: Relief. 3 Credit Hours.

Intermediate level studies in relief processes including photographic and digital printmaking, with emphasis on conceptual growth and individual instruction. NOTE: Main Campus only. Prior to Fall 2008, this course was titled "Relief Printmaking II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2301.

ARTU 2311. Lithography. 3 Credit Hours.

An introduction to drawing, painting, photographic, and digital printmaking techniques, processes, and image development, black/white and color on limestone. NOTE: Main Campus only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 1401, ARTU 1496, or ARTU 1996)

ARTU 2312. Intermediate Printmaking: Lithography. 3 Credit Hours.

Intermediate level studies in lithographic, photographic, and digital printmaking techniques. Reversals, transfers, master image plans, registration procedures and color printing will be demonstrated. Emphasis is on conceptual growth and individual instruction. NOTE: Main Campus only. Prior to Fall 2008, this course was titled "Lithography II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2311.

ARTU 2331. Intaglio Printmaking. 3 Credit Hours.

This course introduces a broad range of intaglio plate making and printing processes including etching, drypoint, collagraphs, and photogravure. Additional topics include the care and use of tools and materials, print portfolio presentation, and a historical survey of printmaking.

Repeatability: This course may not be repeated for additional credits.

ARTU 2341. Screenprinting. 3 Credit Hours.

This course engages students in historic and contemporary approaches to water-based screenprinting concepts and technologies, while encouraging a multi-disciplinary approach to fine art print production. Students will begin with direct cut-paper and hand-painted stencils and move into more complex hand-drawn and digitally manipulated photographic techniques. There will be an emphasis on multi-colored, multi-layered prints as well as the print as image, book, poster, installation, and sculpture. Community and group-based activities will be an integral part of the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2301.

ARTU 2351. Artist Books, Zines and Independent Publishing. 3 Credit Hours.

Throughout the semester, you will learn the basics of bookbinding, DIY independent publishing, and limited printmaking processes. This will include, but is not limited to: basic book binding terminology, tools, and structures; basic printmaking techniques, covering hand printing techniques and alternative printmaking processes; development and dissemination of work completed in class; and working knowledge of contemporary practices and working artists in the Book Arts and Zine fields.

Repeatability: This course may not be repeated for additional credits.

ARTU 2400. Special Topics. 3 Credit Hours.

In this studio art course, approaches to making and understanding images in various media will be addressed.

Repeatability: This course may be repeated for additional credit.

ARTU 2402. Intermediate Drawing. 3 Credit Hours.

Figurative painting in pastel coupled with basic drawing approaches and techniques. A second level drawing course emphasizing more advanced drawing strategies and the use of chalk pastels. The model is used, although not exclusively. NOTE: Prior to Fall 2008, this course was titled "Drawing II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1402.

ARTU 2601. Computer Imaging. 3 Credit Hours.

This course introduces students to the computer as an artist's tool. Emphasis is on developing personal imagery and exploring the ways that the computer can serve as a vehicle for artistic expression. Students should have some previous studio art experience before taking this class. NOTE: Prior to Fall 2008, this course was titled "Introduction to Computer Imaging."

Repeatability: This course may not be repeated for additional credits.

ARTU 2602. Intermediate Computer Imaging. 3 Credit Hours.

This course serves to deepen students' engagement with the computer as a tool for fine arts. Students explore image making in relation to contemporary practices and work with alternative methods of using the computer as a medium.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2601.

ARTU 2605. Internet Imaging. 3 Credit Hours.

This class explores the web as a tool for artistic expression. Students learn web design within the context of an exploration of the uses of the internet as an art medium. NOTE: Prior to Fall 2008, this course was titled "Introduction to Internet Imaging."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 2601 or ARTU 2811)

ARTU 2801. Art Photography: Darkroom. 3 Credit Hours.

The student is expected to master the basic photographic skills quickly through the use of lecture/demonstration, critiques and independent lab and field work. The course then concentrates on the use of photography as a fine art medium. NOTE: Prior to Fall 2008, this course was titled "Basic Darkroom Photography B/W I."

Repeatability: This course may not be repeated for additional credits.

ARTU 2802. Intermediate Art Photography: Darkroom. 3 Credit Hours.

An intermediate level class on the use of photography as a fine art medium with emphasis on archival printing on fiber-based paper, sepia and selenium toning, and the development of a personal aesthetic supported by the use of sophisticated shooting and printing techniques. NOTE: Prior to Fall 2008, this course was titled "Basic Darkroom Photography B/W II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2801.

ARTU 2811. Art Photography: Digital. 3 Credit Hours.

The basic principles of digital photography, including shooting with a digital camera, manipulating images within the computer, and printing to inkjet printers are taught. The course focuses on black & white photo, including duotones. Emphasis is placed on technical expertise, creative development, and an understanding of the potential of imaging software. NOTE: Prior to Fall 2008, this course was titled "Introduction to Digital Photography."

Repeatability: This course may not be repeated for additional credits.

ARTU 2812. Intermediate Art Photography: Digital. 3 Credit Hours.

An intermediate level class in digital photography including the introduction of color photography and its relevant aesthetics, and the use of the web as a presentation medium. Emphasis is on conceptual growth and personal vision. NOTE: Prior to Fall 2008, this course was titled "Intermediate Digital Photography."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2811.

ARTU 2831. Art Photography / Digital On-Line. 3 Credit Hours.

This course teaches students the use of low-tech devices such as cell phones and point-and-shoot cameras for photography, video and sound recording. The results are posted to art-specific online visual communities similar to Facebook and YouTube. Responses from fellow students are evaluated in class critiques. This course raises the aesthetic bar above what is usually seen online. It teaches students how to see the world through a camera, organize the visual spaces found in their local community, and fill these photographs with meaningful content that can communicate the personal vision they develop during the semester to a broader audience.

Repeatability: This course may not be repeated for additional credits.

ARTU 2835. Art Photo / Moving Image. 3 Credit Hours.

This course allows artists to use the medium of video to investigate their world. The technical end involves shooting digital video, transferring to computer, computer editing, post processing, sound editing and processing, and burning finished pieces to DVD. Students are also introduced to alternative ways of creating moving images using digital based animation software to investigate art of motion graphics. The aesthetics are from the art world rather than the commercial, documentary, or Hollywood styles. Knowledge of computers for visual application is expected. NOTE: This course is offered in Tokyo only.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 2601 or ARTU 2811)

ARTU 2900. Honors Special Topics. 3 Credit Hours.

In this studio art course, approaches to making and understanding images in various media will be addressed.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ARTU 3000. Special Topics. 3 Credit Hours.

This studio art course addresses approaches to making and understanding images, objects, and experiences, in various media. Each topic will be addressed through contextual, procedural, material, and critical lenses. A specific theme will be selected each time the course is offered. This course assumes a strong level of basic studio knowledge in one or more art disciplines.

Repeatability: This course may be repeated for additional credit.

ARTU 3103. Advanced Painting. 3 Credit Hours.

Painting as an art form with emphasis upon disciplined draftsmanship and imaginative composition. NOTE: Prior to Fall 2008, this course was titled "Painting Workshop."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2102.

ARTU 3203. Advanced 3-D. 3 Credit Hours.

Workshop course for students wishing to focus on advanced 3-D with emphasis on individual instruction. NOTE: Prior to Fall 2008, this course was titled "Advanced 3-D I."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2202.

ARTU 3303. Advanced Printmaking. 3 Credit Hours.

Exploration of advanced printmaking problems. NOTE: Prior to Fall 2008, this course was titled "Advanced Printmaking I."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 2302 or ARTU 2341)

ARTU 3321. Intermediate Printmaking: Digital. 3 Credit Hours.

This course integrates a variety of digital applications and the traditional printmaking processes of relief, intaglio and lithography. Emphasis is on creative growth and individual instruction. Printmaking experience is required and computer imaging experience is recommended. NOTE: Prior to Fall 2008, this course was titled "Digital Printmaking."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2601 and (ARTU 2301 or ARTU 2311)

ARTU 3403. Advanced Drawing. 3 Credit Hours.

Drawing as an art form with emphasis upon disciplined draftsmanship and imaginative composition. NOTE: Prior to Fall 2008, this course was titled "Intermediate Drawing I."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2402.

ARTU 3601. Multimedia Studio. 3 Credit Hours.

An advanced course in which students explore the computer as a tool for artists. Students will be expected to explore their personal imagery and artistic goals through using the computer to make several long-term ambitious projects using computer screen as their primary medium.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1101, ARTU 1201, ARTU 1401, ARTU 1501, and 4 ARTU courses numbered 2000 to 4999.

ARTU 3602. Digital Mixed Media Studio. 3 Credit Hours.

An advanced course in which students explore the computer as an artistic tool in combination with other materials. Students will be expected to explore their personal imagery and artistic goals through using the computer to make several long-term ambitious projects that exist primarily outside the computer screen.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1101, ARTU 1201, ARTU 1401, ARTU 1501, and 4 ARTU courses numbered 2000 to 4999.

ARTU 3603. Advanced Computer Imaging. 3 Credit Hours.

An advanced course in which students explore the computer as a tool for artists. Students will be expected to explore their personal imagery and artistic goals through using the computer to make several long-term ambitious projects.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2602.

ARTU 3803. Advanced Art Photography: Darkroom. 3 Credit Hours.

This upper-level class involves the collection of aesthetic and technical tools, organized into a photographic vocabulary and the subsequent generation of a body of work that communicates a personal vision that ultimately evokes a meaningful response from an audience. Fiber-based papers, toners, and some unique aesthetic approach are required. NOTE: Prior to Fall 2008, this course was titled "Intermediate Darkroom Photography."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2802.

ARTU 3813. Advanced Art Photography: Digital. 3 Credit Hours.

An upper-level course in digital photography. Emphasis is on conceptual growth through individual instruction. Advanced forms of presentation, including multiple prints, interactive images, and dynamic photographs are considered. NOTE: Prior to Fall 2008, this course was titled "Advanced Digital Photography."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2812.

ARTU 3825. Intermediate Art Photography: Hybrid. 3 Credit Hours.

This upper-level course introduces a wide range of processes that integrate digital and darkroom techniques and aesthetics to produce work in this new genre of photography. The students must have experience with both darkroom and digital photography. Aesthetic problems are posed that use the formal characteristics of these special media to support image content to best advantage. NOTE: Prior to Fall 2008, this course was titled "Introduction to Hybrid Photography."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 2811 and ARTU 2812.

ARTU 3826. Advanced Art Photography: Hybrid. 3 Credit Hours.

This advanced level class extends the opportunity to study and develop the use of photographic media that integrate digital and darkroom processes and aesthetics to produce a meaningful body of work in this new genre of photography. The students must have experience with both darkroom and digital photography. NOTE: Prior to Fall 2008, this course was titled "Intermediate Hybrid Photography."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3825.

ARTU 4148. Painting Workshop. 3 Credit Hours.

An advanced level drawing course focusing on the refinement of skills and personal expression. Individual instruction and self motivation are emphasized. NOTE: Prior to Fall 2008, this course was 3104 "Painting Workshop II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3103.

ARTU 4149. Painting Portfolio. 3 Credit Hours.

An advanced level painting course focusing on making finished quality work to build a portfolio. Individual instruction and motivation are emphasized.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 3103 or ARTU 4148)

ARTU 4182. Independent Study: Painting. 3 Credit Hours.

This course allows the student to explore an area of study that lies outside regular course offering, working independently although under the supervision of a faculty member. All proposals must be approved by the department chair.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 4148 or ARTU 4149)

ARTU 4248. 3-D Workshop. 3 Credit Hours.

An advanced level 3D course focusing on the refinement of skills and personal expression. Individual instruction and motivation are emphasized. NOTE: Prior to Fall 2008, this course was 3204 "Advanced 3-D II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3203.

ARTU 4249. 3-D Portfolio. 3 Credit Hours.

An advanced level 3D course focusing on making finished quality work to build a portfolio. Individual instruction and motivation are emphasized.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 3203 or ARTU 4448)

ARTU 4282. Independent Study: 3-D. 3 Credit Hours.

This course allows the student to explore an area of study that lies outside regular course offering, working independently although under the supervision of a faculty member. All proposals must be approved by the department chair.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 4448 or ARTU 4249)

ARTU 4348. Printmaking Workshop. 3 Credit Hours.

Advanced study of aesthetics and techniques of contemporary printmaking provide an in-depth appreciation of etching, lithography, relief printing and intaglio type processes. Students may concentrate in one print medium. Individual and group work is required. NOTE: Prior to Fall 2008, this course was titled "Printmaking Portfolio I."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3303.

ARTU 4349. Printmaking Portfolio. 3 Credit Hours.

Advanced study in advanced printmaking with emphasis on individual instruction. The preparation of a professional portfolio of editions and/or series is required. Various aspects of a studio career will be covered including: resumes, artists' statements, photographing work, and presentations. NOTE: Prior to Fall 2008, this course was titled "Printmaking Portfolio II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 3303 or ARTU 4348)

ARTU 4382. Independent Study: Printmaking. 3 Credit Hours.

This course allows the student to explore an area of printmaking outside regular course offering, working independently although under the supervision of a faculty member. The department chair must approve a written proposal. NOTE: Prior to Fall 2008, this course was 3304 "Advanced Printmaking II."

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 4348 or ARTU 4349)

ARTU 4448. Drawing Workshop. 3 Credit Hours.

An advanced level drawing course focusing on the refinement of skills and personal expression. Individual instruction and motivation are emphasized. NOTE: Prior to Fall 2008, this course was 4405 "Drawing Workshop I."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3403.

ARTU 4449. Drawing Portfolio. 3 Credit Hours.

An advanced level drawing course focusing on making finished quality work to build a portfolio. Individual instruction and motivation are emphasized. NOTE: Prior to Fall 2008, this course was 4406 "Drawing Workshop II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 3403 or ARTU 4448)

ARTU 4482. Independent Study: Drawing. 3 Credit Hours.

This course allows the student to explore an area of drawing that lies outside regular course offering, working independently although under the supervision of a faculty member. A written proposal must be approved by the department chair.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 4448 or ARTU 4449)

ARTU 4648. Computer Imaging Workshop. 3 Credit Hours.

Advanced study of aesthetics and techniques of computer imaging with emphasis on individual instruction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3603.

ARTU 4649. Computer Imaging Portfolio. 3 Credit Hours.

Advanced study of aesthetics and techniques of computer imaging with emphasis on individual instruction. The preparation of a professional portfolio is required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 3603 or ARTU 4648)

ARTU 4682. Independent Study: Computer Imaging. 3 Credit Hours.

This course allows the student to explore an area of study in computer imaging outside the regular course offering, working independently although under the supervision of a faculty member. A written proposal must be approved by the department chair.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 4648 or ARTU 4649)

ARTU 4785. Field Internship. 3 Credit Hours.

This course offers experiential learning and hands-on training in student's field of choice. NOTE: For Art and Art Education Majors only with Special Authorization.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ARTU 1101, ARTU 1201, ARTU 1401, ARTU 1501, and 4 ARTU courses numbered 2000 to 4999.

ARTU 4796. Art Seminar. 3 Credit Hours.

The goal of this writing intensive upper-level studio course is to help the advanced student find his/her own voice through independent studio projects and writing assignments. The class will meet as a group and the instructor will also meet individually with students. NOTE: Additional prerequisites for studio concentration: Art 2101 (0118), 2402 (0140), 2111 (0159) and two printmaking courses. For digital concentration: one printmaking or photo, three digital electives, and two studio electives or two non-digital electives. For visual studies concentration: one printmaking, photo, or computer imaging course plus four classes from the concentration group.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 1201, ARTU 1401, ARTU 1402, ARTU 1501, 6 ARTU courses numbered 2000 to 4999, ARTH 1103, (ARTH 1155, ARTH 1156, or ARTH 1801), and any ARTH course numbered 2000 to 4999.

ARTU 4848. Art Photography Workshop. 3 Credit Hours.

A top-level course for the study of advanced photographic techniques and aesthetics. The student is expected to design a course of study (proposal required) that is particular to his or her own interests and that involves aspects of photography not available in the other course offerings. Work can be realized in either the darkroom or digital studio and must include unique techniques, aesthetics, and presentation. NOTE: Prior to Fall 2008, this course was titled "Advanced Photo Study I."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTU 3813.

ARTU 4849. Art Photography Portfolio. 3 Credit Hours.

A top-level course for the study of advanced photographic techniques and aesthetics with an emphasis on the creation of all artwork and documentation needed to build a portfolio. The student is expected to define an aesthetic philosophy that is particular to his or her own interests (proposal required). Work can be realized in either the darkroom or digital studio and must include unique techniques, aesthetics, and presentation. NOTE: Prior to Fall 2008, this course was titled "Advanced Photo Study II."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTU 3813 or ARTU 4848)

ARTU 4882. Independent Study: Art Photography. 3 Credit Hours.

This course allows the student to explore an area of photographic study outside our regular course offerings, working independently although under the supervision of a faculty member. A written proposal must be approved by the department chair. NOTE: Prior to Fall 2008, this course was 3804 "Advanced Darkroom Photography."

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTU 4848 or ARTU 4849)

Art Education (ARTE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ARTE 1001. Professional Practices in Art Education and Art Therapy. 1 Credit Hour.

This course covers topics and issues related to professional practices for the BS in Art Education and the BA in Art Therapy. Some of the topics/ issues include clearances and background checks, observational practicums, and volunteer hours, applications for internship, student teaching and fieldwork courses; professionalism, digital literacy, teaching/therapeutic art philosophy, identity, self-care, information literacy, writing skills, and wellness practices.

Degree Restrictions: Must be enrolled in one of the following Degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science Educ.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

ARTE 2001. Science and Art of Teaching. 4 Credit Hours.

Various theories as a framework for considering the science and art of teaching with emphasis on classroom-based research. Accompanied by a practicum in which students observe teacher behavior in a visual arts-based learning environment. NOTE: Students must obtain a B- or better for admission into the certification program. 20 hours field observation required. Child Abuse, Criminal History Clearances, FBI fingerprints and TB test must be obtained prior to the first day of class. Meeting with the Art Education advisor is mandatory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ARTH 1155, ARTH 1955, or 'Y' in CRAH01) and (ARTH 1156, ARTH 1956, or 'Y' in CRAH02)

ARTE 2011. Creative Process in Art Therapy. 3 Credit Hours.

This course explores creativity theory and applies concepts from art therapy and related fields and presents a blend of approaches including Eastern traditions, Jungian psychology, and other sources. Studio work and writing are used as tools to understand the creative process in art therapy and cultivate the discipline of self-awareness. Readings, group discussions, and processing of the art-making experiences will be utilized.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((ARTU 1401, ARTU 1201, and ARTU 1501), (FDPR 1511 and FDPR 1521), or Select 2 from the following: VS 1151, VS 1351, and VS 1451)

ARTE 3003. Arts & Learning in the Elementary School. 3 Credit Hours.

This course forms a foundation for using the arts as active processes for learning, for those who will be teaching at the K-8 level, through a series of hands-on workshops in media including theater, dance, music and visual arts. The course offers experiential and theoretical tools for understanding processes of creativity in the arts and education. Parallel with the in-class arts workshops, students will gain skills in designing curricula which integrate arts and academic content areas.

Repeatability: This course may not be repeated for additional credits.

ARTE 3004. Introduction to Art Therapy. 3 Credit Hours.

This course is designed to offer students a didactic and experiential overview of the field of art therapy. Material covered will include history, theory, and practice of art therapy processes and approaches as well as a survey of populations, settings, and applications. Lectures, readings, discussion, audiovisual presentations, experiential exercises, and guest presentations comprise the structure of this course.

Repeatability: This course may not be repeated for additional credits.

ARTE 3010. Special Topics. 3 Credit Hours.

Special Topics in Art Education addresses and explores pertinent contemporary issues and artmaking practices. Art students and art teachers in the schools and communities will create work as artists and translate their practices into relevant curriculum for their classrooms.

Repeatability: This course may be repeated for additional credit.

ARTE 3011. Introductory Seminar in Community Arts. 3 Credit Hours.

Community Arts brings artists together with people of a community of location, spirit, or tradition, to create art that is based in the life of that community. This course introduces students to the history and theory of Community Arts and current projects in Philadelphia and nationally, through field trips, guest speakers, readings and research. Students will engage in arts projects to orient to an re-discover their own communities of origin in relation to Community Arts and examine issues of race, class, and aesthetics. The course prepares students to become involved in the field internships that are being offered through Tyler/Temple's Arts in Community Program and is a prerequisite for other Arts in Community courses. NOTE: Course previously called "Interdisciplinary Seminar in Community Arts."

Repeatability: This course may not be repeated for additional credits.

ARTE 3089. Research and Project Planning Seminar in Community Arts. 3 Credit Hours.

In this course, students will apply methods of community data collection to research on a specific community, including personal and oral history interviews, background cultural research, detailed observation of community visual environments and performative conventions, and relationship building. Site visits to community sites and meetings with community leaders provide context for this research. These processes are then directed toward sequential project planning, including a research paper and individual and group creative responses in various media. Utilizing a collective research methodology, students then collaborate to identify emerging themes and key issues toward the conceptual design of a community arts project.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTE 3011, ARTE 3911, or VS 1058)

ARTE 3096. Art in Elementary and Secondary School. 4 Credit Hours.

Course focuses on an examination of methods, materials, and current research as it relates to teaching art at elementary and secondary levels. NOTE: One day per week internship in a school art classroom is required of each student. Students must obtain B- or better. Application materials must be submitted during pre-registration the semester prior to taking the course. Child Abuse, Criminal History, FBI fingerprints and TB test must be up-to-date. Meeting with the Art Education advisor is recommended.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (ARTE 2001 or 'Y' in CRAR01) and minimum GPA of 3 in: courses numbered 0700 to 4999.

ARTE 3202. Teaching Artists. 3 Credit Hours.

This course presents students from all arts fields with career options as teaching artists. Teaching artists are professional, practicing artists who collaborate with community and school leaders to create arts-based experiences in a variety of settings including: arts organizations, social service programs, health facilities, public libraries, senior centers, prisons, museums, and schools. Students will research existing resources for teaching artists, learn advocacy strategies, grant writing skills, and participate in direct field experience. Guest teaching artists and community arts administrators will provide presentations and workshops.

Repeatability: This course may not be repeated for additional credits.

ARTE 3911. Honors Introductory Seminar in Community Arts. 3 Credit Hours.

Community Arts brings artists together with people of a community of location, spirit, or tradition, to create art that is based in the life of that community. The goals of this course are for students to learn about the history and theory of Community Arts, to gain skills in Community Arts studio and research processes, to learn to think critically about the issues of race, class, and aesthetics inherent in Community Arts practice, to gain exposure to established Community Arts projects in Philadelphia through field trips and guest speakers, and to orient to and re-discover one's own community of origin in relation to Community Arts. NOTE: This is an honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ARTE 3989. Honors Research and Project Planning in Community Arts. 3 Credit Hours.

In this course, students will apply methods of community data collection to research on a specific community, including personal and oral history interviews, background cultural research, detailed observation of community visual environments and performative conventions, and relationship building. Site visits to community sites and meetings with community leaders provide context for this research. These processes are then directed toward sequential project planning, including a research paper and individual and group creative responses in various media. Utilizing a collective research methodology, students then collaborate to identify emerging themes and key issues toward the conceptual design of a community arts project. NOTE: This is an honors course.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in ARTE 3911.

ARTE 4003. Inclusive Art Education K-12 Students in the Art Room. 3 Credit Hours.

Learn about the scope of different disabilities that may present themselves in the art room including intellectual, learning, and physical disabilities; and visual, hearing, emotional, and behavior disorders. Effective instructional strategies for inclusive practices to meet the unique, diverse learning and special educational needs of K-12 students in the art room, including methods of assessment and accommodations are explored.

Co-requisites: ARTE 4088.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in ARTE 3096 and minimum GPA of 3 in: courses numbered 0700 to 4999.

ARTE 4012. Community Arts. 3 Credit Hours.

In this course students will create, develop and implement a community-based arts project in media including visual arts and performance within a particular Philadelphia community. Students will gain skills in community arts processes including project design, local research, teaching, and design/performance/installation of arts projects. The course is grounded in community arts theory, growing out of the fields of public art and performance studies.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (ARTE 3089 or ARTE 3989) and (ARTE 3011, ARTE 3911, or VS 1058)

ARTE 4082. Independent Study. 1 to 3 Credit Hour.

Self-directed study and research initiated by a student with an independent study contract developed in conjunction with, and supervised by, a faculty member in the art education and community art department.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARTE 4088. Student Teaching. 9 Credit Hours.

Students assume responsibility for direction of classes and lesson planning in both elementary and secondary schools. The practical experience is enriched through seminar discussions focusing on the enterprise of teaching. NOTE: Application Materials must be submitted during pre-registration the semester prior to taking the course. Meeting with the Art Education advisor is recommended.

Co-requisites: ARTE 4003.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C in ARTE 3096 and minimum GPA of 3 in: courses numbered 0700 to 4999.

ARTE 4089. Evaluation and Documentation in Community Arts. 3 Credit Hours.

In this course students will learn and apply methods for evaluation and ongoing work in the aftermath phase of Community Arts projects, including assessment of artistic process and product and community impact, approaches to continuing community involvement, and transitioning of project ownership to the community. The course offers students a variety of media for documenting and assisting community members to document Community Arts projects in the form of scholarly articles, video and audio documentary, community feedback and personal essays/journals that contribute knowledge to the field of Community Arts.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ARTE 4012.

ARTE 4289. Field Work in Art Therapy. 4 Credit Hours.

The course examines the important role of art making in promoting resilience in individuals, families and communities; explores the role the arts play in addressing issues of inequality and injustice; and building strong and caring communities are examined. BA in Art Therapy majors engage in fieldwork experience as art facilitators with individuals and groups at pre-approved fieldwork sites. Philosophies of therapeutic art making practices and experience with appropriate materials; resources related to art therapy with individuals who have diverse educational, social, emotional, communicative and physical needs are explored. Readings, group discussions, and processing of the art-making experiences will be utilized.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ARTE 2011 and ARTE 3004.

Art History (ARTH)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ARTH 0803. The Art of Sacred Space. 3 Credit Hours.

From curse tablets to animal sacrifice to places where the divinity was approached, human beings in every period and culture have communicated with the divine. We will explore together how a given culture used art to communicate with the deity, interrogate the meaning of a sacred space itself, and look closely at the literary and material evidence for rituals and beliefs. Through the lens of a chosen time period, we will analyze and critique practices and behaviors through topics such as festivals, burial practices, magical ceremonies, and rites of passage, with a view to understanding the place of sacred space in our own lives. NOTE: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed REL 0803 or GRC 0803/0903.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

ARTH 0808. Art Matters: Ideas in Art and Architecture. 4 Credit Hours.

This course is an introduction to looking at art and appreciating the wide range of art and architecture that surrounds us in our contemporary world. We will think about, engage with, and learn how to look at the visual arts of the present and the past, and understand their contexts, subjects, and styles. At the same time, we will study monuments across the globe that place the visual arts in a broad cultural framework. Close attention is given to visual literacy, as well as the concepts that connect artistic communication and expression from the art and architecture of the ancient world through modern times. Through local museum and gallery visits, we will also become familiar with the ways that the arts connect to our everyday lives. Prior to Fall 2023, this course was titled "Arts of the Western World: The Visual Experience." NOTE: (1) Field trips outside of regularly-scheduled class time are mandatory for this class. (2) This course fulfills the Arts (GA) requirement for students under GenEd.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

ARTH 0813. The History of Art in Rome. 4 Credit Hours.

Weekly class lectures and on-site visits provide a survey of Roman art from the Etruscan through the Baroque periods, and therefore, from the founding of the ancient city in the 8th century B.C. to circa 1700. Students study each period's art and architecture and define its place within the general context of Roman civilization. Rome's position as both capital of the ancient empire and of the Western Latin Church has earned her the well-recognized sobriquet, Eternal City. Consequently, students confront how the idea of Rome had bearing upon the formation of its art and architecture within the chronological context. The course as a whole can be considered an introduction to art history in the field, as each week the class visits a historical site or museum in order to reconstruct through living examples the artistic fabric of the city. NOTE: This course is taught in Rome.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

ARTH 1003. History of Art in Rome. 4 Credit Hours.

Weekly class lectures and on-site visits provide a survey of Roman art from the Etruscan through the Baroque periods, and therefore, from the founding of the ancient city in the 8th century B.C. to circa 1700. Students study each period's art and architecture and define its place within the general context of Roman civilization. Rome's position as both capital of the ancient empire and of the Western Latin Church has earned her the well-recognized sobriquet, Eternal City. Consequently, students confront how the idea of Rome had bearing upon the formation of its art and architecture within the chronological context. The course as a whole can be considered an introduction to art history in the field, as each week the class visits a historical site or museum in order to reconstruct through living examples the artistic fabric of the city. NOTE: This course is taught in Rome. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTH 1103. Introduction to Methods and Theories. 3 Credit Hours.

This course is an introduction to the key methodologies and theories that have been used in the field of art history and visual studies to understand art and other visual phenomena. By reading and responding critically to some of the most influential texts that have shaped the field, we will consider the history and transformation of the field itself. Through lectures, discussions, and writing, students will be equipped with tools to critically assess artworks and other visual phenomena as well as their own practice and begin to stake out their own position in relation to the debates that have transformed the critical interpretation of visual culture. NOTE: This course is taught at TU Japan.

Repeatability: This course may not be repeated for additional credits.

ARTH 1148. International Cinema. 3 Credit Hours.

A selection of films from modern Europe and Third World cultures which demonstrate both their interaction with postmodern politics, theory and culture, and the development of an international alternative discourse to Hollywood commercial film-making. Films will be selected according to a theme each semester. Past courses: Italian Neo-Realism, Independent Film Makers, and Women in Film. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. NOTE: This course is taught in Rome.

Course Attributes: IS

Repeatability: This course may not be repeated for additional credits.

ARTH 1155. Arts of the World I: Prehistoric to 1300. 3 Credit Hours.

Students in this course examine and analyze the architecture, sculpture, and painting of the art from cultures around the world from the era of Prehistory to ca. 1300. Students analyze the forms, techniques, styles, subjects, and symbolism represented in architecture, sculpture, and painting both historically and in relation to the impact of societal beliefs and values to develop an understanding of global artistic traditions. Students employ contemporary methods in the interpretation of forms, subjects, and artistic differences and parallels. NOTE: Field trips are mandatory for this class. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTH 1156. Arts of the World II: 1300 to the 21st Century. 3 Credit Hours.

Students in this course examine and analyze the art from cultures around the world, including architecture, sculpture, painting, and modern media, from ca.1300-the 21st Century. Students analyze the forms, techniques, styles, subjects, and symbolism represented in art and architecture both historically and in relation to the impact of societal beliefs and values to develop an understanding of global artistic traditions. Students employ contemporary methods in the interpretation of forms, subjects, and artistic differences and parallels. NOTE: Field trips are mandatory for this class. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTH 1801. Arts of Asia. 3 Credit Hours.

Architecture, sculpture, painting and the functional arts of Asia (India, China, Japan and Southeast Asia). A historical examination of the art as a religious expression and as a product of changing social and economic conditions. The material culture of Asia will be examined with an emphasis on differing world views and perspectives with which to "see" art. NOTE: (1) Field trips are mandatory for this class. (2) This course can be used to satisfy the university Core Arts (AR) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. NOTE: This course is only taught at TU Japan.

Course Attributes: AR

Repeatability: This course may not be repeated for additional credits.

ARTH 1955. Honors Arts of the World I: Prehistoric to 1300. 3 Credit Hours.

Students in this course examine and analyze the architecture, sculpture, and painting of the art from cultures around the world from the era of Prehistory to ca. 1300. Students analyze the forms, techniques, styles, subjects, and symbolism represented in architecture, sculpture, and painting both historically and in relation to the impact of societal beliefs and values to develop an understanding of global artistic traditions. Students employ contemporary methods in the interpretation of forms, subjects, and artistic differences and parallels. NOTE: Field trips are mandatory for this class. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

ARTH 1956. Honors Arts of the World II: 1300 to the 21st Century. 3 Credit Hours.

Students in this course examine and analyze the art from cultures around the world, including architecture, sculpture, painting, and modern media, from ca.1300-the 21st Century. Students analyze the forms, techniques, styles, subjects, and symbolism represented in art and architecture both historically and in relation to the impact of societal beliefs and values to develop an understanding of global artistic traditions. Students employ contemporary methods in the interpretation of forms, subjects, and artistic differences and parallels. NOTE: Field trips are mandatory for this class. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: AR, HO

Repeatability: This course may not be repeated for additional credits.

ARTH 2000. Topics in Art History. 1 to 4 Credit Hour.

A selected topic from a specific period in the history of art will be examined. NOTE: Field trips are mandatory for this course.

Repeatability: This course may be repeated for additional credit.

ARTH 2002. History of Modern Crafts. 4 Credit Hours.

Traces the ideas, personnel, workshops, objects & styles of the Arts & Crafts Movement from William Morris to Henry Mercer (1850s-ca. 1915), in Europe and the United States. Charles & Margaret Mackintosh in Scotland, Eliel Saarinen in Finland, Charles Ashbee and the Guild of Handicraft in England will be studied, among others; Stickley, Roycroft, Frank Lloyd Wright, Tiffany, etc., in the U.S., and other key designers/crafters of clay, metal, fiber, wood, glass. The influence of Japanese art & craft is a key issue for this course; also the development of the various forms of Art Nouveau. NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2003. History of Modern Crafts and Design: Design Movements from the Crystal Palace until Today. 4 Credit Hours.

This course will examine the interwoven histories of craft and design in the 20th and 21st centuries, with a special focus on how craft and design not only mirror the various artistic, cultural, political, social, and technological contexts in which they are created, but also how they are able to critique and change those contexts. Students will gain familiarity with a selection of influential objects, makers, materials, and movements from around the world. Through the lens of craft and design, they will also explore topics and frameworks including production and consumerism, sustainability and environmental responsibility, popular culture, activism and reform, intersectionality, diversity, and accessibility. NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2004. History of Printmaking. 4 Credit Hours.

The invention of the printing press in the 1400s contributed to important and lasting changes about how people thought about images and image-making. In addition to gaining an understanding of the technical processes involved in the production of books, woodcuts, engravings, etchings, lithographs and screenprints, students will focus on the social and economic facets of prints as an aesthetic and as a compelling component of visual culture. The course will cover material from c. 1480 to the present, with the aim of relating the history of European printmaking and print culture to traditions of printmaking in Japan, China, the United States and Mexico. Central issues we shall discuss are the nature of the 'original' vs. the 'copy'; the space of prints as a realm for experimentation and new subject matter; the tension between collaboration and individual graphic virtuosity; the functional range of prints from devotion to documentation, from propaganda to social protest; the modern 'print revivals' of the 19th and 20th centuries; and the persistent but dynamic relationship between prints and other media. We also shall reevaluate certain myths about the so-called printing revolution, poised as we are in a new digital age defined as another kind of explosion of images. Field trips are mandatory for this course.

