Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

HA statistics are a reflection of each state's current estimated population information as of February 28, 2009.

Populations do not reflect any changes after February, 2009. (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels, the numbers displayed represents the upper limit.

Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

Acres have been calculated using current digitized (GIS) maps.

Most Recent Year @ AML is the last time AML was achieved on the HMA.

Acreage transferred from BLM to another agency is not deducted from the HA acreage.

Most horse population estimates are direct counts and are not adjusted for animals not observed.

HA totals are calculated based on designations made in the early 1970's. HMAs created from other HAs will not have acres in the HA columns and are not counted in t

the HA totals.
