

NATIONAL DEFENSE BUDGET ESTIMATES FOR FY 2022

**OFFICE OF THE UNDER SECRETARY OF DEFENSE
(COMPTROLLER)
AUGUST 2021**

This Page Intentionally Left Blank

The estimated cost of this report or study for the Department of Defense is approximately \$10,000 for the 2021 Fiscal Year. This includes \$700 in expenses and \$9,510 in DoD labor.

Overview - National Defense Budget Estimates for Fiscal Year (FY) 2022

The National Defense Budget Estimates, commonly referred to as “The Green Book,” is a reference source for data associated with the current budget estimates of the Department of Defense (DoD). It provides current (nominal) and constant (real) dollar historical data for the Department, as well as selected data on all National Defense, the total federal budget, and the U.S. economy. This edition reflects the FY 2022 President’s Budget as submitted to the Congress by President Biden.

The Green Book may be used as a companion to the Budget Request Summary Justification Book. However, while the Justification Book speaks mainly to the Department’s budgetary request in terms of discretionary budget authority, most tables in the Green Book display combined discretionary and mandatory funding. The difference between discretionary and mandatory is discussed later, and can also be found in the Glossary of Terms at the end of the book.

Also to follow is a short guide to understanding the data presented in this document. There is an explanation of budget authority vs. total obligational authority, along with outlays. Next is a section on discretionary, mandatory and emergency funding. Current vs. constant dollars, a mainstay of inflationary analysis, is then defined, followed by an explanation of deflators. Finally, there is a discussion of calculation methodologies and how rounding and differences in scoring cause disparities between DoD reporting and that of the Office of Management and Budget (OMB).

Budget Authority, Total Obligational Authority and Outlays

Green Book funding data are provided in three standard categories: (1) budget authority (BA) – discretionary and mandatory authority are combined in most tables; (2) total obligational authority (TOA);

Department of Defense Discretionary Budget Authority

(Dollars in Billions)

NOTE: The FY 2022 President’s Budget request includes \$42.1 billion for Direct War and Enduring Operations in the base request.

and (3) outlays. While Department analysts may distinguish between BA and TOA, BA is what the general public tends to recognize as funding appropriated by Congress. It is the authority to legally incur binding obligations (signing contracts and placing orders), which will result in current-year and future outlays.

On the other hand, TOA is a DoD financial term expressing the value of the direct Defense program for a given fiscal year, exclusive of the obligation authority from other sources (such as reimbursable orders accepted). Here are some more differences between BA and TOA:

- If BA expires before obligations are incurred, the TOA for that year is reduced by the expired amount. There is no effect on BA.
- If legislation (proposed or enacted) transfers the unobligated balance of one account to another, where the purpose of the balance has changed, scoring rules require the transfer to be reflected as a change in BA in the year in which the transfer occurred (reduction of BA in the losing account, increase of BA in the gaining account). The adjustment to TOA will be in the original program, regardless of when the transaction occurred.
- Reappropriations (the extension of availability of previously appropriated funds) are scored as BA in the first year of extended availability, while TOA is unchanged.
- Rescissions (congressional action canceling new BA or unobligated balances) are reflected as a reduction to BA in the fiscal year in which the rescission is enacted. However, TOA reflects this adjustment in the program year of the rescinded funds (i.e., the fiscal year in which the funds were originally appropriated). If rescissions are proposed in the budget, they would be reflected in the TOA as if enacted.
- Net offsetting receipts (collections from the public that arise out of business-type or market-oriented activities of the federal government, and are deposited in receipt accounts) are deducted from BA, but have no effect on TOA.

The third category of data reflected in this book is outlays, also known as expenditures or disbursements. Outlays are the liquidation of the federal government’s obligations and generally represent cash payments. Outlays in a given fiscal year may represent the liquidation of obligations incurred over a number of years. There is a time lag between budgeting funds (congressional appropriation), signing contracts and placing orders (obligations), receiving goods or services, and making payments (liquidation of obligations).

