like structures known as “pontili”, preserved in later structures, which can still be seen in some areas of the historical centre (an example is the so-called “arco di San Gennaro” in the alleyway of the same name, and the “pontili” in Via F. Pacca); these must be subjected to adequate survey and research, also to ensure their restoration and enhancement. Historical sources mention the presence of public baths, some of which probably dated back to antiquity. Probably residential buildings were rarely equipped with baths, which are attested in monastic complexes, e.g., at Santa Sofia a Ponticello and at the monastery of San Paolo (this last one was linked to the public aqueduct, as documented also at San Salvatore monastery in Brescia). As to the re-use of ancient buildings and monuments during Longobard rule, work carried out at the Roman theatre has resulted in a wealth of documentation, as this structure was intensively occupied by

habitations from the Late Antique period onwards.

As regards productive facilities described by written sources, recent excavations carried out at the Museo del Sannio have brought to light a glass workshop whose activity spanned from the end of the 6th to the beginning of the 7th century.

Single tombs and nuclei of burials were brought to light inside and outside the city. Among these, a vast necropolis area linked to the church of Santa Sofia was pinpointed and investigated in the area in front of the church façade and in the cloister area.

The urban archaeology research has been boosted in recent years and will anyway result in new acquisitions concerning the city’s topography; other relevant data will result from the systematic study of *spolia* re-used ancient materials used extensively in the Early Medieval and Medieval periods and present throughout the buildings in the historical centre.

Original paintings discovered on San Marco dei Sabariani's walls

The territory

Programmed excavations at necropolises have been carried out which are the only type of research which result in a sufficiently ample range of knowledge from funerary furnishings. Thanks to fortuitous finds made between 1927 and 1962 a cemeterial area has been identified in a place known as Pezza Piana, but its furnishings have almost totally disappeared. Excepting Benevento and partly also Salerno and Capua, no archaeological and topographical surveys of the territory have been carried out to locate the first Longobard settlement within the urban context of the cities they occupied. Likewise, there has been no systematic study of agricultural and military settlements which were situated outside the urban contexts, and whose memory survives in the place names “sala”, “gualdo” (meaning fiscal estate), “sculca” “fara”, “longobardo” and “lombardo”.

Salerno still holds important examples of the renewal of the arts under Duke Arechi. Duke Arechi II transferred to Salerno while leaving to Benevento the title of capital of the Duchy. The anonymous author of the *Chronicon Salernitanum* recalls the *Sacrum Palatium*, whose only surviving element is the church of San Pietro a Corte, the palace chapel, which still boasts interesting structures and decorative elements. All of *Langobardia minor*, in any case, the territory of the Duchy of Benevento, greatly exceeds the boundary of today's Regione Campania, and is dotted with artefacts dating back to the Longobard period. In particular any list cannot omit the most crucially relevant basilicas of Montecassino and San Vincenzo al Volturno. The first of these was erected by Abbott Gisulph over the site of a small oratory dedicated to Saint John the Baptist, while the second was a three-naved structure built by Abbot Joshua. Archaeological excavations carried out in both churches have confirmed these were monumental

buildings echoing the solemnity of the Late Antique period. As to the finds discovered in Benevento and its territory, significant objects have come to life which shed light on Longobard production in general and on the process of “culture increase” which the population experienced (namely, the cultural process involving an active dialogue between “Germanic” and “Mediterranean” culture which did not result in mere assimilation).

Recent studies attest the diversified production in the Italian peninsula of cross-shaped laminae between the 6th and 7th century, including cities such as Benevento, Santa Maria Capua Vetere, Capua and Trani. The two crosses found at Benevento can be compared to sculptural artefacts, which can be considered as their true models, thus confirming the reciprocity of exchanges taking place between the major and the minor arts. In Benevento the persistent custom of placing a cross in burials seems to be still extant in the 9th and 10th centuries, as proved by the re-use in a funerary context of the votive cross

known as the cross of *Petrus “sagacissimus”*, and by the placing of a silver cross with inlaid cross arms, in a tomb for two depositions, and including 10th century inscriptions painted in the interior, which was discovered in the Early Medieval Cathedral in 1948. New discoveries and investigations will doubtless clarify whether these are isolated attestations of the funerary use of crosses which was in any case also connected to ceremonial customs of the Late Antique and Byzantine-Mediterranean world, or whether there is a chance of establishing a link between the last attestation of Central and Northern Italian Longobard culture of the first half of the 8th century and this later phase of Beneventan Longobard domination.

6.1.7 PRESENT LEVEL OF KNOWLEDGE ABOUT MONTE SANT'ANGELO

Interest in the Longobard phase of the Sanctuary of San Michele has been at the centre of many experts' research for several years. These experts used analyses of the architectural structures and read the numerous mural inscriptions to reconstruct the oldest construction phases. There are, however, still many gaps in the knowledge of the original set up of the Byzantine age sanctuary before the arrival of the Longobards. The walls of the *longa porticus* (crypt A) and crypts B and C in fact, contain pieces of wall with characteristics that show

stratigraphic relations between them, dating back to different periods. Research interest is currently focused on analysing the different walls, by using advanced technology, in order to try and obtain further knowledge of the construction evolution of the sanctuary. The most complete existing monographic studies, carried out by G. Otranto and C. Carletti published in 1995 and contained in the book "L'angelo, la montagna, il pellegrino" published in 1999, analyse the monument mainly through an historical picture, comparisons of types and the reading of epigraphic documents. After the conferences held in 1978, *Il Santuario di S. Michele sul Gargano dal*

VI al IX secolo. Contributo alla storia della Langobardia meridionale, and in 1990, *Culto e insediamenti micaelici nell'Italia meridionale fra tarda antichità e medioevo*, that attracted the interest of sanctuary experts and which contributed to learning about the reality of the Gargano sanctuary, a three-year Italo-French Research Programme was planned, entitled *Il culto di San Michele dal Gargano all'Europa*, led by G. Otranto, A. Vauchez, P. Bouet. The project, which includes the Puglia sanctuary in a network of European interest, aims to carry out in-depth studies, using interdisciplinary methods, on issues relating to the relations between the three St Michael

Detail of engravings on some ashlars

Map of the pilgrims' paths, reconstructed from the Itinerarium Burdigalense (4th century A.D.)

Itinerarium Bernardi monachi (867-870)

sanctuaries: San Michele in Monte Sant'Angelo, Saint-Michel in Normandy, San Michele in Valle di Susa, taking into consideration the complex dynamics that brought about the inclusion of the same sanctuary realities in European cultural itineraries. The identification of road and sheep-tracks that are a part of the so-called *Via Sacra Langobardorum*: are also being studied, ongoing research is already investigating the mentions of the routes found in literary sources, such as itineraries, registers and chartularies.

Other roads, sheep tracks and paths that connected the Adriatic coast with the St Michael grotto and which constituted an alternative to the *via sacra* are currently being studied. The phenomenon of pilgrimages in the Gargano area, starting from the High

Middle Ages, also contributed to expanding the road network, bringing about the creation of a true group of roads, paths and sheep-tracks that all joined to reach the top of the mountain and of which the most privileged route was in the already-mentioned *Via Sacra Langobardorum*.

The Department of Classical and Christian Studies possess a large amount of scientific contributions on the history and diffusion of the worship of St Michael in the Gargano, thanks to the decades of research carried out in this sector by researchers from the same department and to constant collaborations with many Italian and overseas specialists. The most important publications, conference documents and articles published in various magazines are available from

the offices of the St Michael and Gargano Study Centres in Monte Sant'Angelo. The sanctuary inscriptions are catalogued and available in EDB (Epigraphic Database Bari). The Department of Classical and Christian Studies has founded a new collection entitled "Bibliotheca Michaelica", directed by Giorgio Otranto, and which is destined to accept contributions about the diffusion of the worship of Saint Michael and more general agiographic matters. The first volume, published in September 2007, contains the papers of the Conference held in Bari-Monte Sant'Angelo in April 2006: it also contains contributions in Italian, English, French and Portuguese and is provided with illustrations, making a total of about 500 pages.

Interior view of Santa Maria Maggiore

6.2. PRESENT LEVEL OF PROTECTION

All the artefacts included in the current nomination are subject to the protection due to monuments. That means that they are recognised as being a public concern and part of the cultural heritage of the Country and, as such, subject to special law.

That law, the *Codice dei Beni Culturali e del Paesaggio* - Code of the Cultural and Landscape Heritage, Legislative Decree January 22nd, 2004, no. 4 (see section 7.b and annex 7), which applies to the entire national territory, establishes that on such objects no alterations or modifications that might be disruptive of their intrinsic characteristics are admissible and that, furthermore, all works that aim to preserve, enhance, or restore the monument are in all cases subject to authorisation from the appropriate departments of the Ministry for Cultural Heritage and Activities (the Superintendencies), or are to be directly managed by those offices.

According to the same national law, each intervention involving landscape that has been recognised as a public concern has to be previously authorised by the State through the Ministry of Cultural Heritage and Activities and/or the Regions, or the appropriate authorities (Provinces and Municipalities).

The protection measures currently in force are comprehensive and effective and therefore no further integrations are necessary.

6.2.1. CIVIDALE DEL FRIULI PRESENT LEVEL OF PROTECTION

Ownership

The candidate assets belong to one of the following three institutions:

- the Municipality of Cividale del Friuli owns the so-called Tempietto

Longobardo (since 1893) and the Monastery of Santa Maria in Valle (since 2001);

- the Parish of Santa Maria Assunta owns the Duomo and its annexes - namely, the Winter Chapel and Sacristies, the Chapter Archives, the *Museo Cristiano* and the Bell Tower;
- the Italian State owns the remains of the Patriarch's Palace, the Palazzo dei Provveditori Veneti and the National Archaeological Museum.

Protective Designation

All monuments comprised in the area of the site for which inscription on the World Heritage List is requested, as well as the movable works therein are subject to safeguard according to Italy's national law.

Monumental historical buildings were placed under special tutelage by the *Soprintendenza per i Beni Architettonici per il Paesaggio e per il Patrimonio Storico-Artistico e Demoetnoantropologico* (Architectural, Landscape, Historical, Artistic and Demoethnoanthropological Heritage Department); the *Palazzo dei Provveditori* and the underlying archaeological remains belong to the State. By law, any restoration work must be directly designed and performed by the Soprintendenze (local branches of the Ministry of Cultural Heritage and Activities) or approved and authorised by them.

Moreover, the core zone (as well as all that included in the buffer zone proposed - which corresponds to the city's historical centre), is subject to special safeguard and conservation limitations enshrined in the main urban planning instruments of the Municipality of Cividale del Friuli, and in particular to those enshrined in the PRGC Piano Regolatore Generale Comunale (Urban Development Plan), approved by decree by the President of the Regional Council

of Friuli Venezia Giulia no. 19/press on January 31st, 2007 - and also to the rules enshrined in the Piano Particolareggiato (Detailed Urban Plan) - "Ambito del Centro storico" (Piano Attuativo - Zona A) approved with a Delibera of the Consiglio Comunale no. 57 on October 28th, 1998.

The methodology followed to draw up this new plan was based on analytical and descriptive research involving demographics, history of the territory and existing architectural heritage, socio-economic aspects as well as the infrastructure and legislation; it was also based on direct inquiries carried out in the field. The result of the analysis is explained in a series of charts, which highlighted in synthesis on one side the special limitative laws and their strictness and the lack of flexibility in the areas of research, and on the other showed up the areas' vocation and potential.

The PRGC involves building work, urban conservation and environmental protection, to be carried out by means of different implementation laws. The plan sets out different types of context amongst which is the historical centre. For this area, which is the location of the site and buffer zone, a detailed plan called Piano Particolareggiato d'Iniziativa Pubblica (the relevant implementation law being approved on October 28th, 1998), focus is based on "revitalizing" the urban centre of Cividale del Friuli by means of conservation and enhancement of the urban area's historical and monumentally relevant sections and the restructuring of the surrounding areas.

In particular, the Piano Particolareggiato "Ambito del Centro Storico" is meant to preserve and enhance the still extant historically relevant characteristic types, to grant the historical centre a primary role in the commercial and service sectors, by recuperating the ancient economic, settlement and functional

model at the base of the city's history. The Piano Particolareggiato "Ambito del Centro Storico" involves specific architectural rules which must be followed when dealing with building transformation, and deal with roofing, proportions, finishing of openings and wall areas, window and door structures as well as protective and decorative treatment.

The implementation plan's scope is subdivided into units called UMI (Unità Minime d'Intervento, or Minimal Units of Intervention). For each of these units, there are different types of intervention and use which are allowed; the area of the Monastery of Santa Maria in Valle with the Tempietto Longobardo and the Church of San Giovanni are all comprised within UMI "Q1", where the only type of intervention allowed is restoration, regulated by further prescriptions imposed by the Municipality.

This procedure, which ensures a protection based on the awareness of the urban context, is also applied to building that are not subject to restrictions provided for the national legislation, but that are identified in the Piano Particolareggiato del Centro Storico as a symbol of the building characters of the local tradition. The same attention for the protection of historical building evidences is extended outside the historical centre to the villages and the municipal territory as a whole.

Likewise, in areas UMI 123-124, corresponding to the Palazzo dei Provveditori Veneti (seat of the *Museo Archeologico Nazionale* and the remains of the Patriarch's Palace) and to the area of the Cathedral (and the *Museo Cristiano*), the only type of intervention allowed is restoration.

The buffer zone is subject to other protection laws, such as those imposing that archaeological areas should be respected. In these areas the same laws

apply as those for the homogeneous area of reference except in those cases in which a pre-emptive evaluation of work has been carried out by the Soprintendenza. This body would thus prescribe pre-emptive essay excavations to acquire knowledge about the state of the areas.

The current version of the PRGC provides for the transcription of the updated designations of sites of archaeological value on the graphical zoning tables so that operators and citizens may become aware of them and, therefore, strengthen their protection. The municipal authorities have recently updated the municipal Regolamento Edilizio, which is a building regulation that sets, inter alia, the provisions applicable to buildings in seismic areas, environmental and building decoration, air, light and noise pollution, energy saving, renewable sources and sustainable building (see paragraph 5.d).

The buffer zone is also protected from the environmental point of view thanks to a series of protection laws, or restrictions, which aim to safeguard the landscape, according by laws called Legislative Decree no. 42/2004 and Ministerial Decree dated 01/07/1955; these ensure the respect of a series of specific prescriptions meant to safeguard what is of public interest in the area. The landscape preservation and enhancement focus on the most relevant natural traits, particularly the river Natisone and its *forra*, which are protected also by the implementation norms of the *Piano Regolatore* (Urban Development Plan), by prescribing conservation work for the river and its vegetation, by periodical monitoring of the healthiness and environmental quality requirements of the river's water, allowing work which aims to ensure water safety and banning reduction of the water flow, regulating water

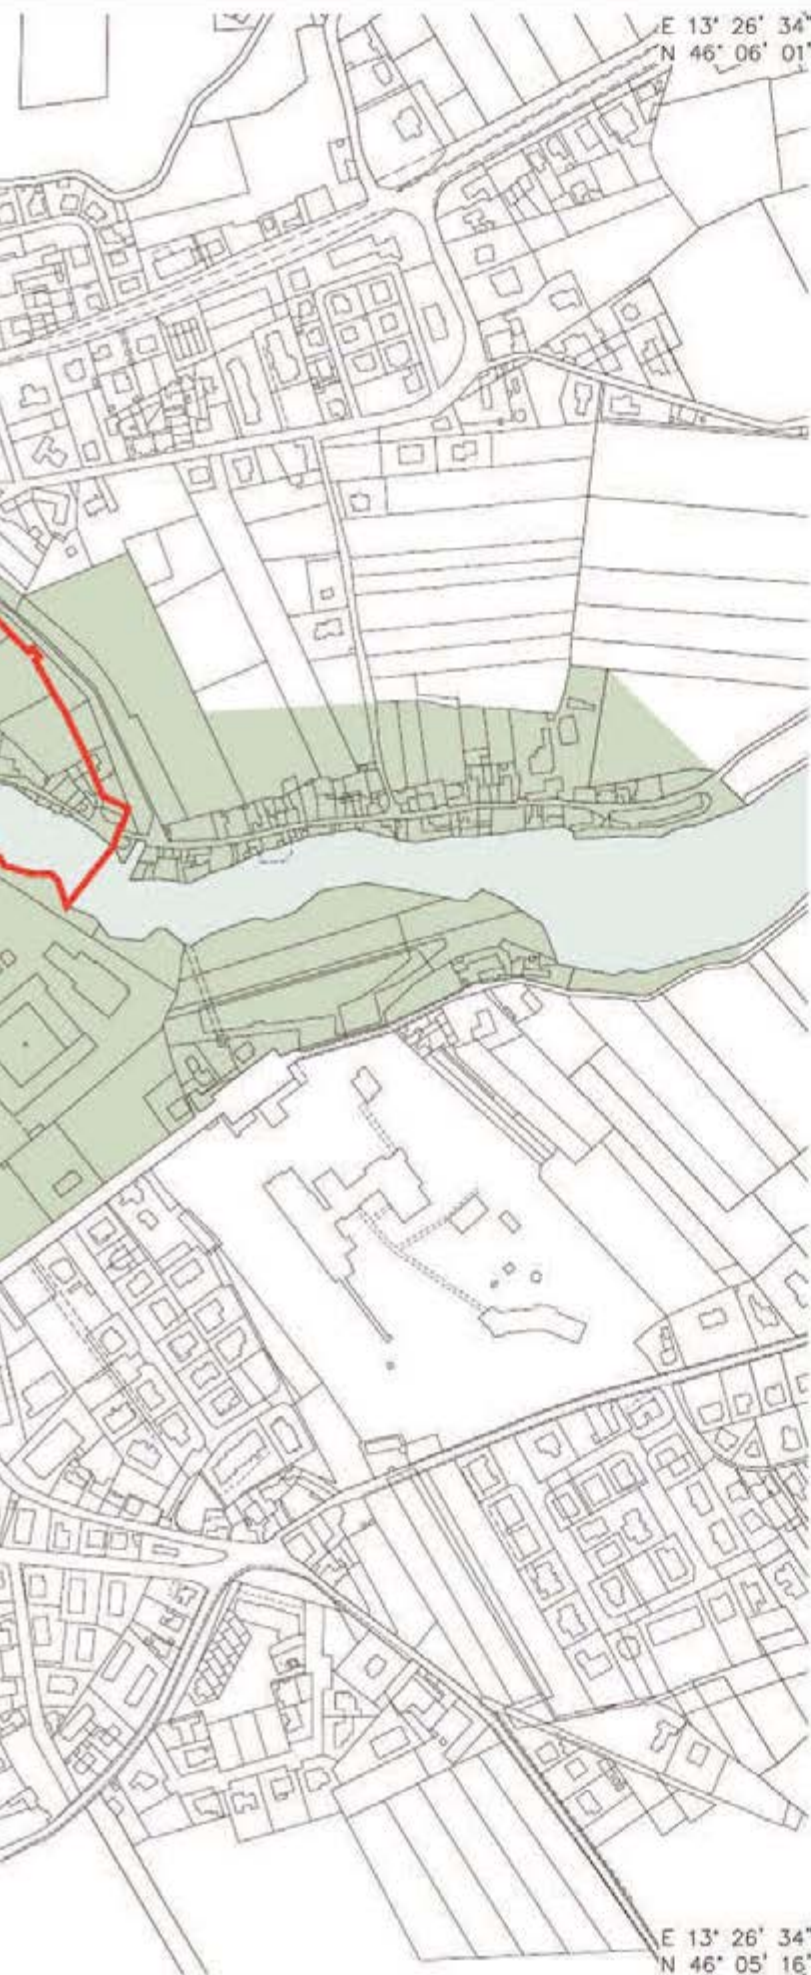

discharge and ensuring against the threat of morphological transformation. Building work on existing buildings and on areas in which building work is allowed must also submit to prescriptions that impose respect for the surrounding landscape, by minimising the impact of such work.

A further limitation refers to the section of the river Natisone included in the buffer zone. It is a restriction enshrined in a law entitled Legge Regionale no. 42/1996, which defines the perimeter of the ARIA (namely, Area di Rilevante Interesse Ambientale, or Area of Relevant Environmental Interest) no. 17, that is, an area characterised by a remarkable importance for its environmental and landscape value. The objectives of conservation, safeguard and enhancement of this territory are regulated by imposing specific uses, as described by the implementation rules of the *Piano Regolatore*, as well as implementation protocols and listing types of work allowed, conditional to urban and building values, to the observance of certain boundaries around the areas of interest; particular attention is also devoted to buildings of architectural and environmental value.

6.2.2. BRESCIA PRESENT LEVEL OF PROTECTION

Ownership

The complex proposed for inscription on the World Heritage List includes a series of buildings, which are all public property.

Protective designation

The monumental area including the Monastery of San Salvatore-Santa Giulia is placed under the protection of the Italian laws in force.

Moreover, the buildings and the buffer zone fall within an area called “Zona A” a of the *Piano Regolatore Generale - PRG* (Urban Development Plan), which is an area characterised by the highest protection standards.

In the Brescia’s *Piano Regolatore* (approved on April 6th, 2004, G.R. no. 7/17074) these zones include the area inscribed within the walls, as well as those centres of ancient municipalities which were incorporated into the city, the neighbourhoods which have maintained their urban form, the rural complexes, the early examples of industrial activities, the architectures described as being of notable importance for the city and worthy of preservation.

In the areas classified as “Zona A” the only work allowed is restoration or conservation; all types of masonry work must focus exclusively on the conservation of the building, and ensure its functionality by means of a series of systematic interventions which must respect the typological, formal and structural elements and allow it to be used in ways compatible with those same elements. These interventions include consolidation, reorganisation and renewal of the building’s constituent elements, the insertion of accessory elements and of the facilities required by the purposes for which it is used, as well as the elimination of any

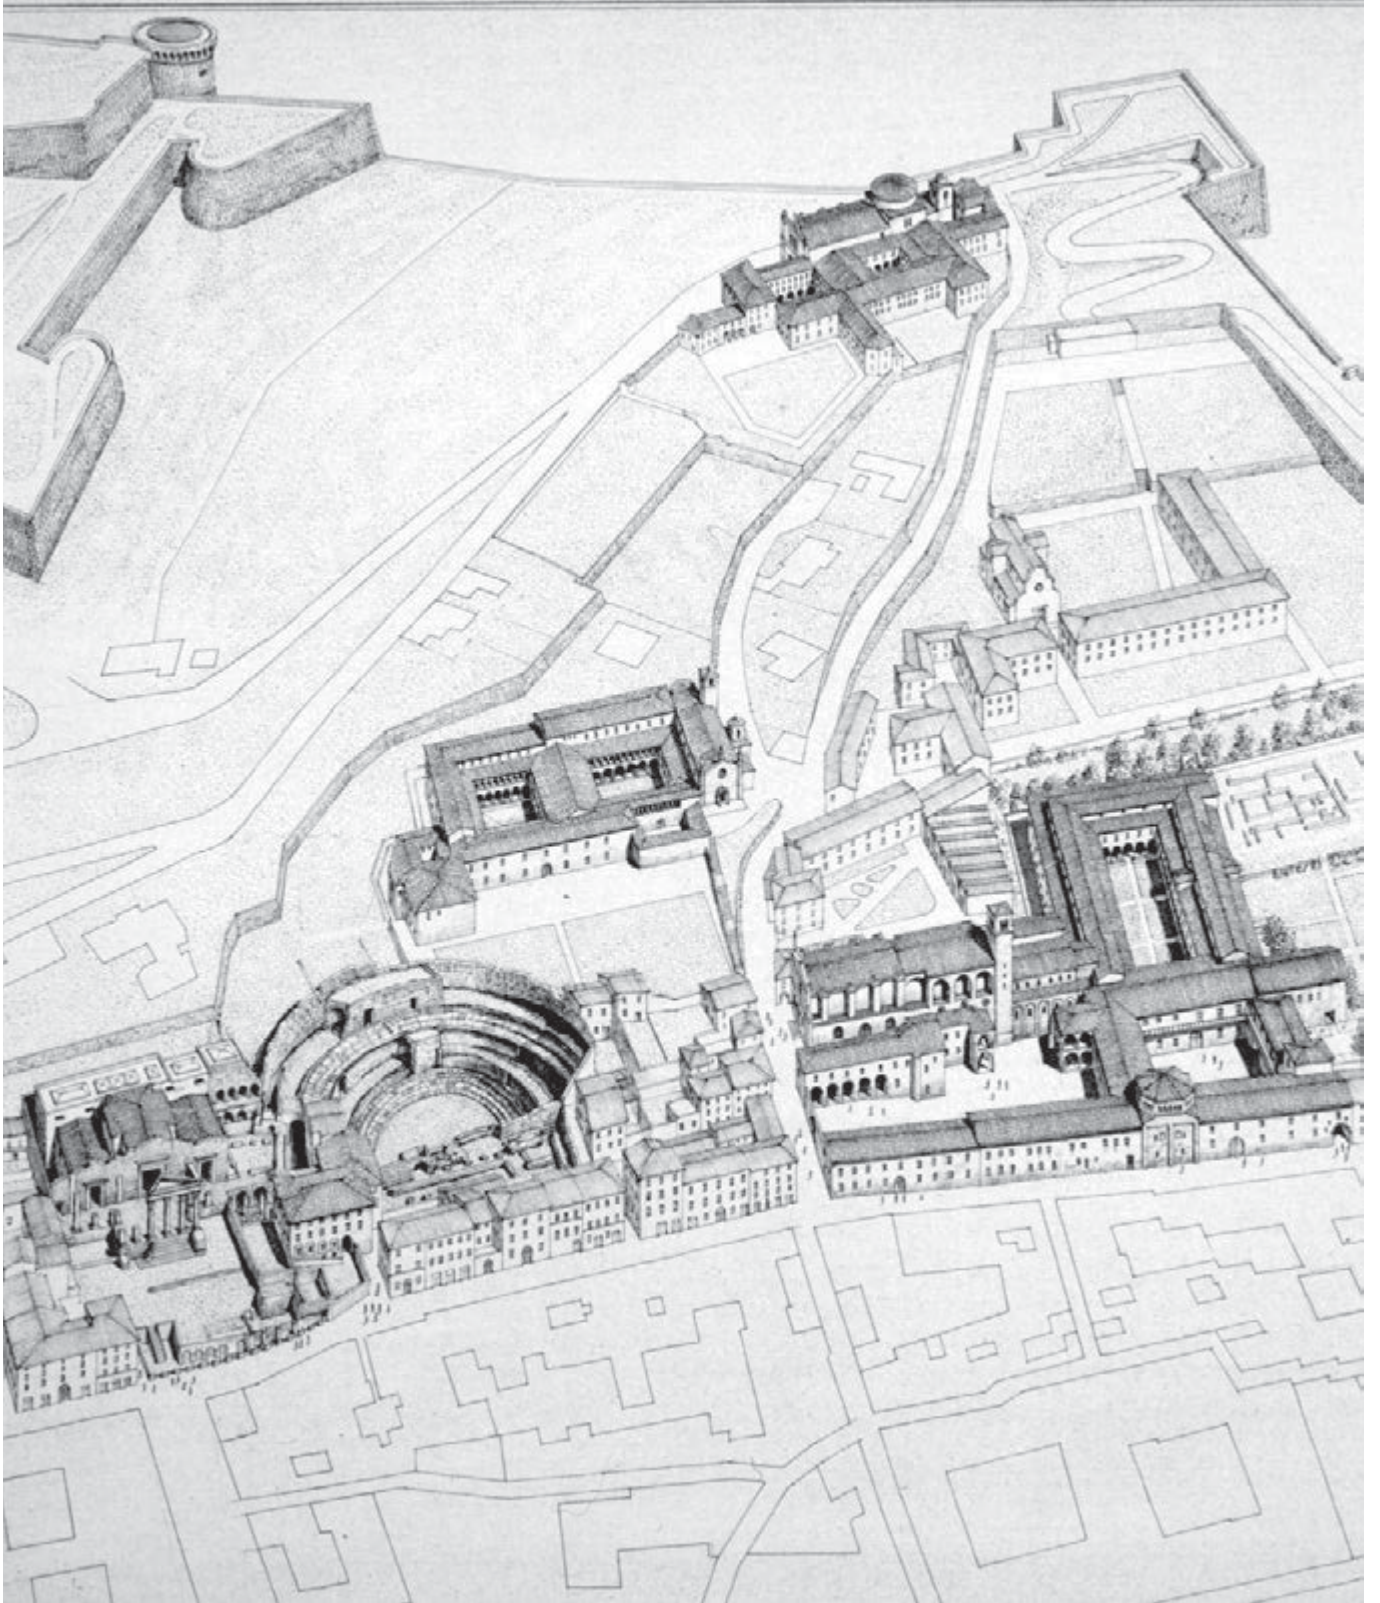

elements which are foreign to the building’s organism. These areas are characterised by the degree of conservation required, the degree of transformation allowed (A1 buildings to be restored - a buildings to be renewed - A3 buildings to be restructured) and by the use to which they can be put.

The main use that is allowed is “residential” (R). There is also provision for “service-producing activity” (T), “services and equipment” (S), while “agricultural activity” (A), and “industrial and artisanal activity” (I), as well as “Fuel stations” (Td) are banned. The ground floor areas can in any case be occupied by service and artisanal service activities if such areas are found to be inadequate as living quarters.

Restructuring work is allowed only up to a maximum height, corresponding to the height of the eaves of the original building or to the summit of the original.

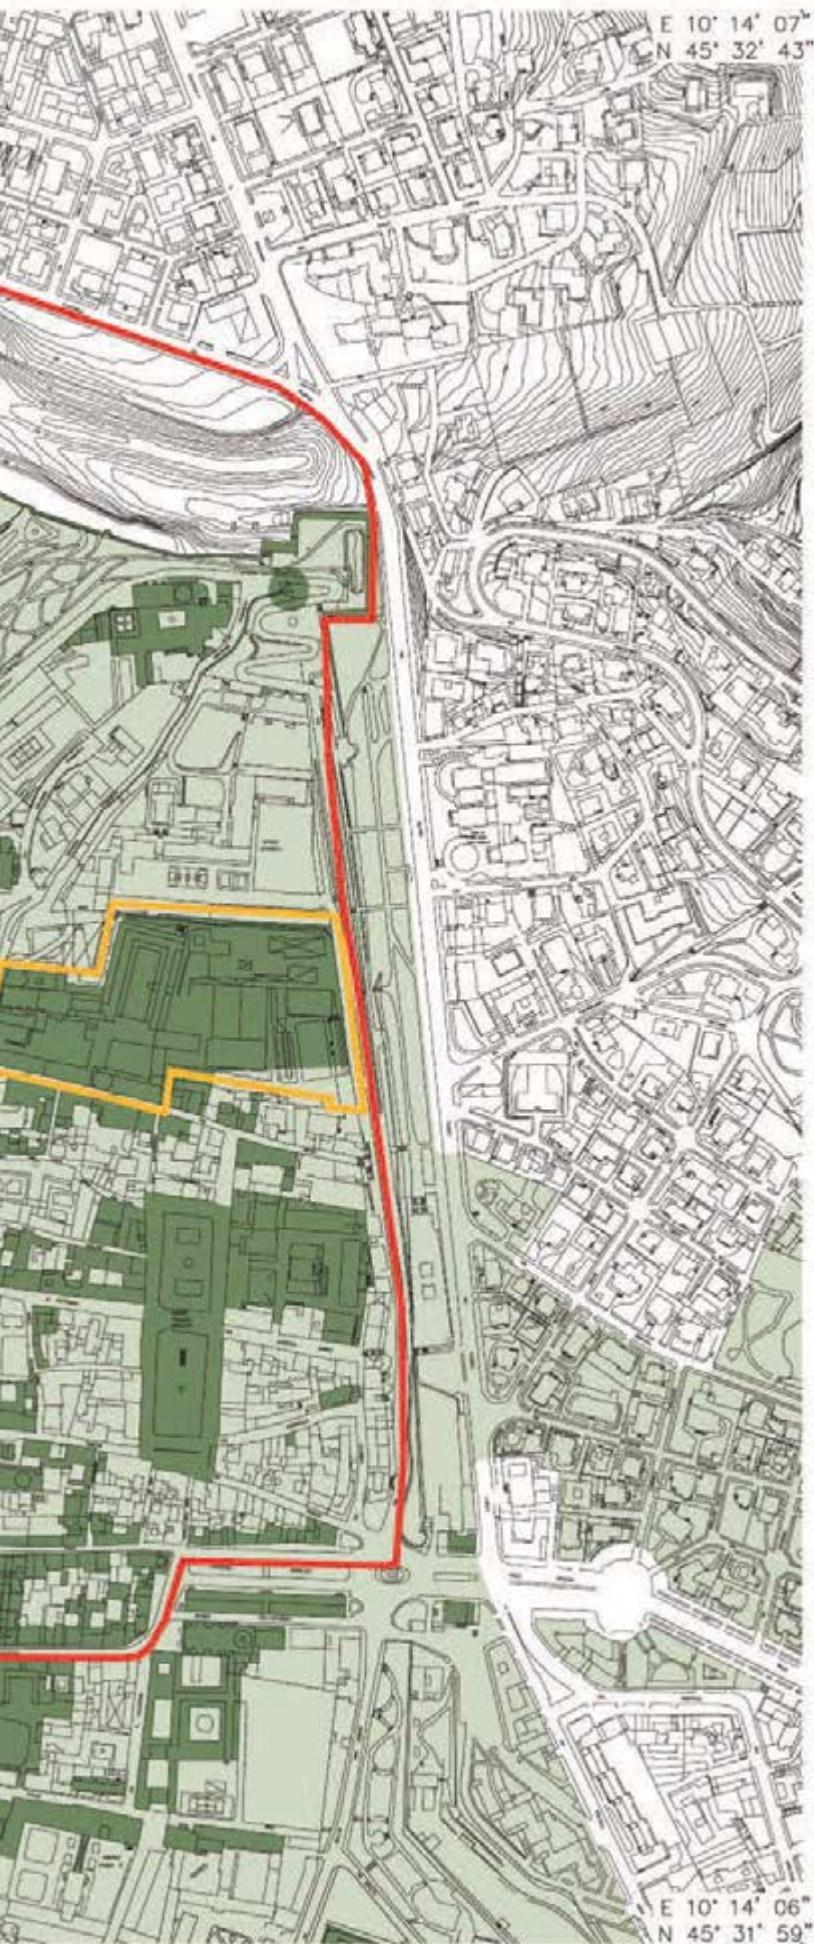

In the case of a restoration, mandatory pre-emptive essay work must be carried out on the structures. The relevant photographic documentation must be supplied to the Municipality.

All intervention applications must be documented with surveys, sections, environmental surveys (indicating species and relative dimensions) and any external qualifying element (walls, half-circle structures, fountains, differences in height, flooring), volume data, historical and historiographic documentation with plans, prints, ancient surveys, land registry maps for the properties concerned; photographic documentation of the external and internal conditions, significant particulars, measurements and description of internal and external finishes (frames, banisters, stairs, windowsills, floors, coatings, etc.); executive project; report indicating planned operations of restoration, consolidation, renewal and use of each floor.

6.2.3. CASTELSEPRIO-TORBA PRESENT LEVEL OF PROTECTION

Ownership

The property in the area of the ancient settlement of Castelseprio-Torba, stretching over around 250,000 m between the quarter and the fortification at the bottom of the valley (Torba), is divided among:

- the Province of Varese, owner of the Church of Santa Maria *foris portas*, the general building located at the entrance to the *castrum*, used as a surveillance and welcoming point and the neighbouring complementary areas (located in the Municipality of Castelseprio);
- Ministry of cultural heritage and activities, owner of the *castrum* and the slopes of the plateau (located in the Municipality of Castelseprio);
- Municipality of Castelseprio, owner of the access road to the *castrum*;
- FAI - Italian Environmental Trust, owner of the Monastery of Torba and its premises located in the underlying Olona valley (in the Municipality of Castelseprio and Gornate Olona);
- private owners of small lots.

Protective designation

The entire monument site has been declared to be of particularly important interest pursuant to national protection legislation for its high archaeological-architectural, historical-artistic and landscape-environmental values (woodland areas) by a Ministerial Decree dated October 18th, 1963.

Moreover, the entire area is protected by the town-planning instruments (PRG, Urban Development Plan) of the two Municipalities of Castelseprio and Gornate Olona, which implement the State restrictions. In particular:

- the whole area of the *castrum* is classified as A1 (i.e. “of historical and archaeological value”) and exclusive use of monumental heritage for cultural

purposes is admitted, including respectful events on the site (conferences, public shows, etc). In order to allow this main allocation of use, the following complementary allocations of use are permitted: guardianships, offices, small-scale sale of goods linked to the site’s characteristics and for the administration of drinks. The preparation of temporary car parks on the green areas is also permitted;

- the areas surrounding the *castrum* are classified as A/E2 (i.e. “agricultural woodland area of historical and archaeological value”);
- other areas, located around the archaeological park, are activated as A/E1 (i.e. “agricultural area of historical and archaeological value”), on which prior permission is necessary from the superintendence office if earth is moved. The Monastery of Torba, which is located within the municipal territory of Gornate Olona (excluding the Church of Santa Maria, which falls within the municipal territory of Castelseprio), with all its minor buildings, is subject to the monumental restriction under the Law dated June 1st, 1939 no. 1089), whereas the whole surrounding area the complex is subject to a landscape restriction under the Law dated June 29th, 1939 no. 1497). Other restrictions imposed in this area concern:

- the environmental protection restriction on the course of the river Olona, which runs downstream the settlement, and its banks for a strip of 150 meters, thus marginally touching the area of the Monastery for a grassland strip along the provincial route SP 42;
- the environmental protection restriction on the woodland territories beyond the said provincial route along the course of the river, and the woodland slope uphill towards Gornate;
- lastly, the archaeological restriction mainly affecting the area to the west of

the provincial route SP 42 (letter c, letter g and letter m of art. 1 of the Law dated August. 8th, 1985 no. 431, respectively). With reference to the PRG zoning in force, the Monastery and the whole grassland area around the complex belong to the so-called “special areas under direct regulation”. In this case, it is an “S2” zone, which is an “area with monumental buildings and archaeological sites of primary importance subject to priority protection action”. For any intervention to be carried out in this area prior authorisation is to be requested from the *Soprintendenza per i Beni Ambientali e Architettonici* (Architectural and Environmental Heritage Superintendence) and the *Soprintendenza per i Beni Archeologici* (Archaeological Heritage Superintendence). The sole use admitted is the fruition for cultural purposes of the assets. New buildings are not admitted. Moreover, the area of the Monastery of Torba is classified as an “Ambito di Paesaggio”, i.e. landscape ambito, subject to the special prescription no. 3/AP1, which lays down special provisions mainly aimed at preserving the area in the field of types, urban morphologies, building and architectural characters, structural characters and external arrangements. It should be added that this “Ambito” is attributed a class of sensitivity 4 (high on a scale from 1 to 5, see D.G.R. of the Lombardy Region no. 7/11045 dated November 8th, 2002 entitled “Linee guida per Esame Paesistico dei Progetti”, or Guidelines on the Landscape Assessment of Projects). In addition, the fact that the whole area is part of the PLIS (*Parco Locale di Interesse Sovracomunale*, Local Park of supra-Municipal Interest) is a further guarantee of heritage protection, especially from an environmental and landscape point of view. Some of the park’s several purposes are, in fact, the preservation, recovery, safeguarding and social use of the territory. The

agreement stipulated between the municipalities belonging to the PLIS, in fact, refers to the “connection between the various protected areas with green corridors and dedicated paths” and, more specifically, foresees “the recovery of the ancient paths as an eco-compatible improvement of the nature and environmental routes included as part of the dynamic use of leisure time that respects landscape and historical matrixes of the area”.

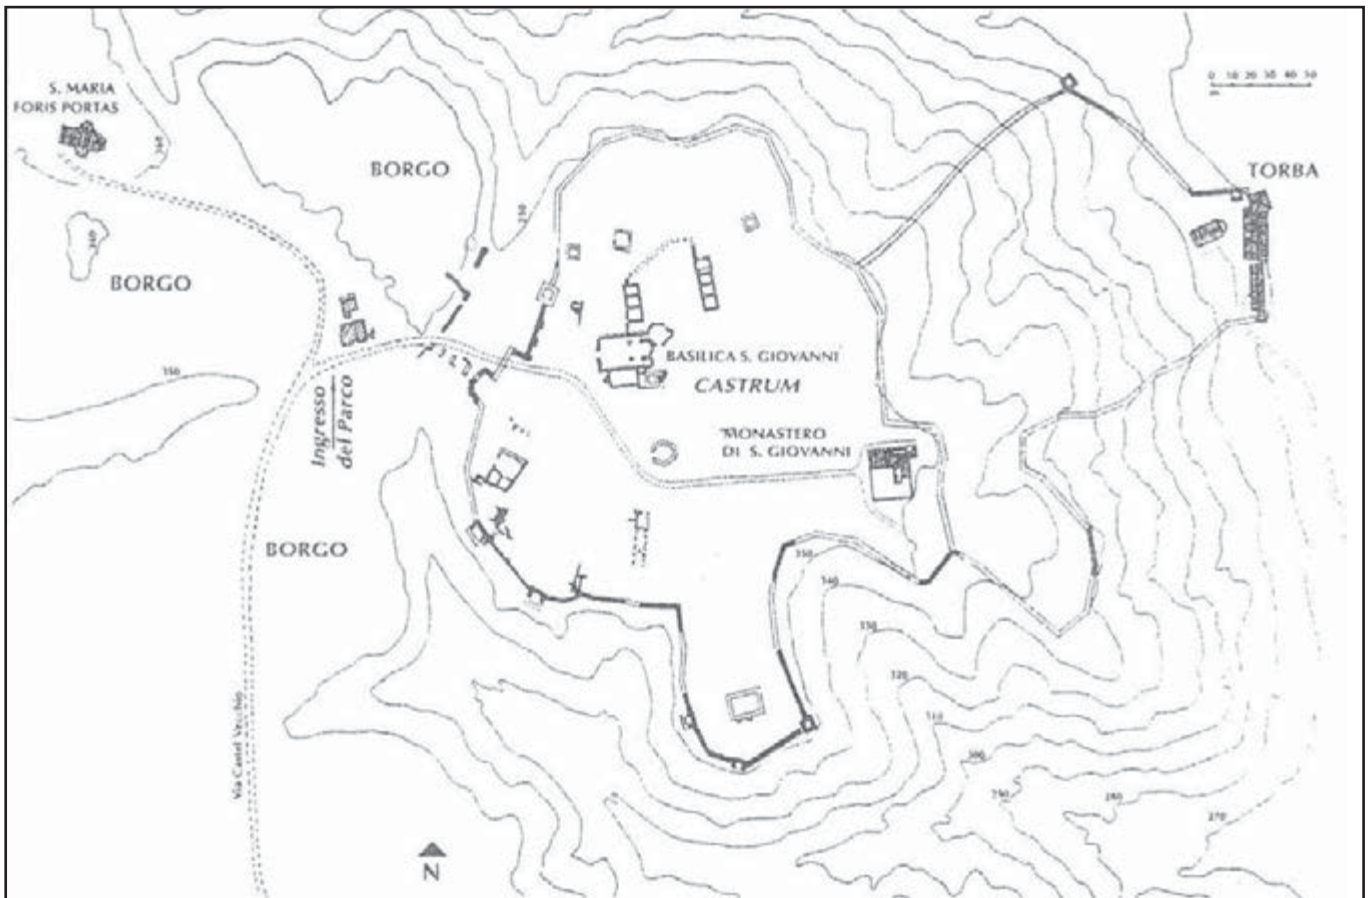

Moreover, the site of Castelseprio-Torba is included within a larger area along the course of the river Olona, which has a special naturalistic, historical and cultural value, belongs to the Municipalities of Castiglione Olona, Gornate Olona e Castelseprio and was declared in 1984 an Area of High Public Interest (pursuant to art. 136 of a law

called *Decreto Legislativo* no. 42/2004), recently (2008) validated and partially modified with reference to its perimeter by a Resolution of the Province of Varese (no. 3/08 of July 22nd, 2008), lastly declared, in these terms, a landscape asset with a high public interest by the *Giunta Regionale Lombarda* (D.G.R. dated August 7th, 2009 no 8/10135). This area is subject to strict use prescription and management criteria (see Annex 2 of D.G.R.) that essentially aim at

a) protecting woodland and surface waters;
b) protecting and valorising ancient built centres, traditional building techniques and, in particular, the areas close to the Monastery of Torba (new buildings are banned, as well as extensions of the industrial area at the east of the provincial

route SP 42, for which restructuring criteria are also laid down,
c) carefully managing recent settlements,
d) protection perceptive/visual aspects,
e) developing enhancement actions,
f) minimising the impact of technological networks.

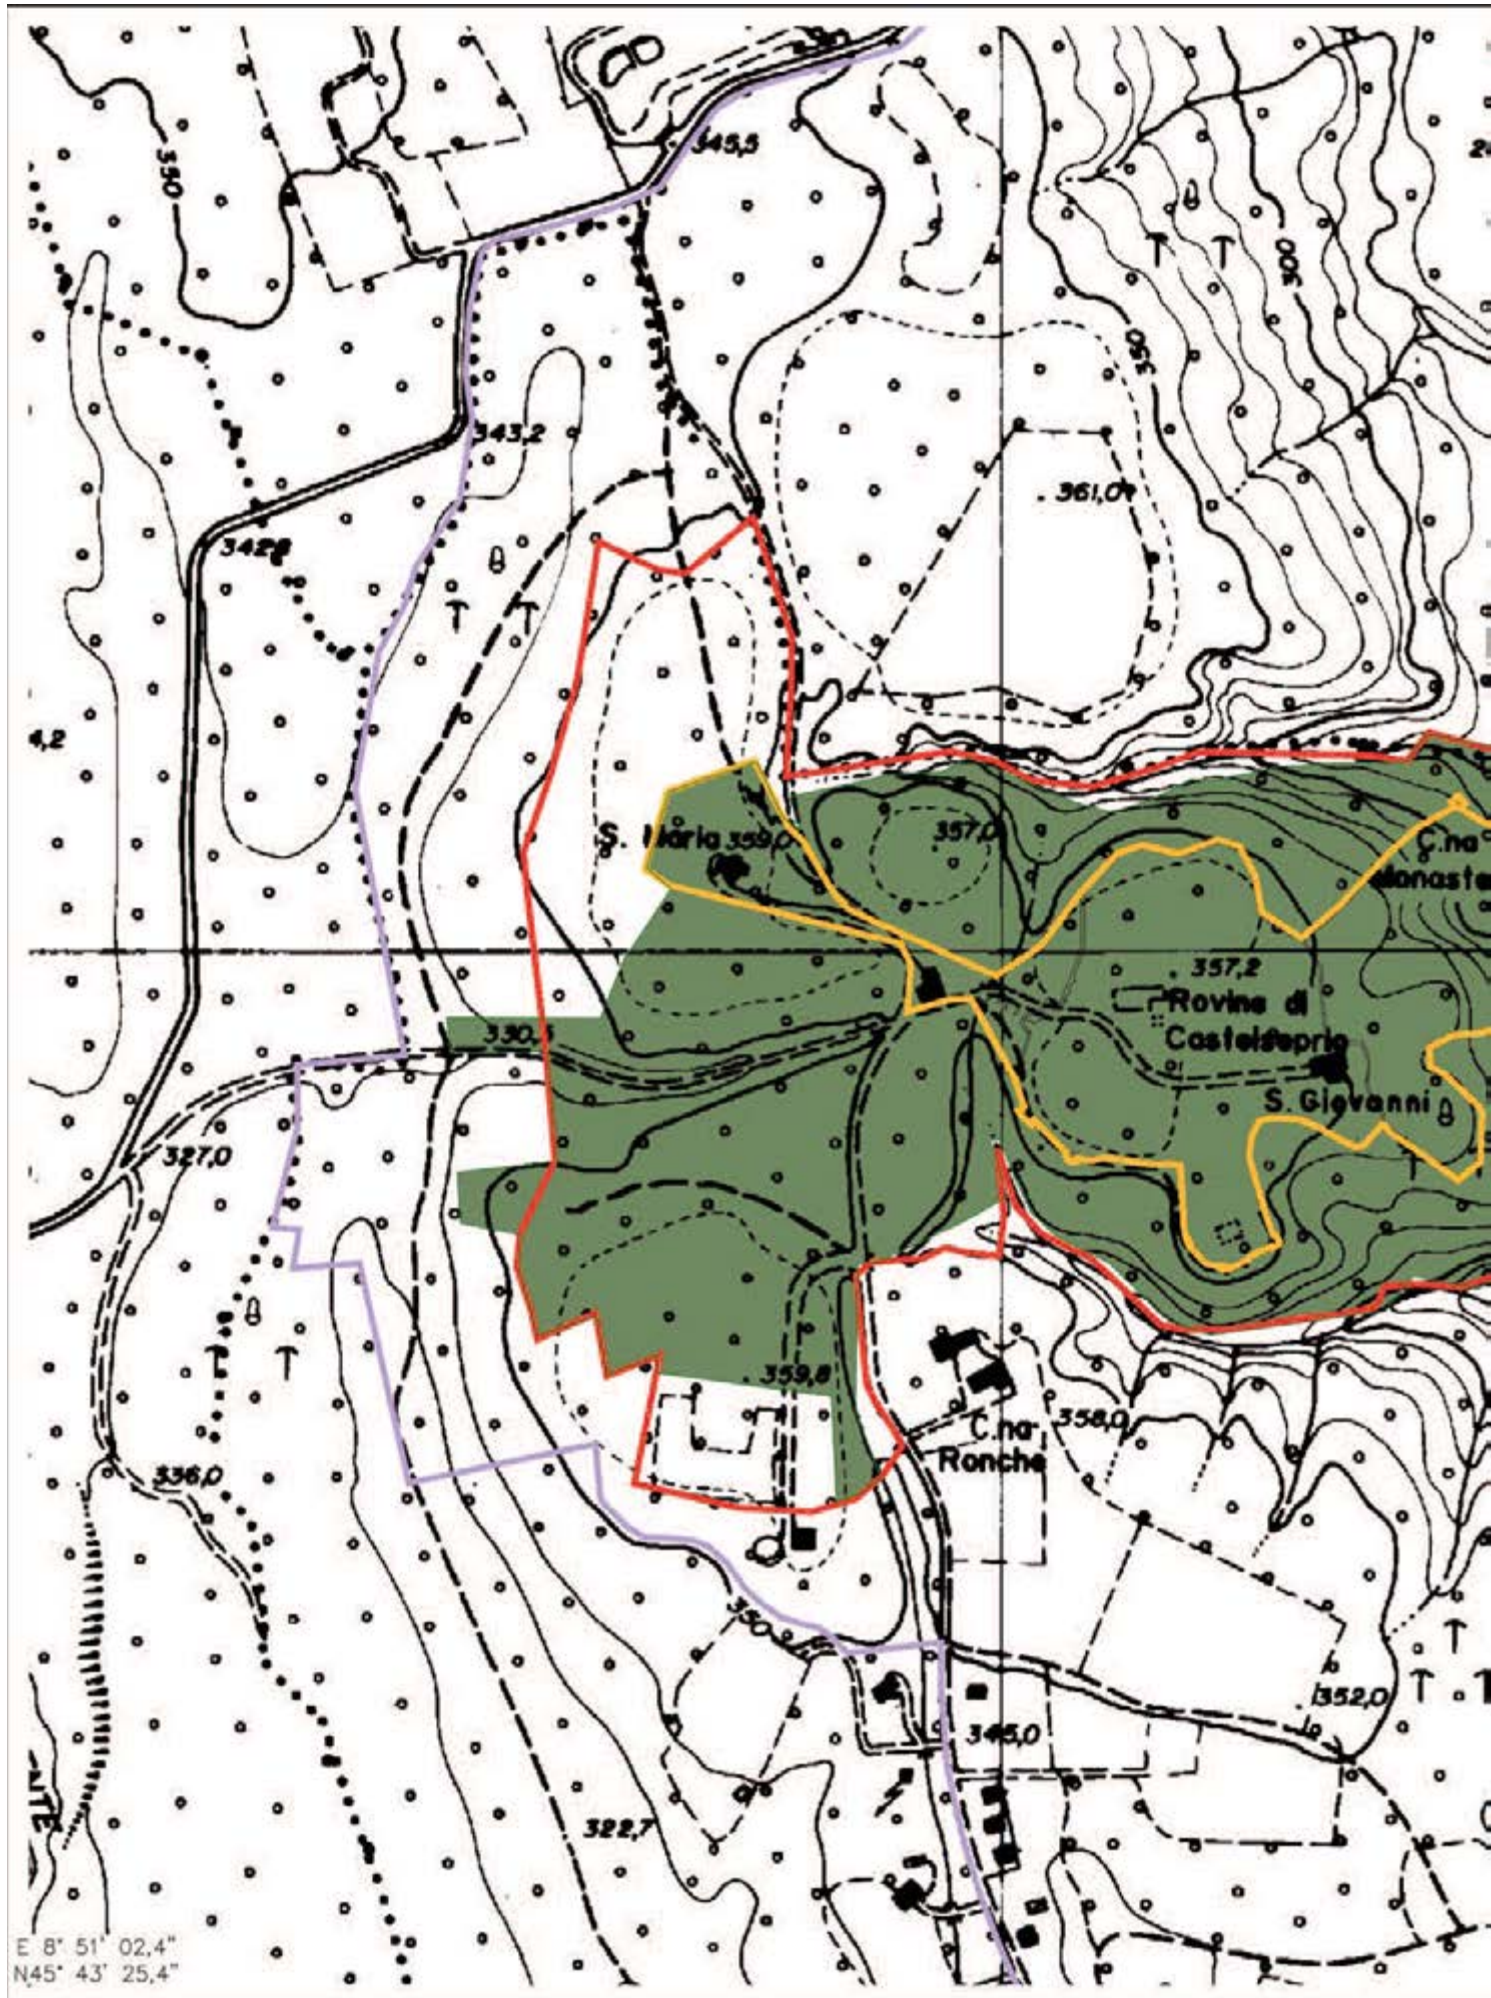

The Municipality of Gornate Olona has recently transposed the law called *Legge Regionale* no. 13/2009 dated July 16th, 2009, on “special actions for the development and qualification of building and urban heritage in Lombardy” (the so-called *Piano Casa*), thus significantly restricting the possibility to build by way of exception to the legislation in force: in particular, the areas of the historical centres are protected, as well as the rural areas and, especially, the area of co-monumental archaeological value of Torba.

6.2.4. SPOLETO PRESENT LEVEL OF PROTECTION

Ownership

La Basilica of S.Salvatore was acquired by the State at the end of the nineteenth century and today it is owned by the Municipality of Spoleto.

Protective designation

Apart from the protective provisions in line with the national legislation for the safeguard of cultural heritage (Code of the Cultural and Landscape Heritage) focusing on core zone and its buffer zone, the whole of the buffer zone - including most of the historic town centre, the bed of the Tessino river and the Ciciano hill - at the foot of which stands the basilica of San Salvatore- is also subject to the protective and safeguard provisions by the most important urban instrument of the municipality of Spoleto, the PRGC Piano Regolatore Comunale (Urban Development Plan).

The Urban Development Plan subdivides the buffer zone into three homogeneous areas:

- zone A, monumental construction or buildings of considerable historical and architectural interest;
- the graveyard area;
- the agricultural and environmental area.

Within the historic town centre zone A restoration and restructuring work as well as the launching of new projects are all possible; any type of work, though, carried out by either private companies or public institutions - the repair of a sign, the colour of the façade, design or restructuring work - needs to be compatible with the urban tissue; any type of work needs to obtain:

1. the go-ahead of the municipal architectural and landscape quality commission, made up of experts on cultural heritage,
2. the go-ahead of the Umbria Superintendence for architectural

heritage and landscape and for historic, artistic and demo-ethno-anthropological heritage,

3. the go-ahead of the Superintendence for archaeological heritage, following all the necessary inspections and research work to detect any remains of archaeological interest.

As to the area of the graveyard area, there is a 100,000 linear metre (respect area) belt unsuitable for building, within which only restoration and conservation work of the existing buildings can be authorized.

Furthermore, in conformity with the Urban Development Plan In the agricultural and environmental area, in addition to restoration interventions, building extensions to houses are also possible; yet the project must obtain an opinion from the Municipal Commission for Architecture and Landscape Quality and the Superintendence of Architectural, Landscape, Historical, Artistic and Demo-Ethno-Anthropological Heritage of the Region Umbria.

The *buffer zone* is also protected by the hydrogeological (Royal Decree 3267/23) and the landscape restrictions. Biotic and landscape components in the area make up an interactive and interconnected system, a geographically adjacent to and an environmental continuum of the Site Nature 2000 (SIC - site of Community interest identified by the European Community) IT5210064 "Monteluco di Spoleto". The system and the historic town centre can be seen as a single entity. The system supports and is the continuation of the historic town centre itself.

Moreover, since 50% of the wooded areas and pastures belonging to the municipality property are included in the sites Nature 2000, in special protection areas and in the sites of Community interest, the municipality of Spoleto is

currently developing its forest management plans for the sustainable use of the forests themselves.

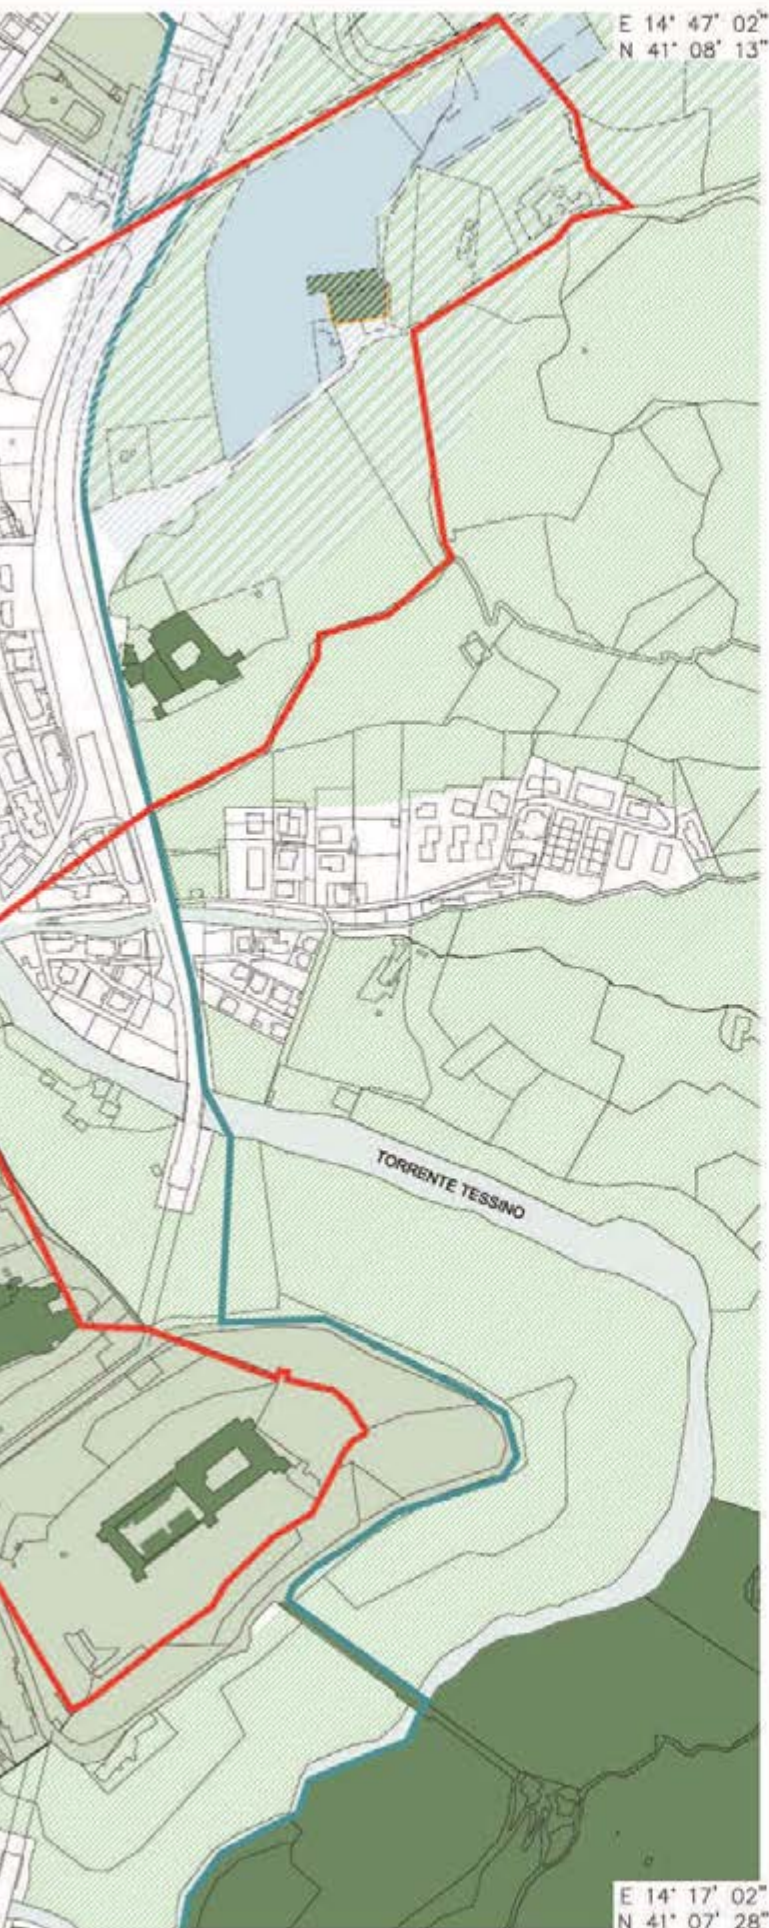

Therefore the *buffer zone* of the basilica is protected for landscape, historic and naturalistic reasons, not only by the Spoleto Urban Development Plan, but also by the Territorial Coordination Plan and the Regional Planning Scheme of the Umbria Region (see 5.b). The area is therefore protected from any modification and/or transformation (demolition and reconstruction work, new construction work, unsuitable use of buildings and so on) undermining its authenticity and its integrity.

Within the buffer zone, further restrictions are in place for the protection of archaeological sites, namely a preventive assessment of the work to be done on the part of the Archaeological Superintendence. The latter may arrange for preventive surveys to further knowledge on the state of the sites. The Ministry for Cultural Heritage and Activities has started a direct procedure, designed to protect the area surrounding the San Ponziano Monastery, to establish a 'respect area', unsuitable for construction work, and to contain the area suitable for construction work in conformity with the Urban Development Plan.

6.2.5. CAMPELLO SUL CLITUNNO PRESENT LEVEL OF PROTECTION

Ownership

The Clitunno Tempietto is owned by the State.

Protective designation

The Clitunno Tempietto, which is at any rate protected in compliance with the national legislation in force (as a monument of historical and artistic value and as a part of a cultural landscape subject to restrictions) is included, along with the proposed buffer zone, in a highly protected area for its extraordinary environmental characteristics.

The area characterised by the river Clitunno and its *Fonti* (Springs) is included in the “areas of remarkable naturalistic value of the Umbria Region” (D.G.R. no. 4271/98) for the purposes of improved protection and enhancement. The same area corresponds to one of the 4 sites of UE interest (SCI) identified in the territory of the Municipality of Campello under the Bioltaly Project, launched by the Ministry of the Environment and promoted by the European Union pursuant to the Habitat Directive EEC 92/43.

Pursuant to the provisions laid down in the Framework Law entitled “Legge Quadro sulle Aree Protette” (no. 394/91), the *Fonti* with the river Clitunno are therefore included in the international network “Natura 2000”, which is a system of protected areas aimed at protecting habitats and biodiversity at the European level (Orsomando, 1998). The whole buffer zone is moreover covered, as stated above, by a landscape restriction and therefore included in the *Piano Territoriale di Coordinamento Provinciale* (Territorial Plan for Provincial Coordination) and the *Piano Urbanistico Territoriale* (Territorial

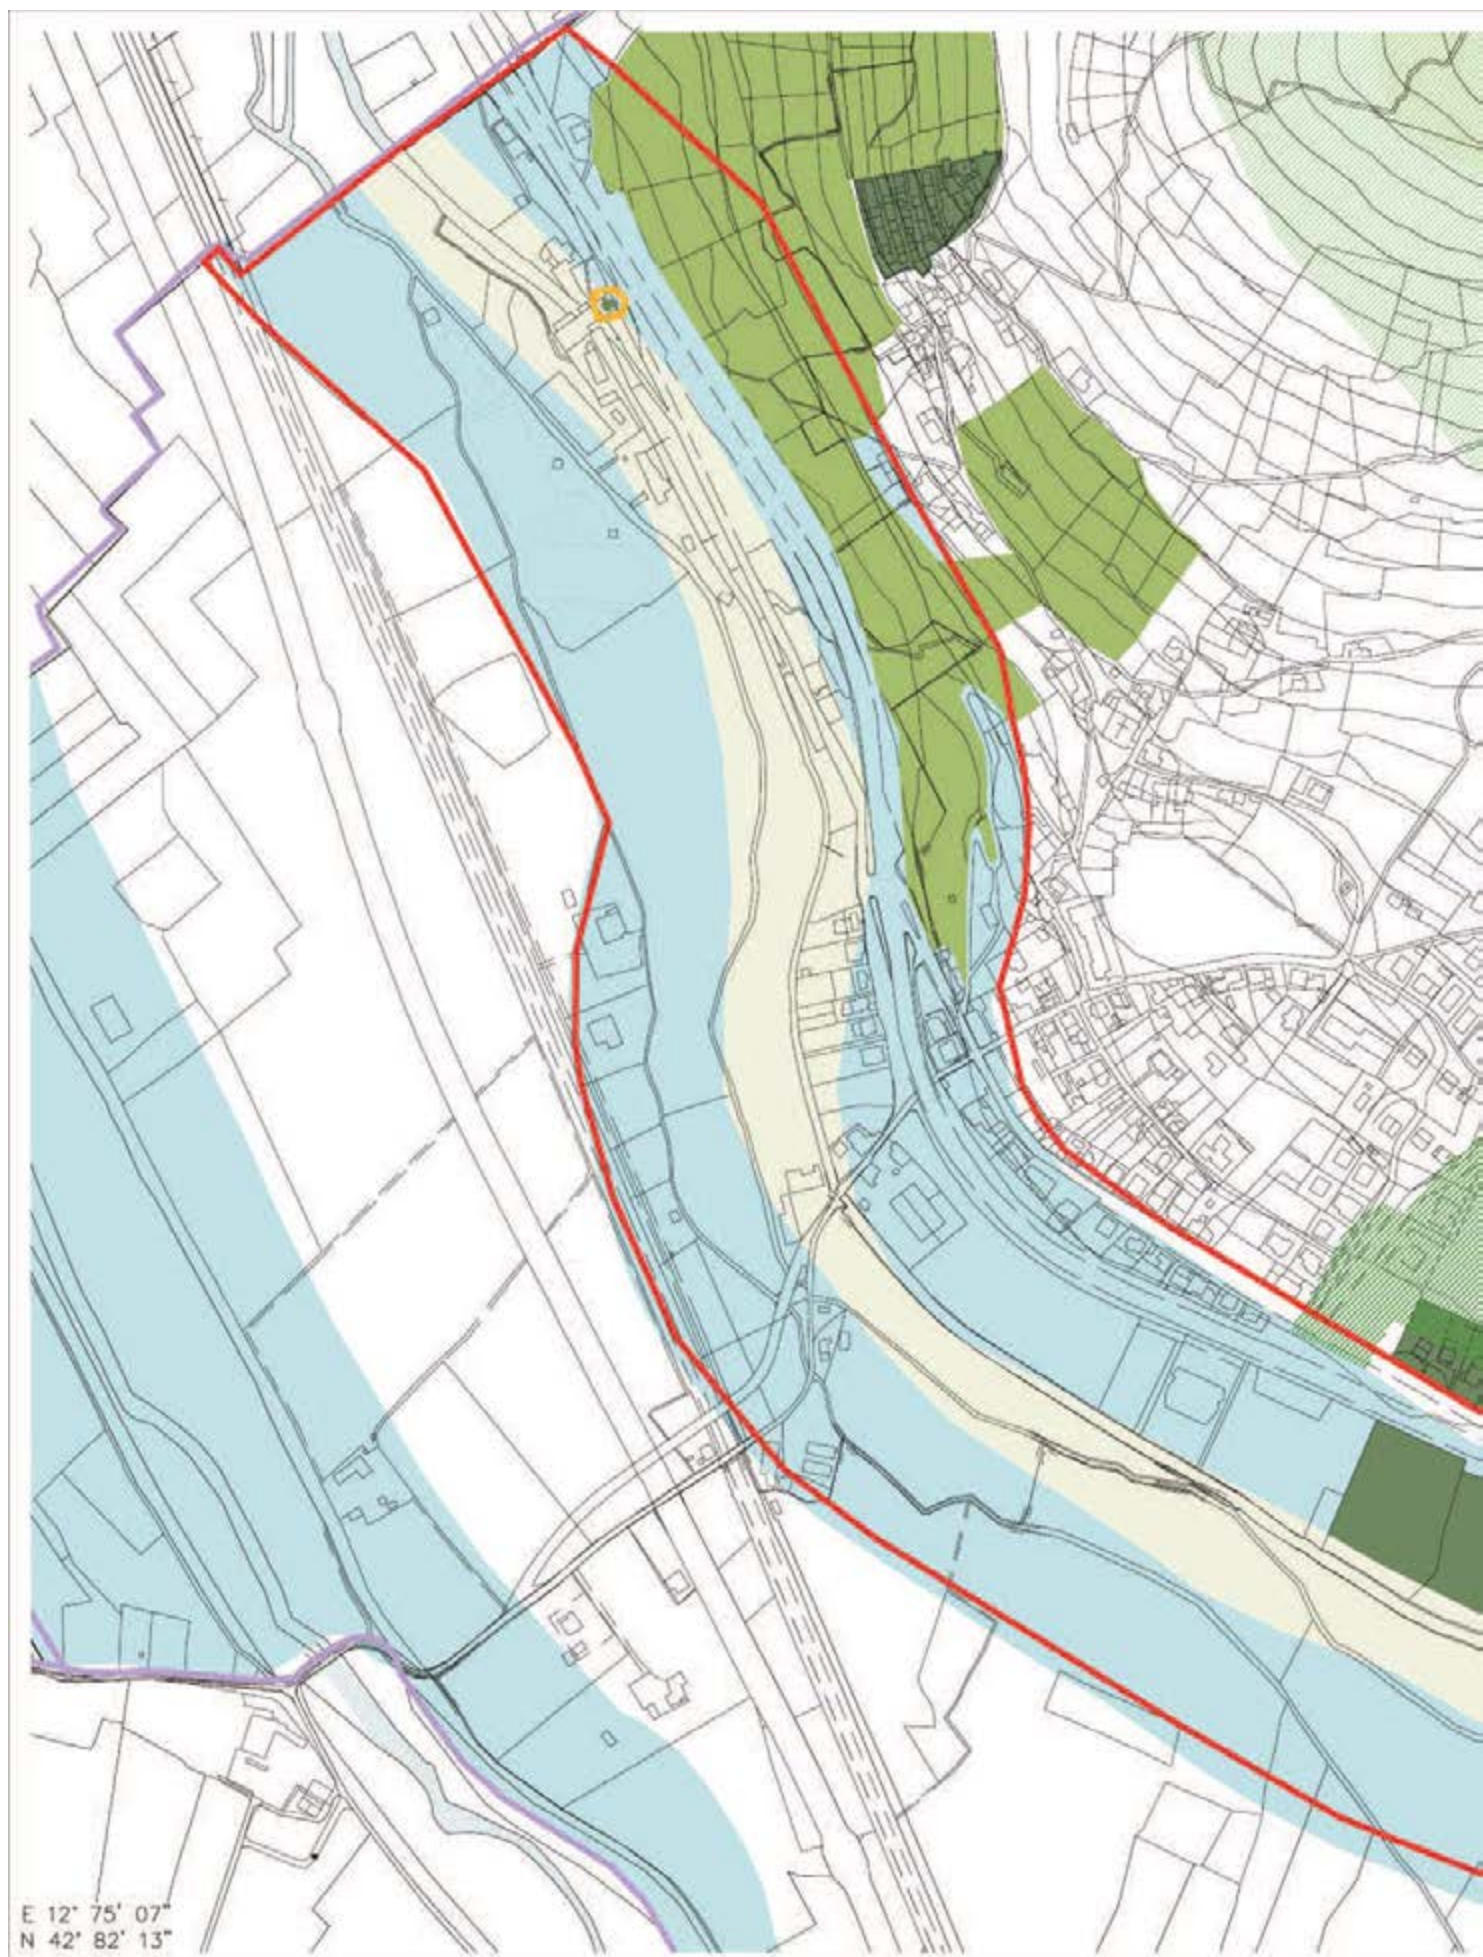

Urban Development Plan) of the Umbria Region, which protect it from any change and/or transformation of context that can jeopardise its authenticity and integrity.

6.2.6. BENEVENTO PRESENT LEVEL OF PROTECTION

Ownership

The complex - which applies for the inclusion in the WHL - is composed by three architectural properties: the Church of Santa Sofia owned by the State (FEC - Italian Fund for Places of Worship), the adjacent Cloister and the Abbey which today hosts the *Museo del Sannio*, which belongs to the Province of Benevento.

Protective designation

The complex of Santa Sofia, besides protection in compliance with the national protection regulation in force, must comply with safeguard provisions of the Urban Development Plan (PGR) of the city of Benevento; the complex is - along with the proposed buffer zone - located in the "area A" of the PRG, and thus must meet the highest protection standards.

In area A only restoration and conservation interventions are allowed, that are construction works which only aim at preserving the buildings, thus ensuring their functionality through a methodological system of works which - by respecting the typological, formal and structural elements of the building itself - guarantee their appropriate use. These interventions include consolidation, restoration and renewal of the elements composing the building, the addition of accessories and plants requested by use and the elimination of the elements considered extraneous.

Preliminary knowledge tests must be carried out before starting restoration on the buildings subject to intervention. The documentation relative to these tests must be given to the Municipality.

All intervention applications must be documented with surveys, sections, environmental surveys (indicating species and relative dimensions) and any external qualifying element (walls,

half-circle structures, fountains, differences in height, flooring), volume data, historical and historiographic documentation with plans, prints, ancient surveys, land registry maps for the properties concerned; photographic documentation of the external and internal conditions, significant particulars, measurements and description of internal and external finishes (frames, banisters, stairs, windowsills, floors, coatings, etc.); executive project; report indicating planned operations of restoration, consolidation, renewal and use of each floor.

Authorisation to intervention is given by the Municipality, after the competent Superintendence of the Ministry of Cultural Heritage and Activities has expressed its opinion on the matter.

The PRG also envisages specific protection provisions for the "Longobard walls" which limit most of the buffer zone proposed.

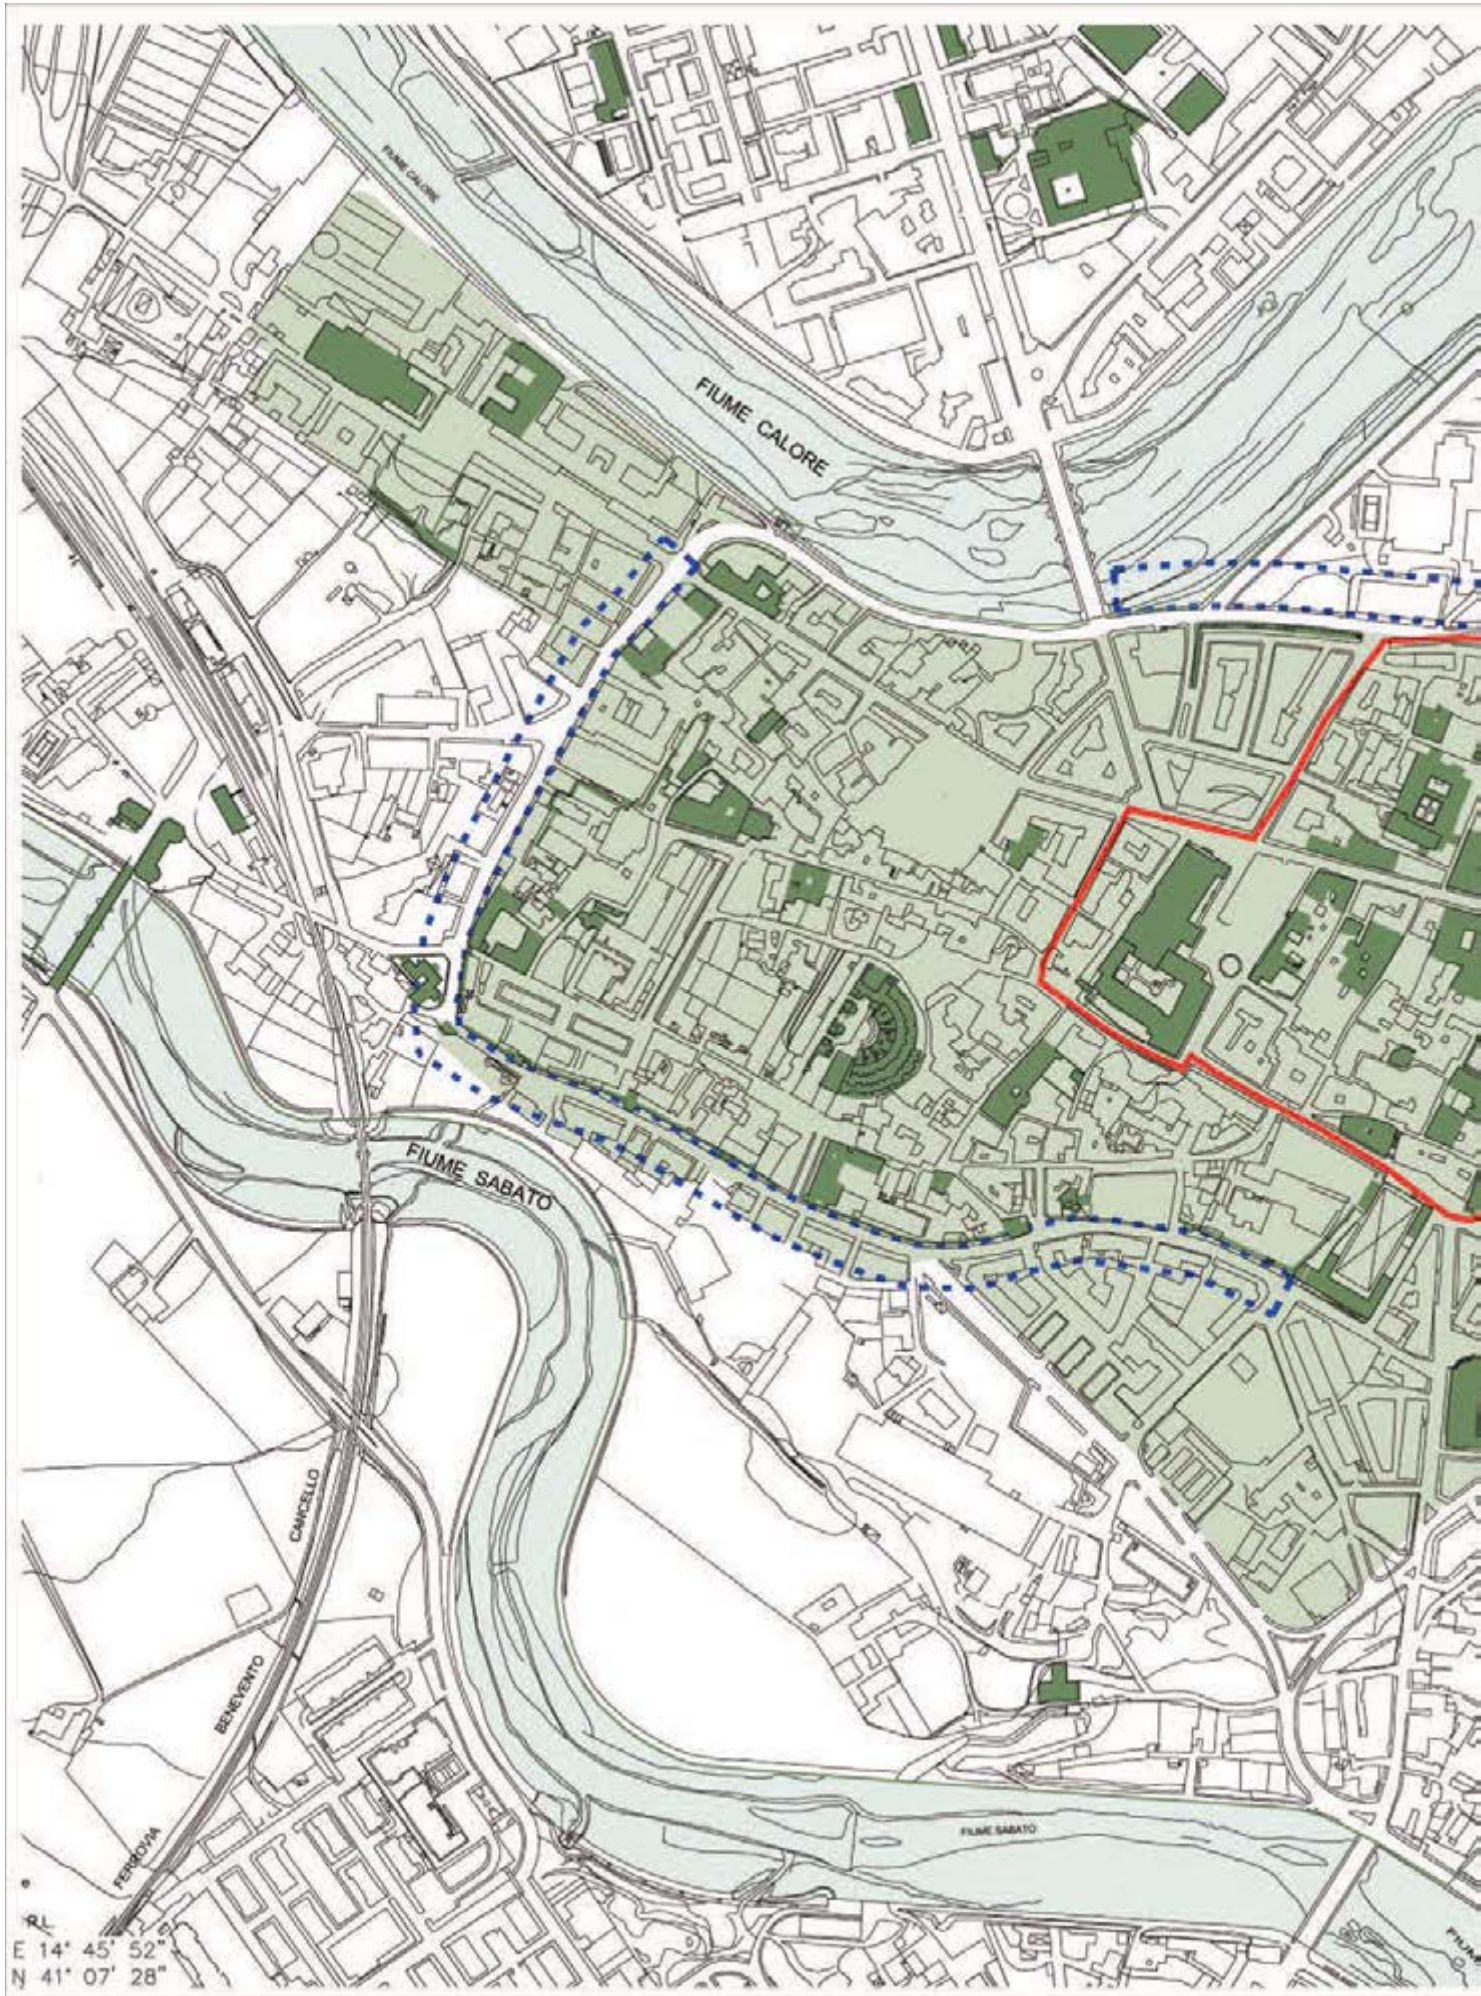

The same provisions are also laid down in the new proposal for Piano Regolatore (PUC), which as a further protection significantly extends the protected perimeter of the Historical Centre far beyond the buffer zone.

6.2.7. MONTE SANT'ANGELO PRESENT LEVEL OF PROTECTION

Ownership

The property applying for the inscription in the WHL belongs to a legally autonomous ecclesiastical authority run by the order of St. Michael fathers (Ordine dei padri Micaeliti).

Protective designation

The area, already protected by national legislation (Code of Cultural and Landscape Heritage, Legislative Decree of January 22nd, 2004, no. 42), is also part of zone A of the *Piano Regolatore Generale* (PRG or Urban Development Plan) of the Municipality of Monte Sant'Angelo (approved by the Regional Council Decision no. 982 of 25.02.1986), zone 2 of the National Park of Gargano (established by the State Law no. 394 of 1991), and finally the Thematic Territorial Urban Plan for Landscape (established by the Apulia Region after the Decision no. 1748 of 15.12.2000).

The urban area "A1 - Centro Storico" (historical centre) of the Municipality of Monte Sant'Angelo, which includes the property applying for WHL and the entire buffer zone, is subject to detailed provisions for protection and maintenance (included in the building law and the technical regulations for the implementation of the Urban Development Plan), which envisage that all interventions must be authorised by the Municipality.

The urban development plan envisages specific architectural provisions as far as intervention of technical nature is concerned, including change in the intended use, for which also the binding opinion by the competent Superintendence for the protection of building techniques, typical building material and types of construction is needed.

The Municipality of Monte Sant'Angelo also includes part of zone of the National Park of Gargano, classified as an area characterised by human presence and action. The regulation for the urban development plan requires the binding opinion of the park authority for each urban conversion in the territory, and that of the competent Superintendence, which is in charge of supervising maintenance and improvement of the quality of landscape in the northern area of the Sanctuary in order to protect the current view. In the Territorial Thematic Urban Plan for Landscape, established by the Apulia Region, the area of the Sanctuary of San Michele is included in the area classified by technical standards as extended territorial scope "E". Although it does not have specific influence on the structure of the Sanctuary, its action of protection directly contributes to the protection of the area located in the north of the structures themselves, outside the urban area, which has high landscape value.

The bodies entrusted with the task of supervising the compliance with the restrictions set on the Sanctuary, its artistic and cultural heritage and the buffer zone as a whole are:

- Ministry of Cultural Heritage;
- Regional Directorate of Cultural Heritage and Landscape Assets of Apulia;
- Superintendence for Architectural and Landscape Heritage - Provinces of Bari and Foggia;
- Superintendence for Historical, Artistic and Ethno-Anthropological Heritage - Provinces of Bari and Foggia;
- Superintendence for Archaeological Heritage of Apulia in Taranto;
- Superintendence for Archives of Apulia;
- State Archives of the Province of Foggia;

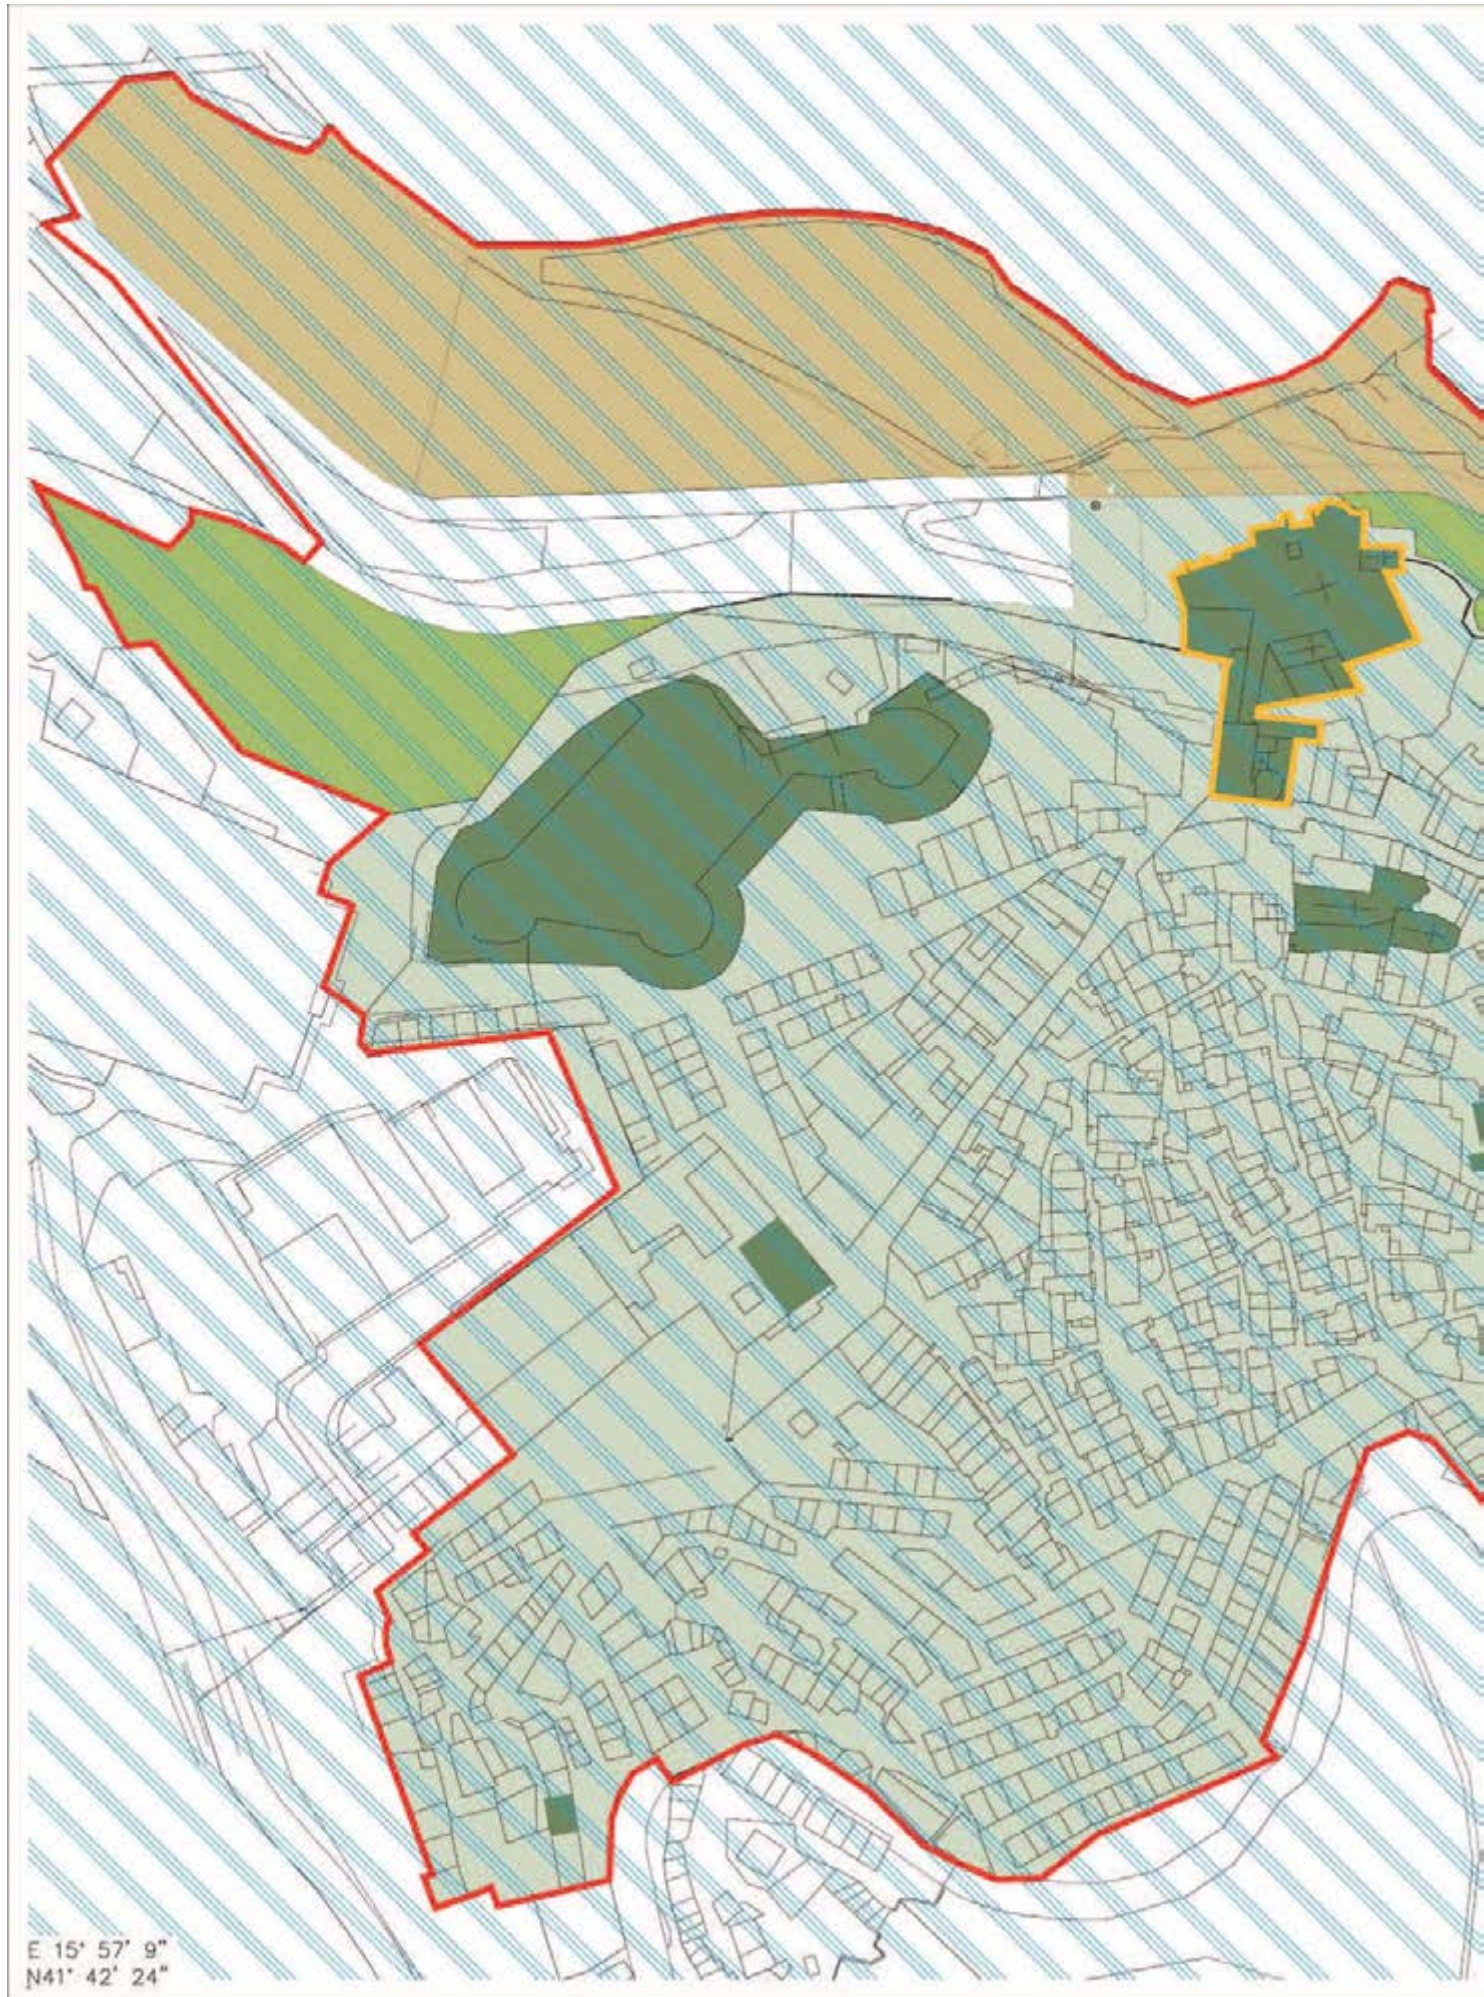

- National Park of Gargano;
- Apulia Region - Councillorship of Urban Development, Environment and Landscape;
- Municipality of Monte Sant'Angelo.

6.3 ASSESSMENT OF THE STATE OF CONSERVATION AND MAIN RISK FACTORS

The state of conservation of the properties included in the series – which stands as a nomination in the World Heritage List – is good.

The serial property comprises buildings and monumental complexes subject to national law on protection (see Annex 7) and therefore subject to constant control and monitoring by the competent bodies. Consequently, all properties are also subject to periodical maintenance activities.

Conservation and maintenance activities are always carried out directly or under the supervision of the territorial Offices of the Ministry for cultural heritage and activities (Superintendences) responsible for the areas; this guarantees a methodological and homogenous approach to the conservation activities applied to properties. This approach meets the criteria and the principles of the Italian restoration school.

Because the properties of the series went through different conservation phases, are located in different geographical areas –very distant one from the other– and were kept under different exposition conditions –both as far as climatic factors and specific collocation are concerned (great urban areas, small historical centres, suburban areas)– and were therefore subject to various environmental and human related factors, a separate description of the single aspects (present state of conservation and factors affecting the property) will be provided for each one.

6.6.1 CIVIDALE DEL FRIULI

THE SITE

A. THE GASTALDAGA

The Tempietto Longobardo

Overall the state of conservation of the artefact is good. A macroscopic observation of the condition of different surfaces (plaster, frescoes and stuccoes) and the masonry does not reveal any particular deterioration sign.

Made of a compound with chalk, the stuccoes, as well as the frescoes, are characterized by some small fractures that appeared following the earthquake in 1976 as it is clear from the comparison with the photographs taken in that period. Moreover, there is some efflorescence due to the humidity on the wall on the side of Natisone River (East) and on the Northern side. Moreover, some fragments of fresco on the Eastern side have flaked off. This condition was already visible in the 1920s and it called for a maintenance intervention in 2001. From the point of view of the structure, the masonry is in an overall good condition and there are no signs of deterioration due to particular problems of stability. On the stone slab

Details of the Archangel Michael in the western lunette

floor of the presbytery, mortar is disintegrating or missing on the joints.

On the wooden chancel the treatment applied in previous restoration operations is starting to alter, as are the pictorial decorations of the wooden parts of the iconostasis. The environmental conditions of the Tempietto are currently monitored

Fresco depicting Saints on the norther and western walls

by a temperature checking system through a dehumidification plant.

Over time the Tempietto has been subject to a series of restoration interventions in order to identify the different historical stratifications and to solve conservation problems. As for the last objective, between 1925 and 1926 a series of interventions was carried out after the detection of “*damage that is threatening the building*” and humidity that is threatening the conservation of walls (the building of an edge beam at cover level which links the three sides of the hall and a tied rod on the “uncovered” side; the building of a concrete edge beam over the North-Eastern wall of the presbytery; the rebuilding of the roof and water drainage system; the restoration of frescoes and plasters existing at that time; conservation and partial reintegration interventions of the wooden chancel.

The interventions carried out between the second half of the 1950s and the second half of the 1960s mainly focused on the parts of frescoed plasters which had flaked off, of which the underlying layers were brought to light (see Scientific Dossier - History and Development).

As for the structure, the masonry is in an overall good state of conservation and there are no signs of deterioration affecting stability. The 1976 earthquake caused damage to the hall vault, the presbytery vault and the wall abutting the sacristy.

The restoration intervention directed by Alessandro Degani after 1977 to “*heal the*

damage sustained by the building following the strong earthquakes” included the implementation of a series of “*simple tie rods at the same height as the threshold of the windows, that could not, of course, be seen*”; the strengthening of the three vaults with epoxy resins; in the hall the interventions dealt with “*the renovation of masonry; the removal of the cap of the vault; the closure of the Western edge beam (where the tie rod is); the implementation of double tie rods*” in the areas at the same height as the windows of the presbytery and of the roof where in the past wooden chains were linked the masonry.

Tempietto Longobardo, photo dated 1977.

Currently masonry is linked both to supports such as tie rods and to the edge beams in reinforced concrete. The earthquakes that have been striking Region Friuli Venezia Giulia since 1976 have not caused any damage to the masonry; most recent research in the field of seismic devices questioned the validity of the interventions for the implementation of cemented edge beams - in Italy best practice in restoration today does not envisage the elimination of these systems. After the restoration carried out following the 1976 earthquake, over the past ten years maintenance interventions and studies on materials have been performed.

At the end of the 1990s the wooden chancel was subject to a restoration and maintenance intervention¹.

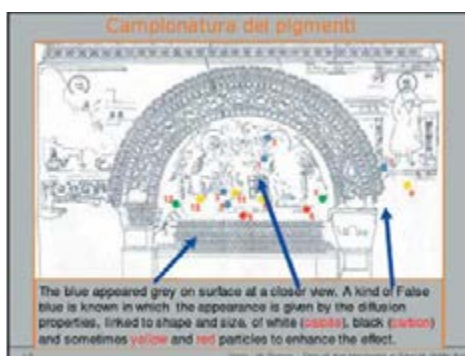

In 2001 a maintenance intervention tackled problems of water seepage by refinishing the roof, re-pointing the Northern wall and spreading a protective material on the bricks of the Northern façade.

To avoid possible problems of instability in the Tempietto, between 2005 and 2006 a prevention Intervention dealt with geostatic instability in the gorge of Natisone River. In the past, interventions to cover and support the rock face were carried out on stone walls. The old age of the masonry and the formation of natural caves under those walls - even though they were not very large - called for strengthening interventions through steel tie rods or filling with concrete and an external face in stone according to the different types of deterioration of the sides². As far as studies are concerned, in particular, reference is here made to the research carried out in 1996³ on the stuccoes of the arch of the Western wall to identify the

The analysis carried out on the frescoes identified the presence of cotton fibres conglomerated with calcite grains.

Pictures of the Monastery of Santa Maria in Valle

composition and the techniques used and in 2003 on the frescoes⁴.

In 1952 Luigi Coletti published the results of the research carried out on stuccoes that identified composition similarities with the stuccoes of the Alhambra. Between 1998 and 1999 the wooden chancel was subject to a systematic maintenance intervention of woodworm disinfestations.

A conservation problem to be solved, though of little importance, is humidity on the Northern-Western wall that so far has not caused serious problems, except for the limited presence of salty efflorescence. It is necessary to investigate the causes of the deterioration, which is likely to be linked to environmental factors and water seepage from the wall; it is therefore essential to check the presence of humidity, the type and the cause as well as to detect the type of deterioration. It is also necessary to plan maintenance operations of the presbytery floor, in particular the repairing of the mortar on joints. The same applies to the wooden chancel, which is deteriorating probably because of the alteration of the products used in previous restorations. In general, it is important to conduct a DIAGNOSIS PROJECT to check the state of conservation of different materials (stuccoes, frescoes, plasters, marble, stone and wood) on the basis of which a MAINTENANCE PROGRAMME can be designed. Operations currently under way are the following:

2007 - Intervention to adapt the parapet walls on Natisone River of Piazza San Biagio to safety rules

2008 – Cognitive analysis on stuccoes to identify the composition and techniques used by the BAPPSAE Superintendence.

In general the state of conservation of the complex, which is varied as for dimensions and type of spaces, is good thanks to continuous maintenance interventions on the interior rooms and

covers that were carried out during the period in which the Ursuline order resided in the premises, from the half of 19th century through the 20th century up to 2001, when the monastery was bought by the Municipality of Cividale del Friuli. The interventions include the functional adaptation for didactic activities in the 1960s that focuses on the side facing Borgo Brossana and successive strengthening operations after 1976 which were accomplished in 1980.

The Church of San Giovanni shows signs of humidity (widespread efflorescence) that has caused the disintegration of part of the plaster on the bottom of the walls and the altar plinths. The frescoes in the façade too have some conservation problems (flaking off, erosion).

As far the rest of monastery is concerned, masonry, generally covered in plaster, is only partially damaged in small area. The condition of external and internal plastered surfaces is generally good from a conservation point of view, except for some parts where there are some humidity signs.

The floors are mainly made of wood

except for those that were restored in 1982 and 1985. The floors of the different levels are different as to quality (type of terracotta and stone slabs) and the state of conservation which generally is good. The system of doors and windows is very complex and differentiated as to material, type and state of conservation; there are signs of deterioration on doors and windows, like the lack of joints and gaps between and on wooden elements.

Over the past five years maintenance interventions were carried out by the owner; in particular, in 2004 the maintenance of curved tile roofs cost 14,280.00 Euros; in 2005-2006 the supplementary maintenance of the former school annexed the Monastery for the location of the Specialization School in Art History. The works cost 210,000.00 Euros.

The works in progress (2007) deal with

⁴ A. CAGNANA, S. ROASCIO, A. ZUCCHIATTI, P. PRATI, *Indagini archeometriche su materiali da costruzione del Tempietto di Santa Maria in Valle di Cividale del Friuli. I parte. Gli affreschi Altomedievali*, "Archeologia dell'architettura", VIII (2003), pp.69-87.

Ratchis Altar

Ratchis Altar - Traces of finishing in light blue

the restoration of the paintings and the frescoes of the Church of San Giovanni and the Convent. It is the restoration of the façade frescoes (Madonna Announced, the announcing angel and three saints), of three paintings (Our Lady of Sorrow, Veronica, Saint Michael the Archangel with Saint Benedict and Saint Claire, Christ Crucified between Blessed Benvenuta Boiani and Saint Ursula) and the restoration of the frescoes in the dining hall of the convent.

The conservation problem to be solved

is the presence of humidity in the masonry of the ground floor and the flaking off of plaster. Doors and windows in general are in a good condition; shutters need renovation interventions to integrate missing parts. The condition of plaster surfaces is generally good from the point of view of conservation, except for the part of the portico roof where there are clear signs of deterioration on plaster because of water; some areas – that near the Tempietto court – have widespread signs of biological degradation. The

Ratchis Altar - Traces of finishing in red

portico stone floor lacks mortar in many joints and has some integrations in a bad condition. The rest of the floor is made of concrete of not very high quality. The enhancement of the monastery is planned (see Enhancement Plan) with the carrying out of maintenance interventions of external plasters and the wooden shutters and with a program of research that should enable the study of the monastery history.

B. EPISCOPAL COMPLEX

Ratchis altar and Font of Callisto

In general, the state of conservation of the Aurisina-stone Ratchis Altar is good. A macroscopic observation of the conditions of the stone surface does not highlight the presence of deterioration except for marks of film materials spread all over the surface as release agent of the casts carried out throughout the 20th century.

On the slabs that make up the altar traces of polychrome finish layers have been detected; they probably belong to the original period and to following maintenance operations, as well as numerous stuccoes. These fragments have different levels of conservation as for both the adhesion to the stone and the alteration of mixes and limited

problems of polychromy alteration. These fragments were studied in laboratory in 2004 to understand the characteristics of the types of pigments used in the polychromy of the altar, the compounds created and their application. Currently the competent Superintendence is planning a Diagnostic Project aimed at improving the knowledge on the material evolution and to monitor the state of conservation and therefore setting the maintenance Program.

Also the state of conservation of the Font of Callisto is good, a sight that is currently the result of a recomposition of the marble elements following numerous disassemblies and displacing. A macroscopic observation of the condition of the surface does not reveal particular degradation signs; there are some stuccoes that have alterations to their compound or limited problems of adhesion; the same applies to the joints – with the bottom larger than the top – between the slabs in the octagonal base. As in the case of the Ratchis's Altar, it would be advisable to set a Diagnostic Project aimed at improving the knowledge on the material evolution and its Maintenance Program. The current premises of the Christian Museum, where the Ratchis Altar and the Font of Callisto are exhibited, are the result of a restoration and layout intervention which is now approaching its accomplishment. Works started at the beginning of the spring in 2006 thanks to funds allocated by the Region Friuli Venezia Giulia, 473,000.00 Euros for the Museum (R. L. 53/1985), and 130,000.00 Euros allocated for the arrangement of the internal Museum Court.

The Cathedral of Santa Maria Assunta

The Cathedral of Santa Maria Assunta is currently in a good state of conservation. During the 20th century the Cathedral was subject to a series of restoration interventions that contributed to the

maintenance of a good state of conservation. Among these, in 1968 and 1969 static restoration of the building has been carried out; following the 1976 earthquake, the Cathedral has been subject to a consolidation intervention with the implementation of a system of tie rods where the arches are: the tie rods were cut during the 18th century as they were considered “ugly”. This intervention caused the detachment of the façade walls that were 20 centimetres out of plumb; the same applies to the roof trusses whose wooden consistency has deteriorated. At the end of the 19th century some tie rods were implemented and between 1894 and 1895 the roofing was restored and 10 trusses were rebuilt while the others were rearranged. In 1888 the walls were repainted and the floor was replaced – both the white and red marble checked floor in the nave dating back to 1509 and that in terracotta of the lateral naves – white and grey marble checked. A maintenance intervention is under way on internal surfaces with the study of plaster stratification thanks to the funding from the Ministry for Cultural Heritage.

Patriarchal Palace

The archaeological area under the Archaeological Museum (area A: stratification referring to the remains of the Longobard Patriarch Palace and following Late Middle Ages periods), part of the Southern side (area B: the masonry of the stratification referring to the evolution of the build-up neighbourhood in the context of the city between the Late-Antique and Early-Medieval ages) is in a good state of conservation.

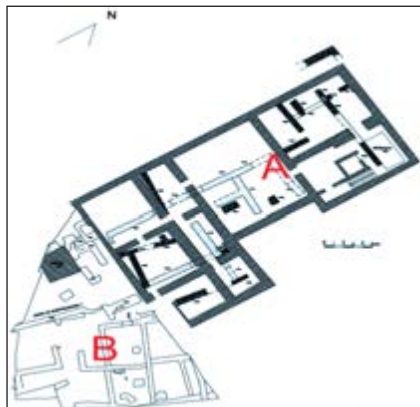

As far as archaeological area A is concerned, the masonry is mainly made up of pebbles of different dimensions and rough-hewed stones implemented in different ways to set groot beds, and there are different ways of making and implementing mortar in the joints. In general, the state of conservation is good as for stone, pebble and brick elements; the part in mortar are disintegrating and are missing in some areas but do not affect the stability of the remains themselves except for some conditions when stones are detached near the wall crest.

Some sections of the brick floor remains show detachments of the tiles near the border of the excavation; the stone slab floor is slightly exfoliated. Part of the

The façade of the Cathedral of Santa Maria Assunta (*Duomo*)

Identification of archaeological areas

wall remains rests on a concrete base annexed to the wall created during the excavations of the 1970s and at the moment it is roughly plastered. Some wall remains have brick floors and stone floors; the tiles of the former are detaching near the border of the excavation; the stone slabs of the latter are slightly exfoliating. The preserved mosaic floor, recently subject to intervention, needs light maintenance. Archaeological area B has been subject to a restoration intervention on the wall

Patriarchal Palace. Picture taken during the excavations in 1976

remains and a museum has been created following the excavations in 1987 and 1988; the intervention saw the covering of the area with a slab laid on iron pillars and the creation of visit routes. Today water seepage is present on the wall that closes the North-Western archaeological area. It has caused some deterioration problems such as a biological patina on the mortar joints and the imbibitions in the wall section where the leakage is localized. Some iron windows and doors in the cover lack

airtight sealing. Conservation problems to be solved in area A mainly refer to strengthening intervention and the integration of mortar joints in the wall face to fasten stone elements that are loose. Overall, there are no conservation problems in need of systematic refilling or change of wall layout neither in the face nor in the curtain wall. The finishing under the concrete wall does not have conservation problems when humidity is not present. Today these solutions are not considered suitable, but the current best practice in restoration does not allow for their removal. It is enough to have a finishing intervention to improve their layout. The stone and brick floors of the archaeological area needs fastening along the border of the excavation (part of brick floor) and sealing of the stone chips that are being exfoliated, together with a general intervention of light cleaning. As for archaeological area B, from the conservation point of view, an intervention is necessary to stop water seepage on the North-Western wall and therefore to proceed to the restoration of that part of the wall face that is deteriorating because of water. At the same time, it is necessary to check and improve the airtight sealing of windows and doors in the cover floor. The competent authorities are carrying out a first phase of works to arrange the whole archaeological area to make the

View of the archaeological remains

museum easier to visit; the phase includes the completion of restoration work on the mosaic floor. The *Provveditori Veneti Palace* was subject to a consolidation and restoration intervention from the first half of the 1970s up to 1990, when the palace became the venue for the National Archaeological Museum and is therefore in a good state of conservation. The restoration project, carried out in different steps from 1972, included the rebuilding of floors and cover, together with the implementation of an edge beam and the adaptation of the plant system.

THE BUFFER ZONE

The city walls around the Roman *Forum Iulii*, which, thanks to strengthening, continue to enclose the Early Medieval city, are in different levels of conservation and only one part is visible. The walls are the limit of the proposed buffer zone. The conservation problem to be solved in the city walls differs according to the sections of the wall itself.

At the moment in the Craigher Canussio Palace a section – long some tens of metres – have been found and restored together with a tower – probably dating from the Late Republican period – with Late-Antique Early-Middle Age braces. The state of conservation of the walls inside the palace is good. The outside section of the walls needs limited maintenance interventions (3) as do the parts in Via Mulinuss (5). Different problems in the part of the Blockhouse area due to the presence of weeds (2), as in the North-Eastern walls where successive houses were built (1-4) (see table 12). In these areas a survey is needed to check possible deterioration especially in the joints mortar. It is necessary to set up a program to survey visible stratification and their state of

deterioration to carry out restoration or maintenance interventions.

The condition of the city walls of the quarters is different. Of all these city walls, only the section around Borgo Brossana is part of the buffer zone. In the Conservation Plan the entire circuit of the quarters that is part of an enhancement program is taken into consideration. From the second half of the 18th century up until at least the 1930s the walls were subject to partial demolition linked to the urban expansion. This condition started to be rectified at the beginning of the 20th century when the Provincial Commission for Monuments of the Province of Udine decided that “*the walls are to be protected and their alteration is by all means forbidden*”. The part currently protected clearly connotes the shape of the circuit and, given its size, different conditions of conservation.

The main problem is the deterioration linked to the presence of weeds that affect in various ways different sections of the walls causing stones to come off. In addition to this, the deterioration of mortar joints and the wall cover cause water seepage.

The areas characterized by deterioration problems are a quite wide section of Borgo di Ponte (picture 13-14), some sections of San Domenico and Borgo San Pietro. The section of wall included in the buffer zone – borgo Brossana (15-16) – needs a maintenance intervention to stop the deterioration due to widespread weeds.

On the one hand it is necessary to improve the knowledge on the walls and the different phases for building them and their transformation in order to analyse the wall stratification; on the other it is necessary to survey the levels of deterioration and then set up a maintenance program that takes into consideration intervention priorities.

The Italian Castle Institute has long dealt with raising awareness of the problem of knowing and preserving this fortified system which has been subject – over the past few years – of some studies focussing on the problem of conservation⁵.

Over the last 20 years of the 20th century limited restoration interventions were carried out on the walls along Borgo San Pietro and Borgo di Ponte.

The works currently under development (2007) deal with the restoration of the section of Borgo San Lazzaro thanks to funds allocated by the Region Friuli Venezia Giulia with law R. L. 10/2000,

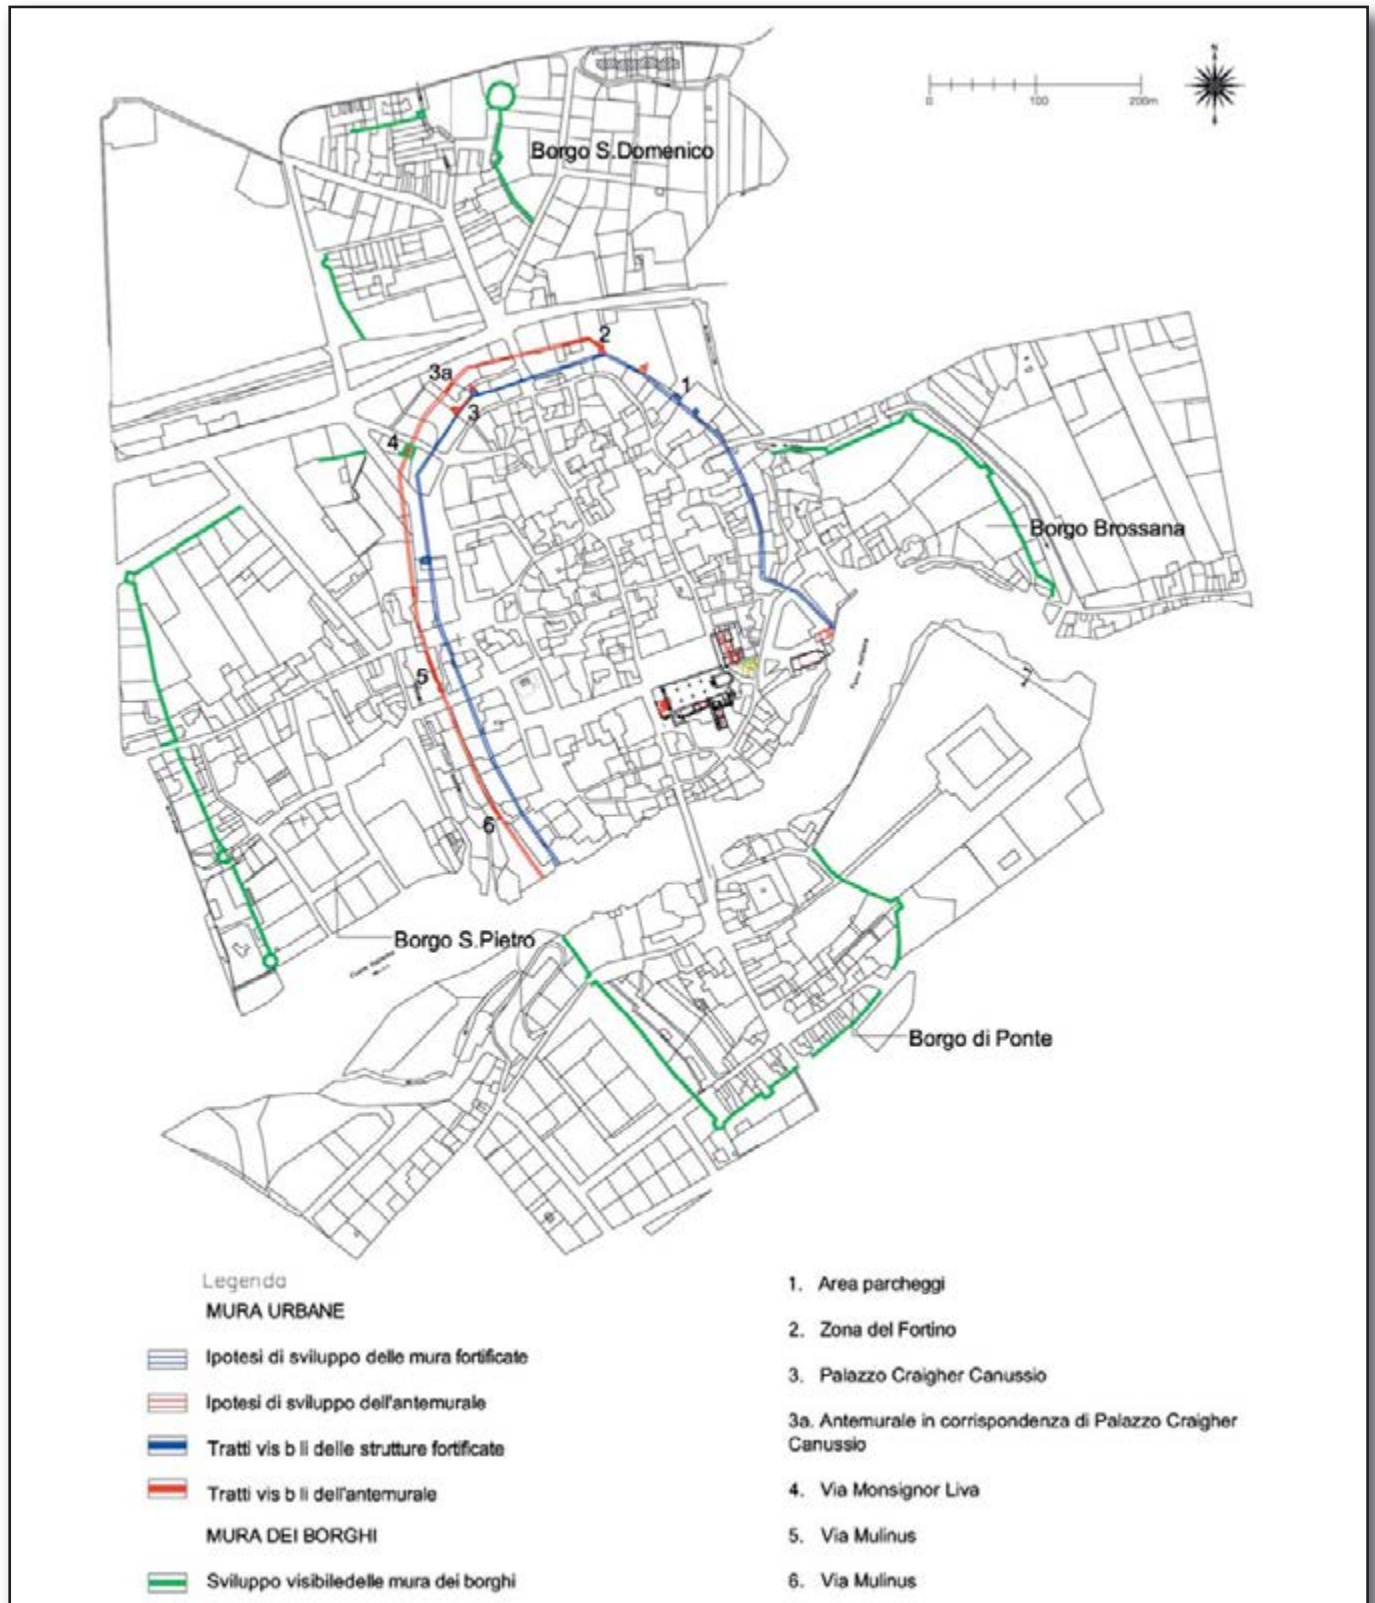

As for the churches and the convents within the Buffer zone, their state of conservation is different.

The Church of San Giovanni in Xenodochio was completely renovated in the 19th century and is currently under restoration.

The Church of Santa Maria di Corte is no longer used for worship, the nave is in a good state of conservation thanks to the recent restoration intervention on the cover, the plant system, the altars and the organ. The façade plasters have deterioration problems such as detachments, holes and disintegration. A maintenance intervention on the façade is necessary. In 2006 tests on the internal plasters were carried out to the amount of 2,000.00 Euros to

⁵ F.DOGLIONI, F.FRANZ, A.QUENDOLO, B.TOMBOLATO, R.VIANELLO, E.ZENDRI, *Le mura di Cividale del Friuli: progetto per la conoscenza e la conservazione del dato materiale*, in *Progettare i restauri. Orientamenti e metodi, materiali e indagini*, Conference Proceedings (Bressanone 30/6-3/4 1998), Edizioni Arcadia Ricerche, Venice 1998, pp. 559-574.

Map of Cividale del Friuli with the sections of urban and quarter walls highlighted

improve knowledge on stratification, especially near the triumph arch, where a fragment of fresco is, Christ Pantocreator, that might have been depicted near the decoration belonging to the original chapel. It is necessary to proceed with these tests.

The Church of San Martino is in a fairly good state of conservation. Recent interventions focused on the bell tower and the cover. On the interior and external façade walls there are signs of deterioration such as detachment of plaster and humidity; while on the external apse wall the plaster stratification is poor in quality, material and image. The interiors have small detachment problems of the plaster at the foundation and the 17th-century vault of the nave has desegregations due to water seepage from the cover. It is necessary to carry out a maintenance intervention.

Since the maintenance of the cover carried out in 1983, the church of San Silvestro has not undergone further interventions. A general restoration project is under way; the current state of conservation is indeed quite poor. The nave shows signs of disintegration of the plasters at the foundation due to humidity and the cover in trelliswork with paintings of 1918 is broken in various areas; the same for the presbytery lunette of the Quaglio. The sacristy against the apse is currently propped up for detachments of plaster on the stubbled cover and the fresco of the Quaglio is deteriorating. Windows and doors, as well as the lighting systems, are in poor conditions.

The Church of San Pietro ai Volti, subject to a systematic restoration intervention accomplished in 2007, does not present conservation problems. The Church of Santi Pietro and Biagio is currently subject to restoration interventions, the latest in a long series of interventions ranging

from the maintenance of the cover (1985) to the discovery of the original Early Medieval plant floor and the restoration of frescoed surfaces.

During the 20th century the Convent of San Francesco was subject of numerous restoration interventions; following the 1976 earthquake, between 1978 and 1985 it was strengthened to make it earthquake-proof; in 1986 the "Sala Capitolare", the sacristy and the underground rooms were restored; some works have not been accomplished yet, especially those linked to the adaptation of the plant and the isolation of the cover. Currently the complex is the venue of conferences and exhibitions.

MAIN RISK FACTORS

(I) Development Pressures

Risks relating to urban context transformation

The site for which inscription in the World Heritage list is required and its buffer zone are located in the historical centre of Cividale del Friuli and both enjoy adequate safeguard from any possible modification and/or transformation of their context (e.g., demolition, reconstruction, new building work, unsuitable use of buildings, etc.), which might diminish their authenticity and integrity (see Management Plan, Protection and Conservation).

Antropic risks related to theft or vandalism

To this day no particular events linked to human presence, such as thefts or vandalism, can lead to any relevant risk factor. The assets are anyway have been placed under surveillance by the relevant institutions; in particular, for the Monastery/*Tempietto* and for the *Duomo/Museo Cristiano* (font of Callixtus, Altar of Ratchis), daytime

surveillance and a break-in alarm system, while for the *Museo Archeologico Nazionale/Palazzo Patriarcale* there is a night time surveillance and a closed circuit tv system (presently undergoing revision and maintenance work). Agreements have been signed to ensure shared surveillance of the assets at the site is upgraded.

(II) Environmental Pressures

Air pollution

In the site and its buffer zone)there is no particular risk factor connected to environment pollution. The area of interest is located in the heart of Cividale del Friuli's Historical Centre, far from the main production areas – the main one of these, the *XI Zona Industriale e Artigianale* (the Eleventh Industrial and Artisanal Zone) is at a linear distance of about three kilometres from the longobard *tempietto*. Therefore, no particular problem arises regarding air quality, also thanks to the dispersion and abatement effects on pollutants exercised by the winds, which prevalently refers to the north-east sector with a minimal component of winds from other octants. Part of the historical centre, including the area where the candidate resource is located, is completely or partially banned to traffic; the Commune's programme includes the progressive extension of the closing of the historical centre to traffic.

Soil and water pollution

No critical levels of pollution have been registered either regarding surface waters (of the river Natisone, which marks the southern boundary of the area) or of groundwater, or in relation to the soil. The rules for the urban plan implementation concur to ensure the safeguard and enhancement of the river Natisone and

its *forra*, by prescribing conservation of the waterway and of the vegetation, also through periodical control of the healthiness and environmental quality of its waters. This ensures facilities can be built to ensure water safety and to ban the reduction of the water flow, regulating water discharge and safeguarding sites from the threat of morphological transformation.

(III) Natural disaster

Risk of earthquakes the whole Comune di Cividale del Friuli is classified as seismic zone grade , in a scale of four decreasing seismic levels, according to a law called “Delibera della Giunta Regionale del Friuli Venezia Giulia” (n. 2325 of August 1st, 2003). In any case, the area proposed as candidate and the largely residential buffer zone, are classified as homogeneous zone of the type “A” by the urban planning instrument of the Comune’s general urban plan, which prescribes that all building work should respect anti seismic normative. These normative prescribe that all building projects should be carried out following specific geological studies, and must respond to specific national rules relating to the updating and/or improvement of buildings’ anti-seismic structures. In particular, monumental resources comprised in the site have been the object over time of focused anti seismic intervention, which have proved their usefulness during the last earthquake which occurred in 1976. This earthquake’s magnitude caused quite remarkable devastation in other towns. The walls of the longobard tempietto is linked to supports, such as the iron rods, and to cement supports, built during the restoration campaign of 1925-26 and again after the 1976 earthquake. The Cathedral of *Santa Maria Assunta*, following the 1976 earthquake had been subjected to a consolidation effort which completed

the ancient system of iron rods, which had been eliminated in the 18th century and partially re-instated during the 19th century. The *Palazzo dei Provveditori Veneti* was subjected to a series of consolidation efforts during the 1970s and in 1990, which comprised the rebuilding of the ceilings and of the roofing and the implementation of a cement supporting element. A project presided over by the “Dipartimento Protezione Civile della Presidenza del Consiglio dei Ministri” is about to be implemented, to monitor the seismic response of some of the city’s public structures. The constant work of the team of volunteers of the “Protezione Civile” of the Municipality of Cividale also concurs in ensuring prevention of seismic risk.

Hydro geological risk

The waters of the river Natisone flow through a *forra* – a typical element of this area-, a deep chasm affecting the surrounding strata constituted by successive floods, and forming lime-based conglomerates, being more or less cohesive, and with different liabilities to erosion. The liability to erosion of terrains, associated with the river’s action, ensures that the *forra*’s sides form sheer drops – measuring a maximum of twenty metres –, with many types of cave formations, of larger and smaller size, and at different heights, which have locally caused collapse related landslides. A notable collapse took place in mid 1980s, (not far from the western boundary of the buffer zone). Part of the river Natisone, included in the buffer zone and adjacent to the site for a small part of its course, has been classified as a flood risk area. This classification refers to areas with a high likelihood of flooding, in which geostatic-related problems related to decay and to the risk of landslides. The system prescribes a series of limitations on

maintenance of existing buildings, the banning of new ones, and the execution of consolidation work along the river banks. Regione Friuli Venezia Giulia had already begun consolidation work on the rocky cliffs of the *forra* in the early 1970s, concentrating on the areas where the danger for habitations, historical landmarks and public areas was greatest. Later work was carried out in 1991 and 1992. The work to ensure safety and consolidation were given greater continuity as of year 2002 up to the present. More recently, the Municipality of Cividale was allocated extra funds totalling 630.000 € (by the agency called “Direzione Centrale Ambiente e Lavori Pubblici della Regione Friuli Venezia Giulia”), to be spent on consolidation work. On completing such work, the Municipality of Cividale will be allotted a further 716.000 €. All work focuses on safeguarding hydraulic works present in the river bed, on avoiding dangerous erosion of the river banks and ensuring smooth water discharge. It is being carried out according to naturalistic engineering methodology, with techniques which strive to preserve the areas’ environmental value. Risk prevention is also the main focus of the *Protezione Civile* of the Municipality of Cividale.

Risk of fire

The Monastery/Tempietto complex is equipped with a system comprising fireextinguishers placed at intervals along the walls, which is constantly maintained; plans are being considered to upgrade the fire-safety system of the whole complex (see management plan). At the *Duomo/Museo Cristiano* (font of Callixtus, altar of Ratchis), and at the archaeological museum/palace of the patriarchs, there are both fire extinguishers and early warning systems involving smoke detection. In 006 the Commune definitively allocated

a building to the *Comando dei Vigili del Fuoco* (Fire Brigade Headquarters), at less than one kilometre from the Tempietto, where a new fire fighting unit has been operational since October 1st, 2007.

(IV) Visitor/tourism pressures

tourism pressures visitors to Cividale del Friuli have so far not involved any risk of damage or deterioration of its historical, artistic and architectural heritage: there are no particular signs indicating any wearing down of the areas of interest, or changes in temperature or humidity levels of enclosed areas, nor particular disturbance to residents, or disruption of traditional lifestyles. In particular, in the area comprising the monastery and the Longobard Tempietto, the Duomo and the Museo Cristiano, the national archaeological museum and the remains of the palace of the patriarchs, which is subject to the request for inclusion in the World Heritage list, there are no particular risks due to tourism pressures. A greater pressure might be recorded at the so-called Tempietto Longobardo, which is today the most visited of the city's monuments (see also visitor statistics, 5.h1), but the building's fruition by visitors is limited by the following conditions: to avoid erosion damage caused by visitors walking over the original *opus sectile* paving, the public can only access the presbiterial area (so at the moment, visitors are only admitted to the building through a side entrance, via an adjacent building, rather than through the original main entrance); the monument can be accessed by a maximum of 5 people at any one time, but the possibility of reducing the number to 15 is being considered. Moreover an agreement protocol is being defined among the different owner-manager entities in charge of the assets proposed for the

World Heritage list. The result would be an integrated tourism offer, comprising a visitor's card, allowing a more homogeneous distribution of visitors over a range of sites; this will alleviate tourism pressure, which would be especially a benefit for small size areas, such as the Longobard Tempietto, in case of an increase in tourist trends. A project involving the enhancement and refunctionalization of the monastery which includes the Tempietto will lead to a remarkable increase of areas open to visitors' fruition; this project involves a new system of approach to the Tempietto which will further diminish the impact of tourism on the building.

“Interventions for the protection, conservation and enhancement of fortified architecture in Friuli Venezia Giulia”.

The complex before

6.6.2 BRESCIA

THE SITE

Both the monastic complex of Santa Giulia and the single monuments enjoy an optimal state of conservation. An organic conservation plan has been implemented for the Site in the years 1979-2005, after in-depth studies and stratigraphic archaeological excavations which addressed the subterranean structures, the buildings' elevation as well as the interior and exterior decorated surfaces.

The southern cloister of the monastery before and after the conservative interventions

This intervention plan has been implemented according to the most advanced criteria and respecting the highest quality standards, and has led to an increase in knowledge of the monastery, revealing the many phases of the area occupied by the monumental complex.

For example:

- extensive archaeological excavations have revealed the Roman neighbourhood beneath the monastery;
- two Roman *domus* of Imperial times have been excavated and inserted within the exhibition area;
- the sequence of phases at the church of San Salvatore has been clarified;
- many stucco elements which had become detached and collapsed, were excavated and replaced in their original position;
- restoration work has led to the discovery of re-used ancient stone elements;
- new frescoes which had once formed part of the monastery's interiors were discovered;
- at Santa Maria in Solario the building was excavated to return to the ancient levels of access and use.

At the moment the only area in the entire complex in need of further work is the

façade overlooking via dei Musei, comprising the façade of Santa Maria in Solario, which had been restored at the end of the 1980s. The porous plaster and stonework have been affected by traffic, which is progressively lessening as the street has been partly closed to vehicles.

The near archaeological area is also in a good conservative condition; since 1823

it has undergone several archaeological surveys and conservative interventions. Since 1998 an organic recovery and enhancement project of the area, still in progress, has been started up with the supervision of the Ministry for Cultural Heritage and Activities and the Municipality of Brescia.

Due to the good condition of the monument and the high number of

The complex afterwards the restoration

Ortaglia Domus dell'ortaglia under excavation

finds, it is one of the most important and rich archaeological areas in northern Italy.

Thanks to specific interventions (studies, archaeological excavations, conservative maintenance, monitoring of the micro-climatic conditions) it has been possible to deepen the level of knowledge of each building of the Roman period and of the events of the area between the late ancient and early medieval periods.

In particular:

in the area of the late-republican Sanctuary

The completion of the archaeological surveys has enabled to precisely define the plan of the building; numerous architectonic elements of the monuments have been recovered;

The micro-climatic monitoring of the building has been started up in cooperation with the Istituto Centrale del Restauro, in order to be able to identify the optimal conservative conditions and assess the modalities of a possible opening to the public;

The restoration of the decorated surfaces (mosaic floors, frescoes), carried out in 2007 and 2008 according to the most modern criteria of sustainability and compatibility, offered a lot of information on the technique of the decorations;

The remains of the oven for the Longobard ceramic have been consolidated on the spot.

In the Capitolium:

the intervention of conservative maintenance and the study of the floor remains of the 1st century A.D., perfectly kept in the central and in the western cells, has enabled to characterize the polychrome marbles as well as to foster the knowledge on the techniques of floor-making and has also highlighted the ancient conservative interventions, thus giving an important contribution to

Sanctuary Western cell of the republican Sanctuary

define the abandonment of the building chronologically;
the comprehensive identification of many architectonic and decorative materials, found during archaeological excavations carried out on the building since the 19th century, has led to the discovery of missing fragments and new pieces of the building.

the theatre:

the archaeological surveys have given an important contribution to the reconstruction of the stratigraphic sequence of the area, with a particular view to the late-ancient and early medieval levels.

The conservation state of all structures and decorative furnishings is constantly monitored by technical and scientific staff. Any possible intervention is carried out at an early and timely stage, and is supervised by the in-house staff of the Settore Musei del Comune, in cooperation with the relevant Superintendencies, and conducted by purposely appointed specialists.

THE BUFFER ZONE

The whole buffer zone is characterized by a high conservative degree also due to the fact that in the main historical buildings the institutions and the bodies of the town government, of the province, university banks and ecclesiastical organizations have their seats. Most of the many churches are still open to mass celebrations and visitors, thanks to the artistic heritage they keep. The main squares are still today meeting places and are practically closed to vehicle traffic.

The Lombardy Regional Authority has promoted numerous interventions for the preservation of the historical artifacts that are part of the landscape. To ensure adequate tutelage of the territory, the Regional Authority has established careful preliminary assessment of proposed interventions that are potentially environmentally devastating, such as the construction of infrastructure or projects for the exploitation of the land.

The most effective tools to that purpose are the following:

The “Basic Landscape Survey” System Plan deals with the impact and landscape compatibility with the eventual construction of “railways, highways, scenic routes, and ancient roads” (D.C.R. n. IV/394 del 25.7.1986).

The Regional Territorial Landscape Plan, has as its starting point the notion that the scenic quality of landscape is not so much a natural element as much as it is the outcome of human intervention or historical events. The regional territory is, therefore, marked in its entirety by significant landscape, which contributes to the quality of life of local populations. Consequently, careful attention must be paid to local identity. The quality of plans and projects for the territory cannot be limited to exceptional parts of the countryside, but has to be extended to the entire region. The Plan launches a process of identification and recognition of the importance of rural landscape on a vast territorial and thematic scale, involving in the process all pertinent bodies and authorities.

Together with the Istituto Regionale di

View of the monastic complex of S. Salvatore - S. Giulia

Ricerca (IReR) and the Milan Polytechnic, guidelines have been drafted for the preservation of historic buildings. The guidelines are published in the volume *La conservazione programmata del patrimonio storico-architettonico. Linee guida per il piano di manutenzione e il consuntivo scientifico* [Planning the Preservation of Historic Architectural Heritage. Guidelines for Maintenance Plans and Scientific Account]. Concurrently, thanks to the technical and scientific collaboration of the Istituto Centrale del Restauro, we have set up an Information System for the Risk Chart of the cultural patrimony, which will enable the evaluation of the vulnerability of buildings to potential disasters and environmental threats. The Lombardy Regional Authority further promotes a project of territorial planning aiming to preventively identify compatibility of proposed interventions with geological, hydro-geological and seismic factors. Integral to this action are efforts to strengthen the role of local planners that should be at the basis of every comprehensive planning enforced through the Piani Territoriali di Coordinamento Provinciali (PTCP) [Provincial Territorial Coordination Plans] and the urban rules and regulations issued by municipalities (P.G.T.).

MAIN RISK FACTORS

(i) Development pressures

Risks relating to urban context transformation

The Site for which inscription in the World Heritage List is required and its *buffer zone* are located in the historical centre of the city of Brescia, and are thus adequately protected from any possible change (demolition, rebuilding, new building work, improper use of buildings, etc.) which could diminish their authenticity and integrity.

Anthropic risks related to theft or vandalism

The monastery of San Salvatore-Santa Giulia is staffed by one in-house caretaker and one security guard 24 hours a day. Surveillance staff is composed of 15 members. The staff numbers are varied in relation to real needs, during exhibitions and other temporary events.

The number of areas assigned to each staff member is based on the size of the exhibition area.

During the hours in which the buildings are open to the public, each entrance is guarded.

The whole exhibition area and the Museum deposits are all equipped with a closed circuit television cameras linked to recording facilities, which is monitored by specialized personnel 24 hours a day.

During the hours in which the buildings are closed to the public, the area is subject to security inspection rounds by personnel which operates 24 hours a day, and by means of closed circuit television cameras.

In the archaeological area is a guard during the opening hours (11 a.m – 4 p.m. Monday, closing day); the number of the personnel is enlarged during extraordinary visits or events. However, the area is protected by a fence and is also equipped with an alarm and video-surveillance system connected to the operative seat of the Surveillance 24 hours a day.

Industrial risk

Various industries are based in the territory of the Comune of Brescia; however, all are equipped with a P.E.I. (Piano di Emergenza Interna, or Plan for an In-house Emergency), and with a PEE (Piano di Emergenza Esterna, or Plan for External Emergency), which have been approved by the relevant authorities and drawn up according to the laws in force and to the guidelines

of the document entitled *Pianificazione di emergenza esterna per impianti industriali a rischio*. As the area of the Medieval monuments lies outside the range of potential damage, there are no particular risks related to accidents which might affect the asset proposed for candidacy.

Risks related to terrorist attacks

Since 11th September 2001 the monumental area with the monastery of San Salvatore-Santa Giulia, like other Italian cultural sites, has been the object of particular attention and vigilance according to provisions for sensitive targets. Risk is anyway quite remote at present.

Also, for security reasons, visitors are required to hand in bags, backpacks and suitcases.

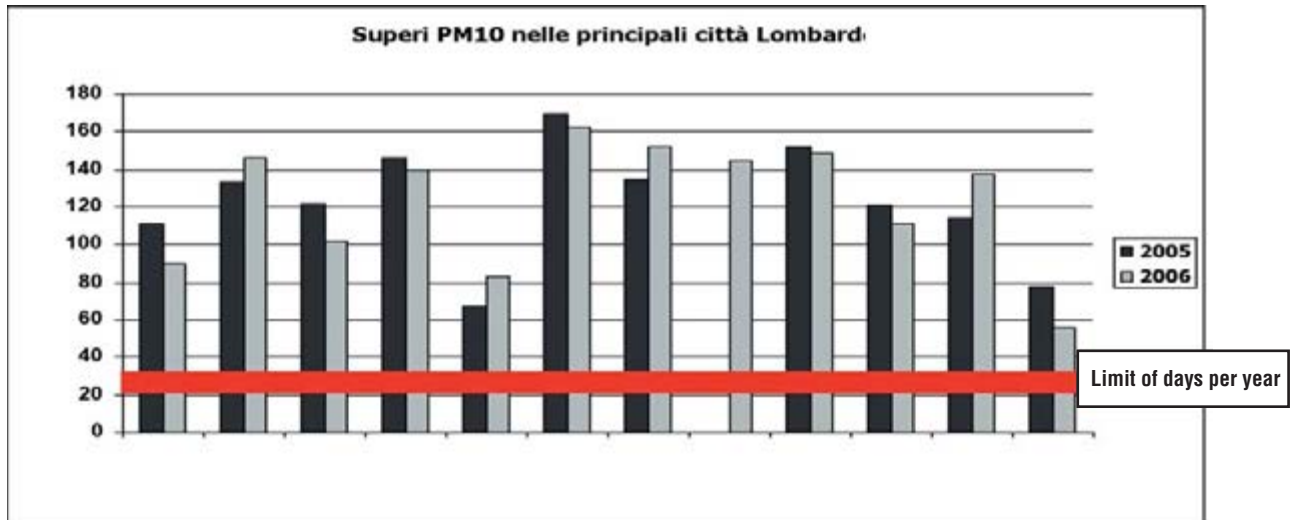

(i) Environmental pressures

Air pollution

Air quality in the Municipality of Brescia is daily monitored by five permanent stations, which belong to the monitoring network managed by the Agenzia Regionale per la Protezione dell'Ambiente (ARPA). One of these is placed at about 500 metre distance from the monastery of Santa Giulia and from the archaeological area near the Palazzo Broletto.

The maximum levels prescribed by the law called Ministerial Decree 60/2002 for the medium daily concentration of PM10 (a mix of solid and liquid particles present in the air, and measuring a diameter of less than 10 µm) were exceeded in the city of Brescia on 133 days in 2005 and on 146 days in 2006. The problem of environmental pollution is common to the whole of Lombardy region, and to the basin of the River Po. It must also be noted that the weather conditions typical of the Po River basin is characterised by no wind and by atmospheric stability, which does not allow the dispersion of these particles.

Number of days and with medium daily concentration level >50mg/cubic metre

The monumental area with the monastery of San Salvatore-Santa Giulia and buffer zone are limited traffic areas and the only public transport means are electrical and methane buses ; moreover the gradual, total closure of Via dei Musei is programmed. Therefore, the environmental pollution of this area of the town centre should significantly lower during the next few years.

Electro-magnetic pollution

Data supplied by ARPA (Agenzia regionale per la Protezione dell'Ambiente) indicates that within the Site the limits of electro-magnetic pollution have not been exceeded.

Acoustic pollution

For the area of via dei Musei, where the monumental area with the monastery of San Salvatore-Santa Giulia is located, the most recent data collected by the Municipality of Brescia (2004) record a level of acoustic pollution above the levels deemed acceptable by law. This in spite of the fact that the Site had been included in an acoustic zoning plan, where it ranked in a class "2" and was therefore subject to special protection (Class II is described as: "areas destined to prevalently residential use: urban areas of largely local vehicle traffic, low population density, limited commercial activity, absence of industrial and

artisanal activity").

Meanwhile however, further measures have been taken to reduce this type of pollution; at this time (2007) the Zona a Traffico Limitato, or Limited Traffic Zone (including the monumental area with the monastery) has been subjected to video-surveillance by the so-called "electronic policeman" (a camera which verifies the number plates of vehicles and the existence of an access permit); vehicle traffic has thus been further reduced of a percentage estimated at 70% or 80% of the traffic recorded in 2004.

Soil and water pollution

In the Site area no activity leading to pollution has ever been recorded. Therefore, no plans to analyze the soil and the underground areas have been implemented.

(iii) Natural disaster

Risk of earthquakes

The territory of the Municipality of Brescia is already classified in the seismic risk scale as a third category area, following monitoring and data collection implemented by the body called Servizio Protezione Civile, which completed and transmitted research data to Lombardy Regional Authority. According to this class system, the area belongs to zone 3 according to a

document called O.P.C.M. 20.3.2003 n. 3274, which corresponds to a low seismic risk level, as described in the explanatory note 4.6.2003 within the document.

The city falls within one of the areas most liable to seismic risk according to recent studies. This is because it rises in an area corresponding to two very evident seismic lines. However, the history of the town during the latest 800 years does not tell about earthquakes of damaging or catastrophic effect.

In 2008 the Municipality of Brescia with the aid of an expert has planned meetings and courses dedicated to the safeguard of the works of art in case of earthquakes or other natural disasters; the courses envisage a practical training with Protezione Civile at the Museum of Natural Sciences and will be attended also by a selection of the municipal staff.

Risk of fire

In the whole area of the monastery of San Salvatore-Santa Giulia. *Museo della città* (exhibition and depot areas) a permanent automatic smoke detection plant is in operation, as well as a manned signalling facility and a fire alarm, which comprises CERBERUS-SIEMENS technology (dynamic apparatus for the dynamic measurement

Monitoring of the conservative condition of the arcs of the church of San Salvatore

of heat) according to UNI 9795 and UNI-EN rules.

A luminous and acoustic alarm system is in place to signal fires, which are connected to a central office staffed 24 hours a day. The alarm is immediately relayed to the closest Fire House.

In the area set up as exhibition, deposit and museum space, hand held fire extinguishers (using powder and water), where the number of fire extinguishers per square meter is as follows: n. 1/50mq. The surveillance personnel has been adequately trained in fire emergency procedures and in using fire extinguishers. Also in the archaeological areas are movable fire-fighting facilities.

(iv) Visitor/tourist pressure

Tourist pressure

During the last twenty years a large number of recovery and enhancement activities have been carried out in Brescia, based on careful programming in view of sustainable development, and focusing on the wealth of its cultural heritage.

This has determined a remarkable increase in visitors, which has been adequately managed by the local administration and by competent agencies. In general therefore, especially because of the very nature of these locations, and because of the number and type of visitors involved, Brescia's tourism has not involved the risk of damage or deterioration of the historical, artistic and architectural heritage: no particular damage has been detected in the locations, nor temperature or humidity level variations in the indoor areas, nor has the residents' life or traditional lifestyle been affected in any way.

As to the monumental area with the monastery of San Salvatore-Santa Giulia, for which admission in UNESCO's World Heritage List is applied for, there are no signs indicating particular risks due to tourist pressure. The wide size of

the area and the high quality of the organized visitors' facilities ensure that the impact of tourism on the monumental area is minimized, even in the case of temporary exhibitions hosted by the Museum.

As to the *buffer zone* proposed for the site, corresponding to the whole of the Longobard town– the present historical centre – tourism is not expected to affect the area negatively during the next few years, principally because of the size of the area over which the assets are scattered, and because of the present level of development of the receptive facilities in place.

Local administrations (Municipality of Brescia, relevant Superintendencies, Province of Brescia) have correctly and carefully managed tourism policies, and specific policies have been implemented by Lombardy Regional Authority. Among the objectives set out in the programme entitled Programma Triennale di promozione turistica della Regione (three-year programme of tourist promotion of the region), conservation

of sensitive components in Lombardy's tourism areas, e.g., valuable terrains, landscapes, natural aspects, ecosystems, are recognized first rank priority. The Regional Authority thus focuses its support of Agenda 21 protocols on an improvement of environmental efficiency of venues, the promotion of environmental management systems, the use of low impact transport, and on the maintenance of a high resource quality, which attract tourism.

In particular, Lombardy Regional Authority has started up an Agreement protocol entitled "Promozione e la diffusione della Carta Europea del turismo sostenibile nelle aree protette" (Promotion and diffusion of the European Chart of the sustainable tourism in protected areas).

6.3.3 CASTELSEPRIO-TORBA

THE SITE AND THE BUFFER ZONE

The state of conservation of the various monuments that make up the Castelseprio-Torba archaeological area is good, thanks to constant monitoring and programmed conservation carried out on the assets by the owners and managers. All works are done making use of qualified professionals (restorers, architects, engineers, etc.) and adopting advanced work techniques that respect the criteria laid down by the Central Restoration Institute of the Ministry of Cultural Assets and Activities.

In particular, in addition to routine maintenance on the Church of S. Maria *foris portas* conservation work was carried out at the end of the 1990s on all wall structures. This also included refurbishing the roof and rainwater systems, as well as creating a chemical barrier against rising damp in the walls. However, this work did not extend to the walls of the central apse, which is home to famous frescoes, since the work done here in the 1950s to eliminate rising damp was still working well. At this time no conservation problems have been found in the structure or the frescoes.

In the case of the Basilica di S. Giovanni (basilica, baptistery, cistern, bell tower, and cemetery), which is also subject to routine maintenance, work was started in 2005 to repair the masonry work, and this will be completed by the end of 2008 (funds already allocated).

As to the fourteenth century building known as Cascina – Monastero di S. Giovanni, overall redevelopment was carried out in 2004-2005 in relation to its use as an *Antiquarium* for the Park, and this is planned to open in 2008.

The projects concerning improvement of the conservation of the other religious buildings of the castrum: St Paul and the Baptistery, are under way.

For the latter the restoration of the protective covering is planned.

The entire stretch of the wall, affected by the landslides in 1989 and 1993, was repaired and further valorised by restoring the profiles of the banks, adequate channelling of the rainwater, refurbishing of the sections of the trail that were damaged, recovery of the foundations of some towers in the circuit, and some pieces of wall that had

slid down the ancient slopes. Currently there are no problems with the visible parts of the wall . and the towers for which work to improve the walling is anyway planned.

As to the Torba area, in recent years FAI promoted an overall works project aimed at completing recovery of the complex and improving its cultural aspects. Currently, work is being completed in all its structures and on

The church of San Paolo

the 8th century frescoes in the Tower, which were covered by initial works in the 1980s. The works in progress are intended to eliminate the phenomenon of deterioration of the paintings (fading, lifting and detaching of the paint film and biological attack) that has occurred due to humidity in these spaces. The works also include operations intended to increase the degree of valorisation of the Tower - new lighting system, system to protect the frescoes, renovation of the illustration panels and signage.

Another work in progress regards the fragments of painted plaster in the Church of S. Maria di Torba. This work is not simply intended to improve their state of conservation and the presentation of the paintings in situ, but also to reposition pieces that had detached themselves about twenty years ago, to prevent them decaying. Conservation works are also planned shortly on the external plaster of the farmhouse. In addition, works are planned for excavating, weeding, and conservation of the boundary wall that links the Torba area to the *Castrum* above.

MAIN RISK FACTORS

(i) Development pressures

The Site for which application is made for inclusion in the World Heritage List and the related buffer zone are in a wooded area outside the urban areas of the Municipalities of Castelseprio and Gornate Olona, and has significant naturalistic and landscape relevance due to its integrity, reinforced by its being included within the PLIS Rile Tenore Olona. There are no particular building risks that could compromise the integrity of the territory, with the exception of the possibility of a factory being erected overlooking the Monastero di Torba area (Municipality of Gornate Olona). However, a watchful

The Tower's Chapel. The frescoes

eye is being kept on this situation by the Superintendency of Architectural and Landscape Assets.

Industrial Risk

A remote industrial risk is posed, in the territory of the Municipality of Castelseprio, by two chemical companies, although these have good safety systems and are not relevant in relation to the archaeological area in

town planning terms (the setbacks called for by law have been respected). This risk would only arise in case of a catastrophic incident.

Anthropic risk due to theft and vandalism

In the past some acts of vandalism have occurred in the area. Now the more vulnerable parts of the Site (S. Maria foris portas and the cascina-Monastero

The church of *Santa Maria* in Torba, the interior

di S. Giovanni) have an alarm system connected to a radio switched through to a Security Company. In addition, the frescoes in S. Maria foris portas are protected by anti-intrusion detectors.

(ii) Environmental pressures

Wood and weed growth

A large part of the Castrum area and the town itself is subject to a risk of woods growing, due to the invasive nature of the bush. In fact, the copse (false acacia, chestnut) contributes to giving rise to and/or aggravating specific disruption phenomena – mostly superficial – characterised by dripping or lava, the most clear signs of which are breaking up of the ground.

Currently the copse is constantly cut back in public areas, whereas the parts on private property lack maintenance. In order to overcome this risk the Superintendency for Archaeological Assets has already drawn up a management plan for the forestry area, and constantly cutting of the copse is proceeding.

(iii) Natural disaster and risk preparedness

Landslides

The land in Castelseprio area is subject to hydrogeological risk. This risk relates to the loss of cohesion in the ground on the slopes, resulting in landslides. In 199 – following heavy rain that caused damage

in various areas of Lombardy and Piedmont – damage occurred to the trails, the pedestrian path, and some parts of the wall (that had not been made safe).

The Superintendency of Archaeological Assets for Lombardy has already carried out a preliminary detailed study to implement works for draining and removal of water, stabilising detachments, maintenance and ageing of the bush in relation to the escarpment and reducing the load on the slopes. On the basis of this study a Forestry Management Plan (2004-2013) was drawn up. Currently work has already been carried out in the slopes belonging to the State, with suitable consolidation works.

Risk of fires

Given the significant number of trees in the area, especially in the proposed buffer zone, the possibility of fires caused by tourists camping is high.

However, the Castelseprio Municipality is involved in the “Safe City” project that also involves the archaeological area, and provides a night time surveillance service from 21:00 to one in the morning. Currently there are 30 patrols per year, but attempts are being made to implement this service. The archaeological area is also patrolled by the Local Police and Carabinieri.

(iv) Visitor / tourism pressures

As regards the Site that is proposed for

registration in UNESCO’s World Heritage List, and its buffer zone, there are no particular risks related to tourism pressure. The extensive area gives rise to a high tourism capacity for the monumental complex.

The anthropic risk is associated with motocross activity in the woods and the danger of fire caused by campers, but these activities have been placed under the control of the Local and Provincial Police and the Carabinieri. It is also covered by patrols that are part of the “Safe City” programme in which the Castelseprio Municipality takes part.

The conservation work of frescoes fragment

6.3.4 SPOLETO

THE SITE

The general state of conservation of the Basilica of San Salvatore is good; particularly, the façade is in excellent state, since –in recent year – it has been subject to accurate conservation work based on the cleaning and the consolidation of stone decorative elements of the windows and the portals.

As excellent is the level of truss covers of the three aisles, in which the inner space is divided; a careful observation of wall surfaces does not reveal the need for any urgent conservation treatments.

From the structural point of view, the stonework is in a good state of conservation and there are no signs of degradation related to stability problems. Moreover, the system to consolidate columns and stonework, connected to structural units dating back to the last century (tie rods and iron hoops), proved to be highly resilient even under the considerable seismic strain of 1997.

Wooden roof trusses of the central nave and side aisles are in an excellent state of conservation

The fragments of frescoes -still remaining on walls of the three apses, are in a good state of conservation and

Main portal's architrave. Disassembly (90s)

San Salvatore, main portal

Mould of the church's main doorway (90s)

they could at best only need a cosmetic conservation intervention.

The terracotta tiles floor, too, is in a good state of conservation and requires some slight maintenance.

The replacement of window and door frames and panes would be desirable because, although most of them are still working, some panes are broken

and iron frames have poor tightness. Internal frames (side doors and iron fence), though efficient, would need a revision of both surfaces (wood and iron) and relative material.

The existing lighting system is composed by loose cables which since no cable raceway can be traced on the walls should be replaced by

adequate raceways and new lighting devices.

The municipality of Spoleto is preparing a consolidation and renovation project for the building adjacent to the Basilica of San Salvatore, ex Monastery, which is currently in a poor state of conservation and is practically unusable. The work, which will be carried out thanks to regional and state funding, is aimed at allocating the building the use of an information point for the basilica (the Umbria Regional Administration has already allocated 300,000.00 Euro that will be used for the initial work for ensuring that the building is safe, starting with consolidation of the structures).

THE BUFFER ZONE

All the buffer zone is characterized by a high level of conservation due to the fact that historical buildings host institutions and bodies of city government, banks and ecclesiastical institutions.

Most of the churches are open for worship and visit, because of the artistic heritage within them.

The main squares are still a meeting place and partially closed to vehicular traffic.

The façade of the former adjacent to the basilica of San Salvatore

After ten years of reconstruction and renovation of public and private buildings of the historical centre with the State funds allocated for the damages caused by the earthquake of 1997, the Municipality of Spoleto has been putting the project “Downtown: from historical to economic value” into practice. This project, basing itself on protection and conservation of architectural and artistic heritage and environment features, aims at raising their enhancement (see cap. 6.4.4).

The structural renovation of the historical centre and the refunctionalization of large covered spaces have been financed by the Programme Document DocUP too.

All the works are performed in line with the national legislation for the safeguard of cultural heritage (Cultural Heritage and Landscape Code) and focusing on cultural heritage and on the buffer zone, the whole of the buffer zone is also subject to the protective and safeguard provisions of the most important urban instrument of the Municipality of Spoleto, namely the PRG (Urban General Development Plan).

Experts from the Municipality –from the Culture and Tourism Department and the Environment and Territory Planning Department-, in cooperation with the competent state Superintendences, have the task of periodically monitoring the artistic-monumental heritage of the City of Spoleto and verifying possible needs of routine and supplementary maintenance intervention, as well as structural interventions

Last but not least, thanks to the alternative mobility project the Municipality intends to relieve the traffic congestion on Spoleto in the historical centre and at the same time make it easily accessible through a network of car parks and footpaths mechanized (see Management Plan, project 20.1).

MAIN RISK FACTORS

(I) Social and economic development pressures

Risk factors related to the transformation of urban tissue and environmental issues

The basilica of San Salvatore stands next to the graveyard, as already stated in paragraph 1e.; which ensures the protection of the surrounding area from any risk of urban and/or landscape transformation. According to the legislation in force, there has to be an appropriate “respect area” between the graveyard and the urban area. The “respect area” is only covered with vegetation (the graveyard, therefore, is hygienically and spiritually separated – and justly so – from the urban area). Several protection provisions preserve the area opposite the basilica from any modification and/or transformation (see paragraphs 5 and 4).

Human risk factors: theft and vandalism

No risk factors related to the presence of man (theft, vandalism) have materialized up to now. The area is surveilled 24 hours a day by the caretaker, who lives in the adjacent building. Moreover, the basilica stands within the area of the municipal graveyard, which is protected by a gate and an early warning system. However, the sculptures once kept in the church are now kept in a museum. Procedures are underway to install a surveillance and anti-theft warning system using wireless connections (see management plan). Once the above-mentioned devices have been installed and the surveillance reinforced, it will be possible to set up an exhibition of the stone sculptures in the basilica.

(II) Environmental risk factors

The municipality of Spoleto constantly adopts environmental measures to protect the town and the surrounding areas. In 2005, in the framework of the

Community Initiative Leader+, the municipality of Spoleto decided to certify the quality of its environment and is currently establishing an Environmental Management System, in conformity with the scheme envisaged by the Community regulation Emas 2, to further enhance and develop the area in an integrated and environmentally-friendly way. Air, noise and electromagnetic pollution. Considering its position and the highly-valued naturalistic content, no particular risk factors related to pollution have been identified on the site and in the buffer zone. Following the approval of the Regional Plan for the Improvement and Maintenance of Air Quality, the Regional Technical Committee was set up. The Committee includes a representative of the municipality of Spoleto and has the objective to implement the plan. To manage the monitoring network, the municipality of Spoleto has reached an agreement with the Regional Agency for Environmental Protection (ARPA) of the Umbria region, according to which, an annual report on air quality is drawn up, to disseminate the monitoring results as well as to promote initiatives for the reduction of pollutants (www.spolveriamolara.it). The agreement with ARPA also envisages the implementation of the Electromagnetic Pollution Reduction Project (RIE); the objective is identifying – in line with the planning activities – appropriate sites for the installation of Based Transceiver Stations (BTS) and consequently the sites where the installation should be ruled out. Moreover, the municipality of Spoleto (with decision No. 78 of the municipal council of 2nd July 2007) adopted the draft Plan on Noise Classification. Noise zoning follows a series of other phonometric measurements and enables the development and consequent implementation of a regeneration plan, to comply with the noise limits imposed

by the legislation. Soil and water pollution No pollution problems have been identified with reference to surface and groundwater (there are no rivers in the buffer zone) and to the soil on the site concerned. During the updating of the Regional Plan for Water Treatment, no sensitive or vulnerable area has been identified in the Spoleto area of the Umbrian valley. The assessment relates to the qualitative traits of water, which is linked to human activities. In particular, the concentration of nitrates in the Spoleto area in the years 2005 to 2006 was insignificant or non-existent.

(III) Natural disasters

Seismic risk factors

The whole area of the municipality of Spoleto – with reference to the “basic seismic hazard degree” – is considered an high seismicity area (level 1). Spoleto is one of the towns of the Apennine and pre-Apennine belt which were most hit by the earthquakes that took place in Umbria from September 1997 and June 1998. The most recent high-intensity earthquake (magnitude 5.8) took place in September 1997 and showed the effectiveness of the consolidation work carried out in the basilica of San Salvatore in the 90s; no structural damage to the church was identified. The latest earthquakes have led to the reconsideration of all spatial planning activities, with greater attention devoted to the prevention of seismic risk. The main objective is to the minimum the negative effects through preparation, coordination, appropriate equipment, knowledge of the territory and the related risks. The Provincial Civil Protection Plan (adopted by the provincial council in the 12th July 2006 session with No. 72) governs the management of emergencies and risks related to seismic, hydrogeological and meteorological events, forest fires, accidents at industrial plants, also with regard to the safeguard of the cultural

heritage. The town planning scheme envisages that all construction work has to be subject to the compliance with seismic legislation: all design work needs to be based on specific geological studies and comply with the national provisions related to building adaptation and/or improvement to counteract seismic risk factors. Contributing to the development of measures to protect buildings in the historic town centre from seismic risk was exactly the objective of the Community project “S.I.S.M.A.” (Integrated system for the protection of historic buildings from and the prevention of risks), promoted by the Umbria region, as the leader region, in the framework of the Community programme Interreg III B. Lastly, the Perugia “Bina” observatory, - one of the oldest observatories in Italy, - is studying a complex system made up of devices including sensors and computers, able to prevent or mitigate the negative effects of high-intensity earthquakes, if placed in strategic places”. Hydrogeological risk factors This type of risk factors is an important component of territorial management, which has characterized the history of the Spoleto valley since antiquity and has led to the plain reclamation and the reconsideration of the water supply network, drainage canals and finally of the embankments, which are still up and running today. A flood of the Tessino river, the only river flowing by the Spoleto urban area, could not possibly hit the church of San Salvatore, which stands up on a hill. Fire risk factors Up to now, no anti-fire systems have been installed in the basilica of San Salvatore; the caretaker lives there and can immediately inform the Fire Brigade, which is less than a mile away, in case of necessity. However, in view of a more intense tourist flow and the consequently of a higher fire risk, the municipality of Spoleto is developing the necessary measures to install an

appropriate anti-fire system on the site (see management plan).

(IV) Tourist pressure

Spoleto has been a place of transit for years and is known all over the world as a city of art and the City of the Festival. Its image was enhanced in 1958 when the Festival of the Two Worlds was founded and therefore with the inclusion of Spoleto in the national and international tourist circuits.

The intense tourist flow (the number of registered guests in the tourist accommodation facilities amounted to 187,645 in 2008), which is of seasonal nature, with peaks in summer and on holidays, has led the municipal authorities of Spoleto to implement measures to improve tourist hospitality, rendering tourism the most vital and thriving sector of the town's economy. However, tourism in Spoleto has not posed any risks related to the damage and the deterioration of the historic, artistic and architectural heritage so far; with regard to the basilica of San Salvatore, in particular, it is off the beaten tracks and consequently the tourist flow is very modest.

6.3.5 CAMPELLO SUL CLITUNNO

The Clitunno Tempietto is in a good state of conservation. It has been subject to several recent interventions which guaranteed its correct conservation. In particular, the last intervention was structured in a series of operations which concerned both external and internal areas, i.e. both stone and fresco surfaces.

At the moment, however, there are slight signs of damage which will be fixed with the next maintenance intervention. In particular, damage is mainly related to moisture – both due to capillarity and condensation – caused by the environmental condition which the building is exposed to, i.e. it partially leans against an earthen wall. For this reason, in the past, a perimeter drainage system and a meteoric water

drainage system were created; however, moisture is still present, especially in the northern wing, along the external part of the apse's plinth, where capillarity has caused some biological patina, such as moss and efflorescence.

On the stone surfaces of the southern side, the door jambs and architraves and near the pronaos, there are some localized heterogeneous deposits, rare encrustation and dark stains; heterogeneous deposits are also present on internal surfaces. Especially on the plinth, some parts of stone material are missing. Localized disintegration of the mortar bed of stone ashlar is visible in some areas both on the external and internal surfaces of the building.

From a structural point of view, there are no stability problems. At the

moment walls are linked to old iron structures which proved to have good resistance against seismic activity (the last intense earthquake took place in 1997).

As to frescos, the last intervention restored the intelligibility of paintings with no intervention on chromatic reintegration, unless by light watercolour veils.

The terracotta-tiled floor is in a good state of conservation and needs only little maintenance.

The monument is constantly monitored by the competent Superintendence.

MAIN RISK FACTORS

(i) Development factors

Risks relating to rural context transformation

The risks coming from urbanisation are

The Tempietto Clitunno

rather limited as the entire area is subject to various environmental restrictions, and the Campitello sul Clitunno building programme observes historical and architectural sites in the area. The population is also rather sensitive to conserving cultural heritage, which is a positive factor for limiting risks.

Antropic risks related to theft or vandalism

Up to now, no event connected to human presence (theft, vandalism) such as to give rise to serious risk factors for the Tempietto has occurred. The property is however protected by a fence, a video surveillance system and an alarm system which is active 24/7. During the day, the building is also guarded by custodians who are equipped with phone connection.

Industrial risk

In November 2006, in the industrial area of Campello, located upstream of the River Clitunno which flows close to the Tempietto, a serious accident occurred, causing a considerable fall of oily material into the draining system of the area and later into the river thus creating deposits on the banks and having a sizeable impact on surrounding areas. Immediate interventions for the safety of the area prevented major damage and thorough reclamation operations promptly started.

To avoid similar events in the future, a new main sewer was linked to the plant where the accident occurred and another sewer will be soon created in order to drain industrial waste from the concerned area.

(ii) environmental risk factors

Air and acoustic pollution

Owing to special environmental conditions, atmospheric and acoustic pollution in the Tempietto area can be considered virtually absent.

The only source of pollution, though modest, is the Flaminia trunk road. However, the recently-built dual carriage way Spoleto-Perugia, with the consequent redistribution of heavy goods vehicle traffic, considerably reduced the risks linked to the presence of the trunk road. In addition to this, the Municipality of Campello sul Clitunno is carrying out a far-reaching project which aims at enhancing the entire area and eliminating the historical route of Flaminia, parallel to the trunk road, which passes just a few meters away from the apse. Even though this road is used only occasionally, this project will contribute to improve the exposition conditions of the property.

So, no particular risk factors connected with environmental pollution can be found in the site and context (buffer zone), as the Buffer zone is at a distance from the production activity. The main reality that is present is the Industrial Area about 4/5 km as the crow flies from the Temple, before the River Clitunno that laps the monument. The results of chemical tests carried out have shown that the River Clitunno has a certain degree of pollution connectable to the various agricultural, industrial and tourist activities that are present in the surrounding area. This pollution, however, is rather slight. On the other hand, the high number of groups of hydrophytes found in the Clitunno during inspections carried out prove that the river facies has been well preserved.

(iii) natural disaster

Risk of earthquakes

The territory of the Municipality of Campello belongs to area 1, which corresponds to a “high seismic” area, according to the O.P.C.M. (Prime Ministerial Decree)- Civil Protection Department no. 3274 of 20 March 2003 “general criteria on the seismic classification of the national territory

and technical regulations on building in seismic areas”.

Seismic events – which hit the areas at intervals of around 20 years – are the most dangerous source of damage for the monument. The monument was not damaged by the earthquake of 1997, of magnitude 5.8., which proves that the building has good resistance against seismic activity; however, in order to minimize the risk, along with a thorough analysis of its structure and the verification of its reaction to seismic events, it would be important to carry out an analysis of the slits so as to plan the installation of anti-seismic devices.

Hydrogeological risk

With regards to hydrogeological risk, there is no risk of overflow of the River Clitunno as the river runs at a lower level than that of the candidated heritage, while the entire rock wall of the mountain above the Temple has been made safe by the positioning of a rock-protection steel net.

Risk of fire

Within the area, near the ticket office, there is one fire extinguisher. The existing video surveillance systems allow constant monitoring of the building.

Near the deposit/ car park of the Municipality, there is a vehicle equipped with all devices needed in case of a fire. The nearest Firearm station is located in Spoleto (around 13 Km).

(iv) visitor/tourism pressures

Tourism pressures

No risks linked to tourism are reported on the Tempietto. Although the building is very small, the area in which it is located has great open spaces and walks with a good capacity. The number of tourist groups is always set in advance.

6.3.6 BENEVENTO

THE SITE

The monumental complex of Santa Sofia and the single monuments composing it are in a good state of conservation and no serious deterioration process urging intervention is reported.

Starting from the restoration conducted in the 50s of the 20th century, the site was subject to a number of conservation and requalification projects and interventions which aimed at providing an adequate response to functional needs (both worship and tourism needs) and sought to counter possible signs of wear due to use.

In particular, the property was included in an organic intervention plan in the years 1991-2000 - preceded by thorough studies and stratigraphic archeological surveys concerning the Cloister court, hypogeum surfaces and ancient walls. Interventions, carried out according to the most modern criteria in the field and the highest qualitative standards, allowed to enrich knowledge on the monastery thus shedding light on the different phases the monumental complex went through:

an hypogeum environment which could belong to the Longobard age was discovered;

the reservoir/ cistern belonging to the internal court of the Cloister was explored and drained thus retrieving ancient stone and ceramic material belonging to the phases the Cloister and the Convent went through;

the construction phases of the Cloister were elucidated thanks to the discovery of the Plan for the placement of columns dating back to the period before the restoration – carried out during the Orsini period (XVIII century) – and of some reused Roman inscriptions;

the monastic and aristocratic necropolis was discovered; it is located under the terracotta-tiled floor in the Cloister and

its material will be exhibited in the Museum which is now being renovated. In particular, as far as the state of conservation of the Church of Santa Sofia is concerned, the macroscopic analysis of the different surfaces and walls did not reveal any specific decay

conditions. The valuable parts in stone material (capitals, plinths and columns) show a slight alteration of the surface caused by small deposits; on plinths small gaps and some inadequate reintegrations were detected. The frescos on the lateral apses show only limited

Detail of a reimployed capital

damage, which is especially related to aesthetic aspects. Modest portions of the internal plaster finishing layer – dating back to the 50s – have partially come off on the bottom of counter-façade and external walls.

The modern floor made of travertine shows scarce care in laying slabs especially in the areas where column and pillar plinths are placed.

On the façade there are partial loose portions of plaster located at the septum bottom next to the entrance, while along the plinth of the main prospectus and the S-W prospectus all-pervading moisture traces can be detected.

The state of conservation of the cloister is generally good. There are only limited problems due to humidity on spouts caused by the flow of

meteoric water from upper terraces: in particular, some biological alterations and surface deposits – more or less homogenous – are reported on stone elements (pulvinos, cornices and arches).

On small external walls supporting cloister columns, more substantial damage on plaster can be detected.

In order to solve the abovementioned problems, a new intervention is about to be launched. It will be completed within the middle of 2008 and is aimed at cleaning stone elements and at improving the layout of church frescos, besides the requalification of the complex's modern finishes (plaster and flooring), including the revision of plants, in compliance with the typological and architectural characteristics of the monument.

THE BUFFER ZONE

The town walls that surrounded the Roman and the Longobard city partially coincides with the perimeter of the *buffer zone*. From the 18th century to the start of the 20th century the walls underwent demolition and some parts were incorporated into the perimeter walls of residential buildings. It is important also to remember the damage from the Second World War bombings. For this reason different parts of walls present unequal state of conservation.

The best conserved part -coinciding with proposed boundary of *buffer zone*, delimiting the ancient Trescene quarte, needs no maintenance intervention, thanks also to the conservation work carried out in the 1990s by the

Re-used materials on the bell-tower of the Cathedral recently the object of conservation interventions

Archaeological Office of Ministry for cultural heritage and activities.

Some conservation problems affect the north-western part instead; it is the part running from the ancient Trajan's Arch to the bridge over Calore river, then from *Port'Arso* -along Via Torre della Catena- up to the convent of Orsoline Nuns. This section of town walls present the most of circular and quadrangular towers, almost all well preserved. The main conservation problems are related to the presence of shrubs and roots, flourishing into the masonry joints, and to the decay of mortar, which is the cause of crumbling phenomena and rainwater infiltration. Moreover, the circular tower along Via Torre della Catena -an important Mediaeval fortification structure- needs static consolidation works (patching and mortar injections) because of severe damage dating back to World War bombing raids.

Maintenance and conservation works are being carried out (2006-2007) on the wall section which has not been restored yet, with funding from *POR CAMPANIA Misura 5.1* (Regional Operative Programmes - EU Programme), as part of the local Integrated Programmeme, at a cost of 2 million €. The work involves manual weeding, careful removal of modern plaster, disinfectant biocidal treatments, creation of sacrifice surfaces on wall tops, consolidation of joints, recovery of small portions of wall decoration, cleaning of despoiled stonework in several parts of the walls.

The Rocca dei Rettori complex, headquarters of the Provincial Council and of the modern history section of the Provincial *Museo del Sannio*, is in an excellent state of conservation. In 2006, the Caserta Heritage Office of Ministry for cultural heritage and activities carried out a conservation and restoration project by means of CIPE funds (Employment Investment Programmes). The following activities were carried out prior to the

works: geognostic surveys, subsoil archaeological explorations, stratigraphic archaeological investigations, modern plaster removal, cataloguing of stratigraphic units of original parts of the building enabling to raise the cultural value of the complex. The intervention made all signs of the oldest phases visible, returning the monument to the 18th century fortress-palace look. The purpose of reorganization of internal distribution system, compromised -by repeated rearrangement of the rooms- aimed at defining a tourist itinerary along the front courtyard.

The church of Sant'Ilario at Porta Aurea (*Ecclesia vocabolo Sancti Ylari*) is in an excellent state of conservation; only some efflorescence phenomena can be noticed on a few internal surfaces of walls. After deconsecration in 1712, the church was used as a farmhouse. During intervention works carried out after the 1980s earthquake, some mudbrick work structures from Roman times and some Late Medieval burials were found.

In 2000, while conservation works on Trajan'Arch -that is in front of the Church of Sant'Ilario- were being completed, intervention on the church started and archaeological excavations were continued, using available funding from Italian Lottery; the whole work aimed at creating the Trajan'Arch Park with related Museum in accordance with the agreement between the Ministry for Cultural heritage and activities and the Province of Benevento.

The archaeological investigation allowed an articulated stratigraphy -from the Roman era down to the modern age- to be brought to light, and the longobard *facies* of the church to be enhanced. The Archaeology Office set up the museum accomodation inside the Church.

The Church of SS. Salvatore is in an excellent state of conservation. The last conservative intervention, conducted by

the Archaeology Office, dates back to 2006 and involved the façade, the internal structure and frescoes. During works also archaeological excavations were carried out, which allowed to bring to light some burials, including Longobard ones, together with other important findings.

The crypt of the Church of San Marco ai Sabariani, of Longobard origin, has been recently discovered during urban digs for public works; the crypt and its fresco decoration are in an excellent state of conservation. The municipality, in partnership with the local Archaeological Office and Heritage Office of the Ministry, has developed a conservation project which will make possible structures to be left in its original location, visible to visitors. Frescoes are being the subject of in-depth studies.

Benevento Cathedral is in an excellent state of conservation. It underwent a reconstruction work following the 1688 and 1702 earthquakes, when it assumed the form that it more or less retained until it was completely destroyed in 1943 during the Second World War. Only the Romanesque façade and the bell tower survived the severe damage.

The structure was completely reconstructed in the decade 1950-1960, according to the designs of architect Paolo Rossi De Paoli. Over the years, it has undergone several maintenance and conservation works. The most recent intervention involved also the archaeological excavation of the layers below flooring level; this activity -still on-going- has been allowing to discover numerous structures belonging to different phases in the building's history.

The built-up area - Despite the numerous transformations and violations, the *Trescene* district -the Medieval quarter which was the heart of the Longobard city and in which is located the monumental complex of the Church of Santa Sofia with

annexed *Museo del Sannio* – is the best preserved area in the whole historic centre: the street layout still consists of narrow streets, underground passages and open spaces with furniture homemade' shops (once a flourishing activity in Benevento).

However architectural requalification is needed for building fronts, in accordance to general provisions of the Benevento 'Piano Particolareggiato' (detailed Urban Development Plan), which holds in due consideration the safeguard of the numerous re-used *spolia*, and the no-built areas.

The south western end of the historic centre, delimited by the Longobard walls, is the oldest part of the city, and is characterized by the presence of Roman theatre. In addition to the area between the walls and the *Duomo*, significantly marked by the events of the World War, it is the area where the urban and architectural decay is still elevated and the urban landscape appears desolate.

However the Municipality of Benevento is carrying out an important Programme aimed at requalifying those degraded areas of the city and at improving the standard of living of the population (see Conservation Plan and Enhancement Plan).

MAIN RISK FACTORS

(I) Development pressures Risks relating to urban context transformation

The Site - for which the inscription in the World Heritage List is requested and the relative *buffer zone* – are located in the historical centre of the city of Benevento and are therefore properly protected from any possible alteration (demolition, reconstruction, new buildings, incorrect use of buildings, etc.) which could reduce their authenticity and integrity.

Antropic risks related to theft or vandalism

As to the human-related damage caused by thefts and vandalism, no damage has been inflicted to the property in the last few years. The special location of the complex in the historical centre – which is always kept under strict surveillance by law enforcement forces –, along with the sensibility shown by the local community, do not give rise to concerns for the future.

The Church, during working time is controlled by the Parish staff.

The Cloister, which is part of the complex of the Museum of Sannio, takes advantage of the surveillance system of the latter: in the Museum 7 guardians work (one is present day and night at the Museum), a chief-guardian and two policemen of the Province who are assigned high-surveillance tasks. The surveillance staff is integrated with more staff of the Provincial Police when necessary, as, for example, during exhibitions or temporary events.

During the day, the Cloister and the Museum are also protected by a drop-down alarm system for the finds and by a closed-circuit television system connected to a recording plant (TVCC) which controls internal and external areas. As for night hours, the Museum is equipped with a sensor night alarm system, connected to the Command Centre of the Carabinieri of Benevento. If maintenance is needed or if the alarm system does not work, external night surveillance is provided by Provincial Police.

Risks related to terrorist attacks

After 9/11, Santa Sofia, as many other Italian cultural sites, is protected with particular care and surveillance, as envisaged for certain sensitive targets. At the moment the risk is rather remote; in any case, visitors are asked to deposit their bags, rucksacks and suitcases in the Museum.

(II) Environmental pressures

Damage due to environmental (atmospheric, ground, electromagnetic, radioactive, etc.) and acoustic pollution appears rather limited, although the site is located in the urban centre of the city. The monumental complex which is part of the ancient centre of the city, overlooks the main street of the city (Corso Garibaldi), which is a pedestrian area and thus completely banned to cars.

(III) Natural disaster Risk of earthquakes

The territory of the city of Benevento belongs to the level 1 area, which corresponds to a "high seismicity" level according to the Prime Ministerial Ordinance - Civil Protection Department no. 3274 of 20 March 2003 concerning "general criteria on the seismic classification of the national territory and technical regulations on building in seismic areas".

In the past, this area was hit by violent earthquakes; the complex of Santa Sofia itself was considerably damaged owing to particularly violent earthquakes which hit Benevento at the end of 1600 and again in the XVIII century. However, conservation and seismic adjustment interventions carried out both in the church, in the Cloister and in the new Museo del Sannio building – besides the constant static monitoring conducted by competent bodies – guarantee a high-level resistance to earthquakes. The area was hit in the 80s by a high-magnitude earthquake which did not cause any structural damage to the monumental complex.

Moreover, the staff responsible for security in the Museo del Sannio was purposely trained in following the procedures in case of an earthquake. The complex is also provided with a sign system in compliance with Law 626/94 on Civil Protection conduct

(security regulations, indication of Evacuation Routes and Evacuation Plan).

Risk of fire

The Cloister of Santa Sofia and the Museum of Sannio, renovated with fire-proof material are equipped with the following security devices:

Smoke detectors

Portable fire extinguisher (pressurized, renewed every six months)

Fire hoses

Fire sign system in compliance with the Law (626/94)

Arrangement of Evacuation Routes and Evacuation Plan

As to the church, inflammable items are rather limited (the only inflammable materials are the benches, the confessionals and the entrance inner door); in addition to that, votive open-flame lamps are used in very limited numbers.

(IV) Visitor/tourism pressures

Tourism pressures

The Cloister of Santa Sofia and the Museum of Sannio, thanks to a specific policy which extended normal working hours, welcomed twice the number of visitors in the last three years (from 9000 to 20.000 visitors). Nevertheless, no sign of wear is reported on the properties which could welcome an even greater number of visitors thanks to all-day opening (6 days out of 7, from 9 am to 7.30 pm) and to the wide exhibition area (1500 mq). In any case, for temporary exhibitions or mass cultural events, controls are increased and visitors are spread into groups so that the number of visitors does not exceed 50 in the Museum and 80-100 in the area of the Cloister at a time.

Analogous control measures for the Church of Santa Sofia are being studied for future enforcement. An agreement between the Diocese and the Province of

Benevento on integrated management of the areas is under way.

Also, as to the *buffer zone* proposed for the site, which would correspond to the extension of the Longobard city – current historical centre – and taking into consideration the dimension of the area where the properties are located and the current development level of accommodation facilities, tourism flows will not cause negative consequences in future years.

6.3.7 MONTE SANT'ANGELO

THE SITE AND THE BUFFER ZONE

The city wall, dating back to Norman times, is within the proposed buffer zone and comprises several sections in varying states of preservation. The stretch that runs to the south of the monastic complex of San Francesco is the most consistent section. Preservation varies from section to section but, on the whole, the wall is in good condition and does not require any stability or structural interventions. The main problem is represented by vegetation that has infested, to different degrees, various sections of the wall causing deterioration of the stonework and mortar. Moreover, disintegration of

the cover is leading to water infiltration. On the one hand, an in-depth study of the wall is necessary to examine the phases of construction and transformation through an analysis of the layers; on the other, a detailed survey of the decay should be carried out to be used as a basis for a maintenance programme taking into account the various priorities.

The architectural sites within the buffer zone present different degrees of preservation.

The castle, which has already been subject to restoration and consolidation works in the past, is currently undergoing new recovery works. The main guidelines consist in the conservative restoration of the east and west towers and the south face, in a new definition of the utilisation

levels of the "Piazza d'Armi" zone, in the recovery of the spaces at the first level and repair of the exterior.

As far as the religious complex of Santa Maria Maggiore is concerned, the Battistero of San Giovanni in Tumba is undergoing restoration works. The church of Santa Maria is in good repair: recent works have been carried out inside, and have also involved the covering of the nave and the façade with portal.

The remains of the church of San Pietro are also in reasonably good condition.

The churches of San Salvatore, Santa Apollinare and the Eremo di San Aniello, privately owned and therefore not currently open to the public, are in need of preservation works. Since these are private properties, a verification must be carried out in order to implement public-private co-financing formulas aimed at preserving the buildings and making them accessible to the public.

The former Cappuccini Monastery, which is now a rest home for the elderly, is in good condition thanks to the restoration of the north-west face and the church and monastery roofs. The complex of the Clarissas is also in fair condition whereas the façade of the church is in need of conservation and restoration.

The monastic complex of San Francesco is undergoing systematic recovery works aimed at the optimum exploitation of this asset. Consolidation of the church's supporting structures is currently being carried out. The conditions of the bell tower and the east wing of the complex, however, require the scope of the works to be expanded.

MAIN RISK FACTORS

(I) Development Pressures

Risks relating to urban context transformation

The effectiveness of direct limitations, controls and constant monitoring of the structures of the sanctuary and of all its elements does not allow for

Conservation works on San Francesco complex

possible interventions (demolition, reconstruction, new buildings, incorrect use of buildings, etc.) which could reduce their authenticity and integrity.

Antropic risks related to theft or vandalism

Up to now, no event connected to human presence such as to give rise to serious risk factors has taken place. The sanctuary is, however, constantly guarded by appointed staff, in charge of day-time surveillance on the whole area, and by an intruder alarm system. Moreover, the presence of the order of *San Michele* fathers on the premises is another direct method to supervise the property.

Risks related to terrorist attacks

At the moment this risk is rather remote. However, during the most important religious events, Monte Sant'Angelo and, in particular, the area of the sanctuary are included in the list of the sensitive targets where the prefecture of Foggia imposes the systematic presence of law enforcements forces in support to the local *Carabinieri* Station and the municipal police, who provide daily surveillance to the tourist areas of the city.

(II) Environmental Pressures

Air pollution

There is no atmospheric pollution in the area of the sanctuary, neither due to local nor indirect factors. The city of Monte Sant'Angelo enjoys a particularly

favourable microclimate, thanks to its geographic position on a mountain crest which is natural border and thus a meeting point of two different climatic areas. The first area stretches from SE to SW, including the Gulf of Manfredonia and the plain at the foot of Gargano's Tavoliere delle Puglie; the second, stretching from NE to NW, is characterized by a vast mountainous area covered with woods and forests stretching beyond the Carbonara valley. This causes a substantial exposure to climatic variability which is characterized by the total exposure of the city to all air currents of the compass rose which guarantee continuous clear air throughout the year. Moreover, there is no intense traffic which could damage or threaten the

Tomab Rotari. The high dome of the so-called "Tomba di Rotari" recently restored

structures of the sanctuary. However, in the busiest days, the sanctuary is included in the pedestrian area and in the limited traffic area as established by the town Council with specific provisions.

(III) Natural disaster

Risk of earthquakes

The entire Municipality of Monte Sant'Angelo is included in the classification pursuant to the regional Council decree no. 153 of 0 /03/ 004 and is therefore considered a -level seismic area in a four-level scale in descending order. The Gargano Promontory is covered by seismic currents which originate from a complex network of faults. The seismic activity recorded on the long term in the Gargano Promontory is the main reason for the continuous attention and monitoring of the territory by the national institute of geophysics, which is implementing a local reading system with the installation – in the municipality of Monte Sant'Angelo and in suburban areas – of technological instrumentation able to record and transmit the data in real time regarding the slightest seismic activity. This is followed by specific correspondence between the national institute of geophysics and the municipality's technical office in order to assess the impact on the territory. The immediate signalling allows continuous monitoring of the sanctuary. This is carried out by town experts and, when and if necessary, also by experts of the Fireman service, by Civil protection staff and by the technical staff of the superintendence. At the moment, according to the historical data regarding seismic events which hit the site, the high seismic risk in the areas corresponds to a good resistance of the architectural structures composing the monument, since, in the history of the sanctuary, there has been no earthquake which caused serious damage or collapse to load-bearing walls. In any case, following the intervention operations on

the occasion of the Jubilee in 000, all routes open to the general public within the sanctuary are equipped with technical devices and specific signs indicating the escape routes, purposely created for emergencies. Moreover, all members of staff operating in the sanctuary, both employed and volunteers, are duly trained to manage any kind of emergency.

