HOW TO USE THIS GUIDE

Welcome to the latest South Australian National Parks guide.

Inside you'll find more than 80 inspiring nature getaways across South Australia, from well-known icons to some of our best kept secrets.

To help you find your way around the state we have divided this guide into eight colour-coded regions. A map introducing each region is at the start of each chapter, along with a list of 'must see and do' highlights.

The recreational facilities and activities in each park are summarised at the back of this guide on pages 62-63.

For further information contact:
Department for Environment
and Heritage Information Line
Telephone: (08) 8204 1910
Email: dehinformation@saugov.sa.gov.au
Website: www.parks.sa.gov.au

Let us know your thoughts. If you have feedback that would help us improve the parks guide please pass it on to the DEH Information Line.

EXPERIENCE NATURE AT ITS FINEST

South Australia boasts an extensive and comprehensive park system, with over 300 reserves encompassing more than 20% of the state.

Our parks showcase the state's natural and cultural heritage – some of the best South Australia has to offer. Here you can experience ancient landscapes and fossils, Aboriginal art and engravings, historic European sites, rugged coastlines and mountain ranges, pristine wilderness, and unique plants and animals.

Our parks provide a wide range of facilities and services. Whether you want to enjoy recreational health benefits, find out more about the environment or simply get away from it all and reconnect with nature, our parks have something for everyone.

I commend South Australia's parks to you and invite you to experience first-hand the wonderful opportunities they offer.

Greg Leaman

Director of National Parks and Wildlife
July 2008

Holiday Programs are fun and interactive ways to expand your knowledge about the environment. In the **Flinders Ranges**, the autumn and spring events program covers various activities such as guided tours of Old Wilpena Station, outback movie nights, dreaming stories told by the Adnyamathanha people and stargazing tours. **Cleland Wildlife Park** also presents fun activities for children of all ages in the school holidays. For details of upcoming events contact the DEH Information Line on **(08) 8204 1910**.

CARING FOR NATURE

South Australia's parks conserve an incredible diversity of living landscapes. Covering more than one fifth of the state, our parks are sanctuaries for native wildlife and protect many cultural heritage sites. South Australia's parks also provide fantastic settings to enjoy recreational activities and boast some of the state's most breathtaking scenery. From the wild coastal vistas of the Coorong to the awe-inspiring Flinders Ranges, the gentle waterways of the River Murray to the red desert sands of the outback – South Australia's parks are sure to amaze, surprise, refresh and inspire you.

The Department for Environment and Heritage (DEH) is responsible for managing South Australia's world-class system of parks. Many parks conserve threatened plants and animals and are culturally significant to the traditional Aboriginal custodians connected with the area.

Please help park rangers care for the environment by treading lightly and respecting local culture so that our parks continue to be special places for future generations to enjoy.

Cycling the Mawson Trail, Flinders Ranges

USEFUL INFORMATION

Park categories

South Australia has eight categories of parks.

National Parks (NP)

Areas considered to be of national significance due to wildlife, natural features of the land, or Aboriginal or European heritage.

Conservation Parks (CP)

Areas protected for the purpose of conserving wildlife or the natural or historic features of the land.

Game Reserves (GR)

Areas set aside for conservation of wildlife and the management of game for seasonal hunting.

Recreation Parks (RP)

Areas managed for public recreation and enjoyment in a natural setting.

Regional Reserves (RR)

Areas proclaimed for the purpose of conserving wildlife or natural or historical features while allowing responsible use of the area's natural resources.

Wilderness Protection Areas (WPA)

Land set aside under the *Wilderness Protection Act 1992* to protect natural and remote areas.

Conservation Reserves (CR)

Land set aside for conservation of natural and cultural features under the *Crown Lands Act 1929*.

Marine Parks (MP)

Areas set aside to preserve the biological diversity of the state's coastal, estuarine and marine environments while allowing ecologically sustainable use of the area's natural resources.

Know before you go

Park entry and camping fees

Many of South Australia's smaller regional parks are free to enter. Entry fees do however apply in approximately ten per cent of the state's parks and reserves. This fee is payable once, when you first enter the park and covers the duration of your stay inside the park.

South Australian parks have designated camping sites set aside for visitors to relax and enjoy the great outdoors. In most South Australian parks bookings are not required, with sites available on a first-come, first-served basis. Camping fees are charged per person per night and apply where you see this symbol  throughout the brochure.

Self-registration stations

Vehicle entry fees and camping permits can be paid at self-registration stations, often found near the entrance to a park. You can also pay at park visitor centres during business hours, and park offices when staff are on-site. If self-registering it's a good idea to keep a supply of loose change handy. Always remember to clearly display your permit on the dashboard of your vehicle to avoid a fine.

Funds raised

Revenue from park entry and camping fees makes an important contribution to conservation, park management and improving visitor services and facilities for everyone to enjoy.

Opening hours

Nearly all South Australian parks are open 24 hours a day, seven days a week. To help protect native wildlife, some parks are open from sunrise to sunset. Both Belair National Park and Morialta Conservation Park in the Adelaide Hills have set opening hours. Refer to individual park listings or call the park of your choice if you require more information.

NATIONAL PARKS PASSES

SAVE TIME & MONEY

If you enjoy the natural wonders of South Australia's parks then you'll appreciate the exceptional value and convenience of a National Parks Pass.

If you are a regular visitor to parks, not only will you save money with a parks pass, but you'll also save time, because you don't have to stop and pay an entry fee each time you visit.

With prices starting from \$30, travellers will recoup the cost of a holiday pass by visiting just four parks on their South Australian journey and annual pass holders can enjoy similar savings.

Every parks pass has something special to offer, whether it is unlimited vehicle entry, unlimited camping opportunities or a guided tour. Simply choose the pass that suits your needs.

Select A Pass That's Right For You:

Type of pass	Valid for: (months)	A good choice for...
Holiday Pass	2	Touring the state on a short visit
Single Park Pass	12	Repeat visits to your favourite park
Multi Park Pass	12	Exploring a variety of South Australia's parks throughout the year
Desert Parks Pass	12	A journey through the desert
Kangaroo Island Tour Pass	12	Enjoying the highlights of Kangaroo Island

CAMP OUT IN SOUTH AUSTRALIA'S NATIONAL PARKS

South Australia is a great place to go camping

South Australia's national parks offer some of the best locations for a great camping holiday.

Our parks are host to remarkable wildlife and offer some of the most ancient and unique landscapes in the country. You can savour the peace and tranquillity of valleys, rivers, rugged ranges, coastlines and vast arid landscapes, and enjoy an amazing sense of space and freedom like no other.

Camping lets you get away from it all and absorb the silence and stillness of the surrounding bush.

See ancient Aboriginal sites or go swimming in the River Murray. Awake to fresh mornings and the delightful pandemonium of birdlife around you. Listen to the sounds of waves on the beach or admire the sweeping colours of a sunset. Swap stories around a crackling campfire, or fall asleep beneath a blanket of stars.

South Australia's national parks offer a range of camping experiences and facilities. Some parks offer secluded wilderness settings with limited facilities, while others provide camping comforts such as showers, toilets, gas barbecues and picnic tables, and have facilities for power.

Call the Department for Environment and Heritage Information Line on **(08) 8204 1910** for further information, or research all your options online at www.parks.sa.gov.au

Camping at Booky Cliffs Campground, Murray River National Park

GO BUSH-WALKING

TRAILS SA

See your world in a different way

Revitalise your spirit and sense of adventure in some of the best scenery in the state.

Bushwalking is one of the easiest ways you can enjoy the environment, get fit and healthy and feel re-energised once more.

With hundreds of trails catering to all levels of fitness, it's little wonder bushwalking is such a popular activity in parks. To get you started we've listed some of South Australia's most well-known trails with more bushwalking highlights listed throughout the guide.

Yurrebilla Trail

You can't go past the Yurrebilla Trail for an all-round bushwalking experience. Passing through the leafy Adelaide Hills, this trail not only boasts stunning views across the hills and city landmarks, but also offers opportunities to enjoy cafes, wineries, and art and craft shops dotted along the way.

This 54 km trail can be enjoyed in half-day sections, or a three-day hike. Purchase the *Yurrebilla Trail: A Hiker's Guide*, or pick up a free *Yurrebilla Trail Product and Services Guide* to find out more. Bed and breakfast and cosy pub-style accommodation is available en route.

Yurrebilla Trail: A Hiker's Guide
\$9.95 rrp each

Bushwalking the Heysen Trail, Newland Head Conservation Park

Heysen Trail

The Heysen Trail is arguably South Australia's most famous walking trail. The trail extends 1200 km from Cape Jervis on the south coast of the Fleurieu Peninsula, to Parachilna Gorge in the spectacular Flinders Ranges. The beauty of the trail is that you can join at any point along its journey and enjoy its exclusive views. The trail traverses diverse landscapes varying from white sandy beaches and dramatic cliffs along the south coast, to rolling valleys and orchards in the Mount Lofty Ranges, the famous vineyards of the Barossa Valley, to ancient mountain peaks and gorges of the Flinders Ranges.

The Heysen Trail can be enjoyed as a series of short walks, overnight hikes, or a full 60-day hiking adventure.

If you've never hiked the Heysen Trail before, some of the most popular sections include:

- South Coast: Deep Creek Conservation Park (4 km)
- Mount Lofty Ranges: Mylor to Mount Lofty (18 km)
- Barossa Valley: Mount Crawford to Tanunda (38 km)
- Flinders Ranges: Wilpena Pound to Parachilna Gorge (57 km)

Accommodation along the trail varies from camping in designated areas to cosy bed and breakfasts, farmstays, historic pubs, youth hostels and basic pioneer huts.

To help you plan your next visit you can download bushwalking maps and trail notes for most parks directly from our website www.parks.sa.gov.au

SOUTH AUSTRALIA'S TOP TRAILS

South Australia's extensive network of marked trails provides a myriad of opportunities to get active outdoors.

Cycling Trails

The epic Mawson Trail (close to 900 km long) is ideal for mountain bike riders wanting to experience South Australia's regional and remote rural areas. Located between Mount Lofty and Flinders Ranges, the trail takes in little-used country roads, state forests, approved national park fire trails and farm access tracks, offering plenty of challenge and reward for pedal-power enthusiasts.

For a more leisurely pace, cycle through the wonderful wine region of the Clare Valley along the Riesling Trail.

Mawson Trail Maps \$8.50 rrp each
Riesling Trail Guides

Canoe Trails

The backwaters and creeks of the River Murray provide some of Australia's best canoeing. Canoe Trails offer novice and experienced paddlers opportunities to explore quiet waterways, see birdlife and enjoy the serenity and slow-moving pace of life along the river.

Diving Trails

With countless submerged shipwrecks off South Australia's coastline, diving trails offer a great way to explore South Australia's amazing underwater marine life and cultural heritage. The Investigator Strait Maritime Heritage Trail on the Yorke Peninsula is just one of the state's fascinating shipwreck trails marked by underwater plaques.

South Australian Visitor Centre & Travel Centre
Phone 1300 655 276
www.southaustraliantrails.com

WALK SAFELY

Be prepared when bushwalking:

- Wear sturdy shoes, hat and sunscreen.
- Carry sufficient food and drinking water. Allow four litres of water per person per day. Do not rely on tanks or creeks in parks for drinking water.
- Keep to the defined walking trail.
- Inform a responsible person of your proposed route and expected time of return.
- Weather conditions can change quickly. Ensure you have appropriate wet-weather clothing.

