

THE TURBO SKYLANE FAMILY JUST GOT EVEN MORE **EFFICIENT**

Cessna's Turbo Skylane is known for its stable flight characteristics, making it the ideal plane when transitioning from training to ownership. With low operating costs and high wing visibility, it's perfect for family or business related flights.

- 87-gallon usable fuel supply, enough to carry you nonstop from Chicago to Orlando
- Reaches altitudes up to 20,000 feet while packing a useful load of more than 1,030 lbs
- Deep-contoured leather seats are ergonomically designed to keep circulation flowing
- All-glass Garmin G1000 avionics with optional Enhanced Vision System and Garmin Traffic Awareness System (TAS)

Should you need significantly greater range and independence from leaded fuel, then the Turbo Skylane JT-A™ is for you.

Jet-A fueled, the Turbo Skylane JT-A eliminates Avgas dependency, reducing fuel costs and allowing more time between engine overhauls – keeping your operating costs to a minimum.

Key features include:

- Fuel is available worldwide unlike Avgas
- Jet-A powered engine burns 30-40% less fuel than comparable Avgas engines
- Reduced operating costs
- Greater range – 1,025 nm (1.898 km)
- Single power lever for a simpler flight experience
- Environmentally friendly

For more information on the Turbo Skylane or Turbo Skylane JT-A call 1.800.4.CESSNA.