For acquisition and construction programs, the Department operates under a “full funding” policy by which Congress approves, in the year of the request, sufficient funds to complete a given quantity of items or build a facility, even though it may take a number of years to actually build and deliver these items. Thus, in exceptional cases (such as the building of an aircraft carrier), final outlays may be recorded a decade after the BA for the program was originally granted.

Discretionary, Mandatory, and Emergency Programs

Discretionary programs are funded annually through the congressional appropriations process. The scorekeeping guidelines of the Budget Enforcement Act (BEA) establish annual limits on the amount of BA available for these programs.

Adjustments to discretionary spending limits are provided for spending that is designated by both Congress and the President as emergency requirements, or for supplemental war funding – on an account-by-account basis.

Mandatory programs, also known as “pay-as-you-go” or PAYGO programs, are direct spending programs and receipts defined as entitlement authority. This is BA authorized by permanent law, rather than annual appropriations acts. Social Security and Medicare are examples of mandatory programs. Military retirement and Medicare-Eligible Retiree Health Fund Contribution accounts are examples of DoD-specific mandatory programs. The Pay-As-You-Go Act of 2010 establishes the current guidelines for scorekeeping of mandatory programs.

The Department of Defense is unique in that it is one of the few federal entities where the majority of its funding falls into the discretionary category. The majority of the entire federal budget is mandatory, and much of the discretionary funding in the budget is comprised of DoD dollars.

Current Dollars and Constant Dollars

The Green Book displays funding in both current and constant dollars. If an item or service is priced in current dollars, the price includes all inflationary changes expected to occur in the program over the duration of the spendout of that program's appropriation.

Constant dollars measure the value of purchased goods and services at price levels that are the same as the base year level. Constant dollars do not contain any adjustments for inflation that have occurred outside the base year. Thus, by looking at funding across various years in constant dollars, the only changes a person will see are programmatic (referred to as "real" change). This will show how much spending has changed for a program, without the impact of inflation.

Through understanding current and constant dollars, variations in purchasing power become more evident. If one dollar buys one widget in 2010, but in 1950 one dollar purchased five widgets, purchasing power has declined. A current-dollar analysis shows DoD spending much more now than it did in 1950, but a constant-dollar analysis reveals that the percentage of program growth (its "real growth") is not as great as the overall nominal growth.

It is important to note that many inflation indices, such as the Gross Domestic Product (GDP) index, are chain-weighted. This means they account for differences in products purchased over the years; new expenditure patterns are accounted for in the inflation figure. For example, if typewriters were regularly purchased in 1970, but by 2000 had become obsolete in favor of PCs, a chain-weighted index would account for this new purchasing pattern.

Deflators

Deflators are a way to measure broad price movements in the economy. The deflator in the base year equals 100, and in the Green Book the default base year is the budget request year – FY 2022 in

this edition (except for Chapter 7, where the base year used by OMB – FY 2012 – is applied). An item that has a deflator of 50.00 has a current dollar value that is half of what you would need to purchase the same item in FY 2022. An item that has a deflator of 200.00 has a current dollar value that is twice what you would need to purchase the same item in FY 2022.

Formula for calculating a deflator when you have the current and constant dollar values:

$$\text{Deflator} = \frac{\text{Current \$}}{\text{Constant \$}} \times 100$$

Converting current dollars to constant dollars:

$$\text{Constant \$} = \frac{\text{Current \$}}{\text{Deflator}} \times 100$$

Example: Converting FY 2004 total DoD budget authority to FY 2022 constant dollars:

FY 2004 deflator = 69.07

FY 2004 budget authority (current \$) = \$471,011 million

FY 2004 budget authority in FY 2022 constant dollars:

$$\frac{\$471,011\text{M}}{69.07} \times 100 = \$681.9 \text{ billion FY 2022 constant dollars}$$

Calculation Methodology and Rounding

DoD uses inflation rates provided by OMB as a baseline. OMB bases their rates on Gross Domestic Product (GDP) composite rates. DoD includes military and civilian pay raise rates, fuel rates, and

medical factors in its composite rates. In addition, outlay rates for each appropriation account are factored into the final DoD inflation rates.