Look after your environment

- Take all of your rubbish home with you.
- Leave gates as you find them.
- Move quietly near stock and wildlife.
- Observe fire bans.
- Respect the privacy of others, including farmers and landowners.
- Help keep water sources pure.
- Do not disturb native flowers or other vegetation.
- Stay on the marked trail.
- Use boot cleaning stations where provided – help minimise the spread of *Phytophthora* (root-rot fungus), a soil and waterborne fungus that causes disease and death to native plant species, exotic fruits and vegetables.

What is the difference between a walk, hike and trek?

The Department for Environment and Heritage has developed a Walk, Hike and Trek classification system to inform park visitors of the level of difficulty of trails throughout South Australia.

A **Walk** is accessible to people of all ages and fitness levels. They are well defined trails, generally less than three kilometres in length, with even surfaces.

A **Moderate Hike** is suitable for bushwalkers with an average level of fitness. These trails can be any length and may include moderate inclines and irregular surfaces.

A **Hard Hike** requires some hiking experience and a reasonable fitness level, as some sections of the trail can be quite steep and uneven.

A **Trek** is generally physically demanding, therefore users should be experienced bushwalkers with good navigational skills. Treks often require several days to complete, and pass through remote areas where the trail is unmarked. Prior to commencing a Trek, bushwalkers must discuss their route with a ranger and fill in a *Trip Intentions* form.

HEALTHY PARKS HEALTHY PEOPLE

ENHANCING
YOUR WELLBEING.
NATURALLY.

Did you know that every time you visit a park you're improving your health and wellbeing?

In today's fast paced world, spending time in nature is an important part of restoring a balance in our busy lives. Research has shown that enjoying the natural environment not only encourages physical activity, but it can also have a calming effect – reducing our stress levels, inspiring feelings of inner-peace, that can make us feel more refreshed and alive.

Parks offer exceptional opportunities for sightseeing, recreation, quiet reflection and enjoying quality time with others. They also offer an easy and inexpensive way to improve our health. So why not swap the treadmill, computer, couch or TV to enjoy the benefits of our parks and the great outdoors?

Here are a few ideas to get you started...

- Connect** Enjoy a family cycle day along the trails at Belair.
- Escape** Stroll, wheel, or push a pram to Morialta's waterfalls.
- Refresh** Be inspired by magnificent mountains in the breathtaking Flinders.
- Explore** Discover evidence of an ice age along Hallett Cove's Glacier Trail.
- Energise** Hike one of the most stunning sections of the Heysen Trail at Deep Creek.

What's it all about?

Healthy Parks, Healthy People is an initiative of the Department for Environment and Heritage that encourages people to enjoy nature by promoting the mental, social and health benefits that parks provide.

To find out more, visit www.parks.sa.gov.au for upcoming events and ideas on healthy activities in South Australia's amazing network of national parks.

ADELAIDE ADELAIDE & HILLS

Uncover the many secrets of Adelaide's national parks, from cascading waterfalls and amazing wildlife to stunning coastal views

You needn't travel far to enjoy some of Adelaide's best national parks, in fact a trip to the suburbs will do! An easy 20 minutes drive south-east of Adelaide lies the beautiful Adelaide Hills, where leafy green landscapes of eucalypt woodlands, plunging waterfalls and peaceful gorges offer wonderful opportunities to escape the city limits and get back to nature. Experience the award-winning Cleland Wildlife Park, the magnificent Mount Lofty Summit and Belair, the second oldest national park in Australia. The hills are a haven for koalas, echidnas and colourful rosellas and offer heritage-listed treasures such as Old Government House.

Holding a koala and getting up-close and personal with South Australia's native animals at **Cleland Wildlife Park**.

Surveying spectacular views of Adelaide's city skyline and coast from **Mount Lofty Summit**.

Enjoying a picnic, bike ride, or stroll around the lake at **Belair National Park**.

Blocking your ears for the firing of the cannon on open days at **Fort Glanville**.

Discovering geological evidence of an epic ice age at **Hallett Cove Conservation Park**.

Scaling one of Adelaide's best rock climbing sites at **Morialta Conservation Park**.

National Parks.

Phytophthora (fy TOFF-thora) species are soil and waterborne fungi that impact on a wide variety of native plant species, exotic fruits and vegetables. Bushwalkers can spread the disease by moist soil and plant material sticking to footwear.

The spread can be minimised by:

- contacting local DEH parks office for information on suitable bushwalking areas
- parking cars in designated car parks only
- keeping to designated roads and walking trails at all times and obeying 'trail closed' signs
- avoiding bushwalking when the soil is wet or muddy
- starting and finishing bushwalks with clean footwear
- removing soil from footwear before leaving an area (boots or shoes should not be taken home to clean)
- using boot cleaning facilities where provided.

PHYTOPHTHORA

Roam free amongst wildlife at Cleland Wildlife Park

Belair National Park 840 ha

Located just 25 minutes drive from Adelaide, Belair has long been a favourite location to relax and enjoy nature. Proclaimed in 1891, Belair is South Australia's oldest National Park – second only in Australia to Sydney's Royal National Park, established a few years prior. Belair's open woodlands, excellent recreational facilities and network of shared walking, cycling and horse riding trails make the park an ideal spot to get active outdoors. Enjoy a leisurely stroll around the lake; share a picnic or barbecue with family and friends; let the kids run wild on the adventure playground; or admire the colonial heritage-listed building of Old Government House. You can even take the dog for a walk (lead required). Sporting facilities include ovals and tennis courts in bushland surrounds, (bookings required). Belair is open 8 am until sunset daily. The visitor centre is open 8.30 am to 4.30 pm Monday – Friday, and 9 am to 4.30 pm weekends and public holidays, except Christmas Day when the park is closed. Walkers can access the park from sunset to sunrise.

Location & Getting There

13 km SE Adelaide. Vehicle access via Upper Sturt Rd, Belair. Walking distance from Belair train station – call Adelaide Metro Infoline (08) 8210 1000.

Contact (08) 8278 5477

Accommodation See page 57

Black Hill Conservation Park 684 ha

Adjoining Adelaide's north-eastern plains, this park has a fine network of walking trails that link to Morialta Conservation Park and offer outstanding views across Adelaide to Gulf St Vincent and beyond. Vegetation varies from giant River Red Gums in the cool valleys to low heath and sheoaks along the ridges and hilltops. During summer the foliage of the sheoaks changes to almost black, giving Black Hill its name. Please note that the toilets are open on weekdays only.

Location & Getting There

10 km NE Adelaide. Access via Addison Ave, Montacute Rd and Maryvale Rd, Athelstone.

Contact (08) 8336 0901

Cleland Wildlife Park in Cleland Conservation Park 35 ha

Cleland Wildlife Park is an award-winning, open-range wildlife sanctuary nestled amid natural bushland in the Adelaide Hills. At Cleland visitors can get up-close and personal with more than 130 species of native wildlife. You can hold a Koala, handfeed kangaroos, emus and waterbirds, and see animal feeding sessions from 12.30 pm to 3.15 pm daily. In the Ocean to Outback interpretive centre reptiles and rare mammal species from four South Australian environments can be seen. For an additional fee you can discover Cleland's nightlife by torchlight on a guided nocturnal tour when mammals such as bandicoots, bettongs and potoroos are at their most active (pre-booking required). Cleland also offers a licensed café and a year-round events program for visitors and schools.

Location & Getting There

22 km SE Adelaide. Access via Summit Rd, Crafers, en route to Mount Lofty Summit. Public transport by bus – call Adelaide Metro Infoline (08) 8210 1000.

Contact (08) 8339 2444

DID YOU KNOW?

A daily bus service runs between Adelaide city centre and Cleland Wildlife Park? Spend the day mingling with some of South Australia's most adorable native animals!

Call Adelaide Metro Infoline on **(08) 8210 1000** for the latest bus timetable information or visit www.transadelaide.com.au

Military drill demonstrations, Fort Glanville Conservation Park Open Days

Fort Glanville Conservation Park 5 ha

Built in 1880, Fort Glanville is the most complete example of nineteenth century coastal artillery built in Australia and represents a significant period in the state's colonial history. On the third Sunday afternoon of each month, between September and May, you are invited to witness the spectacle of a full historical re-enactment by Fort Glanville Association members as they recreate the past with military drill demonstrations, including cannon firing, in full military costume. Fort Glanville is located near the cosmopolitan coastal suburb of Semaphore.

Location & Getting There

12 km NW Adelaide. Access via 359 Military Rd, Semaphore. Public transport by bus – call Adelaide Metro Infoline (08) 8210 1000.

Contact (08) 8336 0901

Hallett Cove Conservation Park 50 ha

Hallett Cove is one of the country's most outstanding geological sites, recording evidence of an Australian ice age some 280 million years ago. See glacial pavements along the northern cliff tops, recognised for their international significance as the best record of Permian glaciation in Australia. Discover the park's fascinating geological history along the Black Cliffs interpretive walking trail which hugs the coast, and learn how the Sugarloaf was formed. Hallett Cove is also a significant cultural site with more than 1700 Aboriginal artefacts recorded here.

Location & Getting There

22 km S Adelaide. Access via Heron Way or Dutchman Drive, Hallett Cove. Walking distance from Hallett Cove train station – call Adelaide Metro Infoline (08) 8210 1000.

Contact (08) 8278 5477

Waterfall Gully, Cleland Conservation Park

Horsnell Gully Conservation Park and Giles Conservation Park 246 ha

Rich in relics from early European settlement, Horsnell Gully and Giles conservation parks provide great bushwalking opportunities with sign-posted trails passing through steep gullies and wooded hillsides. Historic buildings such as Giles Ruins can be found in the park. Wildlife includes Western Grey Kangaroos, Koalas, Short-beaked Echidnas and possums.

Location & Getting There

10 km E Adelaide. Access via Horsnell's Gully Rd, Horsnell's Gully.

Contact (08) 8336 0901

The Southern Brown Bandicoot is the last remaining species of bandicoot naturally occurring in South Australia. A robust streamlined marsupial with a long snout, small round ears and large rump, it is only known to occupy areas of the Mount Lofty Ranges and is listed as nationally endangered. A Recovery Plan funded by the Federal Government and DEH is helping to identify its distribution and prevalence, and address key threats to its survival. If you see a Southern Brown Bandicoot in the Mount Lofty Ranges, you can help by completing an online form – *There's a Bandicoot in my Backyard* – available from www.environment.sa.gov.au

SOUTHERN
BROWN
BANDICOOT

Morialta Conservation Park 533 ha

Surrounded by lush vegetation, this easily accessible park is located 20 minutes drive north-east of Adelaide. Morialta Conservation Park offers impressive views of Morialta Gorge, the famous First Falls waterfall and the surrounding Adelaide plains. The park is popular for birdwatching, rock climbing and bushwalking, with trails catering to all levels of fitness. A scenic picnic area with barbecue facilities and a playground is provided. Morialta Conservation Park is open to vehicle traffic from 8:30 am to 15 minutes before sunset. Walkers may access the park from sunset to sunrise.

GO BUSHWALKING

First Falls Valley Walk

1.6 km 45 min Easy Walk

Experience the beauty of Morialta along the First Falls Valley Walk. This trail follows Fourth Creek into the heart of Morialta Gorge. During summer the creek is dry, but after autumn and winter rains the park's cascading waterfalls and flowing creeks come to life.

