Basic Tables Report Volume 1

Version 2

Foreword

The National Population and Housing censuses (NPHC) is conducted every 10 years and is a critical exercise that provides the primary source of data that government requires for formulating and executing policies and programs aimed at sustainable socioeconomic and environmental development. It also provides a basis for the monitoring and evaluation of the implementation of said policies and programs. The NPHC collects, processes and disseminates detailed statistics on population, its composition, spatial distributions, characteristics and its organization in areas and groups throughout the country.

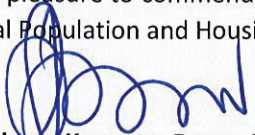

This Volume 1 report is part of a series of reports that serve as a complete package of the Vanuatu 2020 National Population and Housing Census. The 'Volume 1' report provides administrative information and basic statistical tabulations of the Vanuatu 2020 National Population and Housing Census. The statistical information included in this report covers demographic, social and economic characteristics of the population and households in Vanuatu. It is published in this report to assist with informed national decision-making. Other volumes will contain basic and in-depth analysis reports are in the pipeline for the coming year that will help put the information from this major collection into further perspective.

The 2020 National Population and Housing Census is the fifth full census of the population of Vanuatu since 1979. The 2020 Census was the second census conducted using Computer Assisted Personal Interview (CAPI) technology, with over 900 enumerators in the field in November 2020. The use of CAPI, first used in 2016 mini census, is using sophisticated software to reduce the time required for processing the data by more than half to ensure more timely results can be delivered to the people of Vanuatu, at the same time improving quality of the data collected

Furthermore, Volume 1 report of basic statistical tables represents the first time a full census tabulation report was compiled in country by dedicated VNSO staff. This document is a testament of the enhanced capacity of the staff of VNSO and reflects a maturity of skills of the same, which does the country proud and conveys hope for the future of our growing nation in the development of its internal human resource capacity. As Minister of Finance and Economic Management, I am privileged to have witnessed this during my tenure.

Volume 1 report is an educational tool, produced for users' knowledge and benefit. As the Minister responsible for official statistics, I encourage the use of the information contained in these basic tables to inform research, projects, programs and policies in order to help achieve a stable, sustainable, and prosperous Vanuatu over the next ten years. I also encourage that this report is to be used in conjunction with other statistical reports, in-depth census analytical reporting—additional educational tools—coming out in 2022 that will illustrate various social trends over the previous censuses to help make sense of the data presented in the tables you will find in this report.

In the words of the late former Secretary General of the United Nations, Kofi Annan, "*Knowledge is power. Information is liberating. Education is the premise of progress, in every society, in every family.*" In accordance with the provisions of the Census Act [CAP 71] and the Statistics Act [CAP 83], it is my distinct pleasure to commend to the Republic of Vanuatu and her people, this volume 1 of the 2020 National Population and Housing Census.

Hon. Johnny Koanapo Rasou.MP
 Minister of Finance and Economic Management
 Republic of Vanuatu

Acknowledgements

Many institutions and businesses supported the work of the 2020 National Population and Housing Census. These include the Ministry of Finance and Economic Management, the Department of Local Authorities for their fieldwork support, the Vanuatu Christian Council, the National Youth Council, the Malvatumauri National Council of Chiefs, and Vanuatu Broadcasting and Television Corporation for their support with public awareness and cooperation, Air Vanuatu for their support with training and fieldwork logistics, and Digicel Vanuatu. The VNSO wishes to extend our gratitude to these organizations for enabling the successful collection of census data.

My appreciation is extended to the Pacific Community (SPC) Statistics for Development Division, as well as to Mr. Geoffrey Hayes, for the technical assistance provided. I also acknowledge the indirect support of the European Union in acquiring new tablets that were used for the census, as well as financial support from the UNFPA supporting technical assistance as well as piloting of the census instruments.

I would also like to thank the former Government Statistician, Mr Kap Andy Calo, and the 2020 National Population and Housing Census team, led by the Census Coordinator, Mr. Jimmy Tamkela, and his assistant, Ms. Grace Tabi. The advice and guidance given to them by members of the Census Steering Committee, including the late Ps. Alan Nafuki, bolstered their success in completing a national census in the midst of an uncertain global pandemic. The encouragement and trust given by the Census Steering Committee has enabled us to have this critical data available today.

Lastly and most importantly, to the Government and people of Vanuatu, I extend my sincerest thanks and gratitude for your invaluable cooperation, support, and participation in the 2020 National Population and Housing Census.

In gratitude,

Mr Benuel Lenge
Government Statistician
Vanuatu National Statistics Office
Republic of Vanuatu

General Information

1) All numbers used in tables are calculated using a correction factor for each enumeration area. The correction factor technique is used to adjust for populations and household counts for areas that may have coverage issues. The application of correction factors resulted in numbers having decimal numbers and the rounding of the numbers may result in slight difference in totals.

2) For values that are too small or few cases, further disaggregation may not be possible to avoid having to reveal any identity, in line with provisions of the statistics act. Tables that cannot fit in one page continue in another

3) This is the second version to the volume 1, released during the official release with additional tables. The tables are downloadable from the website in pdf and excel format

2020 National Population and housing Census background

A) Introduction

The Census is the official count of population, dwellings and households in Vanuatu and it provides a ‘snapshot’ of the country at one specific point in time: midnight 16th November 2020. The Census provides a unique source of detailed demographic, social and economic information about the whole population of Vanuatu. This information is used for policy making and planning, monitoring and evaluation, research and other decision making. There are many users of statistics from the Census including government agencies like the Ministry of Finance and Economic Management for resource allocation, the Ministry of Education and Youth Development and Training for the population in each of the school catchment areas as well as population projections for the school population of the future, the Ministry of Health uses the population, fertility and household amenity information for a number of purposes in its planning and decision making as well as monitoring and evaluation. Students are avid users of Census data for the many research projects they undertake. The Census provides information for local government (Province, Area Council) in its activities as well as numerous private researchers and their subjects of interest. The Census data is also available in Geographic Information System output format which is used for agricultural land use planning when used in conjunction with other map layers such as type of topsoil, and patterns of population distribution used for transport and other infrastructure planning.

B) A brief history of Census taking in Vanuatu

A full census has taken place in Vanuatu every 10 years since 1979. Unlike many other Pacific countries, Vanuatu does not have a long history of census taking. The first National Population Census took place in 1967, followed by another in 1979. The first official population Census in 1967 enumerated over 70,000 New Hebrideans (today referred to as Ni-Vanuatu) and 5,745 other people of different ethnic groups.

The second national population census was in 1979, a year before the condominium’s

independence. Three other full national censuses have been conducted since the country’s independence in 1980. The first census after independence took place on the 16th of May 1989 with the theme “The First National Population Census of Vanuatu conducted by Ni-Vanuatu”. This was followed 10 years later by the 1999 Census. In 1999 the Census design was completed with comparability with previous census statistics a high priority, along with consideration of what was to become the first Standard Pacific Model Census Questionnaire. The 2009 Census was the first to record GPS coordinates of households and institutions and the first to use questionnaire scanning technology for efficient data entry.

In addition to the full national censuses, two urban censuses have been carried out in Vanuatu—first in 1965 and again in 1986. A national Mini-Census was conducted in 2016 in order to achieve a new household listing following the devastation of Tropical Cyclone Pam. There have also been three National Agricultural censuses conducted, the first was in 1983, followed by 1993 and the most recent was in 2007. The skills acquired during the 1989, 1999, and 2009 Censuses gave the VNSO the confidence to conduct the 2020 Census using very limited amount of external technical assistance. The 1999 Census was seen as the first Census conducted by solely locals. This self-reliance and technical capacity was again used for the 2020 Census.

C) Administrative framework

Government Approval

The Census “Project Document” was submitted to the Development Committee of Officials (DCO) and then approved by the Council of Ministers (COM) on the 19TH June 2019. This is standard procedure for large scale national projects such as the Census.

National Census Steering Committee

The National Census Steering Committee (NCSC) was set-up in 2019 to oversee the overall national census operation under the chairmanship of the Director General of Finance and Economic Management. The Minister of Finance and Economic Management, following recommendations from the Census Project management appointed the following people as members of the steering committee:

- Mr. Letlet August, Director General, Ministry of Finance and Economic Management (Chairperson)
- Mr. Andy Calo, Government Statistician, Vanuatu National Statistics Office (Vice Chairman)
- Mr. Benuel Lenge, Director of Civil Registry and Vital Statistics
- Mr. Serge Lewawa, Director, Department of Policy and Planning, Ministry of Education
- Late Ps. Allan Nafuki, Chairman of Vanuatu Christian Council
- Mr. Tom Jean Pierre, CEO Malvatumauri Councils of Chiefs
- Mr. Jerry Lapi, Department of Strategic, Planning, Policy and Aid Coordination
- Mr. Russel Tamata, Director General, Ministry of Health
- Mr. Lonny Bong, Director of Livestock
- Mrs. Astride Bulekone, CEO Vanuatu Chamber of Commerce and Industry
- Mr. Lai Sakita, CEO Vanuatu Association of Non-Government Organisation
- Mr. Jimmy Tamkela Tomoyan, NPHC National Coordinator (Secretariate)

The NPHCSC met monthly or as required during Census planning, data collection and processing. The first paper presented to the NPHCSC emphasised the importance of the national Census and its operational plan and budget. The Census operational plan was approved by the NPHCSC for the national project to proceed with its activities. The tentative Census work plan and key milestone dates were likewise submitted to, and approved by, the NPHCSC. The NPHCSC noted that there were critical paths with more than one activity taking place at the same time and accepted the work plan and approved for the Census operation to begin.

