US-289 THREE MILE ISLAND-1

Operator: EXELON (Exelon Generation Co., LLC)
 Contractor: B&W (BABCOCK & WILCOX CO.)

1. Station Details

Type: PWR
 Net Reference Unit Power (RUF) at the beginning of 2010: 805.0 MW(e)
 Design Net Capacity: 819.0 MW(e)
 Design Discharge Burnup: 54000 MW.d/t
 Status at end of year: Operational

2. Production Summary 2010

Net Energy Production: 6633.8 GW(e).h
 Energy Availability Factor: 92.5%
 Load Factor: 94.1%
 Operating Factor: 92.3%
 Energy Unavailability Factor: 7.5%
 Total Off-line Time: 676 hours

3. 2010 Monthly Performance Data

US-390 WATTS BAR-1

Operator: TVA (TENNESSEE VALLEY AUTHORITY)
Contractor: WH (WESTINGHOUSE ELECTRIC CORPORATION)

1. Station Details

Type: PWR
Net Reference Unit Power (RUP at the beginning of 2010): 1218.0 MW(e)
Design Net Capacity: 1218.0 MW(e)
Design Discharge Burnup: 36000 MW.d/t
Status at end of year: Operational

2. Production Summary 2010

Net Energy Production: 9738.5 GW(e).h
Energy Availability Factor: 97.5%
Load Factor: 99.0%
Operating Factor: 97.5%
Energy Unavailability Factor: 2.5%
Total Off-line Time: 216 hours

3. 2010 Monthly Performance Data

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 22-NiMoCr-37
Vessel cladding material	: <Not Available>
Vessel cladding material specification	: 5 CrNiNb 19-9
Reactor vessel overall length/height [m]	: 12
Inside shell diameter [m]	: 5.36
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zry-4
Average fuel enrichment [% of U235]	: 0.85
Refuelling frequency [month]	: <Not Available>
Part of the core refuelled [%]	: <Not Available>
Average discharge burnup [MWd/t]	: 11140
Active core diameter [m]	: 4.51
Active core height/length [m]	: 5.3
Number of fissile fuel assemblies/bundles	: 250
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 38.8
Moderator weight [t]	: <Not Available>
Number of fuel elements per assembly/bundle	: 36
Fuel clad thickness [mm]	: 0.55
Average core power density [kW/dm ³]	: 13.74
Average fuel power density [kW/kgU]	: 30.56
Fuel linear heat generation rate [kW/m]	: 23.22

Reactivity control

Control rod material	: <Not Available>
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: <Not Available>
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: <Not Available>
Number of control rod assemblies	: <Not Available>

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: 293.4
Operating coolant pressure [MPa]	: 11.5
Reactor outlet temperature [°C]	: 303.3
Reactor inlet temperature [°C]	: 264
Coolant mass flow at the rated power [t/h]	: 21000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 534.7
Design heat transfer surface [m ²]	: 3454

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.5
Design pressure difference [MPa]	: <Not Available>

Pressurizer

Total volume [m ³]	: 40
Number of safety valves	: 3
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 1980

Containment systems

Containment type	: Single
Containment Shape	: Spherical
Containment structure	: Steel
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	: <Not Available>
Number of containment spray pumps	: <Not Available>
Containment design pressure [MPa]	: 2.8
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: <Not Available>

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 1
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: <Not Available>
LPSI system pressure [MPa]	: <Not Available>
HPSI system flowrate [t/h]	: <Not Available>
LPSI system flowrate [t/h]	: <Not Available>

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: <Not Available>
Number of IP cylinders per turbine	: <Not Available>
Number of LP cylinders per turbine	: <Not Available>
HP cylinder inlet steam pressure [MPa]	: 4.26
HP cylinder Inlet steam moisture [%]	: <Not Available>
HP cylinder inlet steam temperature [°C]	: 254
HP cylinder Inlet steam flow rate [t/h]	: 1856

Main generator

Rated active power [MWe]	: 357
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	: <Not Available>
Output frequency [Hz]	: <Not Available>

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Available>

Number of main condensate pumps	: <Not Available>
Number of main condensate pumps required for full power	: <Not Available>
Condenser vacuum at the full power (absolute pressure) [kPa]	: <Not Available>

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 2
Number of feedwater pumps required for full power operation	: <Not Available>
Feedwater discharge pressure [MPa]	: <Not Available>
Steam generator feedwater inlet temperature [°C]	: <Not Available>

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: <Not Available>
Cable segregation within the unit used for	: <Not Available>
On-site fire brigade	: <Not Available>
Off-site fire brigade response time	: <Not Available>

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: <Not Available>
Number of on site non-safety related gas turbines	: <Not Available>
Other on-site emergency AC power sources	: 3
Estimated time reserve of the batteries at full load [h]	: <Not Available>
Total installed capacity of the on-site emergency power sources per unit [MW]	: <Not Available>
Total battery capacity [Ah]	: <Not Available>

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 10120
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Available>

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 304 L-SS-CALANDRIA
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 6.3
Inside shell diameter [m]	: 0.104
Shell thickness [mm]	: 4.34
Number of pressure channels	: -
Pressure channel material	: Zircaloy
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 7190
Active core diameter [m]	: 6.28
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 4560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 85.73
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.42
Average core power density [kW/dm ³]	: 10.8
Average fuel power density [kW/kgU]	: 23.2
Fuel linear heat generation rate [kW/m]	: 24.75

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium/Boron
Burnable neutron absorber material specification	: B/GD
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 25

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 10.2
Reactor outlet temperature [°C]	: 312
Reactor inlet temperature [°C]	: 266
Coolant mass flow at the rated power [t/h]	: 8800

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.3
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.62
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 253
HP cylinder Inlet steam flow rate [t/h]	: 3600

Main generator

Rated active power [MWe]	: 648
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/NB
Average fuel enrichment [% of U235]	:
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	:
Average discharge burnup [MWd/t]	: 28600
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 83
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 12.5
Reactor outlet temperature [°C]	: 295.8
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 39000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 40
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	:
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 6
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 13.0
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	: 45
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	: 0.5
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: 1338

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 259
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5.2

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 4
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 740
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 1288

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SOUDOTENAX-56
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 10.6
Inside shell diameter [m]	: 3.327
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 2.46
Active core height/length [m]	: 2.44
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 31.7
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 179
Fuel clad thickness [mm]	: 0.62
Average core power density [kW/dm ³]	: 102.6
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 22.22

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 21

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.73
Reactor outlet temperature [°C]	: 315.08
Reactor inlet temperature [°C]	: 284.7
Coolant mass flow at the rated power [t/h]	: 26120

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: -
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 24
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 2.9
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.8
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 272
HP cylinder Inlet steam flow rate [t/h]	: 2400

Main generator

Rated active power [MWe]	: 415
Rated apparent power [MVA]	: 500
Output voltage [kV]	: -
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SOUDOTENAX-56
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 10.6
Inside shell diameter [m]	: 3.32
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 2.46
Active core height/length [m]	: 2.44
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 31.7
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 179
Fuel clad thickness [mm]	: 0.62
Average core power density [kW/dm ³]	: 102.6
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 22.22

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 21

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.73
Reactor outlet temperature [°C]	: 315.08
Reactor inlet temperature [°C]	: 284.7
Coolant mass flow at the rated power [t/h]	: 26120

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: 24
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 2.9
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.8
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 272
HP cylinder Inlet steam flow rate [t/h]	: 2400

Main generator

Rated active power [MWe]	: 415
Rated apparent power [MVA]	: 500
Output voltage [kV]	: -
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA- 508-CL-2
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 12
Inside shell diameter [m]	: 4
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 49000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 69.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 115
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 20

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 32

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.73
Reactor outlet temperature [°C]	: 315.08
Reactor inlet temperature [°C]	: 284.7
Coolant mass flow at the rated power [t/h]	: 26120

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: 40
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Steel+Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 3.5
Design leakage rate [% per day]	: 0.25
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Design thermal capacity per SG [MW]	: 958
Design heat transfer surface [m ²]	:

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.6
Design pressure difference [MPa]	: 0.85

Pressurizer

Total volume [m ³]	: 39.7
Number of safety valves	: 3
Number of relief valves	: 3
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: <Not Available>
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	: 68000
Number of containment spray pumps	: 6
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: 0.178
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 17
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 136.2
LPSI system flowrate [t/h]	: 910

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Superheated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.65
HP cylinder Inlet steam moisture [%]	: 0.2
HP cylinder inlet steam temperature [°C]	: 267.5
HP cylinder Inlet steam flow rate [t/h]	: 720

Main generator

Rated active power [MWe]	: 435
Rated apparent power [MVA]	: 540
Output voltage [kV]	: 18
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 6
Number of main condensate pumps required for full power	: 4
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4

Feedwater system

Number of turbine driven main feedwater pumps	: 4
Number of motor-driven main feedwater pumps	: 4
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 7.5
Steam generator feedwater inlet temperature [°C]	: 225

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 2
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 3
Total installed capacity of the on-site emergency power sources per unit [MW]	: 9.4
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1650
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 13.173
Inside shell diameter [m]	: 4
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.35
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 82.2
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 104.5
Average fuel power density [kW/kgU]	: 42
Fuel linear heat generation rate [kW/m]	: 17.85

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GDO2
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 32

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.52
Reactor outlet temperature [°C]	: 324.7
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 15176

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	:
Design heat transfer surface [m2]	:

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5
Design pressure difference [MPa]	:

Pressurizer

Total volume [m3]	: 39.6
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: <Not Available>
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 3.5
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 12
LPSI system pressure [MPa]	: 2
HPSI system flowrate [t/h]	: 250
LPSI system flowrate [t/h]	: 470

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Available>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.4
HP cylinder Inlet steam moisture [%]	: <Not Available>
HP cylinder inlet steam temperature [°C]	: 268
HP cylinder Inlet steam flow rate [t/h]	: 1511

Main generator

Rated active power [MWe]	: 941
Rated apparent power [MVA]	: 1130
Output voltage [kV]	: 24
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: <Not Available>
Steam generator feedwater inlet temperature [°C]	: 225

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: <Not Available>
Number of on site non-safety related gas turbines	: <Not Available>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 3
Total installed capacity of the on-site emergency power sources per unit [MW]	: 35
Total battery capacity [Ah]	: <Not Available>

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 800
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 12.985
Inside shell diameter [m]	: 3.998
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 65
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	:

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 5.3
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 8
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.295
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 284.5
HP cylinder Inlet steam flow rate [t/h]	: 7200

Main generator

Rated active power [MWe]	: 1309
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	: -
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 2
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: 4
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1084
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

BG-5

KOZLODUY-5

BULGARIA

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 4.136
Shell thickness [mm]	: 192.5
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 15
Part of the core refuelled [%]	: 50
Average discharge burnup [MWd/t]	: 27000
Active core diameter [m]	: 3.16
Active core height/length [m]	: 3.55
Number of fissile fuel assemblies/bundles	: 163
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 76
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 312
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 111
Average fuel power density [kW/kgU]	: 45.5
Fuel linear heat generation rate [kW/m]	: 17.6

Reactivity control

Control rod material	: <Not Available>
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: B-4C
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 16
Reactor outlet temperature [°C]	: 320
Reactor inlet temperature [°C]	: 290
Coolant mass flow at the rated power [t/h]	: 84000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Available>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 285
HP cylinder Inlet steam flow rate [t/h]	: 5980

Main generator

Rated active power [MWe]	: 1000
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.6
Steam generator feedwater inlet temperature [°C]	: 220

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 5
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 2
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 18.9
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: 304L SS CALANDRIA
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.951
Inside shell diameter [m]	: 8.52
Shell thickness [mm]	: 31.7
Number of pressure channels	: 380
Pressure channel material	: Zircaloy
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 8750
Active core diameter [m]	: 5.67
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 6240
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 119
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.42
Average core power density [kW/dm ³]	: 19
Average fuel power density [kW/kgU]	: 24
Fuel linear heat generation rate [kW/m]	: 24.5

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: <Not Available>
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 9.36
Reactor outlet temperature [°C]	: 300
Reactor inlet temperature [°C]	: 249
Coolant mass flow at the rated power [t/h]	: 43200

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 8
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: ELEC-MECH
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Reinforced Concrete
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 1.74
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.37
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 254
HP cylinder Inlet steam flow rate [t/h]	: 4450

Main generator

Rated active power [MWe]	: 825
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: 304L SS CALANDRIA
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.951
Inside shell diameter [m]	: 8.52
Shell thickness [mm]	: 31.7
Number of pressure channels	: 480
Pressure channel material	: Zircaloy
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 7710
Active core diameter [m]	: 5.67
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 6240
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 119
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.42
Average core power density [kW/dm ³]	: 18.9
Average fuel power density [kW/kgU]	: 23.8
Fuel linear heat generation rate [kW/m]	: 24.5

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 24

Reactor coolant system

Number of external reactor coolant loops	: <Not Available>
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 9.49
Reactor outlet temperature [°C]	: 305
Reactor inlet temperature [°C]	: 257
Coolant mass flow at the rated power [t/h]	: 44000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 8
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: ELEC-MECH
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Reinforced Concrete
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.88
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.78
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 260
HP cylinder Inlet steam flow rate [t/h]	: 4933

Main generator

Rated active power [MWe]	: 915
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.78
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 260
HP cylinder Inlet steam flow rate [t/h]	: 4933

Main generator

Rated active power [MWe]	: 915
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Flat End
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: ASME SA240 Type 304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: <Not Applicable>
Reactor vessel overall length/height [m]	: 5.029
Inside shell diameter [m]	: 8.458
Shell thickness [mm]	: 31.75
Number of pressure channels	: 480
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: 4.23

Reactor Core

Fuel assembly geometry	: Circular
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 0.72
Refuelling frequency [month]	: <Not Applicable>
Part of the core refuelled [%]	: <Not Applicable>
Average discharge burnup [MWd/t]	: 8625
Active core diameter [m]	: 7.068
Active core height/length [m]	: 6.06
Number of fissile fuel assemblies/bundles	: 6240
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 136.42
Moderator weight [t]	: 334.4
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.419
Average core power density [kW/dm ³]	: 11.91
Average fuel power density [kW/kgU]	: 46.62
Fuel linear heat generation rate [kW/m]	: 24

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gadolinium nitrate
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: <Not Available>
Number of control rod assemblies	: 24

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: 220
Operating coolant pressure [MPa]	: 10
Reactor outlet temperature [°C]	: 310
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 38412

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: 4
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	: Carbon Steel
Drum separator shell material	: Carbon Steel
Design thermal capacity per SG [MW]	: 664
Design heat transfer surface [m ²]	: 4830

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 9.4
Design pressure difference [MPa]	: 1.9

Pressurizer

Total volume [m ³]	: 63.63
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1500

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 48477
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.0965
Design leakage rate [% per day]	: 4.29
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 6
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 4.03
LPSI system pressure [MPa]	: 1.72
HPSI system flowrate [t/h]	: 1638
LPSI system flowrate [t/h]	: 6840

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 1

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 4.93
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 263
HP cylinder Inlet steam flow rate [t/h]	: 4710.56

Main generator

Rated active power [MWe]	: 936
Rated apparent power [MVA]	: 1101
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.2

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 4
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 3
Feedwater discharge pressure [MPa]	: 5.07
Steam generator feedwater inlet temperature [°C]	: 176.7

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 4
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 4
Number of on-site safety related diesel generators (available per unit)	: <Not Applicable>
Number of on-site safety related gas turbines (available per unit)	: 4
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 2 emergency power generators, gas turbines
Estimated time reserve of the batteries at full load [h]	: 0.5
Total installed capacity of the on-site emergency power sources per unit [MW]	: 6.8
Total battery capacity [Ah]	: 3340

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 370944
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: Main Steam
-------------------------	--------------

Number of heat connection points per unit	: 5
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: 0.96

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Flat End
Reactor vessel centreline orientation	: Horizontal

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 9.4
Design pressure difference [MPa]	: 1.9

Pressurizer

Total volume [m ³]	: 63.63
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1500

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 48477
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.0965
Design leakage rate [% per day]	: 4.29
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 6
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 4.03
LPSI system pressure [MPa]	: 1.72
HPSI system flowrate [t/h]	: 1638
LPSI system flowrate [t/h]	: 6840

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 1

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 4.93
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 263
HP cylinder Inlet steam flow rate [t/h]	: 4710.56

Main generator

Rated active power [MWe]	: 936
Rated apparent power [MVA]	: 1101
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.2

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 4
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 3
Feedwater discharge pressure [MPa]	: 5.07
Steam generator feedwater inlet temperature [°C]	: 176.7

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 4
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 4
Number of on-site safety related diesel generators (available per unit)	: <Not Applicable>
Number of on-site safety related gas turbines (available per unit)	: 4
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 2 emergency power generators, gas turbines
Estimated time reserve of the batteries at full load [h]	: 0.5
Total installed capacity of the on-site emergency power sources per unit [MW]	: 6.8
Total battery capacity [Ah]	: 3340

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 370944
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: Main Steam
-------------------------	--------------

Number of heat connection points per unit	: 5
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: <Not Available>
Extraction steam pressure [MPa]	: 0.96

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ZR-NB
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 6.36
Inside shell diameter [m]	: 0.103
Shell thickness [mm]	: 13.175
Number of pressure channels	: 380
Pressure channel material	: Zircaloy
Pressure channel wall thickness [mm]	: 4.343

Reactor Core

Fuel assembly geometry	: Circular
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 0.72
Refuelling frequency [month]	: <Not Applicable>
Part of the core refuelled [%]	: <Not Applicable>
Average discharge burnup [MWd/t]	: 7000
Active core diameter [m]	: 7.69
Active core height/length [m]	: 6.06
Number of fissile fuel assemblies/bundles	: 4560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 65
Moderator weight [t]	: 255.67
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.38
Average core power density [kW/dm ³]	: 12.9
Average fuel power density [kW/kgU]	: 80
Fuel linear heat generation rate [kW/m]	: 45.4

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: cadmium
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: Gd Injection
Number of control rod assemblies	: 21

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: 207.5
Operating coolant pressure [MPa]	: 10.2
Reactor outlet temperature [°C]	: 310
Reactor inlet temperature [°C]	: 266
Coolant mass flow at the rated power [t/h]	: 27720

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	: carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 516
Design heat transfer surface [m ²]	: 3177

