

# NEVADA CASINOS: DEPARTMENTAL REVENUES, 1984-2023

## Fiscal-year breakdown of Nevada casino resort revenues generated by Gaming, Rooms, Food, Beverage, and Other departments, since 1984

Nevada casino resorts have always been about more than just gambling; in addition to their gaming floors, they also have hotel rooms, restaurants, bars, nightclubs, entertainment venues, and retail shopping. Over the past several years, the revenue pattern of the industry has shifted, as gaming itself has become less important to the overall revenue picture. The following charts feature historic and current data on casino revenue, broken down by department, for five reporting areas: Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County.

### Executive Summary

The five reporting areas in this study (with one notable exception): followed the same general pattern: gaming win, as a percentage of total revenue, has declined over the past 39 years, chiefly because of the emergence of lodging, dining, and nightlife components of casino resorts as revenue centers.

**Statewide:** The percentage of gaming revenue fell from 62% to 44%, with rooms and “other” (chiefly entertainment and retail) making the largest gains.

**Las Vegas Strip:** This area saw the most dramatic change, with gaming win dropping from 59% of total revenue to 35%. Given the rise of high-ticket entertainment and retail on the Strip, it’s not surprising that the percentage of Other income more than doubled.

**Downtown Las Vegas:** While gaming revenue has the highest percentage here, rooms have increased their share by over five times.

**Boulder Strip:** Gaming has less dramatic increases and decreases as the Strip, and other departments still largely exist to enhance slot revenues.

**Washoe County:** This area saw the same general trend as the Strip, but at a more muted pace; gaming still produces most revenues.

### Definitions

- For all reporting areas, each year’s data is for the fiscal year (July-June) in question.
- All data is for all casinos with gross gaming revenues of more than \$1,000,000 per year.
- All revenue totals are in dollars.
- Statewide, Las Vegas Strip, and Downtown Las Vegas have data going back to 1984; the Boulder Strip has data going back to 1986; Washoe County has data going back to 1990.

\*Starting with the 2019 fiscal year, the reporting of complementary expenses in the gaming department changed. Previous to that, it was reported as a departmental expense. In 2019 and following, it was subtracted directly from revenues. This report maintains consistency with the existing data by adding the complementary expenses subtracted from gaming revenue back to that total.

Tables for total departmental revenues and departmental revenues as a percentage of total revenues for Statewide, Las Vegas Strip, Downtown Las Vegas, Boulder Strip, and Washoe County follow.

## Nevada Statewide: Total Departmental Revenues
