POLARIS 1985

United States Air Force Academy

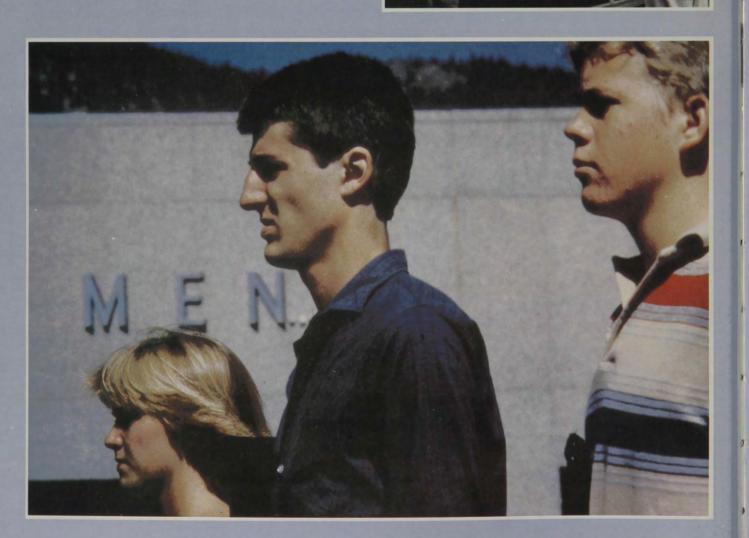

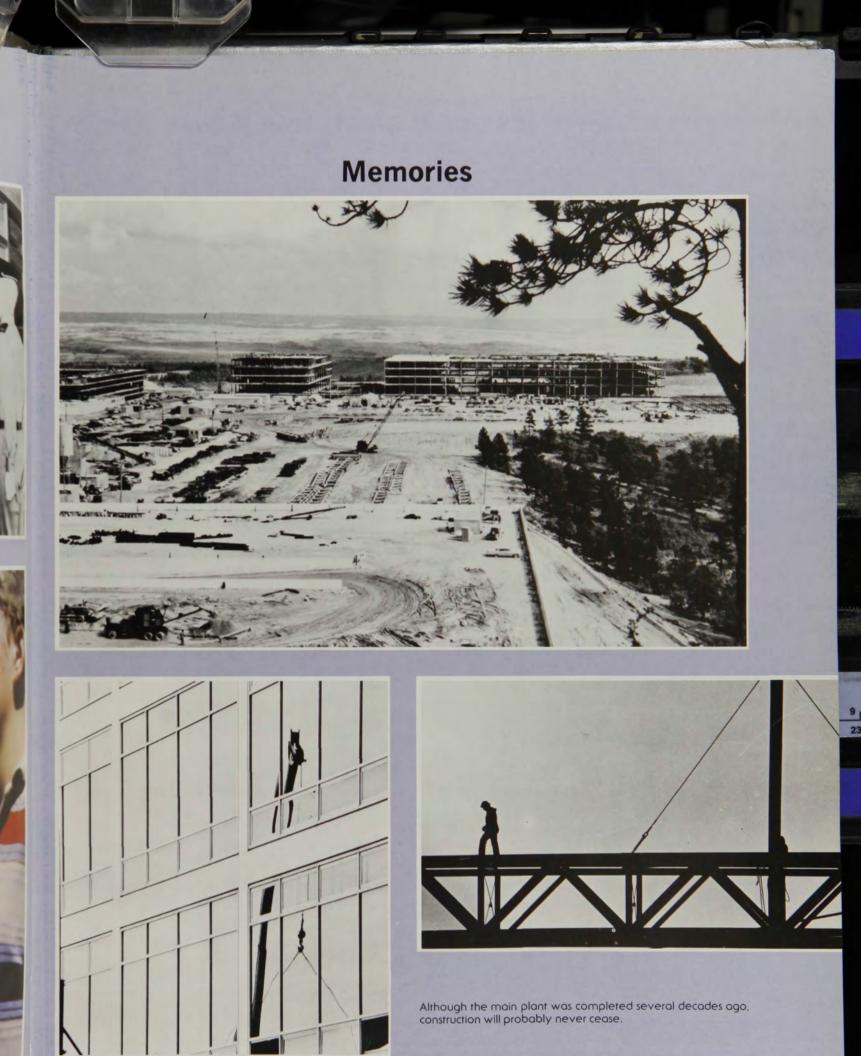

The first class chose the Falcon as the Academy's mascot because it best symbulizes the combat role of the Air Force. Its

keen eyesight, swift and graceful flight, aggressiveness and courage are qualities we look for in our officers. (U.S. Air Force Photo by Capt. Billy Birdwell)

Changes and...

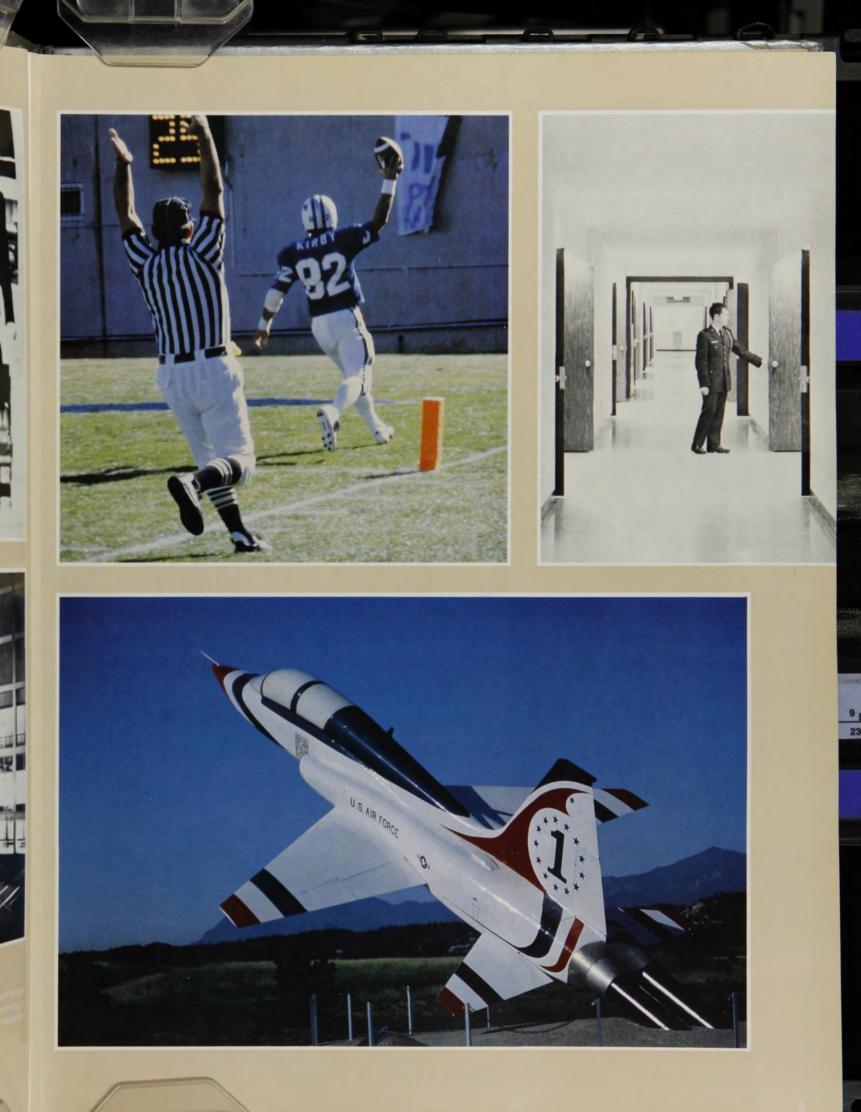

Life itself is in a constant state of change, and the Academy is no exception. By choosing to attend the Academy, each of us accepted the changes that the next four years would bring. Although the inprocessing process itself has undergone little modification, then, as now, it signals the beginning of one of the most significant changes in a young person's life.

Each of us will take from the Academy a collection of memories that will not soon be forgation. Who from the class of '85 will larger Sunbathing in the quads ... the demise of the "banana boat" the F-16 airlift ... late nights spent studying the thrill of winning a football game ... the open door and security monitor policies ... and finally but tragically, the Thunderbirds accident and the establishment of a memorial in their memory?

Some things, however, will never change ...

Leaders of Tomorrow

Although the details change each year the mission remains the same. (This press release is from January, 1984.)

U.S. AIR FORCE ACADEMY, Colo. — The Air Force Academy's mission is to provide cadets with instruction, knowledge and character essential to leadership and the motivation to become career officers in the U.S. Air Force. Each year, nearly 13,000 men and women try to pursue their goal by seeking entry into the Academy, with approximately 1,500 gaining appointments. These appointees are intelligent and aggressive and know what they want — a career in the United States Air Force.

Throughout the academic year, cadets participate in a number of extracurricular experiences. One example is the Academy Assembly. The Assembly brings students from other colleges and universities to the Academy each year to discuss with cadets the major issues confronting the nation. Another example is the Distinguished Speakers Program, featuring a variety of guest speakers who have distinguished themselves nationally and internationally as military leaders and statesmen.

experience into a motivated to defe The athletic pri force leadership in intramural or in Codets may corecognized interAssembly Reges and each year agor saves her examinguishes inguishes emotionalemotionalSpace has always been a part of the Academy curriculum. Since 1965, the Academy has offered a major in astronautics, America's only accredited undergraduates astro program. The Physics Department also offers a major in space physics which deals with environmental problems in space. In addition, the Academy offers cadets an interdisciplinary space sciences major. This major provides the necessary background for graduates to meet the requirements of the Air Force Space Command.

Academy graduates also participate in space research. Cadets developed the first completely successful student experiments on a space shuttle flight. The experiments were carried on the Challenger's maiden flight in 1983. Another experiment is scheduled to be flown in the near future. Thirteen Academy graduates are involved in the astronaut program, including Col. Karol Bobko, a 1959 graduate who piloted the space shuttle Challenger.

Military studies are central to the Academy experience and distinguish it from other institutions of higher learning. Following Basic Cadet Training, new codets enter the Codet Wing and receive a four-year balanced program providing them with the necessary knowledge, skills, values, and behavior patterns. Graduating cadets receive bachelor of science degrees and commissions as second lieutenants. Part of their military training includes parachuting, sailplaning (soaring), T-43 navigation training and T-41 pilot orientation. The Academy's goal is for 70 percent of each graduating class to be pilot-qualified. Under its "Soar For All" program, the Academy has acquired new powered sailplanes to afford every thirdclass (sophomore) cadet to fly solo.

Graduating classes at the Academy have described the soaring program as one of the most motivational facets of the curriculum. Positive rewards are found in all courses and each cadet is given a glimpse of an operational flying unit and a better understanding of the mission of the Air Force.

The leadership program, under the direction of the Commandant of Cadets, molds the basic cadet without military experience into an officer prepared and motivated to defend our nation.

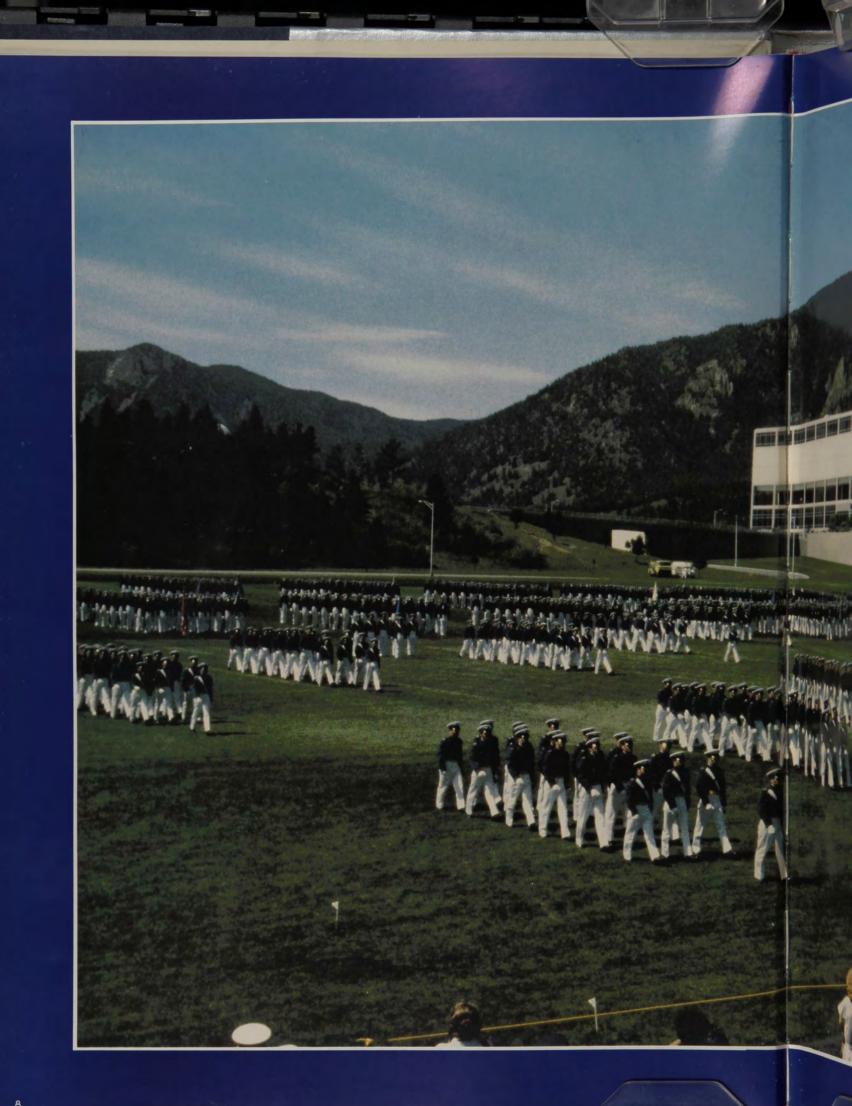

The athletic program makes a vital contribution to the preparation for Air Force leadership. All cadets participate in intramural or intercollegiate athletics. Cadets may compete for nationally recognized intercollegiate teams in a

variety of varsity sports.

To date, approximately 17,600 cadets have been graduated from the Air Force Academy. Of this number, 486 are women. The Academy has produced 26 Rhodes Scholars in its brief 30year history. Since 1959, 11,439 graduates commissioned in the Air Force entered pilot training, 1,181 entered navigator training, and 351 entered helicopter training.

The Academy experience meeting new challenges every day. Out "Leaders of Tomorrow."

S E N I O R S

DANIEL S. BADER, V

Oceanside, Long Island, N.Y. Astronautcial Engineering Dan began his cadet career in Tiger Ten and became actively involved in organizations such as Catholic Choir. At USAFA, he participated in many aviaiton endeavours to include earning his private pilot's license and French jumping wings while at the Ecole de l'Air for the French Exchange program. Dan

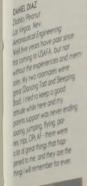

was very proud of Mach One and his squadron mates, and he wishes all of them God speed in their Air Force futures.

BRADFORD LEE BINGAMAN

Bingo HIIIsboro, Ind. International Politics What's to say?/ Five years of my life have passed away./ What do I have to show?/ Pain and a lot of myself gone to where, / I don't know?/ But even though I'm not sure/ What I've learned or if my experience/ was worth the pain, I still have hope, / I still have faith, / and hopefully some love left to give;/ to a brand new beginning,/ and a life full of dreams/ worth the winning!

Human Factors

MARK ALLEN CLOUTIER Clutes Nashua, N.H. Electrical Engineering through four years at USAFA, two things have been constant; the support of my fiancee, and the support of my parents. Heather and I have waited four and a half years for this and I think I was the only one who believed we would make it through togeth-er. We'll always remember the trials of BCT and the people we've met. Of course we'll es-pecially remember Coast Guard and the Ring Dance. Next June 9th!

RICHARD STEPHEN DEBROCK Brocker/Scratcher Saratoga, Calif. Astronautical Engineering He left. He even flipped the rear-mirror so that he couldn't see it go. As the desolate road opened, unveiling his destiny, he thought of many things he hadn't done. he hadn't forgotten his friends or the experiences. He hadn't stopped dreaming of fighting the good fight. And he hadn't forgotten his dog, for he was sitting in the front seat in quiet anticipaton. Also the capitol of Nebraska is Lincoln.

TROY ELLEN DEVINE

Troy Whittier, Calif. **Engineering Mechanics** My five year experience here at USAFA has redifined the meaning of: Long night, bad odds, tough workout, hard work, come back, good times and good friends. I credit whatever I have achieved here to God, my family, the Wilkerson "family", the swim team, my squadron and Captain Brant's the Turners and finally to my very patient and loving friends. Thank you for believing in me. it has been very good but the future is even brighter.

good) d al m enert

> SCOTT LEE MCCREEDY Fond du Lac, Wis. Engineering Science Four years ago I was an average high school kid. I came here and learned what duty, discipline, and honor were. I have been all around the world. I've seen it at Mach 1.2 and upside down. There have been hard times and good times and hard times family, friends, and God helped me through. I do not regret one minute of it. I will leave with many memories, my close friendships gained, and my high school sweetheart, Sue.

B

es ing

EDWARD JOSEPH MCGOVERN

Govs Stony Brook, Long Island, N.Y Basic Academics (Law) As I look back on the past several years I come to many conclusions about people, places and things. The common denominator is this - life's far too important to be taken seriously. I've chosen my friends accordingly. I hope I never loose touch with myself or them.

MELINDA LOU MOJWID Summerville, S.C. Psychology My Mom told me when I was a doolie: life is tough, but you are tougher. I guess I proved ir, I was graduated. Yet, I had tons of help from some very special people: my sponsor family, Jim, a wonderful, tender man, and my supportive family back in S.C. For all that I put them through! thanks!

9 23

27

MICHAEL DEAN MURRAY Murph Spartonburg, S.C. Management To sum up my Academy experience, I would have to say it was tough. For the most part it was rewarding. If it had not been for playing rugby and it would have been an even longer four years. The friendships I made here I hope to make last a lifetime. To all the fellas, "Never let school interfere with your educaton." Best of luck to yall. The Murph. Thanks Mom!

JOSEPH PATRICK PATSY Jay

Miami, Fla. Management I never would've made it if it weren't for all the great friends I had. The good times we shared really made this place worthwhile. I hope we never lose touch. It took a lot of courage, patience, and hope that maybe someday I could start living my life. Now, there are no excuses I Thank God for strength and Mom, Dad, and John for your daily love and encouragement.

MICHAEL JOHN PETROSH JR Mike Haughton, La. Military History "The Warrior"

I was born to live fast and furious, / I am destined to die swift and glorious. / For mine is the life of the sword. / And when I die.../ I will have no regret in my heart,/ And a smile upon my lips.

Jeffery Allen Moore

THOMAS MICHAEL SCLORSCH

Phoenix, Ariz. Computer Sciences How can I sum up my USAFA experience? Four degree year means BCT with MadDag, wrestling and Stanley Canyon, Reese and Spiny, Hell Week (gone but not forget-ten) and Euben Eben. Three degree year means Myrtle Bch, love, and the Dark Ages. Two Degree year means touring with straight, coast guard with Dan and Clour, Meeting Skuze, and the Bang wagon II. First degree year means forty days in Holland, skiing, and lasting friendships. Do it woll as cot offly Do it well or not all!!

CHRISTOPHER MICHAEL ST. CYR Holliston, Mass

Astronautical Engineering My four years at the Academy have been a highly rewarding experience. I have learned alor about myslef, coupled a lifetime of wonderful memories, and have accomplished more than I ever thought possible. But above all, I will cherish the friends I have made the most, especially Brian, Jeff, Keith, Mark and Tom. Now it is time for me to

RICHARD THOMAS STOYLE

lggy Briantree, Mass. Electrical Engineering I always thought that if you lose your individuality and your own perspective on things then you lose it all. Now I know. I remain unchanged, and to my friends I say "Let's get the down," Gous, Omar, Wolf, Alf, Sheryl, Tuesday, Horse, Zip, Flem, Bunz, Geet, Char, Grenz, Tang, Gel, and Mark Tree, Cole and Murph, we did it right, no matter what they say. What they don't know won't hurt them

EDWARD JAY TANNER Albuquerque, N.M. Human Factors Human Factors I want to thank Jae, Bob, Steve, Bergie, Sliek, Thunder, Larro, Juerg, Renard, Chuck, Dave, Jay, Spike, Mark, Whit, Danno, Al, Steve N., Theresa, Yogi, Miguel, Dave K., Dave W., Mike, Daug, George, Don, Marci, Liz, Sue, Chan, Beac, Eris, Kik, and Char, Bang, Eric, Kirk, and Wolf for making it all worth while

DANNY JOSEPH TOPP Kalispell, Mont Space Physics The Physicist I was born to live fast and frictionless, / I am destined to die swift and scintillatingly,/ For mine is the life of the physicist / And when I die.../ I will have many questions left in my heart, / and a confused look on my face.

THOMAS BRENT WYNN

Mesa, Ariz. Computer Sciences One simple concept has led me through the Academy, from BCT to June Week. That is you must always play to win. I hate to lose and I can never quit. I thank my friends who've helped me through. We've played and won. Together we've learned that sometimes you've just got to say... Now as I begin my career as an officer, I wait to view the world from a cockpit that reclines 30 degrees.

Analy Charlot Ohio International Athatis The time Ispenh tent Academy has helpe may moorang part been my growth and bein in Jesus Christ Marthew 6.33 - 36 rt heli lingdom and the in test and all these thill be added to you. Th forme His yoke reall easier, and his load m

lighter.

DWAYNE ANTHONY HARDIN Pontiac, Mich. Economics I came, I saw, I left... and I came back, why? Because I am destined to fly, fight, and win. I thank God and my family for without them, I could not have survived. P.S. Tell Mom, "I have truely found paradise."

CHERYL ANN HICKS Chestertown, N.Y. Psychology

WILLIAM MARVIN HILBUN Bill Tupelo, Miss.

Physics "...And when you're looking for your freedom, nobody seems to care, and you can't find the door, can't find it anywhere, when there's nothing to believe in, still you're coming back, you're running back, you're coming back for more. So put me on a highway and show me a sign, and take it to the limit, one more time..." -The Eagles Thanks Mom and Dad!

RALPH EDWARD JOHNSON Dwarn Sioux Falls, S.D.

Sioux Falls, S.D. Engineering Sciences Ed should be remembered as a very easy guy to get along with and confide in. He has a great ability to take things in stride of negative moments. He did well in all his endeavors here, but is now very glad to leave and try something new. Important things in Ed's life are: parents, Karen, friends, Seringuccio, Saabs, skiing, music, Ralph, and gee I don't know, graduation.

DAVID SCOTT PERCELL Morago, Calif International Affairs

RANDALL THOMAS KERSEY Rondy

Cincinnati, Ohio International Affairs The time I spent here at the Academy has helped me to grow more than I ever realized. The most important part of this has been my growth and strengthened faith in Jesus Christ. Matthew 6:33 - "But seek ye first his kingdom and his righteousness; and all these things shall be added to you." This sums it up for me. His yoke really is easier, and his load much liahter.

RICHARD HENRY KLODNICKI Bellevue, Neb. Humanities

To try, and fall, is by far better than never trying. 'Tis a shame, tho', that a man fail often at the same attempt, but shameful to never allow a man a chance to try. Likewise, to hang such a price on failure as to make temptation unaffordable is truly a sin against all of man.

MICHAEL JOSEPH MASUCCI Mike

Willow Grove, Pa. Astronautical Engineering I came, I saw, I survivedI I would like to thank my Mom and Dad, John, Angela, Mary Ann, Jean, Matt, Eric and Gary (roommates for life). Leo, Anna, Dave, Chuck, and all of my friends and relatives, without whom I could not have made it through the Academy, during the good times and the bad. -Psalm 23 "Lord guard and guide."

DAVID ANDREW NIKOVITS

Dave Springfield, Va. Civil Engineering Llived in Virginia all my life, until I come to Colorado. Now I can't wait to leave. It's time to do some real work and time to start living. Live each day as though it were your last, it just might be. I want to see the world and see my brother Mike, sometime while I'm in the service. Good luck Mike, Thanks Dad, I love you, Jill. Hi Mom and Irwin.

DAVID SCOTT PERCELL Moraga, Calif. International Affairs

40

ANNETTE MARIA PEREZ

Annette Leesville, Lo.

International Affairs What I'm going to miss most of all are all the great friendships and all the fun times that I've had here. The old friends in Deuce (Pam, Greg, Matt, Ron) and all the new ones in Rebeleven (Cheryl, Julie, Rich, Bill, Ken) have all been really super people and I wish the best to them and everyone else here. Have a happy and fun life!

JEFFREY BLAINE PHILLIPS Shawnee Mission, Kan. Management The past four years have been hell. They've been tough on my brain and body, tough on old friendships, and especially tough on my ulcers, but I have to say thar they've been worth it. The experiences have been great, and the friendships I have made are ones that will lost a lifetime. Good luck to all you bums.

9

GARY ROBERT RAFFERTY

New York, N.Y. International Affairs I mean it when I yell out my window, "I love it here!" I'm serious, the Academy was great! Look at my activities: Cheerleading, Bluebards, Catholic Choir and Talent shows. I like performing, traveling and having fun. Happiness is a sickness I can't shake. Even in class I can't resist a good burp or nose blow to break the boring tension. Trust in God and a good sense of humor, got me through here.

ROBERT LAWRENCE STEWART Bob

St. Louis, Mo. International Affairs I came here an idealist. I leave a cynic. To my friends I say salute! To my parents I say I love you. Instead of a bureaucrat, I leave a warrior.

"DIRTY DOZEN"

CURTIS RAY CARTER

Curt Hillview, Ky. Management Management The road from 22 June 1981 seems to have been a long one; and looking back on things, I can say that it's difinitely been an experience. I've gained a lot of book knowledge but more im-portantly I've learned so much about myself. I've done a lot of arowing-up since that first day growing-up since that first day of BCT, and deep down inside I feel good about my accomplish-ments. Thanks everyone — Thanks for the opportunity.

JOSEPH EMMANUEL MARIAN CASTRO

Joe St. Louis, Mo. *Civil Engineering* With effort, comes pride, with a positive attitude, comes ease; with confindence, come success. That's all.

JOHN CASIMER COLOMBO Lumbo, Dillo Seattle, Wash. Aeronautical Engineering The years spent here have been tough. They have also been fun, I'll take with me memories that I will never forget. But, what have I learned? Firsty, I've learned the value and importance of my family and friends, without whose support and love I would have never made it. Secondy, I've learned that in order to survive, you have to work hard and play equally as hard. Finally, I have learned to lough at myself.

JAMES DAVID COOPER Jim

Jim Grand Rapids, Mich. General Engineering It was the best of times, it was the worst of times. But through the grace of God, the support of my family, and with a little help from my friends, I got by and reached the end of the long and winding road.

BRAIN DAVID COX Noshville, Tenn.

201

General Engineering "...Far better it is to dare mighty things, to win glorious triumphs, even though checkered by failure, than to take rank with those poor spirits who neither enjoy much nor suffer much, because they live in the great twilight that knows neither victory or defear." -Theodore Roosevelt

THOMAS EDWARD DOYLE

Oracille, Calif. Aeronautical Engineering Well, we made it, but not without the help of countless people along the way. In particular, I'd like to thank my Mom and Dad and Grandma as well as the rest of my family and friends who have given me an enormous amount of streagth and ensurement

of strength and encouragement along the way. Thank you all so much.

DAVID GREGORY ERAZO Orlando, Fla.

Economics I wish Harold, Terry and Carl could have made it! Looking back it really wasn't that bad. Skiling was fun. Squash was a good time. Roadtrips were great. Everybody helped. Mom thanks to Chris, Joe, Steve, EJ., Blaine, Steve, Ed and Scot. Going downtown was fun. Hoping for Willy probably get Vance. I guess that's alright as long as I don't have to drive. Does anybody want to buy a Truimph?

CRAIG WAYNE HALL

Craigre San Diego, Calif. Basic Academics I finally made it!! But only because of all the love and support I got from my wonderful family, my beautiful wife-to-be, my coach and all my friends. I had more fun the past five years than the 18 years before I came to the Academy. I really thank the gee team for all the fun and laughs and even for the stupid nicknames they gave me. By the blue skies. BOOOM!!!

JEFFREY ETHAN HAYMOND Rison, Ark.

9

Aeronautical Engineering It seems like we've been here forever, freshman year rooming with Doolies, the outrageous room and card games. Sophomore year and giving Linden a hard time and especially the room. Mike and dreaming about cars. Two degree year isn't quite so distant. Steele and the car fiasco. Pulling through with a 2.00. And now I'm outta here. Cars, music, girls and comics; what else is there? Parting thought if all else fails, REBEL!

DEBORAH LYNN INGS Debbie Jackson, N.J. Aeronautical Engineering Well, I've got that behind me now... Lead the way, Lord.

PAUL DAVID JOHNSON Dibby-Doo Reno, Nev. Aeronautical Engineering As I reflect on my Academy experience good things come to mind. Good people, good times, good experiences. I am thankful for the opportunity I was given. I am especially grateful to Chief and "Chafe" for helping me to see it. I thank you for your guidance and cherish your friendship. As the cadet area grows smaller in my rear view mirror. I will feel a loss but It will be time to move on.

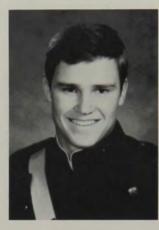

RICHARD CARL MILLS Millsy Essington, Pa. Electrical Engineering I never thought I'd live to see the year 1985. I've learned a lot during my stay here; how to march in snow, how to part my hair (zipperhead!), the only good training is pilot training, how to cut my vocabulary in half by using acronyms, and much more than I care to remember. Couldn't have made it without the love and support of many friends, my parents, and Laura. Let's blast outra here!

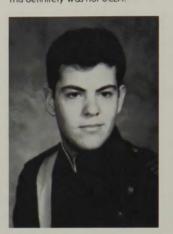

MARK CHRISTOPHER NOWLAND

Lancaster, Calif. Electrical Engineering The Academy takes so much, yet leaves you with so much more. Education, training, experiences, but most of all great friends. I couldn't have made it alone. Without the great companionship of my buddies and everyone else I would've fizzled long ago and not been happy to be part of the program. Remember, happy are those who dream dreams and are willing to pay the price to make them come true. I always will.

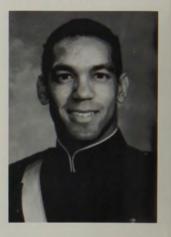

KEVIN JAMES PIZZARELLO Pizza/Pizz Los Angeles, Calif. Engineering Mechanics This definitely was not UCLA!

REGAN WAYNE SEALS Reno, Nev.

Electrical Engineering Through many blunders, successes and trails, I can only hope that I have served well my master, my God, and my friend.

BRIAN STANLEY HYDE

Alpena, Mich. Basic Academics I owe plenty to all the people who helped me make it through here. I'll never forget those who helped me when I was in academic trouble. The biggest plus for this place was that if brought me together with some of the greatest people I will probably ever meet, as for the rest of it... I'm just glad it's finally time to go fly jets! "The flame is gone, but the pain lingers on.

WILLIAM PLEASANT ISLER JR Edgewood, Ky. Organizational Behavior And so the story ends, it wasn't always easy or fun, but thanks to a supportive family, Amy's love and support, and the best friends a man could ever ask for I was able to endure these past four years. I walk away from the Academy proud and confident. I learned that motivation and dedication can make anything possible. Don't ever be content always work to become better!

KEVIN DAVID KETLELL

Clarks Summit, Pa. International Affairs The good times far outweighed the difficult; squadron trip to George AFB, Operation Air Force in Hawaii, exchange trip to Sandi Arabia, BCT Logistics '83 and '84, SERE survival in-structor '83 and '84, chairman of Ring Committee, 2nd Group deputy commander for support, good times with the Bull Dawgs and special moments with Andre! I pray that the Lord will guard and guide each one of you! See you at the top!

DAVID WILLIAM KYGER Dave

Albuquerque, N.M. Electrical Engineering I measure my success in two ways; did I enjoy myself? Did I improve myself? A good day is when I do both, a bad day is when I do neither. USAFA has opened the door for me to have many good days in the future. Thanks Mom and Dad for your unwaivering love

MILES TRACEY LANSING St. Louis, Mo. International Affairs Much is readily forgotton but friends and good times, never. Teaching Rich to play squash, he Vinning Horro play squash, he teaching me how to beat the Dean. Winning Honor Squadron made my doolie year. Brian's kill-o-commie attitude. Brilliantly planned spirit missions, and those philosophical discussions about space and time. (Joe, if they only knew). Senior year brought the ring, new car and more women than the year before. Dink life had its moments but never again!

OHOR

JOSEPH LEE LENERTZ

Joe Roseville, Minn. Astronautical Engineering Freshman year was mixed, with firsties like Adkins; friends like Jeff, Stu, and Rick. One infamous night at Odyssey brought us luck when Lorraine asked me to dance. I remember us in her Z-28. Sophomore year and stop-out raught me about CQ alcohol, Europe, and college The ring, the car, and Linda sent my spirits soaring, but disappointments of everyday life shot them down. I won't look back

TODD FRANKLIN MALONE

Mugs Lake Oswego, Ore Aeronautical Engineering Here's to it and to it again. Damn those that can't do it when they get to it. If they con't do it when they get to it, they ought to be tied to it and made to do it. If they can't do it when they're tied to it and made to do it, they ought to give it to us, 'cuz we're used to it.

CHRISTOPHER ALAN MARTIN Warren, Conn. Biology

SCOTT HILLARY REMINGTON

Yonges Island, S.C. Basic Academics In the past four years, I have come to realize how very for-tunate I have been in attending the Academy. I will always cherish the friendships which I have made here. Through both the good and bad times, my friends and my family have been there to lend me their support. I wouldn't trade places with anyone. It is with them in mind, that I dedicate myself to serving our country in her Air Force.

ALBERT EDWARD ROBERTSON JR

Skip Arlington, Texas General Engineering I'm really fortunate in that I'm getting the benefits resulting gering the benefits resulting from the very hard work of others who helped me through. Special thanks to you, Mom and Dad for your continous support. Also, thanks to Alan for your help in getting me this oppor-tunity. To all of you in B, thanks for all the great times and also for my new nickname-Bluto. It's been real and it's Bluto. It's been real and it's been fun, but it hasn't been real fun. DONALD HERBERT COLEMAN

Scottsdale, Ariz. Aeronautical Engineering I have experienced, been enlightened, experimented, and applied while here. I learned things expected and unexpected. Did things I never would have been able to do anywhere else: Jumping, and flying. I made it through with some hard work, a lot of luck, and with the help of friends and family. The great times were with Snakeman, "The Boys," and Kathy. The bad times, well, they came naturally. Thanks Barry G.

STEVEN CLARK DYE

Steve Augusta, Ga. Astronautical Engineering These three and a half years have taught me many things. Your honor is the only thing you have which can't be taken away from you. Duty is not a word, but a concept of living to be the best and doing what is right. A super attitude will carry you through when all seems hopeless. Remember me with a smile on my face and a "hello" soon to follow. Good Luck!

Davenport, Iowa Basic Academics Looking back in retrospect, I am reminded of the quote from the poer Rilke: "How much suffering there is to get through!" So much has happened here that can't be compressed into 75 words, but the one thing I liked best about the old blue U-SAFA is all the animals perhaps. Nietzche soid it best: "That which does not kill me, makes me stronger."

JOHN FRANCIS HILBING Tran/Hibling Buffalo Grove, III. Computer Science John lived in the Media Office more than in his cadet room. Everybody will remember his "great" 'Pass in Review' articles and his infamous TALON covers (like Dark Ages, 1983!). He will never be forgotten by Capt. Billy Birdwell, Gary G., Matr, Mike, Radar, Peggy, Susan, Attid or mo

KOLE TON

DET A

DANIEL RALPH JOHNSON Minnesoto Basic Academics While I've been living here, I had to take my time and change my style. Now I wonder is something is going to make it all worthwhile? There oin't no feeling like finding the key. Now I'm reeling thinking of the things that I might see. Had my doubts, but decided to wait. We took our chances and now's our fare. It doesn't hurt to say goodbye, because now it's time for me to fly....

54

JAMES RAY JOHNSON

Palmetto, Ga. Economics I came for the education. I enjoyed my stay, my parents enjoyed my stay, my girlfriend loved it. I guess if I had to do it over again, I would. My folks were always there, but if it weren't for my girlfriend, her house, her meals, her caring, I would still be here, but I would still be here, but I would so lot less happy. I've gotten a lot more than an education.

MICHAEL JOSEPH JORDAN Spike Montgomery, Ala.

Monigomery, Ala. International Affairs Fly clean, land soft, love hard, give beautiful memories. Thanks to all for the beautiful ful memories. I'll never forget you guys.

JAMES ROBERT GREEN Hugh Gainesville, Fla. Bosic Sciences Soon after his arrival here, He became affectionately known as Hugh. Few like him could stare for hours out of a window at their first snowfall. Times were Their first snowtall. Times were tough at first, but after Digger and Moon Unit days hugh was left with a great firstie year. He began his cadet career playing intercollegiate football and baseball and ended it playing the field. He will be the the field. He will best be remembered for his landshark attributes, Good hunting.

JAMES CHARLES HAYDEN

Tacoma, Wash. Military History Delight yourself in the Lord, and He will give you the desires of your hear. Commit your way to the Lord, trust also in Him and He will do it." -Psalms 37:4,5 May the skills I learn and actions I train for never be used in my lifetime so that I live in peace - yet, if not I, that my children may

JAMES ALLEN HIRD

Jim Farley, Iowa Electrical Engineering ''I close my eyes only for a moment - and the moment's gone.

Kansas Jim has run the full spectrum of academy life. He started with a massive chest cavity in BCT and went on to be an academic dynamo. Finally, he realized that it just didn't matter and become a ghost on weekends. If you asked, "Where's Hird?" He was always there to make you laugh—like with the buildog song or shock the monkey

JEFFREY SCOTT JACOBS

Rancho Palos Verdes, Calif. Electrical Engineering I was born here so I guess I was destined to return. I wonder what Stanford would have been like? Actually, the four years have been worth it. I'm thirty years later and I hope I can mean as much to my son. Playing soccer has been a great release I'll never forget all the good times and good friends. Thanks Mike and Anne for being my second parents, you've meant more than you realize.

RICHARD CARLTON KELLER Pore

Birmingham, Ala. International Affairs I think someone once said that if you don't have friends, you don't have anything. Well, I can honestly say that if it wasn't for the friends I've had out here, I would have left long ago. So I'd like to thank Zure, Jake, Jeffe, Steve and Adkins for making this place an easier place to live.