Risk of fire

Within the structures of the sanctuary, all routes open to the general public are regularly equipped with technological systems to signal fires and to extinguish them. The rooms which are not open to the public are in any case provided with an electric system in conformity with the law and are adequately isolated with fire-resistant doors from the areas open to the public. The main structure of the complex of the sanctuary, corresponding to the covering of the cave, is adjacent to a modest green area which is well-kept and fenced. Its access is regulated and in any case it is not included in the areas with free access to visitors: all these factors prevent any potential fire risk which could be caused by the presence of this green area. Public roads around the site are provided with several fire hoses to be used in case of fire.

(IV) Visitor/tourism pressures

Tourism pressures

Tourism and pilgrimage flows do not represent any form of threat to the sanctuary. The recent redistribution of spaces and the rationalization of differentiated routes, managed under the direct surveillance of the superintendence of Bari and realised thanks to state funds supplied on the occasion of the Jubilee, aimed at protecting the property. The intervention consisted in: creation of routes for people with special need; creation of escape routes equipped with adequate emergency signs; creation of areas external to the sanctuary system and creation of a wide place of penance

which allowed the protection and enhancement of underground structures, as well as the creation of routes and exhibition spaces connecting the original centre of the sanctuary to the accommodation centre "Casa del Pellegrino" (pilgrim's House). These works, carried out with no demolition and / or distortion of original structures, made it possible to increase the level of usability of the sanctuary and the services, since, in the new area annexed to the original area, 3 highcapacity lifts, internal routes connecting the new library, the devotional museum, the lapidary museum and the Conference Hall are now available to visitors. This new circulation system was placed on pre-existing natural openings in the cave's access system; already in the past, these openings represented a connection point between the Angevine stairs and the external secondary and isolated areas, which could not be used earlier. Tourism impact on the property, though considerable owing to pilgrimage flows, does not entail any risk condition for the structures of the sanctuary. Moreover, no promotional or religious tourism management strategy which could represent a threat to the monument, was adopted, since the mystic atmosphere is the main attraction factor. Recent intervention introduced new escape routes in the sanctuary which are absolutely sufficient to guarantee safety to visitors in case of evacuation due to critical events. The critical collocation of the lapidary museum required the control of visitor flows which was guaranteed by guided tours, upon request of a limited number of people. The continuous and vigilant presence of volunteers in all internal routes guarantees efficient assistance to visitors. Lastly, a thick network of close circuit camera ensures, along with surveillance on the property, constant control on possible critical events of different nature.

6.4 PRESENT LEVEL OF ENHANCEMENT

6.4.1 CIVIDALE DEL FRIULI

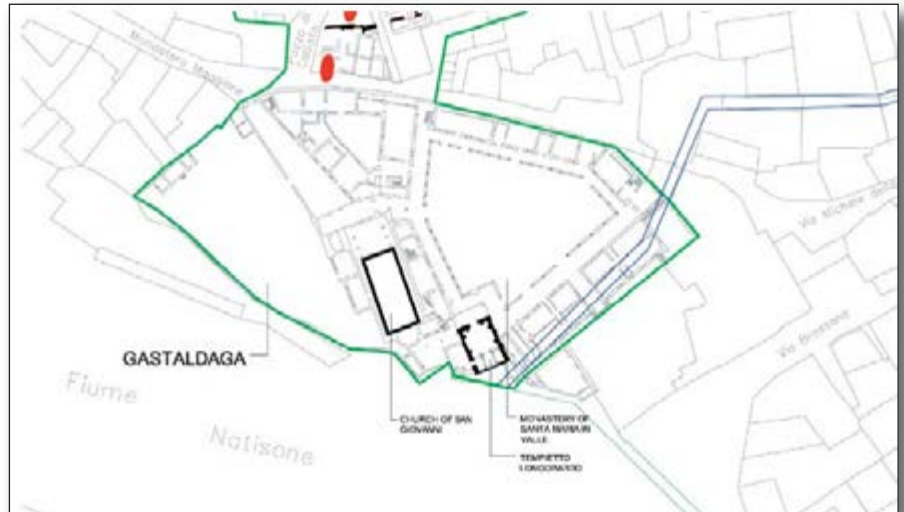

THE SITE

The current level of enhancement of the properties applying for Unesco World Heritage List is connected to the opportunity to visit the Tempietto Longobardo, the Christian Museum, the National Archaeological Museum (furnishings of the Longobard necropolis) and ruins of the Patriarchal Palace.

At the moment, there are three main monuments in town belonging to various owners and thus autonomously managed and characterized by a different level of enhancement.

As to the use of the complex of Gastaldaga, the Tempietto Longobardo is open to the general public, yet it is not provided with an adequate presentation system. Moreover, it is disadvantaged by a decentralized access system and overlapping tourist inflows and outflows.

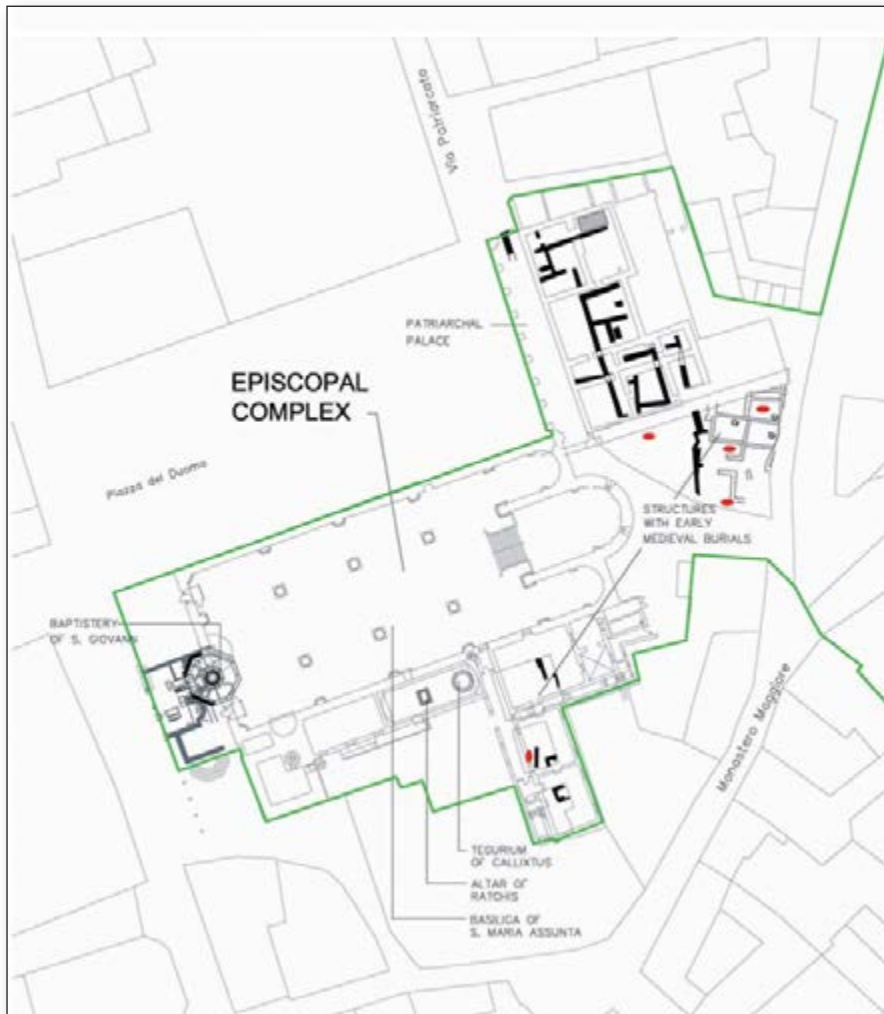

The Monastery of Santa Maria in Valle with the Tempietto Longobardo and the Church of San Giovanni

View of the cloister of the Monastery

View of the Monastery of Santa Maria in Valle

Map of the Episcopal complex

The Altar of Ratchis and the Tegurium of Patriarch Callisto in the new exposition of "Museo Cristiano"

The Monastery of Santa Maria in Valle, instead, is closed to the public, with the exception of the most recent part of the complex, where the Art History Specialization School is located. The Monastery, as well as the Church of San Giovanni located inside it, can therefore be visited only upon request. This tends to increase the isolation of this extraordinary complex from the centre of the town. It should be included in a more structured visit route which could enhance its role as hub of the town.

In the Episcopal Complex, the Duomo is always accessible, being a place of worship; the Christian Museum where the Ratchis Altar and the Font of Callisto are exhibited was closed for two years for restoration: a new layout and a broader museum offer enhanced by new didactic elements will be provided.

The Archaeological Museum, whose layout dates back to a general restoration and enhancement intervention of 1990, is provided with information boards only in Italian. There are no bookshop services. The underlying archaeological area with the ruins of the Patriarchal Palace of Callisto apart from the construction of covering structures near the Provveditori Palace has never undergone enhancement interventions. However, the area can be visited by the general public upon request.

The abovementioned complexes have two separate ticket offices and a different level of promotion: the data on tourist flows show that when visitors arrive in Cividale they choose different routes to visit the sites.

From the perspective of the museum, it is necessary to rationalize exhibition and visit methods of the Longobard artefacts which are currently distributed among the various premises of the Archaeological Museum and the Christian Museum and partially the Convent of Santa Maria in Valle.

The artistic and historical value of these

The facade of Proveditori Veneti Palace (National Archaeological Museum)

artefacts has been widely recognized; these are: the remains of the tomb accoutrements of aristocratic Longobards who were buried in San Giovanni; the Early-Medieval stone fragments of the liturgical furnishing of ecclesiastical buildings of the complex of San Giovanni and of the Tempietto; the Medieval frescos which flaked off in the Tempietto. The objectives of the Enhancement Plan, for the properties included in the Site, are the following:

- A coordination system for the overall museum offer;
- The requalification of the Monastery of Santa Maria in Valle and the strengthening of the role of the Tempietto Longobardo in town and in tourist routes;
- The improvement of visit and presentation potential of the archaeological area of the Patriarchal Palace.

Gold elements of furnishing from Longobard burials discovered inside the Church of San Giovanni in Valle

8th century marble relief from the Church of San Giovanni in Valle

The exposition at the National Archaeological Museum

The objectives are interlinked: the creation of a coordination system for the overall museum offer is based on two main projects; the new “Museum of the Tempietto and Monastery” envisaged in the context of the requalification of the Monastery of Santa Maria in Valle with relative thematic specialization of museum offer of the Archaeological Museum and the Christian Museum; the rearrangement of visit routes to the site of Cividale through the creation of the Combined Ticket and a Visit Centre in the areas of the Monastery which allow the rationalization and management of tourist flows.

THE BUFFER ZONE

The urban fabric of the town characterized by a good exploitation of spaces consists of many monuments and important places. However, there are some important architectural structures, such as the urban and quarters' walls, the churches of the Longobard aristocracy and the gorge of Natisone River, whose historical and landscape

value risks not to be enhanced enough because of the lack of specific thematic routes connecting them which reduces their visit potential.

The wall system of Cividale includes the urban walls enclosing the town during Roman and Early-Medieval times and the walls enclosing the four quarters. The remains of the walls of the first circle are now visible only in some areas of the town as archaeological ruins and as wall sections included in more recent buildings while its possible development is documented both by historical sources and by excavations carried out during different periods of time. At the moment, the archaeological area near Craigher Canussio Palace is the only one which can be visited upon request. Moreover, it is difficult to detect all visible sections of the first circle of walls, as well as the structure of the whole ancient circle with no specific didactic support. The second circle of the quarters is still preserved in a number of fairly large sections and is mainly developed in height. It is present on both public and private territories to the

An example of medieval building

detriment of visitors, because the most significant areas see Borgo Brossana are located on private territories.

The churches of the Longobard aristocracy, in some case founded by the Longobards or anyway used as privileged burial places, such as San Giovanni in Xenodochio, Santa Maria di Corte, San Salvatore (now San Silvestro) and San Martino, have been subject to changes in the architectural structures to such an extent that it is now impossible to detect the Longobard presence with no adequate didactic support.

The so-called Ipogeo Celtico, inserted within the visiting itineraries of the town, is of particular charm and mystery. It is a cave that has been excavated in the layers of the Natisone benches, characterized by a central space, sustained by natural columns, in which big masks have been carved. Some suggest the place be connected to ancient rituals, which may have maintained its function till the Longobards. The knowledge on this site is yet to be deepened, yet it greatly beckons the visitors.

As for Natisone River, which for its

The so called "Ipogeo Celtico"

width, geomorphologic features and collocation is one of the most important elements which characterize the territory and in particular its Historical Centre, lacks scenic routes and adequate lighting systems which could enhance its natural and monumental heritage.

The current level of enhancement of the Historical Centre of Cividale del Friuli, from an urban point of view, is satisfactory as to the continuity of maintenance interventions and operations to improve the quality of spaces which have been carried out in recent years, also thanks to post-earthquake funding. This intervention policy must be pursued so as to improve the urban and architectural layout with special reference to streets and squares. The objectives of the Enhancement Plan for the buffer zone therefore aim at:

- creating thematic routes for the walls and churches thanks to the creation of adequate information and didactic tools;
- creating several scenic routes along the banks of Natisone River;
- improving the quality of spaces in the Historical Centre.

THE TERRITORY

Since the very beginning of the Longobard Duchy of *Forum Iulii* created in an area which was already well

organized and later just reused and adapted to new needs a strong process for the unification of Friuli started. This has led during centuries and especially during the period of the ecclesiastic principality of the Patriarchy of Aquileia to the creation of a regional, original and common culture which later gave rise to the Friulan culture.

Thanks to this spirit of unity and regionalism, considerable monumental, historical and archaeological evidence is

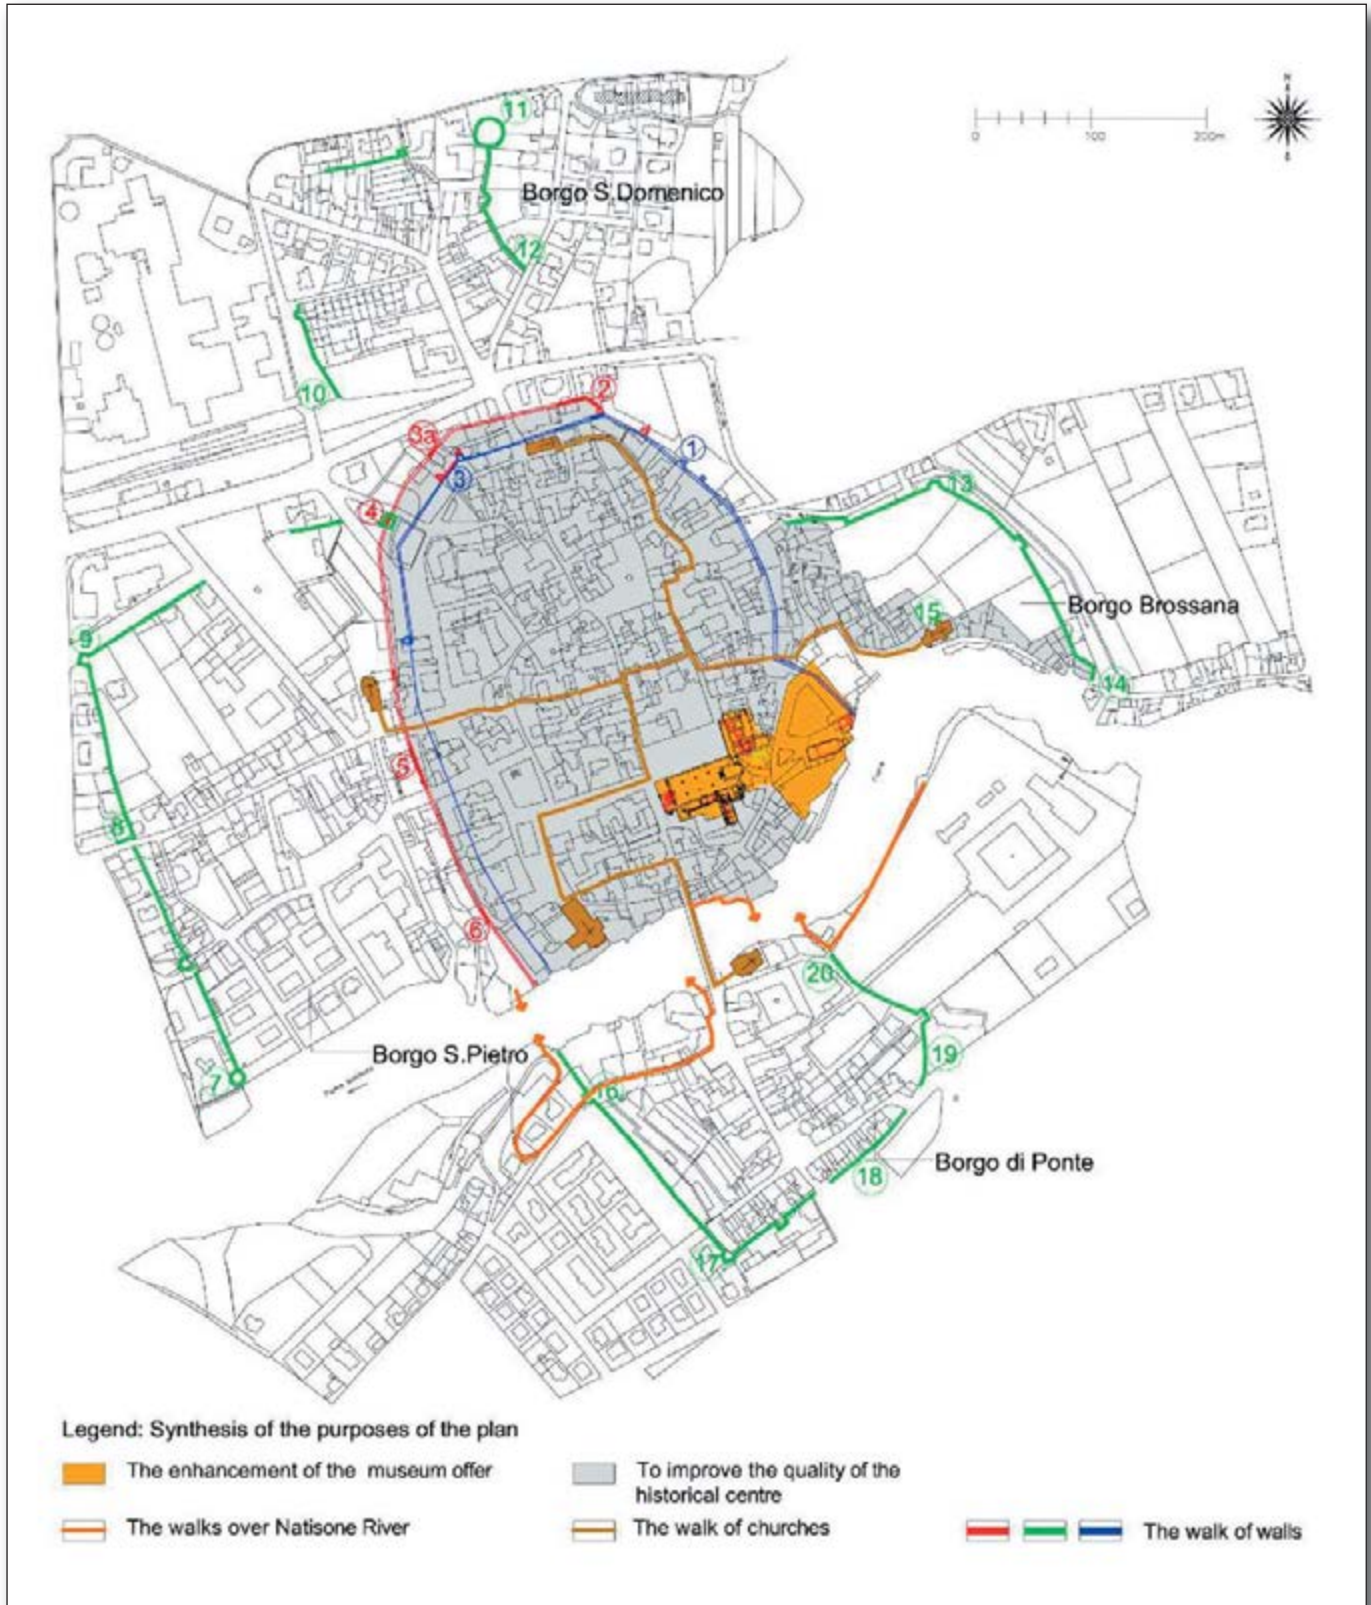

uniquely preserved in Friuli or is, in any case, present in great numbers so as to increase public awareness and improve visit potential.

These remains scattered over an area that goes from coast to mountains, and especially concentrated on the hills still appear to be disconnected and sometimes little known or even unknown.

In relation to the Longobard period, *castra* or fortified settlements are one of

View of the city from the Natisone river

Synthesis of the purposes of the ongoing enhancement plan

the most recurrent elements. A great number of data is now available on them, as are various use options, since many researches have been conducted in these sites. However, the lack of advertising or dissemination tools, as well as the unsuitability of information boards prevents them from being widely known, even separately. Since there is no point of reference, it is also hard to arrange a visit route among the various sites.

Moreover, the artefacts brought to light thanks to past excavations, which are important to reconstruct daily life and provide people with reference points so as to understand social structures, habits and usual activities belonging to a certain historical period, are usually kept in warehouses and thus cannot be seen. A first attempt to enhance the properties is now under way in Artegna, where

recent discoveries confirmed the existence of a fortified settlement in which clear elements of Early Middle Ages are preserved. For these reasons and for its central location in the system of relations with other sites, the settlement was chosen as the focus for an enhancement project regarding fortified settlements and Early-Medieval evidence in Friuli. The project for the definitive renovation of the Medieval castle, financed with funds from the Region Friuli Venezia Giulia, R.L. 10/2000 amounting to around 2,000,000 Euros, has already been launched: according to it, the castle will host along with the welcoming centre for the visit to the San Martino Hill and its ruins an exhibition area linked to the museum network projects for fortified sites, on the topic "The *castra* of Paolo Diacono and Early-Medieval Friuli". A

memorandum of understanding to launch this project was signed between the Municipality of Artegna and the Province of Udine.

Another enhancement project concerned the necropolis of Romans d'Isonzo. Generally, Longobard necropolis mainly composed by ground-level tombs cannot be visited because of their own nature, yet they contain exceptional artefacts which can hardly be collocated in situ. In Romans d'Isonzo, where archaeological researches are still under way, a permanent exhibition of discovered funerary accoutrements has been recently arranged. It allows visitors to contextualize the objects in the place where they have been found.

Another aspect concerning the enhancement of Longobard remains is related to other centres of art and power: churches and monasteries. Many

The hill of Artegna where Longobard castrum -noted by Paul the Deacon- was located

Crypt of Sesto al Reghena Abbey Church with the so called "Urna di Sant'Anastasia"

buildings of worship in Friuli probably have Longobard origins thanks to the presence of sculptural elements of the period which, in some cases, are of very high value. The artefacts are unfortunately little known, as is their value. The creation of suitable didactic tools in the context of a "route on Longobard art" will enable the improvement of knowledge on both single sites, and the history of the territory, thus allowing the reconstruction of ancient relations among the various areas characterized by the presence of the Longobards.

The increase in the enhancement and cultural offer is also needed for Early-Medieval monasteries and in particular for the Abbey of Sesto al Reghena. Here interventions, already promoted by the Municipality, led to the publication of several scientific and information books concerning the vicissitudes of the Abbey, but also concerned the recovery of vast portions of it and adjacent structures which now constitute a cultural centre of great potential, equipped with conference halls and laboratories, as well as a lodge offering accommodation. The strengthening of the cultural centre of the Abbey of Sesto al Reghena will be completed only with the creation of an adequate route including the entire complex, in particular the Urn of Sant'Anastasia. The route, for which a multimedia didactic tool will be created, will facilitate visits to the Abbey, as well as the understanding of its evolution and will have to be linked to other routes related to the Longobards in the Duchy of Friuli and the Early Medieval Monastery in Italy.

The creation of routes and the enhancement activity will benefit from the contribution of the single Municipalities of Friuli involved in the project as envisaged in the plan, as well as of bordering areas of Slovenia and the areas which are strictly linked with the arrival of the Longobards in Italy.

Map of the territory with Early Medieval evidences concerned by the "Longobard routes" envisaged by the Management Plan

6.4.2 BRESCIA

The level of enhancement of the monumental area and of the monastery San Salvatore-Santa Giulia is rather high. Recovery works of the monastery have made it possible for the material illustrating the city's history to be set-up in the halls following the most modern principles of museography, with the simultaneous enhancement and legibility of the phases of the monastic complex. The visitors' routes go through and link the monastery's historical buildings and the museum's chronological and thematic sections, highlighting the continuity of meaning between them. They are continually implemented with new purchases and updated with rotation of items and presentation of those items that have undergone restoration.

All the visitors' routes are specifically sign-posted and there are explanatory panels in Italian and in English displayed in each hall in the museum.

The buildings and monuments inside the monastery are all highly visible thanks to an efficient lighting system and an effective layout. Minimum lighting is

guaranteed during the hours of closure to permit security cameras to film. Outside spotlights illuminate the monastery's main buildings visible from the road, Santa Maria in Solario and the façade of the Church of Santa Giulia.

A comprehensive project has been drafted for the neighbouring archaeological area and it aims at the recovery and enhancement of the incredible stratigraphic sequence of the area that goes from the Celtic, to the Roman, Longobard (with burials and handcrafted structures), medieval and Renaissance phases.

An organic and wide recovery and enhancement plan concerning both the monastic complex of San Salvatore-Santa Giulia and the archaeological area to the west will make this zone of the town a sole museum complex, open, organized and jointly managed.

The complex is opened from Tuesday to Sunday with the following timetable: winter 9.30 a. m. - 5.30 p. m.; summer 10.00 a. m. - 6:00 p. m. (which can be prolonged in case of temporary exhibitions and particular events). All the areas of the museum and monastery are

accessible to disabled people.

The following facilities are available in the *Museo della città*:

Information facilities

Explanatory panels in Italian and English, with graphic reconstructions and plans are present in the following locations:

- in the most significant areas of the monastery, to illustrate the history of the monument;
- in every museum hall, to illustrate the theme of the exhibits and the exhibits themselves;
- leaflets in Italian, English, French, German, Spanish and Japanese;
- publications on the history of the monastery, on the archaeological area occupied by the site, on the museum set up in each asset.

Guided tours

- Specific and thematic visits are conducted by qualified personnel and coordinated by the Municipality Brescia and by the Fondazione Brescia Musei;
- Ordinary visits are conducted by professional tour guides.

Educational activity

School parties can choose from a range of 23 types of workshop, including hands-on activities and visits comprising specific sections of the museum and/or monastery, and relevant exhibits. In the Museum there are four class rooms exclusively reserved for school parties' activity. Other laboratories are spaces set aside for activities relating to other buildings in the *buffer zone* (Picture Gallery Tosio Martinengo, the Castle, including the weapons museum and the Risorgimento museum).

Facilities areas

- Conference hall (total capacity, 216 seats);
- Four workshop and projection halls;
- Library.

The famous Roman bronze depicting the Winged Victory exposed in the *Museo della Città*.

The Roman domus enhanced inside the Museo della Città

Public facilities (information and cafeteria)

- information and booking services, including two telephone numbers reserved for this purpose;
- information booth;
- cloakroom;
- separate washrooms for male, female, disabled visitors, also including baby's changing table;
- cafeteria offering light refreshments;
- self service cafeteria;
- ATM facilities;
- wheel chairs are available;
- bicycle rental service;
- first aid kit.

The archaeological area, where archaeological excavations and conservative maintenance works are being carried out, is open free to the public all the days except on Mondays from 11 a. m. to 4 p. m. At present, the uncovered space and the pronaos of the temple, from which it is possible to see the epigraphic collection of the 19th century inside the cells, can be visited. Disabled people cannot temporarily reach the pronaos of the temple since the archaeological surveys have imposed some changes to the itinerary for the visitors' safety. The following services and facilities are available to visitors:

Informative tools

- Explanatory panels in Italian and English, with plans, sections, historic iconography and graphic reconstruction drawings;
 - guidebook in Italian on sale at the bookshop of the near *Museo della città*;
 - Guided tours
 - Thematic guided tours (conducted by qualified personnel and coordinated by the Municipality of Brescia and by the Fondazione BresciaMusei);
 - ordinary guided tours, conducted by professional guides.
- Specific didactic activities, with the same

characteristic of those carried out for the monastery and *Museo della città*, are available for schools.

Facilities

- separate washrooms for male, female and disabled people

Online Services

Two Internet site deal with the monastic complex, addressing the subject from different points of view. www.museiarte.brescia.it

This site supplies information of scientific importance regarding the museum sites, the collections and the research facilities (library and photoarchive). The site also includes a database on the city collections with in-depth files and an overview of the museum's main publications.

www.bresciamusei.com

This multi-language website contains information regarding the services available at the museum, opening times, ticket prices, booking facilities and cultural events, as well as information on how to reach the historical centre and the

Museum (including information on means of approach, on the limited traffic zone or ZTL, on parking, city and suburban transport, and a map of the city); information on other city museums, visitors' itineraries in the city and the surrounding area; addresses of hotels and restaurants; useful telephone numbers; possibility of buying publications online. The museum also plays host to events on request, while fully respecting the asset itself.

Further works are foreseen (museumisation of additional archaeological areas, upgrading of lighting, layout of green areas) to enhance the value of the complex, implement the usable spaces and to automate several services that are already available to visitors (sale of tickets)

A Visitors' Centre is also foreseen at the entry to the Museum to introduce visitors to the city's Longobard heritage and the entire network of the Site which is being presented as a candidate for UNESCO's World Heritage List. (Ref. Valorisation Plan)

The Monastery-City Museum entrance

Since 2004 the City Museum has been recognised as a “museum” within the wider acknowledgement of museums and museum collections in Lombardy, a programme promoted by the Lombardy Region aimed at innovating and increasing the efficiency of the region’s actions in supporting museums and museum collections. The scope of the acknowledgement is to spark off growth of Lombard museum institutes and raise the quality level of the services on the basis of a verification of minimum requisites. The recognised museums and museum collections, even those with temporary recognition, will be the prime recipients of the region’s actions in such matters.

The Lombardy Regional Authority has recently launched a competition to promote the upgrading and valorisation of the region’s archaeological heritage. The proposals must be related to unmoveable archaeological assets with the *scope of allowing or improving public enjoyment of such assets*. They must also be aimed at publicising awareness of the same as testimony to Lombardy’s culturally important historical heritage. In 2007, within the projects submitted in the competition, three were financed, linked to the UNESCO candidature of Longobard sites, including one that foresees conservation of the Roman *domus* in the monastic complex of San Salvatore-Santa Giulia. City Museum with a contribution of 72,000 Euro from the Region.

Capitolium Archaeological Area

Only a few metres from Santa Giulia, along the Via dei Musei, we find one of the richest and most important archaeological areas in the north of Italy. Besides the many Roman buildings such as the republican sanctuary, the capitoline temple, theatre, part of the *decumanus maximus*, there are historical *palazzi* such as the home of Pallaveri and the Palazzo Maggi Gambara, and part of the Patrio

Aerial view of archaeological area

Museum set up in the reconstructed cells of the capitoline temple in 1830. A project has been prepared for the recovery and valorisation of the incredible sequence of layers that can be seen in the area. These layers cover phases from Celtic to Roman, Lombard (with burial places and handcrafted structures), Medieval and Renaissance periods. The area has already been partially opened to the public given the large number of sites that have been opened one after the other in recent years. In 2006 a system of panels was set up (together with a printed guide) to allow visitors to find their way about the area and to be updated about the works in progress. Restoration of decorative structures (mosaics, frescoes, architectural elements) is in progress at the Roman Republican sanctuary (1st Century B.C.), discovered beneath the Imperial-era *Capitolium*, together with a study of the optimum conditions of temperature and humidity in which to put them on display to the public. These works, promoted by Brescia Museums and the Superintendence of Archaeological Arts of Lombardy, also involve the Central Institute for Restoration. At the beginning of 2008 an agreement will be signed between the Ministry of Fine Arts and Culture and the Municipality of Brescia for specific funding and realization of the project (ref. Enhancement Plan for Core Zone). One of the most important tasks to be carried out is the upgrading of the urban sector of the two important complexes (San Salvatore-Santa Giulia and the Roman forum complex) that comprise a single large museum space by making the Via Musei a pedestrian area and improving the urban furnishings and lighting. Piazza del Foro has already become pedestrian during 2007 making it off-limits to unauthorized traffic by means of permanent barriers. Upgrading of the square is part of a wider ranging project to upgrade the *Capitolium* area.

The Roman Republican sanctuary (1st Century B.C.)

BUFFER ZONE

There are several instruments and actions for promoting and exploiting the buffer zone. In fact, the area is endowed with many historical buildings and places which are owned by agencies and institutes that contribute to their maintenance and valorisation, under the coordination, where possible, of the Municipality of Brescia. A description is given below of the main upgrading and restoration activities foreseen in the next few years involving monuments, museums and areas of the city.

The Roman Basilica

In ancient times the Roman Basilica (1st Century A.D.) looked over the area of the Forum and for this reason is closely connected with the *Capitolium-Theatre-Decuman maximus* complex. Today it is incorporated in a later building that has ensured its preservation throughout the years and

the south face is visible. The building is currently home to the Brescia operative nucleus of the Superintendence of Archaeological Arts of Lombardy.

As far as the other large monumental complexes in the buffer zone are concerned, the Castle is particularly worth noting. It underwent a series of systematic interventions resulting, in 2003, in almost all its halls and rooms being opened to the public.

Visitors today can admire not only the park but also the towers, (*Torre dei Francesi, Torre della Coltrina, Torre dei Prigionieri*), the road of Soccorso with its galleries and pillboxes, the 14th Century Fortified Corridor, the main building of the *Mastio Visconteo*, the so-called Haynau palace and the *Grande Miglio* and the *Small Miglio*. Guided tours of the complex are led by the Brescia Speleological Association. Over the centuries, these buildings have been used for many purposes.

The second floor of the *Grande Miglio* currently houses temporary exhibitions illustrating the new set-up of the Risorgimento Museum with a rich variety of materials.

The Castle's Mastio Visconteo is home to the Arms Museum. Open to the public in 1988, the museum displays the richest collection of ancient arms and armour in Europe. Most of the collection (1090 pieces) was donated by Luigi Marzoli in 1965 and is a fine example of Milanese and Brescian production during the 15th to 18th Centuries. Extraordinary maintenance of the wooden structures, furnishings and roof is currently in progress.

New works are being studied to upgrade the Castle with removal of architectonic barriers, creation of a new entry, rearrangement of access areas, upgrading of technical plant and construction of internal toilet facilities. Another study is underway, by the Municipality of Brescia and the other stakeholders involved, to create a unified management system for the Castle area which will also comprise upgrading of several green areas, the creation of permanent service structures (shops) and the construction of access itineraries and connections with the town (by means of elevators and moving stairways).

The other main monuments of the town have also been the subject of studies by the competent Administrations to ensure their preservation and guarantee their accessibility to the public. These include the Old Cathedral, the New Cathedral, the Loggia Palazzo, Palazzo Broletto, Palazzo Martinengo Cesaresco (with the underlying archaeological areas), Palazzo Martinengo da Barco (home to the Tosio-Martinengo Civic Art Gallery), Palazzo Tosio, Palazzo Bonoris, the Queriniana Library, the Theatre Grande and the Theatre Sociale.

The Romanesque Duomo in Piazza Paolo VI

Another project, “*Revaluating Brescia*”, has been started up by the Municipality of Brescia according to a new formula of collaboration with a private company in order to carry out preservation works on the city’s historical, artistic and architectural heritage. Under this project, operations have been carried out, for example, on the *palazzi* of Monte di Pietà and Carceri where 1480 Roman inscriptions have been inserted on the faces of the buildings.

As far as other open monumental areas are concerned, Piazza Paolo VI (formerly Piazza del Duomo), Piazza della Loggia and Piazza della Vittoria have been pedestrianised for 70% of their area.

Green Areas

The Municipality of Brescia has recently promoted the opening of new public parks by purchasing and/or upgrading areas that were not previously accessible to the public.

Among the various projects, the following are most noteworthy: “Parco dell’Acqua” Project at the former Fish Institute which incorporates a portion of the ancient city walls owned by the Municipality of Brescia; the “Parco delle Colline” Project, a part of which reaches the heart of the buffer zone comprising the entire Colle Cidneo with its public and private areas (including the largest urban vineyard in Europe, property of the monastery of San Salvatore-Santa Giulia); “Campo Marte”, a former military sports camp purchased by the Municipality of Brescia.

The following activities are to be carried out within the buffer zone:

- upgrading of lighting systems for historical buildings and squares, and for temporary events;
- expansion of pedestrianised zones and start-up of sustainable urban mobility systems;
- creation of a single itinerary covering all the Longobard findings in the city

and coordination of all the activities already in progress in the various sites throughout the province;

- increase of green areas and connections with the activities carried out therein.

The Arms Museum

The Castle

6.4.3 CASTELSEPRIO-TORBA

The present level of valorization of the assets which are candidates for insertion in the Unesco Monumental Heritage List is linked to the possibility of visiting the Church of Santa Maria *foris portas* and the remains of the *castrum*, within the Archaeological Park of Castelseprio, and the Torba complex, with the ancient tower of the castrum fortifications and the late medioaeval monastery. The various monuments are currently involved in valorization activities handled by three different proprietary bodies (the Province of Varese, the Italian State and the Italian Environmental Fund (FAI), even if the Letter of Intent signed in 2004 and the Working Group set up with the main territorial organizations aim to promote joint valorization activities, integrated within the context of what has been called the “Castelseprio Archaeological Complex”, which embraces the ensemble of the three properties destined for public enjoyment.

The project, which is currently being expanded and redefined, is aimed at improving the cultural offer and rearranging the historical and artistic elements of the two sites, by exploiting in common the two areas with routes and visitor services located in key points. These aims are in harmony with the policy of valorizing the existing remains and with the attempt to develop as soon as possible a unified management system which allows the improvement of the services offered within an area which is already unique from the historical and architectural viewpoints. At the moment, in fact, there is no useful passage connecting the *castrum* and the monastery of Torba: for those wishing to visit both places, the double transfer by car or bus is the only way possible. Refurbishing the old footpath, as previously planned, would create some historical link between the two sites and at the same time broaden the already impressive cultural offer by adding natural surroundings and

country scenes, which could easily be incorporated in the walking route between the two places.

The most important valorization operation within the Castelseprio Archaeological Park now concerns the completion of the *Antiquarium*, located in the ex convent of St John, inside the *castrum*. The building has benefited from restoration work that began in 2004. The opening of the *Antiquarium*, envisaged during 2008, will allow the monument itself an example of estimable 14th century architecture, with areas of monastic character (frescoed church, room with fireplace, other premises and tower) to be appreciated, but also to illustrate the facilities and way of life in the *castrum*, by exhibiting the finds, creating an architect's model of the period and providing multi-media presentations to facilitate understanding of the visible remains.

The entire visitor route in the Park (*castrum* and the church of St Mary *foris portas* in the village) has for some time been equipped with illustrative panels that assist the visitor as regards topography, history, archaeology and art. Besides this, the visitor receives gratis both the guide (in 5 languages) and theme cards (some in various languages). Further, for each event the Park provides appropriate reference cards.

Within the Torba complex, FAI has in recent years promoted numerous operations to safeguard, upgrade and make the most of the Tower, the Monastery, the church of St Mary and the farmhouse buildings. The operations, all with an eye to the tourist potential of the area, have included the restoration and valorization of the monumental complex and the rearrangement of the entire property which is the home of archaeological remains as well as architectural assets. Apart from

The Church of Santa Maria di Torba

Visitors at the castrum

allowing access and the visit to the monumental, historical and artistic assets conserved in the complex, the present management of the asset envisages the staging of cultural events and the offer of refreshment facilities for guests.

The full valorization of the asset however can only be achieved with the enhancement of the didactic equipment for the visit and the completion of the last part of the footpath linking it to the archaeological area, thus bringing the “Castelseprio Archaeological Complex” into full function.

THE TERRITORY

The “Castelseprio Archaeological Complex” and the surrounding territory is now included in the PLIS R.T.O. (Local Park of Super-Communal Interest for Rile-Tenore-Olona), which could play a key role in the operations of a coordinated action plan for management, valorization and promotion of the entire Area. This is constituted by 8 Communes (Carnago, Caronno Varesino, Castelseprio, Castiglione Olona, Gazzada Schianno,

Gornate Olona, Lozza and Morazzone; recently Lonate Seppino has been added) and bounded geographically within the catchment area of the Rile, Tenore and Olona rivers. The PLIS R.T.O. has been recognized by the Province of Varese since February 2006.

Among its numerous tasks of conservation, recovery, safeguarding and social exploitation of the territory, the convention signed by the member Communes refers to the «linkage between the various areas protected with corridors of greenery and dedicated footpaths» and, more specifically, envisages «the recovery of the old footpaths as an eco-compatible ensemble of nature and environmental walks included in a dynamic use of leisure time which respects the country and historic roots of the area».

On this basis, the Park acts as a privileged intermediary between the local bodies and the other organizations and situations of various types within the territory. Having already vigorously confirmed its willingness to contribute its energies and means in favour of common projects regarding the territory, it

Cafeteria offering light refreshments set up at Torba Complex by FAI

shares these same tasks of protecting and safeguarding the local heritage, contributing the “added value” of its knowledge of the patrimony that its nature and countryside have conferred. An effective coordination with the PLIS R.T.O. could turn out to be equally fruitful from the organizational standpoint for activities and events, to the extent to which all the parties involved are able to guarantee their assent to the programmes and, consequently, a reasoned planning of the appointments as common moments through which to convey the cultural, historic and artistic aspects as well as a knowledge of the local traditions that is even more wider and detailed.

In the context of the more recent activities of valorization in the broader sense of the monumental, artistic and archaeological heritage assets in its territory, the Commune of Castelseprio presented in September 2007 to the Lombardy Region a project for “Activities for study and valorization of the Castelseprio archaeological area”, with an application for financing. The project, which entered the competition for Promotion of Activities to Valorize

the Archaeological Heritage in Lombardy, envisages:

- improvement of road signposting also on territory outside the Comune, aiming to facilitate arrival at the Archaeological Park from the main roads;
- installation of a series of bilingual informative panels (in Italian and English) at strategic points within;
- Communal territory, to provide a stimulus to visit the archaeological area;
- creation of a bilingual brochure (in Italian and English) illustrating the three nuclei of the “Castelseprio Archaeological Complex”: the *castrum*, St Mary *foris portas* and the Monastery of Torba;
- production of a photographic campaign on the site for valorization and publicity purposes.

As regards the wider territorial context of the Seprio area or, better, the ancient Longobard compound of the Giudicaria del Seprio – which extended

well beyond the confines of the same Province of Varese, touching also the Canton Ticino, in Switzerland – although there are important links at the historical, archaeological, monumental and, more in general, cultural levels, no specific coordinated initiatives for valorization of the Longobard heritage have so far been appeared.

The Lombardy Region, however, with the approval of the Regional Land Planning Authority (whose reference points are the European Countryside Convention and the Development Scheme for European Space) has provided the guidelines for territorial planning which amalgamate development and environment. In particular the Plan starts out from the notion that the countryside represents a quality of the territory due as much to natural conditions as to man’s previous or present intervention; all the territory, therefore, presents to varying extents elements significant in the

landscape which characterize the daily environment and contribute to the quality of life of the local population. The Plan therefore considers a knowledge of the landscape features to be a priority in every transformation initiative regarding the territory. An information system has therefore been created and updated covering the landscape and environmental assets (SIBA) of the Lombardy Region, in which the merits of the various landscapes of the entire region are carefully listed.

On the basis of these merits, as regards the Varese area, the Region has imposed appropriate rules for valorizing the local countryside, which can be summarized as: containment of the areas for urban expansion; recovery of the many small town centres of interest (examples are Brinzio, Arcumeggia, Castello Cabiaglio, Casalzuigno); conservation of a scale of agriculture of smallholding size; control of wooded areas and a possible refurbishing of obsolete tourist facilities (hotels, means of transport, etc.) also as centres or cultural itineraries.

Among the valorization activities promoted or supported by the Region we may mention:

- creation of bicycle tracks;
- start-up of cooperative projects regarding landscape themes: support of SiMArch the Archaeological Museum System of the Province of Varese.

Map of Olona Park's footpath system

6.4.4 SPOLETO

THE SITE

Currently, the use of the basilica of San Salvatore is strictly limited to educational activities and guided tours which take place on particular occasions, such as, for example, the FAI Days. Moreover, given the function of the Church, connected to the cemetery area, no particular work has been carried out to date, which could possibly facilitate the enhancement and presentation of the monument, which is open to the public, free of charge, throughout the day, but not yet well equipped with information boards, special signs, etc.

Recently, a project has been finalized for the enhancement, on the one hand, of the architectural-spatial characteristics of the basilica -which will be equipped and used for setting up temporary art exhibitions, as was the case, on an occasional basis in the past- and, on the other, of the spaces of the former convent, adjacent to the Longobard building -where a documentation centre and a visitors and didactical activities coordination centre will be opened. The visitors centre will be responsible for coordinating all the activities related to guided visits to the basilica and to the *buffer zone*, including excursions and naturalistic tours and, more generally, for an effective rationalization and management of tourist flow.

THE BUFFER ZONE

The enhancement of the buffer zone nearest the Site concerns essentially the "Monastero di San Ponziano". Presently, visits to the Church can only be made upon request by contacting the adjacent monastery. Considering the value of the Church and of the crypt lying underneath, it will be necessary to enhance the utility of the Church of the city's Patron Saint.

The Religious Guest House "Monastero di San Ponziano" hosts a congress hall which can accommodate up to 100 visitors, and is equipped with the appropriate technical installations; given that the city of Spoleto has already invested in the restructuring of a Convention Bureau, with the aim also to qualify itself as the upper seat of congress tourism, a method is being devised for introducing the congress facility, located inside the monastic complex, within the city's congress circuit.

Over the course of the years 2004-2006, Spoleto participated in a European project called "European places of the spirit", which had the aim to enter

European places with a high-density of cultural-religious emergencies into the network, so as to identify a location as the "place of the spirit". One of the objectives of the Enhancement Plan for the *buffer zone* is to verify whether the accommodation facility called "Monastery of St. Ponziano" qualifies to be certified as the place of the spirit.

In fact, the buffer zone will also be enhanced by the more basic actions envisaged by the economic development plan. The third phase of the alternative mobility plan, with the construction of the "Archery parking", offering a total of 152 parking places for cars, campers and buses, will be dedicated to the Site concerned. Furthermore, a hectometric

San Salvatore, celebration of Holy Mass by the Archbishop R. Fontana on the occasion of All Souls' Day

passageway consisting of elevators will link the basilica of San Salvatore and the Church of *San Ponziano* directly to the *Museo del Ducato*.

In addition, always in the context of sustainable mobility, the possibility of completing the roadway system providing a new access to the city is currently under study; this project will allow to dismantle the section of the SS 3 Flaminia (national road) passing close to the *Colle Ciciano* (between this and the historical centre). In this way, the ancient route connecting the Site to the historical centre, today cut off by the viaduct of the 60's, would be restored. The resources made available for alternative mobility have been determining. Through this project the Municipality intends to relieve the traffic congestion on Spoleto in the historical centre and at the same time make it easily accessible through a network of car parks and footpaths mechanized.

A network of cultural poles and avant-garde reservoirs that makes Spoleto, for its history and experience in the field of culture in the last century, a city more competitive.

The entire historical centre of Spoleto, one of the largest in Italy even if it belongs to a small art city, is famous for constituting a sort of *open-air museum*, thanks to its numerous monuments, noble palaces, structures from all epochs, museums, and ancient Churches that stud the fabric of the city. A continuous 25 century-long thread of history links these monuments one to the other, among which the two Longobard buildings which govern the territory of Spoleto: the Church of San Salvatore and the Clitunno Tempietto. For the last two millenniums, therefore, the inhabitants of Spoleto have been fully immersed in culture, which is part of their daily lives, as in an indissoluble bond.

After ten years of reconstruction and

renovation of public and private buildings of the historical centre -most damaged by the earthquake of 1997- since 2007 the Municipality of Spoleto has been putting the project "Downtown: from historical to economic value" into practice. This project, basing itself on protection and conservation of architectural and artistic heritage and environment features, aims at raising their enhancement.

One of the main preoccupations of the municipality strategy concerns, other than the preservation and enhancement of its assets, also the possibility of making it more functional for local population and visitors, so as to assert the idea of a living, shared, and fertile culture. Hence, there is a need not only for enhancement, restoration, and development of the already existing libraries, archives, museums, theatres, parks, villas, gardens and historical house, but also for promoting initiatives aimed at opening these places to the

The Monumental Complex of *San Nicolò* that will become the seat of the *Convention Bureau*

public, and turning them into cultural centers, albeit in the respect of specific rules and regulations.

Thus the main objectives of the enhancement plan for the city of Spoleto consists in the structural renovation of the historical centre, and in the refunctionalization of large covered spaces -also thanks to the Programme Document DocUP-:

- the *Rocca Albornoziana*, that hosts the National Museum of the Longobard Duchy - opened in August, 2007 -, (see cap. 5.4). Many are the sculptural and architectural manufactures, from 4th to 5th centuries, from the *Pinacoteca Comunale*; the European School of Book Restoration, and between the two towers, the Cultural Heritage Diagnostic Lab for the restoration of cultural heritage (see Management Plan, Protection and Conservation Plan, Project 24.2). The central hall, multi-purpose, temporary exhibitions, concerts, conferences, etc., are also

being organized there. The Courtyard of Arms is, instead, an outdoor amphitheater that can accommodate 1200 spectators. The green area that surrounds the building will become a public park;

- the Monumental Complex of *San Nicolò*, one of the most interesting medieval monuments in the city, a rare example of Gothic architecture in Umbria. Formerly very active center of religious and cultural life, Nowadays it is a modern conference center that also hosts temporary exhibitions and shows. Within the next year the equipment for conferences will enhance with advanced technologies;

- the complex of the Anfithatre, closed for decades, will join up to the cultural centre of the Rocca Albornoz, by Street of *Murelle* and escalators of Ponziana (third part of the mobility alternative project). The Church of Saints Stephen and Thomas that will function as an *Auditorium* and the adjacent *ex*

Monastero della Stella that will become home of the *Teatro Lirico Sperimentale*; *Palazzo Collicola*, seat of the *Modern and Contemporary Art Gallery*, opened in 2000, and the "*Giovanni Carandente*" *Library*, opened in 2006, -one of the richest contemporary arts library in Italy-, will become a place of representation and exhibition;

- *Palazzo Mauri*, after more than 25 years and long restructuring works, within the next two years, will finally host the historical public library "Giosuè Carducci". It is expected that the overall conservation intervention on Palazzo Mauri -structured on three levels for overall 3,400 sq. Metres- and *Palazzetto Sillani*, where the most of the volumes are being kept (including the most ancient ones), cost 10.5 million €, and is financed by Region Umbria, CIPE, EU, act 400 of 2000, and the Municipality of Spoleto;

- *Palazzo Rosari Spada*, previously the seat of the Communal Pinacoteca, will host, within the next year, the Textiles

Collection of the Commune of Spoleto. The Spoleto collection counts around 1300 items, the result of various collections that were acquired in the last thirty years;

- *Palazzo Leti Sansi* and the whole Market Square will become the focus for the enhancement and promotion of typical local foods;
- *Palazzo Legnetti Luparini* will host young couples and become House of Associations;

- *Palazzo Martorelli Orsini* will become the House of Craft of quality;

- the *Teatro Caio Melisso*, the former Civic Museum; the *Teatro Nuovo*, returned to the city in 2007.

In the historical centre are planned, and partly achieved, structural renovation of streets and squares too.

Among the various enhancement actions to be implemented, one of them concerns the issuance of a *museum card*, which will obviously provide access to the

Museo Nazionale del Ducato of Spoleto, and could constitute the starting point of the Longobard itinerary related to the city of Spoleto. This ad hoc itinerary in the city will be promoted thanks to the support of a paper tool, presently in the study phase.

THE TERRITORY

As for the theme tours, and the renovation of the suburbs (town divisions), a number of itineraries are being offered to the once so-called castles of the Spoleto territory, or what we more commonly refer to as the *villas of the contado of Spoleto*. One way to recreate the ancient link between town and country through the knowledge of the historical, artistic and cultural customs.

Also, further implementing and developing tourist itineraries in search of the archeology, and the historic-artistic paths built around artists that, thanks to their works, have helped to unify the territory.

With regards to Identity, a theme very dear to the municipal Administration which, in fact, established the *Day of Identity and of Memory*, falling on March 22nd (symbolic date which commemorates the tragedy that occurred in the mine of Morgnano in the year 1955), the idea was proposed of identifying a number of symbolic locations, such as:

- Morgnano, seat of the brown coal mines, where a museum will be opened.
- Monteluco, place of the spirit, together with the protection and enhancement of the assets of the Spoleto mountain system.

Even if the huge availability of public parks, the Municipality, over the past four years, has increased by about 50% the land used for gardens and parks and are ongoing some projects to upgrade the existing ones. Greens are equipped so widespread throughout the country, providing an important function of aggregation.

Fresco by Giovanni di Pietro named "Lo Spagna"

6.4.5 CAMPELLO SUL CLITUNNO

THE SITE

The Temple of Clitunno is currently open to the public but does not offer adequate illustrative educational material on the historical matters of the building and the area surrounding it. Panels in several languages would also be necessary.

In the area pertaining to the temple, there is a small kiosk that provides tickets but no other service for visitors. The heritage can be reached by a public bus, which connects the candidate site with the railway station and with the main surrounding towns.

In the entire municipal area, the car parks are free. There are two small areas close to the Temple, while there is a large car park near to the boundary of the Springs of Clitunno, and two sectors equipped for camper stopovers (San Sebastiano and SS. Cipriano e Giustina). There are another four large parking areas in the town centre.

The aims of the Optimisation Plan regarding the site and its pertaining area are:

- Improving the usability of the area by expanding the service offered, with the creation of a small information point and book shop;
- Improvement of the presentation of the Temple with the placement of some illustrative educational panels and a copy of the monumental inscription that is now in Perugia;
- Increase in the Temple's role in relation to the River Clitunno and the ancient Via Flaminia.

The Municipality of Campello is working on a project for this very purpose that will allow the monument area to be expanded, including the route of the ancient Via Flaminia, which is now of local value, owned by and the responsibility of the municipality; this means that the enclosed area can be

equipped with better facilities. Finally, there is currently no direct connection between the area of the Temple and the River Clitunno that runs immediately below it. For this purpose, the Superintendence for the architectural, landscape, historical, artistic and ethno anthropological heritage of Umbria has started up the application to acquire the existing grotto-cellar under the lawn in front of the Temple in order to recreate the original existing connection between the temple and the river.

THE BUFFER ZONE

The area identified as the "buffer zone" includes the so-called "Vecchio Molino", a well preserved, enhanced historical production site.

There is a water pumping plant and a disused ENEL substation near to the Temple, which have been registered by the Municipality of Campello sul Clitunno as sites of historical, architectural and cultural heritage. Although in a fair state of conservation, the two buildings are currently

abandoned, but a recent enhancement project for the whole area from the Springs of Clitunno to the Tempietto included foresees their restoration, with destination of use as exhibition centres, part of the wider territorial system called "Eco-Museum" (see item 12.5.3)

At present, there is no direct connection via furnished tourist routes, between the various architectural and environmental sites located along the River Clitunno. The historical-environmental sites of the area are therefore not connected and are sometimes unknown, as they are not promoted in information-providing material and on the existing information-educational boards.

The recent construction of the fast road further down the valley will soon become an important opportunity for recomposing the landscape unity of the area – which was heavily damaged during the 1950s and 60s with the building of the State Highway no. 2 that literally cut the area into two and into a new opportunity of development.

The objective of the Improvement Plan for the buffer zone and the bordering area are aimed at:

- Creation of a continuous connection between the various monuments, also by pedestrianisation of the ancient Via Flaminia;
- Integration of the existing cycling track extending it along the whole route and equipping it with suitable equipment and various facilities for the visitor;
- Creation of information points and historical document exhibitions documents relating to the area with the task of introducing visitors to an understanding of the anthropic, historical, aesthetic and natural values brought by the settlements within its area;
- Extending the public bus service with stops at the most strategic points along the tourist route.

In this sense, the Municipality of Campello has a large improvement project for the area named Eco-Museum, that involves the Temple and the nearby Springs of Clitunno, and including all the monumental heritage

along the route of the historical river. By a series of upgrading and recovery work carried out on the green areas and structures situated along the way, and through the recovery, improvement and expansion of the internal vehicle and pedestrian cross and longitudinal routes, conservation of the territory's landscape identity will be maintained and guaranteed.

The setting up of the Eco-Museum aims to extend the tourists' and visitors' attention to the environmental system as a whole, seen in its multitude of aspects that include the natural and artificial hydraulic system of the River Clitunno, the traditional crops and agricultural set ups, the archaeological sites, the medieval settlements, linked to each other and networked by the grid of local roads, paths and routes, which will be expanded and extended, in addition- to the most significant historical and symbolic sites (the Water Garden and the Temple).

The Eco-Museum system is therefore the element for reconnecting and regrouping the entire area.

THE TERRITORY

In the last few years the Municipal Administration has led a cultural policy aiming at implementing museum or documentation centres with the purpose of raising awareness among the population and visitors with regards to the customs and traditions of the area.

Therefore, the Civic Museums of Campello sul Clitunno are an important local reality for the promotional and enhancement activities. The Centres are divided into two sectors: Civic Museum of Peasant Civilisation and the Civic Archaeological Museum of Primitive Umbrian Civilisation. Both are located on the noble floor of the charming Palazzo Casagrande, an end-of-eighteenth-century building constructed by the great Neo-classical architect Giuseppe Valadier and situated right in the centre of the town, providing the latter with great historical and artistic value.

The two museums conduct conservation ordering and study of materials and works belonging to collections, educational and information providing activities, using specific and professional skills.

The Civic Museum of Peasant Civilisation "I Cassetti della Memoria" is an ethnographic museum that has the task of collecting, conserving and enhancing the vestiges of traditions and customs of the area, like a true centre of culture and research.

The opening of a detached section of the museum is scheduled for 2009 at Acera, a small medieval village clung to the mountain crest of the territory, inside the former church S. Maria Maggiore and in the above premises, recently restored thanks to an Integrated Recovery Plan (P.I.R.)

The centre, also equipped with a

View of Palazzo Casagrande

multimedia post, keeps a wide photographic exhibition dedicated to the sheep-breeding and transhumance in the Apennines and a small exhibition of objects relative to the main activities deriving from sheep-breeding.

Instead, the Civic Archaeological Museum of Primitive Umbrian Civilisation houses prehistoric material coming from the Bronze Age, found in archaeological digs carried out in the area known as Pian delle Rotte. The space housing the collection is thought of a lively, dynamic space, aimed at students who can admire the items and also stimulate their imagination and manual skills in educational laboratories and in the "Campo dei Miracoli".

With regards to the tourist routes connected to the other endogenous resources in the area, the Umbria Regional Administration (Agriculture and Forestry Department) has recently approved the "*Strada dell'olio extravergine d'oliva DOP Umbria*" project, with the intention of enhancing the value of the regional areas that produce olive oil, leading tourists and residents along an itinerary that illustrates the quality of the product, the ways in which it is processed, the environmental and cultural context in which olive trees and its precious fruit are grown. The first route is around the area "Colli Assisi-Spoleto". It starts from Spoleto and ends in Campello sul Clitunno where there is a clear perception of the use of the olive tree that is a typical presence throughout the surrounding landscape. A second route, designed by the Italian Alpine Club, named "*Sentiero degli ulivi*" winds around the municipalities of Spoleto, Campello sul Clitunno, Trevi, Foligno, Spello and Assisi for a total of 75 km. the route was born with the intention of optimising the value of the hill and mountain foothill area in this charming part of the region, where the

olive groves, spread out over the typical terraces, provide a precise, physiognomy to the area that is impossible to confuse with anywhere else.

Within the interregional project "Itinerari della fede", the territory of Campello sul Clitunno has been included by Umbria Regional Authority in the "Via Francigena di San Francesco", a tract of the well-known "Via di Roma", a route that the pilgrims coming from England and France used to walk to arrive from Perugia and Assisi to Rome. A different way of travelling, in strict contact with the natural environment, is proposed to tourists by ancient itineraries, where it is possible to walk, ride a mountain-bike or a horse.

Finds from Pian delle Rotte

6.4.6 BENEVENTO

THE SITE

The current level of enhancement for the monumental Santa Sofia complex, for which the request has been submitted for inclusion in the UNESCO World Heritage List, is differentiated in relation to the different management of the three parts that comprise the complex: the building used for worship, the annexed cloister and the monastery, which houses the Museo del Sannio and the Library.

The position of the monumental complex with respect to the city provides a high degree of fruition, but at the present time the cultural fruition of the church appears limited by the worshipping activities; in fact, the religious authority that manages

it limits opening it to the public exclusively to those times when religious services are held.

The Province of Benevento manages the Cloister and the Museo del Sannio. In connection with the Museum, the Cloister houses part of the *lapidarium*. Consequently, fruition of the Cloister is linked to access to the exhibition rooms and is regulated by the acquisition of an entrance ticket.

The Museo del Sannio is structured and organized in the manner typical of civic museums, although referred to provincial territory. In fact, it collects archeological artifacts from all the various areas of the Province of Benevento, and range from prehistory to the Longobard period. An important sector is dedicated to Egyptian worship in the imperial period.

The second floor of the structure houses a picture gallery, in addition to religious objects originating from the city's houses of worship and from several sites in the territory, all relating to various historical periods.

The museum artifacts on display are catalogued in the "classical" manner and are arranged by collections. The captions are only written in Italian and show the basic information on the objects displayed, at times referred to a group of objects.

The reorganization currently underway led the way to the realization of the first path referred to Egyptian and neo-Egyptian religious artifacts discovered over time in Benevento and stored in the museum structure. This path places the artifacts along a logical temporal line and includes detailed captions, in both Italian and English.

Egyptian sculptures from the *Roman Iseum*, housed in the exhibition of the Museo del Sannio

At the present time the museum is not equipped with additional services for visitors. With respect to the fruition of the property for tourism, a significant increase in the flow of tourists was registered last year, increasing from approximately 9,000 visitors each year from 2002 to 2005, to approximately 20,000 visitors in 2006. In all probability, this increase was due to an increase in the cultural activities and events that take place in the city, more than to promotional activities prompted by the museum. The exhibitions held in the nearby Museum of Contemporary Art (ARCOS), which attracts visitors from all parts of Italy, were certainly of interest, as well as the phenomenon of religious tourism motivated by Pietrelcina.

THE BUFFER ZONE

Enhancement of Benevento's monumental properties is closely linked to the restoration of the entire historical urban tissue. For decades, alongside the extreme wealth and complexity of its historical layers, this showed the wounds of the damages suffered during the Second World War. In fact, the bombings of 1943 destroyed valuable property near the main buildings, striking monuments such as the Duomo and the Vanvitelli Bridge on the Calore River.

With respect to urban development, two contrasting tendencies have always been in the forefront. At a time in which the city had just commenced its expansion beyond the Longobard walls, on the one hand in the 1930's one of the most important urban planners on a national and international level, Luigi Piccinato, undertook measures to define urban design, outlining urban development according to safeguarding policies and logic and excluding the ancient heart of the city from out-of-city traffic. On the other

hand historical facts and social and economic backwardness configured a negative conservation, due to "abandonment of the sites". As a result of these situations, with the exception of certain highly valuable historical monuments such as Trajan's Arch, the Duomo that was reconstructed in the 1950's and the Roman theater, broad sections of the city within the walls lay in a state of abandonment for many years.

Awareness of the value of the minor buildings came to maturity during the 1980's, when the first integral upgrading measures for the city center were defined; the principal Roman monuments from the imperial age were thus identified and "rediscovered", such as the baths, the amphitheatre, the craftsmen's streets, the river port,

etc., in addition to the Sannite settlement of *Maloentum* and the first Roman colony in the crook of the River Calore of Cellarulo (from *Cellarium*). The earthquake that struck the Sannio and Irpinia regions on 23rd November 1980 meant that renovation of this area could no longer be postponed. Architect Bruno Zevi then developed the Renovation Plan for the City Center. The premises were thus put into place to implement the upgrading and renovation measures for the entire urban area as well as for the monumental structures.

And so a new season begins for the valorization of the "walled city" that is the most important time, with numerous upgrading measures and restorations carried out with financing provided by the European Union during

The Trajan's Arch

Materials from Roman period re-used on dressed face of Cathedral Tower-bell recently restored

the period 1994-1999 and primarily for the period 2000-2006, with the integrated project “Benevento: the future in history”. Many monuments

are now open to the public and many others are undergoing significant conservation and valorization interventions, such as the realization

of the PAU - Urban Archeological Park (*Parco Archeologico Urbano*).

In addition to the significant monumental and historical sites in the city, Benevento also provides space dedicated to contemporary art; in this respect, reference is made to the *Hortus conclusus*, a large garden maintained by the Dominican order in the center, a historical space transformed by Mimmo Paladino, master of the Trans Avant-garde, into an art laboratory.

Another event of fundamental importance for the valorization of the ancient city center, but also for the center area, was the inauguration of the University of Sannio.

Inscription referring to the consecration of Cathedral Bell-tower

Mimmo Paladino's works of art in Hortus Conclusus exhibition

THE TERRITORY

For nearly 800 years the city of Benevento was isolated from the rest of the provincial territory. Commencing in 1080 and up until 1870, in fact, Benevento was a dependent of the Papal State in the Kingdom of Naples. This led to a completely separate cultural development of the city and of the territory. The same historical roadways, that followed over the Roman consular roads such as the Appia and Traiana, and the route followed by the *Via Sacra Langobardorum*, was in fact interrupted by the isolation.

The “reopening” of the city towards the territory only took place halfway through the 1990’s, with valorization

and enhancement measures that started off right from those traces that had been hidden but not erased and which determined a close link between the city and the surrounding territory. This territory, with respect to certain subjects, is quite vast. The Via Traiana, for example, if reference is made to Roman times, brings the influence of Benevento as far as *Aequum Tuticum* (in the territory of Ariano Irpino in Irpinia); if instead reference is made to the period of the Duchy with the *Via Sacra Langobardorum*, which led to the sanctuary of the Longobard people at Monte Sant’Angelo, Benevento’s influence reaches Gargano and on to the Adriatic Coast.

The valorization activities for this vast territory in connection with the city were explicated in the “On the traces

of the Traiano” program containing measures that, starting from the Via Traiano theme, led to all the territories involved in the provinces of Benevento, Avellino and Foggia, and to program measures to safeguard, improve and promote the principal historical, archeological and monumental structures found in the area.

This direction was acknowledged as a Jubilee path, in occasion of Great Jubilee 2000. Two projects were financed to renovate structures in Benevento (the San Pasquale and Madonna delle Grazie complex) for approximately € 8 million.

Another subject for valorization, which covers the vast area, is religious, with the figure of Saint Pio da Pietrelcina, which links the village of Saint Pio’s

birth, a few kilometers from Benevento, with S. Giovanni Rotondo, on the Gargano.

An ulterior presence in the territory that contributes to its valorization is the National Archeological Museum Sannio Caudino di Montesarchio, situated 20 kilometers from Benevento, along the Via Appia, which collects artifacts relating to the Caudina Valley, in which the Roman city *Caudium* flourished.

Moreover, in recent years the Province of Benevento has pursued a cultural policy aimed at the realization of theme museums, spread out over its territory and connected by Internet (MIR Musei in rete). Among these are the following:

- Galanti Institute in S. Croce del Sannio;

- Archeological Excavations Museum of Macchia in Circello;
- Paleontology Museum “Mare nostrum” in Baselice;
- Geo-Paleontology and Paleo-Lab Park in Pietraroja;
- Civic Museum “E. Sannia” in Morcone;
- Time Museum (tower watches) in S. Marco dei Cavoti;
- Museum of Agricultural Culture in Montefalcone di Valfortore;
- Artistic textile center in Pontelandolfo;
- Palazzo Ionni in Molinara;
- Multimedia Library in Casalduni;
- Museum of Arts and Popular Traditions in Fragneto Monforte;
- MEG - Museum of Wine and Gastronomy in Solopaca

- MUSA - Museum of Agriculture in Benevento;
- Ceramic Museum in Cerreto Sannita;
- Museum of Sacred Art in Cerreto Sannita;

With the exception of Benevento and a few other examples, such as the Church of Saint Anastasia a Ponte, there is a lack of awareness throughout the territory of the Longobard civilization. This situation makes it impossible to take short-term measures aimed at valorization. This is why the Plan, with reference to Benevento, calls for an in-depth analysis in this respect, in order to pave the way for future measures.

The Roman Ponte Leproso - Via Appia

6.4.7 MONTE SANT'ANGELO

THE SITE

The present level of valorization of the property, that is being presented for the candidacy in the Unesco List of Monumental Heritage, is connected to the possibility to visit, along with the Basilica Angioina, the Museo Lapidario, hosted inside the Longobard Gallery, and the Museo Devozionale as well. As for the fruition of the Museo Lapidario, it is open to the public on request only, and for a limited number of people. At present it doesn't offer an appropriate didactic equipment and suffers from a method of access of tourists flows that sets over those to the basilica. Various

works from the sanctuary, from the former church of San Pietro and from the ruins of the Benedictine abbey of Santa Maria di Pulsano are exhibited at the Museum. The finds date back to the 8th-15th century.

The visits to the Longobard sanctuary end nowadays by the crypts B and C, which represent the oldest part of the structure. The excavations in this area have been interrupted since they require a complex intervention of consolidation.

In November 1898, in the upper part of the sanctuary, the Museo Devozionale was opened, presently under conservation works. The Museum aims at collecting and exhibiting the various objects that witness the cult of the Angel. Mainly

they are gifts offered to the Sanctuary by the pilgrims over the centuries, in gratitude for the received blessings. They range from golden and silver furnishings pertaining to the Treasury, to vestments, true collections of ceramics, plastic and pictorial icons, quite a number of ex-votoes, the people's production of objects and images of *Micaelic* subject. The objects are exhibited in the corridor and in four halls of the Museum. A substantial part of the Sanctuary, that includes the church of Madonna della Libera, the former library and a number of internal spaces that were previously destined for orphanage and various religious activities, has fallen into disuse and may constitute recoverable spaces.

Conservation works at the Castle included in the buffer zone

Photographs by G. Tancredi (beginning of the 20th century)
 Monte Sant'Angelo, Museum of Popular Arts and Traditions - Tancredi

THE BUFFER ZONE

The town presents many significant places and monuments, within an urban fabric characterized by high quality, both urbanistic and architectural. Yet there are some important emergences, like the boundary walls, some churches and monasteries that run the risk of seeing their actual historical importance underrated by their being hardly usable (private sites) or devoid of any specific thematic path. The system of walls consists of remains which are only partly visible, while its possible history is documented by both historical sources and by researches performed lately. Only the stretch south of the monastic complex of San Francesco is presently visible. Without an appropriate didactic equipment, it is therefore hard to glimpse the visible parts of walls and the general layout of the very circuit. As for the Norman/Swabian/Aragonese castle, this is accessible in all its restored parts and a suitable illustrative equipment is present; an organized guide service is also available on the spot as well as a small book shop, where you may find free brochures on the fortress, published by the Municipality, and purchase publications on the town and on the Gargano Park. In the Downtown, the presence of the complex of San Francesco inside Museo Tancredi is to be highlighted. The present level of valorisation of downtown Monte Sant'Angelo as urban fabric is satisfying for the steadfast conservation interventions and improvement of the quality of spaces that have interested the town in the last years. It is necessary anyway, to further improve the urbanistic and architectural arrangement, particularly regarding street, squares, urban furniture, and to update the tourism sign system.

THE TERRITORY

The territory around Monte Sant'Angelo offers a series of opportunities in terms of tourism, culture, landscape, environment, folklore.

The centres of San Giovanni Rotondo, San Marco in Lamis, Manfredonia are settlements by the diverse potential. Just think of the abbey of San Leonardo di Siponto (12th-13th century) just outside Manfredonia, the shrines in San Matteo (8th-9th century), the sanctuary of Santa Maria delle Grazie, a.k.a. sanctuary of Padre Pio. The latter already attracts huge masses from all over the catholic world.

Starting from researches performed by Centro di Studi Micaelici e Garganici, an itinerary among these sites may be identified, linking them with other

peculiar itineraries that rise from the flat towards Monte Sant'Angelo, San Marco in Lamis, San Giovanni Rotondo. Among these itineraries, those ones that represent the final part of the so-called *via sacra Langobardorum* are to be highlighted, the old trail that pilgrims used to walk once past Rome and before heading out to the Gargano and from there to the Holy Land. This path was never interested by interventions of valorisation; studies do exist, yet they should increase, to allow for an intervention aiming at the discovery of the actual, physical route and at the installation of a sign system and of proper illustrative equipment. The Apulian Museum network in the neighbouring centres (San Giovanni Rotondo, San Marco in Lamis, Manfredonia) may have an important

role in the valorisation and fruition of the heritage. The interest about the network has lately risen in the world of education, especially primary and secondary school.

The Natural Park established on the Gargano Promontory hosts a Naturalistic Museum with specific sections on the characteristic flora and fauna, as well as a section dedicated to the archaeological finds that date back to the important prehistoric phase of the area.

The Park Authority organizes various kinds of guided tours (landscape, environmental, historical/artistic) on different itineraries, equipped on the spot and promoted through information material and the website www.parcogargano.it.

The Abbey of Santa Maria di Pulsano

6.5 PRESENT LEVEL OF PROMOTION AND AWARENESS BUILDING

6.5.1 CIVIDALE DEL FRIULI

In Cividale activities linked to promotion and awareness of the population regarding cultural assets in general have always been very intense and of a high level also due to the presence of numerous cultural associations in the city and territory. Recently there was the development of some specific initiatives concerning Longobard heritage and for which optimisation is in progressed or already planned. Starting from 2005 in particular, Cividale Administration began specific initiatives on topics linked to Longobard culture and history, promoting meetings, television programmes, publications in the *Bollettino Comunale* [local paper] and the daily press.

Mittelfest in Cividale

Among these the following can be cited:

- joint participation of Cividale and Brescia in the International Tourism Trade Show of Milan for the promotion of Longobard Heritage;

- scientific publication in Italian and English: Hjalmar Torp, *Il Tempietto Longobardo. La cappella palatina di Cividale*, [The Longobard Shrine. The Palatine chapel of Cividale] Cividale, 2007;

- The historic Romance, Isabella Vaj, *Desiderata*;

- The Convention of the National Association of Tourist Guides (9- 13 November 2007, Cividale) focussed on sites linked to UNESCO candidature;

- The International Convention on the landscape-cultural Mosaic: “*Will, freedom and necessity in the creation of the landscape cultural mosaics*”, (Cividale, 25- 26 October) organised by the Department of Biology and Agro-Industrial Economy of the University of Udine;

- Numerous publications of articles in the *Bollettino del Comune* and daily press;

- Scientific-cultural television programme “Superquark” by RAI 2.

From the point of view of school education, there are nearly all the types of middle and higher education Institutes in Cividale, in the ministerial programmes for which there is a considerable section dedicated to the history of the Longobards. Specialist centres are the School of Specialisation in Artistic Historic Assets of the University of Udine in relation to classical culture, archivist-documentary, musical, other arts, restoration, the environment and its protection and folklore. Courses of study that are the subject of two framework agreements with the same Atheneum: the first, countersigned by the Patriarch Project Promoter Committee of Aquileia, relative to thesis studies, research and scientific and technological in-depth examinations on the documentary-archivist whole and to the historic-archivist Centre; the second – in itinerary – which will be signed by the Rector of the University of Udine and the Mayor of Cividale and will have as its

subject the application of various scientific disciplines and experimental activities benefiting the Heritage and the endogenous resources of the territory.

Also for this purpose there has been the construction or establishment in progress of specific structures, named “Laboratories for Heritage and Science” and “Longobard Workshop”.

The “Laboratories” are and will be active in direct function to the development of projects and actions inherent to Heritage assets and endogenous resources of the territory of Cividale (documentary archivist and bibliographic area; artistic-architectural area; osteo-archeological area; agro-food area and oenogastronomic area; naturalistic and experimental observation area). These structures will also be the subject of programmed visits above all on the part of students who will be able to carry out aimed experiments based on specific programming.

The “Workshops” on the other hand, represent scientific-divulgative centres displaced in the junction points of the Longobard itineraries with the purpose of giving visitors also in the case above all students and young people a vision of the whole of the reference micro-territories in which, next to the significant Longobard routes, there are other environmental and historical specificities that are productive both in the agricultural sector and that of the characteristic and artistic craftsmanship. It is necessary to consider, under the profile of sensitisation and promotion, that for some time the National Association of Tourist Guides, in the various local sections, have been organising trips and study visits with specific reference to the monuments and assets of Longobard origin. Between the *Stakeholders* and the Association, the optimisation of this activity has already been agreed, specialising it further with an overall outlook of the assets of the Place and extending it to the territory with the addition of more profound knowledge

also on the Site “*Italia Langobardorum*” as a whole, for the necessary historical-artistic recall induced by UNESCO candidature.

There are various different associations in Cividale such as the Youth Tourist Centre, the Student Tourist Centre and the ACLI Tourist Centre which are local expressions of national “networks” recognised by the Ministry for Social Policies and which are engaged in the realisation of initiatives aimed at sensitisation (such as cultural exhibitions, town itineraries, competitions) and the organisation of educational courses. The latter is a function for which the associations are enabled.

Since 1991, Cividale is the premises of the “*Mittelfest*” Association and the relative *Festival di Prose, Dance, Poetry, Visual Arts and Marionettes of the Central European Countries*. The objective of the *Mittelfest* is that of contributing to the development of knowledge and exchange of experience in the sectors of performing arts, theatre and music, among Friuli Venezia Giulia and Central European countries, with particular attention to the counties adhering to the “Central European Initiative”.

In addition to the artistic aspects there are the integrative functions of university education carried out by the Associazione Carta di Cividale, an original reality consisting of hundreds of European university students. The Association organises the “Youth of Europe” Meeting in collaboration with the network of over 25 universities of the countries adhering to the “*Central European Initiative*”. The activity includes the analysis of elements shared by Central European Cultures and, therefore, specific attention is given to the start up of in-depth examinations on the influx of Longobard culture in the various Countries across which the latter has travelled in history.

Contemporarily the Associazione Carta di Cividale works as organiser on behalf of regional and national Institutes, the OECD

LEED Programme of Paris the “*International Desk / Italy - South East Europe*”, an initiative directed at optimising economic exchange between Italy and a vast area of Europe and, in relation to this, to promoting culture and endogenous values of the Territories with specific reference to UNESCO (Technical Task-force works on the topic “Valorisation of the Territory”). In the context young senior year students and postgraduates experiment the approach at the birth of new activities and are sensitive to the added Value of the identity of the Territory.

From the point of view of folklore, the local cultural context working in this sector is very active; among the numerous initiatives that are organised are the “*Palio di San Donato*” which since 1999 constitutes an interesting historical re-enactment which is inspired by the Palio of 300 dedicated to San Donato, carried out under the direction of cultural institutions such as, for example, the Association for the Development of Historical and Artistic Studies of Cividale

and the *Forojuliense Historical Group*. Or the historical Re-enactment of the “*Messa dello Spadone*”, a ceremony which recreates the ordination that the Patriarch once received from the hands of the Emperor, as the lord of the manor of the whole region. It is a very bright fabric which will be completed according to forecast at the realisation of initiatives of promotion of the Longobard Heritage and culture.

As a development of the Sensitisation and Promotion Plan, foreseen, therefore, is a general optimisation of the initiatives aimed at creating, in the various segments of the population (students, teachers, operators in the sector of hospitality, economic categories, weaker social groups) a higher knowledge and awareness of the values of the local Longobard Heritage and that of the reference territory with the purpose of creating an overall organic “system” of support for the tourist-cultural flow for a better orientation in visits to the Heritage and the territory.

Folkloristic event at Cividale del Friuli

6.5.2 BRESCIA

The Site has been the focus of growing attention through the realization of various activities, advertised with special illustrated brochures and with printed material on the monumental area and the monastery.

The Site is appropriately marked by a system of road signs, which also indicates walking itineraries for visitors. Such signs can be found at the train station and on main roads of access to the city. The Site is also indicated among the main tourist attractions on the sign that welcomes travelers approaching the city over the highway exit "Brescia Centro." More signs and totem poles advertising the Site are present in the area in front of the Museum and disseminated in various parts of the city.

The following are some of the main activities:

"Museum and School" educational activities program

A close collaboration has been established with the Provincial

Educational Board for the planning and dissemination of educational activities for schoolchildren. Currently, 23 different types of workshops are available that include practical activities as well as visits to the monumental area, the monastery, specific sections of the museum and exhibited objects. Four classrooms in the museum are exclusively used for these workshops. Other workshops focus on specific buildings that are situated in the buffer zone the Picture Gallery Tosio-Martinengo and the Castle with the Museums of Arms and the Risorgimento. A special brochure printed in 25,200 copies was designed and distributed to promote the educational activities for the school year 2007-2008.

Guided Tours

Visitors can pick among didactic and thematic tours, led by expert instructors, and coordinated by the Comune di Brescia and the Fondazione Brescia Musei; or can choose tours led by professional guides.

Conferences, Talks and Meetings

These are organized in the Auditorium of

the Museum of Santa Giulia, located within the sixteenth-century church of S. Giulia. The topics of conferences focus on the site, but also range to other subjects. Regular meetings are held, and refresher courses offered to teachers. Educational tours targeted to Italian and foreign journalists are organized. Restoration projects concerning the objects in the museum, as well as books published on the monastery, the museum and its artifacts, on the city, and on broader cultural issues are publicized.

Participation in Thematic Networks

The Museum participates in thematic museum networks such as *MA_net*, *Rete dei Musei Archeologici delle province di Brescia, Cremona e Mantova*; *Rete dei Musei Storici della Lombardia*; and *Associazione Longobardia, Regione Virtuale Europea*. Membership to these networks contributes to the dissemination of information concerning the importance of the Site, as well as to raising scientific standards of projects and the organizational skills of personnel.

Temporary Exhibitions

The temporary exhibitions organized by the Civici Musei (Town Museums) and by the Fondazione Brescia Musei as well as by third parties take place during the entire course of the year, increasing and enhancing the cultural contribution of the museum.

In particular, the Municipal Administration has approved, for the period 2004-2008, the project: *Brescia; Lo Splendore dell'Arte* [Brescia; The Splendour of the Art]. That project will include a series of important exhibitions that will be organized by an external company contracted by Fondazione Brescia Musei.

The main temporary exhibitions organized in the course of the year 2000 are the following:

Didactic laboratory in the *Museo della Città*

Exhibition	Period	Number of visitors
The Future of Longobards	18 June - 10 December 2000	177,468
Brescia and the Holy Crosses	31 March- 1 July 2001	18,515
Byzantines, Croats, Carolingians	9 September 2001 - 6 January 2002	44,426
Vincenzo Foppa. A protagonist of the Renaissance	2 March - 30 June 2002	63,448
Roman Brescia. The <i>Domus dell'Ortaglia</i> . Rediscovering Aphrodite	2 March - 2 November 2003	78,769
Monet, the Seine, and Water Lilies. The Great River and the New Century.	23 October 2004 - 3 April 2005	440,564
Gauguin and Van Gogh. The Adventure of New Colors	22 October 2005 – 26 March 2006	541,547
Turner and the Impressionists	28 October 2006- 9 April 2007	352,415
	Total visitors	1,717,152

There are well-known remains and artistic objects from the Longobard age in Brescia, which are often requested on loan to major exhibitions in Italy and abroad. In addition to customary guarantees about safety and security that the requesting institution must guarantee, the concession of such requested early medieval pieces is subject to a careful evaluation of the scholarly aims of the institution and the exhibition. Some of the most important recent exhibitions are the following:

- *Roma e i Barbari* (Venice, Palazzo Grassi, starts on 28 January 2008);
- *I Longobardi. Dalla caduta dell'Impero all'alba dell'Italia* (Torino, Palazzo Bricherasio, from 28 Sept. 2007 to 6 Dec. 2008; Abbey of Novalesa, from 30 Sept. 2007 to 9 Dec. 2007);
- *Crown und Veil* (Essen, Ruhrlandmuseum, from 19 March 2005 to 3 July 2005);
- *Hrvati i Karolinzei* (Split, Archeological Museum, from 20 Dec. 2000 to 30 May 2001);
- *Cataluña en la época carolingia: arte y cultura antes del románico (siglos 9. y 10.)*, Barcelona, 1999;
- *799 Kunst und kultur der Karolingerzeit. Karl der Grosse und Papst Leo III in Paderborn* (Paderborn, Ausstellungseröffnung, from 23 July 1999 to 1 Nov. 1999).

Concert inside the Church of San Salvatore

Most significant current activities

• Exhibitions program 2007 - 2008
 “America! Storie di pittura dal Nuovo Mondo” [America! Stories of paintings in the New World] (24th Nov. 2007- 4th May 2008)
 “Un tesoro di genti celtiche nella pianura a nord del Po. Le dracme di Manerbio” [A treasure of the Celtic peoples in the plains to the north of the Po. The Manerbio drachmas] (1st December 2007 – 4th May 2008)
 “Il Cardinale Angelo Maria Querini. Un collezionista a Brescia nel Settecento tra antichità ed erudizione” [Cardinal Angelo Maria Querini. A collector caught between antiquities and erudition in eighteenth-century Brescia] (closes on 2 June 2008);

Events

The museum often hosts events, initiated by the Fondazione Brescia Musei, or upon request from external entities, provided they are congruent with preservation aims. The “Feast of Santa Giulia” is particularly significant: Fondazione Brescia Musei organizes it toward the end of May each year. It has now been running for seven consecutive years and it is an opportunity for visitors to explore the Museum and its neighborhood. The Feast comprises a numerous series of smaller events that take place during a single weekend: exhibitions, educational and thematic workshops for children and adults; musical and theatrical shows that accompany dinner served in the enchanted atmosphere of the

Monastery; costume plays that reconstruct past life in the Monastery; and the fair of Santa Giulia which unfolds along the streets of the Museum neighborhood, providing the opportunity for visitors to learn about the museums existing in the Lombardy region as well as acquainting themselves with its food, wine, garden and orchard products. In 2007, the Feast of Santa Giulia was promoted through 30,000 special brochures and 500 posters. The Museum participates in “Culture Week,” and “European Heritage Days” and to “FAI Spring Days”. In addition, it organizes special events, sometimes in coordination with temporary exhibitions, enhancing the worth of the Museum as a place that brings together people and culture.

The monumental area during the Feast of Santa Giulia

The project "Brescia Musei Club"

In January or February 2008, the Fondazione Brescia Musei will create the "Brescia Musei Club," an association dedicated to those who visit the museums in Brescia every year. Members will have unlimited access to the Musei Civici (Town Museums); will benefit from a series of discounts offered by the cultural associations linked to the Fondazione; will be entitled to participate in the initiatives sponsored by the Club; and will be kept informed of museum activities. One of the projects underway, envisages the establishment of a network that will include the main museums of northern Italy. The initiative will be promoted through an especially predisposed

communications plan and the production of special brochures.

Agreements

Fondazione Brescia Musei will draft agreements with local and national associations, among which the Fai and the Italian Touring Club.

Communication aiming to promote the Site and its activities with the general public uses multiple channels: printed matter, which includes the publication of specialized books and newsletters sent to visitors, cultural associations and special groups of museum-goers; and digital formats such as videos and websites.

During temporary exhibitions, special promotion campaigns are added to those that are regularly scheduled, increasing impact.

- *Printed matter* with information on the Museum is published in several languages there are brochures in Italian, English, French, German, Spanish and Japanese.

Multiple *distribution channels* are used to disseminate the brochures: specific mailing lists; special hand deliveries across the town and the province; the InfoPoint of the Museo di Santa Giulia and the Tourism Office; fairs specially dedicated to Tourism, such as the Borsa Italiana del Turismo in Milan; and major local and national dailies such as *Corriere della Sera* and *Venerdì di Repubblica*, which distribute the brochures together with their newspapers, thanks to special agreements.

- *Multimedia sources* provide

information on the Site and on some particularly important artifacts such as, for example, the Cross of Desiderius. Videos are shown both in the museum and in places with high numbers of tourists, such as airports and taxis.

- Two *Internet sites* are devoted to the monastery complex; each focusing on a specific purpose.

www.museiarte.brescia.it offers scholarly information on museum sites, the collections, and research tools such as the library and the photographic archive. *Www.bresciamusei.com* instead is written in multiple languages and provides information on the services offered by the museum to visitors, including opening hours, ticket prices, reservations and cultural events, parking, public transportation and a city map. Further information is provided on other city museums and tourist itineraries in the city and the province. In addition, addresses of hotels and restaurants and useful phone numbers are provided, together with the possibility of buying printed material online.

The websites provide links to incoming agencies, Internet portals dedicated to the city, and associations linked to the Civici Musei.

- The *press office* of Fondazione Brescia Musei, in coordination with the press office of Comune di Brescia, maintains a close connection with the press, informing them of all planned events with press releases and press conferences. For some particularly important events, Fondazione Brescia Musei hires an external press office.

- *Books and booklets edited by the Settore Musei Civici and the Fondazione Brescia Musei* are dedicated to the history of the monastery, the archeological site, and the museum within the Site.

- In the last few years, particular focus has been dedicated to merchandising objects that can be bought in the museum bookstore, and that are created especially for the monastery or in

connection to permanent and temporary exhibitions in the museum.

The main current or planned activities are the following:

- a comic strip on the Longobards will be sold in the museum bookstore, in other bookstores, and as a supplement to the local daily *Il Giornale di Brescia*;
- a video on the Museum of Santa Giulia is in the works;
- new merchandising objects are being designed, such as the replicas of Longobard jewelry and tie patterns inspired to Longobard motifs;
- the local network Teletutto broadcasts cultural programs concerning the Site in the late afternoon and early evening;
- an e-commerce online service is available on *www.bresciamusei.com*.

Among the things that need to be done, is a greater coordination of the graphic layout of materials concerning the Site. Over the years it has undergone various changes; it is necessary to impose a unified logo and terminology to all materials referring to the Site.

BUFFER ZONE PROMOTION

Following the opening of the Museum of Santa Giulia, the entire *buffer zone* has been the object of growing attention and efforts to promote Brescia as a city of the arts and a privileged destination for cultural tourism. The Municipality of Brescia, the Fondazione Brescia Musei and all other administrative bodies in charge of tourism promotion are involved in the promotion. Numerous subsidies and publications in various languages and with varying levels of scholarly depth are available to citizens and visitors. Guided itineraries and educational projects to disseminate historical and artistic knowledge are planned. The itineraries are available on the Internet and are indicated with special road signs.

The outcome of this enhancement and promotion policy, which has also enjoyed the contribution of local universities, is

increased awareness on the part of the local population, the public administration and the private sector.

The promotion and enhancement of tourism in the city represents in fact a main factor of economic growth for the entire urban district. Cultural tourism, as opposed to more traditional forms of tourism, has steadily grown in recent years. The improvement of services offered to tourists and the quality of artistic and cultural attractions, which has been the objective of the last few years, have made Brescia one of the most renowned destinations in Italy and in the world. That has been possible also thanks to common objectives and policies pursued by the organizations to which Brescia belongs, (particularly the association "Circuito Città d'Arte della Pianura Padana," which is in turn linked to other networks of European cities such as "Villes d'art et métiers," and "Historic highlights of Germany;" the association "Castelli e Ville aperti in Lombardia," linked to similar national organizations;" and the Tourist System "La Via del Ferro dalla Valtrompia a Brescia," established by Lombardy Regional Authority on the basis of D.G.R. n° 3469 dated 7/11/2006).

The actions that have been taken to promote Brescia as a tourist destination both at the national and international level are the following:

- participation to fairs and workshops;
- organization of educational tours and road shows;
- production of support materials such as brochures, maps, audio guides, videos and gadgets that are distributed also at the Tourist Information Office of the municipality in Piazza della Loggia.

The tools we are using to achieve the above are:

- Internet sites with descriptions of the territory, written in the main European languages;
- Bluetooth connection system of the major monuments in the city currently

being experimented in the area of Santa Giulia and the archaeological area of the *Capitolium*. This technology will enable visitors to request and receive information on mobile phones. The service might be extended to the area outside the Tourism Office with a hotspot Infopoint to provide general information when the Office is closed.

The protagonists of these changes are, together with the Municipality of Brescia, Bresciaturism and Fondazione Brescia Musei. These organizations are supported by numerous research and development activities carried out by Universities and Research Institutes.

A further, important component of the promotion of the district is the network of cities that have a special relation with the Municipality of Brescia: Darmstadt, Logroño and Betlehem and the other cities of the associations mentioned above.

The analysis of tourist flows in Brescia and its province shows a positive and growing trend. That is due to the promotion of the city as a destination of artistic and cultural tourism as well as to the improvement of standards of services offered to tourists. Projects are underway to improve the standards of services even further, especially those targeting foreign tourists. Blockbuster exhibitions in particular draw large numbers of visitors with a positive effect on restaurants, coffee shops and stores whose number and services are to be further increased. A project that will enable online reservations for all tourist structures, services and attractions is underway.

The Forum del Turismo Sociale di Brescia e della sua Provincia was established in 2000, when it became apparent that, in the last decade, Brescia had dramatically evolved from a city based on the manufacturing industry to one whose main economic source was tourism. The purpose of the Forum is to guide and help this process, finding appropriate measures and solutions to Brescia's particular situation. The Forum brings

together the most important associations involved in social and cultural activities and tourism, especially targeting the young the non-profit sector of the industry.

The Forum supports and coordinates the activities of its associates and its declared objectives are the following:

- to enhance art cities, including smaller ones, proposing projects for the creations of tourist itineraries;
- to enhance social tourism in Brescia and Lombardy;
- to promote cultural, culinary, sports, and spa activities for tourists;
- to promote projects and synergies for the development of school, environmental, and religious tourism as well as tourism connected to sports events;
- to promote and assist the establishment and growth of other organizations with similar aims;
- to manage, with the contribution of members, administrative and technical structures of organizations active in the tourist sector;
- to provide training and refresher courses for personnel in the tourist industry.

Among the awareness-raising activities promoted by the Forum are conferences and meetings. In particular, the Forum was responsible for organizing the projects "Associazione Longobardia Regione virtuale europea" and "Turismo in Rete," which includes counters and informative displays on social tourism in Brescia and its Province.

A call-center has been set up for those who wish to make use of the services of a professional tour guide in the city. The call-center coordinates the five authorized tourist guide organizations in the Province of Brescia, which are part of the AGTA (Associazione Guide Turistiche Autorizzate), providing an efficient system of reservations for visitors.

In 2004, the Municipality of Brescia, Fondazione Brescia Musei and the Association that groups store owners and

craftsmen collaborated to produce a new system of tourist road signs. The intention was to encourage the use of walking itineraries by the citizens of Brescia and its Province as well as by visitors, which would also bring them in closer contact with many of the cultural and commercial enterprises in the city. Once the most appropriate itineraries were identified, new and more extensive signs and walls plaques and labels were affixed to monuments, along the footpaths, and in tourist parking areas. The identification of the itineraries was made by a group of experts who identified not only paths that led to the most important historical monuments, but also through some of the most commercially lively parts of the city. The following projects have been carried out:

- tourist signs of the most significant areas and monuments in the *buffer zone*, from the railway station to the main roads of access;
- special tourist signs for itineraries on foot;
- special signposts for specific events;
- signs concerning the main tourist attractions at the highway exit leading to the center of town;
- new road signs referring to tourist attractions, both along walking itineraries and in major parking areas.

In 2004, the descriptions of monuments, affixed on plaques and signposts, have been rewritten.

Each year, numerous events are organized both by public organizations and by the private sector, ranging from concerts to theater and movie productions, to historical plays and reenactments, to sports events.

The following are the most important events of international significance:

The Mille Miglia, a historical reenactment of the Mille Miglia car race that started in Brescia in 1926; the "Arturo Benedetti Michelangeli" piano festival, one of the most important piano festivals in the world; the International Photography

Biennale, held in the Museo di Santa Giulia; and the Brescia Marathon. Several other important events are also held during the course of the year.

Piazza Vittoria during the Mille Miglia

In spring and summer, the events are part of the “Estate in Città” and “Città in Festa” programs.

“Estate in Città,” or Summer Festival, includes a rich variety of events that the Municipality organizes each year and that the inhabitants of the city and its district have grown to expect. These are: the *Summer Festival*, and a series of concerts: *Jazz on the Road*, *ZTS- Zone a Traffico Sonoro*, *Festa Internazionale del Circo Contemporaneo*, *Cannes>Brescia*, *Brescia con Gusto*, *Le Dieci Giornate di Brescia*, *Cantiere Musica Giovani*, *Arene cinematografiche*, and *Festa d'Europa*.

“Città in Festa” Since 2003, small concerts, plays, and other shows have been staged in particularly scenic spots of the city, providing passersby with the possibility to enjoy a pleasant evening out. From autumn to spring, the two city theaters, the Teatro Grande and the Teatro Sociale, offer a rich program of opera and plays respectively, as well as concerts included in the ethnic music program “Musiche dal Mondo.”

The Fondo per l'Ambiente Italiano (FAI), or Italian Environment Fund, contributes to promoting the city by admitting visitors to buildings that are generally close to the public on the annual “Spring Day.” Thanks to the involvement of schools, it promotes these initiatives through projects such as “Castel^{to}ur,” focusing on the study of the Castle, and “Brixiatour.” The latter includes the study and promotion of the underground vestiges of ancient Roman Brescia, including the publication of a leaflet that illustrates the outcome of recent archeological investigations. Another related project is “FAI più bella la Brescia che ami,” which promotes and enhances the historical and artistic heritage of the city, especially through the program “Brescia to visit, to love, and live”

as well as the publication of a brochure on the Lapidario of Piazza della Loggia. Finally, FAI funds and seeks sponsors for the restoration of the monuments of the city.

Some of the most important cultural associations organize historical reenactments of various periods such as, for example, “Frederick II attacks the Castle” or “The Brescia jousts.” One final initiative worth mentioning is “Urban Trekking” a sports event that started in Siena in 2002 and is repeated each year simultaneously in 34 Italian cities. “Urban Trekking” proposes different itineraries through the town each year, including unusual places and sites not generally open to the public, among which are various museums, the monumental area and some sectors of the Museum of Santa Giulia.

A particularly noteworthy project is Brescia Città d'Arte which occurred on the occasion of the series of exhibitions organized for the “Brescia: The Splendor of the Arts” program. Aim of the project was to increase familiarity with the historical center of the city, including its commercial venues.

The major initiatives that were part of the project, and which included publications and events, are the following:

An Exhibitions Card, issued since 2004, aiming at promoting the commercial as well as cultural offerings of the city, and Brescia into a major tourist destination.

The Discovering Brescia project, which started in 2006 and includes guided tours to churches, theatre shows, the presentation of books, concerts, and a chocolate fair that especially targets local craftsmen.

The “Brescia and its Territory” booklet, published starting in 2004 on the occasion of the first exhibition of the “Brescia: The Splendor of the Arts” program, is dedicated to the city and its cultural offerings, aiming at the creation of a related network. The booklet is published in approximately 1,300,000 copies and is

distributes together with national and local dailies: Corriere della Sera, La Repubblica, Giornale di Brescia, and Bresciaoggi.

In order to coordinate such initiatives and render them more efficient, two special offices have been set up by the Municipality. These are

The Office for Events, that organizes and coordinates various cultural events taking place in the historical city center.

The Office for the Urban Marketing Plan whose purpose is to identify the strategic guidelines to revitalize the Buffer Zone and to increase its commercial and social viability.

In 2007, the Committee for the Promotion of Commercial and Artisanal Enterprises in the Historic Center and other Urban Sectors has been established, which will assess and evaluate projects aiming at the commercial revitalization of the city.

Lombardy Regional Authority Direzione Generale Agricoltura has promoted the project The Routes of Wine and Taste in Lombardy, which identifies culinary itineraries that will offer practical support to visitors in Lombardy. The project brings together organizations that are both public and private, and committed to providing quality services to tourists. These services range from hotels, to road signs and labels dedicated to visitors set up along itineraries and monuments. In particular, routes in the district of Brescia are “*Strada del Vino Franciacorta*” (The Route of the Franciacorta wine) and “*Strada del Vino Colli dei Longobardi*” (The Route of the wine of the Longobard hills).

6.5.3 CASTELSEPRIO-TORBA

Both the Superintendent's Office for Archaeological Heritage in Lombardy and the FAI have been working to design and implement numberless promotion and awareness-raising initiatives on the value of this site, which were targeted especially to schools. These activities consist in the production and distribution, free of charge, of information materials related to archaeological, historical and artistic features as well as in guided tours of the sites.

Theme-based exhibitions of an educational and scientific nature are also held in the Park; conferences, theatrical performances, concerts, public readings of poems and literary texts related to the site are also organised. Special days dedicated to the local population are envisaged to describe the latest results of investigations and thereby strengthen

the feeling of belonging with the territory; this has led, in particular, to the publication of several papers in local and national magazines specialising in the popularization of technical issues.

During an especially significant event that relies on a long-standing tradition - the "Settembre Sepriese" - as well as on special occasions, or upon the request of organisations and associations, initiatives and exhibitions of a different nature are held in the Park - contemporary sculpture exhibitions, guided tours of the Park, organisation of trekking trails, etc. Additionally, the Park participates in the national events programmed by the Ministry for Cultural Heritage ("Culture Week", "European Heritage Days"), for which ad-hoc materials of a scientific and educational nature are usually made available.

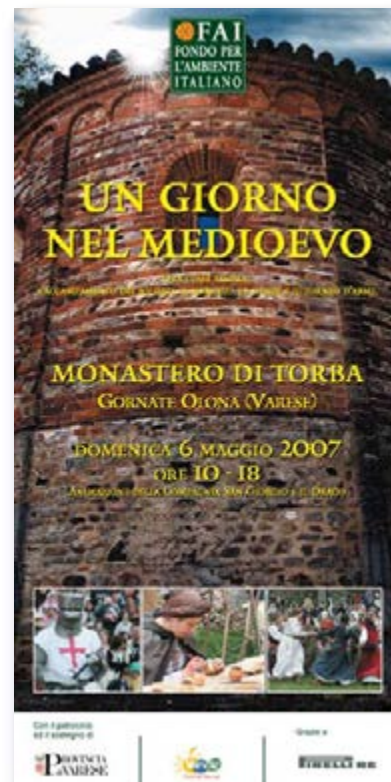

The site is also promoted via media

channels and the web pages of the Ministry (www.beniculturali.it) and the Superintendent's Office for Cultural Heritage of Lombardy, as well as via local web sites (Province, Municipalities).

As for the near future, special importance should be attached in promotional terms to the opening of the Antiquarium (in the former Monastery of St. John's), where a model reconstruction of the castrum, the walls and the buildings will be hosted. This will allow a bird's-eye view of the whole complex in the status it was prior to its destruction.

On its part, the FAI is waging a major promotional campaign for the Monastery of Torba with the help of local, national and international stakeholders such as the "Varese Convention Bureau" and "Federalberghi Varese".

The Monastery was included in the guidebooks published by the Touring

'Un giorno nel Medioevo' (A day in the Middle Ages), event organized at Torba complex by FAI

Concert at the *castrum*

Club and the CTS (Centro Turistico Studentesco E Giovanile - Juvenile Tourism Centre) and is benefiting from the effects produced by promotion of all FAI properties before the National Trust and the International Council of Museums (ICOM).

The Regional Directorate for Lombardy and FAI co-operate actively in implementing the Rile-Tenore-Olona Park jointly with the municipality of Castiglione Olona (which is the managing body as well as the lead municipality in the PLIS) and with all local authorities as included in the park's boundaries. All these institutions are available to collaborate with the FAI also on the occasion of FAI's own initiatives - by making available the municipal watch service, civil protection groups, local tourism boards, co-operatives and groups of volunteers so as to contribute, to different degrees, to the successful outcome of those initiatives.

A project envisaging the collaboration between FAI and the Libraries' Network of the Lake Area is currently under consideration; additional initiatives envisage revamping the Valmorea railway for purposes of tourism, whilst the Province of Varese opened up a tourism information office at the Malpensa intercontinental airport.

Event at Torba complex: reconstruction of a tactical episode

6.5.4 SPOLETO

One of Spoleto's main vocations is that linked to culture and art in a wide sense. In fact, Spoleto constitutes in itself the cultural capital of Umbria a city which artistically, in its own region but also at national level, occupies a position of absolute importance given what it has managed to achieve after the war.

Witnesses to this are:

- the *Accademia Spoletina*, possibly founded in 1477, the heir to the ancient Accademia degli Ottusi, is nowadays a publishing institution, also involved in cultural promotion organizing congresses, concerts and keeping its library open to the public. In some lists divulged by American universities, it is catalogued as the seventh amongst the thirty most ancient academies in Europe. The Ottusi mostly dedicated themselves to poetry and theatre: we owe their initiative the opening of the first public theatre in town, which was already active by the half of the 17th century, to soon undergo restoration works in 1675. The building, once called the Noble Theatre, bears nowadays the name of *Caio Melisso*;

- the *Teatro Lirico Sperimentale* (Experimental Lyrical Theatre Season), which this year reaches its 62nd edition and has the objective of selecting, training and launching young lyrical singers into the lyrical world;

- the *Festival of the Two Worlds* the 51st edition of which will take place this year; the *International Dance Week* (April) at its fifth edition, the *Piano Festival* (May); the *international High Medieval Studies Week* (the week after Easter) which this year celebrates its LVI edition.

The Festival of the Two Worlds has for decades constituted the largest artistic initiatives - Italian culture as the national and foreign press has underlined several times. All this means that the citizenry of Spoleto is not only used to living with art and culture, but is also fully aware that

The Festival of the Two Worlds, final concert

CISAM, the opening of the lessons in the “*Week of studies on Early-Middle Ages*”, 2007

these constitute presupposition and elements that are essential for sustainable tourist development and therefore economic, of its community. Sensitisation of the population but also the numerous Italian and foreign visitors to Spoleto (about 250,000 per year) is in the preparation phase. Citizens, numerous cultural and environmental associations and tourists are already favourably welcoming the candidature of Spoleto to become part of the UNESCO heritage together with other Longobard realities in the north and south of Italy. In the last few days two associations were established in Spoleto which could be operational in the sustainable development of tourism: the “Slow Tourism” Association and the “Rural Development” Association. With regard to the “Slow Tourism” Association, this is a movement intending to promote responsible and sustainable tourism for the protection and safeguarding of prestigious tourist locations, through educating and informing both the “traveller” and the resident (tourist operator, public administration, resident) giving the ancient value and meaning back to the territory. The rural development Association also has the

objective of promoting local sustainable development, to favour social-economic growth of the resident population, in line with the standards of other European countries and with the involvement of other local players and the activation of all community opportunities, national and regional. Among the priorities of the association is the adoption of a welcoming policy, of new residents and external investments, the activation of rural chains which represent an important symbol of promotion and local development, the promotion of sustainable tourism, the construction of the Slow Tourism Club at a national and European level etc.

In relation to formation the high training courses realised in the structures located within the city and its historical centre should be mentioned, in particular:

- The *CISAM*, that is the Italian Study Centre on Early Middle Ages which is based in Spoleto in the ancient *Palazzo Ancaiani*, is unanimously deemed as the most prestigious site in the WHL and interdisciplinary studies dedicated to history and culture of the Early Middle Ages (V- XI Centuries), therefore fully embracing the Longobard period subject

matter of the *Italia Langobardorum* project. All the greatest scholars of this period have taken their lessons in the weeks of study, now at the 54th edition, which traditionally take place from the Thursday after Easter until the following Wednesday;

- The *Teatro Lirico Sperimentale “A. Belli”* (Experimental Lyrical Theatre);
- the School of Book Restoration at *Rocca Albornoziana*;
- the Master in Olive growing and Olive oil at the Experimental Institute of Olive Growing;
- The Gianfranco Vissani. International Academy of Haute Cuisine.

Today in coherence with a commitment to constant renovation, faithful to its vocations, the CISAM, formerly presided by Raul Manselli, Ovidio Capitani and today by Enrico Menestò of the University of Perugia, carries out a brilliant editorial activity, including among its publications Series, Magazines, Periodicals, in ever increasing numbers, known and distributed not only in the entire world scientific community, but also to an ever more numerous public of honorary fellows passionate about the medieval centuries. The presence, therefore, of this subject of great historical weight and culture constitutes, for almost half a century, a ponderous means of sensitisation for a vast local, regional, national and international population.

In close collaboration with the CISAM Foundation concrete didactic actions are brought to life in favour of teachers in order to highlight at the level of learning in schools of all order and degree in the district (Municipalities of Spoleto, Campello sul Clitunno, Castel Ritaldi and Giano dell’Umbria) the circa two centuries characterising the Longobard period under a historical, artistic, social and economic profile.

In the official tourist site of the district of Spoleto (www.visitspoleto.it) there are already itineraries recalling Longobard art. During the first months of this year,

moreover, a paper publications will be produced which is relative to the various historical and artistic itineraries of the territory with particular emphasis on the Longobard period. The real world is nowadays flanked by the virtual world. With the periodical *Città Comune*, a newspaper regularly registered to the Court of Spoleto, a supplement will be published which will also be developed on the network through the creation of a portal of information, linked to the institutional site www.comune.spoleto.pg.it and to that of the network ww.italialangobardorum.it, dedicated to the Longobard Spoleto, through which it will be possible to divulge the history of the Longobards in our territory, the "treasure" that they left us in inheritance and the promoted initiatives.

A capillary sensitisation campaign aimed at professional, regional, national and foreign *stakeholders* such as tour guide associations, hotel and catering associations and consortiums of tourist operators, will be actuated in the near future.

Further promotion of Longobard culture and civilisation will be directed at university and post graduate students, above all foreign. American students have been coming to Spoleto for some years now to participate in courses in relation to the *Spoleto Arts Symposia* while others are brought by Maestro Lorenzo Ricci Muti. Others again have come and will come from Augsburg Polytechnic and the University of Heidelberg, department of Italian studies. Apposite Longobard itineraries will be dedicated to them in the framework of university and post university in-depth examination.

The effective promotion of Longobard testimonials in the territory, obviously with particular reference to the Basilica of San Salvatore and Clitunno Tempietto, will be realised through *educational* purposefully dedicated to *tour operators* and journalists active in the sector of

cultural assets and tourism.

The city of Spoleto will, moreover, be a carrier of the applications of promotion of the territory where it will participate both individually and in collaboration with the Agency for the Promotion of Tourism of Umbria and Tourist Fairs such as Bit of Milan, TTI of Rimini, the *World Trade Market* of London, the *Salon des Vacances* of Paris and Brussels and the *Fitur* of Madrid. Specific actions of promotion are foreseen for this year and will be repeated in 2009, on the market of the United Kingdom and the United States of America. The last week-end of March there will be promotional action in Charleston, South Carolina, the most European city of the United States as well as the host city of perhaps the largest artistic and cultural initiatives in the country *Spoleto Festival USA*, founded in the mid 70s by Maestro Gian Carlo Menotti, formerly founder of the *Festival of the Two Worlds of Spoleto*. Together with these, other important events have been the Spoleto Carnival, the Prize "*Ercole Olivario*", the Organ Concerts Review, Instruments&Music

Poster of the *Teatro Lirico Sperimentale* in Japan

Spring Festival, the *Festival Pianistico*, International Week of Dance, the X Cultural Week, Project *Spettacolo Umbria* (with funds from MiBAC, Umbria Region and Municipality of Spoleto), Special International Concert Mahler Orchestra, the Wines in the World, Spoleto Summer Events, the European Stars of Taste, One World Africa, Spoleto

A moment of the museum education activities

Wines in the World

Back Beat, Open Oil-Mills, the End-Of-The-Year Events.

Spoletto is famous for temporary exhibitions of contemporary art too. We can note among exhibitions carried out in 2007: "*Le stanze delle fiabe*" -with international artists as Jeffrey Isaac and Heidi Kennedy-; "*Thomas Shippers 30 anni dopo*"; "*Joseph Kossuth*" inside the International Week of Dance; "*Santi e Papi in terra d'Umbria*"; "*Fotografie di architettura spagnola*" by Joaquin Berchez; "*In absentia*" by Antonella Reggio and Marco Tronci Lepagier; "*Arte aborigena dall'Australia*"; "*Natura e Metamorfosi*"; "*Mater Dolcissima*" -26 contemporary artists represent the Nativity.

Many conferences, talks and meetings have been organized.

From the point of view of folklore, the local cultural context working in this sector is very active. Very suggestive is the parade of historic of "*Le Vaite*", which traces in a charming historical atmosphere the main phases of the old medieval tradition of Spoleto.

6.5.5 CAMPELLO SUL CLITUNNO

Activities related to promoting and increasing the population's awareness of cultural and environmental heritage in their territory in Campello sul Clitunno are considered to be of a fair level, thanks to the presence of associations that organise various guided tours and interesting cultural events. However, the quality of educational and information-providing material is not adequate for the cultural and environmental values of the area; there is an obvious lack of information boards, information material and tourist signs.

The Perugia Superintendence Department for Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage is about to create specific information panels with translations in several languages, to be placed in the area of the Temple. Visitors are currently provided with a map of the building containing the main information. Publications, brochures and guides written at Region promote knowledge of heritage, however. With regards to education, the Umbria Superintendence Department (SBAPPSAE) has a section dedicated to Education that deals with relations with schools and institutions of all levels and degrees and organises thematic refresher courses for teachers.

Instead, information material and services are available throughout the year at the near Fonti del Clitunno (Springs of Clitunno), where during summer time a Tourist Information Point is established 900m away from the Site. The cultural offer of the Site - enhanced by the high naturalistic value of the territory - is combined with a series of services to the general public, partially completed and partially under way, which concern the buffer zone and partially the entire neighbouring territory.

The Info-point of the Municipality

promotes the entire territory of Campello sul Clitunno, including neighbouring towns and main regional attractions. The promotion activity can therefore be summed up as follows:

Providing information on architectural and artistic structures of the Municipality and relative promotional material. Distributing informative material concerning the area and neighbouring areas, which is provided by the two main Tourist Offices (Spoleto and Foligno), each within its competence. The general guides, are instead offered by the Region. Most of the promotional material which is distributed free of

charge by the municipal Info Point is available in several languages (English, French, German and Spanish). The ticket office of the Fonti offers instead paid tourist guides.

- Providing information on accommodation and catering facilities (restaurants, hotels, rural accommodation, etc.);
- Hotel booking;
- Providing information on roads (road system, limited traffic areas, car parks, urban and suburban transport, city maps);
- Providing information on cultural initiatives and events (festival, events,

Concert at the Springs of Clitunno

concerts) relative to the entire territory, working times, ticket prices, city tourist itineraries, provincial and regional territory.

The Tourist Information Point mainly works during summer time: working times (open all day, Saturdays and Sundays included, as well as National Holidays) are the following: 9.30am-1.30pm/2pm; 4.30pm-7.30pm/8pm.

Throughout the year, the ticket office of the Fonti del Clitunno provides information and paid guides to tourists.

The Municipality launched a Tourism Info-line service, which is always active throughout the year, at +39 0743.275558.

Further information are also available on the website of the Municipality: (www.comune.campello.pg.it - e-mail: info@comune.campello.pg.it).

In order to implement the promotion and awareness enhancement system for the population and visitors, the Campello sul Clitunno Administration has recently started up a series of initiatives aimed at

raising the level of information about the territory, using publications and other means of diffusion (see item 22.5 Promotion and Awareness Enhancement Plan). In addition to cultural promotion, other initiatives contribute to diffusing knowledge of the territory that the site proposed for candidacy stands on and to spreading its image. Most of the initiatives are a regular occurrence. The most important folklore/cultural initiatives are the following:

- *On the first Sunday of each month* in Pissignano, very close to the *buffer zone*, there is an Antiques, Second-hand and Collector's market that now hosts 250 exhibitors. It is considered to be the number one Umbria Fair and the fourth Italian Fair of this kind due to its size and importance;

- during *Easter* the town hosts an event called "*La Falce e la Croce*", that includes popular songs celebrating the Passion and the arrival of May. The event continues during Easter Week, when the

Miserere and the *Stabat Mater* can be heard in the ancient parts of the town, mixing with rural traditions, the charity collections song and the wishes for a generous harvest: May is coming;

- in the month of *May*, the Municipality of Campello takes part in the initiative promoted by Legambiente "*Voler bene all'Italia*", under the patronage of the President of the Italian Republic, with the aim of optimising the beauty and resources of small Italian towns;

- in the months of *July and August* the offer of various types of events, together with the fact that they are free of charge has consolidated the appointment with a large range of events organised into the calendar known as "*Sere d'Estate*" that proposes a playbill very rich in theatrical performances, music, ballet and outdoor cinema;

- the event "*Medi@evo*" is also organized in August and takes place inside the very ancient castle of Campello Alto. The event recovers the medieval feast but combines

Medieval concert at the castle of Campello Alto

it with contemporary music, dance and arts by organizing exhibitions, performances and concerts. Craft workshops, display and tasting of typical products as well as animations for children complete the tourist offer.

As to the events that promotes local produce and traditional local cuisine it is worthwhile remembering:

- in August: the “Sagra del Tartufo Estivo” (Fair of the summer truffle) is organized in the village of Spina. An event that, during the years, has had more and more success. Its fame goes beyond the regional borders, since it has really become a national event. The “Sagra del Tartufo Estivo”, with all the related initiatives, is an important operation of territorial marketing;

- July/August: “Festa della Montagna” (The feast of the mountainis organized in Pettino, a mountain village. The “Festa della Montagna” aims at promoting and safeguarding all the aspects of the

mountain environment. During the event it is also possible to taste typical dishes made with local products. Also the animals become protagonists through shows and practical demonstrations of mountain life and work;

- in December: the “Festa dei Frantoi” (Feast of oil mills), during which tables for the testing of the local extra virgin olive oil are laid, is organized. An Event that for 23 years has put the “oil-tourists” directly in contact with the protagonists of the local oil production. So, on the occasion, it is possible to visit the oil mills when they are operational, to meet and deal with producers and, above all, taste the “green gold” just produced. The event involves almost all the territory and many collateral activities, which naturally concern the theme of the oil, so workshops, conferences, tasting, cooking and olive tree pruning, as well as painting and photograph competitions are held during the feast;

- the regional event “FRANTOI APERTI”

(Open oil mills) is also diffused in most of the territory and is organized with the purpose of enhancing the oil producing areas of the region, by illustrating the excellent quality of the product to tourists and residents.

There are some archives in the Municipal Historical Archive in the Campello sul Clitunno that help to understand the history of the town, that constitute a top-class source of documents to reconstruct the economic, social and political activities within the community.

There will soon be a series of interventions to upgrade and adapt the wing of the building that currently houses the archives, and which will also house the municipal library when work is completed. By optimising the space available, a consultation room will also be created where staff will be able to catalogue material and where the public will be able to consult archive and book sources.

Performance at the church of San Cipriano

6.5.6 BENEVENTO

An effective campaign to promote and publicize the historical and architectural heritage of Benevento and the surrounding territory is being mounted through editorial publications, tourist itineraries and organization of local festivals and events.

At Benevento as many as four history magazines are published (*Samnium*, *The Sannio Historical Review*, *Benevento Studies*, *Historic Archives of the Sannite region*) and there are several cultural associations which also deal with mediaeval culture. Every year interesting articles are published regarding this theme.

The popularizing and promotional activities of the company *Art Sannio Campania* should also be remembered: the task of this agency for the cultural assets of the Province of Benevento is to promote and manage the most of the local heritage. From 29th November to 1st December the agency was present in the 11th Salon of the cultural assets and activities of Venice, focussing on the valorization, awareness of and promotion of the museums and cultural rarities in the Sannite territory.

As regards the spread of knowledge among the resident population and students, numerous courses are frequently held in the ex monastery of S. Sophia to make the younger generation more aware of the merit of the historical documentation, particularly that covering the mediaeval and Longobard periods.

Cultural exhibitions are usually held in the G. Vergineo rooms of the Sannio Museum. Among these, during this year, the two *lectiones* of T.F. Kelly and V. Brown, the first illustrating mediaeval Benevento song (with choral performances in the Longobard church), the second illustrating Benevento writing.

Even if nowadays a widespread

awareness among the population of the importance of the monumental group of S. Sophia can be noted and, more generally, of the traces of the culture of the Longobard period, we cannot yet see throughout the territory any precise and active preoccupation regarding the problems of promoting these resources. One aspect that has to be addressed, therefore, concerns the choice of an effective means of communication. For the church of S. Sophia small brochures and concise guides have been printed and circulated, sufficient for the purposes of the occasional visitor, but they cannot be considered an effective documentation for true cultural tourism. Besides, the knowledge of the monument acquired a short time ago has not yet been made available to international experts, let alone the potential tourists. The only material published recently is the *Chronicon Sanctae Sofiae*, a work, however, intended mainly for academics.

An overall view of the promotion problem is therefore lacking and consequently it has hitherto been impossible to define a winning strategy and set clear, incisive objectives. The Cultural Assets Department of the Commune, in accord with the pertinent national Superintendencies and the Sannio museum, plans a series of cultural events dedicated to promotion and information concerning the Longobard heritage and culture; specifically, there will be an exhibition and conference regarding Longobard Minor; a "Cultural Asset Day"; the opening of archaeological sites; an exhibition entitled "Benevento in comic-strip form" where the artistic and cultural history of the town is presented through narration in unusual forms which reach those of school age more easily.

Finally, in the last two decades, the attention of the local institutions

Image from the *Chronicon Sanctae Sofiae*

responsible for cultural promotion has been directed to the world of entertainment, in particular the theatre, where the annual September event – the "City Lights" – offers a spectacle which shows the townspeople that the union of art, cultural heritage and the territory itself provides a unique opportunity for development.

Detail of a poster stuck up in the historical centre

The festival “four nights and.... more of full moon” enlivens, every year in July, the old town centre of Benevento, with theatrical events, musical dances and literary meetings.

In October an international university event is staged - “Universe Theatre” under the artistic direction of Ugo Gregoretti.

6.5.7 MONTE SANT'ANGELO

The Sanctuary

The sanctuary houses a library with both scholarly and popular books on the subject. The events that take place at the sanctuary as well as initiatives linked to the sanctuary are advertised in the newsletter "MICHAEL."

The sanctuary has a large and modern Auditorium with 300 seats and four halls where conferences, meetings, seminars

and lecture courses are held. A website in Italian, French, English and German provides information on the sanctuary and other monuments in the city. The url address is:

<http://www.gargano.it/sanmichele/>

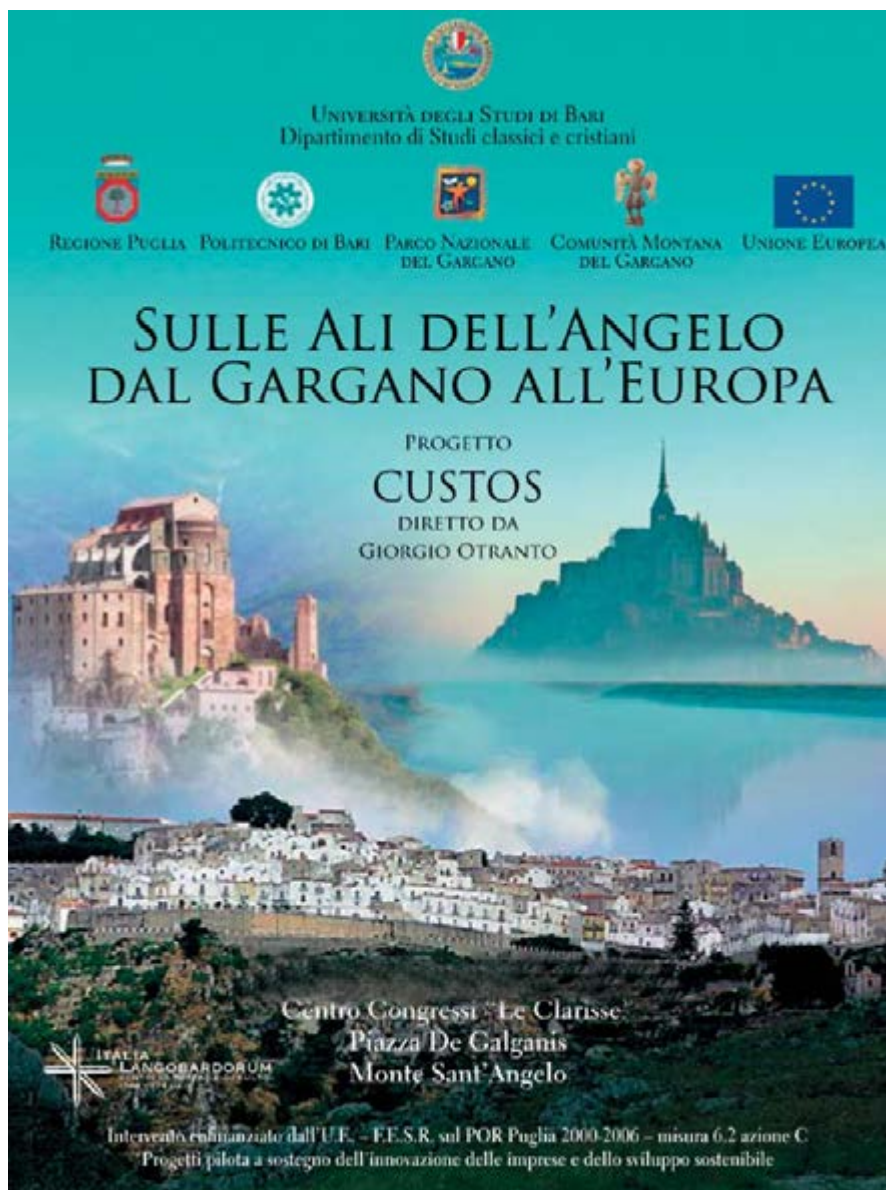

The former medieval convent of the Poor Clares, recently renovated with European funds, in the town of Monte Sant'Angelo, houses since 1995 the *Centro di Studi Micaelici e Garganici*, a center for the

study of issues linked to the cult of Michael and the area of the Gargano. The Centro is a creature of the Department for Classical and Early Christian Studies of the University of Bari, and was established thanks to an agreement with, and support from the University, the Municipality of Monte Sant'Angelo and the Comunità Montana of Gargano.

The objectives of the Centro are to study and enhance the complex historical, archeological, architectural, epigraphic, literary, hagiographic, artistic and ethno-anthropologic documentation that is connected to the Sanctuary of San Michele Arcangelo and the area of the Gargano, especially for the early Middle Ages. The Centro has various databases; particularly interesting are a hagiographic database (the *Acta sanctorum*) and others being completed by scholars of the Department for Classical and Early Christian Studies, such as PICTA (a program for Late Antique Christian Iconography) and EDB (Epigraphic Database Bari).

The Centro has collaborated with RAI to produce two 20-minutes long documentaries on the cult of St. Michael, and on the Christian history of the Daunia. The IRRSAE Puglia (the Regional Research for Educational Experimentation and Update) has authorized the documentaries to be shown in the schools of the region to increase appreciation and understanding of historical and hagiographic heritage. Further integrating the research carried out by scholars, the Centro hosts every year a Study Week, which is now in its tenth edition and is attended also by senior high-school students dedicated to late antiquity and the early Middle Ages. The Study Week explores scholarly themes linked, in particular, to the cult of Michael the Archangel in a historical period that witnessed the fusion of the ancient Roman world with Germanic culture.

Several conferences have been

Poster of EU Project "CUSTOS. *Sulle ali dell'Angelo. Dal Gargano all'Europa*" (CUSTOS. On Angel's wings. From the Garganic Region to Europe)

organized at the Center and several more are in the workings, both at the national and international level, aiming at an in-depth analysis of the phases of evolution of the cult of Michael and the relationship of the sanctuary to other sites in the region and beyond.

The Centro holds an auditorium, a hall with videoconferencing equipment, and a library open to students and scholars, specializing in historical, hagiographic, archeological and literary studies, which includes 4,000 specialized volumes. In addition, there is an archive for audiovisual, graphic and photographic documents.

The Centro runs a three-year degree program in Computer Science and Digital Communication most of the lectures occur through videoconferencing. A three-month course for the training of professional tour guides is also in the works.

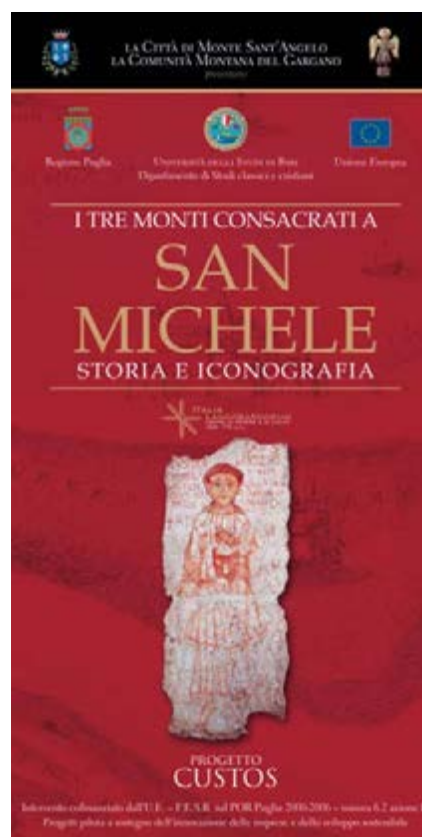

The University of Foggia as well runs various research projects whose outcomes have been publications concerning the cult of St. Michael and related scholarly questions. The same University has signed an agreement with the Department for Classical and Early Christian Studies of the University of Bari and with the Municipality of Monte Sant'Angelo to implement programs for the promotion and enhancement of the sanctuary and the city of Monte Sant'Angelo.

There is a strong link between the Centro di Studi Micaelici e Garganici and the Centro di Studio sull'Alto Medioevo di Spoleto (CISAM), the Association "Les Chemins du Mont Saint Michel" in Vire, France, and other Italian and foreign universities.

The *Museo delle Arti e Tradizioni Popolari "G. Tancredi,"* established in

Monte Sant'Angelo in 1925, has been re-launched thanks also to the support of the University of Bari, especially by G.B. Bronzini. The Museum, which particularly targets schoolchildren, preserves documentation of the tradition connected to the sanctuary the town and the surrounding area. In particular, it preserves testimony of material culture of the Gargano area, focusing on agricultural production and sheep farming, including grain, oil and wine production as well as dairy farming. The culture that is thus documented is a relatively recent one, referring to the 19th and 20th centuries, but is part of a farming tradition that dates back to the Neolithic age and has continued until modern times, with anthropologically significant continuity.

The museum displays illustrated materials suitable to various age groups and professional guides are available for

The exhibition "The three mountains consecrated to St. Michael" in the Clarisse Convent seat, and the related poster

guided tours. It is also possible to consult the photographic archive of G. Tancredi, the founder of the Museum, who used photographs to document his anthropologic studies. Tancredi's beautiful images, many of which are on display in the Museum, still constitute an indispensable tool for ethno-anthropological studies of local population.

The *Comunità Montana del Gargano* funds several cultural initiatives in Monte Sant'Angelo. In particular, the Comunità has supported for decades scholarly projects, some in collaboration with the Department for Classical and Early Christian Studies of the University of Bari and other Italian universities. In addition, the Comunità has financed the publication of scholarly works as well as illustrated material for the general public.

Cooperativa Ecogargano is an association active in Monte Sant'Angelo that has been charged by the Municipality to organize and run guided tours to the main monuments of the city: the Castle, the Baptistery of San Giovanni in Tumba, the church of Santa Maria Maggiore, the church of SS. Trinità; the former Convent of the Capuchins; the church of St. Francis and its annexed monastery; the church of S. Benedetto and the former monastery of the Celestini; the church of St. Anthony the Abbot; the church of S. Maria del Carmine with the former convent of the Carmelitans; and the church of S. Giuseppe.

The Association "Insieme per," founded on 22 February 2005 to enhance the historical and cultural heritage of the city, initiates additional cultural events. The main objectives of the Association are the following: cultural events that might attract tourism; promotion of the cultural patrimony of the city; protection of monuments and the environment; and social solidarity.

Legambiente also organizes cultural

events as well as wine-tasting and culinary fairs in the Centro Studi Micaelici e Garganici and in other sites near the sanctuary.

The Local Tourism Office also organizes cultural events and the publication of small guides to the main monuments of the city. It is necessary to note, however, that promotional materials, brochures and leaflets targeting the general public, especially those written in foreign languages, are still insufficient.

TERRITORY

The *Ente Parco Nazionale del Gargano*, which includes the districts of the 18 Municipalities of the promontory of Gargano and the Tremiti Islands, is in charge of the protected area, the visitor centers, the itineraries and services in the park. In addition, it promotes courses on environmental education and events dedicated to local culinary products. Finally, the Ente produces publications on environmental issues and runs a website in Italian, French, English and German: www.parcogargano.it.

The main objective of the Ente Parco is the enhancement of the environmental patrimony and its respectful enjoyment. For that reason, it organizes educational activities that aim to raise awareness with respect to the protection and re-establishment of environmental equilibrium.

The numerous initiatives of the Ente Parco, which includes study and research of the characteristics of agricultural activity of the Gargano, have encouraged the collaboration among local commercial enterprises for the dissemination, promotion and marketing of culinary specialties, especially those that might risk disappearing. Starting in 2001, the Ente Parco has established a "trademark of quality" that it assigns to those culinary products, artisanal and tourist enterprises it judges most noteworthy.

The *Abbey of Santa Maria di Pulsano*, in the immediate vicinity of Monte Sant'Angelo, hosts regular meetings and conferences. The abbey has a library with a remarkable collection of ancient books, and a pilgrims' hostel for short term stays.

During the month of August, the community of monks of the abbey holds courses on sacred iconography that include a theoretical and practical component. The latter aspect focuses on pictorial techniques used to produce ancient icons. The website of the abbey is: <http://www.abbaziadipulsano.org>

Other religious establishments organize cultural events. Among these is the convent of San Matteo in Lamis, which also runs a library, and which organizes conferences to which well-known scholars from Italian universities participate.

Events

A series of fairs and patron saint festivals which are celebrated in spring and autumn, also in connection to the phases of transhumance are an expression of sheep-farming tradition and culture, representing an added tourist attraction that increases knowledge about Monte Sant'Angelo and its territory.

7 SOCIO- ECONOMIC ANALYSIS

PRELIMINARY METHODOLOGICAL REMARKS

In order to draw up the Management Plan, a socio-economic analysis of the Territories of the Italian Provinces was carried out. It was presented in Rome on 27 June 2007 by UPI (Union of Italian Provinces) and by CENSIS Institute (Italian Socioeconomic Research Institute). The analysis was called "New socio-economic report on Italian Territories / Typological Map of the Provinces – Analysis of main components and *cluster analysis*".

On the basis of the most recent official data, the classification and characteristics of the six Provinces involved in the application "*Italia Langobardorum*" are reported.

The "mapping" of the entire Italian territory divided into provinces was conducted through the aggregation of

the provinces according to homogenous typological groups. 154 indicators – of which 114 were socio-economic indicators (which concerned the configuration and demographic and social trends, production structures and business, produced wealth, supply of services, tourism, cultural and recreational offer) and also 40 indicators relative to the structure of local finance deduced from balance sheets of Provincial Administrations – were adopted in order to identify different clusters according to common variables. Of these indicators, 18 contribute, as "active variables", to the creation of typological groups, while the remaining variables have been used in order to get further information on the specificities of each cluster (136 "descriptive variables"). [see Statistical Tables]

Significantly, the two synthetic factors which determine the group classification of the Italian provinces are:

- the *axis of socio-economic vitality*, at the top of which there is high economic

and social well-being, while at the bottom there is economic, production and demographic involution;
- the *axis of factors connected to tax and finance autonomy*, which speaks of the ongoing change processes in the local financial structure of Provincial Administrations.

By comparing the information reported in tables 2-6, the six provinces included in the Site "Italia Langobardorum", are classified as summed up in the following table:

Table 6 - Typological group classification of the provinces

Source: Censis-UPI, 2007

1 st cluster: Increasing density in the Centre-North of Italy	2 nd cluster: Industrial stability	3 rd cluster: Average performances	4 th cluster: South of Italy in transition	5 th cluster: Subjective rarefaction and dependence
---	BRESCIA VARESE	UDINE PERUGIA	FOGGIA	BENEVENTO

In the cluster “Industrial stability” there are the Provinces of Brescia and Varese. Economic indicators reveal a considerable presence of manufacturing companies in terms of produced added value and a low GDP (Gross Domestic Product) rate, related to trade and services. The high value of exports and the net tendency towards the utilization of savings for production investments must be added to this. The high participation and employment rates, as well as the reduced unemployment level give stability to the local labour market. “Industrial Stability” provinces are characterized, in particular, by an increase in the resident population in the period 2000-2005, owing to the considerable presence of foreigners and to low rates of old age and dependence. The Provinces of Udine and Perugia are part of the cluster “Average performances”. They are characterized by economic performances and development threshold just above or just below national average rates of economic development and employment, standard of living and consumption level, socio-cultural indicators.

In these areas, a marked ageing of the population is being replaced by the strong presence of immigrants.

The Province of Foggia is included in the cluster “South of Italy in transition” which consists of provincial territories characterized by a relatively low level of socio-economic development and at the same time, a marked population density, by a basically balanced demographic situation, by a local finance system based on tax and financial autonomy. Importantly, this is the most dynamic area in the South of Italy, as highlighted by the very high business development

rate which is far above average and by the increase the added value and the tendency to export.

On the basis of the classification proposed by Censis, the only Province – included in the Management Plan – which is part of the most problematic group called “Subjective rarefaction and dependence” is the Province of Benevento. The cluster is characterized by a low participation rate and a high unemployment rate (especially young people), by a reduced schooling level of resident population, by reduced per capita wealth, by a modest value of deposits and investments per inhabitant. The added value produced in these areas is concentrated in non-industrial sectors (agriculture and services).

To identify the production characteristics of the regional areas of the Site “*Italia Langobardorum*” which could give rise to shared projects, the spread of agri-food quality Labels has been studied. Data are illustrated in the following Table:

CONCLUSIONS

The analysis reveals a complex situation, characterized by heterogeneous areas: some provinces have high population density rates (referred to both inhabitants and institutions) while others are located in vast area which are little populated; also, some of the provinces include metropolitan cities, and others are characterized by the presence of many institutions.

A common objective – as underlined in the research by UPI / CENSIS – is to “*plan the development of the vast area by triggering processes able to activate and involve all different areas*”. This is perfectly in line with the objectives and strategies indicated in the Management Plan of the Site “*Italia Langobardorum*”. The Management Plan, as far as socio-economic aspects are concerned, acts as a “structured instrument for the development of the area” pertaining to the six provinces, thus acting as a catalyst and innovative support to the action of local institutions and bodies.

The single places included in the Site and the relative reference territories, with specific reference to the areas influenced by the history and the presence of the Longobards, are illustrated below in terms of their economic situation.

AGRI-FOOD QUALITY LABELS		
Source: APAT (Ministry for Agricultural Policy) – 2007

Umbria	25	
Campania	42	
Puglia	41	

7.1 CIVIDALE DEL FRIULI

Cividale del Friuli is a small town located in the Eastern hilly area of the Region Friuli-Venezia Giulia. The process of demographic development determined a resident population of 11,515 people (52.1% women), as of 31st December 2006, which is subdivided into 4,855 registered families and 11 cohabitations with an average of 2.3 people per registered household.

The population density rate is fairly high (228 inhab/km²) and is much higher than in the Province of Udine (109) and in the entire Region (154). The low birth rate of the last decades – which causes the old age rate to be as high as 177 elderly people for every 100 young people – was compensated and integrated by the immigration rate, especially foreigners. At the end of 2006, the residents of foreign origin, coming from 57 countries, were 5.7% of the population and are still growing (the number doubled in the last ten years). Moreover, the great number of students present in Cividale during the school year must be taken into account (more than 3000 units).

The local production fabric is rather complex and based on around 1,000 active businesses (880 in every 10,000 inhabitants),

The industrial area, located in the suburbs of the municipal territory, is composed by a number of companies, in particular specialized in the manufacturing of metal, glass and wood varnishing.

The food industry is also of good quality. It is based on typical products which are distributed on the national and international market, and in particular wine products. The territory of Cividale is one of the historical areas par excellence for wine production.

Interestingly, the data on business structure show that there is a good presence of young people (6.7% under 30) and women (24%); these values are higher than provincial and regional average rates.

The trade network of Cividale del Friuli is mainly concentrated in the historical centre of the city. At the moment, many shops and activities are located in central streets and squares. Every week the centre becomes full of people thanks to the fish market which takes place on

Fridays and to the general market on Saturdays, where many products can be found: clothing, footwear, leather products, fruits and vegetables, flowers and plants, products for agriculture.

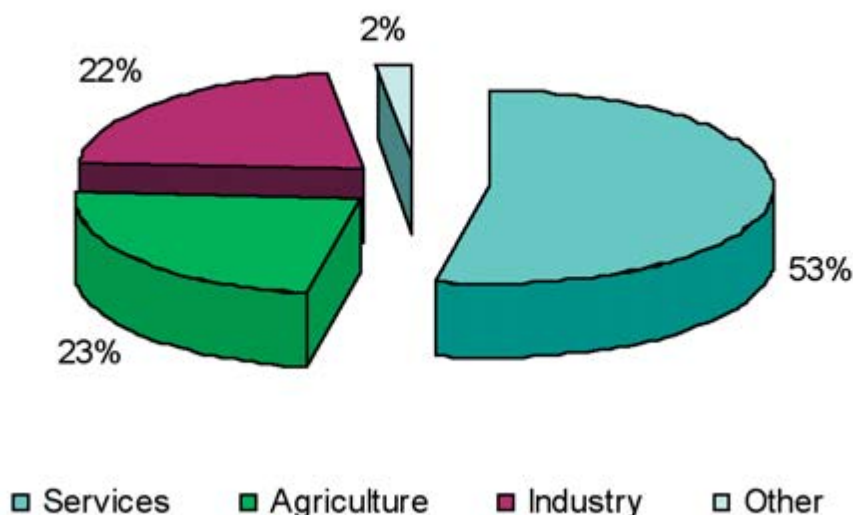

A new trade plan for medium and large shop centres is now being studied. The municipal administration is assessing the opportunity to create – in an area which is close to, but outside, the historical centre – a residential and trade area of excellence, provided with wide car parks, where numerous trade and craft activities will be located.

At the end of 2006, there were 32 catering facilities (of which 19 were rural restaurants).

Accommodation facilities are numerous (52) and of various nature: hotels (3), rural accommodation facilities (15) which are mainly located on the hills, Bed & Breakfast. As a whole, there are 477 beds available (data 2006).

The data on tourist flows referred to 2006 (arrivals 8,770, overnight stays 21,544), show an increase in arrivals and overnight stays in Cividale. The average stay rate is rather low, 2.5 days (against 4.7 at regional level). This suggests that Cividale is a “short break”

Cividale - productive activities 2006

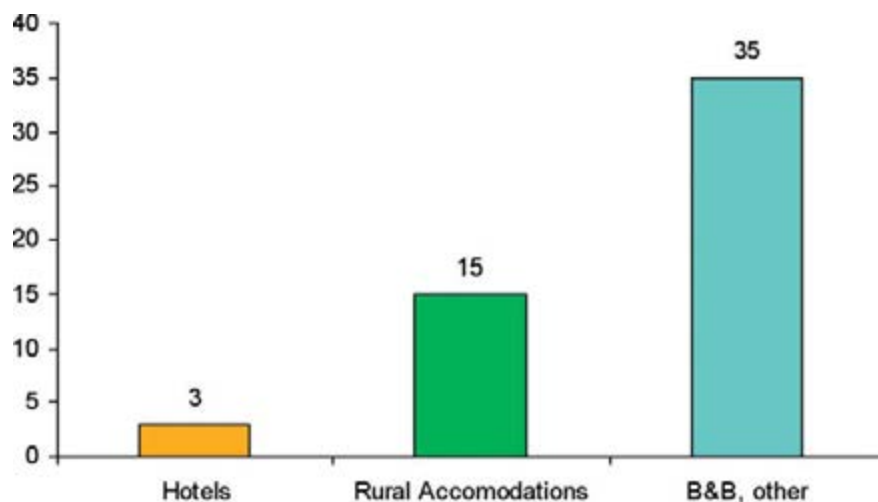

Average bank parameters	Per-capita added value 2004 in Euro	Deposits/ inhab. 2006 in Euro	Investments/ inhab. 2006 in Euro
Cividale	26,500	17,000	50,000
Region FVG	24,500	13,600	20,500

resort. However, local and regional tourist flows are no doubt considerable, though not recorded. In this regard, the number of visitors to the Tempietto Longobardo - around 48,000 visitors in 2006 - and to the National Archaeological Museum with 22,500 visitors can be taken into consideration. The near Sanctuary of Castelmonte (Municipality of Prepotto) records more than 400,000 pilgrims every year. Special attention must be paid to educational centres. Cividale hosts several qualified training centres of national and international value (shown by the multi-annual presence of students from South America, Russia, China and other countries). University activities

linked to the cultural heritage of the territory (Specialization School in Art Studies of the University of Udine) have been recently established - and will be extended in the future.

Cividale - accomodation facilities 2007

7. 2 BRESCIA

Brescia is a municipality with about 190,000 inhabitants, is the main city of its province, and the second most densely populated city in the Lombardy Region. The rate of employment, for inhabitants ages 15 to 64, is 64%. The total unemployment rate is 3.7%.

The territory of Brescia has always been marked by an industrial and commercial character. Among Italian provinces, Brescia is in sixth position when it comes to number of businesses registered with the Chamber of Commerce. On 30 June 2007, the number of enterprises was 120,838, amounting to one for every 10 inhabitants. The territory attracts substantial immigration and, over the years, a number of extra-European enterprises have been established there. The total added value produced by the entrepreneurial system in Brescia amounts to about 2.5 % of that produced by the national economy. Brescia holds second position in its region and fifth at the national level for produced added value.

The distribution of enterprises in the main industrial sector is the following: 32% of businesses are into

manufacturing; 29% in trade; 24% are involved in the services sector (19% provide services to industry and 5% to the public); and 10% are agricultural enterprises.

The Province of Brescia also has a strong artisanal component: almost one third of registered businesses (i.e., 32%) are artisanal enterprises that are especially active in constructions and manufacturing.

Construction companies, restaurants and coffee shops, retail and wholesale trade and transportation are the most widespread businesses. Precision mechanics has an ancient tradition in Brescia, dating to the fifteenth-century, with the production of weapons: pertinent plants are concentrated in the industrial area of Valle Trompia.

There are 540,000 potential workers in Brescia, 519,000 of which are employed: 61.3% of these are men, while 38.7% are women.

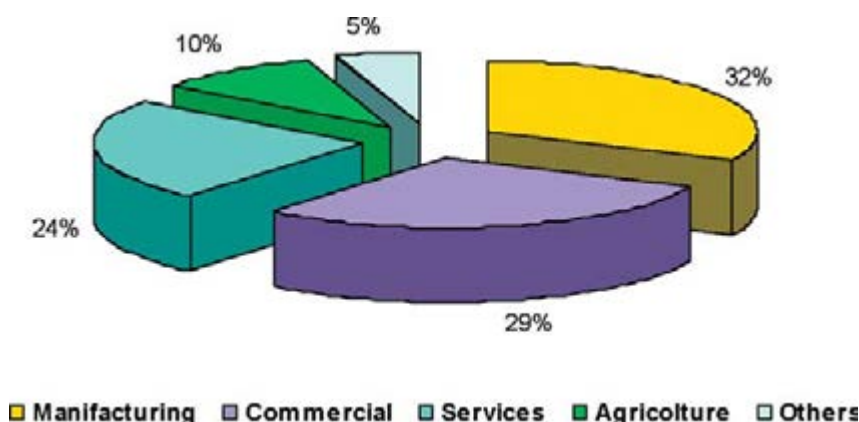

Brescia holds the first position, at the national level, for cattle- and dairy-farming. In the Province there are no fewer than 6 organizations for the regulation and protection of the appellation of wines (the DOC designation) and characteristic farming products. The Franciacorta sparkling

wine is the crown jewel of wine production and is one of the internationally best-known Italian wines. Brescia enterprises have exported goods for 6,980 million Euros in the first semester of 2007, which places Brescia in fifth position at the national level, with a much higher rate than both the regional and national average. The most significant contribution to exports comes from the metalwork sector.

Brescia has traditionally been characterized by advanced technology innovation and experimentation. It was the first city in Italy to adopt an urban district heating plant in 1972. Currently, an entirely automated light subway system is being implemented that will be initially experimented on 14 kilometers of the municipal territory with 17 subway stops, 13 of which will be underground.

The recent Accordo Quadro di Sviluppo Territoriale (AQST)-an agreement for the development of the territory that has been undersigned by the municipal authorities of Brescia and approved by the Lombardy Region and other bodies in Brescia such as the Province, the Municipality, the Chamber of Commerce, the State University and the Università Cattolica-envisages 53 projects for the

Brescia - productive activities 2007

development of the territory that will involve a total investment of over 2 billion euros.

Major infrastructural projects are also in the works to promote, over the medium term, further socio-economic development of the region. These projects include the extension and upgrading of the existing highway system and of the airport of Montichiari, improving accessibility to the area. In turn, that will facilitate and increase both commercial and tourist inflows to the entire province.

The city of Brescia boasts vast urban parks, crucial to overall quality of life. It is well known, and was recently emphasized in the Aalborg Chart and in Agenda 21, that the quantity and quality of green urban areas is a fundamental indicator of the livability of a city. Numerous city parks exist and more are being designed. In 2000, the Municipality has marked the perimeter of the Parco delle Colline, or park of the hills, a series of linked wildlife environments that are a major resource for the city as well as the towns in the hinterland. That represented the first step of a project for the protection of the wildlife areas, which are marked by distinct and rare characteristics in the flora and fauna.

In recent years, Brescia's national and international image has been further boosted thanks to the quality of its cultural and artistic scene as well as the beauty of the landscape. Figures show that, on average, about 7.5 million tourists visit the area each year, especially focusing around the Lago di Garda. A series of blockbuster shows has placed Brescia on the maps of much broader tourist audiences. The shows have ranged from the Longobards to Monet and from Van Gogh to Turner, making Brescia in the destination of 2.5 million visitors in the last three years, attracted to the beauty of a land that is as culturally rich as it is scenic.

The basis for this success is a unified strategy that has been designed and promoted by Fondazione CAB, in collaboration with the Municipality of Brescia and the Fondazione Brescia Musei. Plans for the new future include the excavations and exhibition of the vast ancient Roman archeological area in the city that is the largest in northern Italy. That will entail even greater tourist attraction and is an indication of the intention of the city to continue in its strong commitment to the increased quality and visibility of its cultural and historical landmarks.

7. 3 CASTELSEPRIO-TORBA

With respect to the Province of Varese, of which it is part, Castelseprio is situated at the border with the Province of Como. The Municipality is home to 1,237 inhabitants with a density of 317.18 inhabitants per square kilometre. Between 1991 and 2001 the resident population increased by 12.76%.

Castelseprio, 17 kilometres from the province capital of Varese, is approximately 15 kilometres, as the crow flies, from the international airport of Milano-Malpensa and in the proximity of the Solbiate Arno tollbooth on the A8 Milan-Varese motorway.

There are 41 industrial activities within the Municipal District of Castelseprio, employing 383 workers (equal to 65.92% of the employed workforce); 24 service activities, with 51 employees (4.13%); 36 service activities with 104 employees (8.78%), and 7 administrative activities with 25 employees (6.20%). Overall, 46.97% of the total resident population of the Municipality is employed.

The area that refers to the Lombard heritage also covers the Municipal District of Gornate-Orona with its 1,901 inhabitants and a surface area of 4.8 square kilometres (population density: 396.04 inhabitants per square kilometre). This Municipality too benefited from a substantial increase in the population during the decade from 1991 to 2001 with an increase of 15% in the number of residents

There are 72 industrial activities within the Municipal District of Gornate Olona employing 608 workers (equal to 65.92% of the employed workforce); 23 service activities, with 38 employees (2.83%); another 56 service activities with 104 employees (4.67%), and 7 administrative activities with 47 employees (6.89%). The overall figure of persons in employment with respect to the total resident population of the Municipality is 42.7%. As far as the province of Varese is

concerned (1,199 square kilometres with approximately 814,000 inhabitants), it is included in the so-called "industrially solid" group of provinces.

It is an area with a high rate of employment: there are 373,000 persons in employment against a modest unemployment rate of 3.7% recorded in 2002. This is thanks to a high industrial concentration: the number of businesses enrolled at the Varese Chamber of Commerce in 2002 was 68,890.

From an economic point of view, the manufacturing industry is the driving force, especially textiles and clothing. However, engineering, chemistry and pharmaceuticals, production of rubber and plastics and a specialised industrial district operating in the sector of eyewear are also very important. Among all the Italian provinces, the Varese area is in 46th position in relation to gross domestic product (source: Istat 2005).

The data concerning tourism in the province of Varese is particularly interesting. Tourism in this area, together with the provinces of Como, Lecco and Cantone Ticino (Switzerland), revolves around several exceptionally beautiful naturalistic areas. The number of tourists is constantly and continually increasing.

The Province of Varese is, in fact, promoting a substantial number of projects aimed at developing the tourist sector and reorganising and upgrading the local tourist services, based on principles of sustainability and eco-compatibility. The great natural beauty of the lake and mountain environments and the presence of the Lombard heritage, together with other highly valuable historical-artistic sites, have prompted the adoption of suitable development instruments.

Of all the various projects, particular attention is being paid, therefore, to development of specialised tourist segments (cultural, naturalistic, wine

and gastronomic), construction of strategic infrastructures (airports, railways, motorways) and other local infrastructures (cyclist paths, horse trekking routes, hiking routes) all aimed at incrementing the territory's potential, at encouraging visitors to stay longer and distributing throughout the area the benefits deriving from the attractions of the Lombard heritage of Castelseprio-Torba/Gornate Olona.

In the same way, the Province's plans – prepared in agreement with the Lombard Region, the Chamber of Commerce and other local agencies and category associations – are particularly geared towards upgrading the territory's accommodation structures, such as agritourism businesses, to implementing teaching-training systems such as training farms, international re-launching of typical, characteristic and high-quality agricultural produce such as wines, dairy products, honey.

Finally, special attention has been paid, since 1995, to inter-provincial, inter-regional and international relations with the birth and gradual growth of the "*Regio Insubrica*", among the Italian provinces of Varese, Como, Verbano-Cusio-Ossola, Novara, Lecco and the Cantone Ticino (Switzerland).

7.4 SPOLETO

The municipal district of the town of Spoleto, which borders with thirteen small municipal districts, is among the most extensive in Italy (approximately 350 Km²) and more than half of this area is mountainous. Since 31/12/2002 the resident population has once again exceeded 38,000 inhabitants, a threshold which was surpassed in the Fifties (38,155 in 1951), in the Sixties (38,308 in 1961) and more recently in 1984 (38,072) and 1990 (38,031).

The natural negative balance tends to be compensated by a positive migratory balance due to the high number of immigrants from outside the European Union. In recent years this influx has generated a substantial increase in the resident population and a tendential increase in the birth rate.

With regard to the age structure of the population, (the *ratio* of people 65 years and more to those from 0 to 14), equal to 216.7 that is notably higher than the province of Perugia, the Region of Umbria and the national index. In

particular, the number of citizens aged 80 and above has increased by 2.1 percentage points (from 5.3% at 31/12/1995 to 7.4% at 31/12/2004).

As far as education is concerned, the indices for the number of people with school-leaving certificates – from obligatory education to secondary school level – are all higher than the average levels for Italy. A noteworthy increase in the level of “higher education” may be seen for women in the age groups “19 to 34” and “35 to 44” with respect to the corresponding national male segment.

There are 3,336 active businesses in Spoleto at 31.12.2005 (880 every 10,000 inhabitants), with an increase of +52 businesses with respect to the previous year. A prevalence of service-related businesses may be noted in the distribution of economic activities by large sectors with 28.27% of these services connected with commerce and 5.43% related to the hotel-catering sector.

More than 70% of the commercial network lies within the city walls.

There has been an increase in the number of street vendors in organised fairs. In fact, in addition to the four weekly street markets held in Spoleto and surrounding suburbs, the annual fairs of *Sant'Antonio* in June and the *Madonna di Loreto* fair in September are popular attractions.

There has been an increase in the number of requests for licenses for the monthly “flea-market”, with its 80 operators selling antiques, collectors’ items and such like, which is held on the second Sunday of every month.

A new commercial plan is currently being studied for medium and large sales structures. In the 13 existing productive areas within the municipal district, projects for expansion are being considered that will favour the use of renewable sources of energy, bio-construction technologies, the adoption

(Source: Spoleto Municipal Registry Office)

Spoleto - productive activities 2007

of good energy- and water-saving practices. Spoleto's general zoning plan (PRG) and the new commercial plans, already in progress, will be the centre point for the setting up of an integrated system of production areas offering a multitude of solutions to satisfy the needs of the various productive sectors from industry to craft to commerce. The choice of regulations that favour an economic-environmental union within sustainable development is in line with current European, national and regional trends.

For years Spoleto has been a city of transit and is known throughout the world as a city of art. This image was strengthened with the creation of the Festival of Two Worlds and its insertion in the national and international tourist circuits. The knock-on effect of this, as with other events promoted by the Municipal Administration, together with the city's cultural-artistic heritage and the promotional initiatives undertaken in synergy with other operators in this sector, have contributed in having an increasingly positive effect on tourism. Comparative data on the flow of tourists in Spoleto in 2006 with respect to the previous year indicate an increase of 2.99% in arrivals and 4.87% in

presences. The average length of stay has also notably increased from 1.8 days in 2005 to 2.5 in 2007. This value denotes however a "short-break" tourism to which a high (but unregistered) local and regional excursion flow must be added.

The flow of foreign tourists has seen a notable increase: +11.46% in arrivals and +37.05% in presences.

The seasonal tourist flow, which has important peaks during the summer and at holiday seasons in general, has encouraged Spoleto's Municipal Administration to implement measures to improve the accommodation structures thereby making the tourist sector the most lively and vital component of the town's economy.

In 2007, the accommodations were 105, four more than the previous year -due to the opening of new structures other than hotels-, for a total of 3,354 beds. Almost 20% of the accommodation is in the buffer zones and the level is medium-high. The network of trade in the Historical Centre is widespread, with 264 commercial enterprises presented (41.51%) to which are added 41 restaurants and 34 bars for a total of 339 activities.

The planning and realisation of activities

to promote tourism has followed the guide lines set forth by Umbria Region. The centre of the development plans is the logical pattern of Tourism – Environment – Culture aimed at raising the quality of the services offered through integration of these three resources. The final objective is to increase the value of the territorial tourist systems and the overall regional tourist system in line through an integrated, quality-oriented economic development, with a low environmental impact. Spoleto is leader of the Integrated Territorial Project (PIT) entitled "The Lands of Italy's Green Heart" (*Le Terre del Cuore Verde d'Italia*) which involves 9 municipal districts.

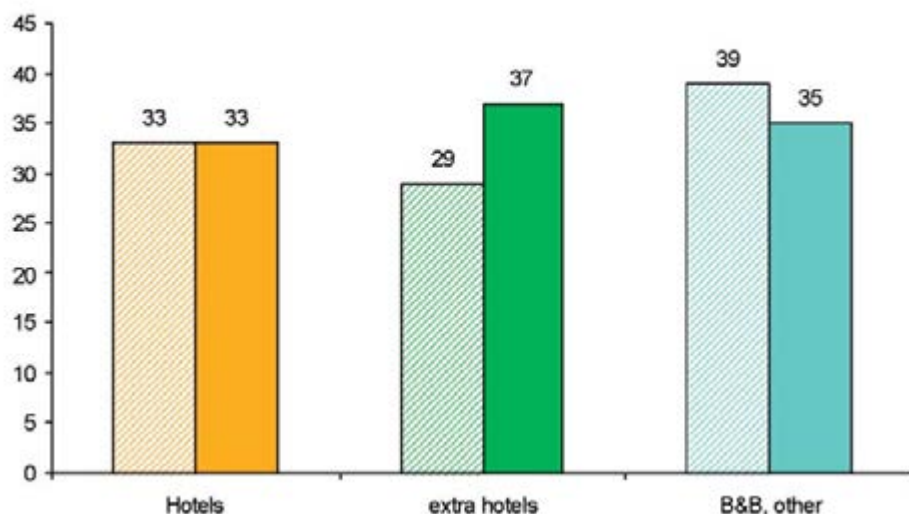

Taking into account the territory's "identity", the Municipal Administration's goal is to improve the services offered to tourists through concrete proposals aimed at satisfying guests and making their stay as pleasant as possible. The problems of tourist marketing will be solved by studying and implementing techniques and instruments aimed at making tourist flow less of a seasonal phenomenon and increasing the average length of stay.

The "Spoleto Tourism System" must

make every effort to offer the best quality, also in terms of accessibility, at competitive prices, in order to consolidate the traditional market segments present in the area and acquire new ones. If acquiring new clients is strategically important, being able to maintain their loyalty and exploit it as a natural and effective method of promotion is certainly no less important. For instance, it has been noted that constructive “word of mouth” by tourists who have been in the area with family and friends is one of the main promotional and advertising vehicles which works like a kind of “multiplier”. The events that have been taking place in Spoleto for years, such as “Vini nel Mondo” (Wines in the World), “Le Stelle Europee del Gusto” (The European Stars of Taste), “OlioDay” (OilDay) and “Frantoi Aperti” (Open Crushers), have a very important effect on the economic productive structure. “Wines in the World” – that reached its third edition in 2007 - is certainly an example of high level promotion that has managed to “integrate Italian quality products with the resources/beauties of the territory”.

In fact, the formula of combining wine to cities of art has proven to be absolutely successful, as demonstrated by the results obtained in terms of attendance and quality of the exhibitors (approximately 300 of the most prestigious Italian wine producers, with more than 2.000 labels), high public turnout (approximately 150.000 visitors in the three days from the 1st to the 3rd of June and 70.000 persons for the *Notte Bianca* of Wine) and a great visibility on national and international media.

Spoleto - accomodation facilities 2006-2007

7.5 CAMPELLO SUL CLITUNNO

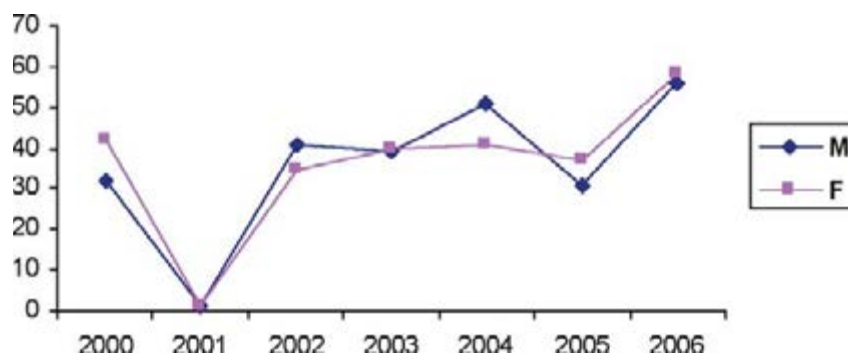

Demographic aspects

The resident population of Campello at 31/12/2006 was 2449 units; due to the territory's morphology, which is almost totally mountainous, the municipality's settlement density is extremely low. There are, in fact, 49 inhabitants per square kilometre, a figure which is much lower than the national average and the central area average, which are more or less the same (196 inhabitants per km²). Distribution over the territory is rather irregular, due to the environmental conditions and the different town-planning development. This division is shown in the table below, created by dividing the municipal territory into four areas, which correspond to the main social and economic realities, more specifically:

Area 1 the municipality centre, including the historical town centre, intended in both its artistic-monumental aspect and in the economic-social one, being the main centre of attraction for citizens' life;
Area 2 the Flaminia area with the Springs of Clitunno;
Area 3 Pissignano;
Area 4 the rest of the territory

With regards to age groups, there is a

tendency towards ageing (ageing index of the Municipality of Campello sul Clitunno t 31/12/2006, was 23.96%, a little higher than the regional and provincial ones) which brings about a certain deficit in the population belonging to the so-called active age (15-64 years) and in the very young (12.7% in the province compared to 14.1% in Italy). In spite of this, the population seems to be slightly and constantly increasing, also due to the increase in immigration, as can be seen in the table below:

Business density in the municipality

Enterprises registered in the municipality as of 31-12-2006 totalled 344 units. There were two most frequently

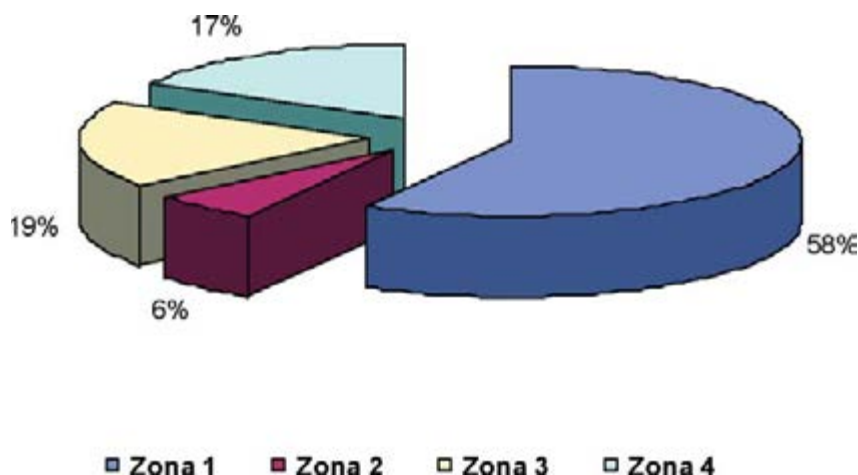

occurring sectors: agriculture and services, followed by industry and commerce. There is a notable incidence of companies operating in the primary sector (18.07%), a figure that is higher than the national average (18.1%) and that of Central Italy (15.8%). The incidence of construction companies is also rather high, at 10.7%. Tourist structures absorb about 9.3% of local entrepreneurial activities.

There are various industrial activities in the municipal area, some of which are important from an economic and

employment point of view, which absorb the labour force from the territory and the surrounding towns.

There are also several craftwork

Campello sul Clitunno - productive activities 2006

businesses that provide both services and the production of goods.

Campello's economy is therefore traditionally agricultural, mainly based on the intensive cultivation of products such as tobacco, maize and cereals. The agricultural businesses in the area boast an extremely important local product: olive oil for which the municipality is one of the main regional producers.

The oil of Campello is a high quality product: 100% of it is classified as extra virgin and cultivation methods still respect tradition. It is one of the best in Italy and has some special qualitative and organoleptic characteristics that have today allowed it to be awarded the "DOP - Denominazione d'origine protetta", D.O.C. and D.O.C.G labels. About 500 hectares of land, with about 28,000 olive trees are not cultivated in Campello.

There are also several production businesses connected with agricultural production, which process and sell the products, including oil presses, true evidence of the municipality's ethnographic culture.

Since 1994, Campello has been a member of the Association "Associazione Città dell'Olio e del Sagrantino".

In the last ten years, various biological agriculture techniques have become diffused which have been welcomed by local producers, always paying attention to protecting the environment and the quality of their products. The cultivation of high-quality, typical products such as lentils, red potatoes and emmer wheat has developed in the mountainous areas, adding to the animal breeding that was already present and becoming an opportunity for extra family income and thus preventing the areas from losing their populations.

Another important economic activity is

the processing of truffles, due to the product's high profitability. The truffles are mostly gathered using carefully trained dogs that search for the precious tuber in the uncultivated mountainous areas where it grows naturally.

There has also been a certain "cultural practice" over the past few years, with the planting of small plants that are already contaminated by truffle spore to create woodland areas where, a few years later, it is possible to find the rare product.

The economy is integrated by tourist activities, linked in particular to the beauty of the places that surround the Springs of Clitunno. The municipality of Campello sul Clitunno has a sound tradition in this sector and boasts several accommodation structures for tourists and visitors, including: five hotels, as many rural guesthouses and a historical residence, together with various businesses selling food and drinks (bars, restaurants, pizzerias), sports facilities and swimming pool. All the structures operate at a high level of quality.

Hiking is an important tourist attraction, especially in the summer at the Springs of Clitunno, but also the monthly markets at Pissignano, which are now nationally renowned and the events linked to local produce (such as the oil, truffle and lentil fairs etc) are important.

Mountain hiking is also important, carried out on the entire ridge, which, once surpassed, brings the hiker to the road that leads to Valnerina.

It must be pointed out that hiking is overall a quality type of tourism and not mass tourism, people searching for cultural elements or genuine products and traditions. This means that there is a context in which the quality and alternative nature of the proposals is more valuable than the number of demand-supply of residents. The opening of the alternative route of the Flaminia, while reducing the inclination to stop in the town of Campello, has not however

affected the territory's resources, such as the Springs, which are a great tourist attraction that have even benefitted from the fact that heavy traffic is now further away.

7. 6 BENEVENTO

The territory of the Province of Benevento includes 78 municipalities, all of which have fewer than 20,000 inhabitants—except Benevento itself, which has 63,026 inhabitants—constituting the less densely populated area of the Campania Region. Population density in the city is much higher than the average calculated over the entire Province (139.36) and similar to that of the Region (426.05).

The data referring to population structure in the Province indicate an increasing aging and increase in numbers of inhabitants. The same phenomenon has been observed at the level of municipalities, where an aging index of 18.3% of resident population has been found and a very high rate of very old people—25% of residents. The demographic structure is clear if we consider these data and, further, that the ratio between the very old and children below 5 years of age is 87%.

Another characteristic is a very low presence of foreigners. There are 1,009 foreigners every 100,000 inhabitants: that is to say, a ratio that is one-fourth the national average and among the lowest in the country—it holds 96th position. Findings at the municipal level are similar.

The productive structure of the Province of Benevento, as surveyed on 31/12/2006,

included 31,962 active enterprises. 15,005 of these were in the agricultural sector; 6,643 in the trade industry; 5,424 in manufacturing; 2,826 in construction work; and 4,890 were in the services sector.

The overall surface of the territory extends for 207,120 hectares, 56.45% percent of which is dedicated to agricultural purposes. The territory produces quality products and specialties that are unique and characteristic of the area, thanks to the specific qualities of the soil and the small dimensions of farms.

The artisanal sector is particularly important to local economy. The production of ceramics (in San Lorenzello), metalwork and stone objects as well as agricultural and culinary products produced by small or very small enterprises play a crucial role. The analysis of the services sector confirms that the territory displays all the signs of an economy that is underdeveloped. There is a preponderance of commercial enterprises, a traditional sector. On the other hand, the credit sector, together with other necessary services to enterprises that mark a modern industrial economy, is insufficiently developed. The lack of sufficient services can be considered the consequence of a traditional economy that is lagging behind, as well as one of the causes in the continuation of the situation.

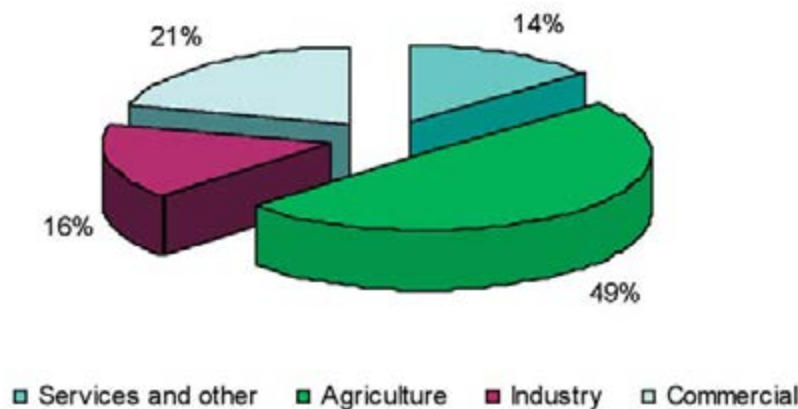

It is important that there be a flourishing services sector for innovative enterprises to be established.

An analysis of the structure of existing enterprises indicates the clear prevalence of micro ventures, comprising only one person, both in the manufacturing sector, where they amount to 43.5%, and in the services sector where they are 70.3%—a rate that is slightly lower than the national average.

The commercial network of Benevento has its pulsing center in the historical center of the city, in particular along the commercial axis of Corso Garibaldi. Along the Corso and its perpendicular streets we find 55.3% of commercial enterprises. The rest is in the new malls built just outside the city center, which attract not only consumers from the towns near Benevento but also from the hinterland.

An important change in the settlement pattern and the infrastructure occurred toward the end of the 19th century, after the unification of Italy. The city developed outside the walls; a railway station was built, beyond the river Calore, and the Ferrovia quarter grew around it. The Libertà quarter, beyond the Sabato river formed instead in the first half of the 20th century. At the same time, Mellusi, another quarter developed along the ancient Roman-Longobard thoroughfare. It is a residential neighborhood, but it is

Province of Benevento - productive activities 2003

also equipped with commercial structures and public services such as schools.

In the last few decades, some urban development has occurred to the north, in the Ponticelli area, and in the south and west, with the expansion of the Libertà and Ferrovia quarters. Currently, the urban area occupies a very extensive surface with respect to that of pre-unity times, which was contained within the Longobard walls. Benevento is the only provincial capital whose urban quality is intimately linked to the surrounding territory—both farmland and naturalistic preserves. The urban fabric, the outcome of centuries of stratification, has different characteristics in the various neighborhoods. That situation exasperates the dependency of the inhabitants of the modern residential neighborhoods on the historical center, where most of the stores and services are found.

Transportation and communications systems.

There are two main street systems in Benevento. The first, is composed of highways and thoroughfares that are tangential to the urban center, that is to say, the connecting road to route A16; route SS 87 Benevento-Campobasso; and SS 372 Benevento-Caianello. The latter, however, has a very rough surface, in dire need of renovation and maintenance, and only comprises two lanes, without emergency lanes or temporary rest areas. The second system comprises state and provincial roads that lead into the urban center. The main streets of this system are state routes 212 and 90bis, both of which converge on Benevento. In particular, the former connects Benevento with Pietrelcina, Pesco Sannita, and Pago Veiano. The latter route is the road that traditionally connected Benevento to Foggia and, at a more local level, links Paduli, Buonalbergo and Fortore.

Railway connections occur along the national Naples-Foggia line and on the regional Benevento-Campobasso line. Another important line that represents the

most direct connection between Benevento and Naples is the “Valle Caudina” railway. The railway connection to Naples, the main hub of the Campania Region, is inadequate, with obsolete railway tracks and cars.

The Caserta-Foggia line has a single track, which is also used by the Intercity trains headed for Rome and Bari as well as freight trains. Such overuse determines a traffic that is hardly manageable. So much so that the project for the improvement of national transport includes the doubling of tracks, and the contribution of new technologies and automatization of services for the Caserta-Foggia line.

The Benevento – Campobasso railway line is not electrified, and locomotives have obsolete diesel engines. The tracks follow natural topography and, in hilly areas, that entails a less than ideal distances to travel times ratio.

Benevento and its province, thanks to its artistic, monumental, historical and natural patrimony, is beginning to represent a destination for national and international tourism. The presence of tourist activity on the territory has enabled the development and enhancement of a series of enterprises linked to the tourist sector, such as the development of hotels, bed-and-breakfasts and restaurants. Other, more recent types of hospitality structures, such as holiday farms are also emerging and are particularly active in the dissemination of local culinary specialties. According to the most recent census, carried out on August 2007 by the Provincial Tourism Office of Benevento, there are 51 hotel structures on the territory of Benevento, for a total of 2090 beds. Concerning quality of services offered: about half available places are in three-star hotels. Further, there are 232 enterprises of various sorts, disseminated on the territory of the province, that offer hospitality to tourists; 132 of these are holiday farms, in addition to 39 are bed-and-breakfasts that can accommodate 172 people.

A comparative analysis has shown that the area of Benevento has witnessed marked growth in the tourist accommodation it offers. In 2000, it counted 57 enterprises other than traditional hotels; in 2004 these had increased to 100, while in 2007 there were no fewer than 232 such establishments. The growth has been particularly influenced by farm holidays, a type of tourism that has shown strong growth in recent years. Camping sites and holiday resorts, on the other hand, are entirely lacking, probably due to climate of the region that favors other types of tourist accommodation.

The city of Benevento boasts a total of 7 hotels that can accommodate 425 people, i.e., 24.6% of the total number of available accommodations, plus 15 other types of tourist structures that include 10 holiday farms. The numbers of tourists in the city were substantial in 2007: there were a total of 17,212 arrivals and 46,236 visitors. A positive trend in that sense is recorded in the entire province as well, as visitors tend to stay for rather long periods. The trend is largely connected to religious tourism (the sanctuary of Pietrelcina is a major attraction); to the spas, because of the thermal waters of Telese; to cultural tourism targeting the abbeys and monasteries; and culinary tourism attracted by the high quality traditional local products such as fruits, vegetables, oil, wine, liquors and torrone. The influx of visitors registered in the last year to the Cloister of the Museo del Sannio was 20,000 people, up from 9,000 in 2004, and the numbers have increased even further in the last three years.

In the city, and in the *buffer zone*, there are numerous eating-places: restaurants, pizzerias, self-services, coffee shops and patisseries. There are no fewer than 88 restaurants in the area of Benevento and 129 coffee shops and bars, while all over its province there is a total of 7,060 such enterprises.

7. 7 MONTE SANT'ANGELO

Monte Sant'Angelo is a town that stands 850 metres above sea level on the south side of the Gargano headland, in a position that dominates the Gulf of Manfredonia in the north of Puglia. The current demography statistics show a resident population as of 31 December 2006 at 13491 units. Dwelling density amounts to 56 inhabitants per km², well under the average found in the province of Foggia (150 inhabitants per km²) and that of the entire region (210). The birth rate in recent decades has been considerably low, which also raises the ageing index of the population.

The influx of foreign immigrants from various countries, amounted to only 55 units on 31 December 2006, many of who are Polish, including 11 priests at the Basilica.

The local productive fabric is equally divided into different areas, due to the presence of an ASI area in the municipal territory that is included in the Manfredonia Area Development Contract, subsidised by government funding.

More specifically, the municipal territory has:

An area for local production activities to the east of the town centre, which is

currently being created and which is destined to house various production activities that are already present in the town centre;

An industrial area, on the Macchia plains - an area of flatland beyond the boundary with the municipality of Manfredonia and overlooking the Gulf carrying the same name.

The most important productive area is the latter, which is home to various important industries belonging to various sectors (glass, shipyards, textiles, industrial painting, aluminium components...) and whose infrastructures are continuously used. In fact, in the year 2008, work will begin for the construction of a new tourist port that while being primarily built for needs connected with the industrial area, will also be able to guarantee new high-quality tourists flows towards the hinterland, thanks to its 250 moorings and a suitable area behind the port which will be dedicated to ship-building and accommodation and facilities.

The food industry, based on local typical products, especially bread, is developing. A consortium of bakers is currently being formed, whose primary aim is to obtain labels of quality and protection for their product. To date, the production of Monte Sant'Angelo's

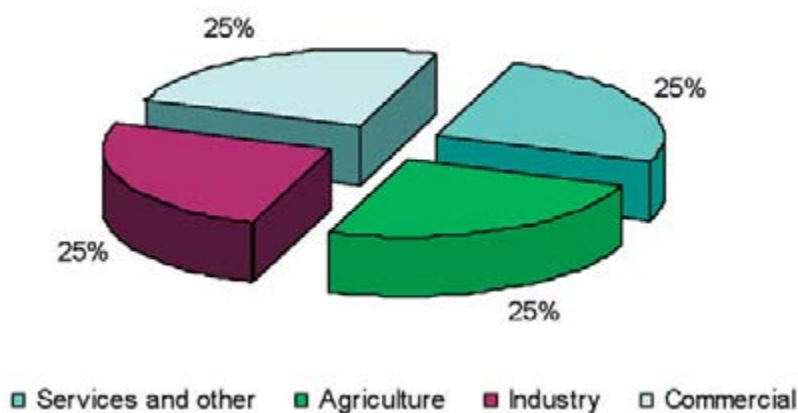

typical bread is most certainly the most well-known and appreciated product on the provincial market and is also gaining ground in other market areas in some regions of the centre and north of Italy. Local food production finds its main market in the tourists and pilgrims who come to see the Archangel's grotto and contributes to the positive image of the city and its quality.

Monte Sant'Angelo's commercial network is mainly organised commercially speaking, by applying the current regional legislation in force, which has identified locations for medium and large sales points in the municipality in both the centre of the town and in the local territory. The town centre has a well-balanced range of various kinds of shops that can satisfy the needs of the inhabitants. The commercial network's natural axis is the main street that crosses the town from east to west, culminating in the area of the sanctuary; most of the public services can be found here, banks, various types of shops, in addition to the shops that sell souvenirs, local products and food.

At the end of 2006, there were 26 restaurants operating in the area (3 of which were rural guesthouses).

There is a total of 10 hotels or similar to

Monte Sant'Angelo - productive activities 2006

accommodate tourists, with a total capacity of 1350 people (2006 data). There is also a still unexpressed potential of places for people to stay in the territory concentrated in the flatland area of Macchia where, in 2004, town-planning variations have been made to allow the creation of medium-sized hotels etcetera to increase the accommodation capacity of the territory, with another 300 beds available.

Comparative data on tourist flows indicate a slight increase in arrivals and presences in Monte Sant'Angelo. The average stay rate is rather low: the data shows a typical "short break" tourist profile, that is only a small part compared to the size of the figure (without registrations on site), referring to the estimation of the number of pilgrims made by the heads of the sanctuary. For this purpose, it must be pointed out that at about 20 km from Monte Sant'Angelo, along the ancient *via Sacra Langobardorum*, we can also find the sanctuary of San Pio da Pietrelcina many of whose devotees also visit Monte Sant'Angelo when going on the pilgrimage to San Giovanni Rotondo. This fact is confirmed especially when the peaks of arrivals at the San Michele Sanctuary are recorded during the dates linked to the festivities and anniversaries connected with the worship of the Saint of Pietrelcina (birth, death, appearance of stigmata, beatification, sainthood, etc). The number of pilgrims from the centre and south of Italy who are devoted to the Archangel and who come to the sanctuary each year on the Saints' days (May 8 and 29 September) also contribute heavily to the figure provided by the sanctuary. They make their ritual pilgrimage in groups.

The flow of tourists, who come on trips to Monte Sant'Angelo from the seaside resorts along the Gargano coast during the summer months, is also important,

adding an interesting share to the number of visitors, although their stay is brief, to the Archangel's town.

Finally the pilgrimage to the Sanctuary of Saint Michael Archangel most translates into a type of tourism based on excursions, which limits the length of the stay to a few hours during one day. This determines a niche-like economy that has a direct influence on the economic activities near the sanctuary and along the various routes that connects it to the car parks.

With the exception of typical food products, such as bread, direct influence on the territory's economic system is rather limited, as operators do not fulfil their potential capacity to re-invest in the sector. This is mainly due to the system's current incapacity to bring about the increase in the time that the pilgrims-tourists stay in Monte Sant'Angelo, creating optimal conditions for increasing opportunities for spending, through new, diversified dynamics which could optimise the overall offer of the heritage the area possesses.

The municipal administration intends to work on this matter in the next few years, working together with the Universities of Bari and Foggia that already operate in Monte Sant'Angelo with the St Michael and Gargano Studies Centre. The guiding idea is to dedicate new attention to training for local operators, in order to start up associations and consortiums that can guide investments to promoting the territory and at the same time creation new forms to optimise the historical town centre that can attract the interest of a diversified tourist market. The ultimate goal will be to succeed in increasing the time of trips, in order to increase opportunities for spending and the opportunities for presenting the territory with its varied offers for tourists. At the same time, the Municipal Administration will start up a series of

strategies to enhance the historical town centre's urban fabric, mostly included in the buffer zone proposal, to support the creation of alternative accommodation such as hotels whose potential may determine an opportunity for reinvestment by the economic operators that are already present in the area of the sanctuary.

BRESCIA
CASTELSEPRIO – TORBA
SPOLETO
CAMPELLO SUL CLITUNNO
BENEVENTO
MONTE SANT'ANGELO

8.1 KNOWLEDGE PLAN

8.1.1 INTRODUCTION – NETWORK

The aims of the plan are to create better coordination of research and study activities into aspects of Longobard heritage and culture that characterise the various places in the network, as well as the other Longobard contexts in Italy (Extended Network) and Europe (European Geocultural Corridor), partly thanks to the involvement of the leading cultural institutions working in this sector (CISAM-Italian Centre for Studies of the Early Middle Ages, and the Centre of Micealican and Garganic Studies).

This can be achieved by:

- Constant distribution of the results of studies and research carried out.
- Exchanging data obtained from various experiences.
- Creating coordinated programmes for increasing knowledge about general aspects of Longobard culture or on specific topics that unite the various locations.
- Creating common databases.

8.1.2 CIVIDALE DEL FRIULI

Site, buffer zone and Territory

In addition to its rich heritage already discovered, the potential still present in Cividale and on the whole Territory of the Duchy of Friuli – revealed also by most recent research – leads to plan a series of projects aiming at the enhancement and improvement of knowledge on the Longobard period.

The first objective concerns the collection and the systematization of already known data (and data to be acquired), by using a system of implementable databases connected to GIS, which enables the rapid management of archives and easy consultation.

As for the properties in the site applying for the site and the buffer zone, actions aim at:

- Enhancing knowledge on the Longobard Tempietto,

especially in relation to the techniques used for decorations and plaster sculpture;

- Better define development phases of the Gastaldaga and the monastery;
- Enhancing knowledge on the Episcopal complex, with special reference to the origin and shape of the basilica and the baptistery;
- Acquiring further information on the Early Middle Ages urban layout;

As for the territory of the Duchy of Friuli, along with the systematization of already known data, the strengthening of research aimed at the identification of the Longobard settlement layout – concerning both necropolis and military buildings – is envisaged.

Moreover, further research will be conducted on Longobard artistic production and evergetism by élites, which will help find parallels with the ongoing studies on places of worship and monasteries, in particular the Abbey of Sesto al Reghena.

8.1.3 BRESCIA

Site, buffer zone and Territory

The results of numerous studies specially conducted over the years on the San Salvatore-Santa Giulia complex are today an important point of reference for knowledge of Early middle ages construction and decorations, particularly with regard to stuccoes, frescoes and sculpture. The main objective is to spread understanding of the studies on the complex, and then look further into specific aspects, such as those related to Longobard skilled and craft production, organising and arranging the numerous existing data.

In order to raise knowledge with regard to the phases prior to the Early middle ages, the proposal is to investigate, study and valorise the other Roman domus in the area.

The archaeological surveys envisaged in the monumental area will contribute to enrich the knowledge both on ancient buildings

and on the early medieval sequences, bringing important contributions to the reconstruction of the passage phases from the late ancient period to the Middle Ages in a neuralgic area of the town and in direct relation with the royal power expressed by the monastery.

In terms of the Territory, the numerous recent discoveries of Longobard settlements and necropolises demand coordination of the research projects started and to be started, in order to guarantee a proper and unequivocal methodological approach, the possibility of comparing data and joint promotion of the research. Thanks to the stakeholders distributed around the Territory it is also possible to experiment an interdisciplinary study approach, capable of guaranteeing specific analyses and innovative research projects.

8.1.4 CASTELSEPRIO-TORBA

Site, buffer zone and Territory

There are many elements of knowledge that concern Castelseprio-Torba and the district of Giudicaria of Seprio. In order to obtain a view of the whole, able to reconstruct the life of the castle, the places of cult, the monastery and the whole Territory in the Longobard era, the following is foreseen:

- Activation of collecting and memorising all data emerging from research carried out up to now by means of the complete cataloguing of the structures and remains of the material culture, organised in a GIS based databank which permits easy consultation and constant implementation of topical archives.
- Start-up of diagnostic and in-depth surveys on the main monuments and their decorative apparatus and on some findings;
- Start-up of an extensive research programme on the Territory;

8.1.5 SPOLETO

Site, buffer zone and Territory

The present state of knowledge on the town of Spoleto in Longobard times leads to plan a series of projects for the accomplishment of some main objectives, related to the basilica of San Salvatore and to its territory of reference.

For what concerns the site:

- Re-organize and systemize all information already known on San Salvatore: bibliographic, documentary and graphic resources, to let converge into the future Documentation Centre of the Basilica
- Increase the presently available data through new investigations and excavations .

For what concerns the Territory:

- Re-organize and systemize all information already known, to update the existing phase maps and plan investigation and study widening.
- Continue the urban excavation campaign, to increase existing data and identify the necropolis areas.
- Boost and increase the archaeological researches in the Territory.

8.1.6 CAMPELLO SUL CLITUNNO

Site, buffer zone and Territory

Despite the rich panorama that has already emerged, the potential of the testimonies that still exist within the Territory has led to the planning of a series of project aimed at investigating and improving understanding of the Longobard period.