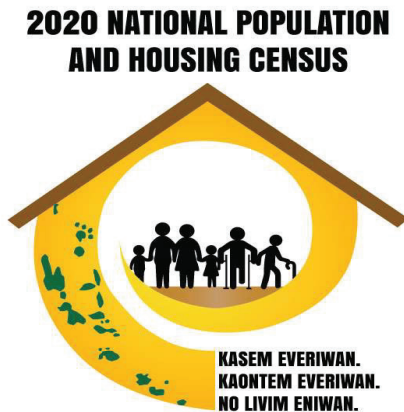

Support

The 2020 Census Project utilised existing government resources as part of the government's financial contributions for the establishment of project. All government Directors General and Directors were requested to provide their support for the Census as well as key institutions such as the Malvatumauri National Council of Chiefs including Chiefs, church leaders and other organisations including Non-Government Organisations and development partners. From November of 2019, the Census Project was actively promoted through government committees (for example the Development Committee of Officials comprising Director Generals of all ministries). Donor partners were able to provide financial and technical assistance support. Discussions began early in the project with the Department of Internal Affairs. The Department of Internal Affairs agreed to provide the services of Area Administrators and Area Secretaries to act as supporting officers to the supervisors for the Census during the field enumeration.

The Census Project through the coordinator and the Government Statistician made consultations with the Director of Internal Affairs to seek assistance from his staff at the six provincial council headquarters, as well as other government ministries represented in the provinces. Meetings and discussions were also held with key community leaders and decision makers to inform them about the Census, obtain their feedback on Census information which would be useful to them as well as outlining the operation plan and requesting their support for the 2020 Census. A visit was also made to the two mayors of the municipalities of Luganville and Port Vila. Other important institutions consulted included Vanuatu Christian Council (VCC), the Malvatumauri National Council of Chiefs, the Vanuatu Society for Disabled People, the Vanuatu Women's Centre, Vanuatu National Youth Council and other community groups to ensure their support for the Census. Weekly

announcements were broadcast on national radio and television to gain general public support for the national Census operation through providing information about the Census and activities of interest to the general public. As was the two previous censuses, the 2020 Census also had a theme which was “*Kasem Evriwan, Kaontem Evriwan, No Livim Eniwan*”.

The 2020 Census also had a logo, as shown below.

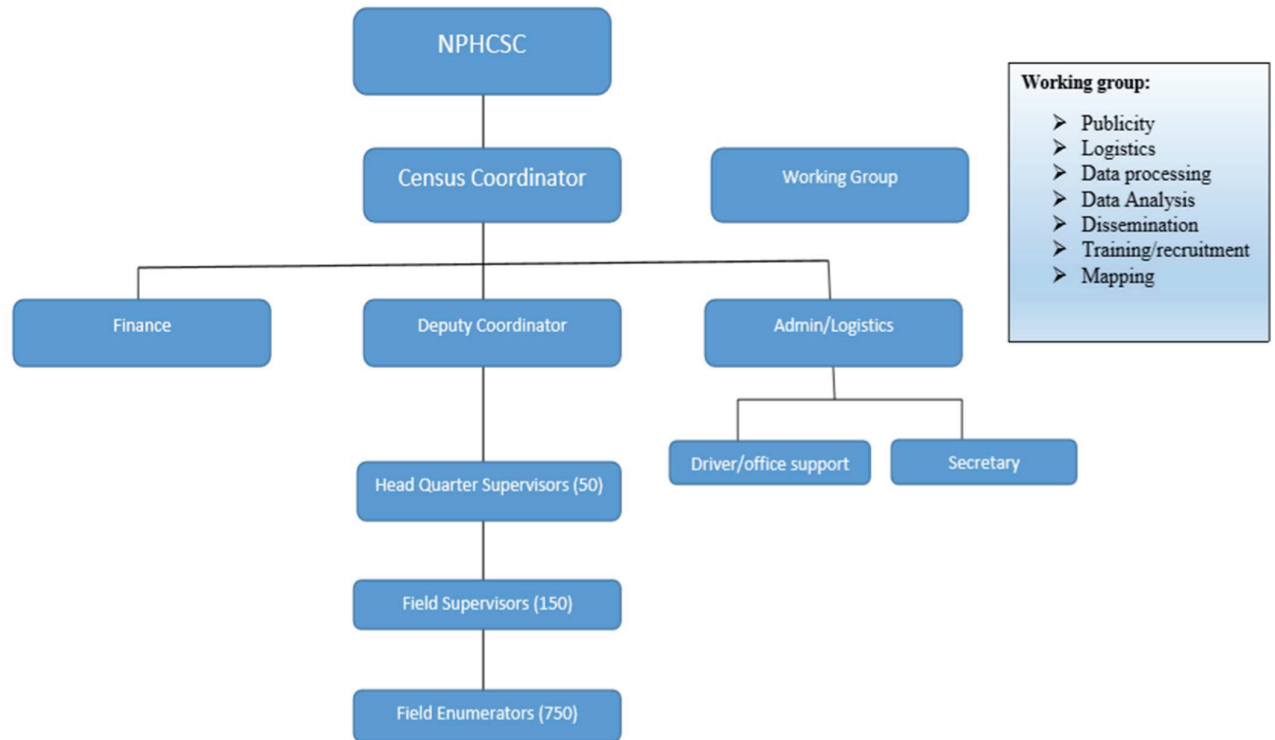

Census timing

The selection of the time of year when the Census will be taken is of critical importance. The most important factor is to select a period in which the Census is likely to be most successful. This depends on a number of factors, the main one being the selection of a date which represents a relatively ‘normal’ period in that there are no major special events happening such as elections, religious conferences or similar large gathering where almost all people will be able to be interviewed at their place of usual residence.

The first national Census after independence of the country was held on the 16th May 1989. The 1999 Census date was moved to 16th November, six months later, to allow schoolteachers to act as trainers and enumerators and the same date was used for the 2009 and 2020 Censuses to maintain a consistent 10-year census interval.

Census Project Organisation

A member of the VNSO staff was appointed to the Census Project Manager position in August 2019 on a contract basis for a period of one year eight months. The Census Project office was established in November 2019 soon after the appointment of the National Census Coordinator and Census Project staff members were subsequently appointed with a structure as shown below.

Census Publicity

Publicity was vital in ensuring the success of the 2020 Census. Awareness booklets and Census posters were printed in Bislama and distributed throughout the country. Advertisements were scripted and aired on Radio Vanuatu and Television in the months leading up to the Census. T-shirts were also printed and distributed to community leaders. Enumerators and supervisors were also given t-shirts to wear whilst they were undertaking fieldwork which clearly identified them as a Census employee.

The six Provincial Administrators played important roles in the publicity campaign in their respective areas. They delivered public speeches, distributed Census posters and public notices, “Census question and answer brochures” to their local communities and schools.

The chiefs of Vanuatu and church leaders also played an important part in the Census publicity by providing information about the Census and the key dates at both informal and formal meetings throughout the country.

The Census Publicity team organised and coordinated the Census publicity and awareness campaign through the Vanuatu Broadcasting and Television Co-operation (VBTC) for both radio and television as well as with privately owned and operated FM radio station. The publicity was centred on the theme “Kasem Evriwan, Kaontem Evriwan, No Livim Eniwan” (in English “Reach Everyone, Count Everyone, Leave no one”).

The publicity consisted of the following:

- Radio talkback shows, with the Census Project Coordinator responding to questions from the show host and the general public which are followed by a relatively large audience.
- More formal scripted television and radio interviews with the Government Statistician and the Census Project Coordinator.
- A series of short clips to relate the importance of the census and showing the different operational stages of the census
- Special radio and TV clips on the Census
- A Census song was composed and played regularly in the radio and TV
- Census posters, stickers, banners and pullup banners
- Census calendar
- Census t-shirts
- Census video documentary
- Census rubber (eraser)
- Census umbrellas
- Census mugs/neck laces
- Census brochures
- Census public notices
- The VNSO letterhead and office contact information contained the Census theme and date
- Email signatures on all outgoing email from VNSO staff contained Census theme and date

The publicity programmed planning started in 2019 with information disseminated about both the pre-Census household listing and actual field enumeration. Publicity activities continued up to the end of the enumeration period in November 2020. A Census song was composed as part of census promotion. A countdown toward the Census night was also placed on the VNSO internet website. During the weeks leading to Census night, Census stickers were distributed with a large size for vehicles as well as a smaller one. The A3 size vehicle stickers were placed on VNSO vehicles as well as other government vehicles and some privately owned ones. The posters were placed in shops in towns and in the rural community notice boards and houses. Both the sticker and banner had the census logo and date of the census. Most of the different forms of publicity were aimed at the public at large with some targeting specific groups such as schools, youth and community leaders with the objective of ensuring that most people in the country would have heard about the Census.