Repeatability: This course may not be repeated for additional credits.

ARTH 2005. Cultural Heritage Preservation. 4 Credit Hours.

Globalism and the international expansion of heritage tourism coupled with 21st century challenges, such as sustainability, natural disasters, climate change, and war, have increased the need for forward thinking management and preservation strategies related to cultural heritage. Italy, where a significant proportion of the world's art and cultural landscape lies, and with Rome as a hub for cultural heritage conservation practice, offers an ideal setting to explore these issues. This course will immerse students in a broad range of cultural heritage preservation issues, including the World Heritage Movement, ways to read the cultural landscape, preservation law, ethics and community partnerships, heritage preservation during war, digital technology, mapping and conservation, and management and leadership in the cultural heritage sector. Students will reflect on these topics against a background of visits to ancient Roman sites, international conservation and preservation centers, the historic center of Rome, a memorial site of conscience, and storage deposits of antiquities recovered by Italian art police squads. Students will gain theoretical and practical knowledge about a field that embraces our shared humanity for the purpose of improving a global society. NOTE: This course is taught in Rome.

Course Attributes: SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

ARTH 2006. Curatorial Methodologies. 4 Credit Hours.

The role of the curator has rapidly expanded in the public's imagination over the past forty years. This class will explore the growing applications of curatorial practice within the field of visual arts - from museums and pop-up galleries to biennials, and public art. Our research will be gathered through texts, site visits, and guest speakers including artists and curators. Class assignments will include writing a case study of a curatorial model of your choosing and presenting your research to the class.

Repeatability: This course may be repeated for additional credit.

ARTH 2007. World Photography. 4 Credit Hours.

This course explores the history of photography as a global phenomenon and includes museum trips that offer direct engagement with current exhibitions in the field. Assigned readings and lectures provide insight to the artistic and political currents that have shaped photography's form, use, and consumption from its introduction in the nineteenth century to its digital proliferation in contemporary social media. NOTE: Field trips are mandatory for this class. Prior to fall 2023, the course title was "World Photography Since 1839."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2008. History of Photography. 3 Credit Hours.

This course explores key moments in the global history of photography. Assigned readings and lectures provide insight to the artistic and political currents that have shaped photography's form, use and consumption from its introduction in the nineteenth century to its digital proliferation in contemporary social media.

Repeatability: This course may not be repeated for additional credits.

ARTH 2010. Topics in Art History. 1 to 4 Credit Hour.

A selected topic from a specific period in the history of art will be examined.

Repeatability: This course may be repeated for additional credit.

ARTH 2043. Islamic Art and Architecture, 650-1250: From Mohammad to the Mongols. 4 Credit Hours.

The revelation of the Qur'an in the 7th-century was a watershed moment that introduced the world to Islam - today one of the most wide-spread and fastest-growing faith traditions. In this course, students are introduced to the rich and varied visual cultures of Islam in the Mediterranean and the Middle East, ca. 650-1250. Through an examination of key objects and architectural monuments, students will be encouraged to consider how aspects of art production and the built environment relate to the social and political contexts in which they were created. Emphasis will be placed on the establishment of new spatial and visual vocabularies, the legacies of classical and late antique traditions in the formation of Islamic art, as well as cross-cultural exchange between the Islamic lands and their neighbors - particularly Western Europe and East Asia. We will also address the importance of modern interpretations of early Islamic art, especially the politics of collecting and museum display. This course is designed for non-specialists; information about major events and historical figures as well as topics related to Islamic society and culture will be introduced and discussed as needed. Field trips are mandatory for this course. Note: Prior to Fall 2023, the course was titled "Early Islamic Art and Architecture."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2044. Islamic Art and Architecture, 1250-1750: From the Mongols to the Mughals. 4 Credit Hours.

This course provides students with an introduction to the art and architecture of the Islamic lands within an increasingly globalized early modern world, ca. 1250-1750. Our sessions begin with the Mongol sack of Baghdad in 1258, which ushered in a new era of small but influential regional dynasties that were eventually superseded by the so-called "Gunpowder Empires" - the Ottomans, Safavids, and Mughals. We will investigate how each of these polities developed rich and distinctive forms of display and art-making, touching upon shifts in patronage patterns, the arts of the book, and the role of figural painting and calligraphy. Emphasis will be placed on cross-cultural encounters and the exchange of ideas, artists, and objects across space and time. We will also address accidents of preservation and the politics of collecting and heritage management, highlighting how the art and architecture from this period has been interpreted for the purposes of nation-building, as well as the numerous ways non-Muslims have participated within Islamic visual culture. This course is designed for non-specialists; information about major events and figures of Islamic history and topics related to Islamic culture will be introduced and discussed as needed. Field trips are required. Note: Prior to Fall 2023, the course was titled "Later Islamic Art: From the Mongols to the Mughals."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2090. Topics in Arts Administration Practice. 3 Credit Hours.

Selected topics in arts administration, focusing on contemporary arts of interest, such as mission, values and community; philanthropy in arts administration.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may be repeated for additional credit.

ARTH 2096. Art History Writing Intensive. 4 Credit Hours.

A selected topic from a specific period in the history of art will be examined. NOTE: This is a Writing Intensive Course. Field trips are mandatory for this class.

Level Registration Restrictions: May not be enrolled in one of the following Levels: Graduate.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

ARTH 2097. Art History Writing Intensive. 3 Credit Hours.

A selected topic from a specific period in the history of art will be examined. NOTE: This is a Writing Intensive Course. Field trips are mandatory for this class.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

ARTH 2098. Art History Writing Intensive. 4 Credit Hours.

A selected topic from a specific period in the history of art will be examined. NOTE: This is a Writing Intensive Course. Field trips are mandatory for this class.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

ARTH 2101. Art of Ancient Egypt and the Aegean. 4 Credit Hours.

This course is an introduction to the arts of ancient Egypt, Crete, and Greece during the Bronze Age (3000-1000 BCE), including painting, sculpture, architecture, and material culture. We will explore how these arts were influenced by the society's religions, social organization, and trade connections. Field trips are mandatory for this course.

Repeatability: This course may not be repeated for additional credits.

ARTH 2105. Roman Art and Archaeology. 4 Credit Hours.

From a group of thatched huts on the banks of the Tiber River, to a wall built to keep the Picts out of England; from the marble temples to the emperors in modern Turkey to the houses of North Africa; from the theaters in Roman Gaul to the destroyed town of Pompeii, the Romans inhabited the entire Mediterranean basin and formed a diverse urban society. We will explore how the Romans built and decorated their houses, how they buried their dead, how they interacted in public spaces, and how they used art in the service of the sacred. We will begin with the formation of Rome in the 8th century BCE, and finish when Constantine moves the capital of the Empire to the east. In this chronological unfolding of the Roman world, we will explore how the Romans developed different building types for their new urban needs; developed the art of interior painting and mosaic; used sculpture to glorify the individual and explain what it means to be a "Roman." We will pay particular attention to the interplay between the city of Rome and its monuments and the larger cultural world the Romans inhabited, especially where they met other art styles that influenced the development of their own - in Greece, France, Asia Minor, the Middle East and Africa. Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2110. Topics in Ancient Art. 4 Credit Hours.

A selected topic from the Ancient period in the history of art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2117. Archaeological Excavation. 1 to 6 Credit Hour.

Requires permission of the instructor. Credit given for participating in an archaeological excavation.

Repeatability: This course may be repeated for additional credit.

ARTH 2129. Greek and Roman Sculpture. 4 Credit Hours.

When is a naked male a god? Are females a sum of their hairstyles and clothes? We begin our exploration of the sculptor's view of the human body in the 7th century BCE and finish as the rise of a newly legal religion changes the form of sculpture in the early 4th century CE. Along the way we will investigate the portrayal of the body in space, the use of emotion, the changing role of nudity as costume, and the depiction of different ethnic groups and ages, the beginning of portraiture, and the representation of non-humans, as the Greek and Roman sculptors portray the Other, the emperor, the god, and more. NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2135. Art and Culture in Ancient Rome. 4 Credit Hours.

Weekly class lectures and on-site visits provide an outline of the origins and development of Italian and Roman art between the 8th century B.C. and the 4th century A.D. Special attention is paid to the cultures that influenced the formation of Roman art: the Greeks in southern Italy and the Etruscans in Tuscany and Latium. The course deals with architecture (and urban design), sculpture, painting, and mosaics. To complete the picture of Roman art, a survey is also given of Roman art in the provinces of the Empire. The course includes a weekend excursion outside of Rome. NOTE: This course is taught in Rome.

Repeatability: This course may not be repeated for additional credits.

ARTH 2196. Greek and Roman Sculpture. 4 Credit Hours.

When is a naked male a god? Are females a sum of their hairstyles and clothes? We begin our exploration of the sculptor's view of the human body in the 7th century BCE and finish as the rise of a newly legal religion changes the form of sculpture in the early 4th century CE. Along the way we will investigate the portrayal of the body in space, the use of emotion, the changing role of nudity as costume, and the depiction of different ethnic groups and ages, the beginning of portraiture, and the representation of non-humans, as the Greek and Roman sculptors portray the Other, the emperor, the god, and more. NOTE: This is a Writing Intensive Course. Field trips are mandatory for this class.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARTH 2197. Art History Writing Intensive. 4 Credit Hours.

A selected topic from a specific period in the history of art will be examined. NOTE: This is a Writing Intensive Course.

Course Attributes: WI

Repeatability: This course may be repeated for additional credit.

ARTH 2200. Topics in Medieval Art. 4 Credit Hours.

A selected topic from the Medieval period in the history of art will be examined.

Repeatability: This course may be repeated for additional credit.

ARTH 2215. Holy Image, Glittering Mosaic: The Art of the Byzantine Empire. 4 Credit Hours.

If you saw a saint in a dream, how would you recognize them? Is a dome only structural, or can it also be symbolic? How did artists represent God in a picture - or not? These questions, and more, were explored by the people of the Mediterranean during the period of Late Antiquity and the Middle Ages, during which the ancient Roman world transformed into the culture of the Eastern Roman Empire - what we often call Byzantium. In this class, we especially consider the religious pluralism of Late Antiquity; the social and religious functions of images and architecture; the purpose of icons; and the settings where these objects were found, including imperial capitals, monasteries and churches. We will use the wealth of local resources in and around Philadelphia to examine manuscripts, relics, coins and other objects from this culture up close. NOTE: Field trips outside of regularly-scheduled class time are mandatory for this class. Prior to Fall 2023 the course was titled "Late Antique/Byzantine."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2216. Early Medieval Visual Culture. 4 Credit Hours.

How did powerful warrior kings, monks living in caves, and travelers crossing continents demonstrate political, spiritual, and holy power through art and architecture? Why are snakes, otters, peacocks, lions, and rabbits tucked away in the corners of religious books? How did monasteries display capsules containing inspirited matter called reliquaries? Explore with us these questions in the visual culture of Late Antiquity and the Early Middle Ages in Eurasia, from Scandinavia to the Mediterranean and North Africa to the Levant, circa 400 to 1000 CE. From the monastery of Skellig Michael in Ireland to the caliphal courts of Baghdad, we will consider how art and architecture from this vital period shaped ideas about institutions of kingship, monasticism, and understandings of divinity across Christian, Jewish, and Muslim communities. We will investigate precious manuscripts, golden treasures from Viking burials, and churches along the route of pilgrimage destinations, among other art forms. NOTE: Field trips outside of regularly-scheduled class time are mandatory for this class.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2217. Art of the Global Middle Ages 1000-1400. 4 Credit Hours.

During the Late Middle Ages, the towering Gothic cathedrals of Europe flooded light into the interior through a fusion of architecture, stained glass and sculpture. At the same time, Mansa Musa, the richest person ever to live, held reign in the Mali Empire. In Ethiopia, a recreated Jerusalem was carved out of living rock, while in Japan, artists produced work to satisfy both warlike shogun and priests making Buddhism available to the illiterate. Through select case studies from the period 1000-1400 CE, we will engage with the art and architecture of the late Middle Ages in Europe, Africa, Asia, Australasia and the Americas, and explore the ideas, individuals and narratives that these objects and structures convey. Particular attention will be given to the connections between art forms and across cultures through objects and ideas that travel. NOTE: Field trips outside of regularly-scheduled class time are mandatory for this class. Prior to Fall 2023 this course was titled "Gothic Art."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2218. From Constantine to Mohammed: Art & Architecture of the Mediterranean from the 4th to 8th Century AD. 4 Credit Hours.

Weekly class lectures and on-site visits examine the period from the time of Constantine (312-337 AD) until the time of Mohammed and the early Islamic period. Through a survey of architecture forms, sculpture (portraiture, historical relief, sarcophagi) and decorative systems (wall paintings, mosaics), students explore fundamental political, religious and cultural changes in the Mediterranean world and their implications on art and architecture up to the 8th century AD. Special attention is drawn to the changing formal and stylistic language of late Roman art, the rise of Christianity and the origins of its art, the influence of the Byzantine world (Constantinople) on the art of the West and on the early Islamic art. The course includes a three-day academic excursion to north eastern Italy centered around Ravenna, residence of Roman emperors, Germanic kings and Byzantine representatives in the 5th and 6th century AD. NOTE: This course is taught in Rome.

Repeatability: This course may not be repeated for additional credits.

ARTH 2296. Topics in Islamic Art and Architecture. 4 Credit Hours.

This course will examine buildings, built environments, and objects created by and for cultures in which Islam was the dominant culture practiced either by a minority ruling elite or by a majority of the populace. Sample topics include "Imperial Cities/Global Early Modern Period" and "The Modern Mosque: Religious Identity, Power, and 'Starchitecture'". Field trips are mandatory for this class.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARTH 2300. Special Topics. 1 to 3 Credit Hour.

A selected topic in the history of art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2310. Topics in Renaissance Art. 4 Credit Hours.

A selected topic in Renaissance art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2321. Masters of Renaissance Art. 4 Credit Hours.

This course will explore the construction of artistic identity and style from the mid-fifteenth century to the early-seventeenth century through visual analyses, readings of contemporary sources (biographies/autobiographies, art treatises, and correspondences), and modern scholarship in an attempt to demystify the "Masters" of the Italian Renaissance. NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2323. Early Renaissance Art in Italy. 4 Credit Hours.

This course is a survey of Italian painting and sculpture from the 13th through the early 16th centuries. An analysis of the "revival" of painting beginning in the Proto-Renaissance by Cimabue, Cavallini, Duccio and Giotto is followed by a study of significant artistic inventions in the Early Renaissance by Masaccio, Brunelleschi, Ghiberti, Donatello and others. The course concludes with the inception of the High Renaissance with works by Leonardo, Michelangelo and Raphael. The artistic culture in Rome and its relationship to Florence are examined. NOTE: Two weekend field trips are mandatory.

Repeatability: This course may not be repeated for additional credits.

ARTH 2325. Art in the Age of Exploration: 1400-1600. 4 Credit Hours.

This course is an overview of the arts created North of the Alps, c. 1400-1600, with attention to the period's early consciousness of globalism. This is a period of dramatic change, with the introduction of the printing press, religious and political turmoil of the Protestant Reformation, the European "discovery" of the Americas, incursions from the Ottoman Turks, and expanding travel across Europe and around the coast of Africa to India. We will examine fundamental artistic developments on the cusp of the modern era, including technical innovations in oil paint and printmaking, developments in mapmaking, the decline of the altarpiece, and the rise of new secular subjects in art, including images of witches, peasants, independent landscapes and portraiture. We will explore the ways in which works of art - by artists such as Van Eyck, Durer, Holbein, Bosch, and Bruegel - both reflected and contributed to the rapidly changing worldview. We will examine a wide range of media and materials, including carved altarpieces, panel paintings, book illuminations, prints, and so-called "feather paintings" from the Americas. We will study the territory of the Burgundian court and the Holy Roman Empire, looking at the cosmopolitan centers of Bruges, Nuremberg, Wittenberg, and Antwerp, but also at the movement of artists, patrons, works of art, and ideas as they are received from Italy, the Ottoman Empire, parts of Africa, and the Americas. Field trips are mandatory for this class. Note: Prior to Fall 2023 this course was titled "Northern Renaissance Art 1350-1550."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2329. Italian Architecture 1400-1700. 4 Credit Hours.

Architects of the 14th century were the first to describe themselves as "modern," although they looked back to ancient Rome and cultivated ideas about architecture as a profession, urban planning and conservation. The aim of this course is to provide a basis for the recognition of Italian Renaissance and Baroque buildings and typologies, architects - from Brunelleschi to Michelangelo through Bernini - and elements of architectural language, within a framework of critical visual and historical analysis. Relationships to local architectural heritage in Philadelphia will be encouraged - consider the Palladian window from Independence Hall to your local McMansion - just one of the types of innovation we will explore for its contribution to our own environment. Field trips are mandatory for this course. Note: Prior to Fall 2023 this course was titled "Renaissance and Baroque Architecture in Italy."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2350. Topics in Early Modern Art, 1400-1750. 4 Credit Hours.

A selected topic in Early Modern Art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2400. Topics in Global Baroque Art. 4 Credit Hours.

A selected topic from the Baroque period in the history of art will be examined. NOTE: Field trips are mandatory for this class.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may be repeated for additional credit.

ARTH 2428. Wonders of Rome: Art and Culture of the Baroque Era. 4 Credit Hours.

Weekly class lectures and on-site visits in Rome provide students an unparalleled opportunity to examine firsthand painting, sculpture and architecture (from c.1585 to c.1750) in their original settings. Organized chronologically from the papacy of Paul V Borghese to that of Alexander VII Chigi, this course gives particular attention to Caravaggio's paintings, Lanfranco's frescoes, Bernini's statues and fountains, Borromini's churches, the Barberini Palace, Piazza Navona, and Saint Peter's Basilica and Square. Works inciting wonder (or "meraviglia") and viewer participation shall be studied from the perspective of the culture of seventeenth-century Rome, as relating to the Counter-Reformation and Catholic Revival, papal propaganda and nepotism, and the rise of powerful new orders, such as the Jesuits. The course includes a two-day field trip to Naples to view seventeenth-century art in the Capodimonte Museum, Certosa di San Martino, and churches in the historic center, "Spaccanapoli", and to consider artistic production in Naples as a striking foil to that of Rome. NOTE: This course is taught in Rome only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2431. Early Modern Italy and Spain in the 17th Century. 4 Credit Hours.

This course will focus on the birth of Baroque art in Southern Europe, originating in Rome, with concentration on its development there and its migration to other centers, such as Naples and Madrid, Spain, and its global spread as an instrument of persuasion and propaganda. Great personalities emerge: from the rebel painter of naturalism, Caravaggio, to the rise of such female artists as Artemisia, to the exponents of art academies, the Carracci, to papal darling Bernini, and the courtier Velazquez, as well as the enslaved Juan de Pareja. The aim of this course is to provide a basis for the recognition of the Baroque work of art, its practitioners and cultural stimuli by looking in depth at the achievements of such key artists and their career trajectories. Emphasis is placed on the expressive qualities of style, meaning, materials and techniques as practiced by these artists in this period. Museum visits form a part of this course! Note: Prior to Fall 2023 this course was titled "Southern Baroque Art: Italy and Spain."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2432. Northern and Global Baroque Art: Art in the Age of Rubens, Rembrandt, Vermeer. 4 Credit Hours.

The period from approximately 1600 through 1750 saw warfare and unstable truces as constants among political rivals and monarchies; the Reformation and Counter-Reformation continued to impact European society and culture; and scientific advancements and global trade reshaped how people understood their place in the world and in nature. This also was a time of exceptional artistic talent - the age of Rubens, Rembrandt, Vermeer, and increasing numbers of women artists such as Judith Leyster and Maria Sibylla Merian - with artworks produced and transported on an unprecedented scale in European cultural centers, at home and abroad, in cities and courts and communities overseas. Global trade and efforts to spread Christianity were also heavily implicated in colonialism, and art of all kinds - large paintings, architecture, prints - played an enormous role in those stories. We not only will look at art of this so-called Baroque Golden Age, but also at its darker underbelly and the 'non-Golden Age' of early colonialism that deserves our attention. Field trips are mandatory for this course. Note: Prior to Fall 2023, the course was titled "Northern Baroque Art."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2450. Topics in Eighteenth Century Art. 4 Credit Hours.

A selected topic in eighteenth-century art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2500. Topics in 19th Century Art. 4 Credit Hours.

A selected topic in the history of art from the 19th century will be examined. Field trips are required.

Repeatability: This course may be repeated for additional credit.

ARTH 2535. Art in the Age of Revolution. 4 Credit Hours.

This course considers Western art from 1750 to 1850 (Neoclassicism, Romanticism and early Realism) within its context of political and socioeconomic upheaval. The industrial and scientific revolutions also expanded technical possibilities and broadened the audiences for the visual arts. Likewise, they reframed conceptions of the physical universe and accelerated and intensified global contact, with a multidirectional exchange of images and objects, iconography and style, impacting the visual culture of exploitation and emancipation, aggression and emancipation, reaction and resistance. The course concludes at the world fairs in London (1851) and Paris (1855). NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2543. Transnational Impressionisms. 4 Credit Hours.

This course begins with the study of plein-air painting focusing on Paris. The artists known as the "impressionists" operated within a transnational context. Their painting was informed by the capitalist, industrial and imperialist modernity of urban Paris. We will consider the significance and reception of palette, brushstrokes, and light in France, but also in other locations. The course also includes challenges to the precepts of impressionism and revivals and revisions to this style. Methodologies such as feminism, postcolonial and transnational perspectives will be engaged to analyze the artists and their art making in a variety of media. NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2600. Topics in 20th Century Art. 4 Credit Hours.

A selected topic in the history of art from the 20th century will be examined. NOTE: Two weekend field trips are mandatory for this course.

Repeatability: This course may be repeated for additional credit.

ARTH 2601. History of Modern Graphic Design. 4 Credit Hours.

The mixture of image and type we view today as graphic design has a history rooted in the earliest pictographs on pre-historic cave walls, evolving through such experiences as Roman political campaigns, medieval illuminated manuscripts, Renaissance book design, and the Industrial Revolution before arriving in the twentieth century. Keeping this rich heritage in mind, this course will investigate the development of graphic design from the mid-nineteenth century to the present, as a result of technological advances, political upheaval, commerce, and cultural and artistic exchange. We will discuss issues and works that are relevant to the field of graphic design in order to enrich your practice and develop critical thinking skills that will be useful to you throughout your academic and professional careers in other environments as well.

Repeatability: This course may not be repeated for additional credits.

ARTH 2610. Topics in Modern and Contemporary Art. 4 Credit Hours.

A selected topic in Modern and Contemporary Art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2611. Introduction to African Art. 4 Credit Hours.

This course is an introductory survey of African art spanning from prehistoric rock art to contemporary African art throughout the entire continent. Students will be asked to consider how African works force us to reconsider what the term "art" means in an African context, particularly the ways that African art is interwoven into society through various means including rites of passage, masquerade, and altars. The course will examine the history of the exhibition of African art in museums and the ways it is antithetical to the life of works intended to be activated by the communities that created them. Further, it will examine the history of the formation of significant collections of African art, particularly those in former colonial centers. The course will begin by asking what art means in an African context. It will move through Africa by region, focusing on the art production of various ethnic groups within those regions. It will end by examining the role of photography in Africa and the massive production of contemporary art within the continent. Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2612. Introduction to Caribbean Art. 4 Credit Hours.

This course is a broad survey of art from the Caribbean region, spanning from indigenous Taino and Carib art through to contemporary art of the Caribbean and its diaspora. The course will expose students to the history of the region including indigenous cultures before European exploration, European arrivals and conceptions of the "New World", plantation economies from sugar to coffee, the transatlantic slave trade, the Haitian Revolution, art of maroon communities, and the syncretism of African religious practices in Afro-Caribbean faiths like Vodoun and Santeria. Throughout the semester, we will examine definitions of the term "Caribbean". For example, is the term limited geographically to the Caribbean basin or should it take on a more cultural valence, expanding to places like Louisiana and Brazil, both of which share significant historical and cultural similarities with the countries from the Caribbean basin. Major themes of the class will include the impacts of colonialism, the transatlantic slave trade, the formation of the Afro-Atlantic diaspora, and legacies of the transatlantic slave trade in contemporary art. Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2622. Galleries and Studios of Rome. 4 Credit Hours.

A course designed to give an overview of the artistic developments in Rome during the past 25 years and to offer insight into the diverse trends of contemporary art in the city. Visits are made to galleries, specific exhibitions, and artists' studios. This course is taught in Rome only.

Repeatability: This course may be repeated for additional credit.

ARTH 2642. Modern Art, 1900-1945. 4 Credit Hours.

This course examines the idea of the "modern" across different geographic contexts and histories. Students will study how artists broke from the concept of art as mimesis as a way to represent their own experiences of modernity. To explore these experiences, topics such as urban life, technological innovations, revolution and war, and histories of colonization will be discussed. Considering the focus of the class on global modern art, we will compare how its genres and styles traveled, often unevenly, across the world, questioning the role of center and periphery in its development. Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2644. Post-War Art, 1945-1989. 4 Credit Hours.

This course examines the major artists and movements in art from 1945 to 1989, placing them within the larger social and political contexts. Artistic practices in American, European and Global movements such as abstract expressionism, experimental art, and avant-garde art will be theorized against the backdrop of the politics, technology, and visual culture of the mid-20th century to 1989. Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2646. Contemporary Art, 1989 to Present. 4 Credit Hours.

This course studies the global production of art after 1989 with a special focus on the development of non-traditional media. Topics covered may include, but are not limited to, performance art, video art and social practice, large-scale photography, conceptual practices, institutional critique, installation art, and site-specific art. We will discuss the periodization of contemporary art and the increasing significance of curators, the biennial system, and the art market. Breaking from a chronological survey of art and a Europe-US axis, the course addresses themes and issues such as relational aesthetics, social practice, collaboration, and globalization in order to understand how art has been re-invented with the contemporary period and across the world. Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2660. Topics in International Cinema. 4 Credit Hours.

Students in this course study a selection of films from modern Europe and Third World cultures which demonstrate both their interaction with postmodern politics, theory and culture, and the development of an international alternative discourse to Hollywood commercial film-making. Films will be selected according to a theme each semester. Past themes have included Italian Neo-Realism, Independent Film Makers, and Women in Film.

Repeatability: This course may be repeated for additional credit.

ARTH 2670. Topics in Contemporary Art. 3 or 4 Credit Hours.

A selected topic on contemporary art and visual culture will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2680. Topics in Global Art. 4 Credit Hours.

A selected topic on global art and visual culture will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2696. Graphic Design Theory. 3 Credit Hours.

This course will introduce students to contemporary design theories and discourse. It will examine the theoretical aspects of artifacts through their making, reading and dissemination. Graphic design and visual communication theories will be compared to those in literature and architecture. Students will use discussion, writing, presentations and design to investigate contemporary design issues. Emphasis will be placed on forming and articulating an individual point-of-view (POV) in discussion and writing. Based on the semester-long discussion about how we visually communicate, all students will draw a revised diagram of the Communication Model developed by Meredith Davis in 2012. Graduate students will also write a 1000-word reflection on the factors that have influenced this eight-year evolution.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARTH 2700. Topics in American Art. 4 Credit Hours.

A selected topic in American Art will be examined. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2701. Modern Art in the United States. 4 Credit Hours.

During the 20th century, artists working in the United States redefined art in an energetic quest to express what they believed to be authentically modern, and/or authentically American, while developing new visual languages for expressing personal and national identity through their work. This course surveys modern art in the US from 1900 to 1990, a period when art, along with culture and society more generally, oscillated between qualities associated with the modern (speed, technology, machines, the future) and the anti-modern (tradition, nostalgia, handicrafts, roots). We will explore modern art's diverse definitions and forms through painting, sculpture, photography, graphic arts and design, and artistic movements including the Ashcan School, the Harlem Renaissance, abstract expressionism, Minimalism, Pop Art, Graffiti Art, and the emergence of post-modernism in the US. NOTE: Field trips are mandatory for this course. Prior to Fall 2023 this course was titled "Main Trends in American 20th Century Painting."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2704. Art in the United States to 1900. 4 Credit Hours.

Nothing characterizes American art so much as the rich diversity of communities, cultural traditions and media that contributed to its development. This course examines the history of art and visual culture in the United States from the precontact settlements of Indigenous peoples through the emergence of modern art around the year 1900. Among the topics we will consider are art and nationalism, folk art and vernacular creative traditions, race and representation, photography and the emergence of mass culture, and the ways that gender, ethnicity, and histories of museums and art markets shaped appreciation and access to art in US society. NOTE: Field trips are mandatory for this class. Prior to Fall 2023 this course was titled "19th Century American Art."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

ARTH 2753. Art and Environment in American Culture. 4 Credit Hours.

Does our present global environmental crisis demand a new way of thinking about art and its history? What role has art played in constructing an image of our environment as natural resource, scientific specimen, mythic Eden, arena of struggle, and/or fragile ecosystem? Can art and art history help envision a more sustainable world or are they part of the problem? As a way of addressing such questions, this course takes an "ecocritical" perspective on American art from the late 19th century (when the word "ecology" first appeared) to the present. More than any other single nation, the United States bears responsibility for the ecological challenges facing our planet, even as its citizens arguably enjoy unparalleled opportunities for creative freedom. By highlighting the interconnectedness of human beings with their environment in America, as well as the power of art to re-imagine that relationship, the course provokes students to re-think accepted canons and practices in light of other criteria having to do with sustainability, environmental justice, and our ethical responsibility to non-human life. Covering a wide range of artists and media - from the Romantic paintings and writings of Thomas Cole and John James Audubon to more recent work by Edward Burtynsky, Subhankar Banerjee, Mierle Laderman Ukeles, Robert Smithson, Helen and Newton Harrison, Eduardo Kac, Alexis Rockman, Mark Dion and other contemporary artists active in this country - the course gives students a new and richly diverse opportunity to think about American art. NOTE: Field trips are mandatory for this course.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ARTH 2760. Topics in the Art of Latin America. 4 Credit Hours.

A selected topic on Latin American art and visual culture will be examined. Topics can range from Pre-Colombian and Mesoamerican to colonial and postcolonial, U.S. Latino, and modern and contemporary art of Latin America. NOTE: Field trips are mandatory for this class.

Repeatability: This course may be repeated for additional credit.

ARTH 2765. Revolution and Beyond: Modern & Contemporary Art in Latin America. 4 Credit Hours.

This course examines art in Latin America from 1900 to the present. Covering a period of tumultuous societal change in the region, from revolutions to economic booms and military dictatorships, discussions will focus on understanding the distinct contexts of artistic production in various Latin American centers, with particular attention to the artists and artistic movements of Brazil and Mexico and including consideration of major architectural projects. We will examine how artists conceived of their work in relationship to local and international aesthetic and political debates. Students will read criticism and artists' writing from the period as well as recent theory and historical analysis and attention will be placed on developing skills to analyze a range of media and styles, including figurative and abstract practices. NOTE: Field trips are mandatory for this class.

Repeatability: This course may not be repeated for additional credits.

ARTH 2800. Topics in Non-Western Art. 4 Credit Hours.

A selected topic in the Non-Western history of art will be examined. NOTE: Field trips are mandatory for this class. This course is taught in TU Japan only.

Repeatability: This course may be repeated for additional credit.

ARTH 2807. East Meets West. 4 Credit Hours.

This course focuses on topics related to the correspondence between the arts of Eastern and Western cultures. Past and future topics include: American chromolithography and Japanese woodblock prints; religious iconography in the East and West; art and technology in modern Eastern and Western art and culture; trade and commerce and the interchange of artistic motifs, philosophies and techniques. NOTE: Field trips are mandatory for this class. Temple Japan campus only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2815. Pre-Modern Japanese Art up to the Edo Period. 4 Credit Hours.

This course is an introductory survey to Japan's long and rich artistic traditions from the prehistoric period to the Edo period marking the end of the feudal samurai government in the late 19th century. Students explore the visual arts of Japan as a reflection of Japanese culture. Lectures focus on selected works of painting, sculpture, architecture, gardens, prints and ceramics while considering themes such as subject matter, style, patronage, and political/social changes. Lectures also address the aesthetic sensibilities, ideas, and beliefs that have developed in Japan in order to provide a glimpse into the culture within which artworks were created and appreciated by the people. Students also study some of the methods and materials used in creating Japanese art. NOTE: Field trips are mandatory for this class. Temple Japan campus only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2816. Art and the City: Tokyo in the 1960s and 1970s. 4 Credit Hours.

This course examines the urban practices of experimental art and visual culture in Tokyo in the turbulent decades of the 1960s and 1970s. Premised on an understanding that Tokyo's changing urban environment shaped the artistic practices of the time, this course thematically explores some of the major theoretical issues that surround contemporary Japanese art and visual culture of the period. Critical readings will provide social, historical, and political contexts for understanding a broad range of visual cultural practices including art, design, and film. While Japan's postwar "miraculous" economic growth was accompanied by conservative ideals such as the homogenous middle class and contemporaneous urban developments reorganized the city to promote market activity, the 1960s and 1970s were also extremely productive decades for the arts. Alongside increased political activism and direct action by students and workers, who took to the streets, new developments in street performances, experimental theater works, graphic design, experimental cinema, and underground comics would irrevocably change the course of Japanese visual culture. Paying attention to the thick connections between artists working in various media of the time, we will explore how Tokyo both shaped the artists and their works and served as their subject. NOTE: Temple Japan campus only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2817. Japanese Art Before and After WWII: National Identities in Modernization. 4 Credit Hours.

This course introduces Japanese art from the early 20th century to present day, focusing on traditional aspects of Japanese culture. Through this course you will study Japan's relationship with modernization and its influence on arts and cultures such as painting, sculpture, manga, films, animation, performance art, and more. The artists who will be discussed in this course will include Hayao Miyazaki, Osamu Tezuka, Leonard Tsuguharu Fujita, Isamu Noguchi, Yasujiro Ozu, Yoko Ono, Yukio Mishima, and Yasumasa Morimura. Special attention will be paid to the historical context of Japan's modernization, World War II, and their influences on Japanese contemporary art. NOTE: This course is taught at TU Japan.

Repeatability: This course may not be repeated for additional credits.

ARTH 2819. Southeast Asian Art. 4 Credit Hours.

The art and civilization of Sri Lanka, Burma, Thailand, Cambodia, Vietnam, and Indonesia, focusing on the key aspects that have shaped cultures from the 5th century AD to modern times. NOTE: Field trips are mandatory for this class. Temple Japan campus only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2868. Arts of Asia. 4 Credit Hours.

