

DATA FOR PROGRESS

From March 30 to April 4, 2022, Data for Progress conducted a survey of 947 likely voters in New York using SMS and web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ±3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=947 unless otherwise specified.

[3] Recently, there has been some discussion about former governor Andrew Cuomo returning to politics and running for a statewide office.

When thinking about this, which statement comes closer to your view, even if neither is exactly right?