The first objective concerns the collection and computerization of known data (and data that will be acquired), using a database system, which allows rapid management of archives and easy consultation.

In terms of the property entered on the site for which inscription is requested and the buffer zone actions will target:

- investigating the Clitunno Tempio, particularly with regard to the execution techniques of decorations and stucco sculptures;
- acquiring information on the Early middle ages urban layout and consequent identification of Longobard settlement design;
- carrying out research and studies to gain further understanding of the Longobard artistic production within the Territory.

8.1.7 BENEVENTO

Site, buffer zone and Territory

Organisation and uniformity of information and knowledge on local heritage is the first objective to pursue. It represents the necessary basis to develop a project for enhancing and promoting the town and its territory.

On other hand, involving local stakeholders provides a very important opportunity to take shared decisions on local sustainable development.

The quest for knowledge will pursue these main objectives:

- Increasing knowledge about the Santa Sofia complex.
- Increasing knowledge about archaeology and local heritage in general.
- Increasing knowledge about the Territory.

These objectives will be pursued by means of actions taken at three different territorial levels: site, buffer zone, and territory. In addition, there will be network action.

The expected result of these actions is the creation of a unique management system for knowledge and information about local cultural heritage and that this local system will be part of the general "Territorial Information System" relating to the "Italia Langobardorum" site.

A virtual library will be included in the system to create a national fund of knowledge on Longobard culture and heritage.

8.1.8 MONTE SANT'ANGELO

Site, buffer zone and Territory

Despite the rich panorama that has already emerged, the potential of the testimonials still existent in Monte Sant'Angelo and the entire Territory, demonstrated by the more recent research, induce to plan a set of projects which lead to the improvement of knowledge of the Longobard period, finalised above all at creating a wider awareness of the cultural heritage and contribute to its preservation and use.

Priority is given to the careful gathering and memorisation of data already known and that to be acquired in relation to a databank system connected to a GIS which allows rapid management and implementation of archives and easy consultation.

The promotion of new cognitive activities will be articulated mainly:

- On the Longobard Sanctuary where in-depth examinations are possible (thanks to new surveys and wall stratigraphic analysis) on the development of the structural phases and the aspects of internal decoration, particularly the epigraphs;
- Explanations on the evolution of the most ancient building phases are foreseen with the realisation of new archaeological surveys and analysis of the wall structures in the area to the north of the sanctuary.

In the buffer zone, the examination of knowledge on the walls will have particular attention, this can be increased by constant control of building in relation to the planning and running of previous urban archaeology.

In the Territory of Monte Sant'Angelo, apart from the memorisation of known data, the optimisation of research aimed at the identification of Longobard settlement networks is foreseen, through examination of the analysis of the testimonials of the Longobard era in the other urban centres of the region and the planning and realisation of new research in field.

FIELDS	OBJECTIVES	PROJECTS	
NETWORK	1 EXTENDING KNOWLEDGE AND CULTURAL TIES BETWEEN LOCATIONS IN THE NETWORK	1.1 Constant updating of the development of knowledge and valorisation of Longobard heritage and culture 1.2 Upgrading of studies and publications on subjects related to Longobard culture and traditions	
	2 COORDINATING ACTIVITIES FOR DOCUMENTING SITES / LOCATIONS IN THE NETWORK	2.1 Implementation of a multimedia computerised platform and a database on the Network, based on a GIS 2.2 Creation of an online bulletin	
	3 EXTENDING KNOWLEDGE ABOUT ARCHITECTURE AND ARTISTIC PRODUCTION IN THE LONGOBARD ERA IN THE LOCATIONS OF THE NETWORK	3.1 Drawing up and running a coordinated programme to update the findings on architecture, with analysis of construction phases	
		3.2 Creating and running a common program for analysing the characteristics of style, materials, and techniques used in works of artistic value	
		3.3 Coordination of diagnostic activities on monuments and heritage works	
	4 EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE EXTENT OF THE NETWORK TO OTHER ITALIAN SITES WITH PARTICULAR EVIDENCE OF THE LONGOBARD ERA	4.1 Creation of a database on Italian Longobard sites	
		4.2 Promoting research and studies into Longobard culture in Italy (Publishing, Conventions, Seminars, etc.)	
	5 EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE GEO-CULTURAL CORRIDOR OF MIGRATION FROM NORTHERN EUROPE TO ITALY	5.1 Creation of a database at European level on aspects of Longobard culture	
		5.2 Promoting research and studies on Longobard culture in Europe	
	CIVIDALE DEL FRIULI SITE, BUFFER ZONE AND TERRITORY	6 ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE	6.1 Launch of further survey campaigns in order to implement the knowledge on the site's heritage
			6.2 Analysis and study of existing archaeological and historical documentation on Cividale
			6.3 Enhancement of historical research on the Longobard Tempietto
6.4 Census on structures and existing data on walls, definition of remains' properties			
7 CONTINUATION OF ARCHAEOLOGICAL RESEARCH IN THE SITE AND IN THE TERRITORY		7.1 Planning and implementation of archaeological surveys in the Monastery of Santa Maria in Valle	
		7.2 Planning and implementation of research in the Duomo	

FIELDS	OBJECTIVES	PROJECTS
		7.3 Planning and implementation of research on the ancient walls belt
		7.4 Planning and implementation of archaeological surveys in the Duchy of Friuli
	8 ENHANCEMENT OF KNOWLEDGE ON THE TERRITORY DURING LONGOBARD ERA	8.1 Analysis and study of existing archaeological documentation on the territory
		8.2 Continuation of archaeological research in rural sites and Longobard necropolis
		8.3 Enhancement of research on middle ages churches and monasteries
		8.4 Enhancement of research on Early middle ages fortified sites
	9 ENHANCEMENT OF KNOWLEDGE ON THE LONGOBARD ABBEY OF SESTO AL REGHENA	9.1 Enhancement of analysis and study on the Urn of Sant'Anastasia
		9.2 Enhancement of analysis of the Abbey of Santa Maria during Early middle ages and Medieval times
		9.3 Carrying out of archaeological researches
	10 SYSTEMATIZATION OF DATA	10.1 Creation of the Archaeological Card Map of Cividale and the Duchy of Friuli
	10.2 Creation of an online database based on GIS	
BRESCIA SITE AND BUFFER ZONE	11 RAISING THE LEVEL OF KNOWLEDGE ON THE EARLY MIDDLE AGES PHASES OF THE MONASTERY	11.1 Study and monograph publication of the Longobard phases of San Salvatore-Santa Giulia
		11.2 Study of the craft productions documented archaeologically at the monastery structures
	12 INVESTIGATION INTO SAN SALVATORE-SANTA GIULIA AS THE CENTRAL NUCLEUS OF THE BRESCIA AND NORTHERN ITALIAN MONASTERY SYSTEM	12.1 Study of the network of monastery properties of Santa Giulia within the Via Carolingia national project
	13 INVESTIGATION INTO THE HISTORICAL AND MONUMENT PHASES PRECEDING THE LONGOBARD MONASTERY	13.1 Scientific publication of the Ortaglia domus
	14 INVESTIGATION INTO THE STATE OF KNOWLEDGE OF THE URBAN CAPITOLINE AREA	14.1 Scientific Publication of the Republican Roman sanctuary
	14.2 Start of studies on other monuments in the area	
BRESCIA TERRITORY	15 SORTING OF TERRITORIAL DATA ON THE EARLY MIDDLE AGES	15.1 Definition of the "Network of Longobard sites" whose significant nodes are

FIELDS	OBJECTIVES	PROJECTS	
	AND INCREASE IN THE STATE OF KNOWLEDGE	<p>the settlements of Manerbio, Leno, Calvisano, Montichiari and Sirmione</p> <p>15.2 Analysis, study and research applied to the findings and funeral objects from the settlements and necropolises of the municipalities in the “Network of longobard sites”</p> <p>15.3 Foundation and organization of the CISL Centro Italiano di Studi Longobardi (Italian Centre for Longobard Studies)</p> <p>15.4 Knowledge, safeguard and enhancement of Archaeological Areas and Parks</p>	
	16 INVESTIGATION INTO KNOWN INFORMATION ON THE LONGOBARDS’ CULTIVATIONS AND FOOD CUSTOMS	16.1 Interdisciplinary study into the cultivations and food customs of the Early Middle Ages	
	CASTELSEPRIO-TORBA SITE AND BUFFER ZONE	17 REORGANISATION AND RECORDING OF KNOWLEDGE	17.1 Review of the existing documentation on research carried out within the castrum
			17.2 Review of existing documentation on Santa Maria foris portas
17.3 In-depth the analysis on the complex of Torba			
17.4 Data memorisation			
18 IN-DEPTH EXAMINATION OF KNOWLEDGE		18.1 Realisation of archaeometric analysis on findings	
		18.2 Diagnostic analysis on the constructive structures and system	
		18.3 Analysis of the constructive sequence of the Torba tower	
		18.4 Diagnostic analysis of the frescoes of Santa Maria foris portas	
		18.5 Completion of diagnostic surveys on the fresco of Torba	
19 CONTINUATION OF ARCHAEOLOGICAL RESEARCH		19.1 Planning and execution of archaeological surveys in the castrum	
		19.2 Completion of the dig in the Basilica of San Giovanni	
		19.3 Recognition of archaeological presences in the village area	
		19.4 Completion of archaeological surveys at Santa Maria foris portas	
	19.5 Planning and execution of archaeological surveys on section of arched walls		

FIELDS	OBJECTIVES	PROJECTS
		towards Torba 19.6 Planning and execution of new surveys in relation to the Torba Complex
CASTELSEPRIO-TORBA TERRITORY	20 IN-DEPTH EXAMINATION OF KNOWLEDGE ON GIUDICARIA OF SEPRIO	20.1 Censoring of Longobard findings and creation of an archaeological document on the Giudicaria in Early middle ages 20.2 Promotion of research on the Early middle ages settlement system of the Giudicaria 20.3 Promotion of research on monuments and artistic productions in the Giudicaria
SPOLETO SITE AND BUFFER ZONE	21 RISE THE BASILICA'S KNOWLEDGE LEVEL	21.1 Gathering and systemizing the existing documentation on the basilica of San Salvatore 21.2 New archaeological investigations on the basilica of San Salvatore
SPOLETO TERRITORY	22 RISE THE LEVEL OF KNOWLEDGE OF THE DUCHY'S CAPITAL AND OF ITS TERRITORY	22.1 Prosecution and development of the urban excavation campaigns 22.2 Realization of a study on the spolia, re-used materials in Early middle ages buildings
CAMPELLO SUL CLITUNNO SITE, BUFFER ZONE AND TERRITORY	23 RISE THE ARCHAEOLOGICAL KNOWLEDGE OF THE TERRITORY 24 INVESTIGATION ON THE HERITAGE OF CAMPELLO 25 INVESTIGATION ON THE TERRITORY DURING THE LONGOBARD ERA	23.1 Creation of the archaeological map of the territory of Spoleto 24.1 Further investigation campaigns to implement knowledge of the site's heritage 24.2 Analysis and study of existing archaeological and historical documentation 24.3 Further historical research on the Clitunno Tempietto 25.1 Analysis and study of existing archaeological documentation on the territory 25.2 Further research into Early middle ages churches 25.3 Further research into Early middle ages fortified sites
BENEVENTO SITE AND BUFFER ZONE	26 COMPUTERISATION OF DATA 27 TO INCREASE THE KNOWLEDGE ABOUT THE SANTA SOFIA COMPLEX 28 TO INCREASE THE KNOWLEDGE ON ARCHAEOLOGY AND LOCAL HERITAGE	26.1 Creation of an online database 27.1 Launch an in-depth study of the Longobard phase of cloisters 28.1 Finishing and increasing urban archaeological excavations 28.2 Start a census and study of the "spolia" re-used in buildings in the old city

FIELDS	OBJECTIVES	PROJECTS
		<p>28.3 Gather and organise all existing data and documentation on the GIS</p> <p>28.4 Create an inventory of documentation on Longobard cultural heritage in the Benevento State Archives</p> <p>28.5 Complete the study of the stucco fragments coming from Sant'Ilario in Port'Aura</p>
BENEVENTO TERRITORY	29 TO INCREASE THE KNOWLEDGE ABOUT THE TERRITORY	<p>29.1 Gather and organise all existing data and documentation on the GIS</p> <p>29.2 Plan systematic analysis and research in the territory</p>

	31 IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE TERRITORY IN THE LONGOBARD ERA	<p>31.1 Analysis and study of archaeological documentation in the territory</p> <p>31.2 Continuation of archaeological research in the cult locations situated along la Via Sacra Langobardorum</p>
	32 MEMORISATION OF COGNITIVE DATA ON THE SITE AND ON THE TERRITORY	<p>32.1 Realisation of an archaeological map of Monte Sant'Angelo and the Gargano</p> <p>32.2 Implementation of the regional GIS</p>

KNOWLEDGE PLAN Network	
Objective 1	EXTENDING KNOWLEDGE AND CULTURAL TIES BETWEEN LOCATIONS IN THE NETWORK
Project 1.1	Constant updating of the development of knowledge and valorisation of Longobard heritage and culture
Description	Constant updating of research on the Longobards and the sites in the network can come about as the result of joint reflection on specific topics that are intended to solve knowledge problems relating to the Longobards. The drawing up of a multi-year plan is intended, which establishes annual works to be carried out in the various locations from time to time. This programme will be defined at a meeting already set for May 2008 at the Italian Centre for Studies on the Dark Ages in Spoleto (CISAM). An international convention is planned in 2008 on the characteristics of the 8 th century, which is currently being organised in Cividale del Friuli by Prof Valentino Pace from Udine University.
Actions	<ol style="list-style-type: none"> 1. Set up a scientific committee 2. Draw up a multi-year programme for topics to be studied in greater detail. 3. Hold conventions on specific topics. 4. Hold a conference in 2008 in Cividale: "The 8th century: A turbulent century".
Parties involved	Stakeholders; CISAM; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Centro di Studi Micaelici; Istituto Italiano dei Castelli; Superintendencies; Universities
Phases and timescales	As from 2008
Financial resources	To be found. For the 2008 Cividale Convention the costs will be borne by: Udine University (MIUR funds, research project of the Ministry of Universities and Scientific Research); Municipality of Cividale del Friuli; F.V.G. Regional Authority; Udine Provincial Authority; University Consortium; Private sponsors (Banca Popolare di Cividale; Fondazione Claricini Dornpacher; Fondazione CRUP)
Expected results	Improved knowledge about Longobard heritage and culture. Facilitating of distribution of knowledge on the topics dealt with.
Result indicators	Number of meetings held. Number of people attending the meetings. Number of institutions and countries represented at the various meetings.

KNOWLEDGE PLAN Network	
Objective 1	EXTENDING KNOWLEDGE AND CULTURAL TIES BETWEEN LOCATIONS IN THE NETWORK
Project 1.2	Upgrading of studies and publications on subjects related to Longobard culture and traditions
Description	Progress in knowledge about Longobard culture can come about by means of setting up specific in-depth actions peculiar to each individual location in the network, and by carrying out research into more general topics that involve all or some of these locations. The intention is therefore to draw up a programme for combined in-depth studies on various topics. Some of these, already identified, include: <ol style="list-style-type: none"> a) St Micheal in religion and in the history of the Longobards. b) Longobard epigraphs c) Defend and dominate: Fortifications in the Dark Ages between Cividale, Castelseprio, and Benevento.
Actions	<ol style="list-style-type: none"> 1. Define a selection of common topics on which to concentrate research. 2. Launch studies on the topics identified. 3. Promote publications
Parties involved	Stakeholders; CISAM; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Centro di Studi Micaelici; Istituto Italiano dei Castelli; Superintendencies; Universities
Phases and timescales	Definition of the programme by the end of 2008 Start of studies and research from 2009.
Financial resources	To be found.
Expected results	Improved knowledge about Longobard heritage and culture. Facilitating of distribution of knowledge on the topics dealt with.
Result indicators	Number of research projects carried out Number of players involved in the research Number of publications produced

KNOWLEDGE PLAN Network	
Objective 2	COORDINATING ACTIVITIES FOR DOCUMENTING SITES/LOCATIONS IN THE NETWORK
Project 2.1	Implementation of a multimedia computerised platform and a database on the Network, based on a GIS
Description	The coordination activities for gathering and managing existing data and fact-finding activities that will be launched will be able to take place thanks to a dedicated computer platform, which will become a database for the network system and act as a collector for the various specific databases, facilitating consultation. A basic computer platform is already in place in Cividale. Management of the computer platform will be linked to that for the Website.
Actions	<ol style="list-style-type: none"> 1. Planning and defining common protocols for gathering and managing data. 2. Acquisition and entering of data 3. Implementation of the network GIS.
Parties involved	Stakeholders; Udine University; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale – Committee for Promoting the Project for the Aquileia Patriarchate; CISAM; Centro di Studi Micaelici
Phases and timescales	1) As from 2008 2-3) As from 2009
Financial resources	To be found.
Expected results	Establish coordination of gathering, management, and distribution of knowledge data on Longobard heritage and culture.
Result indicators	Quantity of data handled and correlations created with the databases. Number of consultations.

KNOWLEDGE PLAN Network	
Objective 2	COORDINATING ACTIVITIES FOR DOCUMENTING SITES/LOCATIONS IN THE NETWORK
Project 2.2	Creation of an online bulletin
Description	Increased knowledge may easily come about as a result of quick distribution of results obtained – albeit partial – and the circulation of news. To do this, the creation of an online bulletin is envisaged, connected to the Website, which can periodically (at least once a year) act as a means of information and connection between the locations in the site and the various initiatives in progress, as well as a forum for discussing ideas and programmes. It will be an excellent means of informing and spreading the activities promoted by the “Italia Langobardorum” site more widely.
Actions	<ol style="list-style-type: none"> 1. Set up an editing committee 2. Design and create the structure of the bulletin 3. Create the bulletin 4. Periodic publishing of the bulletin (once or twice a year)
Parties involved	Stakeholders; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale
Phases and timescales	As from 2009
Financial resources	To be found.
Expected results	Spread of knowledge
Result indicators	Number of editions of the Bulletin Number of players involved in creating it Extent of distribution of the bulletin

KNOWLEDGE PLAN Network	
Objective 3	EXTENDING KNOWLEDGE ABOUT ARCHITECTURE AND ARTISTIC PRODUCTION IN THE LONGOBARD ERA IN THE LOCATIONS OF THE NETWORK
Project 3.1	Drawing up and running a programme to update the findings on architecture, with analysis of construction phases
Description	The locations in the network conserve the major Italian architectural evidence of the Longobard period, which in some cases constitutes a unique heritage for reconstructing the construction concepts of the time. Studies of these monuments is already widespread by very often they differ in terms of method and degree of detail, partly due to the time lapse between the various investigations carried out. New surveying and documentation techniques for structures now make it possible to think about a coordinated, homogenous programme of analysis that is able to produce data that can be compared and new elements for establishing the background of the monuments. These provide materials for creating three-dimensional reconstruction models, used to set up multi-media systems that will constitute elements of a database, connected with a computer platform on the Website.
Actions	<ol style="list-style-type: none"> 1. Check the status of documentation on every monument 2. Gather the data available 3. Draw up analysis programmes 4. Update findings and run new survey campaigns 5. Stratigraphic analysis of the structures and definition of the phases of evolution 6. Create three-dimensional reconstruction models of the various phases 7. Organise the data 8. Create and implement databases 9. Create multi-media editions on the various monuments
Parties involved	Stakeholders; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Istituto Italiano dei Castelli; Centro di Studi Micaelici; CISAM; Superintendencies; Universities
Phases and timescales	1-3) As from 2008-2009 4-9) As from 2009-2010
Financial resources	To be found.
Expected results	Improved knowledge about Heritage Improved chronological understanding of monuments
Result indicators	Number of monuments surveyed Number of three-dimensional reconstructions created Quantity of data organised Frequency of consultation of the databases Quantity of multi-media materials produced

KNOWLEDGE PLAN Network	
Objective 3	EXTENDING KNOWLEDGE ABOUT ARCHITECTURE AND ARTISTIC PRODUCTION IN THE LONGOBARD ERA IN THE LOCATIONS OF THE NETWORK
Project 3.2	Creating and running common programmes for analysing the characteristics of style, materials, and techniques used in works of artistic value
Description	<p>The heritage in the network includes some of the most relevant works done not only in the Longobard realm, but in all artistic works of the Dark Ages. There are many links to be formed between the artefacts found in the various locations in the network, which is a sign of a common cultural matrix that can only be better understood by more wide-ranging analysis and comparison. For this reason, although these is an extensive series of studies in place, the plan is to promote new research to improve knowledge about art work in the period, in order to better understand not only the formal or aesthetic aspects but also, thanks to new survey methods, the material and technical characteristics of the works by means of adequate diagnostic investigation (see project 3.3 below), and new techniques for documentation that are also in able to provide materials for wider distribution.</p> <p>Some of the general topics to be studied in greater depth include:</p> <ol style="list-style-type: none"> a) Stucco from the dark ages from Cividale, Brescia, and Spoleto, between East and West. The art of fresco painting in the Longobard age: Techniques and skills. b) Sculpture in the Longobard era: Artistic influences, materials, and execution techniques. c) Writing and producing codes.

	d) Longobard goldsmith's art – traditional items and new forms of expression
Actions	<ol style="list-style-type: none"> 1. Drawing up a coordinated research programme for works of art from the period 2. Gathering and organising existing data. 3. Creating a database 4. Promoting new surveys 5. Implementing the database 6. Creating multi-media publications on the results of the research
Parties involved	Stakeholders; Centro e Laboratorio di Diagnostica della Rocca Albornoziana di Spoleto; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; CISAM; Centro di Studi Micaelici; Superintendencies; Universities
Phases and timescales	1-3) As from 2008-2009 4-6) As from 2009-2010
Financial resources	To be found.
Expected results	Improved knowledge about works of art
Result indicators	<p>Number of items surveyed</p> <p>Quantity of data organised</p> <p>Frequency of consultation of the databases</p> <p>Quantity of multi-media materials produced</p>

KNOWLEDGE PLAN Network	
Objective 3	EXTENDING KNOWLEDGE ABOUT ARCHITECTURE AND ARTISTIC PRODUCTION IN THE LONGOBARD ERA IN THE LOCATIONS OF THE NETWORK
Project 3.3	Coordination of diagnostic activities on monuments and heritage works
Description	<p>A cognitive aspect closely related to the previous projects (3.1 and 3.2) is that related to the diagnosis methods for structures and material elements that make up the monuments and works of art from the Longobard period. The drawing up of common or coordinated diagnosis programmes for locations in the network will therefore make it possible to have homogenous data that can provide an accurate reconstruction of the methods used to produce the major works in the period, as well as to have an accurate picture of their state of conservation. This will also make it possible to create a database that can become a reference for all studies into art and architecture in the dark ages.</p> <p>These in-depth programmes will be able to count on organisational support from the Rocca Albornoziana Centre and Diagnostic Laboratory in Spoleto.</p>
Actions	<ol style="list-style-type: none"> 1. Define a coordinate diagnosis programme for the heritage items in the network 2. Define data acquisition and organisation protocols. 3. Create a database 4. Promote new coordinated Heritage diagnostic programmes.
Parties involved	Stakeholders; Centro e Laboratorio di Diagnostica della Rocca Albornoziana di Spoleto; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Superintendencies; Universities
Phases and timescales	1-2) As from 2008-2009 3-4) As from 2009-2010
Financial resources	To be found.
Expected results	<p>Extension and coordination of Heritage diagnostic surveys.</p> <p>Increase of knowledge on heritage items and their state of conservation.</p>
Result indicators	<p>Extent of the database</p> <p>Number of items involved in coordinated fact-finding surveys</p> <p>Number of fact-finding surveys promoted</p> <p>Frequency of consultation of the databases</p>

KNOWLEDGE PLAN Network	
Objective 4	EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE EXTENT OF THE NETWORK TO OTHER ITALIAN SITES WITH PARTICULAR EVIDENCE OF THE LONGOBARD ERA
Project 4.1	Creation of a database on Italian Longobard sites
Description	While the Heritage in the network includes the Highest expression of Longobard culture, further aspects of the culture and civilisation of this people is also to be found in other settings in Italy, where less auspicious traces were left, but of equal importance for

	understanding the effect the Longobards had on the destiny of the entire peninsula. Gathering and organising data on the Longobards' presence in Italy will help to better understand these phases of history and to have an overall picture for each in-depth study.
Actions	<ol style="list-style-type: none"> 1. Censusing and analysing Longobard sites and finds. 2. Censusing and analysing funerary finds from the Longobard era. 3. Creating a database 4. Implementing the database thanks to research being carried out
Parties involved	Stakeholders; CISAM; Centro di Studi Micaelici; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Superintendencies; Universities, Regional and Provincial Authorities, and Municipalities of the areas involved.
Phases and timescales	As from 2009
Financial resources	To be found.
Expected results	Increased knowledge about the Longobard presence in Italy
Result indicators	Extent of area involved and number of sites involved Quantity of data acquired and analysed Frequency of use of the database

KNOWLEDGE PLAN Network	
Objective 4	EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE EXTENT OF THE NETWORK TO OTHER ITALIAN SITES WITH PARTICULAR EVIDENCE OF THE LONGOBARD ERA
Project 4.2	Promoting research and studies into Longobard culture in Italy (Publishing, Conventions, Seminars, etc.)
Description	<p>Despite the great amount of data available, gathered in research carried out in the last thirty years, many problematic aspects still exist in relation to the Longobard presence in the peninsula, which deserves studying in greater depth.</p> <p>Some general topics include:</p> <ol style="list-style-type: none"> a) The evolution of urban settlements and the social structure among the inhabitants. b) Carrying out of research into fortification systems in the dark ages. c) Extending research into Longobard necropolises, aimed not only at analysing the single tomb contexts but the construction characteristics and evolution of cemeteries, in order to better anthropologically characterise the dead, and the development of the funeral rite. d) Carrying out research into the customs and society, but analysing cultural material and settlement systems e) Extending research into the evolution of rural areas in the Longobard era, but more in-depth territorial surveys on a large scale and the identification and excavation of the most significant settlements.
Actions	<ol style="list-style-type: none"> 1. Identification and involvement of the cultural institutions and experts that work in this field 2. Definition of a multi-year research programme 3. Activation of protocols and agreements for carrying out specific research 4. Publication of results
Parties involved	Stakeholders; CISAM; Centro di Studi Micaelici; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Superintendencies; Universities, Regional and Provincial Authorities, and Municipalities of the areas involved.
Phases and timescales	1-2) As from 2008 3-4) Long term, as from 2009-2010
Financial resources	To be found.
Expected results	Increased knowledge about the Longobard presence in Italy
Result indicators	Extent of area involved and number of sites involved Number of research projects carried out Number of publications produced

KNOWLEDGE PLAN Network	
Objective 5	EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE GEO-CULTURAL CORRIDOR OF MIGRATION FROM NORTHERN EUROPE TO ITALY
Project 5.1	Creation of a database at European level on aspects of Longobard culture
Description	The characteristics of Longobard civilisation and culture can be better understood only by

	<p>following the route that over the centuries took them from Scandinavia to Italy. There is a lot of data about the Longobard presence in the central-northern European settlements, and also those immediately the other side of the Alps and along the Danube, in the ancient territories of Norico and Pannonia (which stretched over Austria, Hungary, and Slovenia), where they stayed in the decades immediately prior to their descent into Italy. Reconstructing this long route and their socio-cultural evolution, which can be done by analysing the material relics and existing documentation, is an essential opportunity for knowing about this people. Organising and checking the data gathered thus far, a lot of which related to research completed a number of years ago and which was not widely distributed beyond a limited group of specialists, may provide a very important basis for directing the activities of looking in greater detail and valorising the Longobard civilisation. Running such a project involves establishing agreements with institutions and operators in the various European countries involved, that deal with aspects related to research into the Longobards.</p>
Actions	<ol style="list-style-type: none"> 1. Creating relations for European institutions and researchers for the areas involved 2. Drawing up a common research programme and activating requests for financing 3. Censusing and analysing Longobard sites and finds in the various European countries. 4. Censusing and analysing funerary finds from the Longobard era in Europe. 5. Creating a database 6. Implementing the database thanks to research being carried out
Parties involved	Stakeholders; CISAM; Centro di Studi Micaelici; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Superintendencies; Universities, European Institutions in the areas involved.
Phases and timescales	1-2) As from 2008-2009 3-6) Long term, as from 2009-2010
Financial resources	To be found among financing from the European Community for cultural cooperation (Cultural Programme 2007-2013; Interreg ...).
Expected results	Improved knowledge of Longobard culture and civilisation
Result indicators	Extent of area involved and number of sites involved Quantity of data acquired and analysed Frequency of use of the database

KNOWLEDGE PLAN Network	
Objective 5	EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE GEO-CULTURAL CORRIDOR OF MIGRATION FROM NORTHERN EUROPE TO ITALY
Project 5.2	Promoting research and studies on Longobard culture in Europe
Description	<p>The intention is to create a system for collaboration with the Institutions affected by the Geo-Cultural Corridor, for more in-depth studies of the Longobard culture in order to develop and run a programme to analyse the Longobard socio-cultural traditions in the territories affected by their migration.</p> <p>Some general topics to be looked at in-depth include:</p> <ol style="list-style-type: none"> a. Research and studies on pilgrims, sites, and itineraries from the Byzantine Mediterranean region to the Longobard and Germanic world. b. Research into Longobard funeral rites and customs. The large necropolises from Panninia to Italy. c. Research and study of the Longobard routes from Northern Europe to Italy. d. Research and studies into traditional Longobard customs and social evolution e. Research and studies of alimentation in the Longobard era f. Longobard art before arriving in Italy.
Actions	<ol style="list-style-type: none"> 1. Creating relations for European institutions and researchers for the areas involved 2. Drawing up a common research programme, setting up bilateral or multi-party agreements and programmes, and activating requests for financing 3. Carrying out research 4. Publication of results
Parties involved	Stakeholders; CISAM; Centro di Studi Micaelici; Centro Internazionale di Ricerca e Documentazione sull'Arte e l'Architettura Altomedievale; Superintendencies; Universities, European Institutions in the areas involved.

Phases and timescales	1-2) As from 2008-2009 3-4) Long term, as from 2009-2010
Financial resources	To be found among financing from the European Community for cultural cooperation (Cultural Programme 2007-2013; Interreg ...).
Expected results	Improved knowledge of Longobard culture and civilisation
Result indicators	Extent of area involved and number of sites involved Number of research projects carried out Number of publications produced

KNOWLEDGE PLAN Cividale del Friuli site and buffer zone	
Objective 6	ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE
Project 6.1	Launch of further survey campaigns in order to implement knowledge on the site's heritage
Description	<p>An enhanced knowledge – also of the relative documentation – on the exceptionality of the architectural and artistic heritage of Cividale is fundamental to improve its use. The promotion of new cognitive surveys aimed at the improvement of existing data – sometimes incomplete or based on past analyses conducted with non-updated techniques – seems to be of paramount importance. In particular, further studies on building and decorative techniques and development phases of monuments are extremely interesting. In this context, new digital precision organic surveys, acting as a basis for the implementation of knowledge and enabling the planning and implementation of further analytical studies are planned. Surveys can be conducted through photogrammetric or laser-Scanning methods, or through vector and digital rendering.</p> <p>As to the Monastery, it is necessary to start from the survey of wall and plaster stratification (through targeted surveys) of the surfaces facing the cloister. This phase is needed to plan an overall systematic survey.</p> <p>The following actions are scheduled:</p> <ol style="list-style-type: none"> Metric survey of the building stratification, descriptive survey of material of the Tempietto and the Monastery of Santa Maria in Valle (See Conservation Plan, Project 2.2; Enhancement Plan, Project 1.2, 1.7) Georeferenced metric survey and survey of the building stratification of the ancient Patriarchal Palace and other ruins discovered at the Provveditori Veneti Palace (Archaeological Museum) (See Conservation Plan, Project 5.1) Survey of the Font of Callisto and the Ratchis Altar (See Conservation Plan)
Actions	<ol style="list-style-type: none"> Survey project Implementation of campaigns for georeferenced metric and descriptive surveys Analysis of building stratification of monuments Data rendering Creation of three-dimensional rendering models for actual conditions Creation of three-dimensional rendering models for transformation phases
Parties involved	Municipality of Cividale del Friuli; Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage of Friuli Venezia Giulia; Parish of Santa Maria; Region Friuli Venezia Giulia; International Centre for Research and Documentation on Early Medieval Art and Architecture
Phases and timescales	Short-medium term, starting from 2009
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia The survey of the Ratchis Altar, within the diagnostic project (€ 71,000) has already been funded by the Region Friuli Venezia Giulia and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) (See Conservation Plan)
Expected results	<p>Obtaining precision georeferenced surveys on existing material, in order to define the historical evolution of the property (analysis of transformation phases)</p> <p>Surveys will be the basis for:</p> <ul style="list-style-type: none"> - planning the maintenance project of the Tempietto and the restoration project of the Monastery - planning and carrying out of further targeted analyses on building elements - creating a GIS (database) - providing material for dissemination activities
Result indicators	<p>Number of collected and systematized data</p> <p>Frequency of use of results in other project concerning the conservation, enhancement and use of the properties.</p>

KNOWLEDGE PLAN Cividale del Friuli site, buffer zone and territory	
Objective 6	ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE
Project 6.2	Analysis and study of existing archaeological and historical documentation on Cividale
Description	There are numerous research and archaeological finds in Cividale. Not only there are investigations which date back to the 18 th and 19 th century, but also, especially in recent years, excavations have been carried out with modern methods. All documents and finds are

therefore kept. Unfortunately, data have been analysed only partially or at preliminary phase. Their close examination is an important element for the reconstruction of the vicissitudes of the Site and for the improvement of enhancement and dissemination prospects. The objective is therefore to activate a new study on finds and excavation results carried out in the past in Cividale. In particular: in the area of the Duomo and the Patriarchal Palace (Provveditori Palace); in Piazza Paolo Diacono and near the Pietà Mount; in the Fornasaro estate; in the Roman Court; in the Julius Caesar Forum; in the San Francesco court; near the Craigher Canussio estate (ancient walls and towers). In addition to this, the census and analysis of the data concerning churches and monasteries of the city and surroundings are also planned. A cognitive in-depth study will provide material for the monographic publications on different topics in the context of the series "Archaeology in Cividale. Studies and research", which will initially envisage the following topics:

- a) The area of the Episcopal complex from Roman to Modern times; summary of information and results of ancient and recent surveys in the area which includes the complex of the cathedral, the ruins of the Patriarchal Palace and some houses, dating from Roman and Medieval times which are now visible near the basement of the Provveditori Palace.

Remains near Patriarchal Palace

- b) The excavation of Piazza Paolo Diacono; results of old and recent excavations in the area of the Late-Antique palatium and the " Tomb of Gisulf" (layers from Roman to Medieval times).

View of the excavations near the so-called "Tomba di Gisulfo"

- c) The excavation of Julius Caesar Forum and the Roman Court Residence. Excavation conducted from 2003 to 2006 in two key area of Forum Iulii (layers from Roman times to the Renaissance)

View of the roman building and Early middle ages burial in the area of Corte Romana

	<ul style="list-style-type: none"> d) The southern necropolis of Forum Iulii e) The necropolis of San Giovanni and Cella from Roman to Early Medieval times
Actions	<ul style="list-style-type: none"> 1. Research and recovery of documentation. 2. Study and systematization of excavation data. 3. Cataloguing and study of finds 4. Issue of publications
Parties involved	Superintendence for Archaeological Heritage; Municipality of Cividale del Friuli; University of Udine; University of Trieste; International Centre for Research and Documentation on Early Medieval Art and Architecture
Phases and timescales	Medium term starting from 2009
Financial resources	Funds to be raised by: State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; Province of Udine; private and bank sponsorship
Expected results	<p>Scientific release on excavations and dissemination of archaeological aspects on the history of Cividale</p> <p>This will be necessary to:</p> <ul style="list-style-type: none"> - create the Archaeological Card of Cividale. - create a GIS (database) - issue information material
Result indicators	<ul style="list-style-type: none"> Number of obtained data Number of analyzed contexts Number of issued publications

KNOWLEDGE PLAN Cividale del Friuli site	
Objective 6	ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE
Project 6.3	Enhancement of historical research on the Longobard Tempietto
Description	<p>a) Many studies have been conducted on the Longobard Tempietto since the beginning of last century. Documentation on these interventions went missing or lack cohesion. Some surveys – like, for example, those conducted under Austrian rule at the beginning of the 20th century – haven't even been documented. The census and collection of all known data and the search for new data in the archives will be essential to get a complete idea of the vicissitudes of the Longobard Tempietto</p>
Actions	<ul style="list-style-type: none"> 1. Acquisition and systematization of archive data on already conducted researches 2. Research in the historical archive of Vienna on the activity of the Isonzo Armée
Parties involved	Municipality of Cividale del Friuli; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venia Giulia; University di Udine; International Centre for Research and Documentation on Early Medieval Art and Architecture
Phases and timescales	Medium term, starting from 2009
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (financing for research); European Union
Expected results	<p>Improvement of knowledge on the Tempietto Longobardo</p> <p>Creation of an updated and complete database</p>
Result indicators	<ul style="list-style-type: none"> Number of collected data Frequency of use of the database

KNOWLEDGE PLAN Cividale del Friuli site and buffer zone	
Objective 6	ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE
Project 6.4	Census on structures and existing data on walls, definition of remains' properties
Description	<p>The walls are a monumental element of the ancient urban area of Cividale. They have been subject to changes in use and the modern urban development of the town over time. The knowledge of the features which still remain today is therefore a fundamental aspect to understand some urban development trends and to achieve a better protection and conservation level for the remains. Up to now, some in-depth studies have been conducted on Cividale's urban walls, yet with no systematic approach. It is therefore necessary to plan and systematically complete the census and the documentation of existing wall sections, through cataloguing and surveys to verify their belonging (See Conservation Plan). In this</p>

	way, a database which could be used for conservation and enhancement of walls and to favour dissemination of historical aspects among the general public will be created.
Actions	<ol style="list-style-type: none"> 1. Census of existing features or features found in the past 2. Cataloguing of existing wall sections 3. Verification of ownership 4. Verification and recovery of the documentation 5. Promotion of geometric surveys (orthophoto map or photogrammetric surveys) of remaining areas 6. Stratigraphic analysis 7. Systematization of data and transfer into archives 8. Issue of information and scientific material
Parties involved	Municipality of Cividale del Friuli; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) and Superintendence for Archaeological Heritage; International Centre for Research and Documentation on Early Medieval Art and Architecture; Italian Castle Institute (section Friuli Venezia Giulia).
Phases and timescales	Short-medium term starting from 2009
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; Region Friuli Venezia Giulia R. L. 10/2000
Expected results	Improvement of knowledge on walls Production of material for the implementation of GIS and archives on Cividale's Heritage
Result indicators	Number of data obtained Frequency of use of data in other projects concerning the conservation, enhancement and use of the property Number of publications issued on the subject

KNOWLEDGE PLAN Cividale del Friuli site	
Objective 7	CONTINUATION OF ARCHAEOLOGICAL RESEARCH IN THE SITE AND IN THE TERRITORY
Project 7.1	Planning and implementation of archaeological surveys in the Monastery of Santa Maria in Valle
Description	<p>The area of Valle where the Monastery is located is one of the most important areas of Longobard Cividale: here the royal court was located, as well as the Gastaldo. The Church of San Giovanni and the Tempietto were founded in this context as buildings related to the royal court. Besides the Tempietto Longobardo, some sculptures of the 6th-7th century and some aristocratic tombs found in the 18th century in the Church of San Giovanni, there are no other data on the monumental development of the area and the Monastery during Longobard times. Only archaeological surveys will provide new elements so as to reconstruct and present to the general public the history of this crucial area of the town. Several archaeological surveys are directly linked to the interventions concerning the programme to enhance the monastery and to increase attendance to the Tempietto (see Enhancement Plan).</p>  <p>Drawing of Della Torre archaeological findings in the Santa Maria in Valle Monastery</p>

	 <p>Plan of the future archaeological research</p>
<p>Actions</p>	<ol style="list-style-type: none"> 1. Archaeological surveys in relation to the enhancement of the use and layout of the monument and the rearrangement of the route in the Monastery: to be moved to the southern courtyard of the Tempietto, to the external area of the northern wall, to the south wing of the cloister which leads to the narthex and the façade (See Enhancement Plan) 2. Archaeological surveys in the sacristy in relation to the rearrangement of the access to the Tempietto and the redefinition of spaces (See Enhancement Plan) 3. Excavation surveys to verify the archaeological deposit in the cloister and in the courtyard of the Monastery (See Enhancement Plan, Project 1.2, phase 3) 4. Non-destructive preliminary diagnostic surveys (electromagnetism, georadar) in San Giovanni 5. Preliminary diagnostic surveys (electromagnetism, georadar, investigations) to identify other areas of archaeological value in the Monastery 6. Planning and implementation of archaeological extended excavations 7. Study of results 8. Publication of data
<p>Parties involved</p>	<p>Municipality of Cividale del Friuli; Superintendence for Archaeological Heritage of Friuli Venezia Giulia; University; International Centre for Research and Documentation on Early Medieval Art and Architecture</p>
<p>Phases and timescales</p>	<p>1 e 2 Short term 3-8 Medium term</p>
<p>Financial resources</p>	<p>1-2 Funds of the Municipality of Cividale del Friuli in the context of the appropriations for the first phase for the restoration of the Monastery of Santa Maria in Valle (see Enhancement Plan) 3-8 Funds to be raised by: Municipality of Cividale del Friuli; Region Friuli Venezia Giulia</p>
<p>Expected results</p>	<p>Defining the historical evolution of the area and obtaining elements to enhance the cultural offer for the visit to the Tempietto and the Monastery This will contribute to:</p> <ol style="list-style-type: none"> a) The planning of conservation and enhancement interventions b) The creation of the Archaeological Card of Cividale c) Implementation of GIS (database) d) Issue of information material
<p>Result indicators</p>	<p>Width of the area to be surveyed Number of data obtained Frequency of use in other enhancement and conservation projects Quantity of information and scientific material produced</p>

<p>KNOWLEDGE PLAN Cividale del Friuli site</p>	
<p>Objective 7</p>	<p>CONTINUATION OF ARCHAEOLOGICAL RESEARCH IN THE SITE AND IN THE TERRITORY</p>
<p>Project 7.2</p>	<p>Planning and implementation of research in the Duomo</p>
<p>Description</p>	<p>Since there are no data on the original basilica, nor results of excavation conducted at the beginning of the 20th century on the church square, non-destructive cognitive interventions</p>

	will be carried out inside the cathedral in order to verify the existence of ancient structures and possibly their development in plan view.
Actions	Planning of non-invasive surveys according to different methods: georadar, electromagnetism, etc. Carry on out of surveys Processing of result and drawing up of interpretation plans
Parties involved	Parish of Santa Maria; Superintendence for Archaeological Heritage and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; International Centre for Research and Documentation on Early Medieval Art and Architecture
Phases and timescales	Medium term
Financial resources	Funds to be raised by: Region Friuli Venezia Giulia; private citizens and bodies.
Expected results	Improvement of knowledge on the ancient layout of the Duomo
Result indicators	Width of the area to be surveyed Number of data obtained Frequency of use of data in other enhancement and research projects.

KNOWLEDGE PLAN Cividale del Friuli site and buffer zone	
Objective 7	CONTINUATION OF ARCHAEOLOGICAL RESEARCH IN THE SITE AND IN THE TERRITORY
Project 7.3	Planning and implementation of research on the ancient wall belt
Description	<p>The walls enclosing the Roman town and later the Longobard town mark the limits of the urban area. Discovered especially thanks to the research of Stucchi, during the half of the 20th century, they have been subject to recent excavations only in two sections: near Craigher Canussio Palace (Table no. 3) and near Via Mulinuss (Table no. 5). Another significant section containing a tower and the Late-Antique and Early Medieval strengthening structures of the walls is the Blockhouse area (Table no. 2) which could provide further data on the evolution and chronology of structures and represent a significant element in the route connected especially to the walls at the Craigher Canussio Palace.</p>  <p>Map of the city walls with the main areas for the archaeological research</p>  <p>The area n. 1</p>  <p>The area n. 2</p>
Actions	<ol style="list-style-type: none"> 1. Cleaning of the area subject to intervention 2. Survey of existing structures 3. Planning and implementation of archaeological excavations 4. Study and publication of results 5. Dissemination and preparation of visits (see Conservation Plan, Enhancement Plan)
Parties involved	Municipality of Cividale del Friuli; Superintendence for Archaeological Heritage and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage); International Centre for Research and Documentation on Early Medieval Art and Architecture; Italian Castle Institute (section Friuli Venezia Giulia).

Phases and timescales	Short-medium term, can be scheduled starting from 2009
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; Region Friuli Venezia Giulia, (funds in compliance with the Regional Law 10/2000)
Expected results	Improvement of knowledge on the development phases and the chronology of the walls Production of material for conservation and enhancement interventions
Result indicators	Width of the area to be surveyed Number of data obtained Frequency of use of data for other conservation, enhancement and dissemination projects Number of dissemination activities carried out

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 8	ENHANCEMENT OF KNOWLEDGE ON THE TERRITORY DURING LONGOBARD ERA
Project 8.1	Analysis and study of existing archaeological documentation on the territory
Description	Throughout the territory, extended evidence of the Longobard presence has been found. The improvement of knowledge must be based on new acquisitions, as well as on the verification and collection of all data available in order to create a wide documentation ground which could become a fundamental tool for the preservation of the heritage and the launch of new research projects.
Actions	<ol style="list-style-type: none"> 1. Census of existing data relative to the site included in the Longobard routes (see Enhancement Plan) 2. Census of the data on the Longobard period in other urban site of the Duchy (Aquileia, Concordia) 3. Systematization of data and transfer into archives for the creation of a Data Base 4. Study of evidence, data and launch of in-depth analysis of specific topics 5. Publication and dissemination of results
Parties involved	Superintendence for Archaeological Heritage and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; University; International Centre for Research and Documentation on Early Medieval Art and Architecture; Regional Centre for Cataloguing and Restoration of Villa Manin di Passariano; Italian Castle Institute (section Friuli Venezia Giulia); City Museums of History and Art; Friuli Archaeological Association.
Phases and timescales	Short-medium term, starting from 2009
Financial resources	Funds to be raised by: Region Friuli Venezia Giulia; European Union
Expected results	Acquisition of existing data and in-depth studies
Result indicators	Quality and quantity of data obtained Number of dissemination activities promoted and size of target groups

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 8	ENHANCEMENT OF KNOWLEDGE ON THE TERRITORY DURING LONGOBARD ERA
Project 8.2	Continuation of archaeological research in rural sites and Longobard necropolis
Description	<p>The continuation of excavation surveys on the territory on the most significant sites, like those already subject to partial surveys or those discovered again thanks to territorial analyses is essential to allow the enhancement of knowledge on the culture and the settlement of the Longobards. This is true also for Longobard necropolises: finding funerary accoutrements is fundamental to know the traditions, culture and habits of the Longobards and to measure their level of acculturation, also through anthropological analyses of skeleton remains. In Friuli many isolated tombs have been discovered. Since the place where they have been found is known, it would be important to reconstruct the cemeteries to which they belonged.</p>  <p>Map with the burials found of Longobards in Friuli Venezia Giulia</p>
Actions	<ol style="list-style-type: none"> 1. Identification of areas of interest 2. Launch of territorial analyses on wide scale with surveys and satellite image analysis 3. Planning of interventions and preliminary surveys to verify archaeological potential of the sites 4. Conduct of extended excavations 5. Launch of anthropological analyses on preserved skeleton remains 6. Systematization and transfer into archive of data 7. Dissemination and publication of data obtained
Parties involved	Superintendence for Archaeological Heritage; City Museums of History and Art; Friuli Archaeological Association.
Phases and timescales	Medium term, starting from 2010
Financial resources	Funds to be raised by: State; Region Friuli Venezia Giulia; European Union
Expected results	Increase in the numbers of findings and evidence of the Longobards
Result indicators	<p>Number of data Width of the area to be surveyed Frequency of use of acquired data</p>

	Number of the dissemination activities promoted and size of target groups
KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 8	ENHANCEMENT OF KNOWLEDGE ON THE TERRITORY DURING LONGOBARD ERA
Project 8.3	Enhancement of research on Early middle ages churches and monasteries
Description	<p>The churches and monasteries were the main institutions and the most important monuments of Friuli during Longobard times and usually preserve artistic works or evidence of the period. The evergetism of the ruling élites is focused – especially during the 7th and 8th century – on the foundation, embellishment and furnishing of these structures which were usually subject to a long process of evolution and transformation over time. A systematic analysis of these structures is planned in order to collect more data which will allow to improve knowledge on the development of the Early-Medieval presence of the Longobards on the territory and the characteristics of their artistic and architectural production, thus enabling further enhancement of the properties (see Enhancement Plan, Project 9.1)</p> <p>The improvement of knowledge on material and building techniques used for sculpture works of art found in the territory is also planned.</p>  <p>Map of the Early middle ages Monasteries in Friuli Venezia Giulia</p>
Actions	<ol style="list-style-type: none"> 1. Enhancement of research for the identification of the Longobard Monastery of Salt, through territorial surveys (surveys and satellite image analysis) 2. Census of the data and enhancement of research on other Early-Medieval monasteries (Aquileia, Cervignano, San Canzian d'Isonzo) 3. Census and analysis of data about Early-Medieval churches 4. Territorial and toponymic research aimed at identifying the areas where ancient churches which went missing were located 5. Census and study of artistic and architectural evidence linked to places of worship and monasteries 6. Analyses aimed at knowing the material and building techniques of sculptures 7. Systematization and transfer into archive of data 8. Dissemination and publication of the data obtained
Parties involved	Superintendence for Archaeological Heritage and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage); University of Udine; National Research Centre; International Centre for Research and Documentation on Early Medieval Art and Architecture; City Museums of History and Art; Friuli Archaeological

	Association.
Phases and timescales	Short-medium term starting from 2009
Financial resources	Funds to be raised by: Region Friuli Venezia Giulia; private and bank sponsorship As to the Municipality of San Canzian d'Isonzo, a regional contribution of € 40,000 has already been allocated for 2008 in order to launch the first phase for the restoration of the Antiquarium annexed to the church, through previous excavation campaigns. Further funds amounting to € 40,000 are expected to be donated by a bank to continue operations.
Expected results	Enhancement of knowledge on churches, monasteries and works of art of the territory during Longobard times; acquisition of updated data and creation of archives open to consultation
Result indicators	Number of data collected Width of the area subject to intervention Frequency of consultation of collected data Number of dissemination activities promoted and size of target groups

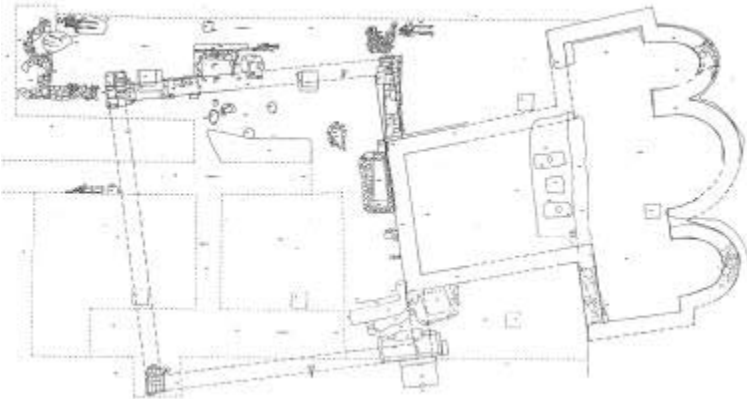

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 8	ENHANCEMENT OF KNOWLEDGE ON THE TERRITORY DURING LONGOBARD ERA
Project 8.4	Enhancement of research on Early middle ages fortified sites
Description	<p>Castra are the main settlements on the territory dating back from Early-Medieval times. Research conducted up to now, in particular in the sites mentioned by Paolo Diacono (Cormons, Nimis, Artegn, Ragogna, Osoppo, Gemona, Invillino) revealed their potential for the reconstruction of the vicissitudes of the Duchy. Research will be continued systematically, starting from a complete census of the areas where fortified settlements are located, by implementing the database on Late-Antique Early-Medieval fortifications created in Artegn (International Centre for Research and Documentation on Late-Antique and Early-Medieval Fortifications -CIRDOFTA), so as to improve knowledge and documentation of each centre, thus identifying characteristics and specificities also thanks to specific archaeological surveys.</p> <p>In some sites researches have already started and are under way:</p> <ol style="list-style-type: none"> a. Artegn, San Martino Hill b. Osoppo, Fortezza Hill c. Ragogna, San Pietro Hill d. Gemona, Castle Hill e. Buia, Castle Hill f. Cormons, Quarin Hill g. Illeggio h. Forni di Sopra, Cuel di Ciaste e Pra di Got <p>In Invillino new interventions are scheduled for 2007 and 2008, in the context of a programme for the enhancement of archaeological areas of Santino Hill, where the castrum is located, and Zuca Hill, where the Early-Christian and Early Medieval cultural complex is located.</p>  <p>Map of the main Early middle ages castles in Friuli Venezia Giulia</p>
Actions	<ol style="list-style-type: none"> 1. Census of the sites and fortified structures 2. Acquisition, Systematization of data 3. Promotion of survey campaigns of fortified centres 4. Completion of archaeological researches and promotion of new surveys 5. Enhancement of the website dedicated to Early-Medieval fortifications (CIRDOFTA)

	6. Study and publication of results
Parties involved	Municipalities; Province of Udine; Region Friuli Venezia Giulia; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) and Superintendence for Archaeological Heritage; CIRDOFTA (International Centre for Research and Documentation on Late-Antique and Early- Medieval Fortifications); Italian Castle Institute (section Friuli Venezia Giulia); City Museums of History and Art; Friuli Archaeological Association.
Phases and timescales	Short-medium term, starting from 2008
Financial resources	<ul style="list-style-type: none"> • Artegnà: for 2007-2008 EU funds and funds of the Municipality of Artegnà have been allocated and amount to € 85,000 for the continuation of research in the castrum, for the launch and activity of CIRDOFTA and dissemination activities; funds in the context of appropriations in compliance with the R.L. 10/2000 for the restoration of the castle (€ 2,200,000) • Osoppo; municipal funds, already allocated in the budget, amounting to € 5,000, for archaeological research in 2008; funds in the context of appropriations in compliance with the R.L. 10/2000 for the restoration of the fort's structures (€ 60,000) • Ragogna; funds in the context of appropriations in compliance with the R.L. 10/2000 for the restoration of fortifies structures (1st lot € 150,000; 2^d lot € 120,000; 3rd lot € 190,000; completion of project € 82,410) • Gemona; funds in the context of the appropriation for the restoration of the castle (€ 000000) • Buia ; funds in the context of appropriations in compliance with the R.L. 10/2000 for the restoration of fortifies structures (€ 0000) • Forni di Sopra, funds in the context of appropriations in compliance with the R.L. 10/2000 (€ 100,000) • Invillino; funds of the Municipality of Villa Santina already allocated in the budget amounting to € 10,000 for the continuation of research and new surveys
Expected results	Improvement of knowledge on Early-Medieval castra of the Duchy of Friuli. Increase in the enhancement levels with extension of the museum network "The castra of Paolo Diacono and Longobard Friuli" (See Enhancement Plan)
Result indicators	Number of data acquired Number of sites involved Width of the area subject to intervention Number of dissemination activities promoted and size of target groups

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 9	ENHANCEMENT OF KNOWLEDGE ON THE LONGOBARD ABBEY OF SESTO AL REGHENA
Project 9.1	Enhancement of analysis and study on the Urn of Sant'Anastasia
Description	<p>The Urn of Sant'Anastasia, which consists of a lectern for the exhibition of holy books, is one of the most interesting sculptural artefacts of the 7th century. Subject to controversial historical-artistic analyses, it has never undergone precise cognitive surveys which could outline sculpture techniques. Therefore, in-depth analyses using the most recent techniques, starting from digital technological surveys are planned in order to better enhance the property. (See Enhancement Plan)</p> <div style="text-align: center;">  <p>The so called "Urn di Sant'Anastasia"</p> </div>
Actions	<ol style="list-style-type: none"> 1. Census and acquisition of existing data 2. Laser scanning survey 3. Creation of three-dimensional models 4. Analysis of style and technical features of the property 5. Publication of results 6. Creation of multimedia publications
Parties involved	Municipality of Sesto al Reghena; Parish; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; International Centre for Research and Documentation on Early Medieval Art and Architecture

Phases and timescales	Short term, starting from 2008
Financial resources	€ 10,000 entered in the budget 2008 by the Municipality of Sesto al Reghena € 35,000 appropriation requested by the Region Friuli Venezia Giulia R.L. no. 68/81 Par. IV
Expected results	Improvement of the knowledge on the Urn of Sant'Anastasia and on sculpture production during Longobard times Issue of material to improve dissemination and use
Result indicators	Number of dissemination activities promoted and side of target groups

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 9	ENHANCEMENT OF KNOWLEDGE ON THE LONGOBARD ABBEY OF SESTO AL REGHENA
Project 9.2	Enhancement of analysis of the Abbey of Santa Maria during Early middle ages and Medieval times
Description	<p>The Abbey of Sesto al Reghena is a single and unique complex, although it contains structures used for different functions. The whole architectural body speaks of all the changes the building went through. There are some elements which date back to the original plan and the phases of monumentalisation during Roman times which concerned the Abbey and other buildings, among which the bell tower. Other Medieval and post-Medieval structures enrich the central core. The knowledge on the various architectural phases will be improved thanks to the recovery of existing data and the promotion of new surveys with digital technology which stand as a basis for the stratigraphic reading of structural layers and for the creation of interpretation and reconstruction three-dimensional models aimed at the enhancement of the place (See Enhancement Plan).</p>  <p style="text-align: center;">Plan of the main buildings known of the Monastery</p>
Actions	<ol style="list-style-type: none"> 1. Census and study of existing documentation 2. Census and analysis of works of artistic value preserved in the Abbey 3. Analysis of data on old excavations 4. Recovery of graphic documentation and surveys of the structures of the Abbey 5. Carrying out of new surveys 6. Stratigraphic analysis of the structures of the basilica 7. Creation of three-dimensional models of the monastic complex
Parties involved	Municipality of Sesto al Reghena; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) and Superintendence for Archaeological Heritage of Friuli Venezia Giulia; International Centre for Research and Documentation on Early Medieval Art and Architecture
Phases and timescales	Medium term, starting from 2009
Financial resources	Funds to be raised by: Municipality of Sesto al Reghena; Region Friuli Venezia Giulia; Province of Pordenone; Fondazione Cassa di Risparmio of Udine and Pordenone
Expected results	Improvement of knowledge on the various phases of the Abbey Production of material for the improvement of dissemination and use
Result indicators	Number of data acquired Number of dissemination activities promoted and size of target groups

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 9	ENHANCEMENT OF KNOWLEDGE ON THE LONGOBARD ABBEY OF SESTO AL REGHENA
Project 9.3	Carrying out of archaeological researches
Description	<p>The ancient origin of the Abbey, founded in the Longobard period on pre-existing structures and its long history bequeathed an archaeological stratification of particular interest. Surveys which have been conducted up to now in the southern area of the abbey brought to light a secondary place of worship dating from Early-Medieval times. In the park, north of the abbey, where the cloister was located, some surveys proved the existence of a warehouse of great potential, relative to pre-existing structures. Supposedly, service facilities of the Abbey were located in this area.</p> <p>New archaeological surveys which will allow the recovery of more data to reconstruct the vicissitudes of the complex will be scheduled. Building and restoration interventions on the structures will be used to conduct preliminary surveys.</p>  <p>Excavation plan of the Early Medieval Chappel founded at the South of the Abbey Church</p>  <p>The Park of Monastery, from north: an area whit ancient remains, where are important carry on new archaeological research</p>
Actions	<ol style="list-style-type: none"> 1. Planning of archaeological surveys 2. Carrying out of preliminary non-invasive surveys in the Abbey and in the hall 3. Carrying out of preliminary surveys 4. Carrying out of extended excavations 5. Analysis of data 6. Production of material for the dissemination of results
Parties involved	Municipality of Sesto al Reghena; Parish; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) and Superintendence for Archaeological Heritage of Friuli Venezia Giulia; International Centre for Research and Documentation on Early Medieval Art and Architecture; University
Phases and timescales	Medium term, starting from 2009-2010
Financial resources	Funds to be raised by: Municipality of Sesto al Reghena; Region Friuli Venezia Giulia; Already entered in the budget for archaeological research (€ 15,000) in the context of the

	appropriation for the renovation of the bell tower (€ 550,000)
Expected results	Improvement of knowledge on the historical and structural development of the Abbey Production of scientific and information material
Result indicators	Number of data acquired Width of the territory subject to intervention Number of dissemination activities promoted and size of target groups

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 10	SYSTEMATIZATION OF DATA
Project 10.1	Creation of the Archaeological Card Map of Cividale and the Duchy of Friuli
Description	Existing data on the Longobard period both in Cividale and throughout Friuli are numerous and are an essential ground for improving knowledge on the Longobard people and its settlements in Italy. Data are heterogeneous and this makes it complicated to use and disseminate them, thus diminishing their potential. For this reason, it is necessary to create an overall systematic collection of this evidence so as to make data available in a single database which will later become a real Card on archaeological evidence.
Actions	<ol style="list-style-type: none"> 1. Census of documentation 2. Filing and cataloguing of findings 3. Study and systematization of data with creation of a digital archive 4. Creation of the Card 5. Publication and dissemination of the Card
Parties involved	Region Friuli Venezia Giulia; Municipality of Cividale del Friuli; Superintendence for Archaeological Heritage and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; University of Udine and Trieste; International Centre for Research and Documentation on Early Medieval Art and Architecture; Project Promoting Committee of the Patriarchy of Aquileia; City Museums of History and Art; Friuli Archaeological Association.
Phases and timescales	Short - medium term, starting from 2009
Financial resources	Funds to be raised by: Region Friuli Venezia Giulia
Expected results	Collection and reorganization of all archaeological data; all data must be available for consultation. This will contribute to the implementation of a territorial GIS on evidence and to draw up archaeological risk maps
Result indicators	Number of collected data Width of the territory concerned Frequency of consultation and use of data in other projects Number of dissemination activities promoted and size of target groups

KNOWLEDGE PLAN Cividale del Friuli territory	
Objective 10	SYSTEMATIZATION OF DATA
Project 10.2	Creation of an online database based on GIS
Description	The management of knowledge on Cividale and Friuli during Longobard times can be facilitated if the systematization of data will become part of a wider knowledge system available to everybody. This will be made possible also thanks to the implementation of the regional GIS system and the addition of the part concerning archaeological and historical-artistic aspects and in particular those related to the Longobard period. This cartographic database will be created on a web application so that it will be available for on line consultation on the website of Cividale and the Longobard network.
Actions	<ol style="list-style-type: none"> 1. Systematization of collected data 2. Implementation of existing regional GIS 3. Insertion in the IT platform 4. Activation of online consultation
Parties involved	Region Friuli Venezia Giulia; Municipality of Cividale del Friuli; Superintendence for Archaeological Heritage and BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; University of Udine and Trieste; International Centre for Research and Documentation on Early Medieval Art and Architecture; Project Promoting Committee of the Patriarchy of Aquileia; Italian Castle

	Institute (section Friuli Venezia Giulia); City Museums of History and Art; Friuli Archaeological Association.
Phases and timescales	Medium term, starting from 2010
Financial resources	Funds to be raised by: Region Friuli Venezia Giulia
Expected results	Broaden the computerized database based on GIS Increasing dissemination and consultation potential of data on Longobard culture
Result indicators	Number of collected and inserted data Width of the territory concerned Frequency of consultation and use of data in other projects

KNOWLEDGE PLAN Brescia site	
Objective 11	RAISING THE LEVEL OF KNOWLEDGE ON THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.1	Study and monograph publication of the Longobard phases of San Salvatore-Santa Giulia
Description	<p>Two volumes have been dedicated to the more ancient phases of the area in which the monastery of San Salvatore-Santa Giulia was built. These present a complete study of the items found in the area (ceramics, glass, metal, coins) and analysis of the settlement structures (the domus from the Roman era and the Longobard era huts) (S. Giulia di Brescia gli scavi dal 1980 al 1992, Reperti preromani, romani e alto medievali, edited by G. P. Brogiolo, Florence; Dalle domus alla Corte Regia. Santa Giulia di Brescia. Gli scavi dal 1980 al 1992, edited by G. P. Brogiolo, F. Rossi, F. Morandini, Florence).</p> <p>A series of research and study projects are nearing completion dedicated more specifically to the Longobard phase of the crypt in the church of San Salvatore, the frescoes, stuccoes and furnishings. Further comparative investigations and research is underway or are about to be started whose objective is to fill in the gaps regarding the late mediaeval phase of the monastery. The results of all these studies are then to be published in a special volume dedicated exclusively to this topic.</p> 
Actions	<p>Reviews of previous partial editions;</p> <ol style="list-style-type: none"> 1. Start and/or completion of new studies (dedicated particularly to the crypt, furnishings and stuccoes of San Salvatore); 2. Analysis project with correct mapping of finds and crossed analysis coordinated with analyses of similar monuments (e.g. Cividale del Friuli) 3. Publication of study results (print)
Parties involved	Brescia City Council; Regional Department of Ministry of Cultural Heritage; Archaeology Office of Lombardy Regional Council; Amici dei Musei and/or CAB Foundation
Planned phases and timing	By end 2009
Financial resources	Still to be found
Expected results	Filling in existing gaps in knowledge; acquisition of data regarding: phase sequence, chronology, techniques, workers, iconographic interpretations Objective data regarding the characterization materials, analogies and differences with other late mediaeval sites
Result indicators	Study of 2000 finds (ceramic fragments, stuccoes and frescoes) Review of 50 documents about the late Middle Ages

KNOWLEDGE PLAN Brescia site	
Objective 11	RAISING THE LEVEL OF KNOWLEDGE ON THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.2	Study of the craft productions documented archaeologically at the monastery structures
Description	During archaeological investigations conducted in the courtyards/cloisters of the monastery and below the structures of the Longobard church numerous metal and bone scraps were found, which demonstrate significant craft activity related to royal commissions.

	<p>Multidisciplinary analysis and comparison with other similar finds from other sites might lead to interesting insights with regards to the late mediaeval crafts.</p> 
Actions	<ol style="list-style-type: none"> 1. Review of finds 2. Sampling for material characterisation and diagnostic investigations 3. Study of traces of craft activity 4. Comparison with finds from other contexts (e.g. Montichiari) 5. Publication of results 6. Temporary exhibition to present research
Parties involved	Brescia City Council; Regional Department for Cultural Heritage; Archaeology Office of Lombardy Regional Council; University of Brescia; Bresciamusei Foundation
Planned phases and timing	<p>January-May 2008 review of sampling and exhibition of finds June-December 2008 start of analysis 2009 study of results and publication</p>
Financial resources	To be met by Brescia City Council-Museum Department; Archaeology Office of Lombardy Regional Council; Bresciamusei Foundation
Expected results	Acquisition of new information on craft production
Result indicators	Review and study of approx. 300 finds

KNOWLEDGE PLAN Brescia site	
Objective 12	INVESTIGATION INTO SAN SALVATORE-SANTA GIULIA AS THE CENTRAL NUCLEUS OF THE BRESCIA AND NORTHERN ITALIAN MONASTERY SYSTEM
Project 12.1	Study of the network of monastery properties of Santa Giulia within the Via Carolingia national project
Description	<p>The city of Brescia was included in the Via Carolingia project, which was set up by the Ministry of Culture and Heritage and coordinated by the Regional Departments. The Via Carolingia project includes the study of the late Roman and mediaeval road axes as means of cultural transmission and valorisation of the historical and artistic testimonies along these routes of communication. The research is also aimed at architecture, settlement in the territory and the lifestyles of the late mediaeval populations.</p> <p>The territory involved in the project covers the provinces of Mantua, Brescia, Bergamo, Lecco and Como. Great importance has been given within the project to the larger metropolitan areas, and in particular, those that played a primary role in the power games (and economic) of those times, such as Brescia and Bergamo. Brescia in particular, with San Salvatore-Santa Giulia and its vast properties, must be considered a trade hub between the flatlands and the</p>

	<p>valleys. For the city of Brescia, at the centre of the project is the monastery of San Salvatore-Santa Giulia. Through the properties linked to the monastery and the other monastery estates of Franciacorta and Valle Camonica, investigations will look into the main aspects relating to the monastery foundations in the territory and the public and private buildings of worship will be analysed according to construction type, their function and role carried out within the reference community, construction techniques, relationships with the main and secondary road networks, the landscape and natural resources, production assets, place names, worship of particular saints and how this was spread across the territory and, where possible, the extent of their properties, relations with imperial and papal power, with the city and with other regions, with centres for procurement of raw materials.</p> 
<p>Actions</p>	<ol style="list-style-type: none"> 1. Data collection and new research and studies on lifestyles in late mediaeval Longobard 2. Comparison of date and results of the investigations against the European late mediaeval scale, emphasising the relations with the previous and subsequent periods. 3. International conference for the valorisation of the research and for a comparison of the research methods and the contexts investigated according to the data acquired 4. Publication of Conference minutes, historical, archive and iconographic research
<p>Parties involved</p>	<p>Directorate General of the Ministry of Cultural Heritage, Archaeology Office of Lombardy Regional Council, Brescia City Council-Art and History Museums Department, the CAB Foundation and the University of Padua</p>
<p>Planned phases and timing</p>	<p>2008-2010</p>
<p>Financial resources</p>	<p>Total cost of the Brescia segment of the project: €154,000, of which €20,500 to be met by the Regional Directorate of the Ministry of Cultural Heritage. The rest is to be found</p>
<p>Expected results</p>	<p>Reconstruction of the lifestyle of late mediaeval Longobard and the rest of late mediaeval Europe</p>
<p>Result indicators</p>	<p>Events and promotional materials for distribution of the research results</p>

KNOWLEDGE PLAN Brescia site	
Objective 13	INVESTIGATION INTO THE HISTORICAL AND MONUMENT PHASES PRECEDING THE LONGOBARD MONASTERY
Project 13.1	Scientific publication of the Ortaglia domus
Description	<p>Over the years, digs beneath the monastery structures have uncovered large part of a large Roman residential district; the so-called domus of Ortaglia, are today part of the itinerary of the City Museum, and are the latest to be unearthed and valorised. Since 2003 there has been a series of studies on the structures, the decorations and furniture finds, but there still lacks a scientific publication containing the results of all completed and ongoing research projects.</p> 
Actions	<ol style="list-style-type: none"> 1. Assignment of study of various aspects and finds of the domus 2. Critical comparison between scholars 3. Integration of existing graphic and photographic campaigns 4. Drawing up of new stratigraphic documents 5. Publication of results
Parties involved	Brescia city council; Archaeology Office of Lombardy Regional Council; University of Padua; University of Pisa; Bresciamusei Foundation; CAB Foundation.
Planned phases and timing	2008-2009 assignment of studies and start of works 2010 publication
Financial resources	Still to be found
Expected results	Investigation of these two Roman dwellings
Result indicators	Study of 500 finds, several thousand fragments of painted plaster; review of 200 pieces of documentation

KNOWLEDGE PLAN Brescia site	
Objective 14	INVESTIGATION INTO THE STATE OF KNOWLEDGE ON THE URBAN CAPITOLINE AREA
Project 14.1	Scientific Publication of the Republican Roman sanctuary
Description	Over the years, parallel to the conservation interventions on the structures and decorations, there has been a series of specialist studies on the Republican Roman sanctuary below the structures of the imperial Capitolium. These studies have led to important results for the field

	<p>of religious buildings of the 1st century BC of Northern Italy, so much that the data collected can be a fundamental point of reference for information on ancient architecture, painting and mosaics. It is therefore necessary to publish the research results.</p> 
<p>Actions</p>	<ol style="list-style-type: none"> 1. Comparison between scholars on the data collected and the state of the research 2. Drafting of study report 3. Publication
<p>Parties involved</p>	<p>Archaeology Office of Longobardy Regional Council; Brescia City Council Museums-Department ; University of Milan; Central Institute for Restoration</p>
<p>Planned phases and timing</p>	<p>2008 comparison and studies and collecting of contributions 2009 publication</p>
<p>Financial resources</p>	<p>Still to be found</p>
<p>Expected results</p>	<p>Investigation into the sanctuary and the history of the area</p>
<p>Result indicators</p>	<p>Study of 100 finds from the monument (architectural elements, sculptures, fragments of painted plaster)</p>

<p>KNOWLEDGE PLAN Brescia site</p>	
<p>Objective 14</p>	<p>INVESTIGATION INTO THE STATE OF KNOWLEDGE ON THE URBAN CAPITOLINE AREA</p>
<p>Project 14.2</p>	<p>Start of studies on other monuments in the area</p>
<p>Description</p>	<p>As the excavation, conservation and valorisation work continues in the Capitolium area of the imperial era, it is necessary to refer to the data of studies conducted in the past and integrate them into recent investigations, in order to gain an overall understanding that is as exhaustive as possible of individual archaeological monuments (Theatre, Capitolium, decumanus maximus) and of the historical buildings that have been placed over ancient structures over the centuries (Palazzo Pallaveri and Palazzo Maggi Gambarà). These studies are fundamental for guiding the museum work in the area and providing information about the heart of the ancient city.</p>

	
Actions	<ol style="list-style-type: none"> 1. Assignment of studies 2. Start of research 3. Integration of graphic and photographic documentation 4. Comparison of study data 5. Publication
Parties involved	Brescia City Council-Museums Department Archaeology Office of Lombardy Regional Council Bresciamusei Foundation CAB Foundation
Planned phases and timing	2008-2009 study phase and preparation of documentation 2010 publication
Financial resources	Still to be found
Expected results	Greater understanding of the buildings and their interrelations and functions
Result indicators	Study of around 700 finds from the area; execution of at least 3 specific archaeological investigations; 1 publication

KNOWLEDGE PLAN Brescia buffer zone and territory	
Objective 15	SORTING OF TERRITORIAL DATA ON THE EARLY MIDDLE AGES AND INCREASE IN THE STATE OF KNOWLEDGE
Project 15.1	Definition of the "Network of Longobard sites" whose significant nodes are the settlements of Manerbio, Leno, Calvisano, Montichiari and Sirmione.
Description	<p>Monitoring of the territory, excavation of other settlements and necropolises carried out over the last three decades by volunteers from archaeological groups operating in the central eastern Brescia plain, coordinated by the Archaeology Office of Lombardy Regional Council, are activities that have enabled: the outlining of a map of 25 sites of initial settlement sites and subsequent stabilization by the Longobards in the Brescia territory; the recovery of funeral objects and a large quantity of objects; the start of the restoration and valorisation, ensuring safeguard and conservation.</p> <p>The activity carried out has also enabled the outlining of a map of the early Christian and late mediaeval ecclesiastical buildings in the plain.</p> <p>The project involves completing reconnaissance on the territory of the main Longobard sites in the network and bordering municipalities.</p>
Actions	<ol style="list-style-type: none"> 1. Historical-archaeological reconnaissance of the territories of the municipalities within the "Network of Longobard sites" and bordering municipalities.

	<ol style="list-style-type: none"> 2. Identification of Longobard sites, Highlighted by settlements, necropolises, buildings and artistic and monument finds. 3. Identification and publication of archive sources, needed to reconstruct the history of the territories and the communities of the five nodes in the network. 4. Archaeological investigation of the settlements, of the necropolises and the monuments identified. 5. Planning of analysis, study, restoration and valorisation of known finds and monuments and of those recently identified 6. Development and implementation of valorisation programmes of settlements, recovered finds and identified monuments (c.f. Enhancement plan).
Parties involved	Ministry of Cultural Heritage Regione Lombardia Brescia Provincial Council Brescia City Council Municipalities within the "Network of Longobard sites" and bordering municipalities Lombardy Regional Directorate for Cultural and Landscape Heritage Archaeology Office of Lombardy Regional Council CAB Foundation Dominato Leonense Foundation Civiltà Bresciana Foundation
Planned phases and timing	<ol style="list-style-type: none"> 1. Start of historical-archaeological reconnaissance 2. Development and set-up of analysis and study projects of the settlements, finds and monuments. 3. Digging campaigns 4. set-up of exhibition 5. organization of a study conference with publication of the results 6. Publication of archive sources 2008-2013 five-year period
Financial resources	To be definite and found
Result indicators	Investigation of at least 5 late mediaeval sites; review of at least 300 archaeological finds; organization of 1 study convention; 1 publication of data acquired.

KNOWLEDGE PLAN Brescia buffer zone and territory	
Objective 15	SORTING OF TERRITORIAL DATA ON THE EARLY MIDDLE AGES AND INCREASE IN THE STATE OF KNOWLEDGE
Project 15.2	Analysis, study and research applied to the finds and funeral objects from the settlements and necropolises of the municipalities in the "Network of Longobard sites".
Description	<p>The various excavation and recovery works of the objects from the numerous necropolises to emerge of the last thirty years in the central eastern Brescia flatland, to survive construction works and intensive farming, have often been carried out using the criteria of urgency. The rescued finds and map of the sites identified need to be re-read together, which is only possible through a careful analysis of the finds, an in-dept examination of the data collected, laboratory investigations, collection and sorting of published and unpublished archive material. The plan is to reconstruct settlement areas and the forms that these took, the cultural, judicial-institutional and socio-economic transformations induced by the integration led by Longobard generations subsequent to their arrival from Pannonia, involved in the dynamics of the Christianization process.</p>

	
<p>Actions</p>	<ol style="list-style-type: none"> 1. Analysis and study of settlements and necropolises located in the territories of the municipality's within the "Network of Longobard sites" and bordering municipalities 2. Analysis and study of archaeological finds located in the collections stored at the historical and archaeological museums of Manerbio, Leno, Remedello and at the National Archaeological Museum of Sirmione, in addition to those kept by the Archaeology Office. 3. Analysis and study of the monument testimonies of San Pietro in Mavino, San Giorgio in Montichiari and San Nazzaro and San Celso in Leno. 4. Analysis, critical publication and study of the mediaeval archive sources for the territory included in the network of Longobard sites in Brescia.
<p>Parties involved</p>	<p>Ministry of Cultural Heritage Regione Lombardia Brescia Provincial Council Brescia City Council Municipalities within the "Network of Longobard sites" and bordering municipalities Lombardy Regional Directorate for Cultural and Landscape Heritage Archaeology Office of Lombardy Regional Council CAB Foundation Dominato Leonense Foundation Civiltà Bresciana Foundation</p>
<p>Planned phases and timing</p>	<p>2008-2013 five-year period</p>
<p>Financial resources</p>	<p>To be quantified and procured</p>
<p>Expected results</p>	<p>Increase in understanding of the material characteristics of late mediaeval finds and monuments; greater awareness of late mediaeval production techniques.</p>
<p>Result indicators</p>	<p>Review of at least 500 archaeological finds; execution of at least 30 specific analyses.</p>

<p>KNOWLEDGE PLAN Brescia buffer zone and territory</p>	
<p>Objective 15</p>	<p>SORTING OF TERRITORIAL DATA ON THE EARLY MIDDLE AGES AND INCREASE IN THE STATE OF KNOWLEDGE</p>
<p>Project 15.3</p>	<p>Foundation and organization of the CISL Centro Italiano di Studi Longobardi (Italian Centre for Longobard Studies)</p>
<p>Description</p>	<p>To coordinate and direct the research and study activities of Longobard heritage in Italy, a Study Centre has been set up with the aim of organizing the activities for distribution of information of the Longobard civilization in Italy, using a multidisciplinary approach. The Centre for specialist analyses will use the applied study and research activities of the Centre for Archaeometry Studies, set up by the Faculty of Engineering of the University of Brescia, and the Archeo Media Lab set up at the Dominato Leonense Foundation in Leno and will work in collaboration with existing study centres in across the Italian territory and abroad.</p>
<p>Actions</p>	<ol style="list-style-type: none"> 1. Seeking scientific partners to set up the centre

	<ol style="list-style-type: none"> 2. Foundation, with memorandum of association, of the Study Centre 3. Set-up of the Study Centre at Palazzo Martinengo Colleoni in Pianezza, today Bargnani, in Brescia, where the Civiltà Bresciana Foundation is also planned to be moved 4. Organization and implementation of a database of Longobard sites in Longobard, linked to national databases. 5. Set-up of a specialist online library, 6. Virtual reconstruction of the more significant settlements and necropolises
Parties involved	<p>Ministry of Cultural Heritage Regione Lombardia Brescia Provincial Council Brescia City Council Municipalities within the "Network of Longobard sites" and bordering municipalities Lombardy Regional Directorate for Cultural and Landscape Heritage Archaeology Office of Lombardy Regional Council CAB Foundation Dominato Leonense Foundation Civiltà Bresciana Foundation University of Brescia Sacro Cuore University of Milan University of Pavia University of Salerno And all the stakeholders in the Italian site involved in the project</p>
Planned phases and timing	2008-2013 five-year period
Financial resources	To be quantified and procured
Expected results	Acquisition of new instruments to gain new understanding of Longobard people
Result indicators	Entry of at least 70 records in database; virtual reconstruction of 5 settlements

KNOWLEDGE PLAN Brescia buffer zone and territory	
Objective 15	SORTING OF TERRITORIAL DATA ON THE EARLY MIDDLE AGES AND INCREASE IN THE STATE OF KNOWLEDGE
Project 15.4	Knowledge, safeguard and enhancement of Archaeological Areas and Parks
Description	<p>Regione Lombardia, with the involvement of three different Directorate Generals (Culture, Identity and Autonomy of Lombardy; Territory and Urban Planning; Environmental Quality) and the Regional Directorate for Cultural and Landscape Heritage of Lombardy Regional Council, Archaeology Office of Lombardy Regional Council have shared the design and set up of the awareness and valorisation project for the archaeological parks and areas in the regional territory. The project includes cataloguing all existing properties in the regional territory with the characteristics of an archaeological park or area.</p> <p>Many of the archaeological areas in Lombardy are located within the territories identified as natural parks.</p> <p>The first phase of the project involves promotion by the Region of the study and cataloguing of the archaeological areas located within natural areas, while the Ministry's structures promote the study of territories outside the protected areas.</p>

	
<p>Actions</p>	<ol style="list-style-type: none"> 1. Investigation into the characteristics of the cultural locations examined 2. In-depth monitoring of valorisation activities in the areas 3. Evaluation of the state of safeguard and valorisation of the archaeological parks and areas in close relation to the environmental and landscape contexts in which the properties are located
<p>Parties involved</p>	<p>Ministry of Cultural Heritage Regione Lombardia Brescia Provincial Council Brescia City Council Municipalities within the "Network of Longobard sites" and bordering municipalities Lombardy Regional Directorate for Cultural and Landscape Heritage Archaeology Office of Lombardy Regional Council</p>
<p>Planned phases and timing</p>	<p>2008-2013 five-year period</p>
<p>Financial resources</p>	<p>To be quantified and procured</p>
<p>Expected results</p>	<p>Acquisition of new instruments to gain new understanding of Longobard sites in the territory</p>
<p>Result indicators</p>	<p>Cataloguing and monitoring of around 200 contexts diversified according to type, extension, property, level of enhancement</p>

<p>KNOWLEDGE PLAN Brescia buffer zone and territory</p>	
<p>Objective 16</p>	<p>INVESTIGATION INTO KNOWN INFORMATION ON THE LONGOBARDS' CULTIVATIONS AND FOOD CUSTOMS</p>
<p>Project 16.1</p>	<p>Interdisciplinary study into the cultivations and food customs of the Late Middle Ages</p>
<p>Description</p>	<p>The numerous data available for the study of late mediaeval cultivations and food customs acquired over the years in towns and across the territory following stratigraphic digs and paleobotanical studies, today make it possible to systematically deal with the study of this important aspect of late mediaeval life, thanks to the evolution of specialist analysis techniques applied in this sector. Integration of archaeological data and written sources, and a comparison with similar research at European level, are proposed to rebuild the food customs of the Longobards and find continuities and discontinuities with today's diet.</p>
<p>Actions</p>	<ol style="list-style-type: none"> 1. Seeking European partners already involved in similar research 2. Applying to the European Culture 2000 programme 3. Starting study of the more significant contexts 4. Starting common analyses 5. Comparison of data 6. Distribution of data at different levels (specialist conferences, conference minutes, children's publications, recipe books)

Parties involved	Brescia City Council CAB Foundation Brescia Musei Foundation Palcogiovani onlus Pianura Bresciana Foundation Brescia Provincial Council Lombardy Regional Directorate for Cultural and Landscape Heritage Archaeology Office of Lombardy Regional Council University of Brescia European partners as yet to be found
Planned phases and timing	2008 seeking partners and presentation of bid for Culture 2000 2009 start of research activities 2011 end of activities
Financial resources	European Union with Culture 2000 funds; Bresciamusei Foundations; partners involved
Expected results	Increase in ability to work in a network; increased understanding of specific aspects of late mediaeval society
Result indicators	Organization of 1 conference; 1 scientific publication of data, publication of 1 children's book; publication of 1 recipe book

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.1	Review of the existing documentation on research carried out within the castrum
Description	<p>Research carried out up to now on Castelseprio has not been the subject of careful analysis which could valorise the results. A re-examination of all the documentation on the dig and the relative stratigraphic phases is therefore foreseen in order to initiate systematic studies, also on the discovered material.</p> <p>A complex and punctual study is then foreseen on the matters of the castrum and its monuments, on the basis of the evidence which emerges</p> <p>The main contexts to be analysed are:</p> <ol style="list-style-type: none"> Digs by the Poles at the wall and the middle tower Digs at the fortified belt (wall, towers, entrance) Research at the basilica complex of San Giovanni and the relative burial ground Dig of building VI Digs at the monastery of San Giovanni Dig of a building at San Paolo run by A. Piccoli - Dig of a medieval house carried out by the Università Cattolica of Milan
Actions	<ol style="list-style-type: none"> Censoring and collection of existing documents Study and analysis of the data on the various contexts Study and analysis of findings Realisation of scientific editions
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy FAI – Fondo per l'Ambiente Italiano (Italian National Trust) Province of Varese Region of Lombardy University
Phases and time frame	Starting from 2008-2009
Financial resources	To be found
Expected results	Widen knowledge on the castrum
Result indicators	Number of data and contexts analysed Number of publications realised

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.2	Analysis of existing documentation on Santa Maria foris portas
Description	<p>Archaeological research carried out at Santa Maria, particularly in the eighties of the twentieth century, has never been the subject of a definitive analysis. The numerous studies and evidence gathered over time deserve a review in relation to an overall approach able to pinpoint not only historical artistic values of the monument and its frescos but to rebuild the formulated constructive aspects and the transformations of the building. A re-examination of all the existing documentation and analysis of the findings.</p>
Actions	<ol style="list-style-type: none"> Censoring and collection of existing documents Study and analysis of contexts Study and analysis of findings Realisation of scientific editions
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy FAI – Fondo per l'Ambiente Italiano Province of Varese Region of Lombardy University
Phases and time frame	Starting from 2008-2009
Financial resources	To be found
Expected results	Heighten knowledge on the Church of Santa Maria foris portas
Result indicators	Quantity of data analysed Number of publications realised

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.3	In-depth of the analysis on the complex of Torba
Description	<p>Concerns research for publication on the asset and historical and artistic links with the territory.</p> <p>The study and research project proposes as its objective the maximum valorisation of the complex of the Monastery of Torba through the constitution of a complete documentary heritage by means of historic, artistic and monumental matters of the asset and its link with the territory to which it pertains.</p> <p>Existing studies on the asset are not such as to offer a complete historic and scientific examination as well as not completely answering the request for information on the part of the public.</p> <p>Until now critical luck has only concerned important fresocs conserved in the while few studies tackle the complex of the monastery of Torba and the Church of S. Maria in a scientific manner and the historical-artistic links with the reality of Castelseprio.</p> <p>Also missing is an analysis of the evidence which emerged from investigations carried out at the entrance to the tower, the church of Santa Maria and the porch of the fourth century church at the back of the tower.</p>
Actions	<ol style="list-style-type: none"> 1. Analysis of the documentation and remains of the digs 2. Historical-artistic research 3. Archive investigations 4. Compilation of text for publication
Parties involved	FAI – Fondo per l’Ambiente Italiano Region of Lombardy Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture
Phases and time frame	Starting from 2008
Financial resources	Co-financing FAI and Region of Lombardy - Lombard archaeological heritage group – year 2007 regional laws no. 39/84 and no. 39/91
Expected results	Improvement of knowledge and use of the asset
Result indicators	quantity of data and contexts analysed Number of publications produced

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.4	Data memorisation
Description	<p>The large mole of existing data appears scarcely homogeneous and disorganised; sometimes it is difficult to find items and to consult it. Collection and memorisation of evidence is therefore foreseen in order to prepare the tools necessary for easy consultation on a GIS basis finalised both to widening knowledge and the preparation of an archaeological document and databank which is able to help the conservation of the heritage and the planning activities of future interventions.</p>
Actions	<ol style="list-style-type: none"> 1. Recovery and memorisation of data 2. Compilation of an archaeological map of the Archaeological Complex of Castelseprio and the neighbouring areas 3. Preparation of a databank with catalogued summaries of buildings and manufactured items 4. Screening of restoration and diagnostic summaries on the materials 5. Realisation and implementation of a GIS
Parties involved	FAI – Fondo per l’Ambiente Italiano Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture Diagnostic Centre and Laboratory of Rocca Albornoziana di Spoleto
Phases and time frame	Starting from 2009
Financial resources	to be found

Expected results	Widening of consultable knowledge and evidence regarding the Archaeological Complex of Castelseprio
Result indicators	Quantity of data memorised Widening and detail of the archaeological document Number and frequency of consultations

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.1	Realisation of archeometric analysis on findings
Description	<p>The project foresees the reconstruction of aspects of the material culture of the castrum and the social economic character of the inhabitants thanks to careful analysis of manufactured items found in the digs and the bone remains both of the remains of food and the sample of population that emerged from burial grounds investigated in San Giovanni, Santa Maria foris portas and Santa Maria di Torba</p> <p>Apart from chrono-typological studies, this analysis also foresees examinations using archeometric analysis</p> <p>Analysis of the metals</p> <p>a) The integral edition of the diagnostic digs of Castelseprio carried out in 1962 and 1963 reported some material analysis on certain manufactured items that are interesting from the history of the so-called "material culture" of the Early medieval period. Recently there was the project for the recovery of intrinsic data of some material recovered from various digs was resumed, among which: shapeless blocks of lead originating from a dwelling perhaps in a part used as a workshop; glass and iron waste from wells. It is thereby interesting to continue with this nature of research with the purpose of understanding how much domestic handcraft activity was not realised inside the castrum.</p> <p>Analysis of ceramic production</p> <p>b) Most of the remains in the dig were ceramics. In particular these were of communal production, linked to the social area in which analysis should be tackled both from the point of view of a formal and chronological serialisation and concerning the determination of the productive techniques and the area of origin and chronology through archeometric investigations</p> <p>Technical and stylistic analysis of the painted fragments in the castle area</p> <p>c) Among the remains conserved in the warehouse there are some fragments of fresco relative to the decoration of the particularly important areas of the settlement, probably the churches of the castrum, the study of which began at the time of the setting up works for the Antiquarium and it should be continued.</p>
Actions	<ol style="list-style-type: none"> 1. Collection and memorisation of data on the material 2. Drafting of a programme of queries to be solved 3. Planning and realisation of archeometric analysis 4. Planning and realisation of osteological and archeozoological analysis 5. Editing of data
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy
Phases and time frame	By 2008-2010
Financial resources	MIBAC funds in relation to setting up the Antiquarium and planning 2007: € 37,200. Further analysis will be realised with Mibac Funds, planning 2008-2010
Expected results	Improvement of knowledge on heritage, the daily life of the castle, material culture and handcraft production in the Longobard and medieval eras
Result indicators	Quantity of material analysed Number of investigations made Quantity of data obtained Frequency of use in other valorisation and conservation projects Increase in divulgative and scientific material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.2	Diagnostic analysis on the constructive structures and system
Description	<p>The project foresees the analytical study of the building characteristics of the monuments, materials and technique used in the structures of the castrum. These analyses allow the examination of the development of building techniques and architectural typologies from the late antique period to 1600 and to add new data on historical, artistic and social economic knowledge of the castrum and the territory to which it refers. They will then permit the clarification of the evolutionary phases of some monuments and specify their peculiarities.</p> <p>Foreseen is the realisation of:</p> <ol style="list-style-type: none"> Diagnostic research and analysis on building materials, continuing with the sampling of building materials (mortar, plaster, paving, bricks and stones) and the analysis of the origin of the materials in progress for over twenty years and unedited in part. Analysis of the structural characteristics and building phases of the monuments Dendochronological analysis of some building apparatus of the main monuments of the castrum, (Santa Maria foris portas and the Torba tower) which preserve the original remains of wooden elements used as beams for the roof or door supports, the allocation of which could be very useful for defining time schedules and building phases Analysis of thermoluminescence finalised at dating clay brick material from the walls of the monuments of the castrum
Actions	<ol style="list-style-type: none"> Collection and memorisation of data on the material Drafting of a programme of queries to be solved Verification and adaptation of surveys or realisation of new surveys Stratigraphic analysis of the structures of the main monuments and the wall belt (structures and coating) Determination of evolutionary phases and graphic reconstruction of the monuments Planning and realisation of sampling and archeometric analysis of building material (mortar, plaster, paving, bricks and stones) Identification of the origin of the material (quarries, Roman dwellings in the area) Preparation of a data bank of the building material, binders and building techniques Realisation of surveys on re-use and compilation of a catalogue of re-usages and their typologies Data and research editing
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture Diagnostic Centre and Laboratory of Rocca Albornoziana di Spoleto University
Phases and time frame	Starting from 2008-2009
Financial resources	MIBAC funds in relation to setting up the Antiquarium and planning 2007: € 28,000. Further analysis will be realised with Mibac Funds, planning 2008-2010
Expected results	Improvement of knowledge on the heritage and building systems
Result indicators	Number of investigations carried out Number of monuments and analysed structures Frequency of use in other projects of valorisation and conservation Increase in divulgative and scientific material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.3	Analysis of the constructive sequence of the Torba tower
Description	The tower of Torba represents one of the most important testimonials conserved in the Langobardia maior of the late antique-Early medieval period. Its phases of transformation into a monastery represent a paradigmatic element of reuse of antique structures in the Early medieval. Analyses carried out on the monument have favoured the study of the Early medieval decorative apparatus which enrich it. However, still lacking are in-depth examinations of the Tower and on its building system, able to Highlight the technical characteristics and evaluative phases. Its time scale allocation is the fruit of hypotheses of interpretation and not based on certain data. For this reason a campaign of in-depth analysis is foreseen on the monument in order to reconstruct its story, integrating the existing documentation, surveys in particular, thanks to the use of the most innovative techniques (e.g. Laser scanning). It will then be useful also to start further archaeological surveys in the underground floor and near to the structure to define building techniques and specify its time schedule. Sampling and diagnostic survey of an archeometric nature on the binders and material will allow further knowledge of the building characteristics.
Actions	<ol style="list-style-type: none"> 1. Collection and memorisation of existing documentation 2. Verification and completion of surveys 3. Realisation of new photographic documentation (air photos and details) 4. Surveys on the ground floor and outside the tower with dig surveys 5. Planning and realisation of sampling and archaeological analysis of building material (mortar, plaster, paving, bricks and stones) 6. Stratographic analysis of the monument (of the structures and coating) 7. Definition of the evolutionary phases and graphic reconstructions of the monument 8. Publication of results 9. Realisation of didactic-divulgative multimedia material
Parties involved	FAI – Fondo per l'Ambiente Italiano Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture
Phases and time frame	Starting from 2008-2009
Financial resources	to be found
Expected results	Widening of knowledge and possibilities of use for the monument
Result indicators	Quantity of data gathered Quantity of material produced

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.4	Diagnostic analysis of the frescoes of Santa Maria foris portas
Description	The great importance of the cycle of frescos of Santa Maria has lead to numerous studies for their allocation which have mainly concerned the stylistic and formal analysis of the paintings. Still lacking is an in-depth technical examination of the building characteristics of the frescos and their mapping. Foreseen, therefore, is the deepening of knowledge of this work of unequalled value by means of suitable diagnostic investigations and new documentation using the most innovative techniques.
Actions	<ol style="list-style-type: none"> 1. Collection and memorisation of existing data 2. Realisation of new photographic and graphic documentation (surveys) 3. Planning and realisation of new surveys and examinations 4. Implementation of data banks 5. Publication of results
Parties involved	Province of Varese Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture Diagnostic Centre and Laboratory of Rocca Albornoiana di Spoleto

Phases and time frame	Starting from 2009
Financial resources	To be found
Expected results	Widening of knowledge on the asset and artistic production in the Early medieval period
Result indicators	Quantity of data gathered Number of surveys carried out Quantity of edited material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.5	Completion of diagnostic surveys on the frescoes of Torba
Description	As in the case of Santa Maria foris portas the studies for the allocation of the frescoes of Torba have also mainly concerned stylistic and formal analysis of the paintings. Only in relation to the recent campaign for conserving the frescos on the second floor of the tower has there been mapping and diagnostic investigation. There will therefore be the continuation of diagnostic examination also on the other paintings in the tower and the church of Santa Maria or the other fragments found in the digs. Furthermore, it would also be opportune to foresee a new documentation using the most innovative techniques.
Actions	<ol style="list-style-type: none"> 1. Collection and memorisation of existing data 2. Realisation of new photographic and graphic documentation (surveys) 3. Planning and realisation of new investigations and examinations 4. Implementation of data banks 5. Publication of results
Parties involved	FAI – Fondo per l'Ambiente Italiano Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture Diagnostic Centre and Laboratory of Rocca Albornoiana di Spoleto
Phases and time frame	Starting from 2009
Financial resources	To be found
Expected results	Widening of knowledge of the asset and artistic production in the Early medieval and medieval periods
Result indicators	Quantity of data gathered Number of surveys carried out Quantity of edited material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.1	Planning and execution of archaeological surveys in the castrum
Description	<p>Castelseprio was only dug in a minimum part and until now the digs have been of a truly limited nature, it is therefore considered necessary to foresee a research programme on a wide scale able to clarify the true extension and characteristics of the castrum habitation, the fortifications and its monuments, verify the function of each building and heightening knowledge of material culture, economy and the society in the site. Of extreme importance will be the archaeological research to be actuated inside the fortified area to identify the relationship between dwelling, monument and necropolis.</p> <p>It will be opportune to define a research programme following the analysis of existing documentation. Some contexts on which to develop research have already been identified</p> <p>- Dig in the area accessing the castrum (access bridge and Castrum door) The elements relative to the access bridge and castrum door were Highlighted in the fifties of the last century. Partial dig essays, run in the early seventies have identified protostoric, late antique and medieval stratigraphies. Continuation of the surveys in particular between the pier of the bridge and the access door with expansion to the north side in the direction of the north-western section of the all could furnish further details on fortifying interventions of the Byzantine, Longobard eras and beyond.</p>

	<p>-The realisation of interventions on different sections to better expand knowledge on the fortifications of Castelseprio is foreseen; in particular:</p> <ul style="list-style-type: none"> o In correspondence to towers 2 and 3 o On the still unknown northern section of the belt o On wall sections relative to the eastern wall documented preliminarily o In correspondence of the section towards the south-east and relative to the extension towards Torba <p>-Dig of the Building or House of the Canonici The Building, already the subject of a Conservation Plan (Project 3.1), requires better knowledge of the structural characteristics and for further details on its foundation in relation to the use of a dig inside its rooms and along the external perimeter.</p> <p>- The fort on the southern plain Investigated and restored in the past, still lacking is data for its correct allocation and for the confirmation of interpretation as a noble nucleus of the castrum</p>
Actions	<ol style="list-style-type: none"> 1. Collection and analysis of existing data 2. Definition of a multiyear research programme 3. Planning and realisation of interventions 4. Data editing
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy
Phases and time frame	by 2008-2010
Financial resources	MIBAC Funds: funds requested from Planning 2008-2010
Expected results	Improvement of knowledge on the castrum and optimisation of the possibilities of use of the heritage
Result indicators	Quantity of research carried out Expansion of the investigated areas Quantity of data obtained Frequency of use of other projects of valorisation and conservation Increase in divulgative and scientific material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.2	Completion of the dig in the basilica of San Giovanni
Description	The complex of the basilica of San Giovanni with the annexed baptistery, cistern and the bell tower constitutes the main monumental nucleus of the castrum. Uncovered and investigated in the past, there are still interpretative doubts on its chronological allocation, the original architectural structure and the evolutionary phases. A recent investigation in the central apse confirmed the existence of a deposit and elements relative to the original, polygonal, apse. Deemed important is the completion of the dig in the entire area of the apse and the aforesaid presbytery and also the area of the adjacent southern apse, formerly the subject of an essay in the sixties of last century, to better understand the subsequent constructive transformations of the basilica.
Actions	<ol style="list-style-type: none"> 1. Analysis of old findings 2. Completion of the dig in the main apse and the presbytery 3. Planning and realisation of other surveys in the aula 4. Planning and realisation of investigations in the Baptistery 5. Analysis of the stratification of the wall structures and coatings 6. Verification of the building phase of the basilica complex 7. Updating of documentation and surveys 8. Realisation of reconstructive models 9. Editing of results 10. Realisation of multimedia divulgative material
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy
Phases and time frame	by 2008-2009
Financial resources	MIBAC funds: funds requested from Planning 2008-2010
Expected results	Improvement of the knowledge on the castrum and optimisation of the possibilities of use for the heritage
Result indicators	Expansion of the investigated area

	Quantity of obtained data Frequency of use in other projects of valorisation and conservation Increase in divulgative and scientific
--	--

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.3	Recognition of archaeological presences in the village area
Description	The first topographic sketch of the overall area of Castelseprio (Castrum and Village) dates back to 1948. Apart from the digs involving the church of S. Maria foris portas only little archaeological research relative to technological installations for the operation of the area was carried out at the end of the eighties. Also realised were some reconnaissance and detailed surveys confirming what found in the forties. It would be extremely important to be able to carry out capillary reconnaissance on the entire area of the Village formerly enclosed in confirmation of that which was indicated and topographically recorded.
Actions	<ol style="list-style-type: none"> 1. Removal of shrubbery 2. Photographic and video recordings of the emergences; surveys on the overall sizes of the identified structures and their placement in the general cartography
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy territorial authorities
Phases and time frame	by 2009-2013
Financial resources	MIBAC Funds: funds to be found Funds of Territorial Bodies: to be found
Expected results	Knowledge of the width of the Village Use of data in comparison with that known and with the other similar realities Use of data for a better knowledge of the life of the Village which rose outside the walls of the Castrum Editing of data at the divulgative and scientific level
Result indicators	Increase in analysed material Quantity of data obtained Frequency of use in other projects of valorisation and conservation Increase in divulgative and scientific material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.4	Completion of archaeological surveys at Santa Maria foris portas
Description	Investigations carried out up to this point at the church have not completely clarified the origin and context in which it is inserted. In 1982-83 an ample set of surveys was realised outside of the building form which a necropolis and interesting data emerged (the existence of a trench and structures perhaps dwellings towards west and north) which should be examined further with the continuation of the research.
Actions	<ol style="list-style-type: none"> 1. Collection, memorisation and verification of existing data 2. Planning and realisation of digs 3. Editing of the results 4. Realisation of divulgative multimedia material
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy Province of Varese
Phases and time frame	Starting from 2010
Financial resources	to be found
Expected results	Improvement of knowledge of the castrum and optimisation of the possibilities of use of the heritage
Result indicators	Increase in analysed material Quantity of data obtained Frequency of use in other projects of valorisation and conservation Increase in divulgative and scientific material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.5	Planning and execution of archaeological surveys on section of arched walls towards Torba
Description	The section of arched wall with a tower of the northern belt which runs towards Torba, formerly subject of investigations in the seventies of the last century represent one of the most important traces of fortified architecture in the castrum. Past research has had the merit of uncovering and documenting these structures which have not however ever been the subject of a dig. The realisation of the path which connects the upper castrum and the complex at the foot of the valley will now permit not only the continuation of the research but also to making these structures, hidden in the wood until now, usable.
Actions	<ol style="list-style-type: none"> 1. Collection, memorisation and verification of existing data 2. Documentation on the structures and updating of the surveys on the structures 3. Technical constructive analysis 4. Editing of the results 5. Realisation of divulgative multimedia material
Parties involved	FAI – Fondo per l'Ambiente Italiano Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy International Centre of Research and Documentation of Art and Early Medieval Architecture
Phases and time frame	Starting from 2008
Financial resources	Co-financing FAI and Region of Lombardy from the Lombard archaeological heritage Group – year 2007 regional laws no. 84 and no. 39/91: € 50,000
Expected results	Improvement of knowledge on the castrum and optimisation of the possibilities of use of the heritage
Result indicators	Increase in analysed material Quantity of data obtained Frequency of use in other projects of valorisation and conservation Increase in divulgative and scientific material

KNOWLEDGE PLAN Castelseprio-Torba site and buffer zone	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.6	Planning and execution of new surveys in relation to the Torba Complex
Description	The project foresees the examination of the stories of the complex and its structure through the review of archaeological data already acquired and the planning of new archaeological investigations of research in extension which may concern: <ol style="list-style-type: none"> a) the crypt of the church of Santa Maria b) the external area of the church towards north and west c) the underground area of the restaurant d) the porch to identify the wall belt. e) the southern sector at the entrance road to the complex f) the section of wall of the southern belt, in the woods on the slope
Actions	<ol style="list-style-type: none"> 1. Collection, memorisation and verification of existing data 2. Planning and realisation of digs 3. Documentation on the structures and updating of structure surveys 4. Technical constructive analysis 5. Editing of results 6. Realisation of divulgative multimedia material
Parties involved	FAI – Fondo per l'Ambiente Italiano Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy
Phases and time frame	starting from 2010
Financial resources	To be found
Expected results	increase of knowledge on the complex of Torba and optimisation of the possibilities of use for the heritage
Result indicators	Number of surveys carried out Size of the investigated area Quantity of obtained data

	Frequency of use in other projects of valorisation and conservation Increase in divulgative and scientific material
--	--

KNOWLEDGE PLAN Castelseprio-Torba territory	
Objective 20	IN-DEPTH EXAMINATION OF KNOWLEDGE ON GIUDICARIA OF SEPRIO
Project 20.1	Censoring of Longobard findings and creation of an archaeological document on the Giudicaria in Early middle ages
Description	The territory pertaining to Castelseprio is rich in evidence relative to the Longobard presence and Early medieval period. A systematic collection of the evidence and their organisation in a data bank that is easily consultable and connected to a GIS platform is foreseen.
Actions	<ol style="list-style-type: none"> 1. Censoring and analysis of data 2. Memorisation of the evidence and creation of the data bank and the archaeological document 3. Implementation of the GIS base
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy Region of Lombardy Province of Varese Province of Como Province of Milan Municipalities of the area involved FAI – Fondo per l'Ambiente Italiano Swiss State and other institutions in the areas involved in Canton Ticino
Phases and time frame	Starting from 2010
Financial resources	To be found
Expected results	Improve knowledge on the Longobard period
Result indicators	Quantity of data collected Size of the data bank Number and frequency of consultation

KNOWLEDGE PLAN Castelseprio-Torba territory	
Objective 20	IN-DEPTH EXAMINATION OF KNOWLEDGE ON GIUDICARIA OF SEPRIO
Project 20.2	Promotion of research on the Early middle ages settlement system of the Giudicaria
Description	The data acquired on the territory up to now allow a good view of the population in the medieval era but leave some questions unanswered which could be solved only with the continuation of archaeological research. Some of the themes to be examined concern: <ol style="list-style-type: none"> a. The other Flavian cities in the territory b. The network of castra and castles c. Characteristics and typologies of rural settlements d. Connection between necropoli, cult places and settlements
Actions	<ol style="list-style-type: none"> 1. Collection, memorisation and verification of existing data 2. Definition of a research programme 3. Planning and realisation of digs 4. Editing of results
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy Region of Lombardy Province of Varese Province of Como Province of Milan Municipalities of the involved areas FAI – Fondo per l'Ambiente Italiano Swiss State and other institutions in the areas involved in Canton Ticino
Phases and time frame	starting from 2010
Financial resources	to be found
Expected results	Improve knowledge on the Longobard period
Result indicators	Quantity of data gathered

	Number of surveys carried out Size of the investigated areas Quantity of obtained data Number of editions realised
--	---

KNOWLEDGE PLAN Castelseprio-Torba territory	
Objective 20	IN-DEPTH EXAMINATION OF KNOWLEDGE ON GIUDICARIA OF SEPRIO
Project 20.3	Promotion of research on monuments and artistic production in the Giudicaria
Description	<p>An important aspect of the Early medieval period in the territory, apart from that relative to the frequency and distribution of the presences, concerns the analysis of artistic and architectural production which has left unequalled traces in Castelseprio. In order to better understand these elements in relation to the cultural climate of the period, knowledge of the evidence will be examined also in the area of the Giudicaria, proceeding with censoring, cataloguing and study of the conserved heritage which mainly concerns:</p> <ol style="list-style-type: none"> Cult places and monasteries Sculptural apparatus Sainted decorations Goldsmith
Actions	<ol style="list-style-type: none"> Censoring, analysis and memorisation of data Censoring, cataloguing and analysis of cult places Censoring, cataloguing and analysis of sculpture production Censoring, cataloguing and analysis of pictorial production Updating of graphic and photographic documentation of the different contexts Creation of a data bank Implementation of the GIS Editing of divulgative and scientific material on themes subject to research of specific contexts
Parties involved	Regional Management of Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy Region of Lombardy Province of Varese Province of Como Province of Milan municipalities of involved areas FAI – Fondo per l'Ambiente Italiano Swiss State and other institutions in the areas involved in Canton Ticino
Phases and time frame	starting from 2010
Financial resources	to be found
Expected results	Improve knowledge of the Longobard period
Result indicators	Quantity of data gathered Number of surveys carried out Size of the investigated areas Quantity of obtained data Number of editions realised

KNOWLEDGE PLAN Spoleto site and buffer zone	
Objective 21	RISE THE BASILICA'S KNOWLEDGE LEVEL
Project 21.1	Gathering and systemizing the existing documentation on the basilica of San Salvatore
Description	<p>On the Basilica of San Salvatore there are studies, surveys and descriptions that date back to the 19th century, as well as archival papers, illustrations and surveys realized in various periods, starting from those performed by the great Renaissance architects. Besides, in the past some test excavations were done, that led the scholars to suggest more phases in the construction of the presently conserved building.</p> <p>The project therefore includes the gathering of all existing data and documents, their organization and systemizing, essential to the future widening investigations on the building. It is also planned to establish an appropriate Documentation Centre in the convent spaces next to the Basilica, in order to make them available to scholars and to the public in general. Such Centre will be able to be the Collect Point of the information on the presence of the Longobards in the town and in the territory, keeping also the relative documentation.</p>  <p style="text-align: center;">San Salvatore, the presbytery</p>
Action	<ol style="list-style-type: none"> 1. Research, identification and gathering of the bibliographic sources 2. Research and reproduction of archival sources 3. Reproduction of graphic and photographic sources, their computerization 4. Establishment of the Documentation Centre
Parties involved	Municipality of Spoleto Umbria Archival Superintendency Perugia State Archives – Spoleto Section University of Perugia Private subjects
Phases and time frame	First data gathering and organization phase: from 2008 Creation of the Centre upon fulfilment of the conservation works on the former convent
Financial resources	Funds of the Municipality of Spoleto

Expected results	To get a full picture of the present knowledge to finalise future investigations To realize computerized archives, to be implemented through time
Result indicators	Quantity of gathered and systemized data Number of data consultation requests

KNOWLEDGE PLAN Spoleto site and buffer zone	
Objective 21	RISE THE BASILICA'S KNOWLEDGE LEVEL
Project 21.2	New archaeological investigations on the basilica of San Salvatore
Description	The project includes the realization of new archaeological investigations underneath the basilica's floor level, inside the basilica and in the area around the façade.
Actions	In particular, the plan includes interventions on: <ol style="list-style-type: none"> 1. The presbytery area, to verify the presence of a pre-Longobard structure- maybe the martyr Concordio is a hint- that can be inferred on the basis of Perkins' excavations and from Montiroli's planimetry (1875) 2. In the area around the church's façade, to clarify the original existence of an exonarthex, inferable from Perkins' excavations.
Parties involved	Municipality of Spoleto University of Perugia
Phases and time frame	Upon completion of project 1.1, gathering and reorganization of existing information
Financial resources	Funds of the Municipality of Spoleto University of Perugia
Expected results	Definition of chronology, function and original morphology of the building

KNOWLEDGE PLAN Spoleto territory	
Objective 22	RAISE THE LEVEL OF KNOWLEDGE OF THE DUCHY'S CAPITAL AND OF ITS TERRITORY
Project 22.1	Prosecution and development of the urban excavation campaigns
Description	<p>The project has the objective of raising the level of knowledge on the presence of the Longobards in Spoleto, on the structure of the city in the period of the Dukedom and on the main city structures built in that epoch.</p> <p>In detail, on one hand it is necessary to continue and widen the urban excavation planned by the Public Works Dept, like those one which brought back to light the mosaics from the Longobard times in Palazzo Mauri and Palazzo Pianciani, on the other hand it is necessary to ensure the prosecution of running excavations and to start new investigations.</p> <p>The results of the excavations will be able to converge into the Documentation Centre to be realised inside the convent next to the basilica of San Salvatore, that will become the cognitive pole of reference for the whole territory.</p>
	 <p>Palazzo Mauri, the mosaic</p>

	 <p style="text-align: center;">Area of the Rocca Albornoziana, excavations on top of Colle Sant'Elia</p>
<p>Actions</p>	<ol style="list-style-type: none"> 1. Prosecution of excavations in the spaces that date back to the Longobard times, discovered under Palazzo Mauri – study of the results 2. Widening of the investigations on the Early middle ages structure discovered under Palazzo Pianciani 3. Prosecution of excavations on top of Colle Sant'Elia (area of the Rocca Albornoziana), where a big cult building is being brought back to light, whose oldest phase seems to date back to the Early Middle Ages 4. Planning and performance of targeted archaeological tests to identify the areas of the Longobard necropolises of the town, and planning of future in-depth investigation campaigns 5. Execution of new excavation campaign in the territory of Spoleto, especially on the hermitages and monasteries, to retrace their Longobard phases.. 6. Planning of investigations on High-ground sites, to deepen the knowledge on Longobard defensive structures 7. Systemizing of the results of the excavation campaigns, gathering of information emerged (see Documentation Centre) and its computerization. 8. Spreading of the new knowledge data, both at scientific and divulging level.
<p>Parties involved</p>	<p>Municipality of Spoleto. Soprintendenza per i beni archeologici dell'Umbria. University of Perugia CISAM Study Centre on Early Middle Ages. Other public and private subjects.</p>
<p>Phases and time frame</p>	<p>From 2008</p>
<p>Financial resources</p>	<p>Funds to be raised from the Town's budget and from other subjects.</p>
<p>Expected results</p>	<p>Implementation of data on the Longobard presence in Spoleto and its territory.</p>
<p>Result indicators</p>	<p>Number of performed interventions and investigations Publications realized to spread the knowledge</p>

KNOWLEDGE PLAN Spoleto territory	
Objective 22	RAISE THE LEVEL OF KNOWLEDGE OF THE DUCHY'S CAPITAL AND OF ITS TERRITORY
Project 22.2	Realization of a study on the spolia, re-used materials in Early middle ages buildings
Description	The project's aim is to review and study the very numerous spolia, re-used in Middle Ages buildings, both civil and religious, in the territory. The project obviously involves the two most significant emergences from the Longobard epoch, the Clitunno Tempietto and the Basilica of San Salvatore, included in the candidacy.
Parties involved	University of Perugia Ministry for University and Scientific Research
Phases and time frame	From 2008
Financial resources	In October 2007, an instance has been proposed by the University of Perugia, to the Ministry for University and Scientific Research, for the co-financing of the Research Project of National Interest
Expected results	Widening of the knowledge on methods of re-use in Longobard times, and on the Roman structures from which the spolia were taken
Result indicators	Quantity of assessed and studied information

KNOWLEDGE PLAN Spoleto territory	
Objective 23	RAISE THE ARCHAEOLOGICAL KNOWLEDGE OF THE TERRITORY
Project 23.1	Creation of the archaeological map of the territory of Spoleto
Description	The project's aim is to catalogue and survey all archaeological structures in the territory of Spoleto, in order to draft an archaeological map that may be of support to the study on the various development phases of the town and the territory. On the basis of this work, it will be possible to elaborate specific phase plants that will guide to better address the planning of future investigation and study interventions. The plan is included in POR Programma Operativo Regionale OB 3 2000/2006 MISURA D4, RISORSE CIPE, a public grant of research funds, finalised at the improvement of human resources in the field of research and technological development.
Parties involved	University of Perugia – Philosophy, linguistics and literatures – late-ancient and Middle Ages palaeochristian study section Region Umbria
Phases and time frame	From 2008
Financial resources	CIPE Funds Interdepartmental Committee for Economic Programming
Expected results	Mapping of archaeological emergences
Result indicators	Number of listed and studied structures

KNOWLEDGE PLAN <i>Campello sul Clitunno site and buffer zone</i>	
Objective 24	INVESTIGATION INTO THE HERITAGE OF CAMPELLO
Project 24.1	Further investigation campaigns to implement knowledge of the site's heritage
Description	<p>Clitunno has a wonderful architectural and artistic heritage, which can only be fully enjoyed if there is greater understanding of its background and documentation. Promotion of new investigations aimed at improving existing data, which is often incomplete or based on analyses carried out in the past using outdated techniques, is of extreme importance. Of particular interest are the possible investigations into the construction and decoration techniques and the development phases of the monuments. In this scenario, there will be new digital format surveys to be used as a basis for implementing awareness and planning and achieving further analytical investigations.</p> <p>These surveys can be carried out using photogrametric or laser scanning methods, and presented in vector or digital format.</p> <p>First of all, the following are planned:</p> <ol style="list-style-type: none"> a) Geo-referenced and stratification metric survey, descriptive survey of the materials in the Clitunno Tempietto.
Actions	<ol style="list-style-type: none"> 1. Surveying project 2. Geo-referenced and descriptive metric surveying campaigns 3. Analysis of the monument's constructional stratification 4. Restitution of data 5. Three-dimensional restitution models of the actual state
Parties involved	Campello Municipal Council Office for Architectural, Landscape, Historical, Art and Local Heritage, Perugia; Regione Umbria;
Phases and time frame	Short to medium term, from 2009
Financial resources	Funds to be procured by: Campello sul Clitunno Municipal Council; Ministry for Cultural Heritage; Regione Umbria
Expected results	<p>Obtaining precision, geo-referenced surveys of the existing structure, to define the sequence of historical evolution of the properties (analysis of the transformation phases)</p> <p>The surveys will also become the basis for:</p> <ol style="list-style-type: none"> a) defining the maintenance project for the Clitunno Tempietto b) designing and creating further analyses for the constructional elements c) creating a database d) supplying material for the distribution and publication activities
Result indicators	<p>Amount of data collected and computerized</p> <p>Frequency with which results are used for other conservation, valorisation and utilization projects</p>

KNOWLEDGE PLAN <i>Campello sul Clitunno site and buffer zone</i>	
Objective 24	INVESTIGATION ON THE HERITAGE OF CAMPELLO
Project 24.2	Analysis and study of existing archaeological and historical documentation
Description	<p>There are various historical and artistic testimonies in Campello Unfortunately, analysis of these properties has been only partial or preliminary. Their examination, however, is an important element to reconstruct the background of the territory and improve prospects for valorisation and distributions. This involves activating a new study of the finds and the results of the excavations carried out in the past at Campello.</p> <p>In addition to this, there will be a survey and analysis of the data regarding the churches across the municipal territory.</p> <p>The investigation will also provide material for the publication of a monograph concerning various aspects.</p>
Actions	<ol style="list-style-type: none"> 1. Research and recovery of documentation 2. Study and computerization of excavation data 3. Cataloguing and study of finds 4. Publication of material
Parties involved	Umbria Archaeology Office University of Perugia Campello sul Clitunno Municipal Council;
Phases and time frame	Medium term from 2009

8.1 KNOWLEDGE PLAN DETAILED SCHEDULES

Financial resources	Funds to be procured by: Italian State (Ministry for Cultural Heritage); Regione Umbria; Perugia Provincial Council; private and bank sponsors
Expected results	Investigation into the cultural finds at Campello Creation of a usable database Publication of new material
Result indicators	Quantity of data obtained quantity of contexts analysed Number of published volumes

KNOWLEDGE PLAN <i>Campello sul Clitunno site and buffer zone</i>	
Objective 24	INVESTIGATION INTO THE HERITAGE OF CAMPELLO (SITE AND BUFFER ZONE)
Project 24.3	Historical investigative research on the Clitunno Tempietto
Description	The Tempietto has been involved in many research projects since the start of the last century. The documentation regarding these projects is fragmentary. Investigation and research into all known data and the search for new data in the archives will be fundamental for a complete picture of the building's background.
Actions	<ol style="list-style-type: none"> 1. Acquisition and computerization of data regarding research already done 2. Collection and organization of new archive data
Parties involved	Campello Municipal Council Office for Architectural, Landscape, Historical, Art and Local Heritage, Perugia; University of Perugia
Phases and time frame	Medium term from 2009
Financial resources	Funds to be procured by: Campello sul Clitunno Municipal Council; Italian State (research funding); European Union
Expected results	Increased knowledge of Clitunno Tempietto Creation of up-to-date, complete database
Result indicators	Quantity of data collected Frequency with which database is used

KNOWLEDGE PLAN <i>Campello sul Clitunno territory</i>	
Objective 25	INVESTIGATION ON THE TERRITORY DURING THE LONGOBARD ERA
Project 25.1	Analysis and study of existing archaeological documentation on the territory
Description	There have been numerous finds and testimonies available from the Longobard era scattered across the territory. An improvement in awareness must be based not only on new finds, but also on checking and collecting all available data in order to create a wide documentary base that can become a fundamental instrument for the preservation of heritage and cultural awareness and to act as a stimulus and guide for the creation of new techniques
Actions	<ol style="list-style-type: none"> 1. Investigation into existing data regarding the sites on the Longobard itineraries 2. Investigation into data on the Longobard era in the other urban sites of the Duchy 3. Organization of data and archiving to create a database 4. Study of testimonies of data and start of investigations into specific themes 5. Publication and distribution of results
Parties involved	Office for Architectural, Landscape, Historical, Art and Local Heritage, Perugia; University;
Phases and time frame	Short to medium term, from 2009
Financial resources	Funds to be procured by: Regione Umbria; European Union
Expected results	Acquisition of all existing data and investigation
Result indicators	Quality and quantity of recovered data Number of distribution activities promoted and breadth of public interest

KNOWLEDGE PLAN <i>Campello sul Clitunno territory</i>	
Objective 25	INVESTIGATION ON THE TERRITORY DURING THE LONGOBARD ERA
Project 25.2	Further research into middle ages churches
Description	Churches usually preserve works or testimonies of art regarding their background and the transformations that have taken place there over time A systematic analysis of these contexts is planned, with the aim of collecting more

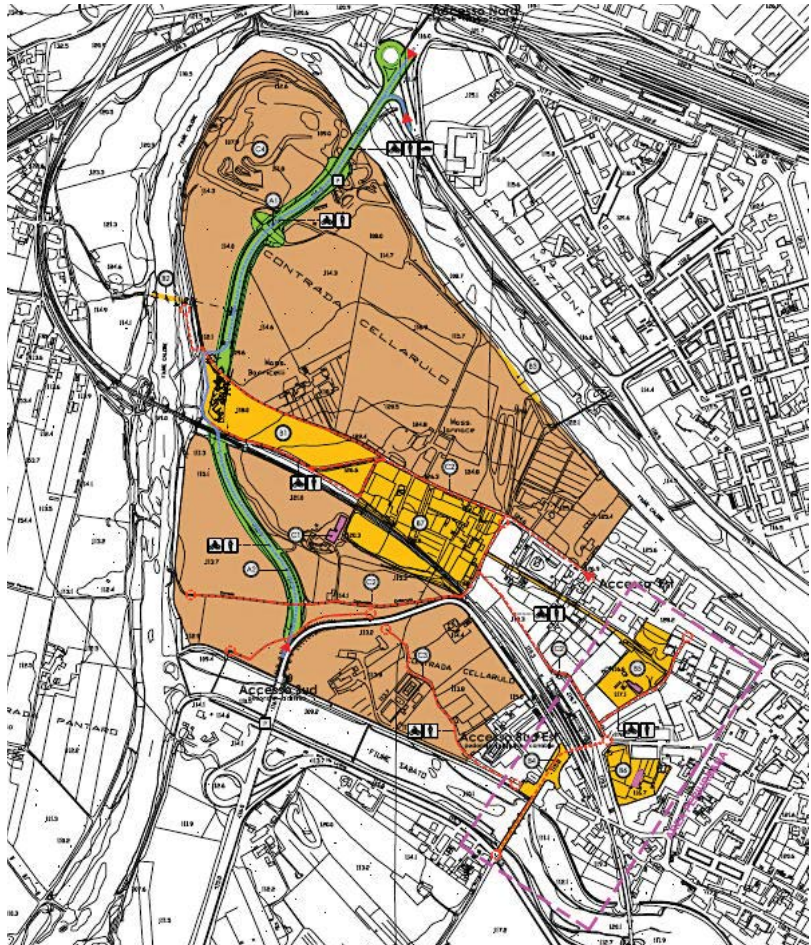

8.1 KNOWLEDGE PLAN DETAILED SCHEDULES

	data to enable an investigation into development in the territory in the late-mediaeval period and the artistic and architectural production characteristics, also enabling a greater valorisation of the properties. An investigation into the materials is also planned, along with the construction techniques used in works of sculpture across the territory
Actions	<ol style="list-style-type: none"> 1. Investigation and analysis of data on the late mediaeval churches 2. Territorial and place-name research aimed at recognising the areas in which ancient churches once stood 3. Investigation and study of artistic and architectural testimonies linked to the places of worship and monasteries 4. Analysis geared towards an understanding of the materials and construction techniques of the works of sculpture 5. Organization and archiving of data 6. Distribution and publication of results
Parties involved	Office for Architectural, Landscape, Historical, Art and Local Heritage; University of Perugia; International Centre for Research and Documentation on Late Mediaeval Art and Architecture;
Phases and time frame	Short to medium term, from 2009
Financial resources	Funds to be procured by: Regione Umbria; bank and private sponsors
Expected results	Investigation of churches, monasteries and works of art from the Longobard era across the territory; acquisition of up-to-date data and setting up of consultable archives
Result indicators	Quantity of data collected Breadth of area involved Frequency of consultation of the data collected Number of distribution activities promoted and breadth of public interest

KNOWLEDGE PLAN <i>Campello sul Clitunno</i> territory	
Objective 25	INVESTIGATION INTO THE TERRITORY DURING THE LONGOBARD ERA
Project 25.3	Further research into middle ages fortified sites
Description	<p>The <i>castra</i> were the main settlements in the territory during the late mediaeval period. Planned, systematic research of these sites, beginning with a complete investigation into the locations of the fortified settlements, to arrive at improving understanding and documentation of all centres, with emphasis on their characteristics and idiosyncrasies, including thanks to specific archaeological surveys</p> <div style="text-align: center;">  <p><i>Map with archaeological sites and elements of the ancient landscape</i></p> </div>
Actions	<ol style="list-style-type: none"> 1. Investigation of site and fortification structures 2. Acquisition and computerization of data 3. Survey campaigns of fortified centres and promotion of new surveys 4. Study and publication of results
Parties involved	Municipalities; Perugia Provincial Council; Regione Umbria; Office for Architectural, Landscape, Historical, Art and Local Heritage;
Phases and time frame	Short to medium term, from 2009
Financial resources	Funds to be procured by: Regione Umbria; bank and private sponsors
Expected results	Improved understanding of late mediaeval <i>castra</i> of Longobard duchy Increased valorisation and creation of a "network of Castles"
Result indicators	Quantity of data obtained Number of sites involved Breadth of areas investigated Number of distribution activities promoted and breadth of public interest

KNOWLEDGE PLAN <i>Campello sul Clitunno territory</i>	
Objective 26	COMPUTERIZATION OF DATA
Project 26.1	Creation of an <i>online</i> database
Description	An understanding of the historical and artistic heritage of Campello sul Clitunno can be made easier if the organization of data is entered as part of a wider panorama of understanding that can easily be reached and consulted by all. This will be made possible by implementing an information system, which will contain the part concerning the archaeological, historical and artistic aspects, in particular, regarding the Longobard period. This data bank will be consultable online via the official website and the site of the Longobard network.
Actions	<ol style="list-style-type: none"> 1. Computerization of data collected 2. Entry onto information platform 3. Activation of online consultation
Parties involved	Regione Umbria; Campello sul Clitunno Municipal Council; Office for Architectural, Landscape, Historical, Art and Local Heritage, Perugia; University of Perugia; International Centre for Research and Documentation on Late Mediaeval Art and Architecture; Promotion Committee of the Aquileia Patriarchate Project;
Phases and time frame	Medium term from 2009
Financial resources	Funds to be procured by: Regione Umbria
Expected results	Increasing possibility of distribution and consultation of data on Longobard culture
Result indicators	Amount of data collected and computerized Breadth of territory involved Frequency of consultation and utilization of data for other projects

KNOWLEDGE PLAN Benevento site and buffer zone	
Objective 27	TO INCREASE THE KNOWLEDGE ABOUT THE SANTA SOFIA COMPLEX
Project 27.1	Launch an in-depth study of the Longobard phase of cloisters
Description	<p>The project includes an in-depth archaeological survey to identify the cloister of Santa Sofia prior to the Romanic one – in line with the complex built at the behest of Arechi II – and the reconstruction of the chronological and artistic phases. Traces of this original cloister can be seen in the reuse of some “a stampella” capitals, with decorations in the form of geometric motifs, which was typical of the Lombard era. Other capitals were recovered from excavations of the cloister’s cistern. In addition to this, traces of another cistern were found that, due to its logical and structural aspects, could belong to a pre-existing cloister.</p> 
Parties involved	<p>Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. Benevento State Archives.</p>
Phases and time frame	Short term (2009)
Financial resources	To be found: local, national and EU funding.
Expected results	Identification of layers preceding the current phase of the Cloister.

KNOWLEDGE PLAN Benevento site and buffer zone	
Objective 28	TO INCREASE THE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 28.1	Finishing and increasing urban archaeological excavations
Description	<p>This action is consistent with the vision of local authorities that provides for sustainable development of the town and of its territory. It sees in the cultural heritage an important engine even for social and economic development. Action will be taken in various stages:</p> <ul style="list-style-type: none"> • Inventory of new findings of Piazza Sabariani (medieval affrescos in a hypogeum of the age of the Duchy of Benevento) and of the Cathedral (mosaics and structures from Roman and Medieval times). • Archaeological investigation of Piazza Piano del Corte near the Church of Santa Sofia that, given its place name, is indicated as the probable site of the Sacrum Palatium. The extent of the investigations in this area could provide new data on common dwelling construction in the Lombard period, about which little is currently known.  <ul style="list-style-type: none"> • Creation of an archaeological-monumental centre located between Piazza Orsini and the "Arco del Sacramento" where some of the most important relics of Roman and Medieval times are to be seen.

	 <p>Arco del Sacramento</p> <ul style="list-style-type: none"> • A larger inventory on the area of Cellarulo, where important remains have been found of the commercial and craft area of the Roman town, the harbour on the river, and Roman baths. • A programme of archaeological surveys and restoration of the area located between Ponte Leproso and Piazza Cardinal Pacca, which includes important monuments for shows (theatre and amphitheatre) and thermal buildings (Via S. Cristiano, Piazza Cardinal Pacca, and Vico Bagni) from the Roman era.
Parties involved	Municipality of Benevento Campania Regional Authority Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. Benevento State Archives.
Phases and time frame	Long term (2015)
Financial resources	To be found: local, national and EU funding.
Expected results	Extension of knowledge about the urban development of Benevento, especially as regards the Lombard phase.
Result indicators	Number of areas investigated. Overall size of archaeological areas.

KNOWLEDGE PLAN Benevento site and buffer zone	
Objective 28	TO INCREASE THE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 28.2	Start a census and study of the “spolia” re-used in buildings in the old city
Description	<p>The practice of stripping, as seen in Benevento, was introduced immediately by the Lombards and continued in subsequent centuries. In fact, already in the wall the Lombards rebuilt as soon as they reached Benevento, one finds construction materials from the Roman era being reused. And that’s not all, here and there in the defences one finds sculptural fragments from the classical era positioned especially at the gateways, that are carefully and sometimes tastefully positioned. The old city is also strewn with funerary sculptures, inscriptions, and architectural elements from the Roman age, built into the external facades of homes. These relics, which form a type of open-air museum, need to be organised to allow in-depth study and, at the same time, suitable restoration that makes it possible to use them.</p> <p>See Knowledge Plan – Gather and organise all existing data and documentation on the GIS.</p> 
Parties involved	<p>Superintendency for Architectural Heritage in Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. Municipality of Benevento - Benevento Provincial Authority - Campania Regional Authority</p>
Phases and time frame	Medium term: 2010
Financial resources	To be found: POR FESR Campania Regional Authority 2007-2013
Expected results	Upgrading of knowledge about the ancient town of Benevento in the various archaeological strata.
Result indicators	Number of cataloguing schedules completed.

KNOWLEDGE PLAN Benevento site and buffer zone	
Objective 28	TO INCREASE THE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 28.3	Gather and organise all existing data and documentation on the GIS.
Description	The project of cataloguing that has started and is to be started in the old city of Benevento – with particular reference to the relics reused in public and private buildings, the study of public buildings, archaeological surveys, and sporadic archaeological finds – brings about a need for organising and contextualising the data. This contextualisation must be both spatial (geographic) and temporal. The tool that can be used to meet this need could be GIS (Geographical Information System) software that, thanks to continuous updating of the database, would allow experts to compare items, even from different sites in Italy and in other countries.
Parties involved	Superintendency for Architectural Heritage in Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. Municipality of Benevento Campania Regional Authority
Phases and time frame	Medium term: 2010
Financial resources	To be found: regional and EU funding
Expected results	To set up and develop an integrated system over time covering the body of knowledge that is accessible and available as a source of information in order to divulge, study, and optimise management of the cultural heritage of the site.
Result indicators	Number of pieces of data organised in terms of subject matter. Quantity of data stored. Number of schedules produced

KNOWLEDGE PLAN Benevento site and buffer zone	
Objective 28	TO INCREASE THE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 28.4	Create an inventory of documentation on Longobard cultural heritage in the Benevento State Archives
Description	A study of the parchment fragments written in Beneventana in the State Archives and the significant corpus of documents on the “suppressed monasteries” currently kept by the Museum in Sannio, will make it possible to gain further knowledge of the activity of the Scriptorium in Benevento. This study will coincide with the Exhibition entitled: “Langobardia Minor: Images and documents from the Duchy of Benevento”.
Parties involved	State Archives
Phases and time frame	Medium term: 2008
Financial resources	Ordinary State Archive Funds
Expected results	Raising the level of knowledge about the documentary heritage on the City's Lombard period.
Result indicators	Number of documents catalogued. Number of experts that consult the catalogued documentation.

KNOWLEDGE PLAN Benevento site and buffer zone	
Objective 28	TO INCREASE THE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 28.5	Complete the study of the stucco fragments coming from Sant' Ilario in Port'Aura
Description	During recent works in the Church of St Ilario in Port Aures some fragments of stucco were found that came from the internal decoration of the church. Upon initial examination, these stuccoes seemed to come from the time the building was constructed. This can also borne out by comparison that could be done with similar stuccoes from the Temple in Cividale del Friuli and the Church of S. Salvatore in Brescia. The project involves promoting and publishing specialist studies, as well as putting the finds in a museum, in order to increase knowledge about this decorative practice.

	
	Church of St Ilario in Port Aures - fragments of stucco
Parties involved	Superintendency for Architectural Heritage in Salerno, Avellino, and Benevento; BAPPSAE Superintendency of Caserta and Benevento.
Phases and time frame	Medium term: 2010
Financial resources	To be found: regional and EU funding
Expected results	Raising the level of knowledge about Lombard items produced in Benevento.
Result indicators	Number of fragments studied, catalogued, and restored.

KNOWLEDGE PLAN Benevento territory	
Objective 29	TO INCREASE THE KNOWLEDGE ABOUT THE TERRITORY
Project 29.1	Gather and organise all existing data and documentation on the GIS
Description	<p>Starting with the wealth of archaeological – architectural heritage, this system makes it possible to direct the actions required to the best knowledge, taking into account, based on the censused resources, all the data on the protective measures applied, state of conservation, interfering disturbing elements, and any other resources that can be related to these.</p> <p>The project will strive to take in the cataloguing and putting on the web of documentary and bibliographic sources, in order to create a Virtual Library covering the territories included in the UNESCO Site.</p> <p>“Planning and management the SIT system with the help of GIS software” involves: Creating a computer system for acquiring / filing / editing data (databanks) on a GIS basis, in order to read geographical data on the relevant territory via the SIT (Territorial Computer System). The first phase will be to design the software model (database and GIS interface) and to experiment with the effectiveness of the database architecture, by entering territorial data associated with basic maps. The second phase involves translating all the data available on the wealth of cultural heritage, within the GIS system. The flexibility of the system will allow the software to be updated over time to meet needs that may arise from time to time as the wealth of knowledge increases.</p> <p>The basic actions to create the network therefore include activating a system for gathering and managing computerised data that involves the entire network of the serial Site, and reporting of information available on the heritage, documentary sources and studies available.</p>
Parties involved	Superintendency for Architectural Heritage in Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. State Archives Municipality of Benevento
Phases and time frame	Long term: 2015
Financial resources	To be found: regional and EU funding
Expected results	To set up and develop an integrated system over time covering the body of knowledge that is accessible and available as a source of information in order to divulge, study, and optimise management of the cultural heritage of the site
Result indicators	Number of pieces of data organised in terms of subject matter Quantity of data stored Number of schedules produced.

KNOWLEDGE PLAN Benevento territory	
Objective 29	TO INCREASE THE KNOWLEDGE ABOUT THE TERRITORY
Project 29.2	Plan systematic analysis and research in the Territory
Description	<p>The creation of an integrated system for cultural heritage, aimed at more in-depth and wider-reaching studies, also presupposes wide-ranging study campaigns on specific topics.</p> <p>In fact, the presence of Lombard culture over a large portion of the central-southern territory leads one to suppose that it had a significant influence on architectural and artistic works, and material culture in general. On the other hand, knowledge outside the City of Benevento is scarce. One may suppose that many settlements of medieval origin or older – located on the Highlands surrounding Benevento, along the main communication routes (Via Appia, Via Traiana, Regio Tratturo, etc.) – were strongly influenced by Lombard culture.</p> <p>It is therefore necessary to plan systematic analysis and research of the territory in order to bring to light these cultural influences and relate them to one another, including by using computerised cataloguing and geo-referencing tools (SIT).</p>
Parties involved	<p>Superintendency for Architectural Heritage in Salerno, Avellino, and Benevento.</p> <p>BAPPSAE Superintendency of Caserta and Benevento.</p> <p>State Archives</p>
Phases and time frame	Short term: 2009
Financial resources	To be found: regional and EU funding
Expected results	Launch of a research and analysis campaign on the territory
Result indicators	Number of research projects launched

KNOWLEDGE PLAN Monte Sant'Angelo site and buffer zone	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE
Project 30.1	Realisation of other survey campaigns
Description	<p>The exploitation of the Longobard Sanctuary requires an in-depth knowledge of its architectural and decorative structure. The promotion of new cognitive investigations aimed at improving existing data, sometimes incomplete or based on past analyses with outdated techniques, appears to be of extreme importance. In particular possible examinations regarding building techniques and phases are of great interest.</p> <p>With this objective, the realisation of a precise organic survey in digital format is foreseen which will permit the planning and realisation of further analytical examinations.</p> <p>The survey can be carried out with photogrammatic type methods or laser-Scanning, with rendering in vectorial and digital format.</p> <p>It is necessary to start from a survey on the stratification of the walls and the remains of frescos (with aimed probes) on the surface. This phase is introductory to the planning of a systematic total survey which includes metric measurement of the building materials.</p>
Actions	<ol style="list-style-type: none"> 1. Survey project 2. Realisation of georeferenced metric and descriptive surveys 3. Analysis of building stratification 4. Rendering of data 5. Realisation of three-dimensional rendered models of the status quo 6. Realisation of three-dimensional rendered models of the transformation phases
Parties involved	<p>Municipality of Monte Sant'Angelo; Superintendency for the BAPPSAE (architectural assets for the landscape and for historical heritage) of the Region of Puglia; University of Bari; Region of Puglia; International Centre of Research and Documentation on Art and Medieval Architecture.</p>
Phases and time frame	Short-medium term, starting from 2009.
Financial resources	Funds to be raised charged to: Municipality of Monte Sant'Angelo; Ministry for Cultural Assets and; Region of Puglia.
Expected results	<p>Obtain a precise, georeferenced survey of the existent and define the historical sequence of evolution of the asset (analysis of the phases of transformation).</p> <p>The survey will also become the basis for:</p> <ol style="list-style-type: none"> a) setting the new museumification and maintenance project for the sanctuary b) plan and realise further analysis aimed at building elements c) realise a GIS (databank) d) supply material for divulgation.
Result indicators	<p>Quantity of obtained data.</p> <p>Frequency of use of the results for other projects of conservations, valorisation and use of the assets.</p>

KNOWLEDGE PLAN Monte Sant'Angelo site and buffer zone	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE
Project 30.2	In-depth examination of historical research on the Longobard Sanctuary
Description	<p>The research which has involved the Longobard Sanctuary dates back to archaeological digs in the fifties. Only in 1999 were other essays on digs carried out by some specialists from the Department of classic and Christian Studies of the University of Bari, which were aimed at identifying and describing burials in the limina of the sanctuary. These findings witness how in the full Longobard era, when the sanctuary assumed a more complete structural form, the tombs were located inside the "Longobard gallery" and in the area in front of the facade.</p> <p>The documentation on these interventions is not homogeneous and is dispersed. The censoring and gathering of all known data and research on new data in the archives will constitute a fundamental moment for the knowledge on matters of the Longobard Sanctuary.</p>
Actions	<ol style="list-style-type: none"> 1. Acquisition and organisation of archived data on past research.
Parties involved	<p>Municipality of Monte Sant'Angelo; Superintendency for the BAPPSAE of the Region of Puglia; University of Bari; International Centre of Research and Documentation on Art and Medieval Architecture.</p>

Phases and time frame	Medium term, starting from 2009.
Financial resources	Funds to be raised charged to: Italian State (financing for research); European Community.
Expected results	Widening of knowledge on the Longobard Sanctuary. Creation of an updated and complete databank.
Result indicators	Quantity of gathered data. Frequency of use of the databank.

KNOWLEDGE PLAN Monte Sant'Angelo site and buffer zone	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE
Project 30.3	Censuring of the structures and existing data on the walls, with definition of the property of the remains
Description	The walls constitute a monumental element of the ancient urban space of Monte Sant'Angelo which were involved over time in phenomena of re-use and modern urban development. Knowledge on the remaining sections therefore becomes a fundamental aspect for understanding some of the dynamics of urban development to obtain better protection and conservation of the remains. There are still now some examinations on the question of the urban walls but there is not yet a systematic approach. Foreseen therefore is the planning and completion of systematic censuring and the documentation on the existing sections of wall by means of categorisation and survey, with the verification of their ownership. At the end of this there will be a precious databank to be used both for conserving the walls and for valorisation, as well as favouring divulgation of the historical aspect to a wider public.
Actions	<ol style="list-style-type: none"> 2. Censuring of existing sections or those seen in the past 3. Categorising the existing sections of wall 4. Verification of the ownership 5. Verification and recovery of documentation 6. Promotion of surveys on the missing parts 7. Organisation of data and archiving 8. Edition of divulgative and scientific material
Parties involved	Municipality of Monte Sant'Angelo; Superintendency for the BAPPSAE of the Region of Puglia; University of Bari.
Phases and time frame	Short-medium term.
Financial resources	Municipality of Monte Sant'Angelo; Region of Puglia.
Expected results	Widening of knowledge on the walls. Production of material for implementation of the GIS and the archives on the heritage of Monte Sant'Angelo
Result indicators	Quantity of obtained data Frequency of use of data in other conservation, valorisation and exploitation projects Number of publications edited on the matter

KNOWLEDGE PLAN Monte Sant'Angelo site and buffer zone	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE
Project 30.4	Planning and realisation of new archaeological research in the area to the north of the Longobard Sanctuary
Description	The lack of data regarding the situation of the most ancient phases of the Sanctuary and the results of the digs in the fifties, invite the planning of cognitive interventions outside of the known area of the Sanctuary in order to verify the existence of other antique structures linked to the monument.
Actions	<ol style="list-style-type: none"> 1. Planning of non-invasive investigations according to different methods: georadar, electromagnetism etc. 2. Realisation of investigations 3. Elaboration of results and compilation of interpretative plans
Parties involved	Sanctuary of San Michele Arcangelo, Superintendency BAPPSAE of Puglia, International Centre of Research and Documentation on Art and Medieval Architecture

Phases and time frame	Medium term
Financial resources	Funds to be raised charged to: Region of Puglia; private sponsors.
Expected results	Widening of knowledge on the ancient structure of the Sanctuary
Result indicators	Expansion of the area undergoing investigation. Quantity of data obtained. Frequency of use of the data for other research and valorisation projects.

KNOWLEDGE PLAN Monte Sant'Angelo site and buffer zone	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE
Project 30.5	Planning and realisation of research on the ancient wall belt
Description	Starting from the hypothesis formulated by scholars regarding the progress of the ancient wall belt, the intention is to start up a systematic verification of the places where it is possible to identify evidence of the structures that are not visible today. The intention is that of elaborating a virtual reconstruction of the wall belt and verify the possibility of defining new valorisation paths.
Actions	<ol style="list-style-type: none"> 1. Instrumental survey of the sites with execution of essays to verify the eventual presence of the structural parts of the towers. 2. Coding data on specific software for virtual 3D re-elaboration 3. Study and publication of the results 4. Divulcation and preparation for use (see Conservation Plan; Enhancement Plan)
Parties involved	Municipality of Monte Sant'Angelo Superintendency for the BAPPSAE of the Region of Puglia.
Phases and time frame	Short-medium term, programmed to start from 2009.
Financial resources	Funds to be raised charged to: Municipality of Monte Sant'Angelo; Region of Puglia.
Expected results	Increase in knowledge on the development phases and dating the walls Production of material useful for conservation and valorisation
Result indicators	Expansion of the area undergoing investigation. Quantity of data obtained. Frequency of use of the data in the projects of conservation, valorisation and divulgation Number of divulgation activities promoted

KNOWLEDGE PLAN Monte Sant'Angelo territory	
Objective 31	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE TERRITORY IN THE LONGOBARD ERA
Project 31.1	Analysis and study of archaeological documentation in the territory
Description	Numerous are the findings already made and the available evidence of Longobard era scattered over the territory. The improvement of knowledge must therefore be based not only on new acquisitions but also on the collection and verification of all the data that is already available in order to create a wide documentary base which may also become a fundamental tool for preserving the heritage and stimulating and addressing the realisation of new research
Actions	<ol style="list-style-type: none"> 1. Censoring of the existing data relative to cult locations located in Longobard itineraries (see Enhancement Plan) 2. Organisation of data and computerised archiving for the creation of a Data Base 3. Study of the evidence of the data and initiation of examinations on specific themes 4. Publication and divulgation of the results
Parties involved	Municipalities of Monte Sant'Angelo, San Marco in Lamis, San Giovanni Rotondo Province of Foggia Gargano National Park Mountain Community Superintendency BAPPSAE Region of Puglia University of Bari
Phases and time frame	Short-medium period, starting from 2009
Financial resources	Funds to be raised charged to: Region of Puglia; European Community
Expected results	Acquisition of all existing data and examination
Result indicators	Quality and quantity of recovered data Number of divulgative activities promoted and expansion of the interested public sphere

KNOWLEDGE PLAN Monte Sant'Angelo territory	
Objective 31	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE TERRITORY IN THE LONGOBARD ERA
Project 31.2	Continuation of archaeological research in the cult locations situated along la Via Sacra Langobardorum
Description	Along the Via Sacra many monasteries, churches and hospitals were built for pilgrims, often superimposed on more ancient structures: Santa Maria di Stignano, San Giovanni de Lama, Sant'Egidio, San Nicola al Pantano, San Lorenzo di Siponto. Having surpassed the valley of Fratta, the road continued near to a late antique or medieval settlement in the Cassana quarter; and then it lead to the abbey of Santa Maria di Pulsano and to Monte Sant'Angelo. Pilgrims could proceed towards the Tavoliere and visit the church of Santa Maria di Siponto, the abbey of San Leonardo di Siponto, the dome of Santa Maria Icona Vetere a Foggia and the sanctuary of the Incoronata di Foggia.
Actions	<ol style="list-style-type: none"> 1. Examination of historical research on known buildings 2. Territorial and toponomastic research aimed at recognising the areas in which ancient churches rose which have disappeared 3. Organisation and archiving of data 4. Divuligation and publication of results
Parties involved	Municipalities of Monte Sant'Angelo, San Marco in Lamis, San Giovanni Rotondo Province of Foggia Gargano National Park Mountain Community Superintendency BAPPSAE Region of Puglia University of Bari
Phases and time frame	Short-medium period, starting from 2009
Financial resources	Funds to be raised charged to: Region of Puglia; bank and private sponsoring.
Expected results	Examination of knowledge on the churches, monasteries and works of art in the territory in the Longobard era; acquisition of updated data and formation of consultable archives;
Result indicators	Quantity of data gathered Expansion of the area subject matter of the interventions. Frequency of consultation of gathered data Number of divulgative activities promoted and expansion of the interested public sphere

KNOWLEDGE PLAN Monte Sant'Angelo territory	
Objective 32	MEMORISATION OF COGNITIVE DATA ON THE SITE AND ON THE TERRITORY
Project 32.1	Realisation of an archaeological map of Monte Sant'Angelo and the Gargano
Description	The existing data on the Longobard period both in Monte Sant'Angelo and all the Gargano territory is numerous and form a base of primary importance for the knowledge of the Longobard people and their settlement in Italy. Given that the data is not homogeneous, using it and distributing it is more complicated and impedes the emergence of its full potential. For this reason it seems necessary to obtain a total collection of this evidence, working systematically and then making it available in a sole data bank which will become a true document on the archaeological evidence.
Actions	<ol style="list-style-type: none"> 1. Censoring the documentation 2. Categorising and cataloguing the findings 3. Study and organisation of data with creation of a digital archive 4. Realisation of the Document 5. -Publication and divulgation of the document
Parties involved	Municipality of Monte Sant'Angelo, Mountain Community of Gargano, Gargano National Park, Region of Puglia, Superintendency for the BAPPSAE of the Region of Puglia; University of Studies of Bari; International Centre of Research and Documentation on Art and Medieval Architecture .
Phases and time frame	Brief – medium term, starting from 2009
Financial resources	Funds to be raised charged to: Region of Puglia
Expected results	Arrive at the collection and reorganisation of all archaeological data and make it consultable. This will serve the realisation of a territorial GIS on the evidence and to compile archaeological risk documents
Result indicators	Quantity of data gathered Expansion of the territory involved. Frequency of consultation and use of gathered data for other projects Number of divulgative activities promoted and expansion of the interested public sphere

KNOWLEDGE PLAN Monte Sant'Angelo territory	
Objective 32	MEMORISATION OF COGNITIVE DATA ON THE SITE AND ON THE TERRITORY
Project 32.2	Implementation of the regional GIS
Description	<p>The management of heritage of knowledge on Monte Sant'Angelo and the Gargano territory in the Longobard era may come about more easily if the organisation of data is inserted into a wider viewpoint of knowledge that is easily reached and consultable by everybody. This could happen thanks to the implementation of the regional GIS (Geographical information system), inserting therein also the part concerning archaeological aspects, in particular those on the Longobard period.</p> <p>Connection of the regional informative system implemented thus may be made usable and available by using the computer platform linked to the Monte Sant'Angelo Web site constituting the web site of the network of locations included in the Site Italia Langobardorum.</p>
Actions	<ol style="list-style-type: none"> 1. Implementation of existing regional GIS 2. Implementation of the GIS on web application
Parties involved	Municipality of Monte Sant'Angelo, Mountain Community of Gargano, Gargano National Park, Region of Puglia, Superintendency for the BAPPSAE of the Region of Puglia; University of Studies of Bari; International Centre of Research and Documentation on Art and Medieval Architecture
Phases and time frame	Medium term, starting from 2010
Financial resources	Funds to be raised charged to: Region of Puglia
Expected results	Expand the regional data bank on GIS base
Result indicators	Quantity of data gathered Expansion of the territory involved. Frequency of consultation and use of gathered data for other projects

8.2 PROTECTION AND CONSERVATION PLAN

8.2.1 CIVIDALE DEL FRIULI Site, buffer zone and Territory

The relative good state of conservation of the properties included in the Site of Cividale del Friuli provides the foundation for the definition of objectives, projects and relative actions of the Protection and Conservation Plan. Taking into account the variety of conditions which characterize the single properties, specific maintenance programmes – integrated with the contents of the Knowledge and Enhancement Plans – need to be implemented.

8.2.2 BRESCIA Site, buffer zone and Territory

Both the monastic complex of Santa Giulia in Brescia and the single monuments enjoy an optimal state of conservation. An organic conservation plan has been implemented for the Site in the years 1979-2005, after in-depth studies and stratigraphic archaeological excavations which addressed the subterranean structures, the buildings' elevation as well as the interior and exterior decorated surfaces.

The organic recovery intervention on the monumental area, which is in a relative good condition, includes significant intervention of extraordinary conservative maintenance, which will be carried out using the highest quality standards. The results of such interventions will directly influence, above all, the contents of the Knowledge Plan.

8.2.3 CASTELSEPRIO-TORBA Site, buffer zone and Territory

The state of conservation of the various monuments that make up the Castelseprio-Torba archaeological area is good, thanks to the numerous restoration and maintenance works carried out over the years by owning bodies and managers. The objectives of the

Protection and Conservation Plan are aimed, on the one hand, at further improving the state of conservation by means of programmed maintenance works that make constant monitoring possible. On the other hand they involve carrying out conservation works in the archaeological areas most subject to decay due to vegetation. As to the environmental context of the Park, particular attention is given to works to stabilise slopes and constant maintenance of the woods.

8.2.4 SPOLETO Site, buffer zone and Territory

In SPOLETO a Diagnostic Laboratory – now operational – was created in the context of the Framework Programme State-Region (APQ) in 2004. This Laboratory – being equipped for damage and risk diagnosis for initial intervention and recovery of properties through innovative methods and techniques – could act as a point of reference as to prevention of seismic risk and cognitive diagnostic projects on the properties, not only for the Longobard monuments of the Duchy of Spoleto, but also for all the properties included in the Italia Langobardorum Network. At this Centre – in cooperation with the Italian Centre for Early Middle Ages Studies (CISAM), also present in Spoleto – a data-archive could be created. It will concern the building techniques and material of the various Longobard artefacts (from architecture to sculpture and paintings, etc.) and include all information acquired thanks to studies, research and surveys throughout Italy. This archive could be extended to a wider network of other European Longobard properties in the future.

8.2.5 CAMPELLO SUL CLITUNNO Site, buffer zone and Territory

The Clitunno Tempietto is in a good state of conservation. It has been subject to several recent interventions which guaranteed its correct conservation. In particular, the last intervention was structured in a series of operations which concerned both external and internal

areas, i.e. both stone and fresco surfaces.

8.2.6 BENEVENTO Site, buffer zone and Territory

The Protection and Conservation Plan site and buffer zone defines medium and long-term safeguards to conserve both the heritage site and buffer zone of Benevento. It also programmes some important conservation projects, actions covering a vast area that will make parts that are currently little known accessible and useable, while valorising the cultural heritage that marked the Samnite Territory.

The objectives it covers includes:

- Improving the state of conservation of the site.
- Improving the state of conservation of Longobard assets included in the buffer zone.
- Raising the conservation status of the old city.
- Monitoring the state of conservation of the site.
- Upgrading and extending the human resources involved in conservation of the site.
- Improving prevention of the seismic risk in the old city.
- Extending the human resources involved in safeguarding the site.
- Improving the state of conservation of the Lombard heritage in the territory.

8.2.7 MONTE SANT'ANGELO Site, buffer zone and Territory

In MONTE SANT'ANGELO the city walls dating back to the Norman period included in the buffer zone proposed consist of remaining pieces with a different degree of conservation, the piece South to the monastic complex of San Francesco which is the firmer portion included. The state of conservation is different depending on the various pieces but, as a whole, is good and does not require any action as to both stability and structure. Invading vegetation differently concerns the pieces particularly in the period between

spring and summer. During planned manual operations aimed at removing it the inspection of the wall coat as well as reparations to avoid water infiltration and structure disintegration are carried out. The castle, already restored and strengthened in the past, returned to its functional condition after further restoration works concluded in summer 2009.

The systematic rehabilitation of the complex is aimed at streamlining and better using this piece of heritage. Recently, the consolidation of the church supporting structures was completed and the place of worship was reopened to public during 2009. With respect to the state of conservation of both the bell tower and the left wing of the complex, timely restoration works are being planned.

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
CIVIDALE DEL FRIULI SITE	1 ENHANCEMENT OF THE STATE OF CONSERVATION OF THE LONGOBARD TEMPIETTO	1.1 Maintenance interventions with special reference to the presbytery
		1.2 Project and maintenance intervention on the wooden chancel and beam of the iconostasis
	2 DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO	2.1 Completion of the research on existing data on past conservation operations and systematization of these data (history)
		2.2 Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations
		2.3 Maintenance programme and launch of the first cycle of interventions
		2.4 Project, creation and implementation of a database for the monitoring of the state of conservation and the transfer into the archives of past and current conservation interventions
		2.5 Maintenance interventions on damaged frescos and stone furnishings of the Tempietto
	3 ENHANCEMENT OF THE STATE OF CONSERVATION OF THE MONASTERY OF SANTA MARIA IN VALLE	3.1 Maintenance intervention on the Church of San Giovanni
	4 DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE RATCHIS ALTAR, THE BAPSTISPERY OF CALLISTO AND THE DUOMO	4.1 Completion of the research on existing data on past restoration operations and electronic systematization of these data
		4.2 Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations and intervention projects
5 CONSERVATION OF THE PATRIARCHAL PALACE	5.1 Carrying out of thematic surveys of wall stratification and deterioration and relative project and conservation intervention in the archaeological area A	
	5.2 Intervention for the restoration of protection architectural structures of the archaeological area B and maintenance intervention on ancient structures	
CIVIDALE DEL FRIULI BUFFER ZONE AND TERRITORY	6 ENHANCEMENT OF THE STATE OF CONSERVATION OF THE WALLS	6.1 Maintenance projects and intervention on visible parts of the first circle of walls to improve knowledge and use of the walls

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
		6.2 Restoration and planned maintenance projects and interventions on quarters' walls
	7 COMPLETION OF CONSERVATION PROJECTS OF THE CHURCHES	7.1 Completion of the restoration of the Church of San Giovanni in Xenodochio
		7.2 Restoration intervention of the Church of San Silvestro
		7.3 Maintenance of external surfaces of the Church of Santa Maria di Corte and church square
		7.4 Maintenance of plaster on the façade and apse of the Church of San Martino and restoration project and intervention on the sacristy
8 PROTECTION AND CONSERVATION OF CONVENTS AND HISTORICAL PALACES	8.1 Completion of the restoration of the complex comprising the church and the former convent of San Francesco	
9. IMPROVEMENT OF NATURAL AND SEISMIC RISKS PREVENTION	9.1 Completion of protection interventions on Natisone River.	
BRESCIA SITE AND BUFFER ZONE	10 MAINTENANCE ON MASONRY AND SURFACES IN THE S. SALVATORE – S. GIULIA MONASTERY COMPLEX	10.1 Maintenance measures for plastered walls and masonry pertaining to the southern side of the Monastery and Santa Maria in Solario
		10.2 Conservation measures on the plaster and masonry pertaining to the side chapels in San Salvatore
		10.3 Conservation measures on the archeological structures below the San Salvatore flooring (Roman <i>domus</i> , the first church and Early middle ages tombs)
		10.4 Conservation measures on the archaeological structures below the nuns' parlor
		10.5 Conservation measures on structures of archaeological interest located in the entrance area to San Salvatore - Santa Giulia <i>City museum</i>
	11 INTERVENTIONS ON MOBILE FINDINGS PERTAINING TO THE EARLY MIDDLE AGES PHASES OF THE MONASTERY	11.1 Cleaning, consolidation, identifying couplings and any assemblage onto panels of significant portions of painted plaster relating to the Early Middle Ages phase of the Church of San Salvatore

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
		11.2 Completion of the cleaning and consolidation, identification of the original arrangement and any on site relocation of stucco fragments pertaining to the architectural decoration of the Church of San Salvatore
	12 IMPROVEMENT OF THE PROTECTION STRUCTURES	12.1 Substitution of the access door to the San Salvatore cloister
		12.2 Substitution of the windows' wood frames on the first floor of the monastery complex
	13 RECLAMATION OF THE ARCHEOLOGICAL AREA OF THE <i>CAPITOLIUM</i>	13.1 Conservation and maintenance interventions on various structures pertaining to the Republican sanctuary
		13.2 Conservation and maintenance interventions on various structures pertaining to the <i>Capitolium</i>
	14 CONSERVATION MEASURES ON HISTORICAL BUILDINGS	14.1 Conservation interventions on the structures and surfaces of Palazzo della Loggia, seat of the City Hall
		14.2 Conservation interventions on the roofing of Palazzo Bonoris, seat of the Ateneo di Scienze Lettere ed Arti of Brescia
		14.3 Conservation interventions on the roofing and Early Middle Ages painted plaster in Palazzo Broletto
		14.4 Conservation interventions on the roofing of Mastio Visconteo within the Castle of Brescia
		14.5 Extraordinary conservation interventions in the Tosio Martinengo Palace
BRESCIA TERRITORY	15 CONSERVATION OF THE LONGOBARD CONTEXTS IN THE BRESCIA TERRITORY	15.1 Restoration and definitive cataloguing of findings and funeral artifacts found in the settlements and the recently excavated necropolis in Manerbio, Leno, Montichiari and Sirmione and from ecclesiastical buildings
	16 PREVENTION AND MITIGATION OF THE PRINCIPAL RISKS FOUND IN THE TERRITORY	16.1 PRIM – Regional integrated program for mitigating risks
16.2 Works to make the road s.s. 45 BIS “Gardesana occidentale” safe		
CASTELSEPRIO – TORBA SITE, BUFFER ZONE AND TERRITORY	17 MAINTENANCE OF THE CHURCH OF SANTA MARIA <i>FORIS PORTAS</i>	17.1 Maintenance plan and works for the surfaces of the Church of Santa Maria <i>foris portas</i>

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS	
	<p>18 IMPROVEMENT OF THE STATE OF CONSERVATION OF THE <i>CASTRUM</i></p>	<p>18.1 Recovery and restoration of the Baptistry of S. Giovanni and creating a new roof</p> <p>18.2 Recovery and restoration of walls in the intermediate area between the Cistern and the Bell Tower in the San Giovanni Basilica Complex</p> <p>18.3 Conservation work on the Church of S. Paolo</p> <p>18.4 Conservation work on building I</p> <p>18.5 Conservation work on the door and access bridge for the <i>castrum</i></p> <p>18.6 Restoration and maintenance work on the wall circuit</p>	
	<p>19 PREVENTION AND MITIGATION OF THE NATURAL, SEISMIC AND ANTHROPIC RISKS</p>	<p>19.1 Refurbishing of the slopes</p>	
	<p>20 IMPROVING THE STATE OF CONSERVATION OF THE TORBA COMPLEX</p>	<p>20.1 Completion of restoration of the internal plaster and frescoes fragments in the Church of Santa Maria of Torba</p> <p>20.2 Drawing up a maintenance project for the external surfaces of the Tower</p> <p>20.3 Restoration of the external plaster of the Church, Farmhouse, and Barn</p> <p>20.4 Conservation, restoration of the existing archaeological structures as part of refurbishing of the connection with the <i>castrum</i> of Castelseprio-Torba</p>	
	<p>SPOLETO SITE, BUFFER ZONE AND TERRITORY</p>	<p>21 DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA OF SAN SALVATORE</p>	<p>21.1 Systematization of data relative to the carried out restoration interventions (see Documentation centre)</p> <p>21.2 Carrying out of thematic surveys aimed at diagnostic project and analysis</p> <p>21.3 Planning of routine maintenance interventions and launch of the first cycle of interventions</p> <p>21.4 Maintenance intervention of stone material stored in the museum warehouse</p>
		<p>22 CARRYING OUT OF CONSERVATION INTERVENTIONS OF THE EX CONVENT COMPLEX</p>	<p>22.1 Launch of conservation and restoration interventions of the ex convent complex</p>

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
	23 IMPROVEMENT OF RISK PREVENTION	23.1 Installation of a video surveillance system on the basilica
	24 IMPROVEMENT OF RISK PREVENTION IN ORDER TO THE CULTURAL HERITAGE	24. 1 Creation of a <i>Centre of Excellence</i> for the recovery of Cultural Heritage in case of a disaster.
		24. 2 Opening of the Cultural Heritage Diagnostic Laboratory at the Rocca Albornoziana
CAMPELLO SUL CLITUNNO SITE	25 IMPROVEMENT OF THE STATE OF PROTECTION AND CONSERVATION OF THE CLITUNNO TEMPIETTO AND THE CLITUNNO RIVER	25.1 Maintenance work particularly on tombstone materials and walls of pronaos
		25.2 Relief and reduction of rising damp problems and condensation in the walls exposed to north and north-east
		25.3 Conservation work and aesthetic aspect of the fresco on back wall of cell
	26 DRAWING UP OF A MAINTENANCE PROGRAMME FOR THE CLITUNNO TEMPIETTO	26.1 Creation of thematic relief work for the diagnostic project and analytical surveys
26.2 Maintenance programme and start up of first cycle of work		
CAMPELLO SUL CLITUNNO BUFFER ZONE AND TERRITORY	27 CONSERVATION AND UPGRADING OF THE INDUSTRIAL ARCHAEOLOGY STRUCTURES	27.1 Conservation and refuencing of ENEL power station and water pumping station, destined to be used as exhibition site for the Eco/Museum Project
	28 CONSOLIDATION AND RESTORATION OF HERITAGE DAMAGED BY THE 1997 EARTHQUAKE	28.1 Work to secure and consolidate structure of the Sanctuary of the Madonna della Bianca
BENEVENTO SITE AND BUFFER ZONE	29 IMPROVING THE STATE OF CONSERVATION OF THE SITE	29.1 Maintenance and conservation improvement of the Church of Santa Sofia
	30 IMPROVING THE STATE OF CONSERVATION OF LONGOBARD ASSETS INCLUDED IN THE SITE AND IN THE BUFFER ZONE	30.1 Maintenance of the Longobard tomb in the Church of S. Salvatore
		30.2 Maintenance work on the Longobard boundary wall
31 RAISING THE CONSERVATION STATUS OF THE ANCIENT CITY CENTRUM	31.1 Implement incentives for private owners to effect eco-sustainable recovery of the ancient city	

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

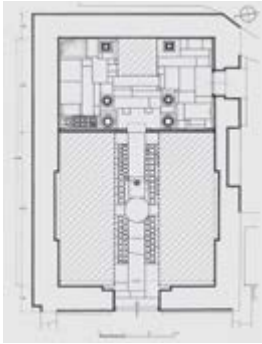

FIELD	OBJECTIVES	PROJECTS
	32 MONITORING THE STATE OF CONSERVATION OF THE ASSETS	32.1 Programme for periodic monitoring of the state of conservation of the archaeological areas
	33 UPGRADING AND EXTENDING THE HUMAN RESOURCES INVOLVED IN CONSERVATION OF THE SITE	33.1 Setting up a building school focussing on restoration as part of a restoration network
	34 IMPROVING PREVENTION OF THE SEISMIC RISK IN THE ANCIENT CITY	34.1 Drawing up a plan to mitigate the seismic risk
	35 EXTENDING THE HUMAN RESOURCES INVOLVED IN SAFEGUARDING THE SITE	35.1 Training courses in civil protection for cultural heritage
BENEVENTO TERRITORY	36 IMPROVING THE STATE OF CONSERVATION OF THE LONGOBARD HERITAGE IN THE TERRITORY	36.1 Programme for monitoring of the state of conservation of the archaeological areas along <i>Via Sacra Langobardorum</i>
MONTE SANT'ANGELO SITE	37 HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY	37.1 Project and intervention for the realisation of a system for the detection, control and correction of the rate of humidity in the locations of the Longobard Gallery, the adjoining rooms, the Angioina staircase, the cave-sanctuary and the connected rooms 37.2 Maintenance on the external wall covering north side 37.3 Planning and conservation of the bronze doors 37.4 Planning and intervention on the portcullis and the column of the upper atrium
	38 ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY	38.1 Completion of research on existing data on restorations carried out in the past and their arrangement (anamnesis) 38.2 Realisation of topical surveys finalised to the diagnostic project and analytic investigations 38.3 Maintenance programme and start up of the first cycle of interventions 38.4 Planning and implementation of a data bank for monitoring the state of conservation and archiving of past and current restorations

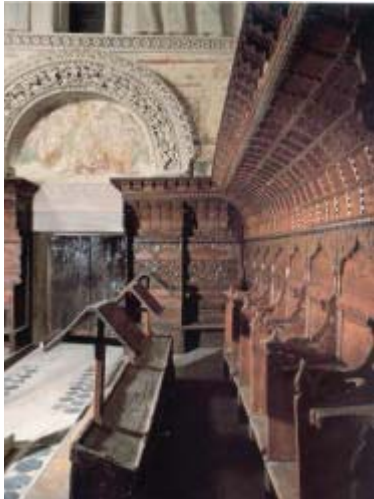

**8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
		38.5 Maintenance interventions on frescos and tombstones in the sanctuary
		38.6 Monitoring and conservation plan of the inscriptions on the wall structures, internal and external
		38.7 Maintenance plan for the wood choir
	39 ELABORATION OF A MAINTENANCE PROGRAMME ON THE STRUCTURES ANNEXED TO THE SANCTUARY	39.1 Research on existing data on past restorations and computer-based memorisation of the same
		39.2 Realisation of topical surveys finalised to the diagnostic project and analytical survey and project of interventions
		39.3 Maintenance and start-up programme of the first cycle of interventions
	MONTE SANT'ANGELO BUFFER ZONE AND TERRITORY	40 IMPROVE THE STATE OF CONSERVATION OF THE NORMAN WALL BELT
41 ENSURE THE STATE OF CONSERVATION OF THE SAN PIETRO - TOMBA DI ROTARI - SANTA MARIA MAGGIORE COMPLEX		41.1 Monitoring and programmed maintenance plan
42 COMPLETION OF THE CASTLE RESTORATION PROJECT		42.1 Completion of the restoration project for the castle
		42.2 Elaboration of a programmatic maintenance and conservation plan
43 MAINTENANCE AND RESTORATION OF THE CHURCHES AND THE MONASTIC COMPLEXES OF THE HISTORICAL CENTRE		43.1 Verification of property and restoration of public use of the churches of: S. Salvatore, Santa Apollinare, Eremo di S. Aniello
		43.2 Elaboration of a programme of interventions for the conservation and valorisation of the assets
44 IMPROVE THE STATE OF CONSERVATION OF THE SAN FRANCESCO COMPLEX		44.1 Completion of the cognitive phase introductory to the completion of the restoration in progress with realisation of topical surveys finalised at analytical investigations
		44.2 Completion of the restoration project
	44.3 Elaboration of a programmatic maintenance plan	

8.6.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

FIELD	OBJECTIVES	PROJECTS
	<p>45 HEIGHTENING OF THE STATE OF CONSERVATION OF THE URBAN FABRIC IN THE HISTORICAL CENTRE</p>	<p>45.1 Study and programming of forms of support for the owners of the private properties to incentivate the recovery and maintenance in good efficiency of the properties and traditional fixtures in line with the technical norms of actuation in force</p> <p>45.2 Optimisation of the controls and new interventions to guarantee the observance of the norms for protecting and safeguarding the historical centre</p>

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 1	ENHANCEMENT OF THE STATE OF CONSERVATION OF THE LONGOBARD TEMPIETTO
Project 1.1	Maintenance interventions with special reference to the presbytery
Description	<p>The first phase of maintenance of the Tempietto Longobardo aims at improving the state of conservation especially of one part of the Tempietto before starting the systematic planning of maintenance interventions of the whole complex. The part concerned is the Eastern wall – partially in the north wing – of the presbytery where traces of moisture are visible. It is necessary to identify the causes of moisture through the verification of both environmental conditions and surface, and the waterproof resistance of external walls in order to plan an intervention project to eliminate the causes and visible effects of deterioration. It is necessary to verify the state of conservation of the frescos on the eastern wall which are partially damaged. Consolidation operations should also be planned.</p> <p>This phase also includes interventions on the floor of the presbytery so as to improve its state of conservation especially regarding floor joints which are now missing.</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;">  <p>1</p> </div> <div style="text-align: center;">  <p>2</p> </div> <div style="text-align: center;">  <p>3</p> </div> </div> <p>1. Plan of Tempietto 2. Soft humidity damage on the eastern wall 3. Floor of the presbytery: disgregation of the mortar between marble slabs</p>
Actions	<ol style="list-style-type: none"> 1. Verification of the environmental conditions of the Tempietto and survey/ analysis to identify the causes of moisture on the wall and the flaking off of some fragments of frescos and relative project. 2. Carrying out of the intervention
Parties involved	Municipality of Cividale del Friuli, Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage of Friuli Venezia Giulia.
Phases and timeframe	Short term: within 2008.
Financial resources	Funds earmarked by the Municipality of Cividale: € 8,000.00
Expected results	Elimination of the causes of deterioration on the presbytery wall. Mitigation of the vulnerability of the property.

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 1	ENHANCEMENT OF THE STATE OF CONSERVATION OF THE LONGOBARD TEMPIETTO
Project 1.2	Project and maintenance intervention on the wooden chancel and beam of the iconostasis
Description	<p>The causes of alteration on wooden parts must be identified and thus removed so as to mitigate visible effects. As for the wooden beam of the iconostasis, the small areas of the painting layer which have flaked off require maintenance intervention.</p> <div style="display: flex; justify-content: space-around;">   </div> <p>1 2</p> <p>1. Seats of the wooden chancel 2. Wooden chancel with clear signs of alteration.</p>
Actions	<ol style="list-style-type: none"> 1. Carrying out of analyses to identify the causes of alteration on the wooden chancel 2. Project and intervention. 3. Maintenance of the beam of the iconostasis.
Parties involved	Municipality of Cividale del Friuli BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia.
Phases and timeframe	2009
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia.
Expected results	Elimination of causes of alteration and improvement of visible condition of the wooden surfaces.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.1	Completion of the research on existing data on past restoration operations and systematization of these data (history)
Description	<p>In order to plan a maintenance programme, it is necessary to know the history of the state of conservation of the property. First, data relative to past restoration interventions must be systematically collected in order to identify the problems which have risen over time and understand how they have been solved (intervention techniques and materials used) in order to contribute also to the description of the part of the artefact which are currently unavailable. Moreover, it is necessary to identify and acquire all studies-analyses already carried out on the state of conservation of the property to contribute to its correct description. The series of data must be transferred into electronic archives through a specific programme (see Knowledge Plan – network-).</p>
Actions	<ol style="list-style-type: none"> 1. Completion of the research and acquisition of existing data. 2. Arrangement of data by transferring them into electronic archives.
Parties involved	Municipality of Cividale del Friuli. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	Anthropological Heritage) of Friuli Venezia Giulia.
Phases and timeframe	Starting from 2008
Financial resources	Funds by the Municipality of Cividale del Friuli: €. 3,000.00 Funds to be raised by private and bank sponsorship
Expected results	Completion and systematization of data on past restoration interventions; Arrangement of tools and definition of procedures allowing the planning of maintenance interventions.
Result indicators	Number and quality of collected and systematized data Publication of data

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.2	Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations
Description	The project envisages thematic surveys aimed at the description of the state of conservation of the property. These include: geometry surveys (metric survey); surveys of material and building techniques (descriptive survey and analytical investigations); surveys of past restoration interventions which left visible marks (stratigraphic analysis); surveys of visible effects of deterioration (deterioration and damage surveys and analytical investigations). The surveys will be carried out through photogrammetric or laser Scanner methods, for the geometric part. All renderings will be carried out on thematic vector/ digital mapping and in photogrammetric format.
Actions	<ol style="list-style-type: none"> 1. Carrying out of metric survey campaigns through photogrammetric or laser Scanner methods (see Knowledge Plan) with relative vector/ digital rendering. 2. Stratigraphic analysis of elevations in order to identify past restoration interventions (see Knowledge Plan) 3. Survey and description of materials and building techniques (see Knowledge Plan) 4. Survey of deterioration types 5. In-depth analysis of analytical surveys to classify materials and types of deterioration 6. Renderings on thematic maps and description of the state of conservation.
Parties involved	Municipality of Cividale. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia. Regional Centre for Cataloguing and Restoration of Villa Manin di Passariano
Phases and timeframe	Actions 1: within 2008 Actions 2-7: starting from 2009.
Financial resources	Action 1: Funds earmarked by the Ministry through BAPPSAE as to the metric survey with laser Scanner of the four walls of the hall: €. 15,000.00 Actions 2-7: Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Obtaining the most complete picture possible of thematic precision surveys and paper and digital renderings.
Result indicators	Number and quality of collected and systematized data.

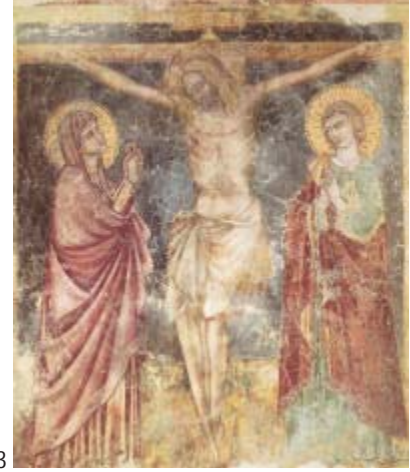

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.3	Maintenance programme and launch of the first cycle of interventions
Description	On the basis of completed surveys, a maintenance programme is planned for the Tempietto enabling the identification of intervention priorities and implementation timeframes. The objective is to carry out continuous maintenance intervention also for small lots.
Actions	<ol style="list-style-type: none"> 1. Identification of intervention priorities and definition of the general programme 2. Launch of the first maintenance cycle.
Parties involved	Municipality of Cividale. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia.
Phases and timeframe	Starting from 2009 and following.
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Arrangement of maintenance programme with identification of interventions to be carried out, timeframes and relative controls.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.4	Project, creation and implementation of a database for the monitoring of the state of conservation and the transfer into the archives of past and current restoration interventions
Description	A specific electronic programme which allows the transfer into the archives, the management and correlation of the data relative to past restoration interventions in the Tempietto, including future interventions, is planned. It refers to the historical data relative to building and transformation phases of the Tempietto; historical data relative to restoration interventions carried out to identify materials, techniques, timeframes and building phases; metric and descriptive surveys, stratigraphic analyses, deterioration surveys and analytical surveys, etc. The objective is to find a connection among the different data relative to various phases and sources of knowledge in order to allow both the improvement of knowledge on the Tempietto and the description of the state of conservation of materials on which maintenance programmes are planned. This database can be created only for the properties included in the Site of Cividale or it can be used as a common and shared tool for all sites included in the network (see Knowledge Plan – network-)
Actions	<ol style="list-style-type: none"> 1. Planning of the IT system 2. Entering and implementation of data
Parties involved	Municipality of Cividale; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; Regional Centre for Cataloguing and Restoration of Villa Manin di Passariano
Phases and timeframe	Starting from 2009 and following
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Obtaining systematized data on the state of conservation of the Tempietto; Obtaining a cognitive electronic base to carry out maintenance interventions; Improving knowledge on past restoration interventions, materials and building techniques; Increasing dissemination potential and consultation of data.
Result indicators	Number of data collected and entered in the database.

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.5	Maintenance interventions on damaged frescos and stone furnishings of the Tempietto.
Description	<p>During restoration interventions on the Tempietto carried out between 1950 and the end of the 60s a number of frescos flaked off. The state of conservation of the material used to create the support of the frescos and the condition of the painting layer must be examined to plan possible maintenance interventions which could be needed in case properties are moved to the soon-to-be Museum of the Monastery and the Tempietto (see Enhancement Plan–Site-Project 1.5)</p>  <p>1</p>

	 <p>2</p>  <p>3</p> <p>1-2-3 Frescos flaked off and put on a frame</p>
Actions	<ol style="list-style-type: none"> 1. Verification of the state of conservation of damaged frescos of the Tempietto and of stone elements 2. Maintenance intervention
Parties involved	Municipality of Cividale; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia.
Phases and timeframe	2009 and following
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Improvement of the state of conservation of the properties.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 3	ENHANCEMENT OF THE STATE OF CONSERVATION OF THE MONASTERY OF SANTA MARIA IN VALLE
Project 3.1	Maintenance interventions on the Church of San Giovanni
Description	<p>The Church of San Giovanni has some problems linked to moisture (widespread efflorescence) which caused the disintegration of part of the plasters constituting masonry and part of altar plinths. The causes of disintegration must be verified by analysing the environmental conditions of the Church and by working on the damaged plaster – recently created – and the stones of altar plinths.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>1</p> </div> <div style="text-align: center;">  <p>2</p> </div> </div> <p>1. View of the church of San Giovanni 2. Same humidity damage on the altar</p>
Actions	<ol style="list-style-type: none"> 1. Verification of environmental conditions of the Church to identify the causes of moisture and relative maintenance project. 2. Intervention to replace damaged plaster 3. Restoration intervention on altar plinth
Parties involved	Municipality of Cividale, BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia.
Phases and timeframe	Starting from 2009 and following
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Elimination of causes of deterioration and visible signs.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 4	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE RATCHIS ALTAR, THE FONT OF CALLISTO AND THE DUOMO
Project 4.1	Completion of the research on existing data on past restoration operations and electronic systematization of these data
Description	<p>In order to plan a maintenance programme, it is necessary to know the history of the state of conservation of the property. First, data relative to past restoration interventions must be systematically collected in order to identify the problems which have risen over time and understand how they have been solved (intervention techniques and materials used) in order to contribute also to the description of the part of the artefact which are currently unavailable. Moreover, it is necessary to identify and acquire all studies-analyses already carried out on the state of conservation of the property to contribute to its correct description. The series of data must be transferred into electronic archives through a specific programme.</p>
Actions	<ol style="list-style-type: none"> 1. Acquisition of existing data

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	<ol style="list-style-type: none"> 2. Implementation of data 3. Arrangement of data through transfer into electronic archive
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; Parish of Santa Maria Assunta
Phases and timeframe	<ol style="list-style-type: none"> 1. Ratchis Altar, Under way. 2. Font of Callisto. Starting from 2009 and following.
Financial resources	<ol style="list-style-type: none"> 1. Ratchis Altar Funds coming from 2007-2008 appropriations of BAPPSAE and the Region Friuli Venezia Giulia (see, Project 4.2) 2. Font of Callisto. Funds to be raised by: State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Completion and systematization of data on past restoration interventions; Arrangement of bols and definition of procedures allowing the planning of maintenance interventions.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 4	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE RATCHIS ALTAR, THE FONT OF CALLISTO AND THE DUOMO
Project 4.2	Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations and intervention projects
Description	<p>The project envisages thematic surveys carried out with advanced technology with the objective of describing the state of conservation of the property. These include: geometry surveys (metric survey); surveys of material and building techniques (descriptive survey and analytical investigations); surveys of past restoration interventions which left visible marks (stratigraphic analysis); surveys of deterioration and analytical investigations. Surveys will be carried out through photogrammetric or laser Scanner methods, for the geometric part; surveys will be the digital foundation on which to enter other data on thematic analyses. All renderings will be in vector/digital format.</p> <p>The analytical phase will be followed by the maintenance project and intervention. As for the Tempietto, descriptive data on each intervention will be electronically transferred into archives and systematized (see Knowledge Plan). As to the Ratchis Altar, the analytical and maintenance phase is under way.</p>
Actions	<ol style="list-style-type: none"> 1. Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations. 2. Project and maintenance intervention. 3. Implementation of the database after each intervention
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; Parish of Santa Maria Assunta
Phases and timeframe	<ol style="list-style-type: none"> 1. Ratchis Altar: surveys are under way and will be completed in 2008. 2. Font of Callisto: starting from 2009.
Financial resources	<ol style="list-style-type: none"> 1. Ratchis Altar. Funds allocated in 2007 by BAPPSAE: € 20,000.00 Funds earmarked by Region Friuli Venezia Giulia: € 50,000.00 Funds earmarked for 2008 by BAPPSAE: € 20,000.00 2. Font of Callisto. Funds to be raised by: State (Ministry for Cultural Heritage and Activities); Region Friuli Venezia Giulia; private and bank sponsorship
Expected results	Obtaining the most complete picture possible of thematic precision surveys and paper and digital renderings; Arranging the material for dissemination and didactic tools of the Christian Museum.

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 4	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE RATCHIS ALTAR, THE FONT OF CALLISTO AND THE DUOMO
Project 4.3	Completion of the survey cognitive phase on the surfaces of the Duomo and relative intervention
Description	The Cathedral of Santa Maria Assunta is currently subject to a maintenance intervention concerning internal surfaces; studies on plaster and fresco stratification are also under way. They are financed by the Ministry for Cultural Heritage. These studies will be completed so that the reference layer for the spread of new plaster will be identified.
Actions	<ol style="list-style-type: none"> 1. Completion of cognitive surveys. 2. Completion of studies on existing stratification. 3. Choice of reference layer and intervention on surfaces.
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; Parish of Santa Maria Assunta
Phases and timeframe	Within 2008-2009.
Financial resources	Funds earmarked by the Ministry for Cultural Heritage and Activities which will be allocated within 2007: €. 600,000.00
Expected results	Improvement of layout of the interior of the Duomo.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 5	CONSERVATION OF THE PATRIARCHAL PALACE
Project 5.1	Carrying out of thematic surveys of wall stratification and deterioration and relative project and conservation intervention in the archaeological area A
Description	<p>The project envisages surveys of the state of conservation of wall stratification, plaster and mortar in the archaeological area A aimed both at improving knowledge on building phases of the complex of the Patriarchal Palace (see Knowledge Plan, Project 1.1) and the planning of the conservation project and the verification of the state of conservation of the mosaic floor.</p>  <p>Plan of the Patriarchal Palace. Identification of archaeological areas</p>    <p>1-2. Detail of the late roman and medieval walls under the Archaeological Museum</p>
Actions	<ol style="list-style-type: none"> 1. Carrying out of surveys of wall stratification. 2. Carrying out of surveys of the deterioration of various materials; 3. Verification of the state of conservation of the mosaic floor.
Parties involved	Superintendence for Archaeological Heritage of Friuli Venezia Giulia.
Phases and timeframe	Within 2009.
Financial resources	Funds to be raised by: BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; private and bank sponsorship.

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

Expected results	Removal of deterioration causes and improvement of the intelligibility of various archaeological remains, both walls and flooring levels.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site	
Objective 5	CONSERVATION OF THE PATRIARCHAL PALACE
Project 5.2	Intervention for the restoration of protection architectural structures of the archaeological area B and maintenance intervention on ancient structures n
Description	<p>Efficiency of the structure for the protection of archaeological area B must be verified to eliminate the causes of water seepage. Later it is necessary to intervene to restore the small sections of archaeological wall ruins which are partially damaged owing to seepage.</p> <p>1 </p> <p>2 </p> <p>1-2. Archaeological areas under the Archaeological Museum with some humidity damage</p>
Actions	<ol style="list-style-type: none"> 1. Survey of the state of conservation of the covering and relative maintenance intervention 2. Verification of water seepage on the walls. 3. Maintenance intervention of the wall sections damaged by seepage
Parties involved	Superintendence for Archaeological Heritage of Friuli Venezia Giulia.
Phases and timeframe	Within 2010
Financial resources	Funds to be raised by: State (Ministry for Cultural Heritage and Activities); private and bank sponsorship
Expected results	Removal of the causes of deterioration and improvement of visible conditions.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 6	ENHANCEMENT OF THE STATE OF CONSERVATION OF WALLS
Project 6.1	Maintenance projects and intervention on visible parts of the first circle of walls to improve knowledge and use of the walls
Description	These are interventions aimed at improving the state of conservation of the first circle of walls and at the same time improving its use; interventions comprising both maintenance of sections already brought to light or visible and the excavation of some significant areas to improve knowledge and use of this wall circle (see Knowledge Plan, Project 2.3).
Actions	<ol style="list-style-type: none"> 1. Interventions to bring to light ruins of the first circle of walls through

	<p>excavation and relative project and conservation intervention (Blockhouse area 2).</p> <ol style="list-style-type: none"> 2. Project and maintenance intervention near the archaeological ruins in the area of the Craigher Canussio Palace (3) 3. Project and maintenance intervention near the North-Eastern area (1) and in the area of via Mulinus (5-6)  <p>Plan of Cividale with indication of intervention areas</p>    <p>1. Area North East 2. Area Fortino 3. Area Craigher Canussio</p>
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) and Superintendence for Archaeological Heritage of Friuli Venezia Giulia, Municipality of Cividale, Foundation Craigher Canussio, private citizens or bodies.
Phases and timeframe	<ol style="list-style-type: none"> 1. 2009 2. 2009-2010 3. 2009-2010
Financial resources	Funds to be raised with the Regional Law 10/2000: "Interventions for the protection, conservation and enhancement of fortified architecture in Friuli Venezia Giulia".
Expected results	Increase of the sections of the urban walls which can be visible in the archaeological remains or used as knowledge data.
Result indicators	Increase in the extension of renovated wall sections

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 6	ENHANCEMENT OF THE STATE OF CONSERVATION OF WALLS
Project 6.2	Restoration and planned maintenance projects and interventions on quarters' walls
Description	<p>The knowledge phase preliminary to restoration interventions must be launched to identify both the area characterized by a larger number of conservation problems and those needing simple maintenance. The survey phase also aims at improving knowledge on walls and to produce information boards on the history of the fortified walls (see Knowledge Plan, Project 1.4 and Enhancement Plan, Project 6.2). The restoration of the section of Borgo di Ponte (San Lazzaro) is now being planned.</p>  <p>Proposal for the organization of interventions on the wall to be verified during planning phase</p>   <p>Detail of the state of conservations of the walls</p>
Actions	1. Verification of walls' properties.

