

## TuneCore

FOR IMMEDIATE RELEASE

May 5, 2009

### May TuneCore Charts (Covering February 2009 Sales)

Billboard has reported the top selling albums and singles distributed by TuneCore in the month of February (as reported at the start of May). These charts reflect the top revenue generating and selling albums and songs from information that combines sales from paid downloads and paid streams. See the charts on Billboard.com here:

<http://www.billboard.com/bbcom/hotweb/tunecore.jsp>

TuneCore continues to change the music business landscape by offering mega-stars and indie startups alike the opportunity to distribute and sell their music, digitally and physically, worldwide.

About TuneCore:

TuneCore.com has changed the 100-year-old rules and model of the music business. It is a low, flat fee service that distributes anyone's music or videos to iTunes, eMusic, AmazonMP3 and many other major download sites while taking no rights and no revenue from the sale of the music. Artists are building careers, selling significant volumes of music and generating revenue while keeping their rights utilizing the new model created by TuneCore. In its 33 months since launch, TuneCore has distributed tens of thousands of albums and millions of songs to iTunes and other digital stores including Grammy winners, record labels and unsigned artists. TuneCore currently distributes between 150 - 250 release a day (more music is released in one day via TuneCore than any major record label over a year) and recently expanded its offering to distribute full-length films, TV shows, live concerts, documentaries etc to iTunes and more. TuneCore's own Billboard Top 25 seller chart went live in July 2008.