Want to know more? Visit www.parks.sa.gov.au to download the latest *Bushwalking in Morialta and Black Hill Conservation Parks* brochure.

Location & Getting There

12 km NE Adelaide. Access via Morialta Rd, Woodforde. Public transport by bus – call Adelaide Metro Infoline (08) 8210 1000.

Contact (08) 8336 0901

Mount Lofty Summit in Cleland Conservation Park

Mount Lofty Summit, the highest point in the South Mount Lofty Ranges, offers panoramic views of Adelaide and Piccadilly Valley. Discover the story behind the white obelisk and explore the many walking trails that start here. The complex includes a Visitor Information Centre, gift shop and modern café/restaurant.

Location & Getting There

Mount Lofty Summit Rd, Crafers, 24 km SE of Adelaide.

Contact (08) 8370 1054

Mount George Conservation Park 85 ha

With a higher than average annual rainfall and cool winter conditions, Mount George Conservation Park offers visitors an opportunity to see a variety of flora that thrive in cooler climate conditions. Walking trails explore the park's diverse landscape which varies from wetlands to open forests with some spectacular rocky outcrops. The park is also an important conservation area for Mountain Gums, considered rare in South Australia and includes an interesting section of the Heysen Trail.

Location & Getting There

25 km SE Adelaide. Access via Mount George Rd, Bridgewater.

Contact (08) 8336 0901

The Mount Lofty Ranges is a biodiversity hotspot for native orchids such as the endangered Pink-lipped Spider orchid – one of 160 species growing in the area. However, environmental pressures such as climate change, vegetation clearance, weed invasion, increased grazing, and the loss of crucial wasp pollinators are threatening the survival of more than 40 orchid species, including 12 nationally threatened orchids. *The Lofty Block Threatened Orchid Recovery Project* aims to arrest this decline. Initiatives such as monitoring, weed control, fencing off areas, and in some instances, caging individual flowers has achieved much in the past few years. This is a joint project between DEH, the Threatened Plant Action Group, Adelaide and Mount Lofty Ranges, Northern and Yorke Natural Resource Management boards, and volunteer support from more than 15 community groups.

Near Mount Lofty, Cleland Conservation Park

Onkaparinga River National Park

Rock climbing is a great way to heighten your senses, lift your spirits and challenge yourself. The two most popular parks for rock climbers are **Morialta Conservation Park** and **Onkaparinga River National Park** with solid rock faces and secure holdfasts.

With some experience and training, rock climbing can be enjoyed by anyone. There are easy climbs for beginners, such as the Al Sirrat or Cinch climbs at Morialta, or more challenging climbs such as Plexas, which boasts amazing views of the gulf and passes one of the area's large gums, a favourite for Koalas. Before attempting a climb, it is recommended that you contact a rock climbing club or licensed tour operator that offer a beginner's rock climbing session to learn about the equipment and technical requirements of setting up a secure climb. Contact the Belair Office on **(08) 8278 5477**.

**ROCK
CLIMBING**

Onkaparinga River National Park and Recreation Park 1826 ha

Featuring permanent rock pools, deep gorges and a slow flowing river, Onkaparinga River National Park and Recreation Park are well worth a visit. The Onkaparinga River, South Australia's second longest river enters the park through a steep-sided valley that flows into a magnificent gorge with cliffs that stretch up to 50 metres high. The park follows the river to the sea, revealing an entirely different estuary and wetland environment. The main bushwalking area is located on the northern side of the gorge near Gate 6 on Piggott Range Road, where there are a variety of accessible trails to choose from. Paddling down the river by canoe in the recreation park and rock climbing in the national park are also popular activities.

Location & Getting There

34 km S Adelaide. Access to gorge area in the national park is from Chapel Hill Rd, Piggott Range Rd, and off Main South Rd via Old Noarlunga. Access to wetlands (RP) is from River Rd and Railway Rd.

Contact (08) 8278 5477

Para Wirra Recreation Park 1417 ha

One of the major recreation parks of the greater Adelaide metropolitan area, Para Wirra Recreation Park offers a beautiful bushland setting with many walking trails, scenic drives and opportunities to encounter wildlife. There are over 100 species of birds in the park, including Emus which are regularly seen strutting through the picnic grounds. Mack Creek Hut offers a budget accommodation option for nature enthusiasts keen to explore the park. Bookings required.

Location & Getting There

40 km NE Adelaide. Access via Humbug Scrub Rd, One Tree Hill.

Contact (08) 8280 7048

Accommodation See page 57

Scott Creek Conservation Park 758 ha

Scott Creek Conservation park has some of the most diverse native vegetation and wildlife in the Adelaide Hills. Its dense Stringybark forests, steep sloped valleys and seasonally flowing creeks are home to a variety of eucalypts including clusters of Blue and Pink gums and over 125 species of birds. In the 1850s Scott Creek was mined for copper and silver. Explore the mine ruins along two short walking trails. Also a great place to spy local wildlife. This park is an important conservation area for the nationally endangered Southern Brown Bandicoot.

Location & Getting There

30 km SE Adelaide. Access via Dorset Vale Rd or Scott Creek Rd, Scott Creek.

Contact (08) 8278 5477

Waterfall Gully in Cleland Conservation Park

Waterfall Gully, located in Cleland Conservation Park is home to the largest of seven waterfalls in the park. Walking paths with handrails make this area suitable for all levels of fitness. There is also a tearoom, housed in a historic Swiss-style chalet (circa 1911), nearby.

GO BUSHWALKING

Waterfall Gully to Mount Lofty Summit Hike

7.6 km return @ 2.5 hrs Moderate Hike

This challenging hike begins at historic Waterfall Gully. It takes you through native bushland to Mount Lofty Summit, the highest point in the South Mount Lofty Ranges. The trail features some steep sections as it approaches the summit. Enjoy spectacular views of the city as you return to Waterfall Gully.

Location & Getting There

8 km E Adelaide. Access via Waterfall Gully Rd, Burnside.

Contact (08) 8379 2488

MUST SEE & DO

Observing majestic Southern Right Whales from a cliff-top viewing platform adjacent to the **Great Australian Bight Marine Park**.

Admiring the towering rock formations of the 'Organ Pipes' in **Gawler Ranges National Park**.

Canoeing the tranquil waters of Yangie Bay in **Coffin Bay National Park**.

Observing Australian Sea-lions basking on the rocks from a lookout at **Point Labatt Conservation Park**.

Savouring stunning seaside views from your front verandah at Donington Cottage accommodation in **Lincoln National Park**.

EYRE PENINSULA

Discover 2000 kilometres of spectacular coastline

Famous blue waters, secluded beaches and coastal cliffs spanning the Great Australian Bight are just the beginning of Eyre Peninsula's stunning scenery. Between June and October visitors can witness the magnificent sight of whales at the Head of Bight, resting and raising their young after their annual migration. Inland, the spectacular Gawler Ranges National Park reveals ochre-coloured hills, home to rare wildlife and ancient geological formations dating back some 1500 million years. Lincoln and Coffin Bay are among the region's most popular coastal parks, offering fantastic camping, fishing, bushwalking and 4WD adventures.

PLACES TO STAY

See page 57 for accommodation ideas in our National Parks.

The Organ Pipes, Gawler Ranges National Park

Coffin Bay National Park 30 977 ha

Coffin Bay National Park's diverse coastal landscape features massive dunes, high windswept cliffs, and surf beaches pounded by the Southern Ocean. On the northern side of the peninsula, the landscape offers a complete contrast, with sheltered bays and low-lying sapphire swamps. Paddling Yangie Bay by canoe, bushwalking, fishing, birdwatching and exploring the more remote areas of the park by 4WD (experience required), are just a few of the activities you can enjoy.

Location & Getting There

 50 km W Port Lincoln. Access via Flinders Hwy.
Contact (08) 8688 3111

Gawler Ranges National Park 162 676 ha

Located in the spectacular southern Gawler Ranges, this park is a popular destination for visitors to Eyre Peninsula and those travelling to Perth. Vast hills and gullies with rocky gorges and seasonal water flows create a stunning natural landscape with an ancient geological history, spanning some 1500 million years. The park includes 53 rare and threatened plant and animal species including the rare Yellow-footed Rock-wallaby. A 4WD with high clearance is required to take in the highlights of the park. Most tracks are unsuitable for conventional 2WD vehicles.

Location & Getting There

 300 km W Port Augusta. Access via Eyre Hwy, north from Wudinna. Also accessible from Minnipa and Kimba.
Contact (08) 8688 3111

The endangered Greater Bilby is a rabbit-sized nocturnal marsupial with rabbit-like ears, a long snout and tail. Bilbies once inhabited around 70 per cent of the Australian mainland. Today they inhabit just 20 per cent of their former range. Threats such as introduced predators and land clearance have influenced their dramatic decline. An initiative of DEH at Venus Bay Conservation Park is helping secure the future of this intriguing animal. Other conservation projects in the region include aiding the survival of the Brush-tailed Bettong, Yellow-tailed Black-Cockatoo, Chalky Wattle, Silver Daisy Bush and West Coast Mintbush. To find out more visit www.environment.sa.gov.au/biodiversity/threatened.html

SAVING OUR THREATENED SPECIES

Great Australian Bight Marine Park 123 323 ha

The iconic Great Australian Bight is an important breeding and calving area for the Southern Right Whale and Australian Sea-lion. During the winter months, whales are regularly seen from the viewing platform overlooking the ocean at the Head of Bight. The viewing area is located in Yalata Indigenous Protected Area and an entry fee applies. Upon arrival, pick up a copy of; *The Great Southern Right Whale – Australian Bight Marine Park* brochure to learn about these amazing creatures. The Great Australian Bight Marine Park protects a diverse range of marine species, while allowing for ecologically sustainable use of marine resources. The park is divided into management zones that grant different levels of protection and permits certain recreational activities to take place. For information about seasonal closures and activities permitted within each management zone call the DEH office at Port Lincoln.

Location & Getting There

 300 km W Ceduna. Access via Eyre Hwy.

Lake Newland Conservation Park 8912 ha

A series of natural saline lakes 20 kilometres in length, Lake Newland is one of the most extensive wetlands on Eyre Peninsula. Bring your binoculars to observe the many species of waterfowl and wading birds that inhabit the wetlands, or try your luck fishing. The lake section of the park is only accessible by 4WD. A day visit and camping area at Walkers Rock (managed by the local council) provides 2WD access to the coast.

Location & Getting There

200 km NW Port Lincoln. Access via Flinders Hwy.

Contact (08) 8688 3111

Lincoln National Park and Memory Cove Wilderness Protection Area 31 513 ha

Lincoln National Park includes coastal mallee wilderness, a spectacular coastline and abundant wildlife. The park is located on a rugged peninsula with sandy beaches, limestone cliffs, and huge sand dunes sculpted by the wind. Fishing, diving, scenic drives, beachcombing and four-wheel drive adventures are among the parks many activities. At the southern end of the park lies Memory Cove Wilderness Protection Area. A secluded bay surrounded by vast expanses of mallee, rewards visitors with its tranquillity and stunning beauty. To maintain the integrity of this site daily visitor numbers are limited with a key and pass required to gain access. These are available from the Port Lincoln Visitor Information Centre. Lincoln National Park also offers the charming Donington Cottage for overnight accommodation. Phone the Port Lincoln Visitor Centre on 1300 788 378 for details and bookings.