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 5
Design pressure difference [MPa]	: 1.7

Pressurizer

Total volume [m ³]	: 45
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 48477
Number of containment spray pumps	: 1
Containment design pressure [MPa]	: 1.27
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 1
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 4.5
LPSI system pressure [MPa]	: 1.2
HPSI system flowrate [t/h]	: <Not Available>
LPSI system flowrate [t/h]	: <Not Available>

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.64
HP cylinder Inlet steam moisture [%]	: 0.2
HP cylinder inlet steam temperature [°C]	: 258
HP cylinder Inlet steam flow rate [t/h]	: 4000

Main generator

Rated active power [MWe]	: 685
Rated apparent power [MVA]	: 805.88
Output voltage [kV]	: 24
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Copper

Number of main condensate pumps	: 2
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 3
Feedwater discharge pressure [MPa]	: 5.481
Steam generator feedwater inlet temperature [°C]	: 186.9

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: 2
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 4
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 6
Number of on-site safety related gas turbines (available per unit)	: 4
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 6
Estimated time reserve of the batteries at full load [h]	: 8
Total installed capacity of the on-site emergency power sources per unit [MW]	: 11.9
Total battery capacity [Ah]	: 1800

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 45000
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 12000

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.94
Inside shell diameter [m]	: 8.09
Shell thickness [mm]	: 114

Total number of pumps/circulators	: 16
Number of pumps per RCS loop	: 8
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Reinforced Concrete
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.46
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.8
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 246
HP cylinder Inlet steam flow rate [t/h]	: 2930

Main generator

Rated active power [MWe]	: 540
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.94
Inside shell diameter [m]	: 7.6
Shell thickness [mm]	: 26.8
Number of pressure channels	: 480
Pressure channel material	: Zircaloy
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 8330
Active core diameter [m]	: 5.94
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 4560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 90.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 28
Fuel clad thickness [mm]	: 0.42
Average core power density [kW/dm ³]	: 15.3
Average fuel power density [kW/kgU]	: 19
Fuel linear heat generation rate [kW/m]	: 27.3

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 21

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 9
Reactor outlet temperature [°C]	: 293.4
Reactor inlet temperature [°C]	: 249.5
Coolant mass flow at the rated power [t/h]	: 27820

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 12
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: MONEL-400
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 16
Number of pumps per RCS loop	: 8
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Reinforced Concrete
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.46
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.8
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 246
HP cylinder Inlet steam flow rate [t/h]	: 2930

Main generator

Rated active power [MWe]	: 540
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.64
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 258
HP cylinder Inlet steam flow rate [t/h]	: 4100

Main generator

Rated active power [MWe]	: 680
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

CN-2

GUANGDONG-1

CHINA

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 16- MND-5
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 308L-309L
Reactor vessel overall length/height [m]	: 13.208
Inside shell diameter [m]	: 3.99
Shell thickness [mm]	: 212
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: 35000
Active core diameter [m]	: -
Active core height/length [m]	: -
Number of fissile fuel assemblies/bundles	: -
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.4
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 109
Average fuel power density [kW/kgU]	: 39.93
Fuel linear heat generation rate [kW/m]	: 18.6

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 28

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.81
Reactor outlet temperature [°C]	: 327.6
Reactor inlet temperature [°C]	: 292.4
Coolant mass flow at the rated power [t/h]	: 68520

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: -
Tube material	: INCONEL-690
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5.2
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.76
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 282.1
HP cylinder Inlet steam flow rate [t/h]	: 5810

Main generator

Rated active power [MWe]	: 983.8
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -

HP cylinder inlet steam pressure [MPa]	: -
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: -
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: <Not Available>
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: -
Reactor vessel centreline orientation	: -
Reactor vessel material	: -
Reactor vessel material specification	: -
Vessel cladding material	: -
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: -
Inside shell diameter [m]	: -
Shell thickness [mm]	: -
Number of pressure channels	: -
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: -
Fuel Form	: -
Fuel material	: -
Refuelling type	: -
Moderator material	: -
Fuel clad material	: -
Fuel clad material specification	: -
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: -
Active core diameter [m]	: -
Active core height/length [m]	: -
Number of fissile fuel assemblies/bundles	: -
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: -
Fuel weight [t]	: -
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: -
Fuel clad thickness [mm]	: -
Average core power density [kW/dm ³]	: -
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: -

Reactivity control

Control rod material	: -
Burnable neutron absorber material	: -
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: -
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: -
Coolant type	: -
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: -
Reactor outlet temperature [°C]	: -
Reactor inlet temperature [°C]	: -
Coolant mass flow at the rated power [t/h]	: -

Steam generators (SG)/drum separators

Type of SG	: -
SG output	: -
Number of SG	: -
Number of drum separators	: -
Tube shape	: -
Tube material	: -
SG shell material	: -
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: -
Number of pumps per RCS loop	: -
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: -
Number of safety valves	: -
Number of relief valves	: -
Installed heater power [kW]	: -

Containment systems

Containment type	: -
Containment Shape	: -
Containment structure	: -
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: -
Number of LPSI systems	: -
Number of hydroaccumulators	: -
Number of core spray system pumps (BWR)	: -
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: -

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: -

Secondary systems

Turbine

Turbine type	: -
Number of turbine-generators per unit/reactor	: -
Turbine speed [rpm]	: -
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: -
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: -
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: -
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: -
Number of condensers per turbine-generator	: -
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: -
Number of motor-driven main feedwater pumps	: -
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: -
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: -
Number of diesel driven pumps	: -
Number of turbine driven pumps	: -

Fire protection system

On-site fire suppression/extinguishing system	: -
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: -
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: -
Number of on-site safety related diesel generators (available per unit)	: -
Number of on-site safety related gas turbines (available per unit)	: -
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: -
Interim storage facility type	: -
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: -
-------------------------	-----

Number of heat connection points per unit	: -
Number of intermediate circuits/heat exchangers	: -
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-111
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 308L
Reactor vessel overall length/height [m]	: 10.705
Inside shell diameter [m]	: 3.382
Shell thickness [mm]	: 175
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 3.4
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33.33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 2.486
Active core height/length [m]	: 2.9
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 40.746
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 204
Fuel clad thickness [mm]	: 0.7
Average core power density [kW/dm ³]	: 68.6
Average fuel power density [kW/kgU]	: 26.9
Fuel linear heat generation rate [kW/m]	: 13.5

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: GG-17
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 14.6
Operating coolant pressure [MPa]	: 15.2
Reactor outlet temperature [°C]	: 308.5
Reactor inlet temperature [°C]	: 281.5
Coolant mass flow at the rated power [t/h]	: 24000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	: S271
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 484
Design heat transfer surface [m ²]	: 3077

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.2
Design pressure difference [MPa]	: 0.74

Pressurizer

Total volume [m ³]	: 35
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1350

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 49000
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 2.65
Design leakage rate [% per day]	: 0.22
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 8
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 75
LPSI system flowrate [t/h]	: 450

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: 0.5
HP cylinder inlet steam temperature [°C]	: 268.1
HP cylinder Inlet steam flow rate [t/h]	: 1866

Main generator

Rated active power [MWe]	: 310
Rated apparent power [MVA]	: 364.7
Output voltage [kV]	: 18
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3.9

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.4
Steam generator feedwater inlet temperature [°C]	: 215

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: 1
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 0
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 2
Total battery capacity [Ah]	: 2000

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1026
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Carbon Steel
Reactor vessel material specification	: 16MND5
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 308L
Reactor vessel overall length/height [m]	: 12.978
Inside shell diameter [m]	: 3.84
Shell thickness [mm]	: 205
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 3.25
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: -
Active core diameter [m]	: 2.67
Active core height/length [m]	: 3.6576
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 63.283
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 94.30
Average fuel power density [kW/kgU]	: 34.71
Fuel linear heat generation rate [kW/m]	: 16.09

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 33

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 160
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 315.2
Reactor inlet temperature [°C]	: 288.8
Coolant mass flow at the rated power [t/h]	: 24290

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: -
Tube material	: INCOLOY-690
SG shell material	: SA-508
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 968
Design heat transfer surface [m2]	: 5630

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.236
Design pressure difference [MPa]	: 0.91

Pressurizer

Total volume [m3]	: 27
Number of safety valves	: 3
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: 1440

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 50637
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: .45
Design leakage rate [% per day]	: 0.3
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 17.67
LPSI system pressure [MPa]	: 1.00
HPSI system flowrate [t/h]	: 34
LPSI system flowrate [t/h]	: 680

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.41
HP cylinder Inlet steam moisture [%]	: 0.5
HP cylinder inlet steam temperature [°C]	: 279.9
HP cylinder Inlet steam flow rate [t/h]	: 3862

Main generator

Rated active power [MWe]	: 650
Rated apparent power [MVA]	: 650
Output voltage [kV]	: 20
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 11.8

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.6
Steam generator feedwater inlet temperature [°C]	: 316

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related cables

Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 11.8

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.6
Steam generator feedwater inlet temperature [°C]	: 316

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: <Not Applicable>
Total installed capacity of the on-site emergency power sources per unit [MW]	: <Not Applicable>
Total battery capacity [Ah]	: <Not Applicable>

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 690
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Carbon Steel
Reactor vessel material specification	: 16MND5
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 308L
Reactor vessel overall length/height [m]	: 12.978
Inside shell diameter [m]	: 3.84
Shell thickness [mm]	: 205
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 3.25
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: <Not Available>
Active core diameter [m]	: 2.67
Active core height/length [m]	: 3.6576
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 63.283
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 94.30
Average fuel power density [kW/kgU]	: 34.71
Fuel linear heat generation rate [kW/m]	: 16.09

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 33

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 160
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 315.2
Reactor inlet temperature [°C]	: 288.8
Coolant mass flow at the rated power [t/h]	: 24290

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	:
Tube material	: INCOLOY-690
SG shell material	: SA-508
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 968
Design heat transfer surface [m ²]	: 5630

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.236
Design pressure difference [MPa]	: 0.91

Pressurizer

Total volume [m ³]	: 27
Number of safety valves	: 3
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: 1440

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 50637
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: .45
Design leakage rate [% per day]	: 0.3
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 17.67
LPSI system pressure [MPa]	: 1.00
HPSI system flowrate [t/h]	: 34
LPSI system flowrate [t/h]	: 680

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.41
HP cylinder Inlet steam moisture [%]	: 0.5
HP cylinder inlet steam temperature [°C]	: 279.9
HP cylinder Inlet steam flow rate [t/h]	: 3862

Main generator

Rated active power [MWe]	: 650
Rated apparent power [MVA]	: 650
Output voltage [kV]	: 20
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 11.8

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 3
Feedwater discharge pressure [MPa]	: 8.6
Steam generator feedwater inlet temperature [°C]	: 316

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Applicable>
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: <Not Applicable>
Total installed capacity of the on-site emergency power sources per unit [MW]	: <Not Applicable>
Total battery capacity [Ah]	: <Not Applicable>

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 690
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: -
-------------------------	-----

Number of heat connection points per unit	: -
Number of intermediate circuits/heat exchangers	: -
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Flat End
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 7.8
Inside shell diameter [m]	: 7.6
Shell thickness [mm]	: 28.6
Number of pressure channels	: 380
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: 4.2

Reactor Core

Fuel assembly geometry	: Circular
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 0.71
Refuelling frequency [month]	: 60
Part of the core refuelled [%]	: <Not Applicable>
Average discharge burnup [MWd/t]	: 7186
Active core diameter [m]	: 6.28
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 4560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 24.01
Moderator weight [t]	: 264
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.4
Average core power density [kW/dm ³]	: <Not Available>
Average fuel power density [kW/kgU]	: 23.5
Fuel linear heat generation rate [kW/m]	: 25.35

Reactivity control

Control rod material	: Other - Stainless Steel/ G
Burnable neutron absorber material	: <Not Applicable>
Burnable neutron absorber material specification	: <Not Applicable>
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: Nitrogen Injection
Number of control rod assemblies	: 21

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: 196
Operating coolant pressure [MPa]	: 9.89
Reactor outlet temperature [°C]	: 310
Reactor inlet temperature [°C]	: 260
Coolant mass flow at the rated power [t/h]	: 27720

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: Inco-800
SG shell material	: CS
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Available>
Design heat transfer surface [m2]	: <Not Available>

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 6.71
Design pressure difference [MPa]	: 1.83

Pressurizer

Total volume [m3]	: 45.3
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: Other - Dousing ;LAC
Additional pressure suppression system	: Water Condenser

Total containment volume [m ³]	: 48654
Number of containment spray pumps	: <Not Applicable>
Containment design pressure [MPa]	: 0.124
Design leakage rate [% per day]	: <Not Applicable>
Type of H ₂ recombiner	: Active + Passive

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: <Not Applicable>
LPSI system pressure [MPa]	: 0.72
HPSI system flowrate [t/h]	: <Not Applicable>
LPSI system flowrate [t/h]	: <Not Available>

Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	:
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	:
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: <Not Available>
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.6
Steam generator feedwater inlet temperature [°C]	: 220

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 5
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 2
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 18.9
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 4.136
Shell thickness [mm]	: 192.5
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: -
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: -
Active core diameter [m]	: -
Active core height/length [m]	: -
Number of fissile fuel assemblies/bundles	: -
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: -
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 317
Fuel clad thickness [mm]	: 0.68
Average core power density [kW/dm ³]	: 108
Average fuel power density [kW/kgU]	: 46
Fuel linear heat generation rate [kW/m]	: -

Reactivity control

Control rod material	: <Not Available>
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: <Not Available>
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 0.7
Reactor outlet temperature [°C]	: -
Reactor inlet temperature [°C]	: -
Coolant mass flow at the rated power [t/h]	: -

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: <Not Available>
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: <Not Available>
Turbine speed [rpm]	: <Not Available>
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	:
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	:
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: <Not Available>
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zr+1%Nb
Average fuel enrichment [% of U235]	: 4.3
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 20
Average discharge burnup [MWd/t]	: 44000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.63
Average core power density [kW/dm ³]	: 84.4
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: 240
Operating coolant pressure [MPa]	: 12.26
Reactor outlet temperature [°C]	: 297
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 31870

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.6
Design pressure difference [MPa]	: 0.425

Pressurizer

Total volume [m3]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 51322
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 1.5
Design leakage rate [% per day]	: 13
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.7
LPSI system pressure [MPa]	: 0.71
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 280

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.3
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 256
HP cylinder Inlet steam flow rate [t/h]	: 1356

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 250
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 7

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3

Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.7
LPSI system pressure [MPa]	: 0.71
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 280

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.3
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 256
HP cylinder Inlet steam flow rate [t/h]	: 1356

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 250
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 7

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1049
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 4053

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zr+1%Nb
Average fuel enrichment [% of U235]	: 4.3
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 20
Average discharge burnup [MWd/t]	: 44000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.63
Average core power density [kW/dm ³]	: 84.4
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: 240
Operating coolant pressure [MPa]	: 12.26
Reactor outlet temperature [°C]	: 297
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 31870

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.6
Design pressure difference [MPa]	: 0.425

Pressurizer

Total volume [m3]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 51322
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 1.5
Design leakage rate [% per day]	: 13
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.7
LPSI system pressure [MPa]	: 0.71
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 280

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.3
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 256
HP cylinder Inlet steam flow rate [t/h]	: 1356

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 250
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 7

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1049
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 4053

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End

Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 4.136
Shell thickness [mm]	: 192.5
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRCALLOY-4
Average fuel enrichment [% of U235]	: 3.6
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 25.7
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 3.16
Active core height/length [m]	: 3.63
Number of fissile fuel assemblies/bundles	: 163
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 91.75
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 312
Fuel clad thickness [mm]	: 0.572
Average core power density [kW/dm ³]	: 105.5
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 16.3

Reactivity control

Control rod material	: Boron Carbide/Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: Al ₂ O ₃ -B ₄ C
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 61

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H ₂ O
Coolant weight [t]	: 330
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 318
Reactor inlet temperature [°C]	: 288
Coolant mass flow at the rated power [t/h]	: 64483

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 750
Design heat transfer surface [m ²]	: 6111

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 6.8
Design pressure difference [MPa]	: 0.67

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 60000
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 4.6
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: -

Emergency core cooling systems

Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.1
Design pressure difference [MPa]	: 0.43

Pressurizer

Total volume [m3]	: 37.8
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Ice Condenser

Total containment volume [m3]	: 74700
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.75
Design leakage rate [% per day]	: 0.2
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.5
LPSI system pressure [MPa]	: 1.1
HPSI system flowrate [t/h]	: 374
LPSI system flowrate [t/h]	: 1584

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	: 0.2
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: 372

Main generator

Rated active power [MWe]	: 260
Rated apparent power [MVA]	: 235
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 2.5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 228

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 4
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 485
Interim storage facility type	: Other - N/A
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: 2
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 23Ni,13Cr - 1 layer, 19Ni,9Cr - 3 other layers
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/NB
Average fuel enrichment [% of U235]	: 4
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: 40000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.42
Number of fissile fuel assemblies/bundles	: 313
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 38
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 105.6
Average fuel power density [kW/kgU]	: 40.2
Fuel linear heat generation rate [kW/m]	: 15.7

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: 180
Operating coolant pressure [MPa]	: 12.25
Reactor outlet temperature [°C]	: 298.5
Reactor inlet temperature [°C]	: 266
Coolant mass flow at the rated power [t/h]	: 31850

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.1
Design pressure difference [MPa]	: 0.43

Pressurizer

Total volume [m ³]	: 37.8
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Ice Condenser

Total containment volume [m3]	: 74700
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.75
Design leakage rate [% per day]	: 0.2
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 12.5
LPSI system pressure [MPa]	: 1.1
HPSI system flowrate [t/h]	: 374
LPSI system flowrate [t/h]	: 1584

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	: 0.2
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: 372

Main generator

Rated active power [MWe]	: 260
Rated apparent power [MVA]	: 235
Output voltage [kV]	: 15.75

Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.5

Reactivity control

Control rod material	: Carbon Steel
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 51

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 292.8
Coolant mass flow at the rated power [t/h]	: 16420

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	:
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	:
Design heat transfer surface [m ²]	:

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m ³]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	:
Type of H ₂ recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285.3
HP cylinder Inlet steam flow rate [t/h]	: 7855

Main generator

Rated active power [MWe]	: 1321
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.25
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.5