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	<ol style="list-style-type: none"> 2. Verification of the geometric survey of walls, its implementation and graphic rendering of visible sectors. 3. Ortophotographic or photogrammetric surveys. 4. Stratigraphic analysis of masonry and deterioration survey. 5. Identification of intervention priorities (maintenance programme) and launch of restoration projects for single sectors according to conservation conditions. 6. Launch of restoration-maintenance interventions
Parties involved	Municipality of Cividale; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; private citizens or bodies.
Phases and timeframe	Starting from 2008 with the general planning of interventions.
Financial resources	Funds to be raised with the Regional Law 10/2000: "Interventions for the protection, conservation and enhancement of fortified architecture in Friuli Venezia Giulia".
Expected results	Improvement of conservation conditions of walls; improvement of their visibility.

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 7	COMPLETION OF CONSERVATION PROJECTS OF THE CHURCHES
Project 7.1	Completion of the restoration of the Church of San Giovanni in Xenodochio
Description	<p>Ongoing restoration intervention in the Church of San Giovanni in Xenodochio must be completed. The intervention focused on structural consolidation. The completion of restoration operations in the interior (false ceiling, vault and plaster surfaces) and paintings on the ceiling by Palma the Young (which flaked off during the emergency intervention in 1998-2000).</p> <div style="text-align: center;">  <p>San Giovanni in Xenodochio Church</p> </div>
Actions	1. Completion of restoration of interior and façades
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia; Parish of Santa Maria Assunta
Phases and timeframe	Within 2009
Financial resources	<p>Funds earmarked by Banca Popolare di Cividale for paintings restoration: €. 50,000.00</p> <p>Funds to be raised in compliance with the law of the Region Friuli Venezia Giulia, R.L. no. 53/85.</p> <p>Funds to be raised by BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia</p>
Expected results	Improvement of conservation conditions and use of the church and exhibited works of art.
Result indicators	Mitigation of the vulnerability of the property

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 7	COMPLETION OF CONSERVATION PROJECTS OF THE CHURCHES
Project 7.2	Restoration intervention of the Church of S. Silvestro
Description	<p>The general planning of the restoration of the church is under way. The church is in a rather poor state of conservation both in the main hall and in the sacristy.</p> <div style="text-align: center;">  <p>S.Silvestro Church</p> </div>
Actions	<ol style="list-style-type: none"> 1. Completion of the restoration project of the church 2. Carrying out of the intervention
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia. Parish of Santa Maria Assunta
Phases and timeframe	Completion of planning within 2008. Beginning of interventions within 2008.
Financial resources	Funds allocated by Region Friuli Venezia Giulia (R.L. 53/85), with a 20-year-long contribution € 19,000.00.
Expected results	Improvement of the conservation conditions and use of the church and exhibited works of art.
Result indicators	Mitigation of the vulnerability of the property.

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 7	COMPLETION OF CONSERVATION PROJECTS OF THE CHURCHES
Project 7.3	Maintenance of external surfaces of the Church of Santa Maria di Corte and church square.
Description	<p>The project envisages the maintenance of plasters on the church façade which are characterized by deterioration (flaking off, gaps and disintegration). Cognitive tests will be completed both on internal and external surfaces. As to the interior, the Organ – now kept in the Duomo of Santa Maria Assunta – will be moved.</p> <div style="text-align: center;">  <p>Santa Maria di Corte Church</p> </div>

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

Actions	<ol style="list-style-type: none"> 1. Study of the stratification of external plasters and continuation of survey campaign inside the nave. 2. Project and maintenance intervention of plaster 3. Rearrangement of church square
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia. Parish of Santa Maria Assunta
Phases and timeframe	Starting from 2009-2010.
Financial resources	Funds to be raised in compliance with the law of the Region Friuli Venezia Giulia, R.L. no.53/85.
Expected results	Improvement of conservation conditions and use of the church and exhibited works of art.
Result indicators	Mitigation of the vulnerability of the property.

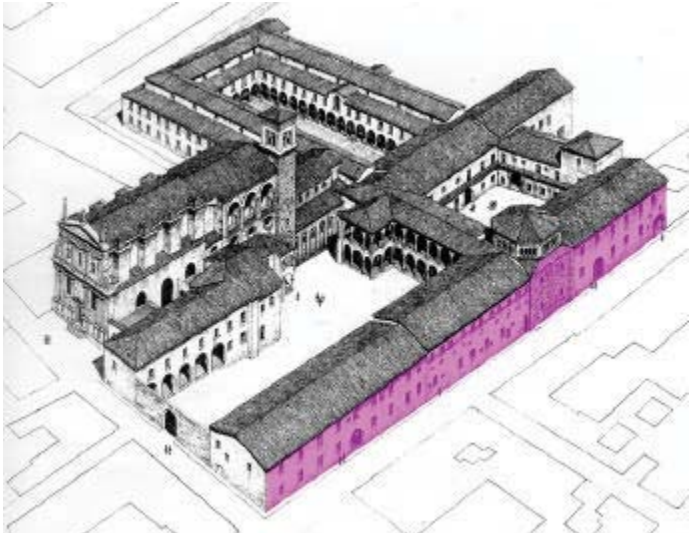

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 7	COMPLETION OF CONSERVATION PROJECTS OF THE CHURCHES
Project 7.4	Maintenance of plaster on the façade and apse of the Church of San Martino and restoration project and intervention on the sacristy
Description	<p>The façade must be repainted or reintegrated and the plasters of the apses must be subject to intervention to improve layout. As for the interior, interventions concern only the area where plaster is eroded by seepage after the causes of seepage have been found out. The complex of the sacristy requires a maintenance intervention and structural verification.</p> <div style="text-align: center;">  <p>San Martino Church</p> </div>
Actions	<ol style="list-style-type: none"> 1. Verification of covering resistance 2. Maintenance intervention on façade and apse plasters and on deteriorated areas in the interior. 3. Maintenance project for the sacristy and intervention.
Parties involved	BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of Friuli Venezia Giulia. Parish of Santa Maria Assunta
Phases and timeframe	<ol style="list-style-type: none"> 1. 2. within 2009 3. starting from 2010.
Financial resources	Funds to be raised in compliance with the law of the Region Friuli Venezia Giulia, R.L. no.53/85.
Expected results	Improvement of layout of the façade.
Result indicators	Mitigation of the vulnerability of the property.

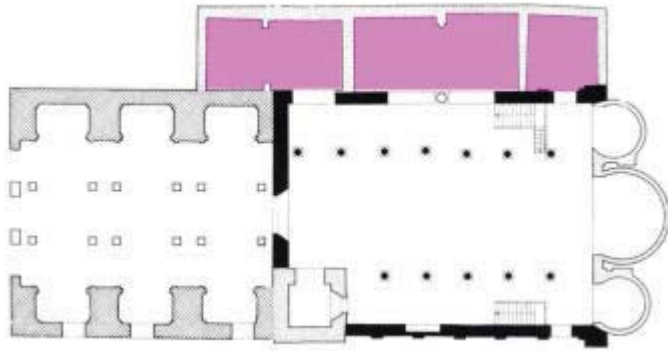

PROTECTION AND CONSERVATION PLAN Cividale del Friuli site and buffer zone	
Objective 8	PROTECTION AND CONSERVATION OF CONVENTS AND HISTORICAL PALACES
Project 8.1	Completion of the restoration of the complex comprising the church and the former convent of San Francesco
Description	<p>The church and the structure of the convent of San Francesco – property of the Parish Santa Maria Assunta in Cividale – were built in the 13th century and stand in a place rising vertically on the gorge of the river Natisone, where the popular tradition uses to indicate the presence of the “Castello dei Duchi” (Castle of the Dukes). During the centuries, and especially after the Napoleonic era, the complex (built on 3 levels) was used in a variety of ways, even if it kept its cult functions. In the inside the church and the convent preserve pictorial and stucco decorations of high artistic esteem, which witness – especially in the Sagrestia nobile – the high level and the prestige of the Franciscan community.</p> <p>The San Francesco complex – which is part of the buffer zone - has never been extensively researched from an archaeological point of view, but it has suffered damages in the earthquake of 1976. The restoration works have been carried on slowly because of the progressive availability of funds. The structure is destined to keep its religious functions, but its use also as a place for meetings, congresses, seminars and exhibitions is now consolidated.</p> <p>The main hall can host approximately 400 seats; the upper hall 120, the Arches hall 60.</p>
Actions	<ol style="list-style-type: none"> 1. End of the restoration works 2. Arrangement of the external gardens 3. Restoration of furniture in the sacristies 4. Renewal of the internal furniture 5. Renewal of internal and external lighting systems 6. Adjustment of the lower floor for youth activities 7. wiring of the structure 8. Restoration of the church roof
Parties involved	Parish Santa Maria Assunta
Phases and timeframe	2009 -2012
Financial resources	€ 600,000.00 from the State € 60,000.00 from the Udine Province
Expected results	Availability of a multi-purpose structure as a congress centre and exhibitions centre of high prestige and with a high capacity Availability of the lower floor for youth activities
Result indicators	fitness for habitation of the complex Number of hosted events

PROTECTION AND CONSERVATION PLAN Cividale del Friuli buffer zone and territory	
Objective 9	IMPROVEMENT OF NATURAL AND SEISMIC RISKS PREVENTION
Project 9.1	Completion of protection interventions on Natisone River
Description	<p>The Municipality intends to preserve and protect the environmental value of Natisone River through timely consolidation interventions on banks and in general through natural engineering interventions. The following operations have already been accomplished:</p> <ul style="list-style-type: none"> a) Renovation intervention and completion of dams on Natisone River; b) Interventions aimed at the stabilization of hydrogeological conditions along Natisone River in the Municipalities of Manzano and Cividale del Friuli; c) Prevention operations for geostatic instability in the gorge of Natisone River; d) Urgent Civil Protection interventions along the right bank of Natisone River near the Convent of San Francesco to protect a dam and implementation of safety measures in surroundings areas; e) Urgent Civil Protection intervention for public safety to prevent erosion on the right bank of Natisone River on the municipal territory of Cividale del Friuli. <div style="text-align: center;">   <p>Consolidation works of the rock walls of the Natison gorge</p> </div>
Actions	<ol style="list-style-type: none"> 1. Completion of interventions on the gorge of Natisone River. 2. Consolidation of the left bank of Natisone River below the Devil's Bridge.
Parties involved	Municipality of Cividale
Phases and timeframe	<ul style="list-style-type: none"> -intervention/ completion operations on the gorge of Natisone River, Beginning 2007 end 2008 - Consolidation of the left bank of Natisone River below the Devil's Bridge,

8.2 PROTECTION AND CONSERVATION PLAN
 DETAILED SCHEDULES

	Beginning 2008 end 2009
Financial resources	<p>The costs relative to interventions which have already been completed on the gorge of Natisone River have been borne by the Region Friuli Venezia Giulia and the Civil Protection and amounted to around 1,600,000 Euros.</p> <p>The costs for the interventions to be carried out on the gorge of Natisone River will be borne by the Region Friuli Venezia Giulia and the Civil Protection and will amount to around 1,400,000 Euros.</p>
Expected results	Protecting the valuable aspects of Natisone River while guaranteeing safety.

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 10	MAINTENANCE ON MASONRY AND SURFACES IN THE SAN SALVATORE – SANTA GIULIA MONASTERY COMPLEX
Project 10.1	Maintenance measures for plastered walls and masonry pertaining to the southern side of the Monastery and Santa Maria in Solario
Description	<p>The property involved in the intervention refers to the entire south front of the monastery and also includes the south side of the Romanesque Santa Maria in Solario.</p> <p>80% of the surface of the side is covered by lime plaster that was realized at the beginning of the 1980's, while the profile masonry on the remaining 20% is visible along with a few pieces of plaster painted during Late Middle Ages phase of the monastery. Due to the atmospheric pollution but primarily to traffic pollution, the modern plaster is in a state of deterioration: the plaster has lost its characteristic compactness and in several points is severely flawed and pulverulent. Even the large stone blocks in Santa Maria in Solario show signs of severe deterioration on the surface, with chipping and cracking. The lower part of the stone wall, moreover, shows evidence of black crusts, caused by vehicular traffic in the vicinity.</p> <p>The intervention to be carried out calls for an initial diagnostic phase in order to correctly understand the factors that contributed to the deterioration, followed by a second phase to identify the proper methods to be used in order to preserve the Late Middle Ages masonry. During this phase a portion of the masonry with modern plaster will be removed in order to verify the conditions of the original masonry and to evaluate whether or not all of said plaster should be removed with the consequent restoration of the underlying masonry or whether it should be kept in place after the surfaces have been cleaned and consolidated.</p> 
Actions	<ol style="list-style-type: none"> 1. Diagnostic awareness surveys 2. Trials for removing modern lime plaster to be carried out on a portion of the wall, to be agreed upon 3. Consolidation tests on the original mortar settings 4. Cleaning test on the materials that constitute the ancient masonry 5. Plans for interventions; - Start-up of works
Parties involved	City of Brescia; Brescia Museum Foundation Superintendent for Environmental and Architectural Assets
Phases and timeframe	- executive plan 2008 - works carried out 2009
Financial resources	Funds to be identified
Expected results	Improvement of the conservation conditions and the aesthetic aspects of the building
Result indicators	Conservation intervention on an area of at least 500 square meters; 10 analysis samples

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 10	MAINTENANCE ON MASONRY AND SURFACES IN THE SAN SALVATORE – SANTA GIULIA MONASTERY COMPLEX
Project 10.2	Conservation measures on the plaster and masonry pertaining to the side chapels In San Salvatore
Description	<p>Three religious chapels were realized between the 13th and 14th centuries on the north side of San Salvatore.</p> <p>At the present time these are used for exhibition purposes and show Earlyly noteworthy fresco decorations on the walls. The 13th century central chapel still shows parts of white plaster that cover the more ancient decorations. The 13th century visible decorations show separations from the supporting plaster from the pictorial film on the underlying wall. The east and west chapels instead, notwithstanding the fact that they underwent restoration measures in the 1950's, are in mediocre condition. The material utilized for the previous restoration is altered and no longer functional.</p> <p>The intervention to be carried out consists in completing the removal of the layers that cover the fresco decorations, in cleaning and consolidating the painted plaster and in the removal, where possible, of the materials applied in previous restorations and which are no longer functional, in addition to the reconstruction using appropriate products.</p> 
Actions	<ol style="list-style-type: none"> 1. diagnostic surveys on ancient materials (setting mortar, plaster mortar, materials constituting the masonry, pictorial pigments) in order to acquire data on ancient techniques as well as on the deterioration factors 2. plans 3. -works carried out
Parties involved	City of Brescia Brescia Museum Foundation Superintendent of Monument and Environmental Assets
Phases and timeframe	- executive plan 2009 - works carried out 2010
Financial resources	Funds to be identified
Expected results	Improvement of the conservation conditions and the aesthetic aspects of the building in general
Result indicators	15 diagnostic surveys; conservation measures on at least 50 square meters of surface

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 10	MAINTENANCE ON MASONRY AND SURFACES IN THE SAN SALVATORE – SANTA GIULIA MONASTERY COMPLEX
Project 10.3	Conservation measures on the archeological structures below the San Salvatore flooring (Roman domus, the first church and Early middle ages tombs)
Description	<p>The intervention pertains to the archeological structures dating back to Roman/Early Middle Ages periods located beneath the modern flooring of the Church of San Salvatore. The structures pertain to a portion of the Roman domus, to the remains of pavement in stone slabs and mortar relating to the first church and to three cappuccina tombs, the insides of which show a painted woven decoration.</p> <p>The intervention calls for an initial diagnostic phase to identify the materials and ancient techniques utilized and to identify any particular deterioration factors.</p> <p>Once the diagnostic and survey details that pertain to the deterioration factors of the materials</p>

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	<p>are known, cleaning, consolidation, stuccoing and integration of same can be carried out</p> 
<p>Actions</p>	<ol style="list-style-type: none"> 1. Diagnostic awareness surveys 2. Consolidation tests on the original mortar settings 3. Sample cleaning tests on materials constituting the ancient masonry 4. Intervention plans 5. Start-up of works
<p>Parties involved</p>	<p>City of Brescia Brescia Museum Foundation Superintendent for Environmental and Architectural Assets</p>
<p>Phases and timeframe</p>	<p>- executive plan 2009 - works carried out 2010</p>
<p>Financial resources</p>	<p>Funds to be identified</p>
<p>Expected results</p>	<p>Improvement of the conservation conditions and of the aesthetic aspect of the archeological area</p>
<p>Result indicators</p>	<p>15 diagnostic surveys; conservation measures on at least 30 square meters of surfaces and masonry</p>

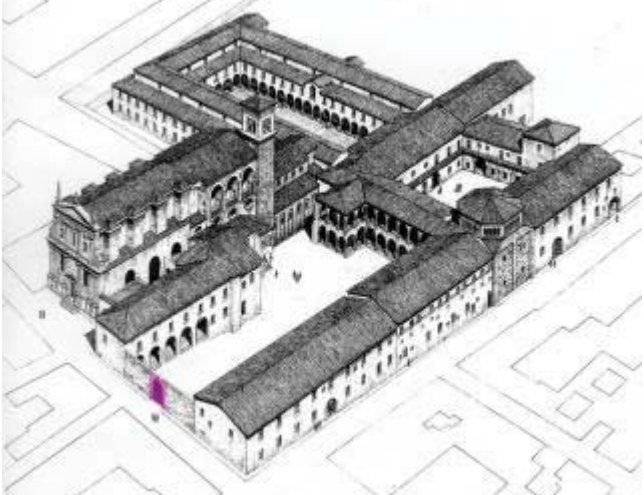

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 10	MAINTENANCE ON MASONRY AND SURFACES IN THE SAN SALVATORE – SANTA GIULIA MONASTERY COMPLEX
Project 10.4	Conservation measures on the archaeological structures below the nuns' parlor
Description	<p>The intervention refers to a series of rooms located beneath the monastery building known as the nuns' parlor. The four rooms are pertinent to the Roman domus excavated below the monastery structures, with the presence of mosaic flooring, fresco painted plaster and various masonry. Moreover, the phases of abandonment of the Roman building and of its reutilization in Late Ancient / Early Middle Ages times are conserved and visible (pole holes for huts, hearths). Until now the rooms brought to light between 1986 and 1988 have not been subjected to any type of restoration measures. The conditions are mediocre: the surfaces show compact deposits and crusts that alter and hide the painted and mosaic work surfaces. The intervention calls for localized consolidation and cleaning of all the ancient surfaces found in the area</p> 
Actions	<ol style="list-style-type: none"> 1. Diagnostic awareness surveys 2. Consolidation tests on painted plaster, on the original mortar settings and on parts of the mosaic that have been detached from the nucleus setting 3. Sample cleaning tests on painted surfaces 4. Intervention plans 5. Start-up of works
Parties involved	<p>City of Brescia Brescia Museum Foundation Superintendent for Environmental and Architectural Assets</p>
Phases and timeframe	<ul style="list-style-type: none"> • executive plan 2008 • -works carried out 2008
Financial resources	Cost of the works € 50.000,00, of which € 25.000,00 allocated by the City of Brescia and € 25.000,00 by the Lombardy Region.
Expected results	Improvement of the conservation conditions and aesthetic aspect of the archeological area
Result indicators	10 diagnostic surveys; conservation measures on at least 70 square meters of surfaces and masonry

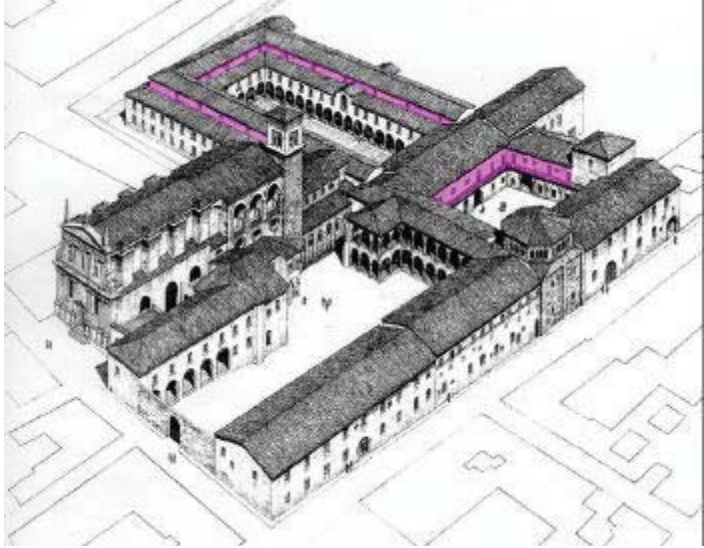

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 10	MAINTENANCE ON MASONRY AND SURFACES IN THE SAN SALVATORE – SANTA GIULIA MONASTERY COMPLEX
Project 10.5	Conservation measures on structures of archaeological interest located in the entrance area to San Salvatore - Santa Giulia City museum
Description	<p>The intervention refers to various rooms located in the entrance area of the Santa Giulia Museum and pertinent to two Roman domus and to the remains of a roadway (cardo). The rooms in the two domus contain the following, all well preserved: polychrome mosaics, pavement slabs, bricked pavements, wall elevations with pieces of painted plaster still in place. The cardo instead includes part of the paving stones that constituted the roadway. During the excavation phases a portion of the Early Middle Ages street that was constructed on the ruins of a Roman street was also conserved. The excavation of the structures was completed in 1998 and the structures are in mediocre condition: a considerable part of the wall elevations and of the various types of floorings shows signs of separation from the mortar settings with the consequent detachment of the original material. The intervention will consist in various types of consolidation, based on the various ancient structures found in the area, and in the specialized cleaning, carried out by hand, with chemical products or with precision instruments (micro-drill, etc.).</p> 
Actions	<ol style="list-style-type: none"> 1. Diagnostic awareness surveys 2. Consolidation tests on the mortar settings in the masonry, on the plaster and on the various types of flooring materials 3. Intervention plans 4. -Start-up of works
Parties involved	City of Brescia Brescia Museum Foundation Superintendent for Environmental and Architectural Assets
Phases and timeframe	<ul style="list-style-type: none"> • executive plan 2008 • works carried out 2008
Financial resources	Cost of the intervention € 122.000,00 of which € 70.000,00 allocated by the City of Brescia and € 52.000,00 by the Lombardy Region.
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	15 diagnostic surveys; conservation measures on at least 50 square meters of surfaces and masonry

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 11	INTERVENTIONS ON MOBILE FINDINGS PERTAINING TO THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.1	Cleaning, consolidation, identifying couplings and any assemblage onto panels of significant portions of painted plaster relating to the Early Middle Ages phase of the Church of San Salvatore
Description	The intervention concerns the numerous Early Middle Ages fresco fragments found in the archeological surveys and in the filling of the extrados of the 16 th century vault in the 1950's in order to bring to light the on-site frescoes from the Early Middle Ages period. The intervention will start off with the search for attachment points of the numerous fragments, followed by a subsequent phase, should it be necessary to recompose significant portions of the decorations, of assembling same on the appropriate panels. The recomposed panels could then subsequently be exhibited in the Church of San Salvatore.
Actions	<ol style="list-style-type: none"> 1. Diagnostic awareness surveys to catalog the plaster mortar required to distinguish the various ages of the plaster fragments (Roman, Early Middle Ages and Late Middle Ages) 2. Search for attachment points 3. Re-assembly of re-composed fragments on alveolar panels
Parties involved	City of Brescia; Superintendent for Environmental and Architectural Assets
Phases and timeframe	<ul style="list-style-type: none"> • search for attachment points 2008 • conducting work of re-assembling fragments and exposition 2009
Financial resources	Funds to be identified
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	Study of at least 200 painted plaster fragments; at least 15 diagnostic surveys

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 11	INTERVENTIONS ON MOBILE FINDINGS PERTAINING TO THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.2	Completion of the cleaning and consolidation, identification of the original arrangement and any on site relocation of stucco fragments pertaining to the architectural decoration of the Church of San Salvatore
Description	The intervention concerns the numerous stucco fragments found during the archeological surveys and in filling the extrados of the 16 th century vault, demolished in the 1950's. The stuccos pertain to the arched lintels and to the under-arches of the three naves in the 8 th century church. The partially completed intervention (with the identification of the original position of certain fragments and their subsequent replacement in situ) will continue with an initial search for the position of the numerous fragments not covered by the previous intervention and a subsequent phase for the replacement in their original position of said fragments. Some of the recomposed fragments (of which the original position was not identified) that are pertinent to the decoration of the church could be assembled on a panel and subsequently exhibited inside the Church of San Salvatore.
Actions	<ol style="list-style-type: none"> 1. cleaning and consolidation of the fragments not involved in the previous intervention 2. search for and identification of the on site couplings 3. re-assembly of the matching fragments for which their original location was not found, on alveolar panels
Parties involved	City of Brescia; Superintendent for Environmental and Architectural Assets
Phases and timeframe	<ul style="list-style-type: none"> • search for attachment points 2008 • conducting work of re-assembling fragments and exposition 2009
Financial resources	Funds to be identified
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	Study of at least 200 fragments; re-composition of at least two panels

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 12	IMPROVEMENT OF THE PROTECTION STRUCTURES
Project 12.1	Substitution of the access door to the San Salvatore cloister
Description	<p>Extraordinary maintenance for safety purposes with the substitution of the entrance door in Via Piamarta</p> 
Actions	<ol style="list-style-type: none"> 1. Structural verification of the outside wall (including any interventions calling for repairs, static consolidation and conservative restoration) 2. Plan for the realization of an automatic iron gate to show the view of the south cloister 3. Intervention with the placement of the gate and electrical connections
Parties involved	<p>City of Brescia Brescia Museum Foundation</p>
Phases and timeframe	<p>Plan executed Realization: by June 2008</p>
Financial resources	<p>Total cost: approximately 30.000 € Funds allocated by the City of Brescia</p>
Expected results	<p>Possibility of seeing the San Salvatore cloister, the nuns' choir, the Longobard Church of San Salvatore and the base of the cupola of Santa Maria in Solario from the external street.</p>
Result indicators	<p>Acquisition of a new view of the San Salvatore - Santa Giulia complex</p>

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 12	IMPROVEMENT OF THE PROTECTION STRUCTURES
Project 12.2	Substitution of the windows' wood frames on the first floor of the monastery complex
Description	<p>Extraordinary maintenance entailing the substitution of the wood frames in the central galleries in the area identified for temporary showings in order to solve the problem of water leakages in the open areas.</p> 
Actions	1. Intervention
Parties involved	City of Brescia Brescia Museum Foundation
Phases and timeframe	By January 2008
Financial resources	Total cost: € 28.800,00 Funds allocated by the City of Brescia
Expected results	Improvement of the aesthetic aspect of the building; lowering the thermal loss and elimination of leaks
Result indicators	Substitution of 20 window's frames

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 13	RECLAMATION OF THE ARCHEOLOGICAL AREA OF THE CAPITOLIUM
Project 13.1	Conservation and maintenance interventions on various structures pertaining to the Republican sanctuary
Description	<p>Identified as far back as the early 1800's, it was excavated several times up to the last surveys carried out in 2006. The building dates back to the 1st century BC and is composed of four parallel rooms separated by hollow spaces, one of the richest and unique examples in northern Italy.</p> 
Actions	<ol style="list-style-type: none"> 1. Archeological surveys in the area south of the podium in the western cell to verify the presence of ulterior structures pertinent to the sanctuary and to envisage a new access to the area 2. Completion of the conservation measures currently underway on the pavements (mosaic works and opus signinum) and on the frescoes in the western cell 3. Conservation maintenance on the remains of the ulterior three cells located below the podium, from the Flavia era 4. Monitoring of the micro-climate conditions, through the use of sophisticated equipment Complete with environmental peripheral sensors in contact with the painted surfaces that register and send data to a central computerized unit 5. Study of the data taken from the station and the plans for a micro-climate system
Parties involved	City of Bresciam; Superintendent for Lombardy Archeological Assets Cariplo Foundation
Phases and timeframe	<p>1st lot financed by the Cariplo Foundation nearly completed, with which the following was realized: structural intervention on Palazzo Pallaveri in order to complete the excavation of the western cell, the completion of the excavations and the restoration of the frescoes and the ancient flooring</p> <p>2nd lot financed by the Cariplo Foundation realized the initial project and the definitive project is nearly completed for the surveys south of the western cell, for the realization of a new access, for the monitoring of the areas by means of instruments to track and record the micro-climate and for the realization of a micro-climate system definitive project 2008 works carried out 2008/2009</p> <p>3rd lot conservation maintenance on the structures pertinent to the sanctuary located below the podium, from the Flavia project 2009 - works carried out 2009/2010 amount: funds still to be identified</p>
Financial resources	Cost currently financed € 415.000 (Cariplo Foundation – City of Brescia)
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	150 square meters of surfaces (object of the intervention)

PROTECTION AND CONSERVATION PLAN Brescia site	
Objective 13	RECLAMATION OF THE ARCHEOLOGICAL AREA OF THE CAPITOLIUM
Project 13.2	Conservation and maintenance interventions on various structures pertaining to the Capitolium
Description	<p>Identified and brought to light in 1822, this is the principal temple of the Roman city of the 1st century, to a goodly extent conserved in elevation. It is composed of three large worship rooms, originally dedicated to Jove, Juno and Minerva, preceded by a deep pronaos built on a High open terrace on the forum's piazza. A good part of the marble decorations (floors and walls) is still conserved in situ. In 1830, the first city museum was created inside, the Museo Patrio, later known as the Museo Romano.</p> 
Actions	<ol style="list-style-type: none"> 1. consolidation of the 18th century vault in the central cell, recently completed 2. consolidation of structural wood in the 18th century roofing of the three cells recently completed 3. maintenance intervention on the roofs of the three cells recently completed 4. conservation intervention on the flooring in opus sectile and on the structures from the Flavia era (podiums) 5. conservation intervention on the 18th century inside walls of the three cells 6. conservation intervention on the external structures from the Flavia era (pronaos, columns, tympanum, side porticos) 7. realization of closing structures for the doors of the three cells
Parties involved	City of Brescia; Lombardy Archeology Superintendent; Ministry of Fine Arts
Phases and timeframe	<p>1st lot financed by the City of Brescia and terminated in December 2007, with which the following was realized: consolidation 18th century vault, structural wood of the roofing, roofing</p> <p>2nd lot to be financed for conservation interventions on the flooring in opus sectile, on the 18th century walls, realization of closing structures for the large access portals to the three cells. Conservation intervention on all the external structures pertinent to the Capitolium (columns, capitals, tympanum, elevations, pronaos, side porticos)</p> <p>definitive project 2008 works carried out 2009/2011</p>
Financial resources	Total cost € 1.300.000, of which € 300.000 borne by the City of Brescia and the remaining amount to be identified
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	500 square meters of surface, approximately 50 architectural elements subject to intervention; at least 30 diagnostic surveys

PROTECTION AND CONSERVATION PLAN Brescia buffer zone	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.1	Conservation interventions on the structures and surfaces of Palazzo della Loggia, seat of the City Hall
Description	<p>These measures are needed in order to guarantee the proper conservation of the monument, through a series of steps that include the redoing or the adjustment of the functional elements to make them efficient, in addition to a whole series of operations aimed at blocking the deterioration and to enhancing the unchanged conservation over time of the external surfaces, both with respect to plaster as well as with respect to stone, with special emphasis on the decorations, through consolidation, cleaning and restoration measures.</p> 
Actions	<ol style="list-style-type: none"> 1. Restoration and cleaning of the east and north prospects and the entrance portico 2. Restoration and cleaning of the entrance portico 3. Conservative measures on the north Palazzotto, new roofing, new frames (window and door), new plaster, updating of technological systems 4. Restoration and cleaning of the stone decorations on the eastern and southern sides of the north Palazzotto 5. Internal restructuring works in the areas used as offices on the first and second floors and in the bathrooms 6. Consolidation of the foundations, on the western and southern sides 7. Realization of scaffolding below the ceiling in order to monitor the roof support structure, initially, followed by subsequent consolidation works.
Parties involved	<p>City of Brescia University of Brescia – Faculty of Engineering Superintendent for Monumental and Architectural Assets Brescia Mobility Private sponsors</p>
Phases and timeframe	Works completed by 2008
Financial resources	Approximately one million Euro; City of Brescia and private sponsors
Expected results	Static and aesthetic restoration of the building
Result indicators	One conference presenting the interventions; one publication of the results of the works

PROTECTION AND CONSERVATION PLAN Brescia buffer zone	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.2	Conservation interventions on the roofing of Palazzo Bonoris, seat of the Ateneo di Scienze, Lettere ed Arti of Brescia
Description	These measures are necessary in order to guarantee the correct conservation of the monument: in fact water leakages caused damages to the decorated ceilings (the decorations dated back to the 16 th century). The intervention calls for a series of operations aimed at blocking the deterioration in the roofing (work on the historical wood beams, caulking, waterproofing, substitution of the broken brickwork) and consequently to safeguarding the underlying historical painted surfaces. The intervention is also linked to the realization of the Ateneo of Brescia's library.
Actions	<ol style="list-style-type: none"> 1. realization of scaffolding and uncovering certain areas of the roofing 2. consolidation and chemical treatments on the wood pertinent to the supporting beams and to those that constitute the lower levels 3. caulking, waterproofing and repositioning the roof tiles 4. maintenance and restoration work on the parts of the painted plaster that were damaged by leakage
Parties involved	City of Brescia
Phases and timeframe	Works completed by 2008
Financial resources	€ 500.000,00
Expected results	Guarantee of appropriate space at the Ateneo with relative library
Result indicators	2,000 square meters covered by the conservation intervention

PROTECTION AND CONSERVATION PLAN Brescia buffer zone	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.3	Conservation interventions on the roofing and Early middle ages painted plaster in Palazzo Broletto
Description	<p>In 2004 the Province and the City, owners of the property, entered into an understanding, aimed at equalizing the measures promoted by the two Administrations, especially with respect to the restoration of the building facades.</p> <p>With respect to activities promoted by the City of Brescia through the Building & Monument Service, starting from 2003 a series of measures were implemented to restore certain portions of the building.</p> <p>Certain works have already been concluded, others are underway, while still other projects are in the development phase and included in the three-year 2007-2009 program for public works. In general, these refer to measures required to guarantee the proper conservation of the monument, through a series of steps aimed at blocking the deterioration and to enhancing the unchanged conservation over time.</p>
	
Actions	<p>For various reasons (economic but also operating), the conservation maintenance will need to be divided in at least two subsequent phases:</p> <ol style="list-style-type: none"> 1. the first, subject to the present intervention, will naturally cover all those operations that can be carried out with the structure open to the sky and that can no longer be

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	<p>postponed, especially the static consolidations;</p> <p>2. all the works pertaining to the intrados, especially those relative to the consolidation of the materials and to the restoration of the surfaces, will be covered in the subsequent phase.</p>
Parties involved	City of Brescia
Phases and timeframe	<p>Restoration and cleaning of the facade of Broletto (southern body facing Via Cardinal Querini) - 2007</p> <p>Cleaning and consolidation of the inside facade of the western body of Palazzo Broletto - 2007</p> <ul style="list-style-type: none"> • INTERVENTIONS UNDERWAY <p>Work on certain areas on the ground floor of the western body of Palazzo Broletto to make new offices - 2006/2007</p> <p>Extraordinary maintenance on the roofing of Palazzo Broletto (southern body facing Via Cardinal Querini) - 2007</p> <ul style="list-style-type: none"> • INTERVENTIONS PLANNED <p>- Project for the conservation restoration of the wood roofing structures conducted by the intrados</p> <p>- Project for creating the museum "Salone dei Cavalieri" (below the roof of the southern body) Program 2007/2008</p> <p>Restoration and cleaning of the facade of Broletto (facing Piazza Paolo VI) Program 2008/2009</p>
Financial resources	Total amount € 1.290.000 borne by the City of Brescia and Cariplo Foundation
Expected results	Improvement of the conservation conditions and partial opening to guided tours in the more important parts
Result indicators	4,000 square meters of surface subjected to intervention

PROTECTION AND CONSERVATION PLAN Brescia buffer zone	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.4	Conservation interventions on the roofing of Mastio Visconteo within the Castle of Brescia
Description	<p>Building located in the top part of the Castle of Brescia and constructed in 1343 (Visconti era) above the remains of a Roman temple, of which at the present time the staircase and certain perimeter walls are visible. The City of Brescia acquired the property in 1900 from the Military Property Office. It underwent restoration between 1968/1974 that, once recent plaster had been removed, made it possible to recover a goodly part of the Visconti era wall decorations and those dating back to the 14th century. The building is composed of four floors. One lower ground floor, not open to the public, preserves Roman era structures (large tubs from local stone quarries). The ground floor and the first floor at the present time are dedicated to the Museum of Arms. The second floor is used as storage space for historical material belonging to the museum.</p> <p>These measures on the roofing are necessary in order to guarantee the correct conservation of the monument: in fact water leakages caused damages to the historical material stored in the attic and to the painted decorations dating back to the Late Middle Ages. Moreover, since the roof was not caulked properly it did not offer the proper micro-climate suitable for conserving the above-indicated artifacts.</p> 
Measures	<ol style="list-style-type: none"> 1. Realization of scaffolding and uncovering certain areas of the roofing 2. Caulking, waterproofing and repositioning the roof tiles 3. Maintenance and restoration work on the parts of the painted plaster that were damaged by leakage
Parties involved	City of Brescia
Phases and timeframe	By 2008
Financial resources	Cost of the intervention € 150.000,00 borne by the City of Brescia
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	400 square meters of surface subjected to intervention

PROTECTION AND CONSERVATION PLAN Brescia buffer zone	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.5	Extraordinary conservation interventions in the Tosio Martinengo Palace
Description	<p>This is a conservation measure on some of the decorated ceilings and vaults (1550-1700) These structures located in the Pinacoteca Tosio Martinengo are in mediocre conservation condition, primarily due to the accumulation over time of dust and various types of dirt (heating vapors) that alter the colors of the paintings</p>

	
Actions	<ol style="list-style-type: none"> 1. Scaffolding and controlling adhesion of the plaster to the masonry supports in the various areas involved in the measure 2. Localized in-depth consolidation in order to reattach the plaster to the masonry and to avoid that material becomes detached 3. Cleaning the pictorial film 4. Stuccoing the cracks
Parties involved	City of Brescia
Phases and timeframe	Project 2008 Works carried out 2008
Financial resources	Funds to be identified Estimated cost of the intervention € 60.000,00 allocated by the City of Brescia
Expected results	Improvement of the conservation conditions and of the aesthetic aspects of the building
Result indicators	200 square meters of surface subjected to intervention

PROTECTION AND CONSERVATION PLAN Brescia territory	
Objective 15	CONSERVATION OF THE LONGOBARD CONTEXTS IN THE BRESCIA TERRITORY
Project 15.1	Restoration and definitive cataloguing of findings and funeral artifacts found in the settlements and the recently excavated necropolis in Manerbio, Leno, Montichiari and Sirmione and from ecclesiastical buildings
Description	<p>A small part of the artifacts recovered in the past thirty years from settlements and from the Longobard necropolis in the central-eastern Brescia countryside has been transferred to the Sirmione National Archeological Museum and to the municipal historical/archeological museums that in the meantime have been established, first in Remedello, then in Leno and in Manerbio. The majority, however, can be found, duly inventoried, in the Superintendent of Brescia and Milan warehouses. The artifacts kept in the museums have all been subjected to restoration. Most of the artifacts conserved by the Superintendent need conservation restoration measures and definitive cataloguing.</p> <p>Moreover, conservation measures and improvements on certain of the more significant ecclesiastical structures in the southeastern part of the territory and the relative archeological areas are envisaged.</p> 
Actions	<ol style="list-style-type: none"> 1. Cataloguing of the archeological finds from the territories of Manerbio, Leno, Calvisano, Montichiari, Sirmione and surrounding townships. 2. Conservation measures on the above-indicated artifacts. 3. Restoration of the building and realization of the archeological area in the early Christian church of San Pietro in Mavino in Sirmione and of the Early Middle Ages churches of San Giorgio in Montichiari and Saints Nazaro and Celso in Leno.
Parties involved	Ministry for Fine Arts and Cultural Activities Lombardy Region Province of Brescia Municipalities of Brescia, Manerbio, Leno, Calvisano, Montichiari, Sirmione Regional Department for Fine Arts and Landscape of Lombardy Superintendent for Archeological Heritage of Lombardy CAB Foundation Dominato Leonense Foundation Civiltà Bresciana Foundation
Phases and timeframe	Five-year period 2008-2013
Financial resources	To be quantified and identified
Expected results	Improvement of the conservation conditions of artifacts and structures
Result indicators	Conservation measures on at least 1,000 Longobard artifacts

PROTECTION AND CONSERVATION PLAN Brescia territory	
Objective 16	PREVENTION AND MITIGATION OF THE PRINCIPAL RISKS FOUND IN THE TERRITORY
Project 16.1	PRIM – Regional integrated program for mitigating risks
Description	The new Regional Integrated Program for Mitigating Risks (PRIM) 2007-2010 represents the instrument to coordinate the policies for safety and prevention on a provincial level. Conceived as an evolution of the Regional Program for Forecasting and Prevention pursuant to national law 225/92 on civilian protection, the PRIM is aimed at calling more attention to the aspects of mitigating risks and, principally, at a wider and more global vision of safety, which is the basis of the needs of citizens. The PRIM takes into consideration five “significant risks”, natural and technological, (hydro-geological, seismic, forest fires, meteorological, industrial), two types of accidents due “with significant social impact” (automobile accidents and accidents in the workplace) and the risk represented by social unrest that refers to the context of urban safety. With respect to these risks the PRIM will conduct a scientific reading not just sectorial but also integrated, in order to photograph the real situation and to identify those areas subject to a combination of risks and to propose policies to reduce risks.
Actions	Analysis of the information collected referring to 108 measures to mitigate risks made known by 21 local agencies in the various contexts: <ol style="list-style-type: none"> 1. 56 measures concerning “hydro-geological and flood risks” 2. 3 measures concerning “seismic risks” 3. “x” measures concerning “meteorological risks” 4. 6 measures concerning “risks from forest fires” 5. 6 measures concerning “urban safety risks” 6. 33 measures concerning “automobile accident risks” 7. 2 measures concerning “industrial risks and dangerous transports” 8. 2 measures concerning “risks of accidents in the work place”.
Parties involved	Lombardy Region Also: Province of Brescia, Mountain Communities, Municipalities.
Phases and timeframe	Different for each project included in the program to develop tourism. It is estimated that the project will be completed before the end of 2010.
Financial resources	The total investment amounts to € 71 million. The Lombardy Region has contributed € 35 million and the other subjects € 11 million. The rest will come from national and EU resources.
Expected results	Share the measures to reduce risks with the principal subjects involved in prevention and with consumer associations, in order to provide visibility and unity to the numerous actions. See the risks in an integrated manner and develop area plans for the selected territories, in order to evaluate the joint impact of more than one source of risks in the same area. Evaluate the impact of the risk-prevention measures by means of the application of a scientific method based on indicators for effectiveness. Finance strategic interventions through the opportunities provided by the EU 2007-2010 funds. Create a computerized information pool so that the various agencies involved in the Safety Pact can exchange information.
Result indicators	Fewer real and perceived social risks, sensation motivated by increased safety, control of the potential risk situations by effective preventive monitoring

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN Brescia territory	
Objective 16	PREVENTION AND MITIGATION OF THE PRINCIPAL RISKS FOUND IN THE TERRITORY
Project 16.2	Works to make the road s.s. 45 BIS "Gardesana occidentale" safe
Description	<p>The project relates to ensuring safety along the road from Limone to the border with Trentino and the realization of the natural gallery in the Nanzel area refers to a section of the artery that extends for approximately 3.5 kilometers, subject to periodic episodes of falling rocks, which require fencing and buttressing, in order to guarantee transit along the strategic artery towards the north of this important road.</p> <p>The realization of the natural gallery in the Nanzel area, situated between kilometer 10.200 and kilometer 10.900 of the Gardesana Occidentale, will provide a definitive solution to one of the most critical parts of that artery, due to the frequency of slides and due to the possibility of falling rocks and boulders from the rocky walls above the artery.</p>
Actions	<ol style="list-style-type: none"> 1. Identification of the priority measures and the definition of the general program 2. Commencement of the cycle of measures in temporal succession with the relevant program agreements.
Parties involved	<p>ANAS s.p.a.</p> <p>Also: Province of Brescia, Mountain Community Parco Alto Garda Bresciano.</p>
Phases and timeframe	It would be advisable that the measures, in order not to compromise transit along the artery, be realized in temporal succession. It is estimated that the work will be completed before the end of 2011.
Financial resources	The total investment estimated amounts to € 34 million, borne by ANAS s.p.a.
Expected results	Safety and for this important western Lake Garda coast road heading north, fewer cases of continuous interventions that slow traffic due to the constant danger of frequent slides. A long-lasting, stable and effective solution.
Result indicators	Driving safely, without any problems or interruptions, from Limone towards the north, as far as the border with Trentino, of the important western coast artery of Lake Garda.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 17	MAINTENANCE OF THE CHURCH OF SANTA MARIA FORIS PORTAS
Project 17.1	Maintenance plan and works for the surfaces of the Church of Santa Maria foris portas
Description	<p>Conservation work was carried out on the Church of S. Maria foris portas at the end of the 1990s on all wall structures. This also included refurbishing the roof and rainwater systems, as well as creating a chemical barrier against rising damp. Previously, in the 1950s the apse walls, which are home to famous frescoes had also been the subject of work to combat damp, which is still fully effective.</p> <p>The project involves creating a maintenance programme that makes it possible to monitor the state of conservation of the Church, especially the frescoes. This programme will be based on carrying out descriptive surveys of the materials, stratigraphic analysis of the plaster and frescoes, and analytical investigations to characterise the materials (see Knowledge Plan).</p>
Actions	<ol style="list-style-type: none"> 1. Carrying out surveys and analytical investigations 2. Drawing up a maintenance programme 3. Carrying out maintenance works
Parties involved	Varese Provincial Administration; Superintendency for Historic, Artistic, and Demoethnoanthropological Heritage and the Superintendency for Architectural Assets and the Landscape of Milan and Lombardy.
Phases and timeframe	As from 2008
Financial resources	Varese Provincial Administration; Superintendency for Historic, Artistic, and Demoethnoanthropological Heritage and the Superintendency for Architectural Assets and the Landscape of Milan and Lombardy.
Expected results	Provision of a maintenance programme identifying the works to be carried out, timescales, and relevant checks.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.1	Recovery and restoration of the Baptistery of S. Giovanni and creating a new roof
Description	<p>The Baptistery presents problems of decay due to the growth of micro-vegetation, disintegration of mortar and plaster, the state of preparation of the floor in opus sectile only fragments of which are conserved, and detachment of flooring and structural elements of the baths. A further element of decay on the floors is the dripping of water due to thawing on the roof, especially during autumn and winter, due to the cold, wet climate. In fact, the current roof is losing its efficiency to the point of needing to be replaced.</p>
Actions	<ol style="list-style-type: none"> 1. Cleaning and consolidation of the various elements of the structure 2. Consolidation and restoration of the plaster on the walls and the floor slabs. 3. Replacement of the now obsolete roofing.
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy. Superintendency of Archaeological assets in Lombardy.
Phases and timeframe	By 2008 – 2009
Financial resources	MIBAC funds: € 30,280.56 for conservation works. € 147,600 has been allocated for the roof, which includes the funds for the roof planned for building I (see Project 4.1).
Expected results	Improved state of conservation of the asset, also in order to valorise it.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.2	Recovery and restoration of walls in the intermediate area between the Cistern and the Bell Tower in the San Giovanni Basilica Complex
Description	The area between the Cistern and the Bell Tower has problems with infestation by vegetation, decay of mortar, and extensive problems on the walls that make maintenance and repair works essential.
Actions	<ol style="list-style-type: none"> 1. Decay survey and conservation project 2. Action to remove vegetation and conservation work on the wall structure.
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy. Superintendency of Archaeological assets in Lombardy.
Phases and timeframe	By 2008
Financial resources	MIBAC funds: € 15,353.40 (this figure also includes the works described in Project 5.1).
Expected results	Consolidation of the walls and valorisation of the same.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.3	Conservation work on the Church of S. Paolo
Description	<p>As part of the Project: "Recovery of the archaeological area of the Castrum of Castelseprio", initially drawn up in 2003, provision is made for conservation restoration of the hexagonal Church of S. Paolo, which dates back to the 11th century, and that has many pieces of the ground floor walls missing, the only floor remaining. This building, built of pebbles and pieces of stone in fairly regular courses, with fishbone inserts, still has half-columns at the corners of the walls made of brick and travertine limestone.</p> <p>Currently, the church is a ruin and the walls are still standing around the internal core, with outer walls built of properly dressed stone blocks and pebbles laid regularly (some fishbone courses), and a chaotic inner core made of undressed pebbles, with a significant amount of mortar. The collapse of large sections of the walls has revealed the inner core that is highly detached on the surface, which has caused individual lithic elements to fall in many sections.</p> <p>So far the walls have undergone general cleaning, which made it possible to see that the surface detachment does not only affect the stones at the surface, directly exposed to the weather, but also the inner stones to a total depth of 40 – 50 cm from the surface. Experimental work has therefore been done, of injecting grout into the worse detached part of the south-west wall (the only one that retains traces of the upper floor) to check the state of the inner walls and to stabilise subsequent consolidation works. Samples have also been taken of mortar and plaster to gain greater knowledge of the materials used at the time.</p>
Actions	<ol style="list-style-type: none"> 1. Carrying out of conservation and restoration works
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy. Superintendency of Archaeological assets in Lombardy.
Phases and timeframe	By 2008
Financial resources	MIBAC funds: €. 78.000,00
Expected results	Elimination of the causes of general decay and especially the detachment of the parts without decoration and generally making the building safe, especially the few traces of the upper floor, for the purposes of conserving and using it.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.4	Conservation work on building I
Description	Building I, located a short way from the S. Giovanni basilica Complex and recognised as a canonical building, requires further works to rid it of vegetation, general cleaning of the surfaces, and consolidation of the mortar and elements in clay used in the walls, as well as refurbishing of the door jambs for the doorways to the various rooms. The building has a few fragments of painted plaster that is from the renaissance era and has been rendered crumbly by persistent damp in the area, characterised by cracks and detachment. The current roof is also to be replaced in traditional elements to protect the plaster. To gain more knowledge about the structure and its foundations, excavation is necessary inside the rooms and along the outer perimeter (in this regard see the Knowledge Plan).
Actions	1. Carrying out of restoration works and replacing the roof.
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy. Superintendency of Archaeological assets in Lombardy.
Phases and timeframe	By: 2008.
Financial resources	MIBAC funds: € 20,468.40 for the restoration. The figure for replacing the roof is included in the funds allocated for the roofs and also includes the roof on the baptistery. For the archaeological excavations and relevant documentation: funds to be found
Expected results	Elimination of the causes of general decay of the building, replacing of the roof in order to conserve the plasters and archaeological investigations to gain more knowledge about the building and medieval building practices
Result indicators	Mitigation of the vulnerability of the asset

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.5	Conservation work on the door and access bridge for the castrum
Description	The access bridge and door of the castrum require removal of vegetation, general cleaning of the surfaces, and consolidation of the mortars and elements of the walls
Actions	1. Carrying out of conservation and restoration works
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy Superintendency of Archaeological assets in Lombardy
Phases and timeframe	By: 2008.
Financial resources	MIBAC funds: € 15,353.40
Expected results	Elimination of the causes of decay and making the building safe for conservation and use
Result indicators	Mitigation of the vulnerability of the asset

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.6	Restoration and maintenance work on the wall circuit
Description	The circuit of the castrum walls has sections of wall already uncovered and sections to be cleared. In this regard, work is planned to improve the state of conservation and use of the circuit of the castrum walls, also in connection with the exposure of new sections, already inspected, and partly detached.
Actions	1. Continuation of uncovering of sections of wall 2. Carrying out of conservation and restoration works
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy Superintendency of Archaeological assets in Lombardy
Phases and timeframe	From 2008
Financial resources	MIBAC funds: Funds requested for 2008-2010 Planning
Expected results	Elimination of the causes of general decay and making the building safe for conservation and use
Result indicators	Mitigation of the vulnerability of the asset

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 19	PREVENTION AND REDUCTION OF HYDROGEOLOGICAL, SEISMIC AND ANTHROPIC RISKS
Project 19.1	Refurbishing of the slopes
Description	Given the nature of these locations, it is deemed essential that the slopes be stabilised and that the woods be maintained constantly, and that this must also be done in the buffer zone that surrounds the Castelseprio site.
Actions	<ol style="list-style-type: none"> 1. Preliminary investigations 2. Completion of the work 3. Final documentation
Parties involved	FAI – Italian Environmental Fund; Superintendency for Historic, Artistic, and Demoethnoanthropological Heritage and the Superintendency for Architectural Assets and the Landscape of Milan and Lombardy; Pinin Brambilla Bariclon (restorer).
Phases and timeframe	2008: Funds sought
Financial resources	Application for co-financing in progress: Bando Non-Profit Community Organisation of Varesotto Art and Culture N° 2/2007; private financing sought
Expected results	Completion of restoration and elimination of state of decay of internal plaster and fresco fragments
Expected results	Improved state of conservation of the asset
Result indicators	Mitigation of the vulnerability of the asset

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 20	IMPROVING THE STATE OF CONSERVATION OF THE TORBA COMPLEX
Project 20.1	Completion of restoration of the internal plaster and fresco fragments in the Church of Santa Maria in Torba
Description	In 2007 a laser scanner was used to survey the interior and the initial restoration work was done on the bell tower area (where a fragment of fresco was rehoused). These works were necessary in order to prepare a project for the remaining two walls in the Church and the apse area, which provides for restoring the fragments of fresco and plaster inside the Church of S. Maria.
Actions	<ol style="list-style-type: none"> 1. Surveys and preliminary documentation 2. Project 3. Completion of the work
Parties involved	FAI – Italian Environmental Fund; Superintendency for Historic, Artistic, and Demoethnoanthropological Heritage and the Superintendency for Architectural Assets and the Landscape of Milan and Lombardy.
Phases and timeframe	2008: Funds sought
Financial resources	Funds to be sought from Private sources, bank foundations, and public sources
Expected results	Improvement of the state of conservation of external plaster of the Tower
Result indicators	Mitigation of the vulnerability of the asset

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 20	IMPROVING THE STATE OF CONSERVATION OF THE TORBA COMPLEX
Project 20.2	Drawing up a maintenance project for the external surfaces of the Tower
Description	The project provides for maintenance of the external surfaces of the Tower, characterised by the presence of ancient mortar of various compositions, wall finishes (stone outline plaster, whitewashing, and covering plaster) and walls in stone, pebbles, and brick that has limited phenomena of decayed material.
Actions	<ol style="list-style-type: none"> 1. Surveys and preliminary documentation 2. Conservation project 3. Completion of the work
Parties involved	FAI – Italian Environmental Fund; Superintendency for Historic, Artistic, and

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	Demoethnoanthropological Heritage and the Superintendency for Architectural Assets and the Landscape of Milan and Lombardy.
Phases and timeframe	2008: Funds sought
Financial resources	Funds to be sought from Private sources, bank foundations, and public sources
Expected results	Improvement of the state of conservation of external plaster of the Farmhouse and Barn.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 20	IMPROVING THE STATE OF CONSERVATION OF THE TORBA COMPLEX
Project 20.3	Restoration of the external plaster of the Church, Farmhouse, and Barn
Description	This project involves restoring the external surfaces of the Church, Farmhouse, and Barn. The Church in particular is characterised by extensive stratification of the walls, mortars and plasters. Stratification surveys will be carried out to extend knowledge about the history of the building and to set up the conservation works.
Actions	<ol style="list-style-type: none"> 1. Surveys and preliminary documentation 2. Archaeological excavations 3. Cleaning of the walls 4. Restoration and consolidation of archaeological structures
Parties involved	FAI – Italian Environmental Fund, Superintendency for Archaeological Assets in Lombardy.
Phases and timeframe	2008
Financial resources	Co-financing: Regione Lombardia - Bando Patrimonio Archeologico Lombardo – Year 2007 Regional laws 39/84 & 39/91
Expected results	Improvement of the state of conservation, and making safe for the purposes of conservation and use.

PROTECTION AND CONSERVATION PLAN Castelseprio-Torba site	
Objective 20	IMPROVING THE STATE OF CONSERVATION OF THE TORBA COMPLEX
Project 20.4	Conservation, restoration of the existing archaeological structures as part of refurbishing of the connection with the castrum of Castelseprio-Torba
Description	As part of the excavations to be carried out at the fortifications along the route that connects to the archaeological area of Castelseprio-Torba, this project provides for the restoration and consolidation of the archaeological structures, which will include works of careful cleaning, detaching of infesting vegetation, repair and consolidation of the masonry parts as necessary, where structural stability needs to be increased.
Actions	<ol style="list-style-type: none"> 1. Drainage and collection of water to stabilise loose areas. 2. Maintenance and reducing the age of the woods in part to make the slopes lighter.
Parties involved	Regional Directorate for Cultural Assets and the landscape in Lombardy. Superintendency of Archaeological assets in Lombardy. Territorial Bodies
Phases and timeframe	By: 2008-2012.
Financial resources	Funds to be found in collaboration with the Territorial Bodies.
Expected results	Elimination of the causes of decay and making the slopes safe for conservation and use
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Spoleto site	
Objective 21	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA OF SAN SALVATORE
Project 21.1	Systematization of data relative to the carried out conservation interventions (see Documentation centre)
Description	<p>Prior to the development of a routine maintenance plan it seems to be essential to proceed with an accurate analysis of the state of conservation of the property, also through the collection and systematic analysis of the data relative to the restoration interventions the object has been subject to over the years.</p> <div style="display: flex; justify-content: space-around;">   </div> <p style="text-align: center;">San Salvatore before and after the conservation intervention of 90s</p>
Actions	1. Collection and systematization of data through transfer into electronic archives in the documentation centre.
Parties involved	Municipality of Spoleto. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Umbria. Archive Superintendence of the Region Umbria. State Archive of Perugia – Section of Spoleto. Private citizens and companies
Phases and timeframe	After completing restoration of the ex convent.
Financial resources	Funds to be raised in the municipal budget and from private contributions.
Expected results	Systematization of knowledge on the restoration interventions carried out in the past; preparation of instruments and definition of procedures allowing for the planning of maintenance interventions.
Result indicators	Number and quality of collected and systematized data

PROTECTION AND CONSERVATION PLAN Spoleto site	
Objective 21	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA OF SAN SALVATORE
Project 21.2	Carrying out of thematic surveys aimed at diagnostic project and analysis
Description	<p>The project envisages thematic surveys aimed at describing the state of conservation of the property; metric surveys; surveys on the materials used and building techniques; surveys of restoration interventions carried out in the past which left a visible mark (stratigraphic analysis); survey on the visible effects of deterioration (deterioration and damage surveys and analytical investigations).</p> <p>Surveys must be carried out with non invasive methods which make use of innovative technological devices.</p>

Actions	<ol style="list-style-type: none"> 1. Survey project 2. Carrying out of geo-referenced metric survey campaigns with relative restitution in vector and digital format. 3. Stratigraphic analysis of elevations to identify restoration interventions carried out in the past 4. Survey and description of materials and building techniques 5. Surveys on deterioration state 6. Restitution of data on thematic maps and description of the state of conservation.
Parties involved	Municipality of Spoleto. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Umbria
Phases and timeframe	From 2008
Financial resources	Funds to be raised in the municipal budget and by other public and private bodies.
Expected results	Production of information material to be available at the Documentation centre
Result indicators	Number and quality of collected and systematized data

PROTECTION AND CONSERVATION PLAN Spoleto site	
Objective 21	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA OF SAN SALVATORE
Project 21.3	Planning of routine maintenance interventions and launch of the first cycle of interventions
Description	On the basis of the carried out surveys a maintenance programme for the basilica will be planned. It will identify intervention priorities and implementation time limits. The surveys will be carried out periodically by a group of experts of the Municipality, according to the attached risk file. The objective is to carry out constant routine maintenance interventions in order to prevent restoration interventions as much as possible.
Actions	<ol style="list-style-type: none"> 1. Identification of intervention priorities and definition of a general programme 2. Launch of the first cycle of maintenance interventions.
Parties involved	Municipality of Spoleto. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Umbria.
Phases and timeframe	From 2008
Financial resources	Funds to be allocated in the municipal budget; search for sponsorship.
Expected results	Planning of maintenance programmes with identification of interventions that need to be carried out, time limits and relative controls.
Result indicators	Increase in the protection level for the property.

PROTECTION AND CONSERVATION PLAN Spoleto site	
Objective 21	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA OF SAN SALVATORE
Project 21.4	Maintenance intervention of stone material stored in the museum warehouse
Description	Many sculptures – mainly fragmented, which used to be part of the walls of the naves of the Basilica – were removed during restoration interventions in the Basilica in the 90s and transferred into the Museum Warehouse of the Municipality of Spoleto. It is necessary to plan constant monitoring for them as well as routine maintenance interventions in order to guarantee excellent conservation.
Actions	<ol style="list-style-type: none"> 1. Verification of the state of conservation of the stone elements removed from the Basilica 2. Launch of maintenance intervention
Parties involved	Municipality of Spoleto. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Umbria. Superintendence for Archaeological Heritage of the Region Umbria.
Phases and timeframe	From 2008
Financial resources	Funds to be allocated in the municipal budget; possible sponsorship.
Expected results	Guarantee to preserve the properties.
Result indicators	Improvement of conservation and exhibition conditions of the properties.

PROTECTION AND CONSERVATION PLAN Spoleto site	
Objective 22	CARRYING OUT OF CONSERVATION INTERVENTIONS OF THE EX CONVENT COMPLEX
Project 22.1	Launch of conservation and restoration interventions of the ex convent complex
Description	The project envisages the integral restoration of the complex in order to transform it into a multipurpose Centre (Welcoming; visits; documentation) which can be used for all activities related to the use and visits to the Basilica and the buffer zone and for studies, training and research on Longobard topics.
Actions	<ol style="list-style-type: none"> 1. Drawing up of a restoration project 2. Launch of restoration interventions
Parties involved	Municipality of Spoleto. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Umbria. Region Umbria.
Expected phases and time frame	From 2008
Financial resources	Funds to be allocated in the municipal budget and regional funding: € 300,000.00
Expected results	Restoration of buildings and opening of areas to the general public
Result indicators	Number of access requests

PROTECTION AND CONSERVATION PLAN Spoleto site	
Objective 23	IMPROVEMENT OF RISK PREVENTION
Project 23.1	Installation of a video surveillance system on the Basilica
Description	The project envisages the installation of a video surveillance plant composed by two video cameras placed outside the Basilica and two video cameras inside, connected to the Municipal Police station. The video cameras will be of the dome type, swivel, day-night, equipped against theft and with an integrated video server which allows immediate direct connection with Telecom plants without any other device.
Actions	<ol style="list-style-type: none"> 1. Drawing up of the installation project 2. Approval of the project and acquisition of necessary authorizations by BAPPSAE 3. Installation of equipment
Parties involved	Municipality of Spoleto. BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Umbria.
Phases and timeframe	From 2008
Financial resources	Funds to be raised in the municipal budget (around 6,000.00 Euro/each)
Expected results	Guarantee for conservation of properties
Result indicators	Installation of video cameras

PROTECTION AND CONSERVATION PLAN Spoleto territory	
Objective 24	IMPROVEMENT OF RISK PREVENTION IN ORDER TO THE CULTURAL HERITAGE
Project 24.1	Creation of a Centre of Excellence for the recovery of Cultural Heritage in case of a disaster
Description	<p>In Spoleto, a regional Centre of Excellence for the recovery of Cultural Heritage in case of emergency is now being created, as a point of reference for the entire territory of Umbria. The structure is composed by a shed – almost entirely built – in the industrial area of Santo Chiodo, in the vicinity of the municipal warehouse for works of art thus creating a department for the protection and conservation of the cultural heritage.</p> <p>The operation benefitted from the assistance, also economic, of the Ministry for Cultural Heritage and Activities, the Presidency of the Council of Ministers (Civil Protection Department), the Region Umbria and Confindustria. The Centre will be used to collect any kind of paintings, sculptures, prints, books, textiles and artistic artefacts of any kind which are in an emergency condition due to earthquakes, floods, fires, static problems of the buildings where they are placed, etc.</p> <p>It is the only structure created in the Region Umbria for this kind of emergencies and was designed according to technological and logistic criteria adjusted to the type of properties and activities which will be carried out. In particular, it has a total surface of 3600 m², of which 70% at full height (around 7.5 m) and 30% at double height. The internal division envisages a warehouse of around 1900 m², a file archive and a photographic archive, the management offices, a secretariat, a meeting hall, a locker room for employees, an area for the guardian, a garage and various services.</p>
Actions	<ol style="list-style-type: none"> 1. Photographic and inventory cataloguing 2. Emergency services: safety devices and cleaning interventions for properties 3. Placing in warehouse on purposely made racks/shelves/showcases 4. Constant monitoring of the state of conservation
Parties involved	<p>Municipality of Spoleto. Ministry for Cultural Heritage and Activities; Presidency of the Council of Ministers (Civil Protection Department); Region Umbria; Confindustria.</p>
Phases and timeframe	end 2008
Financial resources	<p>Region, Ministry for Cultural Heritage and Activities, Presidency of the Council of Ministers: € 6,000,000.00 Confindustria: € 480,000.00</p>
Expected results	Keeping the same state of conservation
Result indicators	Number of carried out interventions

PROTECTION AND CONSERVATION PLAN Spoleto territory	
Objective 24	IMPROVEMENT OF RISK PREVENTION IN ORDER TO THE CULTURAL HERITAGE
Project 24.2	Opening of the Cultural Heritage Diagnostic Laboratory at the Rocca Albornoziana
Description	<p>In Spoleto the Cultural Heritage Diagnostic Lab, housed in the Rocca Albornoziana in the frame of the 2004 Accordo di Programma Quadro APQ (agreement between State and Region concerning territorial strategic planning), is about to become operational. This Laboratory is equipped with innovative methodologies and techniques for the diagnostics of damages and risks, for first aid and conservation of cultural heritage. The competent institutions for the Laboratory and the stakeholders of the Longobard network are defining agreements aiming at making this structure the reference centre for seismic risk and diagnostic studies on the Longobard heritage, not only for the monuments of the "Duchy of Spoleto", but also for those of the entire Italia Langobardorum network.</p> <p>Data Archives concerning techniques and materials used in different types of Longobard artefacts (from architecture to sculptures, paintings etc.) and collecting all the information obtained through studies, researches and inquiries all over Italy, could be created in this Centre, in collaboration with CISAM (Italian Centre of Studies on Early-Middle Ages), situated in Spoleto. The Archives, that could manage data on the conservative operations implemented or to be implemented on the same heritage, could be extended in the future to a larger network including all Italian and European sites that have been characterized by the Longobard presence.</p>  <p style="text-align: center;">Rocca Albornoziana seat of the Cultural Heritage Diagnostic Lab</p>
Parties involved	Municipality of Spoleto, Ministry for Cultural Heritage and Activities, Central Institute for Restoration, CISAM (Italian Centre of Studies on Early-Middle Ages), Umbria Region, all the stakeholders
Phases and timeframe	2010
Financial resources	Region, Ministry for Cultural Heritage and Activities, Municipality of Spoleto
Expected results	Cultural Heritage Diagnostic Lab as a national reference Centre, especially for Longobard artefacts.
Result indicators	Number of analysis and research projects

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno site</i>	
Objective 25	IMPROVEMENT OF THE STATE OF PROTECTION AND CONSERVATION OF THE CLITUNNO TEMPIETTO AND THE CLITUNNO RIVER
Project 25.1	Maintenance work with particular reference to tombstone materials and internal walls of cell and walls of pronaos
Description	<p>The maintenance work on the Temple aims to improve the state of conservation of the tombstone and wall surfaces. It is mainly necessary to remove biological films and clean consistent and inconsistent surface deposits and also integrate some slight gaps.</p>  <p>This phase also includes maintenance work on the cell floor and the wooden windows.</p>
Actions	<ol style="list-style-type: none"> 1. Planning of work 2. Carrying out of maintenance work
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria (SPAPPSAE). Municipality of Campello sul Clitunno,
Phases and timeframe	Planning by 2008 Commencement of work from 2009
Financial resources	<i>Funds allocated for routine maintenance (including context): 8,065.00€ on average each year.</i> Funds to be found by: Municipality of Campello sul Clitunno; Ministry for Cultural Heritage and activities; Umbria Region; private and bank sponsorships
Expected results	Elimination of deterioration phenomena
Result indicators	Mitigation of site's vulnerability

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno site</i>	
Objective 25	IMPROVEMENT OF THE STATE OF PROTECTION AND CONSERVATION OF THE CLITUNNO TEMPIETTO AND THE CLITUNNO RIVER
Project 25.2	Relief and reduction of rising damp problems and condensation in the walls exposed to north and north-east
Description	The main problems in the building are mainly linked to damp and condensation, caused by the particular environmental conditions that the building experiences, partly built against land. For this reason in the past, a perimeter drainage system and rainwater disposal system was created; however, damp still affects the northern face, along the external base of the apse, where rising damp has produced biological films such as musk and efflorescence. It is necessary to constantly monitor the phenomena linked to the presence of damp, foreseeing constant maintenance that removes any damaging effects
Actions	<ol style="list-style-type: none"> 1. Checking of temple's environmental conditions and surveys/analysis to identify cause and effect of damp in north and north-eastern walls 2. Maintenance work
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria (SBAPPSAE); Municipality of Campello sul Clitunno
Phases and timeframe	From 2009
Financial resources	<i>Funds allocated for routine maintenance (including context): 8,065.00€ on average per year.</i> Funds to be found by: Municipality of Campello sul Clitunno; Italian Government (Ministry for Cultural Heritage and Activities); Umbria region; private and bank sponsorships
Expected results	Removal of causes of deterioration of walls exposed to north-northeast
Result indicators	Reduction of site's vulnerability

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno site</i>	
Objective 25	IMPROVEMENT OF THE STATE OF PROTECTION AND CONSERVATION OF THE CLITUNNO TEMPIETTO AND THE CLITUNNO RIVER
Project 25.3	Conservation work and aesthetic aspect of the frescoes on back wall of cell
Description	General condition of the painting layer must be checked which, although it underwent important restoration work in 1984, has some critical factors and then proceed with the necessary work for the aesthetic appearance with suitable reintegration of painting gaps

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

	 <p align="center">cellar</p>
Actions	<ol style="list-style-type: none"> 1. Analysis to check current state of conservation of painting layer and choice of reintegration method for gaps 2. Project and work.
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria BAPPSAE
Phases and timeframe	Planning by 2008 Commencement of work 2009
Financial resources	<i>Funds allocated for routine maintenance (including context): 8,065.00€ on average per year.</i> Funds to be found by: Municipality of Campello sul Clitunno; Italian Government (Ministry for Cultural Heritage and Activities); Umbria region; private and bank sponsorships
Expected results	Elimination of any causes of deterioration and improvement of final aesthetic appearance
Result indicators	Reduction of site's vulnerability

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno site</i>	
Objective 26	DRAWING UP OF MAINTENANCE PROGRAMME FOR THE CLITUNNO TEMPIETTO
Project 26.1	Creation of thematic relief work for the diagnostic project and analytical surveys
Description	<p>The project foresees the carrying out of thematic surveys, aimed at describing the state of conservation of the site and the systematic gathering of data on restoration work carried out in the past (work history). This entails mapping:</p> <ol style="list-style-type: none"> a) Materials used in work b) Construction techniques (descriptive survey and analytical surveys); c) Restoration work carried out in past that left visible trace (stratigraphic analysis); d) Visible effects of deterioration (survey of deterioration and deformity and analytical surveys). <p>All surveys will be recorded on thematic maps in digital/carrier form and in photographs</p>
Actions	<ol style="list-style-type: none"> 1. Stratigraphic analysis of models to identify restoration work carried out in past 2. Survey and description of construction-execution materials and techniques 3. Survey of the state of conservation and the gaps in the structure 4. Study of specific analytical surveys in order to characterise the materials

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

	and forms of deterioration found
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria BAPPSAE Municipality of Campello sul Clitunno
Phases and timeframe	Actions: by 2008 – preliminary preparation for conservative maintenance work
Financial resources	Com: Municipality Campello sul Clitunno; Ministry for Cultural Heritage and Activities; Umbria region; private and bank sponsorships
Expected results	Arrange a full as possible group of thematic findings and returns in paper or digital format, prior to conservative maintenance work
Result indicators	Number and quality of data found and entered into system

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno site</i>	
Objective 26	DRAWING UP OF MAINTENANCE PROGRAMME FOR CLITUNNO TEMPIETTO
Project 26.2	Maintenance programme and start up of first cycle of work
Description	On the basis of surveys carried out, a maintenance programme will be prepared for the temple that also identifies work priority and implementation times. The goal is to carry out maintenance work in small lots, continuing over the years
Actions	1. Identification of work priorities and definition of general programme 2. Start up of first cycle of maintenance work
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria BAPPSAE Municipality of Campello sul Clitunno
Phases and timeframe	From 2009
Financial resources	Funds to be found by: Municipality Campello sul Clitunno; Ministry for Cultural Heritage and Activities; Umbria Region; private and bank sponsorships
Expected results	Drawing up of maintenance programme with identification of work to be carried out, timeframes and relative checks
Result indicators	Reduction of site's vulnerability

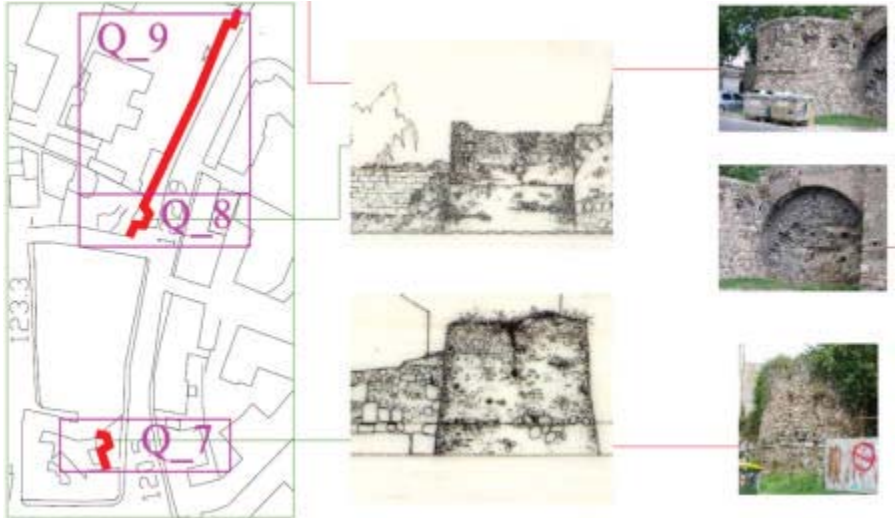

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno</i> buffer zone and territory	
Objective 27	CONSERVATION AND UPGRADING OF INDUSTRIAL ARCHAEOLOGICAL STRUCTURES
Project 27.1	Conservation and refunctioning of ENEL power station and water pumping station, destined to be used as exhibition site for the Eco/Museum Project
Description	Conservative maintenance work of disused structures, destined for use as permanent exhibition sites in the area's Eco-Museum. In particular, the areas will house sections 3 / 4: "Clitunno river as a "Genius Loci" and as a resource" High aesthetic value of "Topoi": The Tempietto and the Springs of Clitunno" (See Enhancement plan)
Actions	1. Conservative Maintenance work
Parties involved	Municipality of Campello sul Clitunno
Phases and timeframe	From 2009 onwards
Financial resources	Part of funds allocated through state funding, further to the environmental accident in 2006 (see Conservation analysis), for the reclamation, recovery and enhancement of the area of the Clitunno river: €6,000,000.00
Expected results	Improvement of the state of conservation

PROTECTION AND CONSERVATION PLAN <i>Campello sul Clitunno</i> buffer zone and territory	
Objective 28	CONSOLIDATION AND RESTORATION OF THE SITES DAMAGED BY THE 1997 EARTHQUAKE
Project 28.1	Work to secure and consolidate structure of the Sanctuary of the Madonna della Bianca
Description	Securing consolidation of structure and conservative restoration of the <i>Santuario della Madonna della Bianca</i> , currently closed due to serious damage from the earthquake in 1997. This is the last of the series of 11 interventions for consolidation and restoration funded by the Umbria region with the annual plan for cultural heritage damaged by earthquakes (DGR 94/2000), to deal with the considerable damage caused by the earthquake to the region's architectural heritage, and for which the Municipality of Campello sul Clitunno has carried out work for a total of €2,639,436.53. Heritage already consolidated and restored from 1999 include: the castle of Pissignano, the church of San Lorenzo, the church of San Michele Arcangelo, the church of San Pietro, Palazzo Casagrande Chillotti, the church of San Giovanni and the bell tower of Santa Maria.
Actions	1. Safety interventions 2. Structural consolidation work and conservative restoration
Parties involved	Umbria Region Spoleto- Norcia Archbishop's curia Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria SBAPPSA
Phases and timeframe	End of work summer 2008 Usable by 2009
Financial resources	Funds allocated by the Umbria Region (Regional law 12.08.98, n° 32 – Annual plan for cultural heritage damaged by earthquakes): €250,000.00
Expected results	Seismic Improvement Improvement of the overall state of conservation of the site

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 29	IMPROVING THE STATE OF CONSERVATION OF THE SITE
Project 29.1	Maintenance and conservation improvement of the Church of Santa Sofia
Description	<p>The city's attention to its cultural heritage is expressed in the numerous programmes and works in recent decades, which have aimed both to improve the physical state and to valorise the numerous emergencies related to the monuments concentrated in the old city. Thanks to the Integrated Project "Benevento: The future in history" widespread redevelopment and modernisation of the infrastructure of the city has begun, and has already produced significant results in terms of the state of conservation of assets.</p> <p>The project forms part of a strategy of valorisation and coordinated management of Assets, which will see the signing of a specific Protocol of Intent by the Bodies responsible for identifying common rules for how to maintain use of the Church as a place of worship that is also useable and accessible for tourist purposes (see valorisation plan).</p> <p>The Santa Sofia complex, which has already been the subject of maintenance restoration, will be subjected to programmed maintenance, necessary due to wear resulting from its use as a place of worship. The maintenance work, in the form of a project by the BAPPSAE Superintendency of Caserta and Benevento, will involve cleaning the stone surfaces inside, and the plaster sections and external decorations of the church structure. In addition, the floor will be refurbished, having been laid during the restorations in the 1950s by Arch Rusconi and now deemed not compatible with the monument's image, the carrying out of archaeological investigations, and upgrading of the lighting system.</p>
	
Parties involved	Municipality of Benevento Benevento Provincial Authority Prefecture of Benevento Cultural Heritage Regional Directorate
Phases and timeframe	Short term: First semester of 2008
Financial resources	Available: € 650,000 from POR Campania 2000-2006
Expected results	Seeing to the quality of the state of conservation of the cultural heritage of the site.
Result indicators	Carrying out of the work

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 30	IMPROVING THE STATE OF CONSERVATION OF LONGOBARD ASSETS INCLUDED IN THE BUFFER ZONE
Project 30.1	Maintenance of the Longobard tomb in the Church of S. Salvatore
Description	<p>The Benevento buffer zone includes relics of Longobard artistic culture that is unique, and so the Municipality of Benevento intends implementing actions to valorise the same, which have been brought forward due to the need for maintenance work.</p> <p>In relation to the Church of S. Salvatore, which has already undergone maintenance restoration, programmed maintenance is planned of the burial sites from the Longobard era it contains. Of these, the tomb of the Priest Auderisio stands out due to its peculiar pictorial decoration that includes the dedication inscription and two crosses. The project must also include restoration of the external facades of the church and the final arrangement of the tombs, introducing plants and systems to conserve and protect these assets from natural agents (damp, light, etc.).</p>  <p style="text-align: center;">The Church of S. Salvatore</p>  <p style="text-align: center;">Longobard tomb in the Church of S. Salvatore.</p>
Parties involved	Archaeological Superintendency and BAPPSAE Municipality of Benevento
Phases and timeframe	Short term: (2009)
Financial resources	To be found: From POR FESR 2007-2013
Expected results	Seeing to the quality of the state of conservation of the cultural heritage of the site.
Result indicators	Carrying out of the work

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 30	IMPROVING THE STATE OF CONSERVATION OF LONGOBARD ASSETS INCLUDED IN THE SITE AND IN THE BUFFER ZONE
Project 30.2	Maintenance work on the Longobard boundary wall
Description	<p>The Benevento buffer zone includes relics of Longobard material culture that is unique, and so the Municipality of Benevento intends implementing actions to valorise the same.</p> <p>In relation to the Wall of the Longobard town, which has already undergone maintenance restoration, completion of the task is planned in the form of programmed maintenance.</p> <p>The city wall that surrounded the ancient medieval Longobard city is in a reasonable state of conservation. The buffer zone does not fully coincide with the area of the ancient wall, but only in some parts of its layout to the east of the town, below the Trescene quarter, along Via del Pomerio as far as the Ark of Traiano and continuing along the River Calore. From the end of the 18th century to the start of the 20th century, the walls were subject to demolition works and in some parts they were included in the outside walls of civil dwellings. (Via Torre della Catena). Further damage and destruction were caused by bombardment in 1943.</p>  <p>Via Torre della Catena, in an old image</p> <p>The part of the wall that is best preserved, thanks in part to conservation refurbishing work done by the Superintendency in the 1990s is the part that coincides with the perimeter of the buffer zone and that demarcates the ancient Trescene quarter. This part of the wall does not require maintenance work.</p>  <p>The conservation plan of the longobard wall</p>

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	<p>Other problems are involved for the stretch of the wall to the north-west of the town, from the Arch of Traiano to the Bridge on the River Calore, and then from Port Arsa, along Via Torre della Catena, to the convent of the Ursuline Sisters. This stretch also includes a lot of circular towers and square towers, almost all of which are well preserved.</p> <p>The main conservation problem is the decay due to the presence of shrubs, scrub, and roots that have got into the fabric of the walls, the decay of the mortar, subsequent damage to the wall itself and thus the infiltration of rainwater. The small circular tower on Via Torre della catena, which was an important medieval fortification, requires static consolidation work (cleaning out and injection of mortar) since it was badly damaged by bombing during the war. Work currently in progress (2006-2007) involves maintenance work on the entire section of the wall not yet refurbished, with financing from POR CAMPANIA scale 5, as part of the Integrated Programme. This work includes removing weeds by hand, careful picking away of the plaster, treatment with disinfectant biocides, refurbishing of the alignment of the cappings on the wall creating sacrificial surfaces, closing of the holes passing through, consolidating the joints, building small sections of boundary wall, cleaning the stone elements used as construction elements in the wall at a number of points.</p>
Parties involved	Municipality of Benevento Archaeological Superintendency and BAPPSAE
Phases and timeframe	Work in progress by 31.12.2008 Further work by 31.12.2015
Financial resources	Available: € 2,000,000 from POR Campania 2000-2006 To be found: From POR FESR 2007-2013
Expected results	Seeing to the quality of the state of conservation of the cultural heritage of the site.
Result indicators	Carrying out of the work

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 31	RAISING THE CONSERVATION STATUS OF THE ANCIENT CITY CENTRUM
Project 31.1	Municipal incentives for eco-sustainable refurbishing in the old city
Description	<p>Building refurbishing in an eco-sustainable manner is a matter that is currently important to and applied by the contemporary building world. This becomes an arduous challenge with applied to historical dwellings. In Benevento, refurbishing and valorisation of the old city has thus far been undertaken in the form of various restoration works, conservative refurbishing, and health and functional upgrading, without any intention to take action in terms of the eco-sustainability of the works done. In addition to regulating building redevelopment works (mainly renovation, refurbishing, and restoration), the city's administration intends involving the citizens in being aware of the importance of doing these works in a sustainable way in their old city. Thus it intends providing incentives for those that intend to retrieve properties, guaranteeing the use of techniques that reduce the pollutant impact and reducing wastage of raw materials.</p> <p>This action relates to parts of the minor historical building fabric, mainly with a private residence function, within the Longobard city wall in Benevento, where one can still see the signs of abandonment following seismic events and damage caused during the second world war.</p> <p>The incentives offered for sustainable recovery that the Benevento Municipality will propose to private citizens for the retrieval of their heritage dwelling and property is in the form of a reduction in municipal tax, for a period of five or ten years for example, provided they undertake to do the work adopting the Municipal Bio-construction Regulations (using alternative sources of energy, construction products with a low environmental impact, and reducing water consumption).</p> <p>See Protection Plan – Issuing of the Municipal Bio-Construction Regulations.</p>
Parties involved	Municipality of Benevento
Phases and timeframe	Medium – long term: by 2015
Financial resources	To be found: POR FESR Campania Regional Authority 2007-2013
Expected results	Creation of an old city that is a model of integration of the traditional cultural values and environmental sustainability requirements expressed in the way it is used daily.
Result indicators	Adoption of the Regulations

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 32	MONITORING THE STATE OF CONSERVATION OF THE ASSETS
Project 32.1	Programme for periodic monitoring of the state of conservation of the archaeological areas
Description	<p>In recent years the Benevento Municipality has started many works to refurbish the old city. These have brought to light the quality and quantity of significant archaeological sites that it includes. For example, as part of the implementation of the Integrated project for the City of Benevento (financed with EU funds), important discoveries were made when rendering Corso Garibaldi a pedestrian area and redeveloping Piazza Sabarini. Other unexpected finds came about during the works to replace the flooring inside the Cathedral.</p> <p>The presence of such cultural resources was stressed in the debate promoted by the Benevento Municipality in 2005 about the peri-urban archaeological area of Cellarulo - the river port from Roman times, amphitheatre with gladiator school, and the cellarium, which had already been the subject of attention for years – the major speakers at which were the competent Superintendencies in the territory.</p> <p>This monitoring will take the form of video surveillance and periodic inspections of the sites by specialist personnel, the Superintendencies, and the Municipality. Monitoring will be managed using a GIS system that will also make it possible to compare the state of conservation of the sites at various times.</p>
Parties involved	Archaeological Superintendency and BAPPSAE Municipality of Benevento
Phases and timeframe	Long term
Financial resources	To be found: Resources of the Bodies involved
Expected results	Setting up an integrated system for the wealth of knowledge and increasing it over time, in order to optimise management of the cultural heritage.
Result indicators	Number of sites monitored Frequency of monitoring

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 33	UPGRADING AND EXTENDING THE HUMAN RESOURCES INVOLVED IN CONSERVATION OF THE SITE
Project 33.1	Setting up a building school focussing on restoration as part of a restoration network
Description	<p>Along with the processes of conserving and valorising the cultural assets in the city and territory, it is useful to launch actions to raise the level of knowledge of the operators of various kinds, involved in working on the cultural and environmental heritage.</p> <p>Professional training has become a necessity, both because it shortens learning time and because training enriches the tradition of new theoretical and practical knowledge required for technical and economic development. This does not relate only to operators, but also to middle and High-ranking technical personnel, which today are more and more important for correct, economic management of sites and companies. The building restoration school will implement the most useful cultural and professional connections - Universities, Superintendencies, and Local Bodies, at both a national and a European level. This training activity must concentrate on three goals:</p> <ol style="list-style-type: none"> 1. Qualification of retrieval and restoration skills. 2. Qualification of complex operating tasks (operating and maintenance of operating machinery). 3. Qualification of normal trades (carpenters, blacksmiths, etc.) of which there is a numerical lack on the local market. <p>The school may also promote the setting up of an Innovation Centre dedicated to research in the area of restoration of architectural assets, a network that can create virtual links between research centres at public bodies and university institutes, industry, and companies operating in the sector. The prime objective is to produce certifications that are valid throughout Europe for Small and Medium-Sized Businesses that work in the sector of restoring cultural assets.</p>
Parties involved	Campania Regional Authority Municipality of Benevento Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento and BAPPSAE Superintendency of Caserta and Benevento.

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

Phases and timeframe	by 2015
Financial resources	Source to be obtained from POR FESR 2007-2013, POR FSE 2007-2013 Campania Regional Authority
Expected results	Creation of a reference structure for training specialised operators for the restoration sector.
Result indicators	Number of operators trained Number of bodies and companies involved in the network.

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 34	IMPROVING PREVENTION OF THE SEISMIC RISK IN THE ANCIENT CITY
Project 34.1	Drawing up a plan to mitigate the seismic risk
Description	<p>In Benevento there have been seismic monitoring activities for the urban area with a view to studying the effects on the site since 2000, as part of the three-year GNDT (National Earthquake Defence Group) project "Traiano: Project for estimating and reducing the Vulnerability of the Built-up Environment". The results of these surveys were generally positive in that they found an absence of phenomena of amplification of the seismic movement in the old city. On the other hand phenomena of amplification, and therefore of greater risk, were found in the Sabato River Valley and the south-western sector of the old city. The question of protecting areas that are characterised by human presence and the concentration of properties that are most vulnerable must be dealt with in terms of an overall organic framework that is first cognitive and then regulatory.</p> <p>For the second aspect, the plan is to draw up a plan to mitigate the risk that gives particular consideration to the old city.</p> <p>The action involves Drawing up a Plan, starting with a census of information on the seismic vulnerability of the historical buildings and architectural emergencies, to arrive at seismic micro-zoning and the identification of measures to mitigate and/or reduce the risk to people and assets.</p> <p>This action can be taken on completion of the activities carried out as a result of the Campania Regional Law N° 26/02 "Standards and incentives for valorising old cities in Campania and for cataloguing Environmental Assets of a landscape nature. Amendments to Regional Law N° 3 of 19th February 1996" especially for the activities of scheduling the urban heritage of the old city.</p> <p>Collaboration can be set up between Institutions and with Research Bodies (GNDT).</p>
Parties involved	Municipality of Benevento Campania Regional Authority Benevento Provincial Authority
Phases and timeframe	Medium term: (2013)
Financial resources	To be found: Regional, state, and community financing for activities relating to protection against seismic risk
Expected results	Drawing up of seismic micro-zoning maps, directives, prescriptions, and operating instructions (technical disciplines for works to mitigate the risk).
Result indicators	Completion of the Plan

PROTECTION AND CONSERVATION PLAN Benevento site and buffer zone	
Objective 35	EXTENDING THE HUMAN RESOURCES INVOLVED IN SAFEGUARDING THE SITE
Project 35.1	Training courses in civil protection for cultural heritage
Description	<p>The Benevento Municipality intends working with environmental associations at a national and international level, to implement training activities for volunteers for protecting cultural and environmental assets, with particular attention being given to the risks related to calamities (earthquakes, floods).</p> <p>Great public pressure often results in a risk of decay of the cultural assets spread around the centre of the cities. In addition to voluntary vandalism, it is often unawareness and incorrect use of assets that increases the risk of decay and damage. In these events the voluntary organisations and forces of law and order concentrate on dozens of aspects, but nobody looks at safeguarding cultural assets. One can think about forging conventions to make volunteers available for exceptional manifestations, for tasks of surveillance of strategic points and notifying the forces of law and order of acts of vandalism, dissuading and explaining to citizens the risks related to improper use of cultural assets, and to valorise and make people aware of the minor assets in the city. Training courses for safeguarding the cultural heritage against natural risks are made up of two types of activity: Making moveable assets safe and recording damage to immovable assets.</p>
Parties involved	Campania Regional Authority Municipality of Benevento Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento and BAPPSAE Superintendency of Caserta and Benevento.
Phases and timeframe	by 2015
Financial resources	Funds to be found from POR FSE 2007-2013 Campania.
Expected results	Creation of a reference structure for training specialised operators for the restoration sector.
Result indicators	Number of volunteers trained

PROTECTION AND CONSERVATION PLAN Benevento territory	
Objective 36	IMPROVING THE STATE OF CONSERVATION OF THE LONGOBARD HERITAGE IN THE TERRITORY
Project 36.1	Programme for monitoring of the state of conservation of the archaeological areas along Via Sacra Langobardorum
Description	<p>The Via Sacra Langobardorum is an ancient pilgrim's route that, following the Appia Traiana, connects Benevento to the Sanctuary of St. Michael on Monte Sant'Angelo sul Gargano. The route along the "Via" is scattered with remains of votive chapels, xenodochia, and stopping places with wells. Over time, some of these places have become famous abbeys (like San Giovanni in Lamis in Puglia, now the Convent of San Matteo and San Leonardo di Siponto), others have been developed as urban centres (San Giovanni Rotondo and Monte Sant'Angelo). Ruins and scattered traces have been conserved of others, and of some only the place name has survived, shown on old geographic maps.</p> <p>The project envisages the setting up of a monitoring service for monumental assets and archaeological areas for the purpose of both periodic maintenance of the same, and for surveillance for security purposes.</p> <p>This monitoring will take the form of video surveillance and periodic inspections of the sites by specialist personnel, the Superintendencies, and the Municipalities in whose territory the assets lie. Monitoring will be managed using a GIS system that will also make it possible to compare the state of conservation and evolution of the sites at various times.</p>
Parties involved	Superintendencies
Phases and timeframe	Long term
Financial resources	To be found: Resources of the Bodies involved
Expected results	Setting up an integrated system for the wealth of knowledge and increasing it over time, in order to optimise management of the cultural heritage.
Result indicators	Number of sites monitored Frequency of monitoring

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.1	Project and intervention for the realisation of a system for the detection, control and correction of the rate of humidity in the locations of the Longobard Gallery, the adjoining rooms, the Angioina staircase, the cave-sanctuary and the connected rooms
Description	<p>This regards intervening for stabilising the different rates of humidity found in the various internal areas of the sanctuary complex in order to allow the establishment of better environmental conditions for the conservation of the wall coverings on which there are inscriptions of every type and period, as well as the conservation of prestigious architectural elements and remains in stone kept within the Sanctuary.</p> <p>In particular the areas encompassed in the zone underneath the current floor of the cave, located in correspondence of the wall covering the north of the sanctuary, show phenomena of more advance degradation. It is necessary to intervene on the conservation in relation to degradation because of humidity and for the maintenance in full efficiency depending on the continuation of the archaeological digs in the area to which they pertain.</p>
Actions	<ol style="list-style-type: none"> 1. Execution of specific surveys and analysis 2. Diagnosis of current general conditions of the rooms in relation to temperature and humidity 3. Project and intervention
Parties involved	Sanctuary of San Michele Arcangelo Superintendency for the BAPPSAE (architectural assets for the landscape and for historical heritage) of the Region of Puglia Municipality Monte Sant'Angelo
Phases and timeframe	By 2010.
Financial resources	Funds to be raised by the Municipality of Monte Sant'Angelo and the Superintendency BAPPSAE of the Region of Puglia.
Expected results	Stabilisation of temperature and rate of humidity inside the various rooms. Disappearance of mould and slurry
Result indicators	Mitigation of the vulnerability of the assets

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.2	Maintenance of external wall covering north side
Description	The purpose of the intervention is to improve the state of conservation of a part of the north wall covering of the Sanctuary. This is the last lot of works already carried out using funds of the Jubilee 2000. This intervention does not lead to valorisations of a static nature and/or structural interventions but only of cleaning the surfaces and sealing the blocks with eventual replacement of degraded elements.
Actions	<ol style="list-style-type: none"> 1. Realisation of maintenance
Parties involved	The Superintendency BAPPSAE of the Region of Puglia Sanctuary of S. Michele Arcangelo
Phases and timeframe	Short term: by 2009.
Financial resources	Funds: Sanctuary of S. Michele Arcangelo.
Expected results	Elimination of the state of degradation.

CONSERVATION AND SAFEGUARDING PLAN Monte Sant'Angelo site	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.3	Planning and conservation of the bronze doors
Description	Intervention on the causes of alteration in the wooden parts and restoration of the full efficiency of the hinges. Moreover, it is necessary to clean the bronze panels and restore the 'niellated' images.
Actions	<ol style="list-style-type: none"> 1. Execution of analyses to verify the causes of alteration in wooden components 2. Diagnosis of the general conditions of the bronze components 3. Project and intervention
Parties involved	Sanctuary of San Michele Arcangelo

	Municipality of Monte Sant'Angelo Superintendency BAPPSAE of the Region of Puglia
Phases and timeframe	By 2009.
Financial resources	Funds to be raised by the Municipality of Monte Sant'Angelo and the Superintendency BAPPSAE of the Region of Puglia.
Expected results	Elimination of the causes of alteration, recovery of full functionality of the doors, improvement in the visible condition of the bronze surface and niellated images.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.4	Planning and intervention on the portcullis and the column of the upper atrium
Description	The objective is that of obtaining chromatic continuity and the same level of maintenance to the columns and the portcullis which delimit the upper atrium accessing the Basilica, respect to the octagonal bell tower and the facade of the Sanctuary on which there have been interventions quite recently. It will be necessary to proceed with sanding the stone surfaces, rebuilding the degraded blocks and reconstructing the iron elements missing in respect to their decorative typology.
Actions	1. Project and intervention
Parties involved	Sanctuary of San Michele Arcangelo Superintendency for the BAPPSAE of the Region of Puglia. Municipality of Monte Sant'Angelo
Phases and timeframe	By 2010.
Financial resources	Sanctuary of San Michele Arcangelo Funds to be raised by the Municipality of Monte Sant'Angelo and the Superintendency BAPPSAE of the Region of Puglia.
Expected results	Recovery of visual uniformity of the upper atrium.
Result indicators	Maintenance of the conditions of visual balance of the atrium as whole.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.1	Completion of research on existing data on restorations carried out in the past and their arrangement (anamnesis)
Description	In order to set up a maintenance programme it is necessary to carry out an anamnesis of the status (of conservation) of the asset. A first step concerns the systematic collection of data relative to restorations carried out in the past to identify the problems there were over time and how they were solved (intervention techniques and materials used), this is also for describing parts of the building currently not measurable. Next to this it is necessary to identify and acquire all the studies and analyses made on the state of conservation of the asset to contribute to its correct definition. The whole of the data is to be archived in a computer using a specific dedicated programme.
Actions	1. Completion of the research and acquisition of existing data 2. Memorisation of data through computer-based archiving
Parties involved	Municipality of Monte Sant'Angelo Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of the Region of Puglia
Phases and timeframe	Starting from 2009.
Financial resources	Funds to be raised by the Municipality of Monte Sant'Angelo, the Superintendency BAPPSAE of the Region of Puglia and private sponsors.
Expected results	Completion and memorisation of the framework of knowledge on past restorations; preparation of tools and definition of procedures which allow maintenance to be programmed.
Result indicators	Number and quality of found and memorised data.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.2	Realisation of topical surveys finalised to the diagnostic project and analytical investigations
Description	The project foresees the realisation of topical surveys finalised at describing the state of conservation of the asset. This involves geometric surveys (metric survey); surveys on the materials used in the work and building techniques (descriptive survey and analytical investigations); surveys on restoration carried out in the past which have left a visible trace (stratigraphic analysis); surveys on the visible effects of degradation (survey of degradation and ruin and analytical surveys). The survey must be carried out using photogrammatic methods or laser Scanners for the geometrical part. All renderings will be in vectorial or digital format.
Actions	<ol style="list-style-type: none"> 1. Survey project 2. Realisation of geo-referenced metric surveys (see Knowledge Plan) with relative return in vectorial and digital format. 3. Stratigraphic analysis of elevations to identify past restorations 4. Survey and description of materials and constructive-executive techniques 5. Survey on the forms of degradation 6. In-depth examination of specific analytical investigations for categorising the materials and forms of degradation present 7. Return of the data on topical documents and description of the state of conservation.
Parties involved	Sanctuary of San Michele Arcangelo Municipality of Monte Sant'Angelo Superintendency BAPPSAE of the Region of Puglia
Phases and timeframe	Actions 1.1 and 1.2: by 2009. Actions 1.3-1.7: by 2010.
Financial resources	Funds to be raised by: Sanctuary of San Michele, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Prepare a set of precise topical surveys, as complete as possible, and renderings in paper and digital format, useful for monitoring the asset and setting up the programmed maintenance plan.
Result indicators	Number and quality of data found and memorised.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.3	Maintenance programme and start-up of cycle of interventions
Description	The Sanctuary is made up of a complex of buildings realised in different phases, built around the central fulcrum constituted by the cave. Their formulation and stratification imposes intervals of monitoring on the static hold of supporting structural elements, to be carried out using suitable tools, in order to prevent the occurrence of critical conditions following possible seismic events. Planning the monitoring will allow each structural component to be kept under control continuously over time. The data will be collected and memorised also on a computer and managed in order to consent the planning of conservation in short times. Moreover, the chalkstone which constitutes the predominant building material of the sanctuary is subject to disintegration in some parts. This process constitutes one of the main threats to the site above all in relation to the documentary value of the inscriptions on the walls. Already in the past, even if without much success, the owner of the candidate asset intervened to reduce this phenomenon. Now a more careful mapping of the area of risk is imposed together with the search for technological solutions in order to preserve this heritage. On the basis of surveys made, the plan is to set up a maintenance programme which allows the identification of priorities for intervention and actuation times. The objective is to realise maintenance even for small lots, but continuous over time.
Actions	<ol style="list-style-type: none"> 1. Mapping of the structures to undergo systematic monitoring

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	<ol style="list-style-type: none"> 2. Planning of interventions of: instrumental verification of the static hold of supporting structures; detailed verification of the degree of conservation of the buildings; identification of critical points 3. Plan for monitoring the degree of erosion and degree of efficiency of adopted actions 4. Collection and management of data. 5. Planning of conservation and/or consolidation 6. Identification of priorities of intervention and definition of the overall programme 7. Start up of the first maintenance cycle.
Parties involved	Sanctuary of San Michele Arcangelo Municipality of Monte Sant'Angelo Superintendency BAPPSAE Region of Puglia
Phases and timeframe	Starting from 2009 onwards
Financial resources	Funds to be raised by: Municipality of Monte Sant'Angelo, Superintendency BAPPSAE of the Region of Puglia, Private sponsors.
Expected results	Preparation of the maintenance programme with identification of the interventions to be realised, times and relative checks.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.4	Planning and implementation of a data bank for monitoring the state of conservation and archiving of past and current restorations
Description	This concerns a specific computer programme which will allow archiving, management and correlation of data relative to restorations carried out in the Sanctuary over time, including those that will be realised in the future. Reference is made to historical data relative to the phases of construction and transformation of the structures of the Sanctuary over time; the historical data relative to restoration carried out to document materials, technique, times and phases of realisation; metric surveys, descriptive surveys, stratigraphic analyses, surveys on degradation, analytical investigations, etc. The purpose is to correlate data originating from different phases and sources of knowledge to allow both the implementation of knowledge of the Sanctuary in itself and to describe the state of conservation of the materials on which to set up the maintenance programme. This data bank can be realised as a common tool shared all over the network.
Actions	<ol style="list-style-type: none"> 1. Designing the computer system 2. Insertion and implementation of data
Parties involved	Sanctuary of San Michele Arcangelo Municipality of Monte Sant'Angelo Superintendency BAPPSAE of the Region of Puglia Centres specialised in Categorisation and Restoration, to be identified
Phases and timeframe	Medium term: starting from 2009 onwards.
Financial resources	Funds to be raised by: Sanctuary of San Michele, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE of Puglia, Private sponsors.
Expected results	Preparation of memorised data on the state of conservation of the Sanctuary; Preparation of a cognitive base to realise the maintenance programme and implement knowledge on past restorations.
Result indicators	Quantity of data inserted into the data bank.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.5	Maintenance interventions on frescos and tombstones in the sanctuary
Description	During the progress of digs and restoration of the sanctuary carried out from 1950 to the end of the 60s, some frescos were detached from the walls. The project foresees the verification of the state of conservation of the materials used for realising the support of the frescos and the conditions of the pictorial film; on this data it will be possible to plan eventual maintenance in predictions of their exposure in the museum of the Sanctuary. The same verification will be made on the frescos still on the site and present in various points of the Sanctuary buildings and on the lapidus and tombstone remains, the latter are conserved in lapidus museum of the Sanctuary.
Actions	<ol style="list-style-type: none"> 1. Verification of the state of conservation of the detached frescos and lapidus elements 2. Intervention
Parties involved	Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2009 onwards.
Financial resources	Funds to be raised by: Sanctuary of San Michele Arcangelo, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE, Private sponsor.
Expected results	Improvement of the state of conservation of assets.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.6	Monitoring and conservation plan of the inscriptions on the wall structures, internal and external
Description	After the digs uncovered locations of the Longobard era, dedicatory and Runic inscriptions of inestimable documentary value were discovered on the most ancient walls which constitute the most wide and important corpus of medieval inscriptions. All the structures of the sanctuary are characterised by the presence of true inscription programmes and symbols scratched onto the stone. The necessity to take every precaution for documentary survey and conservation of these inscriptions therefore imposes the activation of an effective monitoring system for the retaining wall surfaces, subjected to different environmental conditions according to their location. It is also necessary to make casts of the most important inscriptions in order to ensure secure evidence.
Actions	<ol style="list-style-type: none"> 1. Verification of the state of conservation of the inscriptions and the wall structures on which they lie. 2. Execution of detailed surveys and casts. 3. Protection
Parties involved	Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2009 onwards
Financial resources	Funds to be raised by: Sanctuary of San Michele Arcangelo, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE, Private sponsors.
Expected results	Survey and detailed categorisation of all the inscriptions and improvement of their state of conservation.
Result indicators	Mitigation of the vulnerability of the inscriptions.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 38	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE SANCTUARY
Project 38.7	Maintenance plan for the wood choir
Description	Recently restored, the wooden coir of the Sanctuary requires regular monitoring in order to prevent further degradation.
Actions	<ol style="list-style-type: none"> 1. Monitoring of wooden elements 2. Planning of interventions 3. Interventions
Parties involved	Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2010 onwards.
Financial resources	Funds to be raised by: Sanctuary of San Michele Arcangelo, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE, Private sponsors.
Expected results	Form on the vulnerability of the wooden structures of the chancel.
Result indicators	Mitigation of the vulnerability of the chancel.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 39	ELABORATION OF MAINTENANCE PROGRAMME ON THE STRUCTURES ANNEXED TO THE SANCTUARY
Project 39.1	Research on existing data on past restorations and computer-based memorisation of the same
Description	<p>The complex of the Sanctuary includes a series of minor buildings dedicated to cult and not. These are the:</p> <ol style="list-style-type: none"> a) CHURCH MADONNA DELLA LIBERA b) CHAPEL DI S. LUCIA c) CHAPEL DI S. ROCCO d) MONASTERY e) EX ORPHANAGE ROOMS <p>The current state of conservation of these buildings is generally good. Recent maintenance carried out during works for the 2000 Jubilee have also determined the solution of some structural criticalities which still require careful monitoring and consequent planning of conservation.</p> <p>The maintenance programme should follow the anamnesis of the state (of conservation) of the considered buildings. This will lead to the systematic collection of data relative to past restorations to identify which problems came up over time and how they were solved (techniques of intervention and materials used), also to contribute to the description of parts of the buildings which cannot be surveyed. In parallel, it is necessary to identify and acquire all the study-analysis carried out on the state of conservation of the asset to contribute to its correct definition. The set of data must be archived on a computer using a specific dedicated programme. These are the same actions programmed for the Sanctuary and explained in Objective 2.</p>
Actions	<ol style="list-style-type: none"> 1. Completion of research and acquisition of existing data 2. Memorisation of data through computer-based archiving
Parties involved	Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo.
Phases and timeframe	Starting from 2010 onwards
Financial resources	Funds to be raised by: Sanctuary of San Michele Arcangelo, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE, Private sponsors.
Expected results	Completion and memorisation of the framework of knowledge on past restorations; preparation of tools and definition of procedures which allow programming of maintenance.
Result indicators	Number and quality of data found and memorisation.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 39	ELABORATION OF A MAINTENANCE PROGRAMMED FOR THE ANNEXES TO THE SANCTUARY
Project 39.2	Realisation of topical surveys finalised to the diagnostic project and analytical survey and project of intervention
Description	The project foresees the realisation of topical surveys finalised at describing the state of conservation of the buildings annexed to the sanctuary. This involves geometric surveys (metric survey); surveys on the materials used in the work and building techniques (descriptive survey and analytical investigations); surveys on restoration carried out in the past which have left a visible trace (stratigraphic analysis); surveys on the visible effects of degradation (survey of degradation and ruin and analytical surveys). The survey must be carried out using photogrammatic methods or laser Scanners for the geometrical part. All renderings will be in vectorial or digital format.
Actions	<ol style="list-style-type: none"> 1. Survey project 2. Realisation of geo-referenced metric surveys (see Knowledge Plan) with relative return in vectorial and digital format. 3. Stratigraphic analysis of elevations to identify past restorations 4. Survey and description of materials and constructive-executive techniques 5. Survey on the forms of degradation 6. In-depth examination of specific analytical investigations for categorising the materials and forms of degradation present 7. Return of the data on topical documents and description of the state of conservation.
Parties involved	Sanctuary of San Michele Arcangelo Municipality of Monte Sant'Angelo Superintendency BAPPSAE of the Region of Puglia
Phases and timeframe	Actions 1.1 and 1.2: by 2009. Actions 1.3-1.7: by 2010.
Financial resources	Funds to be raised by: Sanctuary of San Michele, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Prepare a set of precise topical surveys, as complete as possible, and renderings in paper and digital format.
Result indicators	Number and quality of data found and memorised.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo site	
Objective 39	ELABORATION OF A MAINTENANCE PROGRAMME FOR THE ANNEXES TO THE SANCTUARY
Project 39.3	Maintenance and start-up programme of the first cycle of interventions
Description	On the basis of surveys carried out, a maintenance programme will be set up for all the buildings annexed to the Sanctuary, which allows the identification of the priority of intervention and actuation times. The objective is to realise maintenance even for small lots, but continuous over time.
Actions	<ol style="list-style-type: none"> 1. Identification of priorities of intervention and definition of the overall programme 2. Start up of the first maintenance cycle
Parties involved	Sanctuary of San Michele Arcangelo Municipality of Monte Sant'Angelo Superintendency BAPPSAE Region of Puglia
Phases and timeframe	Starting from 2010 onwards
Financial resources	Funds to be raised by: Municipality of Monte Sant'Angelo, Superintendency BAPPSAE of the Region of Puglia, Private sponsors.
Expected results	Preparation of the maintenance programme and identification of the interventions to be realise with times and relative checks.
Result indicators	Mitigation of the vulnerability of the site.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 40	IMPROVE THE STATE OF CONSERVATION OF THE NORMAN WALL BELT
Project 40.1	Maintenance on the visible parts of the wall circle to implement knowledge and use of the same
Description	Little evidence remains of the ancient wall belt which, due to its location and state of conservation, makes valorisation difficult with the exception of the largest block to the south of the monastic complex of S. Francesco. The current state of conservation does not required interventions of a static and/or structural nature but only of cleaning the surfaces and sealing the blocks with eventual replacement of degraded elements with the dual purpose of implementing knowledge of it and how to use this circuit.
Actions	<ol style="list-style-type: none"> 1. Identification of the visible parts and total planning of interventions on the entire wall circuit 2. Survey on the state of conservation and relative maintenance
Parties involved	Municipality of Monte Sant'Angelo Superintendency for BAPPSAE of the Region of Puglia
Phases and timeframe	By 2010.
Financial resources	Municipality of Monte Sant'Angelo Mountain Community of Gargano
Expected results	Increase in the parts of the urban circle which are visible and removal of the state of degradation.
Result indicators	Increase in the extension of the parts of requalified walls.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 41	ENSURE THE STATE OF CONSERVATION OF SAN PIETRO - TOMBA DI ROTARI – SANTA MARIA MAGGIORE THE COMPLEX
Project 41.1	Monitoring and programmed maintenance plan
Description	The current state of conservation can be considered as good, also in consideration of recent conservation, still in progress, by the Superintendency of Puglia. The preset objective is to prepare an effective monitoring plan, also in relation to the conservation of decorative stone elements which characterise the complex. The monitoring plan will be realised based on a databank into which they will be collected and implemented: <ol style="list-style-type: none"> a) all data on interventions done and in progress by the Superintendency, b) the topical surveys finalised at describing the state of conservation of the asset (metric surveys with photogrammatic or laser scanner techniques, surveys on the material used in the work and building techniques; survey on past restoration which have left visible traces; surveys on the visible effects of degradation.
Actions	<ol style="list-style-type: none"> 1. Survey project 2. Realisation of georeferenced surveys (see Knowledge Plan) with relative return in vectorial and digital format. 3. Stratigraphic analysis of the elevations to identify past restorations 4. Survey and description of material and construction-execution techniques 5. Survey of forms of degradation 6. In-depth examination of specific analytical investigations for categorising the materials and forms of degradation present 7. Return of the data on topical documents and description of the state of conservation 8. Formation of databank of restorations 9. Elaboration of monitoring plan
Parties involved	Sanctuary of San Michele Arcangelo Parish S. Maria Maggiore Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Actions 1.1 and 1.2: by 2009. Actions 1.3-1.8: by 2010. Action 1.9 to follow
Financial resources	Funds to be raised by: Sanctuary of S. Michele Arcangelo, Municipality of Monte Sant'Angelo,

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	National Park of Gargano, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Elaboration of monitoring plan and programmed maintenance
Result indicators	Number and data acquired and memorised Elaboration of topical maps for monitoring Planning aimed at future interventions

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 42	COMPLETION OF THE CASTLE RESTORATION PROJECT
Project 42.1	Completion of the restoration project for the castle
Description	The castle, subject of restoration and consolidation work in the past, is now undergoing restoration. The main guide lines consist of conservative restoration of the east and west towers and the southern prospect; new definition of quota of utilisation of the "Piazza d'Armi"; restoration of the areas situated at + 9.50m; and finally, the external arrangement.
Actions	1. Completion of the restoration project
Parties involved	Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	By 2010.
Financial resources	Funds existent originating from the Region of Puglia.
Expected results	Improvement in the conditions of conservation and use.
Result indicators	Number and quality of interventions carried out.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 42	COMPLETION OF THE CASTLE RESTORATION PROJECT
Project 42.2	Elaboration of a programmatic maintenance and conservation plan
Description	On the basis of acquired data, a maintenance programme will be set up which allows the identification of the priority of intervention and actuation times. The objective is to realise maintenance even for small lots, but continuous over time.
Actions	1. Identification of the priorities of intervention and definition of the overall programme
Parties involved	Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	By 2010.
Financial resources	Funds to be raised by: Sanctuary of S. Michele Arcangelo, Municipality of Monte Sant'Angelo, Gargano National Park, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Programming of maintenance interventions to be realised with the times and relative controls.
Result indicators	Number and quality of interventions carried out.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 43	MAINTENANCE AND RESTORATION OF THE CHURCHES AND THE MONASTIC COMPLEXES OF THE HISTORICAL CENTRE
Project 43.1	Verification of property and restoration of public use of the churches of: San Salvatore, Santa Apollinare, Eremo di S. Aniello
Description	All the routes trodden by the travelling pilgrims towards the cave of Arcangelo were scattered with hermitages, hostess, monasteries, hospitals, xenodocheions, cells, priories, rock churches and abbeys which played the part of intermediate stops for rest and prayer. The presence of these places became even more common near to the Sanctuary, within the wall belt, where still today there are various religious settlements of different sizes and importance. Among the minor settlements are those listed. Their dedication is often a reminder of saints

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

	visiting this place (St. Aniello); in other cases it is an indication of cult in the first phase of Christianity. In the case of St. Salvatore, some scholars hypothesise its dating to the Longobard period and consider it to be the last testimonial of a Longobard Palatium which was during the course of later transformations of the places over the centuries. Given that these assets are private property, verification of ownership is required to consent the actuation of private/public participate formulae for recovery and use.
Actions	1. Identification of ownership 2. Elaboration of public/private participate formulae for recovery and use
Parties involved	Municipality of Monte Sant'Angelo Superintendency for BAPPSAE of the Region of Puglia
Phases and timeframe	By 2009.
Financial resources	Municipality of Monte Sant'Angelo
Expected results	Realise the possibility of intervention and recovery
Result indicators	Number of agreements realised

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 43	MAINTENANCE AND RESTORATION OF THE CHURCHES AND THE MONASTIC COMPLEXES OF THE HISTORICAL CENTRE
Project 43.2	Elaboration of a programme of interventions for the conservation and valorisation of the assets
Description	The project foresees the realisation of topical surveys finalised to describing the state of conservation of the churches and monastic complexes of the historical centre: Church of S. Salvatore, Santa Apollinare, Hermitage of S. Aniello and monastic complexes of the Cappuccini with annex to the church of S.S. Sacramento and the complex of Clarisse with annexed Church S.S. Trinità'. This involves geometric surveys (metric survey); surveys on the materials used in the work and building techniques (descriptive survey and analytical investigations); surveys on restoration carried out in the past which have left a visible trace (stratigraphic analysis); surveys on the visible effects of degradation (survey of degradation and ruin and analytical surveys). The survey must be carried out using photogrammatic methods or laser Scanners for the geometrical part. All renderings will be in vectorial or digital format. On the basis of the data acquired, a programme of conservation and maintenance will be set up which allows the identification of priorities of intervention and actuation times. The objective is that of realising maintenance interventions even for small lots, but continuous over time.
Actions	1. Realisation of topical surveys finalised to the diagnostic project and analytical investigations 2. Elaboration of the programme of conservative interventions and identification of the priorities of intervention
Parties involved	Municipality of Monte Sant'Angelo Superintendency BAPPSAE of the Region of Puglia
Phases and timeframe	By 2012.
Financial resources	Funds to be raised by: Municipality of Monte Sant'Angelo, Gargano National Park, Superintendency BAPPSAE Region of Puglia, Private sponsors. Furthermore, for the monastic complexes: Sanctuary of San Michele Arcangelo Parish S. Maria Maggiore Archbishop's administration.
Expected results	Preparation of the maintenance programme with identification of interventions to be realised, times and relative checks.
Result indicators	Number and quality of data found and memorised Number of interventions of conservation and maintenance planned.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 44	IMPROVE THE STATE OF CONSERVATION OF THE SAN FRANCESCO COMPLEX
Project 44.1	Completion of the cognitive phase introductory to the completion of the restoration in progress with the realisation of topical surveys and analytical investigations
Description	The project foresees the realisation of topical surveys finalised at describing the state of conservation of the Complex of San Francesco, including the Church, the Monastery and the Museum of art and popular traditions. This involves geometric surveys (metric survey); surveys on the materials used in the work and building techniques (descriptive survey and analytical investigations); surveys on restoration carried out in the past which have left a visible trace (stratigraphic analysis); surveys on the visible effects of degradation (survey of degradation and ruin and analytical surveys). The survey must be carried out using photogrammatic methods or laser Scanners for the geometrical part. All renderings will be in vectorial or digital format.
Actions	1. Realisation of topical surveys finalised to the diagnostic project and analytical investigations
Parties involved	Archbishop 's administration Parish S. Francesco Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2008 onwards.
Financial resources	Funds to be raised by: Archbishop 's administration, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Prepare a set of precision topical surveys as complete as possible and renderings in paper and digital format.
Result indicators	Number and quality of data found and memorised.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 44	IMPROVE THE STATE OF CONSERVATION OF THE SAN FRANCESCO COMPLEX
Project 44.2	Completion of the restoration project
Description	The project currently in progress is finalised to the definitive recovery of all the area of the complex for the optimisation and increased use of the asset in relation to the destined usages already present therein. The church is currently the subject of consolidation of the retaining structures, financed by the municipality of Monte Sant'Angelo. Among the main objectives is the recovery of the east wing of the complex and the restoration of the bell tower, up to now excluded from the interventions of restoration in progress.
Actions	1. Structural planning of the bell tower and recovery of the east wing 2. Intervention
Parties involved	Sanctuary of San Michele Arcangelo Parish S. Maria Maggiore Archbishop 's administration Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2008 onwards.
Financial resources	Funds to be raised by: Archbishop 's administration, Municipality of Monte Sant'Angelo, Gargano National Park, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Improvement in conditions of conservation
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 44	IMPROVE THE STATE OF CONSERVATION OF THE SAN FRANCESCO COMPLEX
Project 44.3	Elaboration of a programmatic maintenance plan
Description	On the basis of acquired data, a maintenance programme will be set up which allows the identification of the priority of intervention and actuation times. The objective is to realise maintenance even for small lots, but continuous over time.
Actions	1. Identification of the priorities of intervention and definition of the overall programme
Parties involved	Archbishop 's administration parish S. Francesco Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	2013 onwards.
Financial resources	Funds to be raised by: Archbishop 's administration, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE Region of Puglia, Private sponsors.
Expected results	Programming of the interventions effective over time.
Result indicators	Number and quality of interventions carried out.

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 45	HEIGHTENING OF THE STATE OF CONSERVATION OF THE URBAN FABRIC IN THE HISTORICAL CENTRE
Project 45.1	Study and programming of forms of support for the owners of the private properties to incentivate the recovery and maintenance in good efficiency of the properties and traditional fixtures in line with the technical norms of actuation in force
Description	Taking into account that are already in force the norms for landscape protection and specific technical norms of actuation to guarantee safeguarding the historical centre with particular attention to the characteristic fixtures and constructive and architectural elements, following the success of the initiative promoted by the Gargano National Park, a few years ago, by virtue of which numerous non-conform fixtures were replaced, the intention is to study forms of direct intervention for private owners of properties in zone A1, in order to give a concrete motivation for the total recovery of non-conform situations currently in existence. The idea is to activate, in concert with the other Bodies, methods of economic sustenance for private owners which are "structural", or continuous over time, to consent recovery despite the yearly financial statement of the involved Bodies. In particular it will be necessary on one side to study forms of tax cut on the part of the Municipality, from the other attempt to build a common economic fund among various Bodies which they tap into for supporting private initiatives.
Actions	1. Study of forms of tax cut 2. Co-ordination among the Bodies for the construction of the common fund for recovering private properties in the historical centre 3. Actuation
Parties involved	Municipality of Monte Sant'Angelo Gargano National Park Body Mountain Community of Gargano other territorial Bodies
Phases and timeframe	2009 onwards.
Financial resources	Funds to be raised: Municipality of Monte Sant'Angelo, Gargano National Park Body Mountain Community of Gargano Other territorial Bodies.
Expected results	Sensitisation of private owners and recovery of situations of degradation.
Result indicators	Mitigation of the state of degradation and improvement of the general facies generale of the historical centre.

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN Monte Sant'Angelo buffer zone	
Objective 45	HEIGHTENING OF THE STATE OF CONSERVATION OF THE URBAN FABRIC IN THE HISTORICAL CENTRE
Project 45.2	Optimisation of controls and new interventions to guarantee the observance of the norms for protecting and safeguarding the historical centre
Description	Intervention is foreseen on all the recent renovations carried out by private owners on the properties in zone A1 in which the norms in force are not expected. In particular, the intent is to intervene in a short time with adequate administrative actions (ordinance of removal), to order the replacement of non-conform roofing layers and the recovery of the colour white on all the prospects of the private buildings. With regard to this, the Drawing Office of the Municipality has already carried out a punctual photographic survey and has prepared the ordinances for the restoration of the roofing system using curved and Roman tiles according to that established by the technical norms.
Actions	<ol style="list-style-type: none"> 1. Punctual completion of the photographic survey of Zone A1 2. Notification of prepared ordinances 3. Control of the compliance of the same 4. Activation of new procedures in the cases of non-compliance (emission of ordinances for the removal of each architectural element and finishing material with the recovery of the status of the locations).
Parties involved	Municipality of Monte Sant'Angelo
Phases and timeframe	2009 onwards
Financial resources	Municipality of Monte Sant'Angelo
Expected results	Re-establishment of the uniformity of the general vision of the historical centre.
Result indicators	Improvement of the general facies of the historical centre.

8.3 ENHANCEMENT PLAN

8.3.1 NETWORK

A more far-reaching valorisation of the traces of Lombard civilisation and culture within the network and, more generally, in Italy and Europe will be attempted by creating greater coordination and a closer relationship between the places in the network and the other Lombard sites of interest that fall within the programme for extending the network to other Italian sites and those in the Geo-Cultural corridor of Lombard migration from Northern Europe to Italy.

In addition to furthering relations due to activities for extending common knowledge (see Knowledge Plan), it will be possible to facilitate diffusion of the value of these sites and extend knowledge about role the Lombards had in the formation of Italian and European culture.

Connections between the various sites can be forged by creating routes and itineraries, which must be promoted in various ways: bulletin boards, publications, illustrative brochures, etc – which help to understand how the events of the Longobards can be followed over a large area and can constitute a guide for visits and more detailed discovery by all. This applies particularly to the monasteries that represent the points of greatest interest and where the most important traces of the Lombard period are conserved.

8.3.2 CIVIDALE DEL FRIULI Site, buffer zone and Territory

The main goals for improvement of the heritage of Cividale included in the candidacy are:

- Creating a coordination system for the entire museum offer;
- Upgrading the Monastery of Santa Maria in Valle and strengthen the role of the Longobard Tempietto in the city and in the tourist route system;
- Improve possibilities for the use and presentation of the archaeological area of Patriarchal Palace.

These three goals are linked to each other. The creation of a coordination system for the entire museum offer –

that foresees the redistribution of some artefacts according to the specific nature of the various exhibition sites (the Archaeological Museum, The Christian Museum and Duomo's Treasure) – is in fact based on two main projects: the organisation of the visiting system at the Cividale site heritage by creating a single ticket that allows the rationalisation and management of tourist flows; the creation of the new "Tempietto and Monastery Museum", planned as part of the upgrading of the Monastery of Santa Maria in Valle. Upgrading of the Monastery also foresees the creation of new links between the Monastery itself, the Longobard Tempietto and the city of Cividale by means of designing more connection routes between the sites, thus increasing the role of this part of the town – and the Tempietto – within the context of the entire old town centre. Moreover, the Monastery, thanks to the wealth and quality of the spaces contained therein, is suited to becoming both a "museum of itself" and a reference place for the entire town, with the creation of a Visitors' Centre and the setting up of a Multi-function Cultural Centre that will entail various levels of interest and use, such as the Archives and Document Centre, the International Early middle ages Art and Architecture Research and Document Centre and an Archaeo-osteological Archive Laboratory.

With regards to the buffer zone, the main projects are aimed at:

- Creating thematic visiting routes for the walls and the churches, with preparation of suitable educational material;
- Creating panoramic routes along the banks of the Natisone river expanding relations between natural spaces and monuments;
- continuing to improve the quality of spaces in the Historical city centre.

The visiting itineraries to be promoted in various ways, publications, illustrative brochures etc, are also planned for the Territory in order to improve the results of the various studies carried out in recent years and to make the presence of the Longobard culture understandable, in both its specific aspects but also in order to enhance the settlement

history and the structuring that they gave to the Territory.

8.3.3 BRESCIA Site, buffer zone and Territory

The monastery of San Salvatore-Santa Giulia presents high standards of valorisation, thanks to its recent total recuperation and its destined as a museum. In relation to the cultural and tourist offer moreover, it plays a leading part and is constantly present in the actions and objectives of the administration of the Municipality of Brescia. Lastly, the comments and suggestions of the thousands of visitors who regularly visit the site contribute to an effective identification of the most suitable actions to take for a continuous increase in the present standards.

The next recovery of the near monumental area will guarantee the same standards achieved by monastery also in this zone; the objective of the enhancement intervention being carried out at the moment is that of creating one organic complex without interruption between the Museum of the town and the archaeological area.

In the buffer zone there are interventions of considerable capacity in progress, above all regarding the recovery and valorisation of numerous historical buildings, among which palaces and churches rich in works of art.

With regard to the Territory, priority has been given to the objective of making the numerous contexts which recently emerged during archaeological survey campaigns usable through valorisation; suitable showcase sites will also be identified for the numerous findings, in some cases in the Museums already present in the territory, in other cases to be designed from scratch.

8.3.4 CASTELSEPRIO-TORBA Site, buffer zone and Territory

In view of better co-ordinating the valorization activities performed in the whole Territory of Castelseprio and Torba (as per the institutional agreement undersigned by the managing bodies), the area will be re-unified also physically by opening up a new trail connecting the remains on the summit plateau with the buildings

in the valley. An expanded cultural offer and the enhanced availability of touring arrangements are also envisaged.

The most important valorization initiative as for the Castelseprio Archaeological Park (including the upper castrum and the church of St. Maria foris portas) consists in completing layout and opening to the public (2009) of the Antiquarium, located in the former monastery of San Giovanni with the explanation panels upgraded by including multi-language texts and pictures on the monuments.

Enhanced qualification and valorization initiatives are also envisaged for the Torba complex in order to make it more easily accessible by creating new explanation panels for educational and popularization purposes.

As for the surrounding Territory, a link will be created between the individual historical, monumental and archaeological components as related to the presence of Longobards in the Giudicaria of Seprio.

8.3.5 SPOLETO

Site, buffer zone and Territory

One of the main preoccupations of the administrative strategy should concern, other than the preservation and enhancement of its architectural, artistic and environmental assets, also the possibility of making it functional for its local population and visitors, so as to assert the idea of a living, shared, and fertile culture. Hence, there is a need not only for the enhancement, restoration, and expansion of the already existing libraries, archives, museums, theatres, parks, villas, gardens and historic homes, but also for promoting initiatives aimed at opening these places to the public, and turning them into cultural centers, albeit in the respect of specific rules and regulations.

8.3.6 CAMPELLO SUL CLITUNNO

Site, buffer zone and Territory

The aims of the Enhancement Plan regarding the site and its pertaining Territory are to:

- Improve the usability of the area by expanding the service offered, with the creation of a

small information point and book shop;

- Improvement of the presentation of the Clitunno Tempietto with the placement of some illustrative educational panels and a copy of the monumental inscription that is now in Perugia;
- Increase of the Tempietto's role in relation to the Clitunno river and the ancient Via Flaminia.

The Municipality of Campello is working on a project for this very purpose that will allow the monument area to be expanded, including the route of the ancient Via Flaminia, which is now of local value, owned by and the responsibility of the Municipality; this means that the enclosed area can be equipped with better facilities.

8.3.7 BENEVENTO

Site, buffer zone and Territory

The uniqueness of the city that results from its layers of thousands of years is the starting point for highlighting action in Benevento. These actions are based on the usefulness of enhancement its heritage, principally archaeological and historical, and associating it with the services available that are directly related, such as extending the local museum system and extending the relationships between the city's plentiful archaeology and the urban functions of everyday life.

The objectives of the Plan are:

- To coordinate management of assets in the site.
- To extend museum activity
- To valorise the urban archaeological heritage
- To improve redevelopment of the ancient city
- To extend museum activity
- To valorise the territory's archaeological heritage
- To valorise the Longobard cultural heritage
- To extend services to those visiting the site

The Enhancement Plan for Benevento highlights the need to take direct and indirect action on the widespread quality of a large portion of the old city, with a view to social and environmental sustainability. Many actions simultaneously involve the buffer zone and a larger portion of the

city, which can coincide with the boundaries of the old city or could extend to areas in the Samnite hinterland and a vast territorial area.

8.3.8 MONTE SANT'ANGELO

Site, buffer zone and Territory

The main objectives of the enhancement of the candidate site are:

- Optimise the museum system inside the Sanctuary (Lapidus Museum and Devotional Museum) through the realisation a new museum set-up and the creation of a new independent internal route. This objective has the purposes of decongesting the Angoine staircase and determining a notable increase in the potential capacity of accommodation of the sanctorial complex.
- In-depth of archaeological investigations in the external area to the north of the Sanctuary and its museumification.
- Ordinary, extraordinary maintenance and refunctionalisation of the spaces currently available not in use next to the Sanctuary.

The three objectives are connected between them as they aim at optimising the capacity of the museum offer equipping the Sanctuary with new spaces.

As far as the buffer zone is concerned, the main projects are finalised at:

- Realising topical visiting routes to the walls and churches with the preparation of opportune didactic devices;
- Continue to improve the quality of the areas in the Historical centre.

The visiting itineraries, to be promoted in different forms of publication, explanatory brochures etc, are foreseen for the Territory as well in order to valorise the results of the numerous research carried out above all in recent years and to distribute knowledge of the Via Sacra Langobardorum which has contributed to the structuring of the Territory.

**8.6.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
NETWORK	1 EXTENDING RELATIONS BETWEEN LOCATIONS IN THE NETWORK AND OTHER ITALIAN LONGOBARD SITES	1.1 Creation of “Longobard Itineraries”: Places of Worship – Necropolises – Settlements 1.2 Creation of a network of “Longobard Monasteries in Italy”
	2 EXTENDING RELATIONS BETWEEN LOCATIONS IN THE NETWORK AND THE EUROPEAN GEO-CULTURAL CORRIDOR	2.1 Creation of theme itineraries: “Routes of Longobard origins and civilisation”
CIVIDALE DEL FRIULI SITE	3 UPGRADING OF MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN DEGREE OF ENHANCEMENT OF THE LONGOBARD TEMPIETTO	3.1 Implementation of preparatory phases of the restoring of the Monastery to be usable as a Visitors’ centre and Cultural Centre
		3.2 Improvement work on the Longobard Tempietto
		3.3 Maintenance of the exterior surfaces of the Cloisters (windows)
		3.4 Creation of the “Visitors’ centre”
		3.5 Design and creation of the “Monastery and Tempietto Museum”
		3.6 Preparation of spaces for the housing of the Archaeo-osteological Centre (preliminary phase)
		3.7 Conservation project of site to place new functions and carry them out
	4 ENHANCEMENT OF RUINS OF THE PATRIARCHAL PALACE AND EXTENSION OF THE ARCHAEOLOGICAL MUSEUM	4.1 Improvement of exhibition area in Patriarchal Palace and archaeological area at Palazzo dei Provveditori
		4.2 Improvement of educational equipment in the Archaeological Museum’s exhibition rooms
	5 EXPANSION OF CHRISTIAN MUSEUM AND IMPROVEMENT OF CULTURAL OFFER IN CATHEDRAL AREA	5.1 Completion and extension of Christian Museum and Duomo’s Treasure
5.2 Conservation and improvement work on Crypt		
6 CREATION OF COORDINATION SYSTEM FOR MUSEUM OFFER	6.1 Organisation of museum visiting system with single ticket	
	6.2 Governing access to monuments-museums and booking of visits	

**8.6.3 ENHANCEMENT PLAN

		51.2 Identification of interventions of improvement in visibility-use of the walls
	52 ENHANCEMENT OF THE CHURCHES AND MONASTERIES OF MONTE SANT'ANGELO	52.1 Definition of visiting routes around the system of churches and monasteries
		52.2 Interventions of improvement of visibility-use
	53 HEIGHTENING OF THE LEVEL OF USE OF THE MUSEUM OF ART AND POPULAR TRADITIONS	53.1 Re-functionalising plan for the areas and review of showcase routes
	54 ENHANCEMENT THE ACTIVITIES OF REQUALIFICATION IN THE HISTORIC CENTRE	54.1 General survey on internal pathways and planning for the restoration of uniformity of the materials
		54.2 Study of new internal connecting routes between the car parks in the initial welcoming areas and the Sanctuary Highlighted by bilingual signs
		54.3 Re-order of publicity boards and definition of a detailed regulation for installing shade tents, publicity signs and informative panels
		54.4 Study and planning of the valorisation of piazza Carlo d'Angiò with the elimination of the car park, organisation of a green area of connection with the Castle and review of existing services
	55 ENHANCEMENT OF THE TERRITORIAL CULTURAL OFFER	55.1 Identification and valorisation of the <i>Via Sacra Langobardorum</i> route
		55.2 Optimisation of the regional museum network

ENHANCEMENT PLAN Network	
Objective 1	EXTENDING RELATIONS BETWEEN LOCATIONS IN THE NETWORK AND OTHER ITALIAN LONGOBARD SITES
Project 1.1	Creation of "Longobard Itineraries": Places of Worship – Necropolises – Settlements
Description	The Site's heritage is the Highest expression of Longobard civilisation. The creation of stronger connections between these assets by identifying integrated, privileged routes will facilitate their valorisation. In Italy there are also other traces of the Longobard presence, made up of remains of settlements, places of worship, necropolises, and museum collections of artefacts that can contribute to better understanding of this people's culture. Putting this evidence in the network and creating specific visitor routes on a wider territorial scale will make it possible to obtain a wider knowledge of Lombard civilisation.
Actions	<ol style="list-style-type: none"> 1. Identification of places to be added to Lombard itineraries. 2. Drawing up agreements with interested institutions and bodies in the various areas. 3. Creating itineraries and routes. 4. Creating specific bulletin board for the itineraries. 5. Creating instructive and scientific multi-media materials on the itineraries and on themes that link the various locations. 6. Creation of a specific space on this topic in the website.
Parties involved	All the stakeholders
Phases and timeframe	As from 2009
Financial resources	To be found.
Expected results	Extension of knowledge about Lombard culture
Result indicators	Number of locations involved Number of itineraries created Quantity of material produced

ENHANCEMENT PLAN Network	
Objective 1	EXTENDING RELATIONS BETWEEN LOCATIONS IN THE NETWORK AND OTHER ITALIAN LOMBARD SITES
Project 1.2	Creation of a network of "Longobard Monasteries in Italy"
Description	Monasteries founded by the Longobard are the principal places of worship and centres of power from the Lombard age. They represent the Highest expression of their civilisation still to be found and contain most of the assets of greatest historical, artistic, and architectural value. Many of the assets in the Site network's heritage come from monasteries (in Cividale, Brescia, Castelseprio Torba, and Benevento). Many of the initiatives proposed on the management plan relate to extending knowledge about and valorising these monasteries that, in some cases, involve structures of similar importance in the territory in which they belong (see Valorisation Plan for Cividale, Objective 4; valorisation Plan for Cividale, Project 9.3; Knowledge Plan for Brescia, Project 2.1).
Actions	<ol style="list-style-type: none"> 1. Censusing and scheduling the Lombard monasteries and their assets 2. Drawing up agreements with interested institutions and bodies in the various areas. 3. Including in the network and creating itineraries and routes that are dedicated to them in the various areas. 4. Creating specific bulletin boards. 5. Producing scientific and informative multi-media material 6. Creating a specific space in for the network on the Website.
Parties involved	All stakeholders in the Site; Bodies and institutions in the locations involved in the project
Phases and timeframe	As from 2010
Financial resources	To be found.
Expected results	Extending the possibility of understanding and visiting Lombardic monastic structures.
Result indicators	Number of sites involved Quantity of material produced

ENHANCEMENT PLAN Network	
Objective 2	EXTENDING RELATIONS BETWEEN LOCATIONS IN THE NETWORK AND THE EUROPEAN GEO-CULTURAL CORRIDOR
Project 2.1	Creation of theme itineraries: "Routes of Longobard origins and civilisation"
Description	The extent of the Network to sites in the European geo-cultural corridor of Longobard migration to Italy, is intended to include the situations touched by the Longobards in regions outside Italy in the valorisation programme as well, as these keep remnants and evidence of their presence and culture and exhibit the same in museums. Reconstruction of this route can come about, in addition to improving knowledge about the traces conserved (see Knowledge Plan for the Network), by creating theme itineraries linking the various locations in order to allow in-depth study of various aspects of the Lombard tradition and better use of the traces kept.
Actions	<ol style="list-style-type: none"> 1. Identifying and censusing the locations to be included in theme itineraries 2. Drawing up of bilateral or multi-lateral agreements with countries affected by the routes. 3. Creating itineraries and routes. 4. Creating specific bulletin boards. 5. Producing scientific and informative multi-media material 6. Creating a specific space in for this area on the Website.
Parties involved	Stakeholders: Institutions and bodies in European countries covered by the itineraries
Phases and timeframe	As from 2010
Financial resources	To be found among financing programmes from the European Community (Cultural Programme 2007-2013; Interreg ...).
Expected results	Extension of the possibility of understanding and use of the traces of the Lombard civilisation on a larger scale.
Result indicators	<p>Number of countries involved</p> <p>Number of locations involved</p> <p>Number of itineraries created</p> <p>Quantity of material produced</p>

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 3	UPGRADING OF MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN DEGREE OF ENHANCEMENT OF THE LONGOBARD TEMPIETTO
Project 3.1	Implementation of preparatory phases of the restoring of the Monastery to be usable as a Visitors' centre and Cultural Centre
Description	<p>An approximate feasibility project will be carried out to check the compatibility of the Monastery of Santa Maria in Valle's spaces with the allocation of use required by the functions associated with the Cultural Centre; these include: the Monastery and Temple Museum, the Archives and Documents Centre, the International Early Middle Ages Art and Architecture Research and Document Centre and the Archaeo-osteological Centre.</p> <p>The aim of the study is:</p> <ul style="list-style-type: none"> a) to decide whether it is possible to carry out some work in phases (e.g. the creation of the Monastery and Temple Museum) before starting planning of the renovation of the entire complex; b) checking the relationship between the work required to adapt the complex to its new functions and the potential of the Monastery space in order to reduce modifications of the structure and type to a minimum. <p>Agreements must be drawn up between the various institutions who will be involved in creating the Cultural Centre before any action is taken.</p> <div style="text-align: center;">   </div> <p>1. View of the site 2. Drowing of the Gastaldaga: Santa Maria in Valle Monastery, the Longobard Tempietto, the church of San Giovanni</p>

	<p>Outline of functions to be checked in feasibility project</p> <p>CREATION OF "VISITORS' CENTRE"</p>  <p>Map of ground floor.</p> <p>CREATION OF THE CULTURAL CENTRE</p>  <p>Map of first floor</p>  <p>Map of second floor.</p>	<ol style="list-style-type: none"> 1) Visitors' centre and speaking area 2) Access route to Temple and relative spaces 3) Spaces tied to Monastery and its possibility of use as a "museum of itself" 4) Ursuline Vegetable Garden 5) Temple Courtyard 6) Temple 7) Monastery and Temple Museum 8) History of Art Specialised School (already set up) 9) Spaces to be used during first creation phase as the Archaeo-osteological laboratory <p>Table. 2b-2c.</p> <ol style="list-style-type: none"> 1) Archives and Documents Centre. 2) Early Middle Ages Art and Architecture Research and Document Centre and hospitality area 3) Museum spaces linked to Monastery and its use as a "museum of itself" 4) Common space for educational activities 5) History of Art Specialised School (already set up) 6) Regional Archaeo-osteological Archive. 7) Lodgings
<p>Actions</p>	<p>FEASIBILITY STUDY</p> <ol style="list-style-type: none"> 1. Approximate check on existing surveys with any additions of sections needed to identify the volumetric measurements of the site. 2. Preliminary check on static conditions, referring to current regulations for the new uses allocated to the various parts of the complex. 3. Check of current plants system with relative checks on available plant plans. 4. Check on adaptations required by the currently safety regulations in force, according to new destination of use (Fire prevention regulations and Local Health Authority and competent Superintendence Dept rules). 5. Definition of work strategies for the recovery of the complex. <p>SETTING UP OF CULTURAL CENTRE</p> <ol style="list-style-type: none"> 6. Definition and approval of protocols of intents between competent authorities for the transfer-sharing of archives making up the "Archives and Documents Centre". 7. Framework agreement with University of Udine for the creation of the Information Technology-Multimedia Laboratory. 8. Finalisation of the setting up and management of the International Early Middle Ages Art Research and Document Centre. 9. Definition of interconnections and collaboration agreements between the Early Middle Ages Art and Architecture Research and Document Centre and parties from the Cultural Centre with other cultural institutions, such as the Norway Science Academy, CISAM and the Saint Michael Study Centre. 	
<p>Parties involved</p>	<p>Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Parish of Santa Maria Assunta, University of Udine, Norway Science</p>	

	Academy, CISAM and the Saint Michael Study Centre.
Phases and timeframes	Feasibility study by first half of 2008 Protocols by 2009
Financial resources	Feasibility study financed by Municipality of Cividale del Friuli funds: €. 9,000.00
Expected results	Indication of dimensional and performance impact that the new uses of the Cultural Centre will have on the Monastery spaces, from a structural, safety system and architectural barrier point of view.

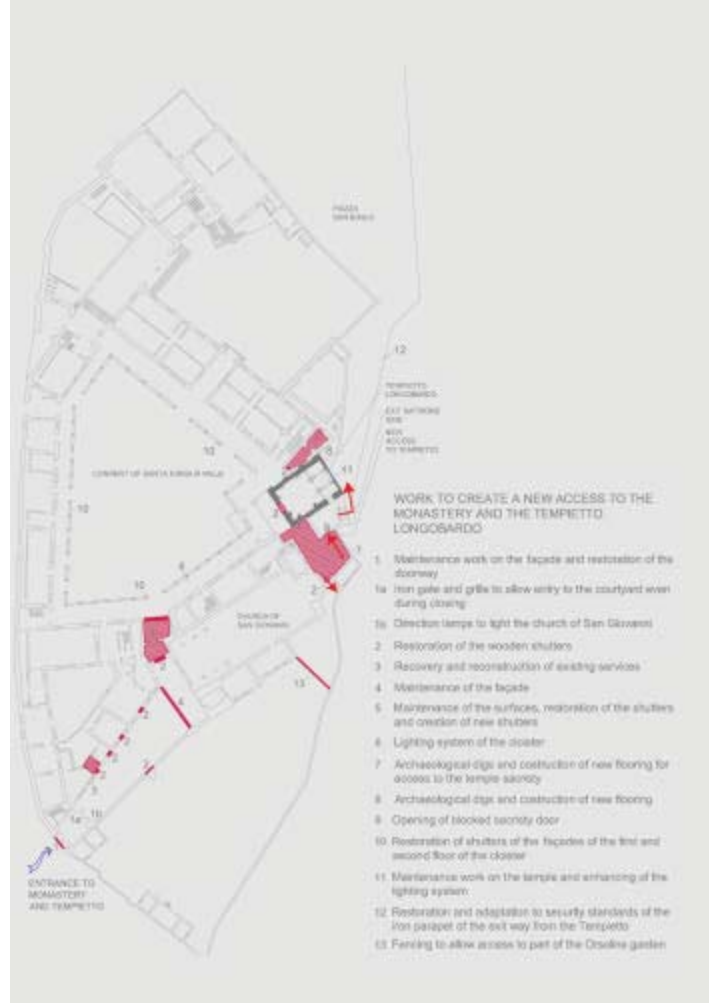

ENHANCEMENT PLAN Cividale del Friuli site

Objective 3	UPGRADING OF MONASTERY OF SANTA MARIA IN VALLE AND INCREASE OF DEGREE OF ENHANCEMENT OF LONGOBARD TEMPIETTO
-------------	---

Project 3.2	Improvement work on Longobard Tempietto
-------------	---

Description

To increase the current enhancement level of the Temple, and depending on the upgrading of the entire monastery of Santa Maria in Valle site, it is necessary to modify and expand the access system for the Monastery and Temple, in order to create visiting routes that aim at better possibilities of appreciating the monuments. The projects will be carried out in three phases. The first phase foresees the creation of a new entrance for the Monastery itself and for the Longobard temple, extending the route from Via Monastero Maggiore through the San Giovanni courtyard and also reaches some important areas of the Monastery. The work includes both maintenance work on the surfaces (plaster, windows, and floors) and work to set up the new access system to the Temple, including the extension of the lighting and safety systems. Access from Via Monastero Maggiore will also allow disabled persons to enter the temple, who will be able to enjoy a part of the Temple without entering the hall, with the opening on request of the antique wooden door that leads to the cloisters.

Description of work foreseen in first phase

A second phase foresees the creation of a visiting route for the upper floors of the

	<p>Monastery, which will provide visibility of the temple's exterior walls with relative frescoes. The stairs to the upper floors will be checked for this purpose, with the route being bordered by partition walls and the creation of a surveillance system.</p> <p>A third phase will involve the planning and creation of access to the entire Ursuline Vegetable Garden, the position of which, compared to the Monastery, the Longobard temple and the River Natisone is of enormous interest in the town. After archaeological survey a flooring system will be created (green or paved differently) that will allow this space to be identified from the entrance from the Temple Courtyard.</p>
	 <p>Outline of access route to monastery and temple with Highlighting of routes</p>
<p>Actions</p>	<p>FIRST PHASE (see table 3).</p> <ol style="list-style-type: none"> 1. Maintenance of San Giovanni courtyard façade and restoration of the wooden entrance door (1- 1.a). Creation of lighting system for courtyard and Church of San Giovanni and proposal for the building of an iron entrance door (1b) to allow visibility of the courtyard from Via Monastero Maggiore, while keeping the wooden entrance door open. 2. Restoration of wooden windows (2). 3. Recovery and renovation of existing bathrooms (3) 4. Maintenance of pronaos façade in the Church of San Giovanni (4). 5. Maintenance of Monastery entrance surfaces with restoration and creation of windows (5). 6. Creation of a lighting system for cloisters (6). 7. Project for demolition and carrying out of archaeological digs needed to improve use of area around Temple and relative new flooring (7-8) (see Knowledge Plan, Project 2.1) 8. Removal of buffered door next to sacristy to create new entrance to the Temple from the Monastery, with exit from walkway on River Natisone (9). 9. Restoration of façade windows on first and second floor of cloisters (10) 10. Maintenance work on Temple and expansion of lighting system (11). 11. Restoration and adaptation to safety regulations of iron parapet on Temple exit route (12) 12. Creation of fencing to allow limited access to a part of the Ursuline Vegetable Garden (13) 13. Checking, planning and creation of a surveillance system. <p>SECOND PHASE</p> <ol style="list-style-type: none"> 14. Planning and creation of visiting route to first floor of Monastery limited to area adjacent to Temple. 15. Placement of temporary partition walls to limit access to Monastery areas. 16. Checking, design and creation of a surveillance system.

	<p>THIRD PHASE</p> <p>17. Creation of an archaeological dig campaign (see Knowledge Plan, project 2.1)</p> <p>18. Arrangement of area with new flooring.</p> <p>19. Parapet on River Natisone to be made safe.</p>
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; International Early Middle Ages Art and Architecture Research and Document Centre
Phases and timeframe	First phase: by 2008 Second phase: by 2009 Third phase: by 2010
Financial resources	First phase: funds already allocated by the Municipality of Cividale del Friuli: € 176.000,00 Other funds to be found through private and bank sponsorship. Second and third phase: funds to be found by: Municipality of Cividale del Friuli in the context of the Three-year Work Plan 2008-2010 (total € 1,500,000.00); Region of Friuli Venezia Giulia; private and bank sponsorship.
Expected results	Making some parts of the ground floor of the Monastery visitable, with improvement of the state of conservation and optimisation of the more prestigious architectural parts; improvement of visibility of Temple architecture; improvement of Temple access system; increase of knowledge of history of the Monastery and the Temple; favour the understanding of the link between the Temple architecture and the Monastery architecture; increase the tourist load capacity of the entire complex.
Result indicators	Increase in quality and number of useable spaces

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 3	UPGRADING OF THE MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN DEGREE OF ENHANCEMENT OF THE LONGOBARD TEMPIETTO
Project 3.3	Maintenance of external surfaces of the Cloisters (windows)
Description	<p>The work aims to improve the aesthetic appearance of the cloisters of the Monastery through the recovery of the wooden window shutters, shutters that have various problems regarding maintenance.</p> <div style="display: flex; justify-content: space-around;">   </div> <p>1. A view of the cloisters 2. Detail of the windows to be conserved</p>
Actions	<ol style="list-style-type: none"> 1. Recovery project for wooden window shutters 2. Carrying out of work.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE Superintendence Dept
Phases and timeframes	By 2008
Financial resources	Funds already allocated by the Municipality of Cividale del Friuli: € 24.000,00
Expected results	Improvement of the aesthetic view of the cloister area and the state of conservation of the wooden elements.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 3	UPGRADING OF THE MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN THE DEGREE OF ENHANCEMENT OF THE LONGOBARD TEMPIETTO
Project 3.4	Creation of the "Visitors' centre"
Description	<p>The project foresees the creation of a Visitors' centre in the part of the building adjacent to the courtyard of San Giovanni, i.e. a place where visits to the town and the area are organised, both logistically and as an offer of information services of various levels. The centre will also include the Single Ticket office for the site, a bookshop, spaces to be used as multimedia "virtual routes" stations, as an introduction to the entire heritage contained in the site itself, in the Buffer Zone, and in the area (see table 1). This service will contribute to easing tourist flows to the site heritage, offering alternatives to visits.</p> <div style="display: flex; justify-content: space-around; align-items: flex-end;"> <div style="text-align: center;">  <p>1</p> </div> <div style="text-align: center;">  <p>2</p> </div> </div> <p>1. A view the courtyard of San Giovanni 2. Map with the location of the Visitors' Centre</p>
Actions	<ol style="list-style-type: none"> 1. Recovery project for a part of the Monastery of Santa Maria in Valle at the entrance from Porta San Giovanni with the creation of the Visitors' Centre, ticket office and bathrooms. 2. Recovery work. 3. Creation of a computerised info point on the site and the network and a bookshop.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE Superintendence Dept
Phases and timeframe	designing phase by 2009 Work phase after 2009.
Financial resources	Funds to be found by: Municipality of Cividale del Friuli in the context of the Three-year Work Plan 2008-2010 (total €. 1,500,000.00); Region of Friuli Venezia Giulia; private and bank sponsorship.
Expected results	Control and organisation of tourist flows directed towards the Longobard temple and the site heritage; Increase of information on the site heritage.
Result indicators	Increase of diffusion of quality and quantity of information about site.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 3	UPGRADING OF MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN DEGREE OF ENHANCEMENT OF LONGOBARD TEMPIETTO
Project 3.5	Designing e creation of the "Monastery and Tempietto Museum".
Description	<p>In the context of the expansion of the cultural offer of the Monastery, linked to the visits to the Longobard temple, a museum exhibition will be set up adjacent to the temple to help visitors to understand and know the history of the evolution of the Monastery and the Temple, using traditional and multimedia exhibition modes (see table 1). This aim could also be fulfilled by the exhibition of artefacts that are evidence of the complex's various happenings, that can "tell" its history; in particular what remains of the items placed in the tombs of the Longobard aristocrats who were buried in San Giovanni; the Early middle age stone fragments of the church furnishing of the religious buildings of the site (S. Giovanni</p>

	and Temple); medieval frescoes detached from the Temple walls. The carrying out of this project, together with project 1.2, will allow tourist flows to be distributed in a better manner throughout the tourist sites included in the candidacy, offering alternatives for visits.
Actions	<ol style="list-style-type: none"> 1. Formalisation of the agreements between the various Authorities involved in the setting up of the "Monastery and Temple Museum" (Municipality of Cividale, Friuli Venezia Giulia BAPSAE Archaeological and Archive Superintendence Dept, Parish of Santa Maria Assunta, Archbishop's Curia of Udine). 2. Project for the restoration of rooms next to the Temple to adapt museum space including the preparation of the portico and static work connected with the recovery of the upper floors. 3. Preparation project of museum spaces with creation of educational devices that will illustrate the history of the Temple and the Monastery. 4. Maintenance work on the tombstones being moved in the museum.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Parish of Santa Maria Assunta
Phases and timeframe	Designing by 2009 Work carried out in 2009-2010.
Financial resources	Funds to be found by: Municipality of Cividale del Friuli in the context of the Three-year Work Plan 2008-2010 (total €. 1,500,000.00); Region of Friuli Venezia Giulia; private and bank sponsorship.
Expected results	Rationalisation and increase of quality of museum offer; Check and organisation of tourist load within monastery site.
Result indicators	Increase of usable monument and museum surface area.

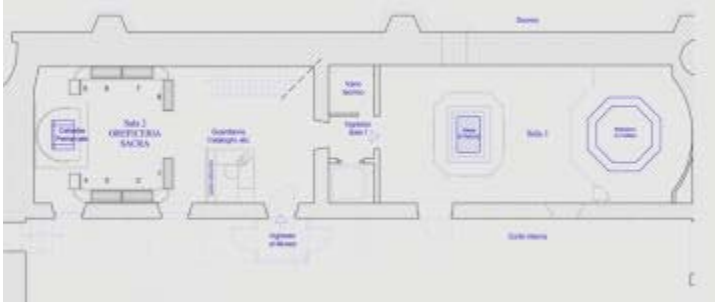

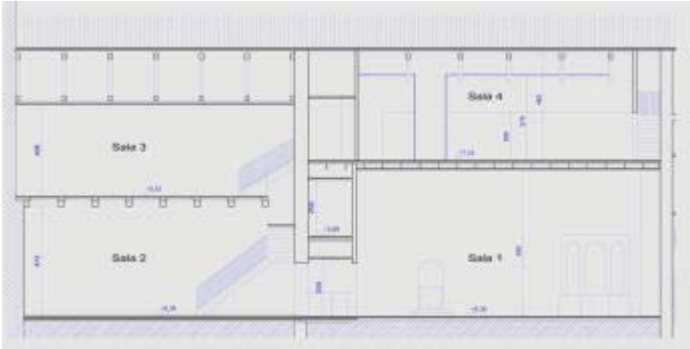

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 3	UPGRADING OF THE MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN THE DEGREE OF ENHANCEMENT OF THE LONGOBARD TEMPIETTO
Project 3.6	Preparation of spaces for the housing of the Archaeo-osteological Centre (preliminary phase)
Description	The setting up of the Cultural Centre in the Monastery of Santa Maria in Valle foresees the creation of an Archaeo-osteological laboratory that is considered to be extremely important for the start up of specific studies on the skeleton remains found in several Longobard burial sites and for the acquisition of anthropological information that will be added to the archaeological knowledge. In this first phase, the project foresees the temporary transfer of the osteological material – kept by the archaeological superintendence dept in various locations – to the Monastery and the preparation of a laboratory in a dedicated area. The permanent housing for the Archaeo-osteological laboratory will be decided during the main monastery conservation project phase
Actions	<ol style="list-style-type: none"> 1. Temporary transfer of materials to ground floor of monastery. 2. Creation of laboratory.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept
Phases and timeframes	By 2008-2009
Financial resources	Funds to be found by Friuli Venezia Giulia Archaeological Superintendence Dept.
Expected results	Reorganisation of anthropological findings located in various superintendence department sites; possibility of cataloguing and study of finds.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 3	UPGRADING OF THE MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN THE DEGREE OF ENHANCEMENT OF THE LONGOBARD TEMPIETTO
Project 3.7	Conservation project of site to place new functions and carry them out
Description	This is the general planning for the conservation of the Monastery with relative studies and calculations for functional adaptation, structural improvement and the introduction of all the technological and system equipment necessary for the new allocations of use. After planning, the work will then be carried out.
Actions	<ol style="list-style-type: none"> 1. Site restoration project for placement of new functions with relative analytical investigations (see Knowledge Plan)

	2. Creation of the project.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept
Phases and timeframes	Planning phase: 2009-2012 Work phase: after 2012
Financial resources	Estimated cost: € 6,500,000.00 Funds to be found by: Municipality of Cividale del Friuli in the context of the Three-year Work Plan 2008-2010 (total € 1,500,000.00); Region of Friuli Venezia Giulia; private and bank sponsorship.
Expected results	Revitalisation of the Monastery as a central reference place for the town of Cividale's cultural and tourist life.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 4	ENHANCEMENT OF RUINS OF THE PATRIARCHAL PALACE AND EXTENSION OF THE ARCHAEOLOGICAL MUSEUM
Project 4.1	Improvement of exhibition area in Patriarchal Palace and archaeological area at Palazzo dei Provveditori
Description	The enhancement of the ruins of Palazzo Patriarcale foresees the extension of the visiting itinerary of the ruins, with bilingual Italian-English panels, after moving part of the archaeological materials currently stored on site; overall adaptation of rooms to safety regulations and adaptation of lighting system.
Actions	<ol style="list-style-type: none"> 1. Classification of materials currently kept in the archaeological area of Palazzo Patriarcale and relative moving 2. Adaptation of safety and lighting systems for archaeological area of Palazzo Patriarcale and the archaeological area at Palazzo dei Provveditori 3. Improvement of exhibition space inside archaeological area at Patriarcale with creation of mobile walls. 4. Increase of educational equipment
Parties involved	Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept
Phases and timeframes	By 2008
Financial resources	Funds allocated by Friuli Venezia Giulia Archaeological Superintendence Dept: € 27,540.00
Expected results	Improvement of presentation of use of archaeological ruins of Palazzo Patriarcale; Improvement of educational offer.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 4	ENHANCEMENT OF RUINS OF THE PATRIARCHAL PALACE AND EXTENSION OF THE ARCHAEOLOGICAL MUSEUM
Project 4.2	Improvement of educational equipment in the Archaeological Museum's exhibitions rooms
Description	The enhancement of the National Archaeological Museum (ground floor, first and second floors) foresees the increase of education equipment with the inclusion of bilingual Italian-English texts, the expansion and adaptation of the video-surveillance system.
Actions	<ol style="list-style-type: none"> 1. Copying and translation of existing educational material into English 2. Creation of new educational material 3. Adaptation and extension of video-surveillance circuit.
Parties involved	Friuli Venezia Giulia Archaeological Superintendence Dept
Phases and timeframes	By 2008
Financial resources	Funds allocated by the Friuli Venezia Giulia Archaeological Superintendence Dept: € 1,428.00
Expected results	Expansion and arrangement of Museum's educational equipment.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 5	EXPANSION OF CHRISTIAN MUSEUM AND IMPROVEMENT OF CULTURAL OFFER IN CATHEDRAL AREA
Project 5.1	Completion and extension of Christian Museum and Duomo's Treasure
Description	<p>The aim is to extend the cultural offer intended to understand the heritage kept in the museum, in particular the Ratchis altar and the Callisto baptismal font. After further studies on these items (see Knowledge Plan, Project 1.1 and Conservation, Project 4.1-4.2) the educational equipment on the exhibition route being prepared, including multimedia equipment will also be finalised.</p> <p>Work, in its final stages, is currently being carried out on the museum, which has included the arrangement of the Cathedral courtyard – the restoration of the halls next to the Cathedral to expand exhibition space from one to four rooms, thus allowing materials to be reorganised. The expansion of the museum will be possible thanks to the recovery of further space in the bell tower. The recovery of the tower has two goals: making the tower fit for visits up to the belfry, the creation of a museum about the history of the “Cividale towers” and creating spaces for the exhibiting of liturgical furniture. This project is part of the general organisation of exhibition space in the Cividale complex, with the thematic specialisation of each museum.</p> <div style="text-align: center;">  <p>Project map of Archaeological Museum</p>  <p>Project Section of Archaeological Museum</p> </div>
Actions	<ol style="list-style-type: none"> 1. Increase of educational equipment in museum exhibitions. 2. Adaptation project for tower, in order to visit belfry. 3. Creation of exhibition space in the tower.
Parties involved	Parish of Santa Maria Assunta; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept
Phases and timeframes	<ol style="list-style-type: none"> 1. Work ongoing, completion by first half of 2008. 2. 3. Starting from 2010
Financial resources	<ol style="list-style-type: none"> 1. - Funds found in context of funding allocated in 2007 by the Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept: €. 20,000.00 and the Friuli Venezia Giulia Regional Administration: €. 50,000.00 2.3 - Funds to be found according to the Friuli Venezia Giulia Regional Administration law, R.L. n.53/85.
Expected results	Increase and preparation of museum's educational equipment.
Result indicators	Increase of exhibition areas; Quantity of data illustrating history of heritage.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 5	EXPANSION OF CHRISTIAN MUSEUM AND IMPROVEMENT OF CULTURAL OFFER IN CATHEDRAL AREA
Project 5.2	Conservation and improvement work on Crypt
Description	This is a project to restore the eighteenth-century area of the Cathedral Crypt, to solve the problem of damp, for system adaptation and for accessibility so that the space can be used for both liturgical functions and for the organisation of temporary exhibitions.
Parties involved	Parish of Santa Maria Assunta; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept
Phases and timeframes	Starting from 2010-2011.
Financial resources	Funds to be found according to Friuli Venezia Giulia Regional Administration law, R.L. n.53/85.
Expected results	Expansion of Cathedral exhibition offer.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 6	CREATION OF COORDINATION SYSTEM FOR MUSEUM OFFER
Project 6.1	Organisation of museum visiting system with single ticket
Description	The project foresees the organisation of the visiting system for the main Cividale heritage sites (Archaeological Museum, Palazzo de Nordis Museum – about to be opened, the Christian Museum, the Monastery and Temple Museum, the Monastery of Santa Maria in Valle) by creating a Single Ticket that will allow visiting routes to be rationalised and tourist flows to be managed in a better manner, in order to reduce impact. The single ticket will be distributed at the Visitors' centre in the Monastery of Santa Maria in Valle (see Project 1.4).
Actions	<ol style="list-style-type: none"> 1. Agreements between various parties involved and protocols of intent. 2. Creation of visiting system using single ticket.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Parish of Santa Maria Assunta
Phases and timeframes	By 2009
Financial resources	To be found by the Institutions involved
Expected results	Rationalisation and better management of tourist flow.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 6	CREATION OF COORDINATION SYSTEM FOR MUSEUM OFFER
Project 6.2	Governing access to monuments-museums and booking of visits
Description	This project is to control visits to the site heritage by organising and controlling the tourist flow, in order to reduce the number of visitors to the most sensitive areas, and offering alternative visits and uses, reducing tourist impact. A first project concerns the creation of the "Monastery and Temple Museum" (Project 1.5) – which will allow alternatives to visiting the Temple – and the creation of planned tourist packages.
Actions	<ol style="list-style-type: none"> 1. Controlling access to the Temple, to the ruins of Palazzo Patriarcale and to the Christian Museum. 2. Organisation of the visit to the Monastery with access to the temple further to booking.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Parish of Santa Maria Assunta.
Phases and timeframes	By 2009
Financial resources	To be found by institutions involved
Expected results	Rationalisation and better management of tourist flow.
Result indicators	Increase of diffusion of the quality and quantity of the information about the site; Increase of load capacity of heritage included in candidacy.

ENHANCEMENT PLAN Cividale del Friuli site	
Objective 7	ENHANCEMENT OF HERITAGE OF CODICOLOGICAL ARCHIVES
Project 7.1	Creation of Archives and Documents Centre
Description	<p>The city of Cividale possesses a wealth of historical document archives that permit the study of the city's history together with that of a wide area in the North of Italy and Central Europe, which was part of the patriarchal state. These Archives – belonging to various parties – are currently kept in several sites and some of these, for example the Historical Archive of the Magnificent Community and the Capital Archives have been dispersed. The goal is to create an Archives and Documents Centre within which these archives can be joined together and kept, promoting various types of activity: continuing reorganisation, cataloguing and replanning; digitalisation of materials to include them in a scientifically organised database (www.patriarcatoaquileia.it); promotion of research and diffusion activities linked to the possibility of the exhibiting of some documents in the Monastery of Santa Maria in Valle (see Project 1); the possibility of connection with other archive holders that contain materials on the history of the Aquileia Patriarchy.</p> <p>In order to create the Centre, it is necessary to stipulate agreements of intent among the various owners of the archives themselves.</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;">  <p>1</p> </div> <div style="text-align: center;">  <p>2</p> </div> </div> <p>1. The works in the Cividale Archives 2. A page of Edgberto Codex</p>
Actions	<ol style="list-style-type: none"> 1. Recognition and census of archives 2. Stipulation of agreements for the physical joining of documents into a single archive at the Monastery of Santa Maria in Valle 3. Moving of archives 4. Digitalisation and implementation of a consultable databank
Parties involved	Municipality of Cividale del Friuli; Parish of Santa Maria; Archbishop's Curia of Udine; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Regional Archive Superintendence Dept, Promoting committee of the Aquileia Patriarchy Project
Phases and timeframes	<p>1 and 4 – currently being carried out</p> <p>2 – starting in 2009</p> <p>3 – starting in 2011</p>
Financial resources	<p>1 and 4- are now funded by the Friuli Venezia Giulia Regional Administration and the Banca Popolare Friuladria bank</p> <p>2 and 3: funding to be found by Subjects involved.</p>
Expected results	To bring together archives in one single place and make them consultable; create a rapid consultation system to be used via digital technology; allowing access and consultation of archives online.
Parties involved	Number of documents in archive; amount of data filed in computers; amount and frequency of consultations; number of publications

ENHANCEMENT PLAN Cividale del Friuli site and buffer zone	
Objective 8	ENHANCEMENT OF HISTORICAL WALLS
Project 8.1	Definition of wall visiting routes

Description

Hypotheses for the organisation of wall visiting routes

The wall system of Cividale includes the urban ring that formed the boundary of the town in the Roman Era and in the Early Middle Ages and the ring that forms the boundary of the four villages. The ruins of the walls from the first ring can currently only be seen in some parts of the town - as archaeological traces and as stretches incorporated into later constructions - while its possible development is documented by both the historical sources and by the digs carried out in various periods. The second ring- that of the villages - instead, has been preserved in rather long stretches and is mainly elevated. The wall visiting route has the following goals to achieve:

- Identify all visible parts of the first ring of wall and the beginning of a route that allows the direction of the circuit to be understood (table 7);
- For the village walls, identify the most important segments from the point of view of construction characteristics and of the best visibility conditions (table 7);

	<p>c) Identifying areas where panels explaining the history of the walls can be positioned; d) Organise a guided tour programme that allows access to parts of the walls now part of private property.</p> <p>It is also necessary to plan and create specific illustrative brochures of the walls' history and educational panels to be placed in various areas along the route.</p>
Actions	<ol style="list-style-type: none"> 1. Designing and identification of the routes for the town and village walls 2. Organisation of a guided tour programme including entrance to private property. 3. Creation of illustrative brochures. 4. Creation of educational panels about history of walls.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept, Italian Institute of Castles (Friuli Venezia Giulia area).
Phases and timeframes	Starting from 2009
Financial resources	<p>Funds to be found by the Municipality of Cividale del Friuli</p> <p>Funds to be found by the Friuli Venezia Giulia Region, Regional law 10/2000: "Interventions for the protection, conservation and enhancement of the fortified architecture of Friuli Venezia Giluia".</p>
Expected results	<p>Increase the possibility of identifying the parts of urban and village walls in the town; integrate the development and progress of the wall circuit adequately in relation to the urban fabric;</p> <p>Increase of stretches of walls that are visible and optimised by the urban and village rings.</p>
Parties involved	Increase of visible surface area

ENHANCEMENT PLAN Cividale del Friuli buffer zone	
Objective 8	ENHANCEMENT OF HISTORICAL WALLS
Project 8.2	Identification of improvement work for the visibility and use of the walls
Description	<p>There are some contexts in the urban and village walls circuit that have various types of potential for enhancement. These are parts that need archaeological digs to bring to light the direction of the Roman and Early Middle Ages walls (Fortress - 2); parts where pedestrian paths can be created to help visibility of walls (car park North Building Area – 1) or where recently built additions can be removed (3a). Two parts are especially interesting: the part relating to the urban wall circuit, brought to light at the base of Palazzo Craigher Canussio that could be improved by expanding the exhibition space with an exhibition of the dig findings and by the creation of appropriate educational panels; the stretch corresponding to the Brossana village walls, the only village where it is possible to see the direction of the defence system without interruption. The creation of a view – or a partial possibility for access to the courtyards – next to the Church of San Biagio (15) would allow the use of this system and the enhancement of the entire square in front of it.</p>
Actions	<ol style="list-style-type: none"> 1. Work on the fortress with digs (see Knowledge Plan forms) and relative arrangement of the area. 2. Arrangement of green area at the Edil Nord Area car park. 3. Expand use of ruins at Palazzo Craigher Canussio with creation of new educational equipment and extension of exhibition after completion of dig data (see Knowledge Plan). 4. Modify visibility of defence wall at Palazzo Craigher Canussio by removing added parts. 5. Making area in Borgo Brossana visible.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Craigher Canussio Foundation, Italian Castles Institute (Friuli Venezia Giulia section); private subjects.
Phases and timeframes	Starting from 2008-2009 to 2011.
Financial resources	<p>Funds to be found by the Municipality of Cividale del Friuli</p> <p>Funds to be found according to the Friuli Venezia Giulia Regional Administration law, R.L. 10/2000: "Interventions for the protection, conservation and enhancement of fortified architecture in Friuli Venezia Giluia".</p>
Expected results	<p>Improve visibility of urban and village walls; integrate the development and progress of the wall circuit adequately in relation to the urban fabric.</p>
Parties involved	<p>increase of stretches of urban and village walls that are visible ;</p> <p>Increase of wall spaces used.</p>

ENHANCEMENT PLAN Cividale del Friuli buffer zone	
Objective 9	ENHANCEMENT OF CHURCHES AND MONASTERIES IN CIVIDALE
Project 9.1	Definition of visiting systems for the churches and monasteries
Description	<p>The visiting route aims to optimise the Longobard aristocracy churches, in some cases founded by the Longobards or privileged burial sites; in particular, San Giovanni in Xenodochio, Santa Maria di Corte, San Salvatore (now San Silvestro) and San Martino. A system of routes and educational materials must be created that allows the signs of Longobard presence in Cividale to be recognised, Also in contexts that have undergone several changes in the architectural organisation over the centuries.</p> <p>The monasteries of San Giorgio in Vado, of San Domenico and of San Francesco are ancient and artistically and architecturally prestigious. The latter will be included in this route, also in its role as a conference centre.</p> <div style="text-align: center;">  <p>View of the city with the main churches</p> </div> <div style="text-align: center;">  <p>Hypotheses for the organisation of churches and monasteries visiting routes</p> </div>
Actions	<ol style="list-style-type: none"> 1. Designing and identification of routes. 2. Organisation of a guided tours programme with set access. 3. Creation of illustrative brochures. 4. Creation of educational panels on the history of churches.

Parties involved	Municipality of Cividale del Friuli Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept Parish of Santa Maria Assunta
Phases and timeframes	Starting in 2009
Financial resources	Funds to be found by: Municipality of Cividale del Friuli; Friuli Venezia Giulia Regional Administration; private and bank sponsorships.
Expected results	Increase of knowledge of places and heritage linked to the Longobard presence in Cividale; Increase of attention on places and heritage linked to the Longobard presence in Cividale.
Parties involved	Increase of amount of information on heritage. Increase of amount of illustrative material available for visitors

ENHANCEMENT PLAN Cividale del Friuli buffer zone	
Objective 9	ENHANCEMENT OF CHURCHES AND MONASTERIES IN CIVIDALE
Project 9.2	Identification of improvement work for visibility-use
Description	In the context of the visiting route foreseen for the churches (Project 7.1) work will be carried out to reorganises spaces in front of churches to improve visibility and use.
Actions	<ol style="list-style-type: none"> Arrangement of area near to the Church of San Giovanni in Xenodochio Arrangement of area near to the Church of Santa Maria di Corte.
Parties involved	Municipality of Cividale del Friuli; Friuli Venezia Giulia BAPSAE and Archaeological Superintendence Dept; Parish of Santa Maria Assunta
Phases and timeframes	<ol style="list-style-type: none"> By 2009 By 2009-2010.
Financial resources	<ol style="list-style-type: none"> Funds to be found by the Municipality of Cividale del Friuli, R.L. n.2/83. Funds to be found by the Parish of Santa Maria Assunta with contributions from the Friuli Venezia Giulia Regional Administration: R.L.53/85.
Expected results	Increase of attention on places and heritage linked to the Longobard presence in Cividale.
Parties involved	Increase in quality of used space.

ENHANCEMENT PLAN Cividale del Friuli buffer zone	
Objective 10	ENHANCEMENT OF HISTORICAL CITY CENTRE
Project 10.1	Upgrading squares and streets
Description	Through annual and three-year plans, the Administration foresees the carrying out of public works on the entire municipal area. In particular, for the Historical town centre and the buffer zone area, work is planned that aims to improve the current urban and architectural set-up, upgrading existing structures, with particular attention paid to streets and squares. Repaving work will be carried out using traditional materials adapted for the various contexts; stone walls will be restored in Piazza San Biagio; improvement of access to river; creation of some pedestrian areas
Actions	<ol style="list-style-type: none"> Restoration of piazza Foro Giulio Cesare: rip; Restoration of piazza Picco named "ex area Q8"; Restoration of piazza San Biagio (I lot); Restoration of piazza San Biagio (II lot) and relative pedestrian area; Restoration of piazza San Francesco, piazza San Giovanni and piazza Garibaldi; Restoration of paving in via Monastero Maggiore and relative pedestrian area.
Parties involved	Municipality of Cividale del Friuli
Phases and timeframes	<ol style="list-style-type: none"> Commencement work September 2007 Completion of work 2008 Commencement and completion of work 2008 Commencement and completion of work 2008 Commencement work 2009 Completion of work 2010 Commencement work 2010 Completion of work 2012 Commencement and completion of work 2010
Financial resources	Funding foreseen, 2,000,000, responsibility of Municipality of Cividale del Friuli and partly already allocated
Expected results	Improvement and upgrading of urban set up of roads and squares in the historical town centre; safeguarding of prestigious aspects of River Natisone, also guaranteeing safety at the same time

Result indicators	Number of interventions carried out and number of areas restored
-------------------	--

ENHANCEMENT PLAN Cividale del Friuli buffer zone	
Objective 10	ENHANCEMENT OF HISTORICAL CITY CENTRE
Project 10.2	Improvement of urban image quality
Description	<p>The Administration reserves considerable attention to the protection and conservation of the Historical town centre and the entire surrounding inhabited area.</p> <p>In this context, the updating and adaptation of the Construction Regulations and the approval and activation of the "Urban Colour and Furnishing Plan", a project that the municipal administration intends to use as an operational instrument to monitor and control actions on "buildings" and include indications for urban furnishing for the town in it.</p> <p>The conservation of the urban apparatus, in fact, cannot be separated from the identification of a method that encodes a practice for interventions that provide the necessary monitoring and control instruments for actions on work by the competent bodies.</p> <p>The urban colour and furnishing plan must appoint and provide indications for the treatment of public and private land (pavements, paved and unpaved surfaces, gardens etc.), furnishing elements (shelters, bus stop poles, benches, flower tubs, clocks, fences, newsagent's, platforms, waste bins, public parking structures and signs in general) and on the choice of colours.</p>
Actions	<ol style="list-style-type: none"> 1. Preliminary analyses; 2. Surveys; 3. Drawing up of Colour and furnishing plan 4. Application and monitoring.
Parties involved	Municipality of Cividale del Friuli
Phases and timeframes	1-3 already implemented 4 starting from 2008
Financial resources	<p>The project foresees a cost for the Municipal Administration of about 8,000.00 Euro for the creation of the project.</p> <p>Expense for implementing urban furnishing of work was foreseen in the municipal budget with its own resources and dedicated income (R.L. 2/1983).</p>
Expected results	Encoding of files on stated work; further improvement of Historical town centre image
Result indicators	Number of interventions for improvement of urban image

ENHANCEMENT PLAN Cividale del Friuli buffer zone	
Objective 10	ENHANCEMENT OF THE HISTORICAL CITY CENTRE
Project 10.3	Setting up of panoramic routes along the Natisone river
Description	<p>The River Natisone is one of the most important water routes in Friuli Venezia Giulia due to its size, geo-morphological characteristics and position; it is one of the elements that characterises the entire municipal territory and in particular its historical town centre.</p> <p>The action acknowledges the strategic location of this river and aims to enhance the environmental qualities and all the landscape characteristics of the place, by creating some panoramic routes along the banks of the river. In particular, the restoration of the path from Borgo di Ponte to the "Belvedere" on the left bank, the creation of the path from Riva della Broscandola to Piazza San Biagio on the right bank and generally the arrangement of access to the river in the buffer zone.</p>

	
	View of the Natisone river gorge
Actions	<ol style="list-style-type: none"> 1. Arrangement of access to the River Natisone also expanding the Gorge lighting system. 2. Restoration of pedestrian path from Borgo di Ponte to the “Belvedere” on the left bank; 3. Creation of path from Riva della Broscandola to Piazza San Biagio. 4. Designing and creation of a lighting system that optimises the Natisone gorge
Parties involved	Municipality of Cividale del Friuli
Phases and timeframes	1 - Commencement and completion of work 2009 2 e 3 -Commencement and completion of work 2010
Financial resources	€ 750,000.00 funding, already partly allocated by the Municipality of Cividale del Friuli partly by the Friuli Venezia Giulia Regional Administration
Expected results	To enhance the area of the River Natisone further and the environmental and landscape characteristics of the area.
Result indicators	Number of accesses and panoramic points on the River Natisone

ENHANCEMENT PLAN Cividale del Friuli territory	
Objective 11	EXPANSION OF THE CULTURAL OFFER IN THE DUCHY OF FRIULI TERRITORY
Project 11.1	Creation of Longobard itineraries:: “Longobard places of art and power”
Description	Structuring of thematic routes with specific signs, educational equipment and publication of specific maps that concern both places in Friuli and in nearby Slovenia, directly involved in the Longobard route from Pannonia towards Italy.
Actions	<ol style="list-style-type: none"> 1. Definition of sites involved and stipulation of agreements. 2. Creation of cultural itineraries on the route “Art and power in the Longobard era: Places of worship and monasteries”. 3. Creation of the route “The Longobard roads: necropolis in the area”, with expansion of the exhibition of Romans d’Isonzo and the identification of other exhibition centres. 4. Creation of the notice boards and the explanatory devices for the thematic routes. 5. Creation of educational and scientific material to illustrate itineraries and the territory. 6. Definition of inter-relation system between Friuli Duchy itineraries and the other sites of the network, with other Italian locations linked to the history and presence of the Longobards and with the sites on the Geocultural Corridor.
Parties involved	Friuli and Slovenia municipalities; Province of Udine, Province of Pordenone; Friuli Venezia Giulia Regional Administration; Slovenia Cultural Institutions (Academy of Lubiana); Slovenian State; Ministry of Culture; Secretarial Office for Cultural Heritage.
Phases and timeframes	Mid-term
Financial resources	Funds to be found by: Friuli Venezia Giulia Regional Administration; European Community funds
Expected results	Increase of cultural and tourist offer in region
Result indicators	Number of sites involved and breadth of area involved by routes. Relations with other initiatives in Italy and Europe. Increase of tourist flow

ENHANCEMENT PLAN Cividale del Friuli territory	
Objective 11	EXPANSION OF THE CULTURAL OFFER IN THE DUCHY OF FRIULI TERRITORY
Project 11.2	Expansion of the museum network "The Castra of Paolo Diacono and the Duchy of Friuli"
Description	<p>The museum network on fortified sites foresees the organisation of a connection system for the visiting routes to the sites with Early middle ages fortification ruins, in the context of a common circuit, linked to some exhibition centres such as the one currently being created in Artegna that will become the visiting centre of Colle di San Martino, an exhibition centre of findings and the centre of the Early middle ages castra network system. A route that involves the Early middle ages fortifications must also take into consideration the ones in the Julian Alps in Slovenia, as, for example, in the case of the Tonocov-grad castrum, above Caporeto, which guards the entrance to the Natisone valley that leads to Cividale.</p> <div style="display: flex; flex-wrap: wrap;"> <div style="width: 50%; text-align: center;">  <p>1</p> </div> <div style="width: 50%; text-align: center;">  <p>2</p> </div> <div style="width: 50%; text-align: center;">  <p>3</p> </div> <div style="width: 50%; text-align: center;">  <p>4</p> </div> <div style="width: 100%; text-align: center;">  <p>5</p> </div> </div> <ol style="list-style-type: none"> 1. View of Gemona Castrum 2. View of Artegna Castrum 3. View of Cormons Castrum 4. View of Ragogna Castrum 5. View of the Tagliamento river valley with the hilltop of Invillino
Actions	<ol style="list-style-type: none"> 1. Definition of sites to which the network between Friuli and Slovenia will be extended 2. Creation of routes part of the "Longobard Friuli – places of art and power" itineraries 3. Creation of notice boards 4. Creation of educational equipment 5. Completion of main network centre in the castle of Artegna
Parties involved	Municipalities of Artegna, Osoppo, Gemona, Nimis, Attimis, Udine, Villa Santina, Ragogna, Cormons, Castelnovo del Friuli; Province of Udine; Province of Pordenone
Phases and timeframes	Short-mid term

Financial resources	Funds to be found by: Municipality of Cividale del Friuli; Province of Udine; Friuli Venezia Giulia Regional Administration; European Community Funds. € 2,000,000.00 have been allocated by the Friuli Venezia Giulia Regional Administration, R.L. 10/2000 for the restoration of the castle of Artegna
Expected results	Creation of an integrated routes system and increase in use of sites
Result indicators	Number of sites involved and extent of territory; increase in number of visitors

ENHANCEMENT PLAN Cividale del Friuli territory	
Objective 11	EXPANSION OF THE CULTURAL OFFER IN THE FRIULI DUCHY TERRITORY
Project 11.3	Expansion of the use of the Abbey of Sesto al Reghena
Description	<p>Improvement of the offer for visits for the Abbey and the use of the Urn of Sant'Anastasia. Connection of abbey visiting route to the group of Longobard itineraries in the network, also by means of the expansion of the already existing programme for the entry to the network and the enhancement of the monastic sites entitled "Along the Abbey route": Sesto al Reghena »</p>  <p style="text-align: center;">View of the Monastery and its park</p>
Actions	<ol style="list-style-type: none"> 1. Designing and creation of the visiting route 2. Creation of specific notice boards and multimedia equipment 3. Creation of relations with other sites 4. Creation of tourist-cultural guidebooks
Parties involved	Municipality of Sesto al Reghena; Province of Pordenone
Phases and timeframes	Short-mid term
Financial resources	Municipality of Sesto al Reghena, Province of Pordenone; FVG Regional Administration A request was made to the Region for a total of €35,000 for 2008, according to the Regional Law no. 68/81 Title IV, for the improvement of the urn of Sant'Anastasia. € 2,000 were allocated by the Municipality and a request for funds has been made to the Region, R.L. no. 12/06 – article 6 for € 15,000 for the creation of a tourist-cultural guide
Expected results	Expansion of visiting system and tourist-cultural offer
Result indicators	Quality, variety and extent of explanatory education equipment, increase in number of visitors and of diffusion of information-providing material

ENHANCEMENT PLAN Cividale del Friuli territory	
Objective 12	ENHANCEMENT OF ENDOGENOUS RESOURCES IN THE AREA
Project 12.1	Creation and enhancement of the Vines and Wines Park
Description	<p>Vines and wines are symbols of the economy but is also an aspect of the landscape, part of the culture and the design of the territory.</p> <p>By means of the territorial planning tool entitled the "Vines and Wines Park"; the intention is to help, and qualify the winemaking use of the areas surrounding the Municipality of Cividale del Friuli, the sub-hill area of the Province of Udine known as Colli Orientali del Friuli.</p> <p>The project aims to enhance the cultural and landscape context of an area with a High-level enogastronomic vocation.</p> <p>Later steps will be carried out to prepare tool that regulate the specific interventions and development plans.</p> <p>The preparation of the Thematic project "Vines and Wines Park", under the form of a supra-municipal "Master Plan" coordinated by the province, foresees the construction of a planning tool with guided proposals for operational projects concerning work, development plans, planning tools for the enhancement of the local particular and specific characteristics of the vine areas, the protection of the landscape and the environment, the conservation of natural and cultural elements etc.</p>
	
	View of vineyards on the Colli Orientali del Friuli
Actions	<ol style="list-style-type: none"> 1. Recovery and upgrading of existing agricultural buildings 2. Creation of recreational routes (excursions, cycling paths, horse-riding tracks) 3. Optimisation of hotel and farmhouse-tourist accommodation
Parties involved	<p>Ministry of Agricultural, Food and Forestry Policies Friuli Venezia Giulia Regional Administration Province of Udine Municipalities of the Colli Orientali (20 municipalities, including Cividale del Friuli) Consortium DOC Colli Orientali del Friuli Association "Movimento Turismo del vino" National Association "Città del Vino". State Technical Agricultural Institute Paolino d'Aquileia University of Udine</p>
Phases and timeframes	2007-2013 (implementation time for the Friuli Venezia Giulia Rural Development Programme, connected to the plan in question)
Financial resources	<p>approx € 2,000,000,00</p> <p>Funds to be found by: Ministry of Agricultural, Food and Forestry Policies, Friuli Venezia Giulia Regional Administration, Province of Udine; European Union</p>
Expected results	Optimising and promoting of candidate site, including it in its cultural, environmental and typical landscape context
Result indicators	Number of cultural, recreational and enogastronomic activities and initiatives linked to surrounding area of Site and buffer zone.