Architecture, sculpture, painting and the functional art of Asia (India, China, Japan and Southeast Asia). A historical examination of the art as a religious expression and as a product of changing social and economic conditions. NOTE: Field trips are mandatory for this class. Temple Japan campus only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2871. Chinese Art. 4 Credit Hours.

This course is an introductory survey of the arts of China from the Neolithic period to the 20th century. Looking primarily at works in situ and in Asian collections, we will investigate how art objects and monuments reflect the religious beliefs, political agendas and aesthetic preferences of the artists and patrons who created them. We will also pay particular attention to the roles that media and technology play in the appearance of and status attached to the finished products. Another major theme will be the development of indigenous and imported religions, and their impact on iconography. Finally, time permitting, we will touch on related contemporary subjects, such as forgeries and the illegal trade in looted art. NOTE: Field trips are mandatory for this class. Temple Japan campus only.

Repeatability: This course may not be repeated for additional credits.

ARTH 2896. Modern Japanese Art and Visual Culture, from late Edo to Showa. 4 Credit Hours.

This course will examine Japanese visual expressions created from ca. 1720 during the Edo period to 1956 during the Showa period. This span of time can be characterized by Japan's modernization efforts and engagement in wars, beginning with the lifting of the ban on western books after almost 200 years of isolation from the outside world. This policy change triggered an influx of European thought into Japan and ensuing westernization as Japan faced the imperialist powers of Europe. Thereafter, Japan experienced two watershed events pertaining to the West: the collapse of centuries-old samurai feudalism in 1868 and Japan's defeat in the Second World War in 1945. In the development of Japanese modern visual arts, Western knowledge and culture played a crucial role, and often challenged Japan's long-standing traditional values and artistic practices. The course will explore the transformation that Japanese visual arts experienced against the backdrop of political and social upheaval of this period. Japan struggled to keep up with an increasingly globalizing world. Japanese artists had to question and gauge their own artistic practice and style to cope with internal and external factors. After the defeat by the Western Allies in the Second World War, Japanese artists again struggled to find their voices in society. As a Writing Intensive Art History course, students will be instructed on proper research and writing in the discipline and will prepare and refine a research paper. Taught at Temple Japan campus only.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARTH 2897. Writing for Art History: Art History Writing Intensive Seminar. 4 Credit Hours.

This course is designed to provide students with opportunities to become familiar with different kinds of art historical writing, with the ultimate aim of pulling together these skills for a final project of researching and writing a virtual exhibition catalog. Students will build on smaller assignments that involve formal description and analysis of visual images, research and contextual interpretation of images, critical reading of secondary sources, and the writing of extended catalog essays. The course will be thematically based according to the instructor's area of expertise and will include two mandatory group field trips to local and regional museums. Examples of possible topics offered in the future are: Renaissance Portraiture; The Development of Landscape in Western Art; Abstraction; Sacred Images from Antiquity to the Baroque Period.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARTH 2898. Contemporary Japanese Art and Visual Culture, from 1945 to the present. 4 Credit Hours.

This course examines the development of Japanese art and visual culture in the postwar period. Instead of providing a linear history of formal developments, this course thematically explores some of the major theoretical issues that surround contemporary Japanese art and visual culture. Critical readings will provide social, historical, and political contexts for understanding a broad range of visual cultural practices. Through the course we will consider topics such as the question of modernity and the West in Japanese art; underground art and political dissent in the 1960s; and roles of gender, cuteness, and fantasy. Based on (but not limited to) the ideas and materials presented in class, students will pursue a research topic of their own interest, which will culminate in a PowerPoint presentation and final research paper. If completed successfully, this course will provide students with a solid grounding in art historical writing that combines critical thinking, formal analysis, research (secondary sources and, if possible, primary materials), and methodological awareness. As a Writing Intensive course, students will produce a sizeable quantity of writing during the semester, for which they will receive substantial feedback from the instructor and also from fellow classmates. The philosophy of this course is that one does not only think in order to write, but that one must also write in order to think. Taught at Temple Japan campus only.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ARTH 2904. Honors Counterfeiting, Looting and the Ethics of Collecting Ancient Art. 3 Credit Hours.

Did you know that the Getty Museum paid over 9 million dollars for a statue that many now consider a fake? That some curators believe that 40% of the art on the market today is fake or so restored that we can consider the pieces fake? We will begin looking at some prominent fakes that took in scholars (the Metropolitan's "Etruscan" Warriors), talk about when something becomes a fake, and problematic pieces that are still on display. Fakes are made because there is so much money in the art market, and we will see how this market developed. In doing so we will see how Napoleon's policies ultimately lead to the looting on a massive scale in Nazi Germany; discuss the modern development of international law on looting and the protection of antiquities; and argue about what is the United States' responsibility in Iraq now. Finally, we will look at various means of how governments try to protect their antiquities (paying attention to the real-life soap operas like the Lydian Hoard); what is the role of museums in protecting antiquities (looking at the major news story on the indictment of the curator of the Getty, and the return of the stolen Euphronios vase by the Metropolitan Museum); what dealers do; and how an ethical collector can pursue his/her hobby responsibly. NOTE: This course is for Honors students.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

ARTH 2910. Honors Special Topics. 4 Credit Hours.

Selected topic in art history, focusing on methodology, art criticism, or art of a particular period or geographical area. NOTE: This course is for Honors students. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. The course may require local field trips to museums or other institutions housing art.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ARTH 2990. Honors Special Topics. 4 Credit Hours.

Selected topic in art history, focusing on methodology, art criticism, or art of a particular period or geographical area. NOTE: This course is for Honors students. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. This course requires two field trips, one local and one to New York, to museums or other institutions housing art.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ARTH 3082. Independent Study. 1 to 3 Credit Hour.

Intensive study in a specific area under individual guidance. Students must get permission from their department before attempting independent study.

Repeatability: This course may be repeated for additional credit.

ARTH 3097. Art History Capstone. 4 Credit Hours.

Undergraduate Capstone seminar in methodology, historiography, and or criticism of art and art history. Specific topics will vary by semester. This course is required of all art history majors for graduation and should be taken in their junior or senior year. NOTE: This is a Writing Intensive Course. This course fulfills the capstone requirement for Tyler Art History majors who entered the university in fall 2008 or later.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in 16 credits needed: (ARTH 2000 or ARTH U000 (TR or higher))

ARTH 3182. Independent Study. 1 to 3 Credit Hour.

Intensive study in a specific area under individual guidance. Students must get permission from their department before attempting independent study.

Repeatability: This course may be repeated for additional credit.

ARTH 3301. Michelangelo. 4 Credit Hours.

Profoundly impressive both for his technique and expressive content - emotional, dramatic, heroic, but always human - Michelangelo Buonarroti (1475-1564) continues to be a vital element in the history of art, as he was during the Renaissance. Weekly class lectures examine his drawing, painting, sculpture and architecture in the context of the art and patronage of his own time, starting with a study of Classical Roman Antiquity. NOTE: This course is taught in Rome.

Repeatability: This course may not be repeated for additional credits.

ARTH 3302. Women and Art. 3 Credit Hours.

A study of women as subjects of art, as patrons, as creators. The course is organized around the roles of women as represented over the course of western art. Note: Prior to spring 2017, the course title was "Images of Women."

Repeatability: This course may not be repeated for additional credits.

ARTH 3324. High Renaissance Art in Italy. 4 Credit Hours.

The course initially focuses on the first three decades of the 16th century, when Rome replaced Florence as the capital of the arts. Attention is given to the Rome of Julius II and the Medici popes, and to the great protagonists of that age: Leonardo, Raphael and especially Michelangelo, the creator of the "grande Maniera Moderna" (great Modern Manner). The course spans the entire 16th century and also considers artistic production in other areas of Italy, such as Venice and Florence.

Repeatability: This course may not be repeated for additional credits.

ARTH 4082. Independent Study. 1 to 4 Credit Hour.

Intensive study in a specific area under individual guidance. Students must get permission from their department before attempting independent study.

Repeatability: This course may be repeated for additional credit.

ARTH 4182. Independent Study. 4 Credit Hours.

Intensive study in a specific area under individual guidance. Students must get permission from their department before attempting independent study.

Repeatability: This course may be repeated for additional credit.

ARTH 4285. Internship. 1 to 6 Credit Hour.

Students working on relevant projects at area museums or galleries may receive Temple credit toward an art history major or minor. Variable credit depending on the number of hours worked per week, up to six credits maximum. Students will maintain a regular record of activities. Prior arrangements must be made with a host museum or gallery. Requires the permission of the Undergraduate Advisor of the Art History Department.

Repeatability: This course may be repeated for additional credit.

Art Therapy (ARTT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ARTT 2011. Creative Process in Art Therapy. 3 Credit Hours.

This course explores creativity theory and applies concepts from art therapy and related fields and presents a blend of approaches including Eastern traditions, Jungian psychology, and other cross-cultural sources. Art making and reflective writing are used as tools to understand the creative process in art therapy and cultivate the discipline of self-awareness. Readings, seminar-style discussions, and processing of the art-making experiences will be utilized.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (Art requirements: (ARTU 1401 or ART 1503), (ARTU 1201 or ART 1011), and (ARTU 1501 or ART 1012), (FDPR 1511 and FDPR 1521), or Select 2 from the following: VS 1151, VS 1351, and VS 1451) and ARTT 3004.

ARTT 3004. Introduction to Art Therapy. 3 Credit Hours.

This course is designed to offer students a didactic and experiential overview of the field of art therapy. Material covered will include history, theory, and practice of art therapy processes and approaches as well as a survey of populations, settings, and applications. Lectures, readings, seminar-style discussion, audiovisual presentations, experiential exercises, and guest presentations comprise the structure of this course. Students complete Volunteer work in this course. Students must have current FBI Clearance, Child Abuse Clearance, Pennsylvania State Criminal Record Check, and a TB Test to take this course.

Repeatability: This course may not be repeated for additional credits.

ARTT 4082. Independent Study. 1 to 3 Credit Hour.

Self-directed study and research initiated by a student with an independent study contract developed in conjunction with, and supervised by, a faculty member in art therapy.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

Repeatability: This course may be repeated for additional credit.

ARTT 4289. Field Work in Art Therapy. 4 Credit Hours.

The course examines the important role of art making in promoting resilience in individuals, families and communities; explores the role the arts play in addressing issues of inequality and injustice; and building strong and caring communities are examined. BA in Art Therapy majors engage in fieldwork experience as art facilitators with individuals and groups at pre-approved fieldwork sites. Philosophies of therapeutic art making practices and experience with appropriate materials; resources related to art therapy with individuals who have diverse educational, social, emotional, communicative and physical needs are explored. Readings, group discussions, and processing of the art-making experiences will be utilized. Applications for this course are due October 1 for Spring; March 1 for Fall. Students will be registered by the department after applications are vetted. Students must have current FBI Clearance, Child Abuse Clearance, Pennsylvania State Criminal Record Check, and a TB Test to take this course.

College Restrictions: Must be enrolled in one of the following Colleges: Art Architecture, Tyler School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (ARTE 2011 or CART 2011) and (ARTE 3004 or CART 3004)

Asian Studies (ASST)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ASST 0811. Asian Behavior & Thought. 3 Credit Hours.

This course is an introduction to some of the major philosophical and religious traditions of Asia, and their roles in Asia and the world today. You will learn about some of the dominant features of these traditions and be exposed to several important ideas, institutions, and practices. How do these ideas influence the behavior of individuals and communities? How does individual and communal behavior and beliefs differ regionally and historically? We will read and discuss selections from primary works as well as secondary scholarship, while surveying key doctrines and historical developments. Note: This course fulfills the Human Behavior (GB) requirement for students under GenEd and Individual & Society (IN) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: CRIT 0811, PHIL 0811, CHI 0811, JPNS 0811, REL 0811, or REL 0911.

Course Attributes: GB

Repeatability: This course may not be repeated for additional credits.

ASST 0857. The Detective Novel. 3 Credit Hours.

The detective novel remains the most popular of literary forms since its American origins in Edgar Allan Poe. The form has spread to virtually every part of the world, taking on different perspectives in the different societies where it has prospered. Our course analyzes the global travels of this prolific literary genre, paying particular attention to the manner in which its formula of crime-detection-resolution has evolved from its classic phase in the Sherlock Holmes mysteries, to its hard-boiled phase in the 1940's US, to the transformation of the private detective working outside the formal apparatus of the law into the police detective working within the law in places as different as Sweden, Holland, Nigeria, and India. We will read bestselling detective novels by figures such as Emile Gaboriau, Poe, Arthur Conan Doyle, Wilkie Collins, Agatha Christie, Raymond Chandler, Jorge Borges (Argentina), Vikram Chandra (India), Henning Mankell (Sweden), Janwillem van de Wetering (Holland), Kole Omotosho (Nigeria), and Soji Shimada (Japan). We will pay special attention to the conventions of the form and analyze its evolution as it travels the world. In exploring its global travels, we will attend to a number of issues, including: the changing definition of crime; the evolving representation of the criminal; the changing methods for "solving" the crime; the ideology of justice; the conflicts between community and individuality; and the varying social and national anxieties that the form reveals. **DUPLICATE CREDIT WARNING:** Students who have received credit for English 0857 or Critical Languages 0857 will not receive additional credits for this course.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ASST 0862. Development & Globalization. 3 Credit Hours.

Use historical and case study methods to study the differences between rich and poor nations and the varied strategies available for development in a globalizing world. Examine the challenges facing developing countries in historical and contemporary context and analyze the main social, cultural, and political factors that interact with the dynamic forces of the world economy. These include imperialism/colonialism, state formation, labor migration, demographic trends, gender issues in development, religious movements and nationalism, the challenges to national sovereignty, waves of democratization, culture and mass media, struggles for human rights, environmental sustainability, the advantages and disadvantages of globalization, and movements of resistance. **NOTE:** This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: History 0862, POLS 0862/0962, or SOC 0862/0962.

Course Attributes: GG, SI

Repeatability: This course may not be repeated for additional credits.

ASST 0863. Religion in the World. 3 Credit Hours.

Learn about the major religious traditions found worldwide today: Hinduism, Buddhism, Judaism, Christianity, Islam, and several indigenous traditions. Examine the beliefs, practices, and values of these groups in order to understand the worldviews and ways of life of the people who practice them. Our interdisciplinary analysis and interpretation of specific examples of religious experience will help shed light on the overall meaning of religion and human existence. We will carefully consider examples while also focusing on particular thematic issues, like cosmology and ritual. Develop appreciation for the religious vibrancy and diversity that exist in human cultures while you actively engage in the learning process through class presentation, class participation, paper-writing, and a self-selected field trip. **NOTE:** This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. **Duplicate Credit Warning:** Students may take only one of the following courses for credit; all other instances will be deducted from their credit totals: Religion 0863, 0963, 1101, C053, Asian Studies 0863, Critical Languages 0863, or Philosophy 0863.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ASST 0868. World Society in Literature & Film. 3 Credit Hours.

Learn about a particular national culture - Russian, Indian, French, Japanese, Italian, for example, each focused upon in separate sections of this course - by taking a guided tour of its literature and film. You don't need to speak Russian, Hindi, French or Japanese to take one of these exciting courses, and you will gain the fresh, subtle understanding that comes from integrating across different forms of human expression. Some of the issues that will be illuminated by looking at culture through the lens of literature and film: Family structures and how they are changing, national self-perceptions, pivotal moments in history, economic issues, social change and diversity. NOTE: This course fulfills the World Society (GG) requirement for students under GenEd and International Studies (IS) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0868/0968, Chinese 0868/0968, English 0868/0968, French 0868/0968, German 0868/0968, Hebrew 0868, Italian 0868/0968, Japanese 0868/0968, Jewish Studies 0868, Korean 0868, LAS 0868/0968, Political Science 0868/0968, Russian 0868/0968, or Spanish 0868/0968.

Course Attributes: GG

Repeatability: This course may not be repeated for additional credits.

ASST 0871. Arts in Cultural Context. 4 Credit Hours.

View the arts as an expression of cultural identity as it occurs across the globe. Each semester, we will focus on a particular world region or country, including but not limited to Russia, Japan, and Latin America. The exploration of cultural identity begins with an overview of the region or country's historical and religious influences and then studies the culture's arts, including the visual arts (painting, sculpture), musical traditions, literature (folktales, national mythology), the vernacular arts (crafts, storytelling), film and theater. You will take field trips or have experiences that will allow you to encounter the region's arts firsthand, and to develop a blended understanding of a people's cultural identity and the larger world. Note: This course fulfills the Arts (GA) requirement for students under GenEd and Arts (AR) for students under Core. Students cannot receive credit for this course if they have successfully completed any of the following: Arabic 0871, Hebrew 0871 or Russian 0871.

Course Attributes: GA

Repeatability: This course may not be repeated for additional credits.

ASST 2000. Special Topics in Asian Studies I. 2 to 4 Credit Hours.

Provides a cross listing for regular and writing intensive courses in other departments when they have substantial Asian Studies content. Also used for directed readings and new courses. NOTE: Cross listing arranged by Asian Studies Director.

Repeatability: This course may be repeated for additional credit.

ASST 2001. Practical Asian Society and Culture. 3 Credit Hours.

Emphasizes practical Asian Studies knowledge and skills. This course provides a foundation for living and working in four countries: China, Japan, Korea, and India. It includes basic aspects of the culture of daily life and work, such as meeting people, communication patterns, entertaining, holidays, and taboos. The course also builds fundamental skills for independent research on Asian society and culture and develops basic presentation skills for use in the workplace and the Asian Studies capstone course. Student teams select and research one aspect of a society or culture, using print and online sources. NOTE: Required for Asian Business & Society Certificate.

Repeatability: This course may not be repeated for additional credits.

ASST 2011. Survey of Japanese Literature Before 1868. 3 Credit Hours.

Novels, poetry, travel diaries, plays, and other genres from Japan's Heian through Edo periods. No knowledge of Japanese language expected. Note: Students who have already taken JPNS 2011 will not receive duplicate credit for ASST 2011.

Repeatability: This course may not be repeated for additional credits.

ASST 2012. Modern and Contemporary Japanese Literature in Translation. 3 Credit Hours.

Major writers and works of late 19th, 20th, and 21st century Japanese literature. NOTE: No knowledge of Japanese language expected. Prior to fall 2009, the course title was "Survey of Japanese Modern Literature." Note: This course is cross-listed with Japanese 2012. Students may only receive credit for one of these courses: ASST 2012 or JPNS 2012.

Repeatability: This course may not be repeated for additional credits.

ASST 2013. Modern and Contemporary Chinese Literature in Translation. 3 Credit Hours.

This course focuses on 20th- and 21st-century literature from China. Among the major themes of the course are socio-political and cultural upheaval and transformation, fiction and nation, and gender, race and class relations. Students will read representative short stories, novels, poetry, and essays. Selected documentaries and feature films will supplement the literary texts. The course will help familiarize students with major writers and with the cultural and historical contexts in which they produced their works. NOTE: This course is equivalent to CHI 2013. Students will earn credit only once for either ASST 2013 or CHI 2013.

Repeatability: This course may not be repeated for additional credits.

ASST 2014. Pre-Modern Chinese Literature. 3 Credit Hours.

This course provides an interdisciplinary introduction to Chinese literature from its inception to the early 18th century. Some of the course's readings are drawn from works well known in the west like the "Book of Songs," "Zhuangzi," the poems of the Tang poets Wang Wei, Li Bai, Du Fu, and Bai Juyi, and the Song poet Su Shi, and short stories by the dramatist and novelist Li Yu. Other readings include works less well known in the west but long considered central to various literary and performance traditions by many Chinese. This course will present its readings with an emphasis on their cultural and historical contexts. Special attention will be paid to the place they have in various Chinese literary traditions and how these traditions have contributed to both Chinese ways of understanding their own cultural heritage and how they have influenced western understandings of that heritage. Note: This course is cross-listed with Chinese 2011. Students may only receive credit for one of these courses: ASST 2014 or CHI 2011.

Repeatability: This course may not be repeated for additional credits.

ASST 2015. Tokyo in Literature and Film. 3 Credit Hours.

Like all great cities, Tokyo simultaneously fascinates and frightens us. The course explores this fascination and fear through the work of leading writers and directors who have responded to and shaped the city in their work. Readings will include essays, short stories, and novels by authors such as Yasunari Kawabata, Fumiko Hayashi, Banana Yoshimoto, and Haruki Murakami. Films by directors such as Yasujiro Ozu, Satoshi Kon, and Shosuke Murakami will be reviewed and discussed. Note: This course is cross-listed with Japanese 2015. Students may only receive credit for one of these courses: ASST 2015 or JPNS 2015.

Repeatability: This course may not be repeated for additional credits.

ASST 2016. Mystery and Crime Fiction in Japan. 3 Credit Hours.

This course examines mystery and crime fiction in Japan through the work of writers such as Edogawa Rampo, Matsumoto Seicho, and Kirino Natsuo. Through critical analysis of novels and short stories, we'll seek insights into the anxieties and tensions of life in modern and contemporary Japan. We'll explore a range of socio-cultural issues in areas such as family life, education, careers, and gender relations. All readings and discussions are in English. Note: This course is cross-listed with Japanese 2016. Students may only receive credit for one of these courses: ASST 2016 or JPNS 2016.

Repeatability: This course may not be repeated for additional credits.

ASST 2017. Stories of Parents and Children in Japanese Literature and Film. 3 Credit Hours.

This course explores the portrayal of family relationships in modern and contemporary Japanese fiction and film. Topics for study and discussion include the tension between older and younger generations, and changing understandings of the family within Japanese society. The work of writers and filmmakers such as Soseki Natsume, Yasujiro Ojo, Kafu Nagai, Hirokazu Kore-eda, and Haruki Murakami will be examined. Class discussions and activities, readings, and written assignments aim at developing students' critical skills. Knowledge of Japanese is not required. Note: This course is cross-listed with Japanese 2017. Students may only receive credit for one of these courses: ASST 2017 or JPNS 2017.

Repeatability: This course may not be repeated for additional credits.

ASST 2021. Japanese Literature in Film. 3 Credit Hours.

Cinematic adaptations of Japanese novels and short stories, with the focus on principal figures of film and literature such as Kurosawa and Akutagawa. NOTE: No knowledge of Japanese language expected. Note: This course is cross-listed with Japanese 2021. Students may only receive credit for one of these courses: ASST 2021, ASST 2921, JPNS 2021, or JPNS 2921.

Repeatability: This course may not be repeated for additional credits.

ASST 2022. Contemporary Chinese Urban Film and Fiction in Translation. 3 Credit Hours.

This course looks at a selection of Chinese cinematic and literary texts by contemporary filmmakers and writers from China, Taiwan, and Hong Kong. Through the study of film and fiction, we will examine how urban spaces and subjects have been delineated and imagined within the context of recent social and economic transformation and globalization. In particular, we will examine the different ways in which cinematic images and narrative structures celebrate the metropolis and convey the anxieties associated with it. We will explore a wide range of urban subjects as represented in film and fiction, and the ways in which they are shaped by and at the same time are shaping society and culture in China, Taiwan, and Hong Kong today. Note: This course is cross-listed with Chinese 2022. Students may only receive credit for one of these courses: ASST 2022 or CHI 2022.

Repeatability: This course may not be repeated for additional credits.

ASST 2030. Special Topics I. 3 Credit Hours.

Arranged each semester, please consult with the instructor or the Asian Studies web site (http://www.temple.edu/asian_studies/) for a detailed description.

Repeatability: This course may be repeated for additional credit.

ASST 2040. Special Topics II. 4 Credit Hours.

Arranged each semester, please consult with the instructor or the Asian Studies web site (http://www.temple.edu/asian_studies/) for a detailed description.

Repeatability: This course may be repeated for additional credit.

ASST 2050. The Japanese Writer in Focus. 3 Credit Hours.

This special topics course offers students the opportunity for in-depth reading, study, and discussion of the novels and short stories of one or two modern or contemporary Japanese writers. The work of writers who are highly regarded both in Japan and globally - such as Haruki Murakami, Kenzaburo Oe, Natsume Soseki, and Yukio Mishima - will be the focus of the course. Students will also be introduced to published scholarship on the writer's work. All readings are English translations of work originally published in Japanese. Note: This course is cross-listed with Japanese 2050. Students may only receive credit for one of these courses: ASST 2050 or JPNS 2050.

Repeatability: This course may be repeated for additional credit.

ASST 2074. Geography of East and South Asia. 3 Credit Hours.

Introduction to the natural environments and diverse contemporary societies that comprise East, Southeast, and South Asia. Emphasis on such topics as poverty, economic development, and social conditions in India, Thailand, and the Philippines, as well as China, Japan, and Korea. NOTE: (1) AS Foundation Course. (2) This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. In addition to meeting the university Core International Studies requirement, this course meets the Non-Western/Third World IS requirement for Communication Sciences majors. Note: This course is cross-listed with Geography and Urban Studies 2074. Students may only receive credit for one of these courses: GUS 2074 or ASST 2074.

Course Attributes: IS, SF

Repeatability: This course may not be repeated for additional credits.

ASST 2098. Japanese Popular Culture and its Literature. 3 Credit Hours.

Contemporary culture and literature of Japan. NOTE: No knowledge of Japanese language expected.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ASST 2101. Religions of India. 3 Credit Hours.

An introduction to the foundations, nature, and principles of classical Hinduism. An introduction to the fundamentals of Buddhism and Jainism. Note: This course is cross-listed with Religion 2101. Students may only receive credit for one of these courses: ASST 2101 or REL 2101.

Repeatability: This course may not be repeated for additional credits.

ASST 2102. Introduction to Buddhism. 3 Credit Hours.

Introduction to the historical development of Buddhism in relation to other East Asian religions. Topics include the Four Noble Truths of Basic Buddhism, the Hinayana Mahayana controversy over Buddhist Dharma and practice, as well as the development of Buddhist thought throughout Asia. Note: This course is cross-listed with Religion 2102. Students may only receive credit for one of these courses: ASST 2102 or REL 2102.

Repeatability: This course may not be repeated for additional credits.

ASST 2107. Asian American Experiences. 3 Credit Hours.

This introductory survey analyzes commonalities and differences in the historical and contemporary experiences of Asian American ethnic groups, Chinese, Japanese, Filipinos, Koreans, and South and Southeast Asians. It explores important ideas about the position of Asians in U.S. society, including racialization, assimilation, cultural pluralism, model minority thesis, split labor market, and internal colonialism. It begins with the arrival of the Chinese in the 1830s and ends with contemporary issues. Lectures and videos; emphasis on active student participation in learning through discussion and response papers. NOTE: This course can be used to satisfy the university Core Studies in Race (RS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information. Note: This course is cross-listed with American Studies 2107, History 2107, and Sociology 3223. Students may only receive credit for one of these courses: ASST 2107, AMST 2107, HIST 2107, or SOC 3223.

Course Attributes: RS

Repeatability: This course may not be repeated for additional credits.

ASST 2111. Japanese Literature: From Classical to Contemporary. 3 Credit Hours.

Students taking this course will have the opportunity to learn about Japan's long literary history by reading, discussing, and analyzing selected novels, short stories, poems, and literary essays. The first half of the semester will focus on work produced up through the pre-modern period, with the second half covering the modern and contemporary periods. Writers ranging from Murasaki Shikibu and Yoshida Kenko to Natsume Soseki and Murakami Haruki will be introduced. Class discussions and assignments will help students become acquainted with current theoretical and methodological approaches in the fields of Japanese studies (and, more broadly, Asian Studies) and literary studies. All readings are English translations of work originally published in Japanese. NOTE: Students can receive credit only once for either ASST 2111 or Japanese 2111.

Repeatability: This course may not be repeated for additional credits.

ASST 2112. Chinese Literature: From Classical to Contemporary. 3 Credit Hours.

Students taking this course will have the opportunity to learn about China's long literary history by reading, discussing, and analyzing selected novels, short stories, poems, and literary essays. The first half of the semester will focus on work produced from around 1000 B.C.E. through the middle of the 19th century, with the second half covering the modern and contemporary periods. Ancient and classical writers (such as Zhuang Zi, Bai Juyi and Su Dongpo) and modern and contemporary writers (such as Lao She and Mo Yan) will be introduced. Class discussions and assignments will help students become acquainted with current theoretical and methodological approaches in the fields of Chinese. NOTE: Students can receive credit only once for either ASST 2112 or CHI 2112.

Repeatability: This course may not be repeated for additional credits.

ASST 2196. Writing in the City. 3 Credit Hours.

Novels, short stories, poetry, and other literary forms both shape and reflect how cities are understood and experienced. "Writing in the City" focuses on literary expressions of the modern and contemporary urban experience in cities such as Shanghai, Seoul, Singapore, Taipei, and Tokyo. This writing-intensive course will offer students the chance to engage with writing from at least two cities (in different Asian countries), focusing on thematic areas that include gender and family, history and memory, and crime and corruption. The main writing-related goals of this course include developing the skills to present evidence-based arguments supported by research, to use a close reading methodology to write an analysis of a literary text, and to carry out effective scholarly peer review. Class discussions and assignments will help students become acquainted with current theoretical and methodological approaches in the fields of Asian studies and literary studies. All readings are English translations of work originally published in languages that include Chinese, Japanese, and Korean.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ASST 2201. Chinese Religions. 3 Credit Hours.

Critical study of the development of Chinese religions from the time of Confucius to Mao, including the problem of ideological continuity in contemporary China (Maoist Marxism versus Confucianism). Note: This course is cross-listed with Religion 2201. Students may only receive credit for one of these courses: ASST 2201 or REL 2201.

Repeatability: This course may not be repeated for additional credits.

ASST 2217. The Vietnam War. 3 Credit Hours.

An attempt to probe in-depth one of the most significant and controversial episodes of recent American history. The history of Vietnam since the 19th century with equal emphasis on the First and Second Indochina Wars. The impact of the war on the domestic and international scenes and its multiple legacies. Television and film from the period and guest speakers. Note: This course is cross-listed with American Studies 2217 and History 2217. Students may only receive credit once for these courses: AMST 2217, ASST 2217, or HIST 2217.

Repeatability: This course may not be repeated for additional credits.

ASST 2238. Visual Anthropology of Modern Japan. 3 Credit Hours.

This course offers an anthropological approach to systems of visual communication that are central to understanding Japanese society and culture. Themes and perspectives from visual anthropology will be applied to visual sign systems of everyday life (writing, clothes, food, etc.), to the prevalence and influences of popular culture emphasizing mass mediated forms of manga (comic books), advertisements, etc. The course will also include ethnographic films about Japanese culture as well as a review of how Japanese culture is communicated to mass audiences through classic and contemporary feature films as well as network television. We will try to unpack some of the stereotypic reductions common to superficial knowledge of Japan and Japanese culture.

Repeatability: This course may not be repeated for additional credits.

ASST 2301. Zen Buddhism. 3 Credit Hours.

This course surveys the historical development of Zen Buddhism as it unfolds in India, China, and Japan, and focuses on the examination of the nature of satori experience. Analyzes its existential meaning from perspectives of therapy, Zen practice, and philosophy. NOTE: Formerly titled "Introduction to Zen Buddhism." Students who earned credit under the original title will not receive additional credits for this course. This course is equivalent to REL 2301. Students will earn credit only once for either ASST 2301 or REL 2301.

Repeatability: This course may not be repeated for additional credits.

ASST 2351. Japan in a Changing World. 3 Credit Hours.

An examination and analysis of the key elements that contribute to Japan's behavior in the global arena. The development of Japan's interaction with foreign powers, the psychological underpinnings of its diplomacy, and the creation of Tokyo's world view will be discussed. Note: This course is cross-listed with Political Science 2351. Students may only receive credit once for these courses: ASST 2351 or POLS 2351.

Repeatability: This course may not be repeated for additional credits.

ASST 2367. South Asia: Peoples, Culture, Experiences. 3 Credit Hours.

An introduction to the peoples and cultures of the Indian subcontinent. The course will focus on the indigenous religions of India: Hinduism, Jainism, and Buddhism as well as Islam, Christianity, and Zoroastrianism as brought to western India by migrants. Note: This course is cross-listed with Anthropology 2367. Students may only receive credit once for these courses: ASST 2367 or ANTH 2367.

Repeatability: This course may not be repeated for additional credits.

ASST 2373. Japanese Culture. 3 Credit Hours.

Introduction to traditional and contemporary Japanese culture. Topics covered include: early literature, aesthetic principles as expressed in art and architecture, religion, gender roles, Japan's shifting relationships with the outside world, rural communities and urban centers in the 20th century, and the construction of the self in modern Japan. Note: This course is cross-listed with Anthropology 2373. Students may only receive credit for one of these courses: ANTH 2373 or ASST 2373.

Repeatability: This course may not be repeated for additional credits.

ASST 2374. The Anthropology of Modern China. 3 Credit Hours.

This course provides an introduction to the culture and society of the contemporary People's Republic of China (P.R.C.). The first half of the course explores the dramatic changes in both rural and urban sectors of Chinese society since the turn of the century, with a particular focus on post-1949 Maoist and post-Mao socialist transformations. The second half of the course examines such topics as gender and the status of women, ethnic minorities, religion and healing, the self and society, the Party and the state, and P.R.C. narratives of modernity. Throughout, the P.R.C. will be examined as a society that embodies a distinctively Chinese synthesis of tradition and modernity.

Repeatability: This course may not be repeated for additional credits.

ASST 2501. Introduction to East Asia: China. 3 Credit Hours.

Within the context of larger processes of socioeconomic and cultural change, this course examines the development of characteristic institutions and thought in traditional China and revolutionary transformation in the modern era. This approach is designed to provide the student with a basic understanding of state, society, and culture in China, the major themes of Chinese history, and more generally, broad processes of social change. NOTE: AS Foundation Course. Usually offered in alternate years or summer on Main Campus. Note: This course is cross-listed with History 2501. Students may only receive credit once for these courses: ASST 2501 or HIST 2501.

Repeatability: This course may not be repeated for additional credits.

ASST 2502. Introduction to East Asia: Japan. 3 Credit Hours.

A survey of Japanese history to the 20th century. Major themes include religious, political, and social change. Major topics are: the early centralized state, the rise of aristocratic culture, the emergence of the warrior class, and the modern transformation into an urban, industrial empire. Course materials include primary documents in translation and videos. NOTE: AS Foundation Course. Usually offered in alternate years on Main Campus. Note: This course is cross-listed with History 2502. Students may only receive credit once for these courses: ASST 2502 or HIST 2502.

Repeatability: This course may not be repeated for additional credits.

ASST 2503. Introduction to Southeast Asia: Insular. 3 Credit Hours.

Covers the histories of the Philippines, Indonesia, Malaysia, and Singapore from the 16th century until modern times. The course will introduce students to the island worlds of Southeast Asia, its peoples, their histories, societies, and economies. To familiarize students with non-Western worlds, lectures will be illustrated with videotapes, slides, and transparencies. Excerpts of articles and indigenous documents will also be used for discussion. Note: This course is cross-listed with History 2503. Students may only receive credit once for these courses: ASST 2503 or HIST 2503.

