January 23, 2012

Dear Friend and Colleague,

I am pleased to announce the launch of the 2011 Global Go To Think Tanks Rankings and associated trends report. The report can be accessed at the Program's website: <http://www.gotothinktank.com>.

The report's publication is the culmination of an eight-month process involving the support of think tanks and experts from every region of the world. Despite the scope of the project, the rankings are conducted without the benefit of a full time staff or budget, instead made possible with the assistance of a group of research interns from the University of Pennsylvania and other colleges in the Philadelphia area.

Below is a snapshot of the range of experts and peer institutions participating in this year's ranking process:

- 793 expert panelists for all the regional and functional research categories
- 150 journalists and scholars with expertise spanning politics, think tanks, and civil society
- 55 current and former directors of think tank programs and networks
- 40 public and private donors
- 100s of think tanks
- 25-30 intergovernmental organizations
- 120 academic institutions

Further, I am pleased to highlight the increasingly global reach of the rankings, as reflected in the following statistics regarding this years report:

- 6,545 think tanks from 182 countries were invited to participate in the process
- 1,500 plus individuals from 120 countries participated in the nominations and rankings process
- Think tanks were nominated, and subsequently ranked, in 30 categories
- A total of 5,329 think tanks were nominated
- A total of well over 25,000 nominations were received across the 30 categories

- 202 think tanks were nominated as the world's top think tank

Each year, our team works to improve the quality of the data collected and the results generated by the rankings process. This and last year's reviews of the process sparked an upheaval of aspects of previous years' methodology. In an effort to make the rankings process more democratic and fair, 2011's process, like 2010's, began with calling for nominations of think tanks across the thirty categories, not relying (as the process had in the past) on Expert Panels for these nominations. At each stage of the process, Expert Panel members were then consulted to verify the legitimacy of each round's results. By using the Expert Panels as barometers for the data's accuracy rather than generators of data, we intended to make the process more democratic and to eliminate the influence on the rankings of any potential bias of Expert Panel members.

In addition, this year's process featured the modification and addition of categories relative to previous years' rankings. In previous years, there was a single regional category titled "Top Think Tanks in Latin America." This year's rankings split that category into "Top Think Tanks in Mexico, Canada, and the Caribbean" and "Top Think Tanks in Central and South America." Additionally, the category titled "Think Tanks with the Best Use of the Internet to Engage the Public" was modified to include "or Social Media" in an effort to reflect the rising importance of social media in political and civil society movements. Finally, the "Top Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD" category was added in an attempt to recognize the work of smaller think tanks that nevertheless produce influential research but might otherwise be edged out the rankings by think tanks with bigger budgets and more manpower.

Still, efforts to streamline and perfect the process are ongoing, and as we are forever seeking ways to enhance the process, I welcome your comments and suggestions on how it might be improved. I further encourage you to provide the names and contact information for prospective Expert Panel members you might suggest for the functional areas and geographic regions covered by the rankings.

As you may know, our initial effort to generate a ranking of the world's leading think tanks developed from a series of requests from donors and journalists to produce national, regional, and international lists of the preeminent think tanks. Our ongoing efforts with respect to the rankings are now defined by our drive to understand the role of think tanks in governments and civil societies globally, so that we can help to improve their capacity and performance.

Our rankings process, as in the past, relies on a shared definition of public policy research, analysis, and engagement organizations, a detailed set of selection criteria, and an increasingly open and transparent nomination and selection process. Particularly with this year's improvements, we believe this process to have tremendous utility for think tanks, policymakers, donors, and the public. We are especially pleased with the increased participation from developing and BRICS¹ countries, which allows us to bring

¹ The BRICS countries include Brazil, Russia, India, China, and South Africa.

special attention to the important work they are doing, often under a set of circumstances with a set of obstacles all their own.

Finally, I would like to thank you again for all your support over the years, and for helping make the Think Tanks and Civil Societies Program a continued success.

Sincerely,

James McGann, Ph.D.
Assistant Director, International Relations Program
Director, Think Tanks and Civil Societies Program
University of Pennsylvania

2011 THINK TANKS RANKINGS CATEGORIES

I. Top Think Tanks in the World

- Think Tank of the Year 2011 – Top Think Tank in the World
- Top Think Tanks – Worldwide (Non-US)
- Top Think Tanks – Worldwide (US and Non-US)

II. Top Think Tanks by Region

- Top Think Tanks in the United States
- Top Think Tanks in Western Europe
- Top Think Tanks in Central and Eastern Europe
- Top Think Tanks in Asia
- Top Think Tanks in Sub-Saharan Africa
- Top Think Tanks in Mexico, Canada, and the Caribbean[†]
- Top Think Tanks in Central and South America
- Top Think Tanks in the Middle East and North Africa (MENA)

III. Top Think Tanks by Area of Research

- Top Security and International Affairs Think Tanks
- Top International Development Think Tanks
- Top Environment Think Tanks
- Top Health Policy Think Tanks
- Top Domestic Economic Policy Think Tanks
- Top International Economic Policy Think Tanks
- Top Social Policy Think Tanks
- Top Science and Technology Think Tanks
- Top Transparency and Good Governance Think Tanks

IV. Top Think Tanks by Special Achievement

- Think Tanks with the Most Innovative Policy Ideas/Proposals
- Best New Think Tanks (Established in the last 18 months)
- Think Tanks with Outstanding Policy-Oriented Public Policy Research Programs
- Think Tanks with the Best Use of the Internet or Social Media to Engage the Public[‡]

[†] In previous years, there was a single regional category titled “Top Think Tanks in Latin America.” This year’s rankings split that category into “Top Think Tanks in Mexico, Canada, and the Caribbean” and “Top Think Tanks in Central and South America.”

[‡] In previous years, this category was titled “Think Tanks with the Best Use of the Internet to Engage the Public.” The phrase “or Social Media” was added this year in an effort to reflect the rising importance of social media in political and civil society movements.

- Think Tanks with the Best Use of the Media (Print or Electronic) to Communicate Programs and Research
- Think Tanks with the Best External Relations/Public Engagement Programs
- Think Tanks with the Greatest Impact on Public Policy (Global)
- Best University Affiliated Think Tanks (Global)
- Best Government Affiliated Think Tanks
- Best Party Affiliated Think Tanks
- Top Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD[§]

[§] This category was added this year in an effort to recognize the work of smaller think tanks that nevertheless produce influential research but might otherwise be edged out the rankings by think tanks with bigger budgets and more manpower.

*THE GLOBAL GO TO THINK TANKS REPORT
2011*

THE LEADING PUBLIC POLICY RESEARCH ORGANIZATIONS IN THE WORLD

FINAL EDITION
JANUARY 20, 2012

ACKNOWLEDGEMENTS

First and foremost, I want to express my deep appreciation to all the scholars, think tank directors, journalists, policymakers, and donors from every region of the world who took time out of their busy schedules to participate in the 2011 think tank rankings. A special note of thanks goes to the over 700 functional area and regional specialists who served on the thirty Expert Panels that provided valuable insights and assistance as I compiled the final 2011 Global Go To Think Tank Index.

I also want to thank my research interns for their help in collecting and analyzing the data for this research project. I want to thank James B. Sharp, International Relations Program, University of Pennsylvania, for updating the think tank data and preparing all the charts and graphs. Special thanks goes to Jillian Rafferty, International Relations Program, University of Pennsylvania, who assembled and edited this year's report. She put in long hours to help improve the quality and appearance of the 2011 Global Go To Think Tank Index Report. Finally, I want to thank the United Nations and the United Nations University for hosting the briefing and global launch of the 2011 Global Go To Think Tank Index in New York again this year, and the Diplomatic Courier magazine for hosting the Washington, D.C. briefing and launch. I am pleased to announce that the Think Tanks and Civil Societies Program, University of Pennsylvania, and the Diplomatic Courier will produce a Global Go To Think Tank Index iPad application that will be released in early 2012.

INTRODUCTION

The 2011 Global Go To Think Tank Rankings marks the fifth edition of the annual report. As in previous years, the Think Tanks and Civil Societies Program (TTCSP) at the University of Pennsylvania's International Relations Program has relied on the indexing criteria and process developed by James G. McGann for ranking think tanks around the world. The Program's Rankings remain the first and most comprehensive ranking of the world's top think tanks, and are based on an annual global peer and expert survey of close to 1500 scholars, policymakers, journalists, and regional and subject area experts. Given the rigor and scope of the process, the Rankings produced have been described as the insider's guide to the global marketplace of ideas. As part of the process, all 6,545 think tanks in the world were contacted and encouraged to participate in the nominations process as well as a group of over 6000 journalists, policymakers, public and private donors, think tanks, and regional and subject area specialists. This group of peers and experts were surveyed to nominate and then rank public policy research centers of excellence for 2011. Additionally, the Program has assembled a set of Expert Panels, comprising over 793 expert members from around the world, spanning the political spectrum and drawing from a wide variety of disciplines and sectors, to help in the refining and validation of the lists generated. These experts were consulted at every stage in the process. The nominations and rankings were based on the detailed set of criteria that included the think tanks' production of rigorous and relevant research, publications, and programs in one or more substantive areas of research (see "Methodology and Timeline" for the complete set of nomination and ranking criteria, and "Appendices" for a detailed explication of the rankings process).