There are some discrepancies between the funding totals shown in this book and those in OMB publications. These differences result from the way account totals are calculated and scored. For example, beginning with the FY 1998 budget, OMB worked with data that had been rounded to the millions of dollars, while DoD

data were derived from numbers rounded to the thousands.

Further, OMB and DoD sometimes differ in how they report items like contract authority and transfers to other federal agencies (i.e. the Coast Guard), which impacts the total dollars reported. In those instances where a discrepancy exists, a delta is displayed as “scoring and rounding.” Finally, in some tables, small differences between the totals shown and the actual sum of the column or row entries are possible. These discrepancies are also due to rounding.

Chapter 1: National Defense – An Overview

This chapter provides an overview of the National Defense function of the federal budget. The National Defense function (function 050) is comprised of: DoD Military activities (subfunction 051), Atomic Energy Defense Activities

(subfunction 053), and Defense-Related Activities of other federal agencies (subfunction 054). Dollar amounts are provided as BA, TOA or outlays.

1. FY 2020 amounts include war and supplemental funding. For the FY 2022 President's Budget request, war funding was included in the base budget.

2. DoD is reporting funding transactions for Other Trust Fund accounts that OMB is not: \$15M in FY 2020, \$4M in FY 2022. Funding transactions OMB is reporting that DoD is not: Working Capital Fund, DCSA: \$37M in FY 2020; Host Nation Support Fund for Relocation: \$22M in FY 2020, \$23M in FY 2022; National Defense Stockpile Transaction Fund: -\$14M in FY 2021, -\$14M in FY 2022; \$9M in FY 2022 belonging to a Department of Homeland Security account temporarily recorded in the Department of Defense budget subfunction.

3. From OMB Historical Table 5.1 (Budget Authority by Function and Subfunction) and Analytical Perspectives Table 20-1 (Net Budget Authority and Outlays By Function, Category, and Program).

1. Includes war and supplemental funding. In the past, outlays for war funding would have been broken out separately in the budget year (FY 2022). However, for the FY 2022 President's Budget request, war funding was included in the base budget.

2. Base outlays for FY 2021 include outlays from previous years' base, war, and supplemental funding.

3. The FY 2021 war column reflects estimated outlays from that year's war funding only.

4. In FY 2021, DoD is reporting \$47M in DoD Closed Accounts that OMB is not.

5. From OMB Analytical Perspectives Table 20-1 (Net Budget Authority and Outlays By Function, Category, and Program).

Chapter 2: Base Budget, War Funding and Supplementals

This chapter provides data on war and supplemental funding for the Department of Defense since FY 2001, in addition to the base budget. War and supplemental numbers presented here include the American Recovery and Reinvestment Act of 2009, disaster

assistance, the Global War on Terror, Overseas Contingency Operations, Direct War costs, Enduring Cost requirements, and funding for other emergency and unanticipated requirements.

Chapter 3: Legislative Authorization

Authorization legislation provides the authority for an agency to carry out a particular activity. This legislation may be annual, for a specified number of years, or indefinite. Most National Defense activities require annual authorization. Table 3-1 provides a

reconciliation between the FY 2022 DoD authorization request, appropriation request, budget authority, and TOA. Table 3-2 presents military personnel end strength authorization data.

Tables	Page

Endnotes

NOTE: Direct War (\$14.3 billion) and Enduring Cost funding (\$27.8 billion) was submitted in the base budget request.