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 292.2
Coolant mass flow at the rated power [t/h]	: 16420

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -

Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 323
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 50000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 957
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 24
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.44
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 28

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 323
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 50000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 957
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 5500

Main generator

Rated active power [MWe]	: 933
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: FS ALLOYED WITH MN-MO-NI
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 105
Average fuel power density [kW/kgU]	: 38.3
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15892

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 5500

Main generator

Rated active power [MWe]	: 933
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 95.8
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.2

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 323.7
Reactor inlet temperature [°C]	: 292.8
Coolant mass flow at the rated power [t/h]	: 16420

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m ³]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H ₂ recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285
HP cylinder Inlet steam flow rate [t/h]	: 7060

Main generator

Rated active power [MWe]	: 1321
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 95.8
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.2

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 292.8
Coolant mass flow at the rated power [t/h]	: 16420

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285
HP cylinder Inlet steam flow rate [t/h]	: 7060

Main generator

Rated active power [MWe]	: 1321
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 12.32
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 38

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 22500

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5455

Main generator

Rated active power [MWe]	: 1040
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 12.32
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 38

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 22500

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m ³]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H ₂ recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5455

Main generator

Rated active power [MWe]	: 1040
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 16 MNO5
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: INOX 24/12
Reactor vessel overall length/height [m]	: 12.6
Inside shell diameter [m]	: 4.5
Shell thickness [mm]	: 225
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: 39000
Active core diameter [m]	: 3.47
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 205
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 125
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 274
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 105.2
Average fuel power density [kW/kgU]	: 34
Fuel linear heat generation rate [kW/m]	: 17.92

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BORATE GLASS
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 25

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 329.5
Reactor inlet temperature [°C]	: 292.2
Coolant mass flow at the rated power [t/h]	: 69840

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL-690
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.3
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 7.1
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 287
HP cylinder Inlet steam flow rate [t/h]	: 8650

Main generator

Rated active power [MWe]	: 1450
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 12.6
Inside shell diameter [m]	: 4.5
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 35000
Active core diameter [m]	: 3.47
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 205
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 125
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 274
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: -
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 17

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 329.5
Reactor inlet temperature [°C]	: 292.2
Coolant mass flow at the rated power [t/h]	: 2350

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.3
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 7.1
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 287
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: 1450
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 41

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m ³]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H ₂ recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5455

Main generator

Rated active power [MWe]	: 928
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 41

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5455

Main generator

Rated active power [MWe]	: 928
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square

Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 41

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL-600S
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.61
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 942
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 14
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 44000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.46
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 104.5
Average fuel power density [kW/kgU]	: 38.3
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 322
Reactor inlet temperature [°C]	: 284
Coolant mass flow at the rated power [t/h]	: 60300

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.257
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 267
HP cylinder Inlet steam flow rate [t/h]	: 5500

Main generator

Rated active power [MWe]	: 923
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.2

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 292.8
Coolant mass flow at the rated power [t/h]	: 16420

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 255.3
HP cylinder Inlet steam flow rate [t/h]	: 7772

Main generator

Rated active power [MWe]	: 1335
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 95.8
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.5

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.7

Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285.3
HP cylinder Inlet steam flow rate [t/h]	: 7855

Main generator

Rated active power [MWe]	: 1321
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-503-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 41

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 289.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 957
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-503-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 12.3
Inside shell diameter [m]	: 3.987
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -

Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 82.2
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 105
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BOROSILICATE
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 45

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.2
Reactor outlet temperature [°C]	: 323
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 47700

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-503-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 47000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.85

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 36

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15890

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 957
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 13.6
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 111.1
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 95.8
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.5

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 293.4
Coolant mass flow at the rated power [t/h]	: 16700

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.05
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285.3
HP cylinder Inlet steam flow rate [t/h]	: 7855

Main generator

Rated active power [MWe]	: 1321
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -

Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.2

Reactivity control

Control rod material	: Boron Carbide/Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 292.8
Coolant mass flow at the rated power [t/h]	: 91000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.2
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285.3
HP cylinder Inlet steam flow rate [t/h]	: 7772

Main generator

Rated active power [MWe]	: 1335
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy

Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 804
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.9
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 95.8
Average fuel power density [kW/kgU]	: 36.68
Fuel linear heat generation rate [kW/m]	: 17.2

Reactivity control

Control rod material	: Boron Carbide/Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.7
Reactor inlet temperature [°C]	: 292.8
Coolant mass flow at the rated power [t/h]	: 16420

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 4.1
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.95
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 285
HP cylinder Inlet steam flow rate [t/h]	: 7855

Main generator

Rated active power [MWe]	: 1335
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS316
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 12
Inside shell diameter [m]	: 12
Shell thickness [mm]	: 15
Number of pressure channels	: -
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂ /PuO ₂
Refuelling type	: OFF-line
Moderator material	: <Not Applicable>
Fuel clad material	: Stainless Steel
Fuel clad material specification	: SS 1515TI
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 5
Part of the core refuelled [%]	: 15
Average discharge burnup [MWd/t]	: 100000
Active core diameter [m]	: 1.39
Active core height/length [m]	: 0.85
Number of fissile fuel assemblies/bundles	: 103
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: -
Fuel weight [t]	: 101
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 217
Fuel clad thickness [mm]	: 0.45
Average core power density [kW/dm ³]	: 406
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: -

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: Na
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 1
Reactor outlet temperature [°C]	: 530
Reactor inlet temperature [°C]	: 380
Coolant mass flow at the rated power [t/h]	: 3600

Steam generators (SG)/drum separators

Type of SG	: Modular
SG output	: Superheated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: -
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: <Not Applicable>

Containment systems

Containment type	: Confinement
Containment Shape	: Rectangular
Containment structure	: <Not Available>
Pressure suppression system	: Vacuum Building
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 0.04
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: <Not Applicable>
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: <Not Applicable>
LPSI system pressure [MPa]	: <Not Applicable>
HPSI system flowrate [t/h]	: <Not Applicable>
LPSI system flowrate [t/h]	: <Not Applicable>

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Superheated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: 1
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 16.3
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 520
HP cylinder Inlet steam flow rate [t/h]	: 790

Main generator

Rated active power [MWe]	: 250
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	: 20
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Brass

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.6
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 220
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 16
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 4.267
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103.7
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 36.68

Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 41

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 928
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 41

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -

Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 45

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 957
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508-CL-3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 4.003
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 33735
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 99.9
Average fuel power density [kW/kgU]	: 36.6
Fuel linear heat generation rate [kW/m]	: 17.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 45

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 15894

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Single
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.45
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 269.9
HP cylinder Inlet steam flow rate [t/h]	: 5450

Main generator

Rated active power [MWe]	: 957
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 22-NiMoCr-37
Vessel cladding material	: Alloyed Steel
Vessel cladding material specification	: 5-CR-NI-NB-199 (1.4551)
Reactor vessel overall length/height [m]	: 13.251
Inside shell diameter [m]	: 5
Shell thickness [mm]	: 242
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 3.2
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 35
Average discharge burnup [MWd/t]	: 33500
Active core diameter [m]	: 3.6
Active core height/length [m]	: 3.9
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 102.7
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 236
Fuel clad thickness [mm]	: 0.78
Average core power density [kW/dm ³]	: 87
Average fuel power density [kW/kgU]	: 34.3
Fuel linear heat generation rate [kW/m]	: 19.4

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 69

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 317
Reactor inlet temperature [°C]	: 285
Coolant mass flow at the rated power [t/h]	: 72000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	:
Drum separator shell material	:
Design thermal capacity per SG [MW]	: 885
Design heat transfer surface [m2]	: 4510

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 8.555
Design pressure difference [MPa]	: 0.65

Pressurizer

Total volume [m3]	: 85
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 4500

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: Spray

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.47
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>

Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 326
Reactor inlet temperature [°C]	: 291
Coolant mass flow at the rated power [t/h]	: 63619

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 946
Design heat transfer surface [m ²]	: 5400

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 65
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 2142

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: Spray

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.63
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 8
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.7
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 283
HP cylinder Inlet steam flow rate [t/h]	: 1927

Main generator

Rated active power [MWe]	: 1383
Rated apparent power [MVA]	: 1640
Output voltage [kV]	: 27
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 768
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 1900

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASTM-A-508-D-2 (22 NiMoCo 37)
Vessel cladding material	: Alloyed Steel
Vessel cladding material specification	: X10-CR-NI-NB-18.9
Reactor vessel overall length/height [m]	: 20.7
Inside shell diameter [m]	: 5.58
Shell thickness [mm]	: 141
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 2.7
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	:
Average discharge burnup [MWd/t]	: 27500
Active core diameter [m]	: 3.696
Active core height/length [m]	: 3.97
Number of fissile fuel assemblies/bundles	: 532
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 96
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 49
Fuel clad thickness [mm]	: 0.82
Average core power density [kW/dm ³]	: 50.6
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 23.1

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 129

Reactor coolant system

Number of external reactor coolant loops	: <Not Applicable>
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 6.9
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 215
Coolant mass flow at the rated power [t/h]	: 7756

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: Saturated Steam
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: Reinforced Concrete
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.45
Design leakage rate [% per day]	: 1
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 4.11
LPSI system pressure [MPa]	: 0.26
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6.67
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 283
HP cylinder Inlet steam flow rate [t/h]	: 1140

Main generator

Rated active power [MWe]	: 806
Rated apparent power [MVA]	: 1006
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.0

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Tube shape	: U-tube
Tube material	: INCONEL-800
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 967
Design heat transfer surface [m ²]	: 5400

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 7.350
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 2142

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: Spray

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.53
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 8
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.59
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 285.3
HP cylinder Inlet steam flow rate [t/h]	: 7488

Main generator

Rated active power [MWe]	: 1360
Rated apparent power [MVA]	: 1640
Output voltage [kV]	: 27
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.6

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 768
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 1900

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASTM-A-508-11; 22-NI-MO-CR-37 (1.6751)
Vessel cladding material	: Alloyed Steel
Vessel cladding material specification	: GE- (1.4551), 5-CR-NI-NB-199 (1.4551)
Reactor vessel overall length/height [m]	: 22.35
Inside shell diameter [m]	: 6.62
Shell thickness [mm]	: 171
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 2.8
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 18
Average discharge burnup [MWd/t]	: 27500
Active core diameter [m]	: 4.818
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 784
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 136.6
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 62
Fuel clad thickness [mm]	: 0.605
Average core power density [kW/dm ³]	: 56.8
Average fuel power density [kW/kgU]	: 28.3
Fuel linear heat generation rate [kW/m]	: 20.4

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 193

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 277
Coolant mass flow at the rated power [t/h]	: 51480

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: Saturated Steam
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m2]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m3]	: <Not Applicable>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.35
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.58
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 283
HP cylinder Inlet steam flow rate [t/h]	: 6966

Main generator

Rated active power [MWe]	: 1310
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	: 27
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 946
Design heat transfer surface [m ²]	: 5400

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 65
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 2142

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 72000
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.52
Design leakage rate [% per day]	: 0.25
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 8
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 6.3
LPSI system pressure [MPa]	: 0.68
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6.43
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 278
HP cylinder Inlet steam flow rate [t/h]	: 1850

Main generator

Rated active power [MWe]	: 1370
Rated apparent power [MVA]	: 1640
Output voltage [kV]	: 35
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	: 8.8

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 768
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASTM-A-508-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 21.85
Inside shell diameter [m]	: 6.7
Shell thickness [mm]	: 168
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 2.8
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	:
Average discharge burnup [MWd/t]	: 27500
Active core diameter [m]	: 3.708
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 840
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 152.4
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 64
Fuel clad thickness [mm]	: 0.82
Average core power density [kW/dm ³]	: 51.8
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 18.0

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 205

Reactor coolant system

Number of external reactor coolant loops	: <Not Applicable>
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.1
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 277
Coolant mass flow at the rated power [t/h]	: 55600

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: Saturated Steam
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 10
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: Reinforced Concrete
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	: 11260
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.50
Design leakage rate [% per day]	: 1
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: 3.4
LPSI system pressure [MPa]	: 0.6
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6.68
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 283
HP cylinder Inlet steam flow rate [t/h]	: 1849

Main generator

Rated active power [MWe]	: 1316
Rated apparent power [MVA]	: 1530
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.4

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1582
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 4160

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 22-NIMOCR-37
Vessel cladding material	: <Not Available>
Vessel cladding material specification	:
Reactor vessel overall length/height [m]	: 10.9
Inside shell diameter [m]	: 4.358
Shell thickness [mm]	: 216
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 3.2
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 37500
Active core diameter [m]	: 3.24
Active core height/length [m]	: 2.985
Number of fissile fuel assemblies/bundles	: 177
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 63
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 205
Fuel clad thickness [mm]	: 0.72
Average core power density [kW/dm ³]	: 100
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 22.5

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 45

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 320.2
Reactor inlet temperature [°C]	: 288
Coolant mass flow at the rated power [t/h]	: 51282

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Available>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	:
Drum separator shell material	:
Design thermal capacity per SG [MW]	: 837
Design heat transfer surface [m2]	: 4005

Main coolant pumps/circulators

Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 9
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: Spherical
Containment structure	: Steel
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.41
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.23
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 5010

Main generator

Rated active power [MWe]	: 900
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: NIMOCR-ST; 22 NiMoCr 37
Vessel cladding material	: <Not Available>
Vessel cladding material specification	:
Reactor vessel overall length/height [m]	: 12.7
Inside shell diameter [m]	: 5
Shell thickness [mm]	: 256
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	:
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 20
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	: 3.605
Active core height/length [m]	: 3.9
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 103
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 236
Fuel clad thickness [mm]	: 0.725
Average core power density [kW/dm ³]	: 93
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 20.8

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 61

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 326
Reactor inlet temperature [°C]	: 291
Coolant mass flow at the rated power [t/h]	: 63619

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCOLOY-800
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 946
Design heat transfer surface [m ²]	: 5400

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 65
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 2142

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 72000
Number of containment spray pumps	:
Containment design pressure [MPa]	: 0.52
Design leakage rate [% per day]	: 0.25
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 8
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 6.3
LPSI system pressure [MPa]	: 0.9
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.13
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 280
HP cylinder Inlet steam flow rate [t/h]	: 2055

Main generator

Rated active power [MWe]	: 1349
Rated apparent power [MVA]	: 1560
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3.8

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	:
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 768
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	:

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 22-NiMoCr-37
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: AS
Reactor vessel overall length/height [m]	: 13.247
Inside shell diameter [m]	: 5
Shell thickness [mm]	: 250
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.3
Refuelling frequency [month]	: 11
Part of the core refuelled [%]	: 30
Average discharge burnup [MWd/t]	: 35400
Active core diameter [m]	: 3.6
Active core height/length [m]	: 3.9
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 102
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 236
Fuel clad thickness [mm]	: 0.725
Average core power density [kW/dm ³]	: 92.3
Average fuel power density [kW/kgU]	: 36.7
Fuel linear heat generation rate [kW/m]	: 20.6

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 61

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 318
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 70600

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam

Active core height/length [m]	: 2.42
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 41.9
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.63
Average core power density [kW/dm ³]	: 85.2
Average fuel power density [kW/kgU]	: 32
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: <Not Applicable>
Burnable neutron absorber material specification	: <Not Applicable>
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: 210
Operating coolant pressure [MPa]	: 12.5
Reactor outlet temperature [°C]	: 297
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 39750

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08H18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.6
Design pressure difference [MPa]	: 0.425

Pressurizer

Total volume [m3]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 51322
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 2.5
Design leakage rate [% per day]	: 14.6
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.7
LPSI system pressure [MPa]	: 0.71
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 280

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.2
HP cylinder Inlet steam moisture [%]	: 0.05
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: 1467

Main generator

Rated active power [MWe]	: 255
Rated apparent power [MVA]	: 265
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3.5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 7.8
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 3
Total installed capacity of the on-site emergency power sources per unit [MW]	: 4.8
Total battery capacity [Ah]	: 1200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1052
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	: 7200

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 2
Number of intermediate circuits/heat exchangers	: 4
Total capacity of heat connections [MWt]	: 37
Extraction steam pressure [MPa]	: 0.5

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical

Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.6
Design pressure difference [MPa]	: 0.425

Pressurizer

Total volume [m ³]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 51322
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 2.5
Design leakage rate [% per day]	: 14.7
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.7
LPSI system pressure [MPa]	: 0.71
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 280

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.315
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: 1467

Main generator

Rated active power [MWe]	: 255
Rated apparent power [MVA]	: 265
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3.5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 3
Total installed capacity of the on-site emergency power sources per unit [MW]	: 4.8
Total battery capacity [Ah]	: 1200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1029
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 2
Number of intermediate circuits/heat exchangers	: 4
Total capacity of heat connections [MWt]	: 37
Extraction steam pressure [MPa]	: 0.5

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: 3.82
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 30
Average discharge burnup [MWd/t]	: 37000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.42
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 41.9
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.63
Average core power density [kW/dm ³]	: 85.2
Average fuel power density [kW/kgU]	: 32
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: <Not Applicable>
Burnable neutron absorber material specification	: <Not Applicable>
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: 210
Operating coolant pressure [MPa]	: 12.5
Reactor outlet temperature [°C]	: 297
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 40600

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.6
Design pressure difference [MPa]	: 0.425

Pressurizer

Total volume [m3]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Water Condenser

Total containment volume [m3]	: 51322
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 2.5
Design leakage rate [% per day]	: 14.7
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 12.7
LPSI system pressure [MPa]	: 0.71
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 280

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: 1467

Main generator

Rated active power [MWe]	: 230
Rated apparent power [MVA]	: 255
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Stainles Steel

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3.5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems

Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 8.7
Reactor outlet temperature [°C]	: 293
Reactor inlet temperature [°C]	: 249
Coolant mass flow at the rated power [t/h]	: 13210

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: Mushroom
Tube material	: INCOLOY-800
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.73
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.972
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 250
HP cylinder Inlet steam flow rate [t/h]	: 1330

Main generator

Rated active power [MWe]	: 235
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: -
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 6.05
Shell thickness [mm]	: -
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: <Not Available>
Fuel clad material	: <Not Available>
Fuel clad material specification	: -
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: -
Active core diameter [m]	: -
Active core height/length [m]	: -
Number of fissile fuel assemblies/bundles	: -
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: -
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: -
Fuel clad thickness [mm]	: -
Average core power density [kW/dm ³]	: -
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: -