The 2006 Global Go To Think Tank Rankings, the first of what would become the annual reports, was launched in response to the endless requests Dr. McGann received from journalists, donors, scholars, and government officials to provide a list of the leading think tanks globally and in particular countries or regions of the world. In its initial conception, the project sought to identify some of the leading think tanks globally in an effort to respond to these inquiries in a systematic fashion. Since 2006, the process has been refined and streamlined, and the number and scope of the institutions and individuals involved in it has grown steadily.

The Rankings' primary objective is to recognize some of the world's leading public policy think tanks and highlight the notable contributions these institutions are making to governments and civil societies worldwide. Over just six years, the "Think Tank Index" has become the authoritative source for the top public policy institutions in the world. As in the past, last year's Report was launched at the United Nations University in New York City. This year, the Report enjoys a joint launch at the United Nations University and at the National Press Club in Washington, D.C. Over two hundred diplomats, foundations, and think tanks attended last year's launch at the UN, and upwards of two hundred print and electronic media outlets featured the Report's findings.

This Report is comprised of the results of 2011's Rankings. Also included in the Report is a summary of the major trends and issues with respect to think tanks worldwide, as they have been identified through the annual survey of think tanks and the Program's interviews with the staff of think tanks and civil society organizations in every region of the world.

Each year, we attempt to respond systematically to the comments and suggestions we receive regarding how we might improve the nomination and ranking process. This year, the considerable time we devoted to this response spurred a number of significant changes in the process. As in the 2010 process, this year's Rankings relied on an open nominations process, followed by a review of this process by Expert Panels. We have a continuing commitment to increasing the quality and representativeness of the Index each and every year we conduct the survey.

In addition, this year's Rankings features a number of new or modified categories. In previous years, there was a single regional category titled "Top Think Tanks in Latin America." This year's rankings split that category into "Top Think Tanks in Mexico, Canada, and the Caribbean" and "Top Think Tanks in Central and South America." Additionally, the category titled "Think Tanks with the Best Use of the Internet to Engage the Public" was modified to include "or Social Media" in an effort to reflect the rising importance of social media in political and civil society movements. Finally, the "Top Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD" category was added in an attempt to recognize the work of smaller think tanks that nevertheless produce influential research but might otherwise be edged out the rankings by think tanks with bigger budgets and more manpower. This new category further sought to address an historic issue for the rankings – the underrepresentation of think tanks from outside the G7 countries.⁵ In particular, this category – and 2011's Rankings in general – sought to highlight the potential rise of think tanks in G20 countries outside the G7.⁶ We have also expanded the number of think tanks listed in each category in order to help highlight the work of think tanks in non-G7 countries.

Though this year's process has enjoyed the improvements outlined above, I would be remiss were I to fail to mention a few qualifications. As in previous years – and despite the work done to mitigate this issue this year – the Rankings continues to underrepresent certain regions within the "Top Think Tanks – Worldwide" category. This likely is related to the relatively small number of think tanks in developing countries, their underdeveloped capacity, and the limited resources available to these institutions. It is also a function of the reality that more than sixty percent of the world's think tanks are based in Europe and North America. Unfortunately, there are simply more and better-funded think tanks in the G7 countries. In addition, the historically dominant role these countries have played in world politics and the influence they traditionally exert over political, economic, and social thinking contributes to the prominence of their think

⁵ The G7 countries include Canada, France, Germany, Italy, Japan, the United Kingdom, and the United States.

⁶ The remaining G20 members include Australia, Argentina, Brazil, China, the European Union, India, Indonesia, Mexico, Russia, Saudi Arabia, South Africa, South Korea, and Turkey.

tanks. That said, I would like to direct your attention to the regional, research area, and special achievement categories, which together might provide a fuller picture of the work of think tanks globally. The playing field is being leveled, however, by advances in information-based technologies which are becoming cheaper and more powerful, thus enabling think tanks in the Global South to have greater national, regional, and global reach.

Though each year, our best efforts have gone into generating a rigorous, inclusive, and objective process, we recognize the impossibility of entirely ridding the selection of the world's top think tanks from bias. The potential personal, regional, ideological, and disciplinary biases of those consulted throughout the process may, inevitably, have crept into the Rankings. While some have suggested what we move to a small group of experts or a panel of journalists to make the selections, we are unwavering in our commitment to a rigorous yet open and democratic process. We are confident in the quality and integrity of the Rankings given the safeguards in place, which include the open and transparent nature of the process, the creation and provision of a detailed set of nomination and selection criteria, and the annually increasing participation of think tanks and experts from every region of the world, and particularly from historically underrepresented countries in the Southern hemisphere. The most significant change has been the on-going involvement the expert panelists which has dramatically improved the nominations and ranking process. Together, these measures insulate the nomination and selection process from any significant problems of bias and misrepresentation.

I would like to highlight the exclusion of think tanks based in the United States from the principal global ranking, as the Program believes their inclusion would distort the global ranking given the extraordinary worldwide prominence and preeminence of U.S. think tanks. In so doing, the Rankings are able to further highlight lesser-known think tanks in regions outside of the United States.

We also want underscore that the Global Go-To Think Tank Index is just one measure of a think tank's performance and impact and is designed to be used in conjunction with other metrics to help identify and evaluate think tank centers of excellence in every region of the world.

As a final note, I would like to remind you that the data collection, research, and analysis for this project, as in previous years, was conducted without the benefit of field research, a budget, or a staff, instead relying on a group of interns from the University of Pennsylvania and other colleges in the Philadelphia area.

Despite the limitations of the Rankings, we are confident that the peer nomination and selection process and the work of the international Expert Panels together have enabled us to create the most authoritative list of high performance think tanks in the world.

GLOBAL TRENDS AND TRANSITIONS

There are a number of major political, economic, social, and technological trends that are converging at this moment in history and that have a profound impact on governments and the institutions that serve them. It is essential that think tanks understand these trends and be ahead of them so that we are all not buried by them.

Given that today's world is faster paced and more dynamic than ever before, and the increasingly complex and overwhelming amount of information that is therefore available, the rise of organizations whose primary goals include the generation of research and the provision of information should, perhaps, come as no great surprise. Indeed, think tanks have enjoyed massive growth – both in number and in their role in global policymaking – over the last decade. As policymakers have come to rely on think tanks for the thoughtful research and analysis needed for the generation and implementation of successful policy responses to global issues, think tanks have expanded and diversified, rising to meet the challenge of an increasing informed and globalized world. In this way, think tanks have sought to fill the “operational gap,” as it has been described – policymakers’ lack of access to the information and tools needed to respond to contemporary issues.⁷ To be sure, the information is available, perhaps in excess. It is here, in part, that think tanks are so important, filtering, sorting, and synthesizing information that they then provide to policymakers.

Think tanks address another key gap in the global policymaking process: the “participatory gap,” which refers to the self-perception of individuals and private organizations as excluded from policymaking.⁸ The effects of this gap in policymaking have been made clear by means of the Arab Spring, the Occupy Wall Street Movement, and the struggles in the streets of Europe – movements through which global populism has emerged to challenge the establishment. In many cases, think tanks have played active roles in these movements – both behind and in front of the barricades. Though think tanks are just one of a wide variety of groups of civil society actors, they have in many ways become the representatives of civil society in global policymaking. As such, a given country's think tank sector can function as a barometer for the state of that country's civil society. A robust and influential think tank sector would, presumably, correspond to a robust and active civil society. In short, if analysts and critics associated with think tanks are allowed to operate freely, so too, in all likelihood, can the rest of civil society.

The role of the Rankings, then, can be seen as two-part, just as is the role of think tanks. As policymakers in governments throughout the developed and developing world address

⁷ Thorsten Benner, Wolfgang Reinicke, and Jan Witte, “Beyond Multilateralism: Global Public Policy Networks,” *International Politics and Society*, 2000: 3. See also James G. McGann, “Global Think Tanks, Politics and Governance,” Routledge, United Kingdom (2010); and James G. McGann, “Global Think Tanks: Catalysts for Ideas and Action,” *Diplomatic Courier*, 5, No. 4 (2011).

⁸ *Ibid.*

the operational gap, seeking expertise to aid their decision-making processes, they turn inevitably to think tanks. But given the explosive proliferation of think tanks in the last decade – this year, TTCSP identified 6,545 think tanks operating in 182 countries – policymakers are faced with the additional question of where to turn for that expertise. The Rankings and Report seek to direct policymakers – and whoever else might benefit from the information, whether they be journalists, donors, or private citizens – to the preeminent institutions while simultaneously encouraging think tanks to aspire to the ideal criteria along which the nomination and selection process is conducted.

The Rankings might also assess both the success of think tanks in addressing the participatory gap and the robustness of civil society nationally, regionally, and globally. Think tanks now operate in a variety of political systems, engage in a wide range of policy-related activities, and simply comprise a highly diverse set of institutions of varied organizational forms. Despite this variety, however, all think tanks face the same fundamental challenge: the struggle to maintain their own independence and existence so they can continue to provide information and expertise to the policymaking process. The strength of think tanks promotes the strength of civil society, just as the strength of civil society promotes the strength of think tanks. As such, the Rankings’ identification of states with particularly prominent and globally recognized think tanks allows for an estimation of the strength of states’ civil societies. The greater the number and prominence of a state’s think tanks, the stronger the civil society and, presumably, the smaller the effects of the participation gap.