1. The Medicare-Eligible Retiree Health Fund Contribution accounts are not part of the annual authorization request.
2. Military construction and family housing authorization and appropriation request levels differ due to variances in funding phases. For example, a project may have been authorized in a previous year, but an appropriation might be required in a subsequent year to continue funding on that project.
3. Mandatory budget authority that is not reported in the TOA, as well as funding transfers only reported in budget authority. RDT&E now includes the "Prepare Americans for Future Pandemics" account in budget authority only.
4. Differences in the way transfers to other agencies are reported.

Chapter 4: Chronology

Chronologies are important because of the scorekeeping provisions of the Congressional Budget and Impoundment Act. Table 4-1 provides a chronology of FY 2020 National Defense budget authority, beginning with the FY 2020 budget request submitted to Congress. Then the table shows congressional action resulting in the FY 2020 column of the FY 2021 budget submitted to Congress. Finally, further appropriations, rescissions, transfers and other

adjustments are shown, resulting in the FY 2020 column of the FY 2022 budget request submitted to Congress. Similarly, Table 4-2 provides a chronology of FY 2021 National Defense budget authority, beginning with the FY 2021 budget request submitted to Congress, and ends with the FY 2021 column of the FY 2022 budget request.

Chapter 5: Treatment of Inflation

Inflation is change in the general level of prices in the economy. Prices do not always rise or change evenly. Some prices may be constant, and others may be falling. Prices of some commodities rise faster than others due to differences in the magnitude and direction of changes in supply and demand in various markets. Chapter 5 provides the standard economic factors for calculating the effects of changes in prices. The constant dollars in this book come from applying the inflation indices in this chapter to DoD current dollars. The Department's outlay deflators for non-pay, non-fuel purchases (as seen in Tables 5-8 and 5-9) are provided by OMB. They are based on the Gross Domestic Product inflation index, and medical prices in the Consumer Price Index for All

Urban Consumers (CPI-U, Medical). Table 5-11 contains outlay rates used in developing outyear inflation factors, for estimating future costs of non-pay, non-fuel Defense purchases. (These rates do not account for any lapses in accounts.) Deflators for non-pay, non-fuel budget authority and TOA (Tables 5-4 through 5-7) are created by applying these purchases outlay rates (Table 5-11) to the outlay deflators published in Tables 5-8 and 5-9; weighted by the respective Defense BA and TOA dollars. For fuel, historical inflation rates are based on the change in the cost per barrel paid by the customer to the stock fund. To see that inflation profiles are often revised many times before becoming actual, Table 5-10 displays the chronology of selected profiles.

1. Civilian pay raise for General Schedule employees.

2. Reflects the average of both across-the-board and targeted pay raise rates.

3. Excludes selected targeted increases for certain warrant officers and mid-grade/senior enlisted personnel.

Chapter 6: TOA, BA, Outlay Trends and Program Changes

Tables in this chapter provide data series that are useful in analyzing historical trends in Defense spending. Data elements include Defense BA, TOA and outlays, in both current and constant dollars, by public law title, functional category, and military department. Defense-Wide totals include all items that are not specific to any military service, and include Retired Pay,

Defense (until FY 1984); Contingencies, Defense; Claims, Defense; and all costs associated with the activities of the various Defense agencies. Family housing costs were allocated to the military departments beginning in FY 1983, and in FY 1985, the military retired pay costs were budgeted by the Services in their military personnel accounts.

Tables		Page
6-1	DoD TOA by Public Law Title (FY 1948 to FY 2022).....	84
6-2	DoD TOA by Category (FY 1948 to FY 2022).....	91
6-3	DoD TOA by Military Department (FY 1948 to FY 2022).....	98
6-4	DoD TOA by Major Force Program – Current Dollars (FY 1962 to FY 2022).....	105
6-5	DoD TOA by Major Force Program – Constant Dollars (FY 1962 to FY 2022).....	107
6-6	DoD TOA, BA, and Outlays by Appropriation Account – Current Dollars (FY 2020 to FY 2022).....	109
6-7	DoD TOA, BA, and Outlays by Appropriation Account – Constant Dollars (FY 2020 to FY 2022).....	116

Chapter 7: Defense, the Public Sector and the Economy

For context, the Defense data presented earlier should be considered in light of the broader macroeconomic picture of the United States. This chapter organizes a compilation of relevant U.S.-wide economic data, including GDP, employment figures, and historic federal spending. Where federal outlays are provided

dollars, the base year is FY 2012; consistent with the base year used by OMB. Table 7-7 is a master percentage table showing DoD and National Defense spending as a percentage of various economic and budgetary aggregates.