Repeatability: This course may not be repeated for additional credits.

ASST 2504. Introduction to Southeast Asia: Mainland. 3 Credit Hours.

Covers the histories of Myanmar (Burma), Thailand, Laos, Cambodia, and Vietnam, from the 16th century until modern times. It is a course designed to introduce students to the analysis of such forces as religion, statecraft, and trade, and the manner in which they have shaped the mainland countries of Southeast Asia. Reference will be made to contemporary events taking place in the region, and students will be encouraged to follow these developments through the media and integrate their knowledge in class discussions. Course work will include readings, discussions, films, examinations, and book reviews. Note: This course is cross-listed with History 2504. Students may only receive credit once for these courses: ASST 2504 or HIST 2504.

Repeatability: This course may not be repeated for additional credits.

ASST 2511. Introduction to Asian Business. 3 Credit Hours.

An overview of Asian business practices and their economic, political, and social contexts, with emphasis on Japan, China, Korea, and India. Asian Studies and other non-business majors/minors are welcome. NOTE: Required for Asian Business and Society Certificate.

Repeatability: This course may not be repeated for additional credits.

ASST 2807. East Meets West. 4 Credit Hours.

A study of the impact of East-West cultural exchanges throughout Japanese art history, concentrating on four main areas: early Buddhist imagery and the influence of Hellenistic and Indian sculpture and paintings; Namban art (art of the southern barbarians) and the effect of the Western approach on the treatment of space in two-dimensional Japanese art; Japonisme and the impact of wood-block prints on European and American artists (Degas, Lautrec, Whistler, Mary Cassatt, etc.); Japanese architecture as an inspiration for modern architects (Bruno Taut, Le Corbusier, F. L. Wright) and cross-cultural Western influences on Japanese architects (Tange, Isozaki, Edward Suzuki, etc.).

Repeatability: This course may not be repeated for additional credits.

ASST 2815. Japanese Art. 4 Credit Hours.

A look at Japanese history through art, with the primary focus on design and pattern. The course will examine all the major art forms from the earliest times to the present.

Repeatability: This course may not be repeated for additional credits.

ASST 3000. Special Topics in Asian Studies II. 2 to 4 Credit Hours.

Provides a cross listing for regular and writing intensive courses in other departments when they have substantial Asian Studies content. Also used for directed readings and new courses. NOTE: Cross listing arranged by Asian Studies Director.

Repeatability: This course may be repeated for additional credit.

ASST 3001. Earth Ethics. 3 Credit Hours.

This course examines the relationship of human and environmental science to ethical principles. By analyzing case studies that deal with resource sustainability, environmental protection, divergent views of technology and respect for all forms of life, students will assess individual life-styles and alternative visions of the good life on planet earth. Note: This course is cross-listed with Religion 3001 and Environmental Studies 3001. Students may only receive credit once for these courses: ASST 3001, ASST 3904, ENST 3001, ENST 3904, REL 3001, or REL 3904.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

ASST 3011. Monks, Masters, and Magicians: Religion in Premodern Chinese Literature. 3 Credit Hours.

This course offers an introduction into the rich heritage of Chinese literature before 1911 with a focus on religious culture. We will follow Buddhist nuns and monks, Daoist masters and Confucian scholars on their adventures through 2000 years of Chinese history. Thematically, the class will focus on texts that show how Chinese religious traditions (Confucianism, Daoism, and Buddhism) were depicted in secular literature, but will also include narrative religious texts. From 3rd century miracle tales, to the classical novels of the Ming and Qing dynasty, we will look at Chinese religion through the lens of literature. Next to the readings themselves, we will cover more general aspects such as the relationship of literature to historical facts and notions of genre and motif as they apply to China. NOTE: This course is equivalent to REL 3011. Students will receive credit only once for either ASST 3011 or REL 3011.

Repeatability: This course may not be repeated for additional credits.

ASST 3030. Special Topics III. 3 Credit Hours.

Arranged each semester, please consult with the instructor or the Asian Studies web site (http://www.temple.edu/asian_studies/) for a detailed description.

Repeatability: This course may be repeated for additional credit.

ASST 3031. Women in Chinese Literature. 3 Credit Hours.

This course focuses on women writers and women as characters in premodern, modern, and contemporary Chinese literature. Texts will include poetry, novels, short stories, and drama. Gender, representation, and women's roles in the history of Chinese literature are among the topics that will be covered. Knowledge of Chinese is not required. The class will be conducted in English, and all readings will be in English translation. Note: This course is cross-listed with Chinese 3031 and Gender, Sexuality, and Women's Studies 3031. Students may only receive credit once for these courses: ASST 3031, CHI 3031, or GSWS 3031.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ASST 3040. Special Topics IV. 4 Credit Hours.

Arranged each semester, please consult with the instructor or the Asian Studies web site (http://www.temple.edu/asian_studies/) for a detailed description.

Repeatability: This course may be repeated for additional credit.

ASST 3052. Environmental Problems in Asia. 3 Credit Hours.

Japan is used as an introduction and model for examining environmental issues in several east and southeast Asian countries. Emphasis is on deforestation, river basin development, urban planning, ecotourism, and role of non-governmental organizations. Note: This course is cross-listed with Geography and Urban Studies 3052 and Environmental Studies 3052. Students may only receive credit once for these courses: ASST 3052, ENST 3052, or GUS 3052.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

ASST 3076. Metropolitan Tokyo. 3 Credit Hours.

The growth and development of Tokyo, past and present. The course includes a profile of the city's many neighborhoods, economic activities, architecture, and challenges for urban planners.

Repeatability: This course may not be repeated for additional credits.

ASST 3082. Independent Study. 1 to 4 Credit Hour.

Directed reading and/or research on an Asian Studies topic. Required: A faculty supervisor, good study skills, and the ability to work independently.

Repeatability: This course may be repeated for additional credit.

ASST 3101. Yoga and Tantric Mysticism. 3 Credit Hours.

Explores Yoga as well as Tantric Mysticism in India and South Asia. Note: This course is cross-listed with Religion 3101. Students may only receive credit once for these courses: ASST 3101 or REL 3101.

Repeatability: This course may not be repeated for additional credits.

ASST 3201. I-Ching, Tao, and Ch'an/Zen. 3 Credit Hours.

This course covers selected topics in the history of Taoist ideas and religious practice, which have broadly influenced China for two and a half millennia. Discussion topics include: symbols and divination; the philosophy of Lao-tzu and Chuang-tzu; the interaction between Taoism and Ch'an/Zen Buddhism; the Taoist/Ch'an influence on the Chinese literary tradition and ideals of beauty; the Taoist view on ch'i energy, meditation, sexuality, and the good life; and Taoism/Zen in America today. Note: This course is cross-listed with Religion 3201. Students may only receive credit once for these courses: ASST 3201 or REL 3201.

Repeatability: This course may not be repeated for additional credits.

ASST 3247. Ideology and Social Change in Japan. 3 Credit Hours.

A sociological look at the conditions that have contributed to Japan's emergence as a world-class economic force. How do culture, social organization, life style, ideology, and global political change to affect Japan's rapid rise to power? Is Japan a closed society? What significance do factors such as racism, religion, education, family, the military, class, and population changes hold for understanding what happened in Japan and in Japan's relations with outsiders, particularly the U.S.? How does this analysis affect the future of American sociology? Duplicate credit warning: This course is regularly cross-listed with SOC 3247. Students may receive credit for only one course from: ASST 3247, ASST 3947, SOC 3247, or SOC 3947.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

ASST 3251. China: State and Society. 3 Credit Hours.

Contemporary Chinese government and politics, together with a survey of the political history of China in the 20th century. Emphasis is on the evolution of the political system and political culture through successive periods of reform and repression. Note: Prior to fall 2010, the course title was "China: Politics and Revolution." This course is typically cross-listed with POLS 3251. Students may only earn credit for one course from ASST 3251 and POLS 3251.

Repeatability: This course may not be repeated for additional credits.

ASST 3252. East Asia and the United States. 3 Credit Hours.

This course introduces Japan and its distinctive model of political economy. The course then reviews how this model has been copied by many other countries in Asia. The course also includes an analysis of Asia's international economic and political relations, especially with the United States. This course is typically cross-listed with POLS 3252. Students may only earn credit for one course from ASST 3252 and POLS 3252.

Repeatability: This course may not be repeated for additional credits.

ASST 3301. Japanese Religions. 3 Credit Hours.

An introduction to Japanese religions, their origins, and development in the social, cultural and intellectual history of Japan. Religions covered are: Shinto, Japanese Buddhism, folk religions, Japanese Confucianism, and the New Religions. Some attention to expression of Japanese spirituality in the fine arts, martial arts, festivals, and rituals.

Repeatability: This course may not be repeated for additional credits.

ASST 3302. Japanese Buddhism. 3 Credit Hours.

Introduction to classical thinkers of Japanese Buddhism: Kukai, Dogen, Shinran, Nichiran, Hakuin. Schools covered are: Shingon, Pure Land, Soto Zen, Rinzaï Zen, Nichiren. Note: This course is equivalent to REL 3302; students will receive credit only once for either ASST 3302 or REL 3302.

Repeatability: This course may not be repeated for additional credits.

ASST 3522. Contemporary China. 3 Credit Hours.

The rise of nationalism, social-cultural changes, and revolutions since the late 19th century. Developments after 1949 in detail. Note: This course is cross-listed with History 3522. Students may only receive credit once for these courses: ASST 3522 or HIST 3522.

Repeatability: This course may not be repeated for additional credits.

ASST 3541. Japan Today. 3 Credit Hours.

Examines significant social, economic, and cultural trends in Japan from 1945 to the 1990s-the Occupation; the 'economic miracle,' state and society; the world of work; family, women and gender; international relations; impact of affluence; post-bubble Japan; and varying approaches to the study of postwar Japanese history and society. NOTE: Usually offered alternate years on Main Campus. Note: Students will receive credit only once for either ASST 3541 or HIST 3541.

Repeatability: This course may not be repeated for additional credits.

ASST 3542. Women and Society in Japan. 3 Credit Hours.

This course analyzes the changing position of women in Japanese society from ancient times to the present. Through discussions, lectures, and audiovisual materials, students learn about goddesses, female diviners, empresses, the classical female writers, women in warrior culture, women in industrializing Japan, and Japanese women's movements. NOTE: Students will receive credit only once for either ASST 3542, ASST 3942, HIST 3542, or GSWS 3542.

Repeatability: This course may not be repeated for additional credits.

ASST 3606. Asian Women in Transition. 3 Credit Hours.

This course introduces and compares the experiences of women in Asia and Asian women in migration to the United States in the modern period, including rural and urban women, and ordinary and elite women in the late 19th and 20th centuries. Topics include women in households, women and work, and women's activism. Duplicate credit warning: Students may only receive credit for one of the following: ASST 3696, HIST 3696, GSWS 4696, HIST 3606, or GSWS 3606.

Repeatability: This course may not be repeated for additional credits.

ASST 3636. Asian Women in Transition. 3 Credit Hours.

This course introduces and compares the experiences of women in Asia and Asian women in migration to the United States in the modern period, including rural and urban women, and ordinary and elite women in the late 19th and 20th centuries. Topics include women in households, women and work, and women's activism.

Repeatability: This course may not be repeated for additional credits.

ASST 3900. Honors Topics in Asian Studies II. 3 Credit Hours.

Provides a cross listing for honors courses in other departments when they have substantial Asian Studies content. Also used for directed readings and new courses.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may be repeated for additional credit.

ASST 4096. Seminar in Asian Studies. 3 Credit Hours.

In this capstone writing course you will do independent research on Asia. You'll deepen your skills in choosing bibliographic tools, in finding and evaluating authoritative sources, including primary materials translated from Asian languages, and organizing and properly formatting a research paper. In consultation with the instructor, you'll choose a topic to meet your interests and professional needs. Required for majors; good to take in junior year. NOTE: Required for the Asian Studies major.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

ASST 4624. Modern Japan: Empire, War, Society. 3 Credit Hours.

Was early modern Japan (1600-1867) static or dynamic? Do the roots of Japan's modern achievements (1868-1945) lie in her early modern culture? What happened to Japan after the 1868 Meiji Restoration, and why? Was modernity a blessing or a curse? We'll find answers to questions like these as we survey Japanese society, culture, and events and trends at home and abroad from the Tokugawa shogunate to the Pacific War. Assignments focus on writing a comparative review.

Repeatability: This course may not be repeated for additional credits.

ASST 4696. Modern Japan: Empire, War, Society. 3 Credit Hours.

Was early modern Japan (1600-1867) static or dynamic? Do the roots of Japan's modern achievements (1868-1945) lie in her early modern culture? What happened to Japan after the 1868 Meiji Restoration, and why? Was modernity a blessing or a curse? We'll find answers to questions like these as we survey Japanese society, culture, and events and trends at home and abroad from the Tokugawa shogunate to the Pacific War. Assignments focus on writing a comparative review. Note: This course is cross-listed with History 4697. Students may only receive credit once for these courses: ASST 4696 or HIST 4697.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Audio and Live Entertainment (ALE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

ALE 3565. Music Publishing. 3 Credit Hours.

An examination of the revenue streams generated by, legal structures governing, and business practices involved in the commercialization of songwriters' copyrights. Topics covered include copyright law, ownership, transfer, and licensing for public performance, recording, and synchronization to audio-visual media, and the management of revenues generated thereby.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2663.

ALE 3590. Intermediate Topics in Audio and Live Entertainment. 2 to 4 Credit Hours.

This course provides flexible opportunities to offer specialized instruction within the ALE curriculum responsive to creative or experimental business or production practices, new technologies, timely marketplace developments, etc. Specific topic covered varies each semester. Please view the course schedule or consult with the instructor for details.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 1701.

ALE 4565. Artist Management. 3 Credit Hours.

A successful artist manager wears so many hats for their client - trusted career advisor, advocate and ally, planner and coordinator. Managers handle the booking of performances, coordinate the schedule of recording releases with labels, plan tours, negotiate contracts, and manage partnerships. Students will discuss and begin to develop the knowledge base, skill set, and mindset necessary to fill all of these roles and meet all of these responsibilities.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 2663.

ALE 4571. International Studies in Media and Communication. 1 to 6 Credit Hour.

Offered through Klein Global Opportunities (Klein GO) and taught outside of the U.S. This course is an immersive study of media and communication institutions, practices, norms, societal, governmental, and legal structures in a culture outside of the U.S. that is conducted during a Klein GO! program. Klein faculty lead students, while living abroad, in media consumption, in comparative analysis and evaluation of media and non-mediated communication, in interaction with local media and communication leaders in the program location. The specific aspects of media and communication to be covered will vary from city to city, and semester to semester, depending on the events of the day. NOTE: Available only to students participating in a Klein GO! Program. For more information and an application, students should visit the Klein GO! web site at <https://temple-smcsa.terradotta.com>.

Repeatability: This course may be repeated for additional credit.

ALE 4590. Advanced Topics in Audio and Live Entertainment. 2 to 4 Credit Hours.

This course provides flexible opportunities to offer specialized, advanced-level instruction within the ALE curriculum responsive to creative or experimental business or production practices, new technologies, timely marketplace developments, etc. Specific topic covered varies each semester. Please view course schedule or consult with instructor for details.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in MSP 1701.

ALE 4755. Advanced Live Sound. 4 Credit Hours.

Building on skills gained in Live Sound Production, students will focus on designing, mounting, and running sound for large-scale concert halls, arenas, and outdoor shows. Logistics, speaker plotting, line array configuration, delay towers, tour management relations, productive mindset, and rigging safety are all covered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in MSP 3755.

Basic Core Medical Science (BCMS)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BCMS 4003. Fundamentals of Biochemistry for Pre-Health Postbaccalaureates. 4 Credit Hours.

This course is for students enrolled in the CST Post-Baccalaureate Pre-Health Program. The goal of Fundamentals of Biochemistry (Biochemistry BCMS-4003) is to provide students with an understanding of the basic principles of biochemistry expected for Medical School Admission Tests. By the end of the course students should be familiar with basic biochemical concepts related to Protein Structure and Function; Enzyme Function and Regulation; Transmission of genetic information; Membrane Structure and Composition; Bioenergetics and Fuel Metabolism; Cell Signaling. Throughout the course, biochemical concepts will be emphasized. As the course proceeds, students should develop an understanding of key biochemical concepts and be able to identify and correctly interpret these concepts from passages on health-related biochemical topics. Note: To register for this course, students must satisfy the prerequisites or obtain permission from the program director.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Postbaccalaureate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 2251 and CHEM 2253.

Bioengineering (BIOE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BIOE 0844. The Bionic Human. 3 Credit Hours.

Can we replace our "worn-out" body parts with space-age materials? Will the day come when an injured athlete buys a tendon for the next big game? If so, who will have access, and when do we cease to be human? Become familiar with the extraordinary advances happening in bioengineering, including regenerative medicine, gene therapy, and mRNA vaccines, with the potential to cure diseases and create designer babies. Discuss science and pseudoscience: Goop, gurus, and the FDA, all the while getting a birds' eye view of the US and global health care systems. By the time you finish this course, you'll know how a pig heart could save your life, how stem cell research could affect your future, the purpose of animal testing, and whether we're going to have Iron Man suits any time soon. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed BIOE 0944, MEE 0844, or MEE 0944.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

BIOE 0856. Ethical Issues in Biomedical Science, Engineering and Technology. 3 Credit Hours.

At some point in our lives, it is likely that each of us will be confronted with an ethical dilemma related to a biomedical technology. This course is designed to enable you to critically address important issues that arise as a result of advances in biomedical science, bioengineering and biotechnology. We will learn the science behind new technology such as genetic testing, gene editing, tissue engineering, human enhancement, artificial intelligence and medical imaging, with specific topics varying by semester. Challenging ethical questions will be considered using principles of ethical theories and frameworks, such as, is it ethical to create "designer babies", or what are the limits on what humans can do to enhance their performance? Material from peer-reviewed journal articles and reputable news sources will provide the basis for in-class discussions, scientific lectures, discussion boards, and structured debates. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed BIOE 0956.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

BIOE 0944. Honors Bionic Human. 3 Credit Hours.

Can we replace our "worn-out" body parts with space-age materials? Will the day come when an injured athlete buys a tendon for the next big game? If so, who will have access, and when do we cease to be human? Become familiar with the extraordinary advances happening in bioengineering, including regenerative medicine, gene therapy, and mRNA vaccines, with the potential to cure diseases and create designer babies. Discuss science and pseudoscience: Goop, gurus, and the FDA, all the while getting a birds' eye view of the US and global health care systems. By the time you finish this course, you'll know how a pig heart could save your life, how stem cell research could affect your future, the purpose of animal testing, and whether we're going to have Iron Man suits any time soon. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed BIOE 0844, MEE 0844, or MEE 0944.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO

Repeatability: This course may not be repeated for additional credits.

BIOE 0956. Honors Ethical Issues in Biomedical Science, Engineering and Technology. 3 Credit Hours.

At some point in our lives, it is likely that each of us will be confronted with an ethical dilemma related to a biomedical technology. This course is designed to enable you to critically address important issues that arise as a result of advances in biomedical science, bioengineering and biotechnology. We will learn the science behind new technology such as genetic testing, gene editing, tissue engineering, human enhancement, artificial intelligence and medical imaging, with specific topics varying by semester. Material from peer-reviewed journal articles and reputable news sources will provide the basis for in-class discussions, scientific lectures, discussion boards, and structured debates. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and Science & Technology Second Level (SB) for students under Core. Students cannot receive credit for this course if they have successfully completed BIOE 0856.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: UHONORS, UHONORSTR.

Course Attributes: GS, HO

Repeatability: This course may not be repeated for additional credits.

BIOE 2001. Frontiers in Bioengineering. 2 Credit Hours.

This survey course will provide a first introduction to the wide scope of biomedical engineering, with emphasis on the application of engineering principles to solving problems in biology and medicine. Specific topics will include biomechanics; bioimaging; bioinstrumentation and biomedical devices; artificial organs; computational biology and bioinformatics; biomaterials and drug delivery; cellular, tissue and regenerative engineering; and nanobiotechnology. At the end of this introductory course the students will be familiar with some of the major molecular, cellular, physiological and engineering principles that allow for problem solving in the vast area of biomedical engineering. Thus the students will be prepared to study in depth some of the specialized topics of bioengineering.

Repeatability: This course may not be repeated for additional credits.

BIOE 2101. Engineering Principles of Physiological Systems. 3 Credit Hours.

This course will introduce biomedical engineering students to quantitative modeling of physiological systems. It will cover fundamental topics in physiology ranging from cell membrane models and chemical messengers to neuronal signaling and control of body movement. In addition, specific physiological systems are discussed in detail, including the cardiovascular, pulmonary, and visual systems. Furthermore, pharmacokinetic models provide quantitative assessment of the dynamics of drug distribution and compartmental interactions. Hands-on laboratories combining actual experiments with computer simulations will reinforce the contents of classroom teaching.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 2112 (may be taken concurrently), BIOL 1012 (may be taken concurrently), BIOL 2912 (may be taken concurrently), BIOL 1112 (may be taken concurrently), or 'Y' in BIOW)

BIOE 2201. Modeling Fundamentals in Bioengineering. 1.5 Credit Hour.

This course will introduce students to the fundamentals of modeling, design, and testing within SolidWorks computer aided design software with a focus on Bioengineering applications. Specifically, it will begin with methods of 3D design with an emphasis on iterative and parametric design mentality and design optimization. The course will conclude with a section of finite element analysis including the use of SolidWorks models for mechanical and fluid dynamic testing and analysis.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1951, or 'Y' in METW) and (ENGR 1101 or ENGR 1901)

BIOE 2202. Programming Fundamentals in Bioengineering. 1.5 Credit Hour.

This course will introduce students to programmatic methods and matrix algebra with specific applications in Bioengineering. Students will learn programming fundamentals such as loops and conditionals, as well as how to apply these methods to data analysis. In addition to the use of built-in Matlab functions, including those used for basic human interface, students will also learn to write their own functions and the methods to assemble complex programs.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1951, or 'Y' in METW)

BIOE 2301. Quantitative Pathophysiology. 3 Credit Hours.

This course will introduce students to fundamental principles of human pathophysiology. Students will gain a systems level understanding of disease processes necessary for the rational design of novel therapeutic and diagnostic technologies. The course will integrate basic biological science and fundamental engineering principles in the evaluation of clinical disease manifestations. Topics that will be covered include: fundamental concepts of cellular homeostasis; cellular responses (adaptation, injury, cell death) induced by stress, injurious stimuli, and disease, and systemic models of major diseases within the US (cardiac, neoplastic, cerebrovascular, traumatic, neurodegenerative, diabetic, and pulmonary).

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101.

BIOE 2302. Cellular and Molecular Biology for Bioengineers. 3 Credit Hours.

This course will enhance the basic knowledge of the students in quantitative cell and molecular biology from the vantage point of a bioengineer, focusing on molecular mechanisms and cellular functions, specifically in cell-cell and cell-matrix communications. Textbook learning will be supplemented with results from recent research and technological innovations in biology. After completing this course, bioengineering students will be able to apply their aptitude in the quantitative, physical and engineering sciences to modern biology. Students will also learn the principles how to establish and test biological models.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101.

BIOE 2312. Mechanics for Bioengineering I. 4 Credit Hours.

This course will provide students with an understanding of the application of statics and strength of materials to biomechanical problem analyses. Topics will introduce basic concepts of mechanics and kinetic analyses with application to physiologic loading and motion in the body.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062 (may be taken concurrently), PHYS 1962 (may be taken concurrently), PHYS 2022 (may be taken concurrently), or PHYS 2922 (may be taken concurrently)) and (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW)

BIOE 2401. Biodesign - Needs and Ideation. 3 Credit Hours.

This course will incorporate the 5-steps of the Design Thinking process in a project-based learning (PBL) environment focusing on bioengineering-specific projects. During these open-ended projects, the students will work in small teams that will 1) delve deeply into the development of the problem statements and needs criteria, 2) ideation process, 3) designing potential solutions, 4) proof of concept, and 5) move on to designing and creating prototypes and writing up the supporting documentation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, 'Y' in MATW, or 'Y' in METW), (PHYS 1062 or PHYS 2022), and ENGR 1101.

BIOE 3001. Research Design and Methods in Bioengineering. 2 Credit Hours.

In this course the upper division students will learn how to integrate fundamental principles of biology, chemistry, engineering, mathematics (including statistics) and physics to develop practical solutions for a variety of biomedical problems from cells to organisms. Students will use both engineering (methodology) and scientific (hypothesis) approaches to problem-solving thereby learning to distinguish between the two approaches. This course will teach the students the fundamental principles underlying modern measurements and control instrumentation utilized in science and engineering. Taking a quantitative and hands-on approach to measurement theory and practice, this course will present and analyze example instruments currently used in academic and industrial research. In addition, the students will consider and discuss bioethical issues involving biological and living systems. Specific bioethics topics that will be covered include stem cells, patents, conflict of interest, patient rights, animal rights, organ donation, and data manipulations but are not limited to them.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1041, MATH 1941, MATH 1038, 'Y' in MATW, or 'Y' in METW) and (CHEM 1031 or CHEM 1951)

BIOE 3101. Bioelectrical Engineering Lab. 3 Credit Hours.

This laboratory class will introduce students to the empirical study of bioelectric phenomena in physiological systems. This includes the origin of biopotentials, the use of biopotential electrodes in their measurements and subsequent amplification, signal processing and analysis of their physiological relevance. Applications of physical principles and basic electric engineering techniques are emphasized.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 3201 (may be taken concurrently), (PHYS 1062 or PHYS 2022), (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW), and BIOE 2001 (may be taken concurrently)

BIOE 3102. Biomaterials Lab. 3 Credit Hours.

This laboratory class will teach students experimental methods used to prepare and characterize biomaterials used in biomedical engineering. Students will learn basic techniques for the fabrication and characterization tools used for polymeric biomaterials, and investigate structure-property relationships as it applies to thermal, mechanical, surface and morphological properties of polymeric biomaterials.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101 (may be taken concurrently) and BIOE 3001.

BIOE 3201. Biomedical Instrumentation. 2 Credit Hours.

This course will introduce the upper division students to the fundamentals of medical instrumentation. Specifically, it will teach the physiological/physicochemical, biomechanical, computational and electronic principles governing the operation of select medical instrumentation. Focusing on classical and modern instrumentation used in specific clinical departments, such as cardiology, pulmonary medicine and critical care, radiology, and anesthesiology, the course will also introduce the students to the operation, safety aspects, and calibration of electronic, optical and acoustical instruments, as well as those involving ionizing radiation.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062 or PHYS 2022) and (MATH 1042, MATH 1942, 'Y' in MATW, or 'Y' in METW)

BIOE 3301. Biomedical Signals and Systems. 3 Credit Hours.

This course will expose students to digital signal processing with emphasis on problems in biomedical research and clinical medicine. It covers principles and algorithms for processing signals and systems in both continuous and discrete time domains with examples from biomedical signal processing and control. Theory and practice of Continuous-time linear systems: convolution, steady-state responses, Fourier and Laplace transforms, transfer functions, poles and zeros, stability, sampling, feedback. Discrete-time linear systems: Z transform, filters, Fourier transform, signal processing. This class will make extensive use of Matlab projects.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2101, ENGR 2011, or MEE 2011)

BIOE 3302. Drug Delivery. 3 Credit Hours.

This course will cover the engineering principles utilized in the design of drug delivery systems. Topics will include: drug delivery mechanisms (oral, parenteral, passive, targeted, etc.); therapeutic modalities and mechanisms of action; engineering principles of controlled release and quantitative understanding of drug transport (diffusion, convection); effects of electrostatics, macromolecular conformation, and molecular dynamics on interfacial interactions; thermodynamic principles of self-assembly; chemical and physical characteristics of delivery molecules and assemblies (polymer based, lipid based); significance of biodistributions and pharmacokinetic models; toxicity issues and immune responses.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 2041 (may be taken concurrently), MATH 2941 (may be taken concurrently), MATH 3041 (may be taken concurrently), MATH 3941 (may be taken concurrently), or 'Y' in METW)

BIOE 3303. Biotransport Phenomena. 3 Credit Hours.

This course will provide students with a quantitative understanding of mass (convection and diffusion) and momentum transport (viscous flow) in living systems, both at macroscopic and microscopic scales. We'll introduce differential equations to model and quantify aspects of bioengineering systems will be covered. Example systems will include the analysis of fluid flow phenomena in the cardiovascular, respiratory and other human organ systems, membrane transport, drug delivery and molecular transport.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ENGR 3571, (MATH 2041 (may be taken concurrently), MATH 2941 (may be taken concurrently), MATH 3041 (may be taken concurrently), MATH 3941 (may be taken concurrently), or 'Y' in METW), and BIOE 2202 (may be taken concurrently)

BIOE 3312. Mechanics for Bioengineering II. 4 Credit Hours.

This course will provide students with an understanding of the application of mechanics of solids and dynamics to engineering problem analyses. Topics will introduce basic concepts of dynamics and mechanics with application to physiologic loading and motion in the body.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2312.

BIOE 3331. Principles of Macromolecular Science. 3 Credit Hours.

In this course students will gain an understanding of the fundamentals of polymer physical chemistry. We will cover polymer structure and conformation, bulk and solution thermodynamics and phase behavior, polymer networks, and viscoelasticity. We will also apply engineering principles to the analysis of biomacromolecules, such as proteins, polysaccharides and oligonucleotides. Upon the completion of the course, students should be able to understand the influence of monomer structure, temperature, solution conditions, degree of polymerization and 3D conformation on the function of biopolymers.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032 or CHEM 1952)

BIOE 3401. Biodesign - Testing and Validation. 3 Credit Hours.

This course aims to reinforce the Design Thinking concepts introduced earlier in the curriculum. Students will apply Design Thinking concepts to team projects. We will introduce topics in project management, machine shop use, computer modeling, ethical conduct of research and translational/entrepreneurial considerations, in addition to building upon the tools acquired and used in the Bioengineering Design I. The first part of the semester will be used for problem statement development and creations of several alternative design solutions. The second part of the semester will then be devoted to prototyping, testing and optimizing the proposed solutions, with oral presentations and written reports of their progress in the project throughout the semester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, 'Y' in MATW, or 'Y' in METW), (PHYS 1062 or PHYS 2022), and ENGR 1101.

BIOE 3402. Design Elective: Biodesign. 3 Credit Hours.

This course aims to reinforce the Design Thinking concepts introduced earlier in the curriculum. Students will apply Design Thinking concepts to team projects. We will introduce topics in project management, machine shop use, computer modeling, ethical conduct of research and translational/entrepreneurial considerations. This course will be an option for the required design elective used as a prerequisite for Senior Design 2 (ENGR 4296). The projects will start with problem statement development and creations of several alternative design solutions and move through prototyping, testing and optimizing the proposed solutions, with oral presentations and written reports of their progress in the project throughout the semester.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1042 (C or higher), MATH 1942 (C or higher), or 'Y' in METW), ENGR 2196, BIOE 3201, BIOE 3101, BIOE 3001 (may be taken concurrently), and BIOE 3102 (may be taken concurrently)

BIOE 3511. Interactions of Biomaterials with Living Tissues. 3 Credit Hours.

This course will cover topics that illustrate how biomaterials interact with living tissues, focusing on cell culture, immunology, cell-biomaterial interfaces, and cell signaling. The students will learn the fundamentals maintaining living cells in culture and how these cells react to the presence of biomaterials using lecture and laboratory format.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101 and (CHEM 1031, CHEM 1035, or CHEM 1951)

BIOE 3719. Introduction to Bioengineering. 3 Credit Hours.

Course topics include biomaterials and implant materials, research proposal preparation, tyrosine-derived synthetic polymer devices for tissue engineering spine biomechanics, cellular material biomechanics, orthopedic biomechanics, hydroxyapatite/polymer composites, applications of injury biomechanics, biomechanics of the lower extremities, principles of polymers used in dental and biomaterials, interfaces in biomaterials. Students will be required to prepare a proposal for a design-oriented term project (i.e. rationale, concept and design, but no actual construction).

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

BIOE 3725. Cell Biology for Engineers. 3 Credit Hours.

Cell Biology for Engineers is a basic course that introduces biological concepts in modern cellular and molecular biology to engineering students. Topics will include the chemical composition of cells, bioenergetics and metabolism, structure and function of the plasma membrane, transport across membranes, the cytoplasmic membrane system, the extracellular matrix, interactions between cells and their environment, the cytoskeleton and cell motility, sensory systems, and cell signaling. In addition, an introduction to basic anatomy and physiology of vertebrates will include the skeletal system, muscle system, cardiovascular system, and nervous system.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031, CHEM 1035, or CHEM 1951)

BIOE 4101. Biomechanics Lab. 3 Credit Hours.

In this course students will apply principles of engineering mechanics in the design and utilization of biomechanical instrumentation. Principles of transduction, mechanics, sampling theory, strain, temperature, and flow measurement as applied to biomechanical systems will be covered. A background in data acquisition, electrical safety, operational amplifier and bridge circuits, and measurements is provided. Students will investigate the biomechanics of the musculoskeletal and cardiovascular systems in normal and pathological states.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 3101, BIOE 2201, and BIOE 2202.

BIOE 4182. Independent Study in Bioengineering. 1 to 5 Credit Hour.

Independent study course in bioengineering. Credits are arranged with instructor.

Repeatability: This course may be repeated for additional credit.

BIOE 4278. Cardiac Devices. 3 Credit Hours.

Intended for electrical engineering, biology, and bioengineering students. No course prerequisites. This course will cover cardiac anatomy and physiology, the heart's electrical system in health and disease, cardiac ECG rhythm interpretation, design and function of ECG monitoring devices, pacemakers and external and implanted defibrillators, and arrhythmia detection algorithms. The course will include observation of pacemaker implants, and troubleshooting in a pacemaker follow-up clinic. The course will prepare students to take the Heart Rhythm Society Allied Professional Pacemaker Certification examination. It is intended to put students in a competitive advantage for getting jobs in the expanding pacemaker and other medical electronics device industries.

Repeatability: This course may not be repeated for additional credits.

BIOE 4301. Bioengineering Seminar. 1 Credit Hour.

This seminar is intended for bioengineering students who are interested in acquiring hands-on presentation skills and, in addition, keeping up-to-date with the bioengineering research fields. The aim of the class is to allow upper division students to present a summarized view of a specific bioengineering or biomedical engineering topic. Specific topics that will be suggested to be covered (by the students) are biomaterials, tissue/regenerative engineering, bioimaging, biosensing, bionanotechnology (or nanobiotechnology), neuroengineering, bioinformatics (computational), biomechanics, (but are not limited to them). Guest lecturers from academia and industry will be invited to talk on several occasions.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2001.