MICHAEL ERIC LEPCHENSKI East Alton, III

Aeronautical Engineering Don't only concentrate on the bad parts of USAFA. Look for the happiness in every day and your stay here can even be fun. thanks go to my uncle Jerry, without whom I never would have known about USAFA, and to Don Lindberg and my sponsors for all their love and support. I wouldn't have made it without all of you. Next for me is the realization of my dream to fly. God bless.

JENS PARKS The Hun Chicago, III. Civil Engineering

YVETTE PEREZ Brandon, Fla,

International Affairs The past four years have been a time of re-evaluation: My thoughts, my feelings, my faith. I've read that "these times when we feel lost and all around us seems to be falling apart...We struggle and try to recapture the security of what was, but almost in spite of ourselves, we emerge on the other side with a new understanding, a new awareness, a new strength. Sue Mitchell you were there .. Anne. Tony...thanks.

LANSON CLIFFORD ROSE III Lanny Seattle, Wash. **Humanities** I've spent almost one fifth of my life here. It's a good place to be from.

58

JEFFERY WAYNE STEEN Jeff

Oxnard, Calif. Astronautical Engineering I will soon forget the un-pleasant times such as the late nighters but will remember most the important lessons I learned, the friends, and graduation. If there is one thing by which I would want to be remembered it would wan to be remembered it is my relationship with the Lord Jesus Christ, that being the most important thing in my life. I am looking forward to serving with pride the greatest country in the world. Thanks Mom and Dad for your support.

CHARLES FREDRICK THOMPSON Chuck

International Affairs Thanks to all who have helped me over the years, Jim, Greg, John, Dave, Taters, Mat, Jay, Gary, and everyone who made my stay a bit better. Good friends are hard to come by and hard times, they are the only thing that saves you. Thank you once again.

ANNE MARIE WEAVER Weave

Clearwater, Fla. International Politics "Nobody can make you feel inferior without your consent." (Eleanor Roosevelt)..."It's not true that life is one damn thing after another - it's one damn after another - it's one damn thing over and over." (Edna St. Vincent Millay)..."Courage is the price that life exacts for granting peace" (Amelia Earhart) "I don't know what kind of mess I am getting into but it's a mess I want to be in" (Ward, in a letter to my parents upon our engagement).

RICHARD KEVIN WILLIAMS RK Grant, La.

Electrical Engineering Too many times these days, people get far too tense about things that really don't mean squat in all of life's cycle. My philosophy is "All things must pass." I remember hoeing waterpass. Tremember hoeing water melons after school until dark and thinking, "Someday this will pass, and I'll leave this Louis-iana farm." Now that I'm about to be graduated, I'm finally package will realizing that this also will pass, and I'll move on through life to newer and better things.

PERRY JON WILSON

Watertown, S.D. Computer Science My Grandpa says there's a reason for everything we do.. My Dad agrees.. Now, I'm not one to argue with the truth, but some-times I'd really like to know, why... If you would, here's a little advice. Be proud of who you are and what you're doing. Tell the people you care for that you love them. But most of all, never let go of that one fabulous dream until you've become a part of it.

"STALAG 17"

CLARITA OMEGA ABUYUAN Claire Fremont, Calif. **Operations** Research Tomorrow is a dream that leads me onward. Tomorrow is a path I've yet to choose/ It's a chance I've yet to take,/ A friend I've yet to make,/ It's all the talent I have yet to use./ Tomorrow is a dream that leads me onward,/ Always just a step ahead of me./ It's the joy I've yet to know./ The love I've yet to show./ For it's the person I have yet to be. — Karen Kavin

ALM TANDOOMI

DANIEL REID BRIDGES

Dan Austell, Go. Aeronautical Engineering For Dan, who will always be remembered for his quick smile and easy going manner, the Academy has been one experience after another. Starting with

improcessing, push-ups on the assault course, Hell Week, and SERE, to being a Soaring IP and pulling more than one all nighter for Aero, and finishing with the French Exchange and 29 May 85. But best of all have been the friends he's made He'll never forget them.

MICHAEL PATRICK CHALLMAN Mike

Yorktown Hts., N.Y International Politics Perhaps the only distinction of my time here will be that I never unpacked (thats right, Barnstormers, I'm still here). It's true what they say; you can have anything you want if you just want it badly enough. for me it's graduation and a chance to serve my country. It wouldn't have been possible with out my family, my faith, and my friends. Thanks, guys, it's been real. "This is the best part of the trip.

STANLEY JOHN COLGATE Sleeper Tempe, Ariz. Engineering Sciences

The Academy was just an invest-ment in time, and it's already paid off through my friends. Larry taught me discretion. Jimmy taught me indiscretion. Tim gave understanding. Kevin taught me the meaning of true friendship, and Natalie showed me reality. I'm so glad I'm still friends with the first four. My parents and brothers were always there, and Mike and Tom never let distance change us. Let's enjoy our lives

KEVIN WILLIAM DIXON Dix

West Covina, Calif. Human Factors The one thing that you take from USAFA is friends. They make your time here worthwhile. They are there when things are going bad and there to share the good things in life. The memories of the bad times will fade, but I will always remember the good times. I want to thank Dooles, Stain, Lars, Timmy Bucks, Dana and the Lord for being there to watch over me.

MARK EUGENE GARNER

I could never have come this far without the love and support of

my family and friends. Thanks

Chuckatuck, Va. Computer Science

DANA GEORGE HANSON Milt

Auoca, Iowa Astronautical Engineering After wondering for four years if this day would ever come, I feel relieved and happy I finally made it. The most important things that one can take from this place is their friends and feeling that anything is possible with dreams and a lot of hardwork. I want to thank Ruth, Stan, Dix, Flem, J.B., Mike and especially Mom, Dad, and Amy, and always remember wet birds don't fly at night.

HAROLD THOMAS HERNDON JR Tommy

Hollywood, Md. Basic Academics Admiration. I might not show it but I have it for you all. Expressing admiration is not my strongest trait but you easily make me feel warm inside. I write to those I call "friend. I stand in the shadows and watch you all, sharing whatever feelings you have. You have been the force behind my goals. I admire you from J.J. to Denise. Thank you and let this "Butterfly" be free.

WILLIAM LOUIS KELLEHER JR Tuck Akron, Ohio General Engineering To get anywhere, God has to give you the initiative, standards, and drive to get there. Once you have the job, you owe it to yourself to keep those standards if not improve on them; never are you to let the Lord or your-self down by doing less than you are capable. I thank my family and friends for supporting me as I strive to meet the challenges before me.

60

WILLIAM EDWARD LINDSEY San Antonio, Texas Astronautical Engineering Should I ever become a father, the best wish I could hope for is that my children have family and friends as wonderful as my own.

FRANK ANTHONY LUCCI Luch

Altoona, Pa **Basic Academics** Friends are what make this place. Those who make you laugh, those who make you cry. Those with whom you have the best times of your life and those with whom you are graduated. That's what it is all about. Life doesn't have to be one long struggle. Laugh about those troubled times (which are numerous), pick yourself up and continue on because the ring on your finger and your hat in the sky are worth it all in the end.

irus

Basic Academics You have never lived until you almost die. To those who fight for ir, life and freedom have a flavor the protected will never know... I'd like to thank my family for all the love and support they gave me to help me get through this place. Here's to good friends: Skin, John, TC, Art, who made it almost fun. Parela, I owe you so much -our parents weekend will never end. -Let's do it-

Tucu Orlando, Fla. Management Hey, it wasn't real fun, but it was bearable thanks to my friends, Art, and especially Sheri. It's all or nothing so do what feels right and have a good time!

WILLIAM GRIFFIN HAMPTON

Will Rock Hill, S.C. Civil Engineering My four years here have been a real experience. They weren't easy either. I've learned a lot about myself and other people, and value the experience. I look forward to becoming a career officer in the Air Force, and doing my best always. See you there Johnny B. and "Beast."

SARA ANNE HELLWIG Dayton, Ohio Humanities I'd like to share a poem my father wrote for me my freshman year. It's helped me through all four years: CINQUAIN for a Cadet... Unsear/ Stars with your high/ Ambition. Look, cadet!/ Fantasies, once scoffed, turn heads of/ Angels!/ -Norris Dean Hellwig

r AND DOUTS ent. Col ment mpricinale Lin day to be the solog cold outs of the pages has all to buy real an would re corel in the second to face and the south of the sothe south of the south of the south of the south the body the code

DEAN WESLEY HULL Mayfield, N.Y. Basic Academics Dean hails from Mayfield, New York, where he spent all of his life before coming here to study languages. We will always remember Dean for his short hair, good natured humor, and his ability to smile in the face of adversity. His hopes lie in continuing his career as a chopper pilot...written on a bunker wall in Khe Sanh "for those who fought for it, freedom has a flavor the protected will never know."

WALTER TOSHIO IWATAKE

Iwo Aiea, Hawali

Electrical Engineering Once when I was at a circus, I saw a clown chase a spotlight. Each time the clown was about to step into the spotlight, it moved away from him. I often see myself as chasing a spotlight. Whether I reach it or not is un important compared to sharing a bit of myself with, and hopefully giving a little happiness to, the people I meet along the way. Thanks Mom, Dad, and friends.

HAROLD TODD KAPLAN

Buck San Diego, Calif. Organizational Behavior Buck is one of those people who wants everything. Came to USAFA not really knowing what to expect, but his goals were to graduate with a 3.0 GPA and to be able to say he had a good time. However, he overlooked the social and military parts of the man hole and got on probations. so Buck bought the farm and found his good times didn't suffer much and Buck was graduated.

TERENCE LINEHAN

Brentwood, N.Y. International Politics "Nothing critical." From the first parties at Beefy's to beer and ding dongs for breakfast, rooming with Berg and Crowdog, the teachings of Fin, the Fab Four, and big glups with the boys from Mount, its all been a "good time." Mom and Dad.

thanks for all your help. Always remember, "sometimes you just gotta say..."

PETER COUGLAS MAHON

Loncoster, Ohio Electrical Engineering I thank the Lord Jesus Christ for bringing about in me the miracle of a new life in Him, and showing me how to walk in His victory. It was by God's grace alone that I was able to be successful here! Glory to God! Therefore, if any man is in Christ, he is a new creation, The old things passed away; behold, new things have come. -2 Corinthians 5:17

SONYA LYNN MARCH

Sunny Saint Petersburg, Fla. Geography Don't ever give up your dreams, and never leave them behind. Find them; make them yours, and all through your life, cherish them, and never let them

go. Thank you Mom, Dad, Stasia, Stella, Suzan and Stanley. I could have never done this with-out you. I'd also like to thank the mouse, dumplings, Janic, Sue, Ace, Steve, and Hawk. USAFA cannot be described, it must be experienced.

RODNEY DEAN MIDDLETON Rod

Rod Iron City, Ga. International Affairs Rod came to USAFA from a little of Georgia town and soon learned to hate the weather of Colorado. He fought with the Dean more than once and somehow made it through it all. Friends helped out a lot. Todd was always around to give a smile. Janet was the greatest thing that ever happened to Rod. Hopefully, things will work out as planned for them in the future. Thanks to Momma and Daddy

I learned many feelings: Sad, hurt, disappointment, boofed, shafted, and above all laziness. It's time to move on to somewhere far, far away. Far away. Go Air Force. Beat 75,120, six months if you Areasy/How atom con

WILLIAM SCOTT CARNEY

F. Lee Lubbock, Texas

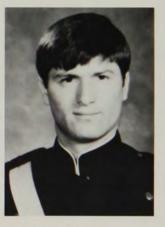

Management I will remember my four years at USAFA for: Leon G's for P and B, midnight movies, two years of hitchiking, Chi-Chi's, BF's, cruising

Nevado, Domino's Pizza, Joe and Emil, all-night SAMIs, Leather and Dan, Sonya and Linda, Gregory C. and his "that's right — fix it," the F.Lee brothers, Weber's food patrol, RC's see me ASAP, and as a 150K education a nickel at a time.

THOMAS HUNTER COLEMAN

TC Woodland Hills, Calif. Basic Academics If anyone would like to get my album, which consists of orginal rockabilly music representing, four years (or five if preppies) of hard work and dedication. Songs like "you got me", "you never know", "why can't we fly" and especially "hard stuff." just write to: TC live, 5011 Claret Court, Woodland Hills, Calif. 91364. It would make a good memorium of USAFA, and if only costs \$6. The folks would love it. Good luck as officers.

WILLIAM PHILIP DELANEY Bill Colchester, Vt. International Affairs

The beginning of a new end.

ALFRED MAXWELL DORSEY JR Dorse

New Jersey Human Factors So glad we had this time together, just to have a laugh... No, really first I'd like to say good-bye to all my Tarantula Buddies especially Boofie Simmons the first man to put a T-41 in orbit and Larry B. who better jump on it. Next to all my playboy squadronmates who know it's like a jungle sometimes. Then to the WLC, who search for justice and what they do find, and finally my parents and sponsors who supported me.

PAM GOODEN

Waynesville, Mo. Engineering Mechanics From freefall...soaring...SERE ...Wing Staff...scuba...Supr's.. marksmanship ribbon...mech major ...summer research...to T-41, challenging opportunities never slipped past Pam. Through natural drive for ambition and genuine persistence, she accomplished a great many things, and yet managed to place top priorty in concern for others -through caring for her classmates and pride in her family.

MICHAEL TIMOTHY HEALY Birdman

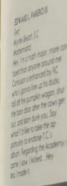

Arcadia, Calif. International Affairs Running with my classmates on either side and the blankets tied over our shoulders, we moved the rock slowly up the hill, and then hid beneath a bush at our final checkpoint. After we cleaned up and ordered pizza, we showed the younger ones how to carry a rock. And with a ring on, for the fourth and final time, we told those of us who had died that we would never forget.

MICHAEL ANTHONY MARGIOTTA Mike Belleville, III.

Belleville, III. Electrical Engineering Mike has made several accomplishments over the past four years. Like scoring a 37 on his second jump and still getting his jump wings, and landing a sailplane with the brake on, just to name a few. Always a "down to earth" kind of guy, he won't forget the Fourth of July at Memorial Pork with Brent, Joe, Steve and the others; one of the few times we all got together.

MARCI LAVON MCGLINN Prescott, Ariz. International Ariz. I'll never forget all the good times I've had ar USAFA and with the gymnastics team. The best times. To the class that made spliti cheese fly and snowmen appear during parades, may we all succeed in our endeavors. Thanks Mom and Dad for the shoulders I cried on and thank you Preston for carrying me through the bad times. You all made the difference. "Thanks God Almighty — we are free at last!"

66

MICHAEL JAMES MCINERNEY Crash Sayville, N.Y. International Affairs These past three years were great, hanging out with the Fab Four at Beet's. Crash, Spunky, Sped and Crow! I'll miss my friends, ski weekends, road trips, stereo wars, ding-dongs, and beer for breakfast and keg parties at Beet's. I'll never forget the Ring Dance weekend. How does it go again guys? Ringcar-friends-date?? It just doesn't matter anymore!! Good luck to the Long Islanders I'm leaving behind.

SCOTT ALLEN MOORE Scott-Tay Taledo, Ohio Chemistry My years at USAFA would have been boring without my good friend Scott-Tay. We've had some fun times together. I'll also miss everyone down at Mott's Party Paradise. (After all, four bucks and four bucks!) Thanks for the support of Playboy 19 when I tried to get Brooke Shields for my Ring Dance date. Oh well, it's her loss. Always remember, "Whosoever would be a man must be a noncomformist."

KEITH WAYNE MARGAN Waterloo, lowa General Engineering I would just like to thank my family, the gymnastics team, roommates, and friends here and back home. RISK SCHALINAANN Holicie Minn Joz Acciento

ERIC WALTER DEARDORF

Herms Auburn, Ind. Management I came here, because I wanted someone to tell me what to do with my life. Since I've been here I've learned to love my country, cherish my family, and long to fly. Am I a product of the system? Maybe, but I don't really care. Because the Academy has taught me to make my own decisions. Thanks to my family, Colonel Joe and Terry, and my friends. I love you all

DAROLEN KAY FAHRNI

Aiea, Hawaii Basic Academics Dear Mom and Dad, My only regret is that I had to move away from home to realize how much Hove you. I appre-ciate all your love, patience and devotion that helped me make it through these five long years. If I've learned one thing here it is to live life well and to party is the best revenge! Iko! Iko! Love Karolen

JONATHAN PAUL FRENCH Frenchy Oroville, Calif.

LAWRENCE AARON WALTER HARGIS

Larry Lafayette, Colo. Military History "Let the word of Christ dwell in you richly in all wisdom; teaching and admonishing one another in psalms and hymns and spiritual songs, singing with grace in your hearts to the Lord. And whatsoever ye do in word or deed, do all in the name of the Lord Jesus, giving thanks to God and the father by Him." -Colossians 3:16,17

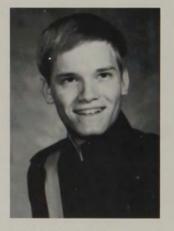

RAYMOND CARLETON HARRIS Ray Danville, Go. Electrical Engineering The best time I had was 29 May 1985.

76

SCOTT CHRISTIAN HOLSWADE Swades South Charleston, W.Va. Physics That's one graduation for a cadet, one giant leap for man-kind. Thanks Mom, Dad, Eric, and PaPaw for making me what I am. I love you all! To my friends: You're welcome for the privilege of knowing me. Stay calm, relax, and have fun out there. Remember he who laughs, lasts. I took from the Academy what I needed and left the rest behind. It was worth it. -John 3:16

DAVID BRYAN HORTON

Dave St. Louis, Mo. Astronautical Engineering "Unless men like myself left these wonderful luxuries in this great land of American we would lose it all forever. We were going to fight, and many of us were to die, for just what I had here - my wife and family. To me they were all that was real, they were all that I could understand. To me, they were American. Col. Robert L. Scott Thanks, Mom and Dad I love you both

KOBIR HUSSAIN

Ko Teaneck, N.J. Monagement Ancient Chinese proverb: "Anyone can learn from their own mistakes but it takes a wiseman to learn from the mistakes of others." I myself, never claimed to be wise. If nothing else, being here, l've learned three very distinct things: Life's too important to take seriously. If it wasn't a challenge it wouldn't be worth it. And most importantly a man's wisdom is measured by how much dust he can find in a clean room.

MARK VINCENT SHURMAN Shrum Chesterton, Ind. Chesterton, ind. Aeronautical Engineering I can't say I enjoyed every minute, but I've learned much and had many of good times. Thanks to all my friends for making good memories. I hope it was worth it.

MICHAEL JUDE SPITZ South Bend, Ind. Aeronautical Engineering I'll admit that the Academy was indeed an experience that I'll look back on. As I do reflect, however, I know I would have never made it without the prayers from my friends and the support Christine gave me when times were bad. Hove them oll

LYNN MAY STEER Colorado Springs, Colo. Humanities I applied my senior year on a Tapplied my senior year on a dare. The hometown class clown? They all said I'd never get in. So I got in. I'd never finish BCT. So I finished. My first SFO said I was too dumb to make it. So I made it. Never give up if the twich that count! it's the tryin' that counts! Now they say I'll never fly F-16s - expect me when you see me boys, or I'll wax your tail, too!

CAREY STEVEN THOMPSON Westminster, Colo.

Management Larrived back at the Academy after a season of skiing in Steamboat. Definitely the best decision that could have happened to me. Some advice to everyone who envies the civilian college life. With the opportunities offered here, the grass is greener on our side of the fence. I have set the reallistic goal of becoming the ultimate being of time, space and matter. But if I can't do that, I'll probably go on welfare.

JERRY LYNN VAUGHAN JR The Captain Alta Lomo, Texas Operations Research I guess that someday, I'll think of this place and remember only the good times. There were good times and good friends. I'll remember you all. After this, we'll all move on, but as

BRETT ALAN VONSIK

Chief California, Pa. Management I came to the Academy expecting a challenge. What I found was a struggle with the Academy and myself. I've changed since I've been here and I feel it's for the better. I have made many new friendships that were born of joy, fear, love, and need; all the things that are the essence of man and the things that, through my friends, have come to change me forever. My friendships will last a lifetime!

DONALD DAVIS WRIGHT JR

Aurora, Colo. Electrical Engineering It is truly amazing how much I actually learned here. I learned some from the Dean, and some from the Commandant, but mostly I learned to avoid fanatics and depend on my friends. I just hope there are fewer fanatics and enough friends in the future for my classmates and me.

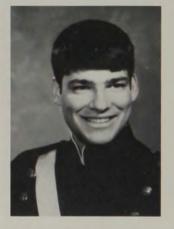

"BARNSTORMERS"

78

ROBERT KAZUO BAKER Bake, Bob North Syracuse, N.Y. Basic Academics The Academy and I came together with great expectations in June of '81. Looks as though the the Academy and I were both disappointed. However, I learned some invaluable lessons and met some great people that I can always call friends. If I did get out with a commission there are two people that I am grateful to. One is God for providing me with the will. The other is me for providing the sweat. Loter.

ANTHONY JOSEPH CARRELLI

Hammonton, N.J. Basic Academics These past four years have been a lot of things. They have been some of the best times of my life, but they have also been the worst of times. Through it all though, I have grown close to some people I can really call friends and nothing in this world can tkae that away. It was never easy, but I made it. Thanks Mom and Dad for your support.

CHRISTOPHER MICHAEL CASSIDY Chris Novato, Calif.

Chemistry I'm inspired to mention these thoughts: At the Academy I've found friends to love and trust, I've discovered an unattainable idea to commit my life to, and I've rediscovered my God to whom I bear my soul. I'll be best remembered by the thoughts in these two quotes: "We are made strong through the struggle and soft through peace and luxury." from Dune. "There is more to life than increasing its speed."

ARVOLD PAUL FARBARIK Arrie Siverdole: Vosh Engreening Physics Twos born to live fors and twos, / Tom desined to die swit and gorous/ For mise is the tie of the sword / And while the is of the sword / And smile upon my foor. 'Jeffrey Allen Moore

GENE MICHAEL KOWALSKI The Hooch Erhard, Minn. Aeronautical Engineering I made it through the last four years on three things: the support and love of Mom and Dad, the companionship of a variety of young ladies who made the weekends worthwhile, and most of all, finding the lif "time friendship of the other 2/3 of "The Boys" Don and John. The three of us did our best to determine what really gives our lives its flavor. I think we've found it. but I gin't tellin'!

TIMOTHY ALFRED LEHMANN A1f, Screamin Woodsrock, Md. Engineering Sciences They said I'd have some of the best and worst times of my life. They were right. Say what you will, but this place works. Thanks Stro - I owe it all to you. To Sandy, Jim and Sarah, you will never be forgotten; thanks for keeping me human. Philosophy - Keep your pretty words and poems, show me how

I a. If you lose yourself ou've lost it all. Family and friends are everything.

MICHAEL ANTHONY MANKUS Indianapolis, Ind. Electrical Engineering A quote by Karl Von Clausewitz sums up my feelings of what the Academy is all about. "...the time is yours; what its fulfillment will be, depends upon you..." I believe this extends through all facets of life, throughout life.

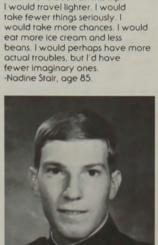

NEAL DERNARD MCELHANNON Colorado Springs, Colo. General Engineering "God watches over me mighty close." I would like to give special thanks to my father, family and friends. I couldn't have made it without them.

JAMES MICHAEL MONTGOMERY Monty Renick, W.Va. Management Anything worth having is worth working hard for.

DANIEL SEAN O'CONNOR Warrensburg, N.Y. Management

If I had my life to live over I'd like to make more mistakes

next time. I'd relax. I would

limber up. I would be sillier than I have been on this trip.

CHRISTIAN MICHAEL PELOZA Pelotes

Awburn, Wash. Astronautical Engineering Nothing left to do but smile, smile, smile.

RONALD BRYAN PERRY

Kon Ontario, Calif. Engineering Mechanics If I had chosen any other path through life, I would not have been as challenged as I was. Conversely, the rewards would not have been as great. But life is a road of many twists and turns, and there is much still to do before I can look back. With ability comes responsibility. Though the Academy is in many if not all ways "unique" the friends I have made over the years are the one thing I will remember most.

TROMAS GETALD ROTHWELL

50 Sugar Genaty Astronatica Espineering During my four year visit at the Academy everytime (Beh) wata in comp of my life. I wate in comp of my life. I wate

BRIAN MARK RATH Phoenix, Ariz. Engineering Sciences The thing that's made this worthwhile is the friends I've known and the times we've shared. No one deserves friends as good as you, and no one will miss you as much as I will. Maybe someday we will live the dreams that have carried us these years. Hopefully through it all we will never forget us, or what we did. From 31 to that last bottle of champagne, to God only knows.

BRIAN ALLEN RENO Chemo Euclid, Ohio Electrical Engineering You know -it really wasn't all that big of a deal. ...''And do one more ''vous'' for me.'' Blue Skies!!

THOMAS GERALD ROTHWELL

Tom Stuttgart, Germany Astronautical Engineering During my four year visit at the Academy, everytime I felt I was in control of my life, I woke up. One thing I've learned is that if at first you don't succeed, try the approved solution. Despite the dietician I still managed to gain 15 pounds. While the reader's thoughts reflect on the Academy my thoughts and I are far removed and lying on a sunny beach in California.

JOSEPH SCOTT SEPESSY Tuesday

Barboursville, W.Va. Barboursville, W.Va. Basic Academics I've had alor of good times, and I've made some of the best friends anyone could have. I also know that if I didn't have my family, my friends, and Lisa by my side, I wouldn't be writing this now.

DAVID THOMAS STOCK WELL Hendersonville, Tenn. Biology The Omack realized the nature of the game, but chose instead to

play by his rules; he did. The upperclassman, trained like povlov's dog, he then played properly...and was further conditioned. It was worth four years of my life.

RONALD BARRY TRUESDALE

Texarkana, Texas Engineering Mechanics On so many lonely days, I thought I would never graduate. But now that my turn has come, I can say that I am glad I stuck to it. I wouldn't have made it without support from Scotty and the Deerhunters, Greg, Joe, The Perrot's, Mom and Dad, and especially Jana. ThanksI Ås I head out the gate for the last time, I'll be happy to say that it's finally all behind me.

DAVID SCOTT WILLIGROD GrodN Oklahoma City, Okla. Engineering Sciences

Oklahoma City, Okla. Engineering Sciences Golden memories. Skydiving was fun...naw, it was great! EFS and then the dreadful rendezvous. Cuts like a knife. No more PLF, Vous, or skirt chasing. No more skydiving. Go for it! I am one. Boogie till ya bounce and then bounce back. Next stop UPT.

PAUL ZAVACKI Zav Bend, Ore. Human Factors

Human Factors I got here the hard way, in the last class through Mrs. Millard's reform school, and left here the hard way, spending half of my firstle year on probation. Having the best friends anyone could ask for made it bearable and makes looking back easier. Even though the diploma will have my name on it the credit goes to family, friends, and Sharon for the love and support that made it all possible. Dare to dream....

"THUNDERBIRDS"

WILLIAM STEVEN COOKE

Steve Greensboro, N.C. Basic Academics It's over!! Thanks to my parents, Patry (my Bubba), and the Big Guys! I don't think I could have made it without you. These four years have been the best and worst time of my life. Good luck to everyone, and God bless. P.S. I made it!!!

91

ERNEST ANTHONY DIMUCCIO

Mooch Greenville, R.I. Basic Academics I made it. Thanks Mom, Dad, friends, and Sgt. Slaughter. Pandemonium has broken out. I'll always remember swampy and the

elephants, Airborne, J.D.'s, Bob and Paula's, and the Red Stang. "What a long, strange trip it's been."

ROSS ALAN DUDLEY

Rad(ical) Cornelius, Ore. Human Factors Soon after my arrival at USAFA, I found a quote which I have never found again: "A Christian cannot make a bad soldier." Since then, It has been my goal to prove this precept. I could not have attempted this alone. I would like to thank my God, and all of those who through their prayers, guidance, and friendship have helped me on my path. God bless you always.

GREGORY MICHAEL HENDERSON

Greg St. Louis, Mo. Civil Engineering I want to thank Mom, Dad, Steve, David and Sue for all the letters and support they've given me these past four years. I'd really like to thank the Lord for always being there for me. More than anything I'll miss the friends I've made...I guess it was worth six years of college. "Someday we'll look back on this and it will all seem funny." Bruce Springsteen

CARL ALLEN HENRY

Pump Siloam Spring, Ark. Basic Academics Thank God, I have finally made it! I am glad I came here and even happier to be graduating from the Academy.

STEPHEN SCOTT JOHNSON Louisville, Ky. Military History All "character building" institutions, like prisons, monosteries, and reform schools can be slightly unpleasant at times. Over time we forger how miserable we might have been and laugh at our misfortunes. Thanks to all my classmates, parents, and friends, I survived the experience. After four years I can say that everything turned out well-enough and that if I could do it all over again I'd probably take the easy way out.

PETER ANDREW LEWIS Pere Reidsville, N.C. Aeronautical Engineering Here's to all the friends I made here, and will have forever. I've met the greatest people here, and the worst. I'm leaving without any regrets, four years were worth it...I wouldn't do it again. To fly, live, and die by the sword, it's better to burn out, than to fade away...that's all I ever really wanted from here. I recleved that and a lot more. I have to laugh. AahOww!

JANET CLAIRE LOCKIE

Jan Palo Cedro, Calif: International Affairs The people I've met are too special to say good-bye to, so I won't. I've made some great friends while I've been here, and I thank them for what life is all about! One chapter of my life is closing, but another is just beginning. I will miss you, my friends....I just keep movin 'cause it helps to ease the pain...

DINO VINCENT LORENZINI Oakton, Va. Astronautical Engineering "The grass is always greener on the other side of the fence, until you get over there and find out It's astro-turf." "Live fast! Die young!"

USE A. MENA Laso Rica Decrical Engineering

JOHN MATTHEW LYONS Matt Rancho Cordova, Calif.

Aeronautical Engineering There are two days no one should ever worry about: Yesterday and tomorrow. Four years of pre-paring to become an officer, a gentleman and a pilot have solidified that premise in my mind. But the time of preparation is over...it's time for me to fly. "Eternal vigilance is the price of freedom"...now let's get out there and be vig-ilant! Life awaits, '85; keep on runnin', don't look back, and, always, keep the faith.

THOMAS OWEN MARKEL

Tom Corona, Calif.

Biology To the members of the Air Force Academy Cadet Drum and Bugle Corps: past, present, and future a toast, both to hard work and good times; and to the spirit and dedication that makes it all possible. And to good friends, who know who they are. Thanks and...good luck. Seek ye first the kingdom of God, and His righteousness, and all these things shall be added unto you.

LISA MARTIGNETTI

Tarson, Ariz. Astronautical Engineering Are you still in school, living up to expectations?/ You were so relied upon everybody knows how hard you tried./ Just look at what a job you've done, carrying the weight of family pride./ You've been well behaved, been working hard/ But will you been working hard/ But will you always stay someone else's dream of who you are?/ Do what's good for you ar you're not good for anybody! -Billy Joe!

Good luck Edward, it won't be eosy.

TODD ALLEN MARTIN

Taylor, Mich. Basic Academics Only with the help of God, parents, and friends! Thanks Mom, Dad, Unk, Jay, Nadine, Renea, Holly, AM, Rod,

EN HENRY

ADAM GERALD SPENIK Spotsylvania, Va.

Electrical Engineering The purpose of the United States Air Force Academy is to provide instruction and expierience to me so that I can graduate and the so that i can graduate and become the best officer the Air Force has seen. After four years the happiest thing I can imagine is the image of USAFA in my rear view mirrow. My life philosophy is "He who die's with the most tours wise!" toys, wins!"

STEPHEN MARK VISEL Steve Hudson, III.

International Politics International Politics "For unknowns can keep imagina-tion trying journeying upward, striving tirelessly. Foith un-dying can keep ideals true." -George Hupp, Jr. Steve was never a doer, always a get her. Get her here, there and anywhere. Remember, in heaven George is punctual.

JOHN WU WONG

Wang Port Hueneme, Calif. General Chemistry I've learned so much here that I look back and see how limited in scope I was, and am. The most important things I've learned were not in academics, but in human values and especially friendships, without which I would not still be here. My love and thanks to Mike, Joe, Lynn, Sally, Orlando, and Mary— the most awesome people I have ever met. May they find happiness always

RICHARD ALLEN WOOLEY Rich Canton, Mich. Management "It was the best of times, it was the worst of times." This quote sums up perfectly these last four years. I have never hated and liked a place as much as this one. At the end it was the good times that far outweighed the bad times. I would like to thank everyone that helped me these past years especially my parents who without their support I would never have reached this goal.

"MAGPIES"

ROBERT STEVEN BAERST

Ogguls Anoheim, Colf. Electrical Engineering I should be fine as long as I'm able to laugh at myself. When the world becomes so serious that I'm unable to laugh about my problems then I know I'm doomed. Thanks to all of you in '85 that have made USAFA a bit more humorious and I wish you success in all your endeavours. A special thanks to my mother, for none of this would have been possible without her. Keep rockin', Andy!

GLEN CAMMARANO Brookline, Mass. Aeronautical Engineering You are right, Dad, power is to the man who thinks he can. Things do happen for the best, Ma. I couldn't have done it without you, sweetheart

Atlanta, Ga. Basic Academics These years at USAFA have been good for me. They hve helped me to understand the many faceted nature of man. They have also allowed me to understand that I connot go it alone. I am so very grateful that you were there for me, Susan and Patrice, when I needed you most. I am forever in your debt. Thanks to my family and thanks most to you, God, for seeing me through.

SCOTT EDWIN DRACON

Drokes Billings, Mont. Engineering Mechanics My whole time here could be de-cribed as a struggle on and off Ac. Pro. I would like to thank AC.PTO. I would like to thank the friends and teachers who helped me get by with a special thanks to Dave for my survival in MECH 320. As for Mom and Dad, "If I ever get the urge to go through the Academy experience again, have me go lie down until the feeling goes away!

BROOKS LEE FREEMAN Florence, Ala. Operations Research

VICTOR I YNN HEDGPETH

Bladenboro, N.C. Aeronautical Engineering I want to thank God and praise Him for allowing me to attend the Academy and giving me the The Academy and giving me the desire and strength to accom-plish all I have in the past four years. Thank you so much Mom and Dad for your never ending love, understanding, and encouragement. Thanks to all my true friends who made life worth histor and the Academy worth living and the Academy worth remembering. -Matt 6:33

KEVIN TODD HORTON Hooch Pensacola, Fla. Management The first one I want to thank is God himself, without whose love and blessings I would never have made it through here. I want to thank my Mom and Dad for their support in all I did and being there when I needed them. Thanks especially to my sweetie, Pam for adding that special some-thing to my life. I am thankful for the friends I made here like Ski, Cau, Bearst, Hedgebrush, Jon (Ripples) and all the others.

May God bless.

EILEEN MARIE ISOLA

Chester, N.Y

Management "The road goes ever on and on/ Down from the door where it began./ Now far ahead the road, has gone,/ And I must follow, if I can,/ Pursuing it with weary feet./ Until it joins some larger way./ Where many paths and errands meet. / And whither then? I cannot say." Thank you, Mom and Dad, for keeping faith in me during the good times and the bad; for being my best friends during the long five years. I love you

HOWARD CONRAD JUDD

Jude Preston, Nev. Aeronautical Engineering The Academy didn't exactly meet my expectations and I, the kid from nowhere, probably didn't live up to theirs. But I sur-vived. In the long run I know I've gained a great deal friends from 18 and Magpies, fond memories, an Aero degree, and chance to prove my-self in the cockpit. Thanks Mom and Dad for making it possible. It's only the tip of the ice-berg. Always remember the big picture

ROBERT AUGUST KAUCIC JR Bob/Kooch Newark, Del. Computer Science I can't say that I've enjoyed my stay here, but I sure did learn alot about myself. There were times that I didn't think I could get those 18 lessons done the night before the G.R. but somehow the machine

managed. I'm glad for what I'll be leaving this place with, but I sure wouldn't do it again. No pain, no gain!!

95

KENNETH BART KLEINLEIN Bart

Salt Lake City, Utah General Engineering Spent three years with the best in blue - the class of 1982. Resigned and enjoyed three years as a civilian. Glad to be back with 85. Enjoyed being a soaring I.P., working on my Z-28 and pushing 'Trons. Looking for-ward to UPT and a fighter assignment. Lord guard and guide.

JOSEPH LA MAGNA JR La Sagna Wantogh, N.Y. Biology All things considered it could have been much much worse.

STEVEN KEITH LAMBERT Stein

Daleville, Ala. Basic Academics The best way for me to use this space is to say thanks to some very speical people. To Mom and Dad, David, and Shan -thanks for the support. To Greg and John - thanks for your true friendship. To Lt. Col. Anderson, Sgt. Fairchild, and Maj. Morse -Thanks for your advice and guidance. This dream could not have been accomplished without you! I'm excited that it's over, but more than that, I'm excited that it's just beginning.

MICHAEL THOMAS LAWLESS Braintree, Mass. Human Factors

"If you can keep your head when all about you..." The good times I've had and the the friends I've made already compensate for everything else. Brooks, Mike, are you busy right now? Can you do me a big favor?

RICHARD DENNIS JAGT

Wenonah, N.J. Engineering Sciences Born and raised in East Brunswick, N.J. I was lucky enough to stumble across an Air Force brochure and inquire about the Academy. I say lucky because the experiences of the past four years have taught me more than most people will ever have the opportunity to learn. The good friends, good times and a sense of accomplishment have made all the trials of the past four years worth while. Defensores Libertaris.

SUSAN LOUISE KRAMER

Sue Sr. Charles, Minn. Management It's finally over. We have good times to remember, and have done

things we never thought we could or would ever want to do again! I'll remember this place for the good times and the many friendships made. Don't forget the choir trips, the weekend CQ shifts in Dirry Thirty, the late night studying. Thanks Mom and Dad, for all your loving support. Play the game but win.

MATTHEW STEPHAN LYNDE

Billings, Mont. Computer Science This place has taught me much for which I'm grateful. I developed frinedships which will last a life time, but there are two people very near and dear to my heart. To the both of you: Hang in there! "Be yourself, give your free will a chance. You've got to work to succeed."