Tables	Page
7-1 Total Federal Outlays – Current Dollars (FY 1945 to FY 2022).....	246
7-2 Total Federal Outlays – FY 2012 Constant Dollars (FY 1945 to FY 2022).....	249
7-3 U.S. Public Spending: Federal, State, Local and GDP – Current Dollars (FY 1945 to FY 2022).....	252
7-4 U.S. Public Spending: Federal, State, Local and GDP – FY 2012 Constant Dollars (FY 1945 to FY 2022).....	255
7-5 Department of Defense Manpower – End Strength/FTE's (FY 1940 to FY 2022).....	258
7-6 U.S. Labor Force – End Strength/FTE's (FY 1940 to FY 2022).....	261
7-7 Defense Shares of Economic and Budgetary Aggregates (FY 1940 to FY 2022).....	264

1. From OMB Historical Table 6.1 (Composition of Outlays).

2. From past and present Economic Reports of the President (table titled "State and Local Government Revenues and Expenditures"). Data were estimated for certain years prior to 1964, and estimated for each year 2019 and beyond.

3. From OMB Historical Table 12.1 (Summary Comparison of Total Outlays for Grants to State and Local Governments).

4. Calculated from data in OMB Historical Tables 6.1 and 12.1, and past Economic Reports of the President (table titled "State and Local Government Revenues and Expenditures").

5. From OMB Historical Table 10.1 (Gross Domestic Product and Deflators Used in the Historical Tables).

NOTE: These figures exclude government enterprises (i.e. postal service, utilities and liquor stores), except for any support these activities receive from tax funds.

1. From OMB Historical Table 6.1 (Composition of Outlays).

2. Calculated from data in past and present Economic Reports of the President (table titled "State and Local Government Revenues and Expenditures"). Data were estimated for certain years prior to 1964, and estimated for each year 2019 and beyond.

3. From OMB Historical Table 12.1 (Summary Comparison of Total Outlays for Grants to State and Local Governments).

4. Calculated from data in OMB Historical Tables 6.1 and 12.1, and past Economic Reports of the President (table titled "State and Local Government Revenues and Expenditures").

5. Calculated from data in OMB Historical Table 10.1 (Gross Domestic Product and Deflators Used in the Historical Tables).

NOTE: These figures exclude government enterprises (i.e. postal service, utilities and liquor stores), except for any support these activities receive from tax funds. FY 2012 is the constant dollar base year used by OMB.

1. Active duty military figures include the activation of 25,652 reservists and National Guard personnel in FY 1990, pursuant to section 673b, Title 10 U.S.C.; in FY 1991, 17,059 reservists and National Guard personnel; and in FY 1992, 954 reservists and National Guard personnel, pursuant to sections 672 and 673, Title 10 U.S.C., in support of Operations Desert Shield/Desert Storm.

2. Beginning in 1953, civilian work force figures include both U.S. and foreign national direct hires, and the foreign national indirect hire employees that support U.S. forces overseas. Personnel funded from a non-DoD Foreign Military Sales trust fund are included as well. Beginning in FY 1996, the federal civilian work force is measured in full time equivalents (FTE's).

3. Navy reserve personnel on active duty for Training and Administration of Reserves (TARS) are included in the active Navy data prior to FY 1980, and in the Full-Time Guard and Reserve data thereafter.