More generally, the value of the Rankings process lies in its ability to highlight the important contributions that think tanks make to governments and civil societies around the world, particularly in traditionally underrepresented regions such as Africa, South East Asia, Latin America, and the Middle East. With this goal in mind, the analysis of this year’s process has sought to highlight the growing importance of think tanks in states with traditionally less international power and influence. Due to the growth in the number and influence of think tanks outside the traditionally preeminent countries in academic and policy research, this year, I would like to draw your attention to the increasing role and prominence of think tanks based in G20 member states that are not in the G7.⁹

G20 THINK TANKS

Member	GDP (PPP)	Population	Think Tanks
Argentina	\$596 billion	41,769,726	137
Australia	\$882.4 billion	21,766,711	29
Brazil	\$2.172 trillion	203,766,711	82
Canada	\$1.33 trillion	34,030,589	97

⁹ As previously noted, the G7 member states include Canada, France, Germany, Italy, Japan, the United Kingdom, and the United States. The remaining member states in the G20 include Australia, Argentina, Brazil, China, the European Union, India, Indonesia, Mexico, Russia, Saudi Arabia, the Republic of Korea, South Africa, and Turkey.

China	\$10.09 trillion	1,336,718,015	425
European Union	\$14.82 trillion	492,387,344	1485
France	\$2.145 trillion	65,312,249	176
Germany	\$2.94 trillion	81,471,834	194
India	\$4.06 trillion	1,189,172,906	292
Indonesia	\$1.03 trillion	245,613,043	20
Italy	\$1.774 trillion	61,016,804	90
Japan	\$4.31 trillion	126,475,664	103
Mexico	\$1.567 trillion	113,724,226	60
Republic of Korea	\$1.459 trillion	48,754,657	112
Russia	\$2.223 trillion	138,739,892	4
Saudi Arabia	\$622 billion	26,131,703	85
South Africa	\$524 billion	40,004,031	35
Turkey	\$960.5 billion	78,785,548	27
United Kingdom	\$2.173 trillion	62,698,362	286
United States	\$14.66 trillion	313,232,044	1815

The G20 was established in 1999 in order to bring together ministers of finance and central bank governors from a diverse group of industrialized and developing nations. The group is comprised of the traditionally powerful G7 nations, the large and developing BRICS nations (Brazil, Russia, India, China, and South Africa), and a geographically and economically diverse group of states. Altogether, the G20 represents two-thirds of the world's population and eighty percent of global trade. The group meets once a year to discuss a wide range of economic issues, including international growth policies, financial market regulation, counter-terrorist measures, and financial crisis recovery. Although not formally linked to any of the think tanks included in this Report, many of the global economic solutions discussed in G20 meetings draw upon research done by these organizations, in addition to research conducted by the group's members.

In many ways, the changes to this year's Rankings attempted to highlight institutions from G20 states outside the G7. 2011's new category, "Best Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD," sought to recognize the work and rise to prominence of think tanks that receive less funding – often because of budget constraints imposed by their operating in states outside the G7 – but nevertheless enjoy growing prominence in global policymaking. The category proved to successfully illustrate the important contributions that smaller organizations based outside the G7 provide to the global policy research environment – six of the top fifteen think tanks in this category were based in non-G7, G20 states.

COUNTRIES WITH THE LARGEST NUMBER OF THINK TANKS¹⁰

1	United States	1815
2	China	425
3	India	292
4	United Kingdom	286
5	Germany	194
6	France	176
7	Argentina	137
8	Russia	112
9	Japan	103
10	Canada	97
11	Italy	90
12	South Africa	85
13	Brazil	82
14	Switzerland	66
15	Sweden	65
16	Mexico	60
17	Netherlands	57
18	Spain	55
18	Romania	54
20	Israel	54
20	Kenya	53
22	Taiwan	52
22	Belgium	52
24	Bolivia	51
25	Ukraine	47

Within this G20 focus, the most remarkable trends to be found in this year's Rankings appear in the context of the BRICS nations. The number of think tanks operating out of these five states increased by over one hundred percent between 2008 and 2011, from 419 to 985 think tanks. China and India have the second and third most think tanks, respectively. In total, 425 think tanks are listed as based in China; this figure is based on the one used by scholars and government officials in China and published in a number of scholarly journals. We have only been able to independently verify seventy-five to eighty think tanks in China, as there is no published list of the country's think tanks beyond those that we have identified (and that thus appear in TTCSP's database). Interestingly, the increase in the sheer volume of think tanks has not as yet corresponded

¹⁰ **We have not been able to identify any think tanks operating in the following countries:** Anguilla, Antigua & Barbuda, Aruba, British Virgin Islands, Brunei, Cayman Islands, Comoros, Djibouti, Equatorial Guinea, French Guiana, Kiribati, Macao, Marshall Islands, Micronesia, Monaco, Montserrat, Myanmar, Nauru, Palau, San Marino, Sao Tome & Principe, Solomon Islands, Tonga, Turkmenistan, Turks And Caicos Islands, Tuvalu, U.S. Virgin Islands, Vanuatu.

to a parallel increase in the prominence of BRICS states' think tanks globally. Only six of the think tanks in 2011's "Top Fifty Think Tanks Worldwide – Non-US" category are based in the BRICS – and only two of the top twenty-five in that category.

NUMBER OF THINK TANKS IN THE WORLD 2011

Region	No. of TT's	% of Total
Africa	550	8.4
Asia	1198	18
Europe	1795	27
Latin America and the Caribbean	722	11
Middle East and North Africa	329	5
North America	1912	30
Oceania	39	.6
Total	6545	100

This chart reflects the number of think tanks in 2011 based on data collected as of July 24, 2011

Despite their continued low recognition globally, regionally and thematically, think tanks in the BRICS states have been noted this year for their exemplary and increasingly influential work. Three of the top ten think tanks in 2011's "Top Thirty Think Tanks in Central and South America" are based in Brazil. Similarly, six of the top ten think tanks in 2011's "Top Thirty Think Tanks in Sub-Saharan Africa" are based in South Africa. Russian think tanks claimed four of the top ten spots in 2011's "Top Thirty Think Tanks in Central and Eastern Europe," while India and China together occupied four of the top ten places in 2011's "Top Thirty Think Tanks in Asia."

2011 GLOBAL DISTRIBUTION OF THINK TANKS BY REGION 6,545 THINK TANKS TOTAL

The number of think tanks based in the remainder of the G20 countries (excluding G7 member and the BRICS states) has also increased since 2008, though this increase has been less dramatic than that of think tanks in the BRICS countries. In 2008, the group had a combined 278 think tanks in the Program's index, compared to the 314 in the index this year. Still, global recognition of think tanks in these countries is lacking. Just three think tanks based in these countries made the list of the "Top Fifty Think Tanks Worldwide – Non-US" this year – none of which were in the top twenty-five. Though the BRICS are usually expected to dominate other G20 members outside the G7, the increasing prominence of think tanks in Argentina, Australia, Mexico, and the Republic of Korea, in particular, challenge this expectation, making particularly significant contributions to global policymaking in the fields of transparency and governance, international development, and security.

It is worth noting that despite the recent rise to prominence of think tanks in many non-G7, G20 states, the two states in this group included in the Middle East and North Africa (MENA) region, Turkey and Saudi Arabia, have historically been and continue to be notably absent from the Rankings. Only seven new think tanks were established in the two countries since 2008, and neither state's think tanks have enjoyed recognition within the global categories. Just four Turkish and zero Saudi Arabian think tanks were ranked in 2011's "Top Thirty Think Tanks in the Middle East and North Africa (MENA)" category – though this is up from the three Turkish think tanks that appeared in 2010's Rankings. At the very least, the Turkish think tanks' recognition within this regional category speaks to the increasing and global reach of their work.

The trend this year's Rankings confirmed of the growing number and prominence of think tanks in G20 nations outside the G7 is remarkable given the traditional dominance of Western European and American think tanks. Although there is still much work to be done before these rising think tanks reach parity with their still-preeminent G7-based counterparts, institutions throughout the G20 have made considerable advances in the Rankings, particularly in the fields of economics, security, and international development. Based on the 2011 Rankings, think tanks outside of the United States and Western Europe will prove increasingly important to future international policy research and policymaking.

METHODOLOGY AND TIMELINE

The 2011 Global Go To Think Tanks Rankings process continued to employ the structural changes implemented in 2010's process. Last year's process involved a significant restructuring of the nomination and selection process, based on feedback from scholars, think tanks, and experts who had participated in the process over the prior five years. Similarly, this year's process implemented a number of substantive changes, relying on participant feedback and suggestions. Among these changes were the addition of new and modification of old categories, the expansion of the Expert Panels, and the continued effort to include think tanks from traditionally underrepresented regions, particularly those non-OECD countries.¹¹

Before beginning the 2011 nomination and selection process, a team of some thirty interns conducted extensive research to establish a comprehensive universe of the world's known think tanks. Through this process, a universe of 6,545 think tanks was identified – 65 think tanks more than were identified in 2010 – for possible inclusion in the year's study. A team of 40 interns spent approximately 6 weeks updating and verifying the contact information for all the institutions, using web searches, print and web based lists of think tanks and TTCSP institutional profile surveys, which were sent to all 6,545 think tanks in the database.

