

# Malthoid

## ROOFING

### A BITUMINOUS ROOFING FELT

#### Key Benefits Summary

- Easy to apply
- Economical

#### Standards

- Malthoid Roofing Complies with:
- AS A99 1959

## DAMP COURSE

#### Key Benefits Summary

- Suitable for one or two storey jobs
- Economical
- Ready to use
- Easily cut to size

**Malthoid**

## PRODUCT INFORMATION

### DESCRIPTION

Malthoid Roofing sheet consists of a wood fibre derivative, often called "felt", which is saturated and coated with bitumen. It is finished with a dusting of fine sand to prevent sticking in the roll.

### USAGE/PURPOSE

Malthoid Roofing is used :

- As a waterproofing on flat roofs
- For the manufacture of malthoid washers for roof work
- In silos for wheat storage

### SIZES AVAILABLE

- 1m x 20m roll
- 1m x 10m roll

## USAGE GUIDELINES

When waterproofing flat roofs ensure there is a slope of at least 1cm per metre towards outlet or gutter. Prime the surface to be covered with an even coat of Pabco Brushable Hydroseal, and before this sets, lay the Malthoid Roofing onto it and roll it flat. Work from low to high areas, with at least 75mm overlaps at sides and ends of rolls. Paint over all lap edges generously with Brushable Hydroseal. Protect from UV deterioration by painting with a TREMCO reflective solar paint such as Alumicool or acrylic paint such as Tennis Court Paint. Allow 14 days UV exposure before painting.

## PRODUCT INFORMATION

### DESCRIPTION

Malthoid Dampcourse rolls consists of a wood fibre derivative, often called "felt", which is saturated and coated with bitumen. It is finished with a dusting of fine sand to prevent sticking in the roll. Malthoid Dampcourses are completely inert to lime and other alkalis found in cement, mortar etc. Malthoid dampcourse is tough and flexible, it won't fracture even if it is bent around a 6mm diameter rod through 180°.

### USAGE/PURPOSE

Malthoid Dampcourse is used :

- As a dampcourse on walls up to eight metres high.

### SIZES AVAILABLE

- 110mm x 20m roll
- 150mm x 20m roll
- 230mm x 20m roll
- 300mm x 20m roll
- Special sizes made to order