4. Army civilian FTEs include Chemical Agents and Munitions Destruction, Defense account data. Air Force civil service employment is included in the Army data prior to 1948, and identified separately thereafter.

5. Defense Agency civilian FTEs do not include Chemical Agents and Munitions Destruction, Defense account data.

6. Reflects enacted amounts.

NOTE: All war and supplemental data are included.

2022	1,439	786	2,225	2,097	2,883	43	4,365						

1. Includes full-time Guard and Reserve end strength. FY 2021 reflects enacted amounts. Also includes the activation of 25,652 reservists and National Guard personnel in FY 1990, pursuant to section 673b, Title 10 U.S.C.; in FY 1991, 17,059 reservists and National Guard personnel; and in FY 1992, 954 reservists and National Guard personnel, pursuant to sections 672 and 673, Title 10 U.S.C., in support of Operations Desert Shield/Desert Storm.

2. Comprised of both U.S. and foreign national civilian direct hires. Foreign national indirect hire civilian employees that support DoD forces overseas are not included, nor are personnel funded from a non-DoD Foreign Military Sales trust fund.

3. From OMB Analytical Perspectives chapter titled, "Strengthening the Federal Workforce," Table 5-2 (Total Federal Employment).

4. From past and present Economic Reports of the President (table titled, "Employees on Nonagricultural Payrolls, by Major Industry").

5. From past and present Economic Reports of the President (table titled, "Civilian Labor Force").

NOTES:

All war and supplemental data are included.

Beginning in FY 1996, the federal civilian work force is measured in full time equivalents (FTE's).

Beginning in FY 2001, some labor force and unemployment data are not strictly compatible with earlier data, due to population adjustments and other changes.

Certain non-Defense employment data were not available past 2020.

NOTES:

All fiscal years 2007 and prior include war and supplemental funding. For the FY 2022 President's Budget request, war funding was included in the base budget. Therefore, the FY 2022 line is not broken out separately.

Beginning in FY 2001, some labor force data are not strictly compatible with earlier data, due to population adjustments and other changes.

These figures are calculated from data in the OMB Historical Tables, past and present Economic Reports of the President, U.S. Census Bureau data, and data from the Bureau of Labor Statistics. Certain non-Defense data were not available past 2020.

GLOSSARY OF TERMS

Aggregate Price	Weighted average of individual prices, where each price is weighted by an item's contribution to total expenditures. The aggregate price is thus a notional price developed to measure changes in inflation and is greatly affected by the relative mix of the items considered, and the change of that mix over time.
Annual Rate of Change in Prices	Measures the year-to-year change in prices, computed by dividing one year's aggregate price by the preceding year's aggregate price, and subtracting one.
Base Year	A point of reference representing a fixed price level, and is expressed as 1.00 or 100.00. The base year for a set of indexed numbers can be changed to another year by dividing each number in the series by the index for the desired base year.
Budget Authority (BA)	The authority to incur legally binding obligations of the federal government which will result in immediate or future outlays. Most Defense BA is provided by Congress in the form of enacted appropriations.
Constant Dollars	Measure of the value of purchased goods and services at price levels which are the same as the base year. Constant dollars do not contain any adjustments for inflationary changes that have occurred, or are forecast to occur, outside of the base year.
Current Dollars	Items or services are priced in current dollars if the dollars contain all inflationary changes expected to occur over the duration of their spendout. Current dollars are also called "then-year" dollars, "nominal" dollars, "budget" dollars or "fully inflated" dollars.
Discretionary Programs	Funded annually through the appropriations process. The Budget Enforcement Act (BEA) establishes annual limits or "caps" on the amount of BA available for these programs.
Gross Domestic Product (GDP)	Measures the market value of all goods and services produced during a particular time period by individuals, businesses, and governments WITHIN the United States, whether the citizens or businesses are American or foreign. It includes income earned on U.S. soil by foreign-owned corporations and foreign citizens, but excludes income earned abroad by U.S.-owned corporations and U.S. citizens. Since GDP refers to production taking place in the U.S., it is considered the appropriate measure for much of the short-term monitoring and analysis of the U.S. economy.
Index	A component of a time series, which measures the change in prices from a fixed point in time, and is calculated by setting the base year equal to one, and then multiplying the index value of each year by one plus the annual rate of change of the next year.