One month in advance of the launch of the 2011 nomination and selection process, all 6,545 think tanks were sent a letter announcing the beginning of the 2011 process and seeking recommendations both for improving the methodology and for potential Expert Panel members. Previous years' Expert Panel members were further sent a survey that requested that they evaluate the efficacy and validity of the criteria used in previous years for the nomination and selection process.

This year's process and schedule is summarized below:

Round I: Nominations

June 30 – August 15, 2011

Call for nominations is sent to 6,545 think tanks and approximately 6,500 journalists, public and private donors, and policymakers from around the world. These nominations are tabulated by the research team. Institutions with five or more nominations are included in the 2011 selection process. Individuals who served on the 2010 Expert Panel and those who were nominated prior to the beginning of Round I are invited to serve on the 2011 Expert Panel. Experts from every region and functional area being ranked are included on the Expert Panel.

Round II: Peer and Expert Rankings

September – November 2011

Think tanks that received five or more nominations in Round I are included in an electronic ranking survey. A letter announcing the commencement of Round II is emailed to the 6,545 think tanks and 6,500 journalists, public and private donors, and

¹¹ The OECD, or Organization for Economic Co-operation and Development, is a forum of thirty-four high-income (or developed) countries committed to democracy and the market economy.

policymakers. Following their completion of the survey, the rankings are tabulated and the list of finalists is generated and prepared for the Expert Panel's review and approval. The list of nominated institutions is then shared with Expert Panel members, who are asked to identify any serious errors, omissions, or irregularities in the slate of nominated institutions.

Round III: Expert Panel Selects 2011 Go To Think Tanks *November – December 2011*
Expert Panel members are asked to review the final rankings and recommend any warranted changes. Their feedback is taken into account, and the Rankings are finalized.

Launch: 2011 Global Go To Think Tank Rankings Announced *January 18, 2011*
The 2011 Global Go To Think Tank Rankings and Report are announced at the United Nations University in New York City and at the National Press Club in Washington, D.C., as well as through selected organizations in every region of the world.

2011's Nomination Categories:

- V. Top Think Tanks in the World
 - Think Tank of the Year 2011 – Top Think Tank in the World
 - Top Think Tanks – Worldwide (Non-US)
 - Top Think Tanks – Worldwide (US and Non-US)
- VI. Top Think Tanks by Region
 - Top Think Tanks in the United States
 - Top Think Tanks in Western Europe
 - Top Think Tanks in Central and Eastern Europe
 - Top Think Tanks in Asia
 - Top Think Tanks in Sub-Saharan Africa
 - Top Think Tanks in Mexico, Canada, and the Caribbean¹²
 - Top Think Tanks in Central and South America
 - Top Think Tanks in the Middle East and North Africa (MENA)
- VII. Top Think Tanks by Area of Research
 - Top Security and International Affairs Think Tanks
 - Top International Development Think Tanks
 - Top Environment Think Tanks
 - Top Health Policy Think Tanks
 - Top Domestic Economic Policy Think Tanks
 - Top International Economic Policy Think Tanks
 - Top Social Policy Think Tanks

¹² In previous years, there was a single regional category titled "Top Think Tanks in Latin America." This year's rankings split that category into "Top Think Tanks in Mexico, Canada, and the Caribbean" and "Top Think Tanks in Central and South America."

- Top Science and Technology Think Tanks
 - Top Transparency and Good Governance Think Tanks
- VIII. Top Think Tanks by Special Achievement
- Think Tanks with the Most Innovative Policy Ideas/Proposals
 - Best New Think Tanks (Established in the last 18 months)
 - Think Tanks with Outstanding Policy-Oriented Public Policy Research Programs
 - Think Tanks with the Best Use of the Internet or Social Media to Engage the Public¹³
 - Think Tanks with the Best Use of the Media (Print or Electronic) to Communicate Programs and Research
 - Think Tanks with the Best External Relations/Public Engagement Programs
 - Think Tanks with the Greatest Impact on Public Policy (Global)
 - Best University Affiliated Think Tanks (Global)
 - Best Government Affiliated Think Tanks
 - Best Party Affiliated Think Tanks
 - Top Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD¹⁴

A snapshot of the peer institutions and experts who participated in the 2011 nomination and selection process is provided below:

- 793 expert panelists for all the regional and functional research categories
- 150 journalists and scholars with expertise spanning politics, think tanks, and civil society
- 55 current and former directors of think tank programs and networks
- 40 public and private donors
- 150 civil society representatives
- 100s of think tanks
- 25-30 intergovernmental organizations
- 120 academic institutions

Further, I am pleased to highlight the increasingly global reach of the rankings, as reflected in the following statistics regarding this years report:

- 6,545 think tanks from 182 countries were invited to participate in the process

¹³ In previous years, this category was titled “Think Tanks with the Best Use of the Internet to Engage the Public.” The phrase “or Social Media” was added this year in an effort to reflect the rising importance of social media in political and civil society movements.

¹⁴ This category was added this year in an effort to recognize the work of smaller think tanks that nevertheless produce influential research but might otherwise be edged out the rankings by think tanks with bigger budgets and more manpower.

- 1,500 individuals from 120 countries participated in the nominations and rankings process
- Think tanks were nominated, and subsequently ranked, in 30 categories
- A total of 5,329 think tanks were nominated
- A total of 25,000 nominations were received across the 30 categories
- 202 think tanks were nominated as the world's top think tank

To aid participants in each stage of the nomination and selection process, I requested that those persons nominating and ranking think tanks strictly adhere to the provided think tank definition, selection criteria, and think tank assessment tool. Participants were asked to focus on the key aspects of think tanks' performance, such as the rigor and relevance of the research and analysis generated, the scale of their operations, the breadth of the audience they reach, the sources of their funding, the contribution of their research and analysis to public debate and to the policymaking process, and the cumulative impact of their work on public policy. For the sake of the Rankings, think tanks were defined as follows:

Think tanks or public policy research, analysis, and engagement institutions are organizations that generate policy-oriented research, analysis, and advice on domestic and international issues in an effort to enable policymakers and the public to make informed decisions about public policy issues. Think tanks may be affiliated with political parties, governments, interest groups, or private corporations or constituted as independent nongovernmental organizations (NGOs). These institutions often act as a bridge between the academic and policymaking communities, serving the public interest as an independent voice that translates applied and basic research into a language and form that is understandable, reliable, and accessible for policymakers and the public.

Structured as permanent bodies, in contrast with ad hoc commissions or research panels, think tanks devote a substantial portion of their financial and human resources to commissioning and publishing research and policy analysis in the social sciences: political science, economics, public administration, and international affairs. The major outputs of these organizations are books, monographs, reports, policy briefs, conferences, seminars, formal briefings and informal discussions with policymakers, government officials, and key stakeholders.

In an effort to help make sense of this highly diverse set of institutions we have created a typology that takes into consideration the comparative differences in political systems and civil societies around the world. While think tanks may perform many roles in their host societies, not all think tanks do the same things to the same extent. Over the last 85 years, several distinctive organizational forms of think tanks have come into being that differ substantially in terms of their operating styles, their patterns of recruitment, their aspirations to academic standards of objectivity and completeness in research and their engagement of

policy makers, the press and the public. We believe, despite these differences, that most think tanks tend to fall into the broad categories outlined below.

As mentioned, the participants were further provided with a set of nominations and ranking criteria. They appear below:

- Direct relationship between organization's efforts in a particular area to a positive change in societal values such as significant changes in quality of life within respective country (amounts of goods and services available to citizens, state of physical and mental health, quality of environment, quality of political rights, access to institutions);
- Publication of the organization's work by peer reviewed journals, books and other authoritative publications;
- Ability to retain elite scholars & analysts;
- Access to elites in the area of policymaking, media and academia;
- Academic reputation (formal accreditation, citation of think tank, publications by scholars in major academic books, journals, conferences and in other professional publications);
- Media reputation (number of media appearances, interviews and citations);
- Reputation with policymakers (name recognition with particular issues, number of briefings and official appointments, policy briefs, legislative testimony delivered);
- Level of organization's financial resources (endowment, membership fees, annual donations, government and private contracts, earned income);
- Ability of the organization to meet the demands of those that fund it or to meet the goals of its respective grant-making institution;
- Overall output of organization (policy proposals, publications, interviews, conferences, staff nominated to official posts);
- Number of recommendations to policymakers, staff serving advisory roles to policymakers, awards given to scholars;
- Usefulness of organization's information in advocacy work, preparing legislation or testimony, preparing academic papers or presentations, conducting research or teaching;
- The organization's ability to produce new knowledge or alternative ideas on policy;
- Ability to bridge the gap between the academic and policymaking communities;
- Ability to bridge the gap between policymakers and the public;
- Ability to include new voices in the policymaking process;
- Ability of organization to be inscribed within issue and policy networks; Success in challenging the traditional wisdom of policymakers and in generating innovative policy ideas and programs.