The publicity campaign made the work of the interviewers conducting the household listing and Census enumeration easier as many people understood the importance of the Census and were expecting the Census interviewers at their house during the period specified. The Census brochure, posters and public notices were very effective for Census publicity and awareness.

One of one most effective form of publicity used was the social media platforms. Internet coverage in Vanuatu can no longer be question. thus, majority of the people are on social media such as Facebook, messenger, twitter, Instagram, YouTube etc. these mediums have help with the wide promotion of the census to the remote areas in Vanuatu compare to the previous census and surveys. The Vanuatu National Statistics Office regularly updated its Face book page and twitter account with census promotion, latest news on the census, census events, etc. and viewers can view the contents around Vanuatu and abroad.

D) Census preparations

Census information technology

For the 2020 Census the VNSO took part in two regional initiatives: one involving the use of GPS (Global Positioning System) technology to map individual households and the second to improve the efficiency of data collection by using android tablets programmed with a data collection software. The use of tablets has been first used as trial in the 2016 mini census and proved effective. The VNSO has taken up this initiative to continue with the use of tablets in all its surveys and censuses. Regardless of this sudden shift in data collection method-from paper form to the use of tablets- there are pros and cons in both methods that the census team has to ensure is managed properly to safeguard the data that is collected in the field.

Questionnaire Development

The 2020 Census questionnaire was designed to ensure consistency with the 2009 Census statistical information while meeting regional standards for 'model' questionnaire and meeting international statistical requirements. The Census Pre-test survey was conducted in 3 provinces during June 2020, precisely the same year of the census actual collection. For the urban areas, three areas in Port Vila and 3 areas in the Peri-urban on the outskirts of Port Vila and five areas in the rural of Efate Island: The area known as Blacksands on the

outskirts of Port Vila and five areas around Luganville town and others were selected as the developing areas representing peri-urban areas, and for the rural areas, Tanna island in Tafea province was selected for inclusion in the Pre-test. The Pre-test provided the opportunity to test both the questionnaires in terms of question content and order of questions and the Census data collection using the tablets to synchronize the data back to Port Vila using the Survey Solution software.

The Pre-test included a number of 'new' questions compared to that used in 2009. Based on submissions by users and follow-up discussions about their information needs, questions on disability, mortality, literacy, the main source of household income, if a person had worked overseas in the last 12 months, the use of mobile phones, and small businesses operated by households were tested and refined.

Based on lessons learnt from the Pre-test, other household surveys and the 2009 Census forms, all questions were programmed into the tablets including all modules from household questions to the last module of the questionnaire.

The final questionnaires were produced in English, French and Bislama. These versions were inserted into the tablets for the interviewer to choose the language he or she is comfortable to use. The questionnaire was designed to be completed by an interviewer (also known as an enumerator).

Household listing

For the 2020 Census, there was no listing done. VNSO preferred to use the household list collected from the 2016 mini census and at the same time to update the list of the households in the country. During the actual enumeration every existing and new identified household, institutions or non-private household, was counted as well as the usual number of people who live there and its location using the tablets inbuilt GPS program. The main dwelling occupied by the household was marked with a sticker containing the unique household reference number. This reference number along with the GPS location of the household was used during the Census enumeration to locate all of the households in Vanuatu. The household interviewed also used to identify the

geographic survey units, called Enumeration Areas, which required dividing into smaller units because they were too large for one enumerator to manage during the actual Census enumeration.

Training of Trainers

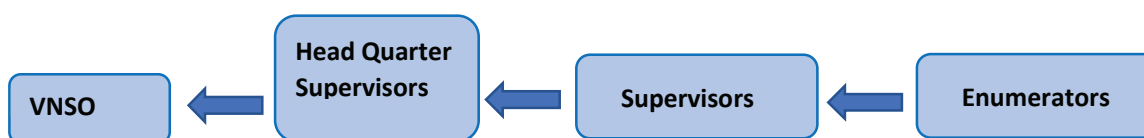

The final preparations for the Census enumeration included training the VNSO staffs who would be training the field interviewers and who would then be Census supervisors (in the provinces) and Head Quarter Supervisors (in Port Vila). The Department of Local Authority also given its approval through a sing MOA for the census to utilise the Area Administrators and Area Secretaries field supervisor. Area Administrators (AA) and Area Secretaries (AS) are basically performed administration roles for the communities in their areas and the Ministry of Internal Affairs released them to assist the Census provincial officers and VNSO staff to conduct training to the interviewers.

The VNSO staff went through a two week 'train the trainer' course in Port Vila, and then travelled to the pre-selected seven different training sites for Census interviewer training. In all there were 31 trainers, all of whom were VNSO staff from Port Vila and the VNSO Provincial Census Officers. Part of the train the trainers programme involved two days conducting 'test' interviews in Eton Village in the East of Efate. The training focused on the:

- Purpose of Census
- Trainer's responsibilities
- Training procedures
- How to complete each Census question (including the codes and classifications used)
- How each question should be answered to avoid errors during data verification
- Synching of questionnaire from the field
- Questionnaire checks to be completed in the field
- Administrative procedures for checking of questionnaires by the Head quarter supervisors

Census enumeration

Census enumerator training was conducted during the two-week period immediately prior to the 16th of November. At the conclusion of training enumerators and supervisors travelled from the training sites directly to their enumeration areas. At the conclusion of the formal training one day was spent allocating the Enumeration Areas to each supervisor and the enumerators in his or her team and distributing the tablets, the bags, the umbrellas, the field allowances, other administrative forms and stationery.

The Census enumeration involved the recruitment of 750 enumerators and 150 supervisors and 50 head quarter supervisor recruited by the national VNSO office, who worked under the direction of National Census Coordinator. At the end of the enumerator training, the supervisors assumed their roles as team supervisors in their respective working zones. While the HQ supervisors where station back at VNSO office. The basic channel of reporting is shown above with each level having different responsibilities and checks to be completed for data quality assurance and monitoring. The period of field enumeration began on 16th November 2020 and was

completed in most areas of the country within two weeks. In areas that were particularly difficult to reach, or where transport was difficult to arrange and, in some cases, not available at all, the enumeration took longer.

A Post Enumeration Survey (PES) planned for two weeks after the completion of enumeration did not eventuate as some areas were still conducting interviews and the timing was inconvenient because of the festive season (Christmas and New Year). Furthermore, there was a lot of people moving between communities at that time so the objective of the PES to re-count household members to verify Census counts would have been difficult to achieve. Vanuatu has never conducted a PES and one of the contributing factors is the capacity requirements of PES is to have independent bodies conducting such activity, other than VNSO itself.

Census data processing

The use of the tablets in the data collection during the 2020 census did apply some steps of data checks. This time, the interviewer was provided the opportunity to check his or her own work by going through what s/he has entered into the tablets to see if all questions have been answered correctly. The checked questions are then sent to the specific team Supervisors tablets using the Digicel data network. The supervisor then checked the incoming questionnaire for any mistakes. If a supervisor identified a mistake, he or she would make a comment on the specific question and send the questionnaire back to the respective enumerator to amend the error.

If the supervisor checks the questions and no error is identified, the supervisor sends the checked question to his or her respective HQ supervisor to go through the questionnaire again for any errors the supervisors might have overlooked. If no error is identified by the HQ supervisor, this question is being approved by the HQ supervisor and stored away in the data awaiting to be worked on after the census enumeration.

In order to obtain accurate statistics from household-based surveys such as the Census, the data must be as free as possible from errors and inconsistencies. Statistics derived from 'dirty data' (that is, data which contains errors) may produce an inaccurate profile of the country or geographic area.

Therefore, before any final Census databases were created and tabulation programs run, the data was checked for errors and edited so that important data items (that is, the answers to key Census questions) were valid and consistent. Checking large quantities of data and correcting errors is a time-consuming task and requires attention to detail. The use of tablets to instantly check for errors in the field reduces both time and the possibility of further human error.

An editing process used during the 2020 Census involved ensuring that the number of households in a particular EA must correspond with the number of GPS coordinates entered into the tablets. Since the household listing used was from the 2016 mini census, thus, all households were recorded for a particular EA. Any new household identified should be given a new GPS reading and be recorded.

The second involved running range and consistency checks against questions to make sure valid codes were in the database. A range check ensures that a valid response for a question has been entered, for example a date of birth of 32/13/1978 would fail two range checks. A consistency check compares the results to two or more different questions or questionnaires for consistency. For example, if a person's place of birth was a location in Vanuatu and their ethnicity was ni-Vanuatu only then their response to the citizenship question had to be that they were a Vanuatu citizen by birth. These consistency checks also generated (or imputed) responses to questions if the respondent had not answered a question. For example, if a person said that they were the spouse of the household head in the 'relationship to the household head' question but did not give an answer to the marital status question, a response of 'legally married' would have been imputed as their marital status. Other imputation assumed that if a 'yes/no' question had been left blank then the answer was no. these range

checks were being programmed into the survey solution software used in the tablets to automatically reason out these response defects in the questions and alerted the enumerator that the selected option does not match the questions. Thus, the enumerator has chosen another option.