Reactivity control

Control rod material	: <Not Available>
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: <Not Available>
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 1.5
Reactor outlet temperature [°C]	: -
Reactor inlet temperature [°C]	: -
Coolant mass flow at the rated power [t/h]	: -

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: <Not Available>
Number of drum separators	: <Not Applicable>
Tube shape	: -
Tube material	: -
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: <Not Available>
Number of pumps per RCS loop	: <Not Available>
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: <Not Available>
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: <Not Available>
Turbine speed [rpm]	: <Not Available>
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: -
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: -
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: <Not Available>
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.07
Inside shell diameter [m]	: 6.05
Shell thickness [mm]	: 25.4
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 6500
Active core diameter [m]	: 4.5
Active core height/length [m]	: 5
Number of fissile fuel assemblies/bundles	: 3672
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 49
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 19
Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 10.07
Average fuel power density [kW/kgU]	: 17.7
Fuel linear heat generation rate [kW/m]	: 29.57

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: <Not Applicable>
Burnable neutron absorber material specification	: 0
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: 1

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.16
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.972
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 250
HP cylinder Inlet steam flow rate [t/h]	: 1336

Main generator

Rated active power [MWe]	: 235
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.07
Inside shell diameter [m]	: 6.05
Shell thickness [mm]	: 25.4
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 6700
Active core diameter [m]	: 4.5
Active core height/length [m]	: 5
Number of fissile fuel assemblies/bundles	: 3672
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 49
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 19
Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 10.07
Average fuel power density [kW/kgU]	: 18.1
Fuel linear heat generation rate [kW/m]	: 35.3

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: 1
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 8.5
Reactor outlet temperature [°C]	: 293
Reactor inlet temperature [°C]	: 249
Coolant mass flow at the rated power [t/h]	: 12100

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 8
Number of drum separators	: <Not Applicable>
Tube shape	: Helical
Tube material	: MONEL-400
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: 8
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.16
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.972
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 250
HP cylinder Inlet steam flow rate [t/h]	: 1336

Main generator

Rated active power [MWe]	: 235
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 4.645
Inside shell diameter [m]	: 5.996
Shell thickness [mm]	: 25
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 15000
Active core diameter [m]	: 4.5
Active core height/length [m]	: 5
Number of fissile fuel assemblies/bundles	: 3672
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 49
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 19
Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 10.07
Average fuel power density [kW/kgU]	: 18.1
Fuel linear heat generation rate [kW/m]	: 35.3

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 8.7
Reactor outlet temperature [°C]	: 293.4
Reactor inlet temperature [°C]	: 249
Coolant mass flow at the rated power [t/h]	: 12700

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Available>
Tube shape	: Mushroom
Tube material	: INCOLOY-800
SG shell material	: -
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.25
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -

Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.1
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 250.6
HP cylinder Inlet steam flow rate [t/h]	: 1073

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.07
Inside shell diameter [m]	: 6.05
Shell thickness [mm]	: 25.4
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 6700
Active core diameter [m]	: 4.5
Active core height/length [m]	: 5
Number of fissile fuel assemblies/bundles	: 3672
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 49
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 19
Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 8.23
Average fuel power density [kW/kgU]	: 15.8
Fuel linear heat generation rate [kW/m]	: 35.3

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 11.6
Reactor outlet temperature [°C]	: 304
Reactor inlet temperature [°C]	: 260
Coolant mass flow at the rated power [t/h]	: 28282

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 8
Number of drum separators	: <Not Applicable>
Tube shape	: Mushroom
Tube material	: INCOLOY-800
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.44
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.1
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 253
HP cylinder Inlet steam flow rate [t/h]	: 1073

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 10.07
Average fuel power density [kW/kgU]	: 17.7
Fuel linear heat generation rate [kW/m]	: 35.3

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: 1
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 8.7
Reactor outlet temperature [°C]	: 293
Reactor inlet temperature [°C]	: 249
Coolant mass flow at the rated power [t/h]	: 11800

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: Helical
Tube material	: MONEL-400
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: 8
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 0.42
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.94
Inside shell diameter [m]	: 7.8
Shell thickness [mm]	: 32
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 7000
Active core diameter [m]	: 6.38
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 5096
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: -
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 9.1
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 20.18

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD NO3
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: 1
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 0.991
Reactor outlet temperature [°C]	: 293
Reactor inlet temperature [°C]	: 249
Coolant mass flow at the rated power [t/h]	: 13210

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: Mushroom
Tube material	: INCOLOY-800
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Double
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.73
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.972
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 250
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: 235
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-302-GRB-SS-CLAD
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-308
Reactor vessel overall length/height [m]	: 16.4
Inside shell diameter [m]	: 3.66
Shell thickness [mm]	: 123.8
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 21000
Active core diameter [m]	: 2.416
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 284
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 39.5
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 36
Fuel clad thickness [mm]	: 0.81
Average core power density [kW/dm ³]	: 39.44
Average fuel power density [kW/kgU]	: 17.9
Fuel linear heat generation rate [kW/m]	: 14.2

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 69

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 7.03
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 13246

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m2]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: <Not Available>
Pressure suppression system	: Pools
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 3.06
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.879
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280
HP cylinder Inlet steam flow rate [t/h]	: 904

Main generator

Rated active power [MWe]	: 210
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: SS-304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.94
Inside shell diameter [m]	: 7.8
Shell thickness [mm]	: 32
Number of pressure channels	: 306
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 7000
Active core diameter [m]	: 6.38
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 5096
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 97.8
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.41
Average core power density [kW/dm ³]	: 9.1
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 20.18

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD NO3
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 11.6
Reactor outlet temperature [°C]	: 304
Reactor inlet temperature [°C]	: 260
Coolant mass flow at the rated power [t/h]	: 28282

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: Mushroom
Tube material	: INCOLOY-800
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.44
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.1
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 250.6
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASTM-A-533-B-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 19.7
Inside shell diameter [m]	: 4.8
Shell thickness [mm]	: 160
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.63
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 20
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 3.44
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 400
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 68
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 72
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 40.6
Average fuel power density [kW/kgU]	: 20
Fuel linear heat generation rate [kW/m]	: 19

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 97

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.07
Reactor outlet temperature [°C]	: 285
Reactor inlet temperature [°C]	: 183
Coolant mass flow at the rated power [t/h]	: 21800

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m2]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m3]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 3410
Number of containment spray pumps	: 4
Containment design pressure [MPa]	: 0.43
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 4
HPSI systems pressure [MPa]	: 1.9
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.68
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 683

Main generator

Rated active power [MWe]	: 460
Rated apparent power [MVA]	: 525
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Applicable>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	:	<Not Applicable>
Number of motor-driven main feedwater pumps	:	3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	:	<Not Applicable>
Number of feedwater pumps required for full power operation	:	2
Feedwater discharge pressure [MPa]	:	
Steam generator feedwater inlet temperature [°C]	:	

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	:	<Not Applicable>
Number of diesel driven pumps	:	<Not Applicable>
Number of turbine driven pumps	:	<Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	:	Water+Supplementary chemical systems
Fire retardant cable coating used for	:	
Cable segregation within the unit used for	:	Safety Related + Other systems
On-site fire brigade	:	Extra-duty Plant Personnel
Off-site fire brigade response time	:	Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	:	3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	:	2
Number of on-site safety related diesel generators (available per unit)	:	2
Number of on-site safety related gas turbines (available per unit)	:	<Not Applicable>
Number of on site non-safety related diesel generator	:	
Number of on site non-safety related gas turbines	:	
Other on-site emergency AC power sources	:	
Estimated time reserve of the batteries at full load [h]	:	
Total installed capacity of the on-site emergency power sources per unit [MW]	:	
Total battery capacity [Ah]	:	

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	:	900
Interim storage facility type	:	Other - Wet,Dry
Interim storage facility capacity (number of spent fuel assemblies)	:	

Non-electrical applications

Primary heat connection	:	<Not Applicable>
-------------------------	---	------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASTM-A-533-B-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 21.9
Inside shell diameter [m]	: 5.5
Shell thickness [mm]	: 138
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.80
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 24
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 4.03
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 548
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 94
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 72
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 50.4
Average fuel power density [kW/kgU]	: 25
Fuel linear heat generation rate [kW/m]	: 19

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	:
Number of control rod assemblies	: 137

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.07
Reactor outlet temperature [°C]	: 285
Reactor inlet temperature [°C]	: 183
Coolant mass flow at the rated power [t/h]	: 21800

Steam generators (SG)/drum separators

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1220
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASTM-A-533-B-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS AND HIGH-NI-STEEL
Reactor vessel overall length/height [m]	: 21.9
Inside shell diameter [m]	: 5.5
Shell thickness [mm]	: 137
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.80
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 24
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 4.03
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 548
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 94
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 72
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 50.4
Average fuel power density [kW/kgU]	: 25
Fuel linear heat generation rate [kW/m]	: 19

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	:
Number of control rod assemblies	: 137

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.07
Reactor outlet temperature [°C]	: 285
Reactor inlet temperature [°C]	: 183
Coolant mass flow at the rated power [t/h]	: 21800

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 4240
Number of containment spray pumps	: 4
Containment design pressure [MPa]	: 0.38
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	: 2.7
LPSI system pressure [MPa]	: 1.3
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.68
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 1230

Main generator

Rated active power [MWe]	: 784
Rated apparent power [MVA]	: 911
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Applicable>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1590
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 2662
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: JISG-3120/SQV-2-A
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS and high Ni alloy steel
Reactor vessel overall length/height [m]	: 22.9
Inside shell diameter [m]	: 6.4
Shell thickness [mm]	: 158
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.70
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 24
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 4.75
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 764
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 133
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 74
Fuel clad thickness [mm]	: 0.71
Average core power density [kW/dm ³]	: 50
Average fuel power density [kW/kgU]	: 25
Fuel linear heat generation rate [kW/m]	: 18.6

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	:
Number of control rod assemblies	: 185

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.07
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 216
Coolant mass flow at the rated power [t/h]	: 48300

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 8700
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.28
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.68
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 1780

Main generator

Rated active power [MWe]	: 1100
Rated apparent power [MVA]	: 1300
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Applicable>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 2769
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: JISG-3120/SQV-2-A
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS and high Ni alloy steel
Reactor vessel overall length/height [m]	: 23
Inside shell diameter [m]	: 6.4
Shell thickness [mm]	: 157
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.68

LPSI system pressure [MPa]	: 0.7
HPSI system flowrate [t/h]	: 160
LPSI system flowrate [t/h]	: 454

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.41
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 270.1
HP cylinder Inlet steam flow rate [t/h]	: 3133

Main generator

Rated active power [MWe]	: 559
Rated apparent power [MVA]	: 625
Output voltage [kV]	: 19
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.48
Steam generator feedwater inlet temperature [°C]	: 291

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.2
Total battery capacity [Ah]	: 3200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 328
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 2
Number of intermediate circuits/heat exchangers	: 1
Total capacity of heat connections [MWt]	: 12
Extraction steam pressure [MPa]	: 2.57

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533-GR-B-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 11
Inside shell diameter [m]	: 3.4
Shell thickness [mm]	: 110
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 55000
Active core diameter [m]	: 2.46
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 48
Moderator weight [t]	: 175
Number of fuel elements per assembly/bundle	: 179
Fuel clad thickness [mm]	: 0.62
Average core power density [kW/dm ³]	: 95
Average fuel power density [kW/kgU]	: 34.3
Fuel linear heat generation rate [kW/m]	: 20.4

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BOROSILICATE
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 29

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 175
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 323
Reactor inlet temperature [°C]	: 288
Coolant mass flow at the rated power [t/h]	: 30000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 690
SG shell material	: Alloyed Steel
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: 825
Design heat transfer surface [m2]	: 5060

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.48
Design pressure difference [MPa]	: 0.7

Pressurizer

Total volume [m3]	: 28
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 51000
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.24
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 7.5
LPSI system pressure [MPa]	: 0.7
HPSI system flowrate [t/h]	: 160
LPSI system flowrate [t/h]	: 454

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.41
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 270.1
HP cylinder Inlet steam flow rate [t/h]	: 3133

Main generator

Rated active power [MWe]	: 559
Rated apparent power [MVA]	: 625
Output voltage [kV]	: 19
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.48
Steam generator feedwater inlet temperature [°C]	: 291

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.2
Total battery capacity [Ah]	: 3200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 400
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 2
Number of intermediate circuits/heat exchangers	: 1
Total capacity of heat connections [MWt]	: 12
Extraction steam pressure [MPa]	: 2.57

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SQV-2-A (JIS-G3120 + G3204)
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 12.9
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 135
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.1
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 46
Average discharge burnup [MWd/t]	: 43000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 89
Moderator weight [t]	: 351
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.64
Average core power density [kW/dm ³]	: 105
Average fuel power density [kW/kgU]	: 38.3
Fuel linear heat generation rate [kW/m]	: 17.9

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: Boron
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: 351
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 325
Reactor inlet temperature [°C]	: 289
Coolant mass flow at the rated power [t/h]	: 60100

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: NI/CR/FE ALLOY
SG shell material	: Alloyed Steel SQV2B
Drum separator shell material	:
Design thermal capacity per SG [MW]	: 855.75
Design heat transfer surface [m2]	: 4870

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.5
Design pressure difference [MPa]	: 0.7

Pressurizer

Total volume [m3]	: 51
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1800

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 73700
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.39
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 9.4
LPSI system pressure [MPa]	: 0.9
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.76
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 273.9
HP cylinder Inlet steam flow rate [t/h]	: 6700

Main generator

Rated active power [MWe]	: 1180
Rated apparent power [MVA]	: 1310
Output voltage [kV]	: 24
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.17
Steam generator feedwater inlet temperature [°C]	: 298

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems

Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 16.6
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 2340
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SQV-2-A/SFW-3(SQV2A SFVQ1A)
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 22.975
Inside shell diameter [m]	: 6.42
Shell thickness [mm]	: 156.7
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.44
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 39500
Active core diameter [m]	: 4.75
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 764
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 134
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 62
Fuel clad thickness [mm]	: 0.86
Average core power density [kW/dm ³]	: 50
Average fuel power density [kW/kgU]	: 24.6
Fuel linear heat generation rate [kW/m]	: 18

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	: <Not Applicable>
Number of control rod assemblies	: 185

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 6.93
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 215.6
Coolant mass flow at the rated power [t/h]	: 48300

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.95
Design pressure difference [MPa]	: 2.36

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Pools
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 8390
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.43
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	: 8.49
LPSI system pressure [MPa]	: 0.90
HPSI system flowrate [t/h]	: 368
LPSI system flowrate [t/h]	: 1691

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.55
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 282.3
HP cylinder Inlet steam flow rate [t/h]	: 6072.467

Main generator

Rated active power [MWe]	: 1137
Rated apparent power [MVA]	: 1280
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5.1

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.06
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 16.2
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 3696
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: (SQV2A,SFVQ1A)
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	:
Reactor vessel overall length/height [m]	: 22.081
Inside shell diameter [m]	: 7.12
Shell thickness [mm]	: 174
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zircalloy2
Average fuel enrichment [% of U235]	: 3.7
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 5.16
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 872
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 151
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 74
Fuel clad thickness [mm]	: 0.71
Average core power density [kW/dm ³]	: 50.6
Average fuel power density [kW/kgU]	: 26
Fuel linear heat generation rate [kW/m]	: 16.5

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd ₂ O ₃
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	: <Not Applicable>
Number of control rod assemblies	: 205

Reactor coolant system

Number of external reactor coolant loops	: <Not Applicable>
Coolant type	: H ₂ O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.07
Reactor outlet temperature [°C]	: 287
Reactor inlet temperature [°C]	: 216
Coolant mass flow at the rated power [t/h]	: 52200

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 10
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	: 0.83
Design pressure difference [MPa]	: 0.39

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Pools
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 7350
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.31
Design leakage rate [% per day]	: 0.4
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 8.73
LPSI system pressure [MPa]	: 1.23
HPSI system flowrate [t/h]	: 182
LPSI system flowrate [t/h]	: 954

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.69
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 283.7
HP cylinder Inlet steam flow rate [t/h]	: 7268.156

Main generator

Rated active power [MWe]	: 1380
Rated apparent power [MVA]	: 1570
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2

Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.4
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 3201

Main generator

Rated active power [MWe]	: 566.5
Rated apparent power [MVA]	: 630
Output voltage [kV]	: 19
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Brass

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 6.7
Steam generator feedwater inlet temperature [°C]	: 221

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.2
Total battery capacity [Ah]	: 3200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 360
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533/SA-508/SFVQ1A
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 11
Inside shell diameter [m]	: 3
Shell thickness [mm]	: 110
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zr-Sn-Fe-Cr-Nb/Zr-Sn-Fe-Cr-Nb-Ni/Zr-Sn-Fe-Nb
Average fuel enrichment [% of U235]	: 4.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 26
Average discharge burnup [MWd/t]	: 51000
Active core diameter [m]	: 2.46
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 49
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 179
Fuel clad thickness [mm]	: 0.66
Average core power density [kW/dm ³]	: 95
Average fuel power density [kW/kgU]	: 33.6
Fuel linear heat generation rate [kW/m]	: 20.4

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium/Boron
Burnable neutron absorber material specification	: Gd ₂ O ₃ /BOROSILICATE/B ₄ C
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 33

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H ₂ O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 323
Reactor inlet temperature [°C]	: 288
Coolant mass flow at the rated power [t/h]	: 30300

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL-690
SG shell material	: Alloyed Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 825
Design heat transfer surface [m ²]	: 5060

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.5
Design pressure difference [MPa]	: 0.8

Pressurizer

Total volume [m ³]	: 28
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 40200
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.267
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 7.5
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 160
LPSI system flowrate [t/h]	: 454

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.4
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 3201

Main generator

Rated active power [MWe]	: 566.5
Rated apparent power [MVA]	: 630
Output voltage [kV]	: 19
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Brass

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 6.7
Steam generator feedwater inlet temperature [°C]	: 221

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.2
Total battery capacity [Ah]	: 3200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 444
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SFVQ1A
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 12
Inside shell diameter [m]	: 4
Shell thickness [mm]	: 126
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂ /MOX
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zr-Sn-Fe-Cr-Nb/Zr-Sn-Fe-Cr-Nb-Ni/Zr-Sn-Fe-Nb/Zr-4
Average fuel enrichment [% of U235]	: 4.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 31
Average discharge burnup [MWd/t]	: 49000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 74
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 100
Average fuel power density [kW/kgU]	: 35.8
Fuel linear heat generation rate [kW/m]	: 17.1