Finally, participants were provided with a think tank assessment tool:

Clearly, assessing the impact of think tanks is not an easy endeavor to undertake given the various and conflicting actors, events, and politics involved in the policy making process. Despite the significant challenges in establishing a causal relationship between knowledge and policy, it is necessary for think tanks to understand and effectively respond to the growing chorus of questions being raised by donors, journalists, and the public about the role and influence of think tanks in civil societies and governments around the world. According to the research of Donald Abelson, James McGann, and others, think tanks can utilize various measures to assess the impact of increases in their activities as well as to account for their contributions to the policymaking environment and civil society. McGann's recent (2008) research has focused on developing a comprehensive assessment tool for evaluating a think tank's impact. The impetus for this research, in part, was the apparent confusion that exists about the differences between outputs and impacts. In various studies and surveys that McGann has conducted over the years, researchers and think tanks responded curiously when asked about impact on public policy and how they measure it. The overwhelming response was to provide a list of research outputs (number of books published, conference held, web hits, media appearances, etc.). Outputs, however, are not the only way to measure impact. The metric provided below is designed to serve as a catalyst for a discussion on how to effectively measure the impact of think tanks. It is provided here as background for the think tank ranking process in the hopes that it will help clarify the distinction between outputs and impacts and provide a useful tool as you prepare your rankings.

- Resource indicators: Ability to recruit and retain leading scholars and analysts; the level, quality, and stability of financial support; proximity and access to decision-makers and other policy elites; a staff with the ability to conduct rigorous research and produce timely and incisive analysis; institutional currency; quality and reliability of networks; and key contacts in the policy academic communities, and the media
- Utilization indicators: Reputation as a “go-to” organization by media and policy elites in the country; quantity and quality of media appearances and citations, web hits, testimony before legislative and executive bodies; briefings, official appointments, consultation by officials or departments/agencies; books sold; reports distributed; references made to research and analysis in scholarly and popular publications and attendees at conferences and seminars organized
- Output indicators: Number and quality of: policy proposals and ideas generated; publications produced (books, journal articles, policy briefs, etc.); news interviews conducted; briefings, conferences, and seminars organized; and staff who are nominated to advisory and government posts
- Impact indicators: Recommendations considered or adopted by policymakers and civil society organizations; issue network centrality; advisory role to

political parties, candidates, transition teams; awards granted; publication in or citation of publications in academic journals, public testimony and the media that influences the policy debate and decision-making; listserv and web site dominance; and success in challenging the conventional wisdom and standard operating procedures of bureaucrats and elected officials in the country

Beyond this quantitative assessment, an effective evaluation of impact should also involve NGOs, as well as members of the government and policymakers, to ascertain the degree to which they have utilized the grantee's research output. This participation can be obtained through interviews, surveys, questionnaires, and focus group meetings, utilizing the Outcome Mapping which "moves away from assessing the products of an activity or a program to focus on changes in behaviors and relationships (outcomes) which can lead to changes." Impact can be viewed as positive if it "changes the behavior, relationships, activities, or actions of the people, groups, and organizations with whom a program works directly."

Although this qualitative assessment is essential because it recognizes that policy impact can be successfully achieved even if policy prescriptions are not directly translated into actual policy, we recommend that this assessment should be translated into numerical rankings, thereby allowing comparisons with baseline data for effective monitoring and evaluation in the future.

Participants and Expert Panel members were further asked to adhere to a very simple but important set of ground rules:

- No self-nominations
- Adherence to professional conduct by revealing and avoiding any potential conflicts of interest
- Use of the selection criteria provided as a tool when evaluating organizations and making nominations and selections
- Provision of the formal, full name of the institution nominated and of the country in which it is based
- Avoidance of national, political, ideological, and disciplinary bias when making all nominations and selections

The evaluation of these institutions, many of which are by the very nature of their work political, according to a set of universal, concrete, and objective characteristics is perhaps the Rankings' greatest challenge. As in previous years, I have controlled for this difficulty to the greatest extent possible, providing every participant with access to the selection criteria, which were designed to create a common, objective metric for ranking the world's 6,545 think tanks.

Finally, participants in the nomination and selection process are able to rank the top global think tanks, top regional think tanks, area of research, and special achievement categories separately. While this can, at times, lead to apparent discrepancies – in which,

for example, an institution is ranking higher globally than it is regionally, or vice versa – the particulate nature of the process is more valuable than these potential discrepancies are detrimental to the reliability of the Rankings. In keeping participation in the various categories separate, participants are not forced to provide nominations or selections in categories about which they are not knowledgeable. In ranking the various categories separately, I hope to assure a proper and meaningful regional representation in the final Rankings.

The 2011 Global Go To Think Tank Rankings Process

March 7, 2011: A "feedback letter" is distributed to Expert Panel members from 2010 and approximately 6,500 think tanks requesting suggestions and critiques of the process.

March-May 2011: A team of interns collects and analyzes the comments and suggestions, preparing a report summarizing the key findings and recommendations.

May-June 2011: Recommendations are assessed by Dr. McGann and a group of advisors. Two new categories are created, and a modified nominations and selection process is implemented.

April 27, 2011: A letter is sent to over 11,500 peers and experts requesting nominations for Expert Panel members.

June 30, 2011: A letter is sent to over 11,500 peers and experts seeking think tank nominations for the 2011 Index.

2011 GLOBAL GO TO THINK TANKS RANKING RESULTS

I would like to point out that the inclusion of an institution in the universe of leading think tanks does not indicate a seal of approval or endorsement for the institution, its publications, or programs on the part of the Think Tanks and Civil Societies Program. Likewise a failure to be nominated does not necessarily indicate a lack of a quality and effectiveness or poor performance. There are 6,545 think tanks that are doing exceptional work to help bridge the gap between knowledge and policy. This report is no more than an effort to highlight some of the leading think tanks worldwide. The results of the 2011 rankings process are provided below.

Think Tank of the Year 2011 – Top Think Tank in the World <i>Table #1</i>

APPENDICES

I. CALL FOR INTERNATIONAL ADVISORY COMMITTEE MEMBERS AND REGIONAL AND FUNCTIONAL EXPERT PANEL MEMBERS

Call for nominations email letter sent on April 27, 2011

1st reminder sent on May 23, 2011

2nd reminder sent on June 6, 2011

Nominations closed on June 15, 2011

April 27, 2011

Dear Friend and Colleague:

As we prepare for the 2011 Global Go To Think Tank Index we are seeking your help in identifying qualified individuals to serve on an International Advisory Committee (IAC) and the Expert Panels for the annual Global Go To Think Tank Index Project.

The Nomination and Suggestion Survey can be accessed by using this link:
[Survey link posted here.]

This link is uniquely tied to this survey and your email address. Please do not forward this message. If there is someone you think should participate in the process simply send me their name and email address and I will send them an invitation to participate.

The International Advisory Committee will be comprised of distinguished individuals from around the world who are policymakers, public and private donors, journalists, former think tank executives, and academics. These individuals will provide advice and support for the Global Go To Think Tank Index Project. The responsibilities will include providing advice on project development and design, external relations, and resource mobilization.

We are also seeking nominations of individuals to serve as Expert Panelists (EP). Expert Panel members should have in-depth knowledge of national and regional think tanks and/or be functional areas experts in the research areas covered by the think tanks index (i.e. security and international affairs, domestic economics, social policy, etc.). Expert Panelists will help with the nominations and rankings process for the 2011 Global Go To Think Tank Index. Members will be expected to help solicit and review nominations in their area of expertise and assist with the ranking process. The purpose of the EP is to assure the quality and integrity of the rankings process.

You are encouraged to make nominations in all categories where you can recommend qualified candidates. Nominations can be made below in the following categories:

1. International Advisory Committee
2. Expert Panels Regional
 - a. United States
 - b. Canada, Mexico, and the Caribbean
 - c. South America
 - d. Middle East and North Africa
 - e. Sub-Saharan Africa
 - f. Western Europe
 - g. Central and Eastern Europe
3. Functional Research Area Panels
 - a. International Development
 - b. Health Policy
 - c. Environmental Policy
 - d. Security and International Affairs
 - e. Domestic Economic Policy
 - f. International Economic Policy
 - g. Social Policy
 - h. Science and Technology Policy
 - i. Transparency and Good Governance

You can send me additional comments and suggestions at jmcgann@sas.upenn.edu.

Thanks for your help!

All the best,

Jim McGann

II. 2011 GLOBAL GO TO THINK TANKS INDEX EXPERT PANEL NOMINATIONS – DUE JUNE 15, 2011

Think Tanks and Civil Societies Program
International Relations Program
University of Pennsylvania
635 Williams Hall
255 South 36th Street
PHILADELPHIA, PA, USA 19104-6305
TEL. (001) 215 746-2928
EMAIL: Jmcgann@sas.upenn.edu

June 6, 2011

Dear Friend and Colleague:

The deadline for submitting nominations for the International Advisory Committee and the Regional and Functional Area Expert Panels (see description of each below) has been extended until JUNE 15, 2011.

You can submit your nominations quickly and easily on-line by using this link:
<http://www.surveymonkey.com/s.aspx>

This will be your final opportunity to nominate experts and advisors for 2011 Global Go To Think Tank Index.

You can reenter the nominations survey as many times as you like but you must retain this link which is unique (tied exclusively) to your email address.

Please join the more than 200 individuals and organizations who have already submitted nominations on line or by emailing me at jmcgann@sas.upenn.edu.

Please note: If you do not wish to receive further emails from us, please click the link below, and you will be automatically removed from our mailing list
<http://www.surveymonkey.com/optout.aspx>

Please help us make sure the think tanks in your country and region are properly reflected in the annual global index of think tanks by nominating members of the IAC and Expert Panels.

