## RØDE TO THE RESCUE

Custom RØDE microphone on tour with Barbra Streisand

Wanting to improve on the already high-quality microphone used during his last tour, respected sound man Bruce Jackson approached the Engineers at RØDE to come up with a custom microphone for Barbra Streisand's history making European tour.

The team at RØDE were briefed by Bruce, and his specifications were clear; an ultra-smooth high frequency response as well as a tailored polar pattern with greater side rejection.

Barbra Streisand using the RØDE 'Jackson Special'

"I am very pleased with the results" an excited Bruce Jackson exclaimed. "RØDE has done a great job tweaking all the variables to come up with a unique sounding capsule that I'm very pleased with and I think it will be embraced by many of my fellow sound men".

Bruce Jackson

The custom microphone is currently being used as the main vocal mic for Barbra Streisand as she conducts her first tour of continental Europe, and her first performance in the UK in over ten years.

Although the RØDE 'Jackson Special' has received an amazing response from all who have heard it, RØDE has no plans to manufacture the unit, but may make it available to leading touring agencies and artists as a custom model by request.

This RØDE 'Jackson Special' is yet another example of the talent and innovation from the engineers at RØDE Microphones.