GO BUSHWALKING

Stamford Hill Hike

📍 1.1 km return @ 45 min Hard Hike

Hike up Stamford Hill and be rewarded with magnificent views of Boston Bay, Port Lincoln and Lincoln National Park. A monument commemorating Matthew Flinders' voyage of discovery is located at the top. The Barbara Beitz Trail continues down Stamford Hill and joins the Investigator Trail to create a return loop.

Gunyah Beach, Coffin Bay National Park

Bundra Cliffs, Nullarbor National Park

Southern Right Whales, Nullarbor National Park

Mamungari Conservation Park 2 128 945 ha

Mamungari Conservation Park is one of the largest arid zone Biosphere Reserves in the world. Located in the southern Great Victoria Desert and northern Nullarbor Plain, the park is co-managed with the traditional owners, the Maralinga Tjarutja people who maintain a strong spiritual connection to the area. Parallel red sand dunes covered with desert karrajong, acacias, desert gums and salt lakes are among the park's interesting features. Wildlife includes Princess Parrots, Scarlet-chested Parrots, Australian Bustards and mammals adapted to the harsh desert conditions. Access to the park is from the east along the Anne Beadell Highway. You will need a well-equipped 4WD and must obtain permits from DEH, Maralinga Tjarutja Inc, and the Area Administrator at Woomera to travel within the park.

Location & Getting There

Nuyts Archipelago Conservation Park 9878 ha

Nuyts Archipelago Conservation Park comprises 22 islands and reefs, including Purdie Islands, St Francis Island, Lacy Islands and Goat Island. The islands feature granite boulders with limestone domes and large sand dunes. Mangrove communities can be found on St Peter and Eyre islands with access to good fishing spots nearby. Accessible by boat, the islands are a haven for rare and endangered wildlife. Boat tours operate to the islands, with the exception of the Franklin islands which are prohibited. Visitors should be aware that Tiger Snakes are common on all of the islands.

Location & Getting There

15 km off the coast of Ceduna. Access is by boat only.

Contact (08) 8625 3144

The 5600 kilometre coastline of South Australia features rocky shorelines, sandy beaches, mud flats, seagrass and mangrove habitats. What lies beneath the ocean is still being discovered through ground-breaking research. Using a range of new technologies including satellite, acoustic equipment and underwater video and surveys, the DEH scientific team is producing maps that profile the landscape of the sea floor as well as the sea life habitat in large areas. This valuable information will assist in effective monitoring and conservation of the marine environment into the future. The mapping project is a joint partnership between DEH, several universities, natural resource management boards and the Australian Government's Natural Heritage Trust.

Point Labatt Conservation Park 51 ha

Point Labatt's rugged coastline dominated by 60-metre high cliffs is home to the largest mainland breeding colony of Australian Sea-lions. A short walk to a cliff-top viewing platform allows you to safely watch the seal colony below – binoculars recommended. The park is also home to majestic seabirds such as the Osprey, White-bellied Sea-Eagle and Peregrine Falcon.

Location & Getting There

50 km S Streaky Bay. Access via Flinders Hwy along unsealed roads, either via Sceale Bay or Calca.

Contact (08) 8625 3144

Sir Joseph Banks Group Conservation Park 47 690 ha

Aquamarine waters and scenic beaches characterise the many islands, islets and reefs of the Sir Joseph Banks Group. The limestone-capped islands within this group generally feature scenic low-lying 'whaleback' profiles, making the area a popular sightseeing destination for marine-based viewing. Havens for wildlife, the islands are a refuge for numerous birds and protect animals such as the endangered Greater Stick-nest Rat and 12 species of lizards. You should be aware that venomous Tiger Snakes are common on several islands and that some islands are prohibited as they are important breeding colonies for wildlife. The Sir Joseph Banks Group is accessible by boat from Tumby Bay and Port Lincoln, with several licensed tour operators in the area.

Location & Getting There

20 km SE off the coast of Tumby Bay. Access is by boat.

Contact (08) 8688 3111

Four-wheel driving Googs Track, Yumbarra Conservation Park

Whyalla Conservation Park 1981 ha

Whyalla Conservation Park conserves a saltbush and bluebush landscape featuring a variety of shrublands and Western Myall woodlands. The area is recognised for its variety of ground lichens, and is home to more than 80 species of native birds.

A feature of the park is Wild Dog Hill, a large sandstone outcrop in the park's north-west corner with an interesting walking trail that passes through rocky outcrops. The seven kilometre track from the highway to Wild Dog Hill is unsuitable for vehicles towing caravans.

Location & Getting There

10 km N Whyalla. Access from Lincoln Hwy.

Contact (08) 8634 7068

Yellabinna Regional Reserve and Wilderness Protection Area 2 501 600 ha and Yumbarra Conservation Park 324 352 ha

These adjoining parks form a valuable wilderness area of sparsely vegetated red sand dunes that extends as far as the eye can see, creating a lasting image of the outback, against the backdrop of a clear blue sky. A vast expanse of mallee to the south provides a corridor linking the Great Victoria Desert to the northern Eyre Peninsula mallee. This is an important habitat for wildlife such as Major Mitchell's Cockatoos, Thorny Devils, Sandhill Dunnarts and Malleefowl. The only access to the parks is via Googs Track. You should only attempt this track if you are an experienced outback traveller and have a well-equipped high clearance 4WD vehicle. For your driving safety it is recommended that you travel from south to north along Googs Track.

Location & Getting There

Along Googs Track commencing 30 km N Ceduna. Access via Eyre Hwy.

Contact (08) 8625 3144

The East Meets West biodiversity corridor is a largely continuous tract of remnant native vegetation stretching from Eyre Peninsula across the Far West of South Australia, to the Western Australian border. This vast area encompasses a range of climates, land-uses, and ecologically diverse plant and animal species. The East Meets West corridor aims to improve 'connectedness' between core habitats by linking established protected areas with buffer zones, enabling species to shift, evolve and adapt to a changing climate. East Meets West aims to protect functioning natural ecosystems and involve people in nature conservation. The involvement and support of the local community, volunteer groups, non-government organisations and other natural resource custodians is vital to the success of East Meets West. DEH will continue to work with these groups to restore the important ecosystems within the East Meets West Corridor.

Newland Head Conservation Park 1035 ha

Located a short drive from the popular seaside town of Victor Harbor, Newland Head Conservation Park protects rocky headlands and two scenic beaches. It is popular among skilled surfers and beachcombers and offers excellent beach fishing for salmon, whiting and malloway. Swimming is not recommended due to dangerous currents. The Heysen Trail runs through the park, providing spectacular views from the cliff tops.

Location & Getting There
 91 km S Adelaide. 17 km SE Victor Harbor.
 Access via Waitpinga Rd, Victor Harbor.
Contact (08) 8552 3677

On the southern coast of the Fleurieu Peninsula, the spectacular cliff-line known as Waitpinga Cliffs is an important conservation zone in Newland Head Conservation Park. White-bellied Sea-Eagles are often seen flying in this area. For their protection, DEH proposed a policy that restricts low-flying aircraft within the zone resulting in the ‘Fly Neighbourly Agreement’. This has been implemented by Airservices Australia and supported by the aviation community.

The Friends of Newland Head Conservation Park have played a huge part in the area’s sustainability by extensively revegetating and stabilising this park after previous farming activities exposed sandy areas making them vulnerable to erosion.

Visitors can experience the Waitpinga Cliffs along the Heysen Trail or view them from Rosetta Head at Victor Harbor.

When walking in Newland Head Conservation Park please remain on the trails to minimise disturbance to these protected birds.

Talisker Conservation Park 211 ha

The site of an early Cornish mining settlement, Talisker Conservation Park is nestled amongst a remnant patch of native vegetation that contains heritage-listed ruins, providing a well-preserved record of nineteenth century mining practices.

Location & Getting There
 110 km S Adelaide. Access via Talisker Rd from Cape Jervis.
Contact (08) 8552 3677

Discover a vast and ancient land filled with startling colours, amazing wildlife and stories as spellbinding as the location itself

Starting approximately three hours drive north of Adelaide, the Flinders Ranges offers an inspiring landscape of incredible beauty, featuring rugged mountain peaks, spectacular gorges and peaceful creeks lined with River Red Gums. The jewel of the Flinders Ranges is Wilpena Pound, a magnificent natural amphitheatre resembling a huge crater rising out of the plains in Flinders Ranges National Park. Well-marked walking trails explore the park with fantastic opportunities to encounter wildlife and learn about the region's rich Aboriginal and European heritage. The Flinders is also the gateway to the legendary outback, a place of surprising contrasts renowned for its red desert sands, brilliant blue skies and vast unspoilt beauty.

Flinders Ranges National Park

Flinders Ranges National Park 91 330 ha

Located in the central Flinders Ranges, Flinders Ranges National Park is a place of stunning scenery with a wealth of geological features, wildlife and Aboriginal and European cultural heritage. A series of rugged mountains, River Red Gum lined creeks and rolling hills covered with a patchwork of native pines and wildflowers in spring are among the park's many natural features. Wilpena Pound, one of the most recognised geological landmarks in South Australia, forms the hub of the park. From here you can take in the park's magnificent scenery along a network of bushwalking trails catering to all levels of fitness; enjoy scenic drives; or join a licensed tour operator on a 4WD tour or mountain bike adventure. For an insight into local Aboriginal culture and European settlement visit the award winning interpretation site 'Ikara – the meeting place' at Old Wilpena Station. See Aboriginal art at Arkaroo Rock, Sacred Canyon and Perawurtina cultural heritage sites. Numerous accommodation options are available. Phone Wilpena Pound Visitor Information Centre on (08) 8648 0048.

GO BUSHWALKING

Hills Homestead Walk

📏 6.6 km 🕒 2 hrs Easy Walk

Beginning at the bushwalking trailhead at Wilpena Pound Visitor Information Centre, this trail follows Wilpena Creek, encountering relics and reminders of pioneering life inside Wilpena Pound. Signs entitled, 'If the walls could talk', tell the story of Jessie Hill, daughter of the first pioneer family to live in the homestead. Walking trail brochures and maps are available from Wilpena Pound Visitor Information Centre.

Yuluna Hike

📏 8 km 🕒 4 hrs Moderate Hike

Experience the landscape that inspired painter Sir Hans Heysen during his visits to the Flinders Ranges. Beginning at the Aroona car park 50 kilometres north of Wilpena, the trail weaves through a section of the ABC Range and takes you past a historic pug and pine hut.

ART**

Hiking trail to Hidden Valley, Mount Remarkable National Park

Operation Bounceback started in 1992 as a recovery program to save the populations of boulder-hopping Yellow-footed Rock wallabies found in the central Flinders Ranges, Gawler Ranges and the Olary Ranges. Over the past 16 years, the program has evolved from a focus on a single vulnerable species to a holistic landscape approach, where all elements of the ecosystem are considered. From feral animal and weed control to strategic revegetation and fauna recovery, the program has successfully helped the recovery of many native plant and animal communities. The success of the program has also seen it extend outside of national parks, to be taken up by pastoral landowners, privately owned sanctuaries and the Aboriginal community.

OPERATION BOUNCE- BACK

Mount Brown Conservation Park 2264 ha

At 970 metres above sea level, Mount Brown is the highest peak in the southern Flinders Ranges. The park is a former forest reserve comprising undulating country, rugged ridges and open woodlands. A circuit trail with a spur track to Mount Brown summit starts at Waukarie Falls. At the summit, a commemorative lookout for Robert Brown, the naturalist aboard the *Investigator* sailing ship led by Matthew Flinders' voyage of exploration, offers panoramic views of the countryside.