Thanks again for you continued interest and support.

All the best,

Jim McGann
Director, Think Tanks and Civil Societies Program

III. CALL FOR NOMINATIONS: 2011 GLOBAL GO TO THINK TANK INDEX

Email to over 11,500 Individuals and Organizations in over 213 countries

Call for nomination email letter sent on June 30, 2011

1st Reminder sent on July 6, 2011

2nd Reminder sent on July 18, 2011

3rd Reminder sent on August 1, 2011

4th and final reminder sent on August 12, 2011

Nominations Round I closed on August 16, 2011

EMAIL: Jmcgann@sas.upenn.edu

June 30, 2011

Greetings Colleagues and Friends:

I am pleased to announce the commencement of the 2011 Global Go-To Think Tank Report nominating process. The Think Tanks and Civil Societies Program at the University of Pennsylvania (TTCSP) is contacting you for help in identifying the world's leading think tanks for the 2011 Global Go-To Index. The primary objective of the index is to bring national and international recognition to the important role think tanks play in civil societies and governments around the world.

Please submit your nominations using the link to the survey below on or before August 15, 2011. Please take the time to make your nominations online, using this survey link: <http://www.surveymonkey.com/s.aspx>. Nominations can also be submitted by email to jmcgann@sas.upenn.edu but we encourage you to use the survey.

The process is simple, and we have provided the following tools to help complete the survey: a link to the online nominations survey, a list of the nomination categories, a definition of think tanks, think tank ranking criteria, and a think tank assessment tool. I encourage you to make nominations only in the areas in which you have knowledge and experience and for think tanks that you feel warrant consideration as centers of excellence on global, regional and national levels.

The selection process for the 2011 Global Go-To Rankings will be conducted in three rounds. This methodology in the rankings and selection process is the result of the

recommendations made by the Expert Panelists who participated in the 2010 rankings process. In 2010, the ranking criteria and rankings process underwent a thorough review by 120 members of the Global Expert Panel and several changes were implemented. Each one of criteria used to rank think tanks was evaluated, which validated the efficacy of the nominations and ranking criteria used for the global rankings. The Expert Panel members made some additional recommendations at the conclusion of the 2010 Rankings that are reflected in this year's survey.

Finally, the Expert Panel members voiced strong support for the open, democratic and transparent process that they feel is one of the defining characteristics of the Global Think Tank Index. The Expert Panel also endorsed the methodology of using regional and functional experts and peers who are guided by a set of criteria to rank think tanks. While we are encouraged by these findings we continue to strive to improve the process and welcome any comments or suggestions you might have for how we might improve the Global Go-To Think Tank Index.

This year's process and schedule is summarized below:

Round I:

Nominations: June 30 – August 15, 2011

Call for Nominations is sent to 6,545 think tanks and approximately 3500 journalists, public and private donors and policy-makers from around the world. These nominations are tabulated and institutes with 5 or more nominations are included in the next step of the 2011 Think Tank Rankings process.

Round II:

Peer/Expert Rankings: September - October 2011

Think Tanks with 5 or more nominations will be placed in an electronic ranking survey. A letter announcing the second round is emailed to all the think tanks, journalists, public and private donors, and the policy maker group who have agreed to participate in the process. The rankings are tabulated and the list of finalists is generated for the Expert Panel to review and make final selections. This year Regional and Functional Expert Panels have been created for every category and these specialists will be consulted to help assure the quality and accuracy of the nominations before they are placed on the final rankings survey. Individuals who served on last year's Expert Panel and those who have been nominated this year will be invited to serve on the 2011 Expert Panel. Experts from every region and functional area will be represented on the Expert Panel.

Round III:

Expert Panel Selects 2011 Go To Think Tanks: October - November 2011

The members of the Expert Panel receive information packets by email in order to facilitate the final selection process. Expert Panelists will submit their rankings and recommendations by Friday, November 11, 2011.

2011 Global Go-To Think Tank Rankings Announced: January 2012

The 2010 Global Go-To Think Tanks are announced at the United Nations in New York

and at selected organizations in every region of the world.

Nomination Instructions And Procedures:

You may nominate up to 25 organizations for the leading think tank in the world. Please also nominate top think tanks by region, areas of research and special achievement.

You may nominate up to 25 institutions per region, 25 per research area, 10 per organizational or programmatic achievement and 5 Top Think Tanks.

Please note that all nominations you make will be kept confidential. **NO SELF-NOMINATIONS WILL BE CONSIDERED.**

Please submit your responses no later than August 15, 2011.

A copy of the unabridged 2010 Global Go-To Report is currently posted on the TTCSP web page, which can be accessed at: http://www.gotothinktank.com/wp-content/uploads/2010GlobalGoToReport_ThinkTankIndex_UNEDITION_15_.pdf

Please note that if you do not wish to receive further emails from us, click the link below, and you will be automatically removed from our mailing list:
<http://www.surveymonkey.com/optout.aspx>.

We value your input and welcome additional comments or suggestions you may have for improving the nominating and ranking processes, as well as how the findings are reported and disseminated.

Thank you for your assistance with the 2011 Global Go To Think Tank Index.

“Helping to bridge the gap between knowledge and policy”

2010 Global Go To Think Tank Nomination Categories

Please use the on-line survey instrument to submit your nomination so they can be properly tabulated.

Category I. Best New Think Tanks (established in the last 18 months) (Global)

Nominate up to 10 institutions.

Category II. Outstanding Policy-Oriented Public Policy Research Program (Global)

Nominate up to 10 institutions.

Category III. Best Use of the Internet and Social Media to Engage the Public (Global)

Nominate up to 10 institutions.

Category VI. Best Use of the Media (Print or Electronic) to Communicate Programs and Research (Global)

Nominate up to 10 institutions.

Category V. Best External Relations/Public Engagement Program

Nominate up to 10 institutions.

Category VI. Greatest Impact on Public Policy

Nominate up to 10 institutions.

Category VII. Think Tanks with the Most Innovative Policy Ideas/Proposals

Nominate up to 10 institutions and include the specific policy idea/proposal.

Category VIII. Best University Affiliated Think Tanks

Nominate up to 10 institutions.

Category IX. Best Government Affiliated Think Tanks

Nominate up to 10 institutions

Category X. Best Political Party Affiliated Think Tanks

Nominate up to 10 institutions.

Category XI. Best For-Profit Think Tanks

Nominate up to 10 institutions.

Category XII: Best Think Tanks with an Annual Operating Budget of less than \$5 Million USD (Global)

Nominate up to 10 institutions.

Category XIII: Top Think Tanks by Research Area

Nominate up to 25 institutions for each of these categories:

Top 25 International Development Think Tanks
Top 25 Health Policy Think Tanks
Top 25 Environment Think Tanks
Top 25 Security and International Affairs Think Tanks
Top 25 Domestic Economic Policy Think Tanks
Top 25 International Economic Policy Think Tanks
Top 25 Social Policy Think Tanks
Top 25 Science and Technology Think Tanks
Top 25 Transparency and Good Governance Think Tanks

Category XIV: Top Think Tanks by Region (Regional)

Nominate up to 25 institutions for each of these regions:

Top 25 Think Tanks Worldwide (Non-United States) ****
Top 25 Think Tanks in the United States
Top 25 Think Tanks in Mexico, Canada and the Caribbean
Top 25 Think Tanks in the Middle East and North Africa (MENA)
Top 25 Think Tanks in Sub-Saharan Africa
Top 25 Think Tanks in Asia
Top 25 Think Tanks in Central and Eastern Europe
Top 25 Think Tanks in Western Europe
Top 25 Think Tanks in the Central and South America

Category XV: Think Tank of the Year—Top Think Tank in the World (Global)

Nominate up to 5 institutions.

Category XIV: Think Tank of the Year

**** United States think tanks have been excluded from this category in order to collect a representative sample of the top think tanks worldwide. Many of the top think tanks in the United States have global reach in terms of their research and programming. Such think tanks may have taken a disproportional number of the Top 25 spots; thus, please exclude U.S. think tanks in this category.

THINK TANK DEFINITION

Think tanks or public policy research, analysis, and engagement institutions are organizations that generate policy-oriented research, analysis, and advice on domestic and international issues in an effort to enable policymakers and the public to make informed decisions about public policy issues. Think tanks may be affiliated with political parties, governments, interest groups, or private corporations or constituted as independent nongovernmental organizations (NGOs). These institutions often act as a bridge between the academic and policymaking communities, serving the public interest as an independent voice that translates applied and basic research into a language and form that is understandable, reliable, and accessible for policymakers and the public.

Structured as permanent bodies, in contrast with ad hoc commissions or research panels,

think tanks devote a substantial portion of their financial and human resources to commissioning and publishing research and policy analysis in the social sciences: political science, economics, public administration, and international affairs. The major outputs of these organizations are books, monographs, reports, policy briefs, conferences, seminars, formal briefings and informal discussions with policymakers, government officials, and key stakeholders.