ENHANCEMENT PLAN Cividale del Friuli territory	
Objective 12	ENHANCEMENT OF ENDOGENOUS RESOURCES IN THE AREA
Project 12.2	Creation of thematic routes: "The Archive Vineyards"
Description	It is possible to trace the historical presence of vines and vineyards in various parts of the area from the parchments and antique documents kept in the various historical-document archives in Cividale del Friuli. The identification search of the places – started in 2007 – will allow mapping of the winemaking areas in the territory and the formation of historically certified routes, also connected to current winemaking production. This search – that is also connected to similar archives on the history of the Aquileia Patriarchy – will allow greater knowledge of local wine culture traditions and an expansion of current economic activities.
Actions	<ol style="list-style-type: none"> 1. Completion of archive research 2. Completion of territorial research 3. Construction of maps and itineraries 4. Formation of dedicated database 5. Agreements with regional, provincial, local institutions, producers' organisations and wine-making companies 6. Production of signs, maps and brochures 7. organisation of guided tours coordinated with the Vines and Wines Park and with the Alpe Adria Enogastronomy Centre
Parties involved	<p>Promoting committee for the Aquileia Patriarchy Project Local, provincial, regional public institutions FVG archaeological and archive superintendence departments Producer category organisations Wine-making companies Observatory on the evolution of the landscape-cultural mosaic Vines and Wines Park Alpe Adria Centre of Eno-gastronomy Public and Private Sponsors</p>
Phases and timeframes	2008-2012
Financial resources	<p>€ 25,000.00 acquired for 2008 with funding from the Banca Popolare FriulAdria/Credit Agricole and the Friuli Venezia Giulia Region € 150,000.00 to be acquired by: Friuli Venezia Giulia Regional Administration (Rural Development Plan); private firms and bank sponsorships</p>
Expected results	Creation of a specialised route (wine tourism) certified by verified historical documents; enhancement of overall territorial tourist proposal
Result indicators	<p>Presentation of research Production of maps, brochures and signs Number of companies involved Number of guided tours</p>

ENHANCEMENT PLAN Brescia site	
Objective 13	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SITE STRUCTURES
Project 13.1	Arrangement of the green area to the south of the Ortaglia domus
Description	<p>Extraordinary maintenance of the green areas and realisation of a car park for service vehicles in the space to the south of the Ortaglia domus.</p> 
Actions	<ol style="list-style-type: none"> 1. Clearing of building waste currently stored 2. Realisation of automated irrigation plant 3. Realisation of green area with grass seeding and shrub planting 4. Realisation of the car park area
Parties involved	Municipality of Brescia Brescia Museum Foundation
Phases and timeframe	Design of irrigation plant and green spaces already realised Realisation of car park foreseen by June 2008
Financial resources	Total cost circa € 80,400.00 Funds set by the Municipality of Brescia
Expected results	New use of the area also for the organisation of exhibitions and open-air events
Result indicators	Increase in available surface area of about 800mq

ENHANCEMENT PLAN Brescia site	
Objective 13	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SITE STRUCTURES
Project 13.2	Completion of the irrigation plant for the green areas
Description	Realisation of an automatic irrigation plant in the San Salvatore cloister
Actions	<ol style="list-style-type: none"> 1. Installation of distribution networks, of the programming control box, valves, irrigators, etc. 2. Re-integration of medium sized shrubs
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	Realisation foreseen by June 2008
Financial resources	Total cost: €8,835.00 Funds set by the Municipality of Brescia
Expected results	Improvement in the decorum and green equipment in the site
Result indicators	Automatic irrigation of circa 1000mq

ENHANCEMENT PLAN Brescia site	
Objective 13	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SITE STRUCTURES
Project 13.3	Internal illumination for the Church of Santa Maria in Solario
Description	<p>The intervention foresees the renovation of the lighting system of the Cross of Desire with new LED (1) technology for the church of Santa Maria in Solario in order to make the frescos decorating walls more visible.</p> 
Actions	<ol style="list-style-type: none"> 1. Renovation of the ceiling of the showcase containing the Cross of Desire in order to prepare it for the installation of the LEDs 2. Installation of the LEDs and realisation of the electric plant 3. Installation of the new spotlights
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	Realisation by January 2008
Financial resources	Total cost: €7,123.60 Resources allocated by the Municipality of Brescia
Expected results	Preparation of the maintenance programme with identification of interventions to be realised, times and relative controls.
Result indicators	Renovation of 15 light sources

ENHANCEMENT PLAN Brescia site	
Objective 13	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SITE STRUCTURES
Project 13.4	External illumination for the monastery
Description	The external illumination of the buildings of the monastery is currently poor. The proposal is to realise a lighting project to renovate it, paying particular attention to Highlight Santa Maria in Solario on the via Musei side and the bell tower of the church of San Salvatore, on the via Piamarta side which leads to the Cidneo hills
Actions	<ol style="list-style-type: none"> 1. Compilation of the lighting project 2. Verification test 3. Realisation of operation
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	Starting from 2009
Financial resources	Funds to be raised
Expected results	The site is more visible and the extraordinary effect of the monastic complex is increased
Result indicators	

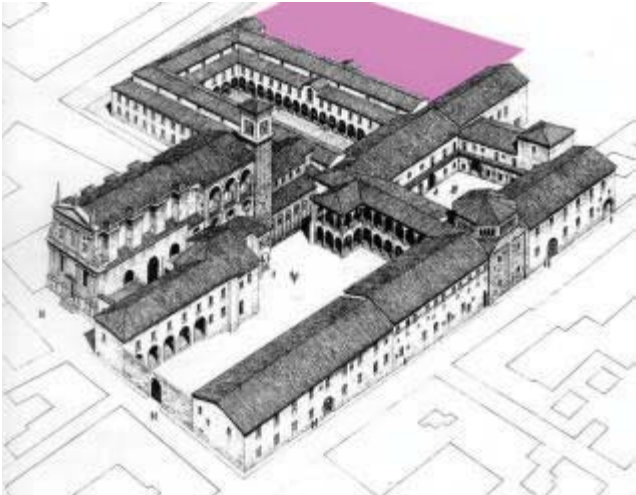

ENHANCEMENT PLAN Brescia site	
Objective 14	INCREASE IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.1	Realisation of a visitor centre on the monastery and on the Longobard sites network
Description	Set-up at the entrance of San Salvatore-Santa Giulia city Museum of an information centre dedicated to the monumental site and the other centres that are part of the Longobard sites network
Actions	<ol style="list-style-type: none"> 1. Acquisition of new locations 2. Preparation of informative graphic material 3. Preparation of informative multimedia products
Parties involved	Municipality of Brescia- Museum Sector; Brescia Museums Foundation
Phases and timeframe	From 2009
Financial resources	To be quantified and raised
Expected results	Distribution of knowledge on Italian Longobard sites
Result indicators	Number of visitors

ENHANCEMENT PLAN Brescia site	
Objective 14	INCREASE IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.2	Automation of the ticket sales system and expansion of the management software
Description	Creation of an integrated system for till management for both the ticket office and the museum book-shop (with relative warehouse management). In this way the system will allow a set of data on visitors to be computerised which is important for monitoring the visitors for statistics and for improving the design of marketing operations.
Actions	<ol style="list-style-type: none"> 1. Analysis of the current system 2. Purchase of new machines 3. Installation of the system 4. Training for museum operators on the use of the system
Parties involved	Brescia Museums Foundation
Phases and timeframe	Realisation foreseen by June 2008
Financial resources	Total cost: approx. €20,000.00 Funds set by the Brescia Museums Foundation
Expected results	Speed up ticket and book-shop sales and computerise visitor data
Result indicators	Number of tickets sold on-line

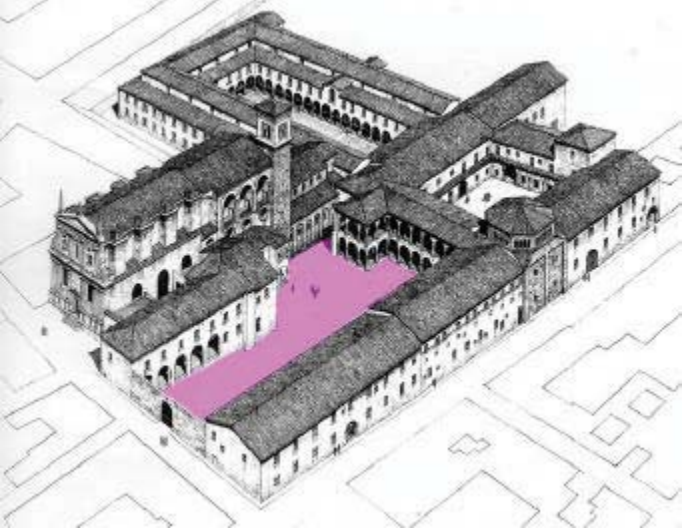

ENHANCEMENT PLAN Brescia site	
Objective 14	INCREASE IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.3	Activation of the e-commerce service relating to the City museums commodities
Description	Creation of a web e-commerce system for selling tickets and book-shop merchandising of the Santa Giulia museum
Actions	<ol style="list-style-type: none"> 1. Design the solution 2. Activation of on-line sales system
Parties involved	Brescia Museums Foundation
Phases and timeframe	Realisation foreseen by 2008
Financial resources	Total cost: €12,000.00 Funds set by Brescia Museums Foundation
Expected results	Increase in the service offered to visitors
Result indicators	Number of on-line sales

ENHANCEMENT PLAN Brescia site	
Objective 14	INCREASE IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.4	Improvement of the video systems available to users
Actions	<ol style="list-style-type: none"> 1. Replacement of 3 PCs and relative monitors displaced along the museum path (Roman section) available for visitors for didactic videos for knowledge of the site 2. Supply and installation of a projector and screen to replace the existing projection system 3. Interventions
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	By January 2008
Financial resources	Total cost: €1,944.00 Funds set by the Municipality of Brescia
Expected results	Better use on the part of visitors
Result indicators	Number of users

ENHANCEMENT PLAN Brescia site	
Objective 14	INCREASE IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.5	Improvement of the services offered to the users of the Santa Giulia Auditorium and the side gallery annexe
Description	<ol style="list-style-type: none"> a) Darkening the windows to improve vision of the projections in the auditorium; b) Improvement of the audio system; c) News lighting in the gallery annexes to improve the setting at the time of temporary exhibitions and events d) Agreement with Brescia Trasporti s.p.a. for a shuttle service available to those wishing to reach the auditorium 
Actions	<ol style="list-style-type: none"> 1. Intervention a) and b) 2. Intervention d) 3. Intervention c) / Replacement of the electrified bars and relative supports; installation of LEDs and relative programming control panel
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	Realisation foreseen by June 2008
Financial resources	Total cost: to be defined Funds set by the Municipality of Brescia
Expected results	Better conditions of use for users
Result indicators	Number of users

ENHANCEMENT PLAN Brescia site	
Objective 15	EXPANSION OF THE ARCHAEOLOGICAL AREAS MADE INTO MUSEUMS IN THE SITE
Project 15.1	Dig and museumification of the domus to the south of Ortaglia
Description	<p>The project, in line with that already realised in 2003, foresees archaeological investigation to the south of the Ortaglia domus, where there are known to be archaeological structures relative to other habitations of the Roman era. The characteristics of the current structure, which protects the domus and consents visits, can be extended to the south to encompass eventual new archaeological structures, guaranteeing a considerable extension to the visiting area.</p> 
Actions	<ol style="list-style-type: none"> 1. Archaeological dig to the south of the Ortaglia domus 2. Design of cover 3. Camping for pre-consolidation and protection of the emerged structures 4. Realisation of cover 5. Final consolidation and cleaning of archaeological remains 6. Museographic set-up and didactics for the visiting route
Parties involved	Municipality of Brescia; Superintendency for the Archaeological heritage of Lombardy; Brescia Museums Foundation
Phases and timeframe	About three years
Financial resources	Necessary 5,000,000.00 Euros, to be raised
Expected results	Increase in the extension of the museumified archaeological areas
Result indicators	Museumification of circa 2000mq

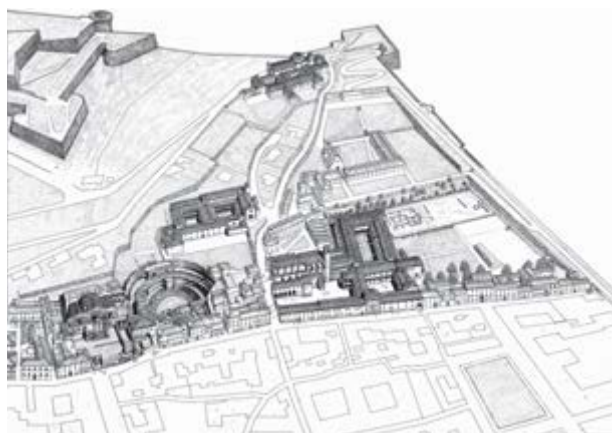

ENHANCEMENT PLAN Brescia site	
Objective 15	EXPANSION OF THE ARCHAEOLOGICAL AREAS MADE INTO MUSEUMS IN THE SITE
Project 15.2	Museumification of the domus in the southern cloister of the site
Description	<p>In the cloister of San Salvatore from 1982 to 1990 an extended district of the Roman era was uncovered, with about 60 environments paved with mosaics and decorated with frescos, with courtyards, stairs and interconnecting corridors. The structures were completely re-covered awaiting museumification and two volumes of study were dedicated to them. After the complete opening of the city Museum it is opportune to continue with the museumification study of this extraordinary archaeological complex in which there are traces of the first Longobard settlement.</p>

	
<p>Actions</p>	<ol style="list-style-type: none"> 1. Design of a museographic project 2. Restoration of the previously dug structures 3. Realisation of cover 4. Final consolidation and cleaning of archaeological remains 5. Museographic set-up and didactics for the visiting route
<p>Parties involved</p>	<p>Municipality of Brescia; Superintendency for the Archaeological heritage of Lombardy; Brescia Museums Foundation</p>
<p>Phases and timeframe</p>	<p>30 months</p>
<p>Financial resources</p>	<p>3000,000.00 to be raised</p>
<p>Expected results</p>	<p>Increase in the extension of the museumified archaeological areas</p>
<p>Result indicators</p>	<p>Museumification of circa 1500mq</p>

<p>ENHANCEMENT PLAN Brescia site</p>	
<p>Objective 16</p>	<p>ENHANCEMENT OF THE ARCHAEOLOGICAL AREA OF CAPITOLIUM</p>
<p>Project 16.1</p>	<p>Recovery project of the archaeological area of Capitolum</p>
<p>Description</p>	<p>The project consists of furthering knowledge regarding the archaeological area of Capitolum of Brescia, its completed archaeological and architectural restoration, its valorisation and the complete and final opening to the public. In the archaeological area located in the centre of the urban fabric the most ancient and significant buildings of the Roman city are still visible: the sanctuary of the republican era (first century AD), the Capitolum (73 AD), the theatre (first to third century AD) and part of the decumanus maximus. Furthermore, the area opens onto the present piazza del foro, which conserves remnants of the roman square (first century AD). Archaeological remains (forum and spa; basilica) can also be visited under the palazzi which today constitute the limits of the legal auditorium.</p> <p>Apart from these Roman buildings, there are also Early medieval, renaissance and modern palazzi of the nobility which "rise" directly from ancient ruins (Palazzo Maggi Gambarà, Casa Pallaveri, both communal property).</p> <p>In this well circumscribed area of the city, therefore, there is uninterrupted stratigraphical evidence which extends from the second century AD to the Eighth century, particularly rich, articulated and dense in content. In the capitolum in 1830, moreover, the site of the Patrio Museum was placed (afterwards the Romano Museum) the first public museum to inaugurate the museological vocation of this area.</p> <p>Following the first circumscribed interventions, carried out by the FIO (first of all regarding the monastery of Santa Giulia- the City Museum and then, as far as the capitolum are is concerned, the partial recovery of Casa Pallaveri and the late republican sanctuary) and with the FRISL project, financed for the first lot of works on the theatre and Palazzo Maggi Gambarà. Starting from 1990 there were archaeological digs, consolidation and restoration aimed specifically at a better knowledge of the archaeological and architectural stratigraphy, making all that was progressively uncovered safe and modern buildings involved in the</p>

operations.

The opening of this special area to the public (at the moment it is open now and again), apart from giving the most important urban portion of the ancient city back, constitutes the completion of the museum routes of the City Museum in Santa Giulia in about ten year's time.

Actions

1. Recognition of movable material and property
2. Allocation of study tasks
3. Completion of archaeological investigations
4. Conservation of the various types of structure and decorative apparatus
5. Compilation of museological project
6. Compilation of museographical project
7. Compilation of didactic tools project
8. Compilation of executive project
9. Realisation of intervention
10. Opening to the public

Parties involved

Municipality of Brescia; Ministry for Cultural Assets and Activities – Regional Management for Cultural Assets and Landscapes of Lombardy – Superintendency for the Archaeological Assets of Lombardy; Brescia Museums Foundation; CAB Foundation

Phases and timeframe

3-5 years starting from 2008

Financial resources	11,000,000.00 Euros. As from January 2008 1,250,000.00 Euros are available (Ministry and Municipality of Brescia); the rest are to be raised
Expected results	Museumification of the entire archaeological area
Result indicators	Opening to the public of about 4000 square metres of visitable archaeological area and 3 visiting routes inside historical buildings

ENHANCEMENT PLAN Brescia site	
Objective 16	ENHANCEMENT OF THE ARCHAEOLOGICAL AREA OF CAPITOLIUM
Project 16.2	Urban equipment of via Musei and the Forum
Description	To valorise the archaeological area of Capitolium in the best way and to connect it more efficiently with San Salvatore-Santa Giulia. City museum, it is opportune to intervene also on the urban equipment along via Musei
Actions	<ol style="list-style-type: none"> 1. Replacement of road surface (remove asphalt and replace with porphyry in alignment with the other streets of the historical centre) 2. Design of suitable lighting 3. Design of suitable road signs 4. Insertion of green areas and parking structures
Parties involved	Municipality of Brescia, Brescia Museums Foundation
Phases and timeframe	By 2010
Financial resources	To be quantified and raised
Expected results	Improvement in use of this urban space, full of the most significant testimonials of archaeology and art in Brescia
Result indicators	Placement of a congruous number of benches, flower pots, light sources and signs.

ENHANCEMENT PLAN Brescia buffer zone	
Objective 16	ENHANCEMENT OF THE ARCHAEOLOGICAL AREA OF CAPITOLIUM
Project 16.3	Expansion of museum set-up in the archaeological area of the Roman basilica in Labus square
Description	<p>In the palazzo at number 3 in piazza Labus, characterised by a plant which goes back to the seventeenth century, when a long series of changes and adaptations was made to the block which in medieval times was back-to-back with the Roman remains now ruins, there is the site of the offices of the Superintendency for the Cultural Assets of Lombardy.</p> <p>Digs and restoration of the complex were carried out from 1993 and 1998; inside on the underground floor, it is possible to visit the internal areas of the Flavian Basilica: in particular the marble opus sectile floors and parts of the elevation are visible. In the same space parts of the forum flooring have been left in sight, these date back to the Augustus- Julius Claudius era, medieval walls with significant elements of reuse, bases with inscriptions (one which mentions the cursus honorum of Nonio Macrino) and architectural elements.</p> <p>In a small area next to the archaeological area is foreseen the exhibition of the materials recovered in the dig. Visitors will find all the findings originating from the site, from Iron-age ceramics to those of the Celtic and Etruscan-Padan settlement, up to medieval and renaissance materials.</p> <p>An important glimpse of articulate Brescian archaeological reality and its rich stratigraphy.</p>
Actions	<ol style="list-style-type: none"> 1. Preparation of new set-up 2. Realisation of multimedia station 3. Realisation of didactic material for schools
Parties involved	Ministry for Cultural Assets and Activities Superintendency for the Archeological Assets of Lombardy
Phases and timeframe	By January 2008
Financial resources	25,000.00 Euros on ministerial funds
Expected results	Enrichment of the museum offer inside the building
Result indicators	Insertion of about 50 new archaeological findings; 1 computer station

ENHANCEMENT PLAN Brescia buffer zone	
Objective 17	COMPLETION OF MUSEUM SPACES AND HEIGHTENING OF THE STATUS OF ENHANCEMENT IN THE CASTLE AREA
Project 17.1	Adaptation and expansion of the Museum of Arms
Description	<p>The Museum of Arms is set up inside the viscount look-out tower of the castle. Currently extraordinary maintenance work is in progress on the structures and wooden furniture and the roof is being rebuilt.</p> <p>Requalification work is in the design phase, this foresees a wide study for the destruction of architectural barriers (including the whole area of Torre Mirabella), the realisation of a new entrance, arrangement of access areas, standardisation of technical plant and the realisation of surrounding hygiene services. In particular, restoration and structural interventions are foreseen for opening "big tanks" on the lower floor of the large room for positioning services and creating a welcoming area for the public with presentation of the museum and the structures that house it.</p> 
Actions	<p>First phase: extraordinary maintenance on wooden floors and fixtures (entrance doors and windows) general review of windows, the stairs to the upper floors, parapets and handrails compilation of the evacuation plan, integration of emergency and safety signs, adaptation of safety exits</p> <p>Second phase:</p> <p>1st lot</p> <ol style="list-style-type: none"> 1. Design and destruction of external architectural barriers <p>2nd lot</p> <ol style="list-style-type: none"> 2. Design and destruction of museum architectural barriers 3. Design and realisation of new entrance 4. Arrangement of access areas 5. Standardisation of technical plant 6. Realisation of internal hygiene services
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	First phase : starting January 2008 Second phase: 1 st lot from June 2008 2 nd lot to be defined
Financial resources	Total cost first phase: circa €60,000.00 Total cost second phase: 1 st lot 250,000.00 2 nd lotto 2,100,000.00 Funds set by the Municipality of Brescia
Expected results	Possibility of a complete museum visit, with introductory informative apparatus and adequate services
Result indicators	Preparation of: 1 entrance; 1 bookshop; 1 ticket office; 1 service; 1 lift

ENHANCEMENT PLAN Brescia buffer zone	
Objective 17	COMPLETION OF MUSEUM SPACES AND HEIGHTENING OF THE STATUS OF ENHANCEMENT IN THE CASTLE AREA
Project 17.2	Re-arrangement and re-opening of the Museum of Risorgimento
Description	<p>Extraordinary maintenance work is in progress on the Grande Miglio building which currently houses temporary exhibitions dedicated to the risorgimento era which in the next few years will be the subject of refurbishing work for the future re-opening of the Museum of the Risorgimento with the exhibition of the permanent collection according to the studies carried and the refurbishing of three "sample" sections opened in 2005, 2006 and 2007. The new order of the museum foresees time scheme-topical distribution which tends to underline the interconnections in a complex society such as that of the eighth century</p> 
Actions	<p>First phase: extraordinary maintenance work on the buildings</p> <ol style="list-style-type: none"> 1. Replacement of fixtures and fittings in the Grande Miglio 2. Renovation of technological plant 3. Compilation of evacuation plans 4. Realisation of emergency signs <p>Second phase: new permanent exhibition</p> <ol style="list-style-type: none"> 5. Preparation of order project 6. Conservation of works 7. Compilation of didactic-explanatory apparatus 8. New set-up of museum
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	First phase: 2008-2009 Second phase: 2009-2010
Financial resources	Total estimated cost 4,500,000.00 € Funds set by the Municipality of Brescia
Expected results	Total re-opening of the museum, updated according to the most current criteria
Result indicators	Number of visitors

ENHANCEMENT PLAN Brescia buffer zone	
Objective 17	COMPLETION OF MUSEUM SPACES AND HEIGHTENING OF THE STATUS OF ENHANCEMENT IN THE CASTLE AREA
Project 17.3	Unified management of the whole area
Description	<p>The area of Castello, into which the competence of different and numerous municipal offices and private associations converge, requires a unified management system. A study is therefore being carried out, on the part of the Municipality of Brescia and the involved stakeholders, of a management system which, apart from co-ordinating all the initiatives and activities of the Castello, should also lead to the re-qualification of some green areas, the realisation of permanent service structures (public exercises) and the realisation of itineraries of access and connection with the urban centre (by means of lifts and escalators, for</p>

	example). 
Actions	1. Total design
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	Year 2009
Financial resources	Resources to be found
Expected results	More usability on the part of the citizenry; co-ordination of activities carried out in the area
Result indicators	Number of activities and co-ordinated initiatives

ENHANCEMENT PLAN Brescia buffer zone	
Objective 17	COMPLETION OF MUSEUM SPACES AND HEIGHTENING OF THE STATUS OF ENHANCEMENT IN THE CASTLE AREA
Project 17.4	Temporary exhibitions programme
Description	The buildings of the Piccolo and Grande Miglio in Castello are used throughout the year for organising temporary exhibitions, particularly dedicated to the evaluation and promotion of works of art by local contemporary artists.
Actions	<ol style="list-style-type: none"> 1. Programming of exhibitions 2. Setting up exhibitions 3. Opening to the public with free entrance
Parties involved	Municipality of Brescia Brescia Museums Foundation CAB Foundation
Phases and timeframe	Year 2008
Financial resources	Total cost: circa €100,000.00 Funds set by CAB Foundation
Expected results	More usability of the museum sites and the whole area of the Castle by the public
Result indicators	Confluence of public

ENHANCEMENT PLAN Brescia buffer zone	
Objective 18	REQUALIFICATION AND ENHANCEMENT OF THE SO-CALLED HERITAGE BUILDINGS
Project 18.1	Requalification of the Tosio Martinengo Picture Gallery
Description	<p>The words "Palazzi dell'arte" refer to an area to the south of via dei Musei characterised by the presence of three imposing palazzi which should be put forward, according to one project, for the conservation and valorisation of figurative, pictorial, sculptural and graphic heritage.</p> <p>This vocation stems from the presence in this area of the palazzo Martinengo da Barco which for over one hundred years has housed the Tosio Martinengo Picture Gallery and by the vicinity of another historical palazzo linked to the formation of the museums, the noble residence of count Paolo, a fine and cultured collector, which he transformed precisely for receiving art collections bought over the years. To this prestigious site could also be added, as proposed for some time, for an opportune expansion of permanent exhibit spaces and for an area destined for temporary exhibitions, palazzo Martinengo Colleoni, very near to the other two sites, which, of municipal property, would free itself of the functions of justice palace, performed up to now. In particular palazzo Martinengo da Barco, site of the Tosio Martinengo Picture Gallery, requires air conditioning, re-design of the exhibition area, to be expanded according to the most recent studies on the works and finally suitable storage.</p>
	
Actions	<ol style="list-style-type: none"> 1. Set-up of new exhibit rooms located on the ground floor 2. Opening of eighth century garden with requalification work in the green area and drawing up of the lighting project with renovation of the lighting plant 3. Renovation of the air conditioning plant 4. Restoration of flooring in the exhibit areas through the removal of the current covering now worn; 5. Video surveillance plant in the museum rooms 6. Expansion of storage areas 7. Compilation of the evacuation plan, integration of emergency and safety signs, installation of more fire detectors in the storage areas; adaptation of safety exits 8. Replacement of all fixtures in the exhibition gallery
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	By the end of 2008
Financial resources	140,000.00 Euros. Funds set by the Municipality of Brescia + 300,000.00 Euros for the air conditioning plant
Expected results	Expansion of exhibit areas
Result indicators	Number of visitors

ENHANCEMENT PLAN Brescia buffer zone	
Objective 18	REQUALIFICATION AND ENHANCEMENT OF THE SO-CALLED HERITAGE BUILDINGS
Project 18.2	Requalification of Palazzo Bonoris, site of the Athenaeum of Science, Letters and Arts
Description	Palazzo Bonoris, of municipal property, was destined as site of the historical Athenaeum of Science, Letters and Arts of Brescia and there are now structural adaptation works in progress and preparation for the opening of a modern library which will house the archive of the historical cultural institution and the numerous volumes pertaining to it. The ample spaces of the palazzo also allow preparation for meetings, conferences and offices in the large living room with seventh century frescos.
Actions	1st lot: <ol style="list-style-type: none"> 1. Extraordinary maintenance of the cover, realisation of elevator plant and specialist electrical and safety work 2nd lot <ol style="list-style-type: none"> 2. construction of library tower and public opening
Parties involved	Municipality of Brescia
Phases and timeframe	1st lotto by the end of 2008 2nd lot starting from 2009
Financial resources	Funds set by the Municipality of Brescia Total cost of the 1st lot: Building works €504,445.97 Plant € 106,130.00
Expected results	Adaptation of the site to the activities of the Academy
Result indicators	Number of library users; number of promoted initiatives

ENHANCEMENT PLAN Brescia buffer zone	
Objective 18	REQUALIFICATION AND ENHANCEMENT OF THE SO-CALLED HERITAGE BUILDINGS
Project 18.3	Requalification of Palazzo Tosio as museum site of the Nineteenth Century Collection
Description	<p>The palazzo Tosio, formerly site of the Athenaeum, of municipal property, will be restored as a museum site for the exhibition of civic collections of the Eighth century. The Palazzo itself, moreover, fruit of the intervention of the architect Rodolfo Vantini, fully reflects the neoclassic taste of the time, both in architecture and furnishings, constituting a true "home-museum" .</p> 
Actions	<ol style="list-style-type: none"> 1. Conservative recovery 2. Museum set-up 3. Opening to public
Parties involved	Municipality of Brescia
Phases and timeframe	Starting from 2009
Financial resources	To be quantified and raised
Expected results	In the city, pen the only museum site dedicated to this important historical, cultural and artistic period
Result indicators	Number of visitors

ENHANCEMENT PLAN Brescia buffer zone	
Objective 19	INCREASE AND REQUALIFICATION OF THE GREEN AREAS
Project 19.1	Hillside Park Project
Description	<p>Founded in 2002, the P.L.I.S. (Parco Locale di Interesse Sovracomunale- Local Park of Supra-municipal Interest) of the Hills of Brescia includes several hill and foothill areas (Municipalities of Bovezzo, Brescia, Cellatica, Collebeato and Rodengo Saiano for a surface area of over 3500 hectares) and a portion infiltrates the heart of the buffer zone, including the whole Cidneo hillside and its public and private areas.</p> <p>The Parco della Montagnola, of municipal property and outside of the defensive system north of the hillside, is currently involved in a requalification project which will see, on completion, the realisation of a topical Botanic Garden, in order to re-introduce the characteristic phytocenosis of the Park.</p> <p>It is also the intention of the Hillside Park of Brescia to develop environmental educational programmes which will involve the Municipality, the managers of the Pusterla vineyards, which with its circa 4 hectares is the largest urban productive vineyard in Europe, and schools with the realisation of didactic routes on conservation techniques for the hillside territory, maintenance of the biodiversity and reminiscence of agricultural traditions.</p>
Actions	<ol style="list-style-type: none"> 1. Final structural arrangement of the Parco della Montagnola 2. Set-up of the Botanic Garden 3. Definition of agreements with the managers of the Posterla vineyard 4. Drawing up of environmental education programmes and training
Parties involved	Municipality of Brescia, Municipality of Bovezzo, Municipality of Cellatica, Municipality of Collebeato, Municipality of Rodengo Saiano, Museums of Art, History and Science, Higher education Institutes, managers of Pusterla vineyard, associations and individual citizens involved in botanic conservation, didactics and training
Phases and timeframe	<p>2008 re-opening to the public of Parco della Montagnola</p> <p>2009 completion of insertion of species in the Botanic Garden</p> <p>2009 start-up of didactic and training activities</p>
Financial resources	Use of membership fees to the Park of each Municipality, resources of the Municipality of Brescia and possible public financing of training activities
Expected results	<p>Parco della Montagnola is returned to the citizenry and recovery of access to the northern Cidneo hillside</p> <p>Divulgation of the phytocenosis of the Park through their re-proposal in an urban environment</p>
Result indicators	Number of plant species; number of users

ENHANCEMENT PLAN Brescia buffer zone	
Objective 19	INCREASE AND REQUALIFICATION OF THE GREEN AREAS
Project 19.2	Water Park project
Description	<p>The area of 11,400sqm which housed the fish farming factory which was active for nearly 100 years with the function of study and fish repopulation of river and lake species, situated between via Lechi and via Spalti San Marco, was purchased by the Region of Lombardy and will become a park dedicated to infancy and adolescence. Its peculiarity is that of being inserted in an historic context, the preservation of which is guaranteed by the complete restoration of medieval bastions and Venetian walls therein which conserve the original aspect. The project in its realisation phase foresees the creation of areas dedicated to various activities: an artificial lake will be realised in the area of the aquarium to recreate an environment with lake flora and fauna and an underwater tunnel to look at the fish; in the various buildings, a bar with a restaurant service, a library, a literary café, an internet point and an info point for the visit to the city and the territory will be opened; an area will be dedicated to the "city of children" with a game room, spaces for didactic laboratories and a skating rink.</p>
Actions	<ol style="list-style-type: none"> 1. Recovery of the area with a project aimed at the valorisation of the existing buildings for games and recreation 2. Creation of an aquarium 3. Creation of a refreshment area
Parties involved	Region of Lombardy

	Municipality of Brescia Asm s.p.a.
Phases and timeframe	Project in the realisation phase Park opening foreseen for April 2008
Financial resources	Total cost: circa €5,000,000.00 Funds charged to the subjects involved
Expected results	Usability on the part of the citizenry
Result indicators	Number of users

ENHANCEMENT PLAN Brescia territory	
Objective 20	ENHANCEMENT OF THE OTHER MUSEUM SITES OF THE MUNICIPALITY OF BRESCIA
Project 20.1	Re-equipping of the Natural History Museum
Description	<p>Part of the Civic Museums are also the Science Museums; after the recent opening of the specialist institute library, a re-furnishing project is starting next to those already in operation, of the rooms of the entire Natural History Museum which boasts collections of primary importance in the national panorama, fruit of the legacies of Brescian scholars and collectors.</p> 
Actions	<ol style="list-style-type: none"> 1. Compilation of the museological project 2. Compilation of the museographic project 3. Conservation of the collections 4. Furnishing 5. Opening to the public
Parties involved	Municipality of Brescia
Phases and timeframe	From 2009
Financial resources	€ 1,800,000 to be raised
Expected results	Completely re-open the museum to the public, it was closed for some years for adaptation work and standardisation
Result indicators	Number of visitors

ENHANCEMENT PLAN Brescia territory	
Objective 21	ENHANCEMENT OF LONGOBARD FINDINGS, OF THE RELATIVE MUSEUM SITES AND ARCHAEOLOGICAL AREAS
Project 21.1	Re-organisation and implementation of the collections conserved at the Civic historical archaeological Museums of Manerbio, Leno, Remedello and at the National Archaeological Museum of Sirmione
Description	<p>The numerous material that has emerged from recent archaeological investigations impose a review of the context exposed in the museum sites of the territory for a consequent update and enrichment, also given the new acquired data.</p> 
Actions	<ol style="list-style-type: none"> 1. Expansion and modernisation of the exhibitive spaces 2. Restoration of items 3. Recovery and exposure of items originating from the territory currently in storage at different sites
Parties involved	Superintendency for the Archaeological assets of Lombardy, Municipalities involved, provincial administration
Phases and timeframe	Five year period 2008-2013
Financial resources	To be defined and raised
Expected results	Increase in the museum offer relative to the Longobard period
Result indicators	Number of findings exhibited; number of visitors

ENHANCEMENT PLAN Brescia territory	
Objective 21	ENHANCEMENT OF LONGOBARD FINDINGS, OF THE RELATIVE MUSEUM SITES AND ARCHAEOLOGICAL AREAS
Project 21.2	Set-up of the Archaeological-exhibition Centre of Montichiari and organisation of the collection of Longobard findings in the territory of Montichiari
Description	The findings currently on show in Montichiari are a High selection of that which was returned to the territory during the course of the years. It is therefore opportune to guarantee an ideal site to the Early medieval heritage of this location.
Actions	<ol style="list-style-type: none"> 1. Expansion of the exhibitive spaces of the Giacomo Bergomi Museum 2. Set-up of new exhibitive spaces 3. Set-up of the collections 4. Optimisation of didactic laboratories
Parties involved	Superintendency for the Archaeological assets of Lombardy; Municipality of Montichiari; Monticlarense Archaeological Group; provincial Administration
Phases and timeframe	Five year period 2008-2013
Financial resources	To be quantified and raised
Expected results	Expansion of the current museum site
Result indicators	Number of findings exhibited; number of visitors

ENHANCEMENT PLAN Brescia territory	
Objective 21	ENHANCEMENT OF LONGOBARD FINDINGS, OF THE RELATIVE MUSEUM SITES AND ARCHAEOLOGICAL AREAS
Project 21.3	Set up of the archaeological area of the Paleochristian Church of San Pietro in Mavino in Sirmione and of the Early medieval Churches of San Giorgio in Montichiari and Saints Nazaro and Celso in Leno
Description	<p>These important monastic contexts deserve to be valorised through the completion of archaeological digs and opening to the public.</p> 
Actions	<ol style="list-style-type: none"> 1. Church of S. Pietro in Mavino (Sirmione): completion of the dig at the archaeological site; conservative restoration of the property; interventions to make the pertaining archaeological area usable. 2. Church of San Giorgio (Montichiari): restoration of the crypt in order to make it accessible to the public; set-up of the space. 3. Church of Saints Nazaro and Celso (Leno): securing the building and conservative restoration; realisation of the cover; start-up of site archaeological dig.
Parties involved	Superintendency for the Archaeological assets of Lombardy, Municipalities involved, provincial administration
Phases and timeframe	Five year period 2008-2013
Financial resources	to be quantified and raised
Expected results	Increase in the number of visitable Longobard sites
Result indicators	Number of visitors

ENHANCEMENT PLAN Brescia territory	
Objective 22	REALISATION OF MUSEUMS LINKED TO THE VOCATION OF THE TERRITORY
Project 22.1	Realisation of the Museum of Industry and Work (MUSIL)
Description	The objective of the project is the representation of industry and work as the main driving forces of modernisation in the last two centuries, through the realisation of a network of museum structures dedicated to industrial archaeology.
Actions	<p>The intervention foresees:</p> <ol style="list-style-type: none"> 1. recovery of the building ex Tempini in Brescia as the central site of the Museum 2. modernisation of the Iron Museum of San Bartolomeo in Brescia 3. recovery of the ex Hydroelectric Power Station of Cedegolo and its reconversion into a Museum 4. set-up in Rodengo Saiano, of large visitable warehouse called " The city of Machines". <p>As this is a formulated programme, the degree of definition varies from project to project.</p>

Parties involved	<p>Leader body: Museum Association of Industry and Work Promoter bodies: Brescian Civilisation Foundation and Luigi Micheletti Foundation Also: the Region of Lombardy, Province of Brescia, Municipality of Brescia, Municipality of Cedegolo, Municipality of Rodengo Saiano, Mountain Community of Valle Camonica, University of Studies of Brescia, Asm Brescia Spa, Chamber of Commerce.</p>
Phases and timeframe	<p>Agreement of programme: conclusion by March 2010; Hydroelectric Energy Museum of Cedegolo: inauguration foreseen for April 2008; Warehouse in Rodendo Saiano :ready for inauguration; Iron Museum: beginning 2008.</p>
Financial resources	<p>Total cost of project quantified at €26,885,000.00 of which RL FIP (regional law 31/96) €4,300,000; RL Doc. ob.2 €2,200,000.; Municipality of Brescia €12,685,000.; Province of Brescia €1,500,000.; University of Brescia €2,500,000.; Mountain Community of Valle Camonica €250,000.; ASM Brescia Spa €2,500,000.; Municipality of Cedegolo €250,000.; other private €700,000.</p>
Expected results	<p>Counting on the variety and abundance of the documentation and collections in the possession of the Luigi Micheletti Foundation and Brescian Civilisation, promoters of the Museum, the machines, items, tools which constitute them will not lead to simple sets of findings, but to integrated systems for which the allocation into the historical container sites of the Museum and striking method of set-up will allow the reading of testimonials, evocative and monumental, of the largest process of industrialisation and modernisation, up to the current objectives of technological innovation.</p>
Result indicators	<p>Visitors to the museum sites, opportunities for comparison and critical study with social spill-over in matters of history and research.</p>

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 23	COMPLETING THE ANTIQUARIUM IN SAN GIOVANNI MONASTERY
Project 23.1	Completing the upgrade of the building of the Monastery to turn it into an exhibition area
Description	The premises of San Giovanni Monastery are the subject of an intervention that is about to be concluded, consisting in the restoration of the ancient halls and re-organization of the materials in the wing used as a warehouse. There remain to be completed works to upgrade the halls of the Monastery to facilitate access to the monument and the findings to be exhibited.
Actions	<ol style="list-style-type: none"> 1. Upgrading the premises 2. Improving the technical apparatus and equipment as required for the new planned use
Parties involved	Regional Directorate for Cultural and Landscape Heritage of Lombardy Superintendent's Office for Cultural Heritage of Lombardy
Phases and timeframe	Within 2008
Financial resources	MIBAC funds: euro 247,000.00
Expected results	Streamlining and upgrading the quality of the museum experience in the Castelseprio Archaeological Park
Result indicators	Area intended for exhibitions and welcoming visitors

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 23	COMPLETING THE ANTIQUARIUM IN SAN GIOVANNI MONASTERY
Project 23.2	Completing the layout of the Antiquarium
Description	<p>The exhibition project for the Antiquarium has already been laid down. As well as in-depth information on the history of the castrum, to be provided prior to visiting the remains, a description of the structures and buildings of the Monastery where the exhibition is hosted will be also made available.</p> <p>Many activities aimed at gathering in-depth information and preparing the relevant materials have already started. They have yet to be completed along with the final layout of the premises, which envisages the following:</p> <ol style="list-style-type: none"> a) exhibition of the findings from the excavations; b) explanatory notes and a multi-language guide; c) an interactive computer workstation to view multimedia materials with differently detailed information; d) a model reconstruction of the castrum and its buildings to afford a bird's-eye view of the whole complex
Actions	<ol style="list-style-type: none"> 1. Selecting, studying and restoring the exhibition materials (already started) 2. In-depth analysis of the existing documents as related to the topics addressed in the exhibition layout, with particular regard to the historical phases of development of the castrum 3. Implementing graphical reconstructions of the castrum and its main monuments 4. Creating the model 5. Creating the showcases for exhibiting the materials and implementing the layout 6. Creating the educational apparatus (panels, texts) 7. Creating the multimedia materials 8. Creating the multimedia educational workstation 9. Creating the guide
Parties involved	Regional Directorate for Cultural and Landscape Heritage of Lombardy Superintendent's Office for Cultural Heritage of Lombardy
Phases and timeframe	Within 2008
Financial resources	MIBAC funds: euro 250,000.00
Expected results	Streamlining and upgrading the quality of the museum experience in the Castelseprio Archaeological Park
Result indicators	Increase in the number of visitors Increased quality and amount of site-related information for all types of visitor and for scholars

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 24	ENHANCING THE TOURING ARRANGEMENTS FOR THE CASTELSEPRIO-TORBA ARCHAEOLOGICAL COMPLEX
Project 24.1	Creating a trail to connect the upper castrum with the outpost in the valley (Torba)
Description	<p>The project envisages restoration of the trail leading to the Castelseprio archaeological area, consolidation of the hillsides, and conservational restoration of the existing archaeological structures.</p> <p>Up to a few years ago, a trail connected the Monastery of Torba, which is located at the foot of the hill 270 m asl, with the former San Giovanni Monastery, which will be hosting the Antiquarium and is located on the hill inside the Castelseprio Archaeological Park. This trail is currently impassable because of landslides that have occurred in several areas.</p> <p>The Superintendent's Office for Archaeological Heritage of Lombardy approved, in 2005, a project for a new trail running close to the extant walls, although those walls are currently covered by vegetation and creepers. Project-designing for the final portion of the trail, in the area owned by FAI, was subsequently completed in line with the features set out as above.</p> <p>To create the trail, a route with a cross-sectional width of 110 cm and a 20% maximum slope will have to be implemented, for a total length of 140 m in the area owned by FAI and additional 340 m in an area owned by the State.</p> <p>Where the slope is found to be in excess of 15%, a set of steps will be put in place with their cutting edge located externally; where the slope is found to be less than 15%, diggings and fillings will be used. The walking surface will be created by using suitably stabilised materials; transverse cuttings will be created and coated in wood to ensure water channeling, and the surface will be leveled out with the help of diggings and fillings.</p> <p>Since the area touches upon a portion of the walls that has yet to be investigated and restored, located mostly in the FAI's grounds, the project envisages archaeological activities to analyse and bring to light any existing structures in addition to restoration of such structures so as to make them accessible and valorize the touring arrangements in the Castelseprio Archaeological park.</p> <p>The objectives sought by this activity consist mainly in creating a trail for tourism and cultural purposes, allowing access to, visit and maintenance of the archaeological findings and the woods, and strengthening the slope of the hill at the level of the trail</p>
Actions	<ol style="list-style-type: none"> 1. Preliminary investigations 2. Implementation activities
Parties involved	Regional Directorate for Cultural and Landscape Heritage of Lombardy Superintendent's Office for Cultural Heritage of Lombardy Lombardy Region FAI - Fondo per l'Ambiente Italiano (Fund for Italy's Environment)
Phases and timeframe	As from 2008
Financial resources	As for the portion of the trail located in FAI's property: Co-funding by FAI and Lombardy Region, based on the Call for Tenders related to the Archaeological heritage of Lombardy (2007) - see regional Acts no. 39/84 and no. 39/91 - Euro 43,000 To be found as for completing the upward trail.
Expected results	Enhanced availability and integration of the areas making up the Castelseprio Archaeological Park
Result indicators	Enlargement of the area accessible to visitors.

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 24	ENHANCING THE TOURING ARRANGEMENTS FOR THE CASTELSEPRIO-TORBA ARCHAEOLOGICAL COMPLEX
Project 24.2	Upgrading the educational and explanatory apparatus along the route to the castrum and close to Santa Maria foris portas
Description	Although the Park and the church of St. Maria foris portas are already equipped with explanatory panels describing the history of the monuments and their building and artistic features, it is appropriate to update the panels and translate the texts into English for the sake of our foreign guests, so as to make available more adequate, effective cultural information.
Actions	<ol style="list-style-type: none"> 1. Carrying out the analysis and gathering the in-depth information required in respect of the monuments and remains to implement new explanatory panels 2. Drafting multi-language texts and diagrams showing reconstructions of the visible remains 3. Creating and placing the panels
Parties involved	Regional Directorate for Cultural and Landscape Heritage of Lombardy Superintendent's Office for Cultural Heritage of Lombardy Province of Varese Municipality of Castelseprio
Phases and timeframe	Within 2009
Financial resources	To be found
Expected results	Streamlining and upgrading the quality of the museum experience in the Castelseprio Archaeological Park
Result indicators	Increase in the number of visitors, both Italian and foreign Increased quality and amount of site-related information for all types of visitor and for scholars

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 24	ENHANCING THE TOURING ARRANGEMENTS FOR THE CASTELSEPRIO-TORBA ARCHAEOLOGICAL COMPLEX
Project 24.3	Enhancing the educational and explanatory apparatus close to the Tower of Torba and the Church of Santa Maria
Description	No panels or signposts are available inside the Tower and the structures of the Torba complex to facilitate visiting the area, which means that Torba is without the basic tools to provide information and facilitate comprehension by the public as a whole.
Actions	<ol style="list-style-type: none"> 1. Carrying out the analysis and gathering the in-depth information required to draft new, updated explanatory materials (researches into art and history; archival surveys; analysis of archaeological documents) 2. Creating graphical reconstructions of the building phases 3. Drafting texts for panels and signposts 4. Translating the texts 5. Publishing scientific papers and/or popularization papers
Parties involved	FAI - Fondo per l'Ambiente Italiano Lombardy Region
Phases and timeframe	Starting from 2008
Financial resources	Cofunding by Lombardy Region - Call for tenders for the archaeological heritage of Lombardy (2007) - Acts no. 39/84 and 39/91
Expected results	Improved knowledge of and access to the cultural heritage; creating historical and artistic links with the Castelseprio area
Result indicators	Number of the analyses and reconstructive attempts Number of the created panels Number of published materials

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 24	ENHANCING THE TOURING ARRANGEMENTS FOR THE CASTELSEPRIO-TORBA ARCHAEOLOGICAL COMPLEX
Project 24.4	Creating a touring route to the village and restoring the old entrance ways
Description	Outside the walls of the castrum there is evidence of a burg (village) including the church of St. Maria foris portas. Apart from the church, no other valorization initiatives and/or trails are currently available to identify other remains in the woods that have covered this area. There are old trails in the woods, which further add to the value of this territory in terms of landscape; those trails are no longer passable because they are covered by vegetation. They were historically the main routes connecting with the neighbouring areas. As well as improving knowledge about the development of the village and the entrance ways to the castrum (see Knowledge Plan), a system of routes will be created to enable valorizing the items in question, which will become a part of the nature experience in the area close to the castrum.
Actions	<ol style="list-style-type: none"> 1. Analysis and assessment of the available data concerning the burg 2. Project-designing and implementing the touring routes as for the area and the burg remains 3. Detecting and analysing the original routes to access the castrum 4. Restoring the old trails 5. Creating educational and explanatory apparatuses
Parties involved	Regional Directorate for Cultural and Landscape Heritage of Lombardy Superintendent's Office for Cultural Heritage of Lombardy Province of Varese Municipality of Castelseprio and neighbouring municipalities Private bodies
Phases and timeframe	Starting from 2010
Financial resources	To be found
Expected results	Enhancing the opportunities to experience the cultural and landscape values of the Castelseprio Archaeological Park.
Result indicators	Number of the opened and/or restored trails/routes Areas that can be visited and/or accessed

ENHANCEMENT PLAN Castelseprio-Torba site	
Objective 24	ENHANCING THE TOURING ARRANGEMENTS FOR THE CASTELSEPRIO-TORBA ARCHAEOLOGICAL COMPLEX
Project 24.5	Creating a new lighting and protection system for the frescoes in the Tower and in the Church of Santa Maria at Torba.
Description	The whole complex of the Torba Monastery will be the subject of activities aimed at improving its preservation and access conditions. In particular, a new protection and lighting system is being designed for the frescoes in the Tower as well as for the plastering and the fragmentary frescoes preserved within the Church of Santa Maria. The project envisages a new lighting system for the first floor of the Tower, consisting in the insertion of lighting sources from a wooden platform that will be installed on top the original flooring and bordered by steps to better protect the delicate frescoes. As for the church of Santa Maria, a new indoor lighting system is envisaged along with the revamping of the existing platform and the apparatus for viewing the archaeological remains (tomb), whose protective glass cover will be replaced.
Parties involved	<ol style="list-style-type: none"> 1. Drawing up the project and assessing its feasibility 2. Implementing the project
Phases and timeframe	FAI - Fondo per l'Ambiente Italiano; Superintendent's Office for Historical, Artistic and Demo-Etno-Anthropological Heritage; Superintendent's Office for Architectural and Landscape Heritage of Milan and Lombardy
Financial resources	2008: Fund procurement
Expected results	To be found (private bodies, banking foundations, public bodies)
Result indicators	Improved preservation, protection and public availability of the Tower and the church of St. Maria at Torba

ENHANCEMENT PLAN Castelseprio-Torba site, buffer zone and territory	
Objective 25	IMPROVING SIGNAL POSTS AND COMMUNICATION TOOLS
Project 25.1	Placing signaling posts along the main traffic routes and nodes
Description	The project envisages mapping the signals that are currently available along the main traffic routes and nodes to Highlight possible flaws and replace them by new signals
Actions	<ol style="list-style-type: none"> 1. Mapping of the existing signals and Highlighting flaws 2. Placing new signals at key locations
Parties involved	Municipality of Castelseprio, Province of Varese
Phases and timeframe	Short-term (by 2008)
Financial resources	Co-funded by Municipality of Castelseprio and Lombardy Region - Call for tenders for the archaeological heritage of Lombardy (2007) - Regional Acts no. 39/84 and 39/91 - Euro 6,500.00
Expected results	Improved identification and access from all directions in respect of the Castelseprio archaeological area
Result indicators	Number of created signals

ENHANCEMENT PLAN Castelseprio territory	
Objective 25	IMPROVING SIGNAL POSTS AND COMMUNICATION TOOLS
Project 25.2	Creating bilingual (Italian/English) information panels
Description	The project envisages the creation of information panels in Italian and English including the relevant pictures, to be located at key locations in the territory of the municipality to invite visitors to the archaeological area
Actions	<ol style="list-style-type: none"> 1. Drafting of bilingual texts on the archaeological area, the church of St. Maria foris portas and the environmental features of the area 2. Determination of the key locations in the territory of the municipality outside the archaeological park 3. Placing the panels
Parties involved	Municipality of Castelseprio
Phases and timeframe	Short-term (by 2008)
Financial resources	Co-funded by Municipality of Castelseprio and Lombardy Region - Call for tenders for the archaeological heritage of Lombardy (2007) - Regional Acts no. 39/84 and 39/91 - Euro 4,000.00
Expected results	Enhanced knowledge and appreciation of the archaeological area by citizens; fostering visits of the area
Result indicators	Number of created panels Number of the languages used for the panels

ENHANCEMENT PLAN Castelseprio territory	
Objective 25	IMPROVING SIGNAL POSTS AND COMMUNICATION TOOLS
Project 25.3	Implementing communications and photographic campaigns
Description	The project envisages implementing a new photographic campaign with regard to the Archaeological Park and the church of St. Maria foris portas, to be used for the aforementioned valorization initiatives as well as to enhance the contents of the websites related to this area
Actions	Phase A <ol style="list-style-type: none"> 1. Photographic campaign
Parties involved	Municipality of Castelseprio, Province of Varese, Superintendent's Office for Archaeological Heritage of Lombardy
Phases and timeframe	Short-term (by 2008)
Financial resources	Co-funded by Municipality of Castelseprio and Lombardy Region - Call for tenders for the archaeological heritage of Lombardy (2007) - Regional Acts no. 39/84 and 39/91 - Euro 1,000.00
Expected results	Creation of exhaustive, updated photographic documentation to fill in the existing gaps
Result indicators	Number of new available pictures

ENHANCEMENT PLAN Castelseprio territory	
Objective 26	LINKING THE EARLY MIDDLE AGES FINDINGS IN THE GIUDICARIA OF SEPRIO
Project 26.1	Creating theme-based itineraries by including the other findings related to the Early medieval and Longobard period
Description	<p>The district of the Giudicaria of Seprio, which was headed by the Flavia [imperial] city of Castelseprio under Longobards' rule, is one of the main areas of the Longobard Kingdom by having regard to its key role with a view to controlling and defending the routes leading from the north to the capital of the kingdom, i.e. Pavia. Its boundaries reached northwards as far as Bellinzona, in the current Ticino Canton, in Switzerland, covered the whole province of Varese (up to the banks of Lake Maggiore and the Ticino river) and took up part of the provinces of Como (the western banks of Lake Como and the Severo river) and Milan (southwards) as well. The importance of this area during the Early middle ages period is shown by major archaeological findings, monuments and documentary evidence - Longobard tombs and necropolises, remarkable places of worship, monasteries, castles and settlements. Part of this heritage has already been the subject of valorization initiatives in the specific contexts, however there is as yet no integrated system that can make available these items to a broader circle within the framework of a full-fledged cultural and tourism offer. Therefore, the project envisages the theme-based networking of these components so as to link the archaeological findings, the monuments and works of art, museum collections and other types of heritage via different routes. This will also allow better appreciating and understanding the environmental features and the social and economic components of the area at issue.</p> <p>To valorize the Early middle ages heritage in the Giudicaria, after establishing the links referred to above, suitable educational and explanatory apparatuses will be made available in respect of the various routes and items by creating ad-hoc panels; additionally, joint valorization initiatives will be waged and multimedia materials will be published on the routes and topics related to the presence of Longobards in this territory.</p>
Actions	<ol style="list-style-type: none"> 2. Analysis of the data related to findings and monuments of the early medieval period (see Knowledge Plan) to set out the theme-based routes and the components to be taken into consideration 3. Stipulation of bilateral and/or multilateral agreements with the entities involved 4. Project-designing and implementation of theme-based routes 5. Creating the educational and explanatory apparatus 6. Implementing joint initiatives to valorize the Lombard heritage and components 7. Creating publications related to the routes and themes taken into consideration
Parties involved	<p>Regional Directorate for Cultural and Landscape Heritage of Lombardy Superintendent's Office for Cultural Heritage of Lombardy Lombardy Region; Province of Varese Province of Como; Province of Milan Municipalities in the areas concerned Swiss State and other institutions in the area concerned within the Ticino Canton</p>
Phases and timeframe	As from 2008-2009
Financial resources	To be found
Expected results	Improved access to and appreciation of the heritage of the Lombard period in the territory of the Giudicaria of Seprio
Result indicators	<p>Scope of the territory involved Number of entities involved Number of the networked items Number of routes created Amount of joint initiatives Amount of published materials</p>

ENHANCEMENT PLAN Spoleto site	
Objective 27	EXPLOITATION OF THE BASILICA OF S. SALVATORE
Project 27.1	Identification of the Basilica as an exhibition centre
Description	The aim of the project is the acquisition of equipment necessary to fully exploit the architectural features and spaces of the building in order to set up temporary art exhibits, with the previous, accurate selection of artists and proposals, including contemporary works. The spaces in the former convent, adjacent to the building, in which a documentation centre, centre for visitors and coordination of teaching activities will be installed, will house a bookshop, where illustrated materials (brochures, catalogues, etc.) can be found concerning the exhibit in progress.
Actions	<ol style="list-style-type: none"> 1. Analysis of the equipment necessary for setting up temporary exhibits (supports, exhibitors, lighting installation, sequences of panels, totems, ...) 2. Creation of a Reception and Information Office with a bookshop annex 3. Programming of teaching activities 4. Creation/updating of useful teaching documentation 5. Acquisition of computer systems
Parties involved	Office for Architectural Assets, Landscape and Historic, Artistic and Ethno-Anthropological Heritage of Umbria (BAPPSAE) Municipality of Spoleto Italian Centre for the Study of the Early Middle Ages (CISAM) Records Office for Umbria State Archives in Perugia – Spoleto Section University of Perugia City and regional schools and sites of the Lombard network
Phases and timeframe	Starting from 2009
Financial resources	Funds to be derived from the Municipality of Spoleto budget, Region of Umbria, Ministry of the University and Research, CISAM, and other public and private organisations.
Expected results	Enlargement of the allocated space inside the Basilica, to include activities other than those currently in practice (worship, guided tours, teaching activities). Systemising the activities already undertaken. Creation of a specialist, computerised documentation centre. Increase in number of information centres in the city.
Result indicators	Number and quality of the temporary exhibits set up, requests for access to/consultation of the documentation centre, participation in teaching activities and guided tours.

ENHANCEMENT PLAN Spoleto site	
Objective 27	EXPLOITATION OF THE BASILICA OF S. SALVATORE
Project 27.2	Creation of a visitors' centre
Description	The aim of the project is to create a visitors' centre, to be located in the space gained following conservative restoration operations and reorganization of the entire complex of the former convent, adjacent to the Basilica. The visitors' centre will deal with coordinating guided tours to the site and the buffer zone, i.e. historic-artistic and naturalistic tours and excursions, as well as organising museum teaching activities for all school levels, a task which is currently carried out in the municipal offices. The centre will be in close contact with the tourist offices in order to ensure an efficient service and offer tourists a variety of information and services related to the site and buffer zone.
Actions	<ol style="list-style-type: none"> 1. Creation of a Reception and Information Office with a bookshop annex. 2. Programming of teaching activities. 3. Production/updating of useful teaching documents. 4. Acquisition of computer systems.
Parties involved	Municipality of Spoleto. Office for Architectural Assets, Landscape and Historic, Artistic and Ethno-Anthropological Heritage of Umbria (BAPPSAE) City and regional schools and sites of the Lombard network

Phases and timeframe	Starting from 2009
Financial resources	Funds to be derived from the Municipality of Spoleto budget, th Region of Umbria, Ministry of the University and Research, and BAPPSAE office of Umbria.
Expected results	Systemising the activities already undertaken. Increase in the number of information centres in the city.
Result indicators	Opening of the centre. Requests for participation in the teaching activities and guided tours.

ENHANCEMENT PLAN Spoleto site	
Objective 27	EXPLOITATION OF THE BASILICA OF S. SALVATORE
Project 27.3	Creation of a documentation centre
Description	The aim of the project is to create a documentation centre, to be located in the space recovered following conservative restoration operations and reorganization of the entire complex of the former convent, adjacent to the Basilica. The centre shall deal with collecting publications and studies on the Longobards; reviews and projects of the Basilica, former convent and cemetery; and graphic, photographic and descriptive documentation on the restorations performed. These shall be made easy to consult through computerised equipment. It will also be enriched with a specialist library with books for comparing the buildings of the entire Longobards network. The material, which is to concern Spoleto and the other cities involved, will be available, if possible, in both paper versions and consultable on-line through connections with other available databases possessing information on the subject. The support that could be supplied by the Italian Centre for the Study of the Early middle ages is fundamental; the above centre has dedicated numerous weeks of study on the subject.
Actions	<ol style="list-style-type: none"> 1. Analysis and acquisition of existing data. 2. Archiving of data through cataloguing and computerisation. 3. Acquisition of all bibliographic and documentary material. 4. Acquisition of data processing equipment.
Parties involved	Municipality of Spoleto. Italian Centre for the Study of the Early middle ages (CISAM) Records Office for Umbria State Archives in Perugia – Spoleto Section University of Perugia.
Phases and timeframe	Starting from 2009
Financial resources	Funds to be derived from the Municipality of Spoleto budget, Region of Umbria, Ministry of the University and Research, CISAM and other public and private organisations.
Expected results	Creation of a specialist, computerised documentation centre. Systemising of existing documents – implementation of archives in other seats of the project and at CISAM.
Result indicators	Opening of the centre. Requests for access to/consultation of the documentation centre, visits to the centre.

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 28	EXPANSION OF SERVICES IN THE LODGING FACILITIES ANNEXED TO THE CHURCH OF S. PONZIANO
Project 28.1	Insertion of the lodging facilities into the network of "Places of the spirit"
Description	From 2004-2006, the Municipality of Spoleto participated in a European project called "European places of the spirit", within the CADSES - INTERREG IIIB programme. Its objective was to network places in Europe that are rich in cultural-religious heritage (monasteries, retreats, abbeys, etc.) in order to exploit their potential to attract tourists and create real cutting-edge Area Products, hereby overcoming the traditional concept of religious tourism and setting up an integrated, quality "package" linked not only to sacred sources, but also to picturesque areas, sources of water, nature and wellness centres. The project considered various areas in Umbria (Monteluco and Valnerina), the Marches

	<p>(Romanic itinerary), Greece (Meteora Monasteries) and Romania (Painted monasteries of the Bukovina). Upon completion of the works, with the collaboration of financial agents from all of the European countries concerned, a Map of Quality was draw up, with which public and private agents in the network of "European Places of the Spirit" committed themselves to satisfying some points deemed essential in characterising a site as a "place of the spirit". The results are then to be taken and verified, to see if it is possible to continue the project on a European level during the applications stage following the now concluded study stage. If this is not the case, the idea that arose from the European project will be created in the lodging facilities known as "Monastero di S. Ponziano"</p>  <p style="text-align: center;">Monastery of S. Ponziano</p>
<p>Actions</p>	<ol style="list-style-type: none"> 1) Verification of the possibility of continuing the project with those European partners already involved (Region of the Marches, Greece, Romania) 2) Otherwise, creation of the idea that arose during the final stage of the European project shall be created in the lodging facilities known as "Monastero di S. Ponziano" (with the application of the principles of the Map of Quality) and tourist packages will be set up that link the values of the sacred, nature and wellness in an integrated, High quality manner.
<p>Parties involved</p>	<p>Municipality of Spoleto Archdiocese of Spoleto – Norcia Religious hospitality house "Monastero di S. Ponziano" Sviluppumbria (Umbria development) as coordinator of the European project "European Places of the Spirit" and, possibly, the other project partners (Region of the Marches, Greece, Romania)</p>
<p>Phases and timeframe</p>	<p>Starting from 2009</p>
<p>Financial resources</p>	<p>Funds to be derived from the Municipality of Spoleto budget, Archdiocese of Spoleto - Norcia, and Region of Umbria</p>
<p>Expected results</p>	<p>Creation of cutting-edge Area Products and tourist packages that supply an integrated, quality offer, linked to sacred sources, picturesque areas, sources of water, nature and wellness centres.</p>
<p>Result indicators</p>	<p>Increase in the persons booking at the lodging facilities and the arrival of tourists in town</p>

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 28	EXPANSION OF SERVICES IN THE LODGING FACILITIES ANNEXED TO THE CHURCH OF S. PONZIANO
Project 28.2	Insertion of a convention area, inside the monastery, into the town convention circuit
Description	The Municipality of Spoleto is already in the process of organising a Convention Bureau that will allow convention organisers to have a coordination office enabling them to supply information in real time on the numerous conventions sites present in the surrounding area. There are already many public-owned sites in the database of the Convention Bureau; thus, it is a matter of defining the methods and drawing up agreements for insertion into the databank, this including privately owned convention sites. The religious hospitality house "Monastero S. Ponziano" has a conference room with 100 seats, which is equipped with the devices necessary for conference activities (monitor, loud-speaker system, projector, internal and external areas for small meetings, buffets and business breakfasts).
Actions	<ol style="list-style-type: none"> 1. Agreements with the Archdiocese of Spoleto – Norcia and with the director of the religious hospitality house "Monastero S. Ponziano" 2. Insertion of the conference room into the database of the Convention Bureau and into promotional activities
Parties involved	Municipality of Spoleto Archdiocese of Spoleto – Norcia
Phases and timeframe	Approx. six months, starting from end-2008
Financial resources	Funds derived from the Municipality of Spoleto budget
Expected results	Enlargement of the range of convention sites to be placed on the market
Result indicators	Requests for sites for organising conventions and meetings by agents in the sector

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 29	RAISING OF THE LEVEL OF EXPLOITATION OF THE CHURCH OF S. PONZIANO
Project 29.1	Enlargement of the usability of the church
Description	The church can currently only be visited upon request, by contacting the adjacent monastery. Consideration of the value of the church and crypt below it makes it necessary to define regular opening hours like the other city churches and monuments. Expansion of the usability of the church would also allow the citizens of Spoleto to visit the church of the patron saint of the city regularly.
Actions	<ol style="list-style-type: none"> 1) Verify the possibility of having recourse to the staff of the Archdiocese or the cooperative society already managing the archaeological sites and museums or the director of the lodging facilities adjacent to the church. 2) Drawing up of an agreement with the pre-selected manager.
Parties involved	Municipality of Spoleto Archdiocese of Spoleto – Norcia
Phases and timeframe	Short period, starting from end-2008
Financial resources	Possible contribution for managing costs of the new opening hours, as a benefit from the Municipality of Spoleto budget
Expected results	Improvement of the usability of the asset
Result indicators	Number of visitors/devotees of the patron saint

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.1	Plan for use of historically and culturally significant buildings
Description	The project provides for defining the use of historic buildings, and their culturally significant contents, the restoration of which has just been completed or is almost completed, following the seismic events of 1997, and inserting them into the broader plan for revitalisation of the

	<p>historic centre.</p> <p>A) Works already completed and use already defined:</p> <ul style="list-style-type: none"> – City Hall – restoration as the seat of institutional bodies and some management offices, with the use of some spaces for housing temporary exhibits; – Palazzo Collicola – City Gallery of Modern Art and art exhibitions; – Teatro Nuovo – restoration of the function of hosting plays, events, conventions, etc. <p>B) Works to be completed:</p> <ul style="list-style-type: none"> – Palazzo Mauri – seat of the Library and City Mediateca (Multimedia centre) and Museum of Printing Works; – Complex of the Chostro di San Nicolò, works in progress to set up a new function as a Convention Centre (a PIT “Project of Territorial Interest” – network of Tourism-Environment-Culture) – Teatro Caio Melisso and former City Museum – works in progress to adapt and create a new function for plays, events, conventions and exhibits. (PIT – network of Tourism-Environment-Culture) <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>City Hall</p> </div> <div style="text-align: center;">  <p>Teatro Nuovo</p> </div> </div>
Actions	<p>point B:</p> <ol style="list-style-type: none"> 1) Verify the trend of the worksite and that the time schedule set forth in the contract is being respected
Parties involved	Municipality of Spoleto
Phases and timeframe	Starting from 2008, at least two years to complete all stages
Financial resources	<p>Funds already earmarked for the works</p> <p>Funds to be found for using some buildings (in collaboration with local financial agents)</p>
Expected results	Completion and systemising of culturally significant historic buildings and their contents, for institutional use by the Municipality of Spoleto and for commercial and cultural aims, within the broader project for revitalising the historic centre
Result indicators	Full use of culturally significant historic buildings and their contents, following their renovation

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30. 2	Planning of a city Trekking project through the identification of new tourist-cultural routes.
Description	<p>In Spoleto, the project for non-invasive mobility is in an advanced state of fulfilment (the first “Spoletosfera” parking lot is ready; by the end of the year, the motorised route from Spoletosfera to Piazza della Libertà will be operative); thus, the Historic Centre will be closed to traffic to the benefit of pedestrians and to view the city at a friendly human pace.</p> <p>This planned action is developed by setting up of four pedestrian itineraries to guide tourists through the streets, lanes, large and small squares, panoramic views, etc., in search of ancient Spoleto, sometimes even hidden, but “new” at the same time, without noise and pollution, thus offering sustainable, quality tourism.</p> <p>The four itineraries being studied are each marked by a colour and suitable signs, to be noted</p>

	<p>in the layout of the new regional tourist signs, currently being prepared:</p> <ol style="list-style-type: none"> a) Most famous monuments – (possibly yellow). Advisable for people visiting Spoleto for the first time; b) Museum route – (possibly red). Basically follows itinerary 1, but with deviations to allow for visiting the many museums, such as: the City Gallery of Modern Art, Municipal Pinacoteca, Museum of Archaeology, Roman Home, Museum of the Diocese, Museum of the Duchy. c) Outside the Walls – (possibly green). Winds around the outside of the medieval city walls. This route is more difficult, since it is long and on foot. However, it is a must for those who wish to gain closer knowledge of the city. d) Archaeological Itinerary – (possibly blue). Guides the visitor to sites, finds and monuments of archaeological interest, often less or not well known. e) Apart from installing signs, the following are also foreseen: f) a multi-lingual editorial route, with guidebooks that describe the various aspects of development (monumental, religious, environmental, architectural, etc.) located and able to be visited along the four routes; the average times needed for covering the routes are indicated, and a map of the city that includes the four options shall be made available g) targeted marketing that will also be developed with the aid of street entertainers, who will perform along the tourist walking routes and promote the events and initiatives programmed in the city <p>The project is partly in collaboration with the Chamber of Commerce of Perugia</p> <div style="text-align: center;">  <p>the Spoletosfera, the work of Fuller behind the elevator to the motorised route</p> </div>
Actions	<ol style="list-style-type: none"> 1) Historic-cultural research, identification and cartographic definition of the itineraries 2) Preparation and installation of signs 3) Preparation of guidebooks in various languages 4) Targeted marketing
Parties involved	Municipality of Spoleto Mapping experts Chamber of Commerce of Perugia
Phases and timeframe	Definition of itineraries: within the year 2008 Installation of signs: within one year of defining itineraries Preparation of guidebooks in various languages: within one year of defining itineraries Targeted marketing: to begin as soon as the previous stages are completed
Financial resources	Funds from the budget of the Municipality of Spoleto and co-financing by the Chamber of Commerce of Perugia
Expected results	Define a more organised way, diversified by interests, to tour the city
Result indicators	Installation of signs Publication of guidebooks and maps in several languages

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.3	Exploitation of Archaeological Routes.
Description	<p>Activation and expansion of itineraries for archaeological discovery, including the National Museum of Archaeology, monuments and architectural sites (Roman domus, Roman Theatre, Amphitheatre, Arch of Drusus and Germanicus, Ponte Sanguinario [Bloody Bridge], City Walls), findings that came to light following excavations (Colle S. Elia), restorations of historic buildings (Palazzo Mauri, Palazzo Pianciani, Teatro Nuovo) and chance discoveries (Necropolis of Cortaccione).</p>  <p>The Arch of Drusus</p>  <p>The Roman domus</p>
Actions	<ol style="list-style-type: none"> 1) Activation of various tourist routes with guided tours. 2) "Archaeobike" routes: archaeology and bicycles 3) Affixing of explanation panels in the monuments and along the itinerary routes. 4) Production of a map of the archaeological sites and routes, available at tourist offices. 5) Creation of a data and documentation centre containing photographic and graphic material and film clips of the individual finds
Parties involved	<p>Municipality of Spoleto Office for the Archaeological Assets of Umbria Italian Centre for the Study of the Early Middle Ages University of Perugia Other public and private organisations</p>

Phases and timeframe	Starting from 2008
Financial resources	Municipality of Spoleto Office for the Archaeological Assets of Umbria Other public and private organisations
Expected results	Re-appropriation of identifying processes and knowledge of historic and cultural roots; interpretation of the vocation of the territory in order to adopt appropriate choices.
Result indicators	Affixing of panels; activation of routes; number of supports and participants.

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.4	Revitalisation of the historic centre
Description	From an economic standpoint, the main objective of revitalisation is to transform the Historic Centre into a "natural business centre", consistent with the outline of Regional Legislation for revitalising Umbrian historic centres. Starting with the analysis of recognition of historic, cultural and environmental heritage, the project shall follow regulations of use marked by the exploitation of spaces, roads, squares and buildings. Within this context, the Plan for the allocation of historic and culturally significant buildings, as in prog. 4.1, takes on importance.
Actions	<ol style="list-style-type: none"> 1) Preliminary analysis 2) Proposal for changes of allocation of use, without charges, for business and handicrafts activities; Multi-functional centres 3) Reductions and award-giving for new investments and/or renovations of existing activities marked by criteria of reuse of the asset, quality of the activities and sustainable development
Parties involved	Municipality of Spoleto, Chamber of Commerce, Professional organisations
Phases and timeframe	Starting from 2008, at least two years to complete all stages
Financial resources	Funds already partially earmarked and partially to be found
Expected results	Transformation of the historic centre into a multi-functional centre equipped with multiple quantitative and qualitative services, benefiting citizens and tourists.
Result indicators	Number of investments and/or restorations, operations and initiatives

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.5	Plan for Street Fixtures
Description	<p>The plan for upgrading the Street Fixtures falls within the project for revitalising the Historic Centre. This plan is intended as a qualifying and harmonising component of the city spaces as a whole, setting itself up in its role of control and suggestion with respect to private operations and planning policy and scheme for public works, according to a unitary component need.</p> <p>The Municipal Government has already started up the initial designs and creation of City Fixtures, but the transformation of the territory and dissemination of the architectural culture shall be the object of a national competition.</p>
Actions	<ol style="list-style-type: none"> 1) Preliminary analysis 2) Drawing up of the competition notification 3) Application and monitoring
Parties involved	Municipality of Spoleto, Ministry for Cultural Heritage and Activities
Phases and timeframe	1 already implemented 2-3 starting from 2008
Financial resources	Funds to be found
Expected results	Transformation of the historic centre, in conformity with a uniform architectural culture.
Result indicators	Number of improvements of the city fixtures

ENHANCEMENT PLAN Spoleto buffer zone and territory	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY
Project 31.1	Opening of Mining Museum of Morgnano
Description	<p>The project concerns the opening of a museum on the historic site of the lignite mines of Morgnano (hamlet outside Spoleto), starting with the remains of industrial archaeology in the area. The museum will emerge as evidence of a chief production activity for the economy of Spoleto from the end of the 1800s until the 1960s. Museum finds will be contextualised through the exhibition in the original locations and will be equipped with a centre documenting the mining activity.</p>
Actions	<ol style="list-style-type: none"> 1) Setting up the site; 2) Opening of the documentation centre with recordings and film clips of the testimonies of the former miners and bibliographic, documentary and photographic material that have been catalogued and computerised; 3) Carrying out teaching and laboratory activities; 4) Expansion of international cultural exchanges and twinning with other mining sites, partly already started up (Sardinia, Marcinelle, Charleroi); 5) Promotion of seminars on economic and social themes.
Parties involved	<p>Municipality of Spoleto; Laboratory of Earth Sciences; Friends of Mines Association; Community Montana of the Martani Mountains and Serano; European Union.</p>
Phases and timeframe	Starting from 2009 (opening of Museum)
Financial resources	Municipal budget; Community Montana of the Martani Mountains and Serano; regional financing; European funding.
Expected results	Expansion of city museums; increase of training offered and amplification of teaching activities, reactivation of identifying processes.
Result indicators	Opening of the museum and documentation centre; support for the activities proposed; visitor affluence.

ENHANCEMENT PLAN Spoleto territory	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY
Project 31.2	Creation of "identity routes": Works of Fortification in the environs of Spoleto; Itineraries of Giovanni di Pietro, "Io Spagno"
Description	The projects concentrate on: the activation of tour itineraries, whether guided or not, to the Spoleto "fortress" district, so as to recreate the historic bond between town and country, by linking it to routes of knowledge of historic-artistic, cultural traditions and material culture; resumption of itineraries (already tested) in search of places and works of the painter Giovanni di Pietro, "Io Spagno", starting from the centre of Spoleto across the Valle Umbra and Valnerina.
Actions	<ol style="list-style-type: none"> 1) Affixing of signs along the routes; 2) Activation of thematic guided tours, which also include tasting traditional country cooking; 3) Connections between the territory and local museums.
Parties involved	Municipality of Spoleto; Municipalities of Valle Umbra and Valnerina, within which fall sites where "Io Spagno" was active; local communities (Associations, Pro loco, etc.)
Phases and timeframe	Starting from 2008
Financial resources	Municipalities and local (Associations, Pro loco, etc.) and private (holiday farms and such) communities.
Expected results	Widespread knowledge of the territory
Result indicators	Participation in and support for proposed activities; autonomous execution of the routes.

ENHANCEMENT PLAN Spoleto territory	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY
Project 31.3	Completion of the Spoleto - Assisi bicycle path. (from the Arezzo dam to the Azzano Bridge).
Description	<p>The project is aimed at supporting the tourist-sports development of the territory by means of a non-invasive viability system, i.e. a 59km-long bicycle path, one of the longest in Europe, which crosses 8 Umbrian municipalities. Since it is located inside a Highly valued natural area, the route lends itself to all types of motorial activities (light amateur athletics) such as jogging, fast walking and such, in synergy with sports structures the path will "meet" as it develops (greens for bowls, "ruzzolone", tennis, areas equipped for multi-purposes, etc.). In the partially completed Spoleto section, (the section between the Dam and San Nicolò Terminal is still to be completed), 5 service areas are foreseen along the path</p> <ul style="list-style-type: none"> o Terminal of the Path at the former tile factory in San Nicolò, where a structure is to be erected for refreshment, garaging bicycles, repairing bicycles, changing rooms, sanitary facilities and parking, and a park-like area. The removal from state ownership of the area must be completed. o Former Casale Galli, the idea being to create a structure at the service of the path, located between the terminal and the town of Pontebari, through renovation of the existing building. Procedure for removal from state ownership still to be started up. o Casale La Torretta, with lodging facilities, already completed: 5 rooms with WC and ground floor used for refreshment and reception. This building is located in Pontebari. The allocation of use must be carried out. o Casale della Stella, located in Protte, with the renovation (50% already completed) of a building to be used as lodgings (3 mini flats) and a ground floor of ca. 200 sqm for services linked to the lodgings. Funds must be found to complete the works. o Equipped area of Crocemarroggia, located in the section not yet completed, which provides for a structure for parking cars and bicycles, as per the final project.

	 <p>Pontebari, works for the cycle lane</p>
Actions	<ol style="list-style-type: none"> 1) Removal of the areas from state ownership 2) Change of allocation of use of Casale La Torretta 3) Construction of the section between the Dam and San Nicolò Terminal 4) Building of 5 service areas on the path
Parties involved	Group for Umbrian Redevelopment
Phases and timeframe	Time schedules restricted by the criticalities mentioned
Financial resources	The project is currently financed with 800,000 Euro, or 80.5% of the overall amount for the works to be created, through an integrated multi-measure public notice for the Tourism-Environment-Culture network.
Expected results	Creation of part of the Spoleto-Assisi bicycle path from the Arezzo Dam to the Azzano Bridge
Result indicators	Completion of the works and service structures

ENHANCEMENT PLAN Spoleto territory	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY
Project 31.4	Creation of a city park near the historic centre
Description	The project provides for the reconversion of the area where the municipal stadium is located, hereby respecting the restrictions imposed by the Superintendence and boundary of the landslide zone. Feasibility of the work is subject to problems linked to the boundary of the landslide zone, with respect to which specific technical studies are in progress, as well as finding the funds required through project financing
Actions	<ol style="list-style-type: none"> 1) Definition of the problems relative to the landslide zone 2) Project financing 3) Performance of the works 4) Outsourcing
Parties involved	Municipality of Spoleto Region of Umbria Province of Perugia Private parties interested in the project financing
Phases and timeframe	Once the problems related to the landslide zone have been defined, the time schedule shall be dictated by the project financing that provides for selection procedures for the offer, calling of the tender, any negotiated procedures, and assigning the works (minimum 1.5 years)
Financial resources	Operation subject to finding funds through project financing
Expected results	Improvement of conditions for using the area
Result indicators	Creation of the park and its management

ENHANCEMENT PLAN Spoleto territory	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY
Project 31.5	Exploitation of the mountain and sustainable development. "LUCUS" Project
Description	The project proposes the protection and use of the environmental and cultural heritage of Monteluco and the Spoleto mountain district, in view of the value and singularity of the area.
Actions	<ol style="list-style-type: none"> 1) Activation of historic-artistic and naturalistic itineraries and spiritual routes (retreats and Franciscanism); 2) Opening of tourist accommodations; 3) Setting up of a naturalistic museum and documentation centre for species of flora and fauna; 4) Affixing of panels and signs for the various itineraries; 5) Activation of events and sports competitions; 6) Opening of centres for the preparation of individual athletes and teams, subject to the reconversion of existing structures.
Parties involved	Municipality of Spoleto; sports associations; private parties; hotel groups; environmental organisations.
Phases and timeframe	To be defined following agreements with the organisations involved
Financial resources	Municipality of Spoleto, Community Montana, private parties, organisations
Expected results	Recognition of the specificity of Monteluco as a diversified, specialist tourist area
Result indicators	Opening of structures; affluence of tourists and athletes.

ENHANCEMENT PLAN Spoleto territory	
Objective 32	EXPLOITATION OF NATURAL AND CULTURAL RESOURCES
Project 32.1	Environmental reclamation of Parco della Rocca in Monteluco
Description	The project provides for works for systemising the park, uncovering a section of the ancient walls of the Rocca Albornoziata and creating a path of packed earth, descending from the peak down to Porta del Duomo, recently brought to light, and then rising up again to reach the mechanised route rising from the parking lot of the shooting range. It is configured as a restoration of the historic pedestrian path and will be implemented within public notification "code C3 Docup Ob. 2 – Measure 3.2".
Actions	<ol style="list-style-type: none"> 1) Works for systemising the park 2) Excavation works to uncover a section of the wall of the Rocca and Porta del Duomo 3) Works for reinforcing the wall
Parties involved	Region of Umbria Regional Superintendence Municipality of Spoleto
Phases and timeframe	By the end of 2008
Financial resources	Regional funds € 1,000,000.00 Municipal funds € 20,000.00
Expected results	Expansion of the use of part of the area of Colle Sant'Elia, off limits to the public until now
Result indicators	Re-opening to the public of the area of Colle S.Elia, including the Rocca and pedestrian path encircling it

ENHANCEMENT PLAN Spoleto territory	
Objective 33	EXPLOITATION OF THE ENVIRONMENT AND THE NATURAL AND ACCESSIBLE LANDSCAPE
Project 33.1	Plan for Management of the SCI area (Site of Community Interest) IT5210064 – Monteluco di Spoleto
Description	<p>This is one of the sites identified by the region of Umbria as being of special naturalistic value due to its considerable biodiversity, natural and semi-natural habitats and species of flora and fauna. These features place it among the sites indicated in the European ecological network "Natura 2000", which unites all of the areas of major biological and naturalistic value in EU Member States.</p> <p>The planning in progress, resulting in an interdisciplinary study of the characteristics of the site, will set forth possible anthropic actions and the protection to be put into effect inside the area.</p>
Actions	<ol style="list-style-type: none"> 1) Interdisciplinary study of the area by experts from various naturalistic and environmental branches. 2) Preparation of maps. 3) Drawing up of a Management Plan for the area. 4) Adoption of the Management Plan for the area by the regional government.
Parties involved	<p>Region of Umbria Community Montana of the Martani Mountains and Serano Municipality of Spoleto University</p>
Phases and timeframe	<p>31.01.2008 presentation of the draft of the Management Plan to the Region of Umbria by the Community Montana, charged with drawing it up. End-2008 Adoption of the Management Plan</p>
Financial resources	Communities and Regions
Expected results	The formal naturalistic and environmental exploitation of the Monteluco area through the adoption of the Management Plan could be an occasion to develop naturalistic tourism and upgrading towards associated tourist-receptive activities, especially those already existing in the Monteluco area.
Result indicators	Adoption of the Management Plan

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Campello sul Clitunno site</i>	
Objective 34	RAISING OF OPTIMISATION LEVEL OF CLITUNNO TEMPIETTO
Project 34.1	Expansion of visitor services inside the Tempietto area
Description	The current kiosk, which is used only as a ticket office, will be expanded to make it suitable for being an info-point and a bookshop that offers information material about the temple and the area. Multi-lingual illustrative panels will also be created, with the history and description of the building.
Actions	<ol style="list-style-type: none"> 1. Increase of the surface area to be destined to ticket office and visitor services 2. Preparation of info-point and bookshop 3. Creation of illustrative panels
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria. Municipality of Campello sul Clitunno
Phases and timeframe	Starting from 2009 and following.
Financial resources	Funds to be found by: Ministry for Cultural Heritage and Activities); Municipality of Campello sul Clitunno; Umbria Region; private and bank sponsorships
Expected results	Expansion of services inside the temple visiting area

ENHANCEMENT PLAN <i>Campello sul Clitunno site</i>	
Objective 34	RAISING OF OPTIMISATION LEVEL OF CLITUNNO TEMPIETTO
Project 34.2	Placement on site of a copy of monument inscription of the Tempietto
Description	At the Superintendence offices in Perugia, there is a fragment of the architrave of the temple's north temple door, with part of the dedication inscription in Capital Roman letters. This inscription, like the others still in place in the building, are especially important as it is not just one of the few examples of monumental inscription on the facade of an Early middle age building, but also proves the extraordinarily classical level of the monument. A copy of the inscription will therefore be created and placed in the area of the temple, to improve understanding of the building
Actions	<ol style="list-style-type: none"> 1. Creation of mould for architrave fragment 2. Creation of copy in resin, containing marble powder 3. Placement of copy on site
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria
Phases and timeframe	Starting from 2009
Financial resources	Funds to be found by: Ministry for Cultural Heritage and Activities); private and bank sponsorships
Expected results	Improvement of monument presentation

ENHANCEMENT PLAN <i>Campello sul Clitunno site</i>	
Objective 34	RAISING OF OPTIMISATION LEVEL OF CLITUNNO TEMPIETTO
Project 34.3	Improvement of internal and external illumination of the Tempietto
Description	Work requires integration of the external illumination, currently only dedicated to the main facade, by planning it for the other three sides too replacement of current internal illumination with a system that uses equipment adapted to accented lighting of the apsidiole with frescoes and Augustan age shrine
Actions	<ol style="list-style-type: none"> 1. Integrate external illumination of temple with additional equipment; 2. Creation of new accent lighting system for decorative elements on apsidiole
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria
Phases and timeframe	Starting from 2009
Financial resources	Funds to be found by: Ministry for Cultural Heritage and Activities; Umbria Region; private and bank sponsorships
Expected results	Functional and accent lighting for all important architectural and artistic elements in temple

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Campello sul Clitunno site</i>	
Objective 34	RAISING OF OPTIMISATION LEVEL OF CLITUNNO TEMPIETTO
Project 34.4	Creation of connection between Tempietto and underlying Clitunno river
Description	The work aims to recreate part of the ancient connection between the Tempietto and Clitunno river re-establishing the vital relationship between the heritage and the surrounding environment, using the cellar grotto underneath the building, which, once acquired, will also increase the space available for visitor services.
Actions	<ol style="list-style-type: none"> 1. Acquisition of cellar grotto 2. Conservative maintenance work on structure 3. Creation of path from Tempietto to Clitunno river
Parties involved	Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria
Phases and timeframe	Starting from 2008
Financial resources	The funds for acquiring the grotto have already been planned in the Superintendence department's 2008 programmes. Funds for the work are to be found
Expected results	Recreate ancient relationship between heritage and river
Result indicators	Possibility of descending to river directly from current temple area

ENHANCEMENT PLAN <i>Campello sul Clitunno buffer zone</i>	
Objective 35	PROTECTION AND ENHANCEMENT PLAN FOR THE CLITUNNO RIVER AND THE "TEMPIETTO ECO-MUSEUM"
Project 35.1	Creation of permanent educational-exhibition centres on environment the site culture
Description	The ENEL power station and some rooms in the water pumping station, a short distance from the temple, will be renovated to be transformed into permanent exhibition sites, part of a larger enhancement project for the area of the Clitunno river called ECO-MUSEUM. In particular, the two industrial archaeology structures will house the sections 3 and 4 of the territorial museum. Section 3 will concern the Clitunno river as "Genius Loci" and as a resource while Section 4 the Highly aesthetic "tòpoi": The Tempietto and the Springs of Clitunno
Actions	<ol style="list-style-type: none"> 1. Acquisition of structures by the Municipality of Campello; 2. Carrying out of work aimed at improving the state of conservation of the structures; 3. Preparation of Eco-Museum sections
Parties involved	Municipality of Campello sul Clitunno.
Phases and timeframe	Starting from 2008 for next stages
Financial resources	Part of the funds already allocated from the government funding provided after the 2006 environmental accident (see point 11.5.2. - Conservation analysis) will be used for the project, for the reclamation, recovery and overall enhancement, of the River Clitunno area: € 6,000,000.00
Expected results	Extend tourist's and visitor's attention to the environmental system as a whole, observed in its multitude of aspects that includes, the hydraulic system – natural and artificial of the River Clitunno, in addition to the elements of a Higher historical and symbolical degree

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 35	PROTECTION AND ENHANCEMENT PLAN FOR THE CLITUNNO RIVER AND THE "TEMPIETTO ECO-MUSEUM"
Project 35.2	Recomposition of the landscape unit of the area
Description	As part of the protection plan for the entire area, the distancing of the fast road - that is now further down the valley – offers the opportunity of recomposing the landscape unit lost in the 1950s with the creation of state Highway 3. By means of a series of upgrading and re-functionalisation work of green areas and structures, and through the recovery, optimisation and extension of the internal road and pedestrian connection network, it will be possible to increase and guarantee the conservation of the area's landscape identity. Identification and recovery of the existing nearby roads, paths and pedestrian routes, connected without interruption, will allow the networking of the several aspects of the territory, including the hydraulic system – natural and artificial of the River Clitunno, traditional crops and agricultural set up, archaeological sites and medieval settlements, in addition to the elements of a Higher historical and symbolical degree.
Actions	<ol style="list-style-type: none"> 1. Recovery and functional integration of the stretch of the ancient Via Flaminia 2. Identification, recovery and extension of nearby roads, paths and pedestrian routes 3. Upgrading of green areas
Parties involved	Municipality of Campello sul Clitunno
Phases and timeframe	Starting from 2009 for later stages of work
Financial resources	Part of the funds already allocated from the government funding provided after the 2006 environmental accident (see point 11.5.2. - Conservation analysis) will be used for the project, for the reclamation, recovery and overall enhancement, of the River Clitunno area: €6,000,000.00
Expected results	Connecting all territorial components with the Highest historical, symbolic and naturalistic degree

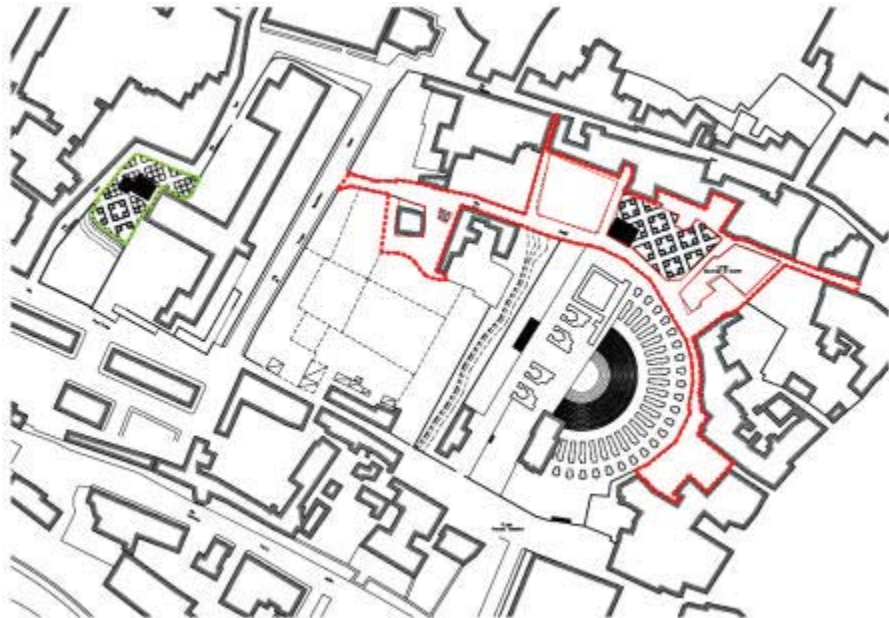

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 36	EXPANSION OF THE CULTURAL OFFER
Project 36.1	Setting up of new cultural and tourist venues
Description	<i>Extension of cycling track</i> The project foresees the extension of the existing cycling track that develops alongside the ancient Via Flaminia that will connect the main architectural sites and environmental sites in the Clitunno area
Actions	<ol style="list-style-type: none"> 1. Creation of cycling track
Parties involved	Municipality of Campello sul Clitunno
Phases and timeframe	Work carried out by 2008
Financial resources	Funds already allocated by the Municipality of Campello sul Clitunno: €170,000.00

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 36	EXPANSION OF THE CULTURAL OFFER
Project 36.2	Recovery and new functional use of a group of buildings that make up the network of infrastructures for visitor services
Description	<p>In some buildings, partly already identified and some still to be found, exhibition spaces, document archives, welcome points, a video library and a project room will be created;</p> <p>The historical-document documentation on the area will be divided into 4 sections, which will have the task of introducing the visitors to an understanding of anthropological, historical, aesthetic, and natural values influenced by the settlements in the area.</p> <p>The planned thematic sections are as follows:</p> <ul style="list-style-type: none"> a) SECTION 1: the area's agricultural identity and the forms of the agricultural landscape. b) SECTION 2: the natural geo-system and its influence on the historical evolution of human settlements. c) SECTION 3: The River Clitunno as "Genius Loci" and as a resource. d) SECTION 4: The Highly aesthetic "Topoi": the Temple and the Springs of Clitunno <p>Section a) will be housed outside the protected and optimised area, in the Museum of Peasant Civilisation currently being prepared in Palazzo Casagrande at La Bianca.</p> <p>Section b) will be set up in some room of Palazzo Lungarotti belonging to the Municipality of Campello in Pissignano.</p> <p>Sections c) – d) will be located partly in the building of the ENEL power station, now disused, at the temple and partly in the unused rooms of the nearby pumping station. A projection room, indoor exhibition space and a bookshop will also be created in the renovated depots currently used as warehouses and workshops belonging to Mr. Zuccari at Pissignano.</p> <p>In the renovated rooms of the ENEL power station and in the small building next to the Church of San Cipriano, placed next to the three main vehicle entrances to the area, other information points and visitor centres will be created.</p>
Actions	<ol style="list-style-type: none"> 1. Identification of structures suitable for destination of use foreseen 2. Conservative maintenance work and preparation of visitor's services
Parties involved	Municipality of Campello sul Clitunno, Superintendence Department for the Architectural, Landscape, Historical, Artistic and Ethno-anthropological Heritage of Umbria.
Phases and timeframe	Starting from 2008 for later stages of work
Financial resources	Part of the funds already allocated from the government funding provided after the 2006 environmental accident (see point 11.5.2. - Conservation analysis) will be used for the project, for the reclamation, recovery and overall enhancement, of the Clitunno river area: €6,000,000.00
Expected results	Multiply attractions that the area will offer to visitors.
Result indicators	Expansion of tourist and visitor's attention to the environmental system as a whole

ENHANCEMENT PLAN Benevento site	
Objective 37	TO COORDINATE MANAGEMENT OF ASSETS IN THE SITE
Project 37.1	Drawing up of a local protocol for controlling use of the Church of Santa Sofia
Description	<p>Various functions coexist in the Church of Santa Sofia: It is an important place of worship in the city, has the Sannio Museum annexed to it, and it is a monument that offers users its historical – monumental value. In order to better valorise the cultural aspects it is best to draw up guidelines and principles agreed to by the owner and management Bodies as to how the Church of Santa Sofia is to be used, in light of its symbolic and worship functions.</p> <p>Defining the content and signing a protocol of intent between the Ministry of the interior (owner) and the Bodies involved in managing and protecting the asset, relates to continuing to use the Church as a place of worship, while making it accessible and useable as a monumental asset.</p> <p>The regulation will therefore define the roles of the various subjects involved in running it. Especially the Curia will continue to use it for the purposes of worship, while the Benevento Provincial Authority will see to managing the asset from a touristic-cultural point of view. The regulation will also include rules as to the fixed furnishings and fittings and moveable systems (lighting, amplification, musical) agreed to. Recommendations may be made as to the addition of further fittings and accessories over time.</p> 
Parties involved	Ministry of the Interior – FEC – Prefecture of Benevento Benevento Provincial Authority Archbishop's Curia in Benevento
Phases and timeframe	By 2008
Financial resources	To be found in the budgets of the Bodies
Expected results	Safeguarding of the unique value of the Santa Sofia complex.
Result indicators	

ENHANCEMENT PLAN Benevento site	
Objective 38	TO EXTEND MUSEUM ACTIVITY
Project 38.1	To re-arrange and extend the Longobard collections in the Sannio Museum.
Description	<p>The Sannio Provincial Museum's collections include historical – archaeological artefacts from the period of the Lombard domain. These very valuable artefacts are grouped in a wing on the ground floor of the Cloister in the Santa Sofia complex. Here, in the rooms dedicated to the Southern Lombards, there are inscriptions from the 5th to the 11th century, sculptures, jewellery and items of female clothing, arms (many come from the necropolis in the Cretarossa quarter), and coins from the Duke's mint. It seems useful to renovate the arrangement of the collection in the museum, also as part of the publicising and communication activities in 2008. A new layout for the two rooms on the ground floor, dedicated to the Lombard period, is planned. The plan, drawn up by the Benevento Provincial Authority, provides for adding new display cabinets for recently acquired artefacts, renewing</p>

	the captions system used for the artefacts, and upgrading the lighting system.
Parties involved	Benevento Provincial Authority Archaeological Superintendency and BAPPSAE
Phases and timeframe	By 2008
Financial resources	To be found: POR FESR 2007-2013 Funds - Campania Regional Authority
Expected results	Improvement of the quality of the exhibition spaces for the cultural heritage, in order to facilitate use by the users and allow better conservation of the assets.
Result indicators	Number of artefacts displayed Number of visitors

ENHANCEMENT PLAN Benevento site	
Objective 39	TO VALORISE THE URBAN ARCHAEOLOGICAL HERITAGE
Project 39.1	Creating an Urban Archaeological Park (P.A.U.) in Benevento
Description	<p>Many urban redevelopment works that the City of Benevento has started in recent years on the old city have Highlighted the quality and quantity of the significant archaeological relics it possesses. Sharing the importance of expressing and valorising these, gave rise to the wish to create a PAU – Urban Archaeological Park.</p>  <p style="text-align: center;">Urban Archaeological Park</p> <p>The Urban Archaeological Park involves a programme of actions aimed at valorising the archaeological heritage and cultural history of the city. Urban redevelopment – building of the walled city, already an objective of the Integrated Plan for the city, by means of which the Administration has taken far-reaching action as to the image of High quality that the city presents, is to be incentivised with further actions to control urban quality, especially in order to guarantee protection of the historical, documental, and cultural value of the original environment in which the Santa Sofia complex stands. These actions range from urban and archaeological redevelopment, to agreements between the Bodies to make it possible to manage the Archaeological Park, and to updating cognitive data, especially in relation to the traces spread around minor buildings as recycled items, as well as the control of problems related to the protection and possible usability where archaeological relics are located, such as private homes for example.</p> <p>The action plans to review the entire system for the archaeological areas in the Bagni - Pacca area, a key point in the city, both due to its location (in the old city on the city's central axis, Madonna delle Grazie, Bagni area, Cathedral area, Corso Garibaldi, and Rocca dei Rettori), and the importance of the archaeological finds. Two works are planned on adjacent sites behind the Cathedral of Benevento: The Ark of the Sacrament and the Urban Archaeological Area. The "Ark of the Sacrament" project provides for building boundary walls and fixing up the</p>

	<p>Lombard wall, reopening the second Roman Arch, creation of services for the quarter, and reconstruction of the ancient route of Via S. Gaetano.</p>  <p>The "Ark of the Sacrament", in an old image and now</p>  <p>For the Bagni – Pacca archaeological area, the project provides for two types of work: Archaeological digs for the Cardinal Pacca area and for the Bagni area</p>
Parties involved	Benevento Provincial Authority Municipality of Benevento Archaeological Superintendency and BAPPSAE
Phases and timeframe	By 2010
Financial resources	<p>Available: Community resources from POR Campania 2000/2006:</p> <ul style="list-style-type: none"> "Area Archeologica Urbana – Cardinal Pacca – Bagni – Teatro Romano" for € 3,040,514.94 "Arco del Sacramento" for € 2,013,629.20 "Piazza Ponzio Telesino" for € 975,445.66 "Area Teatro Romano" for € 1,475,000.00 "Pedestrian paving of the old city" for € 3,098,741.39 <p>To be found: POR FESR Campania Regional Authority 2007-2013</p>
Expected results	Redevelopment of the old city, combining the safeguarding of archaeological assets with the possibility of using and new usability of the same areas. Extending the tourist system by putting the cultural assets in the network and valorising them.
Result indicators	Completion of the work

ENHANCEMENT PLAN Benevento site	
Objective 39	TO VALORISE THE URBAN ARCHAEOLOGICAL HERITAGE
Project 39.2	Creating the museum of the archaeological digs in Piazzetta Sabariani
Description	<p>During the works to make the old city suitable for pedestrians, a crypt of the original church of S. Marco dei Sabariani was found in Piazza Sabariani. The archaeological excavation of the crypt is still in progress.</p> <p>The frescoes found are of great interest, and studies of them are still in progress to establish their chronology and iconography. The crypt is certainly from medieval times, although further research is required to date it exactly.</p> <p>Once the works have been completed the archaeological area will be suitably protected, while making it available for viewing, by setting up a cover with glass surfaces, a lighting system, and protection. This site will also be covered by the tourist signage system for the "Italia Langobardorum" site.</p>
Parties involved	Municipality of Benevento Archaeological Asset Superintendency and BAPPSAE
Phases and timeframe	By 2008 (first phase) by 2015 (completion)
Financial resources	Available: "Pedestrian paving of the old city" for € 3,098,741.39 To be found: POR FESR 2007-2013 Campania Regional Authority
Expected results	Redevelopment of the old city, combining the safeguarding of archaeological assets with the possibility of using and new usability of the same areas. Extending the tourist system by putting the cultural assets in the network and valorising them.
Result indicators	Completion of the work

ENHANCEMENT PLAN Benevento site	
Objective 40	TO IMPROVE REDEVELOPMENT OF THE OLD CITY
Project 40.1	Refurbish functioning of the public fountains
Description	<p>This activity, based on a cluster of urban decoration plans, is part of the Municipality of Benevento's current action to increase the widespread quality of the urban environment, especially the centre of the city.</p> <p>It consists of a programme of maintenance works that involve restoring, reinstating functionality, and experimenting with systems to recycle rainwater, as well as programmed maintenance of the existing fountains (Piazza Santa Sofia, Piazza Orsini, and the fountains on Corso Garibaldi).</p>
	
The fountain of piazza Orsini, in an old image	

The fountain of piazza Matteotti

This action will be carried out along with other important activities planned as part of the program for Valorising Benevento's Cultural Assets

Parties involved	Municipality of Benevento Campania Regional Authority
Phases and timeframe	By 2008 (first phase) by 2015 (completion)
Financial resources	Available: POR 2000-2006 for € 600,000 To be found: POR FESR 2007-2013 Campania Regional Authority
Expected results	Redevelopment of the old city, combining the safeguarding of archaeological assets with the possibility of using and new usability of the same areas. Extending the tourist system by improving the urban image.
Result indicators	Number of redevelopment works

ENHANCEMENT PLAN Benevento site	
Objective 40	To improve redevelopment of the ANCIENT city
Project 40.2	Urban redevelopment of the Piazzas in the Cathedral and Rocca dei Rettori areas
Description	<p>Along with the PI of the City of Benevento, the Benevento Municipality has taken on extensive works to valorise its own historical, architectural, and urbanistic heritage. As an extension of that logic, it intends continuing with recovering existing buildings and central urban areas. The plan of action stresses the creation of new cultural content, which can be achieved by changing the functions of the city's architectural complexes, as well as redeveloping the major urban invasions that border on the city's civic centre, coinciding with the buffer area. At the edges of the buffer zone the plan is to complete valorisation of the heart of the city by redeveloping major empty urban spaces, that is, a system of piazzas that demarcate the ends of Corso Garibaldi.</p>  <p style="text-align: center;">Corso Garibaldi after the bombardment of the second mondial war</p> <p>Resolving these areas is crucial for valorising Benevento, since, having been damaged by bombardment in the second world war, apart from the areas opposite the Cathedral and the Rocca dei Rettori there are key points linking the old city and the significant urban extensions that have been built in more recent times (The Atlantici, Mellusi, and Rione Libertà quarters, which are examples of rationalistic town planning and architecture). The elimination of spaces for vehicles to stop in the areas is possible as part of a new layout of the city's traffic patterns and the service infrastructures, which will gradually move traffic to outside the walled city. For designing the works for Piazza Duomo (Cathedral) and Piazza Orsini, included in the City of Benevento's PI, the Municipal Administration made use of advanced forms of involvement in design choices, creating final and working drawings with new cultural functions and public services, starting with the International Ideas Competition that was held in 2000 and won by the Gabetti & Isola Studio.</p>  <p style="text-align: center;">Design for Piazza Duomo by the Gabetti & Isola Studio</p>

	 <p data-bbox="762 622 1136 651">The Rocca dei Rettori in Piazza Castello</p> <p data-bbox="499 680 1401 831">Piazza Castello, for which planning is to be started as part of redesigning the Strategic Plan for the City of Benevento, appears to be ideal for an urban gateway from the north to the walled city, clearing vehicular traffic from it and adding upgrading elements, which is next in line to the city's major monumental emergences. Provision is made for the inclusion of works commissioned from artists that are famous internationally.</p>
Parties involved	Municipality of Benevento
Phases and timeframe	By 2010 (first phase) by 2015 (completion)
Financial resources	Available: Institutional Programme Intent (CIPE Resources) for € 5,000,000 To be found: POR FESR 2007-2013 Campania Regional Authority
Expected results	Improving and valorising urban quality, Highlighting the monumental emergences that the city contains.

ENHANCEMENT PLAN Benevento site	
Objective 41	TO EXTEND SERVICES TO THOSE VISITING THE SITE
Project 41.1	Multi-mode information centre
Description	<p>In addition to the material infrastructures supporting the tourist system, it is deemed necessary to create virtual infrastructures with a High degree of technological and computer content that can improve accessibility to and use of the assets.</p> <p>To this end a tourist information system is to be created both for information on assets and of a logistics nature on the availability of additional services.</p> <p>The information system available to the tourist, based on GIS technology, will provide an interactive vocal telephonic guide able to provide information (general, on location and accessibility, etc.) in relation to monuments and archaeological routes, the museum network, cultural events and entertainment ion the city, as well as the availability of hospitality services.</p>
Parties involved	Municipality of Benevento
Phases and timeframe	First phase: First semester of 2008 Second phase: By 2009
Financial resources	First phase: Drawing up the project with resources from the Benevento Municipality. Second phase: Works done with funds from POR FESR 2007-2013 - Campania Regional Authority
Expected results	Increase in the level of knowledge about cultural assets covered by the project. Increase in the number of assets and monuments that can be accessed via the system.
Result indicators	Number of assets included in the tourist information system. Quality of information guaranteed. Number of users of the service

ENHANCEMENT PLAN Benevento buffer zone	
Objective 42	TO EXTEND MUSEUM ACTIVITY
Project 42.1	Design a Civic Contemporary Art gallery at Hortus Conclusus
Description	<p>The actions promoted by the Municipality of Benevento for promoting valorisation of the cultural heritage, include actions that increase the number of cultural containers to be used for retrieving and displaying artefacts and traces of ancient and contemporary art.</p> <p>The museums offered by the city, which recently added new public exhibition structures, will be enriched with a civic art gallery.</p> <p>The Hortus Conclusus, set on the historical San Domenico complex, currently a seat of the University of Sannio, is recognised as a small open-air museum in the city. Built in the early 1900s in a walled garden adjacent to the Convent Cloister, it can still be valorised more by making it a venue for showing off the works of art that Benevento has. The sculptures installed there were donated to the city by the artist, Mimmo Paladino. This provides an occasion for creating a civic gallery dedicated to contemporary art, located in the ground floor rooms of the cloister itself, which will be ceded to the Municipality by the University.</p>  <p style="text-align: center;">Hortus Conclusus by the artist Mimmo Paladino</p> <p>The refurbishing already underway on the San Vittorino convent with change the function of this fine architectural complex as part of the infrastructure of the Atheneum of Sannio University. The Municipal Administration has provided for the terraced roof to be transformed into a space that is accessible to the public, to be used for cultural and artistic events, in direct relation to the Hortus Conclusus and the planned Civic Gallery.</p> <p>The plan to design and build the Civic Contemporary Art Gallery, located in the ground floor rooms of the San Domenico cloister, facing onto the Hortus Conclusus, which will be ceded to them by the University of Sannio.</p> <p>The work provides the possibility of connecting to the adjacent San Vittorino complex, making use of part of the terraced roof, where there is currently a fibreglass theatrical installation by Maestro Paladino, in order to create a series of spaces for theatrical and artistic shows, as an extension of the Hortus.</p>  <p style="text-align: center;">Hortus Conclusus by the artist Mimmo Paladino</p>
Parties involved	Municipality of Benevento
Phases and timeframe	By 2015
Financial resources	To be found: POR FESR 2007-2013 Funds - Campania Regional Authority
Expected results	Extending of museum activity in the city of Benevento.

Result indicators	Number of works of art displayed Number of visitors
-------------------	--

ENHANCEMENT PLAN Benevento buffer zone	
Objective 43	TO EXTEND SERVICES TO THOSE VISITING THE SITE
Project 43.1	Multi-mode information centre – Information point network
Description	<p>The creation of a network linking the elements in the Cultural assets system and guaranteeing accessibility to information on the locations, makes it necessary to create a multi-mode information point and to locate it in a central position in relation to the urban system covered by the project. Initially, this function will be located at the bookshop in the 16th century palazzo Paolo V, seat of the Municipal Representative.</p>  <p style="text-align: center;">Corso Garibaldi and palazzo Paolo V</p> <p>In the future the plan is to use municipal means to acquire a property on Piazza Matteotti (Piazza S. Sofia) and adjacent to the Santa Sofia Complex, palazzo Casiello, chosen due to the unique presence of the Garden of Marvels, or Garden of the Wizard, that houses sculptures of figures from the surreal or metamorphic world, created by Architect Riccardo Dalisi. This multi-language desk for tourist accessibility will provide information in access to monuments, museums, routes, hospitality structures, public offices and locations, and the existence of specific transport and assistance services. This structure will be connected to a network of information points spread around the municipal area to serve the people and tourists. Each information point will be located near the old city and will be identified by applying fixed criteria to promote a coordinated image of the UNESCO site.</p>
Parties involved	Municipality of Benevento Benevento Provincial Authority - EPT Body
Phases and timeframe	First phase: by 2008 Second phase: by 2015
Financial resources	POR FESR 2007-2013 Funds - Campania Regional Authority Interregional Operating Program (POIN) "Cultural, Natural, and Tourist Attractions"
Expected results	Offering a quality service that guarantees up-to-date and detailed information, supported by cultural activities aimed at valorising the city's cultural assets.
Result indicators	Number of visitors recorded in museums, art venues, and archaeological sites.

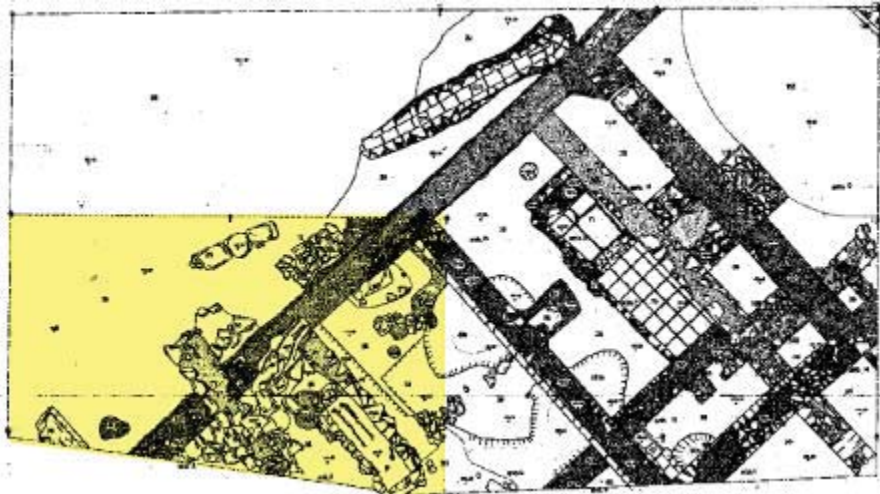

ENHANCEMENT PLAN Benevento buffer zone and territory	
Objective 44	TO VALORISE THE URBAN ARCHAEOLOGICAL HERITAGE
Project 44.1	Plan itineraries for the PAU
	<p>The idea behind the project, using knowledge of the historical archaeological characteristics of some areas of the city, including the extent and depth of archaeological layers, as well as the resulting safeguarding and valorising of the same areas, meets the need to create a tourist system that is currently lacking. The Urban Archaeological Park involves a programme of actions aimed at valorising the archaeological and architectural heritage and cultural history of the city. As part of this initiative, tourists in the city will be able to choose urban trekking itineraries that are free of charge, but for which booking is required, with guides in English and Italian. Urban trekking is a new way of touring, which is less structured and off the famous routes. This type of tourism provides greater freedom and is full of surprises focussing on panoramas, less known monuments, and places in which the citizens live their daily lives.</p> <p>Urban trekking is a form of sustainable tourism that decongests the monument centres and slows the passage of tourists. When walking tourists have an active, hands-on rapport with the city they are visiting and create an emotive bond that promotes fidelity. For residents,</p>

	Urban Trekking is a healthy lifestyle and a way of rediscovering the place they live in.
Parties involved	Benevento Provincial Authority Municipality of Benevento
Phases and timeframe	By 2010
Financial resources	To be found: POR FESR 2007-2013 Campania Regional Authority
Expected results	Raising the level of accessibility and usability of the assets in the city.
Result indicators	Number of itineraries Number of visitors

ENHANCEMENT PLAN Benevento buffer zone	
Objective 45	To improve redevelopment of the ANCIENT city
Project 45.1	Draw plans for decorative lighting
Description	Campania regional Law N° 12 of 25 th July 2002 provides for the drawing up of a Municipal Lighting Plan (PIC). The Lighting Plan the Municipal Administration intends drawing up integrates the norms and requirements both for reducing light pollution, and for night-time valorisation of the important cultural assets, based in specific technical studies of the quality of the assets to be valorised in the urban centre (town planning fabric, and historical, architectural, and monumental assets). In 2005 a laser survey was completed for producing 3D images of areas of the Old City as a support for drawing up the implementation plan. This action, which is to be taken as part of the municipal programming for urban sector plans, provides for zoning of lighting, and the establishing of standards and technical performance requirements for public lighting, in order to come up with a plan that minimises light pollution. A specific cluster will be formed within the plan, dedicated to lighting the areas of greatest significance in terms of historical, town planning, and artistic aspects (Decorative Lighting Plan).
Parties involved	Municipality of Benevento Campania Regional Authority
Phases and timeframe	By 2015
Financial resources	To be found: POR FESR 2007-2013 Funds - Campania Regional Authority
Expected results	Valorisation of the urban environment by accepting quality standards and checking elements that indicate perceptible quality. Valorisation of the old city by correct lighting of monuments and urban areas. Reducing light pollution by installing new lighting units designed according to the latest lighting theories in terms of energy saving.

ENHANCEMENT PLAN Benevento buffer zone and territory	
Objective 45	TO IMPROVE REDEVELOPMENT OF THE OLD CITY
Project 45.2	Drawing up the colour plan
Description	Regional Law 26/02 provided the Municipalities in Campania with a draft standard for conserving and valorising old cities, especially disciplining both censusing and cataloguing actions, and restoration, decoration, and colouring of the facades of the historical civil buildings and curtain walls more than 50 years old in Campania. Implementation of this discipline in Benevento started with censusing and cataloguing all the building structures in the urban area that are of historical and artistic interest and, as a run up to drawing up the Colour Plan for the old buildings, a survey of all curtain walls in the city walls of the old city. This was done using advanced instrumentation (laser surveying equipment for producing 3D images). This Highly scientific instrument's output will be used to create the Colour Plan, which the City's Administration, in collaboration with the BAPPSAE Superintendencies of Caserta and Benevento and Archaeological Assets of Salerno, Avellino and Benevento, will produce with the help of technical support from companies that specialise in producing natural pigments for colouring the facades.
Parties involved	Municipality of Benevento Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. Campania Regional Authority
Phases and timeframe	By 2009 – Devising the plan is expected to take 6 months, plus one year to complete the

	approval process. Implementation times will depend on the contents of the plan itself.
Financial resources	To be found: POR FESR 2007-2013 Funds - Campania Regional Authority Regional Law 26/2002
Expected results	Valorising and guaranteeing the perceptive quality of the urban context by correct regulation of ordinary maintenance works on the building fabric (colour and finish of facades).
Result indicators	Number of works for refurbishing properties located in the old city

ENHANCEMENT PLAN Benevento buffer zone and territory	
Objective 46	TO VALORISE THE TERRITORY'S ARCHAEOLOGICAL HERITAGE
Project 46.1	Create an Archaeological and green space Park in Cellarulo
Description	<p>The Archaeological Park and green space, the executive planning for which has already been financed, covers an area on the edge of the city covering about 50 hectares. It is relevant in terms of its landscape – environmental aspects, and is bounded by a bend in the River Calore and the confluence with the River Sabato. It is mainly used for agricultural irrigation and as an expansive wooded area that was recently created.</p> <p>The work involves environmental redevelopment of the area by building a theme park. It is intended to be used for storing, restoring, and valorising the archaeological excavations carried out in 1991/94/98 and the continuation of the investigations in adjacent areas, in order to definitively mark out the progressive development lines of the old city, until the city walls were built. In addition, the site will be refurbished in general from an environmental point of view, having been compromised by gradual decay and marginalisation caused by the construction and subsequent abandonment of the road infrastructure known as the "Asse interquartiere ovest", which has meanwhile become obsolete compared with the original idea behind it.</p>  <p style="text-align: center;">The archaeological area of Cellarulo</p>
Parties involved	Municipality of Benevento Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento. BAPPSAE Superintendency of Caserta and Benevento. Campania Regional Authority
Phases and timeframe	First phase: By 2008 Second phase: by 2015
Financial resources	Available: (First phase, currently in progress): POR Campania 2000-2006 PI "Benevento: the future in history" for € 4,999,996 Institutional Programme Intent (CIPE Resources) for € 5,250,000 To be found: (Second phase) POR FESR 2007-2013 Campania Regional Authority
Expected results	Valorising the archaeological emergences in the city of Benevento.
Result indicators	Surface areas refurbished.

ENHANCEMENT PLAN Benevento buffer zone and territory	
Objective 47	TO VALORISE THE LONGOBARD CULTURAL HERITAGE
Project 47.1	Create the "Via Sacra Langobardorum" archaeological park
Description	The Via Sacra Langobardorum is an ancient pilgrim's route that, following the Appia Traiana, connects Benevento to the Sanctuary of St. Michael on Monte Sant'Angelo sul Gargano. The route along the "Via" is scattered with remains of votive chapels, xenodochia, and stopping places with wells. Over time, some of these places have become famous abbeys (like San Giovanni in Lamis in Puglia, now the Convent of San Matteo and San Leonardo di Siponto), others have been developed as urban centres (San Giovanni Rotondo and Monte Sant'Angelo). Ruins and scattered traces have been conserved by others, and of some only the place name has survived, shown on old geographic maps.
Actions	<ol style="list-style-type: none"> 1. Planning strategic action aimed at valorising integrated tourism of the territories this cultural itinerary passes through, starting with the following assets: 2. Supporting the development of integrated tourism along the route. 3. Planning and implementing promotional actions. 4. Valorising local resources in the areas touched on by the route. 5. Start-up and development of relations between institutions, populations, and local production activities. 6. Economic and entrepreneurial valorisation of the territories the route passes through. 7. In light of experience with a previous Protocol of Intent for valorising the Appia Traiana promoted by the Municipality of Benevento in 1998, involving various urban and rural bodies that were administratively separate but linked by a common cultural profile, definition of a feasibility study is proposed for refurbishing and valorising the Route of the Via Sacra Langobardorum. 8. Before the programme can be developed a partnership must be forged between the Local institutions interested in the process, which must certainly involve the Municipality of Benevento acting as the promoter of the proposal for the part that falls within the Province of Benevento, as well as Avellino, and the Municipalities of Paduli, Sant'Arcangelo Trimonte, Buonalbergo, Castelfranco in Miscano, Casalboro, Montecalvo Irpino, and Ariano Irpino.
Actions	<p>Protocol of Intent between the territorial bodies affected by the route.</p> <p>Programme of works to valorise the route of the Via Sacra Langobardorum.</p>
Parties involved	<p>Superintendency for Architectural Heritage in Salerno, Avellino, and Benevento.</p> <p>BAPPSAE Superintendency of Caserta and Benevento.</p> <p>Benevento Provincial Authority</p> <p>Campania Regional Authority</p> <p>Municipality of Benevento</p>
Phases and timeframe	Medium – long term action
Financial resources	<p>To be found:</p> <p>POR FESR 2007-2013 Funds - Campania Regional Authority</p> <p>POIN Funds "Natural, cultural, and tourist attractions".</p>
Expected results	Improved valorisation of the Lombard heritage in the Samnite area.
Result indicators	<p>Number of works programmed and planned.</p> <p>Number of subjects involved</p>

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 48	HEIGHTENING OF THE LEVEL OF VALORISATION OF THE SANTUARY'S MOST ANCIENT STRUCTURES
Project 48.1	New set-up project for the Lapidus Museum and execution thereof
Description	The Lapidus Museum located in the so-called Longobard Gallery was realised in the eighties by the will and inspiration of the Benedictine Fathers who were custodians of the sanctuary at the time. The current arrangement does not meet the most updated criteria of museographical set-up. The recently terminated study on the important collections of sculptures makes the plan of a new set-up possible today, according to a route which encompasses the contiguous crypts B and C, re-organised and made more understandable by new captions and illustrative panels
Actions	<ol style="list-style-type: none"> 1. Review of the set-up of the remains in the Longobard gallery continuing from the architectural spaces, the frescos and the epigraphs of crypts B and C 2. Optimisation of didactic apparatus
Parties involved	Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2010 onwards.
Financial resources	Funds to be raised from: Sanctuary of San Michele Arcangelo, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE (architectural assets for the landscape and for historical heritage), private sponsors.
Expected results	Improvement of the presentation of relics and improvement of the didactic offer.
Result indicators	Increase in the quality of explanatory data on the conserved relics.

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 48	HEIGHTENING OF THE LEVEL OF VALORISATION OF THE SANTUARY'S MOST ANCIENT STRUCTURES
Project 48.2	Museumification of the area subject to archaeological digs to the north of the sanctuary
Description	The area to the north of the Sanctuary, in correspondence with the zone included between the so-called entrance of Peter and Paul and the more internal part of the Longobard Gallery, was the subject of archaeological digs finalised at clarifying the stratification of the most ancient buildings in the Sanctuary in the pre-Longobard era. The state of the art is incomplete in that the continuation of the digs requires a complex intervention in order to guarantee the static safety of the structures, after having emptied the rooms still buried.
Actions	<ol style="list-style-type: none"> 1. Execution of essays aimed at delimiting the dig area 2. Planning of interventions 3. Interventions of digging and contextual securing of the structures 4. Set-up of the latter for use
Parties involved	Sanctuary of San Michele Arcangelo Superintendency BAPPSAE of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2010 onwards
Financial resources	Funds to be raised from: Sanctuary of San Michele Arcangelo, Municipality of Monte Sant'Angelo, Superintendency BAPPSAE, private sponsors.
Expected results	Recovery of still buried rooms and structures
Result indicators	Definition of the primary organisation for the structures in the Sanctuary.

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 49	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SANCTUARY
Project 49.1	Project and intervention for the creation of conditions of continuity in decoration of the external space connecting the upper atrium and the roof of the Cave
Description	From the upper atrium of the Basilica, to the left of the entrance to the Angioine staircase, a small door leads to the open space onto which face the church of the Madonna della Libera, the entrance to the roof area of the Cave and a small rock band behind which, in the background there are minor buildings, also private, onto which the octagonal bell tower lies. The space delimited thus requires interventions of improvement to correct architectural elements and fixtures in contrast with the locations. As this open space is delimited and served by an entrance which is accessed from the main road, it is reasonable to hypothesise its use as a show area as well as a secondary access road to the Sanctuary. This space is moreover connected to the so-called "small steps", the roof of the Cave realised in steps of chalky stone where once the pilgrims completed a much felt devotional path.
Actions	1. Planning and realisation of the intervention.
Parties involved	Sanctuary of San Michele Arcangelo Superintendency for BAPPSAE of the Region of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	By 2011.
Financial resources	Sanctuary of San Michele Arcangelo Funds to be raised from the Municipality of Monte Sant'Angelo
Expected results	Valorisation of the area and recovery of its function as devotional connection route to the "small steps".
Result indicators	Realisation of conditions of balance in the overall view of the area.

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 49	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SANCTUARY
Project 49.2	Completion of equipping the Devotional Museum
Description	In May 2008 some new rooms were inaugurated, built for the expansion project of the House of Pilgrims annexed to the Sanctuary. These spaces will be part of the visit open to the public with direct access to the inside of the Sanctuary.
Actions	1. Completion of the intervention
Parties involved	Sanctuary of San Michele Arcangelo Superintendency for the BAPPSAE of the Region of Puglia Municipality of Monte Sant'Angelo
Phases and timeframe	By May 2008.
Financial resources	Sanctuary of San Michele Arcangelo
Expected results	Rationalisation and heightening of the quality of the museum offer
Result indicators	Increase in usable surface area.

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 49	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SANCTUARY
Project 49.3	Optimisation of the access system to the Casa del Pellegrino and creation of a new internal route
Description	The creation of a new "pilgrim's route" has the following purposes: - create independent possibility of vesting the devotional museum and the lapidus museum; - create a new influx and deflux route for pilgrims in the Sanctuary; - create new roads able to evacuate the Sanctuary in emergencies. These last two objectives, in particular, define the final decongestion of the actual amount of pilgrims and a considerable increase of potential capability of accommodation inside the sanctorial complex. Moreover the whole will allow further lightening of the Angioine staircase capacity which currently reaches its limits on days of major afflux, even if effectively regulated with two-way pathways and served by emergency routes.
Actions	1. Opening of the Devotional Museum and creation of the new pathway 2. Start of expansion works to the hall of the House of Pilgrims

Parties involved	Sanctuary of San Michele Arcangelo Superintendency for the BAPPSAE of the Region of Puglia.
Phases and timeframe	By May 2008. By 2010.
Financial resources	Sanctuary of San Michele Arcangelo
Expected results	Increase in the capability of accommodation for visitors.
Result indicators	Improvement in the state of conservation of the Angioine staircase

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 50	ENHANCEMENT OF THE STRUCTURES ANNEXED TO THE SANCTUARY
Project 50.1	Adaptation and refunctionalisation project of the internal spaces
Description	Following conservation of the rooms of the ex-orphanage it will be necessary to start a study for the new refunctionalisation of recovered spaces and the structures annexed to the Sanctuary: the Church of the Madonna della Libera, the Chapel of Santa Lucia, the Chapel of San Rocco and the Monastery.
Actions	<ol style="list-style-type: none"> 1. Definition of the new destined use 2. Elaboration of the project
Parties involved	Sanctuary of San Michele Arcangelo Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2010 onwards
Financial resources	Funds to be raised from: Sanctuary of San Michele, Municipality of Monte Sant'Angelo, private sponsors.
Expected results	Recovery of areas destined for exhibition spaces, training locations, sites for housing specialised archives on the site etc.
Result indicators	Quantity of recovered rooms destined for the valorisation of the site.

ENHANCEMENT PLAN Monte Sant'Angelo site	
Objective 51	ENHANCEMENT OF THE WALLS
Project 51.1	Definition of visiting routes to the wall system
Description	<p>Starting from the hypotheses formulated by local scholars regarding the progress of the ancient wall belt, the intention is a systematic verification of the places where it is possible to identify evidence of the structures that are not visible today. The idea is to elaborate a virtual reconstruction of the wall belt and verify the possibility of defining valorisation routes. At the same time there will be a more detailed idea of the development, even stratigraphical, of the historical centre in relation to the identification of the progress of the original campaign plan.</p> <p>The visiting route of the walls has the following objectives:</p> <ol style="list-style-type: none"> a) Identify all the visible parts of the wall circle; b) Organise a guided tour visit which allows access to the parts of the wall conserved in private properties. c) In addition to this it is necessary to plan and realised specific illustrative depliants on the history of the walls and didactic panels to be placed in the different areas of the route.
Actions	<ol style="list-style-type: none"> 1. Instrumental survey of the sites with execution of essays to verify the eventual presence of structural parts of the towers. 2. Coding of data on specific software for virtual 3D elaboration 3. Planning and realisation of specific signs equipped with bilingual explanatory
Parties involved	Municipality of Monte Sant'Angelo Superintendency for the BAPPSAE of the Region of Puglia
Phases and timeframe	By 2011.
Financial resources	Municipality of Monte Sant'Angelo Mountain Community of Gargano Gargano National Park
Expected results	Identification of the ancient wall circle.
Result indicators	Creation of visiting route for tourists

ENHANCEMENT PLAN Monte Sant'Angelo site and buffer zone	
Objective 51	ENHANCEMENT OF THE WALLS
Project 51.2	Identification of interventions of improvement in visibility-use of the walls
Description	The different portions of the walls present different valorisation potential. The section to the south of the monastic complex of San Francesco could be improved by optimising the area in front of it with the realisation of opportune didactic panels while those conserved in private habitations could have signs along a pedestrian path opportunely studied.
Actions	<ol style="list-style-type: none"> 1. Organisation of the area in front of the sections to the south of the monastic complex of San Francesco 2. Identification of the spaces in which to allocate the explanatory panels on the history of the walls.
Parties involved	Municipality of Monte Sant'Angelo Superintendency for the BAPPSAE of the Region of Puglia
Phases and timeframe	By 2011.
Financial resources	Municipality of Monte Sant'Angelo Mountain Community of Gargano Gargano National Park
Expected results	Improve visibility of the walls and Highlight their progress respect to the urban fabric.
Result indicators	Increase in the visible wall sections, Increase in the spaces of use of the walls.

ENHANCEMENT PLAN Monte Sant'Angelo site and buffer zone	
Objective 52	ENHANCEMENT OF THE CHURCHES AND MONASTERIES OF MONTE SANT'ANGELO
Project 52.1	Definition of visiting routes around the system of churches and monasteries
Description	The realisation of a system of routes and didactic devices which allows the history of these buildings to be known and their development in relation to the life phases of the inhabited areas.
Actions	<ol style="list-style-type: none"> 1. Planning and identification of the routes. 2. Organisation of a guided tour with established accesses. 3. Creation of illustrative depliants. 4. Creation of didactic panels on the history of the churches.
Parties involved	Municipality of Monte Sant'Angelo, Superintendency BAPPSAE Region of Puglia, Sanctuary of San Michele Arcangelo, Parish S. Maria Maggiore, Archbishops' Administration.
Phases and timeframe	Starting from 2009
Financial resources	Funds to be raised from: Municipality of Monte Sant'Angelo, Parco Nazionale del Gargano, Superintendency BAPPSAE Region of Puglia, Sanctuary of San Michele Arcangelo, Parish S. Maria Maggiore, Archbishop's Administration, Private sponsors.
Expected results	Optimisation of the knowledge of the places and assets.
Result indicators	Increase in the quantity of information on the assets. increase in the quantity of illustrative material available for the visitors

ENHANCEMENT PLAN Monte Sant'Angelo site and buffer zone	
Objective 52	ENHANCEMENT OF THE CHURCHES AND MONASTERIES OF MONTE SANT'ANGELO
Project 52.2	Interventions of improvement of visibility-use
Description	In relation to the foreseen visits to the churches, re-organisation is foreseen for the spaces in front of them to improve their visibility and use.
Actions	<ol style="list-style-type: none"> 1. Organisation of the area of Largo le Monache near to the Monastery of Clarisse 2. Organisation of the area Largo San Oronzo facing the monastery of San Francesco 3. Organisation of the area Piazza Beneficenza delimited by the Villa comunale and the Monastery of the Cappuccini
Parties involved	Municipality of Monte Sant'Angelo, Superintendency BAPPSAE Region of Puglia, Sanctuary of San Michele Arcangelo, Parish of S. Maria Maggiore, Archbishop's Administration.
Phases and timeframe	<ol style="list-style-type: none"> 1. By 2009 2. By 2009-2010 3. By 2012
Financial resources	Funds to be raised from: Municipality of Monte Sant'Angelo, Gargano National Park, Superintendency BAPPSAE Region of Puglia, Sanctuary of San Michele Arcangelo, Parish S. Maria Maggiore, Archbishop's Administration, private sponsors.
Expected results	Increase in attention regarding the places and assets.
Result indicators	Increase in the quality of spaces to be used.

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone	
Objective 53	HEIGHTENING OF THE LEVEL OF USE OF THE MUSEUM OF ART AND POPULAR TRADITIONS
Project 53.1	Re-functionalising plan for the areas and review of showcase routes
Description	Following a new definition of ownership, new organisation of museum spaces is foreseen to be realised on the basis of a specific scientific set-up project carried out by the faculty of demoehtnoanthropolgy of the Universities of Bari and Foggia.
Actions	<ol style="list-style-type: none"> 1. Elaboration of a plan of refunctionalisation and set-up 2. Intervention
Parties involved	University of Bari University of Foggia Municipality of Monte Sant'Angelo.
Phases and timeframe	2013 onwards
Financial resources	Funds to be raised from: Municipality of Monte Sant'Angelo at sponsorings
Expected results	Expansion and new set-up of the G. Tancredi museum

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone	
Objective 54	ENHANCEMENT THE ACTIVITIES OF REQUALIFICATION IN THE HISTORIC CENTRE
Project 54.1	General survey on internal pathways and planning for the restoration of uniformity of the materials
Description	The intention is that of detecting all internal pathways in the historical centre in order to carry out monitoring of its state of maintenance and isolate cases of non-uniformity of materials incompatible with the technical norms in force.
Actions	<ol style="list-style-type: none"> 1. Detection 2. Preparation of maps also on digital support 3. Planning of interventions 4. Interventions
Parties involved	Municipality of Monte Sant'Angelo.
Phases and timeframe	2009 onwards
Financial resources	Municipality of Monte Sant'Angelo
Expected results	Re-establishment of uniformity of the general view of the historical centre.
Result indicators	Improvement in the general facies of the historical centre.

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone	
Objective 54	ENHANCEMENT THE ACTIVITIES OF REQUALIFICATION IN THE HISTORIC CENTRE
Project 54.2	Study of new internal connecting routes between the car parks in the initial welcoming areas and the Sanctuary Highlighted by bilingual signs
Description	The intention is that of verifying the possibility of implementing the current topical itineraries in the historical centre in order to improve their efficiency through the arrangement of bilingual explanatory panels which refer also to the urban aspects of the historical centre and its development over the centuries.
Actions	<ol style="list-style-type: none"> 1. Study and planning of itineraries 2. Actuation of forms of targeted promotion 3. Planning of interventions 4. Interventions
Parties involved	Municipality of Monte Sant'Angelo
Phases and timeframe	2010 onwards
Financial resources	Municipality of Monte Sant'Angelo
Expected results	More visits from tourists to the historical centre.
Result indicators	Increase in the duration of excursions.

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone	
Objective 54	ENHANCEMENT THE ACTIVITIES OF REQUALIFICATION IN THE HISTORIC CENTRE
Project 54.3	Re-order of publicity boards and definition of a detailed regulation for installing shade tents, publicity signs and informative panels
Description	Currently the historical centre shows conditions of non-uniformity regarding the type of materials for shade tents, publicity panels and signs. The cause of this is the lack of regulation regarding planning of the urban furnishings. Even foreseeing the building reference regulation norms in force, over the years the consolidated result does not perfectly respond to the rules of decorum of the locations. For this reason a new detailed regulation for the historical area is being studied at the UTC which considers all kinds of decorum and allows the re-ordering of all signs and boards in this area.
Actions	<ol style="list-style-type: none"> 1. Completion and approval of the new regulations 2. Actuation
Parties involved	Municipality of Monte Sant'Angelo
Phases and timeframe	2009 onwards
Financial resources	Municipality of Monte Sant'Angelo
Expected results	Recovery of uniformity and decorum in the historical centre.
Result indicators	Mitigation of the current state of non-uniformity.

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone	
Objective 54	ENHANCEMENT OF THE TERRITORIAL CULTURAL OFFER
Project 54.4	Study and planning of the valorisation of piazza Carlo d'Angiò with the elimination of the car park, organisation of a green area of connection with the Castle and review of existing services
Description	This is one of the most qualifying interventions for the area that directly confines with the Sanctuary. The basic idea is to confer Piazza Carlo D'Angiò an aspect and function that is more suited to the place, through the study of architectural solutions and furnishing which can give it an aspect and decorum in harmony with the nearby Sanctuary. For this purpose the current car park will be eliminated and its thoroughfare with vehicles will be limited. Hygiene services will be re-organised in terms of more discretion and the route which leads from this to the green area contiguous to the Castle currently limited in thoroughfare will be valorised.
Actions	<ol style="list-style-type: none"> 1. Appointment of charge for planning 2. Approval of project 3. Actuation
Parties involved	Municipality of Monte Sant'Angelo Superintendency of Puglia
Phases and timeframe	2009 onwards
Financial resources	Municipality of Monte Sant'Angelo
Expected results	Implementation of decorum and functionality of sanctorial area.
Result indicators	Valorisation of considered space.

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone and territory	
Objective 55	ENHANCEMENT OF THE TERRITORIAL CULTURAL OFFER
Project 55.1	Identification and valorisation of the Via sacra langobardorum route
Description	Structuring of the via Sacra Langobardorum with apposite signs, didactic apparatus and publication of specific maps concerning the cult locations situated along the itinerary which from the plains rises towards Monte Sant'Angelo, San Marco in Lamis, San Giovanni Rotondo.
Actions	<ol style="list-style-type: none"> 1. Definition of the sites involved and stipulation of agreements. 2. Creation of cultural itineraries. 3. Realisation of signboards and explanatory apparatus. 4. Realisation of didactic and scientific material.
Parties involved	Municipalities of Monte Sant'Angelo, San Marco in Lamis, San Giovanni Rotondo Province of Foggia Gargano National Park, Mountain Community Superintendency BAPPSAE Region of Puglia, University of Bari
Phases and timeframe	Medium term.
Financial resources	Funds from Region of Puglia; community funds.
Expected results	Increase in cultural and tourist offer in the regional territory.
Result indicators	Quantity of sites involved and expansion of the area involved in the routes. Increase in tourist flow

ENHANCEMENT PLAN Monte Sant'Angelo buffer zone and territory	
Objective 55	ENHANCEMENT OF THE TERRITORIAL CULTURAL OFFER
Project 55.2	Optimisation of the regional museum network
Description	An important role can be carried out, in the sector of valorisation and use of cultural assets, by the creation of a museum network in Puglia for the neighbouring centres of San Giovanni Rotondo, San Marco in Lamis, Manfredonia, already foreseen by the Region of Puglia
Actions	<ol style="list-style-type: none"> 1. Creation of a museum network 2. Realisation of signboards 3. Realisation of didactic apparatus
Parties involved	Municipalities of Sant'Angelo, San Giovanni Rotondo, San Marco in Lamis, Manfredonia Province of Foggia Gargano National Park

8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES

	Mountain Community Superintendency BAPPSAE Region of Puglia University of Bari
Phases and timeframe	Short-medium term
Financial resources	Funds of the Region of Puglia; community funds.
Expected results	Creation of an integrated system of routes and increase in use of the sites
Result indicators	Number of sites involved and expansion of the territorial area. Increase in number of visitors.

8.4 AWARENESS BUILDING AND PROMOTION PLAN

8.4.1 NETWORK

The Plan aims both at raising awareness of people living in the areas included in the Site on the values of the Longobard Heritage and at universally disseminating these values in each possible way: from training to information; from adequate documentation, to the study and implementation of advanced technological solutions in order to enhance communication; from network initiatives to initiatives launched by single partners of the Site and reference micro-territories.

The three pillars of the Awareness Building and Promotion Plan, along with the strengthening of technological systems, are the following:

- Training – comprising interaction with education institutions (from primary schools to universities) and social systems (employers and employees, pensioners, the elderly, people with special needs); the creation of specialized didactic Laboratories; the retraining of human resources that operate at any level on the properties (from curators, historians to tourist guides, etc.), both those operating in the sectors indirectly linked to the property and those linked to accommodation and services systems.
- Information – comprising both – direct and indirect – production of publishing and multimedia material (guides, brochures, maps, boards, documentaries, etc.) which help to promote and disseminate information on the products and the reference Territories, and the strengthening of network communication technological systems, like websites, the network's connected database, specialized software, and the targeted strengthening of relations with media, with house-organs and with other information centres.

- Events – comprising a wide range of activities: exhibitions, conferences, seminars on the Property; participation in great events (specialized culture and tourism fairs), national and international initiatives; cultural and economic initiatives, promotion of the endogenous resources of the area, etc.

8.4.2 CIVIDALE DEL FRIULI and its Territory

The activities linked to promotion and awareness of the population regarding cultural assets in general have always been very intense and of a Higher level also due to the presence of numerous cultural associations in the city and territory. Recently there was the development of some specific initiatives concerning Longobard heritage and for which optimisation is in progressed or already planned.

8.4.3 BRESCIA and its Territory

The site of S. Salvatore – S. Giulia has been the focus of growing attention through the realization of various activities, advertised with special illustrated brochures and with printed material on the museum and the monastery. The site is appropriately marked by a system of road signs, which also indicates walking itineraries for visitors. Such signs can be found at the train station and on main roads of access to the city. The site is also indicated among the main tourist attractions on the sign that welcomes travelers approaching the city over the Highway exit "Brescia Centro." More signs and totem poles advertising the Site are present in the area in front of the Museum and disseminated in various parts of the city.

8.4.4 CASTELSEPRIO-TORBA and its Territory

The promotion of awareness and promotion about the complex of Castelseprio-Torba, both at national and international level, will be enhanced by publishing products in various languages (general and/ or thematic didactic and scientific

material, brochures, guidebooks) and also through the website.

As to events, exhibitions, conferences and study days in cooperation with qualified universities and cultural institutions, also foreign, operating in the area will be organized. Moreover, the complex will participate in all cultural initiatives promoted by the Ministry for Cultural Heritage and Activities at national and European level (Culture Weeks, European Heritage Days). Following successful past initiatives, guided tours also linked to music, theatre and poetry events, will be organized upon special occasions during the year. In cooperation with other local bodies, the complex will also participate in specialized culture and tourism fairs (BIT, Mediterranean Exchange for Archaeological Tourism, etc.).

In order to establish a constant connection with local people, cooperation with local schools of any kind and level – already successfully launched in the past – will be strengthened so as to create new education opportunities at different levels, involving both students and teachers and to experiment new forms of communication for the properties.

8.4.5 SPOLETO

8.4.6 CAMPELLO SUL CLITUNNO and their Territory

The effective promotion of Longobard testimonials in the Territory of Spoleto and Campello sul Clitunno, obviously with particular reference to the Basilica of San Salvatore and the Clitunno Tempietto, will be realised through educational purposefully dedicated to tour operators and journalists active in the sector of cultural assets and tourism.

The city of Spoleto will, moreover, be a carrier of the applications of promotion of the territory where it will participate both individually and in collaboration with the Agency for the Promotion of Tourism of Umbria and Tourist Fairs such as BIT of Milan, TTI of Rimini, the World Trade Market of London, the Salon des Vacances of Paris and Brussels and the Fitur of Madrid. Specific actions of promotion are

foreseen for this year and will be repeated in 2009, on the market of the United Kingdom and the United States of America.

8.4.7 BENEVENTO and its Territory

The main objectives of promoting and awareness building in relation to the Longobard heritage are:

- Increasing awareness about archaeology and local heritage in general.
- Improving cultural promotion on the site
- Increasing sensitivity among children of school-going age.

The actions included in the local projects are broken down in terms of location and involve:

- Network conventions and a website to create an "Italia Langobardorum" network by presenting an overall picture that is as complete as possible of the cultural, touristic, and recreational attractions of the Longobard heritage protected by UNESCO in general.
- An exhibition of images and documents of the Duchy of Benevento and an exhibition of Longobard crosses, are two items in the project: "Langobardia Minor: Images and documents from the Duchy of Benevento".
- Research and school teaching and an exhibition of comic strips about Longobard Benevento to create a network for the study of the Longobard heritage including the artistic – cultural history of a city using forms of telling the story other than canons, such as for example, comic strip accounts, which offers the possibility of easily reaching the school-going age group.
- The implementation of a computerised tourist system added to by the creation of an Urban Archaeological Park for Benevento by means of virtual networks serving the tourist service that uses innovative

technologies for passing information on to the user on site.

- The creation and activation of a vocal information portal as part of a virtual cultural infrastructure system.
- A multi-modal information centre and a network of information points in a material cultural infrastructure system.
- Laying out itineraries for creating the "Via Sacra Langobardorum" archaeological park.

In detail, the actions to be taken to pursue the objectives, broken down on the basis of reference Territory,

8.4.8 MONTE SANT'ANGELO and its Territory

The presence of a complex system of promotion activities for the artistic-monumental and landscape-environmental heritage in Monte Sant'Angelo e its Territory is strictly linked to a more general enhancement policy which concerns the whole Region Puglia. The Municipalities, Provinces, Region and cultural institutions are all involved in projects – at a different level – whose main objective is to promote this heritage, considered a precious resource to be protected. The objectives of the Plan are therefore to enhance didactic activities, already existing at various levels, which promote the awareness of the site and its Territory.

Moreover, the interaction among universities, Superintendences, Companies and other institutions can enhance the correct management of the heritage by involving suitable professionals, able to combine interdisciplinary competences for the dissemination of knowledge and awareness.

**8.6.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
NETWORK	1 STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY	1.1 Study, implementation and support to targeted training courses for teachers of all school levels
		1.2 Activation of cultural exchanges between Universities and post-graduate Schools
		1.3 Broadening of the educational project "I Longobardi – Gemellaggi formativi e itinerari turistici per le scuole" (The Longobards – Educational twinning and touristic routes for schools)
	2 STRENGTHENING THE INTERACTION WITH SOCIAL SYSTEMS	2.1 Support and promotion of awareness initiatives for specific population sectors (world of labour, pensioners)
		2.2 Support and promotion of initiatives of awareness, information and participation for the weakest segments of the population (elderly, individuals with special needs)
	3 RETRAINING AND UPDATING OF TOUR OPERATORS	3.1 Network initiatives for the training and updating of tour Guides
	4 STRENGTHENING OF TECHNOLOGICAL SYSTEMS FOR THE AWARENESS BUILDING AND PROMOTION OF HERITAGE	4.1 Strengthening of the Network's Website
		4.2 Development of technological systems and products
	5 CONSTRUCTION AND CONSOLIDATION OF THE EUROPEAN GEOCULTURAL CORRIDOR	5.1 Extension of the network of relations to important national and European centres of Longobard interest (Geocultural corridor)
		5.2 Implementation of aimed agreements at the national and European level and co-participation in EU projects
	6 STRENGTHENING OF INFORMATION	6.1 Initiation of permanent relations with information bodies and regional-national media
		6.2 Investigation and implementation of targeted initiatives and events concerning the world of information
	7 PROMOTIONAL INITIATIVES AND MAJOR EVENTS	7.1 Participation and promotion of major specialised events
		7.2 Participation and promotion of Communication and Information events
	7.3 Study, implementation and co-participation in information productions of large circulation (television, film, audiovisual)	

**8.6.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
CIVIDALE DEL FRIULI TERRITORY	8 ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION	8.1 Projects to improve knowledge about the Heritage in relation to education (from primary schools to universities)
		8.2 Development of didactic and experimental activities
		8.3 Project and implementation of didactic laboratories focused on the Heritage
		8.4 Carrying out or enhancing and adjusting guided tours of the territorial network of the "Heritage and Science Laboratories"
	9 ENHANCEMENT OF INFORMATION ACTIVITIES	9.1 Study and implementation of publishing initiatives for promotion and public awareness
		9.2 Improvement of web-related technological systems to put the Heritage on the web
		9.3 Enhancement of relations with information centres
	10 ENHANCEMENT OF RAISING AWARENESS ACTIVITIES	10.1 Carrying out of activities to enhance dissemination of Heritage values
		10.2 Project and carrying out of cultural and economic initiatives
		10.3 Promotion of endogenous resources
BRESCIA TERRITORY	11 RISE AND INCREASE IN THE EDUCATIONAL OFFER	11.1 Design and realisation of new didactic paths
	12 INCREASE IN ACTIONS OF COMMUNICATION	12.1 Realisation of new multimedia promotional material
		12.2 Creation of cartoon strips and gadgets for youth
		12.3 Production of new merchandising products on the Longobards
		12.4 Fostering promotion through the use of more means of advertisement
		12.5 Organisation of exhibitions
	13 ORGANISATION OF EVENTS AT THE SITE	13.1 Event "Feast of Santa Giulia"
		13.2 "Discover Brescia" project
	14 USER RETENTION	14.1 Implementation of the "Desiderio card" project

**8.6.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
	15 LONGOBARD ITINERARIES	15.1 Public pathway dedicated to the main Early middle ages emergencies
	16 PROMOTION OF AWARENESS ON THE LONGOBARDS WITH SUSTAINABLE ACTIONS OF TOURISM	16.1 Diffusion of awareness on the characters and events of the Longobard era
		16.2 Promotion of sustainable tourism in the development of the territories of <i>Langobardia</i>
		16.3 Promotion of intercultural exchange, visits to neighbouring sites and in-depth examinations on wines and characteristic local products
		16.4 Training of Cultural and Environmental Promoters (A.C.A.)
		16.5 Promotion of formation and realisation of dedicated publications
		16.6 Intercultural exchanges between the <i>Langobardia</i> sites
		16.7 Distribute knowledge of the brand and supply work to operators in the sector
	17 PROMOTION OF AWARENESS ON THE ARCHAEOLOGICAL AREAS, MONUMENTAL EMERGENCIES, ARCHAEOLOGICAL FINDINGS CONSTITUTING THE NETWORK OF LONGOBARD BRESCIAN SITES	17.1 Protocol of programmed agreement for the constitution of a Committee of coordination for the enhancement and promotion of the Brescian Longobard heritage
		17.2 Promotion of the activities of the museums in the territory which conserve findings of the Longobard heritage
17.3 Exhibitions on craftsmanship in the Longobard era in Brescia and the sites in the territory		
CASTELSEPRIO-TORBA TERRITORY	18 ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION	18.1 Study and creation of new informational materials and actions to involve schools and tourism
		18.2 Study and implementation of artistic initiatives
	19 ENHANCEMENT OF PUBLIC AWARENESS ACTIVITIES FOR ADULTS	19.1 Projects to improve the enhancement on of the Heritage at various social levels
		19.2 Enhancement of targeted relations with the media
		19.3 Promotion activities of FAI (Italian Environmental Fund) for the Monastery of Torba

**8.6.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

FIELD	OBJECTIVES	PROJECTS
	20 ENHANCEMENT OF TOURIST PROMOTION INITIATIVES	20.1 Study and subscription of agreements with tour-operators 20.2 Implementation of the international project "Nature and Culture in a part of Insubria" 20.3 Tourist promotion "Welcome to Lombardy: the Land of FAI Treasures " - The values of Torba-Castelseprio
SPOLETO TERRITORY	21 INCREASE THE NUMBER OF PROMOTIONAL ACTIVITIES CONNECTED WITH THE SITE	21.1 CISAM realization of a slip-case on San Salvatore 21.2 1 st Congress "Italia Langobardorum (568-774)" 21.3 Implementing ad hoc <i>educational</i> s for tour operators and journalists from the tourist-cultural sector; assistance to journalists and Radio TV crew members
	22 INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES	22.1 Studying and implementing accommodation, promotion and awareness raising-related publishing initiatives 22.2 City course on the subject of Longobard culture, with closing tasting of food products 22.3 Outsourcing the management of the IAT tourist information and accommodation office, offering extended working hours and a wider range of services 22.4 Planning of communication activities for the dissemination of knowledge of the Longobard heritage, through various information channels 22.5 Improving technological systems in order to exploit assets via the Internet

31 ENHANCEMENT OF PUBLIC AWARENESS ACTIVITIES	31.1 Scientific and information meetings, seminars, exhibitions ands touristic tours	

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.1	Study, investigation, implementation and support to targeted training courses for teachers of all school levels
Description	<p>Training of trainers: is a strategic policy for the awareness and promotion of the exploitation of longobard Heritage and of the awareness of its historic, cultural and artistic values among the younger generations. The project foresees the adoption of specific measures:</p> <ol style="list-style-type: none"> in the context of ministerial activities for the updating of teachers of training Institutes of all levels, starting from the ones active in the territories of the "Italia Langobardorum" Site in the context of specific updating activities promoted by the Stakeholders of the Site's territory
Actions	<ol style="list-style-type: none"> To cooperate with the Sites' Universities and training bodies at the purpose of formulating training "packages" in the context of mandatory updating courses for teachers Local awareness initiatives and targeted information Awareness initiatives for the arrangement of school outings in the Site's territory
Parties involved	<p>Network management Body Stakeholders Universities School administrations and complexes</p>
Phases and timeframe	<p>2008-2011 1, 2, 3 Cyclical process initiative</p>
Financial resources	Funding yet to be identified
Expected results	<p>Increasing the teachers' level of sensitization Increasing interest and participation in the promotion of the longobard Heritage Supporting scholastic tourism fluxes in the Site's territory</p>
Result indicators	<p>Number of activated courses Number of involved teachers Number of activated school outings</p>

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.2	Activation of cultural exchange between Universities and post-graduate Schools
Description	<p>Many of the cities which are part of the Italia Langobardorum Site are home to Universities or post-graduate Schools offering courses and master degrees in history, architecture, history of art, archaeology. Specialised internships on the Longobard age offering the opportunity of University accommodation are to be established. In substance, it's a question of organising "exchanges" between students of different universities in order to sustain the direct knowledge of the studied Longobard heritage. Such initiatives could be supported by the Territorial bodies of the territories of reference that could take on the accommodation of students</p>
Actions	<ol style="list-style-type: none"> Agreements between Universities and post-graduate Schools Organisation of specialised internships
Parties involved	<p>Universities of the network's locations Ministry of University and Scientific Research Territorial bodies</p>
Phases and timeframe	From 2010
Financial resources	Funding yet to be identified
Expected results	Strengthening of university training on the Longobards
Result indicators	<p>Number of activated internships Number of involved students</p>

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.3	Broadening of the educational project "I Longobardi – Gemellaggi formativi e itinerari turistici per le scuole" (The Longobards – Educational twinning and tourist routes for schools)
Description	<p>Exposcuola, the Show comparing educational activities in Europe and the Mediterranean, launched in 2000 under the patronage of the Ministry of Education and of the Ministry of Foreign Affairs, is an important point of reference for educational activities. In fact, the Show brings together the leading figures of the education community (students and teachers) to the institutional and associative world of communications, arts, sciences and sports.</p> <p>In this context, the research-action "Museo didattico della Memoria e delle Tradizioni" (Learning museum of Memory and Traditions) which promotes common initiatives among teachers and cultural operators, schools and associations, aiming at the exploitation of local culture systems and at the promotion of the culture of safeguard and conscious enjoyment of heritage and of its values of identity, was established in 2004. Subsequently, the project "I Longobardi – Gemellaggi formativi e itinerari turistici per le scuole" (The Longobards – Educational twinning and touristic routes for schools) networking 10 schools and 12 institutions and associations of Italian areas interested in the longobard presence (among which Benevento, Salerno, Caserta and Pavia) was undertaken in 2007 within the cultural and educational course of the above mentioned research-action.</p> <p>A first moment of encounter and exchange between partners occurred in Atripalda (in the Region of Campania) in November 2007, where the achieved results were presented. The project's progresses, aiming at the reinforcement of the already undertaken network of relations, in order to produce qualitative tourist routes for schools among the Longobard paths, from the North to the South of Italy, were discussed and defined on this occasion. These itineraries will be portrayed as "cognitive labs" of the territories where art, science, history, traditions and environment constitute the different "stages" of the journey.</p> 
Actions	<ol style="list-style-type: none"> 1. To involve other schools which are part of the Italia Langobardorum Site's network or that are, nevertheless, touched by the longobard presence 2. Implementation of educational projects 3. Exchange of experiences and meetings between the students and the teachers of the schools
Parties involved	Ministry of Education Ministry of Foreign Affairs Ministry for Cultural Heritage and Activities Schools Exposcuola Management Organisations active in the field of school tourism
Phases and timeframe	Stage 1 – first semester 2008 Stages 2 and 3 – starting from the school year 2008-2009
Financial resources	To be gathered from the funds of the various involved institutions
Expected results	To promote knowledge of the Longobard culture and to increase a common sense of identity among the young
Result indicators	Number of schools, institutions and associations involved in the project

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 2	STRENGTHENING THE INTERACTION WITH SOCIAL SYSTEMS
Projects 2.1, 2.2	2.1 – Support and promotion of awareness initiatives for specific population sectors (world of labour, pensioners) 2.2 – Support and promotion of initiatives of awareness, information and participation for the weaker segments of the population (elderly, individuals with special needs)
Description	Giving attention to the world of social work requires special attention, in particular when the most vulnerable groups of the population are concerned. Therefore, special importance must be given to actions oriented at sustaining the accessibility to the Heritage and the Territories of reference on the part of the world of labour, pensioners, individuals with special needs. The detected project guidelines aim at favouring the awareness building on the values of Heritage and at the promotion of places carried out by public Bodies, trade union organisations, recognised and qualified organisations and bodies of voluntary social services and solidarity, religious associations. The Network management Body is entrusted with the task of facilitating these initiatives, in alliance with Stakeholders.
Actions	<ol style="list-style-type: none"> 1. Dissemination of information among interested national organisations 2. Support to courses for the Third Age dedicated to the Early middle ages and the Longobard culture 3. Dissemination of targeted tour package offers 4. Discounts for the elderly and for individuals with special needs in the context of Network services
Parties involved	<p>Network management Body Stakeholders of the Site's territory Workers and pensioners unions Recognised and qualified organisations of voluntary social services and solidarity Religious organisations Langobardia Association Associations-network of social, youth and religious tourism (CTG, CTS, CT Acli) Universities of the Third Age active in several cities</p>
Phases and timeframe	2008-2009 1, from 2010 actions 2, 3 e 4
Financial resources	Yet to be identified: Funds: regional, national, vacation-vouchers
Expected results	Balance of contacts Number of signed agreements Commenced initiatives
Result indicators	Periodic verification of the number of initiatives and of visitors

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 3	RETRAINING AND UPDATING OF TOUR OPERATORS
Project 3.1	Network initiatives for the training and updating of tour Guides
Description	This project responds to the need of making available, in every place of the Site, variously qualified personnel which will illustrate to visitors, not only the essential prerogatives of the longobard Heritage, but especially the prerogatives of the Places and Territories (national and of the European geocultural corridor). Such personnel will be adequately trained to favour tourist-cultural links and to promote tours in the other realities of the Network. The educational activities could be carried out, also in cooperation with Universities and the Association of professional guides, by other training bodies and by recognized associations of social, youth and religious tourism which include basic training activities in their statutory purposes.
Actions	<ol style="list-style-type: none"> 1. Definition of partnerships with Universities, the National and European association of Tour Guides, specialised training and social, youth and religious tourism centres (CTG, CTS, CT Acli, ecc.) 2. Organisation and activation of training projects

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

Parties involved	Network management Body Network scientific committee Stakeholders of the Site's Territories National university system National Association of Tour Guides European Association of Tour Guides CTG - Centro Turistico Giovanile (Tourist Centre for Young People) CTS - Centro Turistico Studentesco (Student Tourist Centre) Tourist Centre ACLI Associazione Langobardia Pastoral Tourism Regional, national and International institutions Ministry for Cultural Heritage and Activities Ministry of University The Site's Superintendencies
Phases and timeframe	2009 - Initiation of Action 1 2010 - Initiation of Action 2
Financial resources	To be identified at the regional, national, EU level
Expected results	Activation of training courses and availability of qualified personnel capable of illustrating the Site's thematic itineraries Higher quality of guided tours in the Site's Places and Territories
Result indicators	Progressive agreements with the various involved bodies Number of training courses Number of trained persons

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 4	STRENGTHENING OF TECHNOLOGICAL SYSTEMS FOR THE AWARENESS BUILDING AND PROMOTION OF HERITAGE
Project 4.1	Strengthening the Network's Website
Description	The gradual implementation of the Website (www.italialangobardorum.it) is foreseen in order to give the Site immediate and broad visibility. Three basic functions are foreseen: PROMOTION <ul style="list-style-type: none"> a) Showcase of the artistic-monumental Heritage b) Site's cities' and Territories' guide c) Information on training initiatives d) Information on exhibitions, conventions, seminars e) Proposal of integrated itineraries NETWORK COORDINATION <ul style="list-style-type: none"> f) Organisational guide for the extended Italy network and for the European geocultural Corridor LINKS TO SPECIALISED WEBSITES <ul style="list-style-type: none"> g) Websites of stakeholders h) www.langobardia.it, website of the Associazione Langobardia (Longobardia Association – Social, youth, religious tourism and links to national and European CTG, CTS, CT Acli networks) i) Other relevant websites
Actions	Implementation of the website with data provided by the Stakeholders and the Network management Body
Parties involved	Network management Body Stakeholders Organising Committee of the Aquileia Patriarchate Project (Progetto Patriarcato di Aquileia)
Phases and timeframe	2008-2009 Full functionality and implementations
Financial resources	10.000 Euro already collected; 5.000 euro (Patriarchate Committee) Other funding to be identified; sources: Stakeholders, Network management Body
Expected results	Visibility and efficiency of the integrated tourism system and of the Site's Places
Result indicators	Number of accesses Number of online bookings

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 4	STRENGTHENING OF TECHNOLOGICAL SYSTEMS FOR THE AWARENESS BUILDING AND PROMOTION OF HERITAGE
Project 4.2	Development of technological systems and products
Description	<p>For the general purpose of sensitisation and promotion of the "Italia Langobardorum" Site, the development of scientific-technological cooperation is of key importance for the implementation and strengthening of the Site's visibility, thus favouring the greater and swifter diffusion of the knowledge of Heritage and of its values.</p> <p>Therefore, the projects has the aims at:</p> <ol style="list-style-type: none"> implementing the multifunctional website (www.italialangobardorum.it) already launched in 2007 by the Data Processing Lab of the Aquileia Patriarchate's Organising Committee allowing timely information on initiatives and events favouring coordinated access to the specialised databases regarding Heritage and foreseen in the management Plan implementing technological products for the Network making available finalised services for users researching different technical solutions of support and service
Actions	<ol style="list-style-type: none"> Investigation and implementation of animated characters which will accompany the website's navigation Rendering systems for the optimisation of the Knowledge of artistic-monumental Heritage Investigation and implementation of a specialised computing platform for the (organisational, scientific, economical) multi-functions required by the administration of the integrated system in its different ramifications Investigation and implementation of technologies for palmtops and telecommunications Investigation and implementation of aimed holograms Investigation and implementation of advanced computing platforms (GRID Computing)
Parties involved	<p>Stakeholders Network management Body University system Research Centres Organising Committee of the Aquileia Patriarchate Project (Progetto Patriarcato di Aquileia)</p>
Phases and timeframe	<p>2008 1, 2, 5 initiation of planning procedures and cooperation agreements 2009-2011 3, 6, 7 initiation of studies, researches, implementations</p>
Financial resources	<p>Action 1 Collected funds : 5.000,00 euro (Patriarchate Committee) Other funds yet to be identified; funds: regional, national, EU Actions 2, 3, 4 Collected funds: 10.000 euro (Patriarchate Committee) Other funds yet to be identified, from regional, national, EU funding Actions 5, 6, 7 Resources to be identified; funds: regional, national and EU</p>
Expected results	<p>Visibility of the Heritage, of it's values, of the territories and of their endogenous resources Development of technologies and involvement of Universities and of Research centres in the fields of application of High technological level Strengthening of the of the system's cultural and touristic-economical global quality</p>
Result indicators	<p>Initiation and implementation of each project Quantification of the human resources engaged in research and implementation activities Placement of a permanent hit counter on the website in order to track contacts and for individual Network functions Number of databases linked to the system</p>

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 5	CONSTRUCTION AND CONSOLIDATION OF THE EUROPEAN GEOCULTURAL CORRIDOR
Project 5.1	Extension of the network of relations to important national and European centres of Longobard interest (Geocultural corridor)
Description	<p>The construction of a system of macro-itineraries connecting the "Italia Langobardorum" Site to other European places characterised by longobard history is considered of great importance and attractiveness, in order to increase the knowledge of longobard culture and traditions – which have left significant traces in the traditions of many Countries.</p> <p>A solution which allows, on one hand, to promote the values of the "Italia Langobardorum" Heritage and the sensitisation and involvement of a larger public and, on the other, to promote comparative studies on the cultural and traditional elements originating from the common longobard background.</p> <p>Therefore, the guidelines of macro-itineraries which are configured as a European "Geocultural Corridor", spin off from the unique and excellent Places of the "Italia Langobardorum" Site. This corridor is characterised by two orientations:</p> <ol style="list-style-type: none"> a) Italian Area (places of the territories of the longobard Dukedoms and routes of tradition, among which the <u>Via Sacra Langobardorum</u> – Longobards' Sacred Route); b) European Area, with two orientations: <ul style="list-style-type: none"> <u>Via delle Origini</u> (Route of origins - Itinerary from Scandinavia to the Ionian sea, across Northern and Eastern Europe, following the original historic trail of the Longobards) <u>Via micaelica del Paradiso</u> (Route of spreading St. Michael's worship, transferred by the Longobards from the original Sanctuary of St. Michael in the Gargano (Mount. S. Angelo) towards the western part of Europe and the strongholds in the Susa Valley (the "Sacra" of Mount Pirchiriano) and in Normandy (Sanctuary of Mont Saint-Michel [World Heritage List UNESCO]) and towards Spain, England - Ireland, Lake Constance, Rhine Valley.
Actions	<ol style="list-style-type: none"> 1. Preliminary studies for the definition of significant places for longobard history in the extended Italia network and in the European geocultural corridor 2. Relations and agreements with the institutions of the places identified by the investigation indicated in point 1 3. Establishment of equipped areas for the knowledge of the "Italia Langobardorum" Heritage at the junction points of the two guidelines
Parties involved	<p>Stakeholders, Network management Body Institutions, Bodies, Universities, Study and research centres Economic trade organisations Eurispes Institute, Rome Institutes, Bodies, Universities, Study and research centres, enterprises from the Countries of the geocultural Corridor: OECD-LEED Programme Paris CEI-Central European Initiative Banca Popolare FriulAdria Association "Carta di Cividale"</p>
Phases and timeframe	<p>2009 1, 2 2009-2012 3, 4</p>
Financial resources	Yet to be identified: regional, national, EU sources
Expected results	<p>Establishment of the two additional networks Greater dissemination</p>
Result indicators	<p>Establishment of the "junctions" of the two new networks Preparation of information points on the "Italia Langobardorum" Heritage at the "junctions" Quantification of visitors</p>

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 5	CONSTRUCTION AND CONSOLIDATION OF THE EUROPEAN GEOCULTURAL CORRIDOR
Project 5.2	Implementation of aimed agreements at the national and European level and co-participation in EU projects
Description	<p>The establishment of the European Geocultural corridor also foresees the implementation of targeted bilateral/multilateral agreements between Italy and the involved European Countries on topics concerning culture, environment, economy and training.</p> <p>The contact and relation actions were initiated in 2007 with the initiative - promoted by the Friuli Venezia Giulia Region and recognized by the Italian Government, by the OECD LEED Programme and by the Central European Initiative - entitled "International Desk Italy South East Europe"</p> <p>The works of the technical Table for the "Exploitation of the Territory/Environment and Culture" was held in Gorizia, on the 29th of October 2007 - with the active participation of representatives of Stakeholders from "Italia Langobardorum" (Cividale, Spoleto, Mount St. Angelo-Foggia). On this occasion the planning guidelines of the management plan for UNESCO were analysed in-depth.</p> <p>The International Desk has a permanent nature and will be useful to the initiation of relations and projects with institutional partners of the "Geocultural corridor" (Slovenia, Austria, Hungary, Czech Republic, Slovakia and Croatia).</p>
Actions	<ol style="list-style-type: none"> 1. Constitution of a Network workgroup on national and International projects and adherence to the "International Desk / Italy South East Europe" (Technical Table "Exploitation of the Territory") 2. Processing of planning priorities 3. Identification of International partners 4. Preparation and execution of projects
Parties involved	<p>Stakeholders, Network management Body</p> <p>Institutions, Bodies, Universities, Study and research centres</p> <p>Economic trade organisations</p> <p>Eurispes Institute, Rome</p> <p>Institutes, Bodies, Universities, Study and research centres, enterprises from the Countries of the geocultural Corridor:</p> <p>OECD-LEED Programme Paris</p> <p>CEI-Central European Initiative</p> <p>Banca Popolare FriulAdria / Crédit Agricole</p> <p>Association "Carta di Cividale"</p>
Phases and timeframe	<p>2008 1, 2, 4</p> <p>2008-2009 3, 4</p>
Financial resources	<p>Action 1</p> <p>From Friuli Venezia Giulia</p> <p>2007 (beginning) and 2008</p> <p>Aggregate 450.000,00 euro of which</p> <p>collected: 108.000,00 euro (FVG Region, Banca Popolare FriulAdria)</p> <p>to be collected: 342.000,00 euro (budget commitments FVG Region, FVG Chambers of Commerce, Friulia spa, Finest spa, Banca Popolare FriulAdria/Crédit Agricole, Informest spa</p> <p>Actions 2,3, 4</p> <p>Regional, national, EU funds (EU financing sources: Cultura 2007-2013. Life+, Leader plus, Interreg Programmes)</p>
Expected results	Development of International study and economic cooperation initiatives
Result indicators	<p>Annual balance of carried out activities</p> <p>Implemented projects in the context of the International Desk / Italy - South East Europe</p>

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 6	STRENGTHENING OF INFORMATION
Project 6.1, 6.2	6.1 – Initiation of permanent relations with information bodies and regional-national media 6.2 – Study and implementation of targeted initiatives and events concerning to the world of information
Description	<p>With the definition of the management Plan a new phase is opened, in the relations with the information bodies and the regional and national “media” as well, where the totality of new projects and scenarios deriving from them for the local, regional, national and international contexts will be participated.</p> <p>The actions, to be developed concurrently by the Stakeholders and the Network management Body, will aim at:</p> <ol style="list-style-type: none"> Spreading the Values of Heritage, Favouring the re-interpretation of the longobard experience, Illustrating the originality and complexity of the “Italia Langobardorum” Site and its extension to the extended Italy Network and to the European geocultural Corridor; Promoting the system of macro-itineraries and of local micro-itineraries Illustrating the contextual requalification of the Territories, even from the agricultural and food, oenogastronomic and handcraft point of view. <p>All actions to be developed at the network and local level with press conferences, contacts with daily papers and magazines, public and private television, radio and other information media.</p>
Actions	<ol style="list-style-type: none"> National and local press conferences Interviews to Stakeholders Dissemination of informative material Organisation of dedicated tours with information workers Specific events National thematic competition for information workers
Parties involved	Network management Body Stakeholders of the Site’s Places
Phases and timeframe	2008-2009 1, 2, 3, 4, 5 2010 6
Financial resources	Yet to be identified – Sources: Stakeholders, Network management Body, privates
Expected results	Diffusion of information and sensitisation of the public opinion regarding the Site’s values and the innovative fundamental qualitative development actions of Territories promoted by the management Plan
Result indicators	Periodic and annual press review Observatory of dedicated radio-television productions

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 7	PROMOTIONAL INITIATIVES AND MAJOR EVENTS
Project 7.1, 7.2, 7.3	7.1 Participation and promotion of major specialised events 7.2 Participation and promotion of Communication and Information events 7.3 Study, implementation and co-participation in information productions of large circulation (television, film, audiovisual)
Description	<p>The promotion of the Site and of the annexed tourist-cultural opportunities will be the object of coordinated planning at the Site level and at the level of individual places, in coordination with the Network management Body and the Stakeholders.</p> <p>Specific initiatives at the Highest levels will accompany the investigation, implementation and promotion of major specialised events, as previously occurred in 2006, with the initial presentation at the International Tourism Exchange of Milan, and in 2007, with the television programme “Superquark” (RAI 2) and the exhibition on the Longobards set up in Turin and Novalesa.</p> <p>Important information initiatives - like different kinds of exhibitions (even virtual), conventions, seminars, television and film productions - will be promoted and redefined with an annual scheduling on behalf of the Stakeholders in coordination with and/or the planning and direct intervention of the Network management Body.</p>
Actions	<ol style="list-style-type: none"> Scheduling of the annual interventions of Stakeholders

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	<ul style="list-style-type: none"> 2. Coordination with the Network management Body 3. Production of events and related information and promotion activities
Parties involved	<ul style="list-style-type: none"> Network management Body Stakeholders Regions Ministry for Cultural Heritage and Activities
Phases and timeframe	2008-2009 and on.
Financial resources	Yet to be identified – Funding sources: Stakeholders, regional, national, EU, privates
Expected results	Production of events of cultural value for the promotion of Heritage
Result indicators	<ul style="list-style-type: none"> Number of events Number of visitors or of users attending the events Results of merit derived from press reviews

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 8	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 8.1	Projects to improve knowledge about the Heritage in relation to education (from primary schools to universities)
Description	<p>The project envisages a number of activities. Among these, training of teachers by planning refresher courses on specific topics related to Longobard culture and the Cividale and the network's heritage. Another activity concerns the involvement of students on an annual basis coming from any kind of school in the Province of Udine (with successive extension to students of the other provinces of Friuli Venezia Giulia) in order to study and carry out projects concerning the enhancement of culture, art, properties and tradition of the Longobard Heritage. All studies and works – carried out by using any means (multimedia, objects, drawings, graphics, artefacts, photographs, etc.) will participate in a competition and relative exhibitions (also itinerant). The best works will be included in publications aimed at disseminating and promoting knowledge about the Longobard Heritage. The topics of the competition will be chosen in relation to the proposals for the enhancement of the Management Plan (see Enhancement and Knowledge Plans), like:</p> <ol style="list-style-type: none"> “Early-Medieval fortified sites”; “The walls of Cividale del Friuli: enhancement proposals” “Longobard necropolises” “The Church of San Giovanni: virtual rendering of transformation phases” “The façade of the Church of San Giovanni: drawings by Sturolo, Early-Medieval traces and stone fragments of liturgical furnishings. Multimedia displays ” “Controlling the territory: from Eastern Alps to Istria”. <p>Other projects concern the organization of school trips to the heritage of the site and the production of specific information material for young people. In general, schools will be involved in all projects described in the Public Awareness and Promotion Plan.</p>
Actions	<ol style="list-style-type: none"> Carrying out of refresher courses for teachers. Planning of the initiative with promoters and schools concerned. Preparation of the competition Launch of the initiative Distribution of results at network level
Parties involved	Municipality of Cividale del Friuli; Municipalities included in Longobard itineraries; schools of any kind and level; Italian Castle Institute (section Friuli Venezia Giulia); Italia NostraStrad; FAI (Italian Environmental Fund); Region Friuli Venezia Giulia; Provinces of Udine, Gorizia, Pordenone, Trieste; Friuli Archaeological Association; City Museums of History and Art of Udine; Heritage and Science Laboratories; Longobardia Association; Social and young tourism associations, UNESCO Club of Udine
Phases and timeframe	2008-2009 1, 2, 3 2009-2010 Launch of initiatives and carrying out of the first edition of the competition
Financial resources	Funds to be raised by: Region Friuli Venezia Giulia; Provinces of Udine, Gorizia, Pordenone, Trieste; private funds
Expected results	Increase in the direct participation of young people in knowledge and promotion activities on UNESCO Heritage values
Result indicators	<p>Number of schools and classes involved</p> <p>Number of papers</p> <p>Number of organized visits to the properties of the Heritage and territory to prepare papers</p> <p>Number of activities conducted by the Heritage and Science Laboratories</p>

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 8	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 8.2	Development of didactic and experimental activities
Description	As to primary schools, an "Illustrated Guide of the Town" will be drawn up by pupils with special reference to the Longobard period and heritage. At university level, information will be enhanced to provide guidelines for a number of competitions for the already existing <u>Biennial Competition "Forum Julii"</u> for degree thesis with reference to topics related to the Longobard culture. Concerning aspects related to didactic games, the organization of game or on-stage experimentations will be enhanced in Holiday Centres for secondary schools.
Actions	<ol style="list-style-type: none"> 1. Didactic project of the "Illustrated Guide of the Town", implementation and publication 2. Definition of topics linked to Longobard culture for the Biennial Competition "Forum Julii" 3. Organization of game or on-stage experimentations related to the Heritage in the activities of Holiday Centres (secondary schools) 4. School trips and information initiatives on the local Heritage and Site 5. Organization of guided tours to the Heritage, territory and Heritage and Science Laboratories
Parties involved	Municipality of Cividale del Friuli; Schools; Province of Udine; Longobardia Association; Friuli Archaeological Association; Italian Castle Institute (section Friuli Venezia Giulia); International Centre for Research and Documentation on Early Medieval Art and Architecture; Cultural and social and youth tourism associations.
Phases and timeframe	Under way 1, 2 2008-2009 3, 4, 5
Financial resources	To be defined for each project – Funding: municipal, provincial, regional, private funds.
Expected results	Greater knowledge and participation of young people in the promotion activities of the Heritage and territory
Result indicators	Number of institutions involved Number of carried out initiatives Number of participants Number of targeted publications and printed copies

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 8	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 8.3	Project and implementation of didactic laboratories focused on the Heritage
Description	The project envisages the preparation of specific Didactic Laboratories in the context of scientific Laboratories (existing, to be enhanced or to be created) which deal with specialized topics concerning the knowledge and conservation of the Heritage. The objective of the project is to draw young people closer to applied Sciences in order to favour the dissemination of knowledge about the heritage, also thanks to relevant activities which result in tangible and promotable projects. This refers to a series of laboratories, like: <ol style="list-style-type: none"> a) The laboratory related to the soon-to-be archival-historical Centre which will be enhanced in the Convent of Santa Maria in Valle; b) The laboratory related to the soon-to-be biological archive Centre also in the Convent of Santa Maria in Valle; c) The didactic-archaeological laboratory existing in the National Archaeological Museum
Actions	<ol style="list-style-type: none"> 1. Strengthening of the laboratory referred to the historical-archival Centre and first exhibition of archives and documentation. 2. Project for the first initiative of the laboratory: "The Sign: experimentations on the evolution of writing" linked to the historical-archival Centre. 3. Project for the first didactic initiative of the laboratory of the Biological Archive Centre linked to the collaboration of schools in the cataloguing of findings and the dissemination of the first data in relation to the activities carried out in the laboratory.