OIC AUNE

CHARLES ROBERT MORRISON Hagerstown, Md. Aeronautical Engineering

BRADLEY EARL PETERSON

B. Earl Colorado Springs, Colo. Aeronautical Engineering Coming to the Academy was the fulfillment of a five year dream. So you really want to. It's time to get out there and work on new dreams. I thank Tracie for her endless understanding and special place in my life.

TIMOTHY CHRISTIAN PHARRIS Fiver Centerville, Tenn. Military History Tim had a flair for leadership (I'm serious!) but he never forgot the little people. Being a military history mojor left him time during Ac call for football, Magnum, Simon and Simon, and Hillstreet while still completeing his homework! On the baseball field, he terrorized those who would try to steal second. Above all, I'll never forget the BYOC's, air bands, and the greatest air gurtarist that ever lived!

DARRELL KEITH RICHARDSON Alexandria, Va. General Engineering

MICHAEL PAUL RITS Mike

Honey Grove, Pa. Civil Engineering The Academy has been another stepping stone in my life to bigger and better things. I thank God for the friends and "family" I have acquired here and for the personal growth I have experienced — physically, mentally, and most of all, spiritually. As I continue to serve in the Air Force, my priorities will always be God. family and country.

BRIAN DAVID ROURKE Evergreen, Colo. General Engineering

BLAINE OWEN RUDOCK

Gumby Bossier City, La. Aeronautical Engineering I completed the program, and what a time I had. I'll always remember a few things like the devastating bottle in my car. and the mirror that everyone liked, but most of all, let's remember the responsibility that we were taught.

GIFFORD PATTERSON STEIN Giff

Ogden, Urah Mathematics Remember me for this: a few attributes shown to be useful: attributes shown to be useful: Knowledge, courage, under-standing and friendship. My goal in life: win it big in a lottery. Christ was a criminal in his time, too. Sid vicious died for you. I came, I saw, Usef lleft

RICHARD DENNING ANDERSON Albuquerque, N.M.

Biology It's been a long hard road and I don't think any of us could have made it alone. Thanks to all who kept me going including Fred and lan, two of the greatest room-mates ever; Tina; and especially Mom, Dad, and Ali. I never would have made it without you. I hope I was able to return the favors You made the worst times not so bad and the best times even better. Stay close!

MICHAEL TODD HURE

Souri Delano, Calif. Aeronautical Engineering "This is the end. / Beautiful friend. / This is the end. / My only friend, the end. / Of all our elaborate plans, the end. / Of everything that stands, the end. / No safety or surprise, the end. / I'll never look into your eyes again. / This is the end." -J.D. Morrison

Hank Camp Hill, Pa. Civil ENgineering "If there's one thing in my life that's missing, it's the time that I spend alone, salling on the cool and bright clear water. It's time for a cool change!" -LRB

TILGHMAN HENRY KEIPER III

ROBERT LOUIS MACHO Rob Portland, Ore. International Affairs

STEVEN GREGORY MARCH Steve Woodrugg, Wis, Computer Science

LAURELI MAZIK Redlands, Calif. Management Chins were in at Wolfpack, but it was still fun due to Lori, Philecia, Dave and the rest of the pack. Thirty meant halfway, but due to Jamie, Clay, and class rings memories will not stray. Running was my expertise, and it was Gary, Joy and Coach that helped me reach my peak. But most of all, I've failed. I've conquered, I've cryied, I've laughed, I've hurt, I've loved, I finished with the help of all.

ANDREW MICHELL MUELLER Andy, Mulehead Brown Deer, Wis. Chemistry I never figured out why I was and if I had I probably would have quit. I guess I really wanted to fly, but dreams aren't everything. I used to laugh at squadron commanders. I always lived for the weekends and then slept through them - unless I was somewhere with chorale. I spent my best times with my friends, especially those in cluster 4511. But I never could have done anything without the support from Wisconsin.

WESLEY ALLAN OLSON Wes Sr. Paul, Minn. Human Factors Wes doesn't know what to think of USAFA yet. He used to think "It just doesn't matter," but now he realizes some things do. Wes played ball a little, and met love. Wes considered TV Guide to be a literary classic. Wes hopes Mr. Potatohead will introduce him to happiness after graduation.

FRANK SMEDLEY PECHIN III Downingtown, Pa. International Affairs I think my favorite pastime at the Academy was complaining, hopefully when I am graduated I can exchange it for flying.

102

MICHAEL JAMES PIIRTO

Airborne Terreton, Idaho General Engineering "Let me tell you two things: First of all, no one can hurt me First of all, no one can hurt me unless the Lord wills it or home. And if the Lord were to make a choice between me and someone else who didn't know the Lord, I would hope the Lord would call me home and give that other person more time to come to know him." Michale Ohler USMC COLOSSIANS 3:17

Crescent City, Calif. Civil Engineering I put a lot of effort into this L put a lot of efforr into this place: two years to get in and four years to get out, spending the last year practicing the proverbial rear window view. But I have to say I could not have made it without God, good friends, care packages from Mom, and Reo Speedwagon who once sang

sang "It's time for me to fly!" It is, indeed, time for me to fly.

THOMAS MARIO ZUCCARO Zuke Mound, Minn. **Basic Academics**

"ROADRUNNERS"

Chief/Otis Altus, Okla. Basic Academics I started this brief adventure five long years ago. I made it through countless class committees, and appeal boards. I learned

I learned never to give up; never to quit. Above all, I learned to trust God "WHAT you are is God's gift to you ... What you make of yourself is your gift to God." If only the answers to life's many problems could be found in the library's approved solutions.

CHAD J. BASLER Festus, Mo. Civil Engineering

SARAH SANDERSON BROOKE SARAH SANDERSON BROOKE Fr. Washington, Pa. Computer Science "I shall be yelling this with a sign somewhere ages and ages hence: Two roads diverged in a wood, and I took the one less traveled by, and that has made all the difference." — Bobert Erost - Robert Frost

PETER ALLEN CALLAWAY Florissant, Mo. Computer Science

TOI VONISE CORNS New York, N.Y. Management I would have never made it without you. Thanks Mom and Dad.

MICHAEL SCOTT DEBRUZZI Mike

New Bighton, Minn. Engineering Mechanics I'm not exactly sure what it takes to get through this place. but since you're reading this I must have it. I can't say that I've thoroughly enjoyed my stay here, but I've made the best of it. Nobody has gotten through here all by themselves. Personally I have all of my good friends, my parents, Shanna, and the guidance of my God to thank. "What a long, strange trip it's been."

SAMUEL FORREST DETRICK

Hagar Columbus, Ohio Basic Sciences In retrospect, it was tough but well worth it. One of the best rewards here was working for excellent instructors and commanders. I've learned much about doing what's right and I'll try to let that guide me in the future. From the jungles of Panama to the blue skies of Arizona, it's been a good four years and I'm indebted to those who helped me along the way. Thanks to Mom and Dad.

BRUCE CHARLES EMIG Plattsmouth, Neb. Engineering Mechanics The past four years have been full of memories. In time, only the good will remain. Thanks to Kathy, Ron, and all my good friends for making it possible, and the Lord for helping me through it all.

MICHAEL WARREN FOSTER North Little Rock, Ark. Engineering Mechanics

RONALD EUGENE GRAVES

Dig Seartle, Wash. Basic Academics Looking back I would have to say that many people have made the past four years all worthwhile. My biggest regret is that Marc will not be there, among us, at graduation. I would like to thank Bruce, the guys on the soccer team, and the rest of my friends for all the great times. but most of all, I would like to thank my family and the Lord for always being there.

RODNEY NEIL GRIFFITH Rappin/Rodney New York, N.Y. International Politics In spite of the trying times here, which have led to too many gray hairs; there have been more than enough wonderful people (even a few cadets) to help me when things got me a little down. My warmest appreciation is for my parents. Thank you for having so much faith in me.

DALE ALLAN JACKMAN

Mountain Smithburg, Miss. Smithburg, Miss. Civil Engineering "I was born to live fast and furious. I am destined to die swift and glorious for mine is the life of the sword. But when i die there will be no regret in the there and a smithe unce one my face and a smile upon my lips." I would like to thank my Mom and Dad for all their support, and God for the strength and guidance.

PETER JAHNS

Pete Houston, Texas Aeronautcial Engineering You only live once, so you'd better make the most of it better make the most of it while you can. Live each day to the fullest and remember that you have to let go of the familiar to reach for the stars. Work hard, play hard, and don't be afraid to follow your dreams, so that when it's all over, you can look back with satisfaction and say, "You only live once."

TERRY LAVAUGHAN JORDAN

Milton, Fla. Basic Academics Basic Academics If you read this you'll graduate because if I can make it any-one can, and thank God I made it! Prep School is where all the memories began. Thanks to some good friends there and at the Academy these five long years were made bearable. I hope I can stay out of trouble while I'm in the Air Force. Thanks I'm in the Air Force. Thanks Mom, Dad and Sis for all the love, support and prayers.

DAVID JOHN KOSSLER Dave Columbus, Ohio Electrical Engineering I gave it my best. It was hard. More than anything else, I learned to keep myself motivated learned to keep myself motivated each day like today (Sunday) when I have two labs and a GR to prepare for tomorrow. And I'd rather watch football. I can't name all of the people who have helped me these four years, but I would like to thank some of them: my roommates, friends. instructors, my parents and above all, God!

CHARLES GARDNER MORRISON Pontiac, Mich. Operations Research USAFA has been a trying exper ience but one that we can all surpass. Memories and friend-ships are formed, which will never be lost, but the most important thing is to find outlets that keep you sane, even if a rule or two are broken. Never give up your dream as you are graduated and start a new life.

So as the song sings! Off we go!!!

SCOTT ALAN NEWMANN Neoms Missoula, Mo. Aeronautical Engineering Becoming an Academy graduate a longtime dream of mine and yet only a bridge to other dreams. only a bridge to other ordents. While at the Academy I tried to be a good cadet, taking advan-tage of the opportunities: Choir, an intramural boxing championship and a set of wings. But all the time future dreams called from the end of the tunnel; dreams of jets and spaceships to take me to new adventures far away.

STEVEN CLARK SHIMP Des Moines, Iowa Social Sciences

NATE CALL TERATED

PETER ROBERT STRAIGHT

Pere Cortland, N.Y. Military History Four years of USAFA can blur your vision — literally and figuratively. I avoided the former by dumping the physics major, and the latter by keeping a perspective on things (usually). I leave here a better person than when I came, and I know I've always tried to do what was right. By now, I've got my bars and I'm gone. Can I be anything but happy? "It don't get much better in this Cadayat." -Sgt Plunk

JAMES DAVIS TAYLOR II Jim

Honolulu, Hawaii Mathematics Mathematics I came an idealist, I became a cynic, and I'll carry away memories that will last forever. From the boys in four to "Killer Margaritas" at Rugilio's bar and parties that lasted until Jeff's franche with the state of the feet hurt all that remains of the memory is the good. It's time to move on now that the Academy's lost its sense of humor, but the friends are still great, and reality is as dangerous a concept as ever.

HAROLD EDWARD WATERS JR Muddy Cumming, Ga. Human Factors This is a fine college you got here. You got your ivy walls, lecture halls, full dress balls, and you got Eddie for the nasty stuff

DAVID WAYNE WRIGHT

Dave Dave Grove City, Pa. Operations Research This is to my Insane friends who helped me keep my sanity.

"WILD WEASELS"

Wings of Blue

The Academy's Wings of Blue parachute team continued its domination of the National Collegiate Parachuting Championships, earning its 18th title in the last 20 years.

Cadet First Class Paul G. Schmidt, of Lynnwood, Wash., led the team to the victory, while earning the title of Absolute Champion. He placed first in the accuracy event and in the overall competition, while taking second in the style event.

The championships were held at Marana Airport, near Tucson, Ariz. They are broken down into three events: accuracy, style and relative work. Each event has four categories, master, advanced, intermediate and novis. The Academy contingent consisted of 19 competitors, only four of which were in the novice category.

Coming in for the landing.

The Academy team took 27 out of a possible 47 medals during the competition. Eleven medals came in the style competition, five in the accuracy and 11 in relative work.

The accuracy event entails exiting the jump aircraft at 3,000 feet and flying the canopy to a target measuring five centimeters (about two inches). Cadet Schmidt won the four-jump event with a total score of six centimeters. His nearest competitor came in with a 25 centimeter score.

Style is an event where a competitor has a set of pre-determined maneuvers he must complete in a set amount of time while free-falling. Relative work is broken into two or four-man teams, which must complete several formations while free-falling. The Academy set the collegiate record last year with 22 formations.

Coach Van Derau, of Dayton, Ohio, has coached Wings of Blue for the past two years. He came to the Academy from the Army's Golden Knights parachute team, where he earned the 1978 individual national championship.

ATC

Leadership

During ATC Leadership cadets help train basic airmen at the Air Force Basic Military Training School located at Lackland AFB, Texas During the cadets' six week stay at Lackland they are afforded opportunities to interact directly with both the basic airmen and the enlisted personnel who serve as instructors and supervisors. Cadets help to teach basic drill manuevers, dormitory arrangement and cusotms and courtesies to the enlistees. Events such as parades and retreats, culminatieng with the organization and performance of a cadet parade. The most rewarding aspect of the program is that cadets are treated, and expected to act as, junior officers in the Air Force.

1985 Presidential Inauguration.

Cerberus Frozen in Washington

It was a lesson in artic survival for Cerberus III when they were sent to Washington, D.C. to represent USAFA as the number one marching squadron. As it turned out, the marching services of third squadron were not required at the parade for the 50th Presidential Inauguration, due to subzero weather. Who would have ever thought that cadets would be disappointed, because they were not allowed to march?

The events started, January 12, with a march-off between squadrons 3, 20, 30, 37, which were the best marching squadrons in their groups. It seemed as though the weather that day (snow) was a foreshadowing of what was to come. On Saturday, January 19, with bags packed full of warm winter uniforms, the cadets of third squadron boarded a C-141 to Annapolis where they would spend the weekend with midshipmen. That was almost as unbearable as the cold weather itself, but it turned out to be an interesting experience. They showed their hospitality as they directed us to their company TV rooms, filled with many useful items: a VCR, microwave, popcorn popper, refrigerator, and anything else a company was willing to purchase.

Almost everyone did some sort of sightseeing Saturday evening and Sunday morning. The city of Anapolis was two feet outside the Academy gate, so it was easily accessible by foot. Many others made stops at Georgetown, Washington, D.C., and the Smithsonian Institute. Everything was very close, but you couldn't stand outside for more than 15 minutes without freezing. As the temperature dropped below zero, it became apparent that frostbite would be a factor for Monday's parade. It was for this reason that the Inaugural Parade was cancelled, and many cadets were disappointed as they saw the words flash over the screen. during the Super Bowl

After it was all over, we were bussed back to Andrews AFB where we board-

The firstles pause for a group shot.

ed the C-141 back. However, the weather would have one last shot at us, delaying our plane by several hours. We managed to hobble into USAFA at 2:30 a.m., Tuesday with classes staring us in the face within a few hours.

All in all, everyone had a good time. We were a little disappointed with the weather and the loss of a chance to be on national TV, but anything was better than having to go to Saturday classes.

The Department of Aeronautics, hidden away in the H section of the sixth floor of Academic Wonderland, takes the opportunity of providing all cadets with an understanding of, and appreciation for, the basic principles of powered flight, and an introduction to the quantitative evaluation of energy usage, with a great deal of pride and professionalism. This is accomplished through the teaching of two core curses, Aero 311 and Aero 312. Aero 311 provides the cadets with the basics of powered flight, and gives them the chance to increase their doolie knowledge of the aircraft on the terrazzo, with its ever impressive field trip. Aero 312, taught by Captain Chaffee . This gives cadets the chance to enhance their knowledge of thermodynamics, or why engines, and refrigerators, etc. work.

For those codets missing a few braincells, and looking for a good no-risk financial investment, the Aeronautical Engineering major offers the chance to increase basic knowledge with a number of advanced courses taught by the department. These courses provide a strong background in the fundamentals of flight mechanics, propulsion, aerodynamics and structures. One course, is Aero 377, teaches the Aero major to communicate and play games with "Billy Burroughs", the computer that will become the Aero major's best and only friend as progress is made up the Aero course ladder. The Aero major provides cadets with superior knowledge for future opportunities.

While confining most cadets to the dormitory and the computer center, the Aero major provides a chance for relaxation at the Aeronautics Laboratory. Under current contract for expansion, the lab is a superb reasearch and teaching facility that provides cadets with the equipment and guidance to perform reasearch and further their education through the use of the subsonic and the trisonic wind tunnels and the four engine test cells.

With all of the fantastic opportunities that the Aero majors has, how can he or she go wrong? Well, many cadets enter the Academy with an Aero degree in their minds, but this degree, without a doubt is earned, not given away. The Aero Department wants to produce professional Aero majors, but it takes emmense desire and dedication on the cadet's part to survive.

(Article by Blaine Rudock, '85)

AS

The Astronautical Engineering Department grooms its graduates to cope with the technological sabre edge of the Air Force. Space Shuttles, antisatellite weaponry, control systems, laser beams and photon torpedoes are all Air Force projects begging on bended knees for the few Astro graudates that escape the winnowing process of computer room weekends and sleepless nights.

The Astro Department also manges Engineering 430 - a course near and dear to every senior's heart. A high percentage of the 430 projects contribute significantly to benefiting a handicapped person's life.

The best part about being an Astro major is that you can work on a variety of projects. Humanitarian projects are great, but it's nice to know you'll get a chance to defend our country in space.

BIOLOGY

The Biology Department this year was lead by Lt. Col. William J. Cairney . He took over the Biology Department for Colonel Orwyn Sampson who is on sabbatical for two years. Colonel Sampson's sabbatical is with the Jet Propulsion Laboratory (JPL) in Pasadena, California.

Our Distinguished Visiting Professor, J. Frank Cassel, presented a Biology 495 class entitled "Philosophy of Biology". In this class Professor Cassel provided a stirring review of literary studies of major historical events which have shaped the history of biology and led to major discoveries. The cadets in his class read from classic works in biological science. Toward the end of the semester the lectures and discussions related these works to the contemporary discipline of biology and emerging ethical and moral issues. Professor Cassel, a specialist in animal ecology, has brought to the Academy a full and vivid picture of our world. A picture he most avidly shared with the cadets and faculty. Our thanks and admiration are extended to Professor Cassel.

We started 1984 with a gastronomical delight that, probably, will not, should not, can not, be forgotten - the "Great

Biology Chili Cookoff." The winner for the second year in a row was Major Hunt and his advisees. The loser was all of our stomachs and the roomate that didn't go to the cookoff! The year also started with some excellent poster sessions by the biology majors who had the Cadet Summer Reasearch program. At Los Alamos National Laboratories in New Mexico C1C Mark Deysher studied the "Morphology of Rodent Macrophages", C1C Joseph Andersen worked on "Arsenical Compounds as They Affect Live Tissues", and C1C Stephen Higgins studied the "Toxicity of Oil Shale Compounds". While out at NASA-Ames, Moffit Field Calif., C1C Robert Digeronimo studied "Muscle Fetal Development Under Hypergravity", and C1C Gordon Peters studied Space Adaptation Sickness." And all by herself at the Johnson Space Center in Houston, Texas, C1C Wendy Cook had intensely reasearched an area of Space Microbiology". During the school year many cadets became involved in special research programs under Biology 499. C1C Chevalier Cleaves and C1C Linda Sverdrup each put together an excellent 499 project relating to "G" tolerance and physcial

fitness. C1C John Pfaff and C1C Robert Bussian honed their surgical skills, iniatially learned cutting steak at Mitchell Hall, while working on a 499 project for Maj. Postlewaite on "Small Animal Surgery as a Research Tool".

The Biology majors were able to take advantage of some very interesting field trips this year. In Biology 383, Anatomy, students were allowed to observe an autopsy at a local hospital. Biology 420, Biokinetics, toured the Olympic Training Center in Colorado Springs. The Field Ecology course took many excursions of the wild Academy ground identifing the local flora and fauna. They also took a one day trip to the University of Colorado's Mountain Research Station at Niwot Ridge, Colo. On this trip the class had the opportunity to examine several alpine tundra communities, Isabelle glacier, and the facilities of the University's research station. Biology 331, took a half day trip to the Denver Botanic Gardens where they examined both the outdoor gardens, conservatory and working greehouses that are not normally open to the public. This trip provided an opportunity to see many of the different types of plants discussed in the course.

M

Cadet Fourth Class Vinkman had always been interested in psychology, and seriously contemplated being a Behavioral Science major. He thoroughly enjoyed his BS 110 class, but before he decided upon a 'fuzzy' major he needed to find out more about what the major could offer him. He decided he would go up to the Behavioral Sciences and Leadership Department and see what it had to offer.

Discretely using an even numbered stairwell, he quickly got to the sixth floor of Fairchild Hall and found an organizational chart of the department. Studying the chart, Vinkman said to himself, "The Department of Behavioral Sciences and Leadership is headed by Colonel John W. Williams Jr. and has 41 officers on the faculty. Now, I need to select a likely officer to ask a few questions." After a minute or so, his eyes kept returning to the same name and he kept asking himself "I wonder if it's really her?"

Noting the room number, he located it in less than two hours, all the while thinking to himself, "Even the offices are designed like a maze up here. I wonder if I am an unwitting subject in some laboratory experiment?" He finally reported to the Instructor. "Come on in," said Captain J. Brothers, "What can I do for you?"

"Well ma'am, I'm looking for some information concerning the Department of Behavioral Sciences and Leadership. Can you tell me about the department and the three majors it offers?" asked Vinkman.

"Certainly", answered Captain Brothers, "The 41 faculty members of this department teach three core courses to approximately 1,600 cadets every semester. At the same time, our department offers 15 other in-depth courses to our 170 academic majors. Our academic majors have three choices of tracks to specialize in: these are Psychology, Organizational Behavior and Human Factors Engineering."

"Gee, there sure are many cadets majoring in our discipline," Vinkman exclaimed. "With these diverse types of tracks, what types of background and experience does this department's faculty have?"

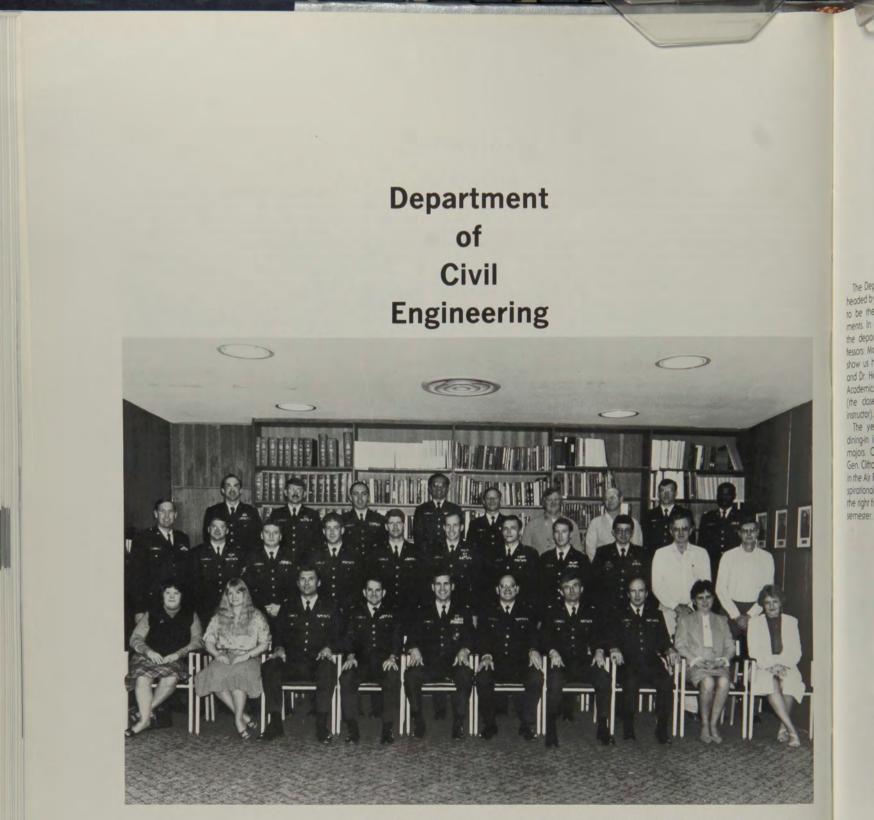

"Our faculty comes from a multitude of backgrounds which include careers in such fields as missile operatons, research and development, pilot, navigator, counseling and social actions," said Captain Brothers.

"I understand you have majors in psychology, organizational behavior and human factors engineering. What else do your cadets do? Research is what I'm really interested in," answered Cadet Vinkman, his eyes widening. "Can you give me some examples?"

"Usually 10-20 cadets are involved in cadet summer research each year. Some of our cadets have been to NASA's Ames Research Center for research on mental workload; WrightPatterson AFB, Ohio, to work on pilot workload in the Flight Dynamics Laboratory; and Edwards AFB, Calif., for work on the F-15/F-16 Aircraft Test and Evaluation Phase."

"Are any of your faculty involved with research?" The cadet asked. "You could always help the faculty with their research. Currently, our faculty is involved with nine different research contracts valued at over \$90,000. For example, NASA is funding a research project in investigating habitability issues in longterm space flight. Also, we have a large project with the Defense Nuclear Agency studying the impact of shiftwork on security police morale, health and performance. Of course, there are many others.

These contracts have allowed the faculty to bring the latest developments in the areas of space station habitability, shift work, subjective pilot research, organizational structures, and soviet human factors engineering research to the classroom." "There is a Biannual Psychology Symposium sponsored by the department." In April 1984 more than 350 individuals throughout the U.S. attended the Ninth Psychology in the DOD Symposium at the Academy. The guest speaker list included Dr. J. Richard Hackman, a highly quoted and respected Professor of Organizational Behavior from Yale University and Dr. Harry L. Snyder, Human Factors Engineering Department Head, Virginia Polytechnic Institute.

Front Row: Ms. Krakovsky, Ms. Zeine, Maj. Van Saun, Maj. Topper (Deputy Dept. Head), Col. Swint (Dept. Head), Maj. Uhlik, Maj. Wachinski, Maj. Riggs, Ms. Anaya, Ms. Gustin, Second Row: Capt. "We Bring Good Things To Life"

The Department of Civil Engineering, headed by Col. David O. Swint, is proud to be the most active of all departments. In addition to its regular faculty, the department has two visiting professors: Maj. Wayne Reynolds, USA, (to show us how it is done in the Army); and Dr. Howard C. Dunn, Vice-Dean of Academics, U.S. Coast Guard Academy (the closest we have to a civilian instructor).

The year started off quick with a dining-in involving the faculty and CE majors. Our guest speaker was Maj. Gen. Clifton D. Wright (top Civil Engineer in the Air Force). His speech was very inspirational and started the year for us in the right frame of mind. Throughout the semester, the faculty has been involved in numerous activities in conjunction with the students. In September, we travelled to New Mexico to try our hand at surveying (night surveying actually) and finished second. The rivalry between the students and faculty also continued on the fields of friendly strife. Revenge is always obtained, for students and faculty alike, in our annual basketball and softball torunaments.

The high point of the year, though always seems to be the regional conference. Once again we captured first place in the concrete canoe race and, for the first time, the faculty won. The celebration was heavy (as the residents of Utah will atest). This year's conference had many added challenges. In addition to the concrete canoe race, concrete skis and a concrete frisbee contest were held.

The year culminated with summer programs. The Department of Civil Engineering administers several outstanding programs. In addition to Summer Research, the department has its own Operation CE. This program allows one cadet to go to each major command for five weeks to experience all facets of civil engineering. Last summer, 10 cadets attended the program and went to bases such as Ramstein, Hickam, Andrews, and Tyndall.

As each year comes to an end, the Department of Civil Engineering looks back to assess its growth, only to set higher goals for the years ahead.

Chemistry

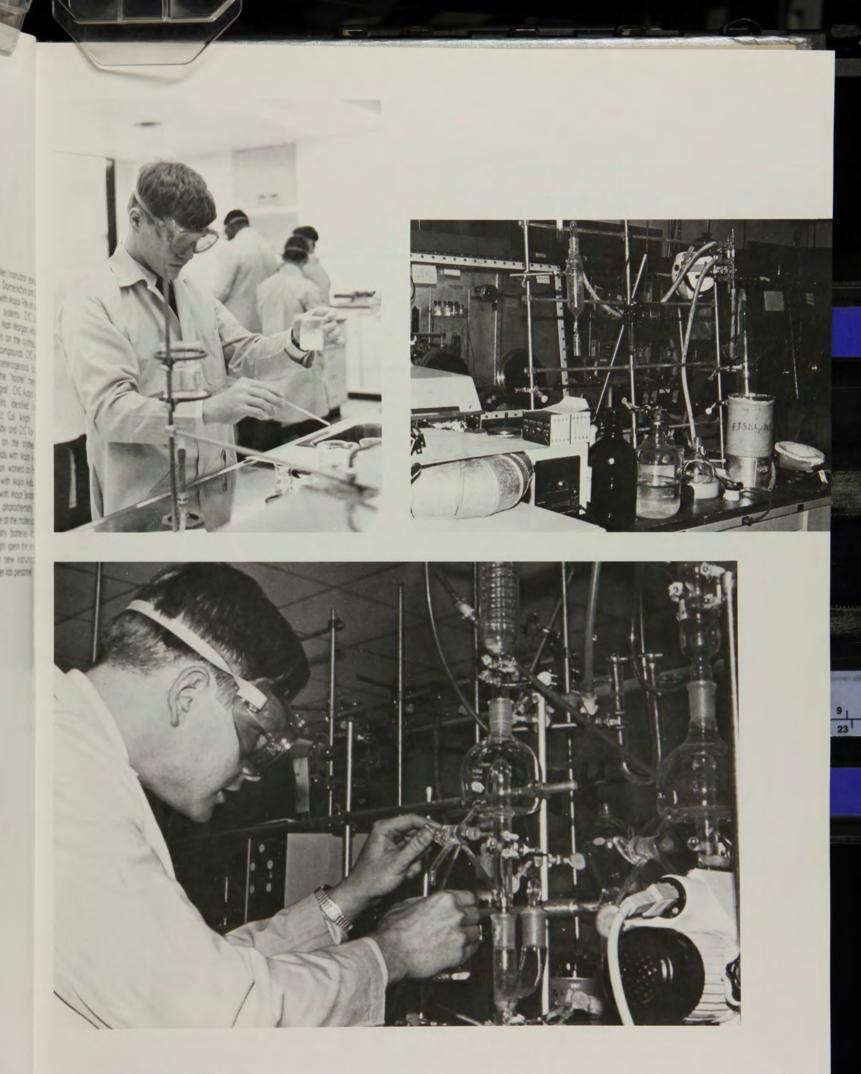

The Department of Chemistry is headed by Col. Harvey W. Schiller . It consists of 28 officers and six civilian personnel. Together they provide instruction and experience to every fourth classman who enters through the "Bring Me Men" ramp by means of the core chemistry course. In addition to this, they teach advanced chemistry courses for the chemistry majors (and a few envious biology majors). They are involved in their own research and research in conjunction with the Frank J. Seiler Research Laboratory. In addition to academic and research pursuits, the faculty is also involved in public affairs such as conducting seminars, judging science fairs, and performing chemistry magic shows for local schools.

During the 1984-1985 year, the department was in turmoil as "Seiler" began moving into chemistry department rooms. As a part of the research lab modernization program, the Seiler chemistry labs on the second floor of Fairchild Hall were being extensively overhauled. At the same time, the Chemistry Department's prep and storage rooms were being renovated. All this resulted in a loss of classroom and lab space for the department. No one passed through those halls without noticing large amounts of lab equipment piled in the hall, chemicals in the closets, and instructors lost in 2C25.

The Chemistry Club was more active this year than any other (in recorded history) due to the excellent advice and direction of Maj. Larry Davis . The club's president, Cadet Firstclass "Ray" Paul Hamilton and Major Davis organized two fall field trips (one for the Chem 435 course and one for the Chem Club). The first was to Kirtland AFB, N.M., to see the chemical branch of the Air Force Weapons Laboratory and the other was to Eglin AFB, FI., to tour the energetic (explosives) materials lab.

After burning their physical chemistry tests, some of the chemistry majors got

involved with Seiler/instructor research projects. C1C A. J. Domenichini and C2C Kendall worked with Major Fife on solar energy storage systems. C1C Scott Moore and C1C Matt Morgan worked with Lt Col Mueh on the synthesis of organometallic compounds. C1C Mike Hake made heterogenous silicon catalysts (using the "hooter" method) with Major Burggraf . C1C August Hein and C2C Estivito identified fungal pigments with Lt. Col. Wright . C1C Christopher Cassidy and C1C Rae Ann Noyes worked on the snythesis of energetic materials with Major Avila C1C Pete Whelan worked on Fredel-Crafts syntheses with Major Avila. C2C Benson worked with Major Sonobe doing research in photochemistry. C2C Dye studied some of the molten salts used in high density batteries with Dr. Wilkes. C2C Knight spent the semester calibrating some new instruments for future use by Seiler lab personnel.

Computer Science

The Computer Science Department, composed of 22 members, is directed by Col. Joseph Monroe, Professor and Head, and the Deputy Head, Lt. Col. Kenneth L. Krause. The expertise of the department can be attributed to the quality and level of educational backgrounds of its people. Twelve of these members are academy graduates, 10 from USAFA, one from West Point, and one from the Naval Academy. Five have doctorates and four others are currently working on one.

Extra curricular activities and additional duties keep its members actively involved with cadets. Two members of the department train cadets in the USAFA flying program to become future Air Force navigators. All members are participants or sponsors of the 25th Cadet Squadron. Other special departmental activities include: sponsorship of the Computer Science Club which is open to all cadets, hosting a national symposium called CRISYS (Computer Related Information Systems Symposium) each year, and presentation of awards to the top cadet in each course for both semesters as well as an annual award to the top cadet in Computer Science.

The dep course. Bey the comput courses such works, com operating si and softwar

Pondering Turbo ---

The department teaches one core course. Beyond this introductory course, the computer science major may study courses such as: Database theory, networks, compiler construction, graphics, operating systems, embedded systems, and software analysis and design. The

ad peran ade a sola a vel a sola a de la sola major has been in existence for 15 years and in this time the Academy has graduated approximately 700 cadets in computer science. Presently there are 45 majors in the class of 1985, 50 in the class of 1986, and 60 in the class of 1987. Computer Science is such a rapidly developing field that it has almost unlimited potential for growth in the future. Whether you are planning for computer science as a primary career specialty or as a secondary career choice, the opportunities in computer science abound.

English

(--- and a whole lot more)

To call Col. Jack Shuttleworth's department the ENGLISH Department is almost an injustice. The name indicates emphasis on merely the English language (if this were the case, we could integrate the English Department and the Foreign Languages Department into the Languages Department). In reality, the Academy English Department teaches far more than vocabulary, grammar, writing and survey literature. The expanse of its core and enrichment offerings ensures that it plays a pervasive role in the academic life of every cadet. The skills and insights learned in English Department courses greatly contribute to improved performance across the curriculum—yes, even in the engineering sciences courses. How? By emphasizing

clear and effective communication; using writing to clarify thinking; improving writing, speaking, and research skills; and—certainly a major contribution for a future officer—guiding cadets in the reading and appreciation of literary masterpieces, works that can help cadets put life and any academic discipline into perspective.

During the Fall and Spring Semesters, department members taught the standard core courses: freshman composition, sophomore speech/composition, junior professional writing, senior survey of literature. Along with these courses, honors classes challenged qualified cadets at every level. Of course, Blue Tube remained a prized opportunity at the junior honors level.

Maj. Rich Comer, Maj. Perry Luckett, Lt. Col. Ed Bailey, Lt. Col. Tom Murewski, Col. Jack Shuttleworth, Lt. Col. Bill McCarron, Lt. Col. Steve Staley, Lt. Col. Terry Bangs. Maj. Dennis Doroff, Maj. Enrichment classes brought wider experiences in language and literature: In the fall, Capt. Mark Faulkner taught an advanced speech class; Capt's Darrell Mastin and Jan Cope taught American Literature I; Capt. Mark Slown guided students in an original course called "The Bible and Modern Novels"; Capt. Dave Smith taught a course on classical literature. The spring semester saw Maj. Dennis Doroff completing the American literature cycle, Maj. Rich Comer offering a stimulating and relevant interdisciplinary course—"Literature on Leadership," and Capt. Herb Smith instructing the ever-popular Shakespeare course

In addition to all these courses, the department managed the Cadet Forensics Club, directed the Bluebard's productions, helped with the Cadet Film Club, and judged and compiled cadet entries to publish "Icarus." One thing clearly above the call of duty was the self-initiated program to instruct several

Lt. Col. Terry Bangs gives some "points" on gestures to an English 212 Speech class.

class sections of cadets in the use of computer word processing programs. All these activities, and I haven't even mentioned what the department does for the Air Force at large, or the Defense Department, or even the nation. Besides editing reports for the Space Command and other agencies like the National Defense University, the department has a team of instructors called the Executive Writing Team that travels all over the world teaching high-ranking military and civilian personnel how to communicate in a clear and direct style. Some of the Academy's English instructors went to the White House this year to assist White House officials with ther correspondence techniques. Lt. Col. Tom Murawski, a tenured professor in the English Department, even appeared on national television in December 1984 espousing unobsfuscated writing (or in his words, 'encouraging 'just plain Engligh'''). Clearly, the English Department at the Academy teaches English, but they also do mush more.

Capt. Mark Faulkner demonstrates some body English to his attentive speech students.

Electrical Engineering

The 1984-1985 term was another dynamic year for the Department of Electrical Engineering. Col. Erlind G. Royer led his staff of 32 officers, a distinguished visiting professor, and eight civilian support personnel in developing and refining a challenging and exciting curriculum for electrical engineering majors courses as well as the two core courses: EE 210 and EE 310. This curriculum placed emphasis on "The Electronic Air Force" and gave each cadet the opportunity to explore basic and advanced electronic principles used today.

The staff of the EE Department was enriched by our Distinguished Visiting Professor, Dr. E. P. Mast, an expert in electromagnetic field theory who is on 'loan' from the University of Illinois. The department also gained great benefit from the talents of our two exchange officers: Lt. Comdr. William H. Long, USN, and Maj. Hubert De Quatrebarbes, French Air Force, who exposed the cadets to the experiences of officers from different services.

Electrical Engineering majors participated in the constant research performed by the department. Maj. Billy J. Stanton led a team of four officers and 10 cadets in researching speech synthesis and analysis. This technology, when developed, will be used in future aircraft. Other department members and cadets worked on diverse projects such as local area networks (to be used in the upcoming cadet dormitory computer system), an interactive communications simulator (to be used by the Rome Air Development Center, Communications Command, and department communications courses), solid state device fabrication, computer-based education, and robotics research.