GO BUSHWALKING

Mount Brown Summit Hike

🕒 15 km loop 🕒 7.5 hrs Moderate Hike

Take this challenging, enjoyable loop hike to the summit of Mount Brown. Along the way you see evidence of a kilometre-deep canyon formed some 600 million years ago. Upon reaching the peak, enjoy spectacular views across the Southern Flinders Ranges.

Mambray Creek, Mount Remarkable National Park

Mount Remarkable National Park 18 271 ha

The appeal of Mount Remarkable National Park lies in its amazing diversity of flora, dramatic gorges and wilderness experiences. Arid zone plants and animals, and species from the more temperate southern regions both thrive in the park making it a popular bushwalking destination. There are three separate vehicle entrances into the park each exploring different sections that are not interconnected. Mambray Creek, north of Port Pirie is home to some of the park's best attractions, including Sugargum Lookout and the secluded hiking experience of Hidden Gorge. Alligator Gorge is easily accessible from the Wilmington entrance, while Melrose offers walking access to Mount Remarkable along a section of the Heysen Trail. Accommodation is available at Alligator Lodge and Mambray Creek Cabin (bookings required). Mambray Creek Campground is a popular camping spot, particularly during holiday periods.

GO BUSHWALKING

Mount Remarkable Summit Hike

🕒 12.2 km return 🕒 5 hrs Moderate Hike

This trail commences from the War Memorial Monument near the Melrose township. It enables easy access to Mount Remarkable Summit (961 metres) with spectacular views of Willochra Plain to the east and glimpses of Spencer Gulf to the west.

Want to know more? Visit www.parks.sa.gov.au to download the latest *Mount Remarkable Summit Hike* brochure.

Location & Getting There

Access to Mambray Creek is via Hwy 1, 45 km north of Port Pirie. The Alligator Gorge entrance is south of Wilmington and the Mount Remarkable section lies directly behind Melrose, 24 km south of Wilmington.

Desert Parks

A Desert Parks Pass is your passport to South Australia's breathtaking arid landscapes by 4WD.

The pass allows entry into the following seven parks and covers camping (where permitted). When you purchase a Desert Parks Pass you will receive a handbook with information on the parks, safety information for outback driving, vehicle supply checklists, wildlife information and detailed maps.

The pass is valid for 12 months and is issued on a per vehicle basis.

**For further information contact:
Desert Parks Pass Hotline 1800 816 078
www.parks.sa.gov.au**

Please note, that although beautiful, the desert is a harsh and unforgiving environment for the unprepared traveller. Familiarising yourself with the safety and trip-planning information in your Desert Parks handbook before you leave is the first step to ensure you'll get the most out of your desert adventure.

Red sand dunes, Simpson Desert Conservation Park

Coongie Lakes National Park 26 669 ha

Coongie Lakes, (pronounced *Khun-gee Lakes*) is an ever-changing desert wetland located in one of the most arid areas of Australia. The freshwater wetland system is home to an amazing variety of wildlife, including fish, turtles, frogs and mammals. It is a deeply spiritual site for the Aboriginal people who inhabited this area and is a significant European site associated with pastoralism and exploration. Coongie Lakes is listed as a Ramsar Wetland of International Importance and is recognised as a significant feeding and resting area for more than 74 species of waterbirds and 13 other wetland dependant species. A good camping area is located near the old station ruins by the lake. The peaceful serenity of Coongie Lakes attracts 4WD enthusiasts and birdwatchers alike, with autumn the best time to see migratory birds.

Location & Getting There

100 km NW of Innamincka in Innamincka Regional Reserve off Strzelecki Track (via Leigh Creek). Access via Innamincka.

Contact Desert Parks Hotline 1800 816 078
Port Augusta Regional Office (08) 8648 5300

Innamincka Regional Reserve 1 354 193 ha

With connections to some of Australia's most famous explorers, diverse wildlife and the internationally significant wetlands and wildlife of the Cooper Creek system, Innamincka Regional Reserve offers a taste of the real Australian outback. The reserve is an oasis of amazing contrasts: you can cruise along shady creeks by canoe; explore historic sites; or fish and swim in one of the reserve's many waterholes surrounded by vast red desert and arid plains. Within the reserve is Innamincka township, once a vital trading post for pastoral properties in the region. Among the must-see sites are the internationally renowned wetlands of Coongie Lakes; Cullyamurra Waterhole; the graves of ill-fated explorers Burke and Wills; and just across the Queensland border, the historic Dig Tree site.

Location & Getting There

776 km NE Port Augusta. Access along the Strzelecki Track, via Leigh Creek.

Contact Desert Parks Hotline 1800 816 078
Port Augusta Regional Office (08) 8648 5300

The amazing contrast of life-filled wetlands surrounded by a sun-scorched desert makes Coongie Lakes a spectacular oasis. Linked to the Cooper Creek system, Coongie Lakes receives its water from north-west Queensland, up to 1000 kilometres away. An arid wetland, Coongie supports an incredible diversity of wildlife including native fish, reptiles and frogs. Recognised as a Ramsar Wetland of International Importance, the lakes support over 205 species of birds, of which 24 are rare, vulnerable or endangered in South Australia. Thousands of migratory birds fly some 25 000 kilometres from the Northern Hemisphere to shelter and feed here from April to December. This makes the lakes an important link to the global environment.

COONGIE LAKES

Lake Eyre National Park 1 348 840 ha

Lake Eyre National Park is Australia's largest salt lake. When filled with water, the lake is a breeding haven for masses of waterbirds. The park is also home to fascinating reptiles including the Lake Eyre Dragon and tiny forms of aquatic life such as Brine and Shield shrimp that suddenly appear when the lake contains water. Water converges into the lake from the catchment areas of three different states. Lake Eyre has filled to capacity only three times in the past 150 years. Camping is available at Halligan Bay. Access to Lake Eyre National Park is by either of two tracks. Both cross pastoral properties and are suitable for 4WD vehicles only. Reserves of fuel, water and food must be carried.

Location & Getting There

500 km N of Port Augusta. Access via the Oodnadatta Track.

Contact Desert Parks Hotline 1800 816 078
Port Augusta Regional Office (08) 8648 5300

Simpson Desert Conservation Park and Regional Reserve 3 614 341 ha

Located in the driest region of Australia, the Simpson Desert is a sea of parallel red sand ridges, some 300 to 500 kilometres long. The park borders the boundaries of South Australia, Queensland and the Northern Territory. Simpson Desert Conservation Park, Simpson Desert Regional Reserve and Witjira National Park form a group of parks representing one of the world's best examples of dunal desert. A wide variety of desert flora and fauna are protected in the desert landscape featuring varied dune systems, extensive playa lakes, spinifex grasslands and acacia woodlands. You can camp at any location next to public access tracks in the Simpson Desert, however the best places are mostly located towards the salt lakes in the central region where Gidgee woodlands provide shade, shelter and soft ground. It is recommended you cross the parks from west to east to take advantage of the gentler upsweep to most dunes. Travellers should be well-prepared and avoid attempting to tow trailers across the Simpson Desert.

Location & Getting There

957 km N Port Augusta. Access via Stuart Hwy, via Oodnadatta and Dalhousie Springs, or through Birdsville from the east.

Contact Desert Parks Hotline 1800 816 078

Many of South Australia's national parks are ablaze with wildflowers each spring. After rains, **Flinders Ranges National Park**, **Coorong National Park** and **Gawler Ranges National Park** all provide excellent opportunities to admire some of the state's best-known wildflowers. South Australia's floral emblem, the exquisite red Sturt's Desert-pea is most commonly seen in northern reaches of the state such as **Vulkathunha-Gammon Ranges National Park**. **Flinders Chase National Park** on Kangaroo Island is home to over 400 native plants and **Belair National Park** supports many species of native orchids.

WILD- FLOWERS

Four-wheel driving in the desert

South Australia has some amazing four-wheel driving opportunities whether you're out to explore the desert or coast, mallee or the ranges. Take on the outback along the Oodnadatta Track, through Purnie Bore in **Witjira National Park** to witness the sea of parallel red sand ridges of the **Simpson Desert**. On Eyre Peninsula, four-wheel drive tracks allow you to discover the sensational beaches and limestone cliffs of **Coffin Bay National Park**. Or check out the **Murraylands**, via the Ngarkat, Mount Rescue and Big Desert four-wheel drive loops. Wherever you go, please stay on designated tracks, drive responsibly and respect the natural environment.

RESPONSIBLE FOUR- WHEEL DRIVING

Relaxing at Dalhousie Springs, Witjira National Park

Wabma Kadarbu Mound Springs Conservation Park 12 016 ha

The major attractions of this park are 'The Bubbler' and 'Blanche Cup' mound springs. Water from the depths of the Great Artesian Basin filters to the surface forming mounds from the sediments and salts as the water evaporates to create a slowly bubbling pond that over millennia has supported the growth of unique aquatic plants and invertebrates. Permanent wetlands created by the spring's overflow provide habitat for a variety of waterbirds. Swimming in the springs is not permitted. Camping is available at nearby Coward Springs.

Location & Getting There

498 km N Port Augusta. Access via Oodnadatta Track.

Contact Desert Parks Hotline 1800 816 078
Port Augusta Regional Office (08) 8648 5300

Witjira National Park 771 113 ha

The gateway to the Simpson Desert, Witjira offers visitors a truly memorable outback experience. The park is home to Dalhousie Springs, a lush oasis in the desert and the largest complex of artesian springs in Australia. Visitors come here to swim in the refreshing thermal pools where the water temperature ranges from 20–45° C. Pleasant camping spots and upgraded visitor facilities make Witjira one of the Simpson Desert's most popular national parks. On the western edge of the Simpson Desert, Witjira's Traditional Owners co-manage the park with DEH. This co-management agreement provides a shared approach to the land that accommodates traditional Aboriginal uses with environmental management, tourism and recreational activities. Witjira and Dalhousie Springs have much to offer the desert traveller and is one of South Australia's most memorable outback experiences.

Location & Getting There

887 km NW of Port Augusta. Access via Stuart Hwy, via Oodnadatta.

KANGAROO ISLAND

Kangaroo Island offers outstanding natural beauty, with abundant wildlife and unspoilt landscapes

With around one third of the island protected, and an absence of introduced predators, it's easy to see why Kangaroo Island is world-renowned for its natural beauty and wildlife. The island's parks offer great opportunities to encounter native animals such as koalas, echidnas, kangaroos, goannas, sea-lions, ospreys and more! There is much to see and do, from visiting the naturally sculpted Remarkable Rocks and Admirals Arch in Flinders Chase National Park, to exploring stunning lighthouse precincts and the famous Seal Bay experience at Seal Bay Conservation Park. One of the few places in Australia where you can observe rare Australian Sea-lions in their natural environment of sand dunes, beach and ocean, on a fascinating guided tour.

The magnificent South Australian Glossy Black-Cockatoo is listed as endangered, with just 340 birds thought to remain in the wild. The large-scale clearance of old gum trees and drooping sheoaks from mainland South Australia last century, has resulted in the birds finding refuge on Kangaroo Island – the only place where they are known to exist today. With the help of volunteers, artificial nest hollows and iron tree collars have been erected to protect the birds' nesting sites from possums. Working closely with landholders has played a vital role in helping restore and protect important habitat areas, resulting in the slow but steady increase of these birds. This recovery program is managed by DEH with funding from the National Heritage Trust and public donations administered by Nature Foundation SA.