GLOSSARY OF TERMS (Continued)

Inflation

The changes in the levels of prices in the economy. Inflation does not mean that prices rise evenly or that all prices are rising. Some prices may be constant and others may be falling. Prices of some commodities rise faster than others because of differences in the magnitude and direction of changes in supply and demand in various markets. There are many different measures of inflation:

- (1) GDP Implicit Price Deflator – Generally regarded as the best single measure of broad price movements in the economy.
- (2) Consumer Price Index (CPI) – A measure of the average change over time in the prices paid by urban consumers for a fixed market basket of consumer goods and services. Although it is often called the “Cost-of-Living Index,” it measures only price changes, just one of several factors affecting living costs. The CPI reflects spending patterns for each of two population groups: All Urban Consumers (CPI-U), representing a majority of the U.S. population, and Urban Wage Earners and Clerical Workers (CPI-W), which are a subset of the CPI-U’s population. The CPI-U (Medical) index provides the average change in prices for medical care.
- (3) DoD Purchase Index – Developed by the Office of the Under Secretary of Defense (Comptroller) (OUSD (C)); consists of outyear projections based on fiscal guidance from the Office of Management and Budget (OMB), linked to actual DoD purchase price experience (calculated by the OUSD (C)).

Mandatory Programs

Also known as “pay-as-you-go” or PAYGO programs; are direct spending programs and receipts defined as entitlement authority. This is BA authorized by permanent law, rather than annual appropriations acts.

National Defense

The National Defense budget function (function 050) is comprised of: DoD Military (subfunction 051); Atomic Energy Defense Activities (subfunction 053); and Defense-Related Activities (of other federal agencies) (subfunction 054). This category of the federal budget is interpreted as activities pertaining to the nation’s defense, even outside of DoD activities.

Outlays

Also known as expenditures or disbursements; are the liquidation of the federal government’s obligations. Outlays generally represent cash payments, and may also represent the liquidation of obligations incurred over a number of years. For major acquisition and construction programs, the Department operates under a “full funding” policy by which Congress approves, in the year of the request, sufficient funds to complete a given quantity of items, even though it may take a number of years to actually build and deliver these items. Thus, in extreme cases (such as building an aircraft carrier), final outlays may be recorded a decade after the budget authority for the program is approved.

GLOSSARY OF TERMS (Continued)

Real Growth

Also known as program growth; is the amount of growth that does not come from inflation. It is year-to-year growth in constant dollars – usually expressed as a percentage, and is computed by dividing the constant dollars for one year by the constant dollars of the previous year, and subtracting one. Real growth always implies a relationship between two or more time periods.

Total Obligational Authority (TOA)

A DoD financial term expressing the value of the direct Defense program for a fiscal year. The TOA differs from the BA in several ways, including:

- (1) BA lapsing before obligations were incurred (decreases TOA with no effect on BA).
- (2) Proposed or enacted legislation transferring unobligated balances for which the purpose of the funding has changed. Scoring rules require that such a transfer be reflected as a change in BA in the year in which the transfer occurs (reduction of BA in the losing account; increase in BA in the gaining account). The TOA is adjusted in the original program, regardless of when the transaction occurs.
- (3) Reappropriations (the extension of availability of previously appropriated funds). Reappropriations are scored as BA in the first year of extended availability. The TOA is unchanged.
- (4) Rescissions (congressional action canceling new budget authority or unobligated balances). Scoring rules require that rescissions be scored as reductions in budget authority in the fiscal year in which the rescissions are enacted. The TOA is adjusted in the program year of the rescinded funds. If rescissions are proposed in the budget, they would be reflected as if enacted.
- (5) Net Offsetting Receipts (collections from the public that arise out of the business-type or market-oriented activities of the federal government and are deposited in receipt accounts). Net offsetting receipts are deducted from BA but have no effect on TOA.