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium/Boron
Burnable neutron absorber material specification	: Gd ₂ O ₃ /BOROSILICATE/B ₄ C
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H ₂ O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 284
Coolant mass flow at the rated power [t/h]	: 45700

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL-690
SG shell material	: Alloyed Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 886.67
Design heat transfer surface [m ²]	: 4870

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.5
Design pressure difference [MPa]	: 0.8

Pressurizer

Total volume [m ³]	: 40
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 67400
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.283
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 9.3
LPSI system pressure [MPa]	: 0.7
HPSI system flowrate [t/h]	: 280
LPSI system flowrate [t/h]	: 852

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue

Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.68
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 1780

Main generator

Rated active power [MWe]	: 1100
Rated apparent power [MVA]	: 1300
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Applicable>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 6
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 3239
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: JISG-3120/SQV-2-A
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	:
Reactor vessel overall length/height [m]	: 23
Inside shell diameter [m]	: 6.42
Shell thickness [mm]	: 157
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.68
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 24
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 4.75
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 764
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 133
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 74
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 50
Average fuel power density [kW/kgU]	: 25
Fuel linear heat generation rate [kW/m]	: 18.6

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	:
Number of control rod assemblies	: 185

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.07
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 216
Coolant mass flow at the rated power [t/h]	: 48300

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	:
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.31
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.68
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: 1100
Rated apparent power [MVA]	: <Not Applicable>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Applicable>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 6
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 3410
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	:
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-CLAD
Reactor vessel overall length/height [m]	: 21
Inside shell diameter [m]	: 7.1
Shell thickness [mm]	: 170
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.75
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 24
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 5.16
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 872
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 151
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 74
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 50.6
Average fuel power density [kW/kgU]	: 26
Fuel linear heat generation rate [kW/m]	: 18.8

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	:
Number of control rod assemblies	: 205

Reactor coolant system

Number of external reactor coolant loops	: <Not Applicable>
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.31
Reactor outlet temperature [°C]	: 287
Reactor inlet temperature [°C]	: 216
Coolant mass flow at the rated power [t/h]	: 52200

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 10
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	:
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.31
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.82
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 284
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: 1356
Rated apparent power [MVA]	: <Not Applicable>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: <Not Applicable>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 6
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 3444
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-302
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 11
Inside shell diameter [m]	: 3.3
Shell thickness [mm]	: 228
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 3.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 31500
Active core diameter [m]	: 2.46
Active core height/length [m]	: 3.05
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 40
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 179
Fuel clad thickness [mm]	: 0.62
Average core power density [kW/dm ³]	: 71
Average fuel power density [kW/kgU]	: 25.8
Fuel linear heat generation rate [kW/m]	: 15.5

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BORON
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 29

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 322
Reactor inlet temperature [°C]	: 294
Coolant mass flow at the rated power [t/h]	: 23500

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 690
SG shell material	: alloyed steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 515.2
Design heat transfer surface [m ²]	: 3280

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 3
Design pressure difference [MPa]	: 0.6

Pressurizer

Total volume [m ³]	: 19.8
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 700

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 41000
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.24
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 8.1
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 68.1
LPSI system flowrate [t/h]	: 307

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 1
HP cylinder inlet steam pressure [MPa]	: 5.39
HP cylinder Inlet steam moisture [%]	: 0.44
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 2029

Main generator

Rated active power [MWe]	: 340
Rated apparent power [MVA]	: 400
Output voltage [kV]	: 17
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Copper

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 6.82
Steam generator feedwater inlet temperature [°C]	: 220.6

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 2
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2

Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.0
Steam generator feedwater inlet temperature [°C]	: 221.1

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 2
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 3.9
Total battery capacity [Ah]	: 2200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1118
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533/SA-508
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 13
Inside shell diameter [m]	: 4.4
Shell thickness [mm]	: 273
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.1
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 44000
Active core diameter [m]	: 3.37
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 193
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 89
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.64
Average core power density [kW/dm ³]	: 105
Average fuel power density [kW/kgU]	: 38
Fuel linear heat generation rate [kW/m]	: 17.9

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: Boron
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 53

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 325
Reactor inlet temperature [°C]	: 289
Coolant mass flow at the rated power [t/h]	: 60100

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 690
SG shell material	: Alloyed Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 854.8
Design heat transfer surface [m2]	: 4870

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.48
Design pressure difference [MPa]	: 0.8

Pressurizer

Total volume [m3]	: 51
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1800

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Ice Condenser
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 37700
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.082
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 2
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 8.1
LPSI system pressure [MPa]	: 1.0
HPSI system flowrate [t/h]	: 96.5
LPSI system flowrate [t/h]	: 681

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	: 0.44
HP cylinder inlet steam temperature [°C]	: 276
HP cylinder Inlet steam flow rate [t/h]	: 6718

Main generator

Rated active power [MWe]	: 1175
Rated apparent power [MVA]	: 1300
Output voltage [kV]	: 24
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 2
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.0
Steam generator feedwater inlet temperature [°C]	: 222.2

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 5.5
Total battery capacity [Ah]	: 2500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 704
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 1
Number of intermediate circuits/heat exchangers	: 1
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: 2.7

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533/SA-508

Main generator

Rated active power [MWe]	: 1180
Rated apparent power [MVA]	: 1310
Output voltage [kV]	: 24
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 5.7
Steam generator feedwater inlet temperature [°C]	: 223.8

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.1
Total battery capacity [Ah]	: 1400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 2129
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ASME SA-533 GrB CL1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS AND HIGH-NI-STEEL
Reactor vessel overall length/height [m]	: 21
Inside shell diameter [m]	: 4.7
Shell thickness [mm]	: 120
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.9
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 3.30
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 368
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 63
Moderator weight [t]	: <Not Applicable>
Number of fuel elements per assembly/bundle	: 72
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 50.3
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 15.6

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 89

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: <Not Applicable>
Operating coolant pressure [MPa]	: 6.93
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 190
Coolant mass flow at the rated power [t/h]	: 22900

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 2.8
Design pressure difference [MPa]	: 1.6

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Pools
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 7000
Number of containment spray pumps	: 4
Containment design pressure [MPa]	: 0.38
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 1
Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	: 7.7
LPSI system pressure [MPa]	: 1.2
HPSI system flowrate [t/h]	: 680
LPSI system flowrate [t/h]	: 1090

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.55
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 2910

Main generator

Rated active power [MWe]	: 524
Rated apparent power [MVA]	: 585
Output voltage [kV]	: 22
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Brass

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.7

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.1
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 3
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 8
Total installed capacity of the on-site emergency power sources per unit [MW]	: 9
Total battery capacity [Ah]	: 4400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1050
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SQV2A SFVQ1A
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS AND HIGH-NI-STEEL
Reactor vessel overall length/height [m]	: 21
Inside shell diameter [m]	: 5.6
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.7
Refuelling frequency [month]	: 13

Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.07
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 266
HP cylinder Inlet steam flow rate [t/h]	: 5200

Main generator

Rated active power [MWe]	: 890
Rated apparent power [MVA]	: 990
Output voltage [kV]	: 23
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.48
Steam generator feedwater inlet temperature [°C]	: 291

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: 11.4
Total battery capacity [Ah]	: 2400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1870
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 2
Number of intermediate circuits/heat exchangers	: 1
Total capacity of heat connections [MWt]	: 25
Extraction steam pressure [MPa]	: 2.66

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533-GR-B-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 12.1
Inside shell diameter [m]	: 4
Shell thickness [mm]	: 126
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 49000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 74
Moderator weight [t]	: 260
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 100
Average fuel power density [kW/kgU]	: 35.8
Fuel linear heat generation rate [kW/m]	: 17.1

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BOROSILICATE
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: 260
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 284
Coolant mass flow at the rated power [t/h]	: 45700

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL
SG shell material	: Ni-Cr-Fe Alloy
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: 886.67
Design heat transfer surface [m2]	: 4780

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.48
Design pressure difference [MPa]	: 0.7

Pressurizer

Total volume [m3]	: 40
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 109300
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.22
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 7.2
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 147
LPSI system flowrate [t/h]	: 681

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.07
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 266
HP cylinder Inlet steam flow rate [t/h]	: 5203

Main generator

Rated active power [MWe]	: 890
Rated apparent power [MVA]	: 990
Output voltage [kV]	: 23
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.48
Steam generator feedwater inlet temperature [°C]	: 291

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: 11.4
Total battery capacity [Ah]	: 2400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1360
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 2
Number of intermediate circuits/heat exchangers	: 1
Total capacity of heat connections [MWt]	: 25
Extraction steam pressure [MPa]	: 2.61

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SQV2A/SFVQ1
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: Stainless steel and high nickel alloyed steel
Reactor vessel overall length/height [m]	: 20.992
Inside shell diameter [m]	: 4.692
Shell thickness [mm]	: 116
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.8
Refuelling frequency [month]	: 15
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 3.30
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 368
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 64
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 72
Fuel clad thickness [mm]	: 0.70
Average core power density [kW/dm ³]	: 50.3
Average fuel power density [kW/kgU]	: 25
Fuel linear heat generation rate [kW/m]	: 16

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: <Not Applicable>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	: Liquid zone control
Number of control rod assemblies	: 89

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 275
Operating coolant pressure [MPa]	: 6.93
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 213
Coolant mass flow at the rated power [t/h]	: 22900

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 2.84
Design pressure difference [MPa]	: 1.62

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Applicable>
Containment Shape	: <Not Applicable>
Containment structure	: Steel
Pressure suppression system	: Pools
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 11000
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.427
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	: <Not Applicable>
LPSI system pressure [MPa]	: 0.90
HPSI system flowrate [t/h]	: <Not Applicable>
LPSI system flowrate [t/h]	: 810

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.55
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 3071

Main generator

Rated active power [MWe]	: 540
Rated apparent power [MVA]	: 600
Output voltage [kV]	: 20
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Titanium

Number of main condensate pumps	:	
Number of main condensate pumps required for full power	:	4
Condenser vacuum at the full power (absolute pressure) [kPa]	:	5.1

Feedwater system

Number of turbine driven main feedwater pumps	:	<Not Applicable>
Number of motor-driven main feedwater pumps	:	3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	:	<Not Applicable>
Number of feedwater pumps required for full power operation	:	2
Feedwater discharge pressure [MPa]	:	10.1
Steam generator feedwater inlet temperature [°C]	:	212.5

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	:	<Not Applicable>
Number of diesel driven pumps	:	<Not Applicable>
Number of turbine driven pumps	:	1

Fire protection system

On-site fire suppression/extinguishing system	:	Water Sprinkler Only
Fire retardant cable coating used for	:	Safety Related + Other systems
Cable segregation within the unit used for	:	Safety Related + Other systems
On-site fire brigade	:	Dedicated Full Time Fire Brigade
Off-site fire brigade response time	:	Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	:	<Not Applicable>

Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	: 7.06
LPSI system pressure [MPa]	: 0.98
HPSI system flowrate [t/h]	: 680
LPSI system flowrate [t/h]	: 850

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.55
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 2450

Main generator

Rated active power [MWe]	: 465
Rated apparent power [MVA]	: 520
Output voltage [kV]	: 18
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Brass

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 9.5
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: No cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 4
Total installed capacity of the on-site emergency power sources per unit [MW]	: 6.4
Total battery capacity [Ah]	: 4400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1140
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: JIS G3120 and JIS G 3204
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: STAINLESS STEEL HIGH NICKLE ALLOY
Reactor vessel overall length/height [m]	: 21.9
Inside shell diameter [m]	: 5.6
Shell thickness [mm]	: 137
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3.7
Refuelling frequency [month]	: 14
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 45000
Active core diameter [m]	: 4.07
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 97
Moderator weight [t]	: 200
Number of fuel elements per assembly/bundle	: 74
Fuel clad thickness [mm]	: 0.71
Average core power density [kW/dm ³]	: 50.5
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 44.0

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd ₂ O ₃
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: Liquid zone control
Number of control rod assemblies	: 137

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H ₂ O
Coolant weight [t]	: 200
Operating coolant pressure [MPa]	: 6.93
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 216
Coolant mass flow at the rated power [t/h]	: 35600

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.5
Design pressure difference [MPa]	: 2.40

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	:

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Pools
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 7400
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 0.427
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: 3
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: 2
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	: 0.961
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	: 1140

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6.55
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 282
HP cylinder Inlet steam flow rate [t/h]	: 4600

Main generator

Rated active power [MWe]	: 820
Rated apparent power [MVA]	: 870
Output voltage [kV]	: 15.5
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Brass

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 2
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.4
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 8
Total installed capacity of the on-site emergency power sources per unit [MW]	: 15.9
Total battery capacity [Ah]	: 6580

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 3518
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533/SA-508
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 13
Inside shell diameter [m]	: 4
Shell thickness [mm]	: 250
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.0
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 43000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.64
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 204
Fuel clad thickness [mm]	: 0.66
Average core power density [kW/dm ³]	: 92
Average fuel power density [kW/kgU]	: 34
Fuel linear heat generation rate [kW/m]	: 20.3

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BORON
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 323
Reactor inlet temperature [°C]	: 289
Coolant mass flow at the rated power [t/h]	: 45000

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 690
SG shell material	: Alloyed Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 812.9
Design heat transfer surface [m2]	: 5055

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.48
Design pressure difference [MPa]	: 0.8

Pressurizer

Total volume [m3]	: 40
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 65000
Number of containment spray pumps	: 4
Containment design pressure [MPa]	: 0.24

Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 67400
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.28
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 7.2
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 147
LPSI system flowrate [t/h]	: 681

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.1
HP cylinder Inlet steam moisture [%]	: 0.44
HP cylinder inlet steam temperature [°C]	: 266.5
HP cylinder Inlet steam flow rate [t/h]	: 5067

Main generator

Rated active power [MWe]	: 870
Rated apparent power [MVA]	: 970
Output voltage [kV]	: 23
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 5.2
Steam generator feedwater inlet temperature [°C]	: 221.7

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 5.4
Total battery capacity [Ah]	: 1200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1188
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: 1
Number of intermediate circuits/heat exchangers	: 1
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: 2.5

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533/SA-508
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 12.4
Inside shell diameter [m]	: 4
Shell thickness [mm]	: 250
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.1
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 40000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.64
Average core power density [kW/dm ³]	: 100
Average fuel power density [kW/kgU]	: 37
Fuel linear heat generation rate [kW/m]	: 17.1

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BORON
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 321
Reactor inlet temperature [°C]	: 284
Coolant mass flow at the rated power [t/h]	: 45700

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: Alloyed Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 886.2
Design heat transfer surface [m2]	: 4780

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.48
Design pressure difference [MPa]	: 0.8

Pressurizer

Total volume [m3]	: 40
Number of safety valves	: 3
Number of relief valves	: 3
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 67400
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.28
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 7.2
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 147
LPSI system flowrate [t/h]	: 681

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.21
HP cylinder Inlet steam moisture [%]	: 0.44
HP cylinder inlet steam temperature [°C]	: 266.5
HP cylinder Inlet steam flow rate [t/h]	: 5067

Main generator

Rated active power [MWe]	: 870
Rated apparent power [MVA]	: 970
Output voltage [kV]	: 23
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 5.2
Steam generator feedwater inlet temperature [°C]	: 221.7

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 5.4
Total battery capacity [Ah]	: 1200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1188
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Extraction steam pressure [MPa]	: 2.5

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: MN-MO-NI STEEL
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: -
Reactor vessel overall length/height [m]	: 23
Inside shell diameter [m]	: 6.4
Shell thickness [mm]	: 157
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 2.2
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 39500
Active core diameter [m]	: 4.75
Active core height/length [m]	: 3.71
Number of fissile fuel assemblies/bundles	: 764
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 130.6
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 60
Fuel clad thickness [mm]	: 0.86
Average core power density [kW/dm ³]	: 50
Average fuel power density [kW/kgU]	: -
Fuel linear heat generation rate [kW/m]	: 18.6

Reactivity control

Control rod material	: Boron Carbide/Hafnium
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 185

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 7.17
Reactor outlet temperature [°C]	: 285
Reactor inlet temperature [°C]	: 277
Coolant mass flow at the rated power [t/h]	: 8100

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: Saturated Steam

Design pressure difference [MPa]	: 0.78

Pressurizer

Total volume [m3]	: 28
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 42400
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.254
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 9.8
LPSI system pressure [MPa]	: 0.84
HPSI system flowrate [t/h]	: 160
LPSI system flowrate [t/h]	: 454

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.41
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 3130

Main generator

Rated active power [MWe]	: 579
Rated apparent power [MVA]	: 650
Output voltage [kV]	: 19
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 5.9
Steam generator feedwater inlet temperature [°C]	: 226

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 4.74
Total battery capacity [Ah]	: 1400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 690
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: JIS G3204, JIS G3120
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SUS304
Reactor vessel overall length/height [m]	: 12.4
Inside shell diameter [m]	: 4.0
Shell thickness [mm]	: 126
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: 4.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 49000
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 74
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 100
Average fuel power density [kW/kgU]	: 36
Fuel linear heat generation rate [kW/m]	: 17.1

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: BOROSILICATE
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 325
Reactor inlet temperature [°C]	: 288
Coolant mass flow at the rated power [t/h]	: 45400

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 690
SG shell material	: Alloyed Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 886.67
Design heat transfer surface [m2]	: 5060

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.6
Design pressure difference [MPa]	: 0.78

Pressurizer

Total volume [m3]	: 40
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 66000
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.283
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 9.5
LPSI system pressure [MPa]	: 0.82
HPSI system flowrate [t/h]	: 280
LPSI system flowrate [t/h]	: 681

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.48
HP cylinder Inlet steam moisture [%]	: 0.4
HP cylinder inlet steam temperature [°C]	: 270.8
HP cylinder Inlet steam flow rate [t/h]	: 5000

Main generator

Rated active power [MWe]	: 912
Rated apparent power [MVA]	: 1020
Output voltage [kV]	: 21
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 5.9
Steam generator feedwater inlet temperature [°C]	: 216

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 5.6
Total battery capacity [Ah]	: 2400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1440
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Applicable>