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	<p>4. Project for specific didactic activities to be carried out in the didactic archaeological laboratory of the National Archaeological Museum.</p> <p>5. Project and implementation of didactic activities on the study of Early-Medieval history, art and architecture in the International Centre for Research and Documentation on Early Medieval Art and Architecture.</p>
Parties involved	Municipality of Cividale del Friuli; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage), Superintendence for Archaeological and Archive Heritage of Friuli Venezia Giulia; Parish of Santa Maria Assunta; Project Promoting Committee of the Patriarchy of Aquileia; Province of Udine; Region Friuli Venezia Giulia; Universities of Udine and Trieste; Schools.
Phases and timeframe	2008-2009 1 and 3 (under way) 2008-2010 2, 4, 5
Financial resources	Action 1 Euro 15,000 already allocated, funding by Banca Popolare FriulAdria/Crédit Agricole. Action 3 funds by the Superintendences of Friuli Venezia Giulia. Actions 2, 4 and 5 to be raised with regional, provincial and private funds.
Expected results	Promotion among young people of both the Longobard Heritage and a series of scientific elements concerning the Heritage Preparation of young people to a systematic and coordinated approach to the Heritage and knowledge in a broad sense Support to teachers in educating young generations towards a more responsible way of understanding the value of historical-human heritage and sciences.
Result indicators	Number of visitors Number of student visitors Number of student projects carried out thanks to Laboratories' support

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 8	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 8.4	Carrying out or enhancing and adjusting guided tours of the territorial network of the "Heritage and Science Laboratories"
Description	<p>The project envisages the enhancement of the "Heritage and Science Laboratories " concerning the territory and of its endogenous resources by strengthening those already existing and creating new ones open to the general public through guided tours and to planned school experimentations.</p> <p>In particular, a structural cooperation with schools of any kind and level involved will be established for the implementation of the initiatives linked to project 1.1.</p> <p>There are four types of Laboratories, concerning applications and research on:</p> <ol style="list-style-type: none"> Agrifood and food and wine production (Taste Laboratory; didactic-experimental greenhouses; Essence and Olfactory laboratory) Other territorial resources (Tradition and Knowledge; Green Room – Mountain and Water culture [Savogna(I)/Litvek (Slo)*]; Astronomic observatory [Mount Matajur]) Areas of the regional Longobard itineraries (Longobard Workshops) Astronomic observatory of Mount Matajur (archaeoastronomy and connection between astronomic observations and agricultural-productive Traditions) <p>* In cooperation and exchange with BlueLab- Sea Culture, already active in Trieste-Muggia and in cooperation with Koper /Slovenia and school complexes of the Province of Trieste</p>
Actions	<ol style="list-style-type: none"> Creation of: Taste Laboratory, linked to the Food and Wine Centre, of the Essence and Olfactory Laboratory and of the Green Room – Mountain and Water Culture (see Socio-Economic Development Plan Cividale Project Objective) Creation of "Longobard Workshops", i.e. multimedia didactic rooms in crucial points of the Longobard historical and natural itineraries. Enhancement of laboratories: Tradition and Knowledge (see Socio-Economic Development Plan Cividale Project Objective) Enhancement of already existing didactic-experimental Greenhouses of the Technical Agricultural Institute with the plants to be designed and implemented in the context of the Food and wine Centre (see Socio-Economic Development Plan Cividale Project Objective)

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	<ol style="list-style-type: none"> 5. Organization of visits to the Astronomic observatory of the Mount Matajur (already existing) 6. Systematic launch of visits and stage 7. Launch of information activities and events 8. Collaboration with promoters and schools for visits to the Laboratories and scientific contribution to projects (utilization of resources of connected databases)
Parties involved	<p>Municipality of Cividale BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage), Superintendence for Archaeological and Archive Heritage of Friuli Venezia Giulia National Archaeological Museum Parish of Santa Maria Assunta Project Promoting Committee of the Patriarchy of Aquileia Universities of Udine, Trieste, Padova, Nova Gorica, Koper, Lubjana Technical Agricultural Institute Paolino d'Aquileia of Cividale Regional Education Department Municipalities of Savogna and Muggia Municipalities of Koper and Litvek (Slovenia) Municipalities included in regional Longobard itineraries UNESCO Club of Udine International Centre for Research and Documentation on Early Medieval Art and Architecture Food and wine centre Observatory on landscape-cultural heritage Community of Cepletischis Astrophilic Association</p>
Phases and timeframe	2008-2009 4, 5, 6, 7, 8 2009-2012 1, 2, 3,
Financial resources	Referred to basic projects created for the Laboratories to be implemented or enhanced - Funding: regional, provincial, private funds
Expected results	Improvement and enhancement of the didactic-training offer of the territory Improvement of scientific knowledge applied on the Heritage and territory Enhancement of the territory
Result indicators	Number of visits Number of visitors Number of promoted initiatives

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 9	ENHANCEMENT OF INFORMATION ACTIVITIES
Project 9.1	Study and implementation of publishing initiatives for promotion and public awareness
Description	<p>The project envisages the production of targeted information material about the Heritage and territory, namely tourist-cultural guides, maps, brochures, information boards, multimedia information material related to the various Promotion, Public awareness and Enhancement initiatives of the territory. Among these:</p> <p>The properties of the site "Italia Langobardorum"; Visit routes: "The walls of Cividale; "The churches and Monasteries of the Longobard aristocracy"; Longobard itineraries: "Longobard Friuli – centres of art and power"; The museum network: "Paolo Diacono's Castra and the Duchy of Friuli"; The Park of Vine and Wine; Multimedia guide: The Urn of Santa Anastasia and the Abbey of Sesto".</p> <p>The project envisages also the production of documentaries on topics related to Longobard culture and heritage. All this initiatives will be enriched by the documentary material produced in single projects of the Knowledge Plan, among which the virtual reconstructions of architecture and works of art of Cividale and its Territory.</p>
Actions	<ol style="list-style-type: none"> 1. Study and implementation of promotion and public awareness publishing initiatives 2. Production and dissemination of materials 3. Choice of topics and production of documentaries
Parties involved	Municipality of Cividale del Friuli; Parish of Santa Maria Assunta; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) and Superintendence for Archaeological Heritage of Friuli Venezia Giulia; Municipality of Sesto al

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	Regghena and other municipalities linked to the itineraries; Region Friuli Venezia Giulia; Province of Udine; Chamber of Commerce; Tourism Association Friuli Venezia Giulia; Association of Regional Tourist Guides.
Phases and timeframe	Starting from 2008-2009
Financial resources	€ 20,000.00, funds at disposal of the Municipality of Cividale del Friuli, already allocated by various Institutions like: Crup Foundation, Banca Popolare FriulAdria, Province of Udine. Funds to be raised by: Region Friuli Venezia Giulia; Provinces of Udine and of Pordenone; Municipality of Sesto al Regghena; private funds
Expected results	Improvement of visibility and knowledge about the Heritage Improvement of orientation services for visitors
Result indicators	Number of publications ;Number of printed copies Number of installed information boards

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 9	ENHANCEMENT OF INFORMATION ACTIVITIES
Project 9.2	Improvement of web-related technological systems to put the Heritage on the web
Description	<p>The project envisages the creation of a specific area dedicated to multimedia illustration (both continuous video playback and information material) of the Heritage of "Italia Langobardorum" of both Cividale and the extended network.</p> <p>The area consists of a Multimedia Heritage Orientation Room located in the context of the Visitor Centre – inside the Monastery of Santa Maria in Valle, where information on the history of Cividale's Longobard Heritage will be provided – and in general information related to the history of the town, the features of the territory, the areas which are important for alternatives cultural itineraries and tours (for example, the Alpe Adria Food and Wine Centre), to the cultural, socio-economic and folk initiatives which are under way or scheduled to welcoming, accommodation and catering services. Regarding the extended network, information on macro-itineraries (geocultural Corridor) along with all necessary data will be provided to improve knowledge about other places of the Site and with the contacts to plan tours.</p> <p>The objective is to provide visitors with a first-level knowledge about the properties of the Site to allow them to orientate in the general visit system and tourist routes which characterize the Enhancement and Promotion proposals for the properties themselves.</p> <p>The Visitor Centre will also host the ticket office and various services (authorized guides, bookshop, brochures and maps, multimedia products).</p> <p>The project envisages the production of multimedia material for the room and the strengthening of the website, also with a virtual tour to the heritage through webcam.</p>
Actions	<ol style="list-style-type: none"> 1. Project and implementation of programmes and multimedia material 2. Activation of the Multimedia Room 3. Activation of a virtual tours to the site and webcam
Parties involved	Municipality of Cividale del Friuli; Parish of Santa Maria Assunta; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) Superintendence for Archaeological Heritage of Friuli Venezia Giulia; Region Friuli Venezia Giulia; Province of Udine; University; Project Promoting Committee of the Patriarchy of Aquileia; International Centre for Research and Documentation on Early Medieval Art and Architecture.
Phases and timeframe	2009-2011
Financial resources	Funds to be raised by: Municipality of Cividale del Friuli; Region Friuli Venezia Giulia; Province of Udine; private funds
Expected results	Offer to visitors of an organic access system to the Heritage and Orientation. Promotion of visits and other tourist-cultural aspects of the territory Promotion of visits and other areas of the Site "Italia Langobardorum"
Result indicators	Number of activated contacts Number of planned visits starting from the Visitor Centre

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 9	ENHANCEMENT OF INFORMATION ACTIVITIES
Project 9.3	Enhancement of relations with information centres
Description	The project envisages the involvement of various information bodies and regional and national media to disseminate information related to the series of initiatives which concern the following aspects: knowledge, conservation, enhancement and promotion of the Longobard heritage. The objective is to enhance the effectiveness of information – both through targeted initiatives, according to the events carried out and periodical information which contribute to arousing and increasing interest in the Longobard Heritage and relative projects.
Actions	<ol style="list-style-type: none"> 1. Launch of permanent relations with information bodies and regional and national media in order to produce an illustrative “bulletin” (also online) on the initiatives and the progress of knowledge. 2. Study and carrying out of initiatives and targeted events dedicated to information, such as press conferences, interviews to Stakeholders. 3. Organization of tours dedicated to information operators.
Parties involved	Stakeholders Information bodies Professional associations and companies Private citizens
Phases and timeframe	2008 1, 2 2009 3.
Financial resources	Funds to be raised by Stakeholders and private funds
Expected results	Dissemination of information and raising awareness among the general public of the Values of the Site Dissemination of information and increase of raising awareness of development projects of the Territory
Result indicators	Number of articles and services published on the press and broadcast on television Number of radio-television programmes dedicated to the Heritage and development projects of the territory

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 10	ENHANCEMENT OF RAISING AWARENESS ACTIVITIES
Project 10.1	Carrying out of activities to enhance dissemination of Heritage values
Description	The project aims at activating a coordinated series of interventions with the objective of raising awareness among local people of the Heritage and territory values. The activities will envisage the arrangement of scientific-information meetings open to the general public to be held both in Cividale and other sites of the Duchy of Friuli and a guided tour programme for the Heritage. In order to increase knowledge about Cividale within the network, organized tours to other Longobard places of interest will be organized in cooperation with local cultural associations and service Clubs. To this end, first in Cividale and later in Brescia, a meeting of the National Association of Tourist Guides was organized to plan agreements and cooperation projects among the various Italian bodies, while the Rotary Club of Cividale has already undertaken an action for the operational and promotional involvement of Rotary Districts included in the Site. An exchange programme on initiatives (exhibition and seminars) with other sites will favour the dissemination of local specificities and common values of the Heritage.
Actions	<ol style="list-style-type: none"> 1. Intensification of coordination between local bodies and cultural associations in order to prepare an annual schedule dedicated to the promotion of the Heritage. 2. Definition of exchange programmes for public awareness initiatives (meetings, seminars, exhibitions, visits) with other places included in the network and other Longobard places of interest in Italy and in the European geocultural corridor. 3. Preparation of an annual schedule for meetings involving the general public and business categories. 4. Continuation of the meeting programme in the context of the “Longobard Days” organized by the Municipality of Cividale del Friuli. 5. Preparation of an annual programme of scientific-information meetings on the

	<p>relation between the Longobards and the territory.</p> <ol style="list-style-type: none"> 6. Planning of meeting in the various sites of the Territory. 7. Planning of seasonal cycles of guided tours to the Heritage. 8. Organization and promotion of tours to enhance knowledge about the other properties of the Site. 9. Arrangement of information exhibitions on the Heritage
Parties involved	<p>Municipality of Cividale del Friuli Province of Udine Region Friuli Venezia Giulia Parish Santa Maria Assunta Superintendences of Friuli Venezia Giulia International Centre for Research and Documentation on Early Medieval Art and Architecture Friuli Archaeological Association City Museums of History and Art of Udine Italian Castle Institute (section Friuli Venezia Giulia) Project Promoting Committee of the Patriarchy of Aquileia Cultural Associations and Service Clubs Longobardia Association Cultural and social and young tourism associations Tourist companies Schools National Association of Tourist Guides with regional sections</p>
Phases and timeframe	Starting from 2008; some actions have already been launched.
Financial resources	Euro 20,000 allocated in 2007 Budget of the Municipality of Cividale del Friuli. € 15,000.00, funds at disposal of Municipality of Cividale del Friuli, already allocated by various Institutions like: Crup Foundation, Banca Popolare FriulAdria, Province of Udine.
Expected results	Increased awareness and knowledge of the values of the Heritage
Result indicators	<p>Number of institutions involved Number of carried out initiatives Number of participants in various initiatives</p>

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 10	ENHANCEMENT OF RAISING AWARENESS ACTIVITIES
Project 10.2	Project and carrying out of cultural and economic initiatives
Description	<p>The liveliness of the cultural fabric and local folklore makes it possible to enhance existing initiatives, targeted to the promotion of the Longobard Heritage and to launch studies and planning of a wide range of new initiatives. In particular, public awareness of the heritage should be raised during the local, regional and extra-regional events, by disseminating the features of Cividale and its territory through various public awareness initiatives (stands, meetings, distribution of promotional material). Moreover, new cultural and folk initiatives concerning the heritage and the Longobard history will be studied and carried out. They will contribute to convey local traditions to the general public and promote their dissemination also elsewhere thanks to cultural exchanges with other places of interest or similar sites ("Longobard Initiatives").</p> <p>This will be possible thanks to:</p> <ol style="list-style-type: none"> a) The orientation of cultural associations and local folklore for new initiatives on Longobard culture of Cividale and Friuli b) The promotion of the application for UNESCO Heritage in all major events related to local tradition, folklore and trade c) The study and participation in events organized by other places of the Site and invitation to held them in Cividale too. d) The participation to major promotion events (BIT – International Tourism Exchange of Milan) e) The enhancement of culture and the heritage in the context of the annual events of Mittel Fest which takes place in Cividale.
Actions	<ol style="list-style-type: none"> 1. Orientation of animation activities 2. Coordinated planning of events with companies and cultural bodies 3. Study and implementation of initiatives
Parties involved	<p>Municipality of Cividale del Friuli Province of Udine</p>

Result indicators	Number of institutions involved Number of carried out initiatives Number of participants

AWARENESS BUILDING AND PROMOTION PLAN Cividale del Friuli Territory	
Objective 10	ENHANCEMENT OF RAISING AWARENESS ACTIVITIES
Project 10.3	Promotion of endogenous resources
Description	Like Cividale, the whole territory of the Duchy of Friuli preserves traditional, historical, monumental and archaeological elements which remind of their ancient origin and the Longobard presence. These features are plunged into a rich ensemble of specific elements and traditions (naturalistic, cultural, food-agricultural) which can contribute to the conservation and dissemination of specific aspects and founding local values. The enhancement and use prospects of these aspects are the main elements of the programmes for the widening and promotion of the knowledge of Cividale and its territory. Therefore, dissemination activities on the territorial offer will continue thanks to better information on the initiatives which are carried out and on both cultural and landscape specificities, especially in relation to the enhancement projects linked to the Management Plan of the network "Italia Langobardorum" (see Enhancement Plan, Objectives 9 and 10)
Actions	<ol style="list-style-type: none"> 1. Launch of coordination with associations or other bodies operating on the territory 2. Improvement of information activities on the territory and events 3. Enhancement of dissemination of knowledge about visit routes in the territory ("Longobard Friuli – centres of art and power"; "Paolo Diacono's Castra and the Duchy of Friuli"; The Park of Vine and Wine (see Enhancement Plan, Projects 9.1,2; 10.1) 4. Enhancement of dissemination of visit routes to the landscape heritage and recreational routes (excursions, cycle tracks, horse tracks) 5. Systematic launch of visits and stage 6. Preparation of specific information material 7. Creation and updating of a specific area for the dissemination of existing or planned activities on the Website 8. Organization of events for the promotion of agricultural-productive traditions and typical products 9. Coordination in the promotion of accommodation and rural accommodation facilities
Parties involved	Municipality of Cividale; Superintendences of Friuli Venezia Giulia National Archaeological Museum; Parish of Santa Maria Assunta Project Promoting Committee of the Patriarchy of Aquileia Universities of Udine, Trieste, Padova, Nova Gorica, Koper, Lubjana Technical Agricultural Institute Paolino d'Aquileia of Cividale Regional Education Department; Municipalities of Savogna and Muggia Municipalities of Koper and Litveč (Slovenia) Municipalities included in regional Longobard itineraries UNESCO Club of Udine International Centre for Research and Documentation on Early Medieval Art and Architecture Friuli Archaeological Association; City Museums of History and Art of Udine Italian Castle Institute (section Friuli Venezia Giulia)

Project 12.3	Production of new merchandising products on the Longobards
Description	<p>Over the course of 2008, new museum merchandising items connected to Longobard symbols and works of art (cups, necklaces, magnets, ties, paper holders, pins) will widen the offer of the Santa Giulia museum book-shop for an ever increasing promotion of the museum.</p>
Actions	<ol style="list-style-type: none"> 1. Design 2. Partnership research 3. Realisation
Parties involved	Brescia Museums Foundation
Phases and timeframe	Realisation by June 2008

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

Financial resources	Merchandise consigned
Expected results	Further distribution of images linked to Longobard artistic culture
Results indicators	Number of acquisitions

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 12	INCREASE IN ACTIONS OF COMMUNICATION
Project 12.4	Fostering promotion through the use of more means of advertisement
Description	The Brescia Museums Foundation press office which works permanently on promoting the site, with the objective of reaching an ever increasing number of users, started up new collaborations with the mass media: with journalistic and sector newspapers on a national and international level, with television programmes both local and national and divulgation through new dynamic means of publicity
Actions	The actions below are given as an example: <ol style="list-style-type: none"> 1. Publication of a wide service on the domus of Ortaglia in the English magazine "Archaeology" by Judith Harris; notification in the French guide "Cities of Art in the North of Italy" by Francesca Mariath showing the site www.bresciamusei.com; 2. Conveyance of promotional material through the national newspapers La Repubblica and Corriere della Sera; 3. The archaeological area of the site was presented in two parts in the programme "ATLANTIS: Stories of men and Worlds" transmitted by the national broadcaster LA7; from the month of January the local television "Teletutto" will show in-depth programmes on culture in the high evening and on other museums in the city; 4. Transmission of the video Cross of Desire on screens inside Brescian taxis
Parties involved	Municipality of Brescia Brescia Museums Foundation
Phases and timeframe	<ol style="list-style-type: none"> 1. Publication by June 2008 2. First intervention on LA7: 8 October 2007/ Second intervention: 23 December 2007/from January on TELETUTTO 3. In progress
Financial resources	No financial intervention
Expected results	Promotion of the site on a local, national and international level Increase in the number of visitors
Results indicators	Number of visitors to the site following these interventions

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 12	INCREASE IN ACTIONS OF COMMUNICATION
Project 12.5	Organisation of exhibitions
Description	Temporary exhibitions organised both by Civic Museums and the Brescia Museums Foundation, as well as third parties, take place in sequence throughout the year, valorising the cultural offer of the museum. In a particular way the Municipal Administration approved the Brescia project for the period 2004-2008. The Splendour of Art, consisting in the realisation of a series of exhibitions of great importance and recall organised by an external company appointed by the Brescia Museums Foundation.
Actions	Realisation of exhibitions: <ol style="list-style-type: none"> 1. "America! Painting stories from the New World" (24 November 2007- 4 May 2008) 2. "A treasure of Celtic people in the plains north of the Po. The drachma of Manerbio" (1 December 2007-4 May 2008) 3. "Cardinal Maria Querini. A collector in Brescian in the Seventh century between antiquity and erudition" (until 2 June 2008); 4. International Biennial of Photography (June-September 2008) 5. "Works from private art collections" from Autumn 2008
Parties involved	Municipality of Brescia Brescia Museums Foundation CAB Foundation CAB Linea d'Ombra
Phases and timeframe	During the year 2008

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

Financial resources	Total cost: €7,000,000.00 Resources allocated by the Municipality of Brescia, Brescia Museums Foundation, CAB Foundation, Linea d'Ombrà and private sponsors
Expected results	Increase in the cultural offer and in the number of visits to the site
Results indicators	Number of visitors coming to the site following these interventions

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 13	ORGANISATION OF EVENTS AT THE SITE
Project 13.1	Event "Feast of Santa Giulia"
Description	<p>Having arrived at its seventh edition in 2007, the Feast of Santa Giulia is a unique opportunity for visitors to meet in the Museum and in its district. Several appointments are included which take place on a weekend: exhibitions, didactic visits and topical routes in Santa Giulia museum for adults and children; theatrical and musical shows which entertain during the dinner served in the striking setting of the Monastery; historical evocations for a dive into the past of the monastery; the exhibition of Santa Giulia which is displaced around the streets of the district of the Museum offers an opportunity to get to know the museums of Lombardy, local craftsmanship and oenogastronomic and garden flower products.</p> 
Actions	<ol style="list-style-type: none"> 1. Design of the event 2. Communication of the event 3. Realisation of the event
Parties involved	<p>Municipality of Brescia Brescia Museums Foundation CAB Foundation Museum bodies and local producers participating in the exhibition</p>
Phases and timeframe	A weekend between the end of May and beginning of June 2008
Financial resources	Total estimated cost: €30,000.00 Resources allocated by the Brescia Museums Foundation and CAB Foundation
Expected results	Increase in use of the Museum on the part of citizens
Results indicators	Number of visitors; number of participants in the exhibition

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 13	ORGANISATION OF EVENTS AT THE SITE
Project 13.2	"Discover Brescia" project
Description	The "Discover Brescia" project, created in 2006, with a programme formulated of several initiatives, foresaw the insertion of a specific itinerary on the presence of the Longobards in Brescia in the 2007-2008 edition, with the organisation of a guided tour to the church of San Salvatore and to the Early medieval section of the Santa Giulia museum.
Actions	<ol style="list-style-type: none"> 1. Project conception and activation 2. Conception of a specific plan of communication 3. Project start-up
Parties involved	Municipality of Brescia Brescia Museums Foundation AGTA (authorised tour guide associations) City cultural associations
Phases and timeframe	From October 2007 to April 2008
Financial resources	Total cost: approx. € 56,000.00 Funds set by the marketing plan office of the Municipality of Brescia
Expected results	Involvement of Brescian citizens and tourists staying in the city for the exhibition "America! Painting stories from the New World" set up at Santa Giulia Museum
Results indicators	Number of participants in the initiative

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 14	USER RETENTION
Project 14.1	Implementation of the "Desiderio card" project
Description	In order to increasingly promote the museum heritage of the city, particularly the Santa Giulia Museum, Brescia Museums Foundation is working on the realisation of a museum card, practical and convenient, aimed at establishing loyalty with visitors for whom it will be possible to approach the past every time they wish, having all the time that the works of art require. The "Brescia Museums Club", against a membership fee, allows members free and unlimited visits to Civic Museums and to enjoy special discounts (reductions for tickets to conventional museums), participate in initiatives dedicated to the Club and always be updated on museum activities. Four categories of membership are foreseen: single, family, sponsor and company.
Actions	<ol style="list-style-type: none"> 1. Design of the card typology and management system 2. Activation of agreements with museum institutions in the north of Italy 3. Design of cultural initiatives dedicated to club members 4. Design of a specific plan of communication 5. Installation at ticket offices of management software systems and card readers 6. Start-up of promotional campaigns 7. Realisation of dedicated initiatives
Parties involved	Brescia Museums Foundation
Phases and timeframe	Project in phase of realisation Activation foreseen for the month of April 2008
Financial resources	Estimated total cost: €25,000.00 Resources allocation by the Brescia Museums Foundation
Expected results	Increase in the number of visitors; user retention, involvement of companies and productive realities of the territory so that the site is recognised as a heritage of the whole community; incentivisation of the tourist flow towards Brescia and towards museum site approved by the site
Results indicators	Number of museum card sales

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 15	LONGOBARD ITINERARIES
Project 15.1	Public pathway dedicated to the main Early medieval emergencies
Description	The Early medieval tracks are distributed in a capillary manner within the urban fabric and some of these are visible inside buildings already open to the public for visits. It is a good idea, in order to valorise the remains in the best way, to offer the tourists and visitors in general a topical itinerary which connects all the sites that can be visited and the tracks present in the city (San Salvatore-Santa Giulia; Palazzo Martinengo; archaeological area of Capitolium; Basilica in Labus square, etc.).
Actions	<ol style="list-style-type: none"> 1. Identification of the itinerary 2. Design of common signs which guide the visitor from the main points of the city (station, squares, tourist bus stops) 3. Design of a depliant on the route 4. Realisation of self-guides (MP3 file downloadable from the stakeholders sites) which the tourists can use along the itinerary
Parties involved	Municipality of Brescia, Brescia Museums Foundation, Provincia di Brescia, Bresciatourism
Phases and timeframe	From 2009
Financial resources	To be found
Expected results	Better knowledge of Early medieval historical heritage in the city
Results indicators	Number of tourists following the proposed itinerary

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory

AWARENESS BUILDING AND PROMOTION PLAN Brescia Territory	
Objective 17	PROMOTION OF AWARENESS ON THE ARCHAEOLOGICAL AREAS, MONUMENTAL EMERGENCIES, ARCHAEOLOGICAL FINDINGS CONSTITUTING THE NETWORK OF LONGOBARD BRESCIAN SITES
Project 17.3	Exhibitions on the craftsmanship in the Longobard era in Brescia and the sites of the territory
Description	<p>The recent urban archaeological digs and those in the territory have uncovered numerous Longobard relics originating above all from necropoli, which allow the main characteristics of Early medieval craftsmanship in the area of Brescia to be traced using a significant sampling. This consists mostly of ceramics decorated 'a stralucido', a very shiny effect and imprinting, finely decorated bone objects, metals with precious damascening. In some cases some of the production structures were also fine. The intention is therefore to dedicate an exhibition to these findings, divided into two showcase sites, one for remains found in the city and one for those found in the territory, rich with didactic apparatus and informative tools which allow the technique and profound ability of the Longobard craftsmen to be understood.</p> 
Actions	<ul style="list-style-type: none"> Selection of findings and contexts Ordering project Compilation of the didactic-informative apparatus Set up of the two exhibition sites
Parties involved	<ul style="list-style-type: none"> Province of Brescia Municipality of Brescia Ministry for Assets and Cultural Activities Regional Management for Cultural Assets and Landscapes of Lombardy Superintendency for Archaeological Assets of Lombardy CAB Foundation
Phases and timeframe	Spring 2008
Financial resources	Total cost about 40,000 Euros, divided among the subjects involved
Expected results	Distribution of knowledge on the Longobard contexts in the city and province and the artistic techniques of the Longobard people.
Results indicators	About 50 findings studied and restored; number of visitors

DETAILED SCHEDULES**

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 18	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 18.1	Study and creation of new informational materials and actions to involve schools and tourism
Description	Project and establishment of cooperation between FAI (Italian Environmental Fund) and the Lakes library system, for the promotion of joint actions in the field of communication, promotion and distribution of material concerning cultural events, in particular events dedicated to children. This agreement – which, as experimental cooperation project, recently envisaged that the Library system be included in one of the big events organized by FAI for children – is particularly important in relation to the natural tendency of the Monastery of Torba for hosting youth-oriented events. In May 2007 the experimental event “A day in the Middle Ages” saw the participation of more than 1,000 visitors.
Actions	1. Enhancement of initiatives already experimented in 2007 2. Creation of new youth-oriented initiatives
Parties involved	FAI (Italian Environmental Fund) Lakes library system School institutes and complexes
Phases and timeframe	2008 1, 2 Repetitive annual initiatives
Financial resources	Euro 10,000 Funding: FAI, regional, provincial funds
Expected results	Involving young people in enhancing knowledge of the Site and Longobard culture
Result indicators	Number of launched initiatives Number of classes involved Number of school visits

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 18	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 18.2	Study and implementation of artistic initiatives
Description	The Project “Beyond stage” (only experiment in Italy promoted by the Region Lombardy in cooperation with the Provinces of Bergamo, Brescia, Como, Cremona, Lecco, Lodi, Pavia, Sondrio, Varese and a large number of municipalities and with the support of AGIS- Italian Show Business Association) aims at promoting – also benefiting students of schools of any kind and level – events which usually concern only metropolis areas, thus proving that investing in culture is fruitful and is a source of development for the local economy. “Beyond stage” promotes language pluralism, experimentation, contamination of visual art and performing arts in theatres but also in non-conventional places, thus discovering and letting others discover places and historical buildings, parks and waterways, industrial archaeological buildings and archaeological sites. Within the Project, three archaeological areas have been identified as fascinating venues for theatre and music events on the occasion of the Heritage European Days. One of these is the area of Castelseprio, which will host the initiatives and thus attract a heterogeneous group of people composed by teachers, students, well-read people.
Actions	1. Preparation of the 2008 schedule for “Beyond stage” (coordinated by the Region Lombardy) 2. Layout of the site of Castelseprio-Torba 3. Involvement of schools and education bodies in general
Parties involved	Region Lombardy Province of Varese FAI (Italian Environmental Fund) Superintendences Municipality of Castelseprio Schools Universities
Phases and timeframe	2008 1, 2, 3

DETAILED SCHEDULES**

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 19	ENHANCEMENT OF PUBLIC AWARENESS ACTIVITIES FOR ADULTS
Project 19.2	Enhancement of targeted relations with the media
Description	The Project envisages the involvement of various information bodies and regional media for the dissemination of information linked to the initiatives which will be implemented at different levels of interest: from knowledge, conservation, and enhancement to the promotion of the Longobard heritage. Information must be enhanced both through targeted initiatives according to the events which will be organized and through periodical information which contribute to arouse and cultivate interest in the Longobard heritage and the projects related to it.
Actions	<ol style="list-style-type: none"> 1. Launch of permanent relations with Information bodies and regional and national media in order to create an illustrative "bulletin" (also online) on the initiatives and the progress of knowledge. 2. Study and implementation of initiatives and targeted events dedicated to information, such as press conferences, interviews to Stakeholders, 3. Organization of tours dedicated to information operators 4. Thematic national competition for information operators
Parties involved	Stakeholders Information bodies Business associations and companies Private citizens
Phases and timeframe	2008 1, 2 2009 3, 4
Financial resources	To be raised– Funds by Stakeholders and private citizens or companies
Expected results	Dissemination of information and raising public awareness on the values of the Site Dissemination of the information and raising public awareness on the development projects of the Territories
Result indicators	Number of articles and reports published in the press and broadcast on the television Number of radio-television programmes dedicated to the Heritage and development programmes on the Territory

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 19	ENHANCEMENT OF PUBLIC AWARENESS ACTIVITIES FOR ADULTS
Project 19.3	Promotion activities of FAI (Italian Environmental Fund) for the Monastery of Torba
Description	<p>With the direct presence of 18 Italian regions and almost 100 Delegations, FAI (Italian Environmental Fund) plays a fundamental role in the dissemination on a large scale – beyond the objectives of the Fund – of the promotion programmes which are annually prepared to raise awareness of the general public on the values of the property and in particular of the artistic-monumental properties of great prestige, like the Monastery of Torba.</p> <p>The scientific material concerning the property of Torba is spread through all other properties of FAI around Italy and any institutional promotion action of the Fund. Along with the specific material of Torba, the property is included in the illustrative collections of FAI Properties.</p> <p>Complete information relative to the Monastery and events here organized are available on the institutional website of FAI; specific articles concerning the property areas also included in the institutional newsletter of FAI sent to around 72,000 users and within the newsletter distributed to all 75,000 members.</p> <p>Special attention is given to the events - specific material is produced in various formats (A3 posters, pictures, brochures) which will be distributed in the area and in the sites included in FAI. The leaflet "FAI meetings" is published three times a year (spring, summer, autumn) and is dedicated to the spread of the event schedule organized in all FAI properties.</p>
Actions	<ol style="list-style-type: none"> 1. Planned information, public awareness and promotion actions within the

	institutional activities of FAI
Parties involved	FAI (Italian Environmental Fund) National public institutions Schools of any kind and level
Phases and timeframe	2008 1 The action is annually reposed according to the methods established each time
Financial resources	FAI funds according to annual budget allocations
Expected results	Dissemination of information and raising awareness of the artistic-monumental Heritage of FAI and, specifically, of the site of Castelseprio-Torba
Result indicators	Number of publications distributed at national level Number of scheduled initiatives Number of visitors to the Monastery of Torba

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 20	ENHANCEMENT OF TOURIST PROMOTION INITIATIVES
Project 20.1	Study and subscription of agreements with tour-operators
Description	This Project of FAI (Italian Environmental Fund) is structured – in parallel with the direct socio-economic development action carried out through the Information Office of Malpensa of the Province and the Chamber of commerce of Varese (see <i>Socio-Economic Development Plan Castelseprio, Objective 2 Project 2.3</i>) – on two main strategies: the first is dedicated to an international audience; the second dedicated to tour operators. Actions to be developed in agreement with local stakeholders of “ <i>Italia Langobardorum</i> ”
Actions	<ol style="list-style-type: none"> 1. Study and enhancement of communication strategies and targeted promotion of the site and events here organized dedicated to an international audience 2. Monitoring of large tour operators and launch of agreements for the drawing up of specific advantageous agreements
Parties involved	Stakeholders of “Italia Langobardorum” Network management body Province of Varese Region Lombardy Private citizens and companies
Phases and timeframe	2008-2009 1,2 Annual repetitive actions
Financial resources	To be defined– Funding: Stakeholders, private funds
Expected results	Insertion of visit proposals to the site in the widespread catalogues of large tour operators Increase in the number of visitors
Result indicators	Number of articles in specialized catalogues of international tour operators Number of visitors involved on the basis of the agreements

**8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 20	ENHANCEMENT OF TOURIST PROMOTION INITIATIVES
Project 20.2	Implementation of the international project “Nature and Culture in a part of Insubria”
Description	<p>The Monastery of Torba was included in the <i>product</i> “Nature and culture in a part of Insubria”, which was the result of the multiannual project of Interreg IIIA “Naturalness and communication in the Contado del Seprio” between Italy and Switzerland, which envisaged – among other things – the creation of tourist packages aimed at the development and promotion of local areas as possible destination for tourism flows.</p> <p>The Monastery of Torba will therefore become part of the tourist circuits of the Canton Ticino and inland Switzerland, also thanks to the promotion of the package within specialized fairs organized in the abovementioned areas.</p>
Actions	1. Preparation of four cross-border tourist packages with a focus on the Monastery of Torba and Castelseprio
Parties involved	FAI (Italian Environmental Fund) Municipality of Castiglione Olona Tourist Office of Mendrisiotto and Basso Ceresio Vienord Park Authority of Lanza Valley Association of the Valmorea Railway Friends Club Association of San Gottardo Rile Tenore Olona Park
Phases and timeframe	2008 under way
Financial resources	Euro 35,000 - Funding: EU (Interreg III A), FAI and other project stakeholders funds
Expected results	International promotion of the site Increase in tourist flows
Result indicators	Number of organized groups adopting tourist packages Number of visitors coming from Switzerland

AWARENESS BUILDING AND PROMOTION PLAN <i>Castelseprio-Torba Territory</i>	
Objective 20	ENHANCEMENT OF TOURIST PROMOTION INITIATIVES
Project 20.3	Tourist promotion “Welcome to Lombardy: the Land of FAI Treasures - The values of Torba-Castelseprio”
Description	<p>Starting from 2006, FAI (Italian Environmental Fund) launched a tourist development project aimed at enhancing its properties as integral part of corresponding local areas. The Project is based on a new way of understanding the concept of <i>incoming</i> tourism: attention is focused not on single services offered in the area (hotels, cultural attractions, sport, etc.), but on the geographic area in its entirety and ability to offer an integrated group of properties and tourism services which could be sold as “products”.</p> <p>The enhancement of FAI properties, as tourism catalysts also aims at attracting more visitors to the areas, but also direct them to benefit from the complementary services provided by other bodies present in the area, like catering services (local food and wine offer), visit to the local consortium’s cellars with tasting and purchase of souvenirs, typical products or other, participation in events organized by local associations and tourist offices.</p> <p>The specific project “Welcome to Lombardy: the Land of FAI Treasures” where an eminent role is given to the Heritage of Torba-Castelseprio is also significant in this context.</p>
Actions	<ol style="list-style-type: none"> 1. Meetings with regional, provincial and local administrators 2. Organization of specific <i>educational programmes</i> for journalists, PR, communication, marketing and event managers 3. FAI Catalogue for Lombardy now being developed 4. Direct presence in the main fairs related to tourism (BIT, GLOBE, TTG, TTI, WTM, etc...),

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

Parties involved	FAI (Italian Environmental Fund) – section Lombardy Stakeholders Network management body Private citizens and companies
Phases and timeframe	2008-2009 1, 2, 3, 4
Financial resources	To be defined– Funding: FAI (Italian Environmental Fund), Stakeholders, private funds
Expected results	Improvement of raising awareness and promotion at national and international level
Result indicators	Number of contacts with local administrators, media representatives, tourist operators Number of news and television reports

AWARENESS BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 21	INCREASE THE NUMBER OF PROMOTIONAL ACTIVITIES CONNECTED WITH THE SITE
Project 21.1	CISAM realization of a slip-case on San Salvatore
Description	The project focuses on the realization of a three-volume slip-case: the first one with the anastatic reprint of the study by Salmi on San Salvatore; the second one with the most significant literature on San Salvatore; the third one with a short essay by architect Renzo Pardi on San Salvatore.
Actions	<ol style="list-style-type: none"> 1. Collecting and elaborating materials to publish 2. Realization of the three volumes and of the slip-case 3. Promoting and spreading the publication, either through the publishing channels of the CISAM Foundation and the website www.cisam.org and through the organization of a study day or a round table for the presentation of the publication 4. Communication of the publication and related actions, through banner to post on the institutional website with links to websites of the other institutional parties <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p style="text-align: center;">Palazzo Ancaini, today housing the seat of CISAM</p>
Parties involved	Foundation CISAM; Foundation Cassa di Risparmio di Spoleto; Municipality of Spoleto
Phases and timeframe	Within 2008
Financial resources	Estimated costs € 40.000,00 to be raised through the involved parties, public and private sponsors
Expected results	Sale of the slip-cas thourgh traditional channels and thourgh the website www.cisam.org Increase of visits to the institutional website Higher attention to all scientific activities of the Foundation CISAM
Results indicators	Realized number of copies of the publication Web stats for the website www.cisam.org

AWARENESS BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 21	INCREASE THE NUMBER OF PROMOTIONAL ACTIVITIES CONNECTED WITH THE SITE
Project 21.2	1 st Congress "Italia Langobardorum (568-774)"
Description	The action focuses on the organization of a congress, to which the major scholars of thematic related to the Longobard heritage in Spoleto will be invited (professor Judson Emerck, William Thopre, Carola Jaeggy). During the congress, the conservation works of the conventual buildings close to San Salvatore and the adjustments of the area around the church (as per Protection and Conservation Plan) will be presented. The planning of an exhibition of drawings and surveys of the buildings is also related to the congress (architects Antonio da Sangallo, Francesco di Giorgio Martini, Andrea Palladio, Ireneo Aleandri, Emerich and so on). The congress may represent the starting point for a coordinated series of interventions of awareness building on the Longobard heritage and on the whole network "Italia Langobardorum". Other congresses and scientific-divulging meetings may follow, to be organized in all places of the network.
Actions	<ol style="list-style-type: none"> 1. Gathering and elaboration of the material to publish for the congress 2. Organization of the congress 3. Organization of the exhibition 4. Promotion and spreading of the initiative through all channels of the network
Parties involved	Municipality of Spoleto, Foundation CISAM, public and private bodies to be identified
Phases and timeframe	Within 2008
Financial resources	€ 10.000,00 to be raised through the involved parties and public and private sponsorships
Expected results	A higher awareness of the citizens not only for the candidacy project
Results indicators	Number of partecipants

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 21	DEVELOP PROMOTIONAL ACTIVITIES
Project 21.3	Implementing ad hoc educational for tour operators and journalists from the tourist-cultural sector; assistance to journalists and Radio TV crew members
Description	Independently, but also in collaboration with the various ENIT offices in the world, with Agenzia di Promozione Turistica of the Region of Umbria, and with Consorzio Conspoletto of the tourist operators of the district territory, a number of educational are organized for single journalists, or for groups of journalists, both Italian and foreign, from the tourist – cultural sector, as well as for Italian and foreign tour operators.
Actions	<ol style="list-style-type: none"> 1. Organization of educational; 2. Follow-ups also to obtain feedback, in the case of journalists, on the published editorials
Parties involved	Municipality of Spoleto, Campello sul Clitunno, Castel Ritaldi and Giano of Umbria. Staff of the Servizio Turistico Associato, Staff of the Consorzio Conspoletto, Cooperativa Sistema Museo
Phases and timeframe	2008 and subsequent years
Financial resources	To be defined. The financial resources are not presently quantifiable, and will be proportional to the number of educational that will be proposed by ENIT, Agenzia di Promozione Turistica of the Region of Umbria and other subjects, including those directly concerned. Depending on their value, a selection will be made of those which will be most useful within an effective and targeted (Longobard heritage) promotion of the territory
Expected results	<p>Double results are expected at the promotional level.</p> <ol style="list-style-type: none"> a) As regards the educational reserved for tour operators, we are expecting an increase in the number of proposals of trips to Umbria and, in particular, to Spoleto, entered into the catalogue produced by them on a yearly basis. b) As regards the educational for the press, we are expecting more space reserved for Spoleto (with particular attention to the UNESCO candidature within Italia Langobardorum) both in the national and in the foreign tourist guides, which are updated on a periodical basis by the journalists assigned by the various publishing companies, and in the press agencies of the journalists who request assistance in order to develop ad hoc programs on Spoleto
Result indicators	A 10 % increase with respect to the past in the number of educational for each tour operator, and in the number of educational and of single assistance cases for tourist-cultural press journalists

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.1	Studying and implementing accommodation, promotion and awareness raising-related publishing initiatives
Description	The project focuses on the production of information material in a double version: the paper and the virtual formats, the latter through the uploading of the brochure into the official tourist website of the district of Spoleto www.visitspoleto.it . More precisely, it will focus on the publication of an easy-to-read pamphlet – brochure which will provide a description of the various historical and artistic itineraries offered to tourists visiting Spoleto, but also disseminate information on some peculiarities of the monumental and environmental assets of the territory. It will be supported by the Museo Nazionale del Ducato of Spoleto, hosted at the Rocca Albornoziana, which will be the starting point of several itineraries for visiting the district at issue. Particular attention will be dedicated to the presence of Longobard evidence in the territory
Actions	<ol style="list-style-type: none"> 1. Studying and publishing the illustrative brochure of the Museo Nazionale del Ducato of Spoleto and the itineraries connected with the latter 2. Producing and disseminating paper materials and, at the same time 3. Implementing the guide and the itineraries in the official tourist website
Parties involved	Municipality of Spoleto, Servizio Turistico Associato of Spoleto, Cooperativa Sistema Museo, Consorzio Operatori Turistici, Arcivescovado of Spoleto and Norcia, Municipalities of Campello sul Clitunno, Castel Ritaldi and Giano dell'Umbria, Agenzia Regionale di Promozione Turistica, SSIT - Società Spoletina Imprese di Trasporto
Phases and timeframe	Over the course of 2008

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

Financial resources	Municipality of Spoleto € 5,000
Expected results	<ul style="list-style-type: none"> a) Targeted message to tourists and citizens on the historical and artistic peculiarities offered by the Museo Nazionale del Ducato and by the territory; b) Increasing the number of visitors to the Museum; providing an incentive to come to Spoleto specifically to visit the Museo del Ducato and related itineraries, including those connected with Italia Langobardorum
Result indicators	<p>Number of printed publication copies</p> <p>Contact numbers entered into the website www.visitspoleto.it</p> <p>Percentage of variation of visits to the Museo Nazionale del Ducato</p>

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.2	City course on the subject of Longobard culture with closing tasting of food products
Description	<p>Publication of an easy-to-use illustrative fold-up brochure of the city itinerary, with the aim to highlight monuments and Longobard finds. Such itinerary will start from the Museo Nazionale del Ducato of Spoleto (hosted by the imposing 'albornoziano' castle) and will guide you through, respectively: Palazzo Mauri (wonderful mosaics), Palazzo Pianciani (finds), Church of San Salvatore, and return to the historic centre at Palazzo Leti – Sansi (palazzo of excellencies and of typical products, for food tasting). The closing tasting will probably be held at the typical pastry shop of Spoleto, which offers two kinds of pastries of Longobard origin: the Attorta (a sort of Strudel with some variants) and the Crescionda (cake made with chocolate, biscuits and milk).</p> <p>In agreement with the Municipal administration of Campello sul Clitunno, it will be possible to extend the Longobard circuit illustrated in the folder by including, also, the Tempietto del Clitunno, which is only 12 km away from Spoleto, and which is part of the Italia Langobardorum project</p>
Actions	<ul style="list-style-type: none"> 1. Examining the folder 2. publishing and distributing the latter 3. stipulating agreements with private entities and, if possible, organize tastings of Longobard food products
Parties involved	Municipality of Spoleto, Servizio Turistico Associato of Spoleto, Associazione Commercianti and, if possible, also other trade associations
Phases and timeframe	Starting from 2008
Financial resources	To be defined
Expected results	Greater attention on the part of the indigenous people and foresters to monuments and Longobard finds in the Spoleto territory
Result indicators	At least 15% increase on a yearly basis of the number of visits to the Longobard sites in the territory

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.3	Outsourcing the management of the IAT tourist information and accommodation office, offering extended working hours and a wider range of services
Description	The municipal administration of Spoleto and of the other municipalities of the district, that is, both of Campello sul Clitunno, Castel Ritaldi and Giano dell'Umbria, have planned to outsource the IAT tourist accommodation and information office to a subject yet to be identified through ad hoc tender
Actions	<ul style="list-style-type: none"> 1. resolution by the Council of the Municipality of Spoleto 2. resolution by the Municipal councils of Spoleto, Campello sul Clitunno, Castel Ritaldi and Giano dell'Umbria 3. Tender and related regulations 4. Awarding of contract
Parties involved	District municipalities: Spoleto, Campello sul Clitunno, Castel Ritaldi, Giano dell'Umbria; potential subjects participating in the future tender; Servizio Turistico Associato of Spoleto
Phases and timeframe	Year 2008
Financial resources	To be defined, based on the instructions that each single Municipality will provide through

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	their own official deeds
Expected results	Extended working hours for the IAT Tourist Information and Accommodation Office, expanding the range of services offered to tourists and citizens thanks to the merchandising of tourist, multimedia, editorial, and typical products. Some products will concern the Italia Langobardorum project, such as the ad hoc Brochure, DVD, etc. The outsourcing of the IAT front office should allow for greater flexibility in the management of the latter
Result indicators	Increasing the number of opening hours (an average of 3 additional hours) of the IAT Front Office; merchandising of several dozens of various products as shown above

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.4	Planning of communication activities for the dissemination of knowledge of the Longobard heritage, through various information channels
Description	The project requires the involvement of various information agencies, and of the regional and national "media" for the dissemination of information connected with the entire set of initiatives that will be developed at the various levels of interest: knowledge, preservation, awareness-raising and promotion of the Longobard heritage. The aim is to increase the effectiveness of information both through targeted initiatives based on the events that will be organized, and through periodical information that will contribute to promoting and nourishing interest in the Longobard heritage and in the projects connected with the latter
Actions	<ol style="list-style-type: none"> 1. Establishing solid relations with the information agencies: TV, radio and regional and national newspapers, with the aim to promote and disseminate information on the promoted initiatives and on the state of progress of the awareness-raising, value-enhancement and knowledge-related projects. 2. Creating and developing television formats to be developed in synergy with the local broadcasting stations, with the aim to promote the activities related to the Italia Langobardorum project 3. Information and project promotion activities in synergy with the regional and local information portals, with the aim to create ad hoc theme sections dedicated to the history of the Longobards in our territory. The information can be spread through interviews (also audio and/or video interviews), editorials, periodical in-depth studies of a historical-cultural nature. 4. Studying and implementing targeted initiatives and events dedicated to the sphere of information, such as press conferences and interviews with Stakeholders. 5. Carrying out an editorial project, published as a supplement to the periodical "Città Comune" (heading duly registered at the Court of Spoleto) which will also be developed on the net through the set up of an information portal, linked to the institutional website www.comune.spoleto.pg.it, and to the one on the net www.italialangobardorum.it, dedicated to the Longobard Spoleto, through which it will be possible to disseminate the history of the Longobards in our territory, the "treasure" that we have inherited, and the promoted initiatives 6. Organization of tours dedicated to information operators
Parties involved	Stakeholders; Information agencies; other communication channels
Phases and timeframe	Points 1 – 2: 2008 Point 3: 2009
Financial resources	Funds to be collected from Stakeholders and private entities
Expected results	Disseminating information and raising awareness of public opinion about the Value of the site and the connected development for the Territory
Result indicators	Number of articles and reports published in the press and broadcasted on TV Number of radio and television programs dedicated to the Heritage and to the projects related to the development of the territory Number of visits to the website dedicated to the Longobard Spoleto

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.5	Improving technological systems in order to exploit assets via the internet
Description	<p>The project includes the set up of a specific space dedicated to multimedia illustration through the use of a continuous cycle video, both through the various information materials of the "Italia Langobardorum" Network and through Spoleto.</p> <p>This is a Spazio Multimediale di Orientamento al Patrimonio housed by the Visitors Centre, located inside the former Monastery adjacent to the Basilica of San Salvatore (see Enhancement plan).</p> <p>As regards Spoleto, information on the history of the assets connected with the Longobard heritage will be provided – as well as on the history in general of the cities – on the characteristics of the territory, on the important sites for visits and alternative cultural itineraries (for example, the Wine and Food Center, Spoleto Tipica project and "Italia Langobardorum" Brand, see social economic development plan objectives 5 and 6), on the initiatives related to cultural, social and economic, and naturalistic entertainment.</p>
Actions	<ol style="list-style-type: none"> 1. Project and implementation of multimedia programmes and material 2. Opening of the Multimedia Space
Parties involved	Municipality of Spoleto, Superintendence for the Architectural Assets, the Landscape, and the Historical, Artistic and Ethnic-anthropological Heritage of Umbria (BAPPSAE)
Phases and timeframe	Starting from 2009
Financial resources	Funds to be collected from the budget of the Municipality of Spoleto, from the Region of Umbria, from the Ministry of University and research, and from the superintendence BAPPSAE of Umbria
Expected results	<p>Offering visitors an organic system providing access to the Heritage and guidance.</p> <p>Incentive to visit other tourist-cultural spheres of the territory</p> <p>Incentive to visit other places of the "Italia Langobardorum" Site</p>
Result indicators	<p>Number of contacts activated</p> <p>Number of planned visits starting from the Visitors Centre</p>

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 23	TOURIST PROMOTION OF THE TERRITORY
Project 23.1	Participation in trade show events and initiatives mainly in the national and foreign markets
Description	<p>Participating in various initiatives and tourist fairs such as the WTM – World Trade Market of London, the Salon des Vacances of Paris, promotional action in Charleston – South Carolina (USA), and other actions in London for accommodation of University and non-University student groups. In Charleston, in the month of May, the signing of the twinning pact with the city of Spoleto, which share the Spoleto Festival (Spoleto) and the Spoleto Festival USA (Charleston), both cities were founded by the maestro Gian Carlo Menotti. The promotion of Spoleto's candidature within the Italia Langobardorum project will be systematically carried out in all the promotional events in which they will directly or indirectly participate</p>
Actions	<ol style="list-style-type: none"> 1. Organization, in collaboration with the Agenzia di Promozione dell'Umbria and the trade Associations of the Spoleto and Umbria territory, of a promotional initiative in Charleston, a city in South Carolina (USA). 2. Continuation of the initiative with a number of subjects from London, aimed to organize language, culture and Italian literature courses in Spoleto, including the opportunity to enjoy tourist itineraries among which, one related to Longobard art. 3. Participation in trade shows in London (WTM), Paris, and Berlin (ITB); 4. Signing of the twinning pact between Spoleto and Charleston in the month of June 2008, which will constitute an important platform for the tourist promotion of Spoleto and Umbria in the USA
Parties involved	Municipality of Spoleto, Consorzio Operatori Turistici of Spoleto "Conspoletto", Fondazione Cassa di Risparmio of Spoleto, Mayor Joseph Riley Jr various subjects of Charleston SC (USA), tourist operators of London; ENIT offices in London and New York
Phases and timeframe	<p>Charleston SC (USA) last week-end in March 2008;</p> <p>signing of the twinning pact in Charleston : June 2008;</p>

	Spoletto: July 2008; London all year
Financial resources	In synergy with the Consorzio Operatori turistici of Spoleto "Conspoletto": approx. 80,000.00 € allocated for promotional activities for the year 2008
Expected results	Increase the effectiveness of promotional actions especially with regards to the Anglo-Saxon market (USA and GB)
Result indicators	Two events in Charleston (promotional initiative held in March and in June 2008); expected increase of presence of Americans in South Carolina (estimated at 20% increase) in the district territory

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 23	TOURIST PROMOTION OF THE TERRITORY
Project 23.2	Tourist accommodation and promotion of the territory through the organization of artistic and cultural events of significant depth
Description	 <p>Organization of artistic and cultural events which have strongly characterized and still strongly characterize the significant cultural and artistic vocation of the city of Spoleto.</p> <p>For more than 60 years, Spoleto has held the Stagione del Teatro Lirico Sperimentale di Spoleto (62nd edition in 2008) and, in particular, this year the Festival dei Due Mondi will be re-launched in its 51st edition. For many years, it has been the most important cultural and artistic Italian initiative, and it is the ambition of the city and of the Ministry for Cultural Assets and Activities that it soon regains its past splendor. From a more strictly cultural aspect, the 56th edition of the Settimana Internazionale di Studi sull'Alto Medioevo, by CISAM, will be held.</p> <p>Other initiatives of major import include the following: the XVI Stagione Musicale e Musicologia dell'Associazione Culturale l'Orfeo (entire year); the Carnevale di Spoleto (February / March); the Premio Concorso Nazionale "Ercole Oliario" (March); the Settimana Internazionale della Danza (April); the 12th Festival Pianistico di Spoleto (April/May); the Rassegna di Concerti D'Organo (May June); the 3rd Fiera Mercato "Vini nel Mondo" (June); Spoleto Estate (July-September); Stelle Europee del Gusto (September); Frantoi Aperti (November); End of year events (December/January)</p>  <p>Poster of the Festival of Two Worlds 2007</p>
Actions	<ol style="list-style-type: none"> 1. Input of experimental and consolidated initiatives 2. Collaboration with institutions, artists, theatre companies, economic trade organizations, public and private companies 3. System training and information initiatives 4. Setting up relations with other sites 5. Coordinated territorial enhancement Indicators and systems of a high quality level

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	6. Enhancement of the reception facilities and of the wine and food business activities
Parties involved	Institutions, trade associations, public and private companies
Phases and timeframe	Starting from 2008, on a yearly basis (monthly in some cases)
Financial resources	They are not quantifiable, given that the organization of the various events reports to different subjects, both public and private
Expected results	<ul style="list-style-type: none"> a) Increase the quality of the activities and initiatives. b) Activate new resources and collaborations towards shared objectives. c) Increase the national and international tourist flow and the related average term of stay -strengthen the public – private network d) Increase the knowledge of the places and assets connected with the city culture and enhancement of the latter
Result indicators	The expected results are mainly connected to the re-launching of the festival dei Due Mondi: a 30% increase in the sale of Festival tickets versus 2007; a 25 % increase in the number of arrivals and presences connected with the Festival dei Due Mondi; we are also expecting a slight increase in the annual average period of stay, especially during the Festival dei Due Mondi of 2008

AWARENESS-BUILDING AND PROMOTION PLAN Spoleto Territory	
Objective 24	DEVELOP TRAINING ACTIVITIES CONNECTED WITH THE EDUCATIONAL SPHERE
Project 24.1	Projects for increasing knowledge of the Heritage in relation to the sphere of education
Description	<p>The need to raise the awareness of the new generations, and not only them, of a wider knowledge of their own artistic assets has provided the Municipality of Spoleto and the Liceo Classico "Pontano Sansi" with the incentive to execute the "Adotta un monumento" project, established in 1998 with a memorandum of understanding through which the participating students, all volunteers, guarantee in the summer period the opening to the public of important city monuments, among which also the basilica of San Salvatore. The project will be proposed again in a more exhaustive manner with, in addition to the opening shifts, also a guided tour service in different languages.</p> <p>Always within the context of the didactical programming the Istituto d'Arte of Spoleto will offer for the school year 2007/2008 the teaching, for the goldsmith section, of the embossing and chasing methods for creating crosses and jewels of the Longobard type; within the stagecraft section, a three-dimensional wooden model of the basilica of San Salvatore will be built.</p> <p>The Hotel institute will try to raise the awareness of young people by proposing a research study on the food and dishes connected with the Longobard period, as well as the preparation and enhancement of the recipes that, thanks to tradition, have been preserved until today.</p> <p>Other projects concern the dissemination and promotion of knowledge of the Longobard heritage through the organization of school trips targeted towards the assets of the site and of the territory, and the production of information materials for young people.</p> <p>In general, the schools will be involved in all the projects included in the Awareness-raising and Promotion Plan.</p> <p>All the material produced at the various levels will be exhibited at the Conference on the Longobards, which will be organized in 2008 in Spoleto</p>
Actions	<ol style="list-style-type: none"> 1. Adotta un monumento" (Adopt a monument) project 2. Start of didactical initiatives 3. Distribution of the results through the Network
Parties involved	Municipality of Spoleto, Liceo Classico "Pontano Sansi", Istituto d'Arte "L. Leonardi", Istituto Alberghiero, all schools from elementary to high schools, Ufficio Informazione Accoglienza Turistica of the Servizio Turistico Associato of the District, Province of Perugia, Region of Umbria
Phases and timeframe	<p>2008</p> <p>The "adopt a monument" project will be proposed again every school year</p>
Financial resources	Funds to be collected from the Municipality of Spoleto and from public and private entities of the city, the Province and the Region of Umbria
Expected results	Increase the direct participation of young people in the knowledge and promotion of the values of the UNESCO assets
Result indicators	<p>Number of institutes and classes involved</p> <p>Number of organized visits to the Heritage assets and to the territory by the preparation of documents</p> <p>Number of documents and their quality level</p>

**8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

AWARENESS-BUILDING AND PROMOTION PLAN <i>Campello Territory</i>	
Objective 25	EXPANSION OF INFORMATION ACTIVITIES
Project 25.1	Implementation of promotional and awareness-raising publishing initiatives
Description	<p>The project foresees the production of information material about the Temple and the entire territory. These will be new tourist-cultural brochures, maps, specific boards, the updating of tourist signs, all linked to the various initiatives for Optimising the Heritage.</p> <p>The project also foresees the creation of an information point where it will be possible to find illustrative education material needed for a more complete understanding of the area's cultural and environmental values, with particular attention on the area of the River Clitunno.</p>
Actions	<ol style="list-style-type: none"> 1. Study and creation of editorial initiatives for promoting and increasing awareness of the area 2. Production and diffusion of the materials
Parties involved	Municipality of Campello sul Clitunno, GAL (Local Action Groups), Superintendence for the Architectural Heritage, Landscape, Historical, Artistic and Ethno anthropological Heritage of Umbria (SPAPPSAE).
Phases and timeframes	Starting from 2008
Financial resources	Funds allocated: € 40,000.00 based on the Leader Programme + "Terre dell'Olio"
Expected results	Improvement of visibility and knowledge of Heritage Improvement of visitor orientation service
Result indicators	Number of publications and information providing equipment Number of copies printed Number of tourist signs and boards installed

AWARENESS-BUILDING AND PROMOTION PLAN <i>Campello Territory</i>	
Objective 25	EXPANSION OF INFORMATION ACTIVITIES
Project 25.2	Actions aimed at supporting awareness-raising and promotion initiatives
Description	<p><i>Project for a projection room and a video library for the educational and scientific diffusion of the area's cultural and environmental values</i></p> <p>The project foresees the creation of a specific space, found in some sheds currently used for storing materials, for the illustration of multimedia material (video and computer) for the collection and scientific and education diffusion of documentary materials concerning the history and characteristic aspects of the area and its heritage.</p> <p>It will be a useful instrument to divulge the current initiatives of cultural, socio-economic and folklore animation and foreseen for the future in the calendars of activities, in hospitality and catering.</p> <p>The purpose is to provide the visitor with top level knowledge of the site heritage, allowing him to find his way around the general visiting and tourist itinerary system that characterise the proposals for the enhancement and promotion of the heritage itself.</p> <p>The Visitor's Centre will also house other services (authorised guides, bookshop, brochures and maps, multimedia products).</p>
Actions	<ol style="list-style-type: none"> 1. Project and creation of programmes and multimedia material 2. Activation of the Projection Room and Video Library
Parties involved	Municipality of Campello sul Clitunno
Phases and timeframes	Starting from 2009
Financial resources	Part of funds allocated part of the funds issued by the Government further to the 2006 environmental accident (see point 11.5.2. - Conservation analysis), for the reclamation, recovery and overall optimisation of the River Clitunno area: € 6,000,000.00
Expected results	Diffusion of information and increase of awareness in public opinion on Site and territorial values. Diffusion of information and increase of awareness in public opinion on territorial development projects
Result indicators	Number of articles and services published in the press and broadcast on television Number of projections dedicated to Heritage and to territorial development projects

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

AWARENESS BUILDING AND PROMOTION PLAN Benevento Territory	
Objective 26	TO INCREASE AWARENESS BUILDING ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 26.1	Exhibition "Langobardia Minor: Images and documentation from the Duchy of Benevento"
Description	<p>By exhibiting new archaeological data, this exhibition intends proposing a review of the settlement events and the major traces of the Longobard period in Benevento.</p> <p>The exhibition route will be made up of various sections, dedicated to in-depth information on specific topics: Fortifications, religious buildings, necropolises and funerary rites, epigraphic documents, craft activities, and artistic culture. The exhibition will include documents and images from the Duchy of Benevento.</p> <p>The objective is to integrate archaeological data known to date, most of which is exceptionally important but is taken from old finds and is thus out of context, with recently acquired documents that make it possible to put together a new summary of the Longobard domination in Benevento.</p> <p>The exhibition will be held simultaneously at various places in the city centre: In the exhibition halls at the old S. Felice prison, seat of the Superintendency for Archaeological Heritage of Benevento, Avellino, and Salerno, and the ground floor (exhibition space and bookshop) of Palazzo Paolo V, seat of the representative of the Benevento Municipality. The planned date for the event is spring 2008.</p> <p>The running of the Exhibition "Langobardia Minor: Images and documents from the Duchy of Benevento" will be run by the Superintendency of Archaeological Heritage of Salerno, Avellino, and Benevento, and they will see to the scientific management, planning and setting up, in collaboration with the State Archives and BAPPSAE Superintendency of Benevento.</p>
Parties involved	<p>Municipality of Benevento</p> <p>Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento and BAPPSAE Superintendency of Caserta and Benevento.</p>
Phases and timescales	<p>First phase: by 2008</p> <p>Second phase: by 2013</p>
Financial resources	<p>To be found:</p> <p>€ 300,000 from Campania Regional Authority</p>
Expected results	Extension of involvement of all in cultural and training events
Result indicators	Number of visitors

AWARENESS BUILDING AND PROMOTION PLAN Benevento Territory	
Objective 27	IMPROVING CULTURAL PROMOTION ON THE SITE
Project 27.1	Laying out itineraries for the "Via Sacra Langobardorum" archaeological park
Description	<p>Starting with the major sites already known along the route known as the Via Sacra Langobardorum, thematic itineraries will be defined. First of all places of worship will be included, such as the caves dedicated to the Archangel Michael, the bridges for crossing the rivers that have characterised the route since Roman times, following the ancient Via Traiana; the ancient stopping points, and the defence systems and fortifications.</p>
Parties involved	<p>Municipality of Benevento</p> <p>Benevento Provincial Authority</p> <p>Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento and BAPPSAE Superintendency of Caserta and Benevento.</p>
Phases and timescales	<p>First phase: By 2008</p> <p>Second phase: By 31.12.2015</p>
Financial resources	<p>First phase: Funds to be obtained from POR FESR 2007-2013, POR FSE 2007-2013 Campania Regional Authority</p> <p>Interregional Operating Program (POIN) "Cultural, Natural, and Tourist Attractions"</p>
Expected results	Valorisation of the vast area of influence of Benevento.
Result indicators	Number of itineraries planned

AWARENESS BUILDING AND PROMOTION PLAN Benevento Territory	
Objective 27	IMPROVING CULTURAL PROMOTION ON THE SITE
Project 27.2	Implementing the tourist information system – augmented reality
Description	The idea behind the project, using knowledge of the historical archaeological characteristics of some areas of the city, including the extent and depth of archaeological layers, as well as the resulting safeguarding and valorising of the same areas, meets the need to create a tourist system that is currently lacking. The project provides for activating virtual networks to serve the tourist system by using innovative technologies for providing the user with information in situ. This initiative involves creating virtual reality modules that reconstruct the city's monuments in various historical ages as well as the Roman and then Longobard plan of the city. Augmented reality means superimposing a computer generated virtual reality over the reality perceived by the subject, thereby providing additional information on the actual setting. The use of these technologies as tourist services that can be used via optic visors connected to a WiFi network could be based on a high quality database (photographs of all the facades of the buildings in the old city, recently taken by the Benevento Municipality as the basis for the Colour Plan), which, with the help of a GIS tool would make it possible to catalogue in detail the architectural elements on facades, stone fragments built into walls, wall textures, etc – within the ancient city.
Parties involved	Municipality of Benevento Benevento Provincial Authority Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento and BAPPSAE Superintendency of Caserta and Benevento.
Phases and timescales	First phase: By 2008 Second phase: By 31.12.2015
Financial resources	First phase: To be done using "Local development" APQ funds for the feasibility study of the old city in Benevento of € 300,000. Second phase: Funds to be obtained from POR FESR 2007-2013, POR FSE 2007-2013 Campania Regional Authority Interregional Operating Program (POIN) "Cultural, Natural, and Tourist Attractions"
Expected results	Development of the TOURIST INFORMATION SYSTEM
Result indicators	Increase in spaces accessible and useable by tourists. Increase the overall number of visitors

AWARENESS BUILDING AND PROMOTION PLAN Benevento Territory	
Objective 28	INCREASING AWARENESS AMONG CHILDREN OF SCHOOL-GOING AGE
Project 28.1	Research and school teaching and a comic strip exhibition about Benevento in the Longobard era
Description	The creation of a network for studying the Longobard heritage is made up of various initiatives that involve students and experts in didactic lessons and research activities aimed at dealing with important documents and images. Presenting the artistic – cultural history of a city using alternative forms of recounting to canons, such as in the form of comic strips, makes it possible to easily get to users in the school-going age group. "Benevento in comic strips" or "Benevento a history of art" has this very aim. In addition, it has an artistic quality if one imagines developing it with the involvement of artists supported by experts in local history.
Parties involved	Municipality of Benevento Superintendency for Architectural Heritage in the provinces of Salerno, Avellino, and Benevento and BAPPSAE Superintendency of Caserta and Benevento.
Phases and timescales	First phase: by 2008 Second phase: by 2013
Financial resources	POR FSE 2007-2013 Campania Regional Authority
Expected results	Extension of involvement of schools in cultural and training events.
Result indicators	Number of research activities launched. Number of readers reached

AWARENESS-BUILDING AND PROMOTION PLAN Monte Sant'Angelo Territory	
Objective 29	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 29.1	Projects to increase awareness on Heritage in relation to education (from primary schools to universities)
Description	The Project envisages: <ol style="list-style-type: none"> Training of teachers by planning refresher courses on specific topics connected to the Sanctuary of San Michele in relation to the Longobard culture and the heritage of Monte Sant'Angelo and its territory; Annual involvement of students coming from schools of any kind and level of the Provinces of Foggia and Bari in the study of the above-mentioned topics by promoting visits to Monte Sant'Angelo and its territory. Production of specific information material for young people
Actions	<ol style="list-style-type: none"> Carrying out of refresher courses for teachers. Planning cooperation with the schools concerned.
Parties involved	Municipality of Monte Sant'Angelo, Municipalities involved in the itineraries of the via Sacra Langobardorum, Mountain Community of Gargano, University of Bari, Centre for San Michele and Gargano Studies, Schools of any kind and level; regional museum network
Phases and timeframe	2008-2009
Financial resources	Funds to be raised by: Region Puglia; private funds
Expected results	Increase in the direct participation of young people in knowledge and promotion activities on UNESCO Heritage values
Result indicators	Number of schools and classes involved Number of organized visits to the properties of the Heritage and territory to prepare papers

AWARENESS-BUILDING AND PROMOTION PLAN Monte Sant'Angelo Territory	
Objective 29	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 29.2	Development of didactic and experimental activities
Description	The enhancement of information at university level requires the establishment of thesis competitions with special reference to the topics related to the Longobard heritage and territory
Actions	<ol style="list-style-type: none"> Choice of topics
Parties involved	Municipality of Monte Sant'Angelo, University of Bari, Centre for San Michele and Gargano Studies
Phases and timeframe	2008-2009
Financial resources	To be defined for every single project – Funding: municipal, provincial, regional, private funds
Expected results	Better knowledge and participation of young people in the promotion activities of the Heritage and its territory
Result indicators	Number of institutions involved Number of carried out initiatives Number of participants Number of targeted publications and printed copies

AWARENESS-BUILDING AND PROMOTION PLAN Monte Sant'Angelo Territory	
Objective 30	ENHANCEMENT OF INFORMATION AND PROMOTION ACTIVITIES
Project 30.1	Study and implementation of publishing activities for promotion and public awareness
Description	The project envisages the production of information material on the Heritage and territory namely tourist-cultural guides, maps, brochures, information boards, multimedia information material related to various Promotion, Public awareness and Enhancement initiatives. Among these: <ol style="list-style-type: none"> the site: "The origins of the Longobard Sanctuary of San Michele"; the "Via Sacra Langobardorum"; the visit routes: "The walls, the churches and the monasteries of Monte Sant'Angelo" the museum network of Monte Sant'Angelo and bordering towns; visit routes inside the National Park of Gargano The documentary material produced in the context of the single projects of the Knowledge Pla

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	will be used in all initiatives. The Visitors Centre, now being established at the castle of Monte Sant'Angelo will act as a point of reference for these activities.
Actions	<ol style="list-style-type: none"> 1. Study and implementation of publishing initiatives for promotion and public awareness 2. Production and dissemination of material
Parties involved	Municipality of Monte Sant'Angelo, Municipalities involved in the itineraries of the via Sacra Langobardorum, Mountain Community of Gargano, University of Bari, Centre for San Michele and Gargano Studies; regional museum network; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Puglia, Tourism Board
Phases and timeframe	Starting from 2008-2009
Financial resources	Funds to be raised by: Region Puglia; Province of Foggia and Bari; Municipality of Monte Sant'Angelo; private funds
Expected results	Improvement of visibility and knowledge of the Heritage Improvement of orientation services for visitors
Result indicators	Number of publications and multimedia information material Number of printed copies Number of installed information boards

AWARENESS-BUILDING AND PROMOTION PLAN Monte Sant'Angelo Territory	
Objective 30	ENHANCEMENT OF INFORMATION AND PROMOTION ACTIVITIES
Project 30.2	Improvement of web-related technological systems to put the Heritage on the web
Description	The project envisages the production of multimedia material for the strengthening of the already existing websites on Monte Sant'Angelo and its territory and the direct connection with the sites "Italia langobardorum", also through a virtual tour to the heritage through webcam.
Actions	<ol style="list-style-type: none"> 1. Project and implementation of programmes and multimedia material 2. Activation of a virtual tour to the site and webcam
Parties involved	Municipality of Monte Sant'Angelo, Municipalities involved in the itineraries of the via Sacra Langobardorum, Mountain Community of Gargano, University of Bari, Centre for San Michele and Gargano Studies,
Phases and timeframe	2009-2011
Financial resources	Funds to be raised by: Region Puglia; Provinces of Foggia and Bari; Municipality of Monte Sant'Angelo; private funds
Expected results	Providing visitors with an organic access and orientation system on the Heritage. Promotion of other tourist-cultural properties of the area Promotion of other places belonging to the site "Italia Langobardorum"
Result indicators	Number of activated contacts Number of planned visits starting from the Visitor Centre

AWARENESS-BUILDING AND PROMOTION PLAN Monte Sant'Angelo Territory	
Objective 30	ENHANCEMENT OF INFORMATION AND PROMOTION ACTIVITIES
Project 30.3	Enhancement of relations with information centres
Description	The project envisages the involvement of various information bodies and regional and national media to disseminate information related to the series of initiatives which concern the following aspects: knowledge, conservation, enhancement and promotion of the Longobard heritage. The objective is to enhance the effectiveness of information – both through targeted initiatives, according to the events carried out and through periodical information which contribute to arousing and increasing interest in the Longobard Heritage and relative projects.
Actions	<ol style="list-style-type: none"> 1. Launch of permanent relations with information bodies and regional and national media in order to produce an illustrative "bulletin" (also online) on the initiatives and the progress of knowledge 2. Study and carrying out of initiatives and targeted events dedicated to information such as press conferences, interviews to Stakeholders 3. Organization of tours dedicated to information operators

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

Parties involved	Stakeholders Information bodies Business associations and companies; Private citizens
Phases and timeframe	2008 1, 2 2009 3.
Financial resources	Funds to be raised by Stakeholders and private funds
Expected results	Dissemination of information and raising awareness among the general public of the Values of the Site Dissemination of information and raising awareness of development projects of the Territory
Result indicators	Number of articles and services published on the press and broadcast on television Number of radio-television programmes dedicated to the Heritage and development projects of the territory

AWARENESS-BUILDING AND PROMOTION PLAN Monte Sant'Angelo Territory	
Objective 31	ENHANCEMENT OF PUBLIC AWARENESS ACTIVITIES
Project 31.1	Scientific and information meetings, seminars, exhibitions ands touristic tours
Description	The project aims at activating a coordinated series of interventions with the objective of raising awareness among local people on the Heritage and territory values. The activities will envisage the organization of scientific-information meetings open to the general public to be held both in Monte Sant'Angelo and bordering towns and a guided tour programme for the Heritage. In order to increase knowledge about Monte Sant'Angelo within the network, organized tours to other Longobard places of interest will be organized in cooperation with local cultural associations and service Clubs. An exchange programme on initiatives (exhibitions and seminars) with other sites will favour the dissemination of local specificities and common values of the Heritage.
Actions	<ol style="list-style-type: none"> 1. Intensification of coordination between local bodies and cultural associations in order to prepare an annual schedule dedicated to the promotion of the Heritage. 2. Definition of exchange programmes for public awareness initiatives (meetings, seminars, exhibitions, visits) with other places included in the network and other Longobard places of interest. 3. Preparation of an annual schedule for meetings involving the general public and business categories. 4. Continuation of the meeting programme organized by the Centre for San Michele and Gargano Studies 5. Planning of meetings in various sites of the Territory. 6. Planning of seasonal cycles of guided tours to the Heritage. 7. Organization and promotion of tours to enhance knowledge about the other properties of the Site. 8. Arrangement of exhibitions on the Heritage.
Parties involved	Municipality of Monte Sant'Angelo, Province of Foggia, Region Puglia, University of Bari, Centre for San Michele and Gargano Studies; regional museum network; BAPPSAE (Superintendence for Architectural, Landscape, Historical, Artistic, Ethno-Anthropological Heritage) of the Region Puglia, tourist companies, National Tourist Guides Association with relative regional sections
Phases and timeframe	Starting from 2008
Financial resources	Funds to be raised by: Region Puglia; Provinces of Foggia and Bari; Municipality of Monte Sant'Angelo; private funds.
Expected results	Improved awareness and knowledge of the Heritage values
Result indicators	Number of institutions involved Number of carried out initiatives Number of participants in various initiatives

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN

8.5.1 NETWORK

The Socio-Economic Development Plan involves a two-pronged action

- The first level relates to the planning guidelines adopted to give the overall site a uniform structure and to create system efficiency in it.
- The second level relates to the projects that each location in the Site has developed, basing the way they are set up on integrated valorisation of the (material and immaterial) cultural and natural heritage and sustainable endogenous resources.

The principal aim of the Socio-Economic Development Plan is to create an integrated Network-system capable of representing, promoting, and managing a complex combination of activities in areas that are at some distance from one another and structurally varied.

In principle, the general objectives pursued are therefore:

- Realising the potentiality that emerges from the socio-economic analyses
- Identifying possible synergies
- Translating potential and synergy into sustainable activities to be run in the network.

The basic element of the integrated system is the Longobard Heritage, as a source of direct and indirect cultural elements that can be translated into advantages and stimuli for economic activities: development of tourism and technology; upgrading and implementation of structures and hospitality services; valorisation and upgrading of traditions as driving elements for the new models of sustainable agriculture; valorisation of quality products that are typical of the territories; upgrading of services; and training of new entrepreneurs and dedicated new companies.

A quality relaunch of the hospitality and services in the locations in the network provides for spreading a specific "Hospitality Culture", that is, an innovative system of contact with and approach to those using the Heritage on the part of local operators in the various sectors (hoteliers, restaurant owners, traders, craftsmen, etc.). A specific culture – regulated by a Code of Conduct for the operators – to be expressed in dealing with visitors and that is of use for directing and assisting them and for improving the approach to both the Heritage and the relevant territory, as well as their endogenous resources (a goal that combines protection of the Heritage in sustainable terms).

Addition potential of the economic system of the network made up of locations in the Italia Langobardorum Site also comes from providing real services via the web (tourist packages, bookings, hospitality services, e-commerce for agroalimentary, wine and food, and editorial products); the adoption of a brand that covers the territory; bank-insurance cards; exchange of typical quality products; organisation of events markets; upgrading and training of human resources to raise the quality level in the territories and to promote innovative economic activity.

Following consolidation of the network linked to the Longobard Heritage as the WHL candidate, further reinforcing of the "Italia Langobardorum" system is planned by extending the Network to other Italian and European locations with a Lombard setting ("Extended Italian Network" and "European Geo-Cultural Corridor").

The strategies for the planning outline are based on some achievements that are considered fundamental to guarantee coordination of the Network activities:

- Setting up of a specific coordination and management structure for the Network of Longobard sites (see Chap 3)
- Establishing of a coordinated image and Network instruments

(see Awareness Building and Promotion Plan).

- Implementation of Information and Communication Technologies (ICT) for the Network (see Awareness Building and Promotion Plan).

In particular, as far as the coordinating structure is concerned, this is made up of personnel in the Municipal Administrations of the seven sites, specifically assigned to network activities. The structure will develop its own organisation according to the times and methods related to implementing the GECT (European Territorial Cooperation Group) for which more information in the European partners will be required.

This structure will have a virtual base, since the local offices will be connected using Information and Communication Technological instruments, such as a video-conference system, database of information shared via the web, and a shared interactive back office for the single portal for the serial site.

The objectives of the Socio-Economic Development Plan are as follows:

- OBJECTIVE 1 – Construction/enhancement of the net system finalized at orienting, regulating, organizing and promoting (using the most advanced information and communication technologies) the cultural and research proposals stimulated by the Longobard heritage and transforming the opportunities of the coordinated projects of the socio-economic development of the territories.
- OBJECTIVE 2 – Strengthening the Managing Authority of the Longobard network with the functions of supervising and monitoring the functionality and the efficacy of the system and of its cultural proposals as well as of socio-economic development proposals also in relation to customer satisfaction.

- OBJECTIVE 3 – Favours the public-private initiatives for the development of useful infrastructures, structures and services to provide the territories with suitable answers to the requests of transport services, mobility and hospitality made by the International public and all the users.
- OBJECTIVE 4 – Creating (regional, national and European) “Longobard Itineraries” so that they become highly visible international channels for the study, the research but also for the awareness and promotion of the shared historical-cultural values of the Longobard heritage (Geocultural European Corridor), as well as instruments and opportunities for tourist-economic interchanges and for organic and shared policies of regional, national and international development and planning.
- OBJECTIVE 5 – Increasing the quality and coordination of the hospitality system and related services, by drafting and establishing rules and regulations for the awarding of the brand “Italia Langobardorum”
- OBJECTIVE 6 – Creation of a coordinated system for typical products and quality in the agroalimentary and crafts lines, by drafting and establishing rules and regulations for the awarding of the brand “Italia Langobardorum
- OBJECTIVE 7 – Supporting entrepreneurship and new professionalism related to sustainable development of tourism

The schedules below lay out the objectives and projects required to achieve them, broken down into direct and across the board projects.

One methodological pre-requisite is that the various locations in the serial site belong to different geographic

areas, for which there are different instruments for supporting the running of socio-economic programmes / projects and to help to professionalize economic operators and create companies. In this regard, financing of actions in the various locations will have a composite architecture, which means that the same action or the same project will use different funds – community, national, regional, local, and private – depending on usefulness.

8.5.2 CIVIDALE DEL FRIULI and Territory

The candidacy offers Cividale and a large part of the area of the Duchy of Friuli the possibility of fully optimising their Longobard heritage and of building a local development system around it, aimed at the upgrading and relaunching of a territory that is filled with other exceptional historical-natural, cultural, specialised and economic-productive values .

It must be pointed out that the removal of the borders with Austria and Slovenia, together with the traditional relations between the bordering territories – distinguished for about 500 years by the centrality of Cividale (capital of the Longobard Duchy, of the oriental Marchland of Charlemagne and of the Patriarchal State of Aquileia) - and strengthened by the strong trading relations with the South East and North Europe, favours renewed surge of transnational cooperation, aimed at the sustainable development of a vaster area.

The socio-economic development plan for Cividale welcomes these prospects and is therefore divided into goals and consequent projects that run alongside the upgrading of the heritage inserted in the candidacy: the implementation of the endogenous resources of the area, creating new conditions for socio-economic development, through initiatives for study, research and training coordination and through the setting up of specific promotions of the quality, traditions and knowledge of the area.

The main goals of the area are:

- Initiatives aimed at urban development;
- Optimisation of access to the heritage and implementation of tourist stays;
- Upgrading and relaunching of landscape-cultural resources and food and wine traditions;
- Upgrading, management and relaunching of complex agribusiness.

8.5.3 BRESCIA and Territory

The Social Economic Development Plan was drawn up on the basis of indications expressed by the Brescian General States of Economy and accepted in the Framework Agreement of Territorial Development (AQST) undersigned on 29 November 2007. The signees are: Region of Lombardy, Province of Brescia, Municipality of Brescia, Chamber of Commerce, State University of Studies and Catholic University which institutionally participate in the meeting of the Brescian General States of Economy.

The Agreement is of strategic significance and importance and foresees the realisation of 53 projects of great social-economic impact aimed at favouring the development of the territory in its different meanings: from the large infrastructures to the valorisation of the human capital, from protecting health to sustaining employment, from the development of tourism to social cohesion, up to the sustainable use of resources in the territory and the implementation of public services and technological development.

In the management plan there is an explanatory synthesis with the integration of further projects.

8.5.4 CASTELSEPRIO-TORBA and Territory

The framework that supports the social-economic development Plan of the area of Varese – strongly reinforced at an international level by the values of the Heritage of Castelseprio-Torba/Gornate Olona – is

given by some key elements of the total planning:

- Optimisation of interregional, international transport infrastructures
- Procedure of realisation of a Quality Brand for hotels and restaurants (activated for collaboration of the provincial Associations of category) to be co-ordinated with the foreseen territorial brand-umbrella of the Site "Italia Langobardorum"
- Training for tourist operators (improvement in the quality of the offer from Varese in all tourist environments from hotel accommodation to catering)
- Protocol of agreement between the Chamber of Commerce and the Province of Varese – undersigned in 2004 – for the promotion and development of the agricultural sector through the realisation of common initiatives, with particular reference to the actuation of Quality policies, to planning and realisation of interventions for valorisation and promotion of local agro-food products, and to participation in fairs on the agricultural sector.

8.5.5 SPOLETO and Territory

In compliance with the guidelines provided by the Region Umbria in the Development Plan 2, the main objective of the socio-economic plan of the Municipality of Spoleto is to enhance the identity of the territory: a territory rich in historical-cultural, craft and naturalistic-landscape resources.

Through the Territorial Integrated Project (PIT), Tourism–Environment–Culture sector, which is now in an advanced implementation phase, the Municipal Administration summed up and integrated the programmatic framework defined by EU provisions a) of the ex Objective 2, b) of the integrated development Project in the areas hit by the Earthquake (PIAT), c) of the Rural Development Plan d) of the Local Action Group (GAL) Umbria Valley and Sibillini, by opening new

prospects for sustainable development which are strengthened by the cultural and historical heritage as well as landscape value vocation of the area. Tourism, culture, services and trade operators are already cooperating in close synergy with the Municipality – as lead body in the Project – in relation to the places of identity, memory, history and culture, the places of spirit and the props of sustainable development from the Cycle Track to the ex Railway Spoleto Norcia to the Olive Grove Path.

The rules of the General Urban Development Plan – operational part – introduce new development opportunities aimed at strengthening the whole sector and entire economic system. From the point of view of sustainable development, the thick network of tracks (practicable on foot, by bicycle and / or on horseback, e.g. Monteluco trekking, Martani Trekking, Giro dei Condotti, hermitage itinerary) is particularly interesting, as is the quality agri-food production.

One of the priorities of the Socio-Economic Development Plan is the revival of the Historical Centre both through a new road system – in some cases mechanized – and through the recovery of the existing building heritage, for house, cultural, trade and also production purposes (see enhancement plan). The inter-directional project for the revival of the Historical Centre, through a thorough socio-economic, historical-cultural and environmental analysis of the heritage, identifies new props for the development of production, cultural and tourist activities; these props are identified in accordance with new tourist cultural routes in order to enhance the utilization of the historical centre which benefits from a new road system and the recovery of the public and private heritage. The main objective of the revival, from the point of view of the economic approach, is the transformation of the Historical Centre into a natural trade centre in accordance with the bill for the Regional Law on the revival of Umbria's historical centres.

At the moment, a new trade plan for medium and large shopping centres is being studied. In the 13 production areas existing on the municipal territory, expansion and requalification interventions are planned according to an "Integrated system of production areas" which respects the combination of economy-environment, in accordance with sustainable development and in line with current European, national and regional standards.

8.5.6 CAMPELLO SUL CLITUNNO and Territory

After the earthquake of 1997, complex planning also started in the territory of Campello sul Clitunno, finalised to the recovery, renovation, requalification and relaunch of historical sites, properties, productive activities and services, especially those connected to one of the most important traditional resources of the whole of Umbria: tourism.

For the Municipality of Campello sul Clitunno and its fascinating historical villages, but also for the enterprises of the tourism-hotel sector, catering, characteristic agro-feed production and artistic craftsmanship a season of intensive activity has begun for the reorganisation of the total accommodation "system" in the most modern and efficient way.

In particular, both the laws on post-earthquake reconstruction and the regional laws have allowed the Municipality and private subjects to have a sum just short of 50 million Euros, 15 million of which are engaged in a complex of integrated reconstruction projects but also requalification and relaunch of the territory in which there will be the conclusion of works and the full entry into operation of the new local development model in the last few months of 2007 and in 2008.

Flanked to this commitment are the parallel initiatives of optimising the tourism-environment-culture chain and agro-productive traditions, especially as far as the production of olive oil is concerned, which characterises not only the local economy, but also the landscape-cultural mosaic of the area, acting as a further element of tourist-economic attraction. It is useful to remember that the olive tree groves in the Municipality of Campello occupy 350 hectares, which is 7% of the communal territory.

8.5.7 BENEVENTO and Territory

The main objectives to be continued for the social-economic development of Benevento, in relation to valorisation projects of its cultural resources, are:

- Improve mobility and accessibility to the historical centre;
- Valorise culture as an endogenous engine of development;
- Optimise the infrastructures for culture;
- Adapt and improve human resources for the sustainable valorisation of cultural assets.

The identified formative project, in particular, foresees a formulation able to develop all the basic, instrumental, managerial and organizational professionalism, in order to represent a concrete answer to the need to insert more incisiveness to the formation-territory-world of work, confronting the considerable potential for development, hardly utilized up to now.

The activation of the various courses, in synthesis, will allow the formation of professional figures connected to safeguarding of architectural, artistic and archaeological heritage, the promotion of cultural events and valorisation of the oenogastronomic production of the territory.

8.5.8 MONTE SANT'ANGELO and Territory

The candidature of the Sanctuary of San Michele Arcangelo offers the city of Monte Sant'Angelo the opportunity of playing a leading part in the social economic system of the Gargano and the entire province of Foggia, correlated to the possibility of increase and new valorisation of the tourist flows which already make this territory the main driving force of the tourist sector of the region of Puglia.

The fascination of the medieval period, focussed on the Longobard population, has an extraordinarily striking impact in this land thanks to the Michaelic cult, which, in the Gargano, brings to life an unequalled harmony between Eastern and

Western Christianity. Because of this connotation in particular, Monte Sant'Angelo has enormous potential for the reconstruction of a local development system – already strongly linked to the economy generated by the Michaelic cult in the past – and which today can be directed towards the requalification and relaunch of a territory rich in many other exceptional historical-naturalistic, cultural values and those of specialisations and economic-productive potential.

Moreover, the possibility of starting up integrated development processes on concrete areas, constantly wider, the centre of which is the Michaelic cult, leads to economic and social scenarios of great interest for the valorisation of the site. The sole idea of creating a network between all the populated areas, locations, nations, public and private organisations, places of cult linked to the Archangel Michael which in some way can be traced back to their devotion or dedications at that time of great diffusion spread by the Longobards, or consequently to it, offers opportunities of virtuous harmony able to start up development and valorisation processes which cannot and must not be ignored.

The social-economic development Plan of Monte Sant'Angelo therefore encompasses these perspectives and is formulated in objectives which adds the integration of other resources which the territory expresses to the valorisation and requalification of the asset, creating innovative conditions for the development of the Main objectives which are:

- Improvement of accessibility to the Heritage and increase in tourist stays;
 - Initiatives finalised at the optimisation of the urban and economic development system;
- Requalification and relaunch of the landscape of cultural resources, agro-food and craftsmanship knowledge (Saperi) and oenogastronomic Traditions.

**8.6.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

FIELDS	OBJECTIVES	PROJECTS
NETWORK	1 DEVELOPMENT OF THE NETWORK ECONOMIC SYSTEM	1.1 Coordinating objectives, projects and network actions
		1.2 Creation of an integrated system for promoting hospitality and typical production activities
		1.3 Joint running of promotional economic initiatives for the serial site
		1.4 Creating a system brand
	2 INCREASING THE QUALITY AND COORDINATION OF THE HOSPITALITY SYSTEM AND RELATED SERVICES	2.1 Creating a discipline for hospitality services and related (catering, bar) services, and the related common brand
		2.2 Creation of an automatic centralised system of hospitality services with an indication of the availability of beds and eating places
		2.3 Creation of a system to monitor the services offered and measure customer satisfaction
	3 SUPPORTING ENTREPRENEURSHIP AND NEW PROFESSIONALISM RELATED TO SUSTAINABLE DEVELOPMENT OF TOURISM	3.1 Running training courses for professional refreshing of economic operators and related employees in the tourism market and typical agroalimentary products and crafts
		3.2 Support with creating new entrepreneurship in the area of sustainable tourist development, and tourist services in particular
		3.3 Running of training courses for creating new professionals in the tourism field
	4 CREATION OF A COORDINATED SYSTEM FOR TYPICAL PRODUCTS, QUALITY IN THE AGROALIMENTARY AND CRAFTS LINES AND RELATED RESEARCH	4.1 Identification of typical products and quality for the agroalimentary and crafts lines
		4.2 Creation of regulations for producing typical, quality products of the Longobard network
CIVIDALE DEL FRIULI TERRITORY	5 IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE	5.1 Strengthening of railway infrastructures and connections and local public transports
		5.2 Interventions to improve the road system

8.6.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

FIELDS	OBJECTIVES	PROJECTS
		5.3 Strengthening of parking areas
		5.4 Improvement of road signs
	6 INCREASE OF OVERNIGHT STAYS	6.1 Creation of differentiated tourist packages and offers
		6.2 Creation of a network of historical buildings for conferences, exhibitions, cultural events to increase specialized tourism flows
	7 DEVELOPMENT AND ENHANCEMENT OF THE URBAN PRODUCTION SYSTEM	7.1 Requalification of the area where the cement factory was located and surroundings
		7.2 Enhancement and relaunch of productive activities and new companies
	8 REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES	8.1 Protection of agri-food traditions and their use to economically relaunch innovative quality products
		8.2 Activation of food and wine services and agricultural services for tourist-economic development
	9 ENHANCEMENT OF TRAINING ACTIVITIES FOR HERITAGE-RELATED SECTORS	9.1 Retraining of human resources operating at different levels on the Heritage
		9.2 Retraining of human resources operating in accommodation facilities and services
BRESCIA TERRITORY	10 IMPROVEMENT OF MOBILITY	10.1 Realisation of automated light underground railway, in a viewpoint of integrated transport services
	11 IMPROVEMENT OF ACCESS TO THE TERRITORY	11.1 New motorway for fast and direct connection between Brescia and Milan (Brebemi)
		11.2 Strategic optimisation of the civil airport of Montichiari
		11.3 Motorway junction A4 – A21 – Airport of Montichiari
		11.4 Railway optimisation Brescia – Iseo – Edolo
		11.5 Motorway junction of Valle Trompia
12 OPTIMISATION OF TERRITORIAL TOURIST SYSTEM	12.1 “The sublimation of water” tourist system	

**8.6.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

FIELDS	OBJECTIVES	PROJECTS
		12.2 "Adamello" Interregional tourist system
		12.3 "Garda bresciano" tourist system
		12.4 "The rail road from Valle Trompia to Brescia" tourist system"
	13 SUSTAINABLE DEVELOPMENT OF TERRITORY	13.1 Actuation of integrated programmes of local development (PISL)
	14 ECONOMIC ANIMATION OF THE TERRITORY IN VIEW OF THE TURISTIC DEVELOPMENT	14.1 Valorisation and promotion of local products linked to Longobard Culture and the tourist offer
15 ECONOMIC ENHANCEMENT OF THE RESOURCES OF THE TERRITORY	15.1 Reutilization and relaunch of endogenous resources	
CASTELSEPRIO-TORBA TERRITORY	16 IMPROVEMENT OF ACCESSIBILITY TO THE TERRITORY	16.1 Requalification and optimisation of the railway node of Varese
		16.2 Realisation of the international railway Mendrisio-Varese-Malpensa
		16.3 Realisation of north-east trunk road of Varese and completion of doubling the A8 motorway link
	17 WIDENING OF TOURIST OFFER TO INCREASE DURATION OF STAY	17.1 Study and realisation of tourist "packages" Culture-Nature/Co- ordination with the "Lakes and Alps" project
		17.2 Improvement of the bike tracks and of the integrated bike-pedestrian track in the Provinces of Varese, Como, Lecco
		17.3 Optimisation of the tourist counter at Malpensa intercontinental airport
	18 OPTIMISATION AND REQUALIFICATION OF LOCAL TOURIST BUSINESSES	18.1 Optimisation and co-ordination of the "system" and of the didactic Factory offer
	19 ECONOMIC PROMOTION OF AGRO-FOOD PRODUCTION AND QUALITY OENOAGSTRONOMY	19.1 Co-ordination for the development of the territorial brand of reference
		19.2 Co-ordination for the development of oenogastronomic tourism initiatives (oenogastronomy Facility)
SPOLETO TERRITORY	20 IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE	20.1 Enhancement of railway infrastructures and connections and public local transport
		20.2 Interventions for an integrated transport system

8.6.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

FIELDS	OBJECTIVES	PROJECTS
	21 URBAN REQUALIFICATION AND DEVELOPMENT OF THE PRODUCTION SYSTEM	21.1 Creation of an integrated system of production areas
	22 ENHANCEMENT OF THE ENVIRONMENT AND THE NATURAL AND HUMAN- AFFECTED LANDSCAPE FOR ECONOMIC PURPOSES	22.1 Franciscan Itinerary – Olive Grove Path
	23 ENHANCEMENT OF EXCELLENCE AGRI-FOOD TYPICAL PRODUCTS FOR ECONOMIC PURPOSES	23.1 Development initiative of agricultural- productive and food and wine quality sectors “Spoleto Tipica”
	24 INTEGRATED PROMOTION OF THE TERRITORY AND PRODUCTS IN THEIR T OURIST-ENVIRONMENTAL- CULTURAL ASPECTS	24.1 Recovery and reutilization of traditional methods and products 24.2 Initiative for the integrated promotion of both territory and produce: “Spoleto, Piazza of Agricultural and Food Excellencies” 24.3 Recovery and requalification of traditional methods and products: creation of the brand “Spoleto Tipica”
CAMPELLO SUL CLITUNNO TERRITORY	25 URBAN INTERVENTIONS TO INCREASE TOURIST STAYS	25.1 Recovery and requalification of the medieval villages for the purposes of re-settlement and tourist hospitality 25.2 Realisation of pedestrian pathways, new roadways and parking in the area of the Sources of Clitunno Clitunno and related improving of the road system and signs
	26 OPTIMISATION OF THE TOURIST ENTERPRISES IN THE TERRITORY	26.1 Realisation of new complexes for hospitality and cultural initiatives
	27 ECONOMIC PROMOTION OF QUALITY AGRO-FOOD AND OENOGASTRONOMIC PRODUCTION	27.1 Co-ordination for the development of the territorial Brand of reference 27.2 Co-ordination for the development of initiatives for oenogastronomic tourism (oenogastronomy facility)
BENEVENTO TERRITORY	28 IMPROVE MOBILITY AND ACCESS TO THE HISTORICAL CENTRE	28.1 Completion and adaptation of the traffic plan; updating of the parking plan; realisation of tourist transport services
	29 VALORISE CULTURE AS AN ENDOGENOUS ENGINE OF DEVELOPMENT	29.1 Insertion of Benevento in the Artecard Campania circuit
	30 OPTIMISE THE INFRASTRUCTURES FOR CULTURE	30.1 Planning and realisation of a Congress Centre and a Theatre-tent

**8.6.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

FIELDS	OBJECTIVES	PROJECTS
	31 ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS	31.1 Activation of training courses for operators for marketing of cultural assets
		31.2 Activation of training courses of experts for the creation of businesses in the tourist section
		31.3 Activation of a master in organisation of events and congresses
		31.4 Activation of courses for training orientators and tourist guides
MONTE SANT'ANGELO TERRITORY	32 IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE	32.1 Realisation of intermodal area with the creation of an overground railway through restarting the complementary Foggia – Handcraft-Industrial Zone of Macchia railway line and constructing a tourist arrival point
		32.2 Realisation of a route alternative to the section of the trunk road 272 Monte Sant'Angelo -San Giovanni Rotondo
		32.3 Implementation of consortium activities for the full utilisation of the Gino Lisa airport of Foggia as a favoured airport for tourist flows of foreign origin
		32.4 Completion of the high-speed roadway network of Gargano in the section Mattinata – Vieste and internal road of connection with the trunk road 272 Monte Sant'Angelo-San Giovanni Rotondo
		32.5 Realization of the Macchia Madonna delle Grazie – Historic Centre of Monte Sant'Angelo cableway
		32.6 Interventions of improvement on the road network
		32.7 Improvement of road signs
	33 IMPLEMENTATION OF TOURIST STAYS	33.1 Preparation of differentiated tourist “packages” and offers
		33.2 Structuring of a plan to incentivate the creation of a receptive system

8.6.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

FIELDS	OBJECTIVES	PROJECTS
	34 DEVELOPMENT AND OPTIMISATION OF THE URBAN PRODUCTIVE SYSTEM	34.1 Realisation of P.R.G. forecasts in relation to the areas destined for craftsmanship production in the periurban area and relaunch of productive and new entrepreneurial activities
	35 REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES IN THE TERRITORY	35.1 Safeguard ago-food traditions and their use for the economic relaunch of innovative productions of quality

SOCIO-ECONOMIC DEVELOPMENT PLAN Network													
Objective 1	DEVELOPMENT OF THE NETWORK ECONOMIC SYSTEM												
Projects 1.1, 1.2, 1.3, 1.4	<p>1.1 Coordinating objectives, projects and network actions</p> <p>1.2 Creation of an integrated system for promoting hospitality and typical production activities</p> <p>1.3 Joint running of promotional economic initiatives for the serial site</p> <p>1.4 Creating a system brand</p>												
Description	<p>The brand of the "Italia Langobardorum" system – owned by the Association of Stakeholders (or Body managing the network) – will have characteristics based on the indicators established by a focus group made up of experts nominated from within the Association and representatives appointed by the economic trade organisations.</p> <p>Companies that intend using the brand must formally accept to comply with the Regulations and Discipline for the economic category to which they belong, which is also to be drawn up by the focus group indicated above, as well as the Quality Model, Code of Conduct, and control system.</p> <p>The integrated system for promoting the activities that will be recognised in the system brand will be based first of all on the capacity to offer hospitality services and connected with high quality sales, especially in terms of technological innovation. The possibility of accessing all the information at any point in the system is the first characterising element: Access to the information will be available via any company that uses the brand, while financial and insurance services for the system of companies will be defined in the disciplines and will have a high added value.</p> <p>In addition, the system will be based in reciprocal conveyance of products. Each hospitality company or related service must have a shelf for typical products, while each typical products company is to provide detailed information on the hospitality services available in the areas involved.</p> <p>Promotion actions taken must be integrated and fall within a system. The logic is that of competitiveness with those outside the system by not within the system. The penetration capacity of products is interrelated with the penetration capacity of the cultural assets – tourist hospitality – typical products system. In this regard the Foreign Chamber of Commerce (Assocamere Estere) system will play a fundamental role as one of the system's reference partners.</p>												
Actions	<ol style="list-style-type: none"> 1. Establishment of the Network Authority between the Stakeholders 2. Structuring the focus group of experts from the locations in the Site 3. Setting up of an integrated (structural) promotion system 4. Running of "system" promotional actions 5. Definition of the Regulations, Discipline, and conditions for granting use of the brand 6. Graphic design and registration of the brand 7. Implementation of the brand 												
Parties involved	<p>Coordination structure</p> <p>Municipal Administrations</p> <p>Regional Authorities</p> <p>Provincial Authorities</p> <p>Stakeholders</p> <p>Universities, Research Institutes, and Regional Centres of Competence</p> <p>Chamber of Commerce – Foreign Chambers of Commerce</p> <p>Economic trade organisations</p> <p>Companies in the sector</p>												
Phases and timeframe	<table border="1"> <tr> <td>These actions will be carried out over a time span of four years, broken down as follows: Structuring of territorial focus groups.</td> <td>January – June 2009</td> </tr> <tr> <td>Drawing up of the brand</td> <td>July – August 2009</td> </tr> <tr> <td>Graphic design and registration</td> <td>August – November</td> </tr> <tr> <td>Implementation</td> <td>December 2009 – February 2010</td> </tr> <tr> <td>Setting up the promotion system</td> <td>July 2010 – February 2012</td> </tr> <tr> <td>Running promotion activities</td> <td>March 2010 – December 2012</td> </tr> </table>	These actions will be carried out over a time span of four years, broken down as follows: Structuring of territorial focus groups. Graphic design and registration	August – November												
Implementation	December 2009 – February 2010												
Setting up the promotion system	July 2010 – February 2012												
Running promotion activities	March 2010 – December 2012												
Financial resources	<p>Euro 45,000,000 to be found</p> <p>Funds: UE, national, regional, local, and private</p>												
Expected results	Creation of an integrated system for promoting the site's territorial system based on interconnecting the cultural assets, hospitality and related services, typical agroalimentary												

	products and typical crafts.
Result indicators	Number of companies using the system trademark Number of promotional initiatives run Number of promotional initiatives run via Assocamere Estero

SOCIO-ECONOMIC DEVELOPMENT PLAN Network					
Objective 2	INCREASING THE QUALITY AND COORDINATION OF THE HOSPITALITY SYSTEM AND RELATED SERVICES				
Projects 2.1, 2.2, 2.3	2.1 Creating a discipline for hospitality services and related (catering, bar) services, and the related common brand 2.2 Creation of an automatic centralised system of hospitality services with an indication of the availability of beds and eating places. 2.3 Creation of a system to monitor the services offered and measure customer satisfaction				
Description	<p>The exceptional, unique nature of the Heritage facilitate the usefulness of raising the level of quality in the socio-economic contexts of the Site Locations, and to concentrate on setting up a quality model for hospitality and reception services, as well as hospitality related services.</p> <p>In the same way the plan is to codify the shared means of approach to and guidance of visitors by those working in hospitality, in order to provide the visitors with further stimuli for knowing about both the individual Locations and the Site as a whole.</p> <p>Regulating the hospitality and related services for "Italia Langobardorum" will specifically mean adopting a Quality Model and a specific Code of Conduct.</p> <p>Among other things, these instruments must identify innovative, high quality services to be proposed to tourists, especially as regards the use of Information and Communication technological instruments.</p> <p>As can be seen in the actions that follow, these regulations will be accompanied by the system trademark as specified in the across the board project illustrated below.</p> <p>Correct, systematic application of the regulations, controlled by means of a system for monitoring the services offered, will guarantee a high standard of quality for the services at the various sites.</p> <p>The level of service offered at every point in the network will also be assured by telematic linking of the structures, for constant updating of their availability.</p>				
Actions	<ol style="list-style-type: none"> 1. Structuring of territorial focus groups made up of representatives of institutions, economic categories, individual entrepreneurs, and experts in the sector, in order to gather proposals on the "Regulations for hospitality activities and related services" comprising a Quality Model and Code of Conduct. 2. Receiving proposals and drawing up draft regulations and a rough common trademark, to be submitted for approval by the associations and individual entrepreneurs in the sector, as well as the institutions involved. 3. Final definition of the shared Regulations and the Trademark and relevant adoption by part of participating entrepreneurs and institutions involved. 4. Connection of all the hospitality structures and related services that adopt the Regulations via the web, for real-time updating of quantitative and qualitative data on the availability of beds and eating covers, as well as other services offered in participating structures. This data will be conveyed via a single portal for the serial site and any other form of promotion that is undertaken. Visitors will be able to access the information in the system via serial system at any point, free of charge. 5. Adoption of customer-satisfaction instruments and monitoring system 				
Parties involved	Coordination structure Municipal Administrations Stakeholders Universities Chambers of Commerce Economic trade organisations Companies in the sector				
Phases and timeframe	<table border="1"> <tr> <td>These actions will be carried out over a time span of about a year and a half, broken down as follows: Structuring of territorial focus groups.</td> <td>January – June 2008</td> </tr> <tr> <td>Receipt of proposals and draft regulations</td> <td>July – October 2008</td> </tr> </table>	These actions will be carried out over a time span of about a year and a half, broken down as follows: Structuring of territorial focus groups.	January – June 2008	Receipt of proposals and draft regulations	July – October 2008
These actions will be carried out over a time span of about a year and a half, broken down as follows: Structuring of territorial focus groups.	January – June 2008				
Receipt of proposals and draft regulations	July – October 2008				

	Definition of regulations and related adoption	November 2008 – April 2009
	Connection of the companies via the web	December 2008 – June 2009
	Creation of a customer satisfaction monitoring system	March – June 2009
Financial resources	Euro 1,000,000 to be found Funds: Community, national, regional, local, and private	
Expected results	Adoption of an overall quality system and code of conduct for dealing with visitors that is homogenous and shared for the locations in the Site. Offer of hospitality and related services with a high technological content that are accessible from all points in the system.	
Result indicators	Number of institutions involved Number of companies adopting the regulations Customer satisfaction monitoring over the period following implementation of the system, with quarterly checks and adoption of any necessary corrective measures and/or sanctions for non-compliance.	

SOCIO-ECONOMIC DEVELOPMENT PLAN Network		
Objective 3	SUPPORTING ENTREPRENEURSHIP AND NEW PROFESSIONALISM RELATED TO SUSTAINABLE DEVELOPMENT OF TOURISM	
Projects 3.1, 3.2, 3.3	3.1 Running training courses for professional refreshing of economic operators and related employees in the tourism market and typical agroalimentary products and crafts 3.2 Support with creating new entrepreneurship in the area of sustainable tourist development, and tourist services in particular 3.3 Running of training courses for creating new professionals in the tourism field	
Description	The birth of the "Italia Langobardorum" Network and the consequent launch of the new tourism and cultural offer of typical local products, requires activation and use of innovative services. On the one hand this means updating existing economic operators and professionals, and on the other hand the activation of new entrepreneurship and professions. The projects included in this section are aimed at facilitating and stimulating the start of training courses for preparing entrepreneurs and professionals in the hospitality and related services, management of the cultural systems, information and communication, quality agroalimentary and wine and food products, publishing, and typical crafts. Another fundamental aspect of the actions to be taken in this regard is support of new entrepreneurship in the tourist sector in general and in innovative tourist services in particular. Forms of support will be identified for neo-entrepreneurs prepared to invest in this sector. This support will vary in term of geographic area and the financial instruments available (finding of FESR funds is a deciding factor).	
Actions	<ol style="list-style-type: none"> 1. Structuring of focus groups made up of representatives of economic categories, individual entrepreneurs, local administrations, universities, and approved training bodies, for drawing up the training courses necessary for the actions in the system for socio-economic development. 2. Running of training courses for updating economic operators and employees of companies already in existence in the hospitality and related services, and quality typical products sector. These courses will be aimed at introducing innovative elements like the use of new information and communication technologies. 3. Running of training courses for starting new entrepreneurs and professions, and professional re-training for those employed in the sectors involved. 4. Promotion of the exchange of know-how between entrepreneurial undertakings in the Locations in the Site. 5. Definition and setting up of regimes to assist innovative activities in the area of sustainable development of tourism. 	
Parties involved	Coordination structure Municipal Administrations Regional Authorities Provincial Authorities Stakeholders Universities, Research Institutes, and Regional Centres of Competence Chambers of Commerce Economic trade organisations Companies in the sector	

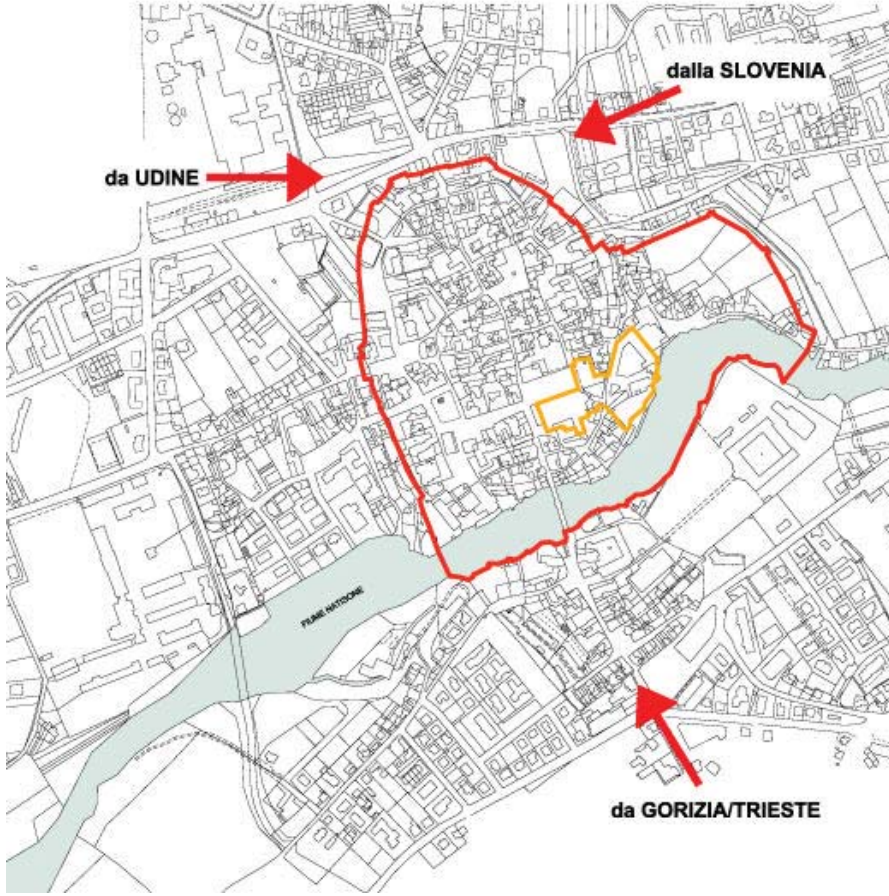

Phases and timeframe	These actions will be carried out over a time span of four years, broken down as follows: Structuring of territorial focus groups.	January – June 2008
	Running of updating training courses for operators	July 2010 – December 2012
	Running training courses for new entrepreneurship and professions	July 2010 – December 2012
	Promotion of exchanges between entrepreneurial undertakings	July 2010 – December 2012
	Definition and setting up of assistance regimes for new entrepreneurship	July 2010 – December 2012
Financial resources	Euro 60,000,000 to be found Funds: Community, national, regional, local, and private	
Expected results	Increase in the quality level of professionalism and the offer in specific sectors. Supporting launching of new entrepreneurship in innovative, sustainable tourist services.	
Result indicators	Number of training courses Number of certificates issued Number of entrepreneurs trained Number of operators in the sector trained Number of economic operators trained Number of new professionals trained Number of new companies in the territories in the Site.	

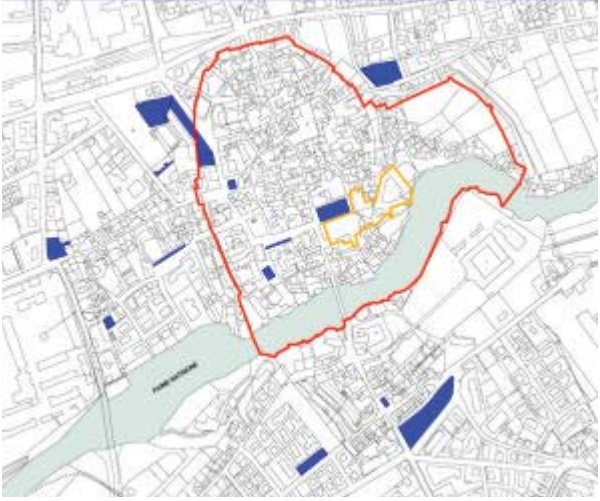

SOCIO-ECONOMIC DEVELOPMENT PLAN Network		
Objective 4	CREATION OF A COORDINATED SYSTEM FOR TYPICAL PRODUCTS, QUALITY IN THE AGROALIMENTARY AND CRAFTS LINES AND RELATED RESEARCH	
Projects 4.1, 4.2	4.1 Identification of typical products and quality for the agroalimentary and crafts lines 4.2 Creation of regulations for producing typical, quality products of the Longobard network	
Description	The creation of a network of products that are typical of the locations in the site is one of the spin-off elements of candidacy, leading to and characterising the socio-economic development of the territories involved. The usefulness of opening to local agroalimentary and typical craft entrepreneurship is promoted by adopting an approach that tends to offer visitors guarantees as to the quality of the products offered and innovative services that give the products added value.	
Actions	<ol style="list-style-type: none"> 1. Structuring of focus groups made up of representatives of the economic categories involved, from among entrepreneurs, local administrations, research institutes, centres of regional competence, and universities in the territories in the Site. 2. Identifying and studying typical products proposed by the focus groups and checking product quality by involving research institutes and universities. 3. Definition of product quality standards by drawing up regulations to be submitted for approval by the associations and individual entrepreneurs in the sector, as well as the institutions involved. 4. Final definition of the shared Regulations and the Trademark and relevant adoption by part of participating entrepreneurs and institutions involved. 5. Connection of all the companies that adopt the Regulations in the network, for real-time updating of data on quantities and quality of products available. This data will be conveyed via a single portal for the serial site and any other form of promotion that is undertaken. Visitors will be able to access the information in the system via serial system at any point, free of charge. 6. Adoption of customer-satisfaction instruments and monitoring system 	
Parties involved	Coordination structure Municipal Administrations Stakeholders Universities, Research Institutes, and Regional Centres of Competence Chambers of Commerce Economic trade organisations Companies in the sector	
Phases and timeframe	These actions will be carried out over a time span of two years, broken down as follows: Structuring of territorial focus groups.	January – June 2008

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

	Receipt of proposals and identification and study of products.	July – December 2008
	Definition of regulations and related adoption	January – April 2009
	Connection of the companies via the web	March – September 2009
	Creation of a customer satisfaction monitoring system	September – December 2009
Financial resources	Euro 1,000,000 to be found Funds: Community, national, regional, local, and private	
Expected results	Adoption of an overall quality system and code of conduct for dealing with visitors that is homogenous and shared for the locations in the Site. Offer of typical products of determined quality and use of innovative services that provide added value to what is on offer.	
Result indicators	Number of institutions involved Number of companies adopting the regulations Customer satisfaction monitoring over the period following implementation of the system, with quarterly checks and adoption of any necessary corrective measures and/or sanctions for non-compliance.	

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 5	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 5.1	Strengthening of railway infrastructures and connections and local public transports
Description	<p>As to the transport system, Cividale is provided with a railway connection to and from Udine, active since 1886.</p> <p>The creation of a new railway station outside the buffer-zone is under way in order to connect the area of the former cement factory (which will soon be requalified– see Socio-Economic Development Plan Cividale, Objective 2 Project 2.1) to the historical centre.</p> <p>Next to the railway station, a new intermodal centre will be created, in view of developing a transport system combining railway and road infrastructures and improving the local public transport.</p> <p>On the railway line structural and plant improvement interventions have been conducted in all stations, level crossings and a new station was created in San Gottardo (Udine). Two new locomotives were purchased and have recently become operational.</p> <p>The railway line Udine-Cividale is currently configured as a surface underground, with around 500,000 users/year and 14-minute travelling time between Cividale and Udine with 6 stops.</p>
Actions	<ol style="list-style-type: none"> 1. Creation of a new railway station and renovation of the line 2. Creation of the intermodal Centre 3. Elimination of the existing level crossing
Parties involved	<p>Municipality of Cividale del Friuli Province of Udine Region Friuli Venezia Giulia Ministry for Infrastructures and Transport Sistemi Territoriali s.p.a.</p>
Phases and timeframe	<p>1: beginning 2005, end 2007 2: beginning 2008, end 2009 3: first semester 2008</p>
Financial Resources	<p>Euro 13,000,000 to strengthen the railway line Udine – Cividale allocated by the Ministry. The Municipal Administration contributed to the creation of a new station with a fund of € 500,000.</p> <p>€ 1,500,000 for the intermodal centre, allocated by the Province of Udine and the Municipality of Cividale</p>
Expected results	Increasing the functionality of the railway line Cividale – Udine and allow maximum level of combination between railway and road systems
Result indicators	<p>Increase in the use of public transport means Improvement of the road system in the area close to the historical centre</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 5	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 5.2	Interventions to improve the road system
Description	<p>The build-up area of Cividale is an important transit area in the regional transport system, in particular for the connections with Udine in the South-West, with the Natisone Valleys and Slovenia in the North-East and with Gorizia and Trieste in the South-East.</p> <p>The urban traffic Plan, created in 1994 and updated in 2007 highlights the presence of a high traffic flow inside the historical centre. The new Municipal General Urban Development Plan aims at directing flows to ensure sustainability to the historical centre by redistributing traffic to external roads and creating new parking areas near the historical centre (see Socio-economic Development Plan Cividale Objective 1 Project 1.3).</p> 
Actions	<ol style="list-style-type: none"> 1. Creation of new roads outside the buffer-zone 2. Creation of roundabouts at the main junctions outside the buffer-zone 3. Creation of cycle tracks 4. Implementation and updating of a new Urban Traffic Plan
Parties involved	Municipality of Cividale del Friuli – private citizens and companies
Phases and timeframe	<p>Action 1 2008 - 2010</p> <p>Action 2 2008 - 2010</p> <p>Action 3 2009 - 2011</p> <p>Action 4 from 2008</p>
Financial Resources	<p>Euro 2,000,000</p> <p>Source: municipal and private funds</p>
Expected results	<p>Improve functions and safety of road system</p> <p>Rationalization of the access system</p>
Result indicators	Improvement of road system in an area close to the historical centre and reduction of traffic in the buffer zone

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory																
Objective 5	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE															
Project 5.3	Strengthening of parking areas															
Description	<p>The survey on demand and availability of parking areas highlighted that the town offers good facilities in the whole municipal area. However, the Municipal Administration aims at providing a substantial investment to enhance parking areas in the historical centre. The area, more than others, needs new car parks, especially for tourists, residents with no garage of their own and public offices, services and trade users: all these categories, unlike permanent employees and suburban residents, need parking areas as close as possible to the Historical Centre.</p> 															
Actions	<p>For the buffer zone:</p> <ol style="list-style-type: none"> in the North/ West At the Intermodal Centre, creation of 100 new parking spaces in the North/East Via delle Mura, creation of around 80 new parking spaces, of which 60 for cars and 20 for caravans in the North Area called "ex-Autonova", creation of around 100 new parking spaces, to be added to the already existing 80 spaces in the South Borgo di Ponte, creation of around 50 new parking spaces, by demolishing the current structures/ laboratories of the Vocational Institute "IPSIA" in the North/ West Area near the shopping centre "Vidussi", rearrangement and adjustment of the area currently used as a car park with around 50 parking spaces 															
Parties involved	Municipality of Cividale del Friuli															
Phases and timeframe	<table border="0"> <tr> <td>In the North</td> <td>at the Intermodal Centre</td> <td>Beginning and end within 2008</td> </tr> <tr> <td>In the North-East</td> <td>via delle Mura</td> <td>Beginning and end within 2009</td> </tr> <tr> <td>In the North-East</td> <td>area called "ex-Autonova"</td> <td>Beginning and end within 2010</td> </tr> <tr> <td>In the South</td> <td>Borgo di Ponte</td> <td>Beginning and end within 2012</td> </tr> <tr> <td>In the North West</td> <td>area near the shopping centre "Vidussi"</td> <td>Beginning and end within 2009</td> </tr> </table>	In the North	at the Intermodal Centre	Beginning and end within 2008	In the North-East	via delle Mura	Beginning and end within 2009	In the North-East	area called "ex-Autonova"	Beginning and end within 2010	In the South	Borgo di Ponte	Beginning and end within 2012	In the North West	area near the shopping centre "Vidussi"	Beginning and end within 2009
In the North	at the Intermodal Centre	Beginning and end within 2008														
In the North-East	via delle Mura	Beginning and end within 2009														
In the North-East	area called "ex-Autonova"	Beginning and end within 2010														
In the South	Borgo di Ponte	Beginning and end within 2012														
In the North West	area near the shopping centre "Vidussi"	Beginning and end within 2009														
Financial Resources	<p>Euro 3,200,000 Costs to be borne partly by the Municipal Administration and partly thanks to contributions by the Province of Udine and the Region Friuli Venezia Giulia</p>															
Expected results	Ensuring functionality and regulation of parking areas by responding to new tourist, trade, residential and service needs while, at the same time, improving accessibility to the Historical Centre and thus reducing traffic in it															
Result indicators	Number of new parking areas compared to the existing															

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 5	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 5.4	Improvement of road signs
Description	At the moment the motorway and road systems of the Provinces of Udine and Gorizia are not adequately equipped as to orientation road signs towards Cividale. The project aims at solving the problem through agreements with supra-municipal bodies dealing with the road system and the rearrangement of road signs along the main roads and junctions of the area.
Actions	<ol style="list-style-type: none"> 1. Preliminary agreement between the Municipality of Cividale, ANAS (National Road Authority) and the Provinces of Udine and Gorizia 2. Creation of a mapping of motorway/road networks and of strategic and/ or sensitive areas for the traffic inflow to Cividale 3. Creation of road signs 4. Positioning of signs in strategic areas to indicate the most direct routes to Cividale
Parties involved	Municipality of Cividale del Friuli ANAS (National Road Authority) Province of Udine Province of Gorizia Region Friuli Venezia Giulia
Phases and timeframe	2008-2009 1, 2, 3, 4
Financial Resources	To be defined – Funding: municipal, provincial, regional
Expected results	More visibility of road access to Cividale Facilitation of tourist flows
Result indicators	Number of road signs installed Reduction of travelling times from strategic traffic junctions to Cividale

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 6	INCREASE OF OVERNIGHT STAYS
Project 6.1	Creation of differentiated tourist packages and offers
Description	The project aims at increasing overnight stays through integrated tourist packages (itineraries on the territory) and differentiated offers for various periods of the year. Itineraries contribute to reduce tourism pressure on the Heritage by extending the benefits of tourism attraction to a broader area of Friuli Venezia Giulia. Differentiated offers aim at grasping various opportunities offered by Cividale and its territory during the year to plan tourist-economic offers also in periods different from the most popular ones (summer and spring)
Actions	<ol style="list-style-type: none"> 1. Agreements with local tour-operators for the definition of packages and alternative tourist offers at lower prices 2. Promotion of differentiated offers at national and international level 3. Start of cooperation with tour-operators and social, youth, student and religious tourism associations
Parties involved	Municipality of Cividale Superintendences Parish of Santa Maria Assunta Alpe Adria Food and Wine Centre Municipalities included in Longobard Itineraries of Friuli Venezia Giulia Business categories and associations Provinces of Udine, Gorizia, Pordenone, Trieste: Region Friuli Venezia Giulia Stakeholders Network Management Body Tour-operators ; Social, youth, school, religious tourism associations
Phases and timeframe	2008-2009 and following 1, 2, 3
Financial Resources	To be defined – Funding: municipal, regional, national, private funds
Expected results	Enhancement of the tourist offer on the Territory Increase in overnight stays
Result indicators	Increase in the number of tourists in accommodation facilities

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 6	INCREASE OF OVERNIGHT STAYS
Project 6.2	Creation of a network of historical buildings for conferences, exhibitions, cultural events to increase specialized tourism flows
Description	The richness of Cividale in prestigious historical buildings which can be used as venues for seminars, conferences, small and large exhibitions, music and literature festivals favours specific actions to promote integrated offers to Institutions, companies, or business associations, cultural Bodies and associations. These initiatives will determine an increase in the number of visitors and overnight stays of specialized tourist flows.
Actions	<ol style="list-style-type: none"> 1. Finding of places in Cividale and in the territory which are available for specialized tourism activities 2. Creation of coordinated illustration materials and their dissemination 3. Agreements with accommodation operators 4. Promotion activities of integrated economic proposals
Parties involved	Municipality of Cividale Superintendences; Parish of Santa Maria Assunta Alpe Adria Food and Wine Centre Municipalities included in Longobard Itineraries of Friuli Venezia Giulia Business categories and associations Provinces of Udine, Gorizia, Pordenone, Trieste; Region Friuli Venezia Giulia Stakeholders; Network Management Body Tour-operators; Social, youth, school, religious tourism associations
Phases and timeframe	2008-2009 and following 1, 2, 3
Financial Resources	To be defined – Funding: municipal, regional, national, private funds
Expected results	Enhancement of specialized tourist offer Increase in overnight stays
Result indicators	Increase in the number of tourists in accommodation facilities

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 7	DEVELOPMENT AND ENHANCEMENT OF THE URBAN PRODUCTION SYSTEM
Project 7.1	Requalification of the area where the cement factory was located and surroundings
Description	<p>The area, outside the buffer-zone, is located in the vicinity of the main access to the town. It is characterized by industrial buildings now in disuse, near the railway, and other buildings which are seriously physically and functionally damaged.</p> <p>Taking into consideration its strategic position, the area will be renovated and thus reused in order to improve the image of the access to the town in a new urban connection system. Among the possible uses of the area, new accommodation facilities for tourists will be created so as to enhance the existing.</p>
Actions	<ol style="list-style-type: none"> 1. Creation of an area of office excellence or residential and commercial buildings.
Parties involved	Municipality of Cividale del Friuli; Banca Popolare di Cividale S.c.p.A.; Private companies
Phases and timeframe	The project for the rearrangement of the area was presented in 2007 and its completion is scheduled within three years. Interventions are going to start in 2008
Financial Resources	Around Euro 70,000,000 Costs for the interventions to be borne by private citizens and companies
Expected results	Requalification of the production area now in disuse Creation of new office and commercial buildings Creation of new residential complexes
Result indicators	Cube meters of office buildings Increase of productive activities Cube meters of residential buildings available for the population Number of commercial activities

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 7	DEVELOPMENT AND ENHANCEMENT OF THE URBAN PRODUCTION SYSTEM
Project 7.2	Enhancement and relaunch of productive activities and new companies
Description	In order to relocate small companies operating in the historical centre and surroundings and to obtain new areas for other small companies, an area south of the trunk road no. 54 and the current industrial area was identified. The new location is functional both at connection level, because it is easily accessible from local roads and at landscape/ environmental level, thanks to a series of implementation strategies envisaged in the detailed Plan. The identified area stretches over a surface of 50 ha.
Actions	<ol style="list-style-type: none"> 1. Implementation of the Detailed Plan of Private Initiative of the new industrial/ small business Area 2. Creation of new industrial and small business plants
Parties involved	Municipality of Cividale del Friuli Consorzio Artigiano e Piccole Imprese di Cividale srl (Small Companies Consortium) Local companies
Phases and timeframe	Beginning 2007. Main urbanization interventions within 2010 Completion within 2015
Financial Resources	Euro 4,700,000 for urbanization interventions, allocated by the Consorzio Artigiano e Piccole Imprese di Cividale Costs related to structures borne by private companies
Expected results	Meeting new settlement and repositioning needs of companies located in inadequate areas.
Result indicators	Number of improper activities moved from the historical centre Number of companies in the Territory Employment development

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 8	REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES
Project 8.1	Protection of agrifood traditions and their use to economically relaunch innovative quality products
Description	The project aims at promoting new agri-food products based on recovery and reutilization of traditional methods and products. The preliminary research activity will be developed according to four main guidelines: <ol style="list-style-type: none"> a) Identification of agri-food, food and wine and Knowledge of the territory (interviews) and their cataloguing in a dedicated database b) Targeted research in the historical archives c) Verification of production processes related to tradition which have already been launched on the territory and support to new projects d) Support to protection initiatives relative to endemic plant species The cognitive phase – coordinated by a scientific and applied research centre (Observatory on the landscape-cultural heritage) – will follow the experimental and economic-promotional phase of agri-food high-quality products, produced with eco-friendly and sustainable methods inspired by Tradition.
Actions	<ol style="list-style-type: none"> 1. Studies on agricultural-productive micro-sectors and agri-food networks. 2. Coordination of research and actions through the Observatory on the landscape-cultural heritage 3. Identification / reconstruction of processes, production cycles, agri-food traditions and protection of endogenous species 4. Control and experimentation activities on points 1 and 3 5. Assistance to launch and economic promotion of innovative production
Parties involved	Department of Biology and Agricultural-Industrial Economics of the University of Udine University of Trieste, Nova Gorica, Lubiana Germplasm Bank of the Botanical Garden of the University of Padova [UNESCO WHL] Business associations Sector companies Region Friuli Venezia Giulia
Phases and timeframe	2008 launch 1, 4 2009 - 2010 launch 2, 3

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

Financial Resources	1 Funding amounting to Euro 45,000, already acquired – Regional source 2, 3, 4, 5 Funds to be raised – Regional sources (Rural Development Plan), national, EU funds (Leader Plus; Life+; Interreg)
Expected results	Creation of the database Development of new company activities Coordination of requalification and relaunch actions of the agri-food and environmental sector
Result indicators	Operational launch of the Observatory Number of carried out actions Number of experimentations and new launched activities

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 8	REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES
Project 8.2	Activation of food and wine services and agricultural services for tourist-economic development
Description	The objectives of the project correspond to the general objectives indicated in the Socio-Economic Development Plan of the Network. At local level a series of services will be created – through general cooperation (Alpe Adria Food and Wine Centre) – for tourist-economic development based on agri-food tradition of a territory which is a bridge among the Italian, Austrian and Slovenian cultures where food and wine production is constantly subject to new influence and adjustment. The function of the Food and Wine Centre is expected to be completed – according to the projects – with the parallel creation of agricultural services (showrooms for the promotion of typical quality products, of rural Districts, of rural tourism itineraries); of didactic-experimental greenhouses; of an essence and olfactory laboratory; of a promotion and experimentation centre for relations among food, health and wellbeing.
Actions	<ol style="list-style-type: none"> 1. Activation of the Food and Wine Centre 2. Creation of a specialized database on Alpe Adria recipe books 3. Activation of agricultural services for the didactic and commercial promotion of agricultural quality products, Districts and rural and food and wine tourism 4. Establishment of a specialized Visitor Centre coordinated with the Visitor Centre of Santa Maria in Valle 5. Promotion of food and wine traditions and their interpretations (Taste Laboratory) 6. Connection with the Vine and Wine Park
Parties involved	University of Udine Chamber of Commerce of Udine ITAS (Technical Agricultural Institute) "Paolino d'Aquileia" Business associations and companies Agricultural companies Banca Popolare FriulAdria Region Friuli Venezia Giulia
Phases and timeframe	2008-2012 actions from 1 to 6
Financial Resources	Euro 900,000.00 1, 2, 3 Regional (Rural Development Plan), national, EU (Leader plus, Life+; Interreg), private funds To be defined 4, 5, 6 Regional (Rural Development Plan), national, EU (Leader plus, Life+; Interreg), private funds
Expected results	Tourist attraction integrated with the Longobard heritage attraction Activation of agricultural services in favour of the territory Requalification of Natisone-Torre-Judrio Valleys at environmental and production level
Result indicators	Increase in specialized tourism flows Number of activated agricultural services Number of promoted initiatives

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 9	ENHANCEMENT OF TRAINING ACTIVITIES FOR HERITAGE-RELATED SECTORS
Project 9.1	Retraining of human resources operating at different levels on the Heritage
Description	<p>The project envisages specific training courses for tourist guides dealing with the properties at different levels. Training and retraining courses must take into account the following:</p> <ol style="list-style-type: none"> basic prerogatives of the Longobard Heritage of Places and territory prerogatives of the entire Site "Italia Langobardorum" general prerogatives of the Itineraries of the European geocultural Itinerary <p>Training activities will be conducted in cooperation with universities and professional guides associations, UNESCO Club, BIT-Bureau International du Tourisme Social and other training bodies and social, youth and religious tourism recognized associations which – among other statute objectives – provide training activities.</p> <p>The activity will, in particular, focus on the Curators, Historians, Tourist Guides, Trainers categories with differentiated refresher courses.</p> <p>Special attention will be given to the training of Trainers which is a strategic way to allow a more effective and adequate didactic activity aimed at raising awareness and promotion of young generations on the values of the UNESCO Heritage and, specifically, on the values of Longobard culture and art.</p> <p>This section of the project envisages the adoption of specific interventions:</p> <ol style="list-style-type: none"> in the context of compulsory refresher courses for teachers of any training body, starting from those in the territory of the Site "Italia Langobardorum" in the context of specific refresher initiatives promoted by the Site's Stakeholders
Actions	<ol style="list-style-type: none"> Agreement between training bodies and local stakeholders Study and carrying out of differentiated training courses Activation of courses
Parties involved	Stakeholders Universities of Udine and Trieste Professional guides association BITS- Bureau International du Tourisme Social UNESCO Club of Udine Youth Tourism Centre Association Card of Cividale Network Management Body
Phases and timeframe	2008-2009: 1, 2 2009 launch 3
Financial Resources	Funds to be raised by: Region Friuli Venezia Giulia; Provinces of the Region; private funds
Expected results	Enhancement of knowledge on the properties of the Heritage Network Enhancement of promotion of the Site "Italia Langobardorum" Increase in the quality of the approach to the Heritage and territories
Result indicators	Number of training courses Number of participants in courses

SOCIO-ECONOMIC DEVELOPMENT PLAN Cividale Territory	
Objective 9	ENHANCEMENT OF TRAINING ACTIVITIES FOR HERITAGE-RELATED SECTORS
Project 9.2	Retraining of human resources operating in accommodation facilities and services
Description	<p>Despite the extraordinary unique and excellent value of the Longobard heritage, there is a rather low level of awareness and dedication among accommodation and services operators towards a dynamic and competent approach to guests and visitors.</p> <p>Taking into consideration the strategic importance of the creation of an adequate welcoming system, based on high quality services and able to act as a catalyst for the heritage and other resources of the territory, the project envisages the activation of several retraining courses for accommodation, service operators and training activities promotion operators to create a new specialized business class.</p> <p>Specific attention will be paid, also according to the strategic guidelines of the Network, to training activities related to the adoption of the Quality Model, of the Behaviour Code for the accommodation and service sector and of the Regulation for the utilization of the territorial umbrella-trademark of "Italia Langobardorum" (see Socio-Economic Development Plan Network Objective 1, Projects 1.1, 1.2; Objective 3, Projects 3.1, 3.2)</p>

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

Actions	<ol style="list-style-type: none"> 1. Agreements among local stakeholders, economic categories, universities and training bodies 2. Study and carrying out of differentiated training programmes (professional retraining of accommodation operators; training of new entrepreneurs of the sector) 3. Activation of courses
Parties involved	Stakeholders Universities of Udine and Trieste Chamber of Commerce Business associations and companies Companies UNESCO Club of Udine Network Management Body
Phases and timeframe	2008-2009 1, 2 2009 launch 3
Financial Resources	Funds to be raised by: Region Friuli Venezia Giulia; Provinces of the Region; private funds
Expected results	Qualitative enhancement of accommodation and service sectors Creation of new companies dealing with communication and cultural heritage management.
Result indicators	Number of training courses Number of participants in courses Number of new companies

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 10	IMPROVEMENT OF MOBILITY
Project 10.1	Realisation of automated light underground railway, in a viewpoint of integrated transport services.
Description	<p>An underground railway with a route of 14km in communal territory, with the realisation of 17 stations of which 13 underground, creation of car parks near the stations accessing the city and integration with the other surface bus lines of Brescia Mobilità and with the Lam – high mobility lines. Realisation by: Ansaldo Trasporti Sistemi Ferroviari, Astaldi, AnsaldoBreda and Necso Entrecanales Cubiertas.</p> <p>The Metrobus, the new underground of Brescia, will become an important axis in the city public transport system, integrated by interchange car parks distributed in strategic points of the urban fabric. It is a completely automatic underground railway, with electric vehicles of a small size, without a driver on board, which travel on their own on protected track, separate from ordinary traffic (partly in tunnels, partly at ground level and partly in viaducts).</p>
Actions	<p>Excavation was chosen using the modern “shield” boring technique, the so-called “mole” because it digs like a mole does. This large machine, driven by expert personnel and with sophisticated equipment, has a diameter of about 9 metres for a length of 120, it works underground with its rotating head and, automatically, consolidates and lines the circular dug tunnel with prefabricated material. All this continuously and silently, without the city realising, except for the external phases of building the stations. For further safety, the micro-stability of all the buildings on the path is continuously monitored. There is no interference with the archaeological layer and, should the water layer rise in the future, all the tunnel (as with all the other underground structures throughout the route) is integrally waterproofed</p>
Parties involved	<p>Brescia Mobilità. Also: Municipality of Brescia, Ministry of Infrastructures, Ministry of Transport, Region of Lombardy.</p>
Phases and timeframe	by the end of 2012.
Financial resources	The expected cost of the work is a total of 750 million Euros, of which 284.4 million come from the State, 72.3 million from the Region of Lombardy, 67 million from the Municipality of Brescia and a thirty year mortgage of 240.3 million.
Expected results	<ul style="list-style-type: none"> a) protect the environment reducing atmospheric and acoustic pollution b) protect the conservation of historical monuments in the city and hinterland c) improve the liveability in the historic centre d) make the use of public transport convenient with the reduction of private circulation, also through integration systems and interchange between the various systems of public transport. e) improve connections between the various zones of the city, in particular the new areas of development (new exhibition facility, new residential areas etc.) f) improve integration and use of different means of transport: bus, railways, underground stations, private means g) contain the total costs (private and public) of the transport service h) increase the satisfied mobility on the urban system from 40 to 56 million passengers/year
Result indicators	Number of transported passengers, reduction in vehicular traffic pressure in the city and historical centre, air quality, liveability in the centre and metropolitan area

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.1	New motorway for fast and direct connection between Brescia and Milan (Brebemi).
Description	Realisation of the Brescia - Bergamo - Milan (Bre-Be-Mi) dual carriageway motorway between Brescia and Caravaggio, which will widen to three carriageways up to Melzo. Apart from the tow barriers, the new artery will have seven tolls. Of the total 50 kilometres, 17 will be trenched, 4 in a viaduct and 1.3 in underground galleries. The new motorway about 62 kilometres long, so-called "direttissima Brescia - Milano", will be completely enlighten and will have fibre optic detection systems to guarantee real time traffic control. The total capacity of the BreBeMi will be of around 40-45 thousand vehicles each way.
Actions	<ol style="list-style-type: none"> 1. Junction of the 19 involved municipalities: Travagliato, Rovato, Castrezzato, Chiari and Urigo d'Oglio in the province of Brescia; Calcio, Antegnate, Covo, Fara Olivana con Sola, Fornovo San Giovanni, Bariano, Caravaggio, Calvenzano, Treviglio and Casirate d'Adda in the province of Bergamo; Cassano d'Adda, Truccazzano, Pozzuolo Martesana and Melzo in the area of Milan. 2. Realisation of the two barriers: one at Castrezzato and one at Cassano. 3. Creation of seven motorway tolls: Chiari, Antegnate-Calcio, Romano, Bariano, Caravaggio-Treviglio est, Treviglio ovest and Cassano d'Adda.
Parties involved	Brebemi Spa (awarded company composed of several motorway companies which benefit from concessions on the Lombard territory; from Autostrade Spa (35%), to Autostrada Brescia-Padova and Autostrade Centropadane (12.7% each one), as well as the company Milano Mare-Milano Tangenziali S.p.A. (ex Autostrada Serravalle Milano Chiasso), which holds a quota of 10%. The remaining quota belongs to a set of local Bodies and the Chamber of Commerce of Lombardy, to a total of 25.3%, and Banca Intesa with 3.8%). Also: Ministry of infrastructures; Regione Lombardia, CAL S.p.A., Province di Bergamo, Brescia, Cremona, Lodi, Milan and Municipalities involved in the route.
Phases and timeframe	Urgent realisation, works expected to start by 2009, conclusion of works by 2012.
Financial resources	The total cost of the project, including complementary road travel and financial charges, is 1,580 million Euros, charged to the private subject, the company Brebemi Spa, which on 18 April 2003 won the tender in project financing, promoted by Anas in December 2001.
Expected results	Its realisation has the purpose of lightening the traffic which exists today on the A4 Motorway Milan-Bergamo-Brescia, which constitutes one of the most critical road nodes in Italy.
Result indicators	Reduction in traffic on the A4, better fast connection Brescia –Milan

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.2	Strategic optimisation of the civil airport of Montichiari.
Description	Interventions aimed at equipping and qualifying the airport not only as a cargo stop for merchandise, but also and above all as a primary facility for receiving passengers and servicing businesses, exhibitions and tourism, developing its potential and guaranteeing the role of intercontinental stop both for goods and above all passenger traffic. This objective is also valid in line with what expressly indicated by the Region of Lombardy as a future development strategy for the Brescian airport.
Actions	<ol style="list-style-type: none"> 1. Identification of priorities of intervention and definition of the general programme 2. Start up of the first cycle of interventions with the necessary programmatic agreements.
Parties involved	The company Brescia and Montichiari Airport S.p.A. (ABeM), Brescian Industrial Industries Association, Chamber of Commerce and Municipality of Brescia, Banks and Local Bodies.
Phases and timeframe	Starting from 2008 onwards.
Financial resources	Private and public funds equal to the importance of the foreseen investment.
Expected results	Full relaunch of the airport, integration with Orio al Serio and development of national, European and intercontinental routes.
Result indicators	Recovery of civil routes, increase in the number of travellers in the airport, increase in tourists in the provincial and regional area.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.3	Motorway junction A4 – A21 – Airport of Montichiari.
Description	Completion of the Ring Road comprising the SP 19, rationalisation of radial traffic flows converging towards the main town but not going into the city, rapid service for the airport of Montichiari. The route foresees a motorway junction between the Ospitaletto toll of the A4 Milan-Venice motorway and the new toll of San Zeno planned along the A21 Turin-Brescia motorway, with the transformation of part of the route of the SP19 into a dual carriageway motorway. It is in strict functional continuity with the foreseen direct connection "BreBeMi" to the West and with the "A4" motorway to the East, constituting a key infrastructural arch for road travel on corridor "5". It makes road communication with Montichiari airport easier and faster. The total length of the operation is 30km.
Actions	1. Initial completion is foreseen, with separate carriageways, of the section Capriano del Colle/Castenedolo. There will then be requalification, with the carriageway being doubled, of the section Ospitaletto/Capriano del Colle.
Parties involved	Autostrada Centro Padane s.p.a. Also: Ministry of Infrastructures, ANAS, Province of Brescia, and Municipalities territorially involved.
Phases and timeframe	Works begin in 2008 and end in 2011.
Financial resources	The total investment is expected to be 296 million €. Financial cover is insured by the Company Autostrade Centro Padane.
Expected results	Strategic implementation of motorway services in the area directly involved with the civil airport of Montichiari to reach, together with the foreseen interventions regarding railways with high capacity lines, making it one of the central airports by geographic position in the area of North Italy and one of the most important at European level for the volume of passenger and goods transport.
Result indicators	Development of air traffic in Montichiari airport, consequent better management of local flows on road and rail, advantages in regional road circulation.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.4	Railway Improvement Brescia – Iseo – Edolo.
Description	Total requalification of the public transport system of Val Camonica. Requalification and optimisation of the public transport system, rail and road, with execution of call to tender for awarding automobile services in respect of the national and regional directives in force, with the objective of reaching the activation of an integrated system which has as its strongpoint the railway line Brescia – Iseo - Edolo flanked by a series of lines for road travel organised so that interchange is favoured and offering a wider coverage of citizen mobility requirements even with contained management costs.
Actions	A. Interventions on rolling stock 1. Revamping of 8 railcars (air conditioning, seating and livery) 2. Purchase of 12 new trains 3. Renewal of bus fleet B. Interventions on the infrastructures 1. Interchange centre of Iseo 2. Interchange centre of Pisogne 3. Interchange centre of Darfo Boario 4. Interchange centre of Breno C. Interventions of planning the TPL service 1. Analysis of existing automobile lines and re-planning according to integration with the railway line (e.g. suppression of duplications) 2. Planning of the service at intervals on the railway line 3. Planning of bus line times connected with the interchange lines 4. Definition of the new integrated tariff system to valid zones both for road and rail services.
Parties involved	Province of Brescia Also: Ministry of Transport, Region of Lombardy, LeNord S.r.l., Ferrovienord S.p.A.
Phases and timeframe	Different for each formulated phase of the project. The foreseen interventions are expected to end by 2010.
Financial resources	The foreseen investment is about 30-35 million €. Rolling stock (to be raised on capital

	account) and indicatively up to a maximum of 1.5 million € per annum for optimising the service. Costs are charged to the Region of Lombardy, Province of Brescia and the State.
Expected results	Increase in passengers of the public service, reduction of vehicles, more customer satisfaction, minor management costs and service more in respect of environmental needs.
Result indicators	Number of passengers, reduction of vehicles, increase in tourist data.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.5	Motorway junction of Valle Trompia.
Description	Realisation of the motorway junction connecting the A4 Milan – Venice motorway at Valle Trompia, with a total length of about 37km. This intervention is known to be of pre-eminent national interest, the works of which will be realised in two functional parts which gather together the interventions finalised at raising safety standards and favouring better roadway flow in Valtrompia. The approved executive project, in the total design of the A4 Motorway and Valtrompia Junction, realises the itinerary between the motorway toll of Ospitaletto and that in programme for Sarezzo.
Actions	1 st Lot: Construction of section Concesio/Sarezzo and connection Concesio/SP 19 towards Gussago; 2 nd Lot: Requalification exits SP 19 (Ospitaletto, Paderno Franciacorta, Rodengo Saiano, Gussago); requalification section SP 19 from Ospitaletto to Rodengo Saiano and from Gussago to Concesio; requalification exit ex SS 510/SP 45 in Castegnato; 3 rd Lot: Requalification section SP 19 from Rodengo Saiano to Gussago and doubling of tunnel of Gussago; 4 th Lot: Construction of section Concesio/Brescia and requalification of west Brescia by-pass.
Parties involved	Anas s.p.a. Also: Ministry of Infrastructures, Province of Brescia, Mountain Community of Valle Trompia, territorially involved municipalities, Società Autostrade BS/PD Serenissima.
Phases and timeframe	The work is urgent, but realisation times are not yet exactly defined.
Financial resources	The total foreseen investment is € 769,318,709.00 mostly charged to the Company Autostrade BS/PD Serenissima and Anas s.p.a.
Expected results	More flow and facility of access from and to Valle Trompia, now served by a single road node, one of the most congested in Europe. Advantages for users, commercial activities and inhabited centres now crossed by uninterrupted road traffic, mostly heavy.
Result indicators	Decongestion of the Valtrompia trunk road, improvement of road service from and to Valle Trompia, reduction of vehicular mass in inhabited centres.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 12	OPTIMISATION OF THE TERRITORIAL TOURIST SYSTEM
Project 12.1	"The sublimation of water" tourist system
Description	Tourist system which proposes the promotion of tourist attractions of a vast area, comprising Low and Mid Val Canonica, Val di Scalve, Val Cavallina, the Sebino, Val Calepio and Franciacorta. Characterised by the common presence of water in its different forms: from snow in the mountains of Valle Camonica, to the thermal baths and to lakes. The system programme, as foreseen by regional law 8/2004, proposes a synthesis of the set of programmes, projects and services orientated at tourist development in the territory and the integrated offer of cultural, environmental assets and tourist attractions, including characteristic products of local production and oenogastronomy. Many projects valid for tourism have been inserted into the system programme, they were already identified in the different tools of local programming (PISL, programme Agreements, planning mountain communities, area Plans, etc.).
Actions	1. The tourist development programme identifies a total of 585 projects. As this is an articulated programme, the degree of definition varies from project to project.
Parties involved	Secas Spa Also: Province of Brescia, Province of Bergamo, territorial Agency for tourism in Val Camonica, Province and Chamber of Commerce of Bergamo, Mountain Communities, 80

	Municipalities, 2 Park Authorities, 43 private subjects in the territory of Bergamo and 47 private subjects of the Brescian territory
Phases and timeframe	Different for each project inserted in the tourist development programme. Realisation is foreseen of a first set of 236 projects in the three year period 2006 – 2008. The total programme has a medium-long term period perspective.
Financial resources	The total cost of the 585 identified projects is more than 400 million €. Potential financing sources are various and vary according to the type of project (regional law 8/2004, FRISL, Law 36/88, PICS, community planning, negotiated planning tools, etc.).
Expected results	Qualification and development of cultural and lake tourism and environmental and sporting, which is the realisation of infrastructural projects (roadway system, car parks, bicycle paths).
Result indicators	Increase in tourist data, improvement of use of the locations, creation of infrastructures adapted to the purposes.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 12	OPTIMISATION OF THE TERRITORIAL TOURIST SYSTEM
Project 12.2	"Adamello" interregional tourist system.
Description	<p>Tourist system which proposes the valorisation of tourist excellence in the interregional land of Adamello – Passo del Tonale, which includes the six Brescian municipalities of High Valle Camonica and the Trentine municipality of Vermiglio. The reference territory of the "Adamello" tourist system is characterised by a ski station which extends over a drop of over 2000 metres, equipped with almost 100km of runs. Moreover, there is significant potential for development of other forms of tourism (naturalistic, sporting, cultural, etc.) from the viewpoint of deseasoning of presences.</p> <p>The tourist system, as foreseen by regional law 8/2004, proposes a synthesis set of programmes, projects and services orientated to tourist development and to the integrated offer of cultural, environmental assets and tourist attractions, including characteristic products of local production and oenogastronomy.</p> <p>Many projects valid for tourism have been inserted into the system programme, they were already identified in the different tools of local programming (PISL, programme Agreements, planning mountain communities, area Plans, etc.).</p>
Actions	1. The tourist development programme identifies a total of 93 projects. As this is an articulated programme, the degree of definition varies from project to project
Parties involved	<p>Consortium Adamello Ski</p> <p>Also: Region of Lombardy, Province of Brescia, Municipality of Vermiglio in the independent province of Trento- Municipality of Incudine, Municipality of Monno, Municipality of Ponte di Legno, Municipality of Temù, Municipality of Vezza d'Oglio and Municipality of Vione, in the province of Brescia – Union of the Municipalities of High Valle Camonica, individual and associated Enterprises.</p>
Phases and timeframe	Different for each project inserted in to the tourist development programme. Total realisation is foreseen by 2008.
Financial resources	<p>The tourist development business plan comprises 93 projects for a total investment of circa 126 million €.</p> <p>Potential financing sources are various and vary according to the type of project (municipal planning, regional law 8/2004, FRISL, Law 36/88, PICS, negotiated planning tools, etc.).</p>
Expected results	Development of winter tourism, strongpoint of the Adamello Ski area which includes the most important ski stations of the Alpine arch; green tourism, particularly connected to mountain bikes, optimising the Adamello Bike Arena and similar agonistic manifestations and the historical-cultural flow referred to as the White War, with the valorisation of specific topical pathways.
Result indicators	Increase in tourist data, improvement of use of locations and creation of infrastructures adapt to the purposes.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 12	OPTIMISATION OF THE TERRITORIAL TOURIST SYSTEM
Project 12.3	"Garda bresciano" tourist system.
Description	This tourist system proposes the integration and valorisation of tourist resources of the Garda riviera in the Brescian area, Valtenesi, Parco Alto Garda and the Morenic hills. The programme foresees evolution towards the interregional system of Garda, continuing the projects and initiatives already promoted by the Region of Lombardy through the resources set to be valid by law 135/2001. The tourist system of Brescian Garda, as foreseen by regional law 8/2004, proposes a synthesis of the set of programmes, projects and services orientated at tourist development in the territory and the integrated offer of cultural, environmental assets and tourist attractions, including characteristic products of local production and oenogastronomy. Many projects valid for tourism have been inserted into the system programme, they were already identified in the different tools of local programming (PISL, programme Agreements, planning mountain communities, etc.).
Actions	1. The tourist development programme identifies a total of 135 projects. As this is an articulated programme, the degree of definition varies from project to project.
Parties involved	Riviera del Garda territorial agency for tourism Also: Province of Brescia, Consortium Riviera dei Limoni, Consortium, Riviera dei Castelli, Consortium Riviera del Garda and Morenic Hills, 20 Municipalities, Mountain Community Parco Alto Garda, private subjects, Region of Lombardy.
Phases and timeframe	Different for each project inserted in to the tourist development programme. Total realisation is foreseen by 2008.
Financial resources	The total investment of 135 projects is more than 95 million €. The Region of Lombardy has financed 4 projects for a sum of about 0.8 million € while the other projects in the programme are financed to be valid on regional, national and communitarian resources. There will be annual monitoring on the total progress of the programme.
Expected results	Qualification of tourist services in the area of Brescian Garda and for promoting the "Garda tourist product", one of the most known, visited and appreciated locations by national and international tourism. Projects aimed at differentiating and continuing the quality of the tourist offer in its different components, both of lake and mountain: the naturalistic environmental, landscape and cultural attraction and local economic fabric, with particular attention to products and services of agriculture both for small businesses and commerce, tourist reception and activities and complimentary services (catering, sport, recreation, etc.). Also to favour the consolidation, re-organisation and infrastructuring of the whole lake bank, from Gardone ato Limone, in its naturalistic and anthropic aspects – with projects of recovery and valorisation of the centres or historical nuclei – in as much as a defining area of interest for the tourist development of the whole area.
Result indicators	Increase in the national and international tourist data, improvement of use of the locations, conservation and valorisation of sites and resources, creation of infrastructures adapt tot eh purposes.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 12	OPTIMISATION OF THE TERRITORIAL TOURIST SYSTEM
Project 12.4	"The rail road from Valle Trompia to Brescia" tourist system
Description	"The rail road from Valle Trompia to Brescia" tourist system, finalised at the valorisation of historical and artistic assets of the city of Bresica, of the riverside of river Mella, of the memory of industrialisation and work (industrial archaeology) in the sites and museums of Valle Trompia. The tourist System, as foreseen by regional law 8/2004, proposes a synthesis of the set of programmes, projects and services orientated at tourist development in the territory and the integrated offer of cultural, environmental assets and tourist attractions, including characteristic products of local production and oenogastronomy. Many projects valid for tourism have been inserted into the system programme, they were already identified in the different tools of local programming (PISL, programme Agreements, planning mountain communities, programme agreement etc.).
Actions	1. The tourist development programme identifies a total of 145 projects. As this is an articulated programme, the degree of definition varies from project to project.
Parties involved	Mountain Community of Valle Trompia.

	Also: Municipality of Brescia, Province of Brescia, Brescia Tourism, 17 municipalities adhering to the Mountain Community of Valle Trompia plus the municipality of Lumezzane, individual and associated companies, other private subjects.
Phases and timeframe	Different for each project inserted in to the tourist development programme. Total realisation is foreseen by 2008.
Financial resources	The tourist development business plan comprises 145 projects for a total investment over 62 million €. Potential financing sources are various and vary according to the type of project (regional law 8/2004, FRISL, Law 36/88, PICS, negotiated planning tools, etc.).
Expected results	Structuring and promotion of tourist services in Valle Trompia, starting with the ancient rail road, highlighting the antique Valtrumpline attitude on work and commercialisation, in connection with historical and artistic assets, assimilated by content, of the city of Brescia. Qualification of the tourist services in the area with projects aimed at differentiating and continuing the quality of the tourist offer in its different components: with particular attention to products and services of agriculture both for small businesses and commerce, tourist reception and activities and complimentary services.
Result indicators	Increase in the national and international tourist data, improvement of use of the locations, conservation and valorisation of sites and resources, creation of infrastructures adapt tot eh purposes.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 13	SUSTAINABLE DEVELOPMENT OF THE TERRITORY
Project 13.1	Actuation of integrated programmes of local development (PISL).
Description	<p>Actuation of various and important integrated programmes of territorial development (PISL) in Valle Camonica, Valle Trompia and Valle Sabbia, based on environmental sustainability, development and valorisation of landscape, historical and artistic resources, inversion of demographic trend, interventions for giving rise to opportunities of work especially in tourism with new proposals of itineraries.</p> <p>Titles and leading concepts of the 14 integrated projects for local development:</p> <ol style="list-style-type: none"> 1. INTEGRATED PROGRAMME OF LOCAL DEVELOPMENT – UNION OF THE MUNICIPALITIES OF THE ALTA VALLE CAMONICA Sustainable tourist development and optimisation of local tourism as a lever in the development of inversion in demographic trend 2. S.T.A.R.T. (Sci, Turismo, Ambiente, Risposta al Territorio – ski, tourism, environment, response to territory) Implementation of the level of qualification and equipping of the territory valorising potential for more tourist attractions. Development of sustainable tourism 3. THE RAIL ROAD AND NATURALISTIC HISTORICAL ROUTES Strategy of valorisation and qualification of environmental, historical and cultural excellence in the territory for relaunching the integrated tourist offer and over the four seasons 4. INTEGRATED PROGRAMME OF LOCAL DEVELOPMENT – UNION OF THE MUNICIPALITIES OF CETO, CIMBERGO AND PASPARDO Social-economic development shared among public operators and social parties in a series of interventions able to valorise environmental and cultural resources in the perspective of relaunching tourism in the area 5. THE LAKE AND MOUNTAINS OF GARDA: QUALITY INTERNATIONAL TOURISM Integration between lake and valleys, able to define, in productive and tourist terms, the total development of the territory 6. IRON, FIRE AND WATER Rediscovery of the traditions of working iron and natural resources (water in particular) typical of the territory 7. VALORISATION OF THE ENVIRONMENTAL, CULTURAL AND ARCHAEOLOGICAL HERITAGE OF ALTOPIANO DEL SOLE Relaunch of local economy through tourism to solve depopulation problems and lack of work for young people. 8. INTEGRATED PROGRAMME OF LOCAL DEVELOPMENT OF CONCARENA Valorisation of the tourist offer and protection of environmental and historical heritage and local traditions 9. ENVIRONMENTAL TOURIST DEVELOPMENT Optimise and valorise existing tourist vocations 10. A NEW IDENTITY FOR VALLE SABBIA: ENVIRONMENT, CULTURE AND TOURISM Change the image of the Valley for the Future

	<p>11. VALORISATION OF THE ENVIRONMENTAL, CULTURAL AND ARCHAEOLOGICAL HERITAGE OF THE DISTRICT OF EDOLO AND SONICO Activate a common development policy founded on the optimisation of the territory's tourist attractions</p> <p>12. OF PARCO DEL BARBERINO AND OF VALLE DEI MAGLI Valorisation of total opportunities of the territorial context referring to the Municipalities through the creation of organised, equipped and promoted tourist routes, which allow the tourist to enjoy a diversified and widened offer.</p> <p>13. ENVIRONMENTAL, CULTURAL AND RELIGIOUS TOURISM IN THE MID VALLE CAMONICA Realise tourist routes constituting the same natural, cultural, environmental and religious attractions and which collectively allow, especially for young people, finding work in loco, no longer exclusively linked to traditional work, but primarily to tourism.</p> <p>14. P.I.S.L. of Valsaviore Favour settlement of population and favour settlement of economic activities: valorise natural resources, requalification of the tourist system and re-organisation of the urban system.</p>
Actions	The tourist development programme identifies a total of 14 projects. As this is an articulated programme, the degree of definition varies from project to project.
Parties involved	<p>Union of the Municipalities of Alta Vallecamonica, Municipality of Aprica, Mountain Community of Valle Trompia, Union of the Municipalities of Ceto, Cimbergo e Paspardo, Mountain Community of Parco Alto Garda Bresciano, Municipality of Casto, Municipality of Borno, Municipality of Cerveno, Municipality of Esine, Mountain Community of Valle Sabbia, Municipality of Edolo, Municipality of Bienno, Municipality of Niardo, Union of the Municipalities of Valsaviore.</p> <p>Also: Region of Lombardy, Province of Brescia, local Authorities of the involved territories.</p>
Phases and timeframe	Different for each project inserted in to the tourist development programme. Total realisation is foreseen by 2008.
Financial resources	<p>The total investment for the 14 projects is €107,413,459.26.</p> <p>Financing funds come from the European Regional Development Fund (FESR), the Italian State and Region of Lombardy.</p>
Expected results	<p>Innovation and qualification of tourist services in the various areas subject of the integrated intervention, in respect to the unambiguousness of the territorial reference, the necessary responsabilisation of the involved local authorities and the sustainability of the projects carried out.</p> <p>Inversion of demographic trend to depopulate, especially in mountain area communities and capability of developing new local employment.</p> <p>Particular attention to products and services in small business agriculture and commercial, and to complementary activities and services.</p>
Result indicators	Inversion in the trend to depopulate in urban areas, increase in local employment, growth and development of social services and tourist infrastructures, accommodation and museums.

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 14	ECONOMIC ANIMATION OF THE TERRITORY IN VIEW OF THE TURISTIC DEVELOPMENT
Project 14.1	Valorisation and promotion of local products linked to Longobard culture and the tourist offer.
Description	The activity of valorisation of cultural, environmental and landscape heritage run by each municipality and recently promoted in the perspective of districts and co-ordinated by the Promotions Agency of the Brescian plain, constituted by the Province of Brescia, must now raise the quality bar in order to exploit the economic added value of the heritage of Longobard evidence in the territory. This set-up requires entering into the network, didactic and divulgative readability and usability of the knowledge and evidence of Longobard people and Lombardy, but also of the entire national community. It also requires setting up organisational systems to mobilise all the resources in the territory and finalises their specific validity according to the valorisation of Longobard testimonials, so that they can become a promotional brand for a significant process of territorial marketing, capable of promoting economic development in the entire area identified as Langobardia fertillis.
Actions	<p>2. Organisation of historic-cultural and oenogastronomic tourist routes which lead to the rediscovery of signs of the presence of Longobard people in the territory of Brescia, appreciating the products and gastronomic offer of local tradition which</p>

	<p>plunges its roots into the same food culture of Longobard ascendancy.</p> <ol style="list-style-type: none"> 3. Promotion of initiatives aimed at operators in the sector of catering for the rediscovery of local traditional dishes 4. Organisation of the network of hotel and agri-tourist offer specialised in the service to the "longobardanist". 5. Preparation and entry into the network of the programming of cultural and promotional initiatives organised in the territory.
Parties subjects	<p>Ministry for Cultural Assets and Activities Region of Lombardy Province of Brescia Municipality of Brescia Municipalities inserted into the "Longobard sites Network" and neighbouring communities Regional Management for Cultural and Landscape Assets of Lombardy Superintendency for the Archaeological Assets of Lombardy CAB Foundation Dominato Leonense Foundation Civiltà Bresciana Foundation</p>
Phases and timeframe	Five year period 2008-2013

SOCIO-ECONOMIC DEVELOPMENT PLAN Brescia Territory	
Objective 15	ECONOMIC ENHANCEMENT OF THE RESOURCES OF THE TERRITORY
Project 15.1	Reutilization and relaunch of endogenous resources
Description	The project aims at launching economic initiatives referred to the guidelines of the rural development plan in the context of agri-food products and food and wine products through the protection of traditions and their use for the economic relaunch of innovative products. Moreover, the activation of food and wine services and agricultural services for tourist-economic development is envisaged
Actions	<ol style="list-style-type: none"> 1. Creation of a Database on traditions and knowledge (see Network project on the observatory on the environmental-landscape heritage) 2. Coordination activities of initiatives (Food and Wine Centre of Lombardy) 3. Participation in the exchange activities according to the Network project
Parties involved	<p>Region Lombardia Province of Brescia Municipality of Brescia Chamber of Commerce of Brescia Business categories Municipalities included in the "Network of Longobard sites" and neighbouring municipalities CAB Foundation Dominato Leonense Foundation Civiltà Bresciana Foundation Pianura Bresciana Foundation Longobardia Association Catholic University of Sacro del Cuore (Milano and Piacenza) University of Milano Slow Food Castalimenti</p>
Phases and timeframe	Five-year period 2008-2013
Financial resources	To be quantified and raised (Funds of the Rural Development Plan)
Expected results	<p>Activation of reutilization and relaunch of initiatives for the agricultural-productive and food and wine system Activation of specialized tourist initiatives Activation of a range of agricultural services in favour of the territory Coordination of reutilization and enhancement actions for the agri-food sector and the environment</p>
Result indicators	<p>Increase in tourist flows Number of activated agricultural services Number of promoted experimentations and initiatives</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 16	IMPROVEMENT OF ACCESSIBILITY TO THE TERRITORY
Project 16.1, 16.2, 16.3	16.1 Requalification and optimisation of the railway node of Varese 16.2 Realisation of international railway track of Mendrisio-Varese-Malpensa 16.3 Realisation of north east trunk road of Varese and completion of doubling the A8 motorway link
Description	<p>The area of the Municipalities of Castelseprio and Gornate Olona is located back-to-back with the interregional and international large infrastructures system of motorway, railway (towards Switzerland) and air (Malpensa airport) traffic to optimise these, the Italian Government, the Region of Lombardy and the Province of Varese according to competence, undersigned a specific programme agreement in March 2007 which foresees the operations in three steps: 2009, 2012 and 2015.</p> <p>Consequently the foreseen connections and junctions with the large infrastructures – which directly involve the Province of Varese in the phases of planning and realisation – predict and ensure direct effects on the territory both in terms of increased visibility and direct social-economic benefits for the optimisation of accessibility to the Heritage.</p> <p>In relation to this there are two railway operations and two motorway optimisation interventions of fundamental importance:</p> <ul style="list-style-type: none"> a) Requalification and optimisation of the Varese railway node b) Optimisation of the international railway section Malpensa-Varese-Mendrisio (Switzerland) with 3 million journeys forecast per year c) The realisation of the north east trunk road of Varese d) Doubling the Varese link of the A8 motorway <p>The whole of these works will requalify the role of Varese as one of the ports of Lombardy to Europe and one of the strategic nodes for the flow of goods along the North-South motorway.</p>
Actions	<p>16.1 - Reorganisation of the railway node of Varese, which includes the unification of the State Railway stations and the North Railway stations and an important urban requalification. It is an important project to requalify an area that today is strongly degraded with the realisation of a complex project on transport and it is moreover an example of how the station of the future should be, that is, also a means of gathering all the types of transport together.</p> <p>16.2 - New transfrontal railway connection Varese-Mendrisio with successive connection to Malpensa. The Ministry of the Infrastructures is committed to guaranteeing the necessary financial resources, starting from 2008, considering also that the Swiss Confederation has already arranged for financing of the interventions falling into its territory.</p> <p>16.3- Realisation of the north east trunk road of Varese. The final project was prepared by the Province of Varese and the procedure of regional Environmental Impact Assessment is in progress. Anas, Region of Lombardy and Province of Varese are committed to guaranteeing the foreseen financing and ensuring continuity in all the actions necessary for the respect of the foreseen times of completion of the works in time for the 2008 world cycling Championships.</p> <p>Completion doubling of the A8-Varese link. The Ministry of Infrastructures is committed to favouring the insertion of the financial plans of Autostrade for Italy.</p>
Parties involved	<p>16.,1 Region of Lombardy, Province of Varese, Municipality of Varese, Rete Ferrovia Italiana S.p.A. e Ferrovie Nord S.p.A., Ministry of infrastructures and transport</p> <p>16.2 Region of Lombardy, Ministry of infrastructures and transport, Railway NetworkItaliana S.p.A., Swiss Railways, Canton Ticino, Swiss Confederation, Province of Varese</p> <p>16.3 Anas, Region of Lombardy, Province of Varese</p>
Phases and timeframe	<p>2010 16.1</p> <p>2012 16.2</p> <p>2008-2009 16.3</p>
	<p>€ 108.7 million by institutional parties</p> <p>€ 203.7 million the part of Italy – Sources of finance: 137,0 million Swiss Francs on the part of the Swiss Confederation - Sources of finance: 50% Confederation, 50% Canton Ticino.</p>

	€ 63,0 million Euros – Sources of finance: ANAS, Region of Lombardy, Province of Varese, Ministry of Infrastructures
Expected results	Requalification and optimisation of railway and motorway infrastructures Improvement of vehicle flow Organised facilitations for visitors Optimisation of tourism-economic flows
Result indicators	Number of travellers on the new railway sections Number of users on the new motorway sections Number of connections between the airport of Malpensa and Varese

SOCIAL-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 17	WIDENING OF TOURIST OFFER TO INCREASE DURATION OF STAY
Project 17.1	Study and realisation of tourist “packages” Culture-Nature/Co-ordination with the “Lakes and Alps” project
Description	<p>The project foresees the co-ordination of the proposal of excellence of the archaeological Park of Castelseprio-Torba, with the community initiatives “Insubria Lakes and Alps” to build an exceptional incentive for the development of cultural and naturalistic tourist segments and to contemporarily valorise the economic-productive quality vocation of the territory, favouring – with a variety of offers – tourists to stay.</p> <p>“Insubria” is the geographical name which defines the transfrontal region comprising the provinces of Varese, Como, Verbano-Cusio-Ossola, Novara, Lecco and Cantone Ticino, that is, the pre-alpine lake region (Maggiore, Como, Lugano) on the border of Italy and Switzerland.</p> <p>An area which also includes the territories of the Municipalities of Castelseprio and Gornate Olona and which, from the economic, cultural and landscape point of view, constitutes (despite the political division and different administrations) an open space which is strongly interconnected.</p> <p>In this context the “Insubria Lakes and Alps” (www.lakesandalps.com) project was started to which over 80 Institutions and economic and cultural associations are members – gathered together since 1995 in the Regio Insubrica Working Community” – and which aims at territorial promotion and integrated tourism, founded on co-operation (transnational, transregional and transprovincial) finalised to the valorisation of endogenous resources of the territory of Insubria.</p>
Actions	<ol style="list-style-type: none"> 1. Study and realisation of Culture-Nature integrated itineraries and “packages” 2. Study and realisation of tourist-economic initiatives of Insubria focussed on the Longobard heritage
Parties involved	Province of Varese Regio Insubrica Working Community Chamber of Commerce of Varese Municipalities of Castelseprio and Gornate Olona FAI – Italian National Trust Region of Lombardy
Phases and timeframe	2008-2010 1, 2
Financial resources	Acquired € 480,000.00 from the “Insubria Lakes and Alps” project
Expected results	Optimisation of the Longobard heritage attraction with the addition of a formulated territorial tourist-economic proposal Increase in tourist stays in the territory
Result indicators	Number of integrated tourist “packages” gravitating on Heritage Increase in tourist stays in the territory

SOCIO-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 17	WIDENING OF TOURIST OFFER TO INCREASE DURATION OF STAY
Project 17.2	Improvement of the bike tracks and of the integrated bike-pedestrian track in the Provinces of Varese, Como, Lecco
Description	In relation to the operations connected with the realisation of the cycling-pedestrian network realised by the Province of Varese in agreement with the Municipalities involved, it is in the start-up phase of works – relatively to the basin of the river Olona – the section from Solbiate to Gornate Olona – in Torba, adjacent to the in grounds of the disused railway station of Valmorea.

	<p>The first section from Castellanza to Solbiate has already been completed, as has the trail round the lake of Varese which will connect to another trail along the lake of Comabbio, allowing a cycling route of considerable landscape and environmental impact to be available which will be nearly 50 kilometres long.</p> <p>An operation – which not only incentivates sustainable mobility, but also cycle tourism – is inserted into the wider framework.</p> <p>The latter includes, finally, participation in the Interreg project with the Provinces of Como and Lecco for the realisation of the equipped cycle axis which is over 200km long and will connect the locations of the most important artistic and environmental testimonials of the three Lombard provinces, starting with the Longobard heritage.</p>
Actions	1. Work starts and realisation of works
Parties involved	Province of Varese Region of Lombardy
Phases and timeframe	2008-2009 (430 days starting from 31 January 2008)
Financial resources	Own funds of the Province of Varese, the Region of Lombardy and Eurospei Funds (Interreg III) Set and liquidated: € 8,000,000.00 trail on lake of Varese € 2,200,000.00 trail on lake of Comabbio Set € 2,900,000.00 Castellanza – Gornate trail
Expected results	Connection of the cycle-pedestrian network with the archaeological area of Torba-Castelseprio Eco-compatible cultural and sporting development
Result indicators	Realisation of the cycle-pedestrian trail Increase in flows of specialist tourism

SOCIO-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 17	WIDENING OF TOURIST OFFER TO INCREASE DURATION OF STAY
Project 17.3	Optimisation of the tourist counter at Malpensa intercontinental airport
Description	<p>The role of the intercontinental airport of Malpensa is of basic importance in relation to the social economic development of the Province of Varese, the territory of which is inserted – on the basis of the executive area Plan – in the context of the “vast interregional and international area” of reference (territories of the Province of Varese, Milan, Novara and Canton Ticino/ Switzerland).</p> <p>The airport structure is located in an excellent position to represent – apart from the functions of travel and transport – a through-joint for international tourist flows in relation to a rich area of naturalistic, landscape (the great lakes) and cultural attractions, in which a place of absolute importance and visibility is reserved to the heritage of Castelseprio-Torba.</p> <p>The institution and recent operative optimisation of the Tourist Information and Accommodation Office also fits into this framework, this office was created in collaboration between the Province and the Chamber of Commerce of Varese Varese – Land of Tourism - which was already operational at the airport of Malpensa with a satisfactory flow of 100 presences per day.</p> <p>The project evaluations which had already emerged have in fact underlined the following necessities:</p> <ul style="list-style-type: none"> a) Calibrated roadway and railway infrastructuring on the complex of the local infrastructural network and on its integration with the transEurospee networks; b) Capacity of residential response on the part of the territorial context c) Medium-long term horizon for economic development
Actions	<ol style="list-style-type: none"> 1. Extend opening time to the public by the IAT Office 2. Optimise the operational capacity of the IAT Office and the tourist and informative offer 3. Co-ordinate tourist flows and incentivate stays with particular attention to the heritage of Castelseprio-Torba
Parties involved	Province of Varese Chamber of Commerce of Varese Private companies Federalberghi
Phases and timeframe	2008 1, 2, 3

Financial resources	Own funds from the Province and the Chamber of Commerce of Varese
Expected results	Increase in counter activities Increase in arrivals and tourist stays in the territory
Result indicators	Number of visitors channelled by the activities of the IAT Office of Malpensa in the hospitality structures of the territory

SOCIO-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 18	OPTIMISATION AND REQUALIFICATION OF LOCAL TOURIST BUSINESSES
Project 18.1	Optimisation and co-ordination of the "system" and of the didactic Factory offer
Description	The project addresses of the Province of Varese include the study and realisation of initiatives of incentivitation for agricultural companies to join the Region of Lombardy's programme for the creation of Didactic Factories finalised to the diffusion – above all among young people – of a correct knowledge of the importance of agriculture and its social-economic role.
Actions	<ol style="list-style-type: none"> 1. Study and realisation of initiatives for the creation of didactic Factories 2. Study and realisation of initiatives to increase the number of active agricultural farms
Parties involved	Province of Varese Region of Lombardy Chamber of Commerce Economic Associations of category Businesses
Phases and timeframe	2008-2012 1, 2
Financial resources	To be defined – Sources of finance: provincial, regional (rural development plan)
Expected results	Increase in the number of didactic factories Increase in the number of agri-tourism businesses Increase in employees in the two sectors
Result indicators	Number of the new didactic factories Number of the new agri-tourism businesses

SOCIO-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 19	ECONOMIC PROMOTION OF AGRO-FOOD PRODUCTION AND QUALITY OENOGASTRONOMY
Project 19.1	Co-ordination for the development of the territorial brand of reference
Description	At the level of "Italia Langobardorum" and realisation of a territorial umbrella-Brand network and relative guidelines is foreseen. In parallel, the Province and the Chamber of Commerce of Varese have realised a Protocol of intent for the creation of a trademark of recognition for the characteristic products of the area which manufacturers may request, observing certain directives. Considering the preliminary start-up state of the initiative of Varese, this project foresees co-ordination between local Bodies – Stakeholders and Managers of the "Italia Langobardorum" network to co-ordinate and uniform the two initiatives.
Actions	<ol style="list-style-type: none"> 1. Start-up of joint study group for the examination of the perspectives of the brands 2. Operational agreement for the co-ordination and/or combination of the initiatives
Parties involved	Province Chamber of Commerce Economic associations of category Businesses "Italia Langobardorum" network management
Phases and timeframe	2008,2009 1, 2
Financial resources	To be defined – Sources of finance from the Stakeholders
Expected results	Adoption of the territorial "Italia Langobardorum" umbrella brand Co-ordination or combination with the Varese territorial brand
Result indicators	Number of assigned uses of the territorial umbrella brand "Italia Langobardorum"

SOCIO-ECONOMIC DEVELOPMENT PLAN Castelseprio-Torba Territory	
Objective 19	ECONOMIC PROMOTION OF AGRO-FOOD PRODUCTION AND QUALITY OENOAGSTRONOMY
Project 19.2	Co-ordination for the development of oenogastronomic tourism initiatives (oenogastronomy Facility)
Description	<p>The project – which referees to the project of the institutive Network of oenogastronomical Facilities in each territory of the Site – foresees organic co-ordination between the “Italia Langobardorum” network and the two territorial projects:</p> <ul style="list-style-type: none"> a) “Varese da Gustare” in elaboration on the part of the Province of Varese in synergy with the local Chamber of Commerce and the Region of Lombardy. Purpose of the project “Varese da Gustare” is the protection of the associations, co-operatives and consortiums which produce and distribute the oenogastronomic heritage of the Province of Varese. b) “Insubria Art & Taste” proposes the rediscovery of characteristic dishes of the territory, their recipes or their “re-interpretation” based on contemporary inspiration and ability. Interpreters of restaurants in the entire Italo-Swiss transfrontal Region, the pre-alpine lakes and the characteristic products of the area. c) In the same way the project also addresses the increase in the number and quality of agri-tourism farms to offer citizens the possibility of exploiting rural heritage as a moment of refreshment, and at the same time, for keeping farmer families in the territory, conserving a heritage of knowledge and local traditions to be collected in turn, conserved in a database and valorised.
Actions	<ol style="list-style-type: none"> 1. Contribute and increase the proposal of agro-food and oengastronomic products in the “Italia Langobardorum” network (institution of oenogastronomic Facilities) 2. Use the visibility of the characteristic high quality products in all trade show manifestations 3. Use the visibility of the characteristic products in particular in 2008, at the time of the world cycling Championships hosted by Varese
Parties involved	Province Chamber of Commerce Region of Lombardy Regio Insubrica Working Community economic Associations of category Businesses
Phases and timeframe	2008 3 2008-2009 1 2008 onwards 2
Financial resources	Already acquired € 155,000.00 Foreseen for 2008 € 170,000.00 own provincial and regional sources
Expected results	Construction of an oenogastronomic network and high quality characteristic productions optimisation of international visibility of the local production
Result indicators	Number of initiatives realised Number of participants in the realised initiatives

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 20	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 20.1	Enhancement of railway infrastructures and connections and public local transport
Description	<p>The Project for Alternative Mobility, which is now being completed, envisages three mega-car parks located next to the historical centre, from where three corresponding mechanized underground or surface tracks, moving sidewalks, escalators and lifts start, the so called hectometric system. The Project was entirely designed to have no architectural barriers.</p> <p>From an environmental point of view, the new system will entail a reduction of both atmospheric and acoustic pollution with values below the levels established by the law.</p>
Actions	<ol style="list-style-type: none"> 1. First area, red colour: Car Park "Posterna"-Piazza Campello The car park will be created – on more levels – on a large area which was previously not used within the perimeter of the Medieval walls. There will be 450 parking spaces. The Project envisages an underground gallery – slightly sloped – which from the parking area will go through the historical centre in all its width; the mechanized transport systems installed in it – moving sidewalks – will transport users to the exchange platforms from where they will later go back to surface through lifts. The exits envisaged are in Piazza PIANCIANI, Piazza del Mercato and Piazza Campello. 2. Second area, green colour: Car Park "Spoletosphaera"-Piazza della Libertà The multi-level car park, opened in 2006 and completely operational since 2007, is totally underground, below a green public area and provides 400 parking spaces. It is linked to Piazza della Libertà through a long mechanized track of underground moving sidewalks. 3. Third area, blue colour: "Via del Tiro a segno"-Duomo-Rocca Albornoziana The Project envisages the creation of an uncovered car park, located in the low part of the city in the vicinity of the Basilica of San Salvatore, which will provide 152 spaces for cars, campers and coaches. A non-underground mechanized track will link the car park of "Via Tiro a segno" to Piazza del Duomo and Rocca Albornoziana. 
Parties involved	Municipality of Spoleto, Ministry for the Environment, Ministry for Infrastructures and Transport, Region Umbria, Contracting companies

Phases and timeframe	1. procedures for tenders are now under way for the completion of 61% of works; end within 2010 2. created 3. end within 2009
Financial resources	Euro 62,045,999.33
Expected results	Guarantee functionality and regulation of the areas by responding to new tourist, trade, residential and services needs while ensuring accessibility to the Historical Centre and thus reducing traffic inside it. Facilitate pedestrian access to the Acropolis
Result indicators	Number of created parking areas and spaces Number and length of created hectometric tracks Number of tourists in the historical centre

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 20	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 20.2	Interventions for an integrated transport system
Description	<p>The Project envisages the creation of an integrated and functional network of transport infrastructures by taking into consideration the recent evolution in some minor build-up areas and the needs to organize access to the city.</p> <p>The functions which the new infrastructures can perform can be summed up as follows:</p> <ol style="list-style-type: none"> Improvement and enhancement of local connections and consequent increase of mobility with new corridors at national level Decongestion of traffic flows inside the city of Spoleto and hamlets concerned by heavy goods traffic Improvement of road safety level and reduction of accidents Support for the development of important urban, residential and services areas <p>At the moment a feasibility study is under way. In particular, the intervention of the South variant which, by joining the East-West main road (the current trunk road 3 Flaminia in the South of the city) with the road of Tre Valli in the vicinity of the hamlet San Chiodo, provides an important connection point at local and supraregional level, thus improving exchange opportunities among the abovementioned trunk roads in a North-South connection system which creates a network among the Region Marche, the Umbria Valley and the Region Lazio. Moreover, a clear urban decongestion advantage will be guaranteed especially in the area of via Martiri della Resistenza where new alternative mobility systems are now being implemented. Also, the feasibility study will concern the elimination of the section of the Trunk road 3 Flaminia which goes from the South junction to the North junction. In this way, the connection between the buffer zone and the historical centre will be resorted in accordance with the ancient tracks interrupted by the viaduct in the 60s.</p>
Actions	<ol style="list-style-type: none"> Creation of new main roads outside the buffer-zone Creation of roundabouts in the main junctions outside the buffer-zone Implementation and updating of the new urban traffic Plan
Parties involved	Municipality of Spoleto, Ministry for the Environment, Ministry for Infrastructures and Transport, Region Umbria, Contracting companies
Phases and timeframe	At the moment only the time frame for projects has been established starting from 2008 to 2010
Financial resources	To be raised
Expected results	Improving functionality and road safety Rationalizing the access system
Result indicators	Km of built road Percentage reduction of pollution rate

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 21	URBAN REQUALIFICATION AND DEVELOPMENT OF THE PRODUCTION SYSTEM
Project 21.1	Creation of an integrated system of production areas
Description	<p>The Project aims at creating an “integrated system of production areas”, rationally connected, which is synergic and flexible and able to offer a wide range of solutions to the various needs of productive settlements from industry and crafts to trade.</p> <p>On the whole, the creation of a new industrial area “Flamina”, located in Fabbreria, East to the new four-lane layout of the trunk road 3 Flaminia and the completion of the existing areas according to the rules which provide for the combination of economy and environment in compliance with European, national and regional sustainable development guidelines and in line with the intense work carried out by the municipal administration through Agenda 21 are planned.</p> <p>The new area, 50 ha wide, is functional also at relation level, because it is easily accessible from local roads. Awarding and de-taxation for new settlements which are built according to good practices (green housing, renewable energy resources) are envisaged; part of the green areas, 4 ha wide, will be transformed into a thematic park on new technologies for renewable energy production.</p>
Actions	<ol style="list-style-type: none"> 1. Implementation of the project of the new industrial area Flamina 2. Creation of industrial/ small business plants
Parties involved	The Municipal Administration in convention with the Consortium for Industrial Areas Development of Terni, Narni, Spoleto and structural funds of the European Community
Phases and timeframe	The works relative to the first areas, as a whole 18 lots and 20 hectares, are terminated and the unit price per square meter is around 33.00 Euros. This cost, at present, is the lowest price for productive area in Umbria
Financial resources	To be definite and found
Expected results	Responding to new settlement needs for industrial and craft activities
Result indicators	<p>Number of companies in the area</p> <p>Employment rate</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 22	ENHANCEMENT OF THE ENVIRONMENT AND THE NATURAL AND HUMAN-AFFECTED LANDSCAPE FOR ECONOMIC PURPOSES
Project 22.1	Franciscan Itinerary – Olive Grove Path
Description	The Project envisages the creation of a track which will connect various areas related to the history of San Francesco and Franciscanism among which the City of Spoleto. In the Spoleto area, the proposed track follows the route of the Olive Grove Path, an excursion path already identified which goes through the olive area at the foot of the mountains of Spoleto characterized by banks and terraces bounded by dry stone walls.
Actions	<ol style="list-style-type: none"> 1. In the short term: The maintenance of the excursion area and the installation of safety devices, the arrangement of information boards and road signs, the recovery of historical artefacts along the path, the completion of relative cartography and a suitable information action are planned. 2. In the medium term: The creation and/ or setting up of refuges for visitors.
Parties involved	<p>Region Umbria</p> <p>Sacred Convent of Assisi</p> <p>Mountain Community of Martani Mountains and Serano</p> <p>Municipality of Spoleto</p> <p>Private companies</p>
Phases and timeframe	2009-2012
Financial resources	<p>EU, national and regional funds</p> <p>Synergies from tourist companies directly concerned in the route</p>
Expected results	Number of tourists in Spoleto area

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 23	ENHANCEMENT OF EXCELLENCE AGRI-FOOD TYPICAL PRODUCTS FOR ECONOMIC PURPOSES
Project 23.1	Development initiative of agricultural-productive and food and wine quality sectors "Spoleto Tipica"
Description	<p>The Project aims at enhancing and promoting the excellence agri-food products through the rationalization and optimization of cooperation processes between public bodies and producers/ producers consortiums at local, regional, national and international level.</p>  <p style="text-align: center;">typical food products</p>
Actions	<ol style="list-style-type: none"> 1. Structural adjustment of the Leti Sansi Palace, hosting the Historical Centre of great historical-cultural value, located in the centre of pedestrian tourist tracks, such as the permanent area dedicated to the enhancement/ promotion of agri-food quality products. 2. Organization of an area inside the Leti Sansi Palace, as a permanent "showcase" shop according to the model "market fair" 3. Coordination of the brand "Spoleto Tipica" with the brand "Italia Langobardorum" and relative provisions 4. Planning of a schedule – pre-settled and with a regional dimension – for events/ festivals/ tours/ promotions, including territorial marketing, by receiving products to be exposed/ marketed in exchange and / or covering all expenses, both for planned events and possible other non plannable needs. 5. Creation of the Consortium Spoleto Tipica also for the brand "Italia Langobardorum" 6. Communication and Marketing plan for the promotion of typical products.
Parties involved	Region Umbria, Provinces of Umbria, Chamber of Commerce, Consortium for Umbrian Reclamation, Mountain Community, Producers Consortium
Phases and timeframe	Medium term, within 2008
Financial resources	Funds to be raised by Municipality, Region Umbria, Chamber of Commerce and contributions by consortium members.
Expected results	Planning and activation of an interaction process between the public and private sector aimed at developing the local market.
Result indicators	Number of producers involved in the project Number of promoted initiatives

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 24	INTEGRATED PROMOTION OF THE TERRITORY AND PRODUCTS IN THEIR TOURIST-ENVIRONMENTAL-CULTURAL ASPECTS
Project 24.1	Recovery and reutilization of traditional methods and products
Description	<p>The Project aims at promoting agri-food quality products based on the recovery and reutilization of traditional methods and products both according to the new guidelines provided by the Rural Development Plan 2007-2013 for the relaunch of agriculture and the protection of traditional standards and according to the general objectives of the Socio-Economic Development Plan of the Network. In particular, in cooperation with the Observatory of the Landscape- Environmental Heritage and by using the Traditional Agricultural-Productive and Food and Wine Database, within the Leti Sansi Palace an area will be dedicated to:</p> <ol style="list-style-type: none"> A specialized media library, provided with publications, videos, slides, etc, illustrating the history, the production/ preparation methods, the use of Spoleto traditional cuisine; A room for free and guided tasting; A welcoming room. <p>The welcoming room will be used not only for tourist and visitors welcoming, but also for educational programmes and/ or meetings for Italian and foreign operators of trade and tourism (Chambers of Commerce, Italian Institute for foreign trade (ICE), Importers, Tour operators, authorities, etc.).</p>
Actions	<ol style="list-style-type: none"> Creation of the media library Agreement between training bodies and local stakeholders Study and creation of differentiated training opportunities
Parties involved	Region Umbria, Provinces of Umbria, Chamber of Commerce, Consortium for Umbrian Reclamation, Mountain Community, Producers Consortium
Phases and timeframe	Medium term, within 2008
Financial resources	Funds to be raised by Municipality, Region Umbria, Chamber of Commerce and contributions by consortium members.
Expected results	Creation of the media library
Result indicators	<p>Number of publications, video, etc. included in the media library</p> <p>Number of promoted initiatives</p> <p>Number of tourists and visitors</p>

SOCIAL-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 24	VALORISATION FOR ECONOMIC PURPOSES OF AGRICULTURAL AND FOOD PRODUCTS OF EXCELLENCE
Project 24.2	Initiative for the integrated promotion of both territory and produce: "Spoleto, Piazza of Agricultural and Food Excellencies".
Description	<p>The project aims at the achievement of the town at regional, national and international level, as "Piazza" of Agricultural and Food products of excellence, through a systematic action of integrated promotion of the chain, through the rationalization and optimization of the processes of collaboration with MIPAF, Public Bodies, associations of producers and events' organizers, by means of a number of prestigious town spaces and culturally prestigious containers. The project hinges on a yearly planning of events for the promotion of the chain, by the regional, national and international dimension, that systemizes the already existing events (Wines in the World, European Stars of Taste, Typical Spoleto) and the starting ones, like the International Academy of Cuisine</p>
Actions	<ol style="list-style-type: none"> Structural adjustment of Palazzo Leti-Sansi, a container in Downtown Spoleto by the high historical/cultural value, as permanent seat dedicated to the valorization/promotion of agricultural and food produce. Functional organization of the spaces within Palazzo Leti Sansi: Tasting Hall, welcome, information and commercial spaces, a permanent display for the productions, also with possibility of sales, on the model of the fair, a mediateque, dedicated to the various aspects of the agricultural and food chain and to the documentation of the events organized within the project. Usage of various spaces of the town for the realization of events.
Parties involved	Ministry for Agriculture and Forestry, Regione Umbria, Chamber of Commerce, Consorzio della Bonificazione Umbra, Comunità Montana, Producers' Association, Organizers of the events of the chain, Fund raising experts, European Planning

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
 DETAILED SCHEDULES

Phases and timeframe	Medium term, within 2010
Financial resources	MIPAF funds to be raised, Municipality, Regione Umbria, Chamber of Commerce, Private subjects, Sponsors
Expected results	Planning and activation of a process of interaction between public and private, targeted at the development of the sector market and at the promotion of both territory and produce. Strengthening of the image of the town at national and international level
Result indicators	Number of producers and products that will join the project Number of initiatives promoted Increase of tourism presences Economic growth of the sector

SOCIO-ECONOMIC DEVELOPMENT PLAN Spoleto Territory	
Objective 24	INTEGRATED PROMOTION OF TERRITORY AND PRODUCE IN ITS TOURISM, ENVIRONMENTAL AND CULTURAL ASPECTS
Project 24.3	Recovery and requalification of traditional methods and products: creation of the mark "Spoleto Tipica"
Description	The project aims at the valorization of the typical agriculture and food produce, through the "historical/cultural" recovery and the requalification of the producing methods, both under the new policies provided for by the Rural Development Plan 2007-2013 for the re-launch of agriculture and the safeguard of traditional standards, and under the general aims of the Network's Social -Economic Development Plan. In particular, going back to the Osservatorio del Mosaico Paesistico Ambientale (Environmental -Landscape Observatory) and to the database of the traditional flavours. The aim is creating a mark of origin "Spoleto Tipica", through the establishment of a municipal register of such agricultural and food produce. To support the action aiming at the economic development, the creation of an association of producers enrolled in the register will be supported, also related to the mark "Italia Langobardorum"
Actions	<ol style="list-style-type: none"> 1. Fact-finding inquiry, to identify the existence of original and characteristic agricultural and food produce, their traditional working methods, and to promote their valorization; 2. Coordination of the mark "Spoleto Tipica" with the mark "Italia Langobardorum" e related regulations; 3. Permanent exhibition of the "Spoleto Tipica" products by the display in Palazzo Leti Sansi (see Actions obj. 5.1) 4. Marketing and Communication Plan for the promotion of producers/produce of such mark, both for planned events (fairs, sector markets, educational and promotional events and so on) and for the management of the permanent exhibition space.
Parties involved	Regione dell'Umbria, Provincia di Perugia, Chamber of Commerce, Consorzio della Bonificazione Umbra, Comunità Montana, Producers and their Associations.
Phases and timeframe	Medium term, within 2008
Financial resources	Funds to be raised, Municipalities, Regione Umbria, Chamber of Commerce, Producers, Sponsors.
Expected results	Realization of the mark Spoleto Tipica Establishment of the Association Spoleto Tipica Recovery of the original and characteristic agricultural and food productions and their working methods
Result indicators	Number of initiatives promoted Increase of the productions of the local tradition Involved Producers' Market and turnover growth

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 25	URBAN INTERVENTIONS TO INCREASE TOURIST STAYS
Project 25.1	Recovery and requalification of the medieval villages for the purposes of re-settlement and tourist hospitality
Description	<p>In 2008 the requalification and reconstruction of the medieval villages of Campello Alto (castle), Acera and Agliano will be concluded, they were initiated after the earthquake of 1997 with financing set for reconstruction and foreseen by the Plans of integrated recovery.</p> <div style="display: flex; justify-content: space-around; align-items: center;">    </div> <p align="center"> <i>Campello Alto</i> <i>Acera</i> <i>Agliano</i> </p> <p>During the last weeks of 2007 most of the work was completed with the objective of supplying further elements of attraction to the territory, allowing both re-settlement of habitations and tourist hospitality in the three characteristic medieval villages and incentivating tourists to stay.</p> <ol style="list-style-type: none"> a) In Campello Alto, apart from privately owned buildings, the entire complex of the medieval walls, internal areas of the castle, the towers of the prisons and the external path of the wall have been restructured and requalified. b) In Acera public and private property recovery, maintenance work on roads and renewal of all the existing infrastructures have been carried out, as well as the re-arrangement of the church, the ancient fountain and re-qualification of the old school which will house the study Centre on sheep farming, migratory herding and mountain tradition. c) In Agliano, to the works of public and private recovery other works of public use have been added (total renovation of all infrastructures present: roadways, drainage system, water works, electrical networks, telephone networks, etc)
Actions	<ol style="list-style-type: none"> 1. Campello Alto: general technical inspection of the interventions carried out on the whole area of the castle and completion of the external path of the wall and elimination of Enel and Telecom open-air cables 2. Acera and Agliano: general technical inspection 3. Agliano: start-up of construction of road connection with the provincial road
Parties involved	Municipality Region of Umbria Private
Phases and timeframe	2008 1, 2, 3
Financial resources	15,000,000 Euros already acquired – Sources of regional and private financing for the set of work already carried out and conclusive
Expected results	Revitalisation of tourism and hospitality of three medieval villages damaged by the earthquake in 1997
Result indicators	Number of re-used habitations Number of hospitality structures Number of inhabitants and guest tourists

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 25	URBAN INTERVENTIONS TO INCREASE TOURIST STAYS
Project 25.2	Realisation of pedestrian pathways, new roadways and parking in the area of the Sources of Clitunno and related improving of the road system and signs
Description	In the immediate vicinity of the Sources of Clitunno there will be the realisation of a new and more usable roadway system in the zone of Pissignano, of pedestrian pathways and bicycle paths and a parking area for vehicles equipped for about 120 parking spaces. The work – already defined from the planning point of view will be realised by the Municipality with distributed financing following the ordinance of the Prime Minister no. 3609 of 29.08.2007 for the reclamation and visualisation of the area – will be completed with the arrangement of flower beds
Actions	<ol style="list-style-type: none"> 1. Realisation of a new system of roadways, new pedestrian pathways and bicycle

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

	paths and a parking area for 120 parking spaces at the Sources of Clitunno
Parties involved	Municipality Region of Umbria
Phases and timeframe	2008 1
Financial resources	1,750,000 Euros already acquired – Source of financing: ordinance of the Prime Minister no. 3609 dated 29.08.2007 for the reclamation and valorisation of the area
Expected results	Optimisation of roadways, paths and parking areas
Result indicators	Index of seasonal and annual occupation of the parking area

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 26	OPTIMISATION OF THE TOURIST ENTERPRISES IN THE TERRITORY
Project 26.1	Realisation of new complexes for hospitality and cultural initiatives
Description	The project, in progress of completion, was initiated in 2005 on the basis of financing obtained by the Region of Umbria and finalised to the requalification and optimisation of the Tourism-Environment-Culture chain. The set of integrated quality projects – co-ordinated by the Municipality of Campello – and presented by the same Municipality, by other local public and private bodies of the territory, was finalised to the realisation, renewal and optimisation of public and private structures and services for tourist hospitality (agritourism, country-houses, holiday homes and hotels). The activation of these synergies between public and private and between the various entrepreneurs operating in Campello sul Clitunno and in the other Municipalities for the compilation of the project as a whole, are the ingredients for the activation of a path of development and valorisation of the territory as well as the co-ordinated realisation of an “area product” for the purposes of tourist development, increased by the potential attraction of the Longobard heritage.
Actions	1. Insertion of new realisations in the tourist circuit with special reference to the promotion of “ <i>Italia Langobardorum</i> ”
Parties involved	Municipality of Campello sul Clitunno Municipalities of Spoleto and Foligno Region of Umbria Mountain Community Umbrian reclamation authority Private
Phases and timeframe	2008 1
Financial resources	2,000,000 Euros (1 million financed by the Region + 1 million financed by public and private subjects) already acquired – Source of financing Region of Umbria (measure C4 of the Single Document of regional programming DOCUP – Tourism-Environment-Culture Chain)
Expected results	Increase in the offer of tourist hospitality Improvement of tourist services
Result indicators	Number of guest tourists in the new structures Number of new employees

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 27	ECONOMIC PROMOTION OF QUALITY AGRO-FOOD AND OENO-GASTRONOMIC PRODUCTION
Project 27.1	Co-ordination for the development of the territorial Brand of reference
Description	The foreseen realisation of a territorial umbrella-Brand of the “ <i>Italia Langobardorum</i> ” network and the relative specifications which distinguish even the best agro-food and oenogastronomic productions of the territory, flanked to the parallel action already initiated by the communal Administration in concert with the economic associations of category and the business in the sector to valorise local agricultural productions and characteristic cuisine. This project therefore foresees the co-ordination between local Bodies - Stakeholders and managing Bodies of the “ <i>Italia Langobardorum</i> ” network to uniform the respective initiatives.
Actions	1. Start-up of a study group for the examination of the perspectives for the brand 2. Operational agreement for the co-ordination and/or union of the initiatives
Parties involved	Province Chamber of commerce Economic associations of category Businesses Management of the “ <i>Italia Langobardorum</i> ” network
Phases and timeframe	2008,2009 1, 2

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

Financial resources	To be defined – Sources of financing from the Stakeholders
Expected results	Adoption of the territorial umbrella brand “Italia Langobardorum” Co-ordination or union with the territorial brand of Varese
Result indicators	Number of assignments of use of the territorial umbrella brand “Italia Langobardorum”

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 27	ECONOMIC PROMOTION OF QUALITY AGRO-FOOD AND OENOAGRONOMIC PRODUCTION
Project 27.2	Co-ordination for the development of initiatives for oenogastronomic tourism (oenogastronomy facility)
Description	The Municipality of Campello has adhered to the “City of Bio” circuit (protection and valorisation of biological agro-food production) and specifically aims at the maximum qualification and valorisation of the production of olive oil, typical of this territory and highly qualified. The same actions are in progress for the protection of the agro productive and oenogastronomic Saperi of local tradition (Museum of culture and farming civilisation and study Centre on sheep farming, migratory herding and mountain tradition) and for the qualification of the catering sector. The project foresees a further opportunity to integrally qualify both the quality agro-food system (with the protection and recovery of the Saperi of tradition) and the typical <i>Social-economic network Objective 4 Project 4.1, 4.2</i> .
Actions	<ol style="list-style-type: none"> 1. Start-up of a study group for the examination of the perspectives for the brand 2. Operational agreement for the co-ordination and/or union of the initiatives
Parties involved	Province Chamber of commerce Economic associations of category Businesses Management of the “Italia Langobardorum” network
Phases and timeframe	2008,2009 1, 2
Financial resources	To be defined – Sources of financing from the Stakeholders
Expected results	Adoption of the territorial umbrella brand “Italia Langobardorum” Co-ordination or union with the territorial brand of Varese
Result indicators	Number of assignments of use of the territorial umbrella brand “Italia Langobardorum”

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 28	IMPROVE MOBILITY AND ACCESS TO THE HISTORICAL CENTRE
Project 28.1	Completion and adaptation of the traffic plan; updating of the parking plan; realisation of tourist transport services
Description	<p>The organisation for mobility in the city comes about in the expectation of a new role of centre orderer and driving force of the dynamics of the territorial development of a vast area. Mobility is managed taking care of multiple aspects connected to the preparation of tools which limit the use of opportune means for public, tourist and commercial transport.</p> <p>a) INSTITUTION OF THE COMMERCIAL TRANSPORT SERVICE (ref. form no. 9.1 in the protection plan)</p> <p>b) INSTITUTION OF ELECTRIC MINIBUS SERVICE OF PUBLIC TRANSPORT (ref. card no. 9.1 in the protection plan)</p> <p>The parking and traffic plan aim at creating the necessary preconditions for a further extension of the pedestrian island, for the valorisation of the zones of limited traffic, for improving the urban roadwork system and for sustaining the development of urban areas subject to consistent re-functionalisation.</p> <p>The elimination of parking areas around the major emergences in the buffer zone (Rocca zone, Duomo zone, Arco di Traiano..), to be transformed in pedestrian areas, within the parking Plan allows a significant increase in parking according to an integrated programme of interventions with material actions (new car parks in the structure and parking areas) and integrated management of the parking area.</p> <p>An ecological tourist shuttle service will allow the use of the historical centre following predefined courses. The shuttle terminal will be located near to the railway stations - Appia, Centrale e Rione Liberate -, to allow the intermodal exchange of transport means (from rail to wheel) and equip tourists with an efficient transport system suitable to visit historical and archaeological sites.</p> <p>The bus Network, with particular technological equipment, will allow the best welcoming for tourists, especially if they are foreign.</p>
Actions	<ol style="list-style-type: none"> 1. Completion and adaptation of the traffic plan 2. Updating of the parking plan 3. Realisation of a tourist transport service
Parties involved	Municipality of Benevento
Phases and timeframe	First phase: by 2008 Second phase: by 2015
Financial resources	First phase: to be realised with APQ "local development" funds relative to feasibility Studies of the historical centre of Benevento. Second phase. POR FESR Funds Regione Campania 2007-2013.
Expected results	Improve mobility in the historical centre Eliminate acoustic and atmospheric pollution
Result indicators	Number of available parking spaces Surface area of the pedestrian areas.