Data cleaning begins in December of 2020. The SPC offers to help with the data cleaning of the census datasets and has taken almost a month to be completed. During this process of data cleaning, there were continuous exchange between VNSO and the SPC team for clarification, coding, etc. to have a final dataset finalize on time for the Volume 1 and 2 reports.

Concepts and Definitions

Concept	Definition
Cash Income Source	<p>“Wages and salary”: wages are referring to a contract signed by in which you are paid according to the hours you have worked; it will also include private workers. Salary is a fixed regular payment, typically paid on a monthly basis but often expressed as an annual sum, made by an employer to an employee, example of a government worker</p> <p>“Income from leasing land”: this refers to cash received from leasing out land to another household. For example, agriculture lease is a land rented for agriculture use</p> <p>“House rent”: this refers to households which have a rent house/ apartment and are receiving income as payment of rent paid to the landlord who is renting out his/her house/ apartments</p> <p>“Money sent from overseas”: Money that is received from a household member/ relative or friend who is living in another country (example RSE SWP Australia and New Zealand)</p> <p>“Money sent from elsewhere in Vanuatu”: this option would be selected if any members of this household have received cash from any person living elsewhere in Vanuatu. It could be from another area council/ Island or province</p> <p>“Sale of cash crops”: if the household is involved in selling of crops from own produce then any cash received from sale of cash crop would be within this option or category. Cash crops refers to some of the crops that grow easily and are quick to sale to obtain cash, such as cabbage, tomatoes, carrot bean etc.</p> <p>“Sale of handicrafts”: if this household is involved in selling of handicrafts made from own account then this option would be a suitable option. This activity involves the making of decorative domestic or other objects by hand, such as baskets, dress, hats, weaving mat etc.</p> <p>“Profit from own business”: this option refers to the household that has a business activity in which they earn profit as a sort of income. Profit is the positive financial gain your business makes after you've subtracted all your expenses</p> <p>“Interest from bank deposit or investment”: this option refers to a household who placed their money in a financial institution or investment and in return they received a cash return or income, for example fix deposit interest</p> <p>“Pension payment”: A pension is a retirement plan that provides a monthly income in retirement. For example, VNPF pension, former pastors and president pension</p> <p>“Disaster Relief Funds”: the household is receiving a cash fund after a natural disaster as an income</p> <p>“Other source of income”: If there is other source of income that has been received which is not in the list provided</p>
Cooking Fuel Type	<p>Gas: Flammable gas, consisting largely of methane and other hydrocarbons, occurring naturally underground (often in association with petroleum) and used as fuel</p> <p>Biogas: Biogas can be produced from raw materials such as agricultural waste, manure, municipal waste, plant material, sewage, green waste or food waste</p> <p>Electricity: The supply of electric current to a building for heating, lighting, or powering appliances</p> <p>Liquefied petroleum gas (LPG): Liquefied petroleum gas (LPG or LP gas), is a flammable mixture of hydrocarbon gases used as fuel in heating appliances, cooking equipment, and vehicles</p> <p>Kerosene/paraffin (petroleum-based): A light fuel oil obtained by distilling petroleum, used especially in jet engines and domestic heating boilers; paraffin oil</p> <p>Oil (including vegetable oils used as fuel): Vegetable oils that are used as a fuel come under two categories – Straight Vegetable Oils (SVO) and Waste Vegetable Oils (WVO). As the name suggests, SVO is the oil that is available in the grocery</p>

Concept	Definition
	<p>stores and this oil can work in diesel engines after making some necessary modifications to the engine</p> <p>Coal: Coal gas (Noun) The poisonous gas, used domestically for cooking etc and formerly for lighting, prepared by heating coal with steam; it is a mixture of hydrogen and carbon monoxide; synthesis gas or town gas</p> <p>Firewood: Wood is one of the best sources of fuel, which is commonly used. To protect valuable forest resources and reduce smoke, use dry wood, cut into small pieces</p> <p>Charcoal: Modern "charcoal", widely used for outdoor cooking, are made with charcoal but may also include coal as an energy source as well as accelerants, binders and filler</p> <p>Animal dung: Its main component is animal dung (gobar – India) along with some other organic matter like dead remains of plants and animals. It can be used to cooking, electricity generating and heating purposes. It is proving to be a very cost-effective and environment-friendly alternative fuel for rural households</p> <p>Crop residues (for example, cereal straw from maize, wheat, paddy rice, rice hulls, coconut husks, groundnut shells), In Vanuatu we use coconut shells, fibre, husks, leaves and branches: Note: Dried crop wastes, such as rice and maize husks and coconut shells are used as fuel in many places. When these materials are used without processing, they cause smoke that can lead to health problems. Chopping the material and pressing it into blocks (fuel briquettes) can make it burn longer and cleaner</p> <p>Other: Some examples: Natural gas or green gas 100 biodiesel, food peelings, etc</p>
Dwelling	<p>A dwelling is any building or structure – or its parts – that is used, or intended to be used, for human habitation. Dwellings can be permanent or temporary and include structures such as houses, motels, hotels, prisons, motor homes, huts, and tents</p>
Drinking Water Source	<p>Piped- Private (metered): Pipe that is privately owned and not shared with other household members. The meter is used for measuring volume of water usage Pipe connected with in-house plumbing to one or more taps, e.g. in the kitchen and bathroom. Sometimes called a house connection</p> <p>Piped-Private (unmetered): Pipe that is privately owned and not shared with other household members. Difference between the meter is used for measuring volume of water usage. Shared means the piped water is shared with members of other households. Private means piped water is used for drinking by members of one household only</p> <p>Pipe-Shared: Where a shared pipe runs either under or through a property, the deeds will usually state that neighbours are entitled to the free passage and the running of water through pipes in or under the property. Example in a rent house with four units, there is only one metered pipe which is connected to all four units and the cost is equally shared among them</p> <p>Village Stand Pipe: Piped water that is shared by the entire community/village</p> <p>Well-protected: A protected well or tank is covered, preventing toxins from entering the water supply. Water in a well is sourced directly from underground and is not collected from rain water or from a tap</p> <p>Well-Unprotected: Water in a well is sourced directly from underground and is not collected from rain water or from a tap. A rainwater well or tank that is uncovered and exposed to the elements and to potential contamination is unprotected</p> <p>Rainwater tank – private: A water tank is a container for storing water. Water tanks are used to provide storage of water for use in many applications, drinking water, irrigation agriculture, fire suppression, agriculture farming, both for plants and livestock's, chemical manufacturing, food preparation as well as many other uses. But this tank is not shared by another household; it is only for the household Rainwater tank private is a container/tank or a built-in concrete that stores rain water. A private tank is used only by the household and not shared with any other household</p>

Concepts and Definitions

Concept	Definition
	<p>Rainwater tank – shared: An in-ground or above-ground well or water tank used to collect and store rain water. Shared means the rainwater from the well/tank is shared with members of other households. Private means the rainwater is used for drinking by members of one household only. Rainwater tank private is a container/tank or a built-in concrete that stores rain water. A shared rainwater tank is usually located in the centre of the village or community in which all households have access to</p> <p>Bottled water (purchased from store): Water that is inside plastic bottled and bottled and it is sold to the household in bottles. Any bottle of water used for refilling either from rain water or tap is not considered bottle water. Bottled water should be bought from shops</p> <p>River, Lake or Spring: Water that is collected from natural sources and used for drinking. River is water flowing down to the sea, Lake refers to water that is in one place and not moving and spring is water springing out from the ground, sand and stone</p> <p>Others: Other sources of water that is not included in the list above, example water pump. Etc.</p>
Floor / Wall/ Roof Material	<p>“Metal”: A solid material which is typically hard, shiny, malleable, fusible, and ductile, with good electrical and thermal conductivity (e.g., iron, gold, silver, and aluminium and alloys such as steel). So, if you see the floor is made of any other examples, tick this category</p> <p>“Wood”: It is the hard-fibrous materials that forms the main substance of the trunk or branches of a tree or shrub, used for fuel or timber</p> <p>“Concrete, cement or brick”: This refers to floor that is made of cement or bricks or concrete. If it is covered by tiles or plastic tiles it is still cement, concrete or brick if it is the one used. Tiles are just accessories</p> <p>“Traditional (Bush) materials”: This refers to floor that is made of trunk of palm trees, bamboo and other local materials but not timber</p> <p>“Makeshift or improvised materials (plastic, etc)”: A floor that is temporarily made for example, coral, cartons, solitaire over soil of the house. Etc</p> <p>“Other”: Any other materials NOT INCLUDED from the list above</p>
Handwashing facilities	<p>Hand basin with soap: Hand basin or washbowl for washing hands with soap</p> <p>Hand basin only without soap: Hand basin or washbowl for washing hands without soap</p> <p>Tap water with soap available: Tap water which have soap available to use</p> <p>Tap Water only: Tap water only</p> <p>Other: Any other hand washing facilities not include</p>
Head of Household	Is an adult person who usually makes the final or most household decisions. It does not necessarily refer to the sole bread winner, or the most senior person or being male. It must be someone who is a usual member of the household
Household (private)	<p>A household is defined as “Those persons who usually eat together and share the work of preparing the food and/or the cost of work of providing it”. A household can also be an individual person without combining with other persons.</p> <p>A household may be found in a variety of forms. It may spread over more than one building. Members of a family may sleep in two or even more buildings but share one place to cook and eat.</p>
Household size	an average measure obtained by dividing the number of people in households of a given area by the total number of households in the area
Institution (Non Private Household)	an organization providing specified services or performing some general public function for a group of residents or inmates who will normally be unrelated to each other. Institutions or sometimes refer to as collective households or non-private dwellings such as hospitals, schools, prisons, hotels, bible college, guest house etc.
Improved Sanitation	Sanitation defines "improved" sanitation as the following kind of toilets:

Concepts and Definitions

Concept	Definition
<i>(Unicef/WHO definition)</i>	<p>Flush toilet</p> <p>water seal</p> <p>Ventilated improved pit latrine (abbreviated as VIP latrine)</p> <p>Pit latrine with slab</p> <p>Composting toilet</p> <p>Any of the above that is "shared" are NOT counted as improved sanitation, including that of open pit latrine and no toilet facilities</p>
<p>Improved drinking water</p> <p><i>(Unicef/WHO definition)</i></p>	<p>An improved drinking-water source is defined as one that, by nature of its construction or through active intervention, is likely to be protected from outside contamination, in particular from contamination with faecal matter.</p> <p>Any water source or storage that is unprotected, uncovered or shared by other household is considered unimproved.</p>
Internet Use	<p>Home Broadband Connection: a high speed communication system that links computers to the internet at home. Home broadband providers in Vanuatu are Wantok, Vodafone/TVL, Digicel, Telsat and 3link.</p> <p>Internet café: a place where people could go to and have access to the internet and the fee is usually time based.</p> <p>Free WIFI Connection: have access to the internet without paying for any data packages, for example - using a friend or family's Wi-Fi, Neighbour's WIFI or connected to the internet via hotspot.</p> <p>at workplace</p> <p>at place of education</p> <p>Mobile data: internet connection on your phone through a cellular service provider (Digicel and Vodafone)</p> <p>Other location</p> <p>None</p>
Land Tenure	<p>"Customary right of a member of the household": This refers to land which is owned by indigenous or a member of the household in accordance with their customs, as opposed to statutory tenure usually introduced during the colonial periods. It involves traditional rights to the land and other natural resources in the land</p> <p>"Leasehold with the customary right owner": This response refers to a temporary right to hold land or property in which a lessee or a tenant holds right property by some form of title from a lessor or landlord.it involves a person who owns the land but gives it to another whom will have ownership over property on the land for a period of time. It also refers to property owner (also called the freeholder) grants the leaseholder the right to live on the property for a specified span of time</p> <p>"Leasehold with another party (Private owner or government lease)": A lease is a legal contract established by two parties over a certain asset where the lessor (the owner) agrees, under certain conditions, to rent his property to a lessee (the person receiving the property).This contract can have a limited time period (a leasehold) or an unlimited one (a freehold).The object of the lease can vary in its nature, from a real estate property to an automobile and in the case of a leasehold the Assets must be returned to the owner after the lease period has concluded</p> <p>"Occupation right without payment": A person occupying the land with the consent of a majority of fellow landowners in any given block of land, you may be given a residential or even a commercial right to occupy a section of land with no payments or rents</p> <p>"Occupy with informal arrangements": A person occupying the land with informal arrangements and there is no legality in the process of ownership of the land. For situations where a person is making instalments on any land and is currently living in the land this option would best represent the status of the ownership of the land</p>

Concepts and Definitions

Concept	Definition
Lighting Source	<p>unless there is a lease title in black and white document certifying the transfer of lease to household then it should be under category 2</p> <p>Electricity –main grid: An electrical grid or power is an interconnected network for delivering electricity. Example, Unelco and VUI</p> <p>Electricity –Own generator: A generator is a device that converts motive power (mechanical energy) into electrical power for use in an external circuit</p> <p>Solar panel and battery system: A solar panel is actually a collection of solar (or photovoltaic) cells from the sun’s rays which can be used to generate electricity through photovoltaic effect</p> <p>Solar lamp: A solar lamp also known as solar light or solar lantern, is a lighting system composed of LED lamp, solar panels battery, charge controller and there may also be an inverter. The lamp operates from electricity from batteries, charge through the use of solar photovoltaic</p> <p>Pressure lamp: Pressure lamp is also known as Coleman light</p> <p>Kerosene lamp: A kerosene lamp is a type of lighting device that uses kerosene as a fuel. Kerosene lamp have a wick or mantle as light source, protected by a glass chimney</p> <p>Battery Powered lamp: A portable hand-held electric light. The source of the light often used to be an incandescent light bulb which uses battery and a switch</p> <p>LPG-Powered lamp: Gas lighting production of artificial light from combustion of gaseous fuel, such as hydrogen, methane, carbon monoxide, propane, butane, acetylene, or natural gas</p> <p>Candles: A candle is an ignitable wick embedded in wax, or another flammable solid substance such as tallow that provides light</p> <p>Wood, Coconut: Dried wood and dried coconut shells/husks/leaves/top burned and uses flame as light</p> <p>Other: Other examples such as windmill and Hydro power plant. Windmill – The energy in the wind turns two or three propeller-like blades around a rotor. The rotor is connected to the main shaft, which spins a generator to generate electricity. Hydro Power Plant – Water released from the reservoir flows through a turbine, spinning it, which in turn activates a generator to produce electricity</p>
Living Quarter Ownership	<p>“Owned by a household member with a mortgage or loan”: refers to a house or living quarter that is still under loan or mortgage (mortgage refers to an agreement with a bank in which the household guarantees with a household asset such as car or land or any valuables in case payment cannot be completed in due time). If the household is paying for a car and has mortgaged the building or living quarter as a guarantee then this option should be selected even if the house/ building or living quarter is free of loan</p> <p>“Owned by a household member clear of mortgage or loan”: refers to a house/ building/ living quarter which is free of loan, build by own costs or does not owe anyone any payment</p> <p>“Rented from someone not in household”: refers to those who live in rented apartments/ houses and are paying rent to the owner of these apartments or house. The owner is also not part of the household but living in another household</p> <p>“Occupied without rental payment (including provided by employer)”: refers to those who are living in a building/ house/ living quarter that requires no payment but is not owned by them. For instance, some government employees fall under this category as they are living in government houses free of charge and do not have any deductions from their salary. But be cautious as there are also government employees who live in government houses and still have a deduction from their salary for payment of rent to the government. Another example is that of house girls who have been provided a living quarter by their boss or employers and do not pay rent or are living rent free</p>

Concepts and Definitions

Concept	Definition
	<p>“Other arrangement with the owner”: refers to those living in a building/ house / living quarter but have some form of agreement with the owner that does not fit the other arrangements stated in the options provided. If this option is selected then need to give details of the arrangements made</p>
<p>Means of communication</p>	<p>Desktop computer: A computer suitable for use at an ordinary desk</p> <p>Laptop computer: A laptop (also laptop computer), often called a notebook, is a small, portable personal computer (PC) with a "clamshell" form factor, typically having a thin LCD or LED computer screen mounted on the inside of the upper lid of the clamshell and an alphanumeric keyboard on the inside of the lower lid</p> <p>Tablet: is a mobile device, typically with a mobile operating system and touchscreen display processing circuitry, and a rechargeable battery in a single, thin and flat package. Tablets, being computers, do what other personal computers do, but lack some input/output (I/O) abilities that devices have</p> <p>Smartphone: A mobile phone that performs many of the functions of a computer, typically having a touchscreen interface, Internet access, and an operating system capable of running downloaded apps. It is much smaller in size compared to a Tablet</p> <p>Mobile/cellphone: A mobile phone is a wireless handheld device that allows users to make and receive calls and to send text messages, among other features. It has a physical keyboard compared to a Mobile Smart Phone</p> <p>Landline: A landline telephone (also known as land line, land-line, main line, home phone, landline, fixed-line, and wireline) is a phone that uses a metal wire or optical fiber telephone line for transmission as distinguished from a mobile cellular line, which uses radio waves for transmission</p> <p>Internet connection: A connection between the user's device and a server that provides access to the Internet, typically through an Internet service provider like Digicel, Vodafone, Telsat, 3 Link, and Wantok. However, the internet connection can be in the form of; MOBILE - Many cell phone and smartphone providers offer voice plans with Internet access. HOTSPOTS - Hotspots are sites that offer Internet access over a wireless local area network (WLAN) by way of a router that then connects to an Internet service provider. Hotspots utilize Wi-Fi technology, which allows electronic devices to connect to the Internet or exchange data wirelessly through radio waves. Hotspots can be phone-based or free-standing, commercial or free to the public. DIAL-UP - Dial-up connections require users to link their phone line to a computer in order to access the Internet. This particular type of connection—also referred to as analog—does not permit users to make or receive phone calls through their home phone service while using the Internet. BROADBAND - This high-speed Internet connection is provided through either cable or telephone companies.</p>
<p>Means of Transport</p>	<p>Car: A four wheeled road vehicle that is powered by an engine and is able to carry a smaller number of people, some for example carry only 4 people</p> <p>Van: Van is a medium sized motor vehicle, used for transporting goods or people. Van can be related to our buses in Vanuatu</p> <p>Truck: Are large, heavy road vehicle used for carrying goods, materials, or troops. It can also be referred to as lorry</p> <p>Motorcycle: Motorcycle includes motorbike, quat and scooter, it is a two to four wheeled motor vehicle that is powered by a motor engine and has no pedals</p> <p>Bicycle: A transport consisting of two wheels held in a frame one behind the other, propelled by pedals and steered with handlebars attached to the front wheel (google 2020)</p> <p>Boat: A small vessel for travelling over water, propelled by sails or an engine</p> <p>Canoe: A light, narrow boat with pointed ends and no keel, propelled with a paddle or paddles</p> <p>Horse: This refer to the animal Horse</p>