In an effort to help make sense of this highly diverse set of institutions we have created a typology that takes into consideration the comparative differences in political systems and civil societies around the world. While think tanks may perform many roles in their host societies, not all think tanks do the same things to the same extent. Over the last 85 years, several distinctive organizational forms of think tanks have come into being that differ substantially in terms of their operating styles, their patterns of recruitment, their aspirations to academic standards of objectivity and completeness in research and their engagement of policy makers, the press and the public. We believe, despite these differences, that most think tanks tend to fall into the broad categories outlined below.

CATEGORIES OF THINK TANK AFFILIATIONS

Autonomous and Independent: Significant independence from any one interest group or donor and autonomous in its operation and funding from government.

Quasi Independent: Autonomous from government but an interest group (i.e. unions, religious groups, etc.), donor or contracting agency provides a majority of the funding and has significant influence over operations of the think tank.

University Affiliated: A policy research center at a university.

Political Party Affiliated Formally: affiliated with a political party.

Government Affiliated: A part of the structure of government.

Quasi Governmental: Funded exclusively by government grants and contracts but not a part of the formal structure of government.

NOMINATIONS AND RANKING CRITERIA

It is essential that you consider a variety of criteria in making your decisions. These may include, but are not limited to:

- Direct relationship between organization's efforts in a particular area to a positive change in societal values such as significant changes in quality of life within respective country (amounts of goods and services available to citizens, state of physical and mental health, quality of environment, quality of political rights, access to institutions);
- Publication of the organization's work by peer reviewed journals, books and other authoritative publications;
- Ability to retain elite scholars & analysts;
- Access to elites in the area of policymaking, media and academia;
- Academic reputation (formal accreditation, citation of think tank, publications by scholars in major academic books, journals, conferences and in other professional publications);

- Media reputation (number of media appearances, interviews and citations);
- Reputation with policymakers (name recognition with particular issues, number of briefings and official appointments, policy briefs, legislative testimony delivered);
- Level of organization's financial resources (endowment, membership fees, annual donations, government and private contracts, earned income);
- Ability of the organization to meet the demands of those that fund it or to meet the goals of its respective grant-making institution;
- Overall output of organization (policy proposals, publications, interviews, conferences, staff nominated to official posts);
- Number of recommendations to policymakers, staff serving advisory roles to policymakers, awards given to scholars;
- Usefulness of organization's information in advocacy work, preparing legislation or testimony, preparing academic papers or presentations, conducting research or teaching;
- The organization's ability to produce new knowledge or alternative ideas on policy;
- Ability to bridge the gap between the academic and policymaking communities;
- Ability to bridge the gap between policymakers and the public;
- Ability to include new voices in the policymaking process;
- Ability of organization to be inscribed within issue and policy networks;
Success in challenging the traditional wisdom of policymakers and in generating innovative policy ideas and programs.

THINK TANK ASSESSMENT TOOL

Clearly, assessing the impact of think tanks is not an easy endeavor to undertake given the various and conflicting actors, events, and politics involved in the policy making process. Despite the significant challenges in establishing a causal relationship between knowledge and policy, it is necessary for think tanks to understand and effectively respond to the growing chorus of questions being raised by donors, journalists, and the public about the role and influence of think tanks in civil societies and governments around the world. According to the research of Donald Abelson, James McGann, and others, think tanks can utilize various measures to assess the impact of increases in their activities as well as to account for their contributions to the policymaking environment and civil society. McGann's recent (2008) research has focused on developing a comprehensive assessment tool for evaluating a think tank's impact. The impetus for this research, in part, was the apparent confusion that exists about the differences between outputs and impacts. In various studies and surveys that McGann has conducted over the years, researchers and think tanks responded curiously when asked about impact on public policy and how they measure it. The overwhelming response was to provide a list of research outputs (number of books published, conference held, web hits, media appearances, etc.). Outputs, however, are not the only way to measure impact. The metric provided below is designed to serve as a catalyst for a discussion on how to effectively measure the impact of think tanks. It is provided here as background for the think tank ranking process in the hopes that it will help clarify the distinction between

outputs and impacts and provide a useful tool as you prepare your rankings.

- Resource indicators: Ability to recruit and retain leading scholars and analysts; the level, quality, and stability of financial support; proximity and access to decision-makers and other policy elites; a staff with the ability to conduct rigorous research and produce timely and incisive analysis; institutional currency; quality and reliability of networks; and key contacts in the policy academic communities, and the media
- Utilization indicators: Reputation as a “go-to” organization by media and policy elites in the country; quantity and quality of media appearances and citations, web hits, testimony before legislative and executive bodies; briefings, official appointments, consultation by officials or departments/agencies; books sold; reports distributed; references made to research and analysis in scholarly and popular publications and attendees at conferences and seminars organized
- Output indicators: Number and quality of: policy proposals and ideas generated; publications produced (books, journal articles, policy briefs, etc.); news interviews conducted; briefings, conferences, and seminars organized; and staff who are nominated to advisory and government posts
- Impact indicators: Recommendations considered or adopted by policymakers and civil society organizations; issue network centrality; advisory role to political parties, candidates, transition teams; awards granted; publication in or citation of publications in academic journals, public testimony and the media that influences the policy debate and decision-making; listserv and web site dominance; and success in challenging the conventional wisdom and standard operating procedures of bureaucrats and elected officials in the country

Beyond this quantitative assessment, an effective evaluation of impact should also involve NGOs, as well as members of the government and policymakers, to ascertain the degree to which they have utilized the grantee’s research output. This participation can be obtained through interviews, surveys, questionnaires, and focus group meetings, utilizing the Outcome Mapping which “moves away from assessing the products of an activity or a program to focus on changes in behaviors and relationships (outcomes) which can lead to changes.” Impact can be viewed as positive if it “changes the behavior, relationships, activities, or actions of the people, groups, and organizations with whom a program works directly.”

Although this qualitative assessment is essential because it recognizes that policy impact can be successfully achieved even if policy prescriptions are not directly translated into actual policy, we recommend that this assessment should be translated into numerical rankings, thereby allowing comparisons with baseline data for effective monitoring and evaluation in the future.

THANKS FOR TAKING THE TIME TO COMPLETE THE NOMINATIONS SURVEY!!!!

IV. EMAIL INVITING PEERS AND EXPERT PANELISTS TO RANK 2011 NOMINATED INSTITUTIONS

EMAIL: Jmcgann@sas.upenn.edu

October 2, 2011

Dear Colleague:

I am writing to invite you to help rank the think tanks that have been nominated for the top think tanks in the world report for 2011. Please use this link to enter the rankings survey: <http://www.surveymonkey.com/s.aspx> .

To be removed from the email listserv simply use this opt out link:
<http://www.surveymonkey.com/optout.aspx>

The survey is designed to have a unique signature from your e-mail account making it possible for us to track response activity from you and other individuals who respond to the survey. You can reenter the survey as many times as you like to change or complete your rankings so long as you keep the survey link provided above.

Please note that your rankings are due on October 31, 2011, and that all rankings will be kept strictly confidential.

I am pleased to report that over 875 individuals participated in the nominations process with over 1500 institutions from 149 countries qualifying for consideration in the 30 categories. Thanks to our outreach efforts we again have witnessed a dramatic increase in the participation from journalists, public and private donors and policymakers from

Eastern and Central Europe, Asia, Latin America and Africa. The impact of this increased participation is reflected in each and every one of the 30 ranking categories. We have also made a number of changes to the -survey in response to the comments and suggestions from, respondents to the survey, as well as, the members of our Expert Panels.

Over the last two months it has taken a marathon of weekends and late nights to compile the lists of nominees and to consult with members of the Expert Panel to assure the quality and integrity of the nominations process. As you go through the list you will realize that the list of nominated institutions represents a valuable reference and networking resource that will only be enhanced by your participation in the next round of 2011 Global Go To Think Tank rankings. Our goal is to create a list of the world's top think tanks that is rigorous, transparent, representative, inclusive and authoritative.

When ranking the top think tanks in the world, we strongly suggest that you use the criteria provided and focus on aspects such as the rigor and relevance of the research and analysis produced, scale of operations, breadth of audience and financial support, contribution of research and analysis to public debate and the policymaking process, and the organization's overall impact on public policy.

Last year the selection criteria we used to guide the nominations and rankings process was sent to the 300 plus Expert Panelists for their critical assessment. We received over 125 responses from the experts who evaluated each criterion separately. All but two of the criterion received a 75-90 positive rating (out of 100) from the respondents. The two criteria that consistently received low ratings were the following: 1) the level of the organization's financial resources (endowment, membership fees, annual donations, government and private contracts, earned income) and 2) the ability of the organization to meet the demands of those that fund it or to meet the goals of its respective grant-making institution.