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 29	VALORISE CULTURE AS AN ENDOGENOUS ENGINE OF DEVELOPMENT
Project 29.1	Insertion of Benevento in the Artec card Campania circuit
Description	<p>"Campania Artec card" is an integrated system of museum-transport conceived in 2002 by Regione Campania and co-ordinated by Scabec. It was created with the objective of favouring the use of cultural heritage in the region through a card which facilitates visitors through the routes of the visit.</p> <p>Inserting the museums and monuments of Benevento into the Campania Artec card circuit becomes a choice of duty if the objective is the art heritage of the city, to build a tourist-friendly Campania which is ever more suited to European citizens.</p> <p>An integrated ticket lasting 3, 7, 365 days which allows access, without queuing, to the main museums and archaeological sites of the Region, to freely access 2 or more museums and, with the discount of 50%, to the remaining museums and monuments inserted into the circuit and to travel over the network of public transport inserted into the circuit and on the special dedicated shuttles.</p> <p>The Campania Artec card is sold in a kit which contains a guide to the museums and the services in Italian and English and the ticket for "Unico Campania" transport. The integrated museum and transport ticket has become one of the certainties of the regional programming</p>
Parties involved	<p>Regione Campania</p> <p>Regional Management of cultural assets of Campania</p> <p>Province of Benevento</p> <p>Municipality of Benevento</p>
Phases and timeframe	By 2008
Financial resources	Resources of the Authorities
Expected results	Insert Benevento into the art circuit at a regional level and increase tourist flows.
Result indicators	Number of tourists using the ticket

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 30	OPTIMISE THE INFRASTRUCTURES FOR CULTURE
Project 30.1	Planning and realisation of a Congress Centre and a Theater tent
Description	<p>The theatre fair "Città spettacolo" which takes place in Benevento at the beginning of September, has a history of nearly thirty years. This event has also permitted the insertion of Benevento in the theatre circuits of a national character. Contrarily the City does not have structures able to house events which foresee a high number of spectators, if not the Teatro Romano, with considerable risks to the preservation of the asset.</p> <p>It is therefore necessary to realise structures suited to house city events.</p> <p>The Administration of Benevento has foreseen for this purpose the realisation of a congress structure of a total capacity of 2000 seats. The structure will be realised on the banks of the river Sabato, in the Libertà district, for which radical urban requalification is foreseen. The position and entity of the structure will determine the constitution of a facility destined to cultural activities of social gathering.</p> <p>Furthermore, while the congress centre is being built, a temporary frame structure will be assembled to provisionally house cultural activities.</p> <p>Connected actions</p> <ol style="list-style-type: none"> MULTIMODAL INFORMATIVE CENTRE (ref. Awareness and Promotion plan). INFORMATIVE POINT NETWORK (ref. Awareness and Promotion plan). Design of the civic contemporary art gallery at hortus conclusus (ref. Enhancement plan).
Actions	<p>Design and realisation of a congress centre</p> <p>Design and realisation of a tent-theatre</p>
Parties involved	Municipality of Benevento
Phases and timeframe	<p>First phase: by 31.12.2010.</p> <p>Second phase: by 31.12.2015.</p>
Financial resources	<p>POR Campania 2000-2006 measure 4.6 for € 7,500,000</p> <p>POR FESR Campania 2007-2013 for € 7,500,000</p>
Expected results	Optimise the city's tourist offer above all in relation to congress tourism and concerning the realisation of large events of a cultural nature.
Result indicators	Number of events realised in a year.

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.1	Activation of training courses of operators for marketing of cultural asset
Description	The training course for operators marketing cultural assets has the objective of supplying educational requirements at a local level of managing the Cultural Assets, as there is an evident lack of professional profiles with directorship functions inside the museums, management and valorisation agencies, public administrations, institutions engaged in the protection, conservation and valorisation of Cultural Assets, given the exceptional dimension of public investments finalised to restoration, recovery and valorisation of Cultural Assets and to the creation of a multiplicity of new cultural centres. The intention is to train a figure equipped with highly technical competences, for discussions with the professionals operating in the field of valorisation, a figure similar to the profile of a Project Manager
Action	<ol style="list-style-type: none"> 1. Identification of formative needs 2. Planning of courses 3. Actuation of courses
Parties involved	Regione Campania Municipality of Benevento
Phases and timeframe	First phase: by 2008 Second phase: by 2015
Financial resources	POR FSE 2007-2013 Regione Campania,
Expected results	Increase employment in the tourist sector Develop the local economy Manage cultural heritage in a co-ordinated manner.
Result indicators	Number of operators trained in the sector

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.2	Activation of training courses of experts for the creation of businesses in the tourist section
Description	Training for business creators in the tourist sector is focussed on the knowledge in matters connected to the specific working typology. The topics of examination regard the different corporate legal forms, the local tourist market, the company and its organisation, computerisation for the company and marketing in the business project.
Actions	<ol style="list-style-type: none"> 1. Identification of formative needs 2. Planning of courses 3. Actuation of courses
Parties involved	Regione Campania Municipality of Benevento
Phases and timeframe	First phase: by 2008 Second phase: by 2015
Financial resources	POR FSE 2007-2013 Regione Campania,
Expected results	Increase employment in the tourist sector Develop the local economy Manage cultural heritage in a co-ordinated manner.
Result indicators	Number of operators trained in the sector Number of businesses created

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.3	Activation of a master in organisation of events and congresses
Description	The Master in organisation of events and congresses is finalised to the formation of new professionals: "Events Managers" expert in the field of modern communication, professionals able to conceive, design, realise and promote different types of events of a cultural and artistic nature and actively participate in the realisation of conventions, meetings and congresses
Actions	<ol style="list-style-type: none"> 1. Identification of formative needs 2. Planning of courses 3. Actuation of courses
Parties involved	Regione Campania Municipality of Benevento
Phases and timeframe	First phase: by 2008 Second phase: by 2015
Financial resources	POR FSE 2007-2013 Regione Campania,
Expected results	Increase employment in the tourist sector Develop the local economy Manage cultural heritage in a co-ordinated manner.
Result indicators	Number of operators trained in the sector

SOCIO-ECONOMIC DEVELOPMENT PLAN Benevento Territory	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.4	Activation of courses for training orientators and tourist guides
Description	The formation of tourist guides and tourism orientators has the primary objective of qualifying, in the area of Benevento and province, professionalism which, through the training before the exam of enablement to exercise the activity, may carry out the profession of Tourist Guide either as independent individual or associated work or as an employee c/o tourist agencies and hotels. This is about professionalism, the characteristics of which are standardised at national/regional level. The tourist orientator is a professional figure able to know and apply the main basics in matters of professional orientation, the methodologies of running orientative activities, the norm which governs orientation, the technical tools for supplying the balance of competences. On the other hand the guide has the task of accompanying individuals or groups of people, with the purpose of illustrating the historical, artistic, monumental, landscape attractions as well as the productive resources of the territory, supply detailed information
Actions	<ol style="list-style-type: none"> 1. Identification of formative needs 2. Planning of courses 3. Actuation of courses
Parties involved	Regione Campania Municipality of Benevento
Phases and timeframe	First phase: by 2008 Second phase: by 2015
Financial resources	POR FSE 2007-2013 Regione Campania,
Expected results	Increase employment in the tourist sector Develop the local economy Manage cultural heritage in a co-ordinated manner.
Result indicators	Number of operators trained in the sector

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.1	Realisation of intermodal area with the creation of an overground railway through restarting the complementary Foggia – Handcraft-Industrial Zone of Macchia railway line and constructing a tourist arrival point
Description	Intermodal area: optimise railway transport restoring operation of the exiting railway line which, by means of a branch point of the Foggia – Manfredonia platform, directly connects Foggia airport to the Handcraft–Industrial Zone of Macchia, in the territory of Monte Sant'Angelo. It is a rail track the use of which could be dual: an arrival point road for tourists and residents, with the function of overground railway also serving the nearby habitation of Manfredonia and goods transport service for the companies working in the contiguous Handcraft–Industrial zone with the main railway node of Foggia. The airport of arrival in the territory of Monte Sant'Angelo is located in the area behind the Shopping Centre. From here, therefore, connection towards the internal roadways and then towards the candidate site, can be ensured by the integrated combination of public transport systems on the existing roadways, also including, in perspective, a cableway. Access to the sea will be guaranteed through the construction of the tourist arrival point for which works will begin by the spring of this year. Its function will be at the service of the territory of Monte San'Angelo and the contiguous Handcraft–Industrial area. It will have space for 200 moorings and at the back of the dock will be equipped with all the services related to welcoming tourists and the possibility of carrying out maintenance on the vessels and launch of the manufacture of the shipyard INSIDE s.r.l. (company of the Gruppo Bolici) operating in the nearby handcraft area. This work was conceived following an Agreement of Programme between Public and Private subjects and its realisation is charged totally to the private subject. Management will also be charged to the private subject and regulated by apposite convention with the municipality of Monte Sant'Angelo. The gruppo Bolici, manufacturer-manager of the work, has already carried out similar operations in other locations in the Mediterranean and because of the services offered in the settlement of Macchia and the other added value represented by its experience in the sector, is able to guarantee great vitality in the port also in terms of number and quality of tourist docks.
Actions	<ol style="list-style-type: none"> 1. Consultation between the public and private Bodies necessary for reaching objectives; 2. Design and planning of the interventions; 3. Execution of the interventions
Parties involved	Municipality of Monte Sant'Angelo Province of Foggia Region of Puglia Ministry of Infrastructures and Transport Mixed and private consortium bodies and companies.
Phases and timeframe	2010-2015
Financial resources	Structural funds Public funds of various authorities according to competence and the outcomes of programming
Expected results	Considerable improvement in the infrastructure system with maximum intermodality between the three types of transport.
Result indicators	Increase in tourist flows towards the site and its territory.

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.2	Realisation of an route alternative to the section of the trunk road 272 Monte Sant'Angelo San Giovanni Rotondo
Description	Trunk road 272 San Giovanni Rotondo – Monte Sant'Angelo is the main roadway axis from which over 70% of tourists arrive at the candidate site. 21km long, currently has sections which slow travel down due to objective technical characteristics. It requires general revision and modernisation of the horizontal and vertical signal system as well as optimisation of protection devices on some margins. The project for the intervention has already been drawn up by ANAS and approved by the Borough Council which has approved the variation to the urban plan to allow the realisation of new sections for considerably reducing travel time, also improving the general level of safety of the road itself. Abandoned before its site set- up by ANAS, due to administrative vicissitudes which occurred during the last part of the nineties

	and correlated to the re-organisation of the structure of the heritage of the roadwork network in Italy, it has currently been restored by the Borough Administration which has negotiations of consultation in progress with the Ministry of Transport and Infrastructures for refinancing and realisation of the work. Its realisation will allow safer and higher quality thoroughfare to the flow of pilgrims which reach Monte Sant'Angelo from the nearby Sanctuary of San Pio da Pietrelcina in San Giovanni Rotondo.
Actions	<ol style="list-style-type: none"> 1. Consultation between the public and private Bodies necessary for reaching objectives; 2. Design and planning of the interventions 3. Execution of the interventions
Parties involved	Municipality of Monte Sant'Angelo Province of Foggia Region of Puglia Ministry of Infrastructures and Transport Mixed and private consortium bodies and companies.
Phases and timeframe	2010-2015
Financial resources	Structural funds Public funds of various authorities according to competence and the outcomes of programming
Expected results	Considerable improvement in the infrastructure system with maximum intermodality between the three types of transport.
Result indicators	Increase in tourist flows towards the site and its territory.

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.3	Implementation of the consortium activity for the full utilization of the Gino Lisa airport of Foggia as privileged airport for tourist flows of foreign origin
Description	Gino Lisa (Foggia) airport is a level III airport with tourist and religious air services, serving the area of Gargano, civil protection and general aviation services. The optimisation of tourist traffic and the development conditions of the airport in relation to its multifunctionality respect to the provincial economic system has for some time been the centre point of planning action dictated by the government organisations of the territory of the Province of Foggia. Its valorisation is among those contained in the proposal of the Agreement of Framework Programme between the Province of Foggia and the Region of Puglia prepared in 2006 for the social economic relaunch of the provincial territory of Foggia because of the planning of structural funds 2007 – 2013. Its growth it currently one of the primary objectives of Promodaunia, the agency for the promotion and valorisation of the "Sistema Capitanata", public and private participant companies, one of which is the Province of Foggia, together with the individual municipalities, among which Monte Sant'angelo, have also appointed the mission finalised to sustaining and actuating actions and strategies which are shared for the implementation of international tourist air traffic in the airport of Foggia. The Unesco candidature is certainly an added value for the purpose in question which will certainly produce a considerable increase in demand able to interest management companies of the airport structure with more availability and resources.
Actions	<ol style="list-style-type: none"> 1. Consultation between the public and private Bodies necessary for reaching objectives; 2. Design and planning of the interventions 3. Execution of the interventions
Parties involved	Municipality of Monte Sant'Angelo Province of Foggia Region of Puglia Ministry of Infrastructures and Transport Mixed and private consortium bodies and companies.
Phases and timeframe	2010-2015
Financial resources	Structural funds Public funds of various authorities according to competence and the outcomes of programming
Expected results	Considerable improvement in the infrastructure system with maximum intermodality between the three types of transport.
Result indicators	Increase in tourist flows towards the site and its territory.

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.4	Completion of the high-speed roadway network of Gargano in the section Mattinata – Vieste and internal road of connection with the trunk road 272 Monte Sant'Angelo-San Giovanni Rotondo
Description	The completion of the gallery system to connect Vieste to Mattinata in the programme of implementation of the high-speed roadway network of Gargano and the realisation of a new internal branch point for connection with trunk road S.S. 272 Monte Sant'Angelo-San Giovanni Rotondo, through the valley of Carbonara, is a territorial objective shared by the Province of Foggia and contained in the planning document mentioned above. It is considered of great importance for defining the elimination of the current bottleneck in the connecting infrastructures between Gargano Nord, the economic facility of which revolves around the beach tourism economy of municipalities such as Vieste and Gargano sud, characterised by a particular richness of the territory in terms of religious, cultural, gastronomic and naturalistic tourist routes. Its material realisation, even if long term, will allow better functionality for businesses and tourist flows thanks to the speed of transport and the connections between the two areas complimenting each other in terms of tourism.
Actions	<ol style="list-style-type: none"> 1. Consultation between the public and private Bodies necessary for reaching objectives 2. Design and planning of the interventions 3. Execution of the interventions
Parties involved	Municipality of Monte Sant'Angelo Province of Foggia Region of Puglia Ministry of Infrastructures and Transport Mixed and private consortium bodies and companies
Phases and timeframe	2010-2015
Financial resources	Structural funds Public funds of various authorities according to competence and the outcomes of programming
Expected results	Considerable improvement in the infrastructure system with maximum intermodality between the three types of transport
Result indicators	Increase in tourist flows towards the site and its territory

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.5	Realization of the Macchia Madonna delle Grazie – Historic Centre of Monte Sant'Angelo cableway
Description	The construction of a cableway which connects the plain of Macchia with the Historical Centre of Monte Sant'Angelo is a project for which the territory has been waiting a definitive relaunch for some time. The final planning stage is already available; the section has a travelling time of about 5 minutes: sufficient time for the tourists coming from the south (Manfredonia, tourist arrival point etc.) to directly reach the buffer zone from which to make the visit to the Michaelic sanctuary. Its realisation will, moreover, give a decisive push to the valorisation of the marine of Monte Sant'Angelo, thanks to the possibility of combining the cool summer climate of the mountain to beach tourism through direct connections between the cableway station downstream and the beaches of the seacoast. For this reason its realisation will be included in a composite project of valorisation of the coast, currently in the study phase and of the territory of the Plain of Macchia from a tourism viewpoint according to regimes of environmental compatibility and in full respect of the vocations of the territory.
Actions	<ol style="list-style-type: none"> 1. Consultation between the public and private Bodies necessary for reaching objectives; 2. Design and planning of the interventions 3. Execution of the interventions
Parties involved	Municipality of Monte Sant'Angelo Province of Foggia Region of Puglia Ministry of Infrastructures and Transport Mixed and private consortium bodies and companies.
Phases and timeframe	2010-2015

Financial resources	Structural funds Public funds of various authorities according to competence and the outcomes of programming
Expected results	Considerable improvement in the infrastructure system with maximum intermodality between the three types of transport.
Result indicators	Increase in tourist flows towards the site and its territory.

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.6	Interventions of improvement on the road network
Description	<p>The internal roadway system of the inhabited centre of Monte Sant'Angelo has its weak point in the by-pass of which the north side, foreseen in PRG, has not yet been activated with consequent heavier vehicle traffic on the main road passing inside the buffer zone and in front of the external atrium, of the Basilica.</p> <p>Even if the urban traffic plan significantly limits the travel of vehicles by means of the pedestrian crossing time bands, to realise the best conditions of protection and valorisation of the site, it is necessary to activate the forecasts of P.R.G. concerning the north side of the by-pass. This intervention, the technical feasibility of which has already been verified, will allow the establishment of a new entrance way to the city on the north side in alternative to the current section of road which coasts the site. The distinct orographic conformation of the involved land, moreover, will allow the possibility of localising new spaces respect to the site and a car park to the north of the buffer zone, in full compatibility with the landscape of the locations. Finally, the work will be of great advantage to the residents in that it will consent safety interventions on internal urban roadways finalised to considerably lightening traffic in the city which currently travels over a long section in high density zones with consequent inconvenience to residents.</p> <p>PRG plan with evidence of the northern by-pass route according to the feasibility study carried out.</p>
Actions	<ol style="list-style-type: none"> 1. Appointment of the task of compiling the executive project 2. Implementation of project approval procedures 3. Implementation of call to tender for appointing the works 4. Execution of works 5. Realisation of roundabouts in the main branch points outside the buffer-zone 6. Re-organisation of the Traffic Plan;
Description	Municipality of Monte Sant'Angelo Superintendency of Cultural and Landscape Assets Gargano National Park
Actions	2010-2014
Parties involved	Municipality of Monte Sant'Angelo Supra-municipal bodies to be defined
Phases and timeframe	Improve functionality and safety of the roadway network Rationalise the access system More availability of areas for parking in areas near to the buffer zone
Financial resources	Improvement in vehicle flow in an area near to the historical centre and reduction of traffic in the buffer zone

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.7	Improvement of road signs
Description	The motorway and road network of the Province of Foggia currently has a good road sign system for directions towards the Gargano in general and to the city of Monte Sant'Angelo. The project proposes the implementation of these road signs and their enrichment using specific advertising boards inherent to the site with specific recalls regarding the Unesco candidature. The operation will allow the establishment of initial diffused advertising of predictable advantage which, in the case of effective inscription of the site in the Unesco list, will only have to be updated.
Actions	<ol style="list-style-type: none"> 1. Preliminary agreement between the Municipality of Monte Sant'Angelo, ANAS, Province of Foggia and private subjects managers of advertising spaces in concession; 2. Realisation of the map of motorway/road networks and the strategic and/or sensitive points respect to vehicle flow to the Gargano and within it; 3. Realisation of advertising boards and road signs 4. Appointment of the service and placement of the boards.
Description	Municipality of Monte Sant'Angelo ANAS Province of Foggia Private subjects
Actions	2010-2014
Parties involved	To be defined- sources of financing: municipal, provincial and regional
Phases and timeframe	Better visibility of road access towards Monte Sant'Angelo Facilitation for visitor flows
Financial resources	Number of road signs and advertising boards Increase in quality excursions

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 33	INCREASE IN TOURIST STAYS
Project 33.1	Preparation of differentiated tourist "packages" and offers
Description	<p>The project proposes the extension of tourist stay times through the preparation of integrated tourist packages (itineraries in the territory) and differentiated offers for the various periods of the year.</p> <p>The itineraries have the added function of removing the pressure from Heritage and placing the benefits of the force of attraction of the Heritage itself onto the wider territorial area of the Gargano and the Province of Foggia.</p> <p>Differentiated offers have the function of gathering the various opportunities offered by the territory of Monte Sant'Angelo and the Gargano during the course of the year to formulate tourist-economic proposals able to deseasonalise the flows</p>
Actions	<ol style="list-style-type: none"> 1. Agreements with local tourist operators for the definition of alternative tourist offers and packages at lower prices. 2. Promotion at national and international level of differentiated proposals 3. Activation of collaborations with tour-operators and social, juvenile, student and religious tourism associations
Description	<p>Municipality of Monte Sant'Angelo Mountain Community of Gargano Gargano National Park Economic Categories and Associations Province of Foggia Region of Puglia Stakeholders Network management body Tour-operators Social, juvenile, scholastic and religious tourism associations</p>
Actions	Yearly scheduled
Parties involved	To be defined – Sources of financing: municipal, regional, national and private
Phases and timeframe	Increase in the tourist offer of the Territory Implementation of stays
Financial resources	Increase in presences in the hospitality system

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 33	INCREASE IN TOURIST STAYS
Project 33.2	Structuring of a plan to incentivate the creation of a receptive system
Description	<p>The distinct conformation of the historical centre and the average size of the properties which compose it, constitute ideal elements for structuring a first nucleus of habitations to be destined to the "diffused hotel" accommodation". The good number of public services and structures in the area ensure the possibility of supply logistic support for study seminars, conventions, exhibitions, music and prose fairs. The planning of the intervention foresees the moves of the start up of forms of mixed management for the identification of surveyable properties to be restructured and placed on the hotel market in relation to tourist packages combined to the request of specialist tourist flows.</p>
Actions	<ol style="list-style-type: none"> 1. Identification of mixed corporate structures for managing the diffused hotel 2. Recognition of the property heritage available in the historical centre 3. Planning of acquisitions and restructuring 4. Realisation of co-ordinated illustrative material and its distribution 5. Agreements with hospitality operators 6. Promotion of integrated economic proposals
Description	<p>Municipality of Monte Sant'Angelo Superintendencies Economic categories and associations Province of Foggia Region of Puglia Stakeholders Network management body</p>

	Tour-operators Social, juvenile, scholastic and religious tourism associations
Actions	2010-2012
Parties involved	To be defined – Sources of financing: communal, regional, national and private
Phases and timeframe	Increase in the offers for specialist tourism implementation of stays
Financial resources	Increased presences in the hospitality system

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 34	DEVELOPMENT AND OPTIMISATION OF THE URBAN PRODUCTIVE SYSTEM
Project 34.1	Realisation of P.R.G. forecasts in relation to the areas destined for craftsmanship production in the periurban area and relaunch of productive and new entrepreneurial activities
Description	The municipality of Monte Sant'Angelo has areas destined for handcraft production localised to the east of the populated area in an area contiguous to the urban parameter. After years of revision of the areas in relation to the effective demand of the market and the difficulties correlated to the physical conformation of the territories involved, up to today the settlements are in the phase of concrete realisation. In particular, on the part of a consortium of private operators, in progress are the workshop areas for programmed handcraft production in the P.I.P zone – location of Stinchitiello, while in the phase of constitution is the public-private consortium for the realisation of the other P.I.P. handcraft area in the location of Santa Croce, contiguous to the former. The programmed workshops will allow the transfer of all the productive activities currently operating in the populated area to the handcraft zone, thus allowing the elimination of conditions of unease both for the operators and the residents, guaranteeing, also, the availability of productive spaces for the new entrepreneurial realities.
Actions	1. Completion of area P.I.P Stinchitiello 2. Constitution of consortium to realise area P.I.P. Santa Croce
Description	Municipality of Monte Sant'Angelo Private entrepreneurs
Actions	Completion of area P.I.P. Stinchitiello and transfer of businesses: by 2011; Constitution of consortium area P.I.P Santa Croce: by 2008 Works begin: by 2009 Closure of works and transfer of businesses: 2015 onwards
Parties involved	Fees for the realisation of works charged to the consortium by deduction of fees
Phases and timeframe	2010-2012
Financial resources	Cubic metres of structures for handcraft facilities Increase in work number of commercial activities

SOCIO-ECONOMIC DEVELOPMENT PLAN Monte Sant'Angelo Territory	
Objective 35	REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES IN THE TERRITORY
Project 35.1	Safeguard agro-food traditions and their use for the economic relaunch of innovative productions of quality
Description	The project is aimed at the valorisation and promotion of quality agro-food production based on the recovery and requalification of traditional methods and products. Preliminary research will be carried out following four guidelines: A. Recognition of agro-food and oenogastronomic traditions and the 'Saperi' of the territory (interviews) and their cataloguing in a dedicated data-base B. Research aimed at historical archives C. Verification of productive processes connected to the tradition and already initiated in the territory and the support of new projects D. Support of safeguarding initiatives relative to endemic vegetable species The cognitive phase – co-ordinated by a scientific centre of applied research (observatory on the landscape-cultural mosaic) – will be followed by the experimental and economic-promotional phase of the agro-food products of high qualitative content, realised using eco-compatible and sustainable methods inspired by Tradition.
Actions	1. Studies on the agro-productive micro-chains and agro-food networks 2. Co-ordination of research and actions through the institution of the Observatory

9. IMPLEMENTING THE MANAGEMENT PLAN

9.1 Mechanism for Management Plan implementation

The management of the Site whose nomination is submitted for inscription on the World Heritage List is an ongoing process that, for the past several decades, has striven to preserve and enhance its artifacts. The rationale at the basis of the Management Plan is the need to improve the link between the Longobard heritage and pertinent territories and to increase awareness of resident population concerning its cultural identity. Finally, the aim of the plan is also to favor conditions for economic growth that are respectful of the cultural value of those territories. The following are the prerequisites to achieve these objectives:

- A strong involvement of numerous interested public and private bodies;
- An optimal level of integration and coordination among these bodies.

During the phases of elaboration of the Site Management Plan, the involvement of numerous public and private bodies, each in charge of a specific Longobard monumental complex and the pertinent territory, gave proof of great political and technical collaboration capacity. That collaboration has enabled the identification of common objectives and the definition of strategies, and has been officially sanctioned by a *Memorandum of Understanding* signed in Rome by institutional representatives during a public ceremony (see attachment 1 in Nomination Format). With this document, all the stakeholders have committed to coordinate their efforts to protect, enhance and promote Longobard heritage, together with the natural and cultural resources of their territories, with the aim to spur their socio-economic development.

Over two hundred experts, located across the Site, have elaborated the main tool of this coordination: the Management Plan, which defines projects and actions to implement common objectives. Meetings and focus groups at the local, regional, and national level have been coordinated by the UNESCO World heritage List Office of the Italian Ministry for Cultural Heritage and Activities. An intranet site has been set up to provide all concerned parties with pertinent documentation, ensuring maximum coordination.

In order to guarantee the implementation of the Management Plan, and the effectiveness of the projects and actions it includes, a more structured and effective management of the Site has been necessary. To guarantee a unitary vision that will remain unmarred by possible changes in political leadership over the long term, or varying schedules of implementation for separate parts of the project, prerequisites are as follows:

- Co-ordination of actions, ensuring uniformity across actions of parties marked by different areas of expertise;
- common policies to create synergies among different sectors and strategies;
- pooling of resources to obtain necessary support for the implementation of planned actions;
- sharing and complementing various types of expertise and respective areas of responsibility to increase efficiency.

In early October 2007, a meeting of the stakeholders tackled these issues, including defining responsibilities of involved parties, and the most appropriate legal forms the Management Plan and its governing structure should adopt.

Concerning areas of responsibility, the governing structure has to guarantee the following:

- the coordination of parties, policies, resources and responsibilities as specified above but without taking on specific and direct responsibility for the implementation of single projects or actions. The Site is very vast and includes monuments disseminated in Italy from north to south. The implementation of specific plans and projects therefore has to be carried out by local "operative structures" that are being set up for the purpose;
- the monitoring of various phases of implementation of projects and respective reports, in addition to providing possible corrective feedback that might readjust programs, modifying the sector Plans as needed.

As for the juridical form that has to be assigned to this coordinating structure of the Management Plan, it has to be such that it guarantees:

- representation of all stakeholders;
- the possibility to access and directly manage financing sources for network activities.

To that end, the juridical forms of organizations under common control as envisaged by the Italian law have been considered, and a few initial suggestions have been made that will be voted upon in the next stakeholders' meeting to be held in March 2008.

The CAB Foundation in Brescia has offered to house the network operative structure in its headquarters and representatives of involved institutions are already at work to create the “operative structures” of management in their respective offices.

Until the management structure of the Site is in place, which should happen within a few months, the implementation of the Plan will continue being carried out by the Work Group.

As regards management structure developments see Socio-economic Development Plan – objective 1 – project 1.1.

In short, in 2008 a pro-tempore Network Authority was set up; in 2009, this body led to the “*Italia Langobardorum*” Association, which is the current managing structure of the whole network.

This Association, also through the involvement of all partners and stakeholders, the establishment of working groups on matters concerning the specific five Plan, the allocation of necessary resources, will ensure:

- **the co-ordinated management of the separate components of the Serial Property,**
- **the coordinated implementation of the networking actions provided for by the Management Plan as well as the integration of the actions planned for each site,**
- **the monitoring, evaluation and feedback of the Management Plan,**

after all:

- **the effective protection, conservation, promotion and enhancement of the nominated serial property for present and future generations,**
- **a sustainable contribution to the social and economic development and to the quality of life of local communities (with reference the *Budapest Declaration* adopted by the World Heritage Committee during its 26th session)**

9.2 Analysis of funding sources

Concerning the implementation of projects and involved institutions in each of the network areas: Institutions and Agencies have made a commitment to improve effectiveness of regular and extraordinary financing sources with the aim to guarantee implementation of the activities included in the Management Plan for the Site whose nomination is put forward for inscription on the World Heritage List and to guarantee necessary coordination among projects. That has enabled the completion of some projects and the launching of others (see Chapters 1 and 3). In addition, the same Institutions and Agencies have set their budgets and financial agendas according to the common policies of the Management Plan and have initiated necessary procedures to obtain further financing, as envisaged by the budget law of Italy.

The territorial fragmentation of the serial property “The Longobards in Italy. Places of the power (568-774 d.C.)” entails, however, an extreme differentiation of the intensity of funding of northern and central Italy as opposed to the southern regions (Campania and Puglia), which will have to be compensated by the network. As for the EU Programs, all regions are equally entitled to access to direct funds, a specific type of structural funds, because financing rates are previously established. Territorial cooperation programs are those most apt to be effectively used for the launching and support of network activities (INTERREG VC). Another tool, the GECT (Groupe Européen pour la Coopération Territoriale REG CE 1083/2006), can also be used to establish a thematic network at the European level, which could include foreign regions that are marked by vestiges of Longobard culture. For certain specific aspects, it is also possible to refer to other EU programs, such as Culture 2007-2013, and other sources of funding for research, such as the 7th Framework Program on Research FP7.

Additional potential sources of funding for the activities included in the Management Plan are structural funds (indirect funds) managed by the Italian State on the basis of the objectives and the ten priorities that have been defined at the National level with the Strategic National Framework (QSN). They are the following:

MACRO-OBJECTIVES	Priorities
a) To develop awareness and knowledge circuits	<ul style="list-style-type: none"> • Improvement and enhancement of human resources (Priority 1); • Promotion, enhancement and dissemination of research and innovation to increase competitiveness (Priority 2)
b) To increase life quality, security and social integration over the territory	<ul style="list-style-type: none"> • Sustainable and efficient use of environmental resources (Priority 3); • Social integration and services to improve quality of life and attractiveness of the territory (Priority 4)
c) To strengthen the productive structures, services and competitiveness	<ul style="list-style-type: none"> • Enhancement of natural and cultural resources to increase attractiveness and development (Priority 5) • Networks and connections to improve mobility (Priority 6); • Competitiveness of productive systems and increased employment rates (Priority 7); • Competitiveness and attractiveness of cities and urban systems (Priority 8).
d) To Internationalize and modernize	<ul style="list-style-type: none"> • Attraction of investment, exports, and resources from foreign countries (Priority 9); • Governance, institutional capacity, competitive and effective markets (Priority 10).

The main financial reference points for the indirect funds managed by the Italian State are the PON (Programmi Operativi Nazionali, or National Operative Programs). These include the PON for Security, Education, Research and Competitiveness, Networks and Mobility, Governance and AT. The PON are managed through the Intesa Istituzionale di Programma [Institutional Program Agreement] and the Accordi di Programma Quadro tra lo Stato e le Regioni [Framework agreements between the State and the Regions]. In addition, each region can manage structural funds through the Programmi Operativi Regionali [Regional Operative Programs] FESR and FSE. Although the various EU, national and regional funding programs can be used interchangeably and together, essentially:

1. The Fondo Sociale Europeo (FSE) [European Social Fund] can be used for research activities
2. The Fondo Europeo di Sviluppo Regionale (FESR) [European Regional Development Fund] is most suitable for activities involving preservation, protection, enhancement, promotion and economic development.

Those Regions that aim to “converge,” such as Campania and Puglia, in the case of the nominated property, can utilize the Programmi Operativi Interregionali (POIN) [Inter-Regional Operative Programs] focusing on issues of the Environment, Tourism, and Cultural Affairs. That latter program, for example, could be used to implement the *Via Sacra Langobardorum* project, involving Benevento and Monte Sant’Angelo.

Furthermore, the established “Italia Langobardorum” Association, which is the current managing structure of the whole network, guarantees the necessary financial support to implement the net project, by using the resources allocated by the members according to the principles of subsidiarity and proportionality set forth by the European Union.

Spoleto 5 th June, 2009. Signature of the “Italia Langobardorum” Association

10. MONITORING AND REVIEWING THE MANAGEMENT PLAN

In order to complete the management process, the monitoring system must be set up. It must be able to assess the real implementation of planned objectives and their impact on the territory at cultural, social and economic level, so as to enable the implementation of an effective error correction feedback for the Management Plan.

For the monitoring, a control model – working on more levels – which makes use of adequate analysis parameters will be used. In particular, through specific and differentiated indicators, the management plan will be evaluated and verified on three different levels which start from monitoring of single operational projects to the monitoring of the objectives achieved in the single actions and to the general impact of the entire management plan.

10.1 Key indicators for nominated Serial Property

As to the implementation of the single operational projects, described in the 5 Sector Plans, this will be verified through a traditional technical monitoring system which will enable the evaluation of the state of progress of interventions in comparison to estimated time limits and expenses, etc..

As far as the achievement of the objectives is concerned, relative to the single projects, this will be possible through purposely created numeric indicators, many of which have been already identified and reported on the projects reports.

Concerning the indicators to be used for the monitoring of macro-objectives (on the basis of each Plan) and the effectiveness of the results achieved in the single Plans (Knowledge Plan, Conservation-Protection Plan, Enhancement Plan, Public Awareness and Promotion Plan, Socio-Economic Development Plan), starting from the analyses conducted by the Ministry for Cultural Heritage, specific performance indicators for the Site applying for WHL are now being studied.

As for the Conservation Plan, the monitoring will no doubt be based also on the updating of vulnerability indicators, defined when the nomination was prepared, according to the standards and the methods of the *Risk Map of Italian Cultural Heritage* (see Nomination Format; item 6.a).

Some possible numeric indicators, now under development, are indicated in the following table:

Knowledge Plan	Conservation-Protection Plan	Enhancement Plan	Public-Awareness and Promotion Plan	Socio-Economic Development Plan
Number of launched study projects	Vulnerability indicators	Number (and costs) of carried out enhancement interventions	Number (and costs) of published promotional materials	Cost and number of overnight stays
Number of archaeological excavations carried out	Environmental damage indicators	Number of monuments now ready to be visited	Number (and costs) of produced multimedia materials	Average duration of overnight stays
Number of scientific publications	Number (and costs) of carried out conservation interventions	Number of exhibited artefacts	Number of visitors	Utilization rate of accommodation facilities
Quantity of registered and computerized information	Number (and costs) of maintenance interventions	Number (and costs) of equipped tourist itineraries	Number of accesses to the network website	Costs for quality-label products
Quantity of information managed for each property	Requalified surface areas	Number (and costs) of recovered buildings	Number (and costs) of organized events; Number of participants	Number of companies and/ or operators in the cultural heritage sector
Accessibility level of the information system			Number of carried out didactic activities	<i>Per-capita</i> income of resident population
Number of organized scientific conferences			Number (and costs) of advertising campaigns	Unemployment rate
Number of edited researches			Site Sponsorship	Infrastructure capacity

10.2 Tourism carrying capacity

An interesting indicator – for which a specific study involving various experts of the *Italia Langobardorum* network is now being launched – is the tourism carrying capacity indicator. As it is known, despite the number of studies on this topic at international level, no shared method has been defined to develop a numeric indicator able to indicate the carrying capacity of a cultural property. Studies on the subject lag behind those relative to the natural heritage.

Also in Italy several experimentations have been launched on the subject. They will be taken into account in the study which is about to be launched for the nominate Property. However, each experimentation followed rather different guidelines and, in any case, the aspects assessed to develop a TCC measure are generally remotely related to the aspects linked to the heritage and indirectly linked to it (e.g. capacity of accommodation facilities, capacity of waste disposal plants, etc.).

10.3 SWOT analysis

The assessment of the results achieved with the implementation of the actions envisaged in the Management Plan can be carried out by using the SWOT analysis, already used when drawing up the Plan.

The SWOT analysis meets the needs for rationalization of decision-making processes, as a support to public intervention decisions used to analyse alternative development models.

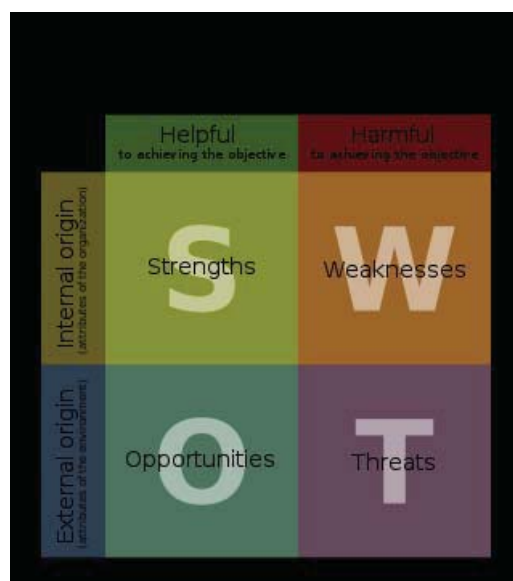

The analysis is conducted on the strengths and weaknesses of the analysis context, as well as on the opportunities and threats which derive from the external context which specific sectors or areas are exposed to. The objective of the analysis is to define the development opportunities of an area which result from the enhancement of strengths and the limitation of weaknesses, in the light of an opportunity and risk analysis. The SWOT analysis therefore highlights the main factors – both internal and external – which can influence the results of a programme/ plan and thus give rise to possible alternative development models.

The analysis also supports the planning of a strategy which is consistent with the context applied to it.

To sum up, the SWOT analysis enables the identification of the main strategic guidelines in relation to a global territorial development objective.

It can be used: *ex ante*, in order to improve the integration of the programme in its context; in intermediate phase, to verify if, in relation to the changes occurred in the context, the guidelines are still relevant (thus providing an instrument to decide on possible programme changes); *ex post*, to contextualize the final results of plans and programmes.

The analysis usually is represented as a matrix, organized in four sections: strengths, weaknesses, opportunities and risks. A specific matrix was built for the places of the *Italia Langobardorum* network, and it can be re-applied as monitoring instrument in the future.

KNOWLEDGE PLAN Network	
Objective 3	EXTENDING KNOWLEDGE ABOUT ARCHITECTURE AND ARTISTIC PRODUCTION IN THE LONGOBARD ERA IN THE LOCATIONS OF THE NETWORK
Project 3.3	Coordination of diagnostic activities on monuments and heritage works
Action ONGOING	<p><i>Researches on the skeleton remains coming from Longobard necropolises</i></p> <p>Skeleton remains constitute one of the most important evidences for reconstructing migratory movements of the invasions period, history of settlements, as well as interaction process between various ethnic groups and their cultures. The skeleton analysis, besides assuming the meaning of indicator, provides a wide public with very interesting data and acts as a landmark for the realization of upgrading projects, museum designs, educational programs and communications products.</p> <p>The Superintendency of Archaeological Heritage of Lombardy formed a working group in order to collect the most updated research experiences -as those conducted by the Superintendency of Archaeological Heritage of Piedmont- to link all the obtained knowledge and to define topics and researches to be set up together. Members of this group are various interested Superintendencies, Academic Departments and other experts working in this field.</p> <p>The activity of the working group will begin in January 2010.</p>

KNOWLEDGE PLAN Network	
Objective 4	EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE EXTENT OF THE NETWORK OF OTHER ITALIAN SITES WITH THE PARTICULAR EVIDENCE OF THE LONGOBARD ERA
Project 4.2 A	Promoting research and studies into Longobard culture in Italy / Publishing
Action COMPLETED	<div style="display: flex; align-items: flex-start;"> <div style="flex: 1;">  <p>La Medicina dei Longobardi di Franco Fornasaro</p> <p>ITALIA LANGOBARDORUM CENTRO DI POTERE E DI CULTURA (568 - 754 D.E.)</p> <p>LEO</p> </div> <div style="flex: 2; padding-left: 10px;"> <p>Publication of the first Network realized by the publishing house "LEG- Libreria Editoriale Goriziana, Gorizia – in partnership with Banca Popolare FriulAdria-Crédit Agricole – for the book series "Biblioteca di Storia Altoadriatica" – Library of the Upper Adriatic History.</p> <p>Title: "La medicina dei Longobardi" – ("The Longobards' medicine").</p> <p>Author: Franco Fornasaro, chemist and writer of Cividale del Friuli.</p> <p>The book deals with the history of the medical-pharmacological knowledge and techniques used and developed by the Longobards in the time lapse between the Baltic-Pannonic settlements and the period of splendour of the Dukedoms of <i>Langobardia minor</i>, including the influences upon the Medical School of Salerno.</p> </div> </div>

2009, February, 4th-7th / AQUILEIA (Udine) / 15th AISCOM's Conference / The result of the conservation in Spoleto works were presented during the which was held in Aquileia, featuring the following contribution: C. Angelelli, B. Bruni, L. Costamagna, A. Scaleggi, S. Zampolini Faustini Conservation "Conservation Interventions on the Early Middle Ages Mosaics in Palazzo Mauri and Palazzo Piaciani in Spoleto. Reading integrations and intervention methods".

2009/ MONTE SANT'ANGELO / The Universities of Bari and Foggia have published scientific papers on the subject and a new text and image database, including well known Longobard websites and other websites on Longobard history

2009, 19-22th, November / PAESTUM (Salerno) / 2nd National Conference The presence of the Longobards in different Italian regions, promoted by the FEDERARCHEO, the Italian Federation of Archaeological Associations, in collaboration with the Salerno Archaeological Group, the Italian Archaeological Groups and the Friulian Archaeology Society. The conference took place in the framework of the 12th Mediterranean Archaeological Tourism Trade event promoted by the province of Salerno and by the "Leader" company. Illustration of the management plan of the "Italia Langobardorum" nomination and of the system of the "Longobard Itineraries" designed to join and to give visibility to all the towns of Longobard origin as well as to promote tourism and the economy.

KNOWLEDGE PLAN Network	
Objective 5	EXTENDING KNOWLEDGE ABOUT LONGOBARD CULTURE IN RELATION TO THE GEO-CULTURAL CORRIDOR OF MIGRATION FROM NORTHERN EUROPE TO ITALY
Project 5.3	Restoration and dissemination of historic sources of the Longobard culture
Description NEW	Restoration of Middle Age parchment manuscripts: Cividale del Friuli, National Archaeological Museum, code XXVIII(<i>Historia Langobardorum</i>), Montecassino, mid 9 th century. It's one of the first and most ancient editions of the work of art written by Paolo Diacono in his old age (700-799) and one of the few dealing with the Longobards. The restoration will enable the acquisition of images, subsequently available to international scholars.

A page of the 9th century edition of *Historia Langobardorum*, kept in Cividale

Actions	<ol style="list-style-type: none"> 1. Restoration of parchments 2. Publication of catalogue 3. Arrangement of exhibition on the restoration of parchment manuscripts at the MAN (National Archaeological Museum) of Cividale 4. Acquisition of academic and historic documentation on cultural heritage and its conservation, planning and implementation of restoration, book reports on the various stages of restoration, exhibitions at the Museum, once the restoration work has come to an end
Parties involved	<ol style="list-style-type: none"> 1) Friuli Venezia Giulia Regional Directorate for Cultural Heritage and Landscape Assets, 2) Friuli Venezia Giulia Autonomous Region – Regional Cataloguing and Restoration Centre of Villa Manin di Passariano, Regional Conservation and Restoration School of the Friuli Venezia Giulia region
Phases and timescales	2010-2012
Financial resources	The budget of the Regional Restoration School, allocated by the Friuli Venezia Giulia regional authorities
Expected results	Preserving and enhancing a precious literary and historic example bearing testimony to the Longobard civilization

KNOWLEDGE PLAN <i>Cividale del Friuli site and buffer zone</i>	
Objective 6	ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE
Project 6.1 A	Launch of further survey campaigns in order to implement the knowledge on the site's heritage
Actions COMPLETED	<p><i>Phase A</i> /Metric survey of the building stratification, descriptive survey of material of the Temple and the Monastery of Santa Maria in Valle</p> <ol style="list-style-type: none"> 1. Carrying out of metric survey campaigns through photogrammetric and laser Scanner methods: during the first phase, the external structures of the Temple along the southern, western and northern sides were surveyed 2. Stratigraphic analysis of elevations has started, in order to identify past restoration interventions and the building phases of the monument <div data-bbox="331 577 1401 1422" data-label="Image"> </div> <p><i>Survey with laser scanner of the northern side of the Temple: visualization of the cloud of dots and first phase of the three-dimensional modelling, with the innovative method of layers segmentation that allows for defining the various building elements and the realization of the phase, three-dimensional surveys (last square box)</i></p> <p><i>Phase B</i> /Georeferenced metric survey of the Church of San Giovanni: photogrammetry of the lower part of the façade and diagnostic analysis related to the wall stratigraphy and to the degradation (see Enhancement, Project 3.2)</p>

Survey and stratigraphic analysis of the church and façade of San Giovanni

Objective 6	ENHANCEMENT OF KNOWLEDGE ON CIVIDALE'S HERITAGE
Project 6.1 B	Launch of further survey campaigns in order to implement the knowledge on the site's heritage
<p>Actions COMPLETED</p>	<p>Promotion of new studies aimed at improving the current data which appear to be sometimes incomplete and built on analyses carried out in the past through out-of-date techniques.</p> <p>Geo- referentiation of building stratification of the old Patriarchal Palace as well as other remains brought to light next to the Palazzo dei Provveditori Veneti (Archaeological Museum)</p> <div data-bbox="730 483 1241 1111" data-label="Image"> </div> <p data-bbox="603 1115 1382 1196"><i>The remains of the Patriarchal Palace, with the two main building phases highlighted (green and orange)</i></p> <div data-bbox="584 1223 967 1720" data-label="Image"> </div> <div data-bbox="1008 1227 1382 1720" data-label="Image"> </div> <p data-bbox="544 1697 1390 1778">1 - Room with mosaics, before and after two infants' graves were brought to light; the graves are disturbed by a series of north-to-south placed holes</p> <p data-bbox="544 1809 1437 2002"><i>Stratigraphic excavation inside the mosaic gaps</i> The excavation, lead in the frame of the investigations finalized at the verification of the conservation state and at the project of floor presentation (see Conservation Plan), allowed for verifying the activities related to the phase of abandonment of the mosaic, which was cut to realize holes and for some burials. The scheduled radiocarbon dating of the skeletal remains, presently undergoing, will allow for obtaining further chronologic elements on the attendance of the area.</p>

	 <p data-bbox="667 792 1310 846"><i>A detail of Early Middle Ages sepulchres covered with slabs of stone in the mosaic room of archaeological site A</i></p>
	<ol style="list-style-type: none"> 1. Geo-referentiation of the basement constructions of the National Archaeological Museum 2. ONGOING	
Parties involved	Friuli Venezia Giulia Superintendence of Archaeological Heritage
Expected phases and time frame	2010-2011
Financial resources	To be found

KNOWLEDGE PLAN <i>Cividale del Friuli site</i>	
Objective 7	CONTINUATION OF ARCHAEOLOGICAL RESEARCH ON THE SITE AND THE TERRITORY
Project 7.1 A	Planning and implementation of archaeological surveys in the Monastery of Santa Maria in Valle
<p>Actions</p> <p>COMPLETED</p>	<p><i>Phase A</i> /The first valorization works in the Monastery of Santa Maria in valle gave the occasion to perform new stratigraphic archaeological researches on the interventions of requalification of the cloister garden green areas and, in a more deepened way, on the activities of rearrangement of the walkways by the Temple and on the improvement of the systems of access and the visibility of the external walls of the oratory.</p> <p>Given the importance of the area, archaeological evidences were documented with the utmost attention, using the most advanced technologies, among wich the laser scanner.</p> <p>- <i>Excavations in the court of San Giovanni</i></p> <p>A first excavation sector was by the access to the Monastery, in front of the church of San Giovanni. Here the investigation reached the barren level and brought back to light Late-Ancient/Early Middle Ages phases, on which a grave is set. Later the area was occupied by Middle Ages buildings that showed a diverging orienting, compared to the present structures of the Monastery in this area.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  <p><i>Excavation: laser scanner survey and stereoscopic photos</i></p> </div> <div style="text-align: center;">  <p><i>Survey cloud of dots</i></p> </div> </div> <p>- <i>Excavations in the cloyster’s garden</i></p> <p>The occasion given by the removal of some big plants allowed for the verification of the cloister deposit, by the north-east corner. Here, soon below the superficial layer, the structure of an older phase of the monastery came back to light</p>

a

b

a) positioning of the excavation sounding, in relation to Della Torre's 19th-century finds;
b) emerged evidences

- Excavations by the Temple

The excavation south of the Temple allowed for verifying the traces of previously existing big spaces with mosaics, whose traces already emerged during excavations by E. Belluno inside the sacristy in 1962.

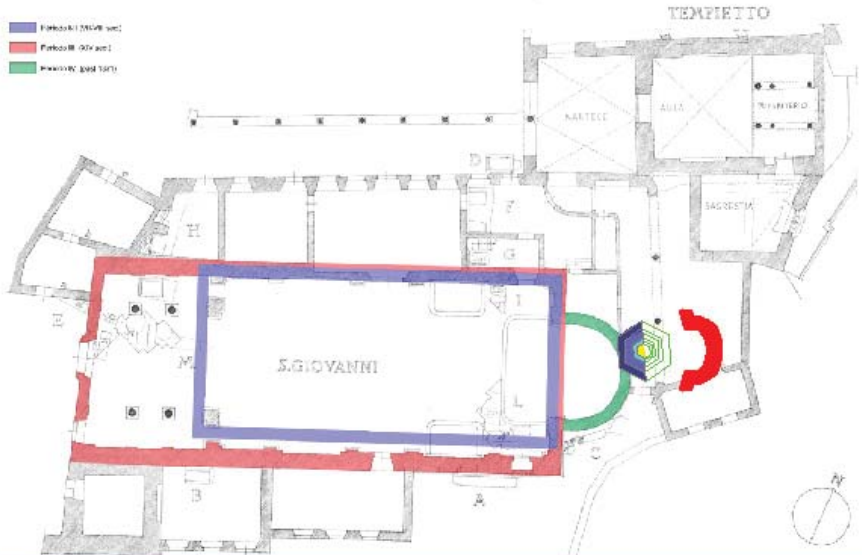

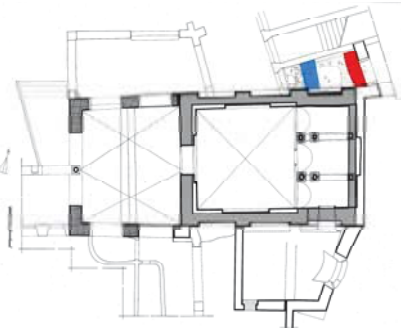

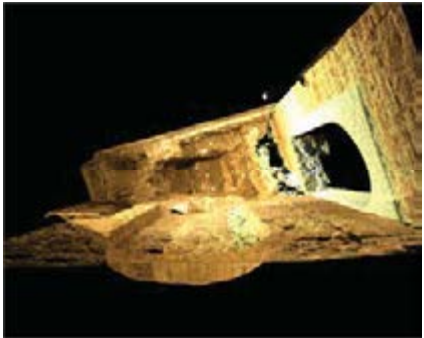

An apsed building would later be erected over this phase, possibly equipped with baptismal font. This building is immediately behind the church of San Giovanni and in axis with it.

A marble fragment possibly belongs to the font, that shows similarities with patriarch Callisto's font in the Cathedral's baptistry.

A cemetery from the Middle Ages, dating to not earlier than the 10th century, marks the abandonment of these structures.

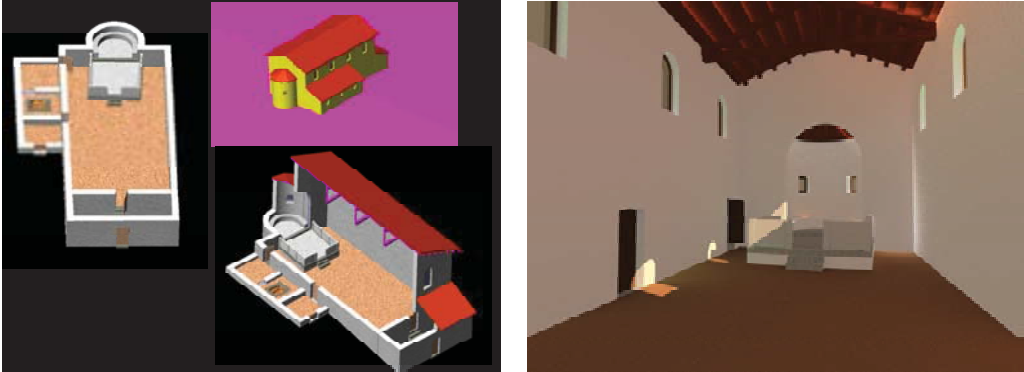

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

	 <p><i>Remains in the court of the Temple and placing of the remains of apse and font</i></p> <p>North of the Temple, some structural elements emerged, presumably realized in the Middle Ages to support the oratory's walls. The verification of the Temple foundation was very interesting. It was possible to attest that the northern perimeter wall was leaning against a previously existing wall, that was re-used as eastern limit of the very oratory. It may be the supposed ring-wall of the city, that in this area used to reach river Natisone.</p>   <p><i>Excavations by the northern perimeter wall: previously existing wall (in red) Middle Ages wall (in blue)</i> <i>Laser scanner survey and first phases of three-dimensional modelling</i></p> <p>This intervention allowed for gathering all existing documentation on the archaeological researches performed so far in the Monastery and to re-organize and rationalize the existing data.</p>
Parties involved	Friuli Venezia Giulia Superintendency for Archaeological Heritage, Superintendency for Archaeological Heritage, Municipality of Cividale del Friuli, Friuli Venezia Giulia Regional Authority.
Expected phases and time frame	2008-2009
Financial resources	Financed by the Municipality of Cividale del Friuli

KNOWLEDGE PLAN <i>Cividale del Friuli site</i>	
Objective 7	CONTINUATION OF ARCHAEOLOGICAL RESEARCH ON THE SITE AND THE TERRITORY
Project 7.1 B	Planning and implementation of archaeological surveys in the Monastery of Santa Maria in Valle
Description	The Municipality of Cividale, on the basis of a regional financing (LR. 17/2008) worked out and presented a Preliminary Project concerning the conservation and development works of the Monastic Complex , a project approved by the competent Superintendencies in December 2009. The programme of planned works also comprises knowledge activities particularly related to the promotion of archaeological excavations linked to other architectural and structural works. For the implementation of such surveys the Municipality of Cividale was granted an excavation concession by the Ministry of Cultural Affairs for the period between 2009 and 2011 to be possibly extended.
Actions ONGOING	<p>The action planned concerns:</p> <ol style="list-style-type: none"> 1) excavations during the building works of the visitor centre; 2) excavations linked to the renovation of the cloister floor, particularly on the northern side of the Tempietto, as a continuation of the surveys conducted in 2008; 3) archaeological works related to both the restoration of the Tempietto presbitery and the research of elevated structures through thematic surveys 4) beginning of the excavations concerning the restoration of the Church of San Giovanni; 5) excavations during the building of the Tempietto and Monastery Museum; 6) completion of the excavations concerning the restoration of the Church of San Giovanni. <p style="text-align: center;">INDICAZIONE DELLE AREE DI SCAVO</p>  <p style="text-align: center;"><i>Project table indicating the areas concerned with excavations</i></p>
Parties involved	Friuli Venezia Giulia Superintendence of Archaeological Heritage, Superintendence of Archaeological Heritage, Municipality of Cividale del Friuli, Friuli Venezia Giulia Regional Authority.
Expected phases and time frame	2010-2011
Financial resources	Financing of Friuli Venezia Giulia Regional Law 17/2008, Art. 7 sub-paragraphs 52/53 for the completion of development works of the Monastery of Santa Maria in Valle (total: € 3,000,000.00): 1,5) €20,000.00 2) € 80,000.00 3) €30,000.00 4,6) €70,000.00

Objective 8	ENHANCEMENT OF KNOWLEDGE ON THE TERRITORY DURING LONGOBARD TIMES
Project 8.4	Enhancement of research on Early Medieval fortified sites
Description	<p>The progress of surveys concerned:</p> <p>A) Prosecution of the Archaeological researches on : Artegna, San Martino Hill Osoppo, Fortezza Hill Ragogna, San Pietro Hill</p> <p>B) Starting from a complete census of the fortified structures and the areas where fortified settlements are located, by implementing the database on Late-Antique Early-Medieval fortifications created in Artegna (International Centre for Research and Documentation on Late-Antique and Early- Medieval Fortifications -CIRDOFTA),</p>
<p>Actions</p> <p>ONGOING</p>	<p>OSOPPO Prosecution of excavations, surveys and three-dimensional reconstruction</p>  <p><i>Hypotheses of reconstruction of the Palaeochristian and Early Middle Ages church of San Pietro</i></p> <p>ARTEGNA Prosecution of the excavation, documentation, survey and three-dimensional reconstruction of the <i>castrum</i> reservoir</p>  <p>Excavations, documentation, survey and three-dimensional reconstructions of the walls and towers of the <i>castrum</i></p> 

	 <p>Last interventions in 2008, confirmed the early Longobard presence in <i>castrum Artenia</i>, testified to by a fibula that belonged to a woman of the first immigrant generation. A permanent exhibition concerning the discoveries made on Colle di San Martino was opened in the Town Hall. The remnants on the hill are open to public.</p> <p>RAGOGNA Archaeological excavations were made on top of Colle di San Pietro where the ancient boundary wall of the <i>castrum</i> was discovered. Archaeological researches and surveys on Early Medieval <i>castra</i> will continue over the next years in relation to restoration and development activities on the remnants.</p>
Parties involved	Municipalities of Osoppo, Artegn, Ragogna, Friuli Venezia Giulia Superintendency for Archaeological Heritage, Superintendency for Architectural and Landscape Heritage, Istituto Italiano dei Castelli
Expected phases and time frame	2010-2012
Financial resources	Funds available for restoration and development projects being defined and financed through Regional Law 10/2000

KNOWLEDGE PLAN <i>Cividale del Friuli territory</i>	
Objective 9	ENHANCEMENT OF KNOWLEDGE ON THE LONGOBARD ABBEY OF SESTO AL REGHENA
Project 9.1	Enhancement of analysis and study on the Urn of Sant'Anastasia
Description	The in-depth analyses of the Urn of Sant'Anastasia was conducted through a precision survey and checks of the work characteristics, tank to the re-opening of the Urn and to the check of both the closing plate and the interior. This led to the formulation of assumptions on the original shape of the handiwork which probably used to be a lectern for the exhibition of sacred books.
Actions COMPLETED	<ul style="list-style-type: none"> A) Census and acquisition of existing data B) New photographic campaign C) <i>Laser scanning</i> survey with high precision camera D) Creation of three-dimensional models E) Hypotheses of reconstruction of the original form F) Analysis of style and technical features of the property G) Making of a DVD to spread outcomes

KNOWLEDGE PLAN <i>Brescia site and buffer zone</i>	
Objective 11	RAISING THE LEVEL OF KNOWLEFGE ON THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.1	Study and monograph publication of the Longobard phases of San Salvatore-Santa Giulia
Description	<p>Conclusion of the researches and studies, dedicated in specific to the Longobard phase of the crypt, to the frescoes, the stucco works and the furniture of San Salvatore. Further comparative studies (in particular with Cividale del Friuli) and researches are under way in order to complete the knowledge about the Early middle ages phase of the monastery. The results of all these studies shall then be spread with the edition of a book, dedicated exclusively to this theme.</p>   <p><i>Study details of the painted walls of San Salvatore.</i></p>
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Review of the past, partial editions 2. Study of the crypt (construction phases, decoration phases, use) 3. Campaign of diagnostic analysis (characterisation of mortars, pigments, ...) 4. Comparative study with Cividale del Friuli; 5. Spread the results of the studies (edition and printing)
Parties involved	So as to integrate the initial participants, the following were added: Laboratorio di Analisi Materiali Antichi, Università IUAV Venezia (Laboratory for the analyses, Venice University)
Phases and timeframe	by 2010
Financial resources	Brescia Municipality 30.000 €

KNOWLEDGE PLAN <i>Brescia site and buffer zone</i>	
Objective 11	RAISING THE LEVEL OF AWARENESS ON THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.2	Study and monograph publication of the Longobard phases of San Salvatore-Santa Giulia
Description	<p>During the archaeological researches held in the yards/cloisters of the monastery under the structures of the Longobard church a great number of waste for the working of metals and bones was found. They testify a significant craft activity linked to royal commissions.</p> <p>The first phase of the research was concentrated on the craft production in the buffer zone, in particular on the furnaces for the ceramics of the Early middle ages found near the remains of the late republican sanctuary and next to the <i>Capitolium</i>.</p>
 <p>Exposition <i>Artifices in Santa Giulia</i>: cover page of the catalogue</p>	
Actions COMPLETED	<ol style="list-style-type: none"> 1. Revision of the found remains 2. Study of the traces of the working process 3. Edition of the results 4. Temporary exposition for the presentation of the research <i>Artifices. Craftsmen working between Brescia and Leno in the Longobard age</i> 5. Sampling for the characterisation of the materials and diagnostic investigations 6. Comparison with the findings coming from other contexts
Phases and timeframe	January-may 2008: review of the sampling and exposition of the findings 2010 study of the results and publication

KNOWLEDGE PLAN <i>Brescia site and buffer zone</i>	
Objective 12	RAISING THE LEVEL OF KNOWLEDGE ON THE EARLY MIDDLE AGE PHASES OF THE MONASTERY
Project 12.1	Study of the network of monastery properties of Santa Giulia within the <i>Via Carolingia</i> national project
Description	<p>The town of Brescia was included in the project <i>Via Carolingia</i>, started by the Ministry for cultural goods and activities (Ministero per i beni e le Attività Culturali).</p> <p>The project foresees the study of the ancient and middle ages road routes as elements for the cultural transmission and for the valorisation of the historic-artistic evidence along these communication roads.</p>
Actions COMPLETED	<ol style="list-style-type: none"> 1. Data collection and new studies and researches about the style and the life modalities in Lombardia during the Early middle ages. 2. Comparison of the data and the results deriving from the research made on the middle ages European scale by pointing out the relations with the previous and following ages. 3. International congress for the valorisation of the researches and for a comparison of the research methodologies of the highlighted realities on the basis of the gathered data. 4. Publication of the acts of the congress, of the historic, archive and iconographic researches.
Phases and timeframe	2008-2010
Financial resources	Total cost of the project to be held in Brescia: 154,000 Euros, of which 20,500 Euros on behalf of the Regional direction of the Ministry for cultural goods and activities (Direzione Regionale, Ministero per i Beni e le Attività Culturali). The remaining resources are still to be found.

KNOWLEDGE PLAN <i>Brescia site and buffer zone</i>	
Objective 13	INVESTIGATION INTO THE HISTORICAL AND MONUMENT PHASES PRECEDING THE LONGOBARD MONASTERY
Project 13.1	Scientific publication of the <i>Ortaglia domus</i>
Description	Under the structures of the monastery emerged a wide residential area dating back to the Roman age, which is partly included in the visit path of the <i>Santa Giulia City Museum</i> .
Actions	<ol style="list-style-type: none"> 1. Assignment of the study on the various aspects of the <i>domus</i>. 2. Critical comparison between the scholars. 3. Integration of the existing graphical and photographic data. 4. Drawing up new stratigraphical essays. 5. Spread the results.
Phases and timeframe	2011 assignment of studies and starting of the works 2012 edition
Financial resources	To be found

KNOWLEDGE PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INVESTIGATION INTO THE STATE OF KNOWLEDGE OF THE URBAN CAPITOLINE AREA
Project 14.1	Scientific Publication of the Republican Roman sanctuary
Description	In the last years a series of studies were started side by side with the conservation interventions on the structures and the decorative equipment. The specialist studies were held on the roman sanctuary of the republican age, which was found under the structures of the Imperial <i>Capitolium</i> . The studies have brought important results in the known elements about the religious buildings of the 1 st Century before Christ in Northern Italy. The gathered data, indeed, can represent a necessary reference point for the knowledge about the ancient architecture, painting and mosaics.
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Recognition of all the archaeological and epigraphic material regarding the monument and its context 2. Comparison between the scholars about the condition of the research and of the gathered data 3. Drawing up the essays 4. Edition
Phases and timeframe	2010 confrontation of the studies and gathering of resources 2011 edition
Financial resources	To be found

KNOWLEDGE PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INVESTIGATION INTO THE STATE OF KNOWLEDGE OF THE URBAN CAPITOLINE AREA
Project 14.2	Start of studies on other monuments in the area
Description	During the continuation of the works of excavation, conservation and valorisation of the imperial <i>Capitolium</i> area, the data deriving from the studies carried out in the past needed to be resumed and integrated with the results of the recent research, so as to reach an overall and thorough knowledge both of the single archaeological monuments (theatre, <i>capitolium</i> , decumanus maximus) and of the historic buildings, which were built on the antique structures during the centuries (Palazzo Pallaveri and Palazzo Maggi Gambarà). These studies are fundamental in order to orient the museum interventions in the area and to spread the knowledge about the heart of the ancient town.
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Assignment of the studies 2. Start the research 3. Integration of the and photographic documentation 4. Comparison of the data 5. Edition
Phases and timeframe	2010 confrontation of the studies and gathering of resources 2011 edition
Financial resources	To be found

8.1 KNOWLEDGE PLAN DETAILED SCHEDULES

	eastern Brescia plain and render them usable. Complete the analysis, the study, the publication and the valorisation. Structure the network of the Longobard sites in the Brescia territory.
Result indicators	Research on at least 5 Early middle ages sites. Review of at least 300 archaeological findings. Organisation of a congress. Publication of the gathered data.

KNOWLEDGE PLAN <i>Brescia Territory</i>	
Objective 15	SORTING OF TERRITORIAL DATA ON THE LATE MIDDLE AGES AND INCREASE IN THE STATE OF AWARENESS
Project 15.2	Analysis, study and research applied to the findings and funeral objects from the settlements and necropolises of the municipalities in the “Network of Longobard sites”
Description	<p>The saved findings and the map of the selected sites need an overall second reading. We will reconstruct the settlement contexts and their various forms and the cultural, the juridical-institutional and the socio-economical changes.</p> <div style="text-align: center;">  <p style="text-align: right;"><i>Fibulas from the Longobard necropolis of Leno</i></p> </div>
Actions ONGOING	<ol style="list-style-type: none"> 1. Analysis and study of the settlements and of the necropolis set in the territories of the municipalities included in the “Network of Longobard sites” and in the neighbouring municipalities. 2. Analysis and study of the archaeological findings set in the collections preserved in the historical-archaeological city museums of Manerbio, Leno, Remedello and in the national archaeological museum Museo Archeologico Nazionale di Sirmione, and of the findings preserved by the Superintendence. 3. Analysis of the monumental witnessing of San Pietro in Mavino in Sirmione, of San Giorgio in Montichiari and of SS. Nazario e Celso in Leno. 4. Analysis, critical edition and study of the Early middle ages archival resources regarding the territory of the network of the Longobard sites in the Breascia area.
Parties involved	Ministero per i Beni e le Attività Culturali, Regione Lombardia, Provincia di Brescia, Comune di Brescia, Municipalities included in the “Network of Longobard sites” and neighbouring municipalities, Direzione Regionale per i Beni Culturali e Paesaggistici della Lombardia, Soprintendenza per i Beni Archeologici della Lombardia, Fondazione CAB, Fondazione Dominato Leonense, Fondazione Civiltà Bresciana
Phases and timeframe	Four year period 2009-2013
Financial resources	To be quantified and to be defined
Expected results	<ul style="list-style-type: none"> ✓ Increase the knowledge about the characteristics of matter of the Early middle ages findings and monuments ✓ Greater knowledge of the production techniques in the Early middle ages.
Result indicators	Review of at least 500 archaeological findings. Carry out at least 30 specific analyses.

KNOWLEDGE PLAN <i>Brescia Territory</i>	
Objective 15	SORTING OF TERRITORIAL DATA ON THE LATE MIDDLE AGES AND INCREASE IN THE STATE OF AWARENESS
Project 15.3	Foundation and organization of the CISL Centro Italiano di Studi Longobardi (Italian Centre for Longobard Studies)
Description	<p>The foundation of a Centre for studies (Centro di Studi) is needed. The <i>Centre</i> will carry on the activities of study and applicative research of the <i>Centro Studi di Archeometria</i> founded by the Faculty of engineering of the University of Brescia and the activities of the Centro Archeo Media Lab, founded within the Fondazione Dominato Leonense in Leno. The centre will cooperate with other similar Centres of study to be found on the national territory and abroad.</p>  <p><i>Sirmione San Salvatore, virtual restoration of the Longobard fresco</i></p>
Actions	<ol style="list-style-type: none"> 1. Look for scientific partners for the foundation of the <i>Centre</i>. 2. Foundation of the <i>Centre</i> and drawing up of the constitutional act. 3. Preparation of the <i>Centre</i> in the Palazzo Martinengo Colleoni di Pianezza, today named Bargnani, in Brescia, where the transfer of the Fondazione Civiltà Bresciana is envisaged. 4. Organisation and implementation of a database of the Longobard sites on the territory of the Lombardia region, linked with the national database. 5. Implementation of a specialized library <i>on line</i>. 6. Virtual restoration of the more significant settlements and necropolis.
Parties involved	Ministero per i Beni e le Attività Culturali Regione Lombardia Provincia di Brescia Comune di Brescia Municipalities included in the "Network of Longobard sites" and neighbouring municipalities Direzione Regionale per i Beni Culturali e Paesaggistici della Lombardia Soprintendenza per i Beni Archeologici della Lombardia Fondazione CAB Fondazione Dominato Leonense Fondazione Civiltà Bresciana Università del Sacro Cuore di Milano Università degli Studi di Pavia Università degli Studi di Salerno All the <i>stakeholders</i> of the Italian sites interested in the project
Phases and timeframe	2010-2015
Financial resources	To be quantified and to be found
Expected results	Acquisition of new instruments to deepen the knowledge about the Longobard people.
Result indicators	Insert at least 70 records in the database Virtual reconstruction of 5 contexts

KNOWLEDGE PLAN <i>Brescia Territory</i>	
Objective 15	SORTING OF TERRITORIAL DATA ON THE LATE MIDDLE AGES AND INCREASE IN THE STATE OF AWARENESS
Project 15.4	Knowledge, safeguard and enhancement of Archaeological Areas and Parks
Description	<p>The project foresees the cataloguing of all the existing goods on the regional territory, which have the characteristics of an archaeological area and park. During the first phase the regional authority will promote the study and the cataloguing of the archaeological areas set within natural areas, whereas the structures of the Ministry will promote the study in the territories outside the protected areas</p>  <p style="text-align: center;"><i>One of the burials in the san Zeno necropolis</i></p>
Actions ONGOING	<ol style="list-style-type: none"> 1. Survey about the characteristics of the studied cultural places. 2. In depth monitoring of the activities for the valorisation of the areas. 3. Estimation of the safeguard level and valorisation if the archaeological areas and parks in tight correlation with the environment and landscape reality, where the goods are collocated.
Parties involved	Ministero per i Beni e le Attività Culturali Regione Lombardia Provincia di Brescia Comune di Brescia Municipalities included in the "Network of Longobard sites" and neighbouring municipalities Direzione Regionale per i Beni Culturali e Paesaggistici della Lombardia Soprintendenza per i Beni Archeologici della Lombardia
Phases and timeframe	Five years period 2008-2013
Financial resources	To be quantified and to be found
Expected results	Acquisition of new instruments to deepen the knowledge about the Longobard people
Result indicators	Cataloguing and monitoring of 200 realities, which differ for their typology, dimensions, features and valorisation level

KNOWLEDGE PLAN <i>Brescia Territory</i>	
Objective 16	INVESTIGATION INTO KNOWN INFORMATION ON THE LONGOBARDS' CULTIVATIONS AND FOOD CUSTOMS
Project 16.1	Interdisciplinary study into the cultivations and food customs of the Early Middle Ages
Description	We will reconstruct the history of the food culture of the Longobards, their relations with the late antique world, to verify the continuities and discontinuities with the diet and usage of today. The survey was mainly carried out on the written sources, but it presents some opportunities of material evidence regarding especially the "Langobardia fertilis" gathered through the archaeological excavations made or in development in Chiari, Bornato, Leno, Iseo, Montichiari and Manerbio.
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Start the study of the most significant contexts 2. Look for European partners, who are already involved in this kind of researches 3. Start common analyses 4. Compare the data 5. Spread the data at different levels (specialist congresses, acts of the congresses, publications for children, recipe books for adults, conferences, ecc.) 6. Participation to the European public service contract Cultura 2000
Parties involved	Comune di Brescia Provincia di Brescia Direzione Regionale per i Beni Culturali e Paesaggistici della Lombardia Soprintendenza per i Beni Archeologici della Lombardia Fondazione Dominato Leonense Fondazione Civiltà Bresciana Onlus Associazione archeologica USPAAA Fondazione Pianura Bresciana Università Cattolica del Sacro Cuore
Phases and timeframe	2010 Look for partners and presentation of the public service contract Cultura 2000 2011 Start the research activities 2013 Conclusion of the activities and presentation of the results
Financial resources	Provincia di Brescia Comune di Brescia Fondazione Banca San Paolo Public and private involved partners (with references to the <i>Langobardia fertilis</i>)
Expected results	<ol style="list-style-type: none"> a) Greater knowledge of the food factors of the Early middle ages society b) Deepen the scientific data and spread the data to the public c) Valorisation of the local districts of Longobard interest <ul style="list-style-type: none"> - Improvement of the promotion of the territory and its safeguard d) - Increase of the working capacity in the network (<i>Langobardia fertilis</i>)
Result indicators	Congresses, scientific publications and surveys on the following themes: <ul style="list-style-type: none"> o Wine, its production, variety and consumes o The time of food: products, life styles and society o The history of agriculture and the trading of agricultural products o The production triad: cereals, wine and oil o The breeding, the transhumance and the food relapses o Milk and cheese: products, diet, conservation o Spread of the scientific data of the researches o Publication of a recipe book: the specialities of the Gottolengo court

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.1	Review of the existing documentation on research carried out within the <i>castrum</i>
Actions ONGOING	<p>A census, the gathering of the existing documentation and the realization of the graphic component (reconstructive re-elaborations and surveys) have been carried out. Study and analysis of the various contexts are going on.</p>   <p><i>Basilica of San Giovanni with view on the Baptistry and three-dimensional reconstruction</i></p>

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.2	Review of existing documentation on <i>Santa Maria foris portas</i>
Description	The purpose of the research and study project is the publication of a critical review of previous knowledge available about Castelseprio, not far from Torba, and the area of the village expanding towards the cemetery area of <i>S. Maria foris portas</i> .
Actions ONGOING	<ol style="list-style-type: none"> 1. Research in the Superintendency's archives 2. Georeferentiation of buildings and old excavations 3. Preparation of a map showing the risks of archaeological ruins
Parties involved	Province of Varese, Lombardy Superintendency for Archaeological Heritage, Lombardy Regional Authority, in cooperation with the Archaeology Ph.D. Schools of the Universities of Padua, Siena, Cattolica and Statale Universities in Milan, Politecnico di Milano, University of Vercelli.
Phases and timeframe	Publication 2011
Financial resources	€ 10.000,00 Province of Varese, Region Lombardia
Result indicators	Amount of data processed and recorded Completeness of the Archaeological Map

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.3	In-depth analysis on the complex of Torba
Description	Research for a publication on the asset and the historic and artistic links to the territory. The research and study project is aimed to promote the value of the Monastery complex of Torba by developing complete reference material on the history, archaeology, art and monumental value of the complex, as well as its relations with the local territory.
Actions COMPLETED ONGOING	<i>Action A</i> Historic-artistic research <i>Action B</i> Preparation of texts for publication
Parties involved	FAI – Italian Environmental Fund Lombardy Regional Authority Lombardy Regional Directorate for Cultural Heritage and Landscape Assets Lombardy Superintendency for Archaeological Heritage International Research and Documentation Centre on Early Medieval Art and Architecture
Planned phases and planning	Publication expected by late 2009-early 2010
Financial resources	Co-financing Region Lombardia
Result indicators	Amount of data and contexts analysed Amount of publications issued

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 17	REORGANISATION AND RECORDING OF KNOWLEDGE
Project 17.4	Data memorisation
Description NEW	Two new areas of intervention have been identified with a view to acquiring, reorganising and recording all knowledge available about the area: A. A critical review of previous knowledge available about Castelseprio, not far from Torba, and the area of the village expanding towards the cemetery area of S. Maria <i>foris portas</i> , to be achieved via research in the Superintendency's archives, georeferentiation of buildings and old excavations, archaeometric analyses, stratigraphic analyses of elevations B. Complete laser scanning of the Castelseprio site. The procedure will provide a highly detailed tool to investigate the site and its monuments. 3D representation of excavations and constructions will also be of extreme importance for maintenance, preservation and promotion of the area.
Actions	<i>Action A /</i> 1. Research in the Superintendency's archives 2. Georeferentiation of buildings and old excavations 3. Archaeometric analyses 4. Stratigraphic analyses of elevations, preparation of easily readable texts 5. Classification and study of materials 6. Preparation of a map showing the risks of archaeological ruins <i>Action B /</i> 1. On-site exploration 2. Implementation of the archaeological map and the GIS data 3. 3D survey
Parties involved	<i>Action A /</i> Lombardy Superintendency for Archaeological Heritage with Province of Varese, Lombardy Regional Authority, in cooperation with the Archaeology Ph.D. Schools of the Universities of Padua, Siena, Cattolica and Statale Universities in Milan, Politecnico di Milano, University of Vercelli. <i>Action B /</i> Province of Varese, Lombardy Superintendency for Archaeological Heritage, Lombardy Regional Authority, Institute for medieval archaeology of the University of Siena.
Planned phases and planning	<i>Action A /</i> Publication not later than spring 2011 <i>Action B /</i>

8.1 KNOWLEDGE PLAN DETAILED SCHEDULES

	Not later than autumn 2010
Financial resources	<i>Action A /</i> € 10,000.00 obtained from Province of Varese, Region Lombardia <i>Action B /</i> € 25,000.00 Province of Varese, Region Lombardia
Result indicators	<i>Action A /</i> Acquisition of new scientific analysis elements Relaunch and in-depth study of the European historiographic debate about Castelseprio-Torba <i>Action B /</i> Amount of data read Amount of studies Increase in planning

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.1	Realisation of archaeometric analyses on findings
Actions ONGOING	The following activities are going to be carried out: <ol style="list-style-type: none"> 1. Analysis of the human remains 2. Metal/technical analysis 3. Technical and stylistic/technical analysis, recomposition of the frescoes' fragments 4. Technical/stylistic and chronotypological analysis
Phases and timeframe	2010-2014

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Obiettivo 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Progetto 18.2	Diagnostic analysis on the constructive structures and system
Actions NEW	Implementation of: <ol style="list-style-type: none"> 1. Photogrammetric survey of surfaces 2. Stratigraphic analysis of walls and coatings 3. Dating of wood elements and construction materials
Parties involved	Province of Varese, Lombardy Superintendency for Archaeological Heritage, Lombardy Regional Authority, Liguria Superintendency for Archaeological Heritage, University of Vercelli, Prof. Carlo Bertelli.
Planned phases and planning	Not later than summer 2010
Financial resources	€ 47,000.00 Province of Varese, Region Lombardia
Result indicators	Amount of materials analysed and results of analyses; amount of positive surveys and data; amount of projects entailing the use of analysis data

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.4 A	Diagnostic analysis of the frescoes of Santa Maria <i>foris portas</i>
Actions NEW	Implementation of: <ol style="list-style-type: none"> 1. Analysis with ED-XFR instruments (CARRIED OUT) 2. Analysis of pigments
Parties involved	Province of Varese, Lombardy Superintendency for Archaeological Heritage, Lombardy Regional Authority, Liguria Superintendency for Archaeological Heritage, University of Vercelli, Prof. Carlo Bertelli.
Planned phases and planning	2010
Financial resources	Province of Varese, Lombardy Regional Authority € 12,000.00
Result indicators	Amount of surveys and data; quantity and quality of preservation projects defined; amount of publications

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 18	IN-DEPTH EXAMINATION OF KNOWLEDGE
Project 18.4 B	Diagnostic analysis of the frescoes of <i>Santa Maria foris portas</i>
Actions COMPLETED ONGOING	The following actions have been concluded: 1. New photographic campaign of the fresco cycle of the church. The following actions are under way or under development: 1. Computerised inventory (elaborated by the staff of the site) 2. Analysis with ED-XFR tools 3. Analysis of the pigments  <p style="text-align: center;"><i>Santa Maria foris portas, a detail of the fresco</i></p>
Parties involved	Province of Varese, Lombardy Superintendency for Archaeological Heritage, Lombardy Regional Authority, Liguria Superintendency for Archaeological Heritage, Università di Vercelli, Prof. Carlo Bertelli; INFN Università di Genova with the coordination of dr. Aurora Cagnana
Planned phases and planning	2010
Financial resources	Envisaged costs €36,000.00 by Province of Varese, Region Lombardia
Expected results	Gathering and arrangement of data, access to the consultation of the archive and use of the images by the scholars, who are cooperating in the project Castelseprio (development of studies, researches and informative material)
Result indicators	Number of surveys and data Quantity and quality of planned conservative projects Quantity of published material

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.3	Recognition of archaeological presences in the village area
Description	<i>Phase A</i> The survey, which foresees the analysis of the excavations samples on multi-layered deposits, will be developed on the basis of the retrieve of the archive data, of the relations about the former excavations, of the territorial recognition after the underbrush cleaning and of the laser scanner analysis. <i>Phase B</i> Interventions for the cleaning and the consolidation of the natural spaces and corresponding documentation
Actions ONGOING	<i>Phase A – Foreseen actions:</i>

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

	<ol style="list-style-type: none"> 1. Open excavations with light equipment 2. Graphic and photographic documentation 3. Treatment of the materials <p><i>Phase B – Foreseen actions:</i></p> <ol style="list-style-type: none"> 1. Underbrush cleaning 2. Stabilisation of the mountain sides 3. Widespread archaeological recognition of the area 4. Graphic and photographic documentation
Parties involved	Province of Varese, Lombardy Superintendency for Archaeological Heritage, Lombardy Regional Authority,
Planned phases and planning	Under way for the cleaning phase, to be concluded by Autumn 2010
Financial resources	<i>Phase A</i> €57,000.00 allocated by the Province of Varese <i>Phase B</i> € 49,838.00 Region Lombardia
Expected results	Widen the knowledge for the research, the valorisation and the exposition and implement the scientific data
Result indicators	Quantity of analysed material and quantity of data Increase of the number of scientific information Increase of the production of informative material

KNOWLEDGE PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 19	CONTINUATION OF ARCHAEOLOGICAL RESEARCH
Project 19.5	Planning and execution of archaeological surveys on section of arched walls towards Torba
Actions ONGOING	<p>In the frame of the first phase of the recovery of the pathway linking the area of the Torba Monastery and Castelseprio <i>castrum</i> three surveys were carried out along the walls, including cleaning and documentation of the inner space of the tower on the upper part of the hill.</p>  <p style="text-align: center;"><i>An archaeological investigation</i></p>

KNOWLEDGE PLAN <i>Spoleto buffer and Territory</i>	
Objective 22	RISE THE LEVEL OF KNOWLEDGE OF THE DUCHY'S CAPITAL AND OF ITS TERRITORY
Project 22.1a	Prosecution and development of the urban excavation campaigns
Actions ONGOING	<p>In 2008-2009 the Foundation CISAM (Study Centre on Early Middle Ages) has started a new excavation campaign on the top area of Colle Sant'Elia, where the Rocca Albornoziana rises, to widen and finish the archaeological verification of the information acquired during the first excavation campaign of June-July 2007. The excavation campaign interested in particular:</p> <ol style="list-style-type: none"> 1. Completion of the church's planimetry and analysis of the artificial stalls 2. Completion of the study on the "trench" of stakeholes, its relation with the realization of the church and the parallel pit 3. Completion of the study on the pits 4. Integral excavation of the tank 5. Study of the hill's morphology 6. Topographic reconstruction of the area <p>Archaeological researches in the Area of the Rocca Albornoziana (2006-2009) will be presented by Professors Letizia Pani Ermini and Luca Donnini in a cycle of meetings co-ordinated by the Superintendency for Archaeological Assets of Umbria (see Management Plan, 22.1.b).</p>  <p style="text-align: center;"><i>Rocca Albornoziana</i></p>  <p style="text-align: center;"><i>Rocca Albornoziana, excavations area on top of Colle Sant'Elia</i></p>

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

The 14th CONFERENCE of AISCOP, the Italian Association for the Study and Conservation of Mosaics took place in Spoleto, by the Chiostrò di San Nicolò, from February 7th to 9th 2008, under the patronage of the Ministry for Cultural Heritage and Activities. The following speeches are to be highlighted, now published in the "Deeds of the 14th Conference of the Italian Association for the Study and Conservation of Mosaic - Spoleto 7-9 February, 2009", The result of the conservation works were also presented during the 15th AISCOP's Conference, which was held in Aquileia, Udine on 4-7 February 2009: "Conservation Interventions on the Early Middle Ages Mosaics in Palazzo Mauri and Palazzo Pianciani in Spoleto. Reading integrations and intervention methods".

Palace Mauri, the mosaic

Palace Pianciani, the mosaic

The information emerged from those sites was also presented during the 2008 Spring Days of FAI (Italian Environment Fund).

KNOWLEDGE PLAN Spoleto buffer and Territory	
Objective 22	RISE THE LEVEL OF KNOWLEDGE OF THE DUCHY'S CAPITAL AND OF ITS TERRITORY
Project 22.1b	Prosecution and development of the urban excavation campaigns
Actions ONGOING	<p>In the frame of the urban area of Spoleto, archaeological investigations went on. The Superintendency for Archaeological Assets of Umbria, in collaboration with the Culture Office of the Comune di Spoleto, organized a cycle of meetings, to be held every two weeks, from January to June, aiming at the diffusion of the knowledge on the activities of research and conservation led in Spoleto in the last years: BUILDING YARDS IN SPOLETO - What have you found? The researches will be shown by the archaeologists who led them and will be introduced by Liliana Costamagna, officer of the Superintendency and responsible for the territory of Spoleto</p> <p>January 15th, 2009, 5.00 pm The building yard at the Tre Valli road – by the Coricell Plant (Feb – Jul 2009) Illustrated by Luca Donnini <i>Roman Mausoleums and the pyre's fire, common people's tombs and unexpected funerary rituals</i></p> <p>Jan 29th, 2010, 5.00 pm The building yard at the Tre Valli Road – At Cortaccione (Jul – Oct 2009), illustrated by Valerio Chiaraluce <i>Ancient and new roads, tombs from the Longobard period and depositions of cattle.</i></p>

“BUILDING YARDS IN SPOLETO”: What have you found?

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

KNOWLEDGE PLAN <i>Spoletto buffer and Territory</i>	
Objective 22	RISE THE LEVEL OF KNOWLEDGE OF THE DUCHY'S CAPITAL AND OF ITS TERRITORY
Project 22.2	Realization of a study on the <i>spolia</i>, re-used materials in early middle ages buildings
Actions ONGOING	<p>Professor Donatella Scortecci of the University of Perugia started two courses in her teaching of Middle Ages Archaeology, exclusively dedicated to the Longobard culture, as Place of Power. During the lessons, operators of conservation works under the Superintendency of Perugia joined in, to go into detail of the artistic techniques, in particular Early Middle Ages stuccoes.</p> <p>An agreement is being defined between the University of Perugia and the Commune of Spoleto, to establish a Specialization School of Archaeology in Spoleto, Palazzo Mauri. Three courses are scheduled: Protohistory, Classics, Middle Ages.</p>

KNOWLEDGE PLAN <i>Campello sul Clitunno site</i>	
Objective 24	INVESTIGATION ON THE HERITAGE OF CAMPELLO
Project 24.2	Analysis and study of existing archaeological and historical documentation
Description	<p>The studies carried out by Judson Hemerick and Carola Jäggi -concerning the construction of the Clitunno Tempietto- set its timing at the Longobard age, between the start of the 7th (Jaggi) and height of the 7th century (Hemerick). The chronology proposed by Jäggi has been also confirmed the frescoes of the cella, which have been very recently dated to the 7th century by Professor Valentino Pace (Professor of Medieval of History of Art at the University of Udine).</p> <p>He carried out further researches and investigations about the frescoes -which represent the Christ <i>Pantocrator</i>, in the apse conch, flanked by the apostles Peter and Paul-, also comparing them with other ones from Late Antiquity and Early Middle Ages (i.e. frescoes in <i>Santa Maria Antiqua</i> in Rome), and get at a final result about chronological attribution to the 7th century.</p> <p>The study was presented by Pace presented his study in a contribution on '<i>Longobard art in Umbria and Campania</i>' in the context of the XVI International Congress of the CISAM Foundation titled '<i>I longobardi dei Ducati di Spoleto e Benevento</i>' (the Longobards in the Duchies of Spoleto and Benevento).</p>
	
Actions	<ol style="list-style-type: none"> 1. Carrying out further historic-artistic research and investigation 2. Presenting study results
COMPLETED	
Parties involved	University of Udine
Financial resources	
Expected results	Raising of knowledge about the Longobard monument
Result indicators	Publication of new study

KNOWLEDGE PLAN Benevento buffer zone	
Objective 28	TO INCREASE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE IN GENERAL
Project 28.2	Start a census and study of the “Spolia” reused in buildings in the old city
Actions ONGOING	On the wait for finding specific funds, the Archaeological Superintendency started, with own staff, a census of the spolia diffused in the historical centre. Besides, the Commune has granted patronage for a FAI exhibition, which was inaugurated on 31 January, 2009, featuring those elements that are more seriously risking degradation
Financial resources	To be obtained: ERDF ROP Campania Regional Authority 2007-2013

KNOWLEDGE PLAN Benevento buffer zone	
Objective 28	TO INCREASE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE IN GENERAL
Project 28.4	Create an inventory of documentation on Longobard cultural heritage in the Benevento State Archives
Actions ONGOING	<p>The State Archives of Benevento and ICARUS (International Centre for Archives Research) are defining an agreement for the participation to the project “Monasterium”, that will allow for the computerization, filing and publication on the Web of all parchment heritage of the Institute, including the code fragments in Benevento writing.</p> <p>So far, 53 code fragments were identified and listed. Given that such fragments have been used across the centuries as covers of notary protocols, it cannot be excluded that further fragments may be identified along the research. The participation to the project “Monasterium” will allow the State Archives to catalogue all conserved parchments following the international standards in archives description, and to publish them on the Web, using ordinary funds assigned to the Institute.</p>
	  
Financial resources	Ordinary funds from the State Archives

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

KNOWLEDGE PLAN <i>Benevento buffer zone</i>	
Objective 28	TO INCREASE KNOWLEDGE ABOUT ARCHAEOLOGY AND LOCAL HERITAGE
Project 28.5	Complete the study of the stucco fragments coming from St. Ilario in Port'Aura
Actions ONGOING	On the wait for finding specific funds, the Archaeological Superintendency started, with own funds, a fotografic survey of the stuccoes found during the conservation works in the Longobard church of Sant'Ilario.
Financial resources	To be obtained: funding at regional and EU level

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

KNOWLEDGE PLAN <i>Monte Sant'Angelo site and buffer zone</i>	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE IN THE SITE AND IN THE BUFFER ZONE
Project 30.1	Realisation of other survey campaigns
Actions ONGOING NEW	With a view to promoting future archaeological campaigns, the public works office of the Municipality of Monte Sant'Angelo, in cooperation with Centro di Studi Micaelici e Garganici, has followed and will follow two main lines of research: <ol style="list-style-type: none"> 1. Creation of a database containing the data obtained from the specialised studies carried out over time by researchers from a variety of specialties. 2. Creation of a section called "images" in the database, for classification of photographs of the site, including those obtained from private archives and collections. Objectives: permanent legibility of the particulars of structures and of previous interventions on same that are no longer legible today.
Financial resources	1 / Own funds of the Municipality of Monte Sant'Angelo and Centro Studi Micaelici e Garganici 2 / Other financial resources: to be obtained
Phases and time frame	2010-2013

KNOWLEDGE PLAN <i>Monte Sant'Angelo site and buffer zone</i>	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE IN THE SITE AND IN THE BUFFER ZONE
Project 30.2	In-depth examination of historical research on the Longobard Sanctuary
Actions ONGOING NEW	Centro di Studi Micaelici e Garganici, in cooperation with the Municipality of Monte Sant'Angelo, has started and planned the following: <ol style="list-style-type: none"> 1. Methodical collection and classification of data obtained from the archives about previous studies on the Sanctuary. This stage has so far been concerned with the management of data available on paper only. 2. Creation of a digital archive
Financial resources	1 / Funding envisaged within the framework of the current activities of the Municipality of Monte Sant'Angelo and Centro Studi Micaelici e Garganici 2 / Financial resources to be obtained
Phases and time frame	2010-2012

KNOWLEDGE PLAN <i>Monte Sant'Angelo site and buffer zone</i>	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE IN THE SITE AND IN THE BUFFER ZONE
Project 30.3	Censuring of the structures and existing data on the walls, with definition of the property of the remains
Actions ONGOING	<ol style="list-style-type: none"> 1. Census of the existing wall sections, with preparation of technical sheets on their firmness and preservation state. 2. Analysis of restoration operations carried out in the past, with a comparison of technical surveys from that date with the current preservation state. 3. A photographic archive on the historic zone is currently being developed, on the basis of which towers and sections of the ancient wall belt can be identified among private constructions.
Financial resources	Own funds of the Municipality Other funds to be obtained
Phases and time frame	2010-2012

8.1 KNOWLEDGE PLAN DETAILED SCHEDULES

KNOWLEDGE PLAN <i>Monte Sant'Angelo site and buffer zone</i>	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE IN THE SITE AND IN THE BUFFER ZONE
Project 30.4	Planning and realisation of new archaeological research in the area to the north of the Longobard Sanctuary
Actions ONGOING NEW	The board of management of the Sanctuary of St. Michael the Archangel, with the help of Centro Studi Micaelici e Garganici from the University of Bari, has agreed on the following operations: <ol style="list-style-type: none"> 1. Digital rendering of data obtained from the assays carried out on site during previous excavation campaigns (advanced stage). 2. Planning of surveys to be carried out with non-invasive means and systems.
Financial resources	1 / Own funds 2 / Currently being defined: agreements with private sponsors and Puglia Regional Authority for access to EU 2007-2013 funding
Phases and time frame	2010-2011

KNOWLEDGE PLAN <i>Monte Sant'Angelo site and buffer zone</i>	
Objective 30	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE LONGOBARD HERITAGE IN THE SITE AND IN THE BUFFER ZONE
Project 30.5	Planning and realisation of research on the ancient wall belt
Actions ONGOING NEW	<ol style="list-style-type: none"> 1. Starting of the digital rendering stage to support the hypotheses put forward by researchers about the line followed by the ancient wall belt, with reference to the walls and towers for which no material or documental evidence is available. 2. Action 1 is preliminary to the preparation of instrumental surveys on the sites and to the assaying of constructions.
Financial resources	1 / Own funds of the Municipality 2 / Other funds to be obtained
Phases and time frame	2010-2013

KNOWLEDGE PLAN <i>Monte Sant'Angelo territory</i>	
Objective 31	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE TERRITORY IN THE LONGOBARD ERA
Project 31.1	Analysis and study of archaeological documentation in the territory
Actions ONGOING COMPLETED	<ol style="list-style-type: none"> 1. The Universities of Bari and Foggia have launched a census of all data about the places of worship that are to be found along previously classified Longobard Itineraries. 2. Some preliminary scientific papers have been published and a first archive has been created, containing data and images on previously known Longobard sites and other sites of Longobard historic origins found thanks to the research activities that were carried out.
Financial resources	Own funds
Phases and time frame	2010-2013

KNOWLEDGE PLAN <i>Monte Sant'Angelo territory</i>	
Objective 31	IN-DEPTH EXAMINATION OF KNOWLEDGE OF THE TERRITORY IN THE LONGOBARD ERA
Project 31.2	Continuation of archaeological research in the cult locations situated along la <i>Via Sacra Langobardorum</i>
Actions ONGOING	The Universities of Bari and Foggia have started an analysis of toponymy in the area to gather indications about the presence of churches and places of worship along the <i>Via Sacra Langobardorum</i> .
Financial resources	Own funds Other funds to be obtained
Phases and time frame	2010-2013

KNOWLEDGE PLAN <i>Monte Sant'Angelo territory</i>	
--	--

**8.1 KNOWLEDGE PLAN
DETAILED SCHEDULES**

Objective 32	MEMORISATION OF COGNITIVE DATA ON THE SITE AND ON THE TERRITORY
Project 32.1	Realisation of an archaeological map of Monte Sant'Angelo and the Gargano
Actions ONGOING	With a view to preparing an archaeological map of Monte Sant'Angelo, the University of Bari and the University of Foggia have launched a census of all documents about evidence dating back to Longobard times and to be found in Monte Sant'Angelo and in the whole of the Gargano territory.
Financial resources	Own funds Other funds to be obtained
Phases and time frame	2010-2012

DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 1	ENHANCEMENT OF THE STATE OF CONSERVATION OF THE LONGOBARD TEMPIETTO
Project 1.1	Maintenance interventions with special reference to the presbytery
<p>Actions</p> <p>COMPLETED</p>	<ol style="list-style-type: none"> The first phase of maintenance of the Longobard Tempietto in the Eastern wall – partially in the north wing – of the presbytery where traces of moisture are visible is being realized. The intervention concerned the enhancement of the waterproof resistance of external walls that was the cause of deterioration. Restoration of walnut door that was the old entrance of the Temple <div style="text-align: center;">  <p><i>Restoration stages of the 16th century wooden portal</i></p> </div> <div style="text-align: center;">  <p><i>Wooden portal: before and after restoration</i></p> </div>
Parties involved	Municipality of Cividale del Friuli, Superintendency for architectural and environmental heritage
Financial resources	Funds allocated by the municipality of Cividale: € 8,000

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.1	Completion of the research on existing data on past restoration operations and systematization of these data (history)
Actions ONGOING	Continuation of the Archives research on the interventions realized in the Longobard Tempietto. The research is being performed by Association "Progetto Patriarcato di Aquileia" in the following Archives: <ol style="list-style-type: none"> 1. Historic Archives of the Municipality of Cividale del Friuli; 2. Historic Archives of the Municipality of Cividale del Friuli called "della Magnifica Comunità" (from 15th to 19th century) kept in National Archaeological Museum of Cividale; 3. Current Archives of the Municipality of Cividale del Friuli; 4. Photographic Archives of National Archaeological Museum of Cividale; 5. Archives of the documents of Santa Maria in Valle; 6. Archives of the Ursulines; 7. Archives of the Benedictine nuns. 8. The transcription and study phases of the identified documents have started.
Parties involved	Municipality of Cividale del Friuli, Superintendency for architectural and environmental heritage, Patriarchate of Aquileia Association
Expected phases and time frame	2010
Financial resources	Funds allocated by the municipality of Cividale: € 3,000 Funds allocated by private associations or banking institutions

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.2	Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations
Description	Assessment of the state of conservation of the frescoes detached from the walls of the Longobard Tempietto in the 50s and 60s and transferred on canvas
Actions ONGOING	<ol style="list-style-type: none"> 1) Assessment of the state of conservation of frescoes and their supports 2) Restoration of frescoes and replacement of decayed supports
Parties involved	Municipality of Cividale del Friuli, Superintendency for historic, artistic and ethno-anthropological heritage of the Friuli Venezia Giulia region.
Expected phases and time frame	2010
Financial resources	€ 5,000 allocated by the Friuli Venezia Giulia Region

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 2	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE LONGOBARD TEMPIETTO
Project 2.2 2.3	2.2 Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations 2.3 Maintenance programme and launch of the first cycle of interventions
Description	Thanks to regional funds (Regional Law 17/2008), the municipality of Cividale developed and submitted to the relevant Superintendency a preliminary plan regarding the conservation and enhancement work to be done on the monastery complex. The project was approved by the relevant Superintendency in December 2009. The work plan also includes important initiatives to further knowledge on the state of conservation of the Longobard Tempietto and other architectural and structural restoration work.

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

Actions ONGOING	Starting up of the project that envisages thematic surveys aimed at the description of the state of conservation of the property (see Knowledge Plan). <ol style="list-style-type: none"> 1. Implementation of metric measurements with laser frames or laser scanners with relevant restitution in vector formats and digital form. 2. Stratigraphic analysis of heights to reveal previous restoration work 3. Identification and description of construction material and techniques 4. Identification of the types of decay 5. In-depth analytical and specific study on the main features of materials and the various types of decay 6. Data restitution on thematic maps and description of the state of conservation.
Parties involved	Municipality of Cividale del Friuli, Superintendency for architectural and environmental heritage, LAMA Laboratory – Venice IUAV university
Expected phases and time frame	2010-2011
Financial resources	Regional law 17/2008, art. 7 and 52/53 authorized funding for the completion of the enhancement work on the monastery Santa Maria in Valle (total budget € 3,000,000)

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 4	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE RATCHIS ALTAR, THE FONT OF CALLISTO AND THE DUOMO
Project 4.2	Carrying out of thematic surveys aimed at diagnostic projects and analytical investigations and intervention projects
Actions COMPLETED	<p><i>Altar of Ratchis</i> Interventions of conservative restoration and further analyses concerning the study of the surfaces of the work and its painted and applied decoration have been carried out. Public presentation of the work executed on November 2009.</p> <div style="text-align: center;">  </div> <p><i>Hypothesis of the original aspect of the altar with the painted decoration</i></p>
Parties involved	Superintendency for historical and artistic heritage of the Friuli Venezia Giulia region; parish of Santa.Maria Assunta
Expected phases and time frame	2009
Financial resources	€ 40,000 allocated by the Superintendency for architectural, landscape, historic and ethno-anthropological heritage (BAPPSAE) € 50,000 allocated by the Friuli Venezia Giulia Region

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli buffer zone</i>	
Objective 8	PROTECTION AND CONSERVATION OF CONVENTS AND HISTORICAL PALACES
Project 8.1	Completion of the restoration of the complex comprising the church and the former convent of San Francesco
Description	<p>San Francesco's church and convent – owned by Parrocchia Santa Maria Assunta in Cividale – were built in the 13th century and stand at the top of a steep hill looking onto the gorge of the Natisone river, where, according to popular tradition, the "Castello dei Duchi" (Dukes' Castle) used to stand. Over the centuries, especially following the Napoleonic period, the three-floor complex was used for most different purposes, albeit always as a place of worship. The church and the convent contain remnants of pictorial decorations and stuccoes of extreme artistic value, bearing evidence – in the Noble Sacristy in particular – to the high level and prestige attained by the Franciscan community.</p> <div style="text-align: center;">  <p><i>Church and convent of San Francesco (XIII cent.)</i></p> </div>

8.2 PROTECTION AND CONSERVATION PLAN DETAILED SCHEDULES

	San Francesco's complex – which lies within the boundaries of the buffer zone – was never studied in detail from an archaeological point of view. It was damaged by the 1976 earthquake and restoring works were carried out slowly, at the same pace as the necessary funding could be obtained. The complex will keep its religious character and destination of use, but it has also been regularly used as a venue for meetings, conferences, lectures, seminars and exhibitions. The main hall can host approximately 400 seats, the hall on the upper floor 120, and the Sala degli Archi 60.
Actions COMPLETED	<ol style="list-style-type: none"> 1. Completion of restoring works 2. Tidying up of external gardens 3. Restoration of the Sacristies' furniture 4. Renovation of inner fittings 5. Adjustment of the lower floor for use for youth-related activities
NEW	<ol style="list-style-type: none"> 6. Wiring of the facilities 7. Rebuilding of the Church's roof
Parties involved	Parish Santa Maria Assunta
Phase and timeframe	2009-2012
Financial resources	€ 600,000.00 from the State € 60,000.00 from the Udine Province Other funds: Friuli Venezia Giulia Regional Authority
Expected results	Availability of a multi-purpose facility to be used as a prestigious centre for conferences and exhibitions, capable of catering for high attendance numbers Availability of the lower floor for use for youth-related activities
Result indicators	Fitness for use of the complex Amount of events held

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 9	IMPROVEMENT OF NATURAL ANDS SEISMIC RISKS PREVENTION
Project 9.1	Completion of protection interventions on Natisone river
Actions COMPLETED	<i>Phase B</i> - Completion of the consolidation of the gorge in the Natisone river in the Cividale del Friuli Municipality.
Financial resources	€ 630.000,00 from the Municipality budget

PROTECTION AND CONSERVATION PLAN <i>Cividale del Friuli site</i>	
Objective 9	IMPROVEMENT OF NATURAL AND SEISMIC RISKS PREVENTION
Project 9.2	Interventions for the protection from meteoric water
Actions NEW COMPLETED	<i>Phase A</i> - Urgent intervention of the civil defence in the Cividale del Friuli Municipality for the safeguard of the built-up areas thanks to the completion of works for the collection, management and draining of meteoric water in Gallo via Crognolet, an area of archaeological interest..
Financial resources	€ 800.000,00 from the Municipality budget

Objective 10	MAINTENANCE ON MASONRY AND SURFACES IN THE S. SALVATORE – S. GIULIA MONASTERY COMPLEX
Project 10.5	Conservation measures on structures of archaeological interest located in the entrance area to San Salvatore - Santa Giulia City museum
Actions COMPLETED	<p>Works started in October 2008.</p> <p>The intervention regards various spaces in the area of the entrance to the museum of Santa Giulia pertaining to two roman <i>domuses</i> and to the remains of a road (<i>cardo</i>).</p> <p>The intervention will see the various kinds of consolidation, on the basis of the various antique structures, which are already present in the area, and the specialized hand-made cleaning with chemical products or with instruments for accurate and precise works.</p> <div style="text-align: center;">  </div> <p style="text-align: center;"><i>The archaeological area after the intervention</i></p>

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN <i>Brescia site and buffer zone</i>	
Objective 11	INTERVENTIONS ON MOBILE FINDINGS PERTAINING TO THE EARLY MIDDLE AGES PHASES OF THE MONASTERY
Project 11.1	Cleaning, consolidation, identifying couplings and any assemblage onto panels of significant portions of painted plaster relating to the Early Middle Ages phase of the Church of San Salvatore
Description	<p>The intervention regards the numerous fragments of the Early middle ages frescoes found during the archaeological researches and in the filling of the extrados of the 17th century vault, which was demolished in the 50's in order to bring to light the frescoes dating back to the Early middle ages. The intervention will have an initial research phase, when we will try to find the junctures of the numerous fragments. If a significant number of fragments are recomposed in larger portions of painted plaster, a second phase will follow, when we will try to assemble the decorations on suitable panels.</p> <p>The recomposed panels may be then exposed inside the San Salvatore church.</p> <div style="text-align: center;">  <p><i>Fragment of painted plaster of the San Salvatore church</i></p> </div>
Actions	<ol style="list-style-type: none"> 1. Diagnostic and cognitive research for the characterisation of the plaster mortars, which are needed for the distinction of the ages of the plaster fragments (roman, Early middle ages and low middle ages) 2. Look for junctures and couplings 3. New mounting of the fragments on cell-like panels
Phases and timeframe	<p>2010 work to find the junctures</p> <p>2010-2011 implement the work of reassembly of fragments and exposition</p>
Financial resources	Brescia Municipality, budget 2010, for the study 10.000 Euros are allocated

PROTECTION AND CONSERVATION PLAN <i>Brescia site and buffer zone</i>	
Objective 12	IMPROVEMENT OF THE PROTECTION STRUCTURES
Project 12.1	Replacement of the access gate to the San Salvatore cloister
Actions COMPLETED	Extraordinary maintenance to guarantee the security and replace the main entrance gate in via Piamarta

PROTECTION AND CONSERVATION PLAN <i>Brescia site and buffer zone</i>	
Objective 12	IMPROVEMENT OF THE PROTECTION STRUCTURES
Project 12.2	Replacement of the windows' wood frames on the first floor of the monastery complex
Actions COMPLETED	Extraordinary maintenance and replacement of the wooden frames in the central galleries of the area designed for the temporary expositions in order to solve the problem of the water infiltrations in the exposition areas.

PROTECTION AND CONSERVATION PLAN <i>Brescia site</i>	
Objective 12	IMPROVEMENT OF THE PROTECTION STRUCTURES
Project 12.3	Staff training for early intervention measures of heritage protection in the event of natural disasters
Description NEW YEARLY SCHEDULED	Staff training for early intervention measures of heritage protection in the event of natural disasters
Actions COMPLETED	The course is a network pilot project, involving – as an experiment – civil protection institutions. It focuses on volunteer staff training for early intervention measures including recovery, cleaning, cataloguing and protection of cultural heritage (paper, stone, metal material) of disaster-hit sites
Parties involved	<ol style="list-style-type: none"> 1. In-house teaching activities (knowledge and protection of preserved material) 2. Simulation of on site intervention
Phases and timeframe	Municipality of Brescia Public institutions preserving material of great historic value (Municipal Museums)

8.2 PROTECTION AND CONSERVATION PLAN DETAILED SCHEDULES

Financial resources	2009 and following years, also within the network "Italia Langobardorum"
Expected results	€ 10,000 allocated by the municipal authorities

PROTECTION AND CONSERVATION PLAN <i>Brescia site and buffer zone</i>	
Objective 13	RECLAMATION OF THE ARCHEOLOGICAL AREA OF THE <i>CAPITOLIUM</i>
Project 13.1	Conservation and maintenance interventions on various structures pertaining to the Republican sanctuary
Description	<p>The building, identified from the beginning of the 19th century, was often object of excavations and lately studied in 2006. It is a building dating back to the 1st century before Christ, made up of four parallel rooms, separated by cavity walls, with fresco decorations, which constitute one of the most rich and rare evidence in Northern Italy.</p> <div style="text-align: center;">  <p><i>Western cell of the sanctuary with the surveying facilities</i></p> </div>
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Completion of the works for the preservation of the pavements (mosaics and pound clay) and of the frescos of the western cell 2. Archaeological surveys in the southern area of the platform in the western cell in order to verify the presence of further structures, pertaining to the sanctuary and to forecast a possible new access to the area 3. Monitoring of the microclimatic conditions with the use of a sophisticated equipment supplied with peripheral environmental probes in contact with the painted surfaces. The equipment will register and send the data to a central unit for the data gathering. 4. Maintenance intervention for the preservation of the remaining of the other three cells, set under the platform dating to the Flavian era 5. Study of the data gathered by the station and planning the possible modalities to open the microclimatic facility to the public
Phases and timeframe	First and second lot: 2008: definitive planning 2008-2009: implementation of works Third lot: 2009 planning 2010-2012 implementation of works
Financial resources	The costs are presently financed by: <ul style="list-style-type: none"> • Fondazione Cariplo 415,000 Euros • Ministero per i Beni e le Attività Culturali 800,000 • Brescia Municipality, 30,000

Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.4	Conservation interventions on the roofing of Mastio Visconteo within the Castle of Brescia
<p>Actions COMPLETED</p>  <p><i>The castle's keep after the works</i></p>	<p>The building is set in the upper part of the Castle of Brescia and it was built during the Visconti age (1343) on the ruins of a Roman temple, of which the staircase and some outer walls are visible. The building was purchased by the Brescia Municipality in 1900 and entered the military state property, then it was subject to a restoration intervention in 1968/1974, when after the removal of the recent plasters a great part of the wall's decorations of the Visconti era and of the 15th century were recovered. The building is structured on four levels. The basement is not opened to the public and it hosts roman structures (large basins built in local calcareous stone), the ground floor and the first floor host the Museum of the weapons – Museo delle Armi – and the second floor is used as a storage of historical material regarding the museum.</p> <p>The conservation intervention on the roofing was necessary to guarantee the correct conservation of the monument: the water seepage, indeed, caused damage to the historical material conserved in the storage under the roof and to the painted decorations of the low middle ages. Moreover, the roof was not correctly insulated and it did not allow the preservation of a suitable microclimate for the conservation of the above mentioned hand made elements.</p>
Parties involved	Brescia Municipality

PROTECTION AND CONSERVATION PLAN <i>Brescia buffer zone</i>	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.5	Extraordinary intervention for the conservative maintenance of Monte Nuovo di Pietà
Description	<p>The building dates back to the 15th century and closes the southern side of Piazza della Loggia; the facade presents a further use of numerous decorative elements and inscriptions of the Roman age. The extraordinary intervention for the conservative maintenance will be mainly dedicated to the external elevations of Monte Nuovo. The principal objective is the conservation and the valorisation of the monumental building.</p>  <p><i>Piazza della Loggia and on the left Monte di Pietà</i></p>
Actions	<ol style="list-style-type: none"> 1. Restoration of the facades, including the portal linking Monte Nuovo and Monte Vecchio; 2. Maintenance of the window frames at the first floor; 3. Rearrangement of the external structures on the facades; 4. Remaking of the internal electric system.
Parties involved	Brescia municipality
Phases and timeframe	From 2010 to 2011
Financial resources	Brescia Municipality, budget 2010, 400,000 Euros to be allocated
Expected results	Restoration of the palace for representative goals

PROTECTION AND CONSERVATION PLAN *Brescia Territory*

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.6	Extraordinary conservation interventions in the Tosio Martinengo Palace
<p>Actions</p> <p>COMPLETED</p> <p>ONGOING</p>	<p>The Martinengo da Barco palace in piazza Moretto hosts the seat of the Pinacoteca Civica (picture gallery), founded in 1908 with the merger of the two galleries founded with the bequest of the Earl Paolo Tosio (1844) and of the Earl Francesco Leopardo Martinengo (1883). The gallery was then enriched in time with other legacies, with works coming from abolished churches or from destroyed buildings and with recent acquisitions. The picture gallery in Brescia documents the history of art in Brescia from the 14th to the 18th century, through the important works in exposition.</p> <p>The main objective of the project is to set up and implement a flexible air conditioning equipment, which can readily respond to the oscillations of the critical micro-climate parameters and to balance the greater thermal stresses in order to obtain the best microclimatic condition for the conservation of the works and a greater comfort for the visitors, who will visit the new exposition halls.</p>  <p><i>Works for the emptying of the picture gallery before the start of the intervention</i></p> <ol style="list-style-type: none"> 1. Restoration of internal and external historic window frames; 2. set up a new air conditioning equipment 3. set up a new electrical and lighting system 4. Restoration of all the facades 5. Restoration of the inner decorative elements (decorated ceilings, wall frescoes)
Parties involved	Brescia municipality
Phases and timeframe	Until 2012
Financial resources	Brescia municipality, budget 2009 cca. 2,000,000 Euros allocated, budget 2010 700,000 Euros envisaged, budget 2011 500,000 Euros envisaged
Expected results	Recovering of the palace as a seat of the City picture gallery (Pinacoteca Civica)

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Brescia buffer zone</i>	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.7 A	Static restoration and conservation of churches and convents
Description	<p><i>A – Sant’Agata church</i></p> <p>The project foresees an intervention for the restoration and cleaning of the S. Agata church, a building founded by the Goths and the Longobards between the 6th and the 7th century and legally bound by the Ministerial decree 28.03.1912. In its history the church has seen a series of changes: in 1450 the antique apse was destroyed in order to construct the presbytery leaning on a bridge (because of river Celato, which is still flowing underneath). The presbytery can be reached through a balustraded staircase. The first pictorial interventions date back to the 3rd November 1505. In 1687 it was completely decorated by Pompeo Ghitti with the perspective method. In 1580 S. Carlo Borromeo ordered the construction of the SS.mo Sacramento chapel, lightly rearranged in 1700; in 1500 the church was enriched with three lateral altars, one matroneum covering three sides of the church, trilobated columns and cross vaults. A lateral altar dedicated to the Virgin of Mercy (Madonna della misericordia) conserves an antique fresco, which was formerly part of the destroyed city walls. The fresco is surrounded by a 16th century polyptych; in the second half of 1900 the 15th century frescoes were recovered together with the crucifixion dating to the end of the 15th century, which is now dominating the apse. Finally, in 1970 the church was equipped with floor heating and in 1990 the 18th century portal was restored.</p> <p>The church was subject to a immobility monitoring (from 2007 to 2009), but it now needs an overall restoration, restructuring and maintenance intervention.</p>
Actions NEW COMPLETED	<p><i>Phase A</i></p> <ol style="list-style-type: none"> 1. Monitoring the immobility <p><i>Phase B</i></p> <ol style="list-style-type: none"> 2. Interventions for the suture of damages and cracks 3. Restoration of the wooden matroneum, the chorus, the chancel and the gate <ol style="list-style-type: none"> a. 4. Cleaning and restoration of frescos and wash drawings 5. Cleaning and eventual restoration of the marble parts of the altars, statues, puttos 6. Restoration of windows and glass doors 7. Interventions for the covering of the roof in order to prevent water and humidity seepage 8. Cleaning and restoration of paintings 9. Intervention for the restoration of the organ
Parties involved	<p>Parrocchia S. Agata Fondazioni bresciane Università del Politecnico di Milano Soprintendenza per i Beni Storico-Artistici di Brescia, Cremona e di Mantova</p>
Phases and timeframe	<p>First phase: from June 2007 to June 2009 Second phase: by 2015</p>
Financial resources	<p>First phase: € Second phase: to be defined</p>
Expected results	<p>Stability of the building; new ventilation; elimination of the water seepage from the roof; a greater comfort in enjoying the architecture structure, the frescos and all the art works; support cultural and study visits.</p>
Result indicators	<p>Greater knowledge and appreciation from the citizens: include the church in the tourist city tours.</p>

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Brescia buffer zone</i>	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.7 B	Static restoration and conservation of churches and convents
Description NEW	<p><i>B - San Faustino church</i></p> <p>The project foresees a restoration and consolidation intervention in the ancient structure of the roof and in the inner parts of the San Faustino in riposo church, legally bound by the ministerial decree 22.03.1912</p> <p>The San Faustino in riposo church is also known with the name of Santa Rita, a saint venerated here. The church resembles a trullo and is set in Via Musei, under Porta Bruciata, within the ancient medieval city walls. It was built in 1200 on the ruins of an antique votive chapel of the 8th century, where the tradition says that the relics of Saint Faustino and Saint Giovita, the patron saints of the town of Brescia, rested here during their transfer.</p> <p>The building has a circular plan. The interior was changed a lot in the 18th and the 19th century.</p> <p>The church conserves an interesting painting of Domenico Romani: Vergine con il Bambino tra i santi patroni Faustino e Giovita (Virgin and child between the patron saints Faustino and Giovita), main altar.</p>
Actions	<ol style="list-style-type: none"> 1. Restoration of the cone roof of particular artistic middle ages value 2. Intervention for the inner structural recovery 3. Adapt the electrical and lighting system 4. New paint with a particular attention dedicated to the ancient layers
Parties involved	Parrocchia della Cattedrale, Fondazioni bresciane, Soprintendenza per i Beni Storico – artistici di Brescia, Cremona e Mantova Ufficio Diocesano Beni Culturali.
Phases and timeframe	by 2015
Financial resources	To be defined
Expected results	Stability of the building and in particular of the roof; hinder the causes of humidity, adequate opportunity to enjoy the artistic structure.
Result indicators	Support the culture and the knowledge of the history of the town; safeguard of the town planning medieval evidence, town history; inclusion in the city tourist tours.

PROTECTION AND CONSERVATION PLAN <i>Brescia buffer zone</i>	
Objective 14	CONSERVATION MEASURES ON HISTORICAL BUILDINGS
Project 14.7 C	Static restoration and conservation of churches and convents
Description NEW	<p><i>C – S. Maria della Carità church</i></p> <p>The project foresees interventions for the overall restoration of the S. Maria della carità church, which was in past the church of the monastery and cloister Buon Pastore.</p> <p>The origin if the church dates back to the 16th century: in 1640 the church was rebuilt by architect Agostino Avanzo and, after several changes in the first half of the 18th century, it was decorated with sculptures and paintings on the facade by Alessandro Callegari and the statue of the Angel with a lily on the left was added; the statue of the Angel with the house of Loreto was made by Antonio Ferretti and stands on the right side. The church was terminated in 1825 with the positioning of the great cross on the dome.</p> <p>In the second half of the 17th century an image of the Virgin was laid on the splendid high altar (one of the most beautiful in town). Behind the image a chapel, similar to the Saint house of Loreto (Santa Casa di Loreto) was built.</p> <p>We need to mention also the paintings of Antonio Gandino (Maria Maddalena Penitente) and of Francesco Paglia (SS. Antonio di Padova , Rocco, Sebastiano, Nicola da Tolentino).</p> <p>The notable pavement (octagonal) with multicoloured marbles is well integrated with the stuccos and the frescoes on the walls and with the architectural perspectives of the dome.</p> <p>In its whole the temple is a splendid expression of the baroque era in town. The situation today presents a progressive deterioration of the structures and of the pictorial decorations.</p>
Actions	<p><i>Phase A</i></p> <ol style="list-style-type: none"> 1. Preliminary studies to find the causes of the deterioration <p><i>Phase B</i></p> <ol style="list-style-type: none"> 2. interventions for the suture of damages and cracks

8.2 PROTECTION AND CONSERVATION PLAN DETAILED SCHEDULES

	<ol style="list-style-type: none"> 3. leaning and restoration of frescos, wash drawings and stuccos 4. Cleaning and eventual restoration of the marble parts of the altars, statues, puttos 5. Restoration of windows and glass doors 6. Interventions for the covering of the roof in order to prevent water and humidity seepage 7. Cleaning and restoration of paintings 8. Intervention for the restoration of the facade and painting 9. adapt the electric and sound system to the rules in force 10. new lighting system
Parties involved	Parrocchia della Cattedrale, Fondazioni bresciane, Soprintendenza per i beni Storico Artistici di Brescia, Cremona e Mantova, Ufficio diocesano Beni Culturali
Phases and timeframe	First phase: by 2011 Second phase: by 2015
Financial resources	To be defined for both phases
Expected results	Fitness for use of the building; eliminate the causes of the deterioration; full enjoyment of the architectural structure; study and cultural visits.
Result indicators	Greater knowledge and valorisation of the baroque architecture in Brescia; inclusion in the city tourist tours.

PROTECTION AND CONSERVATION PLAN <i>Brescia Territory</i>	
Objective 15	CONSERVATION OF THE LONGOBARD CONTEXTS IN THE BRESCIA TERRITORY
Project 15.1	Restoration and definitive cataloguing of findings and funeral artefacts found in the settlements and the recently excavated necropolis in Manerbio, Leno, Montichiari and Sirmione and from ecclesiastical buildings
Description	 <p style="text-align: center;"><i>Archaeological area of Manerbio during the excavation works</i></p> <p>The project envisages an intervention for the conservation and the valorisation of the findings and funeral artefacts and of some of the most significant ecclesiastical structures in the south-eastern territory and of the relative archaeological areas.</p>
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Cataloguing of archaeological findings coming from the territories of Manerbio, Leno, Calvisano, Montichiari, Sirmione and from neighbouring municipalities. 2. Restoration of the building and preparation of the archaeological area of the SS. Nazario e Celso church in Leno 3. Intervention for the conservation of the abovementioned findings. 4. Restoration of the building and preparation of the archaeological area of the early Christian church of San Pietro in Mavino in Sirmione 5. Restoration of the building and preparation of the archaeological area of the San Giorgio church in Montichiari
Parties involved	Ministero per i Beni e le Attività Culturali , Region Lombardia, Province of Brescia,, Municipalities of Brescia, Leno, Calvisano, Montichiari, Sirmione Direzione Regionale per i Beni Culturali e Paesaggistici della Lombardia Soprintendenza per i Beni Archeologici della Lombardia Fondazione CAB, Fondazione Dominato Leonense, Fondazione Civiltà Bresciana
Phases and timeframe	Four years period 2009-2013
Financial resources	To be quantified and to be found.
Expected results	Improvement of the conservation conditions of the findings and of the structures.
Result indicators	Intervention for the conservation on at least 1,000 Longobard findings.

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 17	IMPROVING THE STATE OF CONSERVATION OF THE CHURCH OF SANTA MARIA FORIS PORTAS
Project 17.1	Maintenance plan and works for the surfaces of the Church of Santa Maria foris portas
Actions ONGOING	A conservation intervention on the stretch of surface in opus sectile of the building is in the project phase. Works will start within June, 2009 and will be over by the end of 2010. <ol style="list-style-type: none"> 1. Cleaning and elimination of biodeteriogenic agents and detersion of their catabolitic products; 2. Procedures of disinfection and application of preventive treatments through biocides and protective ones with combined action for the reduction or decrease of the insurgence of new settlements of primary colonizers, including autotrophic forms; 3. Development of a monitoring and maintenance programme. <div style="text-align: center;">  <p><i>Detail of the opus sectile</i></p> </div>
Financial resources	€ 8.000,00 (co-financing from the Public notice of the Lombardy Regional Authority ll.rr.n.39/84 and n. 39/91, year 2008)

PROTECTION AND CONSERVATION PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.1	Recovery and restoration of the Baptistery of San Giovanni and creating a new roof
Actions ONGOING	Works have been subcontracted, the actual start depends on temperature, which must rise enough to allow proper conservation works. Preventive archaeological investigations were assigned, to identify the points where the plinths sustaining the cover will be inserted have been assigned; works will start in the spring. The covering of the Baptistery will be realized in plain glass slabs, cast in metal structure.

PROTECTION AND CONSERVATION PLAN <i>Castelseprio-Torba site and buffer zone</i>	
Objective 18	IMPROVEMENT OF THE STATE OF CONSERVATION OF THE CASTRUM
Project 18.3	Conservation work on the Church of San Paolo.
Actions ONGOING	70% of the interventions is completed, in particular, the following ones: <ol style="list-style-type: none"> 1. Static consolidation with injections of binder materials in the loose portions of walls 2. Conservation works and protection of the sealing mortar exposed on the conserved vestments 3. Realization of the layer protecting the top of the masonry 4. Fastening of the moving stone elements

**8.2 PROTECTION AND CONSERVATION PLAN

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN. <i>Spoletto site, buffer zone and territory</i>	
Objective 21	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA
Project 21.3	Planning of routine maintenance interventions and launch of the first cycle of interventions
Actions COMPLETED	In 2008-2009, only ordinary maintenance works were carried out at the basilica. Three broken glasses were replaced, as well as a rain gutter that could have caused humidity problems.

PROTECTION AND CONSERVATION PLAN. <i>Spoletto site, buffer zone and territory</i>	
Objective 21	DEVELOPMENT OF A MAINTENANCE PROGRAMME FOR THE BASILICA
Project 21.4	Maintenance intervention of stone material stored in the museum warehouse
Actions COMPLETED	Constant monitoring of the state of conservation of the stones removed from the basilica and kept in the communal museum stores was also performed during 2008.

PROTECTION AND CONSERVATION PLAN. <i>Spoletto site, buffer zone and territory</i>	
Objective 22	CARRYING OUT OF CONSERVATION INTERVENTIONS
Project 22.1	Launch of conservation and restoration interventions of the ex convent complex
Actions ONGOING	In 2008-2009, the municipality of Spoleto, - thanks to the funds allocated by Umbria regional authorities, amounting to € 300,000 - started conservation and regeneration work on the former monastery, the building standing next to the basilica of San Salvatore, in a bad state of conservation and virtually unfit for use. A feasibility study is currently being carried out to restore the building, - which will become a documentation and information centre in the service of the basilica – and for the regeneration of the area bordering the site.

PROTECTION AND CONSERVATION PLAN. <i>Spoletto buffer zone and territory</i>	
Objective 22	CARRYING OUT OF CONSERVATION INTERVENTIONS
Project 22.2	Conservation and restoration interventions in the Roman Theatre area
Actions COMPLETED	In 2009 conservation works on the Roman Theatre in Spoleto were completed 
	<i>The Roman Theatre</i>

PROTECTION AND CONSERVATION PLAN. <i>Campello sul Clitunno site</i>	
Objective 25	IMPROVEMENT OF THE STATE OF PROTECTION AND CONSERVATION OF THE CLITUNNO TEMPIETTO AND THE CLITUNNO RIVER
Project 25.1	Maintenance work with particular reference to tombstone materials and internal walls of cell and external walls of pronaos
Description ONGOING	<p>In 2008, ordinary maintenance interventions have been carried out, related to the structure, the retaining wall and the decorated surfaces of the building..</p> 
Actions	<ol style="list-style-type: none"> 1.Consolidation and conservation works on the retaining wall in stone that holds the escarpment behind the monument 2.Consolidation and conservation works of decorated and sculpted surfaces

PROTECTION AND CONSERVATION PLAN. <i>Campello sul Clitunno Territory</i>	
Obiettivo 25	IMPROVEMENT OF THE STATE OF PROTECTION AND CONSERVATION OF THE CLITUNNO TEMPIETTO AND THE CLITUNNO RIVER
Progetto 25.4	Protection system of the Clitunno river water
Description NEW	<p>In 2006, the industrial estate saw an explosion: some oil filled silos exploded and the oil poured onto the streets and later into the river. An ad hoc commissioner was appointed to tackle the environmental emergency and with an Commissioner's order, the municipality of Campello sul Clitunno allocated € 700,000 for the implementation of two specific initiatives to promote the safeguard of and improve the river water quality, seriously impaired by the disaster. Therefore, direct intervention measures were agreed upon, envisaging the reclamation of the riverbed and the embankments of the Clitunno river, as well as essential improvements of the sewage system, which had some weak points. The latter initiative was designed to rebuild the rain- and groundwater collector in the industrial estate and the establishment of connections to all end users in the area.</p> <p>Once all the work has come to an end, the Clitunno Tempietto will be protected from any form of industrial pollution and even from potential pollution.</p>

**8.2 PROTECTION AND CONSERVATION PLAN

<p>Financial resources</p>	<p>State funds have been acknowledged by the Italian Government to the Commune of Campello under Presidential Decree #.3609 of 29 August 2007.</p>

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN. <i>Campello sul Clitunno Territory</i>	
Objective 28	CONSOLIDATION AND RESTORATION OF THE SITES DAMAGED BY THE 1997 EARTHQUAKE
Project 28.1	Securing and consolidating the Sanctuary of the Madonna della Bianca
Description	<p>A few months ago, works of structural and functional adaptation of the Sanctuary of Madonna della Bianca have started; The church, by the elegant workmanship, dates to the 16th century and rises at the centre of Campello sul Clitunno and is presently closed to the cult because seriously damaged by the 1997 earthquake and by the weaker December 2005 seismic swarm.</p> <div style="display: flex; justify-content: space-around;">  </div>
Actions ONGOING	<p>Already started:</p> <ol style="list-style-type: none"> 1. Securing intervention 2. Structural consolidation intervention 3. Conservation intervention 4. Seismic improvement 5. Realization of a heating plant
Financial resources	Funds have been allocated by Region Umbria (Regional Act of 12.08.98, # 32 – Yearly plan for assets damaged by earthquakes): € 250.000,00

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN <i>Benevento site</i>	
Objective 29	IMPROVING THE STATE OF CONSERVATION OF THE SITE
Project 29.1	Maintenance and conservation improvement of the Church of Santa Sofia
<p>Actions COMPLETED <i>phase A</i></p>	<p>Once acquired the ultimate project as drafted by the Ministry for Cultural Assets and Activities, through coordination by the Ministry's regional department, the Commune has farmed out the works, making use of funds from Region Campania POR 2000-2006, for an overall amount of € 650,000.00, keeping the works' direction and survey. Works have almost ended, new plasters have been made, stone materials have been cleaned, a new illumination system and a new floor have been realized. Floor polishing and surface treatment are yet to be finished. Removal of the old cementitious mortar plaster from the perimeter walls has allowed for a new detailed survey, on the basis of which, further deepening studies are now being carried out, on both the Early Middle Ages church and the methods of restoration during the '50s of last century. All phases of the intervention have been documented and posted on http://sicar.mbigroup.it in the frame of the project SICAR-Information System for the documentation of Conservation Works Yards on the web, a platform arranged by the Ministry for Cultural Assets, by the Superintendency of Pisa, in collaboration with Scuola Normale di Studi Superiori and with the University of Pisa. On the very same webpage, information related to previous conservation intervention on the church have been posted.</p> <div style="display: flex; justify-content: space-around;">   </div> <p style="text-align: center;"><i>Conservation intervention on the church of Santa Sofia, on the way to be completed</i></p> <div style="text-align: center;">  </div>

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

PROTECTION AND CONSERVATION PLAN. Benevento site and buffer zone	
Objective 30	IMPROVING THE STATE OF CONSERVATION OF LONGOBARD ASSETS INCLUDED IN THE SITE AND IN THE BUFFER ZONE
Project 30.1	Maintenance of the Longobard tomb in the Church of S. Salvatore
Actions ONGOING	The Superintendency for Historic and Artistic Heritage of the Province of Benevento has launched a maintenance project for the Longobard tomb in the Church of S. Salvatore. Funding has been implemented within its own programme of activities.
Financial resources	€ 50,000.00 from ordinary funds of the Superintendency for Architectural, Landscape, Historic, Artistic and Ethnoanthropological Heritage.

PROTECTION AND CONSERVATION PLAN. Benevento site and buffer zone	
Objective 30	IMPROVING THE STATE OF CONSERVATION OF LONGOBARD ASSETS INCLUDED IN THE BUFFER ZONE
Project 30.2	Maintenance work on the Longobard boundary wall
Actions COMPLETED	<p>The scheduled conservation intervention on the Longobard boundary walls was completed; it was realized on a project by the Commune of Benevento, which also directed the works, with EU funds from the 2000-2006 ROP. A Lowest Unique Bid Auction was called for, to realize sidewalks around a great part of the boundary walls, using acciottolato and lava stone.</p> <p>The maintenance works allow for a better reading of not only the boundary walls, but also of the numerous spolia that were reused for building them. Besides, during the works, archaeological investigations were led where necessary, on the base of the walls, which allowed for widening the knowledge on the long-lasting boundary walls.</p>
	

8.2 PROTECTION AND CONSERVATION PLAN DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo site</i>	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.1	Project and intervention for the realisation of a system for the detection, control and correction of the rate of humidity in the locations of the Longobard Gallery, the adjoining rooms, the Angioina staircase, the cave-sanctuary and the rooms connected to it
Actions ONGOING	Preparatory surveys for specific analysis were started by experts from the Universities of Bari and Foggia, under the supervision of the Superintendency for Cultural Heritage. Specialized firms carrying out technical surveys on the site were contacted in order to obtain detailed estimates for technological equipment supply.

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo site</i>	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.2	Maintenance on the external wall covering north side
Actions ONGOING	The plan has been rescheduled. The current deadline is the end of 2012.

CONSERVATION AND CONSERVATION PLAN <i>Monte S. Angelo site</i>	
Objective 37	HEIGHTENING OF THE CONSERVATION STATE OF THE SANCTUARY
Project 37.3	Planning and conservative intervention on the bronze doors
Description	 <p>The first researches aimed at detecting the chemical composition of the metallic alloys of the panels as well as the analyses of their chromatic trimmings were carried out in 2008-2009. On the grounds of the collected data, it has been set a global conservative planning which is oriented to the safeguard of the bearing structure of the doors: indeed, the slight deformation of their wooden parts – where even some small gaps have been recorded – do not allow to open and close the door leaves. Three detailed projects have been planned for extraordinary maintenance and cleaning works of the images (indeed, the damascened portions are damaged by metals sulphation) under the direction of the most qualified restoration companies working in Italy and specialized in restoration of metals. These three restoration projects have been submitted to the A.R.P.A.I. (Italian Association for the Artistic Heritage Restoration) which included the present intervention among those to be proposed to the members' munificence (according to the Declaration of Intent signed by the A.R.P.A.I. President, dr. Gian Antonio Golin).</p>
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Execution of analyses to verify the causes of alteration in wooden components COMPLETED 2. Diagnosis of the general conditions of the bronze and wooden components COMPLETED

**8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES**

	<p>3. Carrying out of the project COMPLETED</p> <p>4. Fund raising necessary for the work COMPLETED</p> <p>5. Accomplishment of the intervention (2010)</p>
Parties involved	The Superintendency for the Historical Patrimony, Artistic and Ethno-anthropological Heritage for the provinces of Bari and Foggia, Sanctuary of S. Michael the Archangel.
Phases and timeframe	The conservative intervention (phase 5) will begin in 2010.
Financial resources	A.R.P.A.I.
Expected results	Reinforcement of the wooden structure, recovery of the full functionality of the door leaves, improvement in the visible condition of the bronze surface and niellated images.
Result indicators	Mitigation of the vulnerability of the asset.

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo site</i>	
Objective 37	HEIGHTENING OF THE STATE OF CONSERVATION OF THE SANCTUARY
Project 37.4	Planning and intervention on the portcullis and the column of the upper atrium
Actions ONGOING	A detailed analysis of the degradation state is currently being conducted by the public works office of the Municipality of Monte Sant'Angelo, with a view to quantifying the financial resources needed to carry out the operations.
Financial resources	To be determined.

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 40	IMPROVE THE STATE OF CONSERVATION OF THE NORMAN WALL BELT
Project 40.1	Maintenance on the visible parts of the wall circle to implement knowledge and use of the same
Actions ONGOING	<p>The public works office of Monte Sant'Angelo carried out an accurate survey on the visible parts of the town walls and is planning the intervention.</p> <p><i>First intervention planned:</i></p> <ol style="list-style-type: none"> 1. Acquisition of buildings for demolition 2. Restoration and promotion of a tract of the walls on the northern side, view of which is partly obstructed at present by modern constructions to be demolished.
Financial resources	1. €1,200,000.00 obtained from the Municipality's budget

8.2 PROTECTION AND CONSERVATION PLAN
DETAILED SCHEDULES

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 41	ENSURE THE STATE OF CONSERVATION OF THE SAN PIETRO - TOMBA DI ROTARI - SANTA MARIA MAGGIORE COMPLEX
Project 41.1	Monitoring and programmed maintenance plan
Actions ONGOING	<p>Conservation works on the Baptistry of San Giovanni in Tumba, known as Tomba di Rotari, were finished under the direct supervision of the Superintendency.</p>  <p>The starting phase of the survey project on the whole complex is being arranged. Conservation works on the Baptistry of San Giovanni in Tumba, known as Tomba di Rotari, were finished under the direct supervision of the Superintendency. The starting phase of the survey project on the whole complex is being arranged.</p>

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 41	ENSURE THE STATE OF CONSERVATION OF THE SAN PIETRO - TOMBA DI ROTARI - SANTA MARIA MAGGIORE COMPLEX
Project 41.2	Maintenance of internal decorations
Description NEW	The Tomba di Rotari – the external walls of which have already been consolidated – is currently being maintained internally as well. In detail, ornaments are being maintained and stone decorations of the cornices running along the walls of the tomb's space are being cleaned and restored.
Actions	<ol style="list-style-type: none"> 1. Analysis and description of materials and construction-implementation techniques 2. Analysis of degradation states 3. In-depth surveys aimed at identifying the materials and degradation states 4. Cleaning and restoration 5. Preparation of a maintenance plan
Parties involved	Board of management of the Sanctuary of St. Michael the Archangel Parrocchia Santa Maria Maggiore (??) Puglia Superintendency for Architectural, Landscape, Historic, Artistic and Ethnoanthropological Heritage Municipality of Monte Sant'Angelo
Phases and timeframe	Starting from 2010
Financial resources	Resources for the operations described above were supplied by the Italian Ministry for Cultural Heritage and Activities within the framework of its 2008 Ordinary Programme and managed by the Superintendency for Architectural, Landscape, Historic, Artistic and Ethnoanthropological Heritage/Bari.
Expected results	Improved general maintenance state for the complex
Result indicators	Amount and quality of interventions carried out

Objective 43	MAINTENANCE AND RECOVERY OF THE CHURCHES AND MONASTIC COMPLEXES OF THE HISTORICAL CENTRE
Project 43.2	Elaboration of a programme of interventions for the conservation and valorisation of the assets.
Actions ONGOING	Operations being carried out: <ol style="list-style-type: none"> 1. Extraordinary maintenance of the roofing of the Church of SS. Trinità 2. Census to attest the state of conservation, 3. Census to identify the most needed interventions on the churches and monastic complexes in the historical centre 4. Systemization of the data by the Commune's archives, useful to perform thematic surveys and analytical investigations
Financial resources	1. €100,000.00 obtained from the 2009 Municipality's budget

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 44	IMPROVE THE STATE OF CONSERVATION OF THE SAN FRANCESCO COMPLEX
Project 44.1	Completion of the cognitive phase introductory to the completion of the restoration in progress with the realisation of topical surveys and analytical investigations
Actions ONGOING	Start of the systemization of the information in the Municipality's archives, related to the complex and to the past conservation interventions, of which there is available material, and that is considered useful for the next thematic surveys and analytical investigations

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 44	IMPROVE THE STATE OF CONSERVATION OF THE COMPLEX OF SAN FRANCESCO
Project 44.2	Completion of the restoration in progress
Actions COMPLETED	Conservation works on the church of San Francesco have ended. The church was given back for cult use with a religious ceremony on 24 January, 2009. On the basis of actions under project 44.1, further interventions on the monastic complex will be carried out.

PROTECTION AND CONSERVATION PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 44	IMPROVE THE STATE OF CONSERVATION OF THE COMPLEX OF SAN FRANCESCO
Project 44.4	Restoration of the bell tower
Description NEW	The community of Friars Minor Conventual of Monte Sant'Angelo has supervised, on the wake of prior restoration activities, the preparation of a further project to complete the restoring work being carried out on the bell tower. The community has also prepared and put forward a new plan, with the title "Francesco Pellegrino dell'Arcangelo" (Francis Pilgrim of the Archangel), envisaging the refunctionalization of the existing convent – to be used partly to welcome pilgrims – and the restoration of the building of the former Church of Santo Stefano. The operations will revitalise the friars' presence and activities, which are tangible proof of the special devotion of Saint Francis of Assisi to Michael the Archangel. The interventions carried out on the facilities will be followed by a variegated promotion programme aimed to attract Saint Francis' devotees to the Archangel's cave.
Actions	<ol style="list-style-type: none"> 1. Restoration of the bell tower and recovery of the buried rooms of the church; 2. Refunctionalization of the convent of Franciscan Friars; 3. Recovery of the building of the former Church of Santo Stefano; 4. Tidying up of neighbouring areas;
Parties involved	Community of Friars Minor Conventual of Monte Sant'Angelo Puglia Religious Province of Saints Nicholas and Angel

ENHANCEMENT PLAN <i>Cividale del Friuli site</i>	
Objective 3	UPGRADING OF MONASTERY OF SANTA MARIA IN VALLE AND INCREASE IN THE DEGREE OF ENHANCEMENT OF LONGOBARD TEMPIETTO
Project 3.2	Improvement work on Longobard temple
<p>Actions COMPLETED</p>	<p><i>First planning phase:</i> Realization of a new entrance for the Monastery itself and for the Longobard Tempietto, extending the route from Via Monastero Maggiore through the San Giovanni courtyard and also reaches some important areas of the Monastery</p>  <p style="text-align: center;">INTERVENTION MEASURES TO BUILD A NEW ENTRANCE TO THE MONASTERY AND THE LONGOBARD TEMPIETTO</p> <ol style="list-style-type: none"> 1. Maintenance of the façade and restoration of the portal 1a. Iron gate and grating for the monastery courtyard to be seen during closing hours too 1.b The floodlighting of the Church of San Giovanni 2. Restoration of wooden window and portal frames 3. Restoration and refurbishment of existing toilets 4. Maintenance of the façade 5. Maintenance of the surfaces, restoration of windows and portal frames and the making of a new window frame 6. Cloister floodlighting 7. Archaeological excavations and new floor construction to access the sacristy of the Tempietto 8. Archaeological excavations and new floor construction 9. Opening up of the blocked up door of the sacristy 10. Restoration of window and door frames at the first and the second floor of the cloister 11. Maintenance work on the Tempietto and enhancement of the lighting system 12. Restoration of the iron parapet along the path to leave the Tempietto so that to bring it into compliance with safety requirements 13. Fencing to access the Ursuline kitchen garden

COMPLETED

Description of the realized work:

- Maintenance of San Giovanni courtyard façade and restoration of the wooden entrance door (1- 1.a). Realization of lighting system for courtyard and Church of San Giovanni and proposal for the building of an iron entrance door (1b) to allow visibility of the courtyard from Via Monastero Maggiore, while keeping the wooden entrance door open
- Restoration of wooden windows (2)
- Recovery and renovation of existing bathrooms (3)
- Maintenance of pronaos façade in the Church of San Giovanni (4)
- Maintenance of Monastery entrance surfaces with restoration and creation of windows (5)
- Realization of a lighting system for cloisters (6)
- Project for demolition and carrying out of archaeological digs needed to improve use of area around Tempietto and relative new flooring (7-8) (see Knowledge Plan, Project 2.1)
- Restoration of surface of cloisters and the façade windows on first and second floor (10)
- Restoration and adaptation to safety regulations of the iron parapet on Tempietto exit route (12)
- Realization of archaeological excavations (see Knowledge Plan, project 2.1)
- Removal of buffered door of the sacristy to create a new entrance to the Tempietto from the Monastery, with exit from walkway on River Natisone (9)
- Maintenance work on Tempietto and expansion of lighting system (11)
- Realization of fencing to allow limited access to an area of the Ursuline Vegetable Garden (13)
- Checking, planning and creation of a surveillance system

UPGRADING OF THE ENTRANCE TO THE MONASTERY AND TO THE COURTYARD OF SAN GIOVANNI

Iron gate and grating to allow for visibility of the courtyard also during closing hours.

RESTORATION OF WOODEN DOORS, WINDOWS AND SHUTTERS MAINTENANCE OF THE FAÇADE OF THE CHURCH OF SAN GIOVANNI.

Phases of the removal of the cement plaster used in the restoration interventions carried out after the earthquake in 1976. There were not other plaster layers on the masonry.

The reading of the features and of the building phases (see Knowledge Plan. Project 6.1), thanks to the traces on the masonry after the removal of covering, enabled to start studying the construction phases and will be the base to plan the recovery intervention.

Restoration phases of the façade of the Church of S.Giovanni

Façade of the Church of S.Giovanni after the plaster removal

Study of the building phases of the Church based on the stratigraphic analysis
UPGRADE OF THE WALKWAY BETWEEN THE COURTYARD OF SAN GIOVANNI AND THE

CLOISTER OF THE MONASTERY

It is a very important connecting area of the various sectors of the monastery, where it is supposed that there are the traces of the oldest structure of the area of the gastaldaga suggested by some archeological finds and by the general topographic set-up of the structures.

- Restoration of the wooden floor found behind a recent false ceiling that was removed enabling to bring to light the original structure and the lateral painted hollow tiles of the Renaissance.
- Study of the come-out stratification, both of the plaster and of the wooden floor.

Wooden floor (XV-XVI centuries) discovered during restoration works

RESTORATION AND ADAPTATION TO SAFETY REGULATIONS OF THE IRON PARAPET ON THE TEMPIETTO ENTRANCE ROUTE.

The restoration of the iron parapet on the Tempietto entrance route has been carried out. The intervention works consisted in the cleaning of the iron handrail, the passivating treatment, the finishing with iron-micaceous varnish and testing of the footing anchorage.

REMOVAL OF THE BUFFERED DOOR OF THE SACRISTY OF THE TEMPIETTO

Within the Tempietto new entrance plan the removal of the buffered door on the south side of the sacristy is being realized, enabling the entrance to the monument from the cloister of the monastery.

CONSERVATION AND DEVELOPMENT WORKS OF THE EXCAVATION AREA BY THE COURTYARD OF THE TEMPIETTO

The archaeological action taken during the first phase of the development works of the monastic complex brought to light important evidence concerning the development of the area, particularly on the southern side of the Longobard Tempietto.

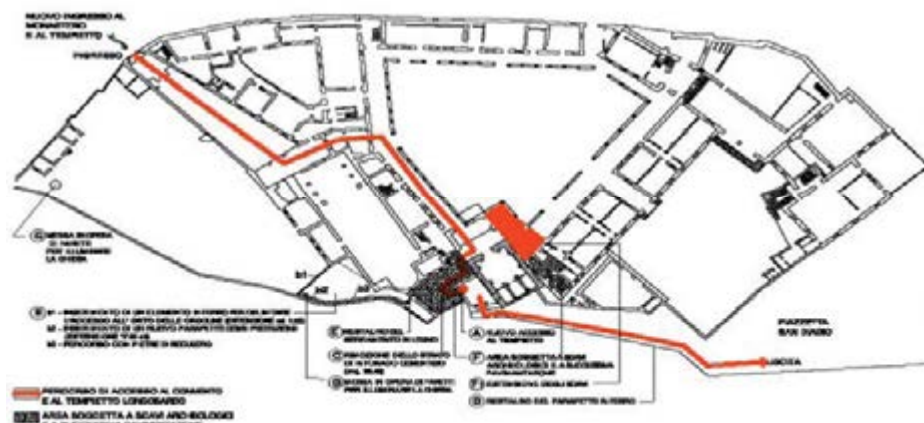

The project entails a partial covering of the excavations, the conservation at sight of a part of the archaeological remnants after the necessary cleaning, strengthening, protection and development.

The area to be covered coincide with the entrance to the Longobard Tempietto through the door currently present in the sacristy wall.

Project table of the archaeological excavation covering and photo of the building site

SACRESTIA – NUOVO ACCESSO AL TEMPIETTO

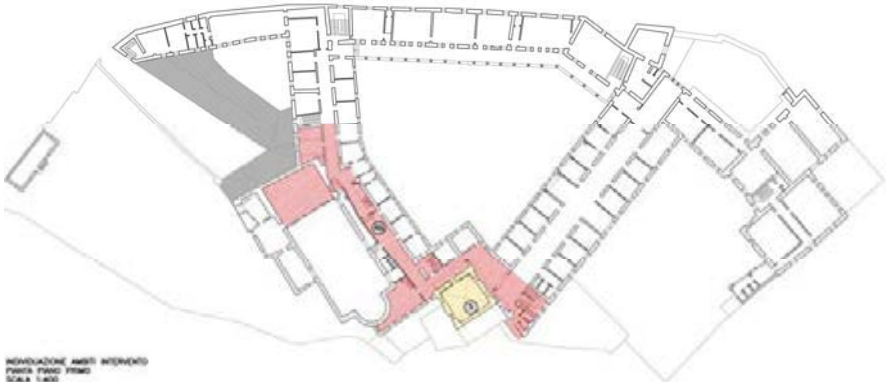

Map of the new entrance route across the sacristy

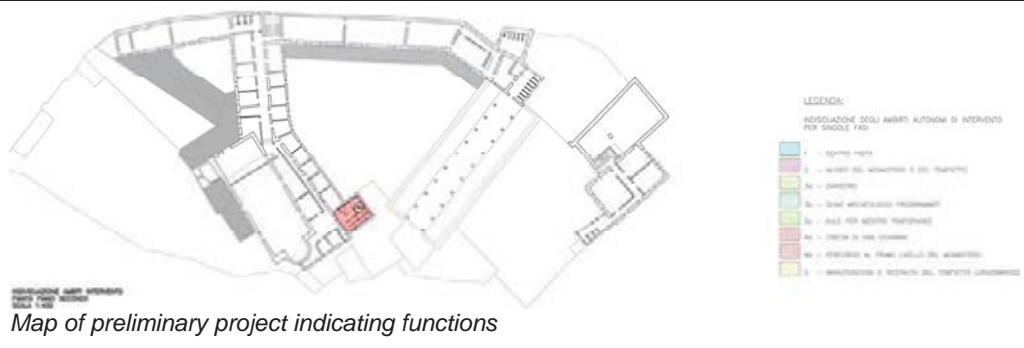

REALIZATION OF FENCING TO ALLOW ACCESS TO AN AREA OF THE MONASTERY VEGETABLE GARDEN WITH A VIEW ON THE RIVER.
An iron gate has been realized and will be positioned to confine the area of the vegetable garden open to tourists.

Parties involved	Municipality of Cividale del Friuli, Superintendency for Archaeological and Environmental Heritage and Friuli Venezia Giulia Superintendency for Archaeological Heritage
Expected phases and time frame	2008- 2009
Financial resources	Funds allocated by the Municipality of Cividale: € 250,000.00

ENHANCEMENT PLAN <i>Cividale del Friuli</i>	
Objective 5	EXPANSION OF CHRISTIAN MUSEUM AND IMPROVEMENT OF CULTURAL OFFER IN THE CATHEDRAL AREA
Project 5.1	Completion and expansion of Christian Museum and Duomo's Treasure
Actions COMPLETED	<p>Completion of the expansion-restoration works and improvement of the surveillance systems of the Christian Museum - Treasure of the Duomo</p> <ol style="list-style-type: none"> 1. Realization of a new setting up of the room where the Altar of Ratchis and the Baptistry of Callisto are kept. 2. Widening of the museum with 3 new rooms to exhibit religious objects, pictures and sacred vestments. 3. Reopening to the public since 21st June 2008 4. Creation of the website and realization of the informative flier.

ENHANCEMENT PLAN <i>Cividale del Friuli buffer zone</i>	
Objective 6	CREATION OF COORDINATION SYSTEM FOR MUSEUM OFFER
Project 6.1	Organisation of museum visiting system with single ticket
Actions ONGOING	<p>The Municipal Administration (Town Council decision of 27.06.2009) approved the institution of a single ticket for the entrance to the Longodard Tempietto/ Monastery of Santa Maria in Valle, Museo Cristiano and Tesoro del Duomo (MUCRIS) and the National Archaeological Museum (MAN). The memorandum of understanding was signed by both the Municipality and the Parish Church under conditions mutually established.</p> <p>With a further Town Council decision on 25.11.2009 the introduction of a single ticket for the year 2010 was approved. This measure provides for the creation of a single type of ticket for the three bodies for over 25 -under 65 guests who do not fall into the following categories: EU guides, EU interpreters, EU disabled people with carer, MiBAC staff, ICOM members, EU students with teacher, volunteer with convention (all categories who are granted free entrance to MAN).</p>

ENHANCEMENT PLAN <i>Cividale del Friuli</i>	
Objective 7	ENHANCEMENT OF HERITAGE OF CODICOLOGICAL ARCHIVESS
Project 7.1	Creation of Archives and Documents Centre
<p>Actions</p> <p>ONGOING</p>	<p>A – In April 2009 the Regional Government of Friuli Venezia Giulia granted the prestigious status of “Bodies of regional significance” to two bodies in Cividale:</p> <p>a) Biblioteca Civica di Cividale del Friuli, as it coordinates the conservation and use of significant documentary heritages in the region. To obtain the status, in 2008 the library acted as a frontrunner and promoter of a memorandum of understanding for the creation of a town library hub in which some of the main bodies of Cividale merged: National Archaeological Museum, Fondazione De Claricini Dornpacher, Fondazione Niccolò Canussio, Società Operaia di Mutuo Soccorso, Circolo Culturale Ivan Trinko, Convitto Nazionale “Paolo Diacono”, the Municipality of Cividale. The aim was to develop the huge book and documentary heritage of Cividale and set up an innovative integrated service meeting the knowledge needs of citizens, students and experts. The operational goals of the library are:</p> <ol style="list-style-type: none"> 1. setting-up of a website which gathers information on collections, timetables and access conditions as well as services provided; 2. definition of shared criteria for the use of material, 3. planning of public services to facilitate the access to information and documents; 4. promotion of the activities and services provided; 5. cataloguing and coordination of collections, 6. strengthening of the specialization of single libraries; 7. updating of IT and technological equipment <p>b) Associazione CP Patriarcato di Aquileia, for the development of the initiative of digitalization and classification in a database of archival and historical material concerning the history of the Patriarchate of Aquileia and other historical documentary archives as well as for the spread of archive contents according to yearly programmes for the development of resources. The association provided the Ministry of Cultural Affairs with an important computerized service during the drawing up of the management plan of the UNESCO candidacy and is composed of : Parish Church of Santa Maria Assunta, Fondazione De Claricini Dornpacher, the Municipality of Cividale, Banca Popolare FriulAdria-Crédit Agricole. During the period between 2008 and 2009 the association worked according the following guidelines:</p> <ol style="list-style-type: none"> 1. Agreement among the municipality of Cividale, Superintendences and other public and private holders of bibliographic-manuscript Archives for the valorisation of the documentary-librarianship heritage present in the town. The agreement, which is being defined, aims at realizing an innovative integrated system that meets the informative needs of citizens, students and researchers. 2. Study of the final setting up of the premises in Santa Maria in Valle to contain the Archives of the Municipality and of the Hospital of Cividale 3. Transfer of the archival materials in temporary premises in S. Maria in Valle 4. Agreement between the University of Udine and the Promoting Board of the Patriarchy of Aquileia Project for the reorganization and registration of the historic documents of the Archives of the Hospital that the Municipality has obtained on bailment from Azienda sanitaria Medio Friuli (introduction to the setting up of the Archival-Bibliographic Centre)

Website www.patriarcatoaquileia.it

5. Implementation of the database of the historic-documentary sources relative to the historic phase of the Patriarchy of Aquileia
6. Reorganization, registration and implementation of the database of the Capitular Archive (Parish Church S.Maria Assunta and National Archaeological Museum)
7. Agreement with the University of Udine for the enhancement of the historic-archival documents
8. Convention with the University of Udine for the financial support to the reorganization and registration of the Historic Archives of the Hospital of Cividale (in collaboration with the Municipality of Cividale)
9. Convention with the regional cataloguing Centre of Villa Manin for the reorganization and registration of a part of the Capitular Archives of Cividale.

B – Town Historical Archive After renovating the Historical Archive of the Cividale Hospital and placing it at the experts' disposal – an initiative co-financed by the Associazione Patriarcato di Aquileia and the University of Udine - the Municipal Administration started the renovation work of the Town Historical Archive as well. The archive consists of documents dating back to the period from 1176 to 1954 and is divided into two sections: the Ancient section was stored in the National Archaeological Museum in 1895 whereas the section concerning XIX and XX centuries is stored in the town hall. It is an archive of great value for its ancient manuscripts and parchments including the diploma through which St. Paulinus was appointed Patriarch of Aquileia by Charlemagne. Thanks to the Region's contribution covering 50% of total costs, the Municipality entrusted an archive-keeping firm with a specialist task and approved the reorganization phases.

Objective 11	EXPANSION OF THE CULTURAL OFFER IN THE DUCHY OF FRIULI TERRITORY
Project 11.2	Expansion of the museum network “The <i>Castra</i> of Paolo Diacono and the Duchy of Friuli”
Actions ONGOING	<p>A Implementation of the protocol of the agreement between the Province of Udine and the Municipality of Artegna for the enhancement of the museum network “The <i>Castra</i> of Paul the Deacon and the Duchy of Friuli”.</p> <ol style="list-style-type: none"> 1. start up of the first census of the evidences visible in the municipalities of the province 2. support to the project by the <i>Italian Castles Institute</i> (Friuli Venezia Giulia section) <p>B) Improvements of the offer for the visits to the <i>castra</i>:</p> <ol style="list-style-type: none"> 1. OSOPPO / Realization of the visit route to the remains of the Paleochristian and medieval Church of San Pietro, with educational panels in Italian, Friulan and English. 2. ARTEGNA / Covering and delimitation of the remains of the cistern and completion of the visit route to the evidences of <i>castrum</i> (the cistern, the western fortified walls and the fortification of the plateau with educational panels in Italian, English and German; realization, within the activities of the ecomuseum “The archaeological park of San Martino Hill” (location of <i>castrum Artenia</i>), of educational laboratories for schools aiming at discovering the archaeological and naturalistic aspects; realization of informative leaflets on the evidences and the possibility of visiting the remains
	 <p><i>The cistern after the restoration and with the new covering</i></p>

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Cividale del Friuli</i> buffer zone	
Objective 12	ENHANCEMENT OF ENDOGENOUS RESOURCES IN THE AREA
Project 12.1 12.2	12.1 Creation and enhancement of the Vines and Wines Park 12.2 Creation of thematic routes: "The Archive Vineyards"
Actions ONGOING	12.1 Continuation of archival researches for the identification of documents where it is possible to find the presence of vineyards in specific areas of the territory 12.2 -Starting up of the mapping of the territory for the realization of routes whose subject is the historic presence of vineyards, coordinated with present wine growers and producers (realization of maps finalized at the food and wine tourism)

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 13	INCREASING THE LEVEL OF VALORISATION OF THE STRUCTURES OF THE SITE
Project 13.1	Arrangement of the green areas south of the Ortaglia <i>domus</i>
Actions COMPLETED	Extraordinary maintenance of the green areas and build the parking area for the service cars in the space on the southern side of the <i>Domus dell'Ortaglia</i> .
 <p style="text-align: center;"><i>The area on the south of the Domus dell'Ortaglia during and after the works</i></p>	

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 13	INCREASING THE LEVEL OF VALORISATION OF THE STRUCTURES OF THE SITE
Project 13.2	Completion of the irrigation plant for the green areas
Actions COMPLETED	Construction of the automatic irrigation system in the San Salvatore cloister
 <p style="text-align: center;"><i>The San Salvatore cloister before and after the intervention for the construction of the irrigation system</i></p>	

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 13	INCREASING THE LEVEL OF VALORISATION OF THE STRUCTURES OF THE SITE
Project 13.3	Internal illumination for the church of Santa Maria in Solario
Actions COMPLETED	New lighting system of the “Croce di Desiderio” (Desiderio’s cross) and new lighting system in the Santa Maria in Solario church. 
	<i>Croce di Desiderio</i>

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Obiettivo 13	INCREASING THE LEVEL OF VALORISATION OF THE STRUCTURES OF THE SITE
Progetto 13.4	External illumination for the monastery of San Salvatore-Santa Giulia
Actions ONGOING	Carry out a project to improve the lighting of the buildings in the monastery.
Phases and timeframe	From 2011

ENHANCEMENT PLAN <i>Brescia site</i>	
Objective 13	INCREASING THE VALORIZATION STANDARD OF THE STRUCTURES OF THE SITE
Project 13.5	New signal system on the visit routes
Description COMPLETED	New signal system on the visit routes, integrating the previous one, to better orient the visitor inside the monastic complex and the museum sections

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

	 <p style="text-align: center;"><i>The new signal system on the visit routes</i></p>
Actions	<ol style="list-style-type: none"> 1. Analysis of the existing situation 2. Study and projecting of the new signal system 3. Realization and installation
Parties involved	Municipality of Brescia Foundation Brescia Musei
Phases and timeframe	Realization during 2009
Financial resources	Overall costs: € 55.000,00 about Funds already allocated by the Municipality of Brescia
Expected results	Better usage of the Museum spaces for the visitors and enhancement of the complex valorization level
Result indicators	Appreciation by the visitors

ENHANCEMENT PLAN *Brescia site*

Objective 13	IMPROVE THE VALORIZATION STANDARD OF THE STRUCTURES OF THE SITE
Project 13.6	Interventions of illumination of the museum displays
Description	The intervention includes the remaking of the displays' illumination system through LED technology, to better valorize the exhibited finds and enhance the conservation standard, thanks to no ultraviolet and infrared rays
Actions COMPLETED	<ol style="list-style-type: none"> 1. Draft of an illumination project 2. Verification test 3. Realization of the intervention
Parties involved	Municipality of Brescia Foundation Brescia Musei
Phases and timeframe	Realization during 2009
Financial resources	Overall costs: to be defined Funds already allocated by the Municipality of Brescia and intervention of private sponsors
Expected results	Remarkable decrease of maintenance costs; substantial energy saving (more than 60%); no ultraviolet and infrared emission
Result indicators	Renovation of the displays' illumination spots

ENHANCEMENT PLAN *Brescia site and buffer zone*

Obiettivo 14	IMPROVEMENT OF THE QUALITY OF THE SERVICES FOR THE VISITORS
Progetto 14.1	Organisation of a visitor centre on the monastery and on the network of Longobard sites
Description	Next to the entrance of the <i>Santa Giulia Museo della città (Santa Giulia city museum)</i> , close to the ticket office, we will organise an information point dedicated particularly to the monumental site and to other centres belonging to the network " <i>Italia Langobardorum</i> ".
Actions	<ol style="list-style-type: none"> 1. Acquisition of new spaces 2. Preparation of informative graphic material 3. Preparation of informative multimedia products
Phases and timeframe	Suspended – To be planned again

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INCREASING IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.2	Automatization of ticket sale and improvement of the related software
Description	Automatic integrated system for the management of the ticket office, the book shop and the storage; Computerisation of the visitors' data.
Actions COMPLETED	<ol style="list-style-type: none"> 1. Analysis of the existing system 2. Purchase new equipment 3. Install the system 4. Train the staff of the museum for the use of the new system

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INCREASING IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.3	Activation of the e-commerce service related to the services of the Musei Civici (Museums of the town)
Description	On-line tickets sale and merchandising of the book-shop
Actions	1. Purchase the system
Phases and timeframe	by 2010

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INCREASING IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.4	Improvement in video systems available to users
Actions COMPLETED	<p>The old Personal Computers have been replaced with new ones in the Roman section, which is available for the visitors, who can watch didactic videos.</p>  <p style="text-align: center;"><i>The three new computers, available for the visitors</i></p>

**8.3 ENHANCEMENT PLAN

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INCREASING IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.5	Improvement of the services offered to the users of the Santa Giulia Auditorium, including the side gallery
Description	Technical improvement in order to guarantee an ever better service for the users of the Auditorium. In 2009 the configuration of the computer equipment for the web, with the definition of a public IP address so as to facilitate the access to the videoconference system, was set up.
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Improvement of the sound system 2. New lighting of the galleries 3. Configuration of the web systems 4. Window darkening 5. Agreement with Brescia Trasporti SpA
Phases and timeframe	By 2010
Financial resources	For the point 3 of the actions the financial resources allocated by the Fondazione Brescia Musei reached € 1,700.00.

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INCREASING IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.6	Integration of the routes in the city museum <i>Museo della città</i> with visual and sound support systems
Description NEW	<p>The object of the project is to give direct access to some areas of the museum through a traditional narrative path, supported by a reading and communication service, implemented with the use of tools, such as music and/or images.</p> <p>Therefore, within the museum tour path, we selected some spaces, which because of the particular findings exposed or because of the importance and uniqueness of the places themselves, can be visited and enjoyed in a different and more dynamic way.</p> <p>The contribution consists in equipping the selected spaces with an audio system for the spread of music and with a video system.</p> <p>The videos will be produced in cooperation with the Art's schools (Accademie di belle arti) of the town of Brescia.</p>
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Selection of the suitable areas in the museum (<i>domus</i>, san Salvatore, necropoli, cardo romano) 2. Involve the Art schools 3. Study the sounds and the images 4. Set up the audio and video system 5. Start and promote the project
Parties involved	Brescia Municipality Brescia Musei foundation Accademia di Belle Arti LABA Accademia di Belle Arti Santa Giulia
Phases and timeframe	Three years period 2010-2012
Financial resources	Overall cost: to be defined Resources allocated by the Brescia Municipality (envisaged for 2010 - € 600,000.00), Fondazione Brescia Musei, possible private sponsors
Expected results	Greater valorisation of the museum areas, subject to the intervention
Result indicators	Visitors' satisfaction

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 14	INCREASING IN THE QUALITY OF THE SERVICES OFFERED TO VISITORS
Project 14.7	Production of multimedia material to be downloaded on the smart phone with an audio-guide, which can be sold or rented
Description	The project foresees the drafting of contents related to the museums' collections, which can be purchased or downloaded by the user on his/her smart phone. This shall improve the quality of the visit at the museum and/or deepen the knowledge about the museum also after the visit (as the multimedia content remains in the memory of the visitor's smart phone). In order to guarantee the opportunity to use the additional data to everyone, the visitors, who do not have a smart phone or who have not the knowledge about how to download the contents, can rent a smart phone at the ticket office and use it as a normal audio-guide service.
Actions	<ol style="list-style-type: none"> 1. Draft the contents 2. Upload the contents in the sale system 3. Service for the rental of audio guides
Parties involved	Brescia municipality Brescia Musei foundation Private sponsors
Phases and timeframe	2010 – 2011
Financial resources	Costs: to be defined Opportunity to find sponsors to partly cover the project costs.
Expected results	Greater knowledge of the museum, especially for single visitors.
Result indicators	Number of visitors, who purchased or rented the audio guides and number of downloads of the multimedia contents on the smart phone

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 15	WIDENING OF THE MUSEUM'S ARCHAEOLOGICAL AREAS IN THE SITE
Project 15.1	Excavation and incorporation of the <i>domuses</i> in the south of Ortaglia as part of the museum
Description	The project is in line with what was already done in 2003 and it foresees the widening of the archaeological researches in the south of the Ortaglia domuses, where the presence of archaeological structures pertaining to other houses of the roman age is known. The characteristic of the existing structure, which protects the domus and facilitates the visits, can be enlarged on the southern side, so as to include new archaeological structures and thus guarantee a remarkable widening of the visit area.
Actions	<ol style="list-style-type: none"> 1. Archaeological excavations on the southern part of the Ortaglia domus 2. Plan the covering 3. Pre-consolidation campaign and protection of the structures on the surface 4. Build the covering 5. Definitive consolidation intervention and cleaning of the archaeological rests 6. Museological and didactical preparation of the visit tours
Parties involved	Brescia municipality; soprintendenza per i beni Archeologici della Lombardia; Brescia Musei Foundation
Phases and timeframe	2010-2013
Financial resources	Needed € 5,000,000.00 For the year 2010 the Brescia municipality budget will allocate € 40,000.00
Expected results	INCREASING of the archaeological areas included in the museum
Result indicators	Inclusion of cca. 2000 square meters in the museum system

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 15	WIDENING OF THE MUSEUM'S ARCHAEOLOGICAL AREAS IN THE SITE
Project 15.2	Incorporation of the <i>domuses</i> in the southern cloister of the site as part of the museum
Description	In the San Salvatore cloister a wide Roman-age neighbourhood was brought into light between 1982 and 1990. It includes approximately 60 spaces with mosaic pavements and decorated with frescoes, with courtyards, steps and linking corridors. The structures have been completely covered while waiting to be included as part of the museum and two study books have been dedicated to these works. After the complete opening of the town museum, the study of the system of inclusion in the museum of this extraordinary archaeological complex, where we can find the traces of the first Longobard settlement, needs to be resumed again.
Actions	<ol style="list-style-type: none"> 1. Plan the museographical solution 2. Recover the previously excavated structures 3. Build the covering 4. Intervention for the definitive consolidation and cleaning of the archaeological ruins 5. Museological and didactical preparation of the visit tours
Parties involved	Brescia municipality Soprintendenza per i beni Archeologici della Lombardia Brescia Musei foundation
Phases and timeframe	2010-2013
Financial resources	€ 3,000,000.00 to be found
Expected results	INCREASING of the archaeological areas included in the museum
Result indicators	Inclusion of cca. 1500 square meters in the museum system

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 16	VALORISATION OF THE <i>CAPITOLIUM</i> ARCHAEOLOGICAL AREA
Project 16.1	<i>Capitolium</i> Archaeological Area Project
Description	<p>The project consists in the widening of the knowledge of the archaeological area, of the <i>Capitolium</i> of Brescia, of its complete archaeological and architectural recovery, of its valorisation and complete and definitive opening to the public. In the archaeological area set in the centre of the town the most antique and significant buildings of the Roman town are still visible: the sanctuary dating back to the Republican age (1st century before Christ), the <i>Capitolium</i> (73 after Christ), the theatre (1st-3rd century after Christ), the part of the pavement of the decumanus maximus. The area is opened on the foro square, which conserves the remains of the Roman square (1st century after Christ). Archaeological ruins (foro and thermal centre) can be also visited under the palaces, which today delimit the sides of the forensic stalls.</p> <p>Beside these buildings belonging to the Roman age, the area includes also noble palaces of the middle ages, of the Renaissance and of the modern age, which "rise" directly from the antique ruins (Palazzo Maggi Gambarà, Casa Pallaveri, both property of the municipality).</p> <p>In this well defined zone of the town we can therefore see an uninterrupted stratigraphy of witnesses, which stretch from the 2nd century before Christ to the 19th century and is particularly rich, articulated and full of contents. In 1830 the seat of the Museo Patrio (national museum, then entitled Museo Romano) was set in the <i>capitolium</i>. It was the first town museum, which paved the way for the museums' vocation of the area.</p> <p>The first limited interventions have been carried out within the FIO (regarding especially the monastery of Santa Giulia-<i>Museo della città (City Museum)</i> and, as concerns the <i>capitolium</i> area, the partial recovery of the Casa Pallaveri and of the late-republican sanctuary) and with the project FRISL, financed for the first lot of the works on the theatre and on Palazzo Maggi Gambarà. Starting from 1990 new archaeological excavations were carried out for the consolidation, the restoration and the improvement of the knowledge of the archaeological and architectural stratigraphy and aimed at improving the safeguard of the excavated findings and of the modern buildings interested by the works.</p> <p>The opening to the public of this special area (it is now opened only occasionally) will return the most important part of the town to the ancient settlement and represents, after 10 years from the beginning of the works, the completion of the</p>

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

	museum routes of the Town museum, in Santa Giulia.
Actions ONGOING	<ol style="list-style-type: none"> 1. Recognition of the finding and of the buildings 2. Complete the archaeological researches on the buildings 3. Intervention for the conservation of different kinds of structures and decorative elements on the buildings 4. Assignment of study tasks 5. Draw up a museological project 6. Draw up a museographic project 7. Draw up a project for didactic tools 8. Draw up an executive project 9. Implement the interventions 10. Opening to the public
Parties involved	Brescia Municipality; Ministero per i Beni e le Attività Culturali-Direzione Regionale per i Beni Culturali e Paesaggistici della Lombardia - Soprintendenza per i Beni Archeologici della Lombardia; Fondazione Brescia Musei; Fondazione CAB
Phases and timeframe	5 years starting from 2008
Financial resources	Overall cost € 11,000,000.00. In January 2008 1,250,000.00 were available (Ministry and Brescia Municipality); the remaining resources are to be found
Expected results	Inclusion of the whole archaeological area in the museum system
Result indicators	Open to the public approximately 4000 square meters of the archaeological area and 3 tours inside the historical buildings.

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 16	VALORISATION OF THE <i>CAPITOLIUM</i> ARCHAEOLOGICAL AREA
Project 16.2	Town furniture in via dei Musei and piazza del Foro
Description	In order to INCREASE at best the value of the archaeological area of the <i>Capitolium</i> and to connect it with a greater efficiency to the San Salvatore – Santa Giulia monastery, we shall intervene with several works along via dei Musei.
Actions ONGOING	<ol style="list-style-type: none"> 1. Introduction of green furniture and of halt structures 2. Replacement of the road surface (replace the asphalt with stone material so as to conform it to the streets in the town historical centre) 3. Plan a suitable lightning system 4. Plan a suitable signs system
Phases and timeframe	By 2012
Financial resources	2010: € 1,500,000.00 2011: € 500,000.00 2012: € 400,000.00 Resources allocated by the Brescia Municipality

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 16	VALORISATION OF THE <i>CAPITOLIUM</i> ARCHAEOLOGICAL AREA
Project 16.3	Widening of the museum display in the archaeological area of the Roman basilica, piazza Labus
Actions COMPLETED	<p>Prepare the new museum display in the area of the Roman Basilica of the Flavian age, which is now seat of the offices of the Superintendence for the Archaeological heritage of the Lombardia Region (Soprintendenza per i Beni Archeologici della Lombardia) by including approximately fifty new archaeological findings and with the functioning of an computerised information point.</p>  <p><i>Inner view of the archaeological area and exposition inside the basilica</i></p>

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 16	VALORISATION OF THE <i>CAPITOLIUM</i> ARCHAEOLOGICAL AREA
Project 16.4	Longer opening time and more opening days of the Roman Basilica
Description	Extension of the opening time of the Roman Basilica in piazzetta Labus square (seat of the Superintendence for the Archaeological heritage - Soprintendenza per i Beni Archeologici), for a better use of the archaeological and exposition area also in the afternoon and during the weekends. The Basilica is part of the archaeological route of Piazza del Foro, part of which is part of the good registered in the Candidature.
Actions	<ol style="list-style-type: none"> 1. Analysis of the state of the art 2. Study and plan the new service 3. Train the volunteer staff 4. Promotion with the activities of the Italian Touring Club 5. Implementation of the service
Parties involved	Direzione Regionale Beni Culturali Soprintendenza per i Beni Archeologici della Lombardia Touring Club Italiano
Phases and timeframe	During 2010
Financial resources	Overall cost: to be defined Resources allocated by the Touring Club Italiano
Expected results	Better conditions for the visitors of the archaeological spaces and higher level of the valorisation of the area. Awareness of the importance of the archaeological heritage raised in the volunteers and in the citizens, sense of belonging, visitors enjoy the service, visit routes in the buffer zone widened.
Result indicators	Increasing in the number of visitors, especially in the weekends.