Department research projects were by no means the only ones involving cadets. Fourtheen EE majors participated in the Summer Research Program at locations ranging from Hawaii to New York. These projects included, among others, speech research and pulse-modulated Doppler radar systems.

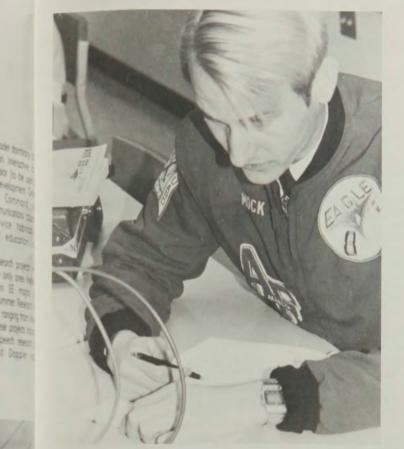

Front Row: Maj. Robert F. Phelps, Maj. Michael F. Guyote, Maj. Frank D. Tiller, Maj. Billy J. Stanton, Col. Erlind G. Royer, Lt. Comdr. William H. Long, Jr.,, Maj. Paul W. Schoell, Maj. Gary R. Hurst, Prof. (DVP) Edward P. Mast.

Back Row: Maj. Kenneth J. Soda, Capt. William P. Harben, Capt. David R. Robertson, Capt. Scott Van Tonningen, Capt. Nathan H. Krys, Maj. Hubert De Quatrebarbes, Capt. Joseph A. Morgan, Capt. Michael F. O'Shea, Capt. Stewart K. Angell, Capt. Daniel L. Martin, Capt. John G. Pennett, Capt. Clifton J. Alston, Capt. Parris C. Neal, Maj. Roger F. Healy, Capt. John M. Santiago, Capt. Theodore J. Moody, Capt. Glen E. Monaghan, Capt. Robert E. Norris, Maj. Christopher A. Cross, Capt. Robert K. Morrow Jr., Capt. Bonnie L. Keeler, Capt. David L. Calloway, Capt. Keith A. Lewis

NOT PRESENT:

Capt. Bruce Pecor, Capt. Donna E. Peterson

EE 464, the department's capstone design course, allowed the first class WW majors to explore design and development of actual systems in a format which copies actual Air Force systems development procedures. Additionally, the cadets gained first-hand knowledge of the talents of our four versatile technicians: Mr. Joyce, Mr. Lynch, Mr. Mann, and Mr. Mitterer.

The EE Department also devoted energy towards community service. Captains Calloway and Morgan played to rave reviews at local schools with their superb demonstrations involving the department robotics systems, and Captain Moody devoted much time and effort into producing a 'smatt' wheelchair which serves as the primary means of mobility for a child afflicted with cerebral palsy. This chair being the most successful of our research projects has provided a deserving child with a device not presently available on the open market.

The Cader Electronics Club (student chapter of the Institute of Electrical and Electronic Engineers), with the help of Captain Pecor, explored the latest developments in microelectronic devices at INMOS, and got the true story of the relationship of such obtuse principles as wave propagation from a vibrating body (loudspeakers), solid state theory (amps), and other enlightening phenomena associated with stereo systems.

In the 1984-1985 term, the EE Department was certainly a dynamic place to be. The friendly but demanding atmosphere served to set the stage for a fun, but challenging year. The year has been most successful and has culminated with the graduation of a class of EE majors fully prepared to chart their future in the electronic Air Force.

9 | 23 |

Affectionately referred to as the 'Mech Department', all cadets are exposed to this department via Mech 210. This core course is designed to increase the cadets' understanding of fatigue and give new meaning to the words "stress" and "strain." "Enlightened" resilient codets with the ''right toughness" often decide to become mech majors. They may choose from two majors administered by the department: Engineering Mechanics, and Engineering Sciences. The first major is designed to give cadets a broad knowledge in fundamental engineering, with in-depth study of dynamics, aircraft structural analysis and design, and materials engineering. The second major allows cadets to pursue a broader education in the engineering sciences-apreparation for effective performance in an engineering specialty

The department continually strives to improve the quality of education given to mech majors and all other cadets taking courses administered by the department. In an effort to satisfy this commitment, computer aided instruction has been introduced into many Mech courses. New courses are also being developed to insure graduates have the academic training needed to tackle current and future engineering problems in the Air Force. For example a course in composite materials has been added this year to introduce students to

Engineering Mechanics

an increasingly more important field in aircraft design. In addition, future plans call for adding a course in engineering economics so that mech graduates are better equipped with the tools needed to evaluate the economic as well as the engineering feasibility of a design project.

Research continues to play a major role in the educational development of cadets. Senior mech majors have conducted independent study projects ranging from techniques used to manufacture composite structures to developing an inexpensive space furnace used to study the formation of metal alloys in the zero gravity environment of space. This latter project is scheduled to go on board a future shuttle flight.

The department interacts with cadets in other areas besides the academic arena. For instance, the Mech Department is squadron participant with the 39th Squadron. Cadets interested in learning how the principles of mechanics are actually used both in the military and civilian sector usually join the Mech Club (admittedly some cadets join just to go on neat trips such as the one to Cape Canaveral to watch a shuttle launch). The club is run by cadets with an instructor from the department serving as club Officer in charge.

While performing its role in the

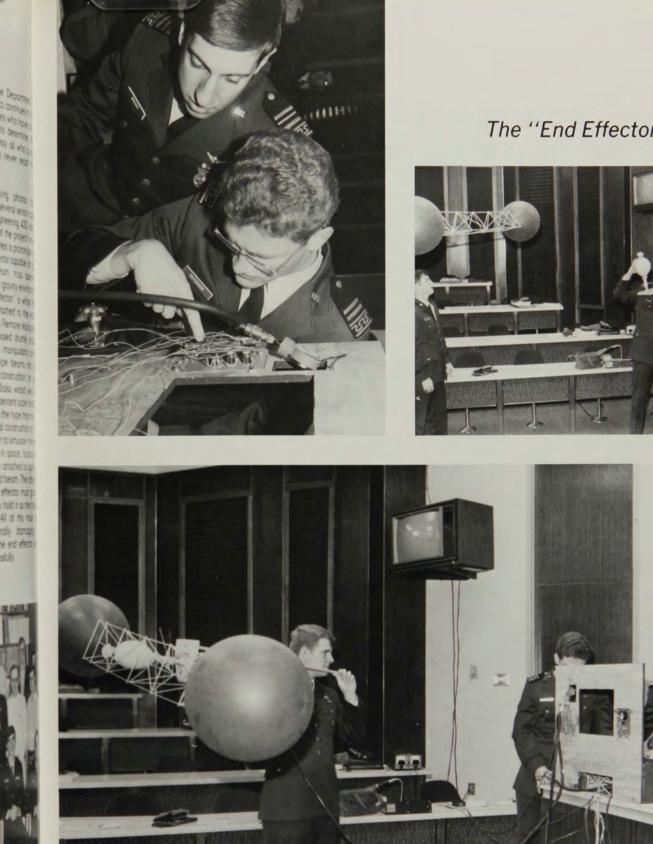

academy mission, the Department of Engineering Mechanics continues to test the durability of cadets who have committed themselves to determine their ultimate strength. May all who pursue our course of study never reach their point of failure.

The accompanying photos show Capt. Sullivan and several senior cadets working on an Engineering 430 design project. The goal of the project was to design, build, and test a prototype concept of an end effector capable of arabbing a fragile beam, truss assembly floating in the zero gravity environment of space. "End effector" is what NASA call the device attached to the end of the space Shuttle's Remote Manipulator Arm. Future proposed shuttle missions call for using the manipulator arm to maneuver truss-type beams into position during the construction of large space structures. Balsa wood was used to construct a 20 percent scale model of a beam similar to the type that may be used during actual construction of these structures. In order to simulate the beam 'floating freely" in space, ballons filled with helium were attached to both ends of the balsa wood beam. The criteria for success: The end effector must grab the beam and rigidly hold it as the beam is moved about. All of this must occur without structurally damaging the fragile beam. The end effector shown performed successfully.

Front Row -Gary J. Butson, Major, John A. Blind, Major, Terry L. Schiessler, Major, August I. DeRosa, Major, Cary A. Fisher, Colonel, James G. R. Department of Foreign Languages

Although the Department of Foreign Languages does not offer a major, it plays an important role in the development of future Air Force officers. Lt. Gen. Lincoln Faurer, the Director of the National Security Agency and a guest speaker at the Academy during the fall semester, stressed the importance of foreign languages. He sees proficiency in other languages as very important to our national security. Also our inability to speak foreign languages gives us a haughty, uncaring image in much of the world.

The department of Foreign Languages works hard to increase our proficiency by offering programs in Spanish, German, French, and the strategic languages: Russian, Arabic, Chinese and Japanese. This diversity allows us to pursue languages we have studied before or to try something new and challenging. While two semesters of language is mandatory, advanced training is available and encouraged. Bacides increasion our language abili The Departi exchange officiency tons. This year

tore Lt. Col. the Mexican A ion Groeven non Republic sponsh Ar Forn here offices altral educat sepannents a norous foreign og codets m erence other ear severa

Besides increasing our language ability, this instruction also exposes us to the cultures of the various countries. This familiarization is accomplished through readings, lectures and the activities of the various language clubs. These activities include visits to ethnic restaurants throughout the area, film festivals, and cultural evenings at the homes of various instructors.

Front Row: Capt. William P. Baird, Maj. Victor W. A. Nell, Maj. Duane E. Bright, Lt. Col. Marcelino Espinosa, Col. Ruben, A. Cubero, Lt. Col. Daniel G. M. Hannaway. Maj. Mary A. Marks, Maj. Gerald T. O'Guin, Maj. Clifford R. Borofsky, Second Row: Bertold L. Geiss, Virginia Lambrecht, Mariette B. Wells

Third Row: Capt. J. Young Mayberry, Capt. Arthur R. Edmonds, Capt. Richard G. Mcclellan, Capt. Thomas T. Cook, Capt. Robert L. B. Stevenson, Maj. David M. Schrupp, Capt. Jose Tamame, Capt. Griffith S. Hughes, Capt. Charles D. Robertson, Capt. William P. Baird, Capt. Stephen H. Harris, Capt. Philip J. Westfoll, Capt. Richard L. Sutherland, Capt. Leslie M. Keffel, SSgt. Gary L. Cauler, Capt. Robert J. Vosika, Carolyn S. McDonald Fourth Row: Capt. Robert F. Giardino, Capt. Patrick V. Curton, Capt. Henry K. Nakagawa, Capt. Julie B. Brownell, Capt. Jill M. Crotty, Capt. Miguel Verano, Capt. Howard M. Swartz, Capt. Nancy J. P. Lewis, Capt. Jose D. Romero, Capt. So-Mai D. Lai,

The Department is also blessed with exchange officers from our allied nations. This year we were honored to have Lt. Col. Marcelino Espinosa from the Mexican Air Force, Lt. Col. George Von Graevenitz from the Federal German Republic's Luftwaffe, and from the Spanish Air Force, Capt. Jose Tamame. These officers add a great deal to our cultural education and also share their expertise and point of view with other departments at the Academy.

There are also exchange programs to various foreign air force academies giving cadets the opportunity to experience other cultures first hand. Every year several French students are

I Cal Daniel G M Hom

Cast inquel Vero

selected to spend a semester at the French Air Force Academy. This year six first classmen took part in this program. Also this year contingents from the other specialties visited Germany, several Latin and South American countries, Saudi Arabia, Egypt, and Japan.

The language program is constantly growing with the introduction of computer-assisted language training, video disk instruction, and plans in the near future to broadcast programs from various countries into the classroom. The expertise of the instructors and the desire to improve will bring additional benefits to cadets and the Air Force as well.

Academy cadets spent three weeks studynig Russian intensively at Garnish-Partenkirchen, West Germany. Here they are posing in a group shot with their instructors and the US Army Russian Institute's staff.

Prepare for the future with

History

The Department of History believes the profession of arms and the study of history are inseparable. The department's varied courses and rich programs instill in all cadets an appreciation of history and its role in the military profession. With an understanding of their past, future Air Force officers can better prepare for their future careers.

To give cadets an understanding of the past, the department uses a wide variety of courses, ranging from "Modern World History" to "The American Way of War." But the department also offers several other programs that enrich the education of cadets, such as the popular History Club. The club has representatives in each squadron as contacts for more than 400 members. The cadets become familiar with many historical topics through club-sponsored dining-ins, lectures, trips and films. This year the club even initiated a version of 'Trivial Pursuit'' for historians!

Another program that stimulates cadets' interests is the Harmon Memorial Lecture, which was begun in 1959 as a forum for a distinguished speaker to present an original lecture on military history. Dr. Harold C. Deutsch, from the U.S. Army War College, spoke this year on "Military Planning and Foreign Policy: German Overtures to Two World Wars." Dr. Deutsch gave both cadets and officers a good understanding of the complex relationship between foreign policy and military goals.

Dr. Deutsch's lecture opened the Eleventh Military History Symposium, which is a series inaugurated in 1967 to provide a forum for military scholars from around the world. The topic, "Military Planning in the Twentieth Century," was highlighted by Admiral Bobby R. Inman, USN (retired). In his ban-quet speech, ''Long-range Planning for the Intelligence Community," the former Vice-Director of the Defense Intelligence Agency and Deputy Director of the Central Intelligence Agency presented a provocative discussion of the future of the intelligence field.

Former Air Force Academy Superintendent, Lt. Gen. Albert P. Clark, USAF (retired), spoke to nearly half of the third classmen in the Distinguished Professionals in Residence Program. Speaking to small groups in the lectinar classrooms, General Clark talked candidly about professionalism and answered many questions about the new cadet honor code. His personal insight made history "real" for many cadets and enhanced their classroom studies.

The Summer Research Program also enhances the cadets' preparation for their future careers and emphasizes the importance of their historical education. This past summer, the department sponsored four cadets for the program, sending them to a variety of Air Force offices: the Office of Air Force History, the Directorate of Soviet Affairs (Soviet Awareness), and the Deputy Directorate for doctrine, Strategy and Plans Integration at the Pentagon.

These courses and programs give every cadet a broad introduction to history and its specific relation to the military profession. The department believes these programs help cadets become better officers and prepare them for a successful approach to the future.

Philosophy and Fine Arts

We always thought that the prospects of a military career, a good education, the needs of the nation, no tuition, or the urging of a variety of wellintentioned relatives brought us to the Academy.

In the core ethics course, philosophy 310, we find out that there was a deeper reason: our values. And it turns out that values insist on affecting our lives whether we like it or not. A major, a spouse, a lifestyle, a career field, and even a war, a battle, a target - we become part of all of these because of values. No wonder we are tasked to go through the soul-searching and endless questioning involved in examining those values. Sure, it's "fuzzy," without any of the "school solutions" that would be so comfortable at final exam time. But that's what our most crucial life decisions are like, so there's every reason to expect that an ethics course must be the same.

Receiving special emphasis in the Department of Philosophy and Fine Arts are moral issues of particular import to the armed forces: professional ethics and morality and war. These issues are addressed as academic, educational issues in the core ethics course; but members of the department also address them as training or instructional issues by providing advisors and instructors for the variety of training we receive in military ethics and the Honor Code.

Besides the required ethics course, the department offers several other philosophy courses, including the always popular "Great Religions of the world."

The Fine Arts program would be the

envy of just about any comparably sized educational institution in the country. In addition to the two appreciation courses — one in music and one in visual arts — there are the American Art and Music course and the always enjoyable Fine Arts Studio.

The department also has taken on the responsibility of academic advising for the new Basic Academic Program, the so-called "no-major major." This program now gives us the opportunity of seeking a broad, general education without having to add a specialty on top of it.

Ultimate questions, moral values, professional obligations, and aesthetic sensitivity — clearly the Department of Philosophy and Fine Arts provides crucial elements to our bored professional education.

Regardless of their majors, all cadets suffer through five core math courses ranging from freshman calculus to probability and statistics. When these courses are finally completed, it is with relief that most cadets reflect on the Math Department along with its graded homework, competency tests, boardwork and GRs that are seemingly unrelated to course objectives. However, core math does prepare cadets for follow-on core courses in engineering and science as well as for the technical majors which require higher mathematics.

For those who understand the above inequality, yes you too can join the privileged (albeit thin) ranks of the math

majors. For those who would like to try, the largest academic department at the Academy offers the Mathematical Sciences major. The math major is divided into two categories: pure and applied math. Pure math majors "appreciate the beauty of mathematical structure" and deal a lot with Greek letters. Applied math majors learn the techniques of problem solving applied to technical fields such as Electrical or Aeronautical Engineering. The Math Department also offers the Operations Research (OR) major. OR majors learn to use statistics and simulation (among other things) to help model managerial and economic processes in order to understand how they are affected, how

they can be made more efficient, etc. Either way, cadets practice their ability to solve problems logically.

Along with learning problem-solving techniques, math majors benefit from a "flexible" major. The math major allows courses from technical fields as electives so that math majors develop an area of specialty. Those considering double-majoring can make use of this overlap. After graduation, graduates with a math degree have a good chance of getting a graduate degree program, but if they don't they will enter one of the many different career fields open to them. The Air Force will always need the analytical abilities of the mathematician.

Department of

Political

Science

Politices never seems to be far from our existence. From BCT through state legislatures all the way up yo international negotiations, politics is the framework by which we try to understand just how those in power distribute what we value most. We sometimes question how well politics provides answers, but at the very least, we expect the discipline to guide our questions. In national politics, we try to understand relations between Congress and the president, how parties and interest groups vie for influence, and in the midst of all this where our voces as citizens and soldiers fit in. In international politics, we struggle with the fact that countries have different and often conflicting vlaues that contribute to friction. Sometimes these conflicting elements overwhelm attempts to find common ground.

The nature of politics requires an eclectic approach — it is a wide discipline. Thus the Department of Science must endeavor to approach its study from several perspectives. Waht is the psychology of antioanl leaders? How do concerned citizens get

the attention of lawmakers? How do interal Kremlin politics affect external Soviet policy? Waht do federal judges feel is within the constitutioanl sphere of rights of accused criminals? The questions we ask provide more than an understanding of the subject — they often reveal much about our own biases and values.

During any academic year, current events provide much meat for debate and study. The Deaprtment focused its efforts to take advantage of such events. The presidential election of 1984 saw Ronald Reagan elected to a second term. If he serves out the entire term, he will be only the second president since FDR to hold down what many have described as the world's toughest job for a full eight year. In order to understand the electoral process better, the Department and the Cadet Forum Club sponsored a Presidential Symposium. The Symposium attracted speakers like John Anderson and Jody Powell. They and others discussed topics like the historic choice of a woman, Geraldine Ferraro, to run on the Democratic

ticket, the likely future courses of the Republican and Democratic Parties, prospects for arms control, the future of social programs and the growing debates over the use of space.

It is toward space that policy makers have turned more attention recently. Because of rapidly advancing technology, the possibilities for the utilization of apce represent a significant policy challenge. Decisions about how best to put technoloby to work for the national interest are the focus of the Deaprtment's newest course, US National Space Policy. The course examines military and civilian space policy, basic decisions about how emerging issues are treated. Visitors included such experts as Lt General James A. Abrahamson, Director of the Strategic Defense Initiative Office and Dr. Colin Gray, and authority on strategic thinking who has sought to integrate opportunities in space with traditional doctrines of strategy. The new curse is an dieal complement to the Space major in the Astronautical Engineering Department.

A department grows from experiences gained outside academe. Bothe cadets and officers were active well before the academic year bagan. To broaden knowledge and experience, they filled various summer research positions throughout the Air Force and the government. Some of the opportunities included internaitonal travel for cadets to allow them to view political processes first hand as they occur. Cadets worked with such groups as the State Department, Department of Defense, the Department of Engergy and the Executive Office of the President.

This year also saw a resurgence of the Forum Club. Not only was it heavily involved in the Presidential Symposium, but it also collaborated with the Colorado College Political Union in activities to broaden cadet exposure to different view on various tipics. The Club was more than a forum for intellectual activity; it served as an effective vehicle for an occasional dining-in for members. Once again, the year saw an extraordinarily successful Academy Assembly. The Assembly attracts students from across the country to discuss issues of importance to the United States. This year's topic was Canadian-American relations.

The Department not only brought students from other universities here, but sent cadets to many different conferences across the nation. Cadets participated in conferences at West Point, Annapolis, Texas A&M, and in Washington DC. This year also saw the opportunity open for future cadets to participate in the Model United Nations Competition in New York City.

Advanced study in political science provides qualified students with the opportunity to progress beyond the groundwork laid here at USAFA in pursuit of graduate degrees. In keeping with past years, several cadets competed for and won prestigious scholarships to graduate schools across the country. This spring, the Department instituted what should become an annual dining-in for both Intaf majors and political science faculty. The evening emphasized the rich heritage and excellence shown by previous graduates, and the tradition of achievement to which this year's grads are heir.

Colonel Douglas Murray arrived as the new Permanent Professor and Head of the Department. In doing so, he applauded the enthusiasm and professionalism of both faculty and cadets in the major. But realizing that political science at the Academy must encourage reasoned judgment beyond mere knowledge of politics for the citizensoldier, he recalled Aristotle's emphasis on excellence: for the healthy democracy, "...the good citizen must possess the knowledge and capcity requisite for ruling as well as being ruled, and the excellence of a citzen may be defined as consisting in a knowledge of rule over free men

Educating the Air Force Manager

Management

A quick look at the wide range of courses offered by the Department of Management will confirm that management is becoming an increasingly complex discipline. To meet the challenge of the complexity, along with ever increasing advances in technology, tomorrow's Air Force Manager whether commanding a tactical fighter wing or managing the acquistion of a major weapon system — will need to draw upon a variety of managerial skills.

It is paradoxical — but nonetheless valid — that in an increasingly complex Air Force environment, it is ever more important to focus on the fundamental issues, the questions that remain critical over time. What is our mission? What is the real problem? And ultimately, what alternative courses of action must be evaluated to optimize the decisions we face both today and tomorrow?

It is toward those fundamental issues that the managment curriculum is oriented. The objective remains constant: to provide tomorrow's Air Force officers a framework with which to manage resources and a foundation on which to build.

What — more graphs? "And I don't even understand what they mean!!"

These and similar comments are likely to be heard from core econ students who walk out of class and are bewildered by the multitude of graphs and diagrams. Economics is not a subject that appeals to everyone, but there are a few of us hardy souls who appreciate that economics does exist. For us it is a challenge that gives us insight into the complex problems of our age. In fact, most of us chose economics as a major for the tools it gives us to analyze the behavior of both countries and individuals. We want to make a contribution to our country and the Air Force, and through our interest and knowledge of economics, hopefully we can.

Geography

The office of Instruction for Geography is small, but offers a variety of courses. It is possibly the best kept secret at the Academy. It has the unique standing of offering a major with 11 totally different, yet related courses; without having a single core course.

The diverse background and experience of the instructors enhances the courses and brings expertise in from a surprizingly large number of different assignments. This year has been made more notable by the return of Lt. Colonel Mitchell, from 15 months as the Commander/Deputy Commander in Izmir, Turkey. He has been joined temporially by another Middle-Eastern specialist this spring: Distinguished Visiting Professor, Dr. John Kolars from the University of Michigan at Ann Arbor. The combination of Lt. Colonel Mitchell, Dr. Kolars and Major Barnes provides several lifetimes of experience in the Middle East. The Soviet Union and Far East have been handled by Captain Papirtis, while Capt. Slaydon has been responsible for Cartography and Latin America. A new addition to the physical structure of the office has been the creation of a remote sensing laboratory for use with Capt. Papirtis' course on remote sensing and image interpretation, Geography 382.

Each of these courses offer the student a different aspect of Geography. They all, however, provide the important overall basis in which to analyze different regions of the world in terms of the physical, cultural, economic, and political structures. It is becoming more recognized as an important tool for Air Force career officers.

Sitting: Lt. Col. Mitchell, Roberta Chavez, Dr. John Kolars. Standing: Maj. Barnes, SSgt Fink, Capt. Papirtis, Capt. Slaydon.

Phun with

Most cadets cringe at the sound of the "physics" word Impossible G.R.'s massive loads of homework problems, and hours of E.I. and just some of the things that instantly come to mind. Despite the adverse reactions the topic, each cadet is required to take a three course sequence in Physics: Classical Mechanics Electricity and Magnetism, and Modern Physics. Those who claim to be, physics majors add around 11 more courses to the standard load.

Although it may have a bad reputation, physics is truly the most basic of the basic sciences. All other science yes, even biology to a certain extent consists of various applications of basic physical principles. Chemists may hate to admit it, but all that they are doing is applying physics at the molecular level. At least physics has the class to haze upperclassmen rather than doolies.

Physics

Seriously, though, it was a good year for the physics department (although some physics majors might tell you otherwise). With so many of its members whisked upstaris to work for the Dean Col. May, Maj. Schrock, and Capt. Tollefson, the department has been regrouping just a little, but should recover just as long as a supply of personal computers is available.

Front Row: Maj. Rolf C. Enger, Maj. John C. Soriders, Maj. Al Greenwood, Maj. Richard E. Swanson, Lt. Col. David Evans, Maj. Carl R. Scheerer, Maj. Thomas Tascione, Maj. Raymond H. Bloomer, Maj. Wayne R. Steinbach. Middle Row: Capt. Philip Gronseth, Capt. Delores Knipp, Capt. Jerry Home, Maj. Thomas Gist, cjpat. Joseph Scott, Capt. Dave Lewis, Maj. David Neumann, Capt. Gary Lorenzen, Capt. Mark D. Stephen, Capt. Michael L. Crawford, Capt. Bill W. Mullins, Capt. Robert K. McNeal, Capt. Douglas Beason, Capt. Dale K. Olinger, Capt. John Ruble. Back Row: Maj. Chris B. Westbrook, Capt. Ken R. Zeringue, Maj. Lee W. Schrock, Capt. Joseph Bassi, Capt. Steve R. Snyder, Capt. Mark V. Tollefson, Capt. Donald Erbschloe, Maj. Armen E. Mardiguan, Maj. Larry Freeman, Capt. Frank Eng, Capt. Walter L. Atchison, Capt. Gernot S. Pomrenke.

DFSEA

(Directorate of Audiovisual)

Seated: Mr. James Rodgers, Chief, TV Division, Lt. Col. Bruford Doyle, Director, Audiovisual Services, Mr. William Redding, Chief, Graphics Divisions, Mr. Renny Strackany, Chief, Training Devices Division. Standing: Mr. Ronald Hall, Chief, Audiovisual Support Division, MSgt Wilma Belvin, Chief, Production/Quality Control Division, TSgt Michael Carter, chief Photo Division, SSgt Linda Ball, Chief, Instructional Technology Division, and Mr. Don Perry, Chief, Precision Measurement Equipment Laboratory.

The Direct vices, or DF3 Doyle, is con pool of near and civiliant doesn't apper coder activitii works behinn Academy or sors. But, al pond solely coders, DFSE, hink of thy instructors transparencie presentation and videotop

SSgt Eric Olson in action at a Falcon Football game.

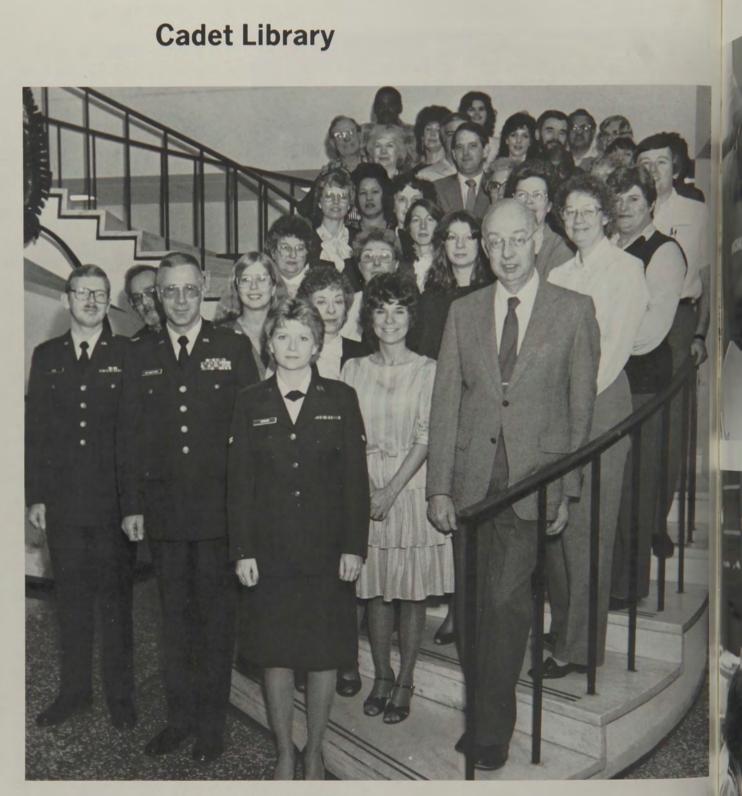

The Directorate of Audiovisual Services, or DFSEA, led by Lt. Col. Bruford Doyle, is composed of a highly skilled pool of nearly eighty enlisted members and civilians. At first glance, DFSEA doesn't appear to be very involved in cadet activities. As a support unit, DFSEA works behind the scenes, helping all Academy organizaitons meet their missions. But, although DFSEA doesn't respond solely to the educational need of cadets, DFSEA does do a lot for cadets.

think of the audiovisual aids that your instructors use. The overhead transparencies in Physics, the slide/tape presentation in History, and the films and videotapes in Military Training are all brought to you courtesy of DFSEA. DFSEA may have created the transparencies in the Graphics ship or shown your instructor how to make them in the self help labs. The slide/tape presentation and the equipment to use it were obtained and maintained in the Support shop. Videotapes are produced in the TV Division and routed to your classroom by the TV Distribution Center.

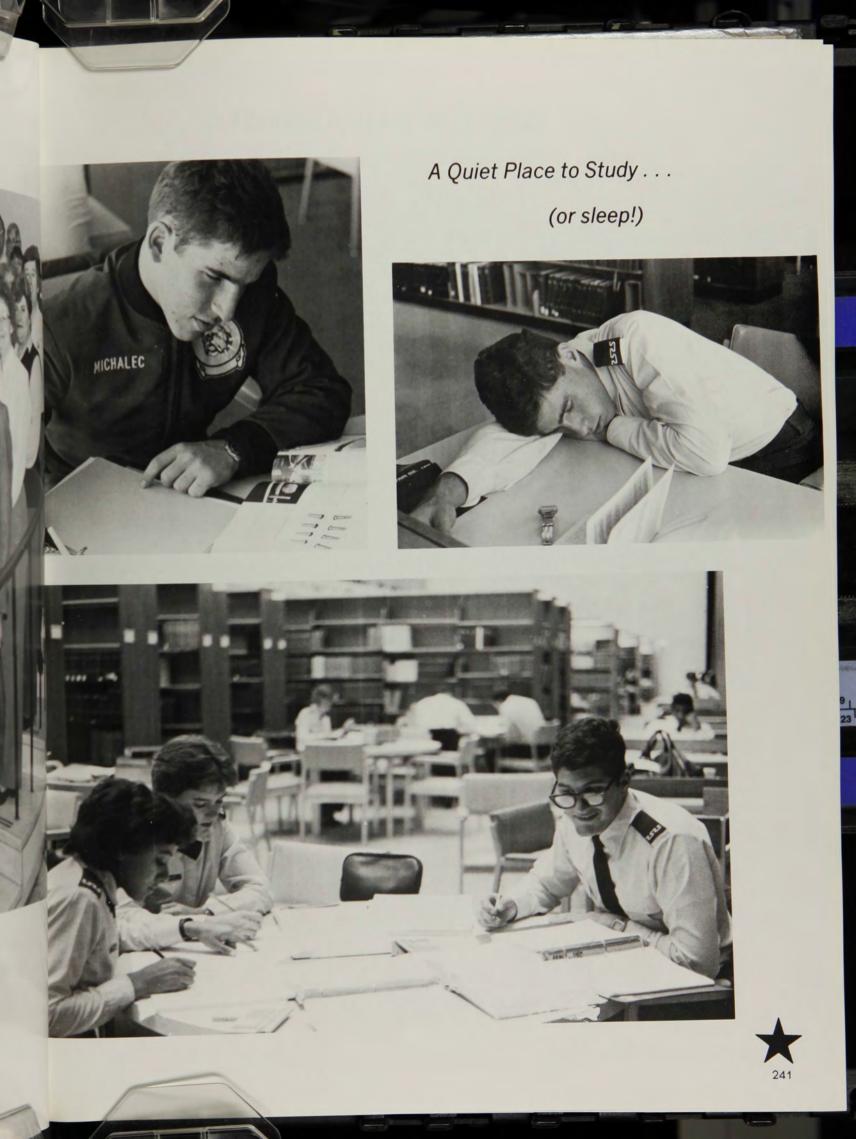

Engineering students get first-hand experience with one of DFSEAs largest divisions: Training Devices. As cadets work out the details of their engineering projects, they work side-by-side with the technicians in Training Devices. And, while the Photographic Division takes photos all over the Academy, some of their finest work involves publicizing cadet activities.

The posters and recruiting material that got you interested in the Academy, the float in the Parade of the rockies, the Blue Tube shows, and so much more, were produced by or with the help of DFSEA people.

So, although all cadets may not get personally involved with the activities in DFSEA, DFSEA touches all cadets. The effects of the Directorate of Audiovisual Services are felt Academy-wide. DFSEA moves behind the scenes, not always visible but always getting the job done.

The Friendly Staff

27th Academy Assembly

Complexities abound in almost all international interactions, and no less so between countries as close geographically, culturally and historically as Canada and the United States. "Canada and the United States" was the subject investigated by 120 cadet and civilian institution student delegates from both countries at the 27th annual Academy Assembly in March.

Convened each year under the aegis of the Department of Political Science to discuss different topics of importance to American policy makers, the Academy Assembly draws on experts in a particualr field from government, academy and professional groups to draw conclusions and make recommendations. Under the overall cadet leadership of C1C Greg Bell, the Assembly sponsored a series of panels that discussed topics that represent real and potential points of contention between the long-time allies. The international system is continually changing—do both countries share the same perspective about particular phenomena? Countries are growing more interdependent—do we share equally the risks as well as the benefits that follow?

Conclusions are difficult to draw, although the Academy Assembly recommended an increased sensitivity of each side to the needs and priorities of the other, as well as increased consultations about policies that affect both countries, and improved public awareness of each other's goals and values. Above all, the participants realized that the closeness of current relations should not gloss over concerns that merit serious attention.

Do any of these situations sound familiar? You have a 2.5 GPA and need a 2.6 to get into graduate school. You have 1.8 MPA and need a 2.0 to stay at the Academy. You are starting a relationship and want to avoid past mistakes. These and many others are all areas that the Cadet Counseling Center can help you cope with more effectively.

the Center, located on the second floor of Vandenberg Hall, offers a wide variety of services to all cadets. For example, your first ride in T-41 ended with an air-sickness bag. Now you are nervous about the second ride. Don't just sit there and worry about it! The Counseling Center staff provides stress managment programs for T-41 and other typical stressors such as test taking or math anxiety. Give them a try.

This past summer the Flight Specialist program was developed, taught to BCT cadre and commanders and put into practice for both BCT periods by the Counseling Center staff. Flight Specialists trained and counseled basics with an emphasis on positive motivation along with increased performance. The Positive Motivation Model (PMM) produced such rewarding results for both cadre and basics that the entire wing will eventually be taught the PMM skills. If you are not yet convinced that a visit to the Counseling Center can be worth our while, here is another reason. Their help may save your own or a frined's life. Do you know someone who can't seem to get a handle on their weekend drinking? How do you let him know, as a friend, that he needs to step back and take a look at his drinking habits? What do you say to someone who is so depressed that they may be desperate? The Counseling Center staff helps you find answers to these types of questions. The Counseling Center is worth your time, even if you are only looking for a little "synthetic silence" in

their sound proof listening booths.

Looking back . . .

... and Ahead.

Adopted from the Falcon Flyer.

The man who quides the Academy's faculty saw a year of progress for the academic program.

"Our fundamental approach of a boradly based core curriculum for all cadets has served us well and will not change." explained Brig. Gen. Ervin J. Rokke, dean of faculty. "But that doesn't mean we stand still. The body of knowledge associated with every academic discipline we teach changes continually. Those changes are reflected in the content of our courses, but our teaching and learning tools are chiging as well. I don't have to tell you that we live in the age of the computer."

The integration of computers into the academic program at the Air Force Academy took a new direction January 1984 when the faculty received the first increment of some 60 Zenith-100 Microcomputers in the Dormitory (MID) project. While the end objective is to lacate a microcomputer in each dormitory room, these first systems were intended primarily for faculty and staff familiarization and for development of prototype course materials.

The plan to install a microcomputer in each dormitory room is on track. What will put the Academy in a class by itself, however, is the plan to interconnect all of these computers through the installation of a local area network (LAN). This network will enable each cadet microcomputer to communicate with every other cadet microcomputer as well as with the faculty microcomputers and the Academy's large mainframe computer systems. Once completed, the MID project will give cadets a computer capability unsurpassed by any other college or university in the nation.

But microcomputers weren't the only thing new in the academic arena. A revised cadet Schedule of Calls was implemented in the fall semester and it has provided numerous benefits to both the cadets and the Academy staff. "Common exam" periods at 6:55 a.m. each day now enable instructors to administer the same examination to all cadets in a course, where different exams were previously required for cadets who had the course on different days. The faculty now has fewer examinations to write, and cadets have hewer days when they must prepare for multiple examinations. additional features of this new schedule include a two-hour study period each evening, with mandatory lights-out at midnight.

"We on the faculty aim to make it even better."

Planning for the future occupied a great deal of the faculty's time. An interdepartmental working group studied the available facilities in Fairchild Hall and then compared them with waht each department needs to fulfill its mission into the next century. The working group concluded that more than 140,000 square feet of additional floor space was needed, and they have recommended the construction of an addition to Fairchild Hall. Programming for this addition is well underway, and, when completed, the new facility also will correct deficiencies in the commondant's area, the cadet clinic, and the dental clinic. Other studies initiated involve the feasibility of establishing an academic endowment program here at the Academy, development of a manpower standard for the faculty, and possible revisions to the core curriculum.