BIOE 4311. The Entrepreneurial Bioengineer. 3 Credit Hours.

Recognizing the increasingly entrepreneurial landscape of Bioengineering, this course will introduce the students to the fundamentals of entrepreneurship and is designed to provide students with a working knowledge of the modern entrepreneurial and business planning and the regulatory process with the special focus on translational development of bioengineering products from the bench to the bedside.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2001 (may be taken concurrently)

BIOE 4333. Capstone Elective: Applied Biospectroscopy. 3 Credit Hours.

This course introduces the basics of light propagation in tissue and other turbid media, vibrational spectroscopy, absorption and fluorescence, and emerging spectroscopic applications. Emphasis is on applications for assessment of biomolecules, engineered tissues and clinically-relevant analyses including musculoskeletal disease and cancer diagnosis. Multivariate analyses for complex spectral data sets will also be introduced.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101, BIOE 3001, and BIOE 3101.

BIOE 4411. Capstone Elective: Biomaterials. 3 Credit Hours.

This course will focus on materials and design parameters used to develop human implant devices, bulk and surface characterization methods for biomaterials, biocompatibility, failure mechanisms of current biomaterials, and regulatory requirements for design and testing of human implant devices. Special attention will be given to biomaterials used in tissue regeneration, orthopedics, and controlled drug delivery.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101 and CHEM 2201.

BIOE 4421. Capstone Elective: Bionanotechnology. 3 Credit Hours.

This course is intended for upper division students interested in acquiring knowledge involving nanometer-sized objects frequently utilized within the biomedical sciences and engineering areas. The aim of the class is to introduce fundamental concepts critical in the design, preparation, analysis, and usage of bionanotechnology (or nanobiotechnology) and its multiple bottom-up and top-down approaches. Multiple nanomaterials categories, such as nanoparticles, nanotubes, biomacromolecules, synthetic polymers, and self-assembled structures, will be covered in detail along with their applications.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 2201 and BIOE 1301.

BIOE 4431. Capstone Elective: Neuroengineering. 3 Credit Hours.

This course will teach students how signals are generated and propagated in neurons and neuronal circuits, and how this knowledge can be utilized to engineer devices to assist people with neurologic disease or injury. The functions of neurons as discrete elements and as parts of neuronal assemblies will be examined; generator and action potentials; conduction in nerve fibers and across synaptic junctions; analysis of sensory and neuromuscular systems; EEG and EKG waveforms. At the completion of the course, students will have gained a fundamental understanding of neural interface/prosthetics design parameters from basic neural physiology to models of neural mechanisms. We will also review advanced neural interfaces currently being developed and or produced commercially by the field.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101 and (MATH 2041 (may be taken concurrently), MATH 2941 (may be taken concurrently), MATH 3041 (may be taken concurrently), MATH 3941 (may be taken concurrently), or 'Y' in METW)

BIOE 4441. Capstone Elective: Biomechanics. 3 Credit Hours.

This course will provide an integrative and multi-scale understanding of biomechanics that spans from tissues, to organs, to the dynamics of an intact, running body. Foundational topics will include muscle mechanics, skeletal mechanics, gait and whole body dynamics. The course will then move on to cover selected topics at the forefront of applied biomechanics including clinical biomechanics and the design and optimization of prosthetic limbs. Finally, frontiers in neural-interfacing for prostheses and rehabilitation, including optogenetics and other emerging areas affecting biomechanics, including robotics and robotic exoskeletons, will be covered.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

College Restrictions: Must be enrolled in one of the following Colleges: Engineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOE 2101 or BIOE 3725) and (BIOE 3312 or (ENGR 2332 and ENGR 2333))

BIOE 4451. Capstone Elective: Biomedical Imaging. 3 Credit Hours.

In this course students learn how light, X-rays, radiopharmaceuticals, ultrasound, magnetic fields, and other energy probes are generated and how they interact with tissues and detectors to produce useful image contrast. Practical issues such as beam generation, dose limitations, patient motion, spatial resolution and dynamic range limitations, and cost-effectiveness will be addressed. Emphasis will be placed on diagnostic radiological imaging physics, including the planar X-ray, digital subtraction angiography mammography, computed tomography, nuclear medicine, ultrasound, and magnetic resonance imaging modalities.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in PHYS 1062, (CHEM 1031, CHEM 1035, or CHEM 1951), (BIOL 1111, BIOL 1012, BIOL 2112, BIOL 1911, BIOL 2912, or 'Y' in BIOW), and (MATH 2041, MATH 2941, MATH 3041, MATH 3941, or 'Y' in METW)

BIOE 4461. Capstone Elective: Principles of Tissue Engineering. 3 Credit Hours.

This course will introduce fundamental concepts of tissue engineering and regenerative medicine, focusing on biomaterials used for scaffolds, mechanisms of cell-biomaterial interactions, biocompatibility and foreign body response, cellular engineering, and tissue biomechanics. Principles of cell/developmental and stem cell biology will be introduced, which will enable the students to apply a multidisciplinary approach to engineering select tissues and organs, such as the musculoskeletal system, cardiovascular tissues, the nervous system, and to design artificial organs. These topics will also be discussed in the context of scale-up, manufacturing, ethical and regulatory concerns. Note: Prior to fall 2017, the course title was "Capstone Elective: Principles of Tissue and Regenerative Engineering."

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101 and CHEM 2202.

BIOE 4471. Mechanobiology. 3 Credit Hours.

Mechanobiology is an emerging interdisciplinary field that focuses on the role of mechanical cues in governing cellular behavior. This course will address the means by which a cell utilizes its adhesions to neighboring cells and to the surrounding extracellular matrix to sense external forces and furthermore, how these forces are transduced within the cell to alter cellular behavior and regulate tissue architecture. This course will also discuss how the extracellular matrix influences cellular behavior during development, health, and disease. Furthermore, this course will also discuss the various tools and techniques developed that pushed the field of mechanobiology forward.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1012, BIOL 1112, BIOL 1912, BIOL 2112, or BIOL 2912), BIOE 3001, and (BIOE 2312 or BIOE 4101)

BIOE 4500. Special Topics in Bioengineering. 3 Credit Hours.

An emerging or advanced area of bioengineering research will be covered. Topics vary by semester.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Bioengineering.

Repeatability: This course may be repeated for additional credit.

BIOE 4501. Capstone Elective: Regenerative Engineering. 3 Credit Hours.

This course is a continuation of fundamental concepts introduced in Principles of Tissue and Regenerative Engineering focusing on developmental biology used in tissue engineering and regenerative medicine. Principles of cell development/biology, cell-cell interactions, signal transduction, and stem cell biology will be discussed with applications to regenerative medicine. These topics will also be discussed in the context of scale-up, manufacturing, ethical and regulatory concerns.

Department Restrictions: Must be enrolled in one of the following Departments: Engineering:Bio Engineering.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Bioengineering.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOE 2101 and (CHEM 2202 or CHEM 2922)

BIOE 4555. Capstone Elective - Biophotonics: Seeing is Believing. 3 Credit Hours.

Only a small portion of the world around us is visible to the human eye. With revolutionary microscopy developments there are ways to visualize drug effects, forces, viral infection, or cancer metastasis, and use light to control biological processes. Once we see biology happen, the result is not just a pretty image. We can use machine learning and artificial intelligence (AI) to improve resolution and quantify the imaging data. In this course students will learn how light can be used to visualize and manipulate biomaterials at molecular, cellular and tissue scale. The first part of the course will provide a review of light and optics. We will cover typical hardware used for imaging in biology, such as light sources, objectives and detectors used to generate images. The second part of the course will include hands-on fluorescent microscopy, the main tool for imaging in life sciences, and it will include imaging of cell cultures in 2D and 3D and tissue sections. We will use typical image processing tools, including Fiji, Matlab and selected Python plugins, and learn how to implement AI tools to improve images and imaging data. Final sessions will include presentations on specialized techniques by students.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (PHYS 1062 or PHYS 2022), CHEM 2202, and (BIOL 1012, BIOL 1112, BIOL 2112, BIOL 2912, or BIOE 3102 (may be taken concurrently))

BIOE 4741. Biomaterials for Engineers. 3 Credit Hours.

This course introduces engineering students to materials as they interact with biological systems, primarily in medicine. Topics will include a review of properties of materials, the classes of materials, tissues that come into contact with materials, the degradation of materials in the biological environment, the application of materials for specific uses, tissue engineering, and biomaterials standards and regulations.

Field of Study Restrictions: May not be enrolled in one of the following Majors: Bioengineering.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031, CHEM 1035, or CHEM 1951)

Biology (BIOL)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BIOL 0848. DNA: Friend or Foe. 3 Credit Hours.

This course is typically offered in Fall.

Through the study of basic biological concepts, think critically about modern biotechnology. Consider questions like: What are the ethical and legal implications involving the gathering and analysis of DNA samples for forensic analysis and DNA fingerprinting? Are there potential discriminatory implications that might result from the human genome project? What are embryonic stem cells, and why has this topic become an important social and political issue? Will advances in medicine allow humans to live considerably longer, and how will a longer human life span affect life on earth? We will learn through lectures, lecture demonstrations, problem solving in small groups and classroom discussion, and make vivid use of technology, including short videos from internet sources such as YouTube, electronic quizzes, imaging and video microscopy. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and the Science & Technology Second Level (SB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed Biology 0948.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

BIOL 0948. Honors DNA: Friend or Foe. 3 Credit Hours.

This course is not offered every year.

Through the study of basic biological concepts, think critically about modern biotechnology. Consider questions like: What are the ethical and legal implications involving the gathering and analysis of DNA samples for forensic analysis and DNA fingerprinting? Are there potential discriminatory implications that might result from the human genome project? What are embryonic stem cells, and why has this topic become an important social and political issue? Will advances in medicine allow humans to live considerably longer, and how will a longer human life span affect life on earth? We will learn through lectures, lecture demonstrations, problem solving in small groups and classroom discussion, and make vivid use of technology, including short videos from internet sources such as YouTube, electronic quizzes, imaging and video microscopy. (This is an Honors course.) NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and the Science & Technology Second Level (SB) requirement for students under Core. Students cannot receive credit for this course if they have successfully completed Biology 0848.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GS, HO

Repeatability: This course may not be repeated for additional credits.

BIOL 1001. Human Biology. 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

An introduction to the principles of biology using the human as a model organism. The course covers biomolecules; the heredity, development, structure and function of the human body; and the relationship of humans to their environment. NOTE: (1) Laboratory requires dissection. Not available for Biology major credit; no credit if Biology 1011 (C083) is previously taken. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1004. Medical Terminology for Pre-Health Postbaccalaureates. 1 Credit Hour.

In this course, students will learn to understand the terms used in medicine. This course focuses on teaching the meanings of root words and how they are put together so that students can break down the meanings of complex medical terms. Understanding medical terms is necessary for clear communication between healthcare providers when caring for patients.

Repeatability: This course may not be repeated for additional credits.

BIOL 1009. Biological Reasoning. 3 Credit Hours.

This course is typically offered in Fall.

This course is a transition semester of biology to be taken before Introductory Biology 1111 or 1112 for students who have not had advanced biology in high school or who wish to increase their reasoning skills before taking the Introductory Biology sequence. The course will focus on the analysis of biological data as well as understanding how these data support or contradict foundational concepts including biological evolution, structure and function, information exchange, energy transformation and flow and systems. The course format will involve group exercises designed to increase diagrammatic and quantitative reasoning in biology using examples from introductory textbooks. Understanding and developing concept maps will provide students with an effective approach for studying biology. The course will prepare students for the content and pace required to be successful in the Introductory Biology sequence.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1011. General Biology I. 4 Credit Hours.

This course is typically offered in Fall and Summer I.

General introductory biology for non-biology majors. Topics include cell physiology (introduction), origins of life, taxonomy, principles of evolution, animal evolution, and a survey of physiology. NOTE: (1) Laboratory required. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1012. General Biology II. 4 Credit Hours.

This course is typically offered in Spring and Summer II.

General introductory biology for non-biology majors. Topics include biological molecules, biochemistry, molecular biology, and genetics. NOTE: (1) Laboratory required. (2) This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702 (may be taken concurrently), any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1111. Introduction to Organismal Biology. 0 or 4 Credit Hours.

This course, with Biology 1112 or 2112, makes up the introductory series for Biology majors. Biology 1111 is designed to be taken during the first year. This course covers evolutionary principles, an introduction to ecology, and anatomy and physiology of plants and animals with an emphasis on vertebrate systems. Concepts and facts discussed in lecture will be closely integrated with laboratory observation and experimentation. NOTE: This is part of the introductory series for Biology majors. There are weekly laboratories that emphasize hands-on experience with living material.

Two sections are required for this course. This course requires registration for a 0.0 credit Recitation section in addition to the 4.0 credit Lecture & Laboratory section. The Recitation sections corresponding to a course are listed under the same course number as the Lecture & Laboratory sections, but have unique section numbers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1112. Introduction to Biomolecules, Cells and Genomes. 4 Credit Hours.

This course (or Biology 2112), with Biology 1111, makes up the introductory series for Biology majors. Biology 1112 is designed to be taken in either semester of the Freshman year. While either 1112 or 2112 will satisfy the requirement for Biology majors and the prerequisites for the 2nd level core Biology courses, students who are interested in focusing on Biochemistry are encouraged to take 2112 instead. This course will be an introduction to the Biology of organisms at the cellular and sub-cellular levels, and will provide an introduction to the fundamental concepts of cell biology, molecular biology, and genetics. Topics covered include the flow of information from DNA to RNA to proteins and the implications for evolution, metabolic pathways, photosynthesis, and cell changes during mitosis and meiosis. Finally, the course will introduce students to cutting-edge tools in bioinformatics and genomics. There are weekly laboratories that reinforce the concepts covered during the lecture and emphasize generating and analyzing data in the Cell and Molecular Biology disciplines.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1211. Basic Core Introduction to Biology for Pre-Medical Post-Baccalaureates II. 4 Credit Hours.

This course is typically offered in Spring.

Biology 1211 begins with a survey of the cell theory, basic microbiology, and embryogenesis, the process whereby cells are organized into the tissues that make up the major organ systems. The structure, function, and coordination of each of the major organ systems are examined. The course concludes with a study of evolutionary biology topics including natural selection, genetic drift, and speciation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 1052.

BIOL 1911. Honors Introduction to Organismal Biology. 4 Credit Hours.

This course, with Biology 1112/1912 or 2112/2912, makes up the introductory series for Biology majors. Biology 1911 is designed to be taken during the first year. This course covers evolutionary principles, an introduction to ecology, and anatomy and physiology of plants and animals with an emphasis on vertebrate systems. Concepts and facts discussed in lecture will be closely integrated with laboratory observation and experimentation. NOTE: (1) This course can substitute for Biology 1111 as part of the introductory series for Biology majors. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 1912. Honors Introduction to Biomolecules, Cells and Genomes. 4 Credit Hours.

This course (or Biology 2912), with Biology 1911, makes up the introductory series for Biology majors in the Honors Program. Biology 1912 is designed to be taken in the Spring of the Freshman year. While either 1912 or 2912 will satisfy the requirement for Biology majors and the prerequisites for the 2nd level core Biology courses, students who are interested in focusing on Biochemistry are encouraged to take 2912 instead. This course will be an introduction to the Biology of organisms at the cellular and sub-cellular levels, and will provide an introduction to the fundamental concepts of cell biology, molecular biology, and genetics. Topics covered include the flow of information from DNA to RNA to proteins and the implications for evolution, metabolic pathways, photosynthesis, and cell changes during mitosis and meiosis. Finally, the course will introduce students to cutting-edge tools in bioinformatics and genomics. There are weekly laboratories that reinforce the concepts covered during the lecture and emphasize generating and analyzing data in the Cell and Molecular Biology disciplines.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MC3A, 'Y' in MC6A, STAT 1001, 'Y' in STT2, STAT 1102, STAT 1902, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

BIOL 2001. Clinical Microbiology. 4 Credit Hours.

This course is typically offered in Fall.

This course is an introduction to the microorganisms that cause infectious diseases around the world. The nonspecific and specific host defense mechanisms are discussed. Methods for diagnosis, including culturing and immunological procedures, are covered. Other topics include disinfection, sterilization, standard precautions, antimicrobials, disease prevention and control. Laboratory related learning experiences, involving the testing of scientific principles related to lecture/discussion content, are integrated to support concepts introduced during lectures. NOTE: Not available for Biology major credit.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1021, CHEM 1031, or CHEM 1951), (BIOL 1012, BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BLOW), and KINS 1224.

BIOL 2003. Introductory Laboratory for Transfer Students. 1 Credit Hour.

This course is typically offered in Fall and Spring.

For transfer students only. Instruction to satisfy the laboratory component of either Biology 1111 or Biology 2112 for students that transfer courses from other institutions that are similar in topic to those offered by the Biology Department, but lack a laboratory. This course allows such students to register solely for the laboratory component of the relevant course. This course does not serve as a Biology elective.

Repeatability: This course may not be repeated for additional credits.

BIOL 2005. Laboratory for Transfer Students. 1 Credit Hour.

This course is typically offered in Fall and Spring.

For transfer students only. Instruction to satisfy the laboratory component of either Biology 2296 or Biology 3096 for students that transfer courses from other institutions that are similar in topic to those offered by the Biology Department, but lack a laboratory. This course allows such students to register solely for the laboratory component of the relevant course. This course does not serve as a Biology elective.

Repeatability: This course may not be repeated for additional credits.

BIOL 2082. Independent Research I. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Research under the direction of a faculty member in the Department of Biology or under joint supervision of an approved outside preceptor and a member of the Biology department. The Temple Biology faculty member oversees their work and acts as a liaison between an outside institution and the Department of Biology. All students must obtain the approval of an advisor from their major. Students must have completed Biology 1111/1911 OR Biology 1112/1912 OR Biology 2112/2912. NOTE: Not available for major credit. This course is not repeatable.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BLOW)

BIOL 2112. Introduction to Cellular and Molecular Biology. 4 Credit Hours.

This course is typically offered in Fall and Spring.

This course (or Biology 1112), with Biology 1111, makes up the introductory series for Biology majors. This course provides an introduction to the fundamental concepts of biochemistry, cell biology, molecular biology and genetics. Topics covered include the structure of important biological macromolecules, enzyme kinetics, metabolic pathways, photosynthesis, cell changes during mitosis and meiosis, DNA replication, transcription, translation and genetic analysis. NOTE: This course is part of the introductory series for Biology majors. There are weekly laboratories that emphasize hands-on experience with living material.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031, CHEM 1951, or 'Y' in CHM1), (CHEM 1032 (may be taken concurrently), CHEM 1952 (may be taken concurrently), or 'Y' in CHM2), and (MATH 1022 (may be taken concurrently), any MATH course numbered 1038 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

BIOL 2133. Human Anatomy. 3 Credit Hours.

The fundamentals of human anatomical structure are examined. A primary goal will be the development of a comprehensive vocabulary, including the learning of Latin and Greek root words underlying medical terminology. Students will progress from a review of the history of anatomy; to the study of anatomy at the microscopic level of cells, organelles and tissues; and finally to the organ systems level. Muscular, skeletal, nervous, endocrine, cardiovascular, gastrointestinal and respiratory systems will be covered.

Repeatability: This course may not be repeated for additional credits.

BIOL 2207. Genetics. 3 Credit Hours.

This lecture course is typically offered in Spring.

Examines the basic principles and problems of classical, biochemical, and molecular genetics. NOTE: BIOL 2297 Research Techniques in Genetics is a required co-requisite WI course.

Co-requisites: BIOL 2297.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), and (CHEM 2201 (may be taken concurrently) or CHEM 2921 (may be taken concurrently))

BIOL 2211. Introduction to Biology II for Pre-Health Postbaccalaureates. 4 Credit Hours.

This course is typically offered in Spring.

Biology 2211 begins with a survey of the cell theory, basic microbiology, and embryogenesis, the process whereby cells are organized into the tissues that make up the major organ systems. The structure, function, and coordination of each of the major organ systems are examined. The course concludes with a study of evolutionary biology topics including natural selection, genetic drift, and speciation. Note: To register for this course, students must satisfy the prerequisites or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 1052 and BIOL 2212.

BIOL 2212. Introduction to Biology I for Pre-Health Postbaccalaureates. 4 Credit Hours.

This course is typically offered in Fall.

Biology 2212 examines living systems at the most fundamental levels. Topics include chemical bonds, the unique properties of water, carbon chemistry, the structures and functions of macromolecules, as well as the thermodynamic and kinetic properties of enzymes. At the cellular level, we will study the components of cell-to-cell communication, cellular signaling, the regulation of the cell cycle, and cell motility. An examination of the processes of gene expression and DNA replication lead into studies on chromosome behavior during meiosis and the field of genetics. This course finishes with a survey of viruses, biotechnology, and two compelling biological processes: cancer and aging. Note: To register for this course, students must satisfy the prerequisites or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 1052 and CHEM 2251 (may be taken concurrently)

BIOL 2227. Principles of Ecology. 3 Credit Hours.

This course provides an overview of ecology from the level of the individual organism to populations, communities and ecosystems. It examines the physical, chemical, and biological components of ecological interactions, and includes a comparative treatment of terrestrial and aquatic ecosystems.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW)

BIOL 2228. Ornithology. 4 Credit Hours.

The course focuses on how the study of birds has contributed to our understanding of basic principles in evolution, ecology, biogeography, behavior, neurobiology, life history theory, biodiversity and conservation. Lectures, small group discussions from primary literature, case studies and field work during the laboratory, will highlight these empirical advances. The course is available for all biology majors, but is geared specifically for those majoring in Ecology, Evolution and Biodiversity.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111 or BIOL 1911)

BIOL 2233. Mammalian Anatomy. 4 Credit Hours.

This course is typically offered in Fall.

A study of the development and gross anatomy of the human. In the laboratory, the dissection of the cat, together with pertinent illustrations from humans and other animals, provides a comparative survey of the anatomical structure of mammals.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 2234. Dinosaur Paleobiology. 3 Credit Hours.

Examines "non-avian dinosaurs" as objects of valid scientific inquiry and where appropriate, evaluates media hype surrounding them. Among topics examined in detail are: evolutionary relationships (including phylogeny, together with relationships to modern birds), ecology (including survey of other Mesozoic vertebrate groups, important invertebrates, plant life, biogeography), anatomy (hard and soft tissues), physiology (particularly but not limited to understanding dinosaur temperature regulatory physiology, paleoneurology, molecular traces, growth), behavior (locomotion, posture, reproduction, etc.), and how these animals are reconstructed and restored as living animals (including what is actually known from fossil evidence). This course highlights how applying basic biological principles is used to gain significant insights about what can actually be known about long extinct animals.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in (BIOL 1111, BIOL 1911, 'Y' in BIOW, 'Y' in CRBI02, or 'Y' in CRBI03)

BIOL 2235. General Histology. 4 Credit Hours.

This course is typically offered in Spring.

A study of the fundamental techniques used in preparing tissues for microscopic examinations, followed by a detailed study of the various types of normal tissues and organs in mammals with emphasis on correlations between structure and function.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW)

BIOL 2241. Invertebrate Biology. 4 Credit Hours.

This course is typically offered in Spring.

An introduction to the biology of the invertebrate phyla including insects. Demonstrations of the patterns of invertebrate evolution by consideration of morphology, behavior, development, physiology, and ecology of representative organisms.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW)

BIOL 2296. Genetics. 4 Credit Hours.

This course is typically offered in Spring.

Examines the basic principles and problems of classical, biochemical, and molecular genetics. NOTE: Required for majors in Biology. There are weekly laboratories that emphasize hands-on experience with living material.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), and (CHEM 2201 (may be taken concurrently) or CHEM 2921 (may be taken concurrently))

BIOL 2297. Research Techniques in Genetics. 3 Credit Hours.

This is the companion course to Genetics, whose dual purposes are to teach you the techniques used by geneticists to elucidate key genetic principles and for you to learn to communicate your findings in IMRD format. Major techniques covered include molecular cloning, PCR, restriction mapping, and gene mapping. You will gain hands-on experience working with several genetic model organisms, clone a gene, determine which variant of a particular gene you have, and delve into the vast (and ever-growing) genetic databases. This course will fulfill 3 credits of the writing intensive requirement.

Co-requisites: BIOL 2207.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), and (CHEM 2201 (may be taken concurrently) or CHEM 2921 (may be taken concurrently))

BIOL 2512. Genomic Foundations of Medicine. 3 Credit Hours.

At the beginning of the 21st century, the genome sequence of only a single human being was completed. Since that time, the application of genomics has grown exponentially. Genomics is now revolutionizing the practice of medicine such that almost every area of medicine has been affected. The practice of medicine thus now requires grounding in genomic principles and knowledge and understanding how current genomic knowledge is scientifically justified. This course introduces major medical disorders affecting humans and surveys their genetic and genomic basis.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 2112, BIOL 2912, BIOL 1112, or BIOL 1912)

BIOL 2525. Nutrigenomics: From Molecular Nutrition to Disease Prevention. 3 Credit Hours.

Nutrigenomics is a field of study that explores the relationship between nutrition and genetics. It focuses on how diet interacts with an individual's genes, influencing health and susceptibility to diseases. Nutrigenomics examines how variations in an individual's genetic makeup can impact their response to specific diet and food choices. By understanding these interactions, nutrigenomics aims to provide guidance on the optimal diet for optimal health and manage chronic diseases. In this course, students will delve into the fascinating world of nutrigenomics, exploring the cutting-edge research and applications that are revolutionizing the field of nutrition. Through a combination of theoretical knowledge and practical insights, students will gain a deep understanding of how nutrients and bioactive compounds in food interact with the human genome. We will examine the influence of genetic variations on individual responses to specific nutrients and explore how dietary factors can modulate gene expression, metabolism, and physiological processes. The course will cover a range of topics, starting with an introduction to basic genetics and the fundamentals of nutrition. Students will then delve into the exciting field of nutrigenomics, examining the latest advancements in genomic medicine and molecular technologies that are shaping our understanding of the Genome-Food interface.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111 or BIOL 1911) and (BIOL 1112, BIOL 1912, BIOL 2112, or BIOL 2912)

BIOL 2812. Principles of Medical Genetics. 3 Credit Hours.

Understanding of genetics is central for many biological disciplines, including medicine. This course examines the basic principles and problems of classical, biochemical, and molecular genetics to enable the student to apply them in solving medical problems.

Repeatability: This course may not be repeated for additional credits.

BIOL 2912. Honors Introduction to Cellular and Molecular Biology. 4 Credit Hours.

This course is typically offered in Fall.

This course (or Biology 1912), with Biology 1911 or Biology 1111, makes up the introductory series for Biology majors. This course provides an introduction to the fundamental concepts of biochemistry, cell biology, molecular biology and genetics. Topics covered include the structure of important biological macromolecules, enzyme kinetics, metabolic pathways, photosynthesis, cell changes during mitosis and meiosis, DNA replication, transcription, translation and genetic analysis. NOTE: (1) This course can substitute for Biology 2112 as part of the introductory series for Biology majors. There are weekly laboratories. (2) This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031, CHEM 1951, or 'Y' in CHM1), (CHEM 1032 (may be taken concurrently), CHEM 1952 (may be taken concurrently), or 'Y' in CHM2), and (MATH 1022 (may be taken concurrently), any MATH course numbered 1038 to 4999 (may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, or 'Y' in MC6T)

BIOL 3011. Integrative Cell and Tissue Biology. 3 Credit Hours.

This course will provide essential information on how cells work together in tissue and organ function. Students will be provided with modern key concepts on system biology paradigms in the analysis of biological processes. Topics covered in this course will include genome-scale in silico models, dissecting transcriptional control networks, circadian rhythms, applicability of modern system biology in human disease and cancer. In the first part of the course, students will learn about the "omics" science, and how omics technologies are used to measure and functionally characterize bio-molecular networks in cells or tissues. In the second part of the course, students will learn about omics applications to understand cell-type diversity of human organ systems, cellular alteration and disease.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111 or BIOL 1911) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW)

BIOL 3082. Independent Research II. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Research under the direction of a faculty member in the Department of Biology or under joint supervision of an approved outside preceptor and a member of the Biology department. The Temple Biology faculty member oversees student work and acts as a liaison between an outside institution and the Biology Department. All students must obtain the approval of the Biology Department Advisor. Students must have either completed Biology 2082: Independent Research I or have completed at least 60 credits (Junior or Senior standing). NOTE: Not available for major credit. This course is repeatable.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

Repeatability: This course may be repeated for additional credit.

BIOL 3083. Directed Readings. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisites: Junior standing and a GPA of 3.2 or better with recommendation of a faculty sponsor and approval of the Biology Honors Committee.

This course is repeatable. A tutorial opportunity for a student to work with a faculty member to investigate areas of study not covered by courses in the department. Available as an elective for Biology major credit by petition to the Biology Honors Committee prior to registration. The student must make a written agreement with a Biology faculty member detailing the course of study to be followed and the mechanism of evaluation. NOTE: Agreement must be submitted to the Biology Undergraduate Advisor and the Biology Honors Committee for approval. This course can be taken a maximum of two times; only one of these can count toward Biology elective requirements as well as GPA requirements.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

BIOL 3091. Research Methods. 3 Credit Hours.

This course is typically offered in Spring.

Research Methods is required for all of the TUteach with Teaching majors. It is one of several content courses specially designed to meet the needs of future teachers. Sections meet two hours per week for non-traditional, interactive lectures and two hours per week for lab. The course is cross-listed in Biology, Chemistry, Earth and Environmental Science, and Physics. The goals of the course are (1) to provide students with the tools that scientists use to solve scientific problems; (2) to give students the opportunity to use these tools in a laboratory setting; (3) to make students aware of how scientists communicate with each other through peer-reviewed scientific literature; and (4) to enable students to understand how scientists develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in conventional science classes. Students design and carry out four independent inquiries, which they write up and present in the manner that is common in the scientific community. The inquiries incorporate mathematics and the various science disciplines, thus the team of instructors teaching this course have expertise in different disciplines and are available to supervise all students as they work on their inquiries in the lab. The combination of Research Methods and the TUteach course "Perspectives on Science and Mathematics" (Philosophy 2196) provides prospective science and mathematics teachers with an in-depth understanding of how the scientific enterprise works. NOTE: Biology 3091 is only available for major credit in the Biology with Teaching BS program.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SCTC 1289 or SCTC 1389)

BIOL 3096. Cell Structure and Function. 4 Credit Hours.

This course is typically offered in Fall.

The chemistry and biological functions of important small molecules and macromolecules of the cell. Concept: the functions of cells are rooted in structures, and the structures themselves derive their characteristics from their chemical components. NOTE: Required for majors in Biology. There are weekly laboratories that emphasize hands-on experience with living material.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), (CHEM 2201 (may be taken concurrently) or CHEM 2921 (may be taken concurrently)), and (PHYS 1021 (may be taken concurrently), PHYS 1061 (may be taken concurrently), PHYS 1961 (may be taken concurrently), PHYS 2021 (may be taken concurrently), or PHYS 2921 (may be taken concurrently))

BIOL 3101. Evolution. 3 Credit Hours.

This course is typically offered in Fall.

Students acquire a strong foundation in evolutionary biology, including its historical development and basic concepts such as the origin of life, natural selection, adaptation, population genetics, speciation, phylogeny, coevolution, taxonomy, and biogeography. Students who successfully complete the course will also have a broad understanding of the planetary environment, the fossil and molecular records of life, conservation of biodiversity, and astrobiology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3111. Genomics in Medicine. 3 Credit Hours.

This course is typically offered in Fall.

The completion of the Human Genome Project in 2003 began a revolution in the treatment of human disease. More than 10 years later, the promise of personalized genome-guided medical treatment is becoming reality. This course will explore how genomic information has enhanced our understanding of human genetic variation and disease susceptibility. Students will develop familiarity with main areas in genomic medicine through lectures from intra- and extramural experts, and they will be involved in classroom discussions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW)

BIOL 3112. Fundamentals of Genomic Evolutionary Medicine. 3 Credit Hours.

This course is typically offered in Spring.

Modern evolutionary theory offers a conceptual framework for understanding human health and disease. In this course we will examine human disease in evolutionary contexts with a focus on modern techniques and genome-scale datasets. We ask: What can evolution teach us about human populations? How can we understand disease from molecular evolutionary perspectives? What are the relative roles of negative and positive selection in disease? How do we apply evolutionary principles in diagnosing diseases and developing better treatments? Students will conduct case studies of a variety of diseases and phenotypes in a group setting.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3113. Genome Analytics. 3 Credit Hours.

The completion of the Human Genome Project in 2003 began a revolution in the diagnostics, treatment, and prevention of human disease. As a part of this revolution, many areas of biology have become data-driven and quantitative. Modern genomic biology, biomedicine, and evolutionary genomics, are vitally dependent on key bioinformatic tools and algorithms. This course is designed to introduce students to key informatics and algorithmic concepts widely used in bioinformatics and computational biology, and to equip them with operational knowledge of the 'must-know' tools used by scientists and practitioners today. Students will complete an independent project using the tools and techniques learned in the course, integrating literature review, new analyses of published data using software tools and pipelines, data visualization and interpretation, and formal report writing. This course takes the approach of discovery-based learning. Each lecture will be structured to cover one discrete topic, with a brief background, introduction of key concepts, tutorials, and guided software exercises.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW) and (BIOL 3111 or BIOL 3112)

BIOL 3114. Evolutionary Ecology. 3 Credit Hours.

This course is typically offered in Fall.

The field of evolutionary ecology deals broadly with understanding how organisms adapt to their abiotic and biotic environments. What is the adaptive significance and evolutionary potential of phenotypic variation in natural populations? How do ecological interactions and genetic constraints shape the course of evolution? The class will cover fundamental ecological and evolutionary theories and approaches used to address questions in evolutionary ecology, including molecular tools, modeling, manipulative field studies, and laboratory- or field-based common garden studies. Topics covered include adaptation and constraint, phenotypic plasticity, life history evolution, ecological speciation, and evolutionary conservation biology. Lectures, assignments, and discussions will explore theoretical and recent empirical advances in the field.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 2227.

BIOL 3115. Disturbance Ecology. 3 Credit Hours.

Nature is dynamic, and ecosystems across the globe are defined by their disturbance regimes. Disturbances can be caused by storms, floods, fire, and species interactions. Disturbances can reset an ecosystem and understanding resilience to disturbance is a cornerstone of contemporary ecology. Further, as climate change alters the frequency and severity of storms and other natural events, disturbance regimes are changing, and understanding these dynamics can help predict and mitigate future impacts. In this course students will learn the conceptual foundations of disturbance ecology, while having hands-on opportunities to study disturbance dynamics in the field. Training in field methods and data analysis will be provided. This course is taught at the Temple Ambler Field Station on the Ambler Campus, with natural areas that recently incurred damage from an EF2 tornado. Students should expect to be outdoors regularly, learning about ecological disturbance and recovery as it unfolds in these environments in real time. Students without the designated prerequisites may be considered for registration with instructor permission.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (BIOL 1111, BIOL 1911, BOT 1112 (C or higher), or HORT 1211)

BIOL 3128. Genomics and Infectious Disease Dynamics. 3 Credit Hours.