Tube shape	: U-tube
Tube material	: INCONEL 690
SG shell material	: SA508
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 864.25
Design heat transfer surface [m2]	: 5119

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5
Design pressure difference [MPa]	: 0.78

Pressurizer

Total volume [m3]	: 28
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 41059
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.30
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 8.1
LPSI system pressure [MPa]	: 0.84
HPSI system flowrate [t/h]	: 159
LPSI system flowrate [t/h]	: 454.2

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 3
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 5.17
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 267
HP cylinder Inlet steam flow rate [t/h]	: 3267

Main generator

Rated active power [MWe]	: 587
Rated apparent power [MVA]	: 749
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 4
Number of main condensate pumps required for full power	: 3
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.7
Steam generator feedwater inlet temperature [°C]	: 220

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: One Non-Class 1E diesel generator
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 2.92
Total battery capacity [Ah]	: 1700

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 562

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533-B
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS 304
Reactor vessel overall length/height [m]	: 11.93
Inside shell diameter [m]	: 3.35
Shell thickness [mm]	: 168.4
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: IMP ZR-4
Average fuel enrichment [% of U235]	: 3.8
Refuelling frequency [month]	: 13
Part of the core refuelled [%]	: 40
Average discharge burnup [MWd/t]	: 36946
Active core diameter [m]	: 2.46
Active core height/length [m]	: 3.658
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 49.99
Moderator weight [t]	: 170
Number of fuel elements per assembly/bundle	: 235
Fuel clad thickness [mm]	: 0.572
Average core power density [kW/dm ³]	: 107.9
Average fuel power density [kW/kgU]	: 37.53
Fuel linear heat generation rate [kW/m]	: 18.04

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: Borosilicate Glass
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 33

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 170
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 324.5
Reactor inlet temperature [°C]	: 287
Coolant mass flow at the rated power [t/h]	: 32250

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: SA508
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 941
Design heat transfer surface [m ²]	: 5114

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 6
Design pressure difference [MPa]	: 0.85

Pressurizer

Total volume [m ³]	: 28
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Double
Containment Shape	: Cylindrical
Containment structure	: Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 40776
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.31
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 8.22
LPSI system pressure [MPa]	: 0.79
HPSI system flowrate [t/h]	: 159
LPSI system flowrate [t/h]	: 454.2

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 3
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.35
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 276
HP cylinder Inlet steam flow rate [t/h]	: 3676

Main generator

Rated active power [MWe]	: 650
Rated apparent power [MVA]	: 700
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 4
Number of main condensate pumps required for full power	: 3
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.4
Steam generator feedwater inlet temperature [°C]	: 222

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: No cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: One Non-Class 1E diesel generator
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 4.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 920

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 12.98
Inside shell diameter [m]	: 3.99
Shell thickness [mm]	: 200.1
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRLO
Average fuel enrichment [% of U235]	: 4.5
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 41
Average discharge burnup [MWd/t]	: 17910
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.658
Number of fissile fuel assemblies/bundles	: 151
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.76
Moderator weight [t]	: 177.56
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.572
Average core power density [kW/dm ³]	: 104.5
Average fuel power density [kW/kgU]	: 38.4
Fuel linear heat generation rate [kW/m]	: 17.83

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 28

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: 177.56
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 326
Reactor inlet temperature [°C]	: 291.5
Coolant mass flow at the rated power [t/h]	: 66611

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: Carbon Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 929
Design heat transfer surface [m2]	: 5109.7

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.2
Design pressure difference [MPa]	: 1.166

Pressurizer

Total volume [m3]	: 39.24
Number of safety valves	: 3
Number of relief valves	: 3
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Other - -

Total containment volume [m3]	: 58899
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.31
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 17.3
LPSI system pressure [MPa]	: 0.807
HPSI system flowrate [t/h]	: 34
LPSI system flowrate [t/h]	: 681.4

Reactor protection system

Moderator weight [t]	: 270
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 104.5
Average fuel power density [kW/kgU]	: 38.3
Fuel linear heat generation rate [kW/m]	: 17.83

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: 270
Operating coolant pressure [MPa]	: 15.4
Reactor outlet temperature [°C]	: 323.2
Reactor inlet temperature [°C]	: 286
Coolant mass flow at the rated power [t/h]	: 66253

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: low alloy steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 928.3
Design heat transfer surface [m2]	: 4699

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.9
Design pressure difference [MPa]	: 0.8

Pressurizer

Total volume [m3]	: 40.3
Number of safety valves	: 3
Number of relief valves	: 3
Installed heater power [kW]	: 1440

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 49400
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.42
Design leakage rate [% per day]	: 0.3
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 17
LPSI system pressure [MPa]	: 0.7
HPSI system flowrate [t/h]	: 34
LPSI system flowrate [t/h]	: 740

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 5.53
HP cylinder Inlet steam moisture [%]	: 0.31
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 5446

Main generator

Rated active power [MWe]	: 986
Rated apparent power [MVA]	: 1100
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5.08

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7
Steam generator feedwater inlet temperature [°C]	: 219.5

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 3
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: 0
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 9
Total battery capacity [Ah]	: 5180

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 1114

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: MNMONI(16-MND-5)
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: AISI308_310
Reactor vessel overall length/height [m]	: 10.50
Inside shell diameter [m]	: 3.99
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRCALLOY-4
Average fuel enrichment [% of U235]	: 4
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 38
Average discharge burnup [MWd/t]	: 42500
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.86
Moderator weight [t]	: 270
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 104.5
Average fuel power density [kW/kgU]	: 38.3
Fuel linear heat generation rate [kW/m]	: 17.83

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508/AUSTENITE-SS
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: AISI308_313
Reactor vessel overall length/height [m]	: 14.445
Inside shell diameter [m]	: 3.96
Shell thickness [mm]	: 259
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRLO
Average fuel enrichment [% of U235]	: 5
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 36.15
Average discharge burnup [MWd/t]	: 38723
Active core diameter [m]	: 3.12
Active core height/length [m]	: 3.81
Number of fissile fuel assemblies/bundles	: 177
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 75.941
Moderator weight [t]	: 328.5
Number of fuel elements per assembly/bundle	: 236
Fuel clad thickness [mm]	: 0.635
Average core power density [kW/dm ³]	: 96.6
Average fuel power density [kW/kgU]	: 38.3
Fuel linear heat generation rate [kW/m]	: 17.69

Reactivity control

Control rod material	: Boron Carbide SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 180

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 328.5
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 327.3
Reactor inlet temperature [°C]	: 295.8
Coolant mass flow at the rated power [t/h]	: 55112.4

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL-690
SG shell material	: SA-508
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 1412.5
Design heat transfer surface [m2]	: <Not Available>

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 4.963
Design pressure difference [MPa]	: 0.72

Pressurizer

Total volume [m3]	: 50.97
Number of safety valves	: 3
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: 1800

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 77220
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.39
Design leakage rate [% per day]	: 0.05
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 14.2
LPSI system pressure [MPa]	: 0.62
HPSI system flowrate [t/h]	: 254
LPSI system flowrate [t/h]	: 1135.0

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 4
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 7.14
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 287.1
HP cylinder Inlet steam flow rate [t/h]	: 5780

Main generator

Rated active power [MWe]	: 1050
Rated apparent power [MVA]	: 1209.6
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5.066

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 1
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.97
Steam generator feedwater inlet temperature [°C]	: 232

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 2
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 1
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 1
Estimated time reserve of the batteries at full load [h]	: 4
Total installed capacity of the on-site emergency power sources per unit [MW]	: 13.6
Total battery capacity [Ah]	: 2800

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 700

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-508/AUSTENITE-SS

On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 13
Total battery capacity [Ah]	: <Not Applicable>

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 723.54

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Flat End
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SS304L
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: <Not Applicable>
Reactor vessel overall length/height [m]	: <Not Applicable>
Inside shell diameter [m]	: 7.60
Shell thickness [mm]	: 43.4
Number of pressure channels	: 380
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: 4.19

Reactor Core

Fuel assembly geometry	: Circular
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: <Not Applicable>
Average fuel enrichment [% of U235]	: 0.71
Refuelling frequency [month]	: 15
Part of the core refuelled [%]	: 96
Average discharge burnup [MWd/t]	: 7296
Active core diameter [m]	: 7.69
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 4560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 84
Moderator weight [t]	: 236
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.4
Average core power density [kW/dm ³]	: 11.2
Average fuel power density [kW/kgU]	: 23.69
Fuel linear heat generation rate [kW/m]	: 0.1615

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: <Not Applicable>
Burnable neutron absorber material specification	: <Not Applicable>
Soluble neutron absorber material	: <Not Applicable>
Secondary shutdown system	: Gd Injection
Number of control rod assemblies	: 21

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: 180
Operating coolant pressure [MPa]	: 10.5
Reactor outlet temperature [°C]	: 310
Reactor inlet temperature [°C]	: 266
Coolant mass flow at the rated power [t/h]	: 8020

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Available>
Tube shape	: U-tube
Tube material	: Incoloy 800
SG shell material	: Carbon Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 516
Design heat transfer surface [m ²]	: 3197

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 6.7
Design pressure difference [MPa]	: 1.83

Pressurizer

Total volume [m ³]	: 45
Number of safety valves	: <Not Applicable>
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m ³]	: 48480
Number of containment spray pumps	: <Not Applicable>
Containment design pressure [MPa]	: 0.12
Design leakage rate [% per day]	: 0.5
Type of H ₂ recombiner	: <Not Applicable>

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: 2
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: <Not Applicable>
LPSI system pressure [MPa]	: 0.7
HPSI system flowrate [t/h]	: <Not Applicable>
LPSI system flowrate [t/h]	: 2181.6

Reactor protection system

Control equipment technology	: <Not Applicable>
Number of independent system divisions	: <Not Applicable>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Applicable>
Number of independent system divisions	: <Not Applicable>

Secondary systems

Turbine

Turbine type	: Superheated steam
Number of turbine-generators per unit/reactor	: 4
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 4.59
HP cylinder Inlet steam moisture [%]	: 0.9968
HP cylinder inlet steam temperature [°C]	: 257.5
HP cylinder Inlet steam flow rate [t/h]	: 3584.8

Main generator

Rated active power [MWe]	: 713
Rated apparent power [MVA]	: 828
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 2
Number of main condensate pumps required for full power	: 1
Condenser vacuum at the full power (absolute pressure) [kPa]	: 6

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 6.5
Steam generator feedwater inlet temperature [°C]	: 188.7

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 1
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: Safety Related cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 1
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 14.2
Total battery capacity [Ah]	: 8875

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 1862

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Rated apparent power [MVA]	: 1284
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 4
Number of main condensate pumps required for full power	: 3
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.9329

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 1
Number of feedwater pumps required for full power operation	: 3
Feedwater discharge pressure [MPa]	: 8.56
Steam generator feedwater inlet temperature [°C]	: 231

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 1
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 2.2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.4
Total battery capacity [Ah]	: 6480

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 1152

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA508CL4
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-309
Reactor vessel overall length/height [m]	: 14.4
Inside shell diameter [m]	: 4.18
Shell thickness [mm]	: 204.7
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRLO
Average fuel enrichment [% of U235]	: 4.2
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 36
Average discharge burnup [MWd/t]	: 42700
Active core diameter [m]	: 3.124
Active core height/length [m]	: 3.81
Number of fissile fuel assemblies/bundles	: 177
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 76.25
Moderator weight [t]	: 273.3
Number of fuel elements per assembly/bundle	: 236
Fuel clad thickness [mm]	: 0.572
Average core power density [kW/dm ³]	: 96.6
Average fuel power density [kW/kgU]	: 36.9
Fuel linear heat generation rate [kW/m]	: 17.26

Reactivity control

Control rod material	: Boron Carbide SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: B4C
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: <Not Available>
Number of control rod assemblies	: 73

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: 282
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 327.3
Reactor inlet temperature [°C]	: 295.8
Coolant mass flow at the rated power [t/h]	: 60732

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: Carbon Steel/Stainless Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 1413.4
Design heat transfer surface [m2]	: 7016

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 6
Design pressure difference [MPa]	: 0.35

Pressurizer

Total volume [m3]	: 51
Number of safety valves	: 3
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: 1800

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 76400
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.37
Design leakage rate [% per day]	: 0.1
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 14.0
LPSI system pressure [MPa]	: 0.5
HPSI system flowrate [t/h]	: 144
LPSI system flowrate [t/h]	: 954

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 4
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 7.14
HP cylinder Inlet steam moisture [%]	: 0.50
HP cylinder inlet steam temperature [°C]	: 287.1
HP cylinder Inlet steam flow rate [t/h]	: 5539

Main generator

Rated active power [MWe]	: 1049
Rated apparent power [MVA]	: 1213
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 4
Number of main condensate pumps required for full power	: 3
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 1
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 10.2
Steam generator feedwater inlet temperature [°C]	: 234

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: 2
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related + Other systems
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Applicable>
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 1
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: AAC D/G
Estimated time reserve of the batteries at full load [h]	: 4
Total installed capacity of the on-site emergency power sources per unit [MW]	: 13
Total battery capacity [Ah]	: 11200

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 1302

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

HPSI systems pressure [MPa]	: 8.5
LPSI system pressure [MPa]	: 1
HPSI system flowrate [t/h]	: 185
LPSI system flowrate [t/h]	: 871.2

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 4
Turbine speed [rpm]	: 1800
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 7.14
HP cylinder Inlet steam moisture [%]	: 0.45
HP cylinder inlet steam temperature [°C]	: 287.1
HP cylinder Inlet steam flow rate [t/h]	: 5507

Main generator

Rated active power [MWe]	: 1050
Rated apparent power [MVA]	: 1219.6
Output voltage [kV]	: 22
Output frequency [Hz]	: 60

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 3
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 5.08

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: 1
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: 1
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 9.3
Steam generator feedwater inlet temperature [°C]	: 233

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Extra-duty Plant Personnel
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 5
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 1
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: 1
Estimated time reserve of the batteries at full load [h]	: 10
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7.2
Total battery capacity [Ah]	: 19400

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Applicable>
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 700

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533-GR-B-CL-1
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS-304
Reactor vessel overall length/height [m]	: 21.1
Inside shell diameter [m]	: 5.23
Shell thickness [mm]	: 168
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 25
Average discharge burnup [MWd/t]	: 35000
Active core diameter [m]	: 3.62
Active core height/length [m]	: 3.81
Number of fissile fuel assemblies/bundles	: 444
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 81.02
Moderator weight [t]	: <Not Available>
Number of fuel elements per assembly/bundle	: 62
Fuel clad thickness [mm]	: 0.813
Average core power density [kW/dm ³]	: 49.15
Average fuel power density [kW/kgU]	: 24.3
Fuel linear heat generation rate [kW/m]	: 17.72

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: GD 203
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: <Not Available>
Number of control rod assemblies	: 109

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 7.2
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 278.5
Coolant mass flow at the rated power [t/h]	: 4876

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m2]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 3.35
Design pressure difference [MPa]	:

Pressurizer

Total volume [m3]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: <Not Applicable>

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel+Concrete
Pressure suppression system	: Water Condenser
Additional pressure suppression system	: Pools

Total containment volume [m3]	: 7447
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 3.9
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: <Not Applicable>
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: <Not Applicable>
LPSI system pressure [MPa]	: <Not Applicable>
HPSI system flowrate [t/h]	: <Not Applicable>
LPSI system flowrate [t/h]	: <Not Applicable>

Reactor protection system

Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Steel+Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 2.65
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.34
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 268.3
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: 325
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Stainless Steel
Reactor vessel material specification	: AS304L,A240
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 4.88
Inside shell diameter [m]	: 4.88
Shell thickness [mm]	: 192.5
Number of pressure channels	: 380
Pressure channel material	: Zircaloy
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 8650
Active core diameter [m]	: 3.82
Active core height/length [m]	: 4.87
Number of fissile fuel assemblies/bundles	: 2277
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 30.4
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 19
Fuel clad thickness [mm]	: 0.38
Average core power density [kW/dm ³]	: 8.72
Average fuel power density [kW/kgU]	: 15.5
Fuel linear heat generation rate [kW/m]	: 4.13

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 4

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 10.6
Reactor outlet temperature [°C]	: 293
Reactor inlet temperature [°C]	: 246
Coolant mass flow at the rated power [t/h]	: 6872

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: -
Tube material	: MONEL-400
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: 2520

Containment systems

Containment type	: <Not Available>
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 1.9
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 3.87
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 248
HP cylinder Inlet steam flow rate [t/h]	: 747

Main generator

Rated active power [MWe]	: 138.6
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Flat End
Reactor vessel centreline orientation	: Horizontal
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: ZR-NB
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 5.97
Inside shell diameter [m]	: 7.6
Shell thickness [mm]	: 28.6
Number of pressure channels	: 380
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: 4.34

Reactor Core

Fuel assembly geometry	: Circular
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: D ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: Zy-4
Average fuel enrichment [% of U235]	: 0.71
Refuelling frequency [month]	: <Not Applicable>
Part of the core refuelled [%]	: <Not Applicable>
Average discharge burnup [MWd/t]	: 7100
Active core diameter [m]	: 6.123
Active core height/length [m]	: 5.94
Number of fissile fuel assemblies/bundles	: 4560
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 97.67
Moderator weight [t]	: 242.54
Number of fuel elements per assembly/bundle	: 37
Fuel clad thickness [mm]	: 0.38
Average core power density [kW/dm ³]	: 11.7
Average fuel power density [kW/kgU]	: 21.1
Fuel linear heat generation rate [kW/m]	: 42.9

Reactivity control

Control rod material	: Cadmium SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd(NO ₃) ₃ ·6H ₂ O
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: Gd Injection
Number of control rod assemblies	: 65

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: D ₂ O
Coolant weight [t]	: 88.266
Operating coolant pressure [MPa]	: 9.99
Reactor outlet temperature [°C]	: 310
Reactor inlet temperature [°C]	: 266.6
Coolant mass flow at the rated power [t/h]	: 27720

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: SB163NiFeCr UNSNo. 8800
SG shell material	: Carbon Steel SA 516gr.70
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 516
Design heat transfer surface [m ²]	: 3193

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 2
Pump motor rating [MW]	: 5.028
Design pressure difference [MPa]	: 1.87

Pressurizer

Total volume [m ³]	: 45.31
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed+Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 48477
Number of containment spray pumps	: <Not Applicable>
Containment design pressure [MPa]	: 0.1241
Design leakage rate [% per day]	: 0.5
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: <Not Applicable>
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>