SOUTH AUSTRALIAN GLOSSY BLACK-COCKATOO

Cape Borda Lightstation, Flinders Chase National Park

Flinders Chase National Park 32 802 ha

Flinders Chase is located at the western end of Kangaroo Island. The park's major attractions include the naturally sculpted Remarkable Rocks overlooking the sea and a colony of New Zealand Fur-seals at Admirals Arch and Cape du Couedic to the south-west. The park includes Ravine des Casoars Wilderness Protection Area to the north and Cape Borda Lightstation on the north-west tip. Spectacular rugged coastlines, encounters with native wildlife and vast areas of rejuvenating bushland are all part of the Flinders Chase experience. Heritage lighthouse keepers' accommodation is available at Cape du Couedic and pioneers cottages at Mays Homestead and the Postmans Cottage at Rocky River. Check the availability of camping prior to arrival. Bookings are essential for both. Several walking trails and boardwalks help you discover the beauty of this park. The award-winning Flinders Chase Visitor Centre at the entrance to the park offers interesting wildlife displays, murals, and a fossil dig pit the kids will love. Afterwards, relax in the café over lunch or enjoy a cuppa.

Guided tour, Seal Bay Conservation Park

For thousands of years fire has played an essential role in shaping the Australian landscape. Aboriginal people influenced the environment by using fire as a management tool to reinvigorate plants and regenerate wildlife habitats. Following the aftermath of fires on Kangaroo Island in 2007, visitors can now witness a fascinating new phase in nature's lifecycle. See the landscape come back to life, as new buds emerge from tree trunks, and fresh shoots capturing newly available light take hold in the nutrient rich soil. To find out more about nature's amazing ability to adapt and recover, pick up a copy of the latest fire interpretation notes from any parks office on Kangaroo Island.

A NEW START TO LIFE

MUST SEE & DO

Explore world heritage in an ancient and beautiful landscape

The heart of the Limestone Coast is an easy four-hour drive south-east of Adelaide. This picturesque region is home to two of South Australia's premier attractions; the underground wonders of World Heritage-listed Naracoorte Caves, renowned for its ancient fossils of Australian megafauna; and the wild coastal scenery of the Coorong, an internationally significant wetland attracting prolific migratory waders and waterbirds. Other exciting attractions include delving into the remarkable crystal clear waters of Piccaninnie and Ewens ponds, and exploring the regions spectacular coastline.

Joining a guided cave tour and discovering the significance of the World Heritage-listed **Naracoorte Caves**.

See page 61 for accommodation ideas in our National Parks.

Beachport Conservation Park 875 ha

Nestled between the Southern Ocean and Lake George, this park provides a variety of habitats for around 200 species of birds. Hooded Plovers are often seen nesting along the beach, while the threatened Orange-bellied Parrot occupies coastal saltmarsh and beach dune habitat. A large midden heap at Three Mile Rocks indicates that the coastline once provided an important food source for the local Aboriginal people. Sheltered camp sites and picnic facilities are provided near the sandy shoreline of Lake George, which is safe for swimming. A walking trail around Wooley Lake provides panoramic views of the ocean and Lake George.

Location & Getting There

83 km NW Mount Gambier. Access is along Alternate Hwy 1 via Beachport.

Contact (08) 8735 6053

Bool Lagoon Game Reserve 3092 ha & Hacks Lagoon Conservation Park 201 ha

A birdwatcher's paradise – Bool and Hacks lagoons is one of the largest and most diverse ephemeral freshwater systems in Southern Australia. In summer the lagoons transform into an important breeding area and refuge for migratory waders, including many rare and endangered wetland species. Brolgas are among the most spectacular of the 150 species that visit this area. Other species, such as the Royal Spoonbill, Red-necked Avocet, Sharp-tailed Sandpiper and Common Greenshank are also fascinating to watch. Boardwalks over the water allow you to stroll amongst the reeds and get closer to bird life. The view from Big Hill and Little Bool Lagoon is also worth a visit to appreciate the vastness of these wetlands.

Location & Getting There

100 km N Mount Gambier. Access via Princes Hwy.

Contact (08) 8762 3412

Black Swans, Bool Lagoon Game Reserve

Canunda National Park 9627 ha

This park is dominated by large mobile sand dunes, a sapphire blue sea and magnificent low-lying limestone cliffs. The majority of the coastline is characterised by long stretches of windswept surf beaches, suitable only for experienced surfers. Four-wheel driving is a popular activity (permitted on designated tracks only), while two-wheel drive vehicle access is limited to the areas around Southend, Coola Outstation and Oil Rig Square. There are walking trails in the northern section of the park and near the Coola Outstation.

77 km NW Mount Gambier. Three access points via Southend, Millicent or Carpenter Rocks.

Contact (08) 8735 6053

Almost all of South Australia's parks offer good birdwatching opportunities, however some of the best spots are **Coorong National Park, Bool Lagoon Game Reserve and Hacks Lagoon Conservation Park, and Coongie Lakes National Park**. Listed as Wetlands of International Importance under the Ramsar Convention, these wetlands provide significant breeding habitat and a refuge for large populations of waterbird species. Some of these include ducks, swans, egrets, ibis, pelicans and cormorants. Migratory birds, such as sandpipers, snipe, and plovers fly thousands of kilometres to these wetlands in summer.

Coorong National Park 48 958 ha

Coorong National Park is an area of national and international, ecological and historical significance that extends south, from where the River Murray meets the sea. Consisting of a string of long, shallow, saline lagoons and white sandy beaches backed by sand dunes it extends more than 100 kilometres in length. A haven for birdwatching, it is an important breeding area for the Australian Pelican, and refuge for ducks, swans, cormorants, terns, grebes and numerous species of migratory birds. The park is also a culturally significant archaeological site with middens and burial sites, evidence of continuing Ngarrindjeri Aboriginal occupation over many thousands of years. Photography, fishing and exploring the Coorong's peaceful waterways by canoe are popular activities. The beaches and park tracks are accessible by four-wheel drive.

GO BUSHWALKING

Journey to Gold Walk

📍 1.3 km return 🕒 1 hr Easy Walk

Little Dip Conservation Park 2150 ha

Little Dip Conservation Park features two distinct landscapes – a coastal strip consisting of sand dunes, coastal cliffs, shore platforms and reefs, and a series of small low-lying freshwater and saltwater lagoons. The park incorporates 23 kilometres of some of the most challenging sand tracks for 4WD enthusiasts. Fossicking, surfing, birdwatching and beach fishing, especially for salmon are popular recreational activities.

Location & Getting There

125 km NW Mount Gambier. Access via Alternate Hwy 1.

Contact (08) 8768 2543

The Coorong and Lower Lakes are a Wetland of International Importance under the Ramsar Convention, an international treaty dedicated to the wise use of wetlands around the world.

The Coorong and Lower Lakes is the termination of the largest river system in Australia, the River Murray, and provides drought refuge for 85 waterbird species including two nationally threatened species, the Orange bellied Parrot and Mount Lofty Southern Emu Wren.

It also supports a large number of native fish species including the nationally threatened Yarra Pygmy Perch.

WET- LANDS

OF INTERNATIONAL IMPORTANCE

Naracoorte Caves National Park 462 ha

Naracoorte Caves National Park is one of 17 World Heritage sites in Australia. Over the past 500 000 years, the park's 26 caves have acted as animal traps. The extensive fossil deposits of giant megafauna found inside the caves are the reason for Naracoorte Caves being inscribed on the World Heritage List in 1994.

Revealing much about Australia's marsupial heritage, visitors to the park can view several fossil areas on regular tours led by professional guides. One special cave is the maternity cave, home to the critically endangered Southern Bent-winged Bat that returns each spring to give birth and raise their young. At the Bat Observation Centre you can witness the bats via infra-red technology as they cling to the ceiling in their normally inaccessible world. The Wonambi Fossil Centre, also in the park is a re-created scene of Naracoorte Caves 200 000 years ago featuring life-size models of the 'megafauna' in a simulated habitat of the era. Guided tours of highly decorated caves showcasing stunning stalactites, stalagmites and columns operate daily. For the more intrepid, adventure tours are also available.

GO BUSHWALKING

Wonambi Fossil Centre/Wet Cave Walk

🕒 500 m 🕒 30 min Easy Walk

Experience another side of the Naracoorte Caves. This scenic walk winds its way through a patch of remnant vegetation, linking the Wonambi Fossil Centre to the self-guided Wet Cave Walk. A series of interpretive signs makes it an interesting and educational experience.

World Heritage Walk

🕒 1.2 km return 🕒 30 min Easy Walk

The World Heritage Walk takes you from the Wet Cave entrance to the Victoria Fossil Cave, identifying sites of World Heritage significance along the way.

Padthaway Conservation Park 981 ha

Padthaway Conservation Park conserves a remnant block of native vegetation, dominated by South Australian Blue Gum, Manna Gum and stringybarks, making it a haven for native birdlife and a birdwatchers paradise. Drinking water, accommodation and camping are available in the adjacent caravan park.

Location & Getting There

300 km SE Adelaide. Access via Riddoch Hwy.

Contact (08) 8762 3412

Penambol Conservation Park 180 ha

Conserving an important area of remnant vegetation formerly known as Herpsts Scrub, Penambol Conservation Park contains several interesting geological features, including the Caroline Sinkhole. Excavations in the sinkholes have provided evidence of habitation by Aboriginal people, who probably used the area for shelter. The park is one of the best places to see Common Wombats, with dozens of holes dotted along the Wombat Walk trail. It also contains the wonderful Butterfly Walk, providing opportunities to see and learn about local butterfly species such as the Splendid Ochre and Orange Species Butterfly. The park also protects the rare Yellow-bellied Glider.

Location & Getting There

22 km SE Mount Gambier. Access via Glenelg River Rd.

Contact (08) 8735 1177

Penola Conservation Park 227 ha

Penola Conservation Park's wetland environment features Brown Stringybark woodlands, open heaths and low-lying swamps lined with River Red Gum. Herons, ibis and Purple Swamphens, are among the numerous bird species that breed here. Flocks of Yellow-tailed Black-Cockatoos, Short-beaked Echidnas, Red-necked Wallabies and Western Grey Kangaroos also call Penola home. Spring is the best time to visit when native plants such as the Yellow Marsh Flower are in bloom. A boardwalk trail with interpretation, introduces you to the changing sights and sounds of this interesting wetland.

Location & Getting There

65 km N Mount Gambier. Access via Penola Rd.

Naracoorte Caves National Park

Snorkelling in Piccaninnie Ponds Conservation Park

Poocher Swamp Game Reserve 77 ha

Poocher Swamp Game Reserve offers hunting and other recreational opportunities, and has fascinating geological features. The park includes two deep 'runaway holes'. These holes are unique to wetland areas as they can fill with water during winter, and then suddenly drain through limestone into the water table over a few hours. A large River Red Gum, that once provided housing for an Aboriginal family, can be seen in the park.

Location & Getting There

280 km SE Adelaide. Access via Dukes Hwy.

Contact (08) 8762 3412

Tantanoola Caves Conservation Park 14 ha

Tantanoola Caves is filled with a spectacular array of limestone formations developed over thousands of years in one large dolomite cavern. Stalactites, stalagmites, wave-like shawls and gravity-defying helictites are among the cave's decorative features. Minerals and tannins, washing through the limestone have tinted the cave's formations in hues of honeycomb, brown and pink. At Tantanoola, there is no waiting for a tour, just meet your guide inside the cave for an introduction and then enjoy it at your leisure. Tantanoola is one of the few caves in Australia that is wheelchair and pram accessible. Above-ground, you can picnic among the gum trees or wander along a walking trail that provides spectacular views of the coast.