This course is typically offered in Fall.

Events such as the emergence of avian flu have increased public awareness about the need for incorporating ecology and evolution in decision-making processes that involve infectious diseases. It is evident for the public health community that molecular information, together with concepts from ecology and evolutionary biology, allows for testing of hypotheses and exploration of scenarios that otherwise could not be investigated by traditional epidemiological approaches. Understanding the ecological and evolutionary dynamics of infectious diseases requires the integration of information across organizational levels at various temporal and/or spatial scales. This requirement, together with novel molecular evolution, genomics, and mathematical modeling approaches, has positioned research on Genomics and Infectious Diseases Dynamics at the forefront of Public Health Genomics. The goal of this class is to discuss some of the biological processes leading to the emergence and re-emergence of infectious diseases stressing on evolutionary concepts within an epidemiological context. Basic concepts will be provided by the instructor as part of formal lectures. Our general objective (integrating evolutionary biology into epidemiology) will be fulfilled by discussing research articles. Such discussions will take place during the second half of the semester. "Emerging" perspectives such as One Health and Public Health Genomics will be integrated into the lectures and discussions.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW)

BIOL 3181. Cooperative Research in Biochemistry. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Independent research carried out in an off-campus laboratory. A Biochemistry faculty member and the research director of the off-campus laboratory will jointly supervise research. Written permission must be obtained in advance from the supervising faculty member and one of the co-administrators. Student must present a seminar on campus describing the scientific aims of the project, the experimental design, and the conclusions drawn from the experiments. NOTE: Restricted to Biochemistry majors enrolled in the Cooperative Program.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Biochemistry.

Repeatability: This course may be repeated for additional credit.

BIOL 3201. Human Genetics. 3 Credit Hours.

This course is typically offered in Fall.

The class provides an extensive overview of various human genetics topics, including classical Mendelian genetics, molecular genetics and population genetics. We will delve into questions such as: what does human genome look like? What are the individual differences and how do they translate into phenotypic traits that affect our lives? How do we inherit and transmit this information? How do researchers study our genetic material and how do they find genes responsible for various diseases? What are the dynamic forces that shape genetic composition of human populations and why is it important to understand it? What have we learned about the past of human populations? Finally, is the ability to decipher the genome the ultimate tool to tell the future and are there any ramifications we should be cautious of? The class will integrate lectures and in-class discussion of scientific literature. This course will build upon the basic genetic knowledge acquired in BIOL 2207 (Genetics) and BIOL 2297 (Research Techniques in Genetics).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296)

BIOL 3204. Cell Structure and Function. 4 Credit Hours.

This course is typically offered in Fall.

The chemistry and biological functions of important small molecules and macromolecules of the cell. Concept: the functions of cells are rooted in structures, and the structures themselves derive their characteristics from their chemical components. There are weekly laboratories that emphasize hands-on experience with living material. Prior to Fall 2023, this course was taught as a WI-course, BIOL 3096.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), (CHEM 2201 (may be taken concurrently) or CHEM 2921 (may be taken concurrently)), and (PHYS 1021 (may be taken concurrently), PHYS 1061 (may be taken concurrently), PHYS 1961 (may be taken concurrently), PHYS 2021 (may be taken concurrently), or PHYS 2921 (may be taken concurrently))

BIOL 3211. Human Evolution. 3 Credit Hours.

Since we last shared a common ancestor with chimpanzees, over 6 million years ago, the human species experienced a series of unusual adaptations so that today humans dominate planet earth and are masters of arts and letters, science and technology. Humans are both highly intelligent and highly social, so that when we work together extraordinary and unpredictable things can happen. This course will cover the evolutionary history of humans from both phenotypic and genotypic perspectives.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3212. Introduction to Bioinformatics and Computational Biology. 3 Credit Hours.

Introduction to Bioinformatics and Computational Biology presents students without a computational background with an initial presentation of the biological questions that can be addressed computationally using mostly online tools. Beginning with an introduction to the scientific hypothesis testing and computational biology, students will subsequently be introduced to searching the scientific literature and biological datasets and databases, concepts in the organization of genes and genomes, sequence searching (BLAST), pairwise and multiple sequence alignment, phylogenetic tree reconstruction, protein structure and homology modeling, and finally modeling function in metabolic pathways. This course is designed as an applied course and as a prerequisite for more advanced conceptual and technological courses in the department.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3214. Theoretical Population Genetics. 3 Credit Hours.

This course explores the causes and consequences of genetic variation within and between populations. We can now obtain large-scale genetic variation data from a variety of species, and this data can be used to make inferences about demographic history, natural selection, gene flow, and a variety of other evolutionary processes. This course focuses on developing the theoretical machinery necessary to understand the factors that shaped the observed genetic variation, and examines how patterns of genetic variation inform our understanding of those forces. By developing probabilistic models of evolution based on coalescent theory and diffusion theory, students in the course will learn to apply statistical methods such as maximum likelihood and Bayesian inference to genetic data. Students will also gain familiarity with commonly used population genetics software.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1942, MATH 1044, or 'Y' in MATW) and BIOL 3101.

BIOL 3225. Evolutionary Genetics. 3 Credit Hours.

This course is typically offered in Spring.

This class covers fundamental principles of population and comparative genetics with special attention given to recent advances in genomics. The scope of the class ranges from understanding variation at the population level to addressing species-level questions. Topics covered include classical population genetics, quantitative genetics, comparative genomics, phylogenomics and speciation. Lectures, assignments and discussions will explore theoretical and recent empirical advances.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, or 'Y' in MATW)

BIOL 3232. Behavioral Genetics. 3 Credit Hours.

This course is typically offered in Fall.

This course is an introduction to the interdisciplinary field - behavioral genetics - that combines behavioral sciences and genetics and unifies the long-standing debate on what underlies complex human behavior: "nurture" or "nature." This course will discuss the genetic approaches used to dissect out the genetic determinant of complex human traits. For example, students will learn about genes that influence learning and memory, intelligence (IQ), cognitive disabilities, personality disorders, psychopathology, antisocial behavior, substance abuse, and sexual orientation. In addition, the interplay of environment and genetic factors that create individual differences in behavior will be explored. Because this field represents the intersection between what is known and what might be known in the future about complex and potentially controversial behaviors and characteristics, students will be encouraged to discuss contemporary ethical issues regarding human behavior in realm of the scientific evidence presented.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296)

BIOL 3241. Genomics and Evolutionary Biology of Parasites and Other Dependent Species. 3 Credit Hours.

This course is typically offered in Spring.

All known multicellular organisms harbor diverse assemblages of dependent species, many of which are considered parasites or pathogens. Yet, in spite of a growing awareness of the importance of dependent species in biodiversity and medicine, many studies are limited to assessing the consequences to their hosts. The goal of this seminar is to discuss some of the biological processes leading to the diversity of dependent species and their functional/evolutionary relationships with their hosts. This general objective will be fulfilled by discussing research articles on the genomics and evolution of dependent species, many of them considered parasites or pathogens. Students are also expected to gain proficiency in writing scientific review papers.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW) and BIOL 2227.

BIOL 3243. Parasitology. 4 Credit Hours.

This course is not offered every year.

This course will introduce students to the basic concepts of parasitology, including types of animal associations, adaptations to parasitic mode of life, and evolution of parasitism. Parasite life cycles (infection, transmission, pathology, symptoms, diagnosis, treatment) and control of medically and economically important parasites are the main emphasis of this course. Includes a laboratory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3244. Experimental Marine Biology. 4 Credit Hours.

This course is typically offered in summer.

Experimental Marine Biology is an upper level Biology course focused on the types of experiments that are used to further the science of Marine Biology. The course will be structured around three themes: Oceanography, Physiology, and Ecology. The Oceanography section will examine the marine environment in terms of the physics of current flow and the chemical properties of seawater. The Physiology section will examine how different organisms respond to these abiotic factors. In the Ecology section, we will discuss how organisms interact with each other as individuals and populations, and how communities and ecosystems are structured.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW)

BIOL 3245. Marine Ecology. 4 Credit Hours.

This course is occasionally offered in Fall.

A survey of the concepts of aquatic ecology in estuarine and marine ecosystems, emphasizing the organization and maintenance of the major aquatic communities in response to the physical, chemical, and biological characteristics of the environment, modes of energy transfer, physiological adaptation, life history characteristics, and functional morphology. Laboratory exercises stress comparative measurement of biological diversity in the marine environment. NOTE: One or more field trips required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 2227.

BIOL 3254. Animal Behavior. 3 Credit Hours.

This course is typically offered in Spring.

This course will examine how animals behave, and investigate the proximate (neurological and developmental) and ultimate (functional and evolutionary) explanations for these behaviors. The ecological and evolutionary processes that shape animal behavior will be examined through the study of classic theories and major principles of animal behavior, including a weighing of the experimental and observational evidence for each idea. Concepts will be illustrated with examples from a wide range of taxonomic groups of animals in diverse ecosystems, and emerging theories in animal behavior will be discussed. We will conclude with applications of animal behavior for conservation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 2227, BIOL 3101, or 'Y' in BIO5)

BIOL 3255. Critical Thinking in Biology. 3 Credit Hours.

The course is designed to improve students' critical thinking in broad areas of biology. Introductory lectures outline the elements and criteria that compose critical thinking, followed by student presentations and discussions based on the primary literature to promote development of this type of thinking in each student. For each session of class, one student will lead the discussion. Discussions will range in content from evolution to ecology and from molecular biology to the pathogenesis of human and animal diseases. Student presentations (one per student), twice weekly homework assignments (20 total), and oral participation in the scientific presentations throughout the semester will be used for grading.

Department Restrictions: Must be enrolled in one of the following Departments: CST:Biology.

Field of Study Restrictions: Must be enrolled in one of the following Majors: Biology.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits, Sophomore 30 to 59 Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW), and (CHEM 2201, CHEM 2921, CHEM 2202 (may be taken concurrently), or CHEM 2922 (may be taken concurrently))

BIOL 3265. Developmental Biology. 3 Credit Hours.

This course is typically offered in Fall.

This course provides an introduction to invertebrate and vertebrate development. It combines the description of classical examples of experimental embryology with the current study of the mechanisms of development, differentiation, and growth in animals at the molecular, cellular, and genetic levels. Topics covered include embryonic patterning, cell-cell interactions, growth factors and signal transduction, transcriptional control mechanisms and regulatory network, evolutionary mechanisms as well as the discussion of relevant diseases.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296)

BIOL 3268. Fundamentals of Cell and Cancer Biology. 3 Credit Hours.

This course examines cellular structures and biochemical pathways including those that, while mutated, lead to cellular transformation and formation of cancer.

Repeatability: This course may not be repeated for additional credits.

BIOL 3275. Ecology of Invasive Species. 3 Credit Hours.

This course is typically offered in Fall.

Species that are transported by humans from their native range and successfully establish and spread in a new environment are called invasive species. Invasive species can cause significant ecological and economic impacts and are a growing threat to native species and ecosystems across the globe. Recognition of this problem has led to a recent surge in research on invasive species and a better understanding of the ecology of invasions and approaches for improved prevention and control. Yet many challenges still hinder scientific and applied advancements in this emerging field. In this course we will investigate these challenges and the science of invasive species using interactive activities and student-driven projects.

Course Attributes: SE, SF, SP

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 2227 or 'Y' in BIO5)

BIOL 3301. Advanced Cell Biology. 3 Credit Hours.

This course is typically offered in Fall.

Fundamental knowledge in cell biology will be discussed. Topics include DNAs, RNAs, proteins, cell structure, cell motility, bio-membrane, endocytosis, nucleocytoplasmic transport, vesicular transport, cancers, visualizing macromolecular trafficking in cells with advanced microscopy imaging techniques, and stories of Nobel Prize Winners. Current journal articles reporting up-to-date developments in molecular cell biology will be covered as well. (Prior to Fall 2016, this course was titled "Cell Biology.")

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3307. Conservation Biology. 3 Credit Hours.

This course is typically offered in Fall.

The Earth harbors an incredible diversity of species and communities, most still poorly understood by science. This biodiversity is essential to the functioning of natural ecosystems and provides a wide array of priceless services to people today and a treasure of benefits for the future. Yet human threats to biodiversity have led us to the brink of the sixth major extinction event in Earth's history. Which populations, species, communities, and ecoregions are most diverse? Which are most threatened, and by which human activities? What is the contribution of biodiversity to human livelihoods? What does the science suggest is needed to conserve biodiversity? How might this best be done given social, economic, and political realities? These questions and more will be examined in this course, focusing on the key principles of conservation biology and the application of those principles to local, national, and international examples.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 2227.

BIOL 3311. Herpetology. 4 Credit Hours.

This course is typically offered in Spring.

Reptiles and amphibians comprise nearly 7,400 species and can be found on every major and minor landmass in the world except Antarctica. This course will provide a broad, evolutionary survey of the major groups of reptiles and amphibians ("herps"). We will cover topics about their basic biology, including anatomy, physiology, ecology, behavior, and conservation. The laboratory will emphasize taxonomic characters and identification of living and preserved specimens, with emphasis on species found in North America. Additionally several field trips (conducted during lab hours and spring break) will reinforce course material through hands-on experience.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3312. Biostatistics. 3 Credit Hours.

Students will learn the basic tools of statistical analysis for raw data and learn how to apply and interpret the analysis for the type of experiments they will encounter in biology. They will have opportunities to work with raw data using available computer tools such as EXCEL and SPSS.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW), (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3316. Tropical Marine Biology. 4 Credit Hours.

This course is typically offered in Fall of odd years.

A survey of marine biology focusing on coral reefs of the Atlantic Ocean. Course lectures given at Temple University include regular meetings during the fall semester plus some meetings between semesters during December and January. The course work at Temple is supplemented by a required week of lectures, field trips and field projects on Ambergris Caye in Belize (Central America). Lecture topics include coral biology, reef geology and ecology, coral reef biota, food webs and nutrient transfer in coral reefs, reef community organization, the biology of reef fishes, commensal and symbiotic interactions of reef organisms, and other appropriate topics. Group projects and presentations are required. Additional requirements include a current passport and snorkeling equipment. NOTE: Requires fall plus inter-session attendance, including air travel to a foreign country between fall and spring semesters. Room, board, and boat use in Belize are covered by the course fee; air transportation to Belize is not included. The course web site survey or an application available from the instructor must be completed prior to registration.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

BIOL 3317. General Microbiology. 4 Credit Hours.

This course is typically offered in Spring.

A general survey of bacteria and archaea. Topics include: classification; physiology, growth, and environmental impact; genetics and gene recombination; evolutionary relationships. Laboratory topics include pure culture, identification, growth characteristics, and genetics.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3321. Plant Community Ecology. 3 Credit Hours.

This course is typically offered in Fall.

This class focuses on fundamental principles in community ecology as they relate to plant systems. The scope of the class ranges from plant-environment interactions and species interactions, to the relationship among communities at larger spatial scales. Lectures and small group discussions will also highlight theoretical and empirical advances made in ecology through classic and contemporary studies of plant communities.

Course Attributes: SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 2227.

BIOL 3322. Biology of Plants. 3 Credit Hours.

This course is typically offered in Fall.

Plant Biology examines the current cellular, molecular and developmental aspects of higher plants, with an emphasis on Arabidopsis and maize. Topics include plant reproduction, embryonic pattern formation in plants, self-incompatibility, sex chromosomes in plants, polyploidy, chemical signaling in plants including PIN efflux carriers, phytochromes and cryptochromes, chloroplast structure and function, the light reaction of photosynthesis, stem cell populations in plants, leaf morphogenesis, flower development, DNA and histone methylation and epigenetics, RNA silencing in plants, plant genomics, plant viruses, and genetic engineering of monocot and dicot plants.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW)

BIOL 3323. Global Change Science: Analytics with R. 3 Credit Hours.

Learn how researchers use data to tackle global problems such as climate change, mass extinction, pandemics, and poverty. Explore interdisciplinary data, from economics to public health, and learn a marketable skill: R, an intuitive computer language. The course is project based, no prior coding experience is necessary, and no tests are given. Instead, student assessment is on project progress and communication of a global change problem of their choice. The most successful students leave class with the quantitative skills to go out and solve our most pressing problems.

Course Attributes: SE, SI, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BIOW) and BIOL 2227.

BIOL 3324. Molecular Biology. 3 Credit Hours.

This course is typically offered in Fall.

A comprehensive introduction to molecular genetics and the biochemistry of DNA, RNA, and proteins. The structure and expression of genes in both prokaryotes and eukaryotes will be discussed with special emphasis on DNA replication, transcription, and translation. Current journal articles covering recent developments in modern molecular biology and genetic engineering will be covered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (CHEM 2202, CHEM 2212, or CHEM 2922)

BIOL 3325. Research Techniques in Molecular Biology. 3 Credit Hours.

This course is typically offered in Spring.

Instruction in the techniques used in modern molecular biology and molecular genetics. This course takes a problem-oriented approach toward teaching the methods of DNA and RNA analysis that are used in determining the structure and function of genes. Practical experience in the preparation of DNA, modern cloning methods, restriction enzyme mapping, hybridization analysis, DNA sequencing, and PCR techniques will be provided. Students will carry out a research project during the course. NOTE: Biology 3324 is highly recommended, but not required.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296)

BIOL 3327. Immunology. 3 Credit Hours.

This course is typically offered in Spring.

The purpose of the Immunology course is to provide a comprehensive overview of the immune system that in its normal function protects each of us from the harmful effects of microbial invaders. The lectures will describe the general properties and development of immunity, the condition of being protected from infection by microorganisms or the effects of foreign molecules. They will provide systemic coverage of immune responses to viruses, bacteria, protozoa and roundworms as well as the practical aspects of vaccine development. Additional lectures will include a description of various types of primary immunodeficiencies, most prevalent autoimmune disease and cancer.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3204, or BIOL 3096)

BIOL 3328. Virology. 3 Credit Hours.

This course is typically offered in Fall.

The role of viruses in human diseases, and their potential as tools for research and clinical interventions. The course will focus on virus-induced diseases in man including polio, rabies, hepatitis, herpes, and influenza; recently discovered viruses such as HIV and HTLV-1 will also be studied. Virus-host interactions and the mechanisms involved in disease progression, therapeutic strategies, and vaccines, strategies for viral entry, evasion of the immune system, transmission, and the subversion of host-cell machinery will be emphasized. Potential uses of viruses as vector for gene therapy of genetic disorders, cancers, and infectious diseases will also be discussed.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (BIOL 3204 or BIOL 3096)

BIOL 3329. Developmental Genetics. 3 Credit Hours.

This course is not offered every year.

The role of genes during the periods of determination and differentiation in eukaryote development. Emphasis on the regulation of gene function and the relationship between gene function and the molecular and developmental interactions that culminate in the adult phenotype.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (BIOL 3204 or BIOL 3096)

BIOL 3333. Advanced Techniques in Microscopy. 4 Credit Hours.

This course is typically offered in Spring.

A survey of modern techniques in microscopy. Students will acquire a thorough grounding in general principles of optics and their application to the microscope. We will cover the theory of many methods current in Biology and Medicine, including: phase, interference contrast, and fluorescence microscopy, confocal microscopy, video microscopy, and digital image processing and analysis. This course includes extensive laboratory experience.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3334. Mammalian Physiology. 4 Credit Hours.

This course is typically offered in Spring.

Emphasis on the physiology of normal animals; consideration of disease states as counter-illustrations. Certain comparative aspects of physiology are introduced. Discussions of function extend to the physical and biochemical level.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, BIOE 3725, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, BIOE 3725, or 'Y' in BIOW), (CHEM 1032, CHEM 1952, or 'Y' in CHM2), (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), or 'Y' in MATW), and (PHYS 1022 (may be taken concurrently), PHYS 1062 (may be taken concurrently), PHYS 2022 (may be taken concurrently), or PHYS 2922 (may be taken concurrently))

BIOL 3335. Life at the Extremes - Polar Biology. 3 Credit Hours.

"Life at the Extremes - Polar Biology" is an introduction to polar environments and the biology of aquatic and terrestrial organisms adapted to live in the Arctic and Antarctic. Similarities and differences between the poles as well as anthropogenic impacts on these remote environments will be addressed. Comparisons to other extreme environments will be included.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, or 'Y' in BIOW) and (BIOL 1112 (may be taken concurrently), BIOL 1912 (may be taken concurrently), BIOL 2112 (may be taken concurrently), BIOL 2912 (may be taken concurrently), or 'Y' in BIOW)

BIOL 3336. Freshwater Ecology. 4 Credit Hours.

This course is typically offered in Fall of even years.

The interrelationships between biological, chemical, and physical factors in freshwater environments. Lectures and laboratories address general ecological principles (population dynamics, community structure, energy flow, and nutrient cycling) as they apply to plants and animals in lakes, ponds, streams and wetlands. NOTE: Students are required to participate in up to two field trips, one of which includes weekend travel.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 2227.

BIOL 3337. Comparative Biomechanics. 3 Credit Hours.

This course is typically offered in Fall.

An overview of biomechanics with emphasis on locomotion. Students gain a working knowledge of the breadth of biomechanical study ranging across organismal and environmental scales.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), (MATH 1042, MATH 1044, MATH 1942, MATH 1951, 'Y' in MA07, or 'Y' in MATW), and (PHYS 1021, PHYS 1061, PHYS 1961, PHYS 2021, or PHYS 2921)

BIOL 3352. Systems Neuroscience. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Study of the structure and function of the central nervous system (CNS) with a focus on the functional brain at a systems level. Systems level questions include how circuits are formed and used anatomically and physiologically to produce physiological functions, such as reflexes, sensory integration, motor coordination, emotional responses, learning and memory.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), (CHEM 2201 (may be taken concurrently) or CHEM 2921 (may be taken concurrently)), and (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, or 'Y' in MATW)

BIOL 3354. Neural Basis of Animal Behavior. 3 Credit Hours.

This course is typically offered in Fall.

An exploration of the relationship of neural activity and connectivity to behavior. Topics include motor control, object recognition, and feedback. Examples from both vertebrate and invertebrate species. Analytic and synthetic approaches.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 3352.

BIOL 3356. Organization and Development of the Nervous System. 3 Credit Hours.

This course is typically offered in Spring.

This course covers developmental and anatomical aspects of the nervous system. The relationship of form to function will be studied in a variety of both invertebrate and vertebrate systems. The course is intended to complement Neurobiology 3352 (0352)/5452 (0452) so that students will have a perspective on neuroscience ranging from the molecular to the systems level.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3358. Cellular and Molecular Neuroscience. 3 Credit Hours.

This course is typically offered in Spring.

The course will focus on the molecular and cellular basis of neurological processing. The fundamentals of action potential generation, synaptic and receptor potentials generation and neuron-neuron communication will be discussed. The contemporary understanding of sensory processing will be covered in great detail with a particular focus on molecular sensors of light, sound, odorants, taste and touch and the signal transduction pathways that underlie the five senses.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096) and BIOL 3352.

BIOL 3361. Molecular Neuropharmacology. 3 Credit Hours.

This course will be offered every year in the Fall semester.

In this course we will examine how drugs interact with the nervous system. We will focus specifically on the cellular and molecular actions of drugs on synaptic transmission as a mechanism for understanding the structure and function of the synapse. In addition, we will discuss how toxins and venoms affect synaptic transmission in nature as well as how they have been (and continue to be) used as research tools. We will study the neural substrates of drug action and the sequence of events from how a drug binds initially to its molecular target(s), the resulting changes in the function of its target, the influence of these changes on biochemical networks in neurons, the subsequent alterations in neuronal output, and in the circuit, including non-neuronal cells. Students will be able to appreciate the progress in the discovery of drugs used to treat complex behaviors as well as major neural disorders (neuroinflammation, pain, migraine, sleep, neurodegeneration, addictive disorders, schizophrenia, etc.). In addition, we will learn about the process of drug approval (preclinical, clinical trials, drug monitoring, and FDA's role).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 3352.

BIOL 3363. Mammalian Development. 3 Credit Hours.

This course is not offered every year.

This course covers normal and abnormal embryonic and fetal development; sources of totipotent, pluripotent and determined embryonic and fetal stem cells; the production of gynogenotes and androgenotes and the evaluation of these embryos to determine the contribution of maternal and paternal genomes to the developing embryo; epigenetic and X chromosome imprinting; the use of transgenes to correct genetic defects in developing embryos; and the function of specific genes in determining body pattern.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 3265.

BIOL 3364. Theory and Applications of Cancer Biology. 3 Credit Hours.

Students will be working at the Sbarro Institute for Cancer Research and Molecular Medicine, in collaboration with the Department of Medicine, Surgery and Neurosciences at the University of Siena. The program is overseen by Dr. Antonio Giordano, MD, PhD, Temple University professor and director of the Sbarro Health Research Organization, Dr. Luigi Pirtoli, MD, PhD, professor and director of the Radiation Oncology Unit at the University Hospital of Siena, and faculty and researchers at the University of Siena. Students will begin the program at the IES Abroad Siena Center with a comprehensive orientation, before beginning their six weeks of research. Throughout the program students will participate in cultural field trips, basic Italian language training and guided visits to Italian hospitals or labs. NOTE: This course may only be taken by students accepted into the Temple Education Abroad Summer in Italy Siena Biomedical Research Program.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111 or BIOL 1911), (BIOL 1112, BIOL 1912, BIOL 2112, or BIOL 2912), and ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3204, or BIOL 3096)

BIOL 3365. The New Neuroimmunology. 3 Credit Hours.

This course is typically offered in Spring.

It is now recognized that there is extensive communication between the immune and nervous systems. This course will examine the mechanisms and effects of this communication. Potential topics include effects of immune molecules on neuronal synaptic structure and function over the lifespan, and the implications for learning and memory; the biological basis of sickness behavior and links to depression and PTSD; possible effects of the microbiome on brain development and function; and links between immune deregulation and neurodegenerative disease.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 3352.

BIOL 3366. Applications of Biotechnology to Historical Preservation. 3 Credit Hours.

This course is central to the Temple Summer in Sicily Study Abroad experience, the Sicily Applied Biotechnology Program. In collaboration with Prof. Franco Palla, coordinator of the 5-year degree in conservation of cultural heritage at the University of Palermo, Italy, students will apply the tools of enzyme biochemistry, protein purification and biochemical techniques, microbe specific metabolic pathways, and biotechnological techniques of DNA sequencing to artifact preservation and restoration. Students will visit specific archeological sites and receive demonstrations of preservation and restoration field work. Students in their sophomore or junior year of study in degree programs within the Biology or Chemistry departments are eligible. Other students, particularly those in Engineering or Architecture programs, may also be considered.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3367. Endocrinology. 3 Credit Hours.

This course is typically offered in Fall.

Broad coverage of "chemical messengers," occurrence, biochemistry, and physiology. Vertebrate endocrinology with minor treatment of invertebrates and plants.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3368. Biology of Cancer. 3 Credit Hours.

This course is typically offered in Spring.

This course will survey the categories of tumors and their varying natures. Known mechanisms that lead to tumor cell development, multistep tumorigenesis, metastasis, tumor immunology, and cancer treatments will be examined in depth.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (BIOL 3204 or BIOL 3096)

BIOL 3369. Approaches to Disease Modeling, Diagnosis and Therapy. 3 Credit Hours.

This course is typically offered in Summer.

This course is divided into three stages. The first stage describes current and developing techniques for the study of the pathogenesis and progression of various diseases, along with new models for drug screening and the potential application of stem cells for tissue regeneration and/or repair. The pathological conditions comprise neurological diseases, genetic disorders and cancer. One specific topic is the current status of late stage clinical trials for the treatment of Alzheimer's disease. The second stage focuses on the latest modalities for diagnosis and prognosis of cancer: detection of tumor markers, circulating tumor cells and circulating tumor DNA. The third stage discusses cancer therapy: drug discovery and/or development, mechanisms of drug resistance in malignant cells, gene therapy, radiation therapy and immunotherapy.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3371. Cell Proliferation. 3 Credit Hours.

This course is typically offered in Spring.

Cell proliferation and its control: model systems, comparisons of proliferating cells with non-proliferating cells, controls of cell division and genomic stability and how that control is modified in proliferative diseases such as cancer, and the relationships between proliferation and differentiation.

Readings will be taken from the literature.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (BIOL 3204 or BIOL 3096)

BIOL 3372. The Molecular Regulation of Cell Migration and Morphogenesis During Development and Disease. 3 Credit Hours.

How cells move and how this process is regulated remains an active area of study. Disruption of cell migration is known to be causative for numerous human pathologies, and as such a major emphasis in the biological sciences is to discern and understand both the mechanisms and logic that drive such cellular migration. This course is an advanced cell biology course that will broadly examine how cell migration is controlled. Students will examine key signaling pathways that regulate cell polarization, cytoskeletal reorganization, cell adhesion and changes to the extracellular matrix for cell migration. Examples of cell migration and morphogenesis will be drawn from both developmental and diseases-based examples to illustrate both the mechanisms and roles of these key processes.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3373. Cell Signaling. 3 Credit Hours.

This course is typically offered in Spring.

The communication among cells is essential for the regulation of the development of an organism and for the control of its physiology and homeostasis. Aberrant cellular signaling events are often associated with human pathological conditions, such as cancer, neurological disorders, cardiovascular diseases and so on. The full characterization of cell signaling systems may provide useful insights into the pathogenesis of several human maladies. (Prior to spring 2017, this course was titled "Cell Signaling and Motility.")

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204 or BIOL 3096)

BIOL 3374. Physical Biochemistry. 3 Credit Hours.

This course is typically offered in Spring.

Physical Biochemistry emphasizes physical techniques that are used in modern biochemical research. Topics include proteomics, protein structure, protein folding, protein misfolding in neurological disorders, interaction of light with proteins including optogenetics, the light reaction of photosynthesis, nitrogen fixation, absorption spectroscopy, emission spectroscopy, bioluminescence and BRET, MALDI-TOF mass spectrometry, NMR spectroscopy, natural and artificial membranes, and single molecule methods in biochemistry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BLOW), (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, or 'Y' in MATW), (PHYS 1061, PHYS 2021, or PHYS 2921), and (CHEM 1034 or CHEM 1954)

BIOL 3379. Biotechnology. 3 Credit Hours.

This course is typically offered in Spring.

This course is designed to survey current issues in technologies including therapeutics and diagnostics, and to examine consequences of developments in this area. The course is designed in a Problem Based Learning format, where students research critical areas and provide oral and written reports for other members in the class. The course is organized by topics including Concepts in Genetics, Cloning and Ethics, Gene Therapy, Prenatal Diagnosis, Gene Therapy for Cancer, Cell Replacement Therapy, Genomics and Proteomics, Vaccines, Forensics, Plant Biotechnology, and Instrumentation. At the end of the course, each student makes a formal presentation on a specific advance in biotechnology.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296) and (BIOL 3204 or BIOL 3096)

BIOL 3380. Contemporary Biology. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Advanced discussion of selected topics.

This course is repeatable for credit.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, or 'Y' in BLOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, or 'Y' in BLOW)

BIOL 3389. Field Research in Community Ecology. 3 Credit Hours.

Many fundamental advances in community ecology have emerged from creative, well-designed field studies in natural ecosystems. Field research is therefore a cornerstone of contemporary community ecology. Through this course taught at Temple's Ambler Campus, students will gain hands-on experience designing and conducting field research in community ecology as the lab component of the course. While some activities will be in a classroom, most lab activities will be held outdoors, in the natural environments around Ambler Campus.

Course Attributes: SE, SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1011, BIOL 1111, or BIOL 1911)

BIOL 3396. Scientific Writing for Biology: The Art of Communicating. 3 Credit Hours.

This course is designed for upper-level undergraduate students majoring in a natural science. This seminar course teaches students how to communicate scientific information in written and oral (PowerPoint) formats clearly and succinctly. The development and refinement of the primary research article represents the core of the course; however, other genres of scientific writing (and audiences) are explored. In addition, students develop their skills as revisers, editors, and reviewers through in-class exercises that focus on giving (and receiving) constructive criticism. As part of a secondary goal of the course, other professional forms of writing (e.g., cover letters, personal statements, and resumes) as well as careers in scientific writing are discussed.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3204, or BIOL 3096)

BIOL 3403. Genomic Biology. 3 Credit Hours.

This course will cover the process of gene inheritance and descriptions of genome structure, as well as a discussion of gene content and function across lineages. Students will learn about genome-related technologies, including genome sequencing. They will also learn about how genomes vary across species, as well as the forces driving these evolutionary changes. A significant part of the course will cover genome-level data analyses, and students will complete assignments and exams to demonstrate understanding of the information present in genomes and how we know it. Note: Prior to fall 2016, the course title was "Genomics." Prior to fall 2015, the course title was "Genomics and Proteomics."

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3101, or BIOL 3212)

BIOL 3511. Pathophysiology of Genomic Medicine. 3 Credit Hours.

Genomics is now revolutionizing the practice of medicine such that almost every area of medicine has been affected. In this companion course to Genomic Foundations of Medicine, we will examine the molecular and cellular consequences of genomic variation in a medical context, focusing on pathophysiology and its impact on cellular and physiological functioning.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in BIOL 2512.

BIOL 3681. Cooperative Studies. 2 to 4 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Students obtain a job through the Cooperative Placement Office. Course grade based entirely on a research paper, related in subject matter to the job, and prepared under the supervision of a Biology Department faculty member. NOTE: The student is responsible for finding a departmental supervisor. For students enrolled in a Cooperative Program; not available for Biology elective credit. This course is not repeatable.

Repeatability: This course may not be repeated for additional credits.

BIOL 3685. Externship Studies. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Students who are participating in a formal externship program may apply to receive credit for the experience. The program must require a minimum of 9 hours per week, and require a summary from the preceptor at the end of the experience. A faculty member of the Biology department shall serve as the liaison to the program. All students must obtain the approval of the Biology Undergraduate Committee prior to entering the externship. Students must have completed Biology 1111/1911 and Biology 1112/2912 or 2112/2912. NOTE: Grades will be on a credit/non-credit basis. Not available for major credit.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW) and (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW)

BIOL 3941. Honors Broader Impacts: The Art of Scientific Communication. 3 Credit Hours.

