Leontief comment: "One of the most able graduate students we have had in our Dept. since the war, Henderson possesses a good working knowlege of techniques in an imaginative way to the solution of concrete empirical problems. As my assistant in Ec. 202 he has proved to be an effective teacher."

Chipman comment: Henderson is certainly one of the ablest grad. students I have known in recent years. His thesis, which I have been reading, is very impressive; it combines great technical competence, both in theory and stat. methods, with a high degree of good judgment as to what is important and what is unimportant.