While the faculty was busy planning the future, most time was in fact spent in the more traditional pursuit of excellence in undergraduate education. Cadet enrollments in individual courses now exceed 28,100, the highest number in Academy history. Beyond the classroom, however, the faculty hosted many conferences and symposia to broaden the cadets' educational experience. The 27th Annual Academy Assembly attracted delegates from across the naiton last March. Their four-day discussion focused on U.S.-Canadian relations. There was continuing demand for faculty and cadet research time from outside organizations, and the Academy received almost \$864,000 in research funds during 1984. Research topics ranged from growing microorganisms in space to videodisc applications in foreign language educaiton. Finally, some 100 cadets went on six-week research assignments last summer sponsored by 15 different major organizations.

Numerous personnel changes are common in any military organization, and the faulty is no exception. Three new permanent professors were appointed in the summer of 1984 and six new visiting professors joined the faculty for one year tours to replace the six who departed las spring. In addition 16 officers were granted tenure in 1984.

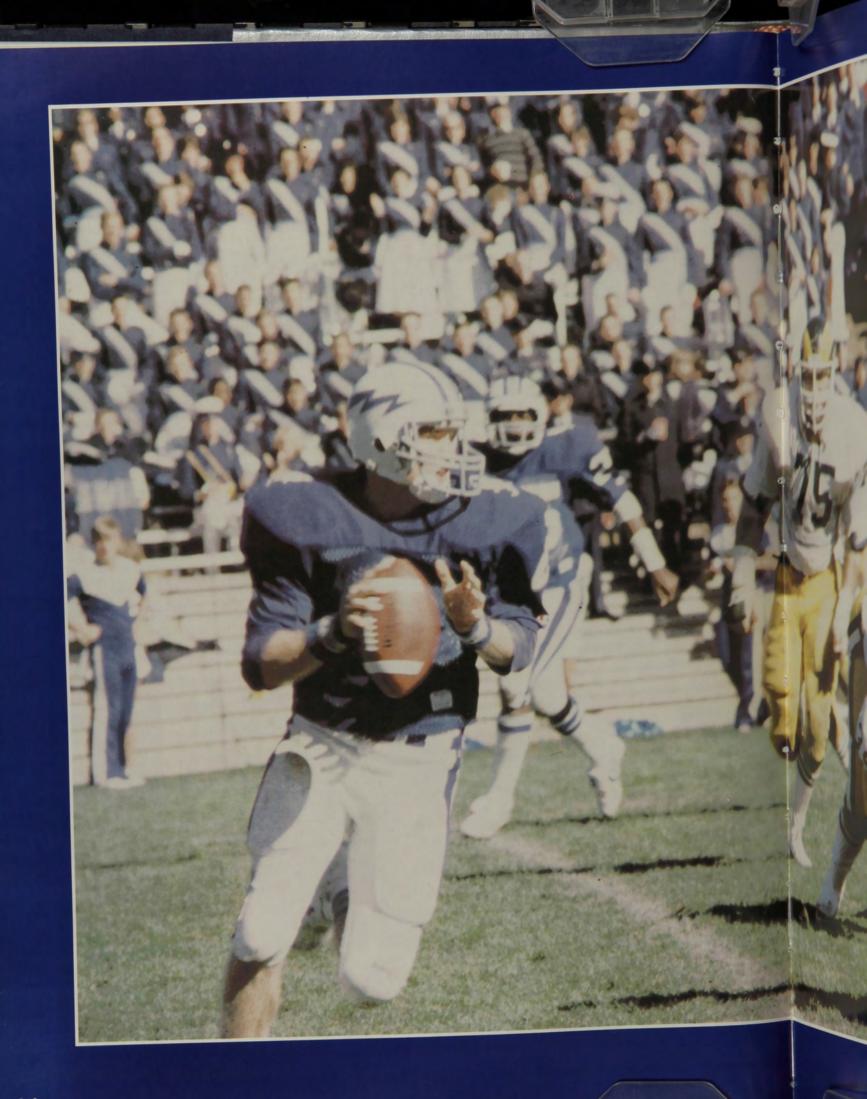

"This really is a first rate institution," says General Rokke. "I'm speaking not only of our academic program, but of our military training program and our athletic program as well. All things considered, there is no undergraduate institution in the United States that I would consider better than the United States Air Force Academy. And we on the faculty aim to make it even better."

S P O R T S

WAC Schedule Provides Test

The Air Force Falcons stomped the San Diego Aztecs in a 34-16 victory in the 1984 season opener. "This was an aboveaverage game for us," said head coach Fisher DeBerry.

Led by quarterback Brain Knorr, the offensive unit accumulated a total of 485 yards. Knorr had eight completions out of 10 passes for 110 yards and 34 yards rushing, while Pat Evans, fullback, bulled for 121 yards on 23 carries. Mike Brown, 1983's national leader in average-yards-per-carry, rushed 55 yards, while Jody Simmons had 79 yards.

The fourth largest opening day crowd in Academy history (36,553 fans) watched the Falcons roll to an early 17-0 lead at Falcon stadium. The 17 points came in a span of 63 seconds. With a third touchdown and a 24-0 lead, the Falcons could afford to take it easy. By halftime the Falcons were ahead 31-10.

Also sparkling in the Falcon romp, was the defensive unit giving up no yards in the entire first quarter and allowing the Aztecs only a total of 216 yards in total offense with only 16 yards rushing. Three interceptions by the Falcons proved they were ready to play.

"We were relying on the defense to hold us up for the first few games until the offense got on track, and they showed everyone that they can, if we need them," DeBerry said.

The lone highlights for the Aztecs were a 47-yard touchdown pass and a 97-yard touchdown runback of an intercepted pitch-out. But as the Academy scoreboard said, "It just doesn't matter.

This was the ninth straight win for the Falcons, breaking a four-way tie for consecutive wins.

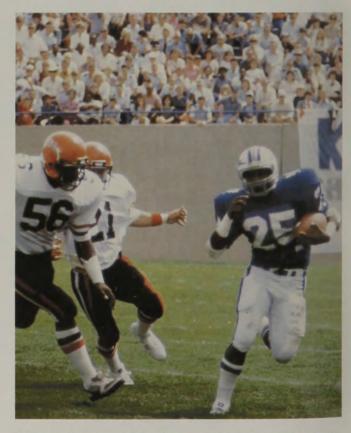

Academy fourth classman had to go through the push-up ritual, having to do 34 before the game was over.

Quarterback Brian Knorr (6) looks to unload a pass in action against San Diego State. Blocking on the play is center Dave Sutton (55).

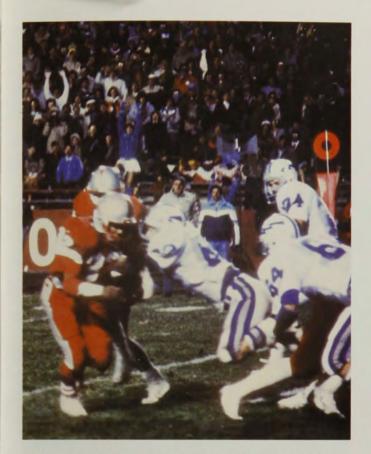

Halfback Mike Brown (3) completes a halfback option pass against San Diego State

Halfback Jody Simmons (25) breaks away during action against San Diego State. Simmons rushed for 79 yards and scored a touchdown.

Linebacker Terry Maki (67) leads the charge at New Mexico. In on the play are linebacker Scott Curtis (64) and defensive tackle John Ziegler (74)

Halfback Greg Pshsniak (38) escapes the hands of New Mexico's tackle Tom Bradford (74). Stopping Bradford is Dave Sutton (55).

Halfback Greg Pshsniak (38) finds a hole in the line in action against New Mexico

FALCONS FINISH 4 - 3 in WAC

The first half didn't look good for the Falcons during the New Mexico game, but Air Force came back in the second to romp over the Lobos in a 23-9 victory at New Mexico Stadium.

While the Falcons offense was sputtering, the defense was playing well enough to keep New Mexico out of the end zone. Two field goals by New Mexico in the first half put them in the lead 6-3.

We told the players at halftime that the whole season and a possible bowl bid were on the line," said head coach Fisher DeBerry . "They made the commitment to themselves and each other to go out and win that game.

With 10 minutes left in the third quarter, New Mexico pushed its lead to 9-3, until Falcon quarterback Bart Weiss scampered 24 yards for touchdown and a 10-9 lead. John Ziegler, defensive end, intercepted the ball leaving the Air Force on the Lobo 45. Two plays later, halfback Mike Brown hit paydirt on a 27 yard touchdown putting the Falcons ahead 17-9

Carlos Mateos, place-kicker, helped the Falcon's winning score by kicking two field goals of 36 and 39 yards.

Other players helping out the game were wide receivers Ken Carpenter (two catches 44 yards), and Kevin Fleming (2-38 yards) and tight end Hugh Brennan (3-21 yards). They accounted for seven completions and 103 passing yards. Leading the rushing attack, Pat Evans, fullback rushed 110 yards on 18 corries

Air Force's defense held New Mexico to 119 rushing yords and 177 passing. The Falcons also intercepted two of New Mexico's passes.

We proved we can play with some of the best teams in the nation. Before this season began nobody even gave us a chance to have a winning season. We proved we could, as well as hold our own against most teams," said DeBerry.

RUMBLE

School records were set September 8, 1984, when the the Air Force Academy Falcons ran over the Nothern Colorado Bears in a 75-7 victory at Falcon Stadium.

"We weren't trying to run up the score," said Fisher DeBerry . "We played well, and things just seemed to go our way."

Every Falcon player in uniform played in the game. The second and third teams finished the game after the first team left the field at the beginning of the second quarter, when the Falcons were already up 17-7.

Falcon school records were set for most points scored in a game, most points scored in a half, most points scored in the first half, most yards rushed (585), best average gain per carry (.4 yards), tied the number of touchdowns scored in a game (10) and most consecutive wins (10).

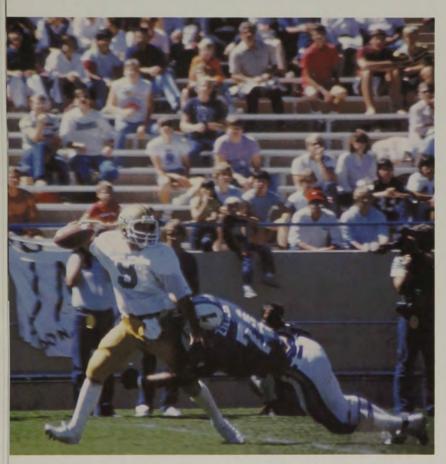

Third team quarterback Kevin Palko made the longest run of the game. Palko romped around the end and romped 56 yards to the end zone. Quarterback Brian Knorr carried seven times for 11 yeards and three touchdowns, and threw for another to Ken Carpenter, while Pat Evans had a second consecutive 100-plus yards game with 110 yards on seven carries and one touchdown.

Leading the defense was Chris Funk with 10 tackles; one for a loss, one sack and one pass break-up. One Bear drive was stopped by Terry Maki's interception. The Bears could only amass a total of 144 offensive yards because of the Falcon's defense, 47 yards rushing and 97 yards in the air. The Falcons weren't giving the Bears first downs, only eight for the Bears compared to the Falcon's 25.

"I still don't know exactly how good we are," said DeBerry. "This kind of game can be a tremendous confidence builder. Our biggest play against the Bears, in my view, was Scott Thomas' kick-off return for 63 yards. that turned the game momentum back around to us.

Fullback Pat Evans (36) scampers for nine yards against Northern Colorado while offensive tackle Kraig Evenson (65) makes room. Evans ran for a total of 110 yards against the Bears and scored a touchdown.

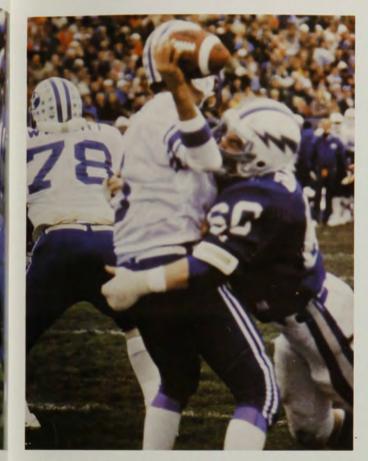

Defensive guard John Ziegler (74) sacks Bear quarterback Tom Aiello.

Placekicker Carlos Mateos (1) makes one of his four extra points against Northern Colorado. Holding the ball is Kevin Fleming .

Fulbock John

rd open Keterla s nam besretises ber

Linebacker Mike Chandler (60) gets to BYU's quarterback Robbie Bosco despite the efforts of Cougar's tackle Dave Wright (78).

VALIANT EFFORT

The Falcons had several chances to win in the October 20, 1984 game against Brigham Young University at Falcon Stadium, but BYU's defense rose to the occasion resulting in a 30-25 Falcon loss.

"They played like they were a top-ten team," said Falcon head coach Fisher DeBerry . "But we played them close, which proved to me that we can hold our own with any team in the nation."

The Falcons had dreams of repeating 1982's last-minute miracle against BYU. Their dream ended when the Air Force got the ball with 6:13 left in the game, but they couldn't get the ball moving. Falcons punted on the fourth down, giving BYU the ball to run out the clock.

BYU was the nation's top passing team and their quarterback, Robbie Boscoe showed why. He threw for 484 yards and four touchdowns, doing most of his passing outside the pocket, mainly because of the pressure from the Falcon defense line.

One of the main aspects of the game were third-down conversions. The Falcons converted seven of 14, while BYU converted nine of 13.

"This was a great college football game," said DeBerry. "I'm very proud of our kids' efforts. We had a chance to win, but just came up short."

Pat Evans, Falcon fullback, led the team on the ground, picking up 104 yards on 20 carries, while quarterback Bart Weiss completed six passes out of 10 attempts for 155 yards, with one touchdown throw of 57 yards to wide receiver Kevin Fleming. Fleming took the ball away from BYU defense and raced into the endzone. However, BYU's defense held the Falcons to just 194 yards on the ground, more than 100 yards under its nation-leading average. The Falcon rushing total dropped them out of the top spot, but they still ranked third with an average of 320.6 yards-per-game.

Fullback Johnny Smith (37) finds his way through the BYU line for five yards.

Defensive tackle Chris Funk (96) and John Ziegler (on ground) puts the final stop to a Cougar runner.

Falcon quarterback Bart Weiss (4) penetrates a hole in the line of the Fighting Irish during the Falcons' 21-7 win over Notre Dame.

Running back Jody Simmons (25) gains 28 of his 141 yards while Dave Sutton (55) heads the way.

FALCONS FLY

Notre Dame may be Air Force's biggest rival, but that didn't stop the Air Force from crushing them in a 21-7 victory at the Notre Dame Stadium, October 16, 1984.

"Nobody in the naiton gave us a chance to win this ballgame. Nobody but the players themselves!" said Fisher DeBerry, Falcon head coach.

This game was played on the ground by the Falcons. They ran for 371 yard and only put the ball in the air six times. Notre Dame should have tried the same. Out of 35 passes they only completed 12.

With only a slim 14-7 lead, the Falcons made the biggest play of the game. Notre Dame tried to get a first down but 225-pound nose guard Larry Nicklas stopped there tailback, giving Falcons the ball. Then Bart Weiss, quarterback, led the team 51 yards into the end zone for a 21-7 lead, driving any thoughts of comeback the Fighting Irish might have had.

This victory put the Falcons at a 5-2 season record.

Leading the ground attack, halfback Jody Simmons rushed 141 yards on 24 carries with one touchdown. At the same time, Weiss was reading the Irish defense perfectly.

Chris Vellanti (left) and Roger Teague (84) attempt block for Carlos Mateos for an extra point against the Fighting Irish.

1305:00

"They were keying inside early in the game, so the pitchout was there," he said. "In the second half they adjusted outside to stop us, and it opened the inside game up. Everything we did seemed to work perfectly."

"Weiss played the option as well as I've ever seen it played." DeBerry said. "Jody had an outstanding game, and he is becoming one of our big-play people. Anytime he has the ball in his hands, he could wind up in the endzone."

Some of the leaders in the game were; Weiss, throwing the ball 2-6 for 27 yards, running 20 times for 69 yards and a touchdown. Fullback Pat Evans ran 54 yards on 13 carries, while halfback Greg Psniak gained 35 yards on seven carries. Fullback Johnny Smith bulled for 24 yards and a touchdown.

"The lead blocker got out in front and gave us the opening we needed almost everytime," DeBerry said.

This could have been the best defensive game the Falcons played all season. Defense held Notre Dame to just 207 yards total offense. "We were outweighed by 40 to 50 pounds per man on the line, but our quickness nad strength made up for it," said DeBerry.

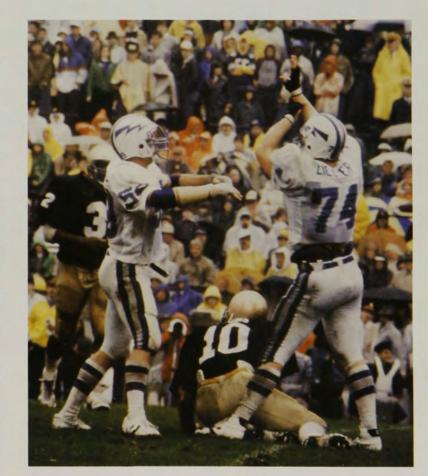

The following game would be the last Falcon home game. "It will be our seniors home game, and they want to go out with a bang," DeBerry said. "We're though to beat in Falcon Stadium. We will be ready for this one. Really ready."

Safety Scott Thomas (29) and Terry Maki (67) put the stop on Notre Dame's Alan Pinkett. The Falcons' held Pinkett to 76 yards and no touchdowns.

Halfback Greg Pshsniak (28) finds room in the Irish defense.

Defensive tackle John Ziegler 974) gives the sign of the ''claw'' after sacking Notre Dame's quarterback Scott Grooms. In on the play was defensive end Tim DeRuyter (59).

FALCONS ROLL RAMS

The Falcons put their two-game losing streak to a quick halt in the September 29, 1984's game in front of a homecoming crowd of 27,806 at Falcon Stadium. Air Force extended its unbeaten record in Falcon Stadium to seven-straight games in a 52-10 victory over Colorado State University.

Falcon's defense was sparkling, forcing seven turnovers. Taking advantage of CSU's mistakes, the Falcons turned four of the turnovers to points.

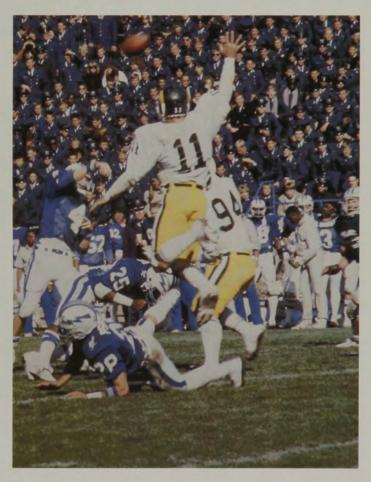

The third longest runback in Academy history was made at this game when Falcon cornerback Tom Rotello ran back 76 yards on one the two CSU passes he picked off. Cornerback Dwan Wilson added a pass theft and forced a fumble to be recovered by Falcon linebacker Terry Maki . Another interception and fumble recovery were made by safety Steve Sigler, while safety Scott Thomas added a fumble recovery.

"The hitting out there was trememdous," said defensive tackle Chris Funk . One example of the hitting was when the CSU quarterback was knocked out of the game with a concussion when Falcon A.J. Scott hit him with a blindside tackle

Falcons led at halftime 24-0, with second string quarterback Bart Weiss leading the team. He was 8-13 for 112 yards and rushed for 20 more. Leading The team in rushing was Pat Evans, fullback, with 94 yards on 20 carries. Jody Simmons was another offense leader. He gained 93 yards on nine carries, plus two touchdowns on runs of 41 and 29 yards. The offense romped for 417 yards in total offense, 304 on the ground. The defense held CSU to 317 yards, only 124 rushing.

Only having to punt four times, Mark Simon averaged 49 yards per kick. The kicking game was excellent, as usual," sold head coach Fisher DeBerry . "We had 156 yards in returns to their two. Our kickers are some of the best in the nation.

"We played extremely well, the best 60 minutes of football so far this season," DeBerry said.

Quarterback Bart Weiss (4) gets away a pass during action against the Rams. Weiss completed eight of 13 for 112 yards and a touchdown. Blocking for Weiss is Jody Simmons (25) and Greg Pshsniak (28).

NAVY SINKS

The defense for the Commander-in-Chief's trophy opened in October 6, 1984's game when the Air Force battled against Navy. The Falcons won 29-22 at Falcon Stadium.

Navy suprised Air Force by scoring in the first 14 seconds of the game. The gameopening kick-pff resulted in a 97-yard touchdown. Coming right back to tie the score, quarterback Bart Weiss made a fouryard run around the end to score, after the Falcons had a 85-yard drive.

After a pitch-out by Weiss, halfback Jody Simmons scored on a 29-yard run, putting the Falcons in the lead for the first time. Before halftime, Navy made two fieldgols, leaving the score 14-13 still in Air Force's favor. The second half started out better for the Falcons. Before 20 seconds had passed, cornerback Tom Rotell ran the kick-off back 49 yards where fullback Pat Evans romped 36 yards to score on the second play. This put the Falcons ahead 21-13.

It wasn't over yet. The middles came back to get the lead by scoring a field goal and touchdown from a pass interception.

After being held back by Navy's defense well into the third quarter and being forced to punt, Falcons recovered the ball on a Navy fumble. Evans scored his second touchdown of the game on a one-yard plunge, putting the Air Force ahead by five points. To make the final score, Weiss kept again for the two-point conversion.

The Falcon's defense wouldn't allow the middles to cross mid-field for the remainder of the game, while Falcon offense kept the ball for 10:47 of the fourth quarter. Eight minutes of the clock were ate up when Weiss found wide-receiver open and threw him a 16-yard pass. Carpenter's catch kept a long drive alive.

"Ken is a clutch receiver," said head coach Fisher DeBerry . "He was there when we needed him the most."

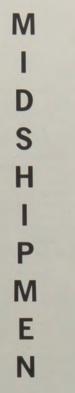

The Falcons won half the battle to the Commander-in-Chief's trophy. The next half of the battle would be against Army in a few weeks.

Fullback Pat Evans (36) avoids the outstretched hands of Navy defender Kent Van Horn (73). Air Force went on to win 29-22.

Fullback Pat Evans (36) continued to penetrate Navy's line while left guard Fred Buttrell keeps the middles linebacker Mike Taylor (62) away.

ARMY UPSETS FALCONS

The first half looked good for the Falcons to keep the Commander-in-Chief's trophy for the third straight year. The second half the Air Force let it slip through their hands by losing to Army 24-12 at Michie Stadium, November 3, 1984.

The game started with a mini disaster for the Falcons. On the first play, Army's defense sacked the Falcon ball carrier in the end zone for a safety and a 2-0 lead. Army then made a field goal by Carlos Matoes and a touchdown by wide receiver Eric Pharris . Pharris caught the 39-yard pass from Bart Weiss who threw three straight completions after unlimbering his passing arm.

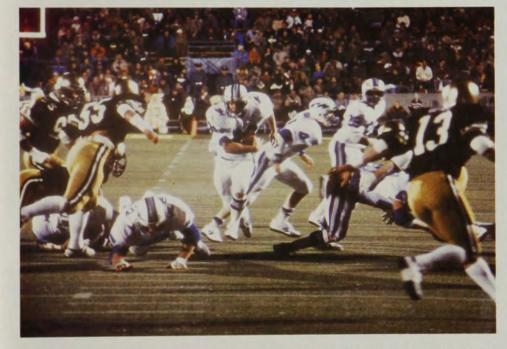

The Falcons then drove the score up to 12-5 when Matoes made another field goal. Things looked good for the Falcons for the first half even though Army's defense had held them back to only 78 yards in total offense.

Things went downhill in the second half. Army picked up on the Falcon's mistakes and turned them into points. Air Force turned the ball over on four of its first five possissions, lost three fumbles and a pass interception.

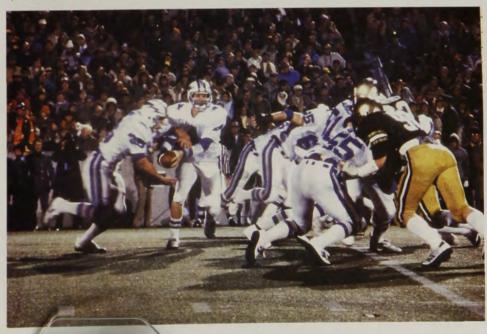

"Our defense played a good game,"

said head coach Fisher DeBerry. "The defense kept Army out of the end zone the whole game, with the exception of the one reverse play. But when you turn the ball over that many times in the second half to a team as good as Army, I don't know of any way to win. Their kicking game was outstanding. Our's wasn't, that's what won the game."

Falcons did play a good passing game. The quarterbacks threw for 231 yards. Army's passing attack netted just 23 yards, but its wishbone attack gained 245 yards on the ground to just 150 for the Falcons.

Fullback Par Evans (36) takes a handoff from quarterback Bart Weiss (4) in aciton against Army. The Black Knights upset the Falcons 24-12.

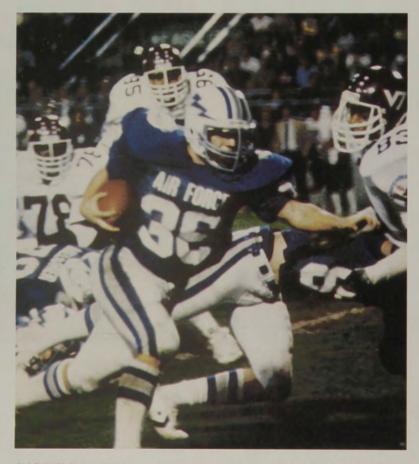

Falcon cornerback Mike Toliver (43) goes up high in an attempt to intercept a pass against Army.

Fullback Par Evans (36) goes up the middle after taking a handoff from quarterback Bart Weiss (4). Evans gained 39 yards on six carries against Army.

FOOTBALL — The Falcons continued their pwerful ground attack and defeated Virginia Tech 23-7 in the Independence Bowl, giving Air Force its third-straight bowl victory and an 8-4 record. The Falcons were the nation's second top rushing team with 326.5 yeards per game. Air Force was also ranked among the national leaders with an average of 426.5 yards per game in total offense and 31.5 points per game in scoring. The Falcons defeated Navy for the third-straight year and also scored its third-straight victory over Notre Dame. Defensive tackle Chris Funk was selected WAC co-player of the year.

Row: Tom Gilster, Juan Pena, Pat McKenna, Sung Cho, Kenny Korpack, Jeff Jacobs, Larry Friend, Lex Brockington, Shea Long, Dereck Toney, Tim Williams Back Row: Kim Schiller, Ted McDougal, Lou Sagastine, Ron Graves, Sean Wright, Dale Bennett, Dennis Ryan, Dave Weintrab, Steve Jazai, Helmut Derrs, Ken Sullivan, Greg Schiller, Paul Nowatry, Paul Olafson, Jack Casey, Capt. Steve Daniek, Capt. Bernie Nuno

"This team has more potential to become national contenders than any other team I have coached here at the Academy," said coach Louis Sagastume prior to the 1984 varsity soccer season. The 1984 Falcons were characterized as confident, poised, strong, and very experienced as could be seen by thier five juniors. Their 10-5-4 record was a bit of a disappointment to many, but the season had many highlights. The four ties could have easily been wins as the Falcons lead nationally ranked teams such as the University of San Francisco, North Texas State, Eastern Illnois, and Southern Illnois. Air Force beat Army and Navy for the second year in a row, and continued their seemingly endless domination of Colorado College with a 3-0 victory. The team will miss senior defenders Dale Bennett, Ron Graves, and Greg Schiller, midfielders Larry Friend and Tim Williams, and most of whom will go on to play for the games were great, the parties were better, and the friendships unforgettable."

Players not Everything

In 1979 the Academy started a new era on the soccer fields. The Academy had decided to hire its first full-time civilian soccer coach, Louis Sagastume, a chrismatic young coach with impeccable credentials and a proven track record. With a heady goal of going for a national championship, Sagastume took the Academy's soccer reins. Soft-spoken, cheerful, gentle of manner, those bright, dark eyes nevertheless projected an intensity and determination.

At the age of 12 years coach Sagastume started his American soccer carrer with club competition in the Bay-area. Sagastume excelled in club play, and eventually moved on to the University of San Francisco varsity. He earned All-American honors as the Dons' play-making inside forward and was captain of the 1966 national championship team - the first time a far west school had gone all the way.

The Oakland Clippers of the North American Soccer League had taken notice, and made Sagastume their number-one draft pick - the first time the Clippers had drafted an American citizen. Success was immediate, but frustration would not be far behind. Playing time for a rookie was limited, and Sagastume became increasingly impatient. Soon Sagastume's involvement with soccer had found a new direction.

"I was beginning to realize that my success in soccer would be as coach, not a player." said Sagastume. Sagastume became a spanish teacher and soccer coach at San Francisco's St. Ignatuis High School, and once again the success was immediate. St. Ignatuis won there city championships and placed second four times during Sagastume's seven year tenure. He built the program from the ground up, and soccer soon was established as a major varsity sport.

A few years past by in which Sagastume took on different positions in the soccer world before looking at the head coach position at the Academy. "I came out just to look at the place, and I was impressed. The facilities were unbelievable. Football always had been king wherever I had gone, and I always had to share a field with the football team. Here, there were enough facilities that I wouldn't have to directly complete with them. I had wanted to coach at a Division 1 school, and this was a great opportunity. When the job was offered, I accepted."

Co-captain Larry Friend uses those "magic feet" to beat a Navy defender.

Sagastume arrived in 1979, intent on building a national soccer powerhouse. The surprise was not a pleasant one. The Academy indeed supported Sagastume's soccer program, but football still was king. Soccer remained a major sport. Major or minor, athletics are secondary to academics and the development of future Air Force officers. Soccer players first must be cadets. Soccer players must meet all of the Academy's rigid admissions standards, and all cadets must carry full loads of academic courses and military studies. The average cadet might carry twice the NCAA's minimum course load for varsity eligibility, and seemingly his every move will be governed by military discipline.

"This is probably the biggest challenge of my life," Sagastume said, leaving his office for the practice field. "The Academy, with its academic and military standards, is one of the toughest places in the country to coach. If I ever get close to or win a national championship with all those factors to overcome, it will be the greatest satisfaction of my life."

(A revised article of Karl Licis in the Sept 13,1984 cover section of the Gazette Telegraph - revised by Gary Burg)

Perhaps the highlight of the year was senior Judd McGlohn's accomplishments. He finished second in the Tucker Invitational, third in the Falcon Invitational, and first in the WAC Championships. The WAC coaches voted him first Team All-WAC and WAC player of the year.

Judd McGlohn/Team Co-captain, 1985 - WAC Cahmpion and WAC player of the year, competed in the 1985 NCAA championships. Judd also made WAC 1st team honors." The Air Force Academy Men's Golf Team finished up their season with a fifth place in the WAC; their highest ever. That

The Air Force Academy Men's Golf Team finished up their season with a fifth place in the WAC; their highest ever. That finish helped culminate a very successful year. They finished 9-0-1 for the year in dual match competition; the tie was in competition with Wyoming. Air Force lost the Rocky Mountain Intercollegiate Golf Association Championship (13 teams from the Rocky Mountain Region) by one shot to the University of Colorado. The championship involved the total strokes from four 36-hole tournaments. "To lose by one shot was very disappointing." said Coach Vic Summers. "That's 576 holes of golf, but that shows how tough the competition was. We were always within two or three shots of Colorado University at each tournament." Judd McGlohn took the individual RMIGA Championship and was voted to the All-RMIGA Team along with senior Craig Hall and Judi McGlohn placed ninth out of 26 teams at the Bluebonnet Bowl in Houston, Texas.

Gulsvig blocks a shot with Rob Marr waiting to grab the loose ball.

MacDonald hits another one from the corner.

Hoopers Experience New Leadership

C1C John Jordon, this years MVP, goes over a BYU defender.

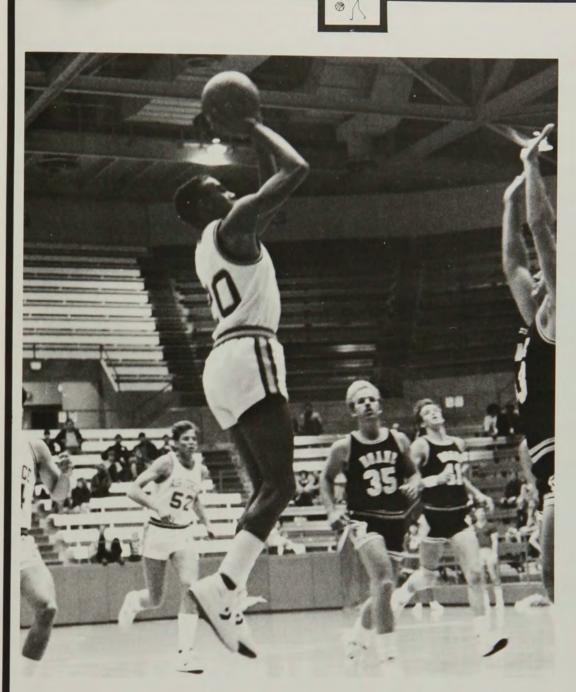

C2C Todd Beer drives to the basket.

Reggie Minton 's first year as head coach of the Falcon basketball program was not as hoped - at least record-wise. The new run and gun game plan was not as effective as coach Minton had hoped but the Falcon's did manage to play almost all of their opponents close and were usually within a few points to turn their loss into a victory.

Coach Minton was an assistant coach for the Falcons before heading to the East Coast to coach. After Coach Egan was releived of his head coaching duties for the Falcons the search was out for a replacement. Coach Minton was the likely choice. Having coached at the Academy previously Coach Minton could relate to his players immediately and establish a program that could fit his players abilities. The Falcon season was not without its bright spots. During the first round of the war tournement the Falcons took it to BYU and beat the highly favored Cougars on their home court. Hopefully this will be an indication of next year's season -we can only hope and support our team to turn the table on next year's outcome.

WOMEN'S BASKETBALL BOOSTS 20-8 RECORD

Standing: Head Coach Marti Gasser, Kelly Latimer, Cindy Stephens, mary Manning, Dawn Dunlop, Andrea Caddy, Theresa Bald, Asst. Coach Pat Swanke, Officer Rep. Karen Dunivin Sitting: Amy Hartfiled, Margaret Duffy, Raegan Roach, Kathy Benko, Marla Baggerly, Amanda Williams, Stacey Goss, Kristen Fosdick

WOMEN'S BASKETBALL — Boasting a strong 20-8 overall record, the Falcons won the Continental Divide Conference finishing 11-3. This is only the second time in Academy women's basketball history a squad reached the 20-win plateau. The 1977-78 team had a 20-2 record. Junior Stacey Goss and senior Theresa Blad became only the third and fourth players to reach 1,000 points for thier careers, while Blad also became the all-time leading rebounder for the Falcons passing Pat Swanke's career total of 721 rebounds. Head coach Marti Gasser was named All-American Coach by the American Women's Sports Federation while Goss was an honorable All-West All-American selectee by the same organization.

Mary Manning deflects a pass. The Falcons proved to be tough on defense.

The Falcons get the rebound against a Continental Divide conference foe.

Logal

1 :

Mary Manning (40) blocks a shot as Kristen Fosdick looks on.

Some day in the future, when the women's basketball championship banners clutter Cadet Field House and the stands are packed and 20-victory seasons are commonplace, they'll look back and point to Miami.

That's where it happened, they'll say. Miami, Fla., home of sandy beaches, Don Shula's Dolphins and hundreds of thousands of retirees. That's where the Academy may have soared to its greatest heights.

In three days at the Miami Classic over Christmas vacation, the Falcons defeated their biggest rival, Army (85-72), and a team that ranked third in the nation at the time, Florida International (65-52).

The success at the Miami Classic proved both to themselves and the other teams that the Falcons were indeed a legitimate National Collegiate Athletic Association Division II contender. But second-year coach Marti Gasser isn't sure which group was harder to convince.

Maybe it was the competition. "When we beat Florida International everyone was so surprised," Gasser recalled. "It was like, 'Who's this little Air Force team beating on the third-ranked team in Division II?' Florida International thought they were going to win by 20 points.

But they didn't. And the pollsters came around

"From that day on we were ranked in the Top 20, anywhere from 12th to 16th, Gasser said. "And I'm sure it's because of the Miami tournament.

The success in Miami had the biggest impact on the players. They were the ones who went through a 13-13 season in

1983-84, Gasser's first at the Academy. "To be honest," said Gasser, one of the few civilian coaches at the Academy, "it took them awhile to adjust to me and my system.

And although they owned a 4-2 record heading into the Miami Classic, the Falcons

were coming off a loss and a month's loyoff.

The Classic, which ran from Jan. 2-5, was the place where the tone for the upcoming Continental Divide Conference season would be set.

"Our trip to Miami was the key to the season," Gasser insisted. "There were no pressures from school and the only thing on their minds was the team. We practiced twice a day — in the morning and evening — and in the afternoon we did something as a team.

They were together for the first time off the basketball court and really clicked. It took more than a year, but I could finally look at them and say, 'You're learning what sports are all about." They peaked right then.

The Falcons lost the third game of the tournament, although it was no fault of junior guard Stacey Goss. In the three games in Miami, Goss scored 25, 25 and 37 points, and although only 5-foot-8, she led the team with 10 rebounds in the third

game against Wisconsin-Green Bay.

'Stacy was the quarterback of our three-guard offense, so as she went, pretty much went the team," Gasser said of the Kansas City, Kan., native.

Goss averaged 18.3 points, 3.9 steals, 5.4 assists and 4.8 rebounds per game. She also had single-game team highs for points (37), field goals (14), free throws (11) and assists (11). Obviously, Goss had a great deal to do with the Falcons' 20-8 record in 1984-85.

Miami proved what Goss and the Falcons could do. But the final acid test was about to come. Upon returning to the Academy, the women were faced with four games in five days. They won all four, beating Alaska-Fairbanks and Alaska-Anchorage both twice, with the final game of the week going into double overtime. Senior center Mary Manning had a great week, three times leading the team in rebounding and one night putting on a 21point, 11-rebound clinic.

With a pair of exceptions, the cadets

practically breezed through the conference season. The Falcons received a scare against Northern Colorado when starting freshman guard Amanda Williams went down with an ankle injury, forcing her out of the lineup for four games. But she came back to finish the season as the team's second-leading scorer (10.5 points per game) and No. 2 assist woman.