Honors Broader Impacts: The Art of Scientific Communication is an upper-level honors course designed to integrate students from different disciplines around a discussion of the interpretation and presentation of scientific results to the public. The course will begin with a motivation for public engagement in the sciences and how science and scientists are viewed by the public. This will include a discussion of the National Science Foundation requirements for the "Broader Impacts" of their submitted proposals. The course will continue with the presentation, evaluation, and discussion of various examples of scientific outreach including film, fine art, music, and museum exhibits, as well as direct communication outlets such as blogs, social media, and press releases. Over the course of the semester, the students will engage with each other in the discussion of what makes an effective science communication strategy and work together to develop materials that communicate scientific to a broad audience. This will ideally involve a pairing of CST graduate students with Honors undergraduates from a wide variety of disciplines.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

BIOL 4201. The Practice of Health Care: Competencies and Current Topics. 1 or 3 Credit Hour.

This course is designed for post-baccalaureate pre-health students in order to better prepare them to be compassionate, well-informed, and professional health-care providers in the current health-care system. The current health-care system is very complex, and the medical education system has to spend so much time teaching scientific and clinical information that it often does not have a substantial amount of time to devote to explicitly teaching the "unspoken curriculum" that all students are expected to learn. The "unspoken curriculum" includes topics such as teamwork, medical ethics, professionalism, and understanding medical literature. This course seeks to better prepare students to function well in the health-care system by exposing them to a wealth of relevant and interesting topics in the areas of professional development, medical ethics, recent research related to medical disorders, and the current state of medical practice.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Postbaccalaureate.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may not be repeated for additional credits.

BIOL 4218. Principles of Medical Genetics for Pre-Health Postbaccalaureates. 4 Credit Hours.

Understanding of genetics is central for many biological disciplines, including medicine. This course examines the basic principles and problems of classical, biochemical, and molecular genetics to enable the student to apply them in solving medical problems.

Repeatability: This course may not be repeated for additional credits.

BIOL 4233. Human Anatomy for Pre-Health Postbaccalaureates. 4 Credit Hours.

The fundamentals of human anatomical structure are examined. A primary goal will be the development of a comprehensive vocabulary, including the learning of Latin and Greek root words underlying medical terminology. Students will progress from a review of the history of anatomy; to the study of anatomy at the microscopic level of cells, organelles and tissues; and finally to the organ systems level. Muscular, skeletal, nervous, endocrine, cardiovascular, gastrointestinal and respiratory systems will be covered.

Repeatability: This course may not be repeated for additional credits.

BIOL 4234. Human Anatomy Lab for Pre-Health Postbaccalaureates. 1 Credit Hour.

This is a 1-credit lab to accompany the Human Anatomy Lecture 4233. It will emphasize the anatomical structures talked about in lecture. Students will dissect and make observations in order to identify major muscles along with their associated bones, nerves and arteries. In addition, after opening the thoracic and abdominal cavities students will identify the major organs of these cavities. Note: To register for this course, students must satisfy the prerequisite or obtain permission from the program director.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Postbaccalaureate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in BIOL 4233 (may be taken concurrently)

BIOL 4268. Fundamentals of Cell and Cancer Biology for Pre-Health Postbaccalaureates. 4 Credit Hours.

This course examines cellular structures and biochemical pathways including those that, while mutated, lead to cellular transformation and formation of cancer.

Repeatability: This course may not be repeated for additional credits.

BIOL 4275. Fundamentals of Medical Biochemistry for Pre-Health Postbaccalaureates. 4 Credit Hours.

Biochemistry is fundamental to understanding pathophysiology, pharmacology, and other medical sciences. This course delves into the principles of biomolecular structure and function, kinetics, bioenergetics, biosignaling, and metabolism to prepare the student for understanding the molecular basis of medicine.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Postbaccalaureate.

Repeatability: This course may not be repeated for additional credits.

BIOL 4291. Extradepartmental Research. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisite: Senior standing with recommendation of a faculty sponsor. Students must obtain a sponsor on the Biology Department faculty to oversee their work and act as a liaison between the outside institution and the Biology Department. A student is eligible to apply for "Distinction in Biology" upon: 1) successful completion of 6 s.h. of a 4000-level Biology research course; 2) submission of a written report on the student's research to the faculty sponsor; and 3) a presentation on the student's research during the Biology Department's annual poster exhibition or another Temple University research symposium. Note: Not available for Biology major credit. This course is repeatable. Students wishing to complete additional credits of Biology 4291 beyond 6 s.h. may do so if they elect the CR/NC option.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

BIOL 4327. Biological Impacts of Global Climate Change. 3 Credit Hours.

This course is typically offered in Fall.

This course will use primary research articles to examine the biological impacts of climate change, often mentioned as the greatest challenge facing humanity today. The course will focus on the climate change impacts on coastal and marine ecosystems; water resources and freshwater ecosystems; food and agriculture; forests, grasslands and deserts; biodiversity and protected areas; and population, health and human well-being. In addition to the biology, we will consider the overlapping social, economic, and ethical concerns rising from the climate changes. Class time will be devoted to reflections and reactions to readings and news articles, case studies, student presentations and lectures.

Course Attributes: SE, SF, SP, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), and BIOL 2227.

BIOL 4338. Epigenetics. 3 Credit Hours.

This course is not offered every year.

The term "epigenetics" describes a heritable effect on chromosome or gene function that is not accompanied by a change in DNA sequence. Recent findings suggest an important role of epigenetics in both normal development and cancer. This course provides an overview of the field and examines selected phenomena in several eukaryotes, mechanisms regulating these effects, and their phenotypic consequences when normal regulation is lost. Topics include gene regulation through chromatin modification (acetylation, methylation), genomic imprinting, mechanisms of silencing (including small interfering RNAs), and the role of epigenetics in human diseases and cancer.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297), BIOL 2296, or 'Y' in BIO6) and (BIOL 3204, BIOL 3096, or 'Y' in BIO7)

BIOL 4341. Genome Editing. 3 Credit Hours.

Genome editing as such is not that new. Scientists have been "editing" genomes of bacteria, yeast and the mouse for some 30 years. Several recent technical advances, however, have pushed genome editing to the forefront of biological research. The first is discovery and development of nucleases, CRISPR/Cas9 in particular, which can be directed to cut DNA at just about any location. The second factor is a combination of stem cell technologies. They make it possible to produce stem cell out of many different tissues, which can then in turn be differentiated into various cell types, or carry out editing in the zygote. This will be a fast-paced seminar-like class. We will read and discuss primary research papers which describe advances relevant to the genome editing field, culminating in their application to edit the genomes of large mammals including the species *Homo sapiens*.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297) or BIOL 2296)

BIOL 4344. Research Techniques in Biochemistry. 4 Credit Hours.

This course is typically offered in Spring.

Laboratory instruction in techniques used to investigate biochemical problems. Techniques include spectrophotometry, various types of electrophoresis, separation of macromolecules, two-dimensional protein separation, affinity chromatography, isolation of plasmid DNA, Western Blot, immunoassay, enzyme kinetics, and radioisotope techniques. If time permits, students will be given a small research project.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 4401 or BIOL 4375)

BIOL 4364. Biochemistry of Embryogenesis. 3 Credit Hours.

This course is typically offered in Fall.

This course will compare and contrast key biochemical mechanisms of embryonic development in a variety of model organisms ranging from humans to plants. We will examine the roles of enzymes, peptides, small RNA molecules and chromatin structure during embryogenesis. Topics will include micro RNAs, modification of DNA structure, and effects of mutation on enzyme activity. These basic principles will then be applied to subjects such as cell communication, stem cells, and cloning. Course material will be drawn from the experimental literature.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297), BIOL 2296, or 'Y' in BIO6)

BIOL 4365. Evolutionary Developmental Biology: Evo-Devo. 3 Credit Hours.

This course is typically offered in Spring.

An overview of the relationship between organisms' development and phenotypic changes during evolution. Includes historical, theoretical and mechanistic themes of Evo-Devo, molecular and genetic basis of development and evolution.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 (may be taken concurrently) and BIOL 2297 (may be taken concurrently)), BIOL 2296 (may be taken concurrently), or BIOL 3101) and (BIOL 3204 or BIOL 3096)

BIOL 4366. Stem Cell Biology. 3 Credit Hours.

This course is typically offered in Fall.

The purpose of this course is two-fold. The first is to present the developmental biology of stem cells, with an overview of the various types of stem cells that exist and an emphasis on embryonic stem cells. The overview will include the important functional differences between embryonic, hematopoietic, and adult stem cells as well as the differences in their biomedical potentials. Techniques such as somatic cell nuclear transfer (SCNT) and other methods for the derivation of stem cell lines will be outlined so that differences that may seem subtle at first glance are clarified. The second purpose is to look into the larger debate on human embryonic stem cell research while continually drawing connections to the established fields of bioethics, politics, and philosophy. The course will ground the issues by looking at the history of the debate over the embryo, with careful attention paid to the language used in arguments. An exploration of important social, ethical, political, and economic issues and how they arose with respect to the stem cell debate will round out the remainder of the course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in ((BIOL 2207 and BIOL 2297), BIOL 2296, or 'Y' in BIO6) and (BIOL 3204, BIOL 3096, or 'Y' in BIO7)

BIOL 4367. Cancer Diagnostics and Therapeutics. 3 Credit Hours.

The course will provide novel insights for early diagnosis of cancer, new approaches for cancer therapy, drug delivery methods, and hints of personalized medicine. It will also highlight new opportunities and challenges associated with novel approaches and platforms for both diagnostics and therapeutics.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 3204, BIOL 3096, (BIOL 2207 and BIOL 2297), or BIOL 2296)

BIOL 4370. Advanced Special Topics in Biochemistry. 3 Credit Hours.

This course is not offered every year.

Advanced lecture course. Subject matter varies from semester to semester.

This course is repeatable for credit.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (CHEM 4401 or BIOL 4375)

BIOL 4375. General Biochemistry I. 3 Credit Hours.

Properties of water (pH and buffers); chemistry of amino acids and proteins including non-covalent interactions; carbohydrates, nucleotides and nucleic acids; lipids and membranes; enzyme mechanisms and kinetics; control of enzyme activity; bioenergetics and oxidative metabolism; and chemistry of photosynthesis.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BIOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BIOW), (CHEM 2202 or CHEM 2922), and (MATH 1041, MATH 1941, MATH 1038, MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA06, or 'Y' in MATW)

BIOL 4376. General Biochemistry II. 3 Credit Hours.

Emphasis on the biochemical reactions in various metabolic pathways. Biosynthesis and degradation of carbohydrates, lipids, proteins and amino acids. Regulation and integration of metabolic pathways. Bioenergetics and oxidative phosphorylation. Signal transduction. Transcription, translation and their control.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 4401 or BIOL 4375)

BIOL 4391. Accelerated Research in Biology. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisites: Senior standing with recommendation of a faculty sponsor. Research under the supervision of a faculty member in the Biology Department. A student is eligible to apply for "Distinction in Biology" upon: 1) successful completion of 6 s.h. of a 4000-level Biology research course; 2) submission of a written report on the student's research to the faculty sponsor; and 3) a poster presentation on the student's research during the Biology Department's annual poster exhibition or another Temple University research symposium. Students completing a minimum of 6 s.h. of a 4000-level Biology research course over two semesters may petition the Biology Undergraduate Committee to have the two semesters count for one elective course. This course is repeatable. Students wishing to complete additional credits of Biology 4391 beyond 6 s.h. may do so if they elect the CR/NC option.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may be repeated for additional credit.

BIOL 4396. Advanced Study in Biology. 3 Credit Hours.

This is a writing-intensive research course focused around the independent research of a senior undergraduate in one of the research labs in Biology, or another approved school or department (research mentor must be approved by course instructor or major advisor). Ideally, the student will have conducted independent research in the mentor's laboratory prior to taking this course, although that is not a requirement. During lecture sessions, students will receive instruction in the elements of a scientific paper, writing effectively in the style of the subject, visually representing their data, and the process of submitting and reviewing a scientific paper. Over the course of the semester, the student will propose a specific topic for the manuscript, write a manuscript in the format of a journal in the field of study, and present the research in class. The research mentor will review the manuscript a minimum of two times during the semester, and the student will revise the manuscript accordingly. At the end of the semester, the final manuscript will be submitted to the mentor, who will provide their evaluation to the course instructor and will be factored into the final grade.

Department Restrictions: Must be enrolled in one of the following Departments: CST: Biology.

Class Restrictions: Must be enrolled in one of the following Classes: Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

BIOL 4483. Accelerated Research in Biochemistry. 3 Credit Hours.

This course is typically offered in Fall, Summer I and Summer II.

This course is required for graduation with distinction in the major. Student presentation of research done in this course [and 4491 (0394)] or a comprehensive presentation of a topic selected jointly by student and advisor. Emphasis placed on analysis of experimental techniques, quantitative interpretation of the data, logical analysis of controls, and implication of the results. Admission to this course and the distinction track, as well as recommendation for graduation with distinction, must be approved by the Biochemistry Committee. Not available for Biology major credit.

Repeatability: This course may be repeated for additional credit.

BIOL 4491. Research in Biochemistry. 3 Credit Hours.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Research under the supervision of one of the Biochemistry faculty. If repeated, a presentation of the student's research is required during the second semester. Upon successful completion of two semesters of Biology 4491 (0394), the student may petition for them to be counted as one of the Biochemistry electives. Not available for Biology major credit.

Repeatability: This course may be repeated for additional credit.

BIOL 4522. Introduction to Scientific and Regulatory Writing. 3 Credit Hours.

This course introduces students to the two primary types of medical writing done by/for pharmaceutical and biotech companies. Specifically, students will learn how to research and write abstracts, posters, clinical reports and other research manuscripts, patient education materials, and slide kits. In addition, students will be introduced to the basics of strategic planning and consulting, including the creation of publication plans and meeting planning from a marketing perspective. Students will also learn the fundamentals of regulatory writing. Topics will include overviews of U.S. and international regulatory agencies, product life cycles, the conduct of clinical trials and reporting clinical trial results, and activities and documentation involved with submissions for marketing approval of treatments.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SCTC 2396 and ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3204, BIOL 3096, BIOL 3396, CHEM 3397, CHEM 3398, CHEM 4196, CIS 3296, CIS 4397, CIS 4398, EES 2096, EES 2097, ENVS 4198, MATH 3096, MATH 3098, MATH 4096, PHYS 2796, or PHYS 4796)

BIOL 4532. Introduction to Grant Writing. 3 Credit Hours.

This course is designed for students who plan to enter professional careers requiring knowledge of grant writing. The course will teach students the mechanics of proposal writing and the political and social aspects of "grantsmanship" as they develop their skills in identifying sources of grant funding, doing useful research to support their applications, and tailoring their proposals to specific audience interests. There will be several short writing assignments, an exam, and an independent project. Students may also be asked to engage in a collaborative grant project to help build their skills in collaboration.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SCTC 2396 and ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3204, BIOL 3096, BIOL 3396, CHEM 3397, CHEM 3398, CHEM 4196, CIS 3296, CIS 4397, CIS 4398, EES 2096, EES 2097, ENVS 4198, MATH 3096, MATH 3098, MATH 4096, PHYS 2796, or PHYS 4796)

BIOL 4533. Communicating Science to a Broader Audience / Non-Scientists. 3 Credit Hours.

This writing intensive course is a hybrid class with online and in-class components, with instructor/s interacting with students by editing multiple drafts of a paper requiring the students to communicate a science topic to readers with either no science background or backgrounds in other STEM fields. The learning goal of this course emphasizes the communication of scientific theory and concepts to wide-ranging audiences, especially non-scientists. The class requires students to demonstrate the ability to break down complex science into accurate, yet understandable explanations, by writing an article in the style of the New York Times science section, or a science report in a newspaper such as the Philadelphia Inquirer.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Undergraduate.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in SCTC 2396 and ((BIOL 2207 and BIOL 2297), BIOL 2296, BIOL 3204, BIOL 3096, BIOL 3396, CHEM 3397, CHEM 3398, CHEM 4196, CIS 3296, CIS 4397, CIS 4398, EES 2096, EES 2097, ENVS 4198, MATH 3096, MATH 3098, MATH 4096, PHYS 2796, or PHYS 4796)

BIOL 4591. Research in Neuroscience. 1 to 4 Credit Hour.

This course is typically offered in Fall, Spring, Summer I and Summer II.

Prerequisites: Senior standing and a GPA of 3.2 or better with recommendation of a faculty sponsor and approval of the Neuroscience Honors Committee. Research under the supervision of a faculty member conducting neuroscience research. Students must be Neuroscience majors who have completed Biology 1111, 1112 or 2112, 2296, 3096, and 3352. A written presentation of the student's research is required during the second semester. A student is eligible to apply for "Distinction in Neuroscience" upon: 1) successful completion of 6 s.h. of Biology 4591; 2) submission of a written report on the student's research to the faculty sponsor and the Biology Honors Committee; and 3) a poster presentation on the student's research during the Biology Department's annual poster exhibition. Not available for Biology major credit. This course is repeatable. Students who complete additional credits of Biology 4591 beyond 6 s.h. must take the additional credits as CR/NC only.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- (except where noted) in (BIOL 1111, BIOL 1911, 'Y' in BIO3, or 'Y' in BLOW), (BIOL 1112, BIOL 1912, BIOL 2112, BIOL 2912, 'Y' in BIO4, or 'Y' in BLOW), ((BIOL 2207 and BIOL 2297) or BIOL 2296), (BIOL 3204 or BIOL 3096), and BIOL 3352 (C or higher)

BIOL A000. Elective UL. 0 Credit Hours.

Repeatability: This course may not be repeated for additional credits.

Botany (BOT)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BOT 1111. General Botany. 4 Credit Hours.

Sexual, structural, and vegetative characteristics of bacteria, algae, fungi, nonvascular and vascular plants. An emphasis is placed on angiosperm (flowering plant) diversity, anatomy, morphology, phylogeny, and ecology. The course explores the importance of plants and the impact of people on our plant communities. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

BOT 1112. Plant Ecology. 3 Credit Hours.

The structure and function of plants are studied in relationship to their fit into the environment. The interaction of plants with each other and with their environment through study of natural and artificial systems, including wetlands, meadows, forests, deserts, disturbed sites, and managed landscapes.

Course Attributes: SE, SF

Repeatability: This course may not be repeated for additional credits.

BOT 2121. Plant Physiology. 4 Credit Hours.

An introduction to the major topics and concepts of plant physiology. Discusses the structure and functions of the different parts of a plant. Focuses on water and nutrition, biochemistry and metabolism, and growth and development of plants. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in ((BOT 1111 and CHEM courses numbered 1021 to 1024) or BIOL courses numbered 1011 to 1012)

BOT 2156. Plant Genetics and Diversity. 3 Credit Hours.

Genetics of plants, including Mendelian and extranuclear genetics, quantitative genetics, and population genetics. The course also considers the basis for, and significance and preservation of plant genetic diversity. The course considers man's impact on plant genetic diversity, including plant extinction, conservation, breeding, and biotechnology.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in (BOT 1111 and CHEM courses numbered 1021 to 1024)

BOT 3122. Applied Plant Physiology. 3 Credit Hours.

Highlights the major environmental factors that affect plant growth and development and explores ecologically sound approaches to solving stress-related problems. Focuses on techniques for designing experiments to examine the impact of environmental stress on the growth and development of a plant, and on techniques for manipulating a microenvironment in the production of horticulture crops.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in BOT 2121.

BOT 3166. Plant Taxonomy. 3 Credit Hours.

Systematic botany, evolutionary relationships of angiosperm families. Identification, classification, and nomenclature based on analysis of plant structure, genetics, physiology, and ecology. Identification of local native flowering plants; preparation of preserved specimens.

Class Restrictions: Must be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in BOT 1111.

Boyer College of Music & Dance (BCMD)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BCMD 0830. GenEd Limited Edition GD. 3 Credit Hours.

This is a General Education Limited Edition course that will satisfy the GenEd Race and Diversity requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Course Attributes: GD

Repeatability: This course may not be repeated for additional credits.

BCMD 0930. Honors GenEd Limited Edition GD. 3 Credit Hours.

This is an Honors General Education Limited Edition course that will satisfy the GenEd Race and Diversity requirement. Topics vary by semester. Check the Class Schedule for the full description of specific topics offered. Students cannot repeat this course for additional credits, regardless of the topic.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: GD, HO

Repeatability: This course may not be repeated for additional credits.

Business Administration (BA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BA 1001. Business Seminar I. 1 Credit Hour.

This course provides students with the foundation necessary for success in college. Students engage in interactive workshops to develop the academic, professional, and life skills required for Fox School of Business students. Topics include: study habits, industry alignment, time management tools, goal setting techniques, financial literacy, embracing/understanding diversity, and university resources. Students work closely with an Academic Advisor to develop an academic plan. NOTE: This course can NOT be taken by juniors or seniors, as the intended audience is new freshman and/or sophomores.

Class Restrictions: May not be enrolled in one of the following Classes: Junior 60 to 89 Credits, Senior 90 to 119 Credits, Senior/Fifth Year 120+ Credits.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School, Sport Tourism Hospitality Mgt, University Studies.

Repeatability: This course may not be repeated for additional credits.

BA 1002. Business Seminar II. 1 Credit Hour.

Business Seminar II is a one-credit course that encourages first-year students to discover major interests through applied learning and other career-oriented experiences. The course exposes students to career paths in business and encourages major exploration through discussions with faculty, informational interviews, readings, and opportunities to practice skills needed to become more efficient students. The course will also reintroduce the rigors of higher education. Many topics covered in this course not only apply to your growth as a student, but also to your social and professional development.

Repeatability: This course may not be repeated for additional credits.

BA 1103. Legal and Ethical Reasoning in Business. 3 Credit Hours.

Legal and Ethical Reasoning in Business examines how legal and ethical principles guide the decisions of business managers in their capacities as employees, supervisors, professionals and individuals. It explores legal, economic and moral theories of the firm to help managers make legal and ethical decisions, recognizing that some such decisions may not lead to short-term profits. The course provides analysis of useful tools and frameworks for managers that facilitate decision-making consistent with the rules of law, the rules of professional responsibility, expectations of stakeholders, and the policies and values of their firms. In the process of course engagement, students will develop their analytical skills, their written and oral communication skills, and their ability to think critically about some of the most pressing legal and ethical issues in business and society today.

Repeatability: This course may not be repeated for additional credits.

BA 1901. Honors Research Methods in Business. 1 Credit Hour.

Students are introduced to a variety of research methods, including online and library research. They also learn the basics of statistical analysis and statistical software. Finally, students receive instruction in writing, with particular attention to how one presents research. This course is restricted to students in the Fox School Research Scholars Program. NOTE: This course is restricted to students in the Fox School Research Scholars Program.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

BA 1903. Honors Legal and Ethical Reasoning in Business. 3 Credit Hours.

Honors Legal and Ethical Reasoning in Business examines how legal and ethical principles guide the decisions of business managers in their capacities as employees, supervisors, professionals and individuals. It explores legal, economic and moral theories of the firm to help managers make legal and ethical decisions, recognizing that some such decisions may not lead to short-term profits. The course provides analysis of useful tools and frameworks for managers that facilitate decision-making consistent with the rules of law, the rules of professional responsibility, expectations of stakeholders, and the policies and values of their firms. In the process of course engagement, students will develop their analytical skills, their written and oral communication skills, and their ability to think critically about some of the most pressing legal and ethical issues in business and society today.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

BA 2002. Business Transfer Seminar. 1 Credit Hour.

The Business Transfer Seminar is a one-credit optional course that introduces transfer students to the Fox School of Business and Management and Temple University. Students will be given an opportunity to discover major interests, work on career planning and development and orientate themselves to their new campus. The course will encourage students to explore their individual strengths, engage with faculty, staff and fellow students, and gain new connections on and off campus. Many topics covered in this course not only apply to your growth as a student, but also to your social and professional development.

Repeatability: This course may not be repeated for additional credits.

BA 2101. Professional Development Strategies. 1 Credit Hour.

Prepare students to enter the internship and permanent job marketplace. Emphasis on career planning, interview preparation (including behavioral event interviewing), expected behaviors and legal issues. Presentation and writing skills will be included. NOTE: It is recommended that all FSBM students take this course as soon as they have completed 45 credit hours.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

BA 2104. Excel for Business Applications. 1 Credit Hour.

The purpose of this online course is to prepare you to use Excel as a tool for solving business problems. You may be familiar with Excel but this course focuses on tools and Excel features that will specifically prepare you for your business courses, job interviews and for your professional life. You will learn how to use Excel efficiently, how to create formulas, use functions, produce and format charts, create reports and Pivot Tables, and use what-if-analysis for managerial decision making.

Repeatability: This course may not be repeated for additional credits.

BA 2196. Business Communications. 3 Credit Hours.

Business Communications is a writing-intensive workplace-oriented course designed to help students develop and refine the oral, written, and analytical skills necessary to communicate effectively in professional settings. Students will learn to effectively edit their own writing, understand how businesses communicate to an audience, and enhance their presentation and persuasive skills. Teaching method is small group discussion and workshop. NOTE: This course counts toward the university requirement that students complete two writing-intensive courses in their major, and it also counts as a lower level Business Core Course. Students who take this course to fill either requirement, need a C- or better for the class to count towards graduation.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 1103, BA 1903, HRM 1101, or HRM 1901)

BA 2501. Turning Numbers into Knowledge: Visualizing Data. 3 Credit Hours.

Corporations generate oceans of data, and the rate of data production is increasing over time. Human's ability to process this information is constant. How can we deal with this information deluge? Answer: A good visualization can be worth many gigabytes of data. This course will not only teach you about good visualizations, but will also focus on using the right visuals to effectively communicate your message. After completing this course, you will be able to identify the context of the data, select appropriate data and visualization techniques to maximize efficacy, focus your audience's attention, extract information from the data, and make compelling recommendations - really, tell a meaningful story with data. You will practice visualization techniques in a hands-on environment with a variety of datasets and data types, allowing you to quickly make great looking charts and graphs that can be directly applied to real-world situations.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2103, STAT 2903, STAT 2104, STAT 2102, STAT 2902, AS 2505 (may be taken concurrently), MATH 3031, or ISE 2101)

BA 2502. Business Analytics: Modern Data Science Techniques. 3 Credit Hours.

This course is designed to give you a new way to explore and solve problems that you encounter in the world using data. Numerous firms have demonstrated that the ability to reliably extract information from data is a potent and enduring source of competitive advantage, and these firms have realized that the ability to transform data into information is an asset that can be a primary source of competitive advantage. Competition is pushing firms to "mine" these insights faster, with greater reliability, and in ways that maximize the probability of implementation. In this course we will explore how modern analytics techniques can be used to improve decision-making, how to convey the insights gleaned from data to managers or to other decision makers, and the ethical pitfalls that one might run into while developing or using these models. The course will use a combination of lecture, real-world examples, cases, and "hands-on" projects to demonstrate techniques in context, to develop your analytic and model building acumen, and to enhance your communication skills. The course uses "off the shelf software" to focus attention on the relevance of the outputs, the importance of the insights, the communication of results, and the transferability of the knowledge rather than the specifics of a particular "tool".

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2103, STAT 2903, STAT 2104, STAT 2102, STAT 2902, AS 2505 (may be taken concurrently), MATH 3031, or ISE 2101)

BA 2951. Honors Turning Numbers Into Knowledge: Visualizing Data. 3 Credit Hours.

Corporations generate oceans of data, and the rate of data production is increasing over time. Human's ability to process this information is constant. How can we deal with this information deluge? Answer: A good visualization can be worth many gigabytes of data. This course not only teaches you about good visualizations but also focuses on using the right visuals to effectively communicate your message. After completing this course, you can identify the context of the data, select appropriate data and visualization techniques to maximize efficacy, focus your audience's attention, extract information from the data, and make compelling recommendations - really, tell a meaningful story with data. You practice visualization techniques in a hands-on environment with a variety of datasets and data types, allowing you to quickly make great looking charts and graphs that can be directly applied to real-world situations.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (STAT 2103, STAT 2903, STAT 2104, STAT 2102, STAT 2902, STAT 2512 (may be taken concurrently), MATH 3031, or ISE 2101)

BA 2996. Honors Business Communications. 3 Credit Hours.

Business Communications is a writing-intensive workplace-oriented course designed to help students develop and refine the oral, written, and analytical skills necessary to communicate effectively in professional settings. Students will learn to effectively edit their own writing, understand how businesses communicate to an audience, and enhance their presentation and persuasive skills. Teaching method is small group discussion and workshop. NOTE: This course counts toward the university requirement that students complete two writing-intensive courses in their major, and it also counts as a lower level Business Core Course. Students who take this course to fill either requirement, need a C- or better for the class to count towards graduation.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 1103, BA 1903, HRM 1101, or HRM 1901)

BA 3102. Business Society and Ethics. 3 Credit Hours.

This course challenges students to consider the ethical obligations of corporations and their employees to a wide variety of societal stakeholders. Students are exposed to a broad range of ethical dilemmas that can arise in the business world and are offered the tools and taught the skills to respond to such dilemmas. Most significantly, the course encourages students to critically examine a preeminent societal institution of which they are a part, with the possibility that they can ultimately be forces for positive change.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Corporate Social Responsibility, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Ethics, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, ProRanger- Natl Park Svc Mgt, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

Course Attributes: SI

Repeatability: This course may not be repeated for additional credits.

BA 3103. Integrative Business Applications. 3 Credit Hours.

This course integrates various functional business disciplines to help the student develop an understanding of business practices. Students will learn to view organizations as integrated systems based on the knowledge accumulated to date in the BBA Core and provide students with an opportunity to address problems faced by organizations from an integrated perspective. This course will bridge the gap between theoretical class work and business practice. NOTE: Students will use business simulation software to allow them to test alternative ways to operate a business in a competitive environment.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FIN 3101, FIN 3901, FIN 3502, or AS 2503), (MIS 2101 or MIS 2901), (MSOM 3101 or MSOM 3901), and (RMI 2101 or RMI 2901)

BA 3531. Sustainability on the Ground. 3 Credit Hours.

Explores how sustainable business practices influence an organization's success by working individually on sustainable projects at a local company in the Philadelphia region. Topics covered include: consulting skills, communication, presentation skills, employee engagement, leadership development, project management and more based on the consulting opportunity provided by the company. This course is available every semester but students should discuss potential projects with the designated faculty member at least the semester before they plan to register. No exceptions will be made to the prerequisites. Note regarding prerequisites: LGLS 3511 is a fall only class. HRM 2511 is a spring only class.

Course Attributes: SF, SS

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of D- in HRM 2511 and LGLS 3511.

BA 3580. Special Topics - Business Administration. 1 to 3 Credit Hour.

Special topics in current developments in the field of business administration.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

BA 3581. Co-operative Experience in Business. 3 Credit Hours.

The course is designed for Fox students who have a full time business co-operative which will take place over a semester, and which requires them to stop attending classes during that semester. NOTE: Arrangements are made through the Center for Student Professional Development. This course is for Fox School of Business undergraduate majors only.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Accounting, Actuarial Science, Business Management, Economics, Economics, Entrprnrship & Innovation Mgt, Entrepreneurship, Finance, Financial Planning, General Business Studies, Human Resource Management, International Business, Law & Business, Legal Studies, Management Information Systems, Marketing, Real Estate, Risk Management and Insurance, Supply Chain Management, Statistical Sci + Data Analyt, Undeclared-Business & Mngt.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

BA 3582. Independent Study. 1 to 3 Credit Hour.

Readings and/or papers in consultation with a faculty member.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may be repeated for additional credit.

BA 3591. Directed Business Research. 1 to 4 Credit Hour.

Directed Business Research provides an individualized method of learning and an in-depth treatment of a topic of interest, while receiving input and supervision from a faculty expert. The course provides hands-on, practical experience working with a Fox School of Business research faculty on an ongoing research project. All students must apply and obtain special approval to be added to the course. This course is primarily designed for students in sophomore and junior years. Exceptional students from other classes may be considered on a case-by-case basis.

Class Restrictions: May not be enrolled in one of the following Classes: Freshman 0 to 29 Credits.

BA 3902. Honors Business Society and Ethics. 3 Credit Hours.

This course challenges students to consider the ethical obligations of corporations and their employees to a wide variety of societal stakeholders. Students are exposed to a broad range of ethical dilemmas that can arise in the business world and are offered the tools and taught the skills to respond to such dilemmas. Most significantly, the course encourages students to critically examine a preeminent societal institution of which they are a part, with the possibility that they can ultimately be forces for positive change. NOTE: Honors section of Business Administration 3102 (0215).

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SI

Repeatability: This course may not be repeated for additional credits.

BA 3903. Honors Integrative Business Applications. 3 Credit Hours.

This course integrates various functional business disciplines to help the student develop an understanding of business practices. Students will learn to view organizations as integrated systems based on the knowledge accumulated to date in the BBA Core and provide students with an opportunity to address problems faced by organizations from an integrated perspective. This course will bridge the gap between theoretical class work and business practice. NOTE: Honors section of Business Administration 3103. Students will use business simulation software to allow them to test alternative ways to operate a business in a competitive environment.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FIN 3101, FIN 3901, FIN 3502, or AS 2503), (MIS 2101 or MIS 2901), (MSOM 3101 or MSOM 3901), and (RMI 2101 or RMI 2901)

BA 4101. Global Business Policies. 3 Credit Hours.

An integrative course that focuses on strategic planning, policy formulation, implementation, and corporate-wide decision making through the use of comprehensive case problems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 3103 or BA 3903)

BA 4102. Strategic Management. 3 Credit Hours.

Strategic Management (BA 4102) is the last required core class in the Fox undergraduate curriculum, culminating the BBA program learning experience. This course introduces the student to the role of the "strategic manager," who is concerned with an organization's challenges and opportunities, and responsible for its overall long-term success. The primary goal of the course is to provide students with the critical thinking skills necessary to function as a strategic manager. The course uses a "tying-it-together" approach providing students with challenges of strategic analysis, formulation, and implementation within the context of the single-business / single market firm, as well as the multi-business / multi-market firm. While the point of view of the decision-maker is that of the top management team (who must be concerned with more than a single functional area), the skills and knowledge developed in this course are relevant to those who head business units, as well as the staff people and consultants who work with the top managers. Just as top managers must integrate and apply the knowledge and competencies from the functional areas across the organization, so too must students integrate and apply the knowledge accumulated from their functional major courses, such as marketing, human resource management, operations, accounting and finance. Whatever your position in an organization, you are likely to be more effective if you understand your organization's strategy and your place in it.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (FIN 3101, FIN 3901, or AS 2503), (BA 1103, BA 1903, LGLS 1101, or LGLS 1901), (MSOM 3101 or MSOM 3901), (BA 2196 or BA 2996), and (RMI 2101 or RMI 2901)

BA 4901. Honors Global Business Policies. 3 Credit Hours.

An integrative course that focuses on strategic planning, policy formulation, implementation, and corporate-wide decision making through the use of comprehensive case problems.