Reactor outlet temperature [°C]	: 322
Reactor inlet temperature [°C]	: 290
Coolant mass flow at the rated power [t/h]	: 64000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 274.3
HP cylinder Inlet steam flow rate [t/h]	: 6430

Main generator

Rated active power [MWe]	: 1000
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.6
Steam generator feedwater inlet temperature [°C]	: 220

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 5
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 2
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 18.9
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 4.136
Shell thickness [mm]	: 192.5
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33.3
Average discharge burnup [MWd/t]	: 40000
Active core diameter [m]	: 3.16
Active core height/length [m]	: 3.53
Number of fissile fuel assemblies/bundles	: 163
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 76
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 312
Fuel clad thickness [mm]	: 0.68
Average core power density [kW/dm ³]	: 108
Average fuel power density [kW/kgU]	: 46
Fuel linear heat generation rate [kW/m]	: 17.6

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: CRB-2
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 61

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 16
Reactor outlet temperature [°C]	: 322
Reactor inlet temperature [°C]	: 290
Coolant mass flow at the rated power [t/h]	: 64000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1

Steam generators (SG)/drum separators

Type of SG	: <Not Available>
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: Straight
Tube material	: ICR2MO
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	:
Design heat transfer surface [m ²]	:

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: <Not Applicable>
Pressure suppression system	: <Not Available>
Additional pressure suppression system	: <Not Available>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	:
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 3
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 13
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 500
HP cylinder Inlet steam flow rate [t/h]	: 540

Main generator

Rated active power [MWe]	: 200
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: CR18NI10TI
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 3
Inside shell diameter [m]	: 4.1
Shell thickness [mm]	: -
Number of pressure channels	: -
Pressure channel material	: -
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: GRAPHITE
Fuel clad material	: Stainless Steel
Fuel clad material specification	: SS
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 3000
Active core diameter [m]	: 4.1
Active core height/length [m]	: 3
Number of fissile fuel assemblies/bundles	: 273
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 7.1
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 6
Fuel clad thickness [mm]	: -
Average core power density [kW/dm ³]	: 1.8
Average fuel power density [kW/kgU]	: 18
Fuel linear heat generation rate [kW/m]	: 27

Reactivity control

Control rod material	: <Not Available>
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: -

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 6
Reactor outlet temperature [°C]	: 280
Reactor inlet temperature [°C]	: 253
Coolant mass flow at the rated power [t/h]	: 630

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: 6
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: <Not Available>
Number of pumps per RCS loop	: <Not Available>
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Applicable>
Containment Shape	: <Not Available>
Containment structure	: <Not Applicable>
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280
HP cylinder Inlet steam flow rate [t/h]	: 100

Main generator

Rated active power [MWe]	: 12
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280
HP cylinder Inlet steam flow rate [t/h]	: 100

Main generator

Rated active power [MWe]	: 12
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Cooling towers
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 4.136
Shell thickness [mm]	: 192.5
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 40000
Active core diameter [m]	: 3.16
Active core height/length [m]	: 3.53
Number of fissile fuel assemblies/bundles	: 163
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 76
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 312
Fuel clad thickness [mm]	: 0.68
Average core power density [kW/dm ³]	: 108
Average fuel power density [kW/kgU]	: 46
Fuel linear heat generation rate [kW/m]	: 17.6

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: CRB-2
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 61

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 16
Reactor outlet temperature [°C]	: 322
Reactor inlet temperature [°C]	: 290
Coolant mass flow at the rated power [t/h]	: 64000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 274.3
HP cylinder Inlet steam flow rate [t/h]	: 6430

Main generator

Rated active power [MWe]	: 1000
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	:

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.6
Steam generator feedwater inlet temperature [°C]	: 220

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 5
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 2
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 18.9
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 6
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 250
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 23Ni,13Cr - 1 layer, 19Ni,9Cr - 3 other layers
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 28600
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 83
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron Carbide SS
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 12.5
Reactor outlet temperature [°C]	: 300
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 39000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 6
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 250
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.59
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280.4
HP cylinder Inlet steam flow rate [t/h]	: 2890

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: -
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 7
Inside shell diameter [m]	: 0.08
Shell thickness [mm]	: 4
Number of pressure channels	: -
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: GRAPHITE
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 10000
Active core diameter [m]	: 11.8
Active core height/length [m]	: 7
Number of fissile fuel assemblies/bundles	: 1693
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 192
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 36
Fuel clad thickness [mm]	: 0.9
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 19.4
Fuel linear heat generation rate [kW/m]	: 11.2

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 150

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 7
Reactor outlet temperature [°C]	: 284
Reactor inlet temperature [°C]	: 270
Coolant mass flow at the rated power [t/h]	: 37500

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: 4
Tube shape	: -
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Applicable>
Containment Shape	: <Not Available>
Containment structure	: <Not Applicable>
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m ³]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H ₂ recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.59
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280.4
HP cylinder Inlet steam flow rate [t/h]	: 2890

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.59
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280.4
HP cylinder Inlet steam flow rate [t/h]	: 2890

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: -
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 7
Inside shell diameter [m]	: 0.04
Shell thickness [mm]	: 4
Number of pressure channels	: -
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: GRAPHITE
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 22000
Active core diameter [m]	: 11.8
Active core height/length [m]	: 7
Number of fissile fuel assemblies/bundles	: 1661
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 192
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 18
Fuel clad thickness [mm]	: 0.9
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 19.4
Fuel linear heat generation rate [kW/m]	: 14.5

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 211

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 7
Reactor outlet temperature [°C]	: 284
Reactor inlet temperature [°C]	: 270
Coolant mass flow at the rated power [t/h]	: 37500

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: 4
Tube shape	: -
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Applicable>
Containment Shape	: <Not Available>
Containment structure	: <Not Applicable>
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.59
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280.4
HP cylinder Inlet steam flow rate [t/h]	: 2890

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 28600
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 83
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 73

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 12.5
Reactor outlet temperature [°C]	: 295.8
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 39000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: 40
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 6
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	: -

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 28600
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 83
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 73

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 12.5
Reactor outlet temperature [°C]	: 295.8
Reactor inlet temperature [°C]	: 267
Coolant mass flow at the rated power [t/h]	: 39000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 40
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Applicable>
Containment structure	: Steel+Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: 6
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 4.4
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 255
HP cylinder Inlet steam flow rate [t/h]	:

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: <Not Available>
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: <Not Available>

Number of main condensate pumps	:
Number of main condensate pumps required for full power	:
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 12.95
Inside shell diameter [m]	: 4.136
Shell thickness [mm]	: 192.5
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 40000
Active core diameter [m]	: 3.16
Active core height/length [m]	: 3.53
Number of fissile fuel assemblies/bundles	: 163
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 76
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 331
Fuel clad thickness [mm]	: 0.65
Average core power density [kW/dm ³]	: 108
Average fuel power density [kW/kgU]	: 46
Fuel linear heat generation rate [kW/m]	: 17.6

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 109

Reactor coolant system

Number of external reactor coolant loops	: 4
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 16
Reactor outlet temperature [°C]	: 324
Reactor inlet temperature [°C]	: 289
Coolant mass flow at the rated power [t/h]	: -

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: <Not Available>
Number of SG	: 4
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 10GN3MFA alloyed carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m ²]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 4
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: 79
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 2520

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	: -

Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 3
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 7.6
Steam generator feedwater inlet temperature [°C]	: 220

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 5
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: 2
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	: 1
Total installed capacity of the on-site emergency power sources per unit [MW]	: 18.9
Total battery capacity [Ah]	: 1500

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: <Not Available>
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: -
Vessel cladding material	: <Not Applicable>
Vessel cladding material specification	: NONE
Reactor vessel overall length/height [m]	: 7
Inside shell diameter [m]	: 0.04
Shell thickness [mm]	: 4
Number of pressure channels	: -
Pressure channel material	: Zr+Nb(2.5%)
Pressure channel wall thickness [mm]	: -

Reactor Core

Fuel assembly geometry	: <Not Available>
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: ON-line
Moderator material	: GRAPHITE
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR/1%NB
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: -
Part of the core refuelled [%]	: -
Average discharge burnup [MWd/t]	: 22200
Active core diameter [m]	: 11.8
Active core height/length [m]	: 7
Number of fissile fuel assemblies/bundles	: 1661
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 192
Moderator weight [t]	: -
Number of fuel elements per assembly/bundle	: 18
Fuel clad thickness [mm]	: 0.9
Average core power density [kW/dm ³]	: 103
Average fuel power density [kW/kgU]	: 19.4
Fuel linear heat generation rate [kW/m]	: 14.5

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: <Not Available>
Secondary shutdown system	: -
Number of control rod assemblies	: 175

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 7
Reactor outlet temperature [°C]	: 284
Reactor inlet temperature [°C]	: 270
Coolant mass flow at the rated power [t/h]	: 37500

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Available>
Number of SG	: <Not Applicable>
Number of drum separators	: 4
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: -
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: 4
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m ³]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: Confinement
Containment Shape	: <Not Available>
Containment structure	: <Not Available>
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: -
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 6.59
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 280.4
HP cylinder Inlet steam flow rate [t/h]	: 2890

Main generator

Rated active power [MWe]	: 500
Rated apparent power [MVA]	: -
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Available>
-------------------------	-------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: -
Extraction steam pressure [MPa]	: -

Design Characteristics

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: E-110 (Zr+1%Nb)
Average fuel enrichment [% of U235]	: 4.25
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 23
Average discharge burnup [MWd/t]	: 46000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.685
Average core power density [kW/dm ³]	: 87.9
Average fuel power density [kW/kgU]	: 34
Fuel linear heat generation rate [kW/m]	: 13.1

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd2O3
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: H3BO3 Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 12.0
Reactor outlet temperature [°C]	: 295
Reactor inlet temperature [°C]	: 268
Coolant mass flow at the rated power [t/h]	: 42000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m2]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 2
Design pressure difference [MPa]	:

Pressurizer

Total volume [m3]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: Rectangular
Containment structure	: Steel+Concrete
Pressure suppression system	: Water Condenser
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 50000
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 0.25
Design leakage rate [% per day]	:
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: 3
HPSI systems pressure [MPa]	: 13
LPSI system pressure [MPa]	: 0.9
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.512
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 256
HP cylinder Inlet steam flow rate [t/h]	: 1360

Main generator

Rated active power [MWe]	: 253
Rated apparent power [MVA]	: 259
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Brass

Number of main condensate pumps	: 6
Number of main condensate pumps required for full power	: 4
Condenser vacuum at the full power (absolute pressure) [kPa]	: 12

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 4800

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 379
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 7056

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	: 147
Extraction steam pressure [MPa]	: 1.451

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: E-110 (Zr+1%Nb)
Average fuel enrichment [% of U235]	: 4.25
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 23
Average discharge burnup [MWd/t]	: 46000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 42
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.685
Average core power density [kW/dm ³]	: 88.7
Average fuel power density [kW/kgU]	: 34.4
Fuel linear heat generation rate [kW/m]	: 13.3

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd ₂ O ₃
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H ₂ O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 12.0
Reactor outlet temperature [°C]	: 295
Reactor inlet temperature [°C]	: 268
Coolant mass flow at the rated power [t/h]	: 42000

Steam generators (SG)/drum separators

Type of SG	: Horizontal
SG output	: Saturated Steam
Number of SG	: 6
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: 08CH18N10T SS
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 2
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: Rectangular
Containment structure	: Steel+Concrete
Pressure suppression system	: Water Condenser
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 50000
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 0.25
Design leakage rate [% per day]	: 13
Type of H2 recombiner	: Passive

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: 3
HPSI systems pressure [MPa]	: 13
LPSI system pressure [MPa]	: 0.9
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.512
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 256
HP cylinder Inlet steam flow rate [t/h]	: 1360

Main generator

Rated active power [MWe]	: 253
Rated apparent power [MVA]	: 273
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Brass

Number of main condensate pumps	: 6
Number of main condensate pumps required for full power	: 4
Condenser vacuum at the full power (absolute pressure) [kPa]	: 12

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 3
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 8.4
Total battery capacity [Ah]	: 4800

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 379
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: 7056

Non-electrical applications

Primary heat connection	: Turbine Extraction
-------------------------	----------------------

Number of heat connection points per unit	: <Not Available>
Number of intermediate circuits/heat exchangers	: <Not Available>
Total capacity of heat connections [MWt]	:
Extraction steam pressure [MPa]	: 1.451

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: 15Ch2MFA; 2,5%Cr0.6°Mo0,25%V
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: 08%Cr18%Ni10%Ti
Reactor vessel overall length/height [m]	: 13.9
Inside shell diameter [m]	: 3.54
Shell thickness [mm]	: 140
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Hexagonal
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: E-110 (Zr+1%Nb)
Average fuel enrichment [% of U235]	: 4.25
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 22
Average discharge burnup [MWd/t]	: 44000
Active core diameter [m]	: 2.88
Active core height/length [m]	: 2.5
Number of fissile fuel assemblies/bundles	: 349
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 44
Moderator weight [t]	: 240
Number of fuel elements per assembly/bundle	: 126
Fuel clad thickness [mm]	: 0.63
Average core power density [kW/dm ³]	: 84.4
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 13.49

Reactivity control

Control rod material	: Boron SS
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: Gd ₂ O ₃
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 37

Reactor coolant system

Number of external reactor coolant loops	: 6
Coolant type	: H ₂ O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 12.0
Reactor outlet temperature [°C]	: 295

Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 229.2
Design heat transfer surface [m ²]	: 2620

Main coolant pumps/circulators

Total number of pumps/circulators	: 6
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 1.6
Design pressure difference [MPa]	: 0.45

Pressurizer

Total volume [m ³]	: 44
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1620

Containment systems

Containment type	: Confinement
Containment Shape	: Rectangular
Containment structure	: Steel+Concrete
Pressure suppression system	: Water Condenser
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 52519
Number of containment spray pumps	: 3
Containment design pressure [MPa]	: 0.25
Design leakage rate [% per day]	: 5
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 3
Number of hydroaccumulators	: 4
Number of core spray system pumps (BWR)	: 3
HPSI systems pressure [MPa]	: 13.5
LPSI system pressure [MPa]	: 0.8
HPSI system flowrate [t/h]	: 65
LPSI system flowrate [t/h]	: 800

Reactor protection system

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 3

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital/Analog
Number of independent system divisions	: 3

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 4.32
HP cylinder Inlet steam moisture [%]	: 0.25
HP cylinder inlet steam temperature [°C]	: 256
HP cylinder Inlet steam flow rate [t/h]	: 1270

Main generator

Rated active power [MWe]	: 220
Rated apparent power [MVA]	: 259
Output voltage [kV]	: 15.75
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 2
Condenser tube material	: Brass

Number of main condensate pumps	: 6
Number of main condensate pumps required for full power	: 4
Condenser vacuum at the full power (absolute pressure) [kPa]	: 8

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 5
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 4
Feedwater discharge pressure [MPa]	: 6.6
Steam generator feedwater inlet temperature [°C]	: 223

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 4
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: Safety Related + Other systems
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Carbon Steel
Reactor vessel material specification	: SA 533 GR.B, CLASS 1.
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS
Reactor vessel overall length/height [m]	: 11.9
Inside shell diameter [m]	: 3.35
Shell thickness [mm]	: 168
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRLO
Average fuel enrichment [% of U235]	: 4.8
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 46
Average discharge burnup [MWd/t]	: 44029
Active core diameter [m]	: 2.46
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 121
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 50
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 235
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 108.7
Average fuel power density [kW/kgU]	: 37.56
Fuel linear heat generation rate [kW/m]	: 17.62

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: 1.1X IFBA, 1.4X IFBA
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 33

Reactor coolant system

Number of external reactor coolant loops	: 2
Coolant type	: H ₂ O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 325.2
Reactor inlet temperature [°C]	: 286.7
Coolant mass flow at the rated power [t/h]	: 28774

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 2
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 690TT
SG shell material	: Carbon Steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	:
Design heat transfer surface [m ²]	: 7177

Main coolant pumps/circulators

Total number of pumps/circulators	: 2
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 5.2
Design pressure difference [MPa]	: 1.6

Pressurizer

Total volume [m ³]	: 28.3
Number of safety valves	: 2
Number of relief valves	: 2
Installed heater power [kW]	: 1000

Containment systems

Containment type	: Double
Containment Shape	: Cylindrical
Containment structure	: Reinforced Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	: 40000
Number of containment spray pumps	: 2
Containment design pressure [MPa]	: 0.309
Design leakage rate [% per day]	: 0.2
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 2
Number of LPSI systems	: 2
Number of hydroaccumulators	: 2
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 17.1
LPSI system pressure [MPa]	: 4.1
HPSI system flowrate [t/h]	: 100
LPSI system flowrate [t/h]	: 460

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Superheated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 2
HP cylinder inlet steam pressure [MPa]	: 6.13
HP cylinder Inlet steam moisture [%]	: 0.47
HP cylinder inlet steam temperature [°C]	: 278.1
HP cylinder Inlet steam flow rate [t/h]	: 3931

Main generator

Rated active power [MWe]	: 730
Rated apparent power [MVA]	: 813
Output voltage [kV]	: 21
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: -

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 3
Condenser vacuum at the full power (absolute pressure) [kPa]	: 4.9

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 6.67
Steam generator feedwater inlet temperature [°C]	: 222.5

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water Sprinkler Only
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 1
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 4
Total installed capacity of the on-site emergency power sources per unit [MW]	: 7
Total battery capacity [Ah]	: 2080

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1694
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

ZA-1

KOEBERG-1

SOUTH AFRICA

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA508 CLASS3
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: AISI-309/308
Reactor vessel overall length/height [m]	: 13.17
Inside shell diameter [m]	: 3.98
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: <Not Available>
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	: -
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 36500
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.4
Moderator weight [t]	: 330
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 102.8
Average fuel power density [kW/kgU]	: 32.7
Fuel linear heat generation rate [kW/m]	: 17.6

Reactivity control

Control rod material	: Cadmium Alloy
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	: -
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	: -
Number of control rod assemblies	: 32

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	: -
Operating coolant pressure [MPa]	: 15.5
Reactor outlet temperature [°C]	: 323.2
Reactor inlet temperature [°C]	: 286.7
Coolant mass flow at the rated power [t/h]	: 47675