"Amanda did a fantastic job for us," said Gasser. "She penetrated well, was a great passer and in a lot of respects she's a lot like Stacey. She has great court awareness, which is something you can't teach.

The low point of the Falcons' CDC season came against Denver and was a 73-62 loss at Cadet Field House. "That was a tough loss for us," Gasser said. "We were bothered by injuries and I think the players were mentally exhausted because of their schoolwork.

The Falcons rebounded with a pair of non-conference wins and headed into a two-game series at Eastern Montana needing just one victory in their final three CDC games to clinch the league title. Just as important as the championship was a berth in the NCAAs.

Until they won again, each game was the biggest one of the season for the Falcons. The wait was a short one, however, as Goss (who else?) scored 32 points and senior forward Theresa Blad had nine rebounds to pace the cadets to a 79-72 victory

Blad played a big role in the Falcons' 11-3 conference record. The all-time Academy leader in games played (103), the 1983 CDC first-team selection average ed 10 points and 7.5 rebounds in 1984-85 and finished her career as the Falcons' alltime top rebounder (751) and No. 3 scorer (1,051 points).

Unfortunately, Blad ended her career on a losing note. In a first-round NCAA playoff game, the Falcons hosted Abilene Christian before a large home crowd of 1,287 and lost 82-61. Goss scored 19 points and Blad had an 11-point, 17-rebound performance, but that wasn't enough.

The Falcons shot just 31 percent from the field and 45 percent from the freethrow line. In all the Falcons missed 16 free throws and it seemed that Abilene's Claudia Schleyer got every one of them. A two-time All-American, Schleyer had 19 rebounds to pace Abilene.

"The sad thing about the game was that it was such a big game and we had one of our worst showings of the year," confessed Gasser. "We were only down by about three at halftime and I told them we were fortunate to be that close despite all the shots we were missing.

Overall, however, the Falcons shot 45 percent from the floor, compared to just 40 for their opponents. In fact, the cadets performed better than their opponents in every facet of the game on their way to a No. 15 ranking last season. No wonder Gasser can't wait for next season to start.

We had seven freshmen and I thought we might be too young," admitted Gasser, who was named top coach in the CDC and District 7. "But we have a base now and should be consistent over the next two or three years. I think we have a chance to be Top 10 this coming season."

MEN'S SWIMMING

Lt. Col. Mikki King coaches cadet Jeff Myer, '87.

The Air Force men's team completed its season with a 13-5 record. On the way to finishing sixth in the WAC championships, the Falcons set two school records. Junior Rich Sumrall placed fourth in the 100-yeard breaststroke with a 57:38 time while the falcons were timed in 3:05.83 in the 400-yard freestyle relay, both school records.

The 1985 season saw the men's tennis team finish with an outstanding 25 win - 7 loss dual match record and a sixth place finish at the WAC Championships. Their 25s win gave the Falcon program its ninth consecutive season with 20 or more victories. Highlighting the season was a 13 match win streak which included such opponents as Cal State -Fullerton, Nebraska, Colorado and Oregon. This streak was finally halted by nationally ranked California - Berkeley.

The Falcons were led by three of the top players in AFA history. Junior Tom Barth posted a 24-7 record at #1 singles, sophomore John Steimle posted a team best 28-3 at #2 singles and senior team captain Scott Vipond went 26-5 at #3. Others making significant contributions to the Falcon's winning ways were freshmen Skip Hinman 24-8 and Alex Torres 19-8, and sophomores Mike Peterson 17-3 and Erik Johnson 12-4. With six of the top seven players returning next season, 11-year head coach, Rich Gugat expects the Falcons to continue their winning ways.

Above: Alex Torres, who had a solid ground game, hits a picture forehand. Right: Scott Vipond going for another ale. Below: Tom Barth crunches a down the line backhand.

Front Row: Anne Neubauer, Chris Blerbower, Mary Beth Keffer, Capt. Bill Allen, Stacey Wilson, Sarah Beth Rhiddlehoover, Emily Whittaker . Back Row: Sue McWhitter, Tricia Heller, Kerry Lombard, Sherry Currin, Tamaron Sharp, Kim Green . Below: Outgoing coach Capt. Bill Allen poses with team captain C2C Tamaron Sharp.

The women's varsity tennis team finished it's fall season with a 1-3 won and lost record but rebounded in the spring season with a 14-6 tally, putting their overall 1984-85 record at 15 wins versus nine losses. They finished third in the Continental Divide Conference and had three All-Conference selections in Sherry Currin, Tamaron Sharp, and Tricia Heller.

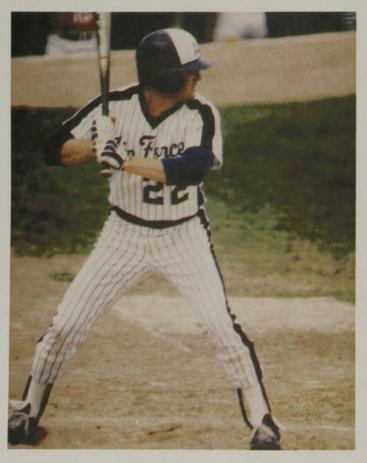

1 seed Tamaron Sharp finished with a 14-12 record in singles and 15-6 in doubles play, #2 Tricia Heller was 12-8 in singles and 11-7 in doubles, #3 Sherry Currin was 16-8 in singles and 11-10 in doubles. Freshman Kim Green the #4 seed was 16-10 in singles and 18-3 in doubles, #5 seed was junior Sarah Beth Rhiddlehoover 14-9 in singles, and freshman Anne Nuebauer was 16-3 in singles. Two more freshmen who saw plenty of action were Terri Cave, who complied a 17-5 record at #2 doubles, and Emily Whittaker, who posted an impressive 14-2 mark at #3 doubles.

BASEBALL — Fininshing with an 18-27 overall record and 9-15 in the WAC, good enough for a fourth-place finish in the Northern Division, the Falcons were in the WAC race through the final week of the season. Air Force hit .346 as a team and senior Tom Coleman recorded the most hits in a season with 69. Junior Eric Pharris was the team's leading batter with a .434 average including 53 hits, 14 doubles, two triples and seven home runs. The workhorse on the mound was junior Roch Rhinehart who threw 88.1 innings and had a team-high 55 strikeouts.

Chris Anspach with a sliding two-bagger.

Team captain Tim Pharris heads to first on a single against Colorado State University.

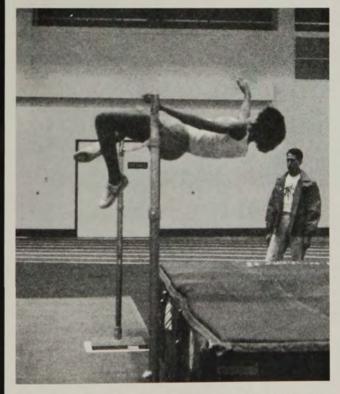

TRACK - INDOOR/OUTDOOR

The men's outdoor track finished with a dual record of 2-0 this season defeating Colorado State and Hastings in the Ram Invitational and finished in sixth place in the WAC championships. In the Ram Invitational, the Falcons won 12 of 19 events in the non-scoring meet. Another fine showing was in the Boulder Relays, where the Falcons broke two meet records. Shannon Sullivan broke the pole vault record with a 17 1/4 feet and the 4 X 100 relay team of Jeff Lamb, Bill Shedd, Todd Scott and Ed Byrd were timed in 3:12.67, four seconds better than the old record.

The Falcon women completed the season 2-0, defeating Colorado State and Hastings at the Ram Invitational. In the nonscoring Colorado Relays, the ladies had a fine showing winning five first places. In the Falcon Invitation, Air Force dominated the meet with five firsts led by Mary Manning, winner in the discus and shot put. The women's team qualified for the NCAA division II championships May 20-26 in Los Angeles.

Ending the season with a fourth-place finish at the Western Athletic Conference championships, the Falcons posted a 5-3 dual record. In the WAC meet, the Falcons took two first places. Mike Profit took the 60-yard hudles with a 7.45 mark while Ed Byrd won the 600-yard run with a time of 1:11.3.

The women's indoor track team finished the season with a 3-3 record and placed a strong sixth in the NCAA Division II national championships at triple jump, Renea Toliver in the 55 meter hurtles, Laureli Mazik in the 800-meter run and Barb Fogel and Shelly Ginder as part of the 1600-meter relay team. Roberts and Mazik were also part of the relay team.

Renea Toliver clears the high jump bar on her way to a new school record.

Powerlifters hold their weight

The bench press consists of lying on your back and pressing as much weight as possible up to the extent of your arms. Clean and jerk is picking the weight off the ground and raising it above your head so the arms are extended. The deadlift which usually is the heaviest of the categories, consists of picking the weight off the ground and raising it to hip level.

"We have several people who can get up into the 600-700 pound range," Captain Maley said. "With the weight classes we compete in, those kinds of lifts will be hard to beat."

"The team changes constantly, as some people just don't have the interest to stick with it," Captain Maley said.

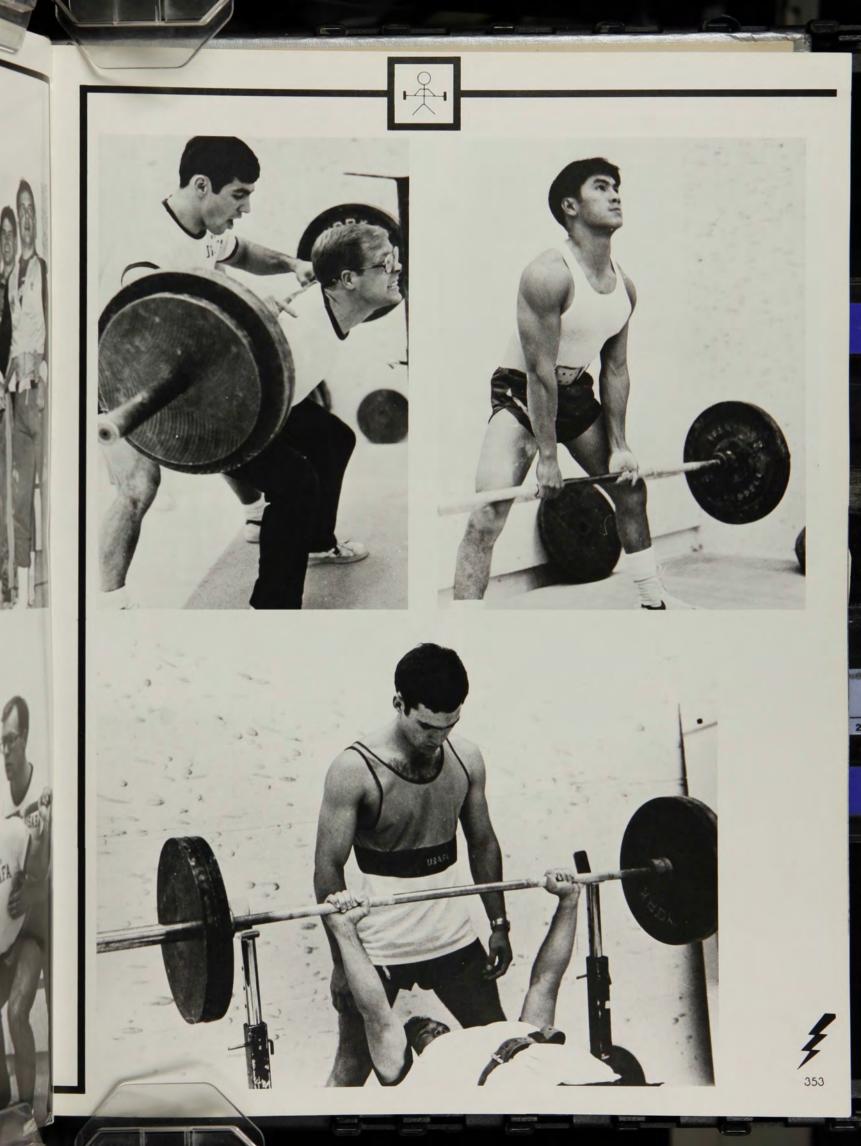

Powerlifting is a sport of lifting as much weight as possible in three different categories. The catefories are bench press, clean and jerk, and the deadlift.

Powerlifting is different from pumping iron, said Capt. Chris Maley, team coach. "Our team members don't have the bulging muscles that most people associate with weight-lifting.

"We go more for actual strength than for the muscles you see in the Mr. America contests. Huge muscles don't necessarily mean a lot of strength, some people who look immense are actually capable of lifting very little weight. They just work the muscles to look good, not lift."

The Falcon Intercollegiate athletic teams continued to excel against the top athletes in the nation ending the 1984-85 seas eight teams nationally ranked.

More than 800 athletes on 41 intercollegiate teams competed in 571 contests and came up with a winning average of 65.6

During the 1984-85 school year, Falcon varsity teams competed in 492 contests, winning 314, losing 171 and 7 ties. Four teams were undefeated during the season — men's and women's outdoor track and men's and women's golf. Several teams placed high nationally. Pistol placed fourth in standard pistol, fifth in air pistol and seventh in free pistol. Women's indoor track was sixth in the nation in Division II while women's golf was ranked seventh. Women's cross country placed eighth no-tionally while women's swimming was also eighth at its championship meet. The women's basketball team was ranked 15th and women's volleyball 18th in Division II.

Football again brought national recognition to the Academy for the third-straight year, winning the Independence Bawl. Water Polo was 14th in the National Coaches Poll.

Polo was 14th in the National Coaches Poll. Although not a varsity sport, the boxing team won its fifth national title in the last six years. Several athletes received honors from the Western Athletic Confrerence. Mike Profit won the conference track championship in the 60-yard hurdles and Ed Byrd took the 600-yards dash title while nine athletes were selected to the All-WAC football teams. Named the WAC co-defensive player of the year and first team was Chris Funk while Jody Simmons, Don Oberdieck, Mark Melcher, Fred Butrell, Larry Nicklas, Terri Maki, Scott Thomas and Mark Simon were named to second teams. Senior Judd McGlohn won the individual WAC championship and was named WAC Golfer-of-the-year while Tim Pharris, and Eric

Pharris, were named to the Northern Division All-WAC baseball team.

In its 29 years of varsity athletic competition, Air Force has won 5,710 contests, lost 2,857 and tied 74, for an overall percentage of

A Note From The Editor:

This has been my third straight year as sports editor for the Polaris. Over the years I have tried to improve the coverage of all i collegiate teams and sports clubs. This year 16 additional pages were added to the sports section. I would like to add even more I can't do it all alone. If your sports club was not covered (i.e. Bicycle, Bowling, women's Rugby, Rodeo, Handball, Trap and Ske men's Volleyball and Ski Racing) its your responcibility as a member of that club to set with Wing Media (Polaris Sports a members). We at Wing Media are more than eager to work with teams and clubs to provide the best coverage possible but we not have the time nor the manning to research every club's activities. As far as the inter-collegiate section went this year. I would like to extend a special thanks to Lt. Col. Micki Hogue, Assistant Athletic Director for Inter-collegiate activities and George Fox, assistant sports information director and their staff without whose help this section would never have been completed - especially with the great quality of work incorporated. Remember the Polaris is a cadet-run yearbook. Without people willing to give up their sports information director sports events this section would not exist. If you would like to help work on the yearbook contact Wing Media. The sports section can always use good photographers and layout personel. Become active in sports activities.

Fears...Tears...Cheers...These came with the parents of the class of 1988 as they greeted the fourth classmen during Parents' Weekend. Held on Labor Day weekend, the event marked the first time the new class ventured off-base in mass. The welcome hugs from Mom made the wait worthwhile.

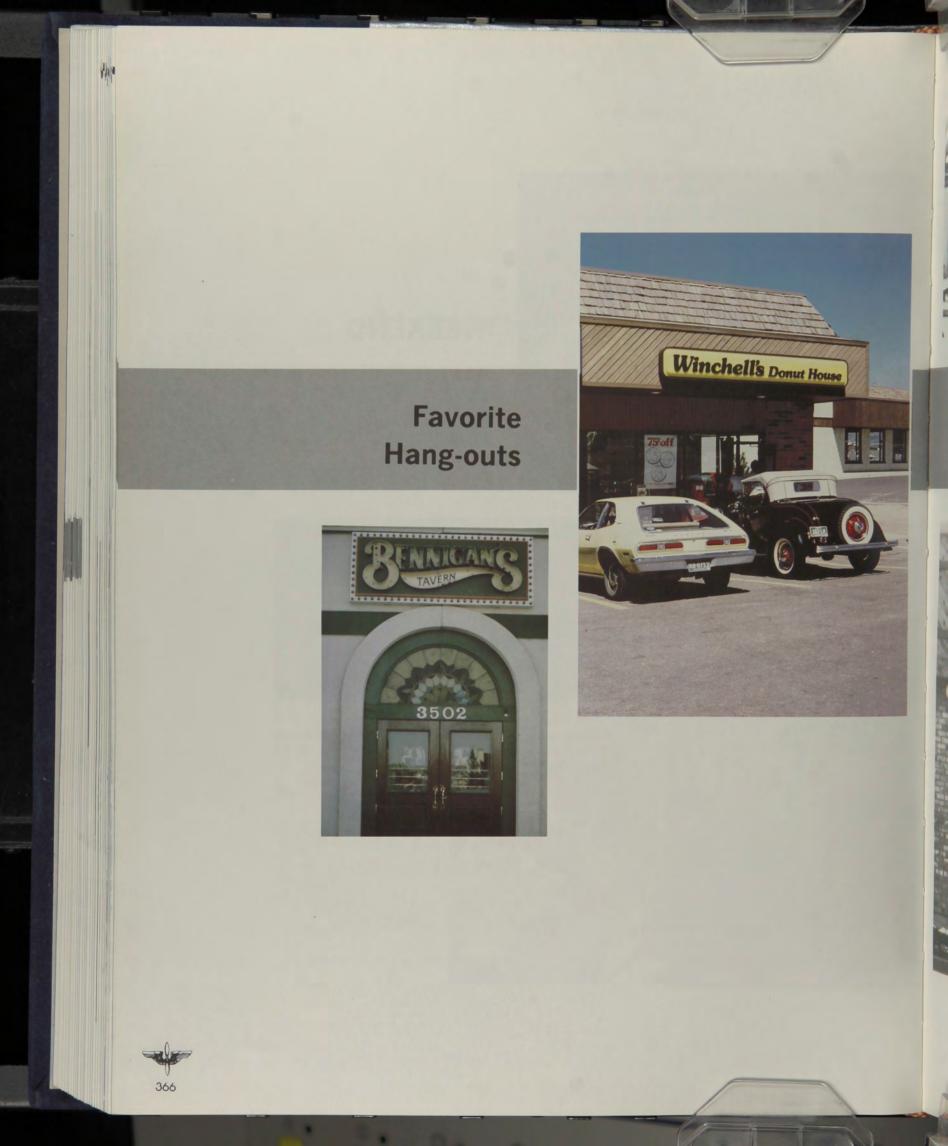

WEEKEND

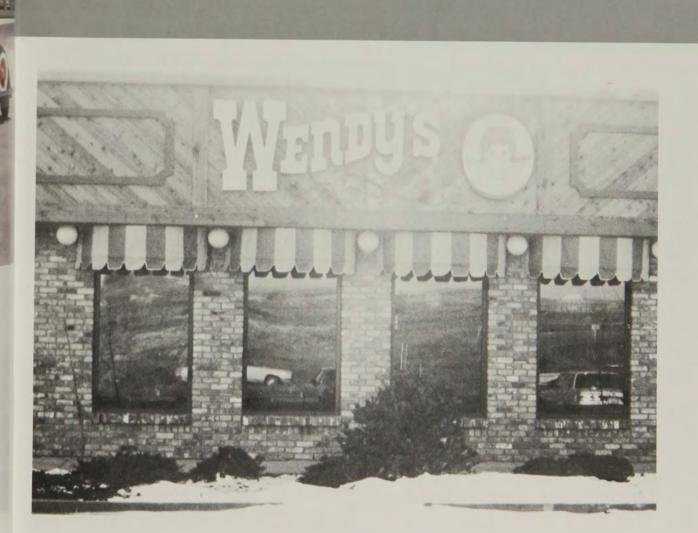

It finally came — Labor Day Weekend when Mom and Dad could visit. When the class of '88 could leave the Academy for the first time. After hugs, kisses and tears, the long wait was over.

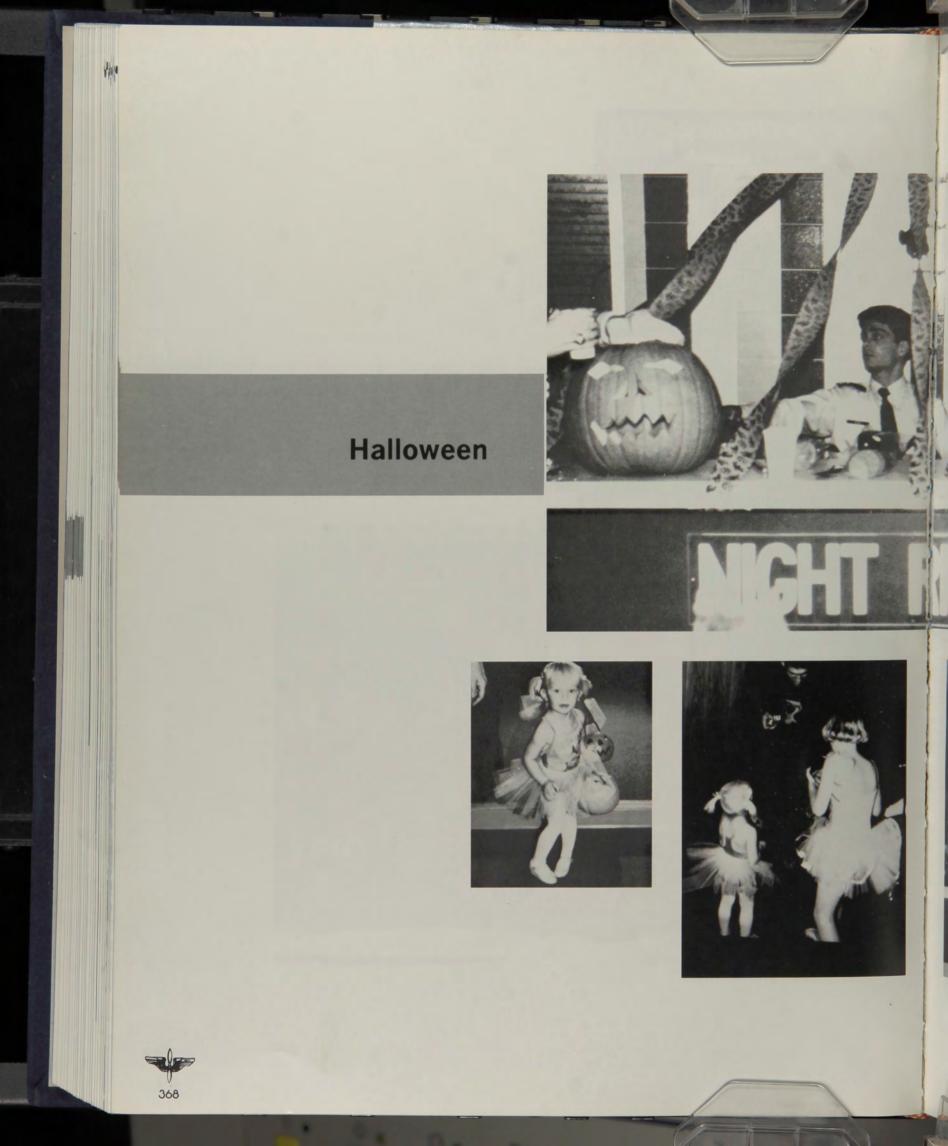

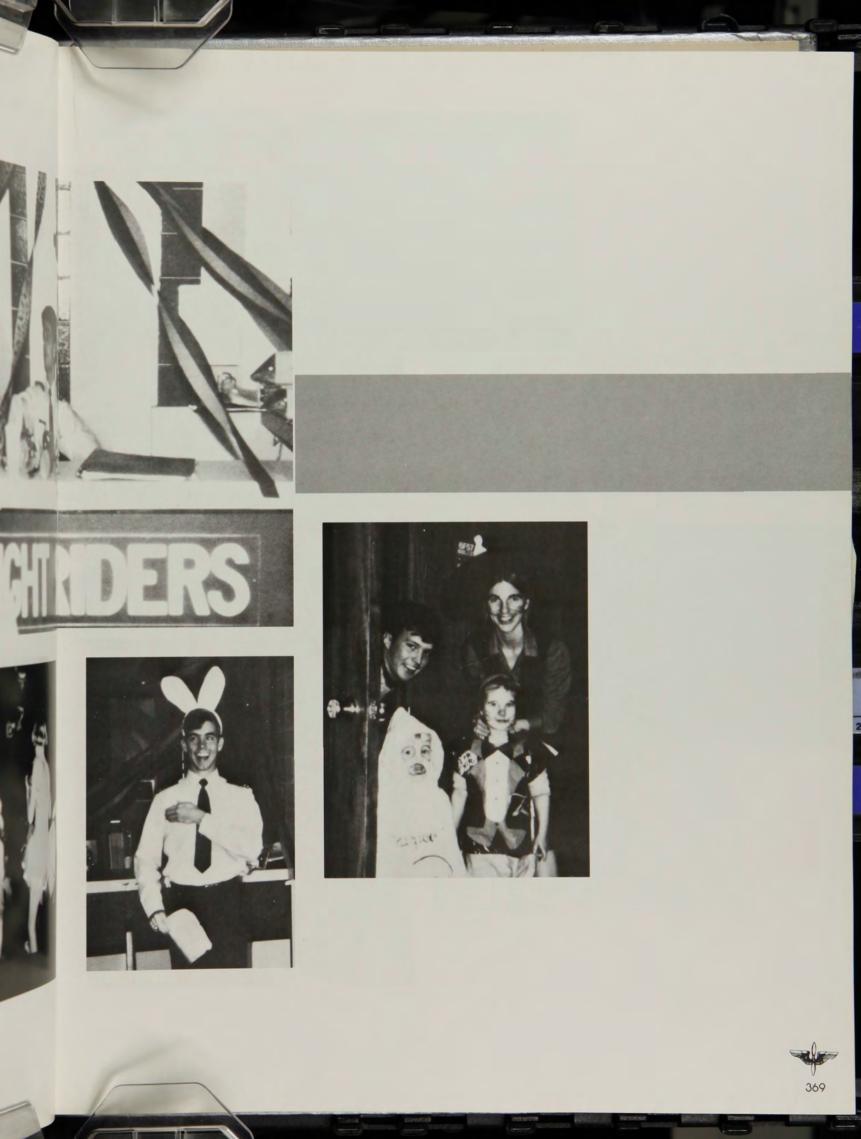

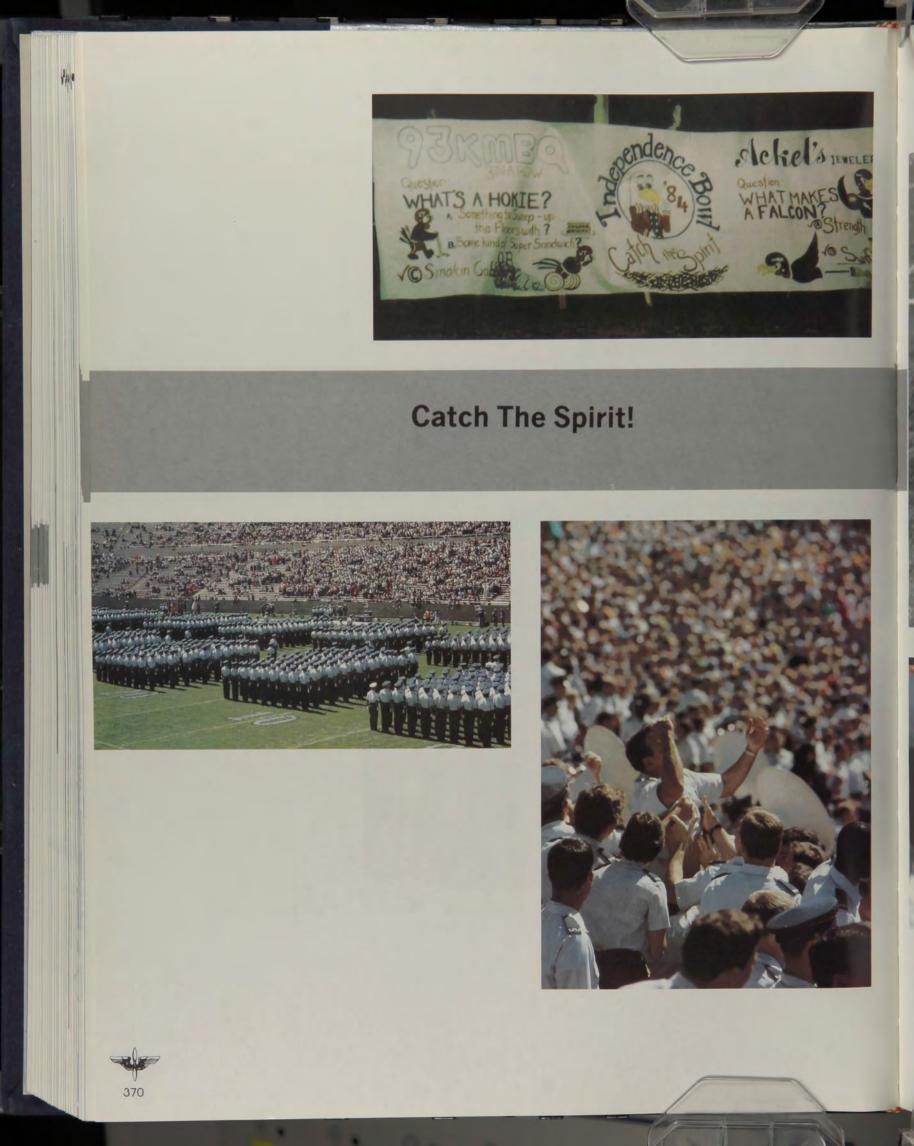

Done how

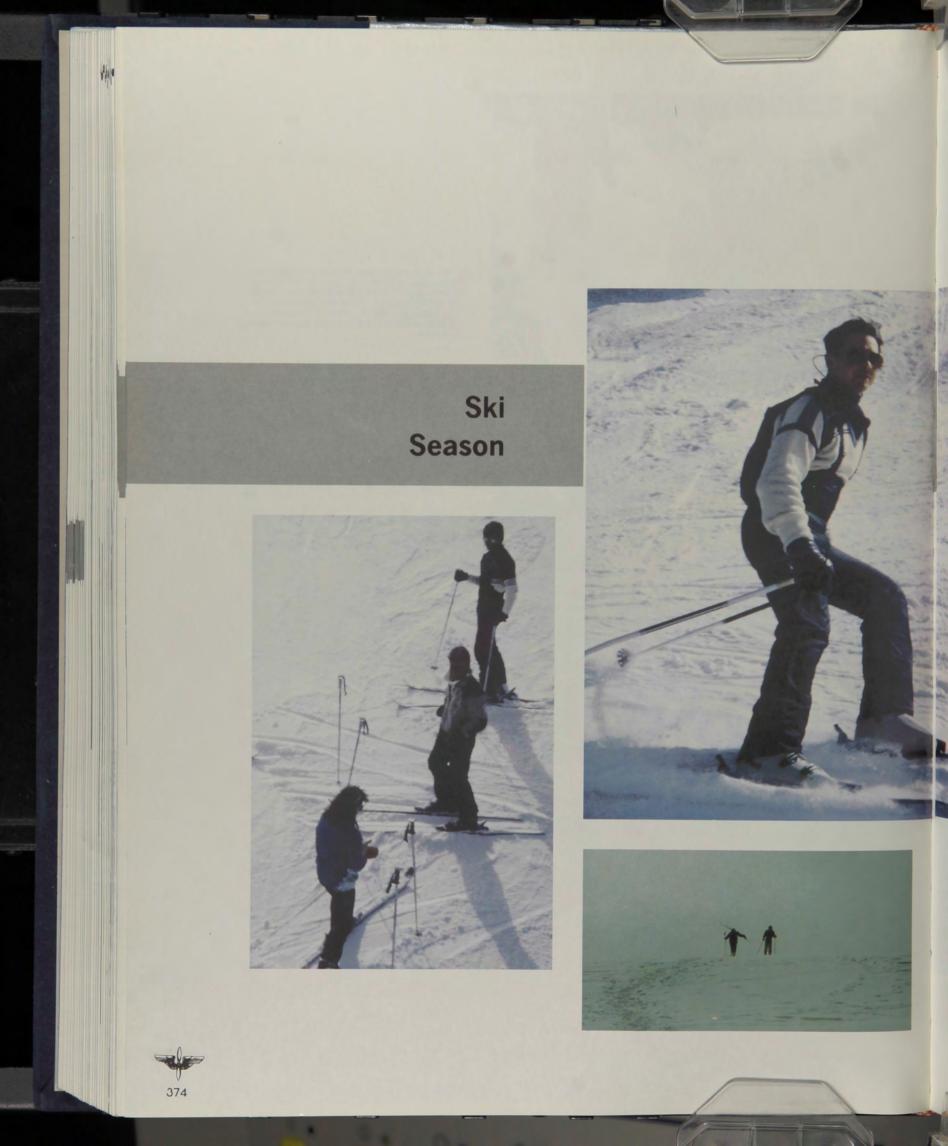

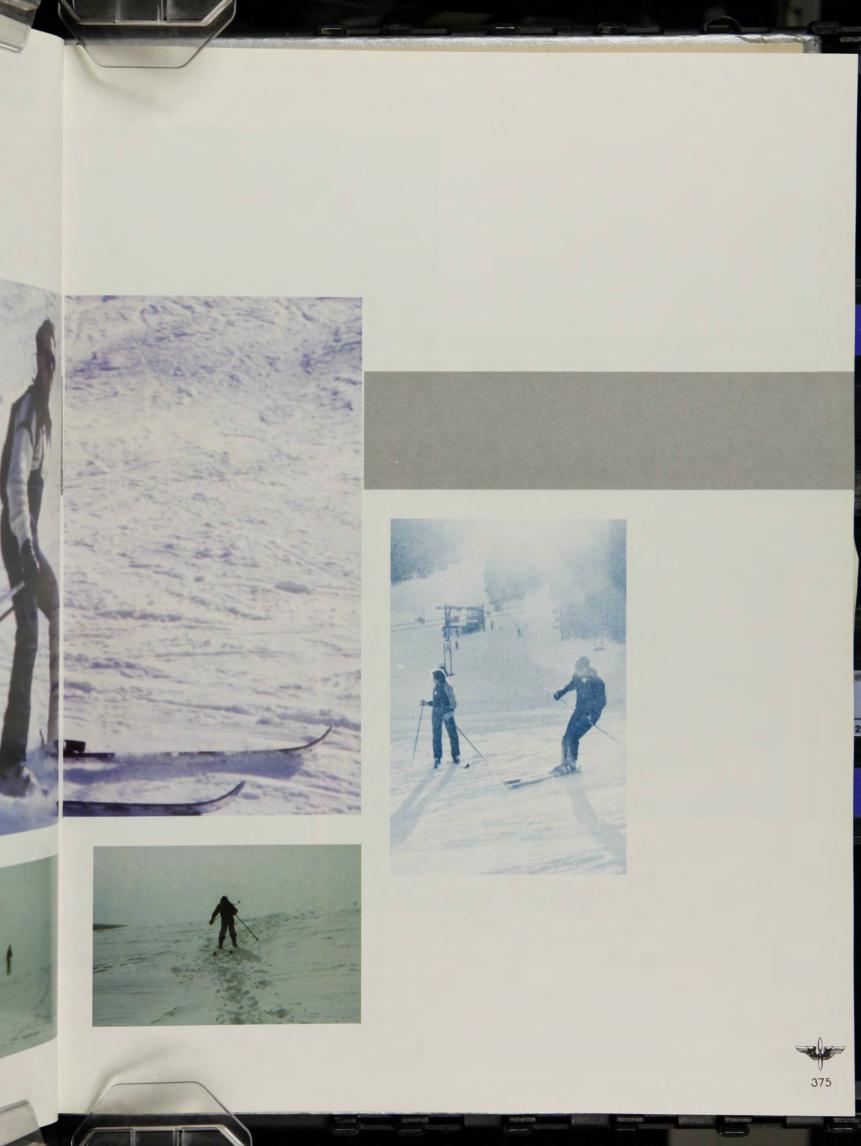

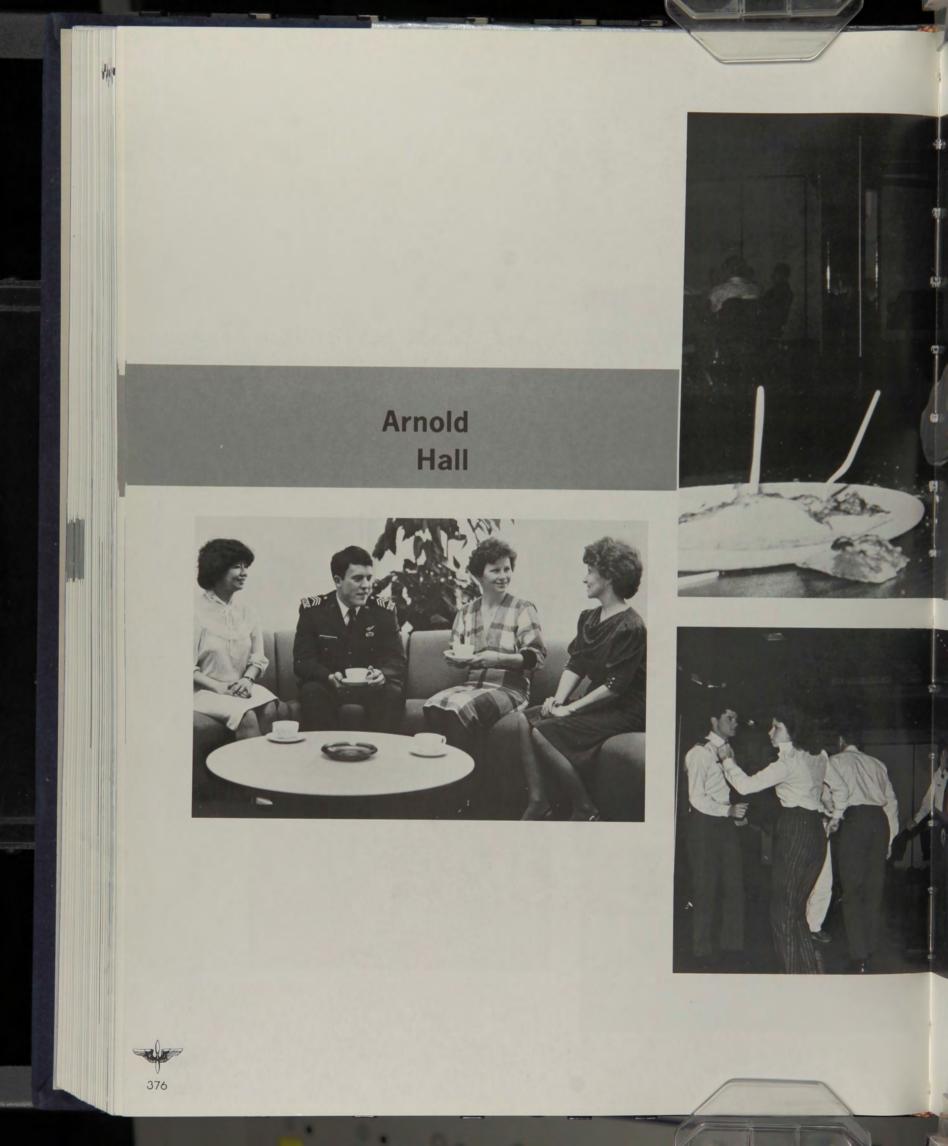

M

For many the highlight of the snow season was the dramatic snowfall in October. For the first time in more than 17 years, cadet classes were cancell-ed by the weather. During the unplanned holi-day, cadets jumped off walls into snow drifts, im-provised snow sleds and built snowmen and snow automobiles.

