

**2020 SABR Annual Report**  
**Appendix 4: Membership Ambassadors Report**

SABR Membership Ambassadors have been reaching out to new members via email and/or phone to welcome and provide a personalized welcome to SABR. These individualized communications seem to be appreciated by new members, particularly in regards to steering towards committees that align with new members' interests.

This has helped lead to increased early engagement including signing up for BioProjects and newsletter submissions that otherwise would have been at best delayed. It has been a rewarding program for both new members and ambassadors.
