SACRAMENTO— California's population exceeded 36.8 million persons as of January 1, 2005, according to new city population estimates released today by the state Department of Finance.

Californians now represent 12.5 percent of the United States population – one out of every eight persons – according to the report. The state added 539,000 residents in 2004 – a 1.5-percent growth rate – continuing the pattern since 2001 of a slowing rate of growth.

The report contains preliminary population data for January 2005, and revised data for January 2004, for the state, cities, and counties. Highlights include:

California Cities:

- The 2005 report lists 478 California cities, of which 404 gained population, 3 experienced no change, and the remaining 71 lost population.
- The newly incorporated city of Rancho Cordova in Sacramento County appears in the report for the first time, with an estimated population of 55,145.
- The small city of Colma in San Mateo County had the highest growth rate of any city in California last year, increasing by 21.0%. Colma added 81 new housing units during the year and now has a total population of 1,567.
- Lincoln in Placer County and Beaumont in Riverside County had the second and third-fastest growth rates of 16.8 and 14.1 percent respectively. Lincoln gained 1,966 housing units and had a population of 27,356, while Beaumont gained 916 new housing units during the year and now has a population of 18,982.
- Yuba City in Sutter County posted the 4th fastest growth rate at 13.5% by adding 975 new units and by annexing 1,616 existing housing units.
- California's three largest cities—Los Angeles (3,957,875), San Diego (1,305,736), and San Jose (944,857)—had the largest numeric increases, respectively, of 44,092, 14,035, and 13,625.
- The cities of Bakersfield in Kern County (13,222), Elk Grove in Sacramento County (11,626), Chula Vista in San Diego County (9,033), Irvine in Orange County (8,816) and Sacramento in Sacramento County (8,564) each had significant numeric population increases as well.
- Other fast-growing cities that grew because of a substantial addition from new housing construction include Patterson and Hughson in Stanislaus County (13.4 and 12.9 percent respectively), Williams in Colusa County (12.1 percent), and Victorville in San Bernardino County (10.7 percent).
- Huntington Beach in Orange County passed 200,000 in population to reach 200,763, giving California 18 cities with populations exceeding 200,000.

- Roseville in Placer County (102,191) passed 100,000 in population to give California 63 communities with populations that exceed 100,000.
- Of the 50 fastest growing cities since the April 1, 2000 census, Riverside County had 10 cities and San Bernardino County had 6 cities in this group. The top 6 fastest growing cities from the census to 1/1/2005 were Lincoln in Placer County (144.1 percent), Murrieta in Riverside County (92.2 percent), Twentynine Palms in San Bernardino County (85.2 percent), Brentwood in Contra Costa County (75.6 percent), Elk Grove in Sacramento County (68.5 percent), and Beaumont in Riverside County (66.7 percent).

California Counties:

- The state grew by 1.5 percent. Twenty-one counties grew more rapidly, thirty-five grew more slowly, and two counties (Alpine and Sierra) experienced minor population decreases.
- The ranking of the state's ten most populated counties was the same as last year: Los Angeles, Orange, San Diego, San Bernardino, Riverside, Santa Clara, Alameda, Sacramento, Contra Costa, and Fresno. All but Fresno have over one million residents, Orange and San Diego each has over 3 million, and Los Angeles County is home to over 10 million people. These 10 counties account for over 72 percent of California's population.
- Almost half of the state's population resides in four counties: Los Angeles, Orange, San Diego, and San Bernardino. Orange remains the state's second most populous county for the second year, after surpassing San Diego in January 2004.
- Los Angeles County continues to be the most populous in the nation, with 10,226,500 people counted as of January 1 of 2005. Los Angeles County makes up nearly 28 percent of the State's population.
- Most of the ten counties attracting the largest number of new residents in 2004 were also among the top ten in total population. Bay Area counties, Alameda and Contra Costa, ranked 7th and 9th respectively in total population were not among the state's fastest growers. Central Valley counties, Kern and San Joaquin, placed in the top ten categories for both the number of people gained and the percent growth in population.
- Riverside, Placer, Imperial, and Madera counties each grew by 3 percent or more during 2004. The rates of growth in Riverside and Placer are declining from the levels in excess of 4 percent that were seen between January 2001 and 2004. Other counties with high growth rates (between 2.6 and 2.9 percent) are concentrated in the central region of the state: Tuolumne, Kern, Colusa, Sutter, San Joaquin, and Merced.
- Riverside County alone ranked in the top ten on all three measures—size, numerical change and percent change—for a fourth year.

Changes to the housing stock are used to prepare the annual city population estimates presented in this report. Estimated occupancy of housing units and the number of persons per household further determine population levels. Changes in city housing stocks result from new construction, demolitions, housing unit conversions, and annexations.

A variety of summary administrative records is used to produce the state and county population estimates. Birth and death counts, driver's license address changes, total housing units, school enrollment, federal income tax returns, legal immigration data, Medicare, Medi-Cal, and other data are provided by the responsible federal or state agency. Data are reported in summarized data tables that do not disclose any information about individuals.

Related population estimates reports are available on the Department's website: <http://www.dof.ca.gov/> under Demographic Information.