Concepts and Definitions

Concept	Definition
	Canoe with motor: Traditional canoes however it is propelled using the help of a motor engine instead of using a paddle
Median age	the age that divides a population into two numerically equal groups - that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population.
Own Account	work done on their own without hiring other non-member of the household, include the type of job defined as "a self-employment job" and have not engaged on a continuous basis any "employees" to work for them during the reference period
Person	any individual member of the household or institution who is present on the census night and is therefore counted in the census. This includes everyone: young and old, male or female, expatriates or residents, tourist and locals alike. For census purposes, the term "person" denotes each individual falling within the scope of census. A person can be identified as belonging to the household population or to the institutional population where he or she slept on the night
Usual place of residence	is defined for census purposes as the place a person last lived for six months or more or intends to live for at least six months.
Reason for absent at work	<p>Full time student: primary and secondary level of school requires that the student must be a full time to complete this level of education</p> <p>Part time student: Vocational and Technical plus Tertiary level or University, the school curriculum allows them take one or two course taking up a little time of their day to attend school and the rest of the day is up to them</p> <p>Doing domestic work only for self and others: example could be a housewife which she only works from home in cleaning the house, doing laundry and taking care of the children. This example is one of many but goes to show that any person who is working at home and not economically producing any goods and services</p> <p>Retired pensioner or income recipient: A pension is a fund into which a sum of money is added during an employee's employment years and from which payments are drawn to support the person's retirement from work in the form of periodic payments, bear in mind although there are some form retired pensioner in Vanuatu such as pastor being retired from church the church still put some money for them or politicians who have retire from work but still receive some money such as the President. However, for this, the VNPF one off payment also counts as it this definition must fit into the context of Vanuatu</p> <p>Too old or infirm to work: when the person is not physically or mentally strong to do any work</p> <p>Sick or injured: there was problem with his/her health that prevent him from working</p> <p>Disability: Persons with disabilities include those who have long term physical mental, intellectual; or sensory impairments which in interactions with various barriers that may hinder their full and effective participation in society on an equal basis with others</p> <p>Looking for work: they are actively seeking work and has taken some steps in finding a work</p> <p>Other: other reasons apart from those listed that describes their status last week as to why they did not work</p>
Main Toilet Type	<p>Flush Toilet inside house-Private: A flush toilet uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours</p> <p>Shared means more than one household uses the same flush toilet. Private means only members of that one household use the same flush toilet</p> <p>Flush toilet outside house-private: A flush toilet that is outside the house but is privately own or used by the owner of the house and those that dwell in the household</p>

Concepts and Definitions

Concept	Definition
	<p>Flush toilet-shared: A flush toilet that is shared by other people in different households</p> <p>Water Sealed-Private: A water sealed toilet uses water poured by hand private refer to only one household using the toilet by one single household without sharing with other members of other households</p> <p>Water Sealed shared: A water sealed toilet uses a water seal, but unlike a flush toilet, a water sealed toilet uses water poured by hand for flushing (no cistern is used). Shared means more than one household uses the same water sealed toilet. Private means only members of that one household use the same water sealed toilet</p> <p>Ventilated Improved Pit (VIP) Latrine-private: A pit latrine ventilated by a pipe extending above the latrine roof. The open end of the vent pipe is covered with gauze mesh or fly-proof netting and the inside of the superstructure is kept dark. Shared means more than one household uses the same VIP toilet. Private means only members of that one household use the same VIP toilet.</p> <p>Ventilated Improved Pit (VIP) Latrine-shared: Excreta are deposited without flushing directly into a hole in the ground</p> <p>Pit latrine- private: Privately own by one household and restricted others from using it</p> <p>Pit Latrine-Shared: Shared means more than one household uses the same pit latrine. Private means only members of that one household use the same pit latrine</p> <p>Other: Other means of toilet that is not included inside the list provided. Example, bush, sea, bucket toilet, compost toilet etc.</p>
Type living quarters	<p>“One-family house detached from any other house”: refers to one single house/dwelling that is not joined to other dwellings by one or more walls and is not also in the building used for a shop or other commercial related activities</p> <p>“One-family house attached to one or more houses”: refers to a living quarter which has several houses or dwellings</p> <p>“Building with two or more apartment”: refers to block or flats, multi-story buildings, an apartment or town houses</p> <p>“Building with 2 or more HH which share a kitchen/toilet”: refers to a structure with two or more households that share a kitchen and/or a toilet. You might find this in areas where the cyclone has destroyed buildings forcing households to share facilities and live together in shared structures</p> <p>“Lodging house”: is like a hostel or private house where a person either share rooms or have separate rooms but share either cooking or washing facilities and this rooms are rented for living or staying in temporarily</p> <p>“Dwelling attached to a shop or other non-resident building”: refers to a dwelling that shared a common wall to shops or other commercial related activities</p> <p>“Other”: Any other options apart from those listed</p>
Value added activities	the improvement of any primary product by household for purpose of selling, usually a transformation from its original content to a valuable one. e.g. From raw to manufactured such as coconut to oil, wood to carving, solid to liquid etc.
Waste Disposal	<p>Authorized waste collection: Municipal areas, such as Port Vila and Luganville where rubbish collection services are provided by the municipal or Private rubbish collection companies who have a certain fee paid to collect and dump rubbish on a central disposal site</p> <p>Take to central disposal site: Voluntary transport of home waste/rubbish to the central disposal site. Some fees may be applicable upon disposal</p> <p>Burn on compound: All home waste/ rubbish is burned in own private yard whether around an old tree stump, in a pit, or in an old drum, etc.</p> <p>Dump in lagoon/river/or sea: Home waste/ rubbish is disposed of into the sea, lagoon, or rivers</p> <p>Bury: All home waste/ rubbish is dumped into a pit and buried</p>

Concepts and Definitions

Concept	Definition
	<p>Recycle: Home waste/ rubbish is being turned into other useful items, or are returned to manufacturers or taken to a recycling plant. For example, Plastic bottles are used as water containers, Tusker Bottles are returned to Tusker company, or Tin cans or old truck parts are taken to Recycle Corp in Port Vila</p> <p>Compost bin: Food/ organic waste is dumped into a specific compost box which later can be used as compost fertilizer</p> <p>Other: those not listed under the options above</p>
Work Status	<p>Employer: They produce goods and services and has workers he/she pays for. Self Employed – has their own business but doesn't employ others</p> <p>Employee: Private Sector – Works for a private company or small private business. This sector is more concerned about making profit for their business, and this range from any number of business starting from agriculture, industry and services delivery</p> <p>Employee: Public Sector – Works for the government in some capacity, like a school teacher or an Area Council Secretary.</p> <p>In addition, Non-government organisation (NGOs) those organisations that does not belong to the government but whose aim is also to improve the livelihood of the people, some example of NGOs are:</p> <p style="padding-left: 40px;"><i>Care International</i> <i>Oxfam</i> <i>World Vision</i> <i>Vanuatu Red Cross</i></p> <p>As for Statutory Bodies, they are usually established to carry out specific functions which a Government considers may be more effectively performed outside a traditional departmental structure. Some examples are:</p> <p style="padding-left: 40px;"><i>Air Vanuatu</i> <i>Reserve Bank of Vanuatu</i> <i>Vanuatu National Provident Fund</i> <i>Vanuatu Financial Service Commission</i></p> <p>Producing goods for own/family consumption: Family garden activities would be captured here</p> <p>Unpaid family worker (family business/plantation): Work that goes without a monetary payment</p> <p>Unpaid household worker (help with basic household duties): Work that goes without a monetary payment</p> <p>Volunteer work without pay: Work that goes without a monetary payment, but that is elective and is helping others</p> <p>Trainee work: work for the purpose of gaining occupational skills or work experience, they are paid in cash or in kind</p>

- The figures in Sanma and Shefa total does not include the urban centres
- Place of enumeration – place where one is being interviewed at during the reference date (Census Night)

Annex 1: 2020 Census questionnaire

Note: This is a very basic skeleton of the questionnaire without the actual questionnaire format, validation rules and open ended questions

For full version of questionnaire, please email stats@vanuatu.gov.vu or call +678 22110