Please use the criteria provided below when ranking the nominated institutions for the 2011 Global Go To Think Tank Index:

- - Direct relationship between the organization's efforts in a particular area to a positive change in societal values such as significant changes in quality of life within respective country (amount of goods and services available to citizens, state of physical and mental health, quality of environment, quality of political rights, access to institutions);
 - Publication of the organization's work in peer reviewed journals, books and other authoritative publications;
 - Ability to retain elite scholars and analysts;
 - Access to elites in the area of policymaking, media, and academia;
 - Academic reputation (formal accreditation, citation of think tank; publications by scholars in major academic books, journals, conferences, and in other professional publications);
 - Media reputation (number of media appearances, interviews, and citations);

- Reputation with policymakers (name recognition with particular issues, number of briefings and official appointments, policy briefs, legislative testimony delivered);
- Level of the organization's financial resources (endowment, membership fees, annual donations, government and private contracts, earned income),
- Ability of the organization to meet the demands of those that fund it or to meet the goals of its respective grant-making institution;
- Overall output of the organization (policy proposals, publications, interviews, conferences, staff nominated to official posts);
- Number of recommendations to policymakers, staff serving advisory roles to policymakers, awards given to scholars;
- Usefulness of the organization's information in advocacy work, preparing legislation or testimony, preparing academic papers or presentations, conducting research, or teaching;
- Organization's ability to produce new knowledge or alternative ideas on policy;
- Ability to bridge the gap between academic and policy communities and policymakers and the public;
- Ability to include new voices in the policymaking process;
- Ability of the organization to be inscribed within issue and policy networks; and
- Success in challenging the traditional wisdom of policymakers and for generating innovative policy ideas.

Your participation in the process helps us recognize centers of excellence in public policy research, analysis and engagement organizations (think tanks) that are operating in governments and civil societies around the world.

A few important ground rules:

- You cannot rank your own institution.
- Adhere to professional conduct by revealing and avoiding any potential conflicts of interest.
- Use the selection criteria provided as a tool when evaluating organizations when ranking each group of institutions.
- Avoid political, ideological, and discipline bias when ranking institutions.

You have 1 month to complete the rankings process. You can reenter the survey as frequently as you like but **YOU MUST KEEP THE ORIGINAL LINK THAT IS PROVIDED IN THE FIRST PARAGRAPH OF THIS EMAIL. PLEASE NOTE THAT IT IS UNIQUE TO YOUR EMAIL ADDRESS AND CANNOT BE SHARED WITH OTHERS.** Please complete the rankings process by October 31, 2011.

Should you have any questions, comments or suggestions, don't hesitate to contact me to discuss them. For more information on the Think Tanks and Civil Societies Program, please see the description below.

Thank you for your participation and continued interest in our research on think tanks and

civil societies around the world.

Sincerely,

James G. McGann, PhD

Think Tank and Civil Societies Program

The Think Tanks and Civil Societies Program (TTCSP), established in 1989 at the Foreign Policy Research Institute in Philadelphia and now located at the International Relations Program, University of Pennsylvania, examines the role policy institutes play in governments and in civil societies around the world. Often referred to as the “think tank's think tank,” TTCSP examines the evolving role and character of public policy research organizations. The Program specializes in researching the challenges think tanks face and developing strategies and programs to strengthen the capacity and performance of think tanks around the world. Over the last 25 years, the Program has launched a number of global initiatives that have helped bridge the gap between knowledge and policy in critical policy areas such as international peace and security, globalization and governance, international economics, environment, information and society, poverty alleviation and health. These international collaborative efforts are designed to establish regional and international networks of policy institutes and communities that will help to improve policymaking and strengthen democratic institutions and civil societies around the world. The Program works with some of the leading private foundations, intergovernmental organizations, think tanks and universities in a variety of collaborative efforts and programs. For additional information about our publications and programs contact: Jmcgann@sas.upenn.edu.

V. SAMPLE EMAIL TO REGIONAL AND FUNCTIONAL AREA EXPERT
PANEL MEMBERS REQUESTING THEIR REVIEW OF THE PENULTIMATE
2011 LIST OF INSTITUTIONS TO BE RANKED IN ROUND II

Emails sent on September 12, 2011

Expert Panel Review Period closed on September 30, 2011

255 South 36th Street
638 Williams Hall
PHILADELPHIA, PA 19104
TEL. (215) 746-2928
FAX (215) 732-4401
EMAIL: jmcgann@sas.upenn.edu

September 12, 2011

Dear Allison:

I hope all is well with you and your fall semester is off to a great start. Can I ask you to review the list of nominated think tanks in the following two categories: 1) top think tanks in Asia and 2) Top Security and International Affairs think tanks and let me know if you find any errors, translation typos or serious omissions? We are about to launch Round II where all of the nominated think tanks will be ranked and I want to make sure there are not serious issues with the list of nominees. Thanks in advance for your assistance with the ranking process.

All the best,
Jim McGann

2011 Nominated Top Think Tanks in Asia:

Alternate Solutions Institute (Pakistan)
Asan Institute (South Korea)

November 25, 2011

Dear George:

I hope all is well with you. The 2011 rankings process is now complete. I am now seeking the input of members of the Expert Panel to help review the 2011 Global Go-To Think Tank Index. Can I please ask you to review the list of the top think tanks in the following two categories: 1) top think tanks in Africa and 2) International Development think tanks and let me know if you find any errors, translation typos or other issues I should be aware of with the institutions that appear on the lists? We are about to draft the final report and I want to make sure there are not serious issues with the rankings. Thanks in advance for your assistance with the ranking process.

All the best,
Jim McGann

BACKGROUND ON THE THINK TANKS AND CIVIL SOCIETIES PROGRAM

The Think Tanks and Civil Societies Program (TTCSP) was established in 1989 at the Foreign Policy Research Institute in Philadelphia. In 2008, TTCSP relocated to the International Relations Program at the University of Pennsylvania. The Program conducts research on the role policy institutes play in governments and in civil societies around the world. Often referred to as the “think tanks’ think tank,” TTCSP examines the evolving role and character of public policy research organizations, specializing in researching the challenges think tanks face and developing strategies and programs to strengthen the capacity and performance of think tanks worldwide. Over the last twenty-six years, TTCSP has launched a number of global initiatives that have helped bridge the gap between knowledge and policy in critical fields such as international peace and security, globalization and governance, international economics, environmental protection, information and society, poverty alleviation, and healthcare. These international collaborative efforts seek to establish regional and international networks of policy institutions and communities that might help to improve policymaking and to strengthen democratic institutions and civil societies around the world. The Program works with some of the leading private foundations, intergovernmental organizations, think tanks, and universities in the context of a variety of collaborative efforts and programs. For additional information about our publications and programs, contact our Director, James G. McGann, at: jmcgann@sas.upenn.edu.

Research on Think Tanks and Civil Societies

TTCSP conducts research on the role of think tanks both in the policymaking process and as key civil society actors in countries around the world.

Think Tank Capacity Building Program (TTCBP)

TTCBP conducts research and provides technical assistance on a wide range of environmental challenges and organizational development issues facing think tanks and policy communities around the globe. In addition, TTCBP develops and implements strategies that help to increase the capacity of think tanks so that they can better serve policymakers and the public.

Database and Directories

TTCSP developed the first comprehensive, interactive, global, multi-sectoral database and directory of think tanks. Most databases and directories are organized by discipline, country, or region. The Program maintains the only multi-sectoral database of think tanks, consisting of over 11,000 think tanks in over 160 countries. The Program further has created and maintained specialized databases of think tanks in areas such as development, democracy, security, international affairs, and healthcare.

THE RESEARCH TEAM

PROGRAM DIRECTOR

James G. McGann, Ph.D., is the Assistant Director of the International Relations Program and the Director of the Think Tanks and Civil Societies Program at the University of Pennsylvania. He conducts research on the trends and challenges facing think tanks and policymakers around the world and provides advice and technical assistance to think tanks, governments, and public and private donors on how to improve the quality and impact of policy research. He is also a senior fellow at the Foreign Policy Research Institute, a Philadelphia-based think tank. Prior to coming to the University of Pennsylvania, Dr. McGann was an Assistant Professor of Political Science at Villanova University, where he taught courses on international relations, international organizations, and international law.

Dr. McGann has served as a consultant and advisor to the World Bank, United Nations, United States Agency for International Development, the Soros, Rockefeller, MacArthur, Hewlett, and Gates Foundations, the Carnegie Corporation, and various foreign governments on the role of non-governmental, public policy, and public engagement organizations in civil society. He has served as the Senior Vice President for the Executive Council on Foreign Diplomats, the Public Policy Program Officer for the Pew Charitable Trusts, the Assistant Director of the Institute of Politics at the John F. Kennedy School of Government, Harvard University, and a senior advisor to the Citizens' Network for Foreign Affairs and the Society for International Development.

Among Dr. McGann's publications are *Competition for Dollars, Scholars, and Influence in the Public Policy Research Industry* (University Press of America 1995); *The International Survey of Think Tanks* (Foreign Policy Research Institute 1999); *Think Tanks and Civil Societies: Catalyst for Ideas and Action*, co-edited with Kent B. Weaver (Transaction Publishers 2000); *Comparative Think Tanks, Politics, and Public Policy* (Edward Elgar 2005); *Think Tanks and Policy Advice in the U.S.: Academics, Advisors, and Advocates* (Routledge 2007); *Global Trends and Transitions: 2007 Survey of Think Tanks* (Foreign Policy Research Institute 2008); *Think Tank Index* (Foreign Policy Magazine 2009); *The 2008 Global Go To Think Tank Rankings* (IRP, University of Pennsylvania 2009); *Democratization and Market Reform: Think Tanks as Catalysts* (Routledge 2009); *Catalysts for Economic Growth and Development: The Role of Think Tanks in Brazil, Russia, India, China and South Africa* (CIPE 2009); *The 2009 Global Go To Think Tank Rankings* (IRP, University of Pennsylvania 2010); and *Global Think Tanks, Policy Networks and Governance* (Routledge 2010).