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: -
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: -
Design heat transfer surface [m2]	: -

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: -
Design pressure difference [MPa]	: -

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	: -

Containment systems

Containment type	: <Not Available>
Containment Shape	: Cylindrical
Containment structure	: Steel+Concrete
Pressure suppression system	: -
Additional pressure suppression system	: -

Total containment volume [m3]	: -
Number of containment spray pumps	: -
Containment design pressure [MPa]	: 0.5
Design leakage rate [% per day]	: -
Type of H2 recombiner	: -

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	: -
LPSI system pressure [MPa]	: -
HPSI system flowrate [t/h]	: -
LPSI system flowrate [t/h]	: -

Reactor protection system

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Engineered Safeguard Feature Actuation System

Control equipment technology	: -
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: <Not Available>
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	: -
Number of IP cylinders per turbine	: -
Number of LP cylinders per turbine	: -
HP cylinder inlet steam pressure [MPa]	: 5.5
HP cylinder Inlet steam moisture [%]	: -
HP cylinder inlet steam temperature [°C]	: 270
HP cylinder Inlet steam flow rate [t/h]	: 5439.6

Main generator

Rated active power [MWe]	: <Not Available>
Rated apparent power [MVA]	: 1120
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: <Not Available>
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

HP cylinder Inlet steam flow rate [t/h]	: 5365

Main generator

Rated active power [MWe]	: 980
Rated apparent power [MVA]	: 1034
Output voltage [kV]	: -
Output frequency [Hz]	: -

Main condenser

Primary means of condenser cooling	: Lake (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 2
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 1

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 2
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: <Not Applicable>
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1804
Interim storage facility type	: Wet
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	:
Reactor vessel overall length/height [m]	: 12.98
Inside shell diameter [m]	: 4.002
Shell thickness [mm]	: 198.3
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRLO
Average fuel enrichment [% of U235]	:
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 28
Average discharge burnup [MWd/t]	: 50500
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.65
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.47
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 110.74
Average fuel power density [kW/kgU]	:
Fuel linear heat generation rate [kW/m]	: 18.92

Reactivity control

Control rod material	: Ag-In-Cd alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: Al203/B-4C
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.72
Reactor outlet temperature [°C]	: 326.7
Reactor inlet temperature [°C]	: 290
Coolant mass flow at the rated power [t/h]	: 15890

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL 600
SG shell material	: 22K carbon steel
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	:
Design heat transfer surface [m ²]	:

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	: 4.8
Design pressure difference [MPa]	:

Pressurizer

Total volume [m ³]	: 40
Number of safety valves	: 3
Number of relief valves	: 2
Installed heater power [kW]	: 1400

Containment systems

Containment type	: Single
Containment Shape	: Cylindrical
Containment structure	: Pre-stressed Concrete
Pressure suppression system	: Spray
Additional pressure suppression system	: Other - relief valves

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 3.86
Design leakage rate [% per day]	: 0.05
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 3
Number of LPSI systems	: 2
Number of hydroaccumulators	: 3
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Digital
Number of independent system divisions	: 2

Engineered Safeguard Feature Actuation System

Control equipment technology	: Digital
Number of independent system divisions	: 2

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 1500
Number of HP cylinders per turbine	:
Number of IP cylinders per turbine	:
Number of LP cylinders per turbine	:
HP cylinder inlet steam pressure [MPa]	: 6.6
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 280
HP cylinder Inlet steam flow rate [t/h]	: 1528

Main generator

Rated active power [MWe]	: 930
Rated apparent power [MVA]	: 930
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: Titanium

Number of main condensate pumps	: 4
Number of main condensate pumps required for full power	: 3
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: 2
Number of motor-driven main feedwater pumps	: <Not Applicable>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: 1
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: 2

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: 1
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 2
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: 1421
Interim storage facility type	: Dry
Interim storage facility capacity (number of spent fuel assemblies)	:

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Main generator

Rated active power [MWe]	: 460
Rated apparent power [MVA]	: 575
Output voltage [kV]	: -
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: River (once-through)
Number of condensers per turbine-generator	: 2
Condenser tube material	: -

Number of main condensate pumps	: -
Number of main condensate pumps required for full power	: -
Condenser vacuum at the full power (absolute pressure) [kPa]	: -

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Available>
Number of motor-driven main feedwater pumps	: <Not Available>
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Available>
Number of feedwater pumps required for full power operation	: -
Feedwater discharge pressure [MPa]	: -
Steam generator feedwater inlet temperature [°C]	: -

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Available>
Number of diesel driven pumps	: <Not Available>
Number of turbine driven pumps	: <Not Available>

Fire protection system

On-site fire suppression/extinguishing system	: <Not Available>
Fire retardant cable coating used for	: -
Cable segregation within the unit used for	: -
On-site fire brigade	: -
Off-site fire brigade response time	: -

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Available>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: <Not Available>
Number of on-site safety related diesel generators (available per unit)	: <Not Available>
Number of on-site safety related gas turbines (available per unit)	: <Not Available>
Number of on site non-safety related diesel generator	: -
Number of on site non-safety related gas turbines	: -
Other on-site emergency AC power sources	: -
Estimated time reserve of the batteries at full load [h]	: -
Total installed capacity of the on-site emergency power sources per unit [MW]	: -
Total battery capacity [Ah]	: -

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Applicable>
Interim storage facility capacity (number of spent fuel assemblies)	: <Not Applicable>

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Carbon Steel
Reactor vessel material specification	: S-20MN- MO-NI 55
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SS 1.4550
Reactor vessel overall length/height [m]	: 10.689
Inside shell diameter [m]	: 4.878
Shell thickness [mm]	: 245
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-4
Average fuel enrichment [% of U235]	:
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 33
Average discharge burnup [MWd/t]	: 33000
Active core diameter [m]	:
Active core height/length [m]	:
Number of fissile fuel assemblies/bundles	: 177
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 82.8
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 236
Fuel clad thickness [mm]	: 0.725
Average core power density [kW/dm ³]	:
Average fuel power density [kW/kgU]	: 36.34
Fuel linear heat generation rate [kW/m]	: 20.71

Reactivity control

Control rod material	: Carbon Steel
Burnable neutron absorber material	: <Not Available>
Burnable neutron absorber material specification	:
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	:

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.7
Reactor outlet temperature [°C]	: 325.9
Reactor inlet temperature [°C]	: 294.3
Coolant mass flow at the rated power [t/h]	: 59806.8

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: Saturated Steam
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	:
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: 1009.3
Design heat transfer surface [m ²]	:

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	: 0.66

Pressurizer

Total volume [m ³]	: 45.2
Number of safety valves	: 2
Number of relief valves	: 1
Installed heater power [kW]	: 1638

Containment systems

Containment type	: Double
Containment Shape	: Spherical
Containment structure	: Steel+Concrete
Pressure suppression system	: <Not Applicable>
Additional pressure suppression system	: <Not Applicable>

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	:
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: 6
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: <Not Available>
Number of independent system divisions	: <Not Available>

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 1
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	:
HP cylinder Inlet steam moisture [%]	:
HP cylinder inlet steam temperature [°C]	: 278.12
HP cylinder Inlet steam flow rate [t/h]	: 5604

Main generator

Rated active power [MWe]	: 1066
Rated apparent power [MVA]	: <Not Available>
Output voltage [kV]	:
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Cooling Towers
Number of condensers per turbine-generator	: 1
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	:

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	:
Steam generator feedwater inlet temperature [°C]	:

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: 4
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	:
Cable segregation within the unit used for	:
On-site fire brigade	:
Off-site fire brigade response time	:

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 3
Number of on-site safety related diesel generators (available per unit)	: 4
Number of on-site safety related gas turbines (available per unit)	: <Not Applicable>
Number of on site non-safety related diesel generator	:
Number of on site non-safety related gas turbines	:
Other on-site emergency AC power sources	:
Estimated time reserve of the batteries at full load [h]	:
Total installed capacity of the on-site emergency power sources per unit [MW]	:
Total battery capacity [Ah]	:

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
-------------------------	--------------------

Number of heat connection points per unit	: <Not Applicable>
Number of intermediate circuits/heat exchangers	: <Not Applicable>
Total capacity of heat connections [MWt]	: <Not Applicable>
Extraction steam pressure [MPa]	: <Not Applicable>

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Carbon Steel
Reactor vessel material specification	: CS
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: AS
Reactor vessel overall length/height [m]	: 12.34
Inside shell diameter [m]	: 3.99
Shell thickness [mm]	: 200
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Pellets
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZIRLO
Average fuel enrichment [% of U235]	:
Refuelling frequency [month]	: 18
Part of the core refuelled [%]	: 30
Average discharge burnup [MWd/t]	: 50500
Active core diameter [m]	: 3.04
Active core height/length [m]	: 3.66
Number of fissile fuel assemblies/bundles	: 157
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 72.5
Moderator weight [t]	:
Number of fuel elements per assembly/bundle	: 264
Fuel clad thickness [mm]	: 0.57
Average core power density [kW/dm ³]	: 110.74
Average fuel power density [kW/kgU]	: 38
Fuel linear heat generation rate [kW/m]	: 18.92

Reactivity control

Control rod material	: Boron Carbide/Cadmium Alloy
Burnable neutron absorber material	: Boron
Burnable neutron absorber material specification	: Al203/B-4C
Soluble neutron absorber material	: Boric Acid H3BO3
Secondary shutdown system	:
Number of control rod assemblies	: 48

Reactor coolant system

Number of external reactor coolant loops	: 3
Coolant type	: H2O
Coolant weight [t]	:
Operating coolant pressure [MPa]	: 15.8
Reactor outlet temperature [°C]	: 328.3
Reactor inlet temperature [°C]	: 291.6
Coolant mass flow at the rated power [t/h]	: 16477.7

Steam generators (SG)/drum separators

Type of SG	: Vertical
SG output	: <Not Available>
Number of SG	: 3
Number of drum separators	: <Not Applicable>
Tube shape	: U-tube
Tube material	: INCONEL-600TT
SG shell material	:
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	:
Design heat transfer surface [m2]	: 4929.3

Main coolant pumps/circulators

Total number of pumps/circulators	: 3
Number of pumps per RCS loop	: 1
Pump motor rating [MW]	:
Design pressure difference [MPa]	:

Pressurizer

Total volume [m3]	: <Not Available>
Number of safety valves	: <Not Available>
Number of relief valves	: <Not Available>
Installed heater power [kW]	:

Containment systems

Containment type	: <Not Available>
Containment Shape	: <Not Available>
Containment structure	: Pre-stressed Concrete+Steel
Pressure suppression system	: Spray
Additional pressure suppression system	: Vacuum Building

Total containment volume [m3]	:
Number of containment spray pumps	:
Containment design pressure [MPa]	: 5
Design leakage rate [% per day]	:
Type of H2 recombiner	:

Emergency core cooling systems

Number of HPSI systems	: <Not Available>
Number of LPSI systems	: <Not Available>
Number of hydroaccumulators	: <Not Available>
Number of core spray system pumps (BWR)	: <Not Available>
HPSI systems pressure [MPa]	:
LPSI system pressure [MPa]	:
HPSI system flowrate [t/h]	:
LPSI system flowrate [t/h]	:

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: <Not Available>

SWEDEN

Design Characteristics

Primary Systems

Reactor pressure vessel

Reactor vessel shape	: Cylindrical, Hemispherical End
Reactor vessel centreline orientation	: Vertical
Reactor vessel material	: Alloyed Steel
Reactor vessel material specification	: SA-533-B
Vessel cladding material	: Stainless Steel
Vessel cladding material specification	: SIS 2333
Reactor vessel overall length/height [m]	: 21.7
Inside shell diameter [m]	: 6.4
Shell thickness [mm]	: 160
Number of pressure channels	: <Not Applicable>
Pressure channel material	: <Not Applicable>
Pressure channel wall thickness [mm]	: <Not Applicable>

Reactor Core

Fuel assembly geometry	: Square
Fuel Form	: Rods
Fuel material	: UO ₂
Refuelling type	: OFF-line
Moderator material	: H ₂ O
Fuel clad material	: Zirconium Alloy
Fuel clad material specification	: ZR-2
Average fuel enrichment [% of U235]	: 3
Refuelling frequency [month]	: 12
Part of the core refuelled [%]	: 20
Average discharge burnup [MWd/t]	: 42000
Active core diameter [m]	: 4.51
Active core height/length [m]	: 3.68
Number of fissile fuel assemblies/bundles	: 676
Number of fertile fuel assemblies (for FBR, N/A for other reactors)	: <Not Applicable>
Fuel weight [t]	: 117.5
Moderator weight [t]	: 247
Number of fuel elements per assembly/bundle	: 96
Fuel clad thickness [mm]	: 0.605
Average core power density [kW/dm ³]	: 45.9
Average fuel power density [kW/kgU]	: 23.1
Fuel linear heat generation rate [kW/m]	: 13.4

Reactivity control

Control rod material	: Boron Carbide
Burnable neutron absorber material	: Gadolinium
Burnable neutron absorber material specification	: UO ₂ -Gd ₂ O ₃
Soluble neutron absorber material	: Boric Acid H ₃ BO ₃
Secondary shutdown system	: H ₃ BO ₃ Injection
Number of control rod assemblies	: 161

Reactor coolant system

Number of external reactor coolant loops	: <Not Applicable>
Coolant type	: H ₂ O
Coolant weight [t]	: 247
Operating coolant pressure [MPa]	: 7
Reactor outlet temperature [°C]	: 286
Reactor inlet temperature [°C]	: 273.5
Coolant mass flow at the rated power [t/h]	: 35100

Steam generators (SG)/drum separators

Type of SG	: <Not Applicable>
SG output	: <Not Applicable>
Number of SG	: <Not Applicable>
Number of drum separators	: <Not Applicable>
Tube shape	: <Not Applicable>
Tube material	: <Not Applicable>
SG shell material	: <Not Applicable>
Drum separator shell material	: <Not Applicable>
Design thermal capacity per SG [MW]	: <Not Applicable>
Design heat transfer surface [m ²]	: <Not Applicable>

Main coolant pumps/circulators

Total number of pumps/circulators	: 8
Number of pumps per RCS loop	: <Not Applicable>
Pump motor rating [MW]	: 0.83
Design pressure difference [MPa]	: 0.125

Pressurizer

Total volume [m ³]	: <Not Applicable>
Number of safety valves	: <Not Applicable>
Number of relief valves	: <Not Applicable>
Installed heater power [kW]	: <Not Applicable>

Containment systems

Containment type	: Confinement
Containment Shape	: Cylindrical
Containment structure	: Steel+Concrete
Pressure suppression system	: Pools
Additional pressure suppression system	: Spray

Total containment volume [m3]	: 9850
Number of containment spray pumps	: 1
Containment design pressure [MPa]	: 6
Design leakage rate [% per day]	: 1
Type of H2 recombiner	: Active

Emergency core cooling systems

Number of HPSI systems	: 4
Number of LPSI systems	: 4
Number of hydroaccumulators	: <Not Applicable>
Number of core spray system pumps (BWR)	: <Not Applicable>
HPSI systems pressure [MPa]	: 7
LPSI system pressure [MPa]	: 1.2
HPSI system flowrate [t/h]	: 81
LPSI system flowrate [t/h]	: 450

Reactor protection system

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Engineered Safeguard Feature Actuation System

Control equipment technology	: Analogue
Number of independent system divisions	: 4

Secondary systems

Turbine

Turbine type	: Saturated steam
Number of turbine-generators per unit/reactor	: 2
Turbine speed [rpm]	: 3000
Number of HP cylinders per turbine	: 1
Number of IP cylinders per turbine	: <Not Applicable>
Number of LP cylinders per turbine	: 3
HP cylinder inlet steam pressure [MPa]	: 6
HP cylinder Inlet steam moisture [%]	: 0.5
HP cylinder inlet steam temperature [°C]	: 285
HP cylinder Inlet steam flow rate [t/h]	: 4360

Main generator

Rated active power [MWe]	: 466
Rated apparent power [MVA]	: 635
Output voltage [kV]	: 21.5
Output frequency [Hz]	: 50

Main condenser

Primary means of condenser cooling	: Sea (once-through)
Number of condensers per turbine-generator	: 1
Condenser tube material	: Titanium

Number of main condensate pumps	: 3
Number of main condensate pumps required for full power	: 2
Condenser vacuum at the full power (absolute pressure) [kPa]	: 3.9

Feedwater system

Number of turbine driven main feedwater pumps	: <Not Applicable>
Number of motor-driven main feedwater pumps	: 3
Number of start-up feed-water pumps (if different from the auxiliary FWP)	: <Not Applicable>
Number of feedwater pumps required for full power operation	: 2
Feedwater discharge pressure [MPa]	: 8.42
Steam generator feedwater inlet temperature [°C]	: <Not Applicable>

Auxiliary / Emergency feedwater

Number of electrical motor-driven pumps	: <Not Applicable>
Number of diesel driven pumps	: <Not Applicable>
Number of turbine driven pumps	: <Not Applicable>

Fire protection system

On-site fire suppression/extinguishing system	: Water+Supplementary chemical systems
Fire retardant cable coating used for	: No cables
Cable segregation within the unit used for	: Safety Related cables
On-site fire brigade	: Dedicated Full Time Fire Brigade
Off-site fire brigade response time	: Less than 30 min.

Emergency power supply systems

Number of alternate power sources from the neighbouring units (available per unit)	: <Not Applicable>
Number of alternate power sources from the transmission grid (standby transformers available per unit)	: 2
Number of on-site safety related diesel generators (available per unit)	: 4
Number of on-site safety related gas turbines (available per unit)	: 1
Number of on site non-safety related diesel generator	: <Not Applicable>
Number of on site non-safety related gas turbines	: <Not Applicable>
Other on-site emergency AC power sources	: <Not Applicable>
Estimated time reserve of the batteries at full load [h]	: 2
Total installed capacity of the on-site emergency power sources per unit [MW]	: 6.4
Total battery capacity [Ah]	: <Not Applicable>

Spent fuel storage

Reactor building spent fuel pool capacity (number of spent fuel assemblies)	: <Not Available>
Interim storage facility type	: <Not Available>
Interim storage facility capacity (number of spent fuel assemblies)	: -

Non-electrical applications

Primary heat connection	: <Not Applicable>