Location & Getting There

29 km NE Mount Gambier. Access via Princes Hwy.

Contact (08) 8734 4153

Telford Scrub Conservation Park 170 ha

Telford Scrub Conservation Park protects an important area of remnant vegetation that includes over 20 species of native orchids. The forest canopy boardwalk provides you with a unique bird's-eye view of the forest. Choose between a one and 2.5 hour stroll through the forest. Both trails have interpretive signs that highlight some of the park's unique features along the way. A small clearing provides an ideal spot to enjoy a picnic.

Location & Getting There

15 km N Mount Gambier. Access via Riddoch Hwy.

Contact (08) 8735 1177

Piccaninnie Ponds Conservation Park 547 ha

A unique and fragile area, Piccaninnie Ponds is one of the prettiest cave diving and snorkelling sites in South Australia. To protect this fragile ecosystem all snorkellers and divers must obtain a permit to enter the water. Water has been filtering through the limestone and forming the pond's stunning features over thousands of years. With visibility that can exceed 40 metres, you can snorkel across the top of The Chasm and peer into the dark depths below or experience the large white cavern, known as The Cathedral. Back on dry land, a walking trail through coastal wattle, Bearded Heath and Silky Teatree leads to a picturesque viewing platform overlooking wetlands.

Location & Getting There

32 km SE Mount Gambier. Access via Piccaninnie Ponds Rd.

Contact (08) 8735 117713

DIVING & SNORKELLING

South Australia has many dive sites of world standard. SA offers unique opportunities to observe cuttlefish, dolphins, the Leafy Sea Dragon and numerous varieties of fish and other marine life. Some of the states most popular underwater spots include cave diving at **Piccaninnie Ponds Conservation Park** and snorkelling at **Ewens Ponds Conservation Park**.

Both require permits. There are over 700 shipwrecks along the state's coastline. You can dive, photograph and explore the wrecks, but not disturb them. Favourite dive sites include the Investigator Strait Maritime Heritage Trail accessible from **Innes National Park** and the ex-HMAS Hobart shipwreck on the Fleurieu Peninsula.

RIVERLAND & MURRAYLANDS

Relax by the River Murray or see a spectacular mallee sunset. Whichever you choose, both regions offer the perfect escape

The majestic River Murray winds its way past sandstone cliffs, graceful old River Red Gums and vast tracts of mallee country on its journey through the Riverland and Murrayland regions. Known for its wonderous wetlands and abundant birdlife, the Riverland is easily accessible from Berri or Barmera, two-hours east of Adelaide. The gateway to the Murraylands at Murray Bridge is only an hours drive from Adelaide. For those who love the great outdoors, both regions offer fantastic opportunities to enjoy fishing, camping, boating and birdwatching, or simply lazing by the river and enjoying the relaxed pace of life and tranquil surrounds.

Paddling a canoe through the serene backwaters of the **Murray River National Park**.

Enjoying the solitude and beauty of **Ngarkat Conservation Park**'s vast mallee landscapes.

Camping in fantastic surrounds along the banks of the River Murray at Katarapko in **Murray River National Park**.

Taking the perfect photo of **Chowilla Game Reserve**'s still waters at sunset.

Malleefowl

Chowilla Game Reserve and Regional Reserve 93 397 ha

The Aboriginal word for Chowilla means 'place of good spirits' or 'good camping place'. An apt description for its setting along the peaceful waterways of the River Murray lined with majestic River Red Gums. Chowilla Regional Reserve features vast stands of mallee woodlands, Black Oak and bluebush shrublands that stretch across the flood plains to Danggali Conservation Park in the north. Its creek system supports abundant bird life and provides great opportunities for birdwatching, canoeing, photography and fishing.

GO BUSHWALKING

Border Cliffs Customs House Wetland Walk
 4 km loop @ 1.5 hrs Walk

Discover Chowilla. See native plants such as River Cooba, River Red Gums and Dryland Tea-tree. Observe a diversity of bird life including Whitefaced Herons at the observation point, approximately 350 metres off the main trail.

Canoeing Loch Luna Game Reserve

Danggali Conservation Park 251 232 ha

Australia's first Biosphere Reserve, Danggali Conservation Park is known for its vastness, wilderness appeal and diverse ecology reflecting an overlap of mallee and arid wetland ecosystems. Dominated by woodlands, the park provides you with opportunities to enjoy remote camping experiences, birdwatching and to explore relics of its pastoral history.

Location & Getting There

350 km NE of Adelaide. Access via Old Wentworth Rd.

Contact (08) 8595 2111

WET & DRY CYCLES

The natural flood cycle that occurs along the River Murray is referred to as 'wetting and drying'. Floodwaters from large upstream flows into South Australia temporarily cover low-lying areas of flood plain and wetlands. This regenerates natural wetland plant species such as River Red Gums and causes massive breeding of wetland and riverine animals including the Southern Bell Frog. The wetlands then slowly dry out until the cycle is repeated with the next flood. In recent years, the impact of drought, river regulation and increased water usage has reduced the frequency and size of these flood cycles. To ensure the ongoing breeding and regeneration of flood plains the natural flood cycle is now simulated, giving wetland habitats a helping hand.

Loch Luna 2 063 ha and Moorook Game Reserves 1244 ha

These two reserves feature large areas of permanent water, a network of waterways and shallow swamps. The environment is an important habitat for aquatic wildlife and birds, including the Regent Parrot. Wachtels Lagoon dominates Moorook Game Reserve, while Loch Luna provides a smaller network of creeks providing attractive and serene experiences for canoeing and recreational fishing. Waterfowl hunting is permitted on open days. Popular camping spots beside the river include Sugarloaf Hill and Loch Luna.

Location & Getting There

180 km NE of Adelaide. Access via Sturt Hwy.

PENINSULA YORKE & CLARE VALLEY

A perfect place to reconnect with nature

The Yorke Peninsula's sparkling blue waters and spectacular coastline is just three hours drive from Adelaide. Here you will find the ruggedly beautiful Innes National Park. Featuring secluded coves, honeycomb-tinted cliffs, dense coastal mallee and waves that surge with the Southern Ocean, Innes is a paradise for bushwalkers, surfers, birdwatchers and anglers alike. The park offers great opportunities to explore the abandoned gypsum mining town of Innes, encounter wildlife and enjoy the contrasting colours of the mallee in spring. North-east of Yorke Peninsula lies the picture-postcard Clare Valley region, known for its beautiful bushland, stately mansions and rare fossil finds.

0 km 50

Innes National Park 9415 ha

Innes National Park features a wealth of early maritime and mining history. Set amongst almost 10 000 hectares of coastal mallee, the park protects one of the largest uncleared areas on the Yorke Peninsula. The park's coastline is exposed to the elements and winter fury of the Southern Ocean, resulting in rocky headlands, wavecut platforms and sandy beaches. Up to 110 species of birds, including White-bellied Sea-Eagles and the shy Western Whipbird call this park home. Wildlife regularly seen in the park includes Western Grey Kangaroos, Emus strutting through the campground and Common Dolphins that play and feed in the shallows all year-round. The park offers excellent facilities; for hiking, camping, surfing and fishing. Historic Inneson village, once a thriving gypsum mining town, offers cosy accommodation in renovated miners' cottages, bookings required. Follow the Thomson-Pfizer Trail Hike along the old railway line that once transported gypsum from Inneson to Stenhouse Bay. Interpretation of the area's mining history and rich biodiversity is provided along the way. Or take a drive along the southern Yorke Peninsula coastline to discover tales of more than 20 shipwrecks along The Investigator Strait Maritime Heritage Trail.

GO BUSHWALKING

Stenhouse Bay Lookout Walk

📍 2 km loop 🕒 1 hr Easy Walk

The Stenhouse Bay Lookout trail follows the cliff tops overlooking the jetty and beautiful coastal cliffs. This well-marked trail provides a glimpse into the mining history of the area, while guiding you through significant coastal vegetation. A series of lookouts take advantage of the spectacular coastal views with interpretation sharing the stories of the resourcefulness of the people and resilience of the plants.

Want to know more? Visit www.parks.sa.gov.au to download the latest *Innes National Park* brochure.

PONDALOWIE CAMPGROUND UPGRADE

Please note that due to redevelopment, Pondalowie Campground in **Innes National Park** will be closed from November 2008 to June 2009 inclusive. During this time the availability of camp sites in peak periods such as Easter and school holidays may be limited. We apologize for any inconvenience.

Emus, Innes National Park

Martindale Hall Conservation Park 19 ha

At the end of a long driveway rests Martindale Hall, a magnificent nineteenth century Georgian mansion nestled in the Clare Valley. Edmund Bowman built this grand mansion on his sheep station in 1879, at a cost of £30 000. However, Edmund's extravagant lifestyle, combined with the 1880s depression and falling wool prices meant the family was forced to sell the property in 1891. Purchased by William Mortlock, Martindale Hall remained in the Mortlock family until 1950. Today, the building and surrounding land is open to the public for self-guided tours. The marble floors, T-shaped staircase, extensive library and billiard room offer a fascinating insight into the lives of South Australia's early gentry. Accommodation packages are available. Phone (08) 8843 9088.

Red Banks Conservation Park

Southern Hairy-nosed Wombat

Red Banks Conservation Park 1 030 ha

Red Banks features a scenic landscape of red earth gorges and native vegetation. Paleontologists have called this area one of the richest mega-fauna sites in Australia. Up until approximately 65 000 years ago Red Banks was home to *Diprotodons*, a large marsupial often likened to a giant wombat, weighing 1–2 tonnes. From the day visitor area, take the Landscapes of Change interpretive walk which passes deep gorges and permanent waterholes to discover what the landscape may have been like 65 000 years ago, when megafauna roamed the area. The park provides an important habitat for birds, reptiles, Short-beaked Echidnas, Southern Hairy-nosed Wombats, Western Grey and Red kangaroos and Euros.

Location & Getting There

170 km N Adelaide. Access via the Barrier Hwy.

Contact (08) 8892 3025

Blue Love Creeper, Innes National Park

Native grasslands were once widespread in the state's Mid North. Over the past 100 years their habitat has been greatly modified, and largely cleared for cropping. Mokoia Conservation Park is the first reserve in South Australia dedicated to the conservation of native grasslands. The park is too small however to adequately conserve native grasslands alone. With the help of local landholders, The Mid North Grasslands Working Group is committed to ongoing trials to balance the economic needs of primary production and determine how broader grassland conservation can be achieved.

GRASS-LANDS

Spring Gully Conservation Park 396 ha

Spring Gully Conservation Park conserves a picturesque bush landscape and protects a rare stand of Red Stringybarks, one of few remaining in South Australia. The park features steep, undulating terrain that leads into the creek bed of Spring Gully. Wildlife in the park includes Western Grey Kangaroos, Euros, Common Brushtail Possums, bats and nine species of reptiles. The walk from Blue Gum Lookout leads to a waterfall that cascades from a height of 18 metres after rain. The park is at its best during spring when wildflowers and orchids bloom. There are picnic tables, a short distance from the car park.

GO BUSHWALKING

Cascades Walk

📍 1.3 km return ⌚ 40 min 🚶 Easy Walk

From Blue Gum lookout enjoy a stroll through grassy woodlands to the Cascades. Enjoy spectacular views over the plains to the west. Be on the lookout for orchids that blossom in spring.