Singles Survival

This year saw the beginning of the singles survival course. Taught by Edyth Worley, the class showed first classmen the fundamentals of cooking and entertaining. During the course cadets learned to purchase food, prepare it and serve it in casual, informal and formal settings.

the

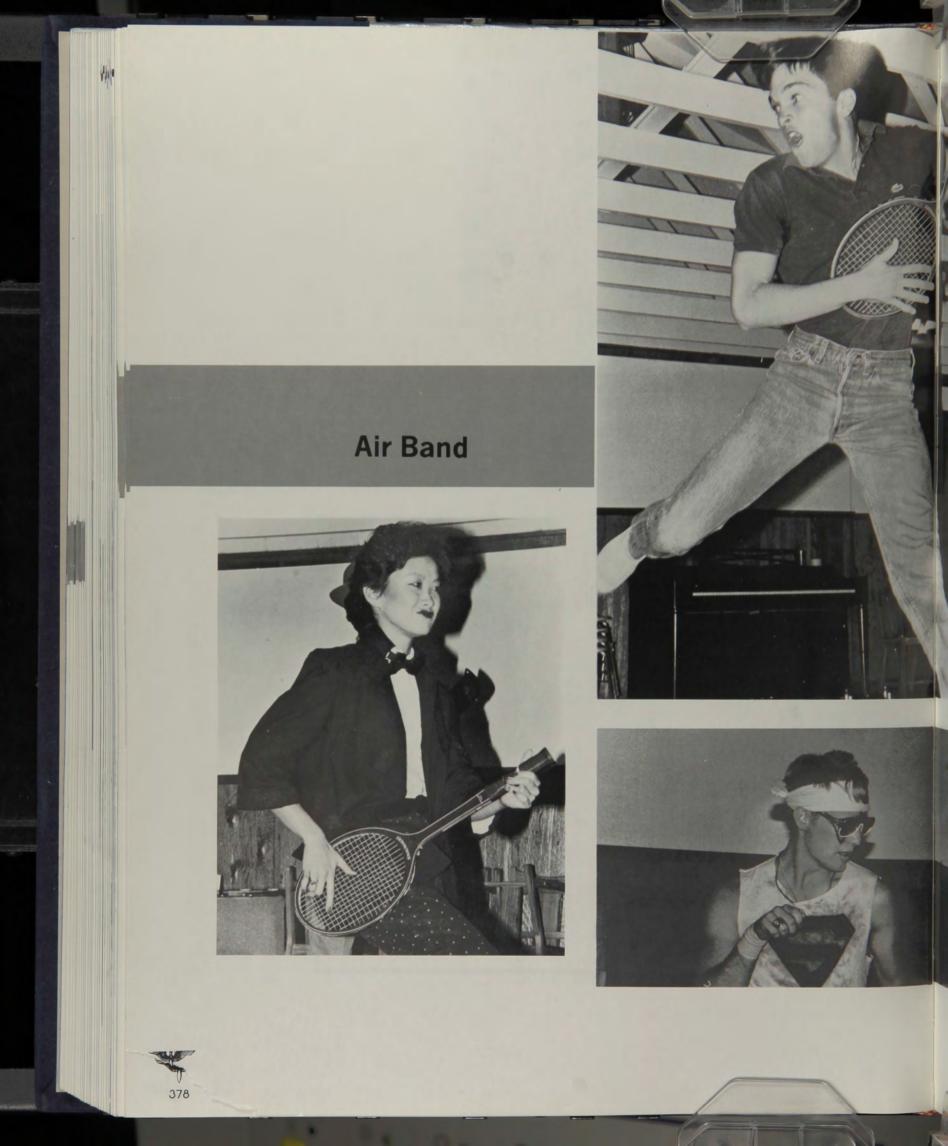

Louise Brown, the Cader Wing Hostess, and her assistant, Karen Mandel, led cadets in developing their social graces. The hostess office sponsored the Singles Survival Course, the fashion shows and directed all the formal balls and dances in Arnold Hall. And of course, Ms. Brown and Ms. Mandel advised cadets in protocol and party planning.

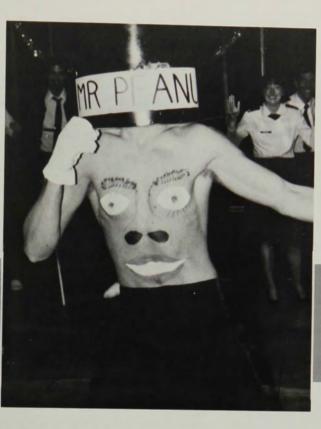

Cadet Wing Hostess

370 381

U

.*

A new rage gripped the Cadet Wing this year as air bands and air band contests sprang up all over. The groups showed their talents at squadron parties, in the dorms and in Arnold Hall.

The second annual "Dress For Success" fashion show displayed the latest in proper dress for new officers. The show highlighted professional and casual civilian clothes available through the Army and Air Force Exchange Service. The Cader Wing Hostess, Louise Brown, developed the show to help first class cadets prepare their social wardrobe.

Competition...hugs...events...hugs...smiles...hugs...dancing...and more hugs. These things filled two full days in May as the Air Force Academy hosted the Colorado Special Olympics. Excorted by members of the class of 1988, the Special Olympians participated in track and field, gymnastic and swimming events. A dance in Arnold Hall capped the event. But throughout the Special Olympics people gave and got hugs, hugs and more hugs.

Olympics

TOP LEFT: The spectators enjoyed the Colorado Special Olympics as much as the participants. ABOVE: Participants and cadet escorts break from the events on the steps of the Cader Field House. LEFT: Special Olympians and cadet escorts danced to the music of the Air Force Academy Band during the Special Olympics dance held in Arnold Hall.

387

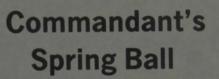

Superintendent's Christmas Ball

Lavish decorations marked the annual Superintendent's Christmas Ball held in the Arnold Hall ballroom. The Air Force Academy Band provided the music after the first class greeted Lt. Gen. Winfield W. Scott Jr. in receiving lines.

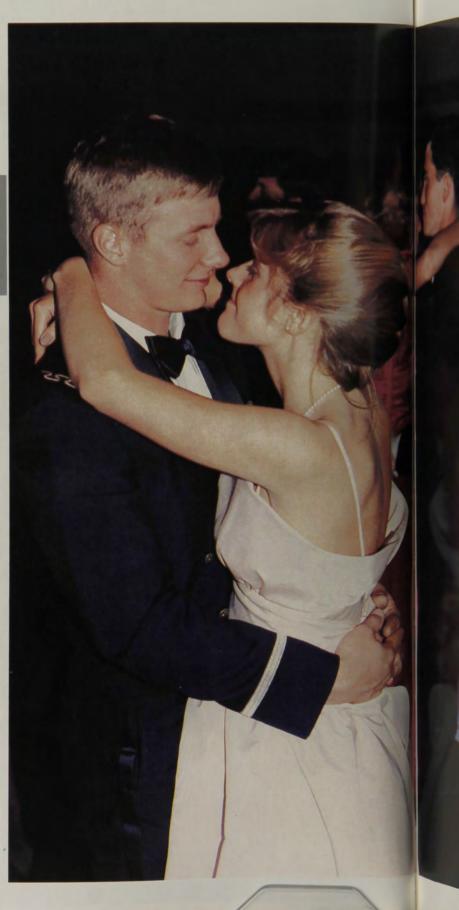

The Commandant's Spring Ball, sponsored by Brig. Gen. Marcus A. Anderson, highlights the fourth class. The evening began with the traditional receiving lines followed by a dance in the Arnold Hall ballroom. The Air Force Academy Band provided dance and rock-and-roll music for cadets and their dates.

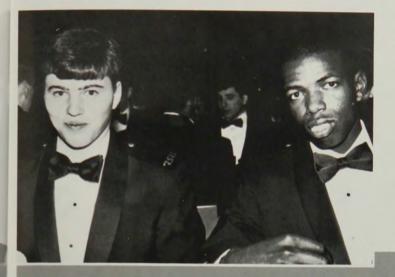

Dean's Valentine Ball

The Dean's Valentine Ball in February began with the traditional receiving lines. Brig. Gen. Irwin J. Rokke hosted the reception, aided by his staff. Cadets and their dates then danced to midnight to the music of the Air Force Academy Band's Blue Steel.

Fou

he

Finally the class of 1988 could practice their formal decorum lessons at the class dining-in. The function was held at Mitchell Hall during the spring semester.

Fourth Class Dining-In

Wing Commander's Ball

This year marked the return of the Cadet Wing Commander's Ball after an absence of several years. Hosted by , '85, the Fall Wing Commander, the event included receiving lines and a dance. The ball occurred in the Arnold Hall Ballroom.

Third Class Dining - In

ABOVE: Chaplain (Col.) Merredith Thomas jokes with two members of the class of 1987 during the third class dining in. RIGHT: Two cadets practice the "Yiner points" of cadet decorum.

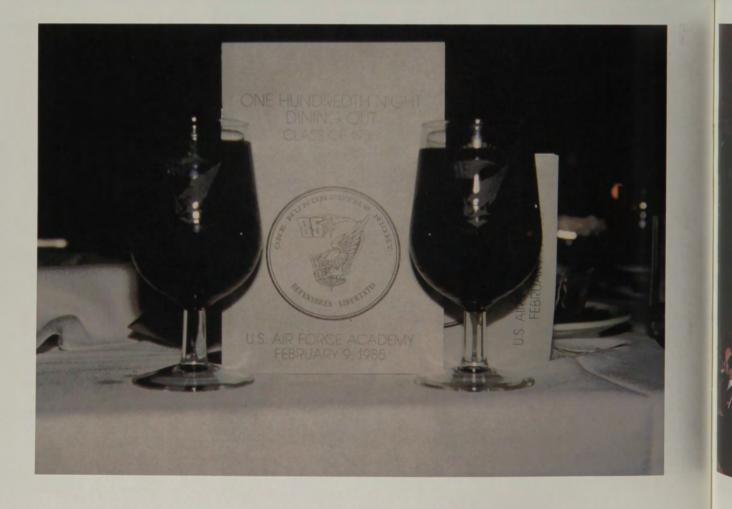

"AHH...only a hundred wake-ups to go." Thus marked the begining of the final stretch to graduation for the class of 1985. The 100ths Night Celebration held in February began the final count down. The evening began with a dining-out in Mitchell Hall. Following the meal, Brig.

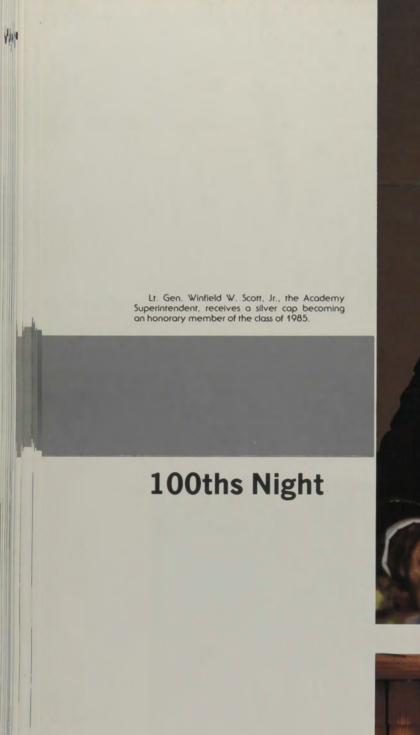

Gen. Richard Abel delivered an address followed by the traditional toasts. After the formal events, the first class cadets and their dates moved to Arnold Hall for their dance.

Meanwhile, fourth classmen followed another tradition: Redecorating the first classmen's rooms.

100ths Night

Arnold Air Society

The Allied Arts society has a stage crew known as RATTEX; Rising Star, Allied Arts, Theater Variety Technicians. This group of cadets is responsible for the technical set-up, production, and tear-down of shows, concerts, and other activities on the Academy. RATTEX is made up almost entirely of cadets; there are also three civilians and one NCO among the crew. Pete Romano heads up the crew with Fred Smith as his assistant. Bud Griffin serves as the electrician, while TSgt. Ron Barnes runs security and logistics.

The cadets that formed the corp of RATTEX for 84-85 were Fritz Koennecke '85, Jim Morgan '85, Co-CIC, Anthony Frederick '85, Chris Herrmann '85, Roy Fullerton '86, Sean Rooney '86, Steve Hopkins '87, Mark Sakerlich '87, Nancy Balkus '88, Chris Route '88, and Than Wands '88. Throughout the year, another 100 or so cadets worked on a show-to-show basis.

The major programs that RATTEX worked on are Allied Arts concerts, Theater Variety Series, and the Catch a Rising Star series. In addition to these major shows, they also provide technical support for briefings, dining-ins, dances, and other special functions.

Cadets work in three major areas: lights, sound, and stage work. The lighting director for RATTEX for 84-85 was Jim Morgan with Steve Hopkins '87 and Nancy Balkus as his main assistants. The sound engineer for 84-85 was Fritz Koennecke with Sean Rooney and Than Wands as his main assitants. The stage managers were Anthony Frederick and Chris Herrmann, with Roy Fullerton and Chris Route as their main assistants.

RATTEX helps set up and run the lights, sound, stage and anything else necessary to put on a show. The most visible job they do is spot light operator. Most of the rest is behind the scenes. A typical show day for RATTEX starts at 6 a.m., with the "in", the set-up, going until 3 p.m. and final adjustments and repairs until 7 p.m. The show starts at 8 p.m., with the "out" going from the end of the show until 1 or 2 a.m.

By the time these cadets graduate, they are experts in the theater.

CLINK.

Besides helping with lights and sound, the Allied Arts crew helps the major road shows with loading and unloading equipment.

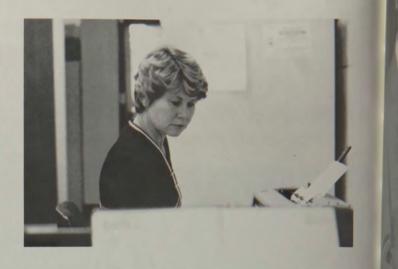

T 421

The Bluebards presented two productions during the year. In the fall they hosted a dinner theater in Arnold Hall. In the spring they performed a comedymusical in Fairchild Hall.

RIGHT: Peggy Murphy, publications assistant, types material for all the cadet publications produced by Cadet Wing Media . **BELOW:** Capt. Billy Birdwell edits a story for TALON magazine. This marked the first full year for computer use in codet publications.

Cadet Wing Media

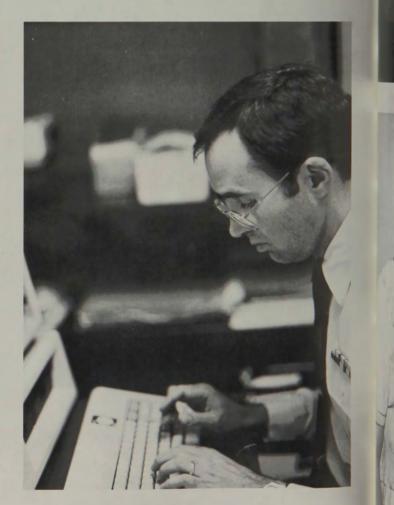

"Cadet Wing Media" is the umbrella term for an office which coordinates a broad variety of publications and administrative work. Cadets know the office best however, through the printed matter that appears in the wing - TALON magazine, the POLARIS yearbook, CONTRAILS calendar as well as the inhouse advertising for Arnold Hall - related activities. Even the DODO is coordinated and printed through the Media office.

With the exception of the BCT yearbook, work is done by volunteer cadets during their free time. (Although a few limited-on-season slots do help free up some additional moments). Under the direction of Captain Billy Birdwell, the Chief of Cadet Wing Media, the various publications enjoyed yet another successful year.

The office is always looking for people (primarily cadets, although many of the better contributions have come from other members of the Academy "family") who desire to take part in its publishing concerns, and eagerly accepts motivated individuals.

In closing, your friendly ghostwriter wishes to thank Cadets Mike Panarisi, '86, and John McDonnell, '87, for so competenly removing TALON from his concerns this past year.. -- Good Luck

-- John F. Hilbing, '85

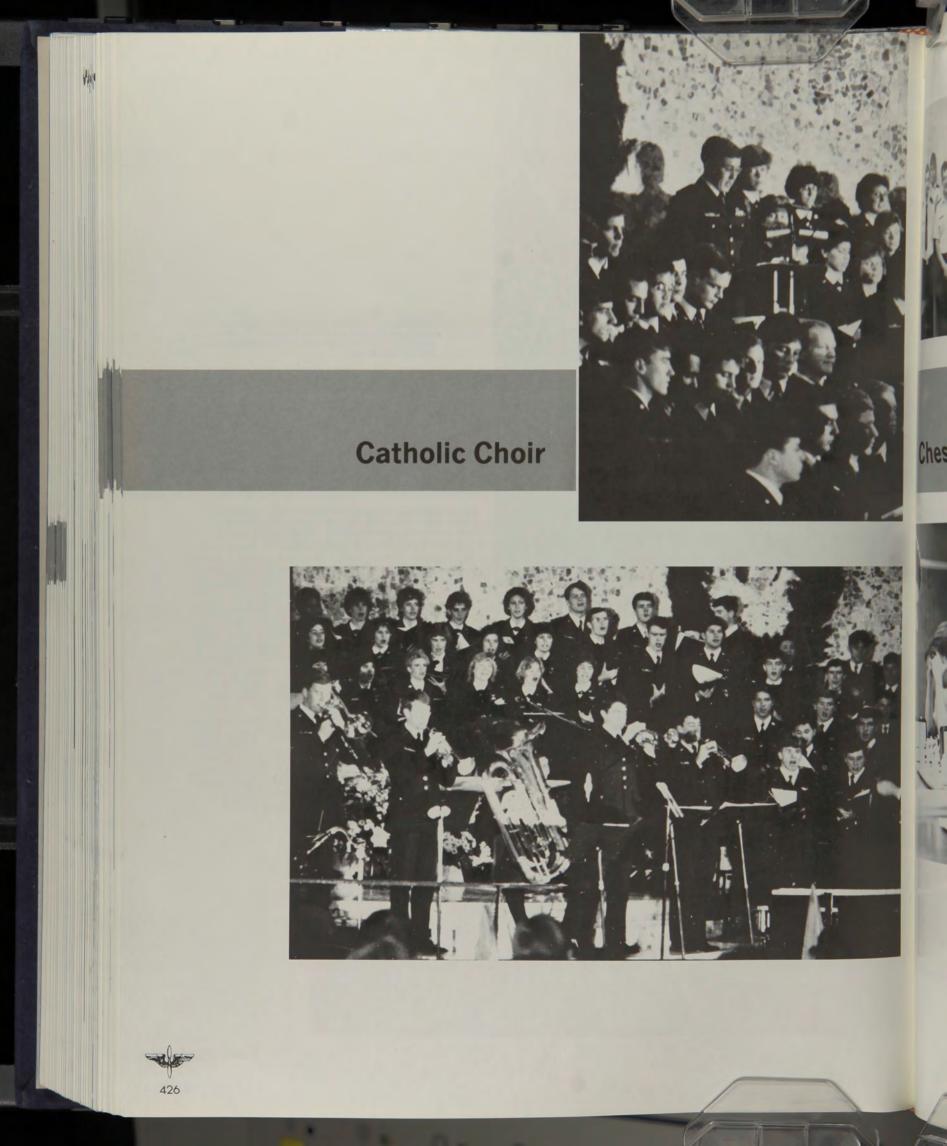

Mike Panarisi, '86 shown with a representative of the Chamber of Commerce, received the TALON editor's award during the annual Media Awards banquer held in May.

Maria Shellabarger, '85, shown between Mrs. Eleanor Larsen and Mrs. Clara Porter of the Daughters of the Union Veterans of the Civil War, received the POLARIS editor's award.

Lt. Seibert, Francois, Gilbert, Rubush, Nieves, Edge, Brindley, Moore, Senef, Monroe, Dettelis.

Chess Club

The chess club had its busiest and most successful year. An active and strong group of players earned the club an average of over \$100 for each of the six Colorado chess tournaments they played in. Brad Senef, '86 the leading money winner, and Lt. Seibert both earned more than \$200 each.

This year saw the continuation of the cadet tournaments played at the Academy along with the introduction of the USAFA Quads. Another new addition to the schedule was the first interservice Academy chess match. Air Force, without two of its top four boards, lost a close 3-5 match to West Point.

The highlight of the year was the wing open. Larry Brindley, '85 and Peter Dettelis, '85 both tied for first, ending the year in a way that was indicative of their battle against each other over the past four years.

Cadet Competition Flying Team

Explorers

The Cadet Explorer Club is the Academy's liason between the Cadet Wing and the local Scouting organizations. The club is open to all cadets who wish to get involved with the local scouting organizations.

The post headed by their OIC Maj. Hancock and this year's CIC Lee Hutchins '86, currently put together a new program and local work with the two Boy Scout troups on base. They helped provide counceling and senior leadership to help scouts in those troups. They participated in several joint camping trips where the cadets helped the boys to earn such merit badges as camping and orienteering.

The post is looking forward to a very rewarding year and renewed interest in the program. The year culminated with a trip to Philmont High Adventure in the summer for many of the members. The Cadet Competition Flying Team represents the Academy at regional and national intercollegiate flying competition. Under the auspices of the national intercollegiate Flying Association, cadets match their aviation skills against students from other colleges and universities. Competition consists of flying and ground events. Flying competition includes power-on and power-off accuracy landings, instrument competency flight, VFR cross-country navigation and message drop events. Ground events include aircraft indentification, cross-country planning, flight simulator and aircraft pre-flight. The 84-85 team had 13 members headed by team captain, Kevin Frisbie, '85. Each team member had a private pilot licence and a minimum of 80 hours powered aircraft time and was expected to compete in both flying and ground events.

The year was a banner one for the flying team, for the first time they had their own airplane. a Cessna 150, donated by the Association of Graduates, was outfitted with a 150 hp engine (normally 100 hp) and new instruments. Since the team is under the direction of the 94 Airmanship Training Squadron, it was appropriate that the FAA allowed the new aircraft to bear the tail number ''94th.''

The team funded well at regional competition hosted by Oklahoma State University during the fall. They won first in the ground events and third overall, which earned them an invitation to nationals. The team also walked away with the Flight Safety Award. e Kontaneert eebrig old me ister during a retnical dimb sel he greatest tige Maj. Tem tarthiling actio

The Mountaineering Club recruited several new members while helping old members polish their skills.

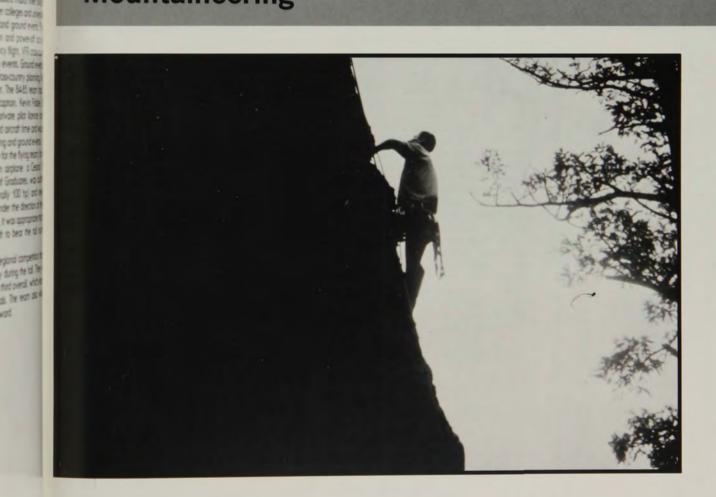

Whether during a pratice at the Garden of the Gods, or a long technical climb in the high Rockies, the club members stressed the greatest safety. Under the guidance of the officer in charge, Maj. Terry Deaton, the club experienced some of the post thrilling action of a lifetime.

Fine Arts Club

the

430

The Fine Arts Club is the youngest club at the Academy. We try to enhance the cultural opportunities for cadets, maninly by publicizing upcoming events here and in Denver in our monthly newsletter. We work closely with the Information, Ticket and Tours Office in Arnold Hall, and have mutually arranged free tickets to the Colorado Springs Symphony, the Gates Showtime Series, and to the Colorado Springs Dance Theatre. We also choose one particularly promising performance each semester and make it a club activity. First semester this year we chose a Ray Charles concert in Denver, which was enjoyed by many club members.

The monthly newsletter also features articles by club members about items of interest, such as how to get to all of the concert halls in the area, or which events look especially good. Club membership is open to anyone, there are no dues. Our OIC this year was Maj. Cervone, DFPFA; the C1C was Neil Billings; the Asst. C1C was Bob Stewart; the principle editor of the newsletter was Steve Byers.

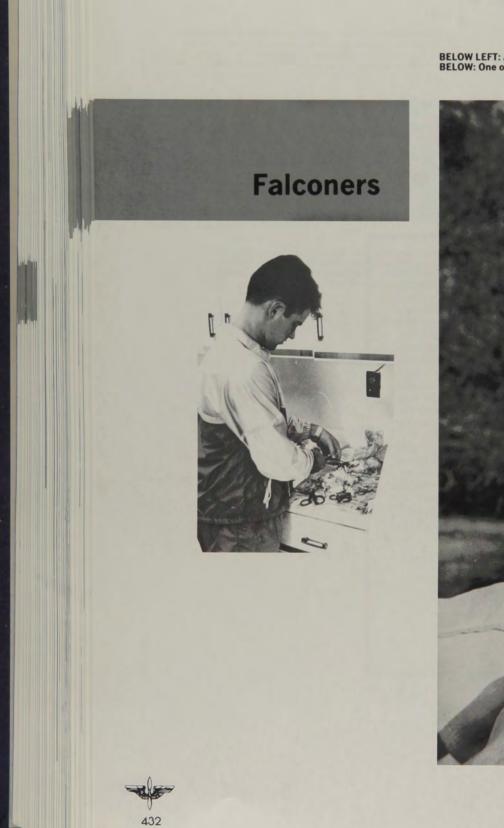

Cadet Wing Commanders James Lovell and Scott Dumbauld receive congratulations from Brig. Gen. Marcus A. Anderson during the Curtiss Tapping Ceremony. The award is presented each year to the Cadet Wing Commanders.

CAP Tapping — Curtis Tapping

Cadet Ian R. Dickenson and Brig. Gen. Marcus A. Anderson "tap" the plaque bearing Dickenson's name to the Civil Air Patrol's Honor Roll in Arnold Hall. The award goes to the former CAP cadet who graduates highest in the Academy's class. The CAP is a club activity.

Model Engineering

The two planes flew across the ridge, one locked on the other's tail, and the long streamers flying out behind each. Suddenly the rear plane cut up, attempting to catch the other's streamers in his propellor, but missing by a hair. The front plane swerved and came around hard, cutting the other's streamer neatly in two.

Aerial combat and the building and flying of model aircraft make up only two of the things that the model engineering club does along with their remote controlled airplanes. They also build normal models in their club room and have remote controlled vehicles ranging from boats to helicopters.

The club is open to everyone, and experience is not important. Someone who has never built anything before will be taught to build and fly his own plane in no time.

"The main reason people join the club is just to have a place to work their models instead of their room, said the club cadet-in-charge William A. Kliesh, '85 of squadron 21. The club has all the tools needed to make models, as well as for painting them.

One good part about the club is that anytime they want, any club member can simply go to the command post and get the key to the club room. This provides access to all members at any time they wish. The club meets regularly about once every two months to do business, and these are not even mandatory, according to Cadet Kliesh.

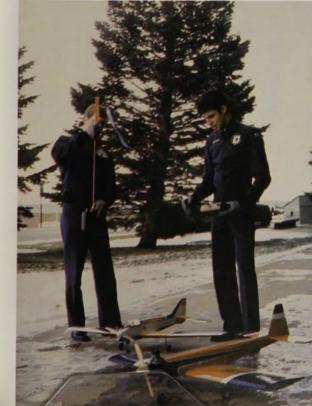

The whole club gets together once every semester with three or four downtown clubs for what they call a "fun fly". That's where everyone takes their planes out and flies all day with everyone else.

"Overall, it's a really great club to join if you're interested in modeling, building and flying model airplanes says Cadet Kliesh and the club OIC Capt. John Yarger of the Aeronautical department.

For the money and for the opportunity to fly, even indirectly, the club cannot be beat.

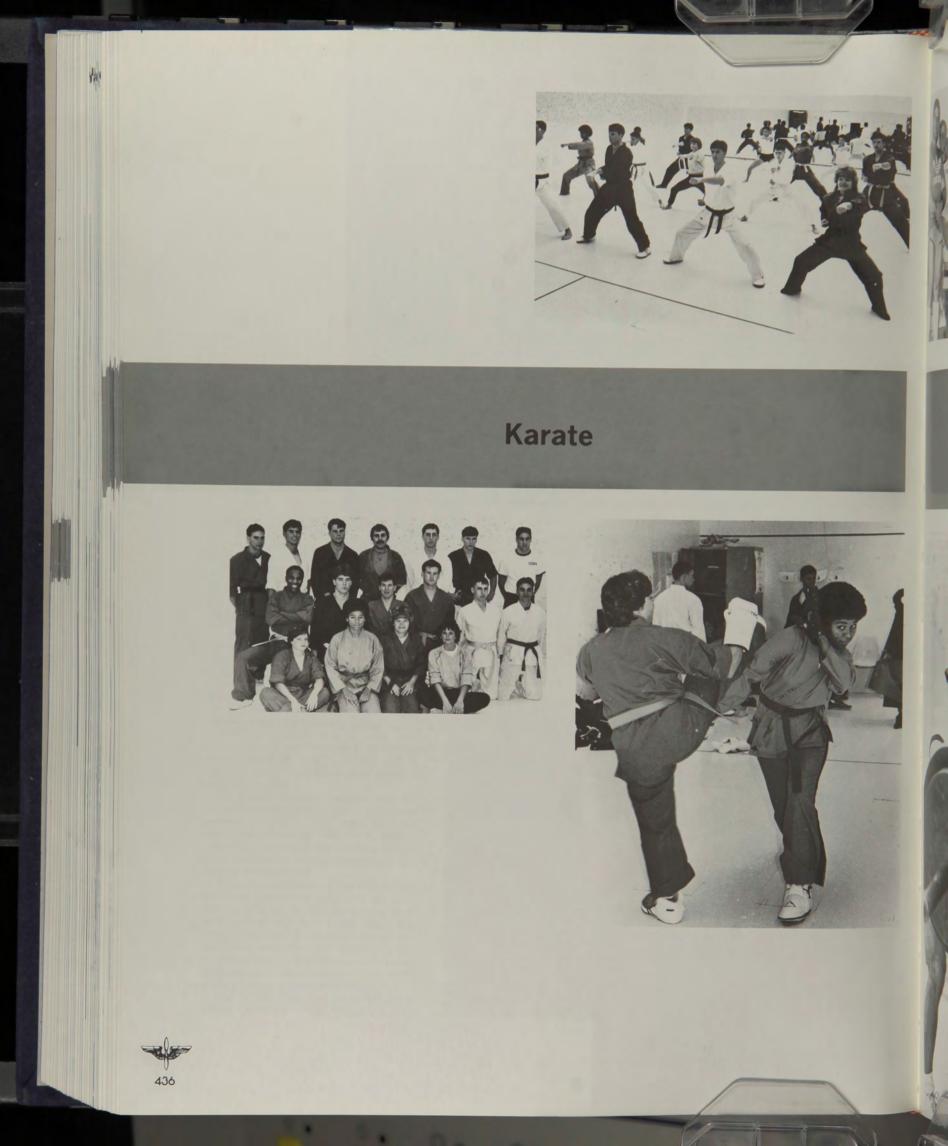

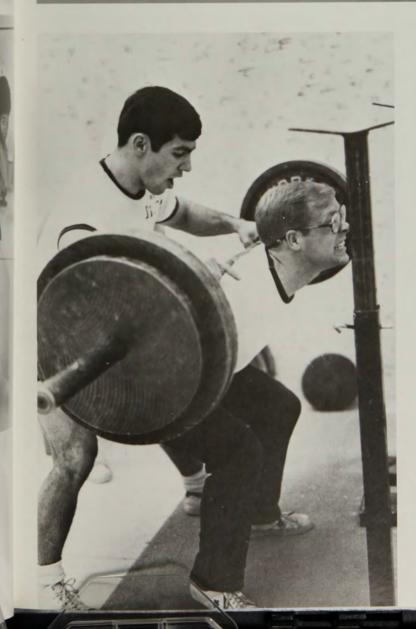

TOP: A sharp blade and a straight edge help form the wings on a model airplane. LEFT: Cadets Willis and Kliesch prepare for aerial battle. PRECEDING PAGE: The model Engineering Club forms the roots of the venerable "F-41F" Fighting Mescalero.

Mach One. It's the Cinderella story. Naturally, having to work with an Army AOC Maj. Bruce A. Brant, we started with an immediate disadvantage. "If we don't want you, we'll get rid of you!" Well, we lost a few in that purge, but we were able to retain (or was it retrain) most of the squadron. However, the Air Force in us prevailed — we mellowed out some and were even authorized relaxation time. A business-oriented squadron, we used more business passes than most squadrons combined. Firstie meetings downtown were essential elements of squadron leadership. Especially productive were the C-2 firstie meetings and the firstie organizational meetings.

"First Takes Care of its Own" is our motto, and that we did. Our "identity crisis" room resolved two separate identity problems into four. And when one firstie neglected to write his yearbook picture blurb, well ... we graciously took care of that for him. of course, the underclass often wondered where the firstie class was, but the intensity of our weekend command meetings (compliments of Rachael, the Tri-Delts, and others) severely limited our presence. Then again, they knew we were around when we came down with another "great" squadron policy.

It was fun being a part of the mystery squadron. Four out of five rumors surveyed concerned Mach One — the squadron with the most form 10s, or the squadron with brevitt during fall semester. It's funny how much can be accomplished (both good and bad) with the help of a little imagination and good old fashioned gossip. Of course, it seems like there really is no substitution for hard work.

Deuce greeted the new year with a new AOC, Capt. Duane A. Jones, and a new outlook. "Loose Deuce!" was out, "Deuce is on the loose!" was in. The squadron turned around its undesired bad reputation in a very short time. Fall squadron commander Joe Simpson started the squadron off and Deuce finished the semester with a high standing in group competition. Constant improvement was a goal that we reached in the first semester. Spring semester squadron commander Bob Mc-Caughan took over and led the squadron through until the end of the year. Each class had a character all its own. Even though the Firsties never "gelled" as a class (whatever that means), they got the job done. The two-degrees had a lot of spirit; Delta Tau Deuce was back with a vengeance. Although the banner didn't make it to Shreveport this year, it did make appearances at all home games. The three-degrees started off not quite knowing what to do, but once they were given the ball, they ran with it. The four degrees will always be remembered for the quality of their skits. Deuce is again one of the best squadrons in the wing.

A new year and a new AOC greeted the Cerberus Warriors back to the squadron in August. Football weekends saw tailgate parties on Kansas's truck and cheering for Scooter and Brian. What was life like for the everyday Cerberae? Birthday nukings for Steve and Mark, and John (how long did it take to get that stuff out of our hair), Luke Zel's bagel, Doley's weekly rendition of the "Cheers" theme song, always being one game away from an intramural "sweep," wrestling with the Dean.

And then there were sponsor visits — Traildust parties in the Springs; T-38 rides at Beale; dining-in with Major General Anderson (an astronaut!); softball and volleyball picnics; Operation Christmas.

The highlight of the year had to be "Cerbus in Washington!" — a trip to D.C. to march in the 1984 Inaugural Parade. It started as just a cheer in September (thanks, Darren!) but became a reality in January. Old-man Winter accompanied us there for some record breaking, sub-sub zero weather that cancelled the parade and sent us to "sort-of a Reagan pep rally" instead. But we did miss two days of school for it!

As the graduating class heads out to the four corners (from Vance to Mather to Laughlin to Wheeler to NASA to San Antonio to the Philippines), they know that BCT and noon meal formations, SAMIs, IRIs and Standards/Evaluation will continue at the Academy, but so will the Cerberus spirit!

Where'd it go?

Maj. Judy W. Lindsay

Buck-buck at its best.

Our many thanks go to our AOC, Maj. Judy W. Lindsay, who we affectionately called mom. None of us will argue that it was her respect for the firstie class and her permission to allow the seniors to "run things" that ensured the squadron true excellence in all respects from a Qual 1 to athletic and academic distinction. Judy's kids were also a bit mischievous. Who will forget Lone Ranger Smith and Tonto Gresham? After all, where in the regs does it say one can't park horses in the quad. And what about Skow's marching practice. Come on Paul, we weren't that bad. Dead Head Doore and football star ``little Mo Brown,'' definitely deserve the least visibility award. On the field however, Mike was certainly noticeable.

As a class, we experienced good times and bad times. We laughed, cried, and partied together. As a consequence we grew together. We will not forget each other, nor the Fightin' Fourth Squadron.

