

10. During your scheduled visit to the Permit Center for review and approval of your plans and project the City staff will go over your stormwater requirements (NPDES, BMP's, SWPPP's). In addition you may receive the 'Contractors Best Management Practices' brochure. When your project is approved you will receive further information during your pre-construction meeting. In addition you may schedule a field meeting to go over the installation requirements as per your approved plans. During the construction phase of your project you will receive a letter around the end of September or early October regarding your BMP and SWPPP's requirements in preparation for winter. However, the City of Salinas requires BMP's and SWPPP's all year and you will receive weekly inspections for compliance.

The Permit Center staff is here to assist you in your efforts to comply with the requirements of both the State of California and the City of Salinas. Some of the links provided in this brochure should apply throughout the County of Monterey.

NOTE:

This brochure has been prepared to help facilitate Engineers, Architects, Geologists, Planners, Designers, Contractors and residents in their preparation of plans and reports to be submitted for review by the Permit Center staff and implementation in the field at your job site. Provided is a list of existing resources with website links and other brochures and pamphlets to help you understand the requirements, which are mandated by the City of Salinas and the State of California.

RESOURCES:

1. “City of Salinas Stormwater Development Standards for New Development and Significant Redevelopment Projects” can be reviewed at www.ci.salinas.ca.us/services/engineering/engineering.cfm.
2. A bound version of the “City of Salinas Stormwater Development Standards for New Development and Significant Redevelopment

Projects” is available for your review in the lobby of the Permit Center.

3. “After the Storm, A Citizens Guide to Understanding Stormwater”, www.epa.gov/npdes/stormwater or www.epa.gov/nps.

4. The City of Salinas “Annual Evaluation Report for NPDES Municipal Storm Water” available for review in hard copy at City of Salinas, City Hall, Engineering and Transportation Department.

5. Builders Exchange of the Central Coast, (831)883-3933 or www.bxcc.org and www.constructionplans.org. They have two plasticized posters, to protect them from the weather, which can be posted at your job site. They are “Storm Water Pollution Prevention” and “Construction Waste Water Management”.

Stormwater & Education Alliance (SEA) for the peninsula cities and County of Monterey, (831)899-9957. Seven different pamphlets are available; “Fresh Concrete & Mortar Application”, “General Construction and Site Supervision”, “Painting and Application of

Solvents and Adhesives”, “Home Repairs and Remodeling”, “Roadwork and Paving”, “Earth-Moving Activities and Detection of Contaminated Soil and Groundwater”, and “Heavy Equipment Operation”.

6. California Stormwater Quality Association (CASQA) and the California Stormwater Quality Task Force (SWQTF), “Stormwater Best Management Practice Handbook”, 3 volumes; “Construction”, “Industrial and Commercial”, and “Municipal”. Visit their website at www.cabmphandbooks.com.

7. “Erosion Control, Keeping Sediment in Check” at www.erosioncontrol.com.

8. State Water Quality Control Board, “Water Quality Order 99-08-DWQ”, in particular the **MS4 recitals** for the Central Coast Region, “Erosion and Sediment Control Field Manual” (the ‘Field Manual’ is available for review in the Permit Center lobby). Visit their website at www.waterboards.ca.gov. You can review all workshops from this site.