College Restrictions: Must be enrolled in one of the following Colleges: Business & Mngmnt, Fox School.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (BA 3103 or BA 3903)

Business Education (BSED)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

BSED 3241. Methods of Teaching Microcomputer Applications. 3 Credit Hours.

Psychology of skill development and development of effective teaching techniques for teaching computer applications. Textbooks are evaluated, lessons presented, and student evaluations prepared. Simulated presentations videotaped.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in EDUC 2205 (may be taken concurrently)

Career and Technical Education (CTE)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CTE 3101. Principles of Career and Technical Education. 3 Credit Hours.

For prospective career and technical education teachers and technical trainers. Provides an in-depth analysis of the context in which contemporary career and technical programs operate. Emphasis is placed on the philosophical concepts underlying career and technical education, an examination of issues and problems in present programs and how research on teaching practice drives curricular change. NOTE: General familiarity with internet searching and navigation necessary. Some course assignments will be posted on Blackboard. Students are to inquire with the program for technical equipment requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 3102. Teaching Strategies in Career and Technical Education. 3 Credit Hours.

This course focuses on developing teaching competence. The following will be addressed: models of teaching for achieving instructional outcomes in career and technical areas; using performance standards to prepare and present content lessons; evaluation of instructional outcomes; integration of technology in instruction; serving students with special needs; creating an environment for student learning, differentiated instruction. NOTE: General familiarity with internet searching and navigation necessary. Some course assignments will be posted on Blackboard. Students are to inquire with the program for technical equipment requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 3103. Curriculum in Career and Technical Education. 3 Credit Hours.

Develop strategies for designing, implementing, and evaluating curriculum in career and technical education. Acquire knowledge, skills, and methods to validate a curriculum. Develop the skill to analyze an occupation in terms of duty and tasks performed; develop the skill to prepare valid performance objectives; determine scope and sequence schedules; aligning content, learning experiences, assessment and performance standards. NOTE: General familiarity with internet searching and navigation necessary. Some course assignments will be posted on Blackboard. Students are to inquire with the program for technical equipment requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 3241. Methods of Teaching Business Education, Marketing Education, and Computer Applications. 3 Credit Hours.

Instructional strategies in the teaching of Business, Computers, and Information Technology and Marketing are analyzed and demonstrated. Students are required to prepare lesson plans, teach demonstration lessons, develop a unit plan, participate in our profession, and complete the Intermediate Performance Assessment (IPA; if not completed before). The high expectations of this course will be met by all students to include English language learners and special education students. Lessons will integrate appropriate PA Standards for Business, Computers, and Information Technology or comparable standards, such as those for the National Business Education Association and the Temple College of Education Standards for Effective Teaching. Emphasis is placed on professionalism, and planning and skillful teaching that meet the needs of all students, including those with special needs, diverse, socio-cultural backgrounds, and English language learners. Demonstration lessons will be integrated with the course work to encourage developing teaching competency through a series of presentations appropriate to the student's certification interests.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: EDCNDCY.

Repeatability: This course may not be repeated for additional credits.

CTE 3372. Project-based Learning for Today's CTE. 3 Credit Hours.

The course is designed to help pre-educators and in-service educators plan and apply learning theory and principles of project-based learning to the development of Career and Technical Education and Business/Marketing related instruction in the classroom.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 3389. Supervised Work Experience. 1 to 6 Credit Hour.

This course provides certification candidates with education in the workplace experiences, including practical technical experience to supplement classroom instruction. An individualized training plan for the workplace is developed for each student. Staff visitations and joint supervision occur at the placement site.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may be repeated for additional credit.

CTE 4285. Industry Education Capstone and Field Experience for Work-Based Learning. 1 to 6 Credit Hour.

Evaluation of field work, including in-service education and/or technical experiences that can enhance a candidate's occupational specialty, certification program, and/or strategies for connecting school and real world experiences.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may be repeated for additional credit.

CTE 4300. Wkshp Vocational Ed. 1 to 6 Credit Hour.

Repeatability: This course may be repeated for additional credit.

CTE 4315. Credit by Examination. 1 to 24 Credit Hour.

Credit by examination is limited to students matriculated in the undergraduate Career and Technical Education (Industrial Education majors) degree program and who have met the following conditions: (a) completed 90 s.h. of approved course work, and (b) have received approval to have credit awarded toward their degree based on the successful completion of an Occupational Competency Assessment in a PDE Certification area.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 4324. Industry-Based Coordination Methods for Work-Based Learning. 3 Credit Hours.

The history, development, and operation of cooperative education programs are addressed in this course. Also covered are the development and promotion of a workplace-learning program, the development of workplace learning partnerships, workplace learning sites, safety considerations for students in the workplace, and connecting work-based and school-based learning. NOTE: This course is offered in a blended instructional format through a combination of online instruction and some face-to-face, whole class meetings. Students are to inquire with the program for technical equipment requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 4331. Industry-Based Instructional Methods for Work-Based Learning. 3 Credit Hours.

This course covers the role of the teacher-coordinator in conducting and teaching procedures and activities necessary for providing successful supervised field experiences for students in the workplace. Also covered are methods of establishing contact with students, employers, teachers, parents, and community leaders, career and technical student organizations, and students with special needs, as well as developing and understanding labor laws and other legal requirements affecting student workers/interns. NOTE: This course is offered in a blended instructional format through a combination of online instruction and some face-to-face, whole class meetings. Students are to inquire with the program for technical equipment requirements.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

CTE 4416. Professionalism, Evaluation, and Assessment in Secondary Education. 3 Credit Hours.

This course is designed to build a knowledge base for educational assessment and evaluation, Career and Technical Education curriculum development, and professional development, providing the opportunity to apply this knowledge in an actual classroom/laboratory setting. This course will also consider teaching strategies for the success of all learners, including special population students.

College Restrictions: Must be enrolled in one of the following Colleges: Education & Human Development.

Repeatability: This course may not be repeated for additional credits.

Center for the Performing and Cinematic Arts (CFA)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CFA 1001. Art Scene: Inspired Connections. 3 Credit Hours.

Have you ever wondered how a piece of music is composed, a screenplay is written for a film, or how a work of art comes to be? This course will explore these very ideas, revealing how creative people make and perform in a variety of the rich arts disciplines that comprise the Center for the Arts, including architecture, art and design, dance, film, music, and theater. Each week of the semester will be devoted to a different area of the arts and will provide insight into the working process of that form of art, the nature of the creative challenges, and the type of training and practice required to be successful. The format of the class will vary to suit the weekly topic and will include interviews with student participation, lectures, discussions, live demonstrations, and performances. During the first meeting of each week a distinguished faculty member for the Center for the Arts will present a brief history and broad introduction to their discipline, followed by a dynamic experience during the second class meeting that brings to life the artistic process and particular details about how that artist brings their ideas and vision to life.

Repeatability: This course may not be repeated for additional credits.

Chemistry (CHEM)

Course information contained within the Bulletin is accurate at the time of publication in August 2023 but is subject to change. For the most up-to-date course information, please refer to the Course Catalog.

CHEM 0821. Chemistry of Wine. 3 Credit Hours.

This course is typically offered in Fall.

Wine has occupied a central role in human culture. In our exploration of the science of wine we will learn why wine was the beverage of choice through the ages, why a bottle of wine can range from \$2 to \$2,000, how wine is made, what makes a good/bad wine, how is white different from red, and how we know what is in a bottle of wine. The course begins with a large scale fermentation of red and white wine and will continue with team-based analyses of the two month process of turning grape juice into wine. Many aspects of the production and consumption of wine will be addressed in this course.

NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and the Science & Technology Second Level (SB) requirement for students under Core.

Course Attributes: GS

Repeatability: This course may not be repeated for additional credits.

CHEM 0838. Nature Has No Reverse. 3 Credit Hours.

This course is not offered every year.

Rapid advances in modern science often tend to conceal the "forest in the trees," but we all need enough familiarity with the "scientific method" to make informed judgments as citizens and voters. This course will take you on a journey through the history of science, with stops at the Second Law of Thermodynamics, the "revolution" of fire, the rational basis of life, energy as the universal currency and changes in the universe around us. We will end with that most disturbing of paradoxes: the certainty of uncertainty. Each week includes both lecture and hands-on demonstration/practicum. NOTE: This course fulfills a Science & Technology (GS) requirement for students under GenEd and the Science & Technology Second Level (SB) requirement for students under Core.

Course Attributes: GS, SI

Repeatability: This course may not be repeated for additional credits.

CHEM 0877. The Chemistry of Global Environmental Issues. 3 Credit Hours.

Global warming. Climate change. Ozone Layer. Carbon Footprint. Ocean Acidification. Pollution. The Greenhouse Gas Effect. The ramifications of these issues, for the environment you live in are debated in such venues as the living (and dorm) room, the news, the halls of Congress, and the United Nations. The primary objective of this course is to pull back the veil on the scientific aspects of these topics while giving you the scientific background so that you can better understand and evaluate the potential impact of these significant environmental topics.

Course Attributes: GS, SE, SF

Repeatability: This course may not be repeated for additional credits.

CHEM 1005. Practice and Development of Spatial Visualization Skills. 1 Credit Hour.

The ability to mentally visualize in three dimensions is an important skill for scientists. In this course, students will move through ten different modules that will strengthen spatial reasoning and visualization skills. All assigned work will be completed during the scheduled class time. This course is restricted to students taking CHEM 1031, 1035, or 1951, and who have scored less than 70% on the PSVT:R.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031 (may be taken concurrently), CHEM 1035 (may be taken concurrently), or CHEM 1951 (may be taken concurrently))

CHEM 1006. Knowing Where to Start: Taking the Problem Out of Chemistry Problem Solving. 1 Credit Hour.

How do chemists understand a problem and figure out a plan to solve it? This course approaches problem solving as a way of thinking, helping students to succeed in introductory chemistry and beyond. The strategies explored in logic, math, and reading will be applied to challenges across human health and the environment.

Repeatability: This course may not be repeated for additional credits.

CHEM 1011. Chemistry: The Study of Matter I. 4 Credit Hours.

This course is typically offered in Fall and Spring.

Four hours of lecture and demonstration per week; intended to be the primary course for those who take chemistry only to satisfy their Core requirements. Important chemical phenomena and their explanations. Special emphasis on the use of chemical theories and development of mathematical skills needed for their use. NOTE: (1) Because fundamental science is presented, this sequence is also recommended for students who would like to enter a scientific field but fear their background is not adequate. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (any MATH course numbered 0701 to 0702, any MATH course numbered 0800 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

CHEM 1021. Introduction to Chemistry I. 3 Credit Hours.

This course is typically offered in Fall and Summer I.

The first semester of a course designed for the non-science major, introducing chemical principles in the context of everyday life. Fundamental concepts of chemistry including atomic theory, the mole concept, acids and bases, and physical properties of substances. NOTE: (1) Appropriate for some Allied Health students; check the requirements of your program. (2) This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (any MATH course numbered 0701 to 0702 (C or higher), any MATH course numbered 1021 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in CRMA18, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T)

CHEM 1022. Introduction to Chemistry II. 3 Credit Hours.

This course is typically offered in Spring and Summer II.

An introduction to organic and biochemistry. Emphasis on relationships between carbon compounds and the chemistry of living systems, the interaction of chemical science with current technology, and chemicals in the environment. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 1021.

CHEM 1023. Introduction to Chemistry Laboratory I. 1 Credit Hour.

This course is typically offered in Fall and Summer I.

Introduction to experimental inorganic chemistry and general chemical techniques. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (any MATH course numbered 0701 to 0702 (C or higher), any MATH course numbered 1021 to 4999 (may be taken concurrently), 'Y' in MC3, 'Y' in MC4, 'Y' in MC5, 'Y' in MC6, 'Y' in MA01, STAT 1001 (may be taken concurrently), 'Y' in STT2, STAT 1102 (may be taken concurrently), STAT 1902 (may be taken concurrently), 'Y' in MC3A, 'Y' in MC6A, 'Y' in MATW, 'Y' in MC3S, 'Y' in CRMA18, 'Y' in MC3D, 'Y' in MC3O, 'Y' in MC3T, or 'Y' in MC6T) and CHEM 1021 (may be taken concurrently)

CHEM 1024. Introduction to Chemistry Laboratory II. 1 Credit Hour.

This course is typically offered in Spring and Summer II.

Introduction to experimental organic and biological chemistry. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 1023 and CHEM 1022 (may be taken concurrently)

CHEM 1027. Applications of Chemistry. 4 Credit Hours.

This course is typically offered in Fall, Spring, and Summer II.

This course is a transition semester of chemistry to be taken before Chemistry 1031 (C071) designed for students who have not had enough preparation in chemistry or mathematics to directly take Chemistry 1031 (C071). Mathematical concepts and chemical principles will be integrated into a series of common applications. In this class, students will learn proper handling of laboratory materials and perform experiments that are integrated with, as well as introduce and reinforce, the material from the lecture. This course is intended to prepare students for General Chemistry by emphasizing the mathematical basis of chemistry and laboratory measurements. A quantitative introduction to atomic and molecular structure, states of matter, basic thermodynamics, solutions, gas laws, kinetics, and equilibrium. NOTE: Students must register for 2 sections: one of which is a combination of lecture and lab for 4 credits and the other is a 0 credit recitation.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1021 (may be taken concurrently), any MATH course numbered 1022 to 4999 (C- or higher; may be taken concurrently), 'Y' in MC5, 'Y' in MC6, STAT 1001, STAT 1102, STAT 1902, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA04, 'Y' in CRST01, 'Y' in CRST02, or 'Y' in MC6T)

CHEM 1031. General Chemistry I. 3 Credit Hours.

The first semester of chemistry for science majors, pre-professional students, and others in science related fields. A quantitative introduction to atomic and molecular structure, states of matter, basic thermodynamics, and solutions. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1021, any MATH course numbered 1022 to 4999 (C- or higher; may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, STAT 1001, STAT 1102, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA04, 'Y' in CRST01, 'Y' in CRST02, or 'Y' in MC6T)

CHEM 1032. General Chemistry II. 3 Credit Hours.

The second semester of chemistry for science majors, pre-professional students, and others in science related fields. An introduction to thermodynamics, equilibrium, kinetics, electrochemistry, and descriptive chemistry. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1031, CHEM 1041, or CHEM 1951)

CHEM 1033. General Chemistry Laboratory I. 1 Credit Hour.

An introduction to experimental chemistry, including the determination of molecular weights, calorimetry, and fundamental analytical techniques. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1021 (C or higher), any MATH course numbered 1022 to 4999 (may be taken concurrently), 'Y' in MC5, 'Y' in MC6, 'Y' in MA03, STAT 1001 (C or higher), STAT 1102 (C or higher), 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA04, 'Y' in CRST01, 'Y' in CRST02, or 'Y' in MC6T) and (CHEM 1031 (may be taken concurrently), CHEM 1035 (may be taken concurrently), CHEM 1041 (may be taken concurrently), or CHEM 1951 (may be taken concurrently))

CHEM 1034. General Chemistry Laboratory II. 1 Credit Hour.

Experiments in equilibrium, kinetics, acid-base and oxidation reduction titrations, electrochemistry, and synthesis of metal complexes. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Course Attributes: SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1033, CHEM 1043, or CHEM 1953) and (CHEM 1032 (may be taken concurrently), CHEM 1042 (may be taken concurrently), or CHEM 1952 (may be taken concurrently))

CHEM 1035. Chemistry for Engineers. 3 Credit Hours.

This course is typically offered in Fall and Spring.

The course is specifically designed to provide Engineering students with a concise, but comprehensive treatment of chemical principles. An objective of the course is to present concepts in an engineering context. This will be accomplished in part by discussing how chemical principles provide a foundation for engineering and technology. Topics to be included will be states of matter, reaction stoichiometry, atomic and molecular structure, chemical equilibria, thermodynamics, and kinetics. The course will consist of three hours of lecture and one hour of recitation per week. CHEM 1033 is normally taken concurrently.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C (except where noted) in (MATH 1022, any MATH course numbered 1038 to 4999 (C- or higher; may be taken concurrently), 'Y' in MC6, 'Y' in MA04, 'Y' in MC6A, 'Y' in MATW, 'Y' in CRMA05, or 'Y' in MC6T)

CHEM 1051. General Chemistry I for Pre-Health Postbaccalaureates. 3 Credit Hours.

This is the first semester of general chemistry for post-baccalaureate students. It includes a quantitative introduction to atomic and molecular structure, states of matter, basic thermodynamics, and solutions. These topics will be covered with special consideration of their relevance to the health sciences.

Repeatability: This course may not be repeated for additional credits.

CHEM 1052. General Chemistry II for Pre-Health Postbaccalaureates. 3 Credit Hours.

This is the second semester of general chemistry for post-baccalaureate students. It includes an introduction to thermodynamics, equilibrium, kinetics, electrochemistry, and descriptive chemistry. These topics will be covered with special consideration of their relevance to the health sciences. Note: To register for this course, students must satisfy the prerequisite or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 1051.

CHEM 1053. General Chemistry I Lab for Pre-Health Postbaccalaureates. 1 Credit Hour.

This course is typically offered in Summer I.

This is the laboratory to accompany the first semester of general chemistry for post-baccalaureate students. It includes a quantitative introduction to atomic and molecular structure, states of matter, basic thermodynamics, and solutions. These topics will be covered with special consideration of their relevance to the health sciences.

Repeatability: This course may not be repeated for additional credits.

CHEM 1054. General Chemistry II Lab for Pre-Health Postbaccalaureates. 1 Credit Hour.

This course is typically offered in Summer II.

This is the laboratory to accompany the second semester of general chemistry for post-baccalaureate students. It includes hands-on investigations of an introduction to thermodynamics, equilibrium, kinetics, electrochemistry, and descriptive chemistry. These topics will be covered with special consideration of their relevance to the health sciences. Note: To register for this course, students must satisfy the prerequisites or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 1052 (may be taken concurrently) and CHEM 1053.

CHEM 1055. Introduction to Problem Solving and Logical Thinking for Pre-Health Postbaccalaureates. 1 Credit Hour.

The ability to solve problems and think logically is essential for success in health professions schools because health professionals must be able to put together patient symptoms, test results, and current research to determine the best course of action for the patient in question. As a result, entrance exams for health professions schools test the ability to think and solve problems logically. However, the techniques of good problem solving are rarely explicitly taught at any point in a student's education, and science majors rarely take logic courses. This course seeks to fill that gap in a way that is geared specifically toward what is needed for pre-health students to succeed in their classes and on standardized tests. This course teaches students good problem-solving techniques and the basics of deductive and inductive logic. The students will spend class time practicing and applying the techniques and principles they are taught, either individually or in pairs/groups. This design will enable them to develop their skills of problem solving and logical thinking so that they can apply them not only to their classes, but to entrance exams for professional school and the practice of their profession as well.

Repeatability: This course may not be repeated for additional credits.

CHEM 1951. Honors General Chemical Science I. 3 Credit Hours.

This course is typically offered in Fall.

When taken with Chemistry 1953 (H093), this course meets pre-professional requirements. Similar to Chemistry 1031 (C071) but with added emphasis on topics of current interest to the professional chemist. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher; may be taken concurrently), MATH 1941 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (D or higher; may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21)

CHEM 1952. Honors General Chemical Science II. 3 Credit Hours.

This course is typically offered in Spring.

Similar to Chemistry 1032 (C072), but with added emphasis on topics of current interest to the professional chemist. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 1951 and (MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, or 'Y' in MATW)

CHEM 1953. Honors Chemical Science Laboratory I. 1 Credit Hour.

This course is typically offered in Fall.

An introduction to the experimental techniques employed in the determination of the physical and chemical properties of matter. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- (except where noted) in (MATH 1041 (C or higher; may be taken concurrently), MATH 1941 (C or higher; may be taken concurrently), MATH 1038 (C or higher; may be taken concurrently), MATH 1042 (may be taken concurrently), MATH 1044 (may be taken concurrently), MATH 1942 (may be taken concurrently), MATH 1951 (may be taken concurrently), any MATH course numbered 2043 to 3080 (D or higher; may be taken concurrently), 'Y' in MA06, 'Y' in MATW, 'Y' in CRMA08, or 'Y' in CRMA21) and (CHEM 1031 (may be taken concurrently), CHEM 1041 (may be taken concurrently), or CHEM 1951 (may be taken concurrently))

CHEM 1954. Honors Chemical Science Laboratory II. 1 Credit Hour.

This course is typically offered in Spring.

Introduction to the experimental techniques employed in the determination of the physical and chemical properties of matter. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement. To determine if this course in combination with another course can satisfy the GenEd Science & Technology requirement, see your advisor.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 1951, CHEM 1953, and CHEM 1952 (may be taken concurrently)

CHEM 2201. Organic Chemistry I. 3 Credit Hours.

Structure, synthesis, and reactivity of hydrocarbons and their simple derivatives. Principles of organic spectroscopy and stereochemistry. Introductory study of kinetics and reaction mechanisms.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032, CHEM 1042, or CHEM 1952)

CHEM 2202. Organic Chemistry II. 3 Credit Hours.

Detailed examination of the more common functional groups and their reaction chemistry. Emphasis on development of organochemical reasoning powers through planning of multi-step syntheses and solution of structural problems by the combination of chemical and spectroscopic methods. Applications of organic chemistry to biological systems.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2201, CHEM 2211, or CHEM 2921)

CHEM 2203. Organic Chemistry Laboratory I. 1 Credit Hour.

An introduction to microscale laboratory techniques in organic chemistry. Emphasis on learning to manipulate equipment and on efficient separation and purification of organic compounds.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1034, CHEM 1044, or CHEM 1954) and (CHEM 2201 (may be taken concurrently), CHEM 2211 (may be taken concurrently), or CHEM 2921 (may be taken concurrently))

CHEM 2204. Organic Chemistry Laboratory II. 1 Credit Hour.

A continuation of Chemistry 2203 (0123). Preparation, purification, and analysis, including multi-step sequences, of typical moderately complicated organic compounds.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2203, CHEM 2213, or CHEM 2923) and (CHEM 2202 (may be taken concurrently), CHEM 2212 (may be taken concurrently), or CHEM 2922 (may be taken concurrently))

CHEM 2211. Organic Chemistry for Majors I. 3 Credit Hours.

This course is typically offered in Fall.

Structure, synthesis, and reactivity of hydrocarbons and their simple derivatives. Principles of organic spectroscopy and stereochemistry. Introductory study of kinetics and reaction mechanisms. Presentation focused on topics of interest to the professional chemist.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032, CHEM 1042, or CHEM 1952)

CHEM 2212. Organic Chemistry for Majors II. 3 Credit Hours.

This course is typically offered in Spring.

Detailed examination of the more common functional groups and their reaction chemistry. Emphasis on development of organochemical reasoning powers through planning of multi-step syntheses and solution of structural problems by the combination of chemical and spectroscopic methods. Applications of organic chemistry to the chemical profession.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2201, CHEM 2211, or CHEM 2921)

CHEM 2213. Organic Majors Laboratory I. 1 Credit Hour.

This course is typically offered in Fall.

Introduction to organic chemical laboratory techniques, including spectroscopy and chromatography. Hands-on approach with individualized demonstration and instruction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1034, CHEM 1044, or CHEM 1954) and (CHEM 2201 (may be taken concurrently), CHEM 2211 (may be taken concurrently), or CHEM 2921 (may be taken concurrently))

CHEM 2214. Organic Majors Laboratory II. 1 Credit Hour.

This course is typically offered in Spring.

Advanced organic chemical laboratory techniques, including spectroscopy and chromatography. Hands-on approach with individualized demonstration and instruction.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2203, CHEM 2213, or CHEM 2923) and (CHEM 2202 (may be taken concurrently), CHEM 2212 (may be taken concurrently), or CHEM 2922 (may be taken concurrently))

CHEM 2251. Organic Chemistry for Pre-Health Postbaccalaureates. 6 Credit Hours.

This course is typically offered in Fall.

This is a one-semester version of organic chemistry for post-baccalaureate students. It includes the chemistry of alkanes, alkenes, alkynes, alcohols, amines, alkyl halides, ethers, aromatic rings, aldehydes, ketones, carboxylic acids, esters, and amides. These topics will be covered with special consideration of their relevance to the health sciences. Note: To register for this course, students must satisfy the prerequisites or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 1052 and CHEM 1054.

CHEM 2253. Organic Chemistry Lab for Pre-Health Postbaccalaureates. 1 Credit Hour.

This course is typically offered in Fall.

This is the laboratory component of a one-semester version of organic chemistry for post-baccalaureate students. It includes the chemistry of alkanes, alkenes, alkynes, alcohols, amines, alkyl halides, ethers, aromatic rings, aldehydes, ketones, carboxylic acids, esters, and amides. These topics will be covered with special consideration of their relevance to the health sciences. Note: To register for this course, students must satisfy the prerequisites or obtain permission from the program director.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C in CHEM 2251 (may be taken concurrently) and CHEM 1054.

CHEM 2891. Introduction to Undergraduate Research. 1 Credit Hour.

This course is typically offered in Fall and Spring.

Study and research under supervision of a member of the Chemistry faculty. Open to sophomore chemistry and biochemistry majors, others with permission of the department. The student is expected to gain an introduction to research through participating in limited independent research (3-4 hours/week) and participating in group research activities. A group presentation is required, the content of which is to be determined in consultation with the Research Mentor. A final written report will be submitted to the faculty member, who will forward a copy to the Department's Undergraduate Research Coordinator. Students are responsible for arranging their program and submitting reports with lead-time sufficient that registration and grading can be accomplished normally. NOTE: For further information and details, contact the Undergraduate Research Coordinator. This course does not fulfill an advanced Chemistry course for the Chemistry B.A. or B.S. degree. This course is repeatable for credit.

Repeatability: This course may be repeated for additional credit.

CHEM 2921. Organic Chemistry for Honors I. 3 Credit Hours.

This course is typically offered in Fall.

Structure, synthesis, and reactivity of hydrocarbons and their simple derivatives. Principles of organic spectroscopy and stereochemistry. Introductory study of kinetics and reaction mechanisms. Presentation focused on topics of interest to the professional chemist. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032, CHEM 1042, or CHEM 1952)

CHEM 2922. Organic Chemistry for Honors II. 3 Credit Hours.

This course is typically offered in Spring.

Detailed examination of the more common functional groups and their reaction chemistry. Emphasis on development of organochemical reasoning powers through planning of multi-step syntheses and solution of structural problems by the combination of chemical and spectroscopic methods. Applications of organic chemistry to the chemical profession. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2201, CHEM 2211, or CHEM 2921)

CHEM 2923. Organic Honors Laboratory I. 1 Credit Hour.

This course is typically offered in Fall.

Introduction to organic chemical laboratory techniques, including spectroscopy and chromatography. Hands-on approach with individualized demonstration and instruction. NOTE: This course can be used to satisfy the university Core Science & Technology First Level (SA) requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SA

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1034, CHEM 1044, or CHEM 1954) and (CHEM 2201 (may be taken concurrently), CHEM 2211 (may be taken concurrently), or CHEM 2921 (may be taken concurrently))

CHEM 2924. Organic Honors Laboratory II. 1 Credit Hour.

This course is typically offered in Spring.

Advanced organic chemical laboratory techniques, including spectroscopy and chromatography. Hands-on approach with individualized demonstration and instruction. NOTE: This course can be used to satisfy the university Core Science & Technology Second Level (SB) requirement.

Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR.

Course Attributes: HO, SB

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2203, CHEM 2213, or CHEM 2923) and (CHEM 2202 (may be taken concurrently), CHEM 2212 (may be taken concurrently), or CHEM 2922 (may be taken concurrently))

CHEM 3001. Inorganic Chemistry. 3 Credit Hours.

Structure and bonding of inorganic compounds. Introduction to symmetry and group theory. Nomenclature. Descriptive chemistry of the main group elements. Introduction to transition metal chemistry and solid state materials. Mode: Three hours lecture and one hour recitation per week.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2201, CHEM 2211, or CHEM 2921)

CHEM 3091. Research Methods. 3 Credit Hours.

This course is typically offered in Spring.

Research Methods is required for all of the TUteach with Teaching majors. It is one of several content courses specially designed to meet the needs of future teachers. Sections meet two hours per week for non-traditional, interactive lectures and two hours per week for lab. The course is cross-listed in Biology, Chemistry, Earth and Environmental Science, and Physics. The goals of the course are (1) to provide students with the tools that scientists use to solve scientific problems; (2) to give students the opportunity to use these tools in a laboratory setting; (3) to make students aware of how scientists communicate with each other through peer-reviewed scientific literature; and (4) to enable students to understand how scientists develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in conventional science classes. Students design and carry out four independent inquiries, which they write up and present in the manner that is common in the scientific community. The inquiries incorporate mathematics and the various science disciplines, thus the team of instructors teaching this course have expertise in different disciplines and are available to supervise all students as they work on their inquiries in the lab. The combination of Research Methods and the TUteach course "Perspectives on Science and Mathematics" (Philosophy 2196) provides prospective science and mathematics teachers with an in-depth understanding of how the scientific enterprise works. NOTE: Chemistry 3091 is only available for major credit in the Chemistry with Teaching BS program.

College Restrictions: Must be enrolled in one of the following Colleges: Science & Technology.

Repeatability: This course may be repeated for additional credit.

Pre-requisites: Minimum grade of C- in (SCTC 1289 or SCTC 1389)

CHEM 3103. Techniques of Chemical Measurement I. 3 Credit Hours.

This course is typically offered in Fall, Spring, and Summer I.

Introduction to the theory of instrumental analytical methods, with particular emphasis on equilibria and acid-base techniques. Application of statistics and error analysis to the design and execution of experiments, and writing and presenting scientific reports and papers. NOTE: Enrollment limited to students with declared majors in chemistry, biochemistry, or environmental science.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032 or CHEM 1952), (CHEM 1034 or CHEM 1954), and (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, 'Y' in CRMA10, or 'Y' in CRMA11)

CHEM 3105. Introduction to Chemical Research Techniques. 1 Credit Hour.

This course is typically offered in Fall, Spring, and Summer I.

Introduction to the application of instrumental analytical methods, with particular emphasis on equilibria and acid-base techniques. Written scientific reports will require a quantitative analysis of collected data, including statistics and error analyses. NOTE: Enrollment limited to students with declared concentration in chemistry or biochemistry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032 or CHEM 1952), (CHEM 1034 or CHEM 1954), (MATH 1042, MATH 1044, MATH 1942, MATH 1951, any MATH course numbered 2043 to 3080 (may be taken concurrently), 'Y' in MA07, 'Y' in MATW, 'Y' in CRMA09, 'Y' in CRMA10, or 'Y' in CRMA11), and CHEM 3103 (may be taken concurrently)

CHEM 3301. Physical Chemistry Lecture I. 3 Credit Hours.

This course is typically offered in Fall and Spring.

Chemistry 3301 (0231) provides the foundation essential for most higher-level work in chemistry. Topics covered include thermodynamics, phase equilibria, chemical equilibria, kinetic theory of gases, chemical kinetics, and equilibrium electrochemistry.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032, CHEM 1042, or CHEM 1952), (MATH 2043 (may be taken concurrently), any MATH course numbered 3043 to 3044 (may be taken concurrently), any MATH course numbered 3137 to 3142 (may be taken concurrently), or any MATH course numbered 4051 to 4063 (may be taken concurrently)), and (PHYS 1062 (may be taken concurrently), PHYS 2022 (may be taken concurrently), PHYS 2922 (may be taken concurrently), any PHYS course numbered 2101 to 2701 (may be taken concurrently), any PHYS course numbered 3101 to 3701 (may be taken concurrently), or any PHYS course numbered 4101 to 4796 (may be taken concurrently))

CHEM 3302. Physical Chemistry Lecture II. 3 Credit Hours.

This course is typically offered in Fall and Spring.

An introduction to quantum mechanics and spectroscopy. NOTE: Although it is recommended that physical chemistry courses be taken in sequence [i.e., 3301 (0231) followed by 3302 (0232)], this course may be taken prior to Chemistry 3301 (0231).

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 1032, CHEM 1042, or CHEM 1952), (MATH 2043 (may be taken concurrently), any MATH course numbered 3043 to 3044 (may be taken concurrently), any MATH course numbered 3137 to 3142 (may be taken concurrently), or any MATH course numbered 4051 to 4063 (may be taken concurrently)), and (PHYS 1062 (may be taken concurrently), PHYS 2022 (may be taken concurrently), PHYS 2922 (may be taken concurrently), any PHYS course numbered 2101 to 2701 (may be taken concurrently), any PHYS course numbered 3101 to 3701 (may be taken concurrently), or any PHYS course numbered 4101 to 4796 (may be taken concurrently))

CHEM 3303. Physical Chemistry Laboratory I. 2 Credit Hours.

This course is typically offered in Fall and Spring.

A laboratory-based exploration of the fundamental physical and chemical principles involved in thermodynamics, chemical equilibria, colligative properties, and electrochemistry. The material complements topics covered in CHEM 3301. Special emphasis is placed on physical measurements followed by computer-aided analysis of data and errors.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in CHEM 3103, CHEM 3105, and CHEM 3301.

CHEM 3397. Physical Chemistry Laboratory I. 2 Credit Hours.

This course is typically offered in Fall and Spring.

A laboratory-based exploration of the fundamental physical and chemical principles involved in thermodynamics, chemical equilibria, colligative properties, and electrochemistry. The material complements topics covered in CHEM 3301. Special emphasis is placed on physical measurements followed by computer-aided analysis of data and errors. This writing-intensive course gives the student experience in generating technical reports as preparation for a professional career in Chemistry. NOTE: Capstone writing course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 3103, CHEM 3105, and CHEM 3301)

CHEM 3398. Physical Chemistry Laboratory II. 2 Credit Hours.

This course is typically offered in Fall and Spring.

A laboratory-based exploration of the fundamental physical and chemical principles involved in quantum mechanics, spectroscopy, and chemical kinetics. The material complements topics covered in CHEM 3302. Special emphasis is placed on physical measurements followed by computer-aided analysis of data and errors. This writing-intensive course gives the student experience in generating technical reports as preparation for a professional career in Chemistry. NOTE: Capstone writing course.

Course Attributes: WI

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 3103, CHEM 3105, and CHEM 3302)

CHEM 3401. Applications of Biochemistry. 3 Credit Hours.

This course provides a comprehensive introduction to biochemical concepts with an emphasis on application and relevance to health and medicine. Topics in the course will provide a strong background and foundation for students interested in pre-professional health programs. This course will satisfy the biochemistry requirement for the American Chemical Society certified degree in chemistry. Biochemistry majors must take CHEM 4401 instead of this course.

Repeatability: This course may not be repeated for additional credits.

Pre-requisites: Minimum grade of C- in (CHEM 2202, CHEM 2212, or CHEM 2922)

CHEM 3405. Physical Chemistry of Biomolecules. 3 Credit Hours.
