

Who are we?

EASE welcomes members from every corner of the world. They can be found in 50 countries – from Australia to Venezuela by way of China, Russia and many more.

EASE members are involved in many disciplines and roles including commissioning editors, editors-in-chief, academics, translators, publishers, indexers, statistical editors, science and technical writers, authors' editors, journalists, corporate communicators, copyeditors and proofreaders.

The EASE mission is to improve the global standard and quality of science editing by promoting the value of science editors and supporting professional development, research and collaboration. The three strategic pillars around which we focus our activities are as follows:

- Improve global standards
- Raise the profile of science editors
- Support professional development

EASE Communities

EASE's collaboration with sister organisations includes discounts on EASE membership and EASE events, fringe events, joint meetings and joint training activities.

EASE networking opportunities include our lively discussion forum ListServ, and our social media outlets, Facebook, Twitter and LinkedIn and an EASE Blog.

EASE topic communities include committees on Peer Review and Gender Policy, which conduct research and disseminate best practice in these fields.

EASE Regional Chapters facilitate interaction among editors within countries or groups of countries. Activities include formal seminars and workshops, as well as an informal social exchange of ideas.

Association of
Science
Editors**

EASE

The European Association of Science Editors (EASE) is an international community of editors from diverse backgrounds, linguistic traditions and professional experience who share an interest in science communication and editing.

EASE President and ESE Editor in conversation at the EC/EASE Joint Discussion Forum, Brussels

EASE Publications

- EASE's open access journal, *European Science Editing*, publishes articles covering all aspects of scientific editing and publishing. It is indexed in Scopus and a full archive is held on the ESE website.
- *EASE Digest* is the member magazine, including abstracts from the journal, book and website reviews, information and opinion pieces.
- The *Guidelines for Authors and Translators of Scientific Articles to be published in English* is our most popular resource: it is regularly updated and currently available in 29 languages.
- The *Science Editors' Handbook* is a soft-back text book in its second edition and is also available online.
- The *Authors', Editors' and Peer Reviewers' Toolkits* each compile freely available online training materials in easily accessible formats.
- The *SAGER Guidelines for Sex and Gender Equity in Research* are being used globally to improve reporting standards in this area.
- The monthly *e-newsletter* highlights news and articles about editing and publishing, forthcoming events of interest and Association activities.

EASE Conference

25–27 June 2021
Valencia, Spain

EASE events include our biennial conference, held in locations across Europe. The next conference is on the theme of '*Promoting sustainability and diversity in research: the role of editors*'.

The conference will also host additional workshops, BELS examinations and the EASE AGM.