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
S1. Please select Province name (where this household is currently located)	SINGLE-SELECT 01 Torba 02 Sanma ...
S2. Please select Island name (in %province%)	SINGLE-SELECT: CASCADING ISLANDS 101 hiu 102 metoma ...
S3. Please select Area Council name (in %province%)	SINGLE-SELECT: CASCADING 101 torres 102 ureparapara ... area_council
S4. Please select Village name or Urban Area (in %area_council%)	SINGLE-SELECT: CASCADING 101001 Dineumevuneu 101002 Kwururetokwa ... village
S5. Please select EA number (in area_council)	SINGLE-SELECT: CASCADING 101001 101001 101002 101002 ... ea_number
S6. What type of household is this?	SINGLE-SELECT 01 Private household 02 Institution (Schools, hospitals, hotels, rooming houses and other lodging houses) 03 Mobile households (vessels, construction camps) hh_type
1. START FIRST VISIT	
FV. Please press button to record time and date of first visit	DATE: CURRENT TIME fv_time
FV. Is anybody home, and able to be interviewed? IsAnswered(fv_time)	SINGLE-SELECT 01 Yes => continue and start questionnaire 02 Yes, but refused to participate (discuss with supervisor and possibly come back later) 03 No, nobody at home (come back AT LEAST one hour later) fv_result
FV. Please state the number of dwellings.	NUMERIC: INTEGER fv_num_dwelling
FV. Please record the location of this visit (household).	GPS N W A fv_gps
TV. Please press button to record time and date of third and last visit	DATE: CURRENT TIME tv_time
TV. Is anybody in the home, and able to be interviewed?	SINGLE-SELECT 01 Yes => continue and start questionnaire 02 Yes, but refused to participate. (NOTE: 03 No, nobody at home. tv_result
TV. Please state the number of dwellings.	NUMERIC: INTEGER tv_num_dwelling
TV. Please take a photo of the front of ALL the dwellings.	PICTURE tv_photo
S7. Please press button to record start time and date of interview	DATE: CURRENT TIME interview_date

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
2. PERSON ROSTER: ALL INDIVIDUAL PERSONS	
☐ Tap to record the START time and date of the interview for this section.	DATE: CURRENT TIME start_roster
P1. What are the FULL NAMES of ALL persons who were in this household on the CENSUS NIGHT, midnight on Sunday 16 NOVEMBER 2020 ?	LIST p1_hh_members
A1. What is the relationship of XYZ to Head of household?	SINGLE-SELECT relat 01 Head 02 Spouse/Partner...
A2. What is XYZ's sex?	SINGLE-SELECT sex 01 Male 02 Female
A3. What is XYZ's age at last birthday?	NUMERIC: INTEGER age SPECIAL VALUES 00 Less than one year
A3a. How old is XYZ , in months?	NUMERIC: INTEGER age_m
A4. What is XYZ date of birth?	TEXT dob
A5. What is XYZ's marital status? age>=15	SINGLE-SELECT marital_status 01 Never married (Single) 02 Legally married 03 Defacto 04 Divorced 05 Separated 06 Widowed
A5a. Specify Legally married marital_status ==2	MULTI-SELECT custMarriage 01 Custom 02 Church 03 Municipal
A5b. Was the church marriage registered in the Civil Status?	SINGLE-SELECT marriage_registration 01 Yes 02 No 99 Don't Know
A6. Which of the following ethnic groups do XYZ identify with?	SINGLE-SELECT ethnicity 01 Ni-Vanuatu only 02 Part Ni-Vanuatu 03 Other Melanesian ...
A6a. Specify Other(s) ethnicity == 9	TEXT other_ethnicity
A6b. Please specify other ethnicity beside Part Ni-Vanuatu. ethnicity==2	TEXT Other_beside_nivan
A7. What is XYZ's Citizenship?	SINGLE-SELECT citizenship 01 Vanuatu by birth 02 Vanuatu by naturalisation 03 Other Country

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
A7a. Please specify other citizenship.	SINGLE-SELECT: COMBO BOX other_citizenship 700001 Fiji 700002 American Samoa 700003 Western Samoa 700004 Solomon Islands ...
A7b. Please state other citizenship. other_citizenship.	TEXT specify_citizenship
A8. Does XYZ have another citizenship?	SINGLE-SELECT two_citizenship 01 Yes 02 No
A8a. Please select the names of countries.	MULTI-SELECT other_2_citizenship 700001 Fiji 700002 American Samoa...
A9. Does XYZ have a VANUATU NATIONAL ID CARD ? -	SINGLE-SELECT national_id 01 Yes (ID Card Present) 02 Yes (ID Card not Present) 03 No (includes lost or damaged national id card) 04 No (never registered or don't know)
A9a. Please state the Identification Number on the card.	NUMERIC: INTEGER id_number
A10. Does XYZ have a birth certificate?	SINGLE-SELECT birth_certificate 01 Yes (Birth Certificate present) 02 Yes (Birth Certificate not Present) 03 No (includes lost or damaged birth certificate) 04 No (never registered or don't know)
A10a. Please state the Reference Number on the birth certificate.	NUMERIC: INTEGER birth_cert_number
A11. What was XYZ's place of birth? If born in hospital, give the usual residence of mother at time of birth	SINGLE-SELECT place_of_birth 01 Same place 02 Different place in Vanuatu 03 Overseas
A11a. Please select other Island in Vanuatu	SINGLE-SELECT: COMBO BOX other_island 101 hiu 102 metoma...
A11b. Give the usual place of residence of mother at time of birth.	TEXT mother_usual_residence
A12. What is XYZ's religion?	SINGLE-SELECT religion 01 Anglican 02 Presbyterian 03 Catholic 04 SDA ...
A12a. Please state other religion Respondent state only 1 religion	TEXT other_religion
A13. Does XYZ have a valid VANUATU ELECTORAL CARD ?	SINGLE-SELECT electoral_card 01 Yes 02 No (includes expired or lost/damaged electoral cards) 03 No (Never register / Don't know)

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
A14. During last week (9 November to 15 November 2020), did XYZ consume any of the following: age>+12	MULTI-SELECT: YES/NO consumption 01 / Tobacco/Cigarette 02 / Alcohol 03 / Kava 04 / Betel Nut
2. PERSON ROSTER: ALL INDIVIDUAL PERSONS 13 / 83	
A15. Does XYZ have access to treated bednets? Distributed by Department of Health	SINGLE-SELECT treated_bednets 01 Yes 02 No
A15a. Did XYZ slept under a treated bednet on the night of 16th November 2020? treated_bednets==1	SINGLE-SELECT slept_under_bednets 01 Yes 02 No 99 Don't know
2. PERSON ROSTER: ALL INDIVIDUAL PERSONS / MEMBER: XYZ	
B1. What is XYZ's USUAL place of residence?	SINGLE-SELECT residence 01 Same as present 02 Other place in Vanuatu 03 Other country
B1a. Please state other place in Vanuatu	SINGLE-SELECT: COMBO BOX other_residence 101001 Dineumevuneu 101002 Kwururetokwa 101003 Lateu ... 101004 Likwal
B2. How long has XYZ been living in USUAL place of residence?	SINGLE-SELECT residence_period 01 Since birth 02 Less than 1 year 03 1 or more years
B3. What is XYZ's home island?	SINGLE-SELECT: COMBO BOX home_island 101 hiu 102 metoma...
B4. Where was XYZ's USUAL place of residence 5 years ago (November 16, 2015)? age>=5	SINGLE-SELECT: COMBO BOX residence_tcpam 000099 Same Place 101001 Dineumevuneu ...
B5. Where was XYZ living one year ago (16 November, 2019)? age>=1	SINGLE-SELECT residence_year_ago 01 Same place as now 02 Other place in Vanuatu 03 Overseas
2. PERSON ROSTER: ALL INDIVIDUAL PERSONS	
B5a. Please state other place in Vanuatu	SINGLE-SELECT: COMBO BOX other_place 101001 Dineumevuneu 101002 Kwururetokwa 101003 Lateu ... 101004 Likwal
C1a. Does XYZ have any difficulty ...Seeing, even if wearing glasses?	SINGLE-SELECT seeing 01 No, no difficulty 02 Yes, some difficulty ⁰³ Yes, lots of difficulty ⁰⁴ Cannot do at all

SECTION/QUESTION	RESPONSE CATEGORY
	Basic information
C1a1. What was the main cause of difficulty? seeing.	SINGLE-SELECT cause_of_diff_seeing 01 Congenital 02 Acquired 03 Related to old age
C1b. Does XYZ have any difficulty ... Hearing, even if wearing a hearing aid?	SINGLE-SELECT hearing 01 No, no difficulty 02 Yes, some difficulty ⁰³ Yes, lots of difficulty ⁰⁴ Cannot do at all
C1b1. What was the main cause of difficulty? hearing.InList(3,4)	SINGLE-SELECT cause_of_diff_hearing 01 Congenital 02 Acquired 03 Related to old age
C1c. Does XYZ have any difficulty ... Walking, lifting or bending, climbing steps?	SINGLE-SELECT walking 01 No, no difficulty 02 Yes, some difficulty ⁰³ Yes, lots of difficulty ⁰⁴ Cannot do at all
C1c1. What was the main cause of difficulty? Walking	SINGLE-SELECT cause_of_diff_walking 01 Congenital 02 Acquired 03 Related to old age
C1d. Does XYZ have any difficulty ... Learning, concentrating or remembering?	SINGLE-SELECT remembering 01 No, no difficulty 02 Yes, some difficulty ⁰³ Yes, lots of difficulty ⁰⁴ Cannot do at all
C1d1. What was the main cause of difficulty? remembering.InList(3,4)	SINGLE-SELECT cause_of_diff_learning 01 Congenital 02 Acquired 03 Related to old age