This Page Intentionally Left Blank

NOTES

Civilian Pay

The composition of civilian pay as displayed and used for calculating the figures in this book changes over the fiscal years. Originally, the civilian pay figures consisted of everything: funding for all U.S. hires, foreign hires, direct and reimbursably-funded hires, and all personnel benefits. This is the case for the historical data, up through FY 2010.

The figures for FY 2011 and later are intended to represent the civilian pay dollars to which the civilian pay raise rates are applied. This excludes all foreign hire funding, civilian retirement benefits, and a small portion of other personnel benefits.

However, one exception to the above-mentioned parameters can be found in **Table 6-14**, “Department of Defense Civilian Pay” (and the corresponding **Table 6-15**, “Department of Defense Civilian Pay” – in constant dollars). For 2011 onward, these tables are designed to match all civilian pay reported in the Department’s OP-8 exhibit, “Total Civilian Personnel Costs,” as part of the annual submission of Defense budget justification material to Congress.

Gross National Product & Gross Domestic Product

In December 1991, U.S. National Income and Product Accounts (NIPAs) shifted emphasis from the Gross National Product (GNP) to the Gross Domestic Product (GDP). Both GNP and GDP measure output at market prices, but in a slightly different manner. The distinction between GNP and GDP is not very great for the United States because relatively few U.S. citizens work abroad, and U.S. earnings on foreign investments are about the same as foreign earnings within the United States.

Changes in Account Structure

In FY 1992 and FY 1993, funds were appropriated in Defense accounts supporting domestic, rather than defense, programs. Using the rules and definitions of the Budget Enforcement Act, the Office of Management and Budget (OMB) scored these appropriations in the correct domestic functions rather than in the DoD Military subfunction (051). Data in this book display the total DoD budget request and include these amounts.

Changes in Scorekeeping

Rescissions: Before the amended FY 1989 budget was submitted, rescissions of prior year unobligated balances were reflected as adjustments only against TOA in the applicable program year. However, since then, both the Congressional Budget Office (CBO) and OMB score such rescissions as reductions to current year BA with one large exception. Fifteen billion dollars were appropriated for the Persian Gulf Regional Defense Fund in FY 1991. Only \$304 million was transferred to other defense accounts to offset Operation Desert Storm costs. The balance of \$14.696 billion was rescinded, and FY 1991 BA was reduced rather than reducing BA in the current year.

NOTES (Continued)

Changes in Scorekeeping (Cont.)

Reappropriations were previously scored as new BA in the year of legislation. However, in presenting the amended FY 1989 budget, the CBO and OMB directed scoring of reappropriations as BA in the first year of new availability (first year after original availability would lapse).

Retired Pay/Accrual

In accrual-based financing, transactions are counted when the order is made or a service takes place, even if no cash has changed hands yet. Cash-based financing recognizes transactions only when cash is actually received or paid. For FY 1985, the OMB Historical Tables moved National Defense BA and outlays for the actual Military Retired Pay accounts (which were cash-based) from the DoD Military subfunction (051) to the Income Security function (600), and replaced it with an estimate for Military Retired Pay Accrual. So for FY 1948 through FY 1984, the DoD BA and outlay tables in this book reflect military retired pay on a CASH basis. After FY 1984, the BA and outlays reflect only the ACCRUAL cost of military retirement.

The FY 2003 budget shifted the costs of civilian and military health care from central accounts to which they had been charged, to the affected program accounts as accruals. For comparability, OMB included imputed amounts for these shifts in their FY 2001 and FY 2002 data for the DoD Military subfunction (051). This book does not include the accrual costs of those transfers.