Fifth squadron returned this year to refinished rooms and a new Air Officer Commanding, Capt. Mark Welsh, a 1976 graduate of the Academy. Paul Waters started us off as fall squadron commander, followed by Matt Valle for the spring semester. Wolfpack wasn't known as a powerhouse in all areas, but our soccer team did well again this year and swimming racked up victory after victory this winter season. Our people are our most important asset, although the numbers did not always show it.

Fifth squadron welcomed new third classmen and a group of high-spirited fourth classmen into the Pack. Wolfpack had its share of squadron parties, also, including the infamous "Gradbash '85'' at the end of the year. Our second classmen spent their third year in the squadron, getting ready for their senior year and waiting for their coveted rings. Meanwhile, the first classmen counted the days down to May 29, 1985. Good luck to our graduates, may they always "Run With the Pack.

Diversity of character was the prevailing feature among the seniors of Bull Six. Our squadron leaders proved that there are different ways to skin the same cat. We welcomed Captain Mark "Happy" Hyatt, a fighter pilot turned AOC. (Why?) From wing leadership to the tour pad to intercollegiate sports, we were there. We lived, we were even graduated; time to fly!

Well, Seagram's Seven survived another one, if not in name at least in spirit. This showed strongly during the football season in the squadron's unity in cheering on the team in the face of the rest of the wing's adversity to spirit and support. A mark has been left in the introduction of the infamous Spirit Socks. Dirty boot socks always did seem to excite more spirit than American cheese and toilet paper. The flex-off was a highlight again this year. Yu-Jen, The Terror, the bookie's favorite, didn't even make a showing. Wonders never cease. We were introduced to the simple life of country music and porch parties by the ol' boys on the corner. Now if that don't beat contemplatin' your navel. We didn't have very many organized parties, everyone seemed to have a good time just playing cadet. Well, maybe not everyone, but that's life.

Flight dining-outs were the standard escape and if things ever got too tough, D&D Cinema had a matinee every day. It's amazing D.T. did as well as he did. We had a great year in intramurals and developed a lot of pride in the squadron. As far as academics go, it's doubtful we'll forget old W.W. flying around during ACQ hexing the noisy with her deadly WACQ spell.

Our AOC, Major Michael "Bond" Singer, helped us out a lot and really let the firsties get some hands-on experience, both good and bad. He offered a great deal of insight into the "real world" out there but it's doubtful any of us ever listened to half of what we should have (Lord help the USAF). As the saying goes, "Nobody does it better." That was 007 this year, hopefully '86 can do as well when it's their turn.

Eagles on the loose.

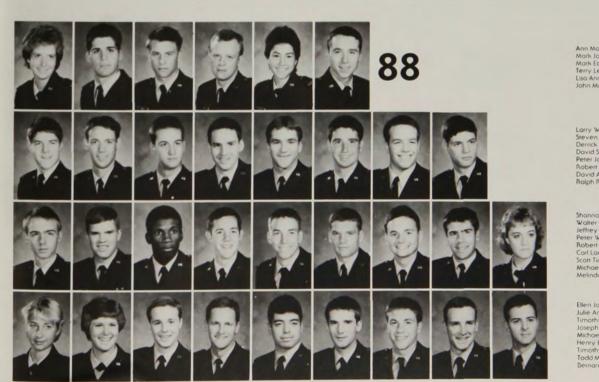

the

The Eagles have always had the sort of underdog image, at the beginning of the year, that gets most people down. Perhaps it is due to the envy of all other squadrons at the excellent rapport we have with Maj. Arthur W. Schwall, or maybe because we tend to have so much fun as a whole. In any case, we always seem to raise our level of performance, and therefore status, in the eyes of those who would suppress our

good spirits.

All classes seemed to adjust easily to the rough dorm life at USAFA and formed a type of brotherhood. Being an Eagle is an experience that will be remembered by all who live in these two halls . . . and they count themselves lucky to have that memory.

Viking Nine has been riding a steady ship this semester. Again under commanding officer, Capt. Joseph P. Stein, with Cadet Lt. Col. Cheryl Cleveland, we have had a fine year.

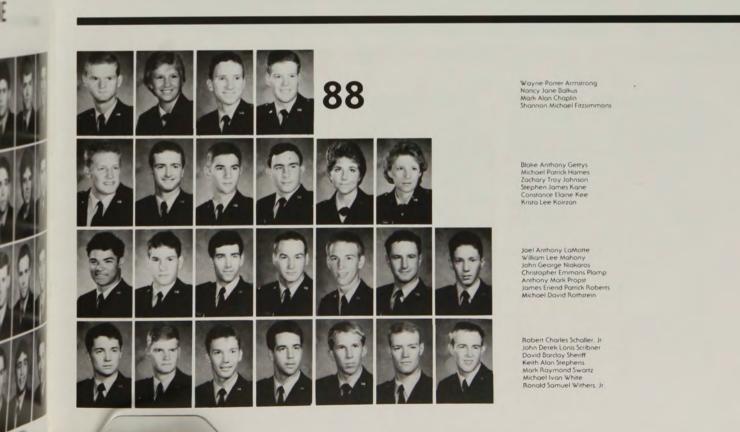

While striving to reach our goals Vikings won't forget the fun they had along the way. A common relaxation between the classes, has been the sold out airband concerts featuring the BACKSEAT CREW and FIGURE FOUR as the top performers.

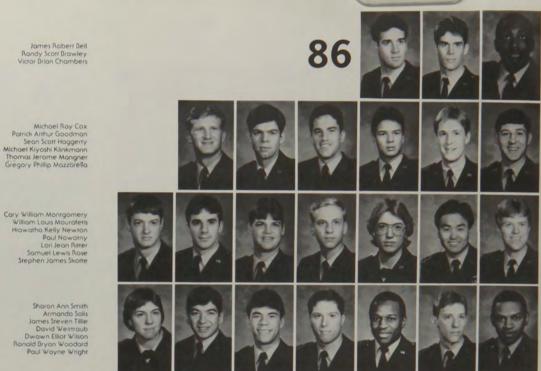

If you're tired, bored or in that humdrum mood, then just

FELP it. The common way to party.

When the weather is good, Black Forest is the place to be. Ultimate, fruit and a bit of the bubbly hit the spot. If it gets too hot then just take a dip in the Palmer House pool, any nightclubber can give directions. So, as the Vikings are working hard, they are looking for-

ward to smooth sailing ahead.

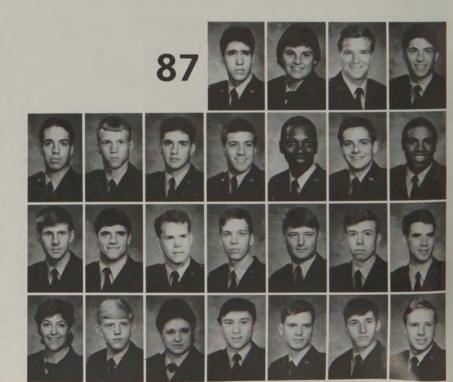

Shoron Ann Smith Armando Solis James Steven Tillie David Weirtraub Dwawn Ellior Wilson Ronald Bryan Woodard Paul Wayne Wright

For whatever reason each of us came here to USAFA, the great computer in CWD put us all together in Tiger Ten. It even threw in an FB-111 pilot, Maj. Robert B. Manning, who fortunately for us had a reasonable grip on reality (uncharacteristic of SAC people), and appointed Scott C. Rutherford and Jerry K. Weldon as cadet commanders for the first and second semesters, respectively. Not for better or for worse, but to learn a few things that may serve us well down the road. Now, the Tigers may not be number one in the Wing or even in First Group, but it is in the hearts of more than a few. The

most important part to us is that we came together a bunch of misfits, and turned Tiger Ten into what we wanted it to be. We've shared some good and bad times, fought and had fun, and day by day wrote the pages of "As the Tiger Turns." It has not a star-studded cast, but is a story of a few plain people who, as in the proud tradition of our battle cry, leap forward into the unknown darkness to preserve what we love and believe in. This last page of Chapter 85 is dedicated to those 24 who have bided their time and now cross over to the other side.

Reb-Eleven, the squadron that traditionally just barely placed in the top ten squadrons in second group competition went a long way in the '84-85 school year. The rebellious cadets even went as far as winning the honor of Squadron of the Month. This amazing feat was accomplished through both many WACQ's and extra hours spent working out for intramurals. In the fall, the Rebel intramural tennis team made it as far as the wing semi-finals. By the time winter rolled around, the number of Rebel intramural teams to make the wing playoffs had jumped to three. Two of these, wrestling and bowling managed to go all the way and win the wing team champion-

Willie

ships!

The Rebel family spent a great deal of time together at functions such as Halloween parties, and Farish weekends. The squadron even went on a wild, white water-rafting trip down the Arkansas River. And for the three-day February weekend, the Rebels spent an awesome time at Steamboat Springs.

Eleventh Squadron did much together throughout the year and even if we weren't always known for consistent first places in marching, or exceptional hair cuts during Standards/Evaluation inspections, we proved that even a mellow squadron could motivate itself to great achievements.

CS-12 began the 1984-85 school year with a bang by winning squadron of the month for Second Group in September. Spirits were kept high as squadron commander Chris Nowland and new AOC, Maj. George D. Pollard, a USAFA graduate, led the way early on to motivate the cadets toward excelling throughout the first semester. The firsties made everyone feel welcome, especially the incoming three degrees, by throwing a party and getting everyone acquainted. The firsties kept their B.Y.O.C. (Bring Your Own Cup) tradition alive by celebrating a different theme every Thursday night. As the first semester progressed, a Halloween party broke the Iull along with various nukings by the four degrees to keep the morale of the

squadron at its peak. These nukings carried over to the second semester with the climax coming on Hundredths Night in which no firstie room was overlooked.

In February the CS-12 sponsors, the 437 MAW from Charleston AFB, South Carolina, visited the squadron for skiing and tours at the Academy. Also, the squash intramural team rallied to beat CS-08 in a grueling match to win the wing championship. All in all, the Dirty Dozen had a terrific year in all aspects of the Academy. Looking ahead to next year, the eager two degrees will successfully follow the firsties' lead and inspire the Dirty Dozen to soar to greatness.

What can you say about the Bulldawgs of '85? Well, we started the year out right. Massive FIGMO set in about Mid-August. But that didn't bother Silly Willy as he took command of the squadron and let Dawk whip us into shape.

Second semester, Marcus (flew the coop to Rhonda's) Cooper took over. He and his Ops, John Robinson spent a lot of time searching for squadron goals. However, by this time it was apparent that 85 had only one goal. "Let's get out of here!"

m

And that we did, every chance we got. We tried hard to be like our AOC Capt . . . oops, sorry Sir . . . Maj. Jim Dotson, Jr. (that is, always out).

We ran the gamut from Buck's break dancin' to Theo's friendly demeanor. We were a tight knit bunch. We'll miss the one we lost. Good luck Charlie. But most of all, we're ready for the Air Force.

Once again, it was the Cobra's year to break in a new AOC — Maj. Hedy C. Pinkerton, 5'2", southern accent and red hair. The proof is left to the reader as to who broke in whom. Under the direction of Kyle Cunningham, the new year set sail without a hitch. Pat Stoneham dealt breaks almost as often as punishments and Ed Koslow got the task of discovering what Assistant Ops really does. Marty Granum "Crankin" sported excellent hairs for fall semester, Paul Jeffries was "sorry" to leave us at Christmas.

Fall semester saw Lisa Drinen marching with a butter knife, Dave Dimartinis "Yo" making the Cobras sweat and Russ "Voteman" pushing the doolies to second best bookworms in the wing. Fall semester was Larry Gast and the Easter "Bunny" and Wayne Miller "Bone" banging heads in rugby.

Spring semester came in like a lion with Jim Moore as squadron commander. We lost Mary Manning to group but hung on to Tom Bergeson "Berge" as Ops. Ben Bellis "Bonj" visited Mexico on spring break but returned with no souvenirs. Mark Neyland "Heyba" kept us in tune to Phil Collins and Monica Eady became a volleyball powerhouse. Bobby Blackmon picked up the reins as athletic officer and Will Sager "Pilig" started round two as CTO. Wayne Olson "Ole" found new ways to total his Vette, John Au-Yeung played handball.

It was a memorable year for the Wareagles, with some fond memories that won't easily be forgotten. The squadron thrived under the able leadership of the firsties. Who will ever forget "Recondo Block's" command voice calling the squad to attention, or Tron's unique knack for knocking off his service cap during noon meal formation? The class of '86, the class that "always does things better," proved themselves to be quite a stract bunch of individuals, coming in second to none on the number of people on the Commandant's List. Could this have possibly been the result of Quint's leadership? The three degrees turned out to be quite a classy bunch of dressers too bad they couldn't go anywhere. And then there was the class of '88 \ldots all they wanted was a chance to do spirit missions, but even more importantly, they wanted their passes approved.

All in all it was a great year for the squadron. We started the year by getting our ducks lined up and trying to do good. We hosted our sponsors from Little Rock in the fall, and they reciprocated by making some of us sick on their C-130s in the spring. Always Wareagles, we got our lips ripped off a few times, but on the whole succeeded in our quest.

Yes, it's official — we're back to being "Chickenhowks" after a brief time of being just "Hawks." The change, voted in by the squadron as a whole, has helped return the tradition in our squadron of having a relaxed atmosphere while still getting the job done. It's worked, as shown by our third place in the Wing academics standings, sweeping intramurals for the first time in years, and our high rankings in the squadron-of-the-month competition.

/KS

While saying goodbye to Maj. Mooney, we welcomed Maj.

Loren C. Ainsworth, a '70 Chickenhawk, to our squadron. He has yet to develop a taste for cut-off uniform pants. With Tom C. at the helm, and even with Jim H. at his side, we have the squadron mellowed again. Jeff J. comes out of the woodwork with Jim G. to write our final chapter.

Amidst it all, we've come together and made life-long friendships. But most importantly, we've come to realize that ... "nothing in life is critical."

Maj. Jack R. Trimble

Nestled high in the western most corner of Vandenberg Hall the Seventeenth Cadet Squadron lived under the leadership of Maj. Jack R. Trimble. Major Trimble joined the Stalag family this year and has proven to be a dedicated team leader. He has brought to Country Club 17' the experience of an operational Air Force squadron — a fighter squadron that is — and a motto: When we work, we work hard and when we party we party just as hard.

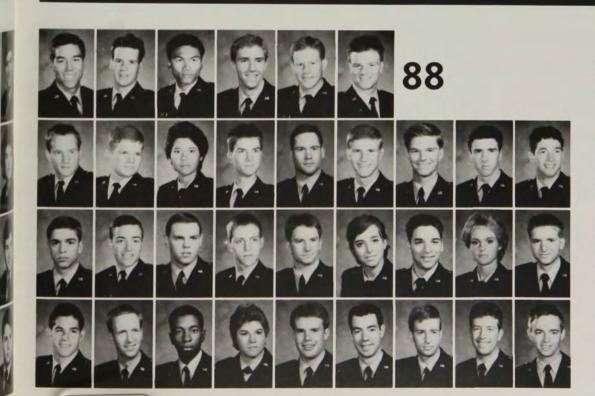

ים בל ז'דה בכאל אין ארברי אבר

Living true to this motto, Stalag has grown together with a strengthened chain of command and a social schedule purposefully filled by our own squadron planning committee. Leading us along these paths have been our future Marine Corps flyer, C1C Marc Powell and our bicep-building, girl-lifting C1C Pat Marshall.

To remember: the last wing champion football team complete

with C3C Kaler's broken ankle, the wing running-up swimming team, that raft trip in the midst of September when the Arkansas River was sufficiently lowered from the water we personally transported back to the Springs, that Christmas party where we all had to buy ties in order to go — where the freshmen proved that Stevie Puke and the Vomits' might have developed some competition, that bake sale where certain slides were remembered in bureaucratic form for a few consecutive weekends, and, of course, the 100ths Night when we held tightly to our dates just in case a blue-eyed, drink buying superior proved tempting.

In the Future: The class of '86 awaits the inheritance of Stalag responsibility. '85 wishes to these four year veterans of this sixth floor habitat — an operational elevator on those weekend laundry afternoons.

Our squadron commander, "Lips" T. Linehan, started the year rolling with his exclusive power principle. With his side kicks Too Cool Hamlin, Fog, and Thumper, they thought chili with a 90% garlic content would be a sure winner at the chili cook-off.

Captain, oops, Maj. Daniel Peterjohn always seemed to have time to hear and solve any problem; that is if you had an hour and a half to listen to related tank stories. If you ever came to a squadron party he was the one in the tan pants and blue sweater, or if you're on the slopes he's the one getting hit on the head with the chair lift. When he goes to Fort Leavenworth (only temporarily we hope) we'll miss him.

And then there's the party that wasn't; Harold's wet ears; Wild Walter; Joanne's late night walks; broken engagements; and who doesn't march?

All in all we managed to take first in group, the four degree's first in the PCE, and we won't mention academics. The three degrees after a slow start, finally caught on as to what it takes to be a Nightrider. The two degrees are eagerly awaiting the firsties exit. And the firsties ... well, good luck, and just don't get caught in Fort Leavenworth with P.J.

NIGHTRIDERS 18

The Nightrider Firsties

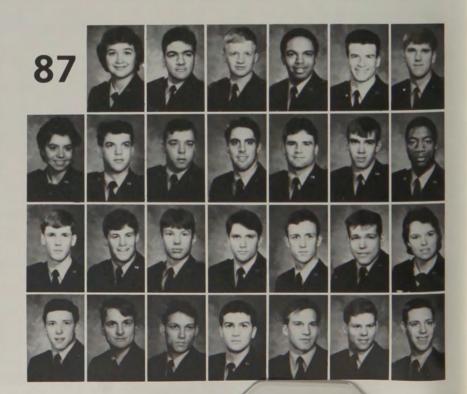

Well, another year is over. For the firsties, it means going to the Air Force. The two degrees will take command, three degrees get cars, and the four degrees look forward to life in their new squadrons. All of us will carry the memories of this year together in Starship 19.

This was a good year for "Playboy." We passed Standards/ Evaluation with a resounding Qual 1. (The first time.) Maj. Randall R. Cantrell still can't figure out why no one wanted to be "famous throughout the wing." Who can forget the infamous hall parties before SAMIs. How big is your speaker, Mac? Our trip to Eglin to visit our squadron was fantastic.

The firsties are finally out! We've had some great times together, including Ring Dance, 100ths Night, Bennie's Card Parlor, Raff's 9:00 bedtime, and Erv's duckwalk. We wish good luck to the lower classes in the year to come. See you in the Air Force!

There was a new attitude in 20th squadron this year. Maj. Stephen R. Martin allowed the firsties to run the squadron. They did so by having a good time while still getting the job done with the philosophy that "nothing's critical." The Trolls set goals, as all squadrons do, but most were surprised when we started achieving them. The Trolls managed right away to break into the top three in squadron of the month competition for the first time in over two years. The semester continued to go well with first place in every SAMI, first in group in fall intramurals and in marching. We even spent a Saturday marching in the snow

with hopes of going to D.C. for President Reagan's inauguration. Trolls continued to dominate second semester in athletics and squadron competition with its second wing championship and winning squadron-of-the-month.

Most memorable, however, is probably the many imaginative excuses to have dining-outs. And, let us not forget the firsties with a language all their own initiated by Roy "the right stuff" Hamilton. Anyway, best of luck to next year's Trolls and remember that "nothing's critical."

Well, the year comes to a close and looking back I'd have to say that the Blackjacks were never the squadron with the most discipline, but we had to be the most disciplined. When we were not in trouble, the firsties were off at Nautilis and the Golden Bee, the two degrees kekpt themselves busy in search of the perfect party, while many of the three degrees brought the party a little closer to home, and for the four degrees, taking a keg or two from Arnies was never out of the question.

First semester we had a squadron commander whose earings were slightly large. Second semester rolled around and we found ourselves with a squadron commander who had impeccable saber manual. No matter who was in charge, that individual could only count on one thing for sure and that was, no matter how hard we tried, we always got last place in the SAMI.

As the year comes to a close, the light at the end of the tunnel becomes a little brighter for each and every one of us. We wish the class of '85 the best of luck and always remember that we may not have been the best in military nor best in academics, but the Blackjacks were always a squadron that others wished they were in.

Two - one in there.

The 'Stormers never forget how to mix pleasure with business. For example, take their fall semester squadron commander Ed Tomme please. His Thursday night study sessions provided the most enlightening educational experience available to those who really needed it.

The AOC, Major Margaret M. Stanek, provided new meaning to the concept of "cookie motivation" as Ed Tomme managed to wear more of her dilectables than he ate. But for \$90 the shoe was on the other foot, or should we say, the pie was on the other face.

Our strongest point as a squadron was the loyalty we felt toward each other and the close bonds of friendship that were built. Even though the Barnstormers may not walk away with honor squadron, we will walk away with good memories and valuable experiences.

The Phantoms were known this year for being one of the more military squadrons in the wing. We got off to a good start by being the first squadron in Third Group, and only the second in the wing to get a Qual level 1 on fall standards/evaluation. We did work hard, but we played even harder. We had numerous parties and made more than \$1000 at our fall bake sale to fund them. Where did all that money come from?).

One had to be very careful when walking through the

squadron. If one made it past our ferocious security guard, there were still the ever-on-the prowl killer elephants to contend with.

Overall, under the reins (or is it reigns?) of Mike Black in the fall, and Tim Ray in the spring, we had much of fun and we look back with a sense of pride. And if we can say we learned anything, it is, ``fly, fight, and blow them to smithereens!''

The spirit of the Redeye, Mr. Lucky, followed us throughout the year. Whether it was the fiasco at Boulder or taking squadron of the month. The Redeye did everything with that extra flair that has earned CS-25 the nickname "those guys on the sixth floor, right?"

The 109 members of the squadron have had a good year. Based upon a firm foundation of documentation, the leadership of Major Robert R. Weber (USMC) was a continual presence in the squadron.

Another highlight of the year was the filming of CS-25's favorite soap opera "As the Stomach Turns," down at Mr. Murphy's fine establishment. From Cheers and Hill Street parties to the Silver Bullet party, the comraderie and fraternity of twenty-five were well known throughout the wing. We follow-ed up well on the Redeye motto: "Have another one on Mr. Lucky.'

Everything was simply wonderful in Snoopy land. Cadets going to class, playing intramurals, cleaning rooms and keeping the squadron safe from the danger lurking around the corner.

h

Our happy little doolies scampered about at the wee hours while the cadets slept until first call. All slept soundly until being awakened by the joyous shouting of the doolies, joyous because they knew their presence wasn't required at the flag raising.

If not for a few key injuries, this year might have seen the football team lose a close one in the Wing Championships. The Barons were more inclined to watch the real team down at Falcon Stadium on Saturday.

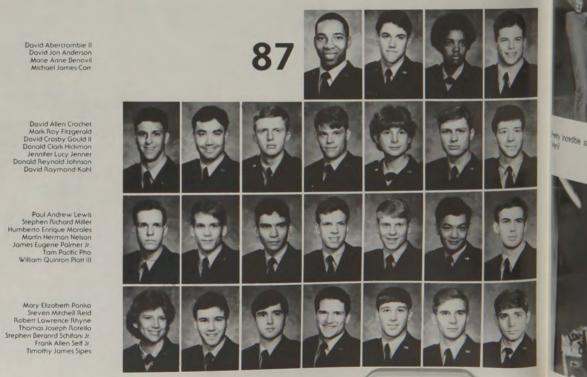

The abundance of intercollegiates gave everyone an idol

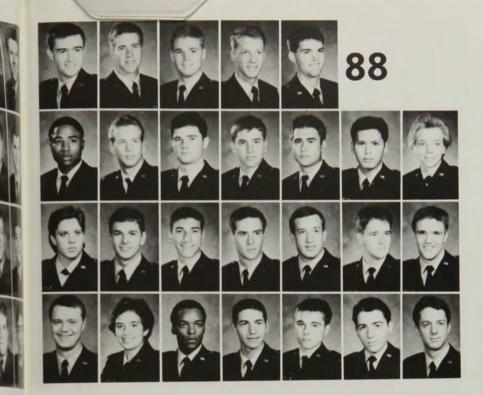

and kept the halls vacant all weekend. They sure missed some wild flicks in the TV room.

All Barons love to recreate whenever they can. The early snow provided the best SAR sledding in years. Those criminals involved had the time of thier lives. It was also the year of the air band at USAFA and everyone took part. We had our own groupies and everything.

Now you're looking back after you've left the old snoopy doghouse for good, walking down Air Force lane with your bowl turned upside-down on your head to keep from getting dumped on. Then suddenly you realize with a smile that it is no longer needed.

in 28th Squadron, we give credit where credit is due. Somehow, our academic officer, Denise Senn, took us from 39th in the wing to 5th in the span of one semester. Rumor has it that she cast an evil spell over our foosball table: anyone playing with below a 3.0 GPA was suddenly turned into a wing staffer. It worked!

Our AOC, Maj. James E. Scully (the "Skull" to us) thought he had picked Vic Hedgebrush for squadron commander first semester, but in reality, Vic's twin brother Rich was in command for most of the time. If that didn't mix things up enough, talking physics with a physician didn't help matters, either.

4

By playing their music before each SAMI, the squadron's very own rock band, "Howie Judd and the la Magpies" helped each member of the squadron get "hammered" the following morning by our associate AOC.

When our resident linguist "Gentleman Jim" Van Meter finally got our twistometer working again, everyone was happy. But alas, when '85 departed, this useful "navigational" device went with them to their various bases. To the classes of '86, '87, and '88 we wish you the best of luck in trying to re-invent the wheel.

Twenty-ninth squadron, the Black Panthers, began the year with two new classes - the thirdclass cadets and the doolies. They provided new faces and new ideas which blended well with the old to make for a good year. We worked hard and we played hard. Everybody enjoyed the squadron beerball games and the bake sale, while the doolies enjoyed everybody's birthdays, engagements, and solos.

Our squadron goal was simply to place among the top three in everything. We started out rather slowly in marching, intramurals, and academics, but we did improve. Of course, we

all had to get used to having all afternoon free and going to bed at midnight, but somehow we managed. Both of our squadron commanders and our AOC did a heck of a job in making this a good year. It was an especially good year for Capt. Thomas H. Saunders Jr. - he made Major, so we brought in a singing Amazon woman to congratulate him.

We had a unique bunch of people we called a squadron. We had our good times and our not-so-good times, but we all came through these as better people.

 Year Assume
 Base
 Image: Control of the start st

The Knights of Thirt started off fresh this year. The flame wasn't around anymore to rummage through their overheads while they slept. No, this year we were lucky to have Maj. William E. Crowe Jr., a Citadel grad, to lead the Knights. He wasn't too anxious to meet us though, seeing as he didn't show up for school until the middle of September. Just in time for all of the action.

The now annual class of '86 fashion show was great. Michele Burkhard was such a doll, and Jimmy Gulsvig, say guy! The Traildust will never forget our Intramural Banquet. Steak for a hundred, please. We did pretty good in intramurals this year. The soccer team won the wing championship under the coaching of C2C Keith Kudla .

Andy Mueller did well as squadron commander first semester leading the Knights, but that's only because all of us tried our best not to "reflect poorly upon Andy."

Overall, the Knights of Thirt were a together squadron. To the firsties you've finally made it and all the hard work will pay off on May 29. The class of '85 "Best Alive" will finally get to experience the Air Force.

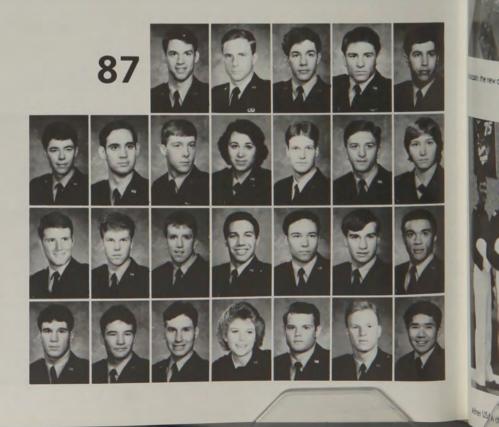

GOOD LUCK, KNIGHTS.

The Grim Reapers were really in for a ''good year'' when they got their new AOC Capt. Norman W. Goodyear . The spirits were high in CS-31 that first weekend back at the annual John Elekes Woodmovie Lake Party. Of course John brought the watermelons. The party was over the next morning at the new good deal morining accountability formation. It was time to work.

With Gregg "Shelby" Christmas as our first go commander, the Reapers set our goals wisely. Shelby organized policy to allow more people to get involved in running the squadron. With this, the Reapers finished high in intramurals and received

a qual 1 in Standards/Evaluation. For R.R., the squadron had its airband contests, wild parties and an interesting weekend at Farrish.

Koting lie o

As the new semester came in, Rod Cregier took charge as commander of Reapers 31. Working hard and having fun was still the standard. 100's night came and went. Grup's fail-safe lock system didn't keep the four degrees out that night, though. The firsties took the nukings with a grain of salt because it comes with the territory. We had a good time, made a lot of frineds and have a lot of memories. Good luck and good-bye from '85.

R, the squadra to: meresting wooles

Gegler took dags ard and hoving fax d went. Graps blo egrees out fra to to grain disat tests and time, mate co and time, mate co and time, mate co

Nothing like a good piece of pie!

Hundred's Night strikes again.

Major Norman W. Goodyear

It was the worst of times. It was the best of times. The class of 85 could finally see a flickering of light at the end of the tunnel. The freshmen always had a clear view of the end of the tunnel. And several times through the year, the entire squadron felt the tunnel caving in.

However, even when it seemed like more doors were open than closed on Saturday nights, our beloved Major Garvey remained steadfast in his promise to let the firsties run the show. This task was by no means an easy one. With too many second class cadets imitating Mario Andretti and the three degrees practicing archery at irregular hours, our squadron meetings looked like the weekly AA meeting. Nevertheless, we retained our commitment to duty first, with morale running a close, close second. All in all, we learned the lessons already learned by the Black Sheep — we learned to work together, play together, fast and hard, and above all, make the Academy a little better place to live for the cadets of the notorious Road Runners.

The end is finally near. After four long years, we've finally made it. These last two years have been memorable ones, from the Ring Dance to Hundred's Night to graduation. We have many memories that will last a lifetime.

We worked hard and played hard, but through it all we

never lost sight of our goals; graduation led by our squadron commanders, Dave Knight and Keith Knudson. We always managed to have fun, but got the job done. In the end, we'd all like to forget these last four years, but we'll always remember them. Good luck to all!!!

The Thunderbolts of CS-34 and their new AOC, Capt. Thomas E. Scanlin continued this year in the same winning spirit as last. The two squadron commanders, Fritz and Mark, were able to command the squadron independently with the helpful guidance of Captain Scanlin.

The 'Bolts continually pride themselves in superior achievements such as top academic squadron in group. Our outstanding training program developed by select third

classmen still has the wing buzzing.

Our new sponsors proved quite appropriate. Based out of Myrtle Beach, S.C., The Green Demons of the 356th Tactical Fighter squadron fly none other than the A-10 Thunderbolt II. Their overwhelming support for our squadron can be best described by any 'Bolt that attended the dining-in we held at the Raintree Inn.

Wild Wessel '85 saw some unforgettable moments in our final year. We won some, lost some, got a new AOC, lost some friends, and survived it all while growing closer as our time came due.

Surfin' Johnny led the way fall semester while Lynn handled Ops. Ozoa had his bathrobe, Mark had the birds, Doug fell in love — with a Porche — and the Tigers won it all for Jeff.

Dogger, Jabbs, and Ski-Bum Chubber led a fun-loving group into spring. Steve got into med school. Z-man declared war on

wildlife, Smitty kept us honorable, and Pete and Darrel kept on singing. As the magic day approached, Ed led the glory-bound flickerball team, Volleyball spiked opponents, Chance went on to fly jets and break hearts, Mugo extended his realm in the kingdom another semester, and Scotty finally got out of trouble.

We survived, had much of fun, and headed into the world with many lessons learned and a wish of luck to those who follow.

h

The class of 1985 would like to thank 36th squadron for the best year ever. This year our seniors pulled together as first classmen, tossing aside the labels of dirt bags and geeks. Will we ever have as good a time as we did at the Deb's Ball? And how about the assassin game, the trivial pursuit tournament, the ski trip and the generous servings of fermented amoeba.

10

We'll laugh when we look back at the broken engagements and the futile efforts of Steve Butler to deny his wedding plans. And those incredible squadron parties; we'll yearn for the days when we could relax and listen to Bob Marley at Cave of the Winds. As seniors at USAFA, we wish '86,'87, and '88 the best of luck in continuing the legacy that is the 36th squadron.

F

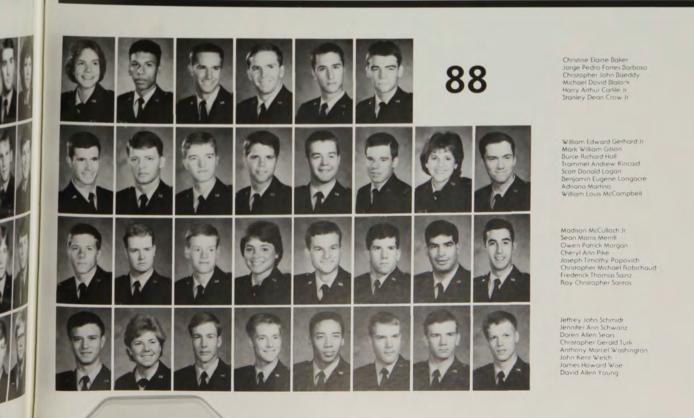

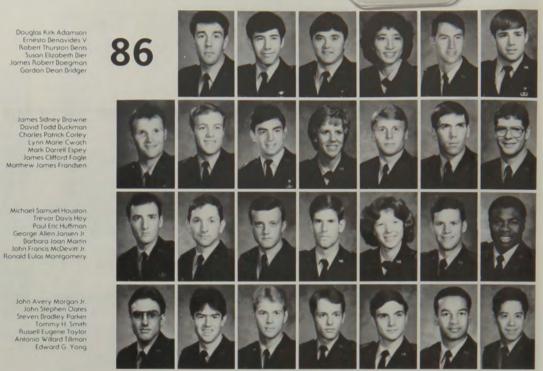

The Skyraiders started the year out right with a dining-in. Not only was this an effective welcome to the new third and fourth class, but it gave the squadron a chance to set up our new goals. The goals were set with sights on that No. 1 position in the wing. This included a long range dream of marching down Pennsylvania Avenue this January.

The squadron has met most of our goals, which were to rank in the top percent of everything. We have monopolized the squadron of the month competition for fourth group. We have climbed to number 1 in wing malanify points through maximum output from all members of the squadron. The second classman really took charge when they took No. 1 in academics. Much to our dismay the first class didn't help the squadron in academic standing. We were led by the fearless squadron commander, Rick Martin who spent most of his time preparing poems for the squadron meetings. The squadron Ops officer did his part by spending his spare time writing forms 10. Then there was the new third class who really wanted to show their newly gained squadron spirit. Unfortunately they did it by taking 37th in the wing in academics.

For the second straight year the Sky Raiders were commanded by Capt. David A. LaFave. Given the raw materials, Captain LaFave and the squadron staff made the parts work and kept them working. When the captain isn't thinking about some way to improve the squadron, you could find him flying his B-1 around the office or giving it a daily dusting.

With everything riding high, the Sky Raiders have focused in on that outstanding squadron patch which could ride high on their left shoulder.

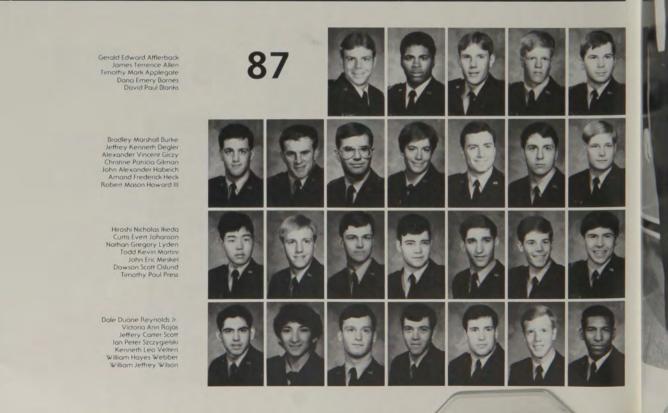

John Avery Morgan Jr. John Stephen Oates Steven Bradley Parker Tommy H. Smith Russell Eugene Taylor Antonio Willard Tillman Edward G. Yong

We finally made it. Four long, hard, demanding years. For two of those years we became a team, a unit; despite our personal differences. In each one of us we saw something unique or special. We remember those who began the struggle with us but didn't quite make it. As we begin to branch out in separate directions, as we walk across the platform and salute each other, as we throw our hats into the air on the longawaited Wednesday, we cannot help but pause to reflect and remember

'Captain S. and his half-hits, thinking we really had it tough. Second class parties at Taps. Zac and his air band concerts. Turning 21, ring payments, sending home for money. Brand new cars. The ring Dance, Rich Goffi and "Rich" Goffers. Fay's first date

BCT, the new AOC, non-negotiable, motivation, from within. Hundred's night, rooms thrashed, but somewhere in the mess left behind a set of beautiful gold bars. Extended privileges instead of brevet. Hopes, dreams, some fulfilled, some left stranded on the wayside. UPT selection, receiving orders, 42 days, 41 days, 40 days

We finally made it Joe, Andy Tom, Joe V., Chris, Fred, Bruce, Steve, Fay, Kurt, Vern, Jess, Pam, J.O., Gordie, George, Mark, Paul, Homer, and Doug. Never forget: "If it is to be, it's up to me." Make it happen. Set the world on fire. And wrap these four years up and place it in your heart or in the back of your mind, to be remembered on rare occasions and never, ever to be forgotten.

Inspired by the revolutionary spirit of their namesake, the Jedi Knights of 39th squadron have dubbed themselves the "Campus Radicals." Despite this nickname the Jedi Knights have conformed satisfactorily to the standards of the Cadet Wing, making it through another year in fine form.

We began the 1984-85 academic year with a new AOC. A graduate of the Citadel, Capt. Stephen M. Souther provided guidance and motivation in good times and bad. Cadets Mark Arnold and Russ Quinn were the first and second semester squadron commanders. Under them we earned "Quality 1"

standards Evaluation ratings during both semesters.

The squadron has had good rapport with its Academy sponsor, the Mechanical Engineering Department. A softball game, a bowling match, and a Halloween party were some highlights of our interaction with the members of the Mech Department and their families. Squadron parties and individual element sponsors were other means of contact. We have appreciated and enjoyed their sponsorship and look forward to a continuing relationship with them.