I15a. Specify Electricity MAIN grid Provider	SINGLE-SELECT 01 Unelco 02 VUI 03 Government mainGridPro
I16. What is the MAIN source of electricity for this household?	SINGLE-SELECT 01 Main Grid – UNELCO/VUI/Government 02 Own small generator (<1000Watt) 03 Own medium generator (>1000Watt) ... src_of_electricity
I17. What is the average cost of electricity per month?	SINGLE-SELECT 01 0vt 02 Less than 1000vt ... aver_cost_electricity

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
I18. Does this household use LPG/gas?	SINGLE-SELECT ownership_lpg 01 Yes 02 No
I18a. What was your last expenditure in vatu (VT) on LPG/gas ?	NUMERIC: INTEGER lpg_gas_cost
J1. How many plots of land are used for AGRICULTURAL purposes?	NUMERIC: INTEGER parcel_land
J2. Did any member of this household grow crops of any kind on their OWN ACCOUNT for household consumption, sale or exchange during the LAST 12 MONTHS?	SINGLE-SELECT crops 01 Yes, home consumption only 02 Yes, mainly for home consumption but some sale 03 Yes, mainly for sale but some home consumption 04 Yes, for sale only 05 No
3. HOUSEHOLD 40 / 83	
J2a. Did any member of this household grow any of the following crops on their OWN ACCOUNT during the LAST 12 MONTHS?	MULTI-SELECT crops_own_account 01 Kava 02 Coconut 03 Cocoa 04 Coffee 05 Sandalwood ...
J2b. Which of the following crops did the household grow MAINLY for sale?	MULTI-SELECT crops_sale 01 Kava 02 Coconut 03 Cocoa 04 Coffee 05 Sandalwood ...
J2b. Which of the other crops did the household grow MAINLY for sale?	MULTI-SELECT: LINKED other_crops_sale
J3. Is any member of this household CURRENTLY raising any kind of livestock on their OWN ACCOUNT for household consumption, sale or exchange?	SINGLE-SELECT livestock 01 Yes, home consumption only 02 Yes, mainly for home consumption but some sale 03 Yes, mainly for sale but some home consumption 04 Yes, for sale only 05 No
J4. Is any member of this household CURRENTLY raising the following livestock on their OWN ACCOUNT?	MULTI-SELECT: YES/NO raising_lvstk 01 / Cattle 02 / Pigs 03 / Goats ...
J4a. How many XYZ is this household CURRENTLY raising?	NUMERIC: INTEGER num_livestock
J5. Did any member of this household go fishing on their OWN ACCOUNT during the LAST 12 MONTHS?	SINGLE-SELECT fishing_own_cons 01 Yes, for home consumption only 02 Yes, mainly for home consumption but some sale 03 Yes, mainly for sale but some home consumption 04 Yes, for sale or exchange only 05 No

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
J6. Was this household engaged in farming fish (aquaculture) on their OWN ACCOUNT during the LAST 12 MONTHS? Referring to since 16th November 2019	SINGLE-SELECT <small>freshwater_aquaculture</small> 01 Yes, for home consumption only 02 Yes, mainly for home consumption but some sale 03 Yes, mainly for sale but some home consumption 04 Yes, for sale only 05 No
J7. Does this household have any land used for forestry?	SINGLE-SELECT <small>land_use_forestry</small> 01 Yes 02 No
J8. Does anyone in this household manufacture handicrafts for sale or household use?	SINGLE-SELECT <small>handicrafts</small> 01 Yes, for household use only 02 Yes, for sale only 03 Yes, some for sale and some for household use 04 No
K1. Any member of the household have knowledge on the PROCESS of death notification?	SINGLE-SELECT <small>death_process_notification</small> 01 Yes 02 No
K2. Has any resident of this household died during the LAST 12 MONTHS?	SINGLE-SELECT <small>residents_died_last_12_months</small> 01 Yes 02 No 99 Don't know
K2b. List the members of the household who died in the LAST 12 MONTHS?	LIST <small>died_lst_12_months</small>
K3. What is the Sex of XYZ?	SINGLE-SELECT <small>died_member_sex</small> 01 Male 02 Female
K4. What was the age of XYZ when XYZ died?	NUMERIC: INTEGER <small>died_member_age</small>
K5. What was XYZ date of death (DoD)?	TEXT <small>dod_death</small>
K6. Was XYZ s' death pregnancy related? died_member_sex==2	SINGLE-SELECT <small>females_died_preganant</small> 01 Yes 02 No 99 Don't know
3. HOUSEHOLD / HOUSEHOLD ASSETS	01 Car 02 Van (Bus) 03 Truck ...
Roster: MEANS OF TRANSPORT	SINGLE-SELECT <small>trnsprt_working</small> 01 Yes 02 No
L1a. How many XYZ?	NUMERIC: INTEGER <small>num_means_trnsprt</small>
L1b. How much does this household spend on fuel for this XYZ in the last month/in a typical month for these means of transportation?	NUMERIC: INTEGER <small>cost_transport_fuel</small> SPECIAL VALUES 999 Don't Know
L2. Does this household have ..XYZ.. in WORKING CONDITION?	SINGLE-SELECT <small>appliances</small> 01 Yes 02 No
L3. Does this household have..XYZ.. in WORKING CONDITION??	SINGLE-SELECT <small>means_communication</small> 01 Yes 02 No

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
L3a. How many XYZ?	NUMERIC: INTEGER num_communication
L4. Does this household have insecticide treated bednets? This insecticide treated bednets are from Health NOT from shops	SINGLE-SELECT insecticide_treated_bednets 01 Yes 02 No
L4a. How many insecticide treated bednets?	NUMERIC: INTEGER number_bednets
M1. Did this household receive any cash income from the following sources during the PAST 12 MONTHS?	MULTI-SELECT: YES/NO source_cash_income 01 / Wages and salary 02 / Income from leasing land 03 / House rent ...
M2. Which of these sources of income was the MAIN source in the PAST 12 MONTHS ?	SINGLE-SELECT main_source_income 01 Wages and salary 02 Income from leasing land 03 House rent ...
M3. In the past 12 months has this household received goods in kind from overseas or elsewhere in Vanuatu?	SINGLE-SELECT goods_in_kind 01 Yes, from overseas 02 Yes, from elsewhere in Vanuatu 03 No
4. INSTITUTION / MOBILE HOUSEHOLDS	
I1. What is the name of this institution?	TEXT institution_name
I1a. What type of institution is this?	SINGLE-SELECT inst_type 01 Boarding School 02 Health facility 03 Hostel ...
I2. What are the names of all people staying in/at %institution_name%?	LIST int_members1
I3. What is XYZ's age (in completed years)?	NUMERIC: INTEGER SPECIAL VALUES institution_age1 000 Child under 1 year of age 999 Unknown / not stated
I4. What is XYZ's sex?	SINGLE-SELECT institution_sex1 01 Male 02 Female
I2. What are the names of all people staying in/at %institution_name% (cont)?	LIST institution_members3
4. INSTITUTION / MOBILE HOUSEHOLDS Roster: PERSON - INSTITUTION (CONT)	
I5a. Enter the number of MALE in this facility.	NUMERIC: INTEGER tourist_male
I5b. Enter the number of FEMALE in this facility.	NUMERIC: INTEGER tourist_female
I6. Record time before leaving this section.	DATE: CURRENT TIME inst_end_time
G1. Select the MAIN respondent who provided you answers to this questionnaire	SINGLE-SELECT: LINKED G1_Respondent
G2. What is the PRIMARY phone number used to contact this household or institution?	NUMERIC: INTEGER prim_phone_num
G2a. Is there another phone number used to contact in this household or institution?	SINGLE-SELECT another_phn_avail 01 Yes 02 No
G2b. What is the SECOND PRIMARY phone number used to contact this household or institution?	NUMERIC: INTEGER sec_phonenumber

SECTION/QUESTION	RESPONSE CATEGORY
Basic information	
G3a. What is the sticker prefix? (Three letters at the beginning of the sticker number)	SINGLE-SELECT g3a_sticker_prefix ⁰¹ TOR ⁰² SAN ⁰³ PEN ⁰⁴ MAL ⁰⁵ SHE ⁰⁶ TAF
G3b. What is the sticker number which comes after %g3a_sticker_prefix%?	NUMERIC: INTEGER g3b_sticker_number
G4. Please record the location of this household or institution. any go into settings and set GPS to less than 20m	GPS g4_dwelling_gps