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 17	COMPLETE THE MUSEUM SPACES AND IMPROVE THE VALORISATION LEVEL OF THE CASTLE AREA
Project 17.1	Adaptation and enlargement of the Museo delle Armi (Weapons museum)
Description	The Museo delle Armi (Weapons museum), set inside the Mastio Visconteo in Castello, is subject to an extraordinary maintenance work, to restoration and structural interventions and to an overall requalification of the museum.
Actions COMPLETED NEW	<p>First phase:</p> <ol style="list-style-type: none"> 1. Extraordinary maintenance of the wooden pavements and frames – entrance doors and window frames -, general review of the showcases, of the access steps to the upper floors, the parapets and handrails 2. Draw up an evacuation plan, integrate the emergency and rescue signs, adapt the emergency exits <p>Second phase:</p> <ol style="list-style-type: none"> 3. Plan and demolish the architectural barriers in the external areas 4. Plan and demolish the architectural barriers in the museum 5. Plan and create a new entrance 6. Rearrange the access areas 7. Standardise the technical installations with the laws in force 8. Prepare internal toilets
Phases and timeframe	2012

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 17	COMPLETE THE MUSEUM SPACES AND IMPROVE THE VALORISATION LEVEL OF THE CASTLE AREA
Project 17.2	Rearrange and open the Renaissance Museum (Museo del Risorgimento)
Description	The Renaissance Museum (Museo del Risorgimento) is subject to an intervention for the extraordinary maintenance for the future rearrangement of the museum with a new disposition of the exposed works and documents, based on a chronological-thematic distribution.
Actions	<p><i>First phase (extraordinary maintenance works)</i></p> <ol style="list-style-type: none"> 1. Replacement of the frames of the great milestone 2. Renew technical installations 3. Draw up evacuation plans 4. Place the emergency signs <p><i>Second phase (new permanent exposition)</i></p> <ol style="list-style-type: none"> 5. Draw up the distribution project 6. Interventions for the conservation of the works 7. Prepare a didactical – explanatory equipment 8. New arrangement of the museum halls
Phases and timeframe	Postponed, starting in 2011

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 17	COMPLETE THE MUSEUM SPACES AND IMPROVE THE VALORISATION LEVEL OF THE CASTLE AREA
Project 17.3	Joint management of the overall area
Description	On the basis of the need for a joint management system in the castle area, we are planning a type of management, which can coordinate the various initiatives organised in these spaces, in order to promote the green areas and to create new structures and services.
Actions	Overall planning
Phases and timeframe	Postponed to the biennium 2010 - 2011

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 17	COMPLETE THE MUSEUM SPACES AND IMPROVE THE VALORISATION LEVEL OF THE CASTLE AREA
Project 17.4	Programme of temporary exhibitions
Actions YEARLY SCHEDULED	<p>The buildings of the Piccolo Miglio and Grande Miglio in Castello are normally used during the year for the organisation of temporary exhibitions.</p> <p>Programme 2008-2009: <i>Giuseppe Gallizioli. Dalla natura al sogno</i> (From nature to dream) (4.03.08-6.05.08) <i>La messa al campo. La grande guerra in un capolavoro di Emilio Rizzi</i> (Mass in the field. The great war in a masterpiece of Emilio Rizzi) (17.05.08 – 2.11.08) <i>Franca Ghitti. La città e la sua impronta</i> (<i>The city and its footprint</i>)(25.09.08 – 23.11.08) <i>Pierca. Una vita nell'astrazione</i> (<i>A life in abstraction</i>) (16.01.09-22.03.09) <i>Franco Rinaldi. Nei giardini del sogno</i> (<i>In the gardens of the dreams</i>) (19.09.09-8.11.09)</p>  <p><i>The preparation of the exhibition "Franca Ghitti. La città e la sua impronta"</i></p>
Phases and timeframe	Normal activity during the year

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 18	REQUALIFICATION AND VALORISATION OF HISTORICAL PALACES
Project 18.1	New arrangement of the picture gallery in Palazzo Tosio Martinengo
Description	The Martinengo da Barco palace in piazza Moretto hosts the seat of the Pinacoteca Civica (picture gallery), founded in 1908 with the merger of the two galleries founded with the bequest of the Earl Paolo Tosio (1844) and of the Earl Francesco Leopardo Martinengo (1883). The gallery was then enriched in time with other legacies, with works coming from abolished churches or from destroyed buildings and with recent acquisitions. After the intervention for the extraordinary maintenance for the conservation and the adaptation of the palace, the museum tour will be defined and planned according to the most modern museological and museographic criteria.
Actions ONGOING	<p>The interventions include:</p> <ol style="list-style-type: none"> 1. The study and the draft of the new museum route The maintenance for the extraordinary conservation of the works 2. The drawing up of didactic texts, boards and legends 3. preparation 4. Preparation of museum services (bookshop, cafeteria, etc)
Parties involved	Brescia municipality
Phases and timeframe	From 2009 to 2012
Financial resources	Brescia municipality, budget 2009, 2,000,000 Euros allocated, budget 2010 700,000 Euros to be allocated, budget 2011, 500,000 Euros to be allocated
Expected results	Restoration of the palace for the seat of the Paint gallery
Result indicators	Number of visitors

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 18	REQUALIFICATION AND VALORISATION OF HISTORICAL PALACES
Project 18.2	Requalification of Palazzo Bonoris, seat of the Science, Languages and Arts Athenaeum
Description	Palazzo Bonoris, which is a property of the Municipality, was selected as the seat of the historical Science, Languages and Arts Athenaeum of Brescia and now structural adaptation works are under way in order to open a library, which can host the historical cultural archive and the numerous books. The wide spaces of the palace allow to set the seat for the assemblies and the offices in the wide hall decorated with frescos of the 18 th century.
Actions ONGOING	<p><i>First lot:</i></p> <ol style="list-style-type: none"> 1. Extraordinary maintenance of the covering, install the lift system and special electrical and safeguard systems <p><i>Second lot:</i></p> <ol style="list-style-type: none"> 2. Install a second lift, restorations and internal building works for the restoration of spaces in order to place a reading room and a flat for the guardian
Phases and timeframe	<p><i>First lot</i> by the end of 2009</p> <p><i>Second lot</i> 2010-2013</p>

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 18	REQUALIFICATION AND VALORISATION OF HISTORICAL PALACES
Project 18.3	Requalification of Tosio as museum seat for the 19 th century collections
Description	The Tosio palace, seat of the Athenaeum, is a property of the Municipality and it will be recovered and become the seat of the museum for the exposition of the collections from the 19 th century. Moreover, the palace itself is the result of the intervention of architect Rodolfo Vantini and it fully mirrors the neoclassical taste, both in the architecture and in the furniture, thus being a real "house-museum".
Actions	<ol style="list-style-type: none"> 1. Conservative recovery 2. Museum arrangement 3. Opening to the public
Phases and timeframe	From 2011 to 2013

ENHANCEMENT PLAN <i>Brescia site and buffer zone</i>	
Objective 19	INCREASING AND REQUALIFICATION OF GREEN SPACES
Project 19.1	Project Parco delle Colline
Description	Founded in 2002, the P.L.I.S.(Parco Locale di Interesse Sovracomunale – Local park of extra-municipal interest) of the Brescia hills includes various hilly and pre-hilly areas (Municipalities of Bovezzo, Brescia, Cellatica, Collebeato, Rodengo Saiano, Rezzato and Nuvolera, covering a surface of more than 4300 hectares), one part stretches and reaches the buffer zone, including all the Cidneo hill and its public and private spaces. The Parco della Montagnola, which is a municipal property and remains outside the defence system on the north of the hill, was recently subject to a requalification project, which saw the creation of a thematic botanical garden, which comprehend the typical phytocenoses of the hilly environment in the PLIS.
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Pilot project for the environmental education in the Montagnola park, dedicated to the primary and secondary schools of the municipalities, which joined the PLIS 2. Since 2009: botanical enrichment of the garden with the introduction of vegetal shrubby and herbaceous species, found within the original habitats, in the garden. 3. since 2010: prosecution and strengthening of the projects of environmental education and training. New definition of the relations with the managers of the vineyard Pusteria through the signing of a new agreement
Parties involved	Beyond the initial subjects, the following joined the project: Rezzato Municipality, Nuvolera Municipality
Phases and timeframe	2009-2010

ENHANCEMENT PLAN *Brescia site and buffer zone*

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

Objective 19	INCREASING AND REQUALIFICATION OF GREEN SPACES
Project 19.2	Project Parco dell'Acqua
Actions ONGOING	<p>The area covering 11.400 square meters, which used to host the fish plant, purchased by the Lombardia Region, is now being transformed in a thematic park, dedicated to the children and teenagers.</p> <p>The management project foresees the creation of a Water, environment and renewable energies park (Parco dell'Acqua, dell'ambiente e delle energie rinnovabili), which will carry out the activities of cultural spread of environmental themes. Inside the structure the "expositive interactive didactic" path will be organised so as to spread, improve the knowledge and understand the energy situation at an international and local level.</p>  <p><i>One of the possibilities of development of the Water park</i></p>
Phases and timeframe	Partial opening in January 2010

ENHANCEMENT PLAN <i>Brescia Territory</i>	
Objective 20	VALORISATION OF OTHER MUSEUM SEATS IN THE BRESCIA MUNICIPALITY
Project 20.1	New arrangement of the Museo di Storia Naturale (Museum of natural history)
Actions ONGOING	<p>Project for the new arrangement of the Museum of natural history, which has collections of prime importance in the Italian panorama, the result of legacies of scholars and collectors from Brescia.</p> <ol style="list-style-type: none"> 1. Conservative interventions on the collections 2. Draft the museological project 3. Draft the museographic project 4. Arrangement 5. Opening to the public
Phases and timeframe	2010-2012

ENHANCEMENT PLAN <i>Brescia Territory</i>	
Objective 21	VALORISATION OF THE LONGOBARD FINDINGS, OF THE CORRESPONDING MUSEUM SEATS AND ARCHAEOLOGICAL AREAS
Project 21.1	Reorganisation and exhibition of the collections conserved in the Historical-archaeological town museums of Leno, Remedello and in the National Archaeological museum of Sirmione (Museo Archeologico Nazionale di Sirmione).
<p>Actions</p> <p>ONGOING</p>	<p>Revision of the expositional contexts in the museum seats of the territory for a consequent update and enrichment in the light of the newly acquired data.</p>  <p><i>Montichiari, Palazzo dell'archeologia e della storia del territorio (Palace of archaeology and of the history of the territory), reconstruction of a Longobard burial</i></p> <ol style="list-style-type: none"> 1. Enlargement and renewal of the exposition halls 2. Restoration of the objects 3. Recovery and exposition of the objects coming from the territory and which are now stored in different seats
Parties involved	Soprintendenza per i Beni Archeologici della Lombardia Involved municipalities Brescia Municipality
Phases and timeframe	Four year period 2009-2013
Financial resources	To be defined and to be found
Expected results	INCREASING of the museum offer as regards the Longobard era
Result indicators	Number of exposed findings; Number of visitors

ENHANCEMENT PLAN <i>Brescia Territory</i>	
Objective 21	VALORISATION OF THE LONGOBARD FINDINGS, OF THE CORRESPONDING MUSEUM SEATS AND ARCHAEOLOGICAL AREAS
Project 21.2	Preparation of the Montichiari Archaeological-expositional centre and organisation of the collection of Longobard findings in the Montichiari territory
<p>Actions</p> <p>ONGOING</p> <p>COMPLETED</p>	<p>Creation of a suitable seat in order to preserve the Early middle ages heritage of Montichiari (PAST – Palazzo dell’archeologia e della storia del territorio – Palace of archaeology and history of the territory)</p> <p>Widening of the exposition spaces of the <i>Giacomo Bergomi Museum</i>. The enlargement of the existing museum spaces was replaced by the collocation of the Longobard findings in the territory of Montichiari in the “Palazzo dell’Archeologia e della Storia del territorio” (Palace of archaeology and history of the territory).</p> <ol style="list-style-type: none"> 1. Arrangement of new exposition spaces 2. Arrangement of collections 3. Development of the didactic laboratories
Parties involved	Soprintendenza per i Beni Archeologici della Lombardia Montichiari Municipality Gruppo Archeologico Monteclarense (Montichiari archaeological group) Brescia Municipality
Phases and timeframe	Four years period 2009-2013
Financial resources	To be defined and to be found
Expected results	Found a small centre for the promotion of the knowledge of the history and culture of the plain territory of Brescia in the Early middle ages
Result indicators	Number of exposed findings, Number of visitors

ENHANCEMENT PLAN <i>Brescia Territory</i>	
Objective 21	VALORISATION OF THE LONGOBARD FINDINGS, OF THE CORRESPONDING MUSEUM SEATS AND ARCHAEOLOGICAL AREAS
Project 21.3	Arrangement of the archaeological area of the early Christian church of San Pietro in Mavino in Sirmione and of the Middle ages churches of San Giorgio in Montichiari and SS. Nazario e Celso in Leno
<p>Actions</p> <p>ONGOING</p>	<p>These important monastic centres deserve to see their value increasing through the completion of the archaeological excavations and the opening to the public.</p>  <p><i>Sirmione, S. Pietro in Mavino – General view of the excavations</i></p> <ol style="list-style-type: none"> 1. San Pietro in Mavino (Sirmione) church: completion of the excavations of the archaeological site; conservative restoration of the building; interventions in order to render the relative archaeological area feasible 2. San Giorgio (Montichiari) church: restoration of the crypt in order to render it accessible to the public; arrangement of the space 3. SS. Nazario e Celso (Leno) church: render the building safe and execute a conservative restoration; build the covering; start the archaeological excavations campaign in the site
Parties involved	Soprintendenza per i Beni Archeologici della Lombardia Involved Municipalities Brescia Municipality

Project 30.1 B	Plan for use of historically and culturally significant buildings.
Actions ONGOING	<p>Remarkable structural and refunctionalization interventions were performed also thanks to the Programme Document DocUP; such works interested the Monumental Complex of San Nicolò as a congress centre, Palazzo Collicola (seat of the Modern Art Gallery), Teatro Caio Melisso, the former Civic Museum and the Documentation Centre on the Mines' Museum in Morgnano at the Earthly Sciences Lab.</p>  <p><i>The Monumental Complex of San Nicolò</i></p> <p>Palazzo Rosari Spada, previously the seat of the Communal Pinacoteca, now hosts the</p>

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

Textiles Collection of the Commune of Spoleto, which was inaugurated on 1 May, 2008. The Spoleto collection, that as of 1988 only counted 300 items, is the result of various collections that were acquired in the last thirty years, thus remarkably enriching the Ancient Textile Section.

The textile collection of the Pinacoteca was originally composed of precious vestments, Prior clothes with headgear, ties and golden chains, communal valet liveries and waistcoats, tapestries, historical flags, a series of five tapestries coming from Christine of Sweden's inheritance and later bought by the Marquises Collicola, and a Persian carpet dating to the 17th century; the whole was enriched by the broad Bianca and Virgilio Portoghesi Fund, featuring more than 1.500 pieces, spanning from the 14th to the 20th centuries; it was owned by Lucia Portoghesi and the Commune of Spoleto bought it thirty years ago.

After more than 25 years and long restructuring, on April 9th, 2009 palazzo Mauri has finally returned to be the seat of the historical public library "Giosuè Carducci".

Palazzo Mauri, now free from architectural obstacles and equipped with elevators and computers for the disabled, is structured on three levels for overall 3,400 sq. Metres, and holds a newspaper library, a literary café, two conference halls, a hall for temporary exhibitions, six halls dedicated to the kids equipped with videogames. The library seats 200 people, the conference halls 84, while the PCs are 40.

The palace's third floor will host a multimedial Documentation Centre, big archives of visual and photographic evidences that document important historical and artistic events of the town.

The overall conservation intervention on Palazzo Mauri and Palazzetto Sillani, where the most of the volumes are being kept (including the most ancient ones), cost 10.5 million €, and was financed by Region Umbria, CIPE, EU, act 400 of 2000, and the Comune.

Palazzo Mauri, public library "Giosuè Carducci"

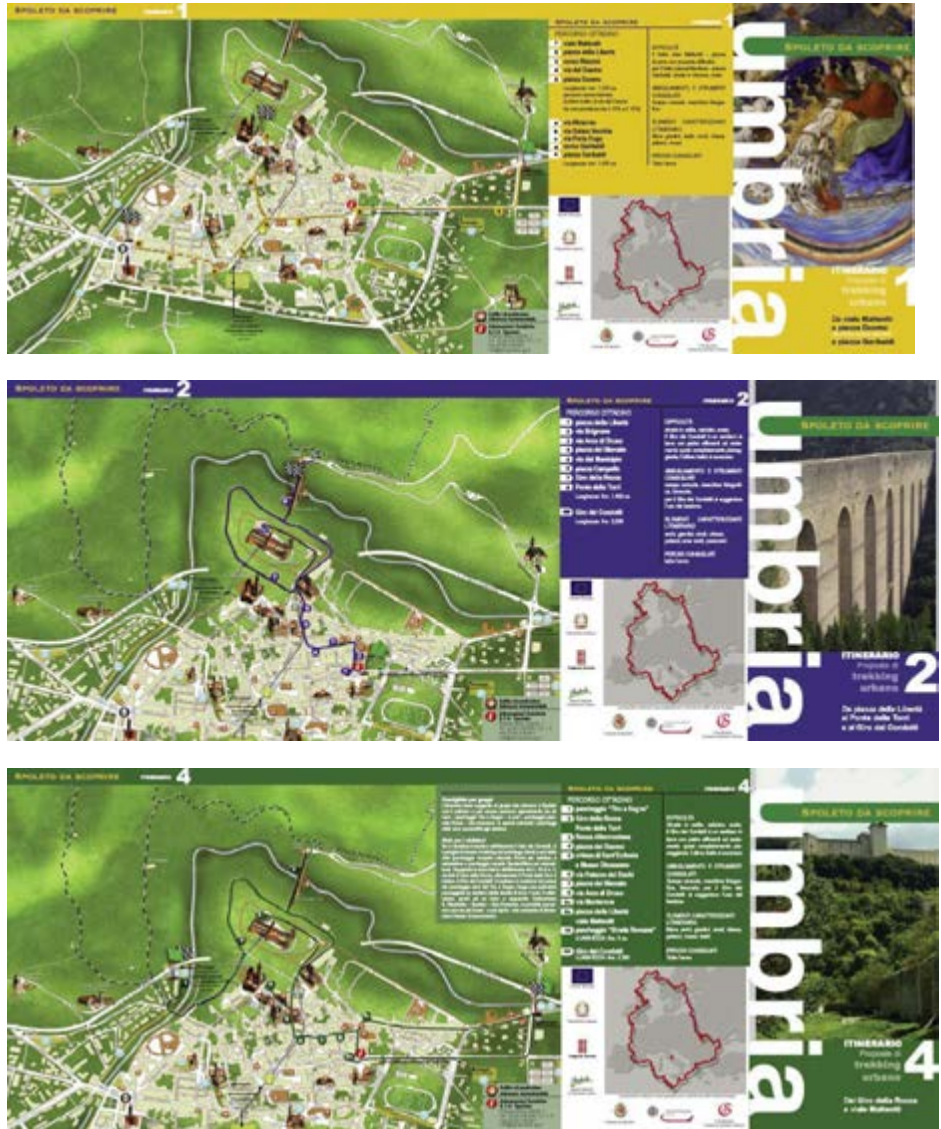

In the Monumental Complex of *San Nicolò* -a container culturally very heterogeneous-, particularly successful is the initiative *Family Theatre*.

On Sundays from November 2009 to March 2010 the children bring their parents to the theatre, shows for all from 3 to 90 years, children enter free.

The initiative, organized by the Municipality of Spoleto -Department of Culture-, aims to promote the love for the theatre among the younger generations.

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.2	Planning of a city Trekking project through the identification of new tourist-cultural routes.
<p>Actions</p> <p>COMPLETED</p>	<p>Four urban trekking itineraries (Spoleto to discover) have been presented at a press conference on 21 November, 2008. The four itineraries represent a different way to disclose the city to the visitors, a way to get to know the extraordinary artistic, architectural and historical highlights, of a city in which it is still possible to walk and breath clean air, taste genuine products and admire unique sights.</p> <p>The second one of such itineraries, 3.3 kilometers long, includes the Rocca Albornoziata, seat of the European School of Book Restoration, of the Cultural Heritage Diagnostics Lab, and of the National Museum of the Longobard Duchy of Spoleto. From there and through the Giro dei Condotti and a pathway across woods and olive groves, it is possible to reach the basilica of San Salvatore and the church of San Ponziano.</p> <p>Another itinerary, by the same length, starts from the Tiro a Segno parking lot, close to the basilica of San Salvatore and to the church of San Ponziano; through an escalator (scheduled for completion by the first half of 2010, see Management Plan 20.1), it will allow to reach the Giro della Rocca and, through further elevators, the Rocca itself. Both said itineraries feature Palazzo Mauri and Palazzo Pianciani, where it is possible to see splendid mosaics (see Dossier and Management plan).</p>  <p>The image displays three maps of Spoleto, each illustrating a different urban trekking itinerary. Each map includes a legend with various points of interest and a descriptive text box. The maps are titled 'SPOLETO DA SCOPRIRE' and are numbered 1, 2, and 4. The maps show the city's layout, including the historic center, the Rocca Albornoziata, and the Giro dei Condotti. The legends provide details about the itinerary's route, duration, and key landmarks. The descriptive text boxes offer further information about the itinerary's highlights and the city's cultural heritage.</p>

The four urban trekking depliants

Along with the four itineraries, there is also the *Founts and Fountains*, the paths of water, an itinerary that, following the thread of water, gives the opportunity to discover, along with the traditional highlights of the city of Spoleto, alleys, narrow streets, courtyards, hidden and little known corners that help taste the history, traditions and activities of a time gone-by, learning trivia sometimes ignored by the very inhabitants of Spoleto. If you also wish to visit churches, museums, and other places of art in the city, it will be wise to organize for a whole day, having a wide offer of places to stop by for a rest and for eating something. Also, the city's commercial offer gives the chance to have a taste of the territory's food and agricultural produce, as well as a number of shops of various categories.

The Founts and Fountains depliant

ENHANCEMENT PLAN <i>Spoletto site and buffer zone</i>	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.3	Exploitation of Archaeological Routes.
Actions ONGOING	<p>Given the number of requests, in 2009 the project "Archaeobike. Discovering the countryside of 2000 years ago by bike", will start over again, after being suspended in 2008.</p> <p>The guidebook "Archaeological Spoleto" is going to be issued, featuring three itineraries in the city and one in the neighbouring territory.</p> <p>Guided tours were organized during the August 15th holiday, in collaboration with <i>Spoletto Tipica</i>: cultural initiatives intertwine and are integrated with the economic ones, for the valorization and sensitization of the territorial excellences.</p>

ENHANCEMENT PLAN <i>Spoletto site and buffer zone</i>	
Objective 30	EXPANSION OF THE CULTURAL OFFER OF THE HISTORIC CENTRE OF SPOLETO.
Project 30.4	Revitalisation of the historic centre
Actions ONGOING	<p>On 8 December, 2008, the Buyocco was inaugurated, along with four other such projects in the rest of the region: the Historical Centre as a natural shopping mall. The name combines the English verb "to buy" with the ancient currency of the duchy of Spoleto, the Bajocco. After a phase of projecting, formation and definition of the objective, that lasted 18 months, the creation of such natural mall is now a reality and is the result of the regional project "City Mall", for the re-launch of commerce, handicraft and services in the historical centre.</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p>The Feast of Historical Centres took place in Spoleto between December 6th to 8th 2008, featuring events and initiatives to revitalize the historical centre of Spoleto.</p> <p>A census of the buildings in the centre has been performed, to survey their present use. In the frame of the operative part of the Urban Planning, the City Administration has proposed the identification of the areas in the "A" Zone, where the productive, handicraft and commercial uses prevail, to impose prohibition of turning them into residential spaces at their ground floor.</p> <p>Drawing on the experience of "Vitrines Vivantes", which attracted thousands of people to the historical centre of Spoleto during the End-Of-The-Year Events 2008-2009, on May 22nd and 23rd, 2009, the "Festa della Città ... in Corso" was organized. Streets, alleys and piazzas became the natural stage for a series of initiatives to celebrate the end of the works for the re-paving of the main streets, Corso Mazzini and Corso Garibaldi.</p> <div style="display: flex; justify-content: space-around;">   </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <p><i>Vitrines Vivantes</i></p> <p><i>Festa della Città ... in Corso</i></p> </div> <p>On December 11th, 2009, a convention was held in Perugia, organized by Region Umbria: "New Urban Centrality and Re-vitalization of Historical Centres". In the frame of the convention, programme agreements were signed for the implementation of the Complex Urban Programmes(PUC2, see Management Plan,</p>

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

	<p>new files, Economic Plan) between Region Umbria and seven of the tenn Umbrian Municipalities which received funds (including Spoleto) from the programme, to raise the urban attractiveness and quality of Umbrian cities and their historical centres.</p> <p>In Spoleto, the PUC2, “<i>Spoleto Piazza delle Eccellenze</i>” (Spoleto Square of the Excellences), has the aim of establishing a model of harmonic and sustainable development, that levers on the historical centre, through interventions that can valorize Spoleto’s treasures, its potentials, vocation, and create opportunities for cultural, economic and social growth, promoting the quality of services.</p> <p>The sphere of intervention of PUC2 includes the “Zona A” in the historical centre, which is 612,122 sq. Meters wide, and another area outside the historical centre, 611,706 sq. Metres wide. The funds allotted by Region Umbria sum up to 7,515,325.95 €, yet the overall financial spin-off, including public and private investments, requalification of previously existing activities and the start of new ones, will easily exceed 20 million €.</p>
--	--

ENHANCEMENT PLAN <i>Spoleto Territory</i>	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY.
Project 31.1	Opening of Mining Museum of Morgnano.
<p>Actions</p> <p>COMPLETED</p>	 <p>On March 22nd, 2009, on the occasion of the Days of Spoleto Memory and Identity, established by the Comune di Spoleto 54 years past the tragedy at the Morgnano Mines, when 23 miners lost their life, The Museum of the Morgnano Mines was inaugurated, a reference point for the study and knowledge of the town’s memory.</p> <p>The promotional campaign promoted in August 2009 was particularly interesting and very rich of events.</p> <p>The Museum, financed with EU funds, represents a first part of a wider project for a Minerary Geological Park.</p>

ENHANCEMENT PLAN <i>Spoleto Territory</i>	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY.
Project 31.2	Creation of “identity routes”: <i>Works of Fortification in the environs of Spoleto; Itineraries of Giovanni di Pietro, “Lo Spagna”</i>
<p>Actions</p> <p>ONGOING</p>	<p>With reference to Regional Act # 12/2008, art. 4, the Commune of Spoleto, along with the University “La Sapienza” in Rome, has drafted the Quadro Strategico di Valorizzazione (strategic valorization frame, QSV) of the historical centre, to achieve the results included in art. 3 of the same act.</p> <p>Region Umbria passed the technical, administrative documentation under regional government resolution # 1338 of 13 Oct. 2008, granting a contribution of € 15.000,00.</p> <p>The project includes the valorization of the network that spans from the Rocca Albornoziana to other fortresses on the plain: Itinerary of Hamlets and Castles. In the frame of activities for the education on the cultural heritage, paths of knowledge on the Rocca Albornoziana and on the painter Giovanni di Pietro a.k.a. Lo Spagna have been introduced to local schools of each level (see Management Plan, new files).</p>

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Spoletto Territory</i>	
Objective 31	EXPANSION OF THE CULTURAL OFFER IN THE TERRITORY.
Project 31.3	Completion of the Spoleto - Assisi bicycle path. (from the Arezzo dam to the Azzano Bridge)
Actions ONGOING	 <p>On February, 2008, the works for the Terminal of the Cycle Lane Spoleto – Assisi started, by the former tiles factory in San Nicolò di Marrubia. As per project, the works for the development of the cycle lane went on in the territory of the Commune of Spoleto. The procedures for the change of usage of La Torretta are going on: the bond has been obtained from the Superintendency.</p>

ENHANCEMENT PLAN <i>Campello sul Clitunno</i> buffer zone	
Object 35	PROTECTION AND ENHANCEMENT PLAN FOR THE RIVER CLITUNNO AND THE TEMPIETTO - ECO-MUSEUM
Project 35.2	Recomposition of the landscape unit of area
Description ONGOING	<p>A programme of reconstruction of the landscape unity of the area of river Clitunno and the Tempietto was started, through the definition of the Safeguard and Enhancement Plan, drafted by the Municipality of Campello sul Clitunno in the frame of <i>Programma Leader 2</i>. Lately there has been an assignment for the preparation of detailed projects; subjects have been identified, that will perform the intervention of reclamation and of cleaning-up of riverbed and banks, develop and implement infrastructures (sewerage systems, white water network, new purification plants), for the protection and safeguard of the river itself.</p> <p>In further interventions, the Plan also includes:</p> <ol style="list-style-type: none"> 1. Creation of a green belt around the apse of the Clitunno Tempietto, presently very close to the main road, from which it is only separated by an iron fencing. 2. Modification of both pedestrian and vehicles viability, thanks to the downgrading of the main road Via Flaminia, as a consequence of the opening of the new main road along the valley bottom and consequent decrease of local traffic.  <p style="text-align: center;"><i>Tempietto Apsa: creation of a green belt</i></p> <ol style="list-style-type: none"> 3. Acquisition of the land belt between the so-called Fosso Vecchio and river Clitunno, starting from the historical water garden (Fonti del Clitunno) until the Tempietto, as well as the realization of a pathway along the river. <p>The project, as it merges reclamation with environmental valorization, also includes the recovery of the old laundries, of the locks and the reclamation of compromised areas.</p>  <p style="text-align: center;"><i>Realization of the route Fonti del ClitunnoTempietto "Parco del Clitunno"</i></p>
Actions	<ol style="list-style-type: none"> 1. Elaboration of the intervention plan 2. Allocation of funds for the first plots

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Object 36	EXPANSION OF THE CULTURAL OFFER
Project 36.1 A	Setting up of new cultural and tourist venues
<p>Actions</p> <p>COMPLETED</p> <p>NEW</p>	<p><i>Extension of cycling track</i></p> <p>The works for the realization of a walkway - cycle lane, paralleling the old via Flaminia are on their way to be finished. A leg runs from the crossing with the new via Flaminia, while a second one goes from the Fonti del Clitunno to the Tempietto. The two routes flank one another, yet the walkway runs four inches higher than the cycle lane, thus avoiding mutual interference between the two groups of users. Requalification of the green area is also included, with the scheduled planting of autochthonous species.</p> <div style="display: flex; justify-content: space-around;">   </div> <p><i>Already completed :</i></p> <ol style="list-style-type: none"> 1. Realization of the routes (walkway and cycle lane) 2. Arrangement of the illumination plant of the routes by means of street lamp placement 3. Arrangement of a signal system <p><i>Next Action</i></p> <p>a-Green area</p>

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Obiettivo 36	EXPANSION OF THE CULTURAL OFFER
Progetto 36.1 B	Setting up of new cultural and tourist venues
<p>Actions</p> <p>NEW</p> <p>COMPLETED</p>	<p>In 2009 a detached section of the Museo della Civiltà Contadina (Museum of Farming Civilisation) in the village of Acera, a small medieval quarter castle on the mountain ridge of the territory, was opened in the former Church of Santa Maria Maggiore and its overlying premises, which have been recently recovered thanks to a P.I.R. (Integrated Restoration Plan). The site is also equipped with a multimedia station and displays a rich collection of pictures on farming in the Apennines and transhumance, as well as a small collection of artefacts dealing with the main activities resulting from farming.</p> <div style="display: flex; justify-content: space-around;">   </div> <p style="text-align: center;"><i>The access to the Museum</i></p> <p style="text-align: center;"><i>Panel</i></p>
Parties involved	Municipality of Campello sul Clitunno, Regional Authority Umbria

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Obiettivo 36	EXPANSION OF THE CULTURAL OFFER
Progetto 36.2 A	Setting up of new cultural and tourist areas
Description NEW	<p>In recent years, the Municipal Authorities refurbished the Tower of the Castle of Campello Alto and Palazzo Trinci in the Castle of Pissignano. A new objective is to transform these areas so as to promote cultural and artistic initiatives and return them to the resident population.</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <div style="display: flex; justify-content: space-around; align-items: center;"> <p><i>Pissignano, the Tower of the Castle</i></p> <p><i>The castle of Campello Alto</i></p> </div>
Actions	<ol style="list-style-type: none"> 1. Setting up of exhibition layouts 2. Improvement of areas to facilitate the access by disabled people
Parties involved	Municipality of Campello sul Clitunno
Phases and timeframe	2010
Financial resources	<p>The actions are funded by the Regional Authority Umbria (resolution of the Regional Council no. 928 of 21.07.2008 on the procedures to allocate contributions according to the Regional Law no. 24/2003 "<i>Regional Museal System – Protection and Enhancement of Related Cultural Assets – Yearly Programme 2008</i>") For the Municipality of Campello, an expenditure corresponding to 20% of the global amount of actions has been planned.</p>
Expected results	<ul style="list-style-type: none"> • Enhancement of the cultural heritage of Campello sul Clitunno • Increased attractiveness for visitors • Extension and diversification of the local museal network
Result indicators	Number of cultural initiatives and activities related to the territory Increase in the number of visitors

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Obiettivo 36	EXPANSION OF THE CULTURAL OFFER
Progetto 36.2 B	Setting up of new cultural and tourist venues
<p>Description</p> <p>NEW COMPLETED</p>	<p><i>Inauguration and reopening of the Tower of the Castle of Campello Alto to public fruition</i></p> <p>Since August 2008, the Tower of the Castle of Campello Alto, which has been carefully reconstructed and restored following the earthquake of 1997, has been reopened to the public. The inauguration and reopening of this important section of the medieval castle was aimed at involving young people and create around it an innovative cultural socialising point. An exhibition of pictures on the whole territory of Campello, as well as three exhibitions of paintings by contemporary artists were organised on this occasion.</p> <p>Through the restoration of these beautiful areas, the Municipal Authorities aim at involving associations, organising events and giving hospitality to other initiatives taken by Italian partners that wish to use them to make their peculiar characteristics known and establish contact with the territory of Campello</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  <p><i>External view</i></p> </div> <div style="text-align: center;">  <p><i>Panoramic view</i></p> </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 20px;"> <div style="text-align: center;">  <p><i>“Afranio Metelli” exhibition</i></p> </div> <div style="text-align: center;">  <p><i>“Andrea Calisti” exhibition</i></p> </div> </div>
Parties involved	Municipality of Campello sul Clitunno
Financial resources	Funding from the Municipality of Campello sul Clitunno
Expected results	<ul style="list-style-type: none"> • Improvement of the offer to visitors • Enhancement of the environmental and cultural heritage of Campello sul Clitunno and increase fruition by tourists and visitors • Increase in the number of visitors • Number of cultural events
Result indicators	<ol style="list-style-type: none"> 1. Organisation and setting up of exhibitions 2. Involvement of cultural associations

ENHANCEMENT PLAN <i>Campello sul Clitunno Territory</i>	
Object 36	EXPANSION OF THE CULTURAL OFFER
Project 36.3	Recovery and new functional use of a group of buildings that make up the network of infrastructures for visitor services
<p>Actions</p> <p>COMPLETED</p> <p>NEW</p>	<p>Part of the Museum of Farm Civilization and Ancient Crafts has been reopened to the public, in its seat of Palazzo Casagrande, in the centre of Campello sul Clitunno. The Museum vaunts a collection of primary importance within Umbria, and gathers a huge deal of evidences and finds, spanning from 18th to the 20th centuries. The Museum has been split into various sections, each of which is related to a fundamental and characterizing aspect of rural living in the territory. Projects for didactic activities, to be realized starting from next school-year, are being organized. The reopening of the Museum is one among the many tiles of the network of service infrastructure for the visitor, included in the wider programme of territory requalification.</p> <div style="display: flex; justify-content: space-around;">   </div> <ol style="list-style-type: none"> 1. Draft of the museological project 2. Draft of the museographic project 3. Conservation intervention 4. Conservation interventions on the collections 5. Arrangement 6. Opening to the public 7. Opening of the weaving section and a kids multimedial section

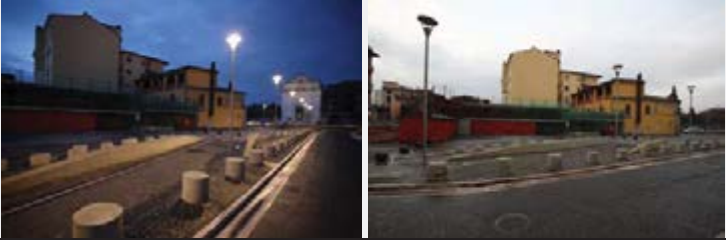

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Benevento site</i>	
Objective 37	TO COORDINATE MANAGEMENT OF ASSETS IN THE SITE
Project 37.1	Drawing up of a local protocol for controlling use of the Church of Santa Sofia
Actions ONGOING	Following preliminary investigation and hearing led by the Benevento Prefecture, an agreement between the Archbishop's Curia of Benevento and FEC (Fondo Edifici di Culto, that owns the good) was reached. The deed of entrustment of the Church of Santa Sofia to the Benevento Curia will be defined within 28 February, 2009, and will consider both the religious and the tourist use of the site. Past the times needed for ministerial approval, the ultimate formalization is expected within the following 60 days

ENHANCEMENT PLAN <i>Benevento site</i>	
Objective 38	TO EXTEND MUSEUM ACTIVITY
Project 38.1	Rearrange and extend the Lombard collections in the Sannio Museum
Actions ONGOING	The Province of Benevento, owning body of the Museo del Sannio, entrusted ART SANNIO (a company owned by the Province) to arrange the two halls at the ground floor, dedicated to the Longobard period, and has also arranged for a high professionalism consulting task, to coordinate activities. The project includes new exhibiting cases for the lately acquired finds, the renewal of the caption system accompanying the finds and the adjustment of the illumination plants.
Financial resources	€60.000,00 of budget funds from the Province of Benevento were used

ENHANCEMENT PLAN <i>Benevento site</i>	
Objective 39	TO VALORISE THE URBAN ARCHAEOLOGICAL HERITAGE
Project 39.1	Creating an Urban Archaeological Park (P.A.U.) in Benevento
Actions ONGOING	<p>Completed interventions:</p> <ol style="list-style-type: none"> 1. "Piazza Ponzio Telesino" €975.445,66 2. "Arco del Sacramento" €2.013.629,20 <p>On the way to be completed, completion scheduled for April, 2009:</p> <ol style="list-style-type: none"> 3. Urban Archaeological Area – Cardinal Pacca – Baths – Roman Theatre" €3.040.514,94; 4. "Area Teatro Romano" €1.475.000,00 5. "Historical centre Pedestrianization" €3.098.741,39. <p>The prosecution of the archaeological excavations has allowed for acquiring new information regarding the Early Middle Ages period of the building. Of particular interest is the finding, in the area that corresponds to the atrium or "Paradise" as per some literary sources, of some intact graves from the Longobard period. Among these, a child's grave stands out, which also gave back a poled silver Cross with golden wires, that is part of the embroidered clothes.</p> <p>Through institutional programmatic agreement, Region Campania financed the valorization of the archaeological complex that was found in the underground of the Cathedral. The amount of the project is €2.880.000,00 and the works will be contracted out before 30 June, 2009</p>
Financial resources	<p>Available: EU resources, to be taken from POR Campania 2000/2006:</p> <ul style="list-style-type: none"> • "Urban Archaeological Area – Cardinal Pacca – Baths – Roman Theatre" € 3.040.514,94; • "Arco del Sacramento" €2.013.629,20 • "Piazza Ponzio Telesino" €975.445,66; • "Roman Theatre Area" €1.475.000,00 • "Historical centre Pedestrianization" €3.098.741,39

ENHANCEMENT PLAN <i>Monte Sant'Angelo site</i>	
Objective 49	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SANCTUARY
Project 49.1	Project and intervention for the creation of conditions of continuity in decoration of the external space connecting the upper atrium and the roof of the Cave
Actions	Planned intervention measures <ol style="list-style-type: none"> In-depth surveys on the area and data restitution in digital form carried out by the technical department of the municipality General planning by the Superintendency
Phases and timeframe	<ol style="list-style-type: none"> 2010 2012

ENHANCEMENT PLAN <i>Monte Sant'Angelo site</i>	
Objective 49	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SANCTUARY
Project 49.2	Completion of equipping the Devotional Museum
Actions COMPLETED	<p>The Devotional Museum has finally been set and was inaugurated on July, 7th 2008 and regularly opened to the public</p>  <p>The exposition at the Devotional Museum</p>

ENHANCEMENT PLAN <i>Monte Sant'Angelo site</i>	
Objective 49	HEIGHTENING OF THE ENHANCEMENT LEVEL OF THE SANCTUARY
Project 49.3	Optimisation of the access system to the Casa del Pellegrino and creation of a new internal route
Actions COMPLETED	The widening of the Pilgrim's House hall has been completed. The hall's welcoming level has been therefore enhanced, for those who, through the use of the elevator, reach the Devotional Museum and the internal routes that lead to the sanctuary grotto.

ENHANCEMENT PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 51	ENHANCEMENT OF THE WALLS
Project 51.1	Definition of visiting routes to the wall system
Actions ONGOING	<p><i>Planned activities:</i></p> <ol style="list-style-type: none"> The property of the estates englobing parts of the ring-walls has been verified Towers, or part of towers, englobed in private properties were surveyed Hypotheses made by local experts, founded on epoch photographic material and on technical surveys on the site, have undergone a first verification. Such hypotheses have been digitally recorded. Accurate soundings and verifications on the structures, aiming at the check of the hypotheses is in the planning phase

8.3 ENHANCEMENT PLAN DETAILED SCHEDULES

	6. The planning of specific signs as well as the translation into English and German of the relevant explanations is currently being planned
--	--

ENHANCEMENT PLAN <i>Monte Sant'Angelo</i> buffer zone and Territory	
Objective 51	ENHANCEMENT OF THE WALLS
Project 51.2	Identification of interventions of improvement in visibility-use of the walls.
Actions ONGOING	Though the achievement of the objective is strictly connected to the previous 51.1, so far, a route equipped with explanation panels was defined, to help use the part of ring-wall south of the Complex of San Francesco

ENHANCEMENT PLAN <i>Monte Sant'Angelo</i> buffer zone and Territory	
Objective 52	ENHANCEMENT OF THE CHURCHES AND MONASTERIES OF MONTE SANT'ANGELO
Project 52.1	Definition of visiting routes around the system of churches and monasteries
Actions ONGOING	The technical department of the municipality is currently carrying out a preliminary study for the identification of pedestrian routes within the historic town centre, with consecutive stopping places by churches and annexed monastery complexes. <i>The objectives of the programme include:</i> <ol style="list-style-type: none"> 1. Supplying tourists with differentiated itineraries, which can be integrated, 1. An estimate of the time needed to complete a given itinerary, to better plan package tours.

ENHANCEMENT PLAN <i>Monte Sant'Angelo</i> buffer zone and Territory	
Objective 52	ENHANCEMENT OF THE CHURCHES AND MONASTERIES OF MONTE SANT'ANGELO
Project 52.2	Identification of interventions of improvement of visibility-use
Actions ONGOING	An accurate survey is being carried out, on the state of the architectural decorum of public spaces in front of religious complexes inside the Buffer Zone. The result will be the basis of the intervention of requalification of those elements that have an impact on the visual quality and on the usability of the spaces. <i>Planned intervention measures:</i> <ol style="list-style-type: none"> 1. The elimination of any distracting landscape elements to open up the view 1. The introduction of new and appropriate urban furniture

ENHANCEMENT PLAN <i>Monte Sant'Angelo</i> buffer zone and Territory	
Objective 54	ENHANCEMENT THE ACTIVITIES OF REQUALIFICATION IN THE HISTORIC CENTRE
Project 54.3	Re-order of publicity boards and definition of a detailed regulation for installing shade tents, publicity signs and informative panels
Actions ONGOING	A census on the present street signs within the buffer zone was held and the identification of the various types of private advertising signs. A study of the locations, which are most fit for placing information boards was launched

**8.3 ENHANCEMENT PLAN
DETAILED SCHEDULES**

ENHANCEMENT PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 54	ENHANCEMENT THE ACTIVITIES OF REQUALIFICATION IN THE HISTORIC CENTRE
Project 54.4	Study and planning of the valorisation of piazza Carlo d'Angiò with the elimination of the car park, organisation of a green area of connection with the Castle and review of existing services
Actions ONGOING	<ol style="list-style-type: none"> 1. An executive project of the regeneration of Piazza Carlo d'Angiò within the project "Contratti di quartiere II" (area contracts II), envisaging various town, including a number of places within the buffer zone. The construction work will begin in 2010. 2. The technical department of the municipality has also launched a preliminary study on the regeneration of the green area leading to the castle and the related services

ENHANCEMENT PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 55	ENHANCEMENT OF THE TERRITORIAL CULTURAL OFFER
Project 55.1	Identification and valorisation of the <i>Via Sacra Langobardorum</i> route
Actions COMPLETED phase A	<ol style="list-style-type: none"> 1. The Universities of Bari and Foggia identified the main routes and stopping places along the <i>Via Sacra Langobardorum</i> 2. Restoration and upgrading measures are being planned in the framework of the planning of the enlarged area "Capitanata 2020". The province of Foggia is the leader and can already avail itself of European funds and is deciding upon their allocation to single projects.
Financial resources	European Union funds

ENHANCEMENT PLAN <i>Monte Sant'Angelo buffer zone and Territory</i>	
Objective 55	ENHANCEMENT OF THE TERRITORIAL CULTURAL OFFER
Project 55.2	Optimisation of the regional museum network
Actions ONGOING	Local institutions have set out the process of drawing up memoranda of understanding between the different museum institutions, under the aegis of Puglia regional authorities, to establish a museum network on a territorial basis, in the province of Foggia. The initiative was conceived as a point of departure for the extension of the regional museum network.

8.4 AWARENESS BUILDING AND PROMOTION PLAN DETAILED SCHEDULES

AWARENESS BUILDING AND PROMOTION PLAN <i>Network</i>	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.2	Activation of cultural exchanges between Universities and post-graduate Schools
Description	An agreement is being defined between the University of Perugia and the Municipality of Spoleto, to establish a Specialization School of Archaeology in Spoleto, Palazzo Mauri. Three courses are scheduled, of which one is on Middle Ages Archaeology. The foundation of such institution in Spoleto will allow for the scheduled exchanges with similar institutions in the other sites of the network.
Actions ONGOING	<ol style="list-style-type: none"> 1. Definition of an agreement between the University of Perugia and the Municipality of Spoleto; 2. Identification and preparation of the seat and of the didactic rooms; 3. Definition of an agreement for the students' hospitality; 4. Theoretical and practical lessons.
Involved subjects	University of Perugia and Municipality of Spoleto.
Financial resources	University of Perugia, Municipality of Spoleto
Expected results	Widening of scientific competences in the sector of archaeological disciplines, in particular the medieval one
Result indicators	Activation of a School of Specialization in Middle Ages Archaeology Number of enrolled students.

AWARENESS BUILDING AND PROMOTION PLAN <i>Network</i>	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.3	Broadening of the educational project "I Longobardi – Gemellaggi formative e itinerari turistici per le scuole" (The Longobards – Educational twinning and touristic routes for schools)
Actions COMPLETED  	<p>The schools of the Network, represented by Benevento, Cividale del Friuli and Spoleto, took part to the national event "Exposcuola 2008", which took place from 5 to 7 September, 2008 in Salerno, as part of the didactic project "The Longobards – formative twinings and itineraries of school tourism", a project included in the sensitization plan of the Italia Longobardorum Network.</p> <p>The project, co-ordinated by BAP Superintendency for the provinces of Caserta and Benevento and by ISS "M. Buonarroti" in Caserta, came joint first at the prize giving of the "Exposcuola monitored projects 2008", for the excellences and the quality of the formative offer presented.</p> <p>Started by a group of schools, cultural institutions, local bodies and associations, as tiles of an educational network, initially including the schools of Pavia, Benevento, Caserta, Upper Irpinia and Salerno, in 2008 the project was widened, to include the schools of the province of Avellino, Cividale del Friuli (National Boarding School "Paul the Deacon") and Spoleto (Hotel Trade School and Art School "Leoncillo Leonardi").</p> <p>The main objective of the project is the activation and development of a system of relations that – along the roads of the Longobards, from North to South and vice versa – promotes formative twinings and produces tourist itineraries for the schools. It is a project that aims at creating a totally innovative proposal of school tourism, in which the chances of turning the instruction visits into fundamental activities for the growth of knowledges for the young generations appear evident.</p> <p>The event counted an attendance of 10.000 and more in four days; in an experimental way, the students proposed labs, narrations, demonstrations, games conceived for the itinerary, all of them useful to making the visit to the pavilion a lively one.</p> <p>The logo conceived and realized by the Art School "Leoncillo Leonardi" of Spoleto, was selected as official logo of the project "Formative twinings and Journey as project"</p> <p>In the 2009 the network of schools that have joined the project has grown considerably.</p> <p>2009 BRESCIA The project envisages the involvement of a number of Brescia primary and secondary schools to promote cultural exchanges with other towns of Longobard</p>

8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES

	<p>origin in Italy. During their stay in Brescia, exchange schoolboys and schoolgirls will visit the Longobard sites of Brescia and its province.</p> <ul style="list-style-type: none"> • Communication to primary and secondary schools on the project • Involvement of the USP (Provincial School Office) • Implementation of exchanges
	
	<ul style="list-style-type: none"> • Students' didactic/formative work programming. <ol style="list-style-type: none"> a) Historical deepening on the Early Middle Ages in Italy and, in particular, on the period between the 6th-11th centuries; b) Historical/bibliographic research on the monuments in the territory; c) Survey on the sites of the itinerary; d) Analysis of the monuments through filling in observation and study files on the monuments; e) Taking of images, making of drawings and shooting of videos on the monuments; f) Drafting of syntheses to produce the itinerary's descriptive materials on the itinerary and give a structure to the consolidation of students' learning. • Twinning/welcoming actions programming: <ol style="list-style-type: none"> g) Standardizing the tourist proposals of the territory itineraries; h) Virtual twinning through the realization of articulated multimedial structures: websites, blogs, forums, e-mail, videoconferences, and so on.
Parties involved	<p>BAP Superintendency for the provinces of Caserta and Benevento and of Umbria, Communes and schools of Pavia, Benevento, Caserta, Cividale del Friuli, Spoleto, Avellino and Salerno, Sistema Museo Umbria – Formative Services. Municipality of Brescia, Fondazione Brescia Musei, Ufficio Scolastico Provinciale</p>
	<p>Future editions of Exposcuola are likely to be attended again.</p>
	<p>As for Spoleto: Commune of Spoleto and Art School "L. Leonardi"</p>
	<p>Growth of the educational network: twinnings and tourist itineraries for schools.</p>
	<p>Number of involved schools Number of organized visits Number of realized projects</p>

DETAILED SCHEDULES**

AWARENESS BUILDING AND PROMOTION PLAN <i>Network</i>	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.4 A	Project for increasing knowledge of the Heritage in relation to the sphere of education
<p>Description</p> <p>COMPLETED <i>pilot-phase</i></p>	<p>The pilot-project has proposed to the schools of the territory of Spoleto, Campello sul Clitunno and surrounding communes, a didactic programme whose aim was the historical investigation on Longobard culture in Italy, with particular reference to the territory of Umbria. The programme also included guided visits and the realization of a file with the topics dealt with during the lessons, including a specific bibliographic display, for any of the topics, to orient students in widening particularly interesting thematics.</p>  <p>B) Project to be extended to the school of the network territories C) The production of the documentary "From Cividale to Salerno" shot by the school-boys and school-girls of the Salerno Liceo scientifico (secondary school focusing on sciences) "Leonardo da Vinci" assisted by their teacher Matteo De Cesare. The video was presented in Paestum during the 12th Mediterranean Archaeological Tourism Trade event (19th to 22nd November 2009).</p>
<p>Actions</p> <p>ONGOING</p>	<ol style="list-style-type: none"> 1. Theoretical lessons 2. Guided visits to the main monuments, evidences of Longobard presence in Umbria 3. Realization of a divulging file
<p>Involved subjects</p>	<ol style="list-style-type: none"> a) Superintendency for Historical, Artistic, Ethnoanthropological Landscape of Umbria, Municipality of Spoleto, Municipality of Campello sul Clitunno, National Museum of the Duchy of Spoleto, Soc. Coop. Sistema Museo – Educational Services, University of Perugia, Middle Ages Archaeology Dept b) Network's stakeholders
<p>Planned phases and time frame</p>	<p>a) Pilot-project. The lessons were structured into two phases:</p> <ul style="list-style-type: none"> • A first cycle of five lessons by the general character was dedicated to the analysis of the culture of the Longobards, from an anthropological and sociological point of view, starting from the traditional forms of Northern-European influence to the acculturation processes due to the contacts with the Romance culture of Mediterranean tradition (Roman-Byzantine). During this first phase, social composition, ways of living, building techniques and religiousness of the Longobards was dealt with, including how all this has been influencing the way the conquering territories were being occupied (towns, countryside, pre-existing structures) during the immigration phase. Such phenomena were analysed by covering "the places" of the UNESCO candidacy, seen as mature results of the processes of acculturation and elaboration of an autonomous, completely original "cultural language". • A second cycle of five lessons focused on the most significant aspects of the Longobard presence in Umbria.

**8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

	The whole path started in October, to last until half December 2008. b) 2009-2010 ongoing c) Yearly scheduled starting from 2010-2011
Financial resources	a) Superintendency for Historical, Artistic Ethnoanthropological Landscape of Umbria b) Yet to be identified
Expected results	Increased direct youth participation to the knowledge and promotion of the values of the Unesco Heritage
Result indicators	Number of involved classes Number of organized visits to the Heritage assets and to the territory Number of printed and distributed files

AWARENESS BUILDING AND PROMOTION PLAN Network	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.4 B	Didactic Project <i>Weapons, "Long Beards" and Precious Jewels</i>
Description COMPLETED pilot-phase B YEARLY SCHEDULED	<p>The didactic project <i>Weapons, "Long Beards" and Precious Jewels</i>, is addressed to primary and secondary schools.</p> <p>The didactic proposal aims at transferring the knowledge of the origin, society, uses and costumes of the Longobard people to the kids, through the observation of the funerary outfits, kept by the National Museum of the Duchy of Spoleto.</p> <p>Direct observation of the finds, and the contact with the artistic evidences has the objective of making the experience more involving, favouring the learning process in the kids and stimulating their critical sense.</p> <div style="text-align: center;">   </div>
Actions	<ol style="list-style-type: none"> Meetings at the National Museum of the Duchy of Spoleto: <ul style="list-style-type: none"> - analysis of the funerary outfits; - lab for the reconstruction of Longobard clothing; Guided visits to the Basilica of San Salvatore and to the Tempietto sul Clitunno
Involved subjects	Superintendency for the Historical, Artistic and Ethnoanthropological Landscape of Umbria, Municipality of Spoleto, Municipality of Campello sul Clitunno, National Museum of the Duchy of Spoleto, Sistema Museo Educational Services

8.4 AWARENESS BUILDING AND PROMOTION PLAN DETAILED SCHEDULES

Planned phases and time frame	The didactic activity is split into two meetings of two hours each, the first one by the National Museum of the Duchy in Spoleto, while the second one by the Basilica of San Salvatore and the Tempietto sul Clitunno, monuments included in the Italia Langobardorum site, which is candidated to the UNESCO World Heritage List. Activity started with the school year 2008/2009.
Financial resources	Superintendency for the Historical, Artistic and Ethnoanthropological Landscape of Umbria, Municipality of Spoleto
Expected results	Increased direct youth participation to the knowledge and promotion of the values of the Unesco Heritage
Result indicators	Number of involved classes Number of organized visits to the assets of the Heritage and to the territory

AWARENESS BUILDING AND PROMOTION PLAN <i>Network</i>	
Objective 1	STRENGTHENING THE INTERACTION WITH THE EDUCATION COMMUNITY
Project 1.4 C	“Rodelinde, Queen of the Longobards”
Description ONGOING	Agreements were started between the Municipality of Spoleto and the prestigious, internationally known Teatro Lirico Sperimentale “A.Belli” from Spoleto, for the staging of “Rodelinde, Queen of the Longobards”, by G.F. Haendel. The opera will be included in next Festival of Two Worlds’ programme. After Spoleto, “Rodelinde” will also be performed in the theatres of the other places of the “Italia Langobardorum” Network; to such end, contacts with the city of Brescia have already been defined. The representation gives the opportunity to divulge the knowledge on the Longobards’ origins, society and uses through a musical work, thus reaching an adult target. More, costumes and scenography will be realized by the students of the School of Art “Leoncillo Leonardi” in Spoleto (see 24.1), thus strengthening the project’s aspects of sensitization.
Actions	1. Accurate definition of agreements with Teatro Lirico Sperimentale in Spoleto and Teatro Grande in Brescia
Involved subjects	Municipality of Spoleto, Municipality of Brescia, Teatro Lirico Sperimentale “A. Belli” in Spoleto, Teatro Grande in Brescia, Foundation Festival, School of Art “L. Leonardi” in Spoleto,
Planned phases and time frame	Medium period 2010-2012
Financial resources	Public and private sponsoring
Expected results	The staging of a little known “Longobard” opera, which will be repeated in the other sites of the Network, will not only allow for spreading the opera to a wider audience, it will also enhance the knowledge on Longobard culture; more, it will strengthen the ties among stakeholders, extending the field of common actions to new aspects
Result indicators	Number of representations Number of places of the Network where the opera will be staged Audience figures

Project 8.1 A	Projects to improve knowledge about the Heritage in relation to education (from primary schools to universities)
<p>Actions COMPLETED</p>	<p>1. Tender for graduation thesis Prize <i>Forum Iulii</i> The Municipality of Cividale del Friuli has called for the 4th tender to award 3 prizes for the specialist graduation thesis or of the former system and PhD thesis whose subject is the Town of Cividale del Friuli and the Territory in relation with the environmental changes, the evolution of history, communities and people, the enhancement and preservation of the artistic heritage. Expiration date to present the thesis: 31st October 2008 In 2009 the proclamation of winners: Rodolfo Basaldella was awarded the first prize with his thesis "<i>Le banche di Antro e Merso. L'organizzazione comunitaria nel Cividalese durante il dominio veneziano</i>" (University of Udine – Master's degree in Arts); Chiara de Santi came second with her thesis "<i>Affreschi del 14. secolo negli ambienti conventuali della Chiesa di San Francesco a Cividale. I recenti restauri</i>" (University of Trieste, Faculty of Philosophy and Arts) together with Isaura Vogrig with her "<i>Tra città e paesaggio. Cividale del Friuli</i>" (IUAV University of Venice – Master's degree in Architecture for sustainability).</p> <p>2. Presentation of the book/research: "<i>Le carte del monastero femminile di S.Maria in Valle di Cividale (Centuries 9th-13th)</i>" by Elena Maffei in collaboration with Attilio Bartoli Langeli and Daniela Maschio.</p>

AWARENESS BUILDING AND PROMOTION PLAN <i>Cividale del Friuli Territory</i>	
Objective 8	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 8.1 B	Projects to improve knowledge about the Heritage in relation to education (from primary schools to universities)
<p>Actions ONGOING</p>	<p>In 2008 the University of Udine and the municipality of Cividale made a framework-agreement within the 2008 Italian candidacy of the sites included in the "<i>Italia Langobardorum</i>" project for UNESCO World Heritage Site status. The agreement led to further specifications aimed at editing publications on the town to increase the knowledge of the historical and cultural heritage of Cividale.</p> <p>a) In the period between 2010 and 2012 Cividale will be major subject of a study which will lead to the compilation of the first urban history ever produced in Friuli. A team of experts coordinated by the University of Udine – Faculty of Arts will prepare for printing two volumes containing research contributions and in-depth studies worked out by twenty National and International experts on the town history in the Middle Ages.</p> <p>b) Moreover, by next spring, the proceedings of the International Conference of Studies "<i>L'VIII secolo: un secolo inquieto</i>" will be published. It was the first conference of the network of UNESCO candidate sites held in Cividale in December 2008 under the scientific guidance of Prof. Valentino Pace of the Department of History and Protection of Cultural Heritage of the University of Udine. The book will contain reports by major International and Italian experts of main themes related to VIII century. The proceedings are financed by Fondazione CRUP, the town of Cividale and the University of Udine.</p> <p>c) Not to mention the forthcoming publication of the inventory of medieval letters by representatives of the surrounding states to the town of Cividale now kept in the National Archaeological Museum. These include agreements, trials, evidence, privileges, peace chapters, notarial deeds, bulls (both patriarchal and papal), imperial diplomas of the period between 1176 and 1540. The initiative will be funded by the municipality in cooperation with the Friuli Venezia Giulia Regional Authority.</p>

**8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 11	RISE AND INCREASE OF THE EDUCATIONAL OFFER
Project 11.4	Projects to foster the knowledge on the Heritage in connection with the educational system
Description NEW	The project has many objectives. Among them: making young people know the Longobard vestiges in Brescia (firstly the monastery of San Salvatore) and in its Province as an actual value sharing with whom preceded us and with what they handed down to us also with the purpose of an incisive safeguard of the heritage and of the re-thinking of the meaning and historical importance of the Longobards' presence in Brescia and in Italy; contacting other European peoples who, as we did, shared and still maintain alive the Longobard heritage; implementing a potential national and international tourist offer for the Longobard sites in Brescia (but also for the other historical sites of the town). The studies and the works performed will be the subject of a competition and of relevant, also itinerant, exhibitions (in the province of Brescia for cultural exchanges with schools and students that apply for them)
Actions	<ol style="list-style-type: none"> 1. Preparatory activity 2. Introductory lectures held by experts 3. Study and development of the knowledge on the Longobard site in Brescia and involvement of national and international realities 4. Giving back the carried out work to the local community by paper publications, multimedia material and lectures 5. Starting up "class exchanges" with other schools (of the net Italia Langobardorum" or of the countries belonging to the virtual Longobard region or that participate in the World Heritage List of Unesco)
Parties involved	Newspaper "Brixia mirabilis" Secondary school Piamarta-Artigianelli Linguistic European secondary School" I.P.C. Camillo Golgi "Tourist" and "Advertising graphic designer" sections No-profit organization "Intercultura" Onlus
Estimated phases and times	2009-2010 planning and preparatory initiatives; 2010-2011 implementation of the project; 2011-2012 national and International "class exchanges".
Financial resources	Funds to be raised by: Lombardy Regional Authority; Province of Brescia; private funds
Expected results	Collaboration teachers/students; collaboration students/students (within the same school or among different schools for a common and not competitive work between students and schools; commitment of schools, teachers and students in the territory and application of the theoretical-practical skills to the particular realities of the territory; actual approach of the students to the initiatives that could/should be their natural professional opportunity; promotion of the idea at national and international levels; approach, opening to and confronting with cultures different from the Italian one; direct participation of young people in the knowledge on and promotion of the values of UNESCO Heritage.
Result indicators	The project wanted by Brixia mirabilis is an integrant part of the school training offer and thus students' learning and production will be evaluated by their teachers. Start up of national and international fruitful and lasting relations Desire to participate in further projects

Description	<p>1. Literary work, in the shape of a novelized narration, by author Lucio Panozzo, entitled: “<i>Trilogia – Saga Longobarda</i>” [“<i>Trilogy - The Longobard Sag</i>”]. It consists of three different books inside a slipcase: the first book: <i>La crocetta d’oro</i> [The golden little cross] (first book); <i>Passaggio a Nord-est</i> [North-east passage] (second book); <i>La scuola degli eroi</i> [The heroes’ school] (third book).</p> <p>2. Translation and publication of “Re Rotari” – “Rothari King”, a medieval poem. The purpose of the publication is to enable the Italian public to read an important work of the medieval German literature, of which there is no translation. It tells the adventures of King Rothari as they were sung by the court jesters in the 12th century. Moreover, the thread of the story connects some places of the <i>Italia Langobardorum</i> nomination.</p> <div data-bbox="794 741 1182 1267" data-label="Image"> <p>The image shows the front cover of a book titled 'Re Rotari'. The title is in a large, black, serif font. Below it, in a smaller font, is 'Poema Medievale'. The background of the cover features a faint, repeating pattern of medieval script in a Gothic or similar font. At the bottom of the cover, there are two circular logos: one for the 'Rotary Club Brescia Sud Est Montichiari' and another for the 'International Inner Wheel Club Brescia Sud'. The text 'Traduzione di Giuseppe Galliani' is visible at the bottom of the cover.</p> </div> <p align="center"><i>The cover of the book</i></p>
<p>Actions</p> <p>ONGOING</p> <p>COMPLETED</p>	<p><i>First project:</i></p> <ol style="list-style-type: none"> 1. Assignment to the author 2. Print of the volumes 3. Presentation of the initiative during public meetings and its diffusion using the local press and the territorial information agencies <p><i>Second project:</i></p> <ol style="list-style-type: none"> 4. Translation and print of the poem
Parties involved	<p>First project: Fondazione CAB; Municipality of Brescia</p> <p>Second project: Rotary Club-Brescia Sud Est Montichiari; International Inner Wheel Club Brescia Sud</p>
Estimated phases and times	<p>First project: print within 2009; presentation and diffusion during 2010</p> <p>Second project: completed</p>
Financial resources	<p>First project: overall cost € 50,000.00</p> <p>Funds allocated by Fondazione CAB</p> <p>Second project: cost paid for by Rotary Club-Brescia Sud Est Montichiari; International Inner Wheel Club Brescia Sud</p>
Expected results	Increase in the interest on the Longobards, their historical and cultural events

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 12	INCREASE OF THE ACTIONS OF COMMUNICATION ON THE SITE

8.4 AWARENESS BUILDING AND PROMOTION PLAN DETAILED SCHEDULES

Project 12.9	Researches, installations, exhibitions and photographic workshops
Description	Mounting of three photographic exhibitions: 1. The first one to present the architectonic and artistic vestiges of the Roman period, (the archaeological area with the Republican Sanctuary, the <i>Capitolium</i> , the Roman theatre, Forum Square, the Roman <i>domus</i> and the Winged Victory Bronze) and of the Longobard period (San Salvatore-Santa Giulia monastery with the church of San Salvatore and the precious objects, such as the slab with the peacock and the cross of King Desiderius); moreover, the Romanesque church of Santa Maria in Solario, the choir, the church of Santa Giulia and the Renaissance cloisters. 2. The second one to show, using paintings, prints and old photographs, the changes occurred in the different areas of the town (for example: corso Palestro, piazza Mercato, piazza Vittoria; piazza Arnaldo and piazza Tebaldo Brusato) and to foster the knowledge on the history of each town area for its historical-artistic aspects and architectonic and urban changes, which have characterized the aspect of the town, by sensitizing the public in general and the shopkeepers in particular on the knowledge of the places where the social and commercial life of the town took and is still taking place. 3. The third one to show the map of the Castle and comment the places, with an in-depth study concerning the industrial exhibition held in Brescia in 1904, a historical event of paramount importance that presented the productive aspects and food and wine peculiarities of the Brescia territory.
Actions	<ul style="list-style-type: none"> • Identification of exhibition places • Selection of the photographs • Realization of the captions and of synthetic didactic panels • Mounting of exhibitions • Realization and distribution of informative brochures
Parties involved	Municipality of Brescia
Estimated phases and times	Within 2011
Financial resources	Overall cost: € 45,000.00 Funds allocated by the Municipality of Brescia and potential technical sponsors
Expected results	The exhibitions should arouse the attention of the public and make it have a direct knowledge on the heritage, highlighting it in the different places of the town.
Result indicators	Number of people interested; number of brochures distributed

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 12	INCREASE OF THE ACTIONS OF COMMUNICATION ON THE SITE
Project 12.10	Targeted promotion using European transport means
Description	The Local Authority for Tourism of the Municipality of Brescia, in cooperation with company ELIPSOS INTERNACIONAL of Barcelona, which manages the night railway transportations called Trenhotel between Spain and Italy, has organized a promotional campaign to present Brescia and the site. Thanks to the agreement, all the passengers received a guidebook on Brescia in Spanish and a leaflet to promote the site and the new bike rental service Desiderio Bike (see project 15.2)
Actions	1. Arrangement of specific signal system, with the logo of the nomination that promotes the initiative 2. Print of a leaflet in Spanish to be put on all the seats of trenhotel ELIPSOS
Parties involved	Municipality of Brescia Brescia Mobilità Fondazione Brescia Musei (Foundation Brescia Musei)
Estimated phases and times	August 2009, to be repeated in summer 2010
Financial resources	Overall cost: € 1,000.00 Fund allocated by the Municipality of Brescia
Expected results	Increase in the number of Spanish visitors in the monumental area and monastery of Salvatore – Santa Giulia; greater use of bikes; decrease in the number of polluting circulating vehicles
Result indicators	Number of tickets of the museum presented at the bike rental Further abatement of pollutants in the area of the site and in the buffer zone

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 13	ORGANISATION OF EVENTS AT THE SITE
Project 13.1	Event “Feast of Santa Giulia”

8.4 AWARENESS BUILDING AND PROMOTION PLAN DETAILED SCHEDULES

Actions COMPLETED	<p>The “Feast of Santa Giulia” took place in the weekend from 23rd to 25th May 2008 during which many and various initiatives were organized: the evocative dinner in the cloister of San Salvatore, guided tours to the museum, cultural meetings, the fairy, concerts in the museum and along the via dei Musei. New editions of the Feast are to be defined according to schedules to be fixed.</p>  <p style="text-align: center;"><i>A moment of the entertainment of the latest edition during the “Feast of Santa Giulia” inside the Domus of Ortaglia</i></p>

Objective 13	ORGANISATION OF EVENTS AT THE SITE
Project 13.2	“Discover Brescia” project
Actions COMPLETED	The project “Brescia da scoprire”, started in 2006 with a programme articulated into a number of initiatives, in the edition 2007-2008 has included a specific itinerary on the presence of Longobards in Italy, with the organization of guided tours to the church of San Salvatore and to the section dating to the Early Middle Ages of the museum of Santa Giulia.

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 13	ORGANISATION OF EVENTS AT THE SITE
Project 13.3	Organization of cultural and artistic events
Description	Organization of different events, addressed to different types of public during the year. Among the main ones: <i>Festival internazionale Arturo Benedetti Michelangeli</i> (March, April), <i>Per te alle 5</i> (January – March), <i>La bottega delle meraviglie</i> (February, March), <i>La mille miglia</i> (May), <i>Il gran galà della scherma</i> (June), <i>il Festival internazionale dei cori</i> (June), <i>Brescia con gusto</i> (June), <i>Brescia Menu per l'estate</i> (from June to September), <i>Jazz on the road</i> (July), <i>Festival di Shakespeare</i> (July), <i>Concerti nelle piazze (omnia orchestra and many pop and rock singers in summer)</i> , <i>festival show</i> (July), <i>Notti bianche</i> (May, October, December), <i>1,2, 3 Castello d'estate</i> (May – September), <i>Fiorinsieme</i> (September), <i>Scopriamo Brescia tra moda e design</i> (September), <i>Piazze d'Europa – Germania e dintorni</i> (September), <i>la Giornata del trekking urbano</i> (November), Christmas events (skating rink, gala performance on ice, <i>1..2..3 Castello</i>).
Actions ONGOING	<ol style="list-style-type: none"> 1. Agreements with the parties involved 2. Planning 3. Realization and distribution of promotional material 4. Organization and implementation
Parties involved	Municipality of Brescia, Fondazione Brescia Musei (Foundation Brescia Musei) , cultural, trade and craft associations, public and private bodies and institutions operating on the territory
Estimated phases and times	In 2009 and 2010
Financial resources	They cannot be quantified since the organization of the events depends on different public and private persons
Expected results	Involvement of the townspeople to make them enjoy their town and its historical-artistic heritage
Result indicators	Participation of townspeople, press review

8.4 AWARENESS BUILDING AND PROMOTION PLAN DETAILED SCHEDULES

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 13	ORGANISATION OF EVENTS AT THE SITE
Project 13.4	Utilization of Santa Giulia for civil ceremonies
Description	The Auditorium of Santa Giulia can be utilized two Saturdays a month to celebrate civil wedding ceremonies. Upon request, also the museum rooms can be utilized for catering services and guided tours to the complex.
Actions COMPLETED	<ol style="list-style-type: none"> 1. Planning and printing the promotional material of the initiative 2. Organization and press conference 3. Web-site visibility 4. Start up of the project
Parties involved	Municipality of Brescia Fondazione Brescia Musei (Foundation Brescia Musei)
Estimated phases and times	The room is available since March 2009
Financial resources	The initiative self-finances with a contribution asked for to the newly-wed couple
Expected results	Diffusion of the knowledge on the Museum, opening the Museum to townspeople
Result indicators	Number of celebrated weddings (to 30 th September 2009 n. 54)

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 14	USER RETENTION
Project 14.1	Implementation of the “Desiderio card” project
Actions COMPLETED	<p>The museum card “Desiderio” was started in the spring of 2008, to promote the city’s museum heritage, in particular the Museum of Santa Giulia, establishing a loyalty-marketing based relation with the visitors; this project includes a further implementation through another card, especially conceived for the primary and secondary school. The objective is to favour the usability of the city’s museums and the didactic activities taking place inside them, with a tool that can repeatedly be used during the school year; it is in fact a sort of subscription to the museums. The tool is destined for the single classes with two accompanying teachers.</p> <ol style="list-style-type: none"> 1. Projecting of the “School Card” 2. Projecting of a specific communication plan 3. Start of promotion in the spring of 2009 4. Activation starting from September, 2009
	 <p style="text-align: center;"><i>The “Desiderio card”</i></p>
Parties involved	Municipality of Brescia Foundation Brescia Musei
Phases and timeframe	Project “Desiderio Card” already started School Card implementation scheduled for September, 2009
Financial resources	Self-financing initiative, through the sales of the cards
Expected results	Increased involvement of teachers and school public
Result indicators	Appreciation by teachers and card sales’ figures

AWARENESS BUILDING AND PROMOTION PLAN <i>Brescia Territory</i>	
Objective 15	LONGOBARD ITINERARIES
Project 15.1	Public pathway dedicated to the main Early middle ages emergencies
Description	In order to enhance the early medieval traces, which are capillary distributed in the town, it is appropriate to plan a thematic itinerary that connects all the sites in the town that are visible and can be visited. .
Actions	<ol style="list-style-type: none"> 1. Study and creation of the itineraries

AWARENESS-BUILDING AND PROMOTION PLAN <i>Spoletto Territory</i>	
Objective 21	DEVELOP PROMOTIONAL ACTIVITIES
Project 21.3	Implementing <i>ad hoc</i> educational activities for tour operators and journalists from the tourist-cultural sector; assistance to journalists and Radio TV crew members
<p>Actions COMPLETED YEARLY SCHEDULED</p>	<p>The project was started on both the front of the educational activities and of the press.</p> <p>Some tourism operators and journalists went to Spoleto, on various occasions, in the frame of promotional initiatives performed by public bodies such as the Umbria Regional Agency for Tourism Promotion, Local Tourism System "Valli e Monti dell'Umbria Antica", Spoleto Hotel Managers Association "Conspoletto", Spoleto Tourist Office (Municipalities of Spoleto, Campello sul Clitunno, Castel Ritaldi and Giano dell'Umbria).</p> <p>The following groups of tourism operators and journalists visited Spoleto and were given exhaustive information about the Italia Langobardorum project:</p> <ul style="list-style-type: none"> - 18 tourism operators coming from the U.S.A., Germany and the Netherlands (October 2008, "Vitae" Free Time and Wellbeing Fair in Bastia Umbra) - about 20 tourism operators and journalists from Spain (March 2009, before the participation of Spoleto and Umbria to the International Tourism Fair of Catalonia) - about 10 Italian and international tourism operators and journalists (December 2009, Rural Tourism Fair in Foligno) <p><i>Italia Langobardorum</i> received wide exposure along the events of presentation of the Festival of Two Worlds, attended by a number of representatives of the media and tourism operators. The Festival was presented at the Italian Embassy in Paris, France (2008), in London, U.K. (2008), at Moma, in New York (2009).</p>

AWARENESS BUILDING AND PROMOTION PLAN <i>Spoletto Territory</i>	
Objective 22	DEVELOP INFORMATION, RECEPTION AND PROMOTION ACTIVITIES
Project 22.1 A	Studying and implementing accommodation, promotion and awareness raising-related publishing initiatives
Description	<p><i>Pilgrims' routes</i></p>  <p>Religious tourism is nowadays very much felt and diffused. The recent inauguration of the itinerary of faith La Via di Roma – La Via Francigena of San Francesco is an evidence of this.</p> <p>The Municipality of Spoleto, in collaboration with the Spoleto – Norcia Archdiocese has projected a route that allows the tourist-pilgrim to visit all places in the communal and district territory, that were the seat of miracles or of extraordinary events, and to know at the same time the historical, cultural, artistic and architectural features connected to these. The route is partly connected to the Longobards, both from a geographic (the church of San Ponziano is inside the Buffer Zone) and from a historical point of view (the events that occurred in San Paolo <i>inter vineas</i> and San Sabino include Longobard characters).</p>
Actions ONGOING	<ol style="list-style-type: none"> 1. Draft, graphic setting and print of a brochure on the "Places of Miracles and of Extraordinary Events" 2. Participation to sector fairs 3. Request of including the route in the list of regional religious itineraries
Involved subjects	Municipality of Spoleto. Archdiocese of Spoleto – Norcia
Estimated phases and times	<ol style="list-style-type: none"> a. Text draft b. Translation into at least one foreign language (English) c. Graphic setting and print <p>The whole started in the summer of 2008. The last phase is strictly connected to finding the necessary funds</p>
Financial resources	Funds to be found in the communal budget
Expected results	Increase of the offer of tourist itineraries in the territories of Spoleto and in the district (Campello sul Clitunno, Castel Ritaldi and Giano dell'Umbria)

Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.1 D	Studying and implementing accommodation, promotion and awareness raising-related publishing initiatives
Description	<p><i>Spoleto card</i></p> <p>In the summer of 2008 the “Spoleto CARD” was introduced. It’s a simple and innovative formula to help the access to the museums in Spoleto for both citizens and tourists. Conceived by the Municipality of Spoleto, to favour and optimize the system of visits to the city’s museums and historical monuments, Spoleto CARD also includes the use of the “Art Shuttle”, an appositely conceived transport service that helps the connection among museums and monuments and the parking lots, the train station and the hotels in the city. The Art Shuttle connects in fact all most important museums and monuments, among which the Basilica of San Salvatore.</p> <p>The service, in its experimental phase, includes 7 rounds a day. The promotional campaign “PERCHIAMAL’ARTE”, promoted in August 2009 was particularly interesting: holders of the Spoleto Card, besides the entrance to the museum, could also enjoy free guided tours – at nighttime too – to the main museums, monuments, churches, theatres and historical dwellings in Spoleto.</p> <p>More than 20 among hotels, farm holidays enterprises, historical residences have joined the card promotion initiative. In order to promote cultural activity and integrated use of the museums, signing of agreements with the Museums of the Network, with discounts for visitors, is scheduled.</p> <div data-bbox="646 1848 1292 2049" style="text-align: center;">  <p>A Spoleto il tempo è Scoperto. Con i vantaggi che ti offre la nuova Spoleto Card potrai trascorrere uno o due giorni in assoluto relax e visitare la Città, i monumenti e l'arte raccolta nei suoi musei.</p> <p>PERCHIAMAL'ARTE</p> </div>

AWARENESS-BUILDING AND PROMOTION PLAN <i>Spoletto Territory</i>	
Objective 22	INCREASE THE NUMBER OF INFORMATION, ACCOMMODATION AND PROMOTION ACTIVITIES
Project 22.4	Planning of communication activities for the dissemination of knowledge of the Longobard heritage, through various information channels
Actions COMPLETED YEARLY SCHEDULED	<p>The Municipality has realized a communication campaign to sensitize local population on the Longobard past of Spoleto, on the candidacy and on the actions that are being carried out to enhance the valorization level of the city's and territory's historical evidences such as to promote and divulge all initiatives of the Italia Langobardorum network.</p> <p>Communication activities will be repeated along the next years.</p> <p>A section dedicated to <i>Italia Langobardorum</i> was opened on the Municipality's website.</p>

AWARENESS-BUILDING AND PROMOTION PLAN <i>Spoletto Territory</i>	
Objective 23	TOURIST PROMOTION OF THE TERRITORY
Project 23.1	Participation in trade show events and initiatives, mainly in the national and foreign markets
Actions COMPLETED YEARLY SCHEDULED	<p>In 2008 and 2009 the Municipality of Spoleto, besides the fairs mentioned in the file, took part to BIT Milan and Travel Trade Italia, the main Italian tourism fair.</p> <p>In June 2008, tour operators who had attended the Umbria Tourism Fair in 2007 were hosted.</p> <p>In June 2008 a town twinning was signed, between Spoleto and Charleston, SC (USA).</p> <p>In December, 2008 there was a promotional action in the U.S.A. (New York and Washington) and in Mexico (Guanajuato). In the frame of an extensive promotion of the territory of Spoleto and its events, notably the Festival of Two Worlds and the Opera Season, a wide space was given to the candidacy of Spoleto and Campello sul Clitunno related to Italia Langobardorum. In particular, a number of meetings with the Italian Ambassador, with the Cultural Attaché of the Italian Embassy Silvia Limoncini and with the director of the Italian Institute of Culture Rita Venturelli. The Embassy of Italy also organized two other important meetings for the delegation from Spoleto, with lawyer D'Ambrosio, president of the Villa Firenze Foundation and with <i>NIAF – National Italian American Foundation</i>. Those subjects were introduced to the potentials that the territory has, at cultural, artistic and tourist level. In such context, the project Italia Langobardorum found the right space and the appropriate exposure, raising remarkable interest among the institutional and private subjects met. In the future, the contacts and relations that were started will serve to establish collaborations for the promotion of the territory, in the frame of which, the UNESCO candidacy of Spoleto with the basilica of San Salvatore and of Campello sul Clitunno, with the small temple by the same name, will have a strategic role.</p> <p>In July 2009 the project "Spoleto & the Italy you find around" was officially presented by Mayor Daniele Benedetti and Hon. Vincenzo Scotti, Undersecretary of Italian Ministry of Foreign Affairs. "Spoleto & the Italy you find around" is a pilot project in Italy; the Ministry of Foreign Affairs chose Spoleto as pilot town to promote Italy through a small town of remarkable tourist and cultural value. The project involves the use of the widespread network of Italian Embassies, Italian Cultural Institutes, Foreign Trade Offices all over the world, in order to promote Spoleto and, consequently, Italy. The project could be implemented in other Italian tourist and cultural towns for Italy promotion. Spoleto and the entire Italia Langobardorum network will benefit from this widespread promotion through the above mentioned institutions.</p> <p>In April and October 2009, the Municipality of Spoleto received official delegations from Cajamarca (Peru) and Schwetzingen (Germany) within the frame of the existing town-twinning relations. Since Cajamarca historical centre is part of UNESCO world heritage list and Schwetzingen applied for getting its castle's garden included in the list, these visits were the occasions for an</p>

AWARENESS BUILDING AND PROMOTION PLAN <i>Spoletto Site and Territory</i>	
Objective 23	TOURIST PROMOTION OF THE TERRITORY
Project 23.2 A	Tourist reception and promotion of the territory through the organization of artistic and cultural events of major depth
<p>Description COMPLETED YEARLY SCHEDULED</p>	<p>FAI – Italian Environmental Fund, in collaboration with the Municipality of Spoleto, has dedicated the 16th edition of the Spring Days of FAI, on 5 and 6 April, 2008, to the discovery of the main places of the Longobards: from the Basilica of San Salvatore to the discovered mosaics in Palazzo Mauri and Palazzo Pianciani. Students of the Liceo Classico “Pontano – Sansi” and of the Art School “Leoncillo Leonardi” from Spoleto led the visits during the two days, flanked by expert guides. Particularly appreciated by the visitors was the literary space offered on 5 April “Landscapes and Words”, curated by Anna Leonardi and the Teodelapio School of Theatre, featuring readings of passages by travellers who went to Spoleto.</p> <p>“Landscapes and Words” was also proposed on the occasion of the meeting of the Network’s members, which took place on 6-7 May, 2008 in Spoleto. On that occasion, the idea was expressed, to stage the show in the theatres of the seven sites, enriched with thematic readings on the cities of the Network.</p> <p>In the frame of the European Days of the Heritage, 27 and 28 September, 2008, by the Basilica of San Salvatore, there were readings of passages from Paul the Deacon’s <i>Historia Langobardorum</i>, both in Latin and in Italian, performed by Claudio Trionfi; Sergio Macedone briefly introduced the historian from Cividale, and a concert followed, by the Communal School of Music and Dance “Alessandro Onofri”, featuring music by C. Gounod, D. Shostakovich, J. Strass and S. Joplin.</p> <p>On 5 October, 2008, for the promotion of Italia Langobardorum, the Municipality of Spoleto organized a concert at the Teatro Nuovo, in honour of the Dukes that made Spoleto so great in Italy and worldwide. “I Solisti di Perugia” tributed the great “Dukes” of Spoleto: from the Longobard ones in our memory, to our contemporary duke, Gian Carlo Menotti, founder of the Festival of Two Worlds.</p> <p>Per la 17a Giornata di Primavera, a sostegno dell’arte e della natura italiane, il FAI nel ricco programma ha promosso le visite guidate ai beni dell’Italia Langobardorum - Centri di potere e di culto (568-774 d.C.).</p> <p>On the steps of the re-discovery of Spoleto Longobard past, readings of excerpts from Paul the Deacon’s “<i>Historia Langobardorum</i>” were given on March 28th and 29th by the Basilica of San Salvatore. In the frame of the European Days of Heritage, free guided tours to the National Museum of the Duchy of Spoleto have been organized.</p>

**8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

AWARENESS-BUILDING AND PROMOTION PLAN <i>Spoletto Territory</i>	
Objective 23	TOURIST PROMOTION OF THE TERRITORY
Project 23.2 B	Tourist accommodation and promotion of the territory through the organization of artistic and cultural events of significant depth
<p>Actions COMPLETED YEARLY SCHEDULED</p>	<p>2008 and 2009 were rich with important initiatives that reconfirmed the remarkable cultural vocation of Spoleto.</p> <p>A new management of the Festival started in 2007/2008, thanks to a synergy between the Municipality of Spoleto and the Ministry of Cultural Assets; Giorgio Ferrara was entrusted with the artistic direction of the Festival and was appointed president of the Festival Foundation.</p> <p>The first edition under the new management (the 51st one in the history of the Festival) featured some sensational stagings such as the Padmavati and Robert Wilson's Threepenny Opera, and represented an ultimate starting point for the rebirth of the most important event in Spoleto.</p> <p>A great success confirmed by the 52° edition "A festival – or rather, a factory. Cradle to the utmost Italian traditions of "arts" and "artisans", the Medieval town is once again the arena for original stagings conceived specifically for the event and offered to the audience in preview. The Festival deepens and widens its obligatory vocation: a showcase for youngsters and for anything new and insightful. At the same time, it confirms its role of international and prestigious forefront for the most influential and exemplary theatrical events recently staged in worldwide theatres" <i>Giorgio Ferrara</i>.</p> <div data-bbox="603 891 1362 1442" data-label="Image"> </div> <p>The Opera Season (63rd edition in 2009), the 57th Study Week on the High Middle Ages, the 13th Piano Festival, the International Dance Week, they all confirmed to be events by the extraordinary cultural importance, capable of a remarkable tourist attractiveness. Close to these, other major events were the <i>Spoletto Carnival</i>, the <i>Prize "Ercole Olivario"</i>, the <i>Organ Concerts Review</i>, <i>Instruments&Music Spring Festival</i>, the <i>"Wines In The World"</i>, <i>Spoletto Summer Events</i>, the <i>European Stars of Taste</i>, <i>Open Oil-Mills</i>, the <i>End-Of-The-Year Events</i>.</p> <p>Cultural events and performances have met new management modalities. Private partners were asked to invest and to actively start fundraising. So, with the decrease of public investments in the sector, the weight of sponsors and entrepreneurs has grown up, with a proportional increase of public attendance. Spoleto Summer Events were attended by some 37.000; compared to 2004, the increase was 18,4%.</p> <div data-bbox="539 1451 879 2004" data-label="Image"> </div> <p align="center"><i>Wines In The World, 2008</i></p>

8.4 AWARENESS BUILDING AND PROMOTION PLAN DETAILED SCHEDULES

The quality of the offer of the Prose Season has enhanced; subscribers have grown by 63,7%, compared to 2005, as well as appreciation of the programming. The School of Theatre directed by Pietro Biondi and curated by the Association Teodelapio, counts among its teachers professional actors such as Pietro Biondi, Anna Leonardi, Claudio Trionfi and Rita Di Lernia. They all make it a point of excellence in the education and promotion of theatre culture.

In Spoleto, as in any other city, temporary exhibitions have always been offering interesting chances for debate and cultural growth, favouring a remarkable production of publications and contributing to the development of tourism. Among the many exhibitions which took place in 2008-2009, there are *Mater dulcissima*; *Pascali-Leoncillo two artists compared*, by Giovanni Carandente, Livia Velani and Marco Tonelli, Roy Lerner, Virginia Ryan, Carlo Cego; Gianluca Murasecchi, *Spoletto at the end of the 19th century in the pictures of a Roman photographer*; Jeffrey Isaac, *Fleurs*; Karol Wojtila's *theatrical world*; Aristide Loria; Thomas Lange e Mutsuo Hirano, *The Apocalyptic melody*; Maurizio Mochetti, *The Bluebird*; Lino Frongia and Klaus Karl Mehrkens, *Italia-Germania. Dialogues*; Roberto Coda Zabetta, *Paintings*; *Artist's Lights* by Giovanni Albanese.

The network of cultural association in Spoleto is very rich and diverse, featuring as many as 80 officially registered associations. Unregistered associations are to be added to the list, as they have offered their contribution through greatly appealing initiatives, such as *One World Africa*, *Orfeo's Music and Musicology Season*, *Spoletto Back Beat*, *Fucina-Off*, *Nickelodeon - Festival of Social Shorts*.

AWARENESS-BUILDING AND PROMOTION PLAN <i>Campello sul Clitunno Territory</i>	
Objective 25	EXPANSION OF INFORMATION ACTIVITIES
Project 25.1 A	Implementation of promotional and awareness-raising publishing initiatives
Description	<p>A few months ago, works of structural and functional adaptation of the Sanctuary of Madonna della Bianca have started; The church, by the elegant workmanship, dates to the 16th century and rises at the centre of Campello sul Clitunno. In consideration of the high artistic, historical and civic value of the church, the Town Administration decided to realize a divulging text that, besides explaining the ongoing conservation works, will document and focus the attention on the site's historiographic and artistic aspects.</p> <p>All this, to offer to citizenship and scholars a better knowledge of the territory, aimed at a more aware usability. Inside the building, the decorations are of remarkable quality and its importance is also linked to the artists who worked inside here, such as Lo Spagna (1450 – Spoleto, 1528), Valadier (Rome, 14 April 1762 – Rome, 1 February 1839), Fabio Angelucci da Mevale di Visso (1574).</p>

Project 27.2 A	Implementing the tourist information system – Augmented reality
Actions ONGOING	A project for € 1.050.000,00 for the realization of immaterial networks serving the tourism system has been approved by Region Campania. The information will be delivered to the user on the spot, through the use of innovative technologies, with optical viewers connected to a WiFi network.
Financial resources	POR FESR 2007-2013 funds

AWARENESS BUILDING AND PROMOTION PLAN <i>Benevento Territory</i>	
Objective 27	IMPROVING CULTURAL PROMOTION ON THE SITE
Project 27.2 B	Implementing the tourist information system - augmented reality
Actions COMPLETED	The Municipality has realized a communication campaign to sensitize local population on the Longobard past of Benevento, on the candidacy and on the actions that are being carried out to enhance the valorization level of the city’s and territory’s historical evidences. Signs and informative panels have been installed all along Corso Garibaldi, the main street in the historical centre; two panels of 6 by 6 Metres have been installed in the central piazza Duomo and a number of posters of 6 by 3 Metres have been put at the entrances of the city. An informative brochure on the candidacy is being printed, to be spread out among the population, and a sticker will be positioned on the displays of the shops in the city.
Financial resources	Budget funds have been locked up, for € 20.000,00 about

**8.4 AWARENESS BUILDING AND PROMOTION PLAN
DETAILED SCHEDULES**

AWARENESS BUILDING AND PROMOTION PLAN <i>Benevento Territory</i>	
Objective 27	IMPROVING CULTURAL PROMOTION ON THE SITE
Project 27.3 A	Empower public infrastructures connected to cultural heritage
Description	The monumental, archaeological and artistic heritage is the actual richness of the city of Benevento. These goods must be properly safeguarded and valorized, through a series of projects and interventions to make them usable without damaging them. The historical centre of Benevento is already the stage of yearly events that propose the most charming spaces of the city as scenarios (the 25-year-old review "Città Spettacolo" and the younger "Quattro notti e più" take place at the Roman Theatre and at the Rocca dei Rettori). The City Administration's task is that of coordinating and controlling the more and more significant activities that involve the monuments; to such end, the creation of a specific office was scheduled within the communal frame.
Action NEW	1. The establishment of a specific office in the frame of the Comune of Benevento was scheduled. The office, which will be under the rule of the Assessor for Cultural Assets and Tourism, will deal with the actions and programmes for the management, the protection and the valorisation of the Cultural Assets, flanking the Superintendencies.
Parties involved	Municipality of Benevento
Phase and timeframe	2009
Financial resources	Resources from the City Administration of Benevento
Expected results	To embody the will of the Public Administration, to valorize the monumental emergences and the historical-artistic-archaeological assets in the historical centre, giving the city a point of reference for all inherent activities.
Result indicators	Activation of the office

AWARENESS BUILDING AND PROMOTION PLAN <i>Benevento Territory</i>	
Objective 27	IMPROVING CULTURAL PROMOTION ON THE SITE
Project 27.3 B	Empower public infrastructures connected to cultural heritage
Actions NEW COMPLETED	The Municipality has carried out a communication campaign to sensitize townspeople on the Longobard past of Benevento, on the nomination and on the actions that are being implemented to enhance the valorisation level of the historical evidences of the town and territory. Signs and informative panels have been installed all along Corso Garibaldi, the main street in the historical centre; two panels of 6 by 6 metres have been installed in the central piazza Duomo and a number of posters of 6 by 3 metres have been positioned at the entrances of the town. An informative brochure on the nomination is being printed and it will be distributed to the population, moreover, an adhesive banner will be stuck on the windows of the shops in the town.
Financial resources	Budget funds have been locked up for about € 20.000,00

AWARENESS-BUILDING AND PROMOTION PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 29	ENHANCEMENT OF TRAINING ACTIVITIES RELATED TO EDUCATION
Project 29.1	Projects to increase awareness on the Heritage in relation to education (from primary schools to universities)
<p>Actions COMPLETED</p>	<ol style="list-style-type: none"> 1. The 11th edition of the Roman-Barbaric Week was celebrated in 2008 and was curated by the Michaelic and Garganic Study Centre, on the theme "Society and Culture in Southern Italy from the 4th to the 8th centuries". It was a moment of high formation and upgrade for teachers operating in the territory, as well as for university students, on thematics related to the Longobards' period. 2. For the school year 2008-2009, the first edition of the competition "Mount Gargano – Italia Langobardorum" was announced, the theme being "In Dialogue with your Mountain". The competition is addressed to students of the municipalities in the Gargano territory, at their last year of secondary school. The competition will end on 23 May, 2009, when the Commission will award the five scheduled prizes, for an overall value of € 4.000,00. The prize-giving ceremony will occur at the end of the cultural meeting between the students and professor of History of Christianity Giorgio Otranto, of the University of Bari. Theme of the meeting, which will be held in Monte Sant'Angelo, by the auditorium of the Michaelic and Garganic Study Centre, will be the "Sacredness of mountain and stone in ancient religions". The competition is organized by the Municipality of Monte Sant'Angelo, the Universities of Bari and Foggia, Gargano National Park and various local cultural associations. 20 schools from 13 communes of the Gargano territory have joined the initiative. 3. A pictorial competition was announced by the Social Centre "San Michele Arcangelo" and the Municipality of Monte Sant'Angelo, addressed to students of the primary schools of Monte Sant'Angelo, the theme of the competition being the UNESCO candidacy. The competition will be completed within the present school year. 4. An agreement is going to be defined by the Michaelic and Garganic Study Centre and the Municipality of Monte Sant'Angelo, that will be submitted for approval to all school directors in the provinces of Bari and Foggia within October, 2009, for the organization of formation journeys to the various places of the "Italia Langobardorum" Network, that will be adjusted to the age and didactic needs of the students. <div align="center" data-bbox="742 1272 1265 1962"> </div>

--	--

AWARENESS-BUILDING AND PROMOTION PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 30	ENHANCEMENT OF INFORMATION AND PROMOTION ACTIVITIES
Project 30.3	Enhancement of relations with information centres
<p>Actions ONGOING</p>	<p>All initiatives under Objective 30 enjoyed massive press coverage at both regional and national level. Relations with the editorial offices of local and nationwide newspapers, TV News and the main press agencies are by now consolidated; on the occasion of cultural events and on a periodical basis, coverage of the themes connected to the UNESCO candidacy and to the site of Monte Sant'Angelo is ensured.</p> <p>The cultural and divulging activities realized in collaboration with the Michaelic and Garganic Study Centre, and all occasion of public debate on the theme of the candidacy were always introduced with or ended by a press conference.</p> <p>Rai journalist and internationally known writer Raffaele Nigro is a preferred partner for the city of Monte Sant'Angelo and the Italia Langobardorum site. His sensitive attention on the UNESCO candidacy and on the themes connected to the Longobard presence on the Gargano area resulted in the inspiration that originated a new literary work, that will be printed within 2009, as soon as the forms of participation to the publication and diffusion of the book by the city of Monte Sant'Angelo will be properly defined.</p>

AWARENESS-BUILDING AND PROMOTION PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 31	ENHANCEMENT OF PUBLIC AWARENESS ACTIVITIES
Project 31.1	Scientific and information meetings, seminars, exhibitions and touristic tours
<p>Actions ONGOING</p>	<p>It is a very complex theme, strategies for the achievement of the objective are in the start-up phase. Much depends on the initial, natural difficulty to start local and network synergies, for the systemization of cultural exchanges. At the moment, sensitization and involvement of local cultural associations and of economic operators in the communal territory has started. It will lead to the creation of events and cultural exchanges with the other centres of the Network.</p> <p>The local associative fabric has answered the stimulation by founding the association "Centre of Cultural Promotion <i>Land of the Archangel</i>", whose objective is the valorization of the cultural heritage and, in particular the Longobard heritage in Monte Sant'Angelo, characterized by strict relations with the other European places linked to the Michaelic cult. This association has inaugurated its activities in the summer of 2008, with a touring exhibition for the schools by the theme "The Pilgrim by the Gargano" by Father Marcello Cavaglieri, dating to the 17th century, a reference point in the historical bibliography of our city.</p>

**8.5 SOCIO ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Network</i>	
Objective 1	DEVELOPMENT OF THE NETWORK ECONOMIC SYSTEM
Project 1.2	Creation of an integrated system for promoting hospitality and typical production activities
Actions ONGOING	<p><i>Action A/</i> The objectives and actions included into the Management Plan were inspired to the UNESCO very aims and to the Code of Tourism Ethics, as defined by UNWTO and to the aims of BITS-Bureau International du Tourisme Social. For these reasons the Pro-Tempore Network Authority has developed relations with BITS, in order to participate to advanced programmes at international level for the development of Social and Youth Tourism, and to the definition of European evaluation criteria for the hospitality systems addressing to social /youth tourism (Objectives 3 and 4 of the Social and Economic Development Plan.</p> <p>The immediate agreements between the Network Authority and BITS (December 2008 – January 2009) is going to definy within 2010 the role of the <i>Italia Langobardorum</i> Association as stakeholder, to give life to a European research, finalized at the identification of criteria for the classification of European welcoming facilities for Social and Youth Tourism (also applicable to the system of Italia Langobardorum)</p>
Expected phases and time frame	2010

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Network</i>	
Objective 1	DEVELOPMENT OF THE NETWORK ECONOMIC SYSTEM
Project 1.3 1.4	1.3 – Joint running of promotional initiatives for the serial site 1.4 – Creating a system brand
Actions ONGOING	<p>1.3 / Creation of a Network Working Group (Rome, 8 September, 2008) with the task of developing preliminary verifications with the Italian Touring Club system, and go on then to start institutional relations with national and regional economic categories, in order to identify the parameters of the mark for single productive sectors and of the services and co-ordinate its realization with previously existing territorial and quality marks.</p> <p>1.4. / Start of the procedure for the realization of the system mark (see Socio Economic Development Plan, Ob. 4 Project 4.1, 4.2)</p>

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Network</i>	
Objective 2	INCREASING THE QUALITY AND COORDINATION OF THE HOSPITALITY SYSTEM AND RELATED SERVICES
Project 2.3	Creation of a system to monitor the services offered and measure customer satisfaction
Actions NEW	<p>We will create an operative system, shared by the stakeholders, under the direction of the Management Authority of the network Italia Langobardorum. The system – beyond the intranet communications and the video conferences – will allow the fast and safe exchange of data, audio and video files in the network websites. The project envisages the creation of a data processing infrastructure for the connection of the seats involved in the project in high speed data lines together with the activation of a server, which will carry out the most common applications, will manage a database and automatically save the security copies of all the operative data.</p> <p>The use of a web server will allow a series of operative modalities for the management of a centralised database to be activated, in order to add, elaborate and memorise data shared by all the seats of the project. All the data will be inserted and elaborated from each position in real time and without using the e-mail to send files between the various seats. Every week or every day the memorised data can be automatically duplicated on different supports in order to safeguard them before casual losses.</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN Network	
Objective 3	SUPPORTING ENTREPRENEURSHIP AND NEW PROFESSIONALISM RELATED TO SUSTAINABLE DEVELOPMENT OF TOURISM
Project 3.1	Running training courses for professional refreshing of economic operators and related employees in the tourism market and typical agroalimentary products and crafts
Description NEW	<p>The first pilot project is scheduled for 2010 in Brescia. It follows the study days held in Cividale del Friuli on 21st and 22nd March 2009, which saw the participation of economic operators of the wine route “Longobard Hills”, to the south of Brescia, in collaboration with the Consorzio Colli Orientali del Friuli (consortium of the eastern hills of Friuli). The meeting of wine-growers was the opportunity to exchange experience and deepen cultural knowledge on the sites of the network “Italia Langobardorum”.</p> <p>The meeting led to a second experimental step: the planning of a free 20/30 hours evening course, held by teachers and experts in the field of wine-growing, to further knowledge on the art and history of the nominated network sites. The objective of the course is laying out guidelines to widen the tourist offer of the single sites and of the network on its whole.</p>
Actions	<ol style="list-style-type: none"> 1. Course planning 2. Promotion of the course among the companies in the field 3. Preparation and distribution of technical handouts 4. Running of the course
Parties involved	Longobard Association Brescia forum on social tourism Association Charter of Cividale The Laser cooperative Foundations, private and public institutions
Phases and timeframe	2010
Financial resources	Funds to be collected from foundations, private and public institutions
Expected results	Widening of tourist and cultural offer of the wine route
Result indicators	Number of course participants

SOCIO ECONOMIC DEVELOPMENT PLAN Network	
Objective 4	CREATION OF A COORDINATED SYSTEM FOR TYPICAL PRODUCTS AND QUALITY IN THE AGROALIMENTARY AND CRAFTS LINES
Project 4.1	Identification of typical products and quality for the agroalimentary and crafts lines
Actions ONGOING	<p>The year 2009 saw the start of coordinated initiatives for the promotion of the typical products of the regional area of the candidature. A first step was made with the opening of the dialogue with several organisations and exhibition agencies of the Friuli Venezia Giulia, Lombardy, Umbria and Campania regions in order to develop agreements related to manifestations and fair exhibitions, which are specialised in the promotion of the typical products of the agroalimentary and oenogastronomic fields.</p> <p align="center">CIVIDALE DEL FRIULI – UDINE</p> <p>The event “GOOD”, regarding the agroalimentary and oenogastronomic quality of the Alps Adriatic region was held in UDINE, on the October, 18th 2009. The bank Banca Popolare FriulAdria-Crédit Agricole created an illustrative board about the potential of the network “Italia Lanogobardorum” as regards the tourist interests and the means offered to the social and economical development of these territories by Culture.</p> <p>During the event a presentation of the Management Plan of Italia Longobardorum was organised by the Secretariat of the Management Authority for the entrepreneurs.</p>
	

Udine , "GOOD"/ Exhibition fair of the agroalimentary and oenogastronomic products of the Alps-Adriatic region

Other specialized territorial initiatives within the network "*Italia Langobardorum*" which are currently being organized.

- I. BRESCIA / Aliment&Attrezzature is an exhibition which specializes in food sector. It is not only a reference event but also a meeting point for all food business operators (*trade, distribution and supply*) as well as of the whole sector pertaining to catering equipment, services, hotel food supplies and hospitality. Aliment&Attrezzature 2010, directly arranged by Centro Fiera del Garda in Montichiari (BS), will be held from 28 February to 3 March 2010.
- II. CASTESEPRIO-TORBA / "*VARESE da Gustare*" is a project developed in cooperation with the Province and the Chamber of Commerce of Varese with the contribution of the Directorate General for Agriculture of the Regional Authority of Lombardy. The initiative is aimed at promoting Varese typical products, protecting and checking their quality since they are regarded as an important resource for the economy and food and wine tourism in the Province.
- III. SPOLETO / "*SPOLETO tipica*" – Trade fair of Spoleto typical products started in 2007 which includes that of Campello sul Clitunno. It is promoted by both the *Comunità Montana dei Monti Martani e del Serano* and the *Consorzio Bonificazione Umbra* and is held in the weekends from 1 to 11 November. Historic buildings, streets and oil mills of the region welcome visitors with conferences and tasting. The main product is extra virgin olive oil.
- IV. CAMPELLO SUL CLITUNNO / The following events related to typical products and the local traditional cuisine need to be enhanced to develop the network system: the "festival of the summer truffle", held in August in a nearby place called La Spina; the "Mountain Festival and the Festival of the Lentil of Pettino" (in June and August); the national event "Open Oil-Mills" (in December); the "Festival of Oil-Mills" (in December), featuring conferences, guided tastings of local products and dishes. The Campello Festival of Oil-Mills is one of the first events to be organized in the Southern Umbrian valley to enhance and to promote olive oil and olive growing.
- V. BENEVENTO / "*IL SANNIO tra sapori e folklore*" – The 7th edition of the

**8.5 SOCIO ECONOMIC DEVELOPMENT PLAN

	<p>initiative was organized by the UNPLI Committee of the Province of Benevento in cooperation with the Chamber of Commerce of Benevento, sponsored by the Department of Productive Activities and Tourism of the Municipality of Benevento, the Province of Benevento and the Province Tourist Board. The 2009 edition took place from 5 to 8 December 2009 with the participation of 34 tourist associations, Samnite producers and craftsmen. The best resources of traditional gastronomy, handicrafts and folklore of Beneventan Samnium were proposed.</p> <p>VI. MONTE SANT'ANGELO / Apulia is rich in trade fairs finalized to promote important economic sectors. In particular the food and wine, agriculture, environment and cultural promotion sectors fall into the activities of the main fair boards of the region. In view of this the Municipality of Monte Sant'Angelo, in agreement with local operators, has moved the preliminary steps towards agreements with the Fair Boards of Bari and Foggia in order to promote various products in provided exhibition spaces.</p>

**8.5 SOCIO ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Network</i>	
Objective 4	CREATION OF A COORDINATED SYSTEM FOR TYPICAL PRODUCTS, QUALITY IN THE AGROALIMENTARY AND CRAFTS LINES AND RELATED RESEARCH
Project 4.1 4.2	4.1 Identification of typical products and quality for the agroalimentary and crafts lines 4.2 Creation of regulations for producing typical, quality products of the Longobard network
Description NEW	<p>AGRIFOOD is the pilot project of the “<i>Italia Langobardorum</i>” network and it shall propose a development model aimed at the improvement and valorisation of quality in the SME’s working in the agroalimentary and oenogastronomic fields. The typical agroalimentary productions of the eligible territories included in the network of the UNESCO nomination will be valorised.</p> <p>The macro-objective of AGRIFOOD is to develop and test the model of the “Excellencies network” (network-of-networks) aimed at:</p> <ol style="list-style-type: none"> a) Supporting the valorisation at an international level and the potentials of the objective-area, by supplying the economical and cultural operators an operational channel with the best excellencies and the highest possible visibility, where to coordinate their development politics; b) Supporting the valorisation of the marginal areas with a high naturalistic content, in particular in the transalpine view; c) Strengthening the cross-border cooperation in the view of the constitution of the “European geo-cultural corridor” of the “<i>Italia Langobardorum</i>” candidature; d) Stimulating technical and scientific research and innovation; e) Operating for the development of innovative activities for the enterprises; f) Designing new professional figures, who can offer same opportunities (young people, women, people in need); g) Cutting the system producer-tourist/consumer. <p>The “Excellencies network” structured in this way will allow a greater coordinated development of other productive sectors and tourist services (artistic and traditional craft, innovative, hospitality services).</p>
Actions	<p>There are four operative objectives of AGRIFOOD for the growth of the quality levels of typical products and services of touristic interest:</p> <ol style="list-style-type: none"> 1. <i>Excellencies of the territory and the environment</i> 2. <i>Excellencies of Small and Medium Enterprises in the agroalimentary sector</i> 3. <i>Excellences in oenogastronomy</i> 4. <i>Sustainable tourism</i>: promotion of the UNESCO interest sites for international users, inclusion in the newly formed “European geo-cultural corridor” [Confront the Management plan of “<i>Italia Langobardorum</i>”], which links Italy to Slovenia and to Central-Eastern and Northern Europe through the region Friuli Venezia Giulia (Historical route of the Longobards) <p>Objectives to be pursued with specific actions for the single intervention lines</p>
Parties involved	<p>Municipality of Cividale del Friuli, project leader Friuli Venezia Giulia Regional Authority (Turismo FVG; Regional council for Agriculture) Unione Cooperative Friulane Agency for the territorial development of the Republic of Slovenia</p>
Phases and timeframe	2010-2012
Financial resources	€2,400,000.00 Interreg III A EU funds
Expected results	Define the territorial development model
Result indicators	Number of enterprises involved in the agroalimentary and oenogastronomic sectors

**8.5 SOCIO ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Network</i>			
Objective 4	CREATION OF A COORDINATED SYSTEM FOR TYPICAL PRODUCTS, QUALITY IN THE AGROALIMENTARY AND CRAFTS LINES AND RELATED RESEARCH		
Project 4.3	Creation of a system to monitor the services offered and measure customer satisfaction		
Description NEW	<p>A preliminary study was carried out to create specialist functions through the computer web system. On the basis of the results the Management Authority of the network will be able to verify and therefore operate to improve the efficiency level in the following fields:</p> <p><i>A / Control of the accesses:</i> through the use of the automatic mapping systems of the presences we will be able to monitor in real time and from one single place, the accesses to each site included in the network or of all the websites as a whole. The monitoring may be of a numeric kind with statistical elaborations of the number of visits divided by place, date, on the basis of particular events or to particular promotional campaigns in order to analyse the number of connections of the efficiency of the local or national media support, compared to other kind of supports. The system envisages a network of video control as a support to the normal local systems, which can become very important during the night, where one single operator can monitor the most important buildings of the whole network.</p> <p><i>B/ Real time management</i> of the availability of accommodation structures on the territories of the areas included in the candidature and of the Longobard routes</p> <p><i>C/ Preferences of the tourists/web surfers</i> in the direct creation of personalised routes in the candidature areas and alongside the Longobard paths</p> <p><i>D/ Management of virtual shops</i> for the on-line commercialisation of typical products of the candidature areas and of the Longobard routes</p> <p><i>E/ Tv-on-demand services</i> for documentaries regarding the candidature areas and the Longobard routes (culture, nature, typical products). The first test will be held in Brescia</p> <p><i>F/ Monitoring of the consumer's opinions</i> about the efficiency of the hospitality and of the network system</p> <p>For each above mentioned service the customer satisfaction level will be displayed</p>		
Actions	<table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><i>Phase 1 / Feasibility project</i></td> <td style="width: 50%;"><i>Phase 2 / Following intervention steps, defined every year by the Management authority</i></td> </tr> </table>	<i>Phase 1 / Feasibility project</i>	<i>Phase 2 / Following intervention steps, defined every year by the Management authority</i>

Parties involved	Management authority of the network, Stakeholders		
Phases and timeframe	<i>Phase 1 / 2010-2011</i> <i>Phase 2 / 2013-2014</i>		
Financial resources	To be found by involved parties		
Expected results	Efficiency and monitoring of the system and of the customer satisfaction		

**8.5 SOCIO ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO ECONOMIC DEVELOPMENT PLAN Network

Objective 4 CREATION OF A COORDINATED SYSTEM FOR TYPICAL PRODUCTS, QUALITY IN THE AGROALIMENTARY AND CRAFTS LINES AND RELATED RESEARCH

Project 4.4 Development of agrifood production according to archaeo-zoological, archaeo-botanical, historical and archival surveys

Description
NEW

The start of the site *Italia Langobardorum* in various places and the development of initiatives for the study of the archaeo-zoological e and archaeo-botanical remains, together with the parallel start of historical and archival studies and researches on the theme of ancient cultivations and breedings, beyond the organisation of the first expositions of the materials found in the territories of Cividale, Brescia and Castelseprio have suggested the development of a deeper scientific-technological analysis about the findings.

The Trieste University promotes this initiative also in its capacity as the coordinator of the Central European Initiative Network, which includes approximately thirty Universities of Central and Eastern Europe, co-interested in the history of the Longobards (Geo-cultural corridor “Via Longobarda delle Origini”). The initiative has been launched by the exhibition realized by Museo Archeologico –Nazionale (October-november 2009) about Early middle ages food and animals.

Recent exhibition in Cividale on medieval food where the latest findings were displayed

Poster of the exhibition (2004-2005)

Archaeo-zoological and archaeo-botanical surveys will use genetic technologies for the analysis of “ancient DNAs” in order to identify species and variants belonging to the ancient-early medieval-medieval periods to be compared with the current genetic variability; moreover, archaeo-palynological, archaeo-carpological and xylological technologies will be used (“archaeological woods”). The identification of specific elements to recognize “ancient” animal and plant species and variants will also lay the scientific foundations for a more general development of the agrifood sector based on the peculiarities of these territories.

In this regard, the presentation of Germanic food and fruit that took place in Paestum during the XII Borsa Mediterranea del Turismo Archeologico (12th Mediterranean Grant for Archaeological Tourism) (November 19th-22th, 2009) can be also considered a research activity.

DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Cividale del Friuli Territory</i>	
Objective 5	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 5.2	Interventions to improve the road system
Actions ONGOING	Construction of roundabout roads to enter the town. 1. Rotonda del Gallo (Roundabout near Gallo) – Work in progress 2. Restoring roads 
Phases and timeframe	2010
Financial resources	€ 300.000,00 from the Municipality budget
Expected results	Reduction of motorized traffic – Easier access to town for cars and tourist coaches

Rendering of the roundabout near Gallo, new entrance to Cividale

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Cividale Territory</i>	
Objective 6	INCREASE OF OVERNIGHT STAYS
Project 6.1	Creation of differentiated tourist packages and offers
Description NEW ONGOING	The current project implies touristic promotion measures targeted to organized groups. The aim is to encourage visits to Cividale del Friuli by Italian and foreign organized groups.
Actions	<i>A – Project implementation arrangements:</i> <ol style="list-style-type: none"> Organized groups of at least 20 people who visit the town and eat at least one meal or organized groups of at least 10 people staying overnight in Cividale will be granted one visit to the town with an authorized professional guide at the expenses of the municipality. <i>B – Promotion of the initiative:</i> <ol style="list-style-type: none"> Tourist guides participating in the project commit themselves to informing on the initiative the agencies which usually contact them for the implementation of guided tours The Municipal Administration will promote the initiative in travel agencies and tour operators of Friuli Venezia Giulia and Veneto. Flanking initiatives will be realized by hotel keepers and restaurateurs in Cividale within their respective promotional contacts.
Parties involved	The Municipality of Cividale in cooperation with: Associazione Guide Turistiche del Friuli Venezia Giulia; Friulguide – Guide turistiche autorizzate della Regione Friuli Venezia Giulia; Itineraria – Associazione Guide Turistiche autorizzate per la Regione Friuli Venezia Giulia; La via dell'Ambra; Nord-Est Guide and certified tour operators.
Financial resources	From the Municipality of Cividale and private parties

DETAILED SCHEDULES**

Financial resources	Private funds
---------------------	---------------

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Cividale del Friuli Territory</i>	
Objective 7	DEVELOPMENT AND ENHANCEMENT OF THE URBAN PRODUCTION SYSTEM
Project 7.2	Enhancement and relaunch of productive activities and new companies
Description NEW COMPLETED	Implementation by the Municipal administration of a local and tourism marketing assessment for the renovation of commercial and tourism activities in Cividale. The initiative concerned studies and specific local designs.
Actions	In this respect the following actions were taken: <ol style="list-style-type: none"> 1. <i>Local Marketing assessment</i> – The specific study flanked by a trade plan/sector study, helped define local commercial needs, assess the expenditure outflow to other centres, acknowledge the existing situation and how satisfactory it is in terms of expenditure intentions of citizens. The study led to outlining a communication plan suited to spread the image of the old town centre at a tourism and commercial level. 2. <i>Analysis of the old town shopping areas</i> – This activity concerned the detailed mapping of the areas in the Municipality of Cividale defining their size, position, rent and selling price. Moreover all existing economic activities were catalogued with the indication of products supplied in order to compile a database which helps the Municipal administration involve operators. 3. <i>Organization of the Convention of productive activities</i> – The local marketing assessment also contained a data collection on approval and reporting by operators implemented in two phases: direct interviews of operators and a public meeting (convention) to show the assessment results. During the convention, further meetings were arranged with qualified staff aimed at training operators in their areas of competence.
Expected results	Detailed definition of product needs, commercial strategy and promotional communication of the town. Presentation of a plan of commerce/tourism integrated communication with the publication of a commercial guide to the town.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Cividale del Friuli Territory</i>	
Objective 8	REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES
Project 8.1	Protection of agri-food traditions and their use to economically relaunch innovative quality products
Actions ONGOING	Initiatives developed by the Municipal Administration in cooperation with Coldiretti Udine and further private operators: <ol style="list-style-type: none"> 1. <i>MERCATO "CAMPAGNA AMICA"</i> – With decision of 18.11.2009 the Association for the management of Friuli Venezia Giulia farmers' market in direct sale located in Udine was granted the request to hold a fair of local importance called "Mercato di Campagna Amica" on a trial basis up to April 2010 every fourth Sunday of the month. 2. <i>BOTTEGA DEL TERRITORIO</i> – Opening on a trial and temporary basis of a shop called "Bottega del Territorio" in a municipal property, a historic building known as "Casa Medievale", in order to promote the exhibition and sale of agricultural foods, artefacts and other local products from handcrafted <i>gubane</i> to honey, olive oil etc produced in the Municipality of Cividale del Friuli.
	
Expected results	Promotion of typical agricultural foods. Drawing consumers' and tourists' attention on producers and production sites.

DETAILED SCHEDULES

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Cividale del Friuli Territory</i>	
Objective 10	ENHANCEMENT OF HISTORICAL CITY CENTRE
Project 10.1	Upgrading squares and streets
<p>Actions COMPLETED</p>	<p>The Municipal Administration provided for the development of the upgrading and development programme of a number of important urban areas. In the period between 2008 and 2009 the following works were carried out:</p> <ol style="list-style-type: none"> 1. Improvement, restoration and asphaltting of some town streets 2. Renovation of Piazzetta San Biagio and construction of a viewing point on the Natisone river 3. Restoration of the Ponte del Diavolo (Devil's Bridge) – Reconstruction and consolidation of natural stone parapets 4. Lighting technique upgrading and street furniture in the old town centre
	 <p><i>The Ponte del Diavolo (Devil's Bridge)</i></p>
	 <p><i>Piazzetta San Biagio</i></p>  <p><i>View on the Natisone river</i></p>
Financial resources	€ 300,000.00 from the Municipality budget

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Cividale del Friuli Territory</i>	
Objective 10	ENHANCEMENT OF HISTORICAL CITY CENTRE
Project 10.2	Improvement of urban image quality
<p>Actions COMPLETED</p>   <p>COMPLETED</p>  <p><i>Official awarding by the Italian Touring Club of the orange flag (Bandiera Arancione) to the Municipality of Cividale</i></p>	<p>Action A / 2009 / Cividale del Friuli ranks 11th in the <i>list of the 100 Italian towns with the highest quality of life</i> and 1st in the region Friuli Venezia Giulia. The study was carried out by the Venice Study Centre "Sintesi" on behalf of the Italian weekly magazine "Panorama" among Italian towns with a population ranging from 10,000 to 100,000 inhabitants (main towns and metropolitan areas were left out). The picture which emerges is of the utmost importance, since over 27 million Italians (the majority of the population) live in towns with the above-mentioned population range (other 19 million live in towns with fewer than 10,000 inhabitants and the remaining 14 million in metropolitan areas). There were two selection stages: a) skimming of the 8,101 Italian municipalities on the basis of 13 parameters; b) assessment of the quality of life on the basis of 50 well-being indicators including historic, artistic and archeological heritage, climate indexes, local gastronomy. The town which ranks 1st in the list is Brunico/Bruneck (in the province of Bolzano/Bozen)</p>   <p>1. Action B / 2009 / The Italian Touring Club awarded to the town the "Bandiera Arancione" (orange flag), an environmental tourism quality label bestowed after a strict selection process on towns and cities which stand out for the excellent supply and high reception standards. The label bestowed on Cividale is the first "Bandiera Arancione" awarded to a town in Friuli Venezia Giulia and is valid for two years subject to the maintenance in time of the quality standards established by the Club. The label enables the town to take part in a communication system which provides it with high visibility and a range of options in terms of promotion and tourism launch. The aims related to this award are:</p> <ul style="list-style-type: none"> a) local resources development b) promotion of handicrafts and typical products c) impetus to local entrepreneurship d) strengthening of local identity <p>These objectives are the underlying principle of the Management Plan of the UNESCO "<i>Italia Langobardorum</i>" candidacy.</p>
Parties involved	<p>Action A: Panorama; Centro studi "Sintesi"</p> <p>Action B: Touring Club Italiano</p> <p>Action C: Municipality of Cividale del Friuli</p>
Expected results	Project to improve the quality of life and of the environment in Cividale del Friuli

DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
OBJECTIVE 10	IMPROVEMENT OF MOBILITY
PROJECT 10.1	Realisation of automated light underground railway, in a viewpoint of integrated transport services
<p>Actions ONGOING</p>	<p>The construction works of the automated light underground railway in Brescia are proceeding according to the time schedule planned. The service will enable, at full capacity, the transport of 4 million people per year. The managing company, Brescia Mobilità, is developing projects to extend the transport network to the hinterland of Brescia. The operation will further favour the opportunity of socio-economic development and improve the accessibility, also from a tourist point of view, to the historical-artistic, monumental and naturalistic resources of the territory. It is possible to follow the progress of the works in the Internet website www.metro.bs.it</p> <p>Visits to the most significant locations of the excavation area have been programmed.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  <p>1</p> </div> <div style="text-align: center;">  <p>2</p> </div> </div> <div style="margin-top: 10px;">  <p>3</p> </div> <p>1. Roof casting in the via Marcon station 2. Tunnel framework before the railway track laying</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.1	New motorway for fast and direct connection between Brescia and Milan ("Brebemi")
<p>Actions ONGOING</p>	<p>The Regional Territory Plan has been drafted, with the identification of the development areas and the safeguard of open space areas.</p> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;">  </div> <div style="width: 50%;"> <p>On the 22nd July 2009, in Urago D'Oglio, the works for the "Brebemi" (Brescia-Bergamo-Milano) road started officially with the first concrete casting for the building of the first viaduct pillar on the Oglio river.</p> <p>The whole Brescia-Milano road is 62 km long. Envisaged time for the completion: 3 years.</p> </div> </div>

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.3	Motorway junction A4 – A21 – Airport of Montichiari
Actions ONGOING	<p>The works for the building of the separate carriageways of the section Capriano del Colle/Castenedolo started in December 2008. Therefore the end of the works is foreseen for 2012.</p> 

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.5	Motorway junction of Valle Trompia
Actions COMPLETED NEW	<p>The first part of the 4th Lot has been realised with the requalification of the stretch at the junction between south and west Brescia by-pass: a new fly-over bridge with 6 carriageways, 2 new larger galleries, roundabouts and motorway crossings have been recently completed.</p> <p>Further construction phases for the completion of the motorway in Val Trompia are made up by two additional stretches.</p> <p>1 / Connection between Concesio and Sarezso along 7 kilometres. The work – almost completely in tunnels – will relieve the traffic on the only access road to the Val Trompia, with a transit of approximately 50,000 vehicles per day.</p> <p>2 / Renovation of the provincial road n. 19, which goes from Concesio, through the municipalities of Gusago and Rodengo, to Ospitaletto (A4 motorway tollbooth), where it reaches “Corda molle” road link, thus creating an integrated system of motorways, which will enable to deviate the traffic outside the built up areas.</p>  <p>The completion of the Val Trompia motorway will facilitate the access to the extraordinary natural and productive heritage of this pre-Alpine territory near Brescia on the one side (www.valletrompia.it), whereas on the other side it will complete the road system of the Brescia province in connection with the next completion of the works of the highway 237 in the Val Sabbia, of the Statal road 42 in the Val Camonica and with the already mentioned “Corda molle” and “Brebemi” connections.</p>
Financial resources	1 / €258.000.000 already granted by the EU

Objective 11	IMPROVEMENT OF ACCESS TO THE TERRITORY
Project 11.6	High speed train (Treno Alta Velocità - TAV) section Treviglio-Brescia
Actions NEW	The Italian high speed/high capacity are some of the greater infrastructures to be developed in our Country since the end of the war because of the extension of the investments, because of their complexity and for their strategic importance. Today 800 kilometres of lines are already functioning. In comparison with other high-speed examples in Europe, the Italian lines have a unique formula: high speed combined with high capacity. The tight integration with the existing railway, the numerous interventions for the presence on the territory and the technical-engineering solutions, which allow the transport of travellers and goods, are the strength of this concentrate of Made in Italy knowledge.
Parties involved	Lombardy Regional Authority Brescia Province Brescia Municipality Trenitalia
Phases and timeframe	Start of the works in the Treviglio-Brescia west section from March 2010 Conclusion of the works by 2014
Financial resources	Cost: € 2,000,000,000.00

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
Objective 12	OPTIMISATION OF THE TERRITORIAL TOURIST SYSTEM
Project 12.1	“The sublimation of water” tourist system
Actions ONGOING	In December 2008 the Tourist System was definitely approved by Region Lombardy. As this is an articulated programme, the degree of definition varies from project to project.

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
Objective 12	OPTIMISATION OF THE TERRITORIAL TOURIST SYSTEM
Project 12.4	“The rail road from Valle Trompia to Brescia” Tourist system
Description	The aim of the tourist system “La via del ferro dalla Valle Trompia a Brescia” (The iron route from the Trompia valley to Brescia) is the valorisation of the historic and artistic heritage of the town of Brescia, of the Mella river, of the memory about the industrialisation and of work (industrial archaeology) in the sites and in the museums of the Trompia valley. The tourist system, as is described by the regional law n. 15/2007, aims at summing up the programmes, projects and services oriented at the tourist development of the territory and at the integrated offer of cultural and environmental goods and of touristic attractions, including the typical products of the local oenogastronomy. The programme for the tourist development includes new initiatives and already ongoing projects, which are still not concluded, and the various tools for the local planning regarding also the historical and artistic goods, which can be assimilated through their contents, of the town of Brescia (PISL, planning of the upland authority association, programme agreements, ecc.). The Italian tourist system was recognised by the Lombardy Regional Authority with the Decree of the regional council n. 3469, dated 7/11/ 2006. In 2008 the development programme was updated with the new requests and has positively concluded the Strategic Environment Assessment process.
Actions	The new programme for tourist development defines 219 projects, divided into 5 action plans, and namely: <ol style="list-style-type: none"> 1. Plan A - La Via del Ferro (The Iron Route); 2. Plan B – The Mella river, natural park and base of the sustainable mobility; 3. Plan C – Sport and hiking; 4. Plan D – Art, culture and local traditions; 5. Plan E – Environment, nature, natural paths As this is an articulated programme, the definition of the details is different in the various projects.
Parties involved	The tourist system includes approximately 100 public and private operators, who have appointed the upland authority association of the Trompia valley to be the coordinator of the system. Production group: Comunità Montana Valle Trompia (Valle Trompia upland authority association), Brescia Municipality, Brescia Province and Brescia Chamber of Commerce And: Agenzia Parco Minerario Alta Valle Trompia; Agenzia Territoriale Valtrompia Turismo; Brescia Musei; Brescia Mobilità; Brescia Trasporti; il Parco delle Colline; Sistema Museale Val Trompia; Bresciatourism; l'associazione Comuni delle Terre Basse (Association of the municipalities of Dello, Azzano Mella, Barbariga, Brandico, Longhena, Mairano e Corzano); l'associazione Strada del Vino dei Colli dei Longobardi; Confartigianato di Brescia; Confesercenti Provinciale di Brescia; Consorzio Armaioli Bresciani; Associazioni culturali e sportive; Società di impianti; 3 parishes and 60 operators of the accommodation trade and catering sectors.
Phases and timeframe	The planning of interventions in the Tourist system is to be developed in three years. Its implementation is bound to the financial resources, which can be found at a local, regional, State and European level. The implementation depends also on the types of projects, which define the Action plan of the programme for the development of tourism. The next review is to be carried out by 2011.
Financial resources	The overall investment for the 219 projects included in the programme exceeds 96 million Euros, of which 46% derive from public and 54% from private investments. The potential financing resources are numerous and differ on the basis of the type of the project. In the first three years of activity 50 interventions have already been carried out or are now being developed, for a total of 8,000,000 Euros invested.
Expected results	Structuring and promotion of the tourist services of the Trompia valley, starting from the ancient Iron route, with a particular attention to the old ability of its inhabitants to process and sell the iron, an aptitude linked with the historical and artistic goods, which can be compared to those of the Brescia valley for their contents. Qualification of the tourist services of the area with projects aimed at the differentiation and the achievement of quality of the tourist offer in its different components, with a particular attention to the products and services of agriculture, handicraft and trade so as to improve touristic accommodation facilities and the complementary services and activities.
Result indicators	Increase in the number of tourists, improvement of the facilities available in various places, conservation and valorisation of sites and resources, creation of suitable

DETAILED SCHEDULES

	<p>strategy for the urban development;</p> <ol style="list-style-type: none"> 6. ONE EVENT CALENDAR – creation and management of one single and coordinated calendar of the events of territorial animation in order to animate and render more attractive the trade, the spaces and places with attractions inside the DUC; 7. MULTILINGUAL WELCOME – Services, help and orientation of the DUC users through a better ability of the staff in public places (bars and restaurants) to welcome the tourists in a foreign language; 8. DUC SHUTTLE – creation of a special communication service for the users during particular events, with a small train/bus working during the Christmas festivities (Christmas + sales) in order to connect the principal sites and the EVENT areas; 9. URBAN STRUCTURING AND REQUALIFICATION (11. C.so Mameli; 12. Via S.Faustino, 13. Piazze Storiche; 14. Rua Sovera; 15. Delle Battaglie, via Scalvini and vicolo Due Torri) with coordinated and homogeneous urban furniture elements (lightning-flower pot holders-signs); 10. STRUCTURES FOR THE ANIMATION – purchase the equipment and the furniture for special events (stage, pavilions, audio equipment, lighting equipment, chairs, etc.), the informative boards and the signs for the organisation of animation and development activities of the DUC; 11. “PINK” STOP AREAS – creation of “PINK” stop areas dedicated to pregnant women or women with children; 12. BIKE PARKING PLACES IN LARGO FORMENTONE – creation of parking places and availability of bikes “BICI MIA” in largo Formentone; 13. EXTENTION OF THE TERRITORIAL HELP SERVICE – measures for the hindering of unauthorized commerce and for the prevention of crimes through the extension of the existing travelling help service, guaranteed by police agents along the main commercial streets of the DUC; 14. PUBLIC ASSISTANCE – extension of the PUBLIC ASSISTANCE service on the public service number 18, operating in the DUC area; 15. TOWN STEWARDS – services for the welcoming, help and orientation of the DUC users through the introduction of the TOWN STEWARDS service during particularly important and crowded events; 16. INTEGRATED PROJECT OF DUC – TOURISM COMMUNICATION: thanks to the cooperation and the greater resources of the Bresciatourism company, communication initiatives, educational tours and promotional material will be developed and spread to a vast public with the touristic initiatives of the town and with the intervention programme DUC. The initiative is part of the Protocol; 17. PROTOCOL OF AGREEMENT: organisation of the following initiatives, on the basis of the modalities and commitments described by the Protocol of agreement, which is being defined in cooperation with the Chamber of Commerce, the trade associations, CDO, CONSORZIO BRESCIA CENTRO, Bresciatourism; 18. EVENTS IN TOWN: a calendar of initiatives aimed at a greater presence of people attending the DUC; 19. ARS GUSTANDI: annual event aimed at improving the availability of the DUC restaurants, characterised by a strong bond with the cultural events in town (Year 2009/2010 in connection with the INCA exhibition); 20. PIAZZE d'EUROPA (European squares): thematic exhibition-market for the presentation of European cultures with the organisation of cultural and animation events; 21. SCOPIRAMO BRESCIA TRA MODA & DESIGN (Discover Brescia through fashion and design): exhibitions and fashion shows linked to the products created by local stylists and craftsmen and fashion shows with the samples of the clothes shops of the town; 22. STAGIONI DEL GUSTO (Seasons of taste): 4 events, all associated with the oenogastronomic promotion of season products and of their use in the kitchen; 23. MULTIMEASURE PUBLIC NOTICE OF THE BRESCIA MUNICIPALITY FOR TRADE SME's <i>MEASURE 1</i> – <i>System actions</i> <i>Urban furniture:</i> The Brescia municipality will define the guidelines, which will be submitted to the approval of the City Council. The guidelines will be aimed at and necessary for the specific contents of the notice, which will allocate the resources for the economic operators of some DUC streets, selected in accordance with the entrepreneurs' associations in order to develop interventions for the qualification of commercial buildings with a stable seat.

	<p><i>Structural intervention for the commercial qualification: financing the intervention for the aesthetic qualification of the buildings and spaces, destined for the trade with a stable seat.</i></p> <p>24. MULTIMEASURE PUBLIC NOTICE FOR TRADE SME's – MEASURE 2. Allocation of resources in order to give the SME's the equipment regarding alarm systems and video cameras</p>
Parties involved	<p>Brescia Municipality (Office for the urban marketing and other municipal sectors) Lombardy Regional Authority Brescia Chamber of Commerce The most representative trade associations (ASCOM – Confcommercio) and CONFESERCENTI Crafts trade associations (ASSOCIAZIONE ARTIGIANI, CNA, CONFARTIGIANATO, ASSOPADANA CLAI) Associations of enterprises (COMPAGNIA DELLE OPERE and CONSORZIO CENTRO CITTA') Joint companies and/or bodies BRESCIATOURISM, BRESCIA MOBILITA' Brescia Musei Foundation</p>
Phases and timeframe	Three years period 2009 – 2011
Financial resources	<p>Overall cost: € 7,741,700.00 Resources allocated by: Lombardy Regional Authority and Brescia Municipality for € 5,515,700.00 and by private partners for € 2,226,000.00</p>
Expected results	Valorisation and development of local trade and competitiveness of the enterprises

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Brescia Territory</i>	
Objective 14	ECONOMIC ANIMATION OF THE TERRITORY IN VIEW OF THE TURISTIC DEVELOPMENT
Project 14.3	Town Stewards
Description NEW	In particular times of the year (Summer, Christmas, Easter) and/or in the occasion of important events, we will introduce a new professional figure, the <i>Town Steward</i> , who will have the task to improve the welcome and the orientation of the customers of Brescia centre. The town stewards will be easy to identify (uniform and identification card) and will have the task to improve the “liveability” of the historic centre by giving tourist information, distributing maps and promotional leaflets, illustrating the various public services and highlighting the excellencies of the city, suggesting the main shopping streets, etc.
Actions	<ol style="list-style-type: none"> 1. Precise definition of the contents and of the implementation modalities of the new service, in cooperation with the project partners 2. Assignment of the task and special training of the staff 3. Implementation of the activities 4. Monitoring of the implemented activities
Parties involved	Brescia Municipality
Phases and timeframe	Starting from 2009
Financial resources	2009: 20,000 Euros 100% of the expenses covered by public contributions (50% Municipality, 50% Lombardy Regional Authority) 2010: 50% Brescia Municipality, 50% Single or associated traders 2011: majority percentage supported by traders with a public co-financing reaching a maximum of 40%
Expected results	Improving the “quality of life and liveability” of Brescia historic centre, welcoming and guiding the visitors thanks to dedicated and trained staff
Result indicators	Assessment of the satisfaction through polls handed out to the traders of the district and submitted to the customers. Think about the opportunity to introduce in Brescia, as it successfully happened in some international contexts (Liege, Charleroi), simple systems for the “ <i>traceability of information</i> ”; the steward gives the needed information and hands a “token”, which will be then given by the customer to the trader or to the owner of the indicated local so as to have a concrete element, which documents the efficiency of the service offered by the stewards.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoletto Territory</i>	
Objective 20	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 20.1	Enhancement of railway infrastructures and connections and public local transport
Actions ONGOING	<p>The second part of the Alternative Mobility is completed. In the first half of 2010 the third one will be inaugurated.</p>  <p><i>The tapis roulant of the second part of the Alternative Mobility</i></p>

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoletto Territory</i>	
Objective 20	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 20.2	Interventions for an integrated transport system
Actions ONGOING	<p>As for the projecting hypothesis that includes a ring road around Spoleto and consequent elimination of a part of the old main road outside of the city, an agreement to be signed with PARC has been defined, for the draft of an international competition. In such circumstance, the need for restoring a relation between the city, Colle Ciciano and the slopes of Monteluco will be highlighted. Within 2010, it will only be possible to conceive the first competition phases.</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoletto Territory</i>	
Objective 21	URBAN REQUALIFICATION AND DEVELOPMENT OF THE PRODUCTION SYSTEM
Project 21.2	PUC2: 2 nd generation complex urban programmes - Requalification of the Historical Centre
Actions NEW ONGOING	<p><i>PUC2: "Spoleto Square of the Excellences"</i></p> <p>The Municipality of Spoleto participated to the regional competition with an integrated requalification project, composed of various synergic actions, finalized at the valorization, revitalization and promotion of the historical centre of Spoleto and the immediate vicinities.</p> <p>The project is structured into 5 strategic axes, related to the improvement of accessibility and usability of the historical centre, the valorization of the city's treasures and its excellences, the recovery of the identity and the promotion of social cohesion, the strengthening of services, the consolidation and qualification of commerce.</p> <p>Five pilaster-projects were defined on these axes, that define the characteristic and distinctive elements of PUC2 and sustain the strategic axes: the settling and social cohesion system, the integrated tourist offer, the congress offer, markets and</p>

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

services, knowledge and high formation.

The Municipality of Spoleto evaluated 226 proposals by citizens and firms (commerce, handicraft, services). 212 were accepted and form a list which will become ultimate and financeable, upon assessment by Region Umbria.

In the frame of PUC2, a plan of urban marketing was elaborated that, starting from the elaboration analysis, followed the governance model applied to the whole Complex Urban Planning. The projecting area includes the site of the Basilica of San Salvatore and the plan of urban marketing is integrated with the related plans of the Italia Langobardorum Management Plan.

Involved subjects	Region Umbria, Municipality of Spoleto and private subjects
Estimated phases and times	The project was presented to Region Umbria on 20 October, 2008 and approved by the Region Umbria on July, 2009.
Financial resources	The funds allotted by Region Umbria sum up to 7,515,325.95 €. Yet the overall financial spin-off, including public and private investments, requalification of previously existing activities and the start of new ones, will easily exceed 20 million €.
Expected results	As for: <ul style="list-style-type: none"> a. settling and social cohesion system: building recoveries, aimed at downtown repopulation; restructuring of the S. Carlo social centre; creation of a house of associations, requalification of green areas b. integrated tourist offer system: signals; integration of services; requalification of welcoming points; calendarization of events.

8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN DETAILED SCHEDULES

	<p>c. congress offer system: total functionalization of S. Nicolò</p> <p>d. markets and services system: realization of the natural shopping mall; creation of a system for the mobility of goods that relieves downtown congestion; return of public services in the downtown.</p> <p>e. knowledge and high formation system: realization of a network of all cultural actors and of intellectuals, that allows for turning such system into a distinctive feature of the city.</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoleto Territory</i>	
Objective 22	ENHANCEMENT OF THE ENVIRONMENT AND THE NATURAL AND HUMAN-AFFECTED LANDSCAPE FOR ECONOMIC PURPOSES
Project 22.1	Franciscan Itinerary – Olive Grove Path
Actions ONGOING	 <p>The Via Francigena was inaugurated in Assisi on 21 September, 2008. Region Umbria has participated with its own stand to Josp Fest, the Journey of the Spirit Festival, the first international festival dedicated to the “journeys” of the spirit. Conceived and organized by Opera Romana Pellegrinaggi, organ of the Holy See, Josp Fest is an innovative event that aims at “celebrating” the pilgrims and involving all those who wish to “start their own journey”, stimulating them and contributing to their spiritual growth.</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoleto Territory</i>	
Objective 22	STRENGTHENING OF THE ACTIVITIES OF INFORMATION WELCOMING AND PROMOTION
Project 22.2	Urban route on the theme of Longobard culture with final tasting of gastronomic products
Actions ONGOING	Two urban itineraries on the theme of Longobard culture were realized. Agreements with private subjects are being defined, to insert the tasting of gastronomic products deriving from the Longobards, into such itineraries.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoleto Territory</i>	
Objective 23	ENHANCEMENT OF EXCELLENCE AGRI-FOOD TYPICAL PRODUCTS FOR ECONOMIC PURPOSES
Project 23.1	Development initiative of agricultural-productive and food and wine quality sectors “SPOLETO TIPICA”
Actions ONGOING	An Agreement was signed with category associations and private subjects, for the realization of the integrated project “Spoleto Tipica”, in the frame of the second generation, complex urban programme “Spoleto Piazza delle Eccellenze”. A plan of development and urban marketing is being implemented. Resources were asked, for the implementation of the project, including requests to the EU – Leader measures, inside the local development plan 2007-2013 “Le Valli di Qualità” of GAL Valle Umbra e Sibillini.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Spoleto Territory</i>	
Objective 24	INTEGRATED PROMOTION OF THE TERRITORY AND PRODUCTS IN THEIR TOURIST-ENVIRONMENTAL-CULTURAL ASPECTS
Project 24.1	Recovery and reutilization of traditional methods and products
<p>Actions COMPLETED YEARLY SCHEDULED</p>	<p>Important initiatives were realized, aiming at the valorization and promotion of typical food and agriculture of excellence, as per management plan. The whole month of November, 2009, was dedicated to the third edition of "Spoleto Tipica" (exhibitions, tastings, guided visits, labs of taste, performances, animation and conventions). The tourist and cultural offer, joint with the quality enogastronomic one, through the promotion of local produce, has involved the whole historical centre and was enriched by the presentation of five new urban trekking itineraries, by the visits to the museum with the Art Shuttle, and by the "XV Mostra Convegno di Micologia delle Erbe e dei Frutti Spontanei".</p> <p>There will be many side events, from the photographic exhibition on chestnut growing, organized by the Consorzio Produttori Castagna Umbra (Co.P.Ca.U.), to the Mercato delle Briciole which always takes place on Sunday once a month in the historical centre, to the "Open Oil-Mills" initiative, with guided tours and free visits to local oil-mills.</p> <p>Attendance of visitors and tourists, on the week-ends of the event, was rather high. The research on the preparation of typical dishes and products, previously identified in the working plan, particularly regarding the "Attorta", a cake by the Longobard origins, has ended. For each of the selected products (Attorta, Strangozzi, Pane di Strettura, Crescionda and Sparteccchie) a file was arranged, through adequate investigation on the passed-on preparation methods.</p> <p>A path of historical research is being arranged, with the aim of producing regulations on the products of local tradition, to whom an umbrella-trademark (project objective) will be attributed, finalized at the valorization and development of the sector.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p><i>Attorta</i></p> </div> <div style="text-align: center;">  <p><i>Crescionda</i></p> </div> </div>

DETAILED SCHEDULES**

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 25	URBAN INTERVENTIONS TO INCREASE TOURIST STAYS
Project 25.3	Quality improvement of towns and roads
Description NEW COMPLETED 	<p>During the last year, the Municipal Authorities planned and implemented new public works aimed at urban, landscape and environmental requalification of the whole municipal territory and, in particular, the village of Pissignano, which is adjacent to the buffer zone and where every first Sunday of the month the most important Antiques, Second Hand and Collectors' Market of central Italy takes place. Actions to improve the urban and architectural arrangement have been taken by requalifying existing assets, especially with reference to squares, public lavatories and tourist info points. Where required, the most suitable traditional materials were selected to repave some areas, stonewalls were reconstructed and green areas were rearranged.</p>  <p align="center"><i>Church of S. Michele Arcangelo</i></p>
Parties involved	Municipality of Campello sul Clitunno Regional Authority Umbria
Actions	<ol style="list-style-type: none"> 1. Restoration of pavements and walls along the perimeter of the square in front of the Church of San Michele Arcangelo; 2. Requalification of the green areas in the square of Pissignano: setting up of an irrigation system, delimitation with fences, grassing, setting up of an equipped playground for children and resting areas. 3. Replacement of the ancient spring; 4. Restoration of public lavatories
Phases and timeframe	2009
Financial resources	<p>These actions were funded by the Municipality of Campello and the Regional Authority Umbria.</p> <p>With reference to the square in front of the Church of San Michele, about € 22,000 drawn from the wider <i>Requalification Project for Municipal Roads</i> were used. For the works carried out on the main square of the town, about € 28,000 were allocated.</p>
Expected results	Improvement in quality and fruition of the territory
Result indicators	Number of implemented actions (4) and number of rearranged areas Number of new economic operators settled in the area

Objective 26	OPTIMISATION OF THE TOURIST ENTERPRISES IN THE TERRITORY
Project 26.1 C	Realisation of new complexes for hospitality and cultural initiatives
Description ONGOING	<p>Thanks to D.G.R. 1036/2005, for Tourism, Culture and Environment Development Plan, it was possible to introduce a project related to the recovery of a private building damaged by the seismic event of 1997, used for commercial purposes. The complex lies within the Buffer Zone, just above river Clitunno, and is characterised by the presence of a smokestack that reveals its previous function as a factory for the working of olive residues.</p> <p>Following a reorganization of the wide internal spaces and maintaining the overall volumes, the building will serve as commercial activity, tourist-welcoming facility, through the realization of a small shop that will also organize tastings of typical products. Eleven small apartments will be used as houses for holidays. The works are presently going on.</p>  <p align="center"><i>Project: external view</i></p>
Parties involved	Private partners

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Campello sul Clitunno Territory</i>	
Objective 26	OPTIMISATION OF THE TOURIST ENTERPRISES IN THE TERRITORY
Project 26.2	Realisation of tourist services in the territory and realisation of public structures serving visitors to the territory
Description NEW	<p>The Municipality of Campello sul Clitunno started actions to set up a Tourist Hospitality Centre to promote the territory and its products in a large venue close to Via Flaminia. The site selected to this end is located at the core of the municipal territory, few meters away from the cycling track, the equipped green track and sports facilities.</p> <p>It is connected with the main road axes and served by a large parking area, which can be also used by campers.</p> <p>Also thanks to its key position in the valley of Umbria, this site is an ideal location for facilities aimed at widening the tourist offer from both the point of view of enhancement of the natural environment and its resources and the promotion of tourist and cultural initiatives.</p>
 <p align="center"><i>External view</i></p>	
Actions COMPLETED ONGOING	<ol style="list-style-type: none"> 1. Study and design of the new facility 2. Infilling works, plants and finishing 3. Setting up
Parties involved	Municipality of Campello sul Clitunno Regional Authority Umbria
Phases and timeframe	2010

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 28	IMPROVE MOBILITY AND ACCESS TO THE HISTORICAL CENTRE
Project 28.1	Completion and adaptation of the traffic plan; updating of the parking plan; realisation of tourist transport services
Actions ONGOING	The Administration has assigned the draft of a study on the mobility to the Università del Sannio. The study is introductory to the completion and adjustment of the traffic plan, the update of the parking plan and the realization of a tourist transport service.
Financial resources	First phase: to be realized with APQ "local development" funds, related to a feasibility study of the historical centre of Benevento. Second phase: Funds from POR FESR Region Campania 2007-2013.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 29	VALORISE CULTURE AS AN ENDOGENOUS ENGINE OF DEVELOPMENT
Project 29.1	Insertion of Benevento in the Artec card Campania circuit
Actions ONGOING	A museum network connecting all exhibiting structures in the province is already operative. It will be possible to include in such network the system " Campania Artec card "
Financial resources	€ 450.000,00 for three years, ordinary funds of the Province of Benevento

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 29	VALORISE CULTURE AS AN ENDOGENOUS ENGINE OF DEVELOPMENT
Project 29.2	Projecting and realization of urban videosurveillance systems
Description NEW	<p>In urban environment, following the exponential progress of IT, it is evident how videosurveillance systems, allowed for by the funds that the EU allocated for the operative programme "Security for the Development of Southern Italy", are effective. An effective and technologically advanced system can satisfy a number of needs, yet its first aim is being a valid deterrent against the city's Cultural Assets-targeted acts of vandalism.</p> <p>Realization of a domotic plant based on a BAS (Building Automation System) that allows for the system's components to talk to each other, while guaranteeing integrated management of the videosurveillance, anti-theft and anti-intrusion plants.</p> <p>The choice of such technology allows for introducing control on the whole buffer zone and its architectural sites in a virtual circuit, without materially intervening, thus avoiding invasive actions on the goods, with remarkable energy saving.</p> <p>Network surveillance, which will first interest the major city monuments and the archaeological areas already usable along Corso Garibaldi and the Longobard Walls, will be then extended to further significant areas in the historical centre of Benevento, as they are becoming usable. In particular, the most significant evidences of re-use in the Early Middle Ages and in the Middle Ages inside the historical urban fabric, will be object of videosurveillance.</p> <p>It will be possible that the system's operative electronic control unit be directly managed by the City's administration, through by-call activation of the Police or through multiple access options by the local Police and the Fire Brigade.</p> <p>In the frame of PAU, a regulation tool will be defined for the use of the assets, shared by the competent bodies, stating characteristics and modalities of the availability of public access, the possible managing forms and the features of services to be provided for within PAU.</p> <p>The action flanks the contemporary implementation of archaeological excavation sites and their arrangement for tourism and culture use, establishing the bases for the definition of a true reorganization and use of the very areas.</p>
Parties involved	Superintendency for Archaeological Assets of Salerno and Benevento Superintendency BAPPSAE of Caserta and Benevento State Archives Commune of Benevento Province of Benevento Region Campania Other stakeholders (Artsannio, Fondazione Città Spettacolo, Curia Arcivescovile; Unisannio, EPT, Chamber of Commerce, Associations).
Estimated phases and time frame	2009-2010
Financial resources	To be found: POR FESR Region Campania 2007-2013

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

Expected results	Major control on the actions to be taken for the protection and management of the Unesco heritage and of the assets in the communal territory. Creation of a model of reference for the PAU implementation actions, also to be exported to other territorial areas.
------------------	---

SOCIO ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 29	RAISING THE CONSERVATION STATUS AND REQUALIFICATION OF ANCIENT CITY CENTRUM
Project 29.3	Plan for urban decorum
Description NEW	So far, requalification and valorisation of the historical centre of Benevento occurred through diffused conservation interventions and hygienic-functional adjustments of the real estates belonging to the Cultural Assets heritage. It is necessary to go on and strengthen the sense of such manoeuvre, also controlling the minor aspects that participate to the maintaining of a quality urban image
Actions	Draft of a document with communal validity that, once acquired the legislative prescriptions and guidelines on the matter, will define the basic rules: 1. For the control of perceptive quality of the urban context, through the specification of quality standards for the signposting, also commercial and private. The action will be done upon agreement with the commerce associations, to gather specific needs and questions, in particular regarding the regulation of standards that the activities in the buffer zon will have to stick to; 2. For the definition of performance and quality standard requirements for the installation of gazeboes, dehorces, waste baskets, sitting places, flowerpots, racks, noticeboards and so on.
Involved subjects	Commune of Benevento, Province of Benevento, Superintendency for Archaeological Assets of Salerno, Avellino and Benevento, Superintendency BAPPSAE of Caserta and Benevento, Region Campania
Estimated phases and time frame	2009-2010
Financial resources	To be found: POR FESR Region Campania 2007-2013
Expected results	To qualify the historical centre as an integration model between traditional cultural values and the issues of environmental sustainability and better livability of the urban environment.
Indicators	Adoption of the Regulations

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.1	Activation of training courses of operators for marketing of cultural asset
Actions ONGOING	A course in Economy and Management of Tourism Services is active by the Università del Sannio. The Commune of Benevento has planned to define an agreement with the said University, in order to create specialization courses for the formation of Marketing Operators for Cultural Assets, in the frame of the said course.
Financial resources	Ordinary funds of the Commune of Benevento and the Ministry for Scientific Research.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.2	Activation of training courses of experts for the creation of businesses in the tourist section

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.3	Activation of a master in organisation of events and congresses
Actions ONGOING	A course in Economy and Management of Tourism Services is active by the Università del Sannio. The Commune of Benevento has planned to define an agreement with the said University, in order to create specialization courses for the organization of events and congresses, in the frame of the said course.
Financial resources	Ordinary funds of the Commune of Benevento and the Ministry for Scientific Research

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Benevento Territory</i>	
Objective 31	ADAPT AND IMPROVE HUMAN RESOURCES FOR SUSTAINABLE VALORISATION OF CULTURAL ASSETS
Project 31.4	Activation of courses for training orientators and tourist guides
Actions ONGOING	A course in Economy and Management of Tourism Services is active by the Università del Sannio. The Commune of Benevento has planned to define an agreement with the said University, in order to create specialization courses for the formation of orientators and tourist guides, in the frame of the said course.
Financial resources	Ordinary funds of the Commune of Benevento and the Ministry for Scientific Research

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.1	Realisation of intermodal area with the creation of an overground railway through restarting the complementary Foggia – Handcraft-Industrial Zone of Macchia railway line and constructing a tourist arrival point
Actions ONGOING	<p>Within this project and as regards the creation of the tourist centre in the intermodal area on the 26th June 2008 the permit to build was issued. On the 20th December 2008 the first stone of the object was laid. Up to now the eastern dock was built.</p> 
Phases and timeframe	2011

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.2, 32.3, 32.4, 32.5	<p>32.2 Realisation of a route alternative to the section of the trunk road 272 Monte Sant'Angelo – San Giovanni Rotondo</p> <p>32.3 Implementation of consortium activities for the full utilisation of the Gino Lisa airport of Foggia as a favoured airport for tourist flows of foreign origin</p> <p>32.4 Completion of the high-speed roadway network of Gargano in the section Mattinata – Vieste and internal road of connection with the trunk road 272 Monte Sant'Angelo-San Giovanni Rotondo</p> <p>32.5 Realization of the Macchia Madonna delle Grazie – Historic Centre of Monte Sant'Angelo cableway</p>
Actions ONGOING	<p>The long term macro-projects for the creation of fundamental infrastructures for the development of tourism in the area see the Monte Sant'Angelo Municipality as an active part in the cooperation with public institutions, which are the stakeholders of the candidature (Foggia Province, Regione Puglia), and with other public, economic and private bodies and subjects.</p> <p>All the four macro-projects have reached an advanced elaboration phase.</p>
Phases and timeframe	In 2010 the start of the various executive projects for the progress lots is envisaged

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.6	Interventions of improvement on the road network
Actions ONGOING	<p>Operations to access financing from the EU funds 2007-2013 are being carried out. Within the framework of the wider area "Capitanata 2020", the Province of Foggia (which manages the already available European funds) is defining the assignment of the single projects. In this way an intervention for the restoration and the valorisation of the historical centre of Monte Sant'Angelo was planned through the creation of a suitable parking area as a terminal of the <i>Via Sacra Langobardorum</i>.</p> <p>1. Executive projecting assignment</p>
Phases and timeframe	2010

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 32	IMPROVEMENT OF ACCESSIBILITY TO THE HERITAGE
Project 32.7	Improvement of road signs
Actions ONGOING	As per programme, relations with ANAS and the Province of Foggia are being defined, for the signature of an agreement for the improvement of the road signals and advertisement installation on the road network of the territory. The operative phase needs to wait for the definition of the logo and the mapping of the territory for the installation of the signs.
Phases and timeframe	2010-2012

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 33	IMPLEMENTATION OF TOURIST STAYS
Project 33.1	Preparation of differentiated tourist "packages" and offers
Actions ONGOING	The Administration started talks with the Tourism Promotion Agency, the Association of Tourism Operators of Region Puglia and other category associations, in order to start synergic strategies in the field of tourism promotion through international sector fairs. In 2008 Monte Sant'Angelo – Italia Langobardorum attended the BIT In Milan, hosted at the stands of Region Puglia and Gargano National Park. Attendance for 2009 has been confirmed. In January, 2009, Monte Sant'Angelo, along with the Province of Foggia, attended Josp Fest in Rome, an international fair dedicated to religious and cultural itineraries. Agreements are being defined with major international tour operators and those in the Gargano area, to produce a range of tourist offers for the BIT Milan, 2010.

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 33	IMPLEMENTATION OF TOURIST STAYS
Project 33.2	Structuring of a plan to incentivate the creation of a receptive system
Actions ONGOING	In such sector, two fronts are being faced with: <ol style="list-style-type: none"> 1. a census of private dwellings in the buffer zone is taking place, which are uninhabited and/or in a serious state of maintenance because of their being split into various particles, in order to arrange for a plan of recovery through public contributions, provided that they will be available for the tourist market for no less than 20 years, following forms of direct management by the owners or through agencies specialized in the sector. 2. in order to increase the value of the Buffer Zone and stimulate investments by economic operators, works for the total recovery of the Complex of Clarisse Nuns were completed; the Complex will be a polyvalent cultural container, to constitute a qualified and equipped reference point for the hospitality system of the city and of the Gargano District, for conventions and high level events. So far, the complex includes <ul style="list-style-type: none"> o the public library; o the library of the Michaelic and Garganic Study Centre; o the seat of the Michaelic and Garganic Study Centre; o a multimedial hall featuring 20 computers; o 3 conference halls equipped with projecting device and amplification plant; o 1 hall equipped for videoconference; o an auditorium seating 200, provided for with any professional equipment serving for conferences, projections, concerts and small theatre events; o professional equipment for the occasional use of the cloyster for concerts, theatre events, projections; o internet wi – fi, covering all inner spaces of the complex, the cloyster and part of the Buffer Zone, within a ray of 500 Metres about.

**8.5 SOCIO-ECONOMIC DEVELOPMENT PLAN
DETAILED SCHEDULES**

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 34	DEVELOPMENT AND OPTIMISATION OF THE URBAN PRODUCTIVE SYSTEM
Project 34.1	Realisation of P.R.G. forecasts in relation to the areas destined for craftsmanship production in the periurban area and relaunch of productive and new entrepreneurial activities
Actions ONGOING	<p>So far, what included in the file has been respected; officina are being completed, as well as the primary and secondary urbanization works of the Stinchitiello artisans area. A public-private association has been established, for the realization of an Industrial Area in Santa Croce.</p> <p>Consulting started with the faculties of Economy at the Universities of Bari and Foggia, for the arrangement of formative paths for entrepreneurs and to start an office addressing to young entrepreneurs, to support job creation activities, also through formative initiative aiming at tutoring new firms in their start-up phases.</p> <p>Assistance to entrepreneurs for the access to European funds and to any other source of financing will be greatly stressed, for the firms to establish re-launch opportunities and development of the local economic system.</p>

SOCIO-ECONOMIC DEVELOPMENT PLAN <i>Monte Sant'Angelo Territory</i>	
Objective 35	REQUALIFICATION AND RELAUNCH OF ENDOGENOUS RESOURCES IN THE TERRITORY
Project 35.1	Safe guard agro-food traditions and their use for the economic relaunch of innovative productions of quality
Actions ONGOING	<p><i>Phase A</i></p> <p>The preliminary phase of investigation on the territory, that will later be directly followed by operators identified on purpose, is being arranged in collaboration with the Universities of Bari and Foggia.</p> <p>1. Database definition</p>
Phases and timeframe	<i>Phase A - 2010</i>

Our Ref. GB/MA 1318

Paris, 13 December 2010

World Heritage List: The Longobards in Italy. Places of the power (568-774 A. D.) (Italy) – Additional information

Dear Sir,

ICOMOS is currently assessing the nomination of "The Longobards in Italy. Places of the power (568-774 A. D.)" as a World Heritage Site and we thank you for the additional information we received on 8 November 2010.

As part of our evaluation process, the ICOMOS World Heritage Panel has now reviewed this nomination and identified a few areas where it considers that further information is needed.

We would be pleased if the State Party could consider the following points and additional information related to the specific nominated property of Spolète:

- 1 Reconsider the buffer zone, so as not to reduce its size to the east and south-east of the property, compared with the nomination examined in 2009. It would seem desirable to maintain the initial buffer zone in this part, which is immediately adjacent to the property.
- 2 Reconsider the allocation of the square alongside the Basilica of San Salvatore, which is currently used as a parking area, detracting from the visual expression of the property.
- 3 Clarify the question of the visual impact of the projected underground car park, and its stairways, which are not far from the property.
- 4 Confirm the setting up of a fire protection system at the Basilica of San Salvatore.

We look forward to your responses to these points which will be of great help in our evaluation process.

ICOMOS has no obligation to contact States Parties during the evaluation process. However, with a view to being as transparent as possible, ICOMOS has agreed to approach States Parties in specific cases. This does not prejudice the ICOMOS recommendation on the nomination and should be considered as preliminary information. It also does not prejudice the World Heritage Committee's decision.

We would be grateful if you could provide ICOMOS and the World Heritage Centre with the above information by **Monday 28 February 2010**.

We thank you in advance for your kind cooperation.

Regina Durighello
Director
World Heritage Programme

RAPPRESENTANZA
PERMANENTE D'ITALIA
PRESSO L'U.N.E.S.C.O
L'AMBASCIATORE

Prot. 193

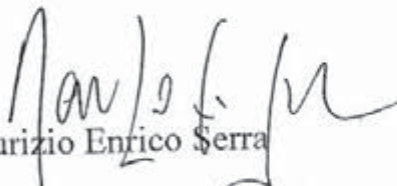

Paris, 28 FEB. 2011

Subject: Additional information about "The Longobards in Italy.
Places of the power (568-774 A.D.)"

Dear Director,

with reference to your communication of December 13, 2010 (GB/MA 1318), I am pleased to enclose to this letter the additional information about the site "The Longobards in Italy. Places of the power (568-774 A.D.)". This is provided by the Italian Ministry of Cultural Heritage and Activities and is related to the specific nominated property of Spolète.

Please accept, dear Director, my best regards,

Maurizio Enrico Serra

Mrs Regina Durighello
Director
World Heritage Programme
ICOMOS

Copy to UNESCO World Heritage Centre, Paris

THE LONGOBARDS IN ITALY.

Places of the Power (568-774 a.D.)

additional information

In reference to the ICOMOS note GB/MA 1318, the City Administration of Spoleto, with Council decision # 32/2011 has disposed to accept and integrate the requests contained therein.

1. Reconsider the buffer zone, so as not to reduce its size to the east and south-east of the property, compared with the nomination examined in 2009. It would seem desirable to maintain the initial buffer zone in this part, which is immediately adjacent to the property.

As for the request to modify the buffer zone, the invitation is accepted and we send updated tables of Spoleto, see attachment B, related to:

Tab. 1 - Boundaries of the nominated property and its buffer zone – MAP;

Tab. 2 - Boundaries of the nominated property and its buffer zone – Aerial photo;

Tab. 3.1 - Administrative arrangements and special legal protections from which the property and its buffer zone benefit;

Tab. 3.2 - Administrative arrangements and special legal protections from which the property and its buffer zone benefit.

The serial nomination table is also updated, including the new surfaces.

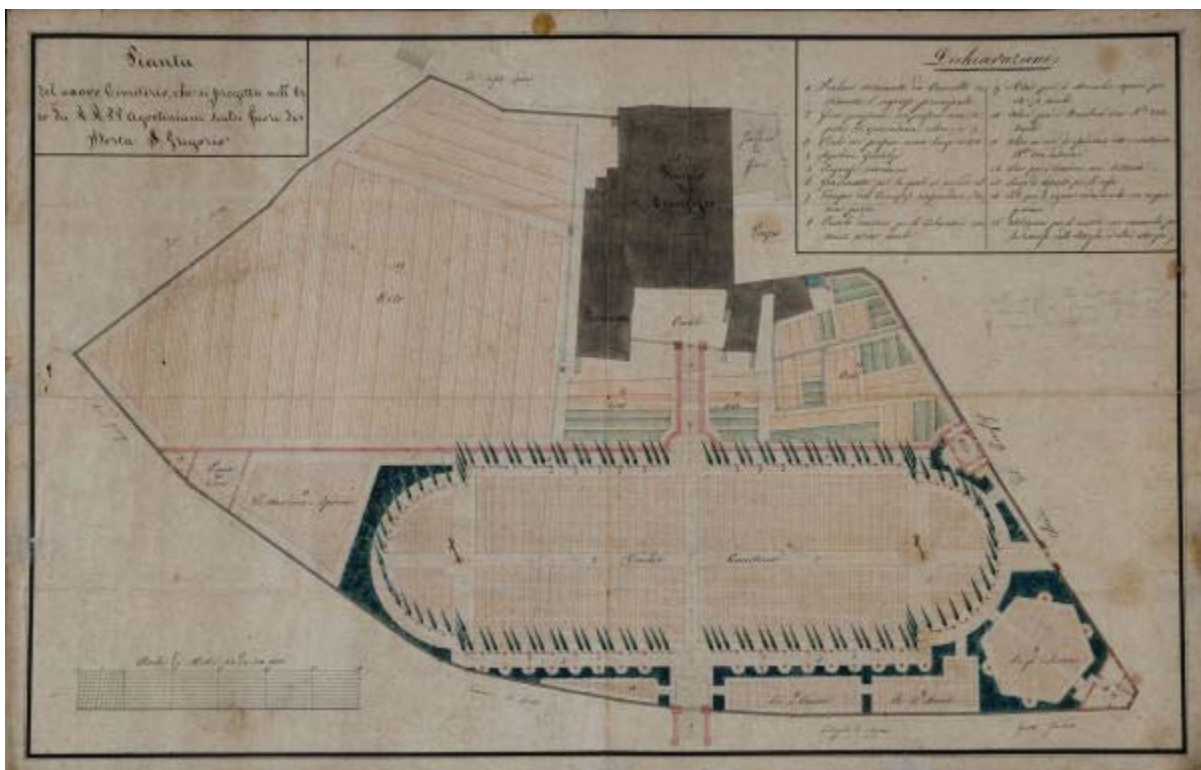

SERIAL NOMINATION TABLE FOR: **THE LONGOBARDS IN ITALY. PLACES OF THE POWER (568-774 A. D.)**

Site element No.	Name	Municipality Region Province	Coordinates of Centre point	Area of core zone (ha)	Buffer zone (ha)	Total (ha)	Map annex
1	The Gastaldaga area and the Episcopal complex	Cividale del Friuli Friuli Venezia Giulia (Province of Udine)	46° 05' 39" N 13° 25' 59" E	1,09	20,83	21,92	1, 2, 3, 4
2	The monumental area with the monastic complex of San Salvatore-Santa Giulia	Brescia Lombardia (Province of Brescia)	45° 31' 59" N 10° 14' 06" E	3,75	84,13	87,88	1, 2, 3, 4
3	The <i>castrum</i> with the Torba Tower and the church outside the walls, Santa Maria <i>foris portas</i>	Castelseprio – Torba Gornate Olona Lombardia (Province of Varese)	45° 00' 06" N 9° 27' 11" E	8,50	38,75	47,25	1, 2, 3, 4
4	The basilica of San Salvatore	Spoleto Umbria (Province of Perugia)	42° 44' 31" N 12° 44' 36" E	0,08	66,85	66,93	1, 2, 3, 4
5	The Cilitunno Tempioletto	Campello sul Cilitunno Umbria (Province of Perugia)	42° 50' 32" N 12° 45' 25" E	0,01	51,28	51,29	1, 2, 3, 4
6	The Santa Sofia complex	Benevento Campania (Province of Benevento)	41° 07' 50" N 14° 46' 53" E	0,34	27,56	27,90	1, 2, 3
7	The Sanctuary of San Michele	Monte Sant'Angelo Puglia (Province of Foggia)	41° 42' 30" N 15° 57' 15" E	0,31	16,82	17,13	1, 2, 3
	The Longobards in Italy. Places of the power (568-774 d.C.)		TOTAL	14,08	306,22	320,30	

As for the protection measures, it is not necessary to send further information because the scheduled measures for the protection of the area added to the east and south-east coincide with those included in the previous perimeter.

2. Reconsider the allocation of the square alongside the Basilica of San Salvatore, which is currently used as a parking area, detracting from the visual expression of the property.

In the frame of the revision project of the UNESCO nomination, the Culture and Tourism Dept. of the City of Spoleto, as it receives the recommendations contained in the ICOMOS relation of 2009, with manager's decree # 2096/2009, has entrusted the Architecture Studio Fabiani e Rosati in Spoleto with a propaedeutic study to the preliminary projecting concerning the area of the basilica of San Salvatore. The historical-architectural-landscape and technical-illustrative relation connected with such study was presented and given to the ICOMOS inspector, dr. A. Boschetti, on the occasion of his inspective visit. The study was inspired by the first project of the cemetery, realized by architect Ireneo Aleandri in 1836. Aleandri, as it can be seen in his project which is attached, aware of the architectural quality of san Salvatore, valorized it as scenographic background and strengthened its monumental image by positioning the cemetery's main entrance on its south-western side, in line with the basilica's prospect.

Plant of the new cemetery of Spoleto, Ireneo Aleandri 1836

Architects Fabiani and Rosati, inspired by Aleandri's project, with an eye on the urban planning and on the ongoing projects on Spoleto's historical centre, propose in particular:

- to realize a new parking lot nearby;

- to open a new pedestrian entrance on the south-western perimeter wall;
- to rearrange the pedestrian connection to the cemeterial area by restructuring the underpass that allows for crossing the A-road;
- new areas for the flower kiosks (presently they are along via della basilica) and other cemeterial services as well;
- the destination of the former Convento del Crocifisso;
- the paving of Piazza Salmi;
- the re-paving of the basilica's parvise;
- the restoration of the perimeter wall;
- the regulation of the chutes in via della Basilica and widening of the street;
- the rearrangement of the green, with particular attention to the sights towards the Basilica.

In particular, in the preliminary study to eliminate the present parking lot in Piazza Salmi and the passage of cars along the street that climbs up towards the square (via della Basilica), an area which is south/south-west of the cemetery has been identified, in the direction of the Via Flaminia, where a new parking lot can be realized. The re-paving of Piazza Salmi is also scheduled, in bricks and cobblestones, following local traditional techniques. In the square, lined by flowerpots, three car spaces for disabled people will remain anyway, on the most distant side away from the Basilica.

In this regard, the need for maintaining such three spaces destined for disabled people, derives from the presence of a number of physical obstacles, gaps and stairs, preventing access to the building by the disabled; such presence is both inside the cemetery and on the route towards the basilica and their overcoming would imply works by the strong architectural and aesthetic impact. The new project integrates with that already realized and partially started, related to the restoration and requalification of the former Convento del Crocifisso (see MP2 Protection and Conservation Plan ob. 21.1 and Enhancement Plan ob. 27.3), that includes the realization of a bookshop, library, infopoint, study and didactic halls, and exhibition spaces, with services for visitors, scholars, students.

See attachment B:

Tab. 4 - survey

Tab. 5 – photographic survey

Tab. 6 – planimetry of the projecting interventions

Tab. 7a – parvise and Piazza Salmi flooring

Tab. 7b – parvise of Piazza Salmi: photo montage

Tab. 8 – bookshop and info-point

Tab. 9 – coach parking

Piazza Salmi, Basilica of San Salvatore

3. Clarify the question of the visual impact of the projected underground car park, and its stairways, which are not far from the property.

The new parking lot serving the cemetery and the Basilica will be realized in a ground depression to the south-west, already occupied by an olive grove that won't be eradicated. As it appears evident from the sections and rendering prepared on purpose, the gap between the new parking lot and the basilica (16 Meters) and the presence of the olive trees will make the parking lot scarcely visible, thus leaving the sights of the basilica from Via Flaminia and from the basilica itself towards the town untouched. Along the south-western perimeter wall a new pedestrian entrance will be opened to both cemetery and basilica, with stairs which will reproduce Aleandri's project and a ramp to overcome obstacles preventing access to the disabled. This new entrance will restore the frontal sight of the basilica of San Salvatore from the city.

See attachment B:

Tab. 10a – new entrance to the cemeterial complex: section AA'

Tab. 10b – new entrance to the cemeterial complex: section AA'

Tab. 10c – new entrance to the cemeterial complex: section AA'

Tab. 11a – new entrance to the cemeterial complex: photo montage

Tab. 11b – new entrance to the cemeterial complex: photo montage

4. Confirm the setting up of a fire protection system at the Basilica di San Salvatore.

In relation to the ICOMOS request of providing the Basilica of San Salvatore with an anti-fire system, the City Administration, in spite of the (attachment A) certification, drawn by Studio Tecnico Associato GMG in Spoleto, which states that the fire risk inside the basilica is null, also in sight of an increase of tourist visits, is anyway about to provide the church with a plant for smoke detection.

The system will include four detectors of linear type, by reflection, positioned in the three naves at the level of the covering; a switchboard for fire detection, two optical-acoustic plates to signal fires, a manual fire alarm button and a telephone dialer that will automatically call a series of pre-determined numbers, among which the Fire Brigade of Spoleto, one airline kilometer away, to timely give notice of a prospective start of a fire.

The plant will be realized under UNI regulations 9795, with a cable by the mineral isolation respecting rules IEC 702, CEI 20-39/1-2, CEI 20/36-37 with an exercise tension up to 750 V, so that the plant will have a minor impact, considering the environment in which it will be installed.

As active measure of fire prevention, the Culture and Tourism Dept. has ordered the competent administration's offices to install 3 fire extinguishers, homologated under Ministerial Decree of 20 December 1982, with an extinguishing capacity not lower than 34 A 233 B,C; there will be a fire extinguisher every 200 sq. Meters of floor. They will be placed close to the entrances, in an easily accessible and visible position, and signs will be placed to highlight them, also from a distance.

However, we underline that:

- the basilica of San Salvatore is inside the cemetery of Spoleto
- the cemetery's guardian lives in the building right next to the basilica and vigilates 24/7;
- if needed, the guardian can immediately alert the Fire Brigade, whose station is less than one airline kilometer away;
- the *buffer zone* (see MP2, paragraph 5b4, related to the protection) is also protected by the landscape bond. The area's biotic and landscape components represent an interacting and interconnected system, geographically adjoining and in ecologic continuity with the site Natura 2000 (SIC – site of communitarian interest identified by the Eu) IT5210064 "Monteluco di Spoleto". For this reason, the area of the basilica is included in the Emergency Plans of the naturalistic site.

THE LONGOBARDS IN ITALY.

Places of the Power (568-774 a.D.)

ATTACHMENT A

Certification

Comune di Spoleto
Direzione Cultura e Turismo
Piazza della Libertà, 7
06049 Spoleto (PG)

Il giorno 16 Febbraio 2011, il sottoscritto, Per. Ind. Giampaolo Pannuzzi, iscritto al Collegio dei periti Industriali e dei Periti Industriali Laureati della Provincia di Perugia, su incarico della Direzione Cultura e Turismo del Comune di Spoleto, si è recato presso la Basilica di S. Salvatore, per valutare il carico di incendio presente all'interno.

- Da un esame a vista della struttura, si è potuto constatare che all'interno della basilica non sono presenti materiali di arredo o altri materiali che potrebbero dare origine a principi di incendio.

L'unico materiale ligneo presente, è quello della orditura del tetto, da ciò ne consegue che il carico di incendio, è praticamente nullo.

Il valore nominale del carico d'incendio specifico, è stato calcolato con il metodo previsto dal D.M. 9 marzo 2007, considerando i quantitativi di materiale combustibile presente all'interno dei locali, il fattore di partecipazione alla combustione di ciascun materiale combustibile ed il fattore di limitazione della partecipazione alla combustione per ogni materiale combustibile presente.

Allo stato attuale all'interno della basilica vengono officiate solo funzioni religiose e non viene effettuata nessun altro tipo di attività riconducibile ad attività di pubblico spettacolo, ricadenti nel campo di applicazione del D.M. 19.08.96 (Approvazione della regola tecnica di prevenzione incendi per la progettazione, costruzione ed esercizio dei locali di intrattenimento e di pubblico spettacolo).

La stesa basilica, vista l'attuale destinazione d'uso, non rientra nell'elenco degli edifici pregevoli per arte o storia, soggetti al controllo dei Vigili del Fuoco (attività n.90 del D.M. 16.02.1982), destinati a contenere biblioteche, archivi, musei, gallerie, collezioni o comunque oggetti di interesse culturale sottoposti alla vigilanza dello Stato di cui al R.D. 7 novembre 1942, n.1564.

L'impianto elettrico all'interno della basilica, è molto scarno, pertanto, ai fini della prevenzione incendi e per la sua conformazione, non costituirà causa primaria di incendio o di esplosione o via privilegiata alla propagazione di eventuali incendi.

Inoltre, la struttura è costantemente monitorata dal custode del cimitero, che risiede nell'edificio attiguo.

Da quanto sopra esposto e secondo le normative di riferimento, per la struttura in oggetto non è necessario prevedere nessuna protezione passiva contro l'incendio.

Tanto si doveva per l'incarico ricevuto.

Spoletto, 23.02.2011

Il tecnico

Per. Ind. Giampaolo Pannuzzi

Comune di Spoleto
Direzione Cultura e Turismo
Piazza della Libertà, 7
06049 Spoleto (PG)

On 16 February 2011, the engineering technician Giampaolo Panuzzi, member of the College of Engineering Technicians and enrolled in the list of engineering technicians by the Province of Perugia, thus commissioned by the Culture and Tourism Dept. of the City of Spoleto, went to the Basilica of San Salvatore to estimate the fire risk inside the basilica. From a sight survey, it emerges that inside the Basilica of San Salvatore in Spoleto there are no furnishings or other materials that may originate a start of fire.

The only present wood material is the roof's supporting structure, hence the risk of fire is in practice absent.

Attachment A – Spoleto, certification

The nominal value of the specific fire risk has been calculated through the method under Ministerial Decree 9 March 2007, considering the quantities of inflammable materials present inside the spaces, the factor of the participation to combustion for each inflammable material and the factor of limitation to combustion for each inflammable material present.

Presently, only religious functions are held inside the basilica and no other kind of activity takes place there, that can be reconducted to activities of public performances as ruled by Ministerial Decree 19 August 1996 (Approval of the technical rules of fire prevention for the projecting, construction and exercise of buildings destined for entertainment and public shows).

The basilica itself, given the present destination of usage, is not included in the list of buildings which are valuable for history or art, subject to the control by the Fire Brigade (activity # 90 of Ministerial Decree 16 February 1982), destined for hosting libraries, archives, museums, galleries, collection or whatsoever object of cultural interest that undergo State surveillance, of which under Royal Decree # 1564 of 7 November 1942.

The electrical plant inside the basilica is very basic, therefore, in the light of fire prevention and because of its nature and characteristics it cannot be the primary cause of fire or explosions, nor can it be a privileged way of perspective fire propagation.

Besides, the structure is constantly monitored by the cemetery's guardian, who lives in the adjoining building. Because of what explained above and under the present law regulations, the structure does not need any passive protection against fires.

Spoletto, 23.02.2011

**Objet : Inscription d'un bien sur la Liste du patrimoine mondial
Les Lombards en Italie. Lieux de pouvoir (568-774 après J.C.)
(C 1318) Italie**

Monsieur l'Ambassadeur,

J'ai le plaisir de vous informer que le Comité du patrimoine mondial, lors de sa 35e session (UNESCO, 19 - 29 juin 2011), a examiné la proposition d'inscription des ***Les Lombards en Italie. Lieux de pouvoir (568-774 après J.C.)*** et a décidé d'**inscrire** ce bien sur la Liste du patrimoine mondial. Veuillez trouver ci-joint la décision du Comité concernant cette inscription.

Je suis certain que votre Gouvernement continuera de prendre les mesures nécessaires à la conservation de ce nouveau bien du patrimoine mondial. Le Comité du patrimoine mondial et son Secrétariat, le Centre du patrimoine mondial, feront tout leur possible pour collaborer avec vous dans ce sens.

Les Orientations devant guider la mise en œuvre de la Convention du patrimoine mondial (paragraphe 168), demandent au Secrétariat d'envoyer à chaque Etat partie disposant d'un nouveau bien inscrit une carte de la ou des zone(s) inscrite(s). Veuillez examiner la carte ci-jointe ainsi que le tableau d'inscription et nous informer de toute erreur éventuelle dans ces informations avant le **1er décembre 2011**.

L'inscription d'un bien sur la Liste du patrimoine mondial est une excellente opportunité d'attirer l'attention des visiteurs, tout comme des résidents, sur la *Convention du patrimoine mondial* ainsi que sur la valeur universelle exceptionnelle du bien. A cet égard, vous souhaiterez peut-être apposer une plaque avec les emblèmes du patrimoine mondial et de l'UNESCO. Vous trouverez dans les *Orientations devant guider la mise en œuvre de la Convention du patrimoine mondial* des suggestions à cet effet.

Dans la plupart des cas, les Etats parties décident d'organiser une cérémonie d'inscription du bien sur la Liste du patrimoine mondial. Sur demande de l'Etat partie au Centre du patrimoine mondial, un Certificat peut être préparé pour cette occasion.

Par ailleurs, je vous serai très reconnaissant de me faire parvenir le nom, l'adresse, les numéros de téléphone et de fax, ainsi que le courriel de la personne ou de l'institution responsable de la gestion du site, ce qui nous

permettra de lui/leur envoyer les publications du patrimoine mondial ultérieurement.

Veillez trouver ci-dessous une brève description de votre site, préparée par l'ICOMOS et le Centre du patrimoine mondial, en français et en anglais. Ces descriptions étant amenées à être reprises par la suite dans des publications, ou sur le site Internet du Centre du patrimoine mondial, nous aimerions avoir votre plein accord sur les termes employés. Je vous prierai donc d'examiner ces descriptions, et de nous informer au plus tard le **1er décembre 2011** d'éventuels changements devant être apportés. Si nous ne recevons aucune contestation d'ici là, nous en concluons que vous approuvez le texte soumis.

De plus, comme vous le savez probablement, le Centre du patrimoine mondial possède un site Internet à l'adresse : <http://whc.unesco.org>, sur lequel on trouve des informations générales relatives aux biens du patrimoine mondial. Etant donné que nous ne pouvons fournir sur ce site qu'un nombre limité d'informations concernant chaque bien, nous essayons de relier nos pages avec celles provenant du site Internet de votre bien inscrit au patrimoine mondial ou de votre bureau, afin d'offrir au public des informations fiables et constamment mises à jour. Si vous possédez un site Internet pour le bien nouvellement inscrit, je vous remercie par avance de bien vouloir nous en transmettre l'adresse.

La liste complète des décisions adoptées par le Comité du patrimoine mondial lors de sa 35e session est disponible sur notre site Internet à <http://whc.unesco.org/fr/sessions/35COM>

Comme vous le savez, conformément au paragraphe 172 des *Orientations devant guider la mise en œuvre de la Convention du patrimoine mondial*, le Comité du patrimoine mondial invite les Etats parties à la *Convention* à l'informer, par l'intermédiaire du Centre du patrimoine mondial, de leurs intentions d'entreprendre ou d'autoriser, dans la zone protégée par la *Convention*, des restaurations importantes ou de nouvelles constructions, qui pourraient modifier la valeur universelle exceptionnelle du bien.

Je saisis cette opportunité pour vous remercier de la coopération de votre gouvernement dans la mise en œuvre de la *Convention du patrimoine mondial*, et vous prie d'agréer, Monsieur l'Ambassadeur, l'assurance de ma plus haute considération.

Extrait des Décisions adoptées par le Comité du patrimoine mondial lors de sa 35e session (Maison de l'UNESCO, 2011)

Décision : 35 COM 8B.33

Le Comité du patrimoine mondial,

1. Ayant examiné les documents WHC-11/35.COM/8B et WHC-11/35.COM/INF.8B1,
2. Inscrit **Les Lombards en Italie. Lieux de pouvoir (568-774 après J.-C.), Italie**, sur la Liste du patrimoine mondial sur la base des **critères (ii), (iii) et (vi)**.
3. Adopte la Déclaration de valeur universelle exceptionnelle suivante ;

Brève synthèse

Le bien en série représente la quintessence du patrimoine bâti et de l'art des Lombards subsistant aujourd'hui en Italie. Peuple d'origine germanique sédentarisé et christianisé, les Lombards assimilent les valeurs matérielles et culturelles que leur lègue le monde romain finissant. Également au contact des influences byzantines, hellénistiques et moyen-orientales, les Lombards effectuent une synthèse culturelle, architecturale et artistique unique, tant par sa diversité monumentale et stylistique que par ses différents usages civils et religieux. Il s'agit de l'une des racines majeures de la naissance du monde médiéval européen et de l'établissement de la chrétienté occidentale.

Critère (ii) : Les monuments lombards témoignent de façon exemplaire de la synthèse culturelle et artistique faite en Italie, du VI^e au VIII^e siècle, entre l'héritage romain, la spiritualité chrétienne, l'influence byzantine et des valeurs issues du monde germanique. Ils préparent et annoncent l'épanouissement culturel et artistique carolingien.

Critère (iii) : Les lieux de pouvoir lombards expriment de nouvelles formes artistiques et monumentales remarquables, témoignant d'une culture lombarde caractéristique du haut Moyen Âge européen. Elle se concrétise par un ensemble culturel bien identifié et unique, dont les langages et les objectifs multiples expriment le pouvoir des élites lombardes.

Critère (vi) : La place des Lombards et de leur héritage dans la structuration spirituelle et culturelle de la chrétienté médiévale européenne est très importante. Ils ont considérablement renforcé le mouvement monastique et contribué à l'instauration d'un lieu précurseur des grands pèlerinages, à Monte Sant'Angelo, avec la diffusion du culte de saint Michel. Ils ont également joué un rôle important dans la transmission des travaux littéraires, techniques, architecturaux, scientifiques, historiques et juridiques de l'Antiquité au monde européen naissant.

Intégrité

Les biens remplissent les conditions d'intégrité, en particulier pour la justification de la série. L'application de critères de sélection rigoureux a conduit à ne pas y inclure les anciennes capitales royales lombardes et à des délimitations strictes. Ils comprennent toutefois les éléments nécessaires à l'expression de la valeur universelle exceptionnelle de la

série, notamment par un état de conservation satisfaisant de ses composants.

Authenticité

Les conditions d'authenticité des éléments monumentaux, décoratifs et épigraphiques présentés sont satisfaisantes. Ils sont accompagnés d'une documentation architecturale, artistique, archéologique et historique approfondie qui justifie tant leur sélection que leur authenticité.

Mesures de protection et de gestion

Tous les biens bénéficient du plus haut niveau de protection légale, fixé par le décret législatif n° 42 du 22 janvier 2004 (Codice dei beni culturali e del paesaggio). Il s'agit d'un bien complexe dont nombre d'éléments importants sont intrinsèquement fragiles et délicats à conserver, comme les vestiges archéologiques, les peintures et les stucs. Toutefois, des mesures de conservation appropriées sont mises en place par l'État partie. Il existe un système de gestion propre à chacun des sept biens, comprenant des intervenants multiples et variables suivant les régimes de propriété. Le réseau associatif Italia Langobardorum s'est transformé en une autorité transversale propre à assurer l'harmonisation et le suivi de la série. Un ensemble très complet de projets sont inscrits au Plan de gestion. Il serait toutefois nécessaire de les hiérarchiser en fonction de la conservation durable des biens et l'expression environnementale de leur valeur exceptionnelle. Outre les risques naturels sismiques ou d'érosion fluviale liés à certains des sites, la pression du développement touristique pourrait menacer les composants du bien les plus sensibles à la présence humaine.

4. Recommande que l'État partie prenne en considération les points suivants :
 - a) porter une attention soutenue à la conservation des peintures murales et des éléments décoratifs en stuc les plus fragiles qui peuvent être menacés par une fréquentation touristique excessive ou mal contrôlée,
 - b) identifier, hiérarchiser, consolider financièrement et garantir sur le long terme les projets de conservation compris dans le Plan de gestion,
 - c) préciser, et éventuellement renforcer les personnels permanents de l'association Italia Langobardorum,
 - d) examiner la possibilité d'étendre la série aux vestiges lombards de Pavie.

Surface and coordinates of the property inscribed on the World Heritage List by the 35th session of the World Heritage Committee (UNESCO, 2011) in accordance with the *Operational Guidelines*.

Brève description en français

Ce site comprend sept groupes de bâtiments importants (avec des forteresses, des églises, des monastères, etc.) situés à Friuli, Brescia, Castelseprio, Spolète, Campello sul Clitunno, Bénévent, Monte Sant'Angelo. Ils témoignent des réalisations des Lombards, venus d'Europe du Nord pour s'implanter en Italie où ils ont développé une culture spécifique et dirigé de vastes territoires du VI^e au VIII^e siècle. La synthèse lombarde de plusieurs styles architecturaux marque la transition entre l'Antiquité et le Moyen Age européen ; elle s'appuie sur l'héritage de l'ancienne Rome, la spiritualité chrétienne, l'influence de Byzance et de l'Europe germanique. Les sept sites témoignent du rôle important joué par les Lombards dans le développement culturel et spirituel de la chrétienté médiévale, notamment en appuyant le mouvement monastique.

Brève description en anglais

The Longobards in Italy. Places of Power, 568–774 A.D. property comprises seven groups of important buildings (including fortresses, churches, and monasteries) throughout the Italian peninsula. They testify to the high achievement of the Lombards, who migrated from northern Europe and developed their own specific culture in Italy where they ruled over vast territories in the 6th to 8th centuries. The Lombard synthesis of architectural styles marked the transition from antiquity to the European Middle Ages, drawing on the heritage of Ancient Rome, Christian spirituality, Byzantine influence and Germanic northern Europe. The serial property testifies to the Lombards' major role in the spiritual and cultural development of medieval European Christianity, notably by bolstering the monastic movement