SAFETY HINTS & TIPS

Please remember, your safety is our concern, but your responsibility.

It is important to take care when visiting parks to ensure your impact is minimal.

Let us know before you go

If going bushwalking on long or difficult walking trails, inform a responsible person or park ranger of your proposed route and anticipated time of return. We also recommend completing a *Trip Intentions* form, available on the DEH website before you commence your hike or trek. Always carry adequate supplies of water and food and for longer walks a first aid kit and compass. Wear appropriate clothing and footwear and be prepared for changeable weather conditions – and don't forget to tell your contact person when you return.

Drink plenty of water

Water is your body's fuel. You can survive for 30 days without food, but no more than three days without water. When visiting national parks it's essential that you avoid dehydration. Consequences can include fatigue, headaches, nausea and fainting. It can also be fatal.

Ensure you are well-hydrated before beginning activity by drinking 300–500 ml of fluid. You should then aim to drink 150–250 ml every 15 minutes thereafter (1 litre of water for every hour of exercise). Avoid walking during the hottest part of the day and don't rely on tanks or creeks in the park for water.

Be sun smart

Sun protection is a serious matter in Australia. To avoid sunburn, remember to apply a broad spectrum sunscreen of at least SPF 30 and wear a hat.

Fire bans

In most parks, the fire ban season extends from 1 November to 30 April, depending on seasonal conditions. No wood fires are permitted in parks during this time. All open fires, liquid fuel and gas stoves are banned in all parks on days of extreme fire danger as declared by the Country Fire Service (CFS) and broadcast on ABC radio 891. Parks may be closed to visitors on Total Fire Ban days. Contact the CFS hotline on 1300 362 361 for more information.

HELP US HELP NATURE

Join thousands of South Australians who are helping us preserve nature.

- You can **donate** funds, land or provide support in kind.
- You can **support** us indirectly with every purchase through a BankSA GreenCard.
- You can consider a **bequest** ensuring a legacy beyond your lifetime.
- You can **volunteer** your time or expertise.

Whatever your contribution and no matter how small, it could help save a threatened species, preserve native bushland or fund a recovery project, educational program or scientific survey.

www.naturefoundation.org.au
Freecall: 1300 366 191

Save.

Protect.

Restore.

Campfires

To help conserve trees and vegetation litter which are home to precious wildlife, gas and liquid fuel stoves are preferred in parks. If a campfire is important to you, the following safety rules apply:

- Check if campfires are permitted and observe all fire bans.
- Always use existing fire places.
- Make only small campfires, adequate for warmth/cooking.
- Never leave a fire unattended.
- Extinguish the fire with water before you leave, and make absolutely sure the fire is out.

As native timber in arid and semi-arid areas is in short supply in South Australia, firewood is generally not supplied in South Australian parks. You may therefore be required to bring your own – enough for a small fire. If in doubt, call the park you plan to visit before you leave. Please note fines apply for the removal and damage of native plants, including wood or timber in South Australian parks.

Watch out for wildlife

At dusk and dawn, native wildlife often become more active. This makes them more vulnerable to injury caused by traffic on park roads. If you must drive at these times, please reduce your speed and keep watch for wildlife.

Road conditions

Many roads leading to and within parks are sealed. Some roads, however are unsealed, but suitable for a conventional 2WD vehicle. Road conditions can change dramatically depending on weather conditions. For Far North road conditions please contact Transport SA on 1300 361 033 or Port Augusta DEH office on (08) 8648 5300.

Your vehicle

Remember, when you travel you are dependent on your vehicle. It's also worth remembering that many parks in South Australia are in remote areas. If you're planning a visit to one of these, be sure to take appropriate precautions such as checking that your vehicle is in good condition, has been serviced and has sufficient spare parts to cover most contingencies. Even in relatively settled areas, service and parts can be difficult to obtain and are expensive. Being prepared can save inconvenience.

National Parks Code

Help protect your national parks by following these guidelines:

- Leave your pets at home.
- Take your rubbish home with you.
- Observe fire restrictions usually from 1 November to 30 April. Check CFS é hotline on 1300 362 361 é
- Conserve native habitat by using liquid fuel or gas stoves.
- Camp only in designated areas.
- Respect geological and heritage sites.
- Keep our wildlife wild. Do not feed or disturb animals, or remove native plants.
- Keep to defined vehicle tracks and walking trails.
- Be considerate of other park users.

Thank you for leaving the bush in its natural state for the enjoyment of others.

WHERE CAN I TAKE MY PET?

South Australia's national parks are homes for native wildlife.

The policy of the Department for Environment and Heritage is that pets are not allowed in most parks and reserves.

Dog and cat scent can frighten wildlife away, some pets may kill wildlife, or disrupt other park users. Pets can also catch diseases or parasites from native animals.

Dogs are however allowed in most recreation parks, with the exception of Granite Island (home to a colony of Little Penguins).

Dog-friendly parks in metropolitan Adelaide include:

- Belair National Park
- Mount George Conservation Park (recreation zone only)
- Morialta Conservation Park (recreation zone only)
- Onkaparinga River Recreation Park
- Para Wirra Recreation Park
- Black Hill Conservation Park (recreation zone only)
- Mark Oliphant Conservation Park, (Loffia Park recreation zone only)
- Marino Conservation Park (on specially marked dog walking trails only).

Regional areas include:

- Chowilla Game Reserve
- Innamincka Regional Reserve.

Dogs that are used for a special purpose, such as guide dogs, can be taken into any park. Cats are not permitted in any park under any circumstances.

Your dog must be restrained on a lead, no longer than three metres at all times. If you'd like to find out more, download a free copy of the *National Parks and Your Pet* brochure from www.parks.sa.gov.au or call the DEH Information Line on **(08) 8204 1910**.

PLACES TO STAY!

Accommodation in national parks offers a surprising variety of choice for every taste and budget.

In South Australia, park accommodation ranges from modern eco-retreats to pioneer huts, resorts with restaurants and swimming pools, to historic lighthouse keepers' cottages overlooking the sea.

GET BACK TO NATURE

Did you know there are more than 20 unique places to stay in South Australia's national parks?

For those who enjoy their creature comforts, accommodation in parks provides access to a wonderful range of nature retreats. - Barossa Valley (Sandy Creek Conservation Park)
- Southern Flinders Ranges (Wirrabara Forest – State Forest).

YHA offers groups, families and backpackers budget accommodation ranging from huts, cottages and farmhouses, fully equipped for groups and independent travellers. They are well located on the Heysen, Yurrebilla, Mawson and other trails. Contact the Youth Hostels Association on **(08) 8414 3001** for more information or visit their website www.yha.com.au

VOLUNTEERING IN PARKS

PEOPLE WHO
MAKE A LASTING
DIFFERENCE

Volunteering is a great way to give something back to nature and the community.

Everyone has something to offer, even if you only have a small amount of time to spare there are plenty of amazing ways you can help.

You can:

- Care for habitat by planting trees or controlling weeds.
- Help out annual wildlife surveys.
- Learn to restore fragile heritage sites.
- Meet like-minded people and make new friends.
- Lead a guided nature walk or become a campground host.

The DEH Volunteer Support Unit can match your interests to one-off special events, weekend conservation projects, or put you in touch with the Friends of Parks or special-interest group nearest to you.

New volunteers are always welcome!

To find out how easy it is to get involved visit www.parks.sa.gov.au/getinvolved or call the DEH Volunteer Support Unit on **(08) 8124 4784 for details.**

Flinders Ranges & Outback

The magnificent Flinders Ranges National Park is one of South Australia's favourite holiday destinations. Wilpena Pound Resort, the hub of the national park, offers a range of places to stay from camp sites to budget cabins and luxury accommodation.

If you're seeking adventure and wilderness, Vulkathunha-Gammon Ranges National Park in the North Flinders Ranges offers pioneer cottages and shearers' quarters that provide guests with a taste of the outback.

Three hours north of Adelaide lies the South Flinders Ranges, a region known for its dramatic gorges, diverse flora and bushwalking trails. Here you can find two classic Australian homesteads in The Dutchmans Stern Conservation Park near Quorn and Mount Remarkable National Park near Wilmington. A small cabin ideal for hikers is also available at Mambray Creek in Mount Remarkable National Park.

Flinders Ranges National Park

Wilpena Pound Resort

Offering accommodation options, varying from backpackers' accommodation to deluxe motel suites and modern self-contained units.

Facilities	Linen	Sleeps	Prices from*

Karatta Lodge, Flinders Chase National Park

Kangaroo Island

Kangaroo Island's lighthouse keepers' cottages are located in isolated and stunningly beautiful locations. Cape du Couedic in Flinders Chase National Park at the western end of the island offers overnight accommodation in one of three spacious heritage-listed lightkeepers' cottages. Two pioneer cottages are also available at Rocky River – the gateway to Flinders Chase National Park.

In the remote north-west corner of the island perched high above the cliffs, Cape Borda Lightstation offers one lighthouse keepers' cottage, a cabin, and cosy hut for two.

While at the rugged easternmost point of the island in Cape Willoughby Conservation Park, Seymour and Thomas lightkeepers' cottages savour spectacular views of Backstairs Passage.

Cape Willoughby National Park

Seymour Cottage & Thomas Cottage

Beautifully restored, fully furnished lighthouse keepers' cottages.

Facilities	Linen	Sleeps	Prices from*
	Yes	8	\$150 for 2 people

Flinders Chase National Park – Cape Borda Lightstation

Wonambi Fossil Centre

Yorke Peninsula & Clare Valley

For something a little different, stay in renovated miners' cottages in Innes National Park on beautiful Yorke Peninsula. There are six cottages to choose from, ranging from a basic hut to self-contained lodges.

Martindale Hall in the Clare Valley, combines original nineteenth century charm with today's modern comforts. Experience the ambience of a bygone era with original décor including an 1878 billiard table and library.

If you're seeking peace and tranquillity, Troubridge Island Hideaway offers the perfect escape. This original lighthouse keepers' cottage at the foot of Yorke Peninsula is situated on a small island known for its bird life.

Innes National Park

Engineers Lodge and Managers Lodge

Heritage-listed miners' cottages with verandah overlooking salt lakes.

Facilities	Linen	Sleeps	Prices from*
	BYO	10	\$100 for lodge (min 2 nights)

Miners Lodge & Gatehouse Lodge

TAKE A TOUR TODAY!

Travel with a licensed tour operator and leave the troubles of touring alone behind. You can sit back and relax as your experienced guide provides an informative tour that showcases the state's unique natural environment.

Benefits

You will benefit from a number of additional services that a tour operator may provide. Tour guides can interpret the landscape, bird life, fauna, flora and history of our protected areas to leave you with lasting memories of your South Australian national park experience. Some tour operators offer specialist tourism experiences including off-road outback tours, guided or tag along 4WD tours, boat tours, bus or coach tours, wildlife interactions and recreational experiences. For some tours, catering, guided bushwalks and accommodation may be included.

How to choose a tour operator?

Before you book your next tour, please make sure you choose a tour operator that is licensed by the Department for Environment and Heritage. These operators are identifiable by the logo shown below which may appear in their brochures, websites and other promotional material.

To help you select a tour operator for your next national parks trip, you can view a current list of licensed operators at

www.environment.sa.gov.au/parks/visitor/operators.html

So book a tour today with a licensed tour operator who will ensure you get the most out of your national park experience.
