

Projects supported by EWEB Greenpower produce both electricity and renewable energy certificates (RECs), which represent the positive environmental attributes of renewable generation such as solar and wind power. Each year, EWEB retires the corresponding quantity of RECs associated with Greenpower support. **The RECs retired on behalf of EWEB Greenpower customers are tracked** through the Western Renewable Energy Generation Information System (WREGIS) and were **made up of the following resources in 2013:**

# Support clean energy with EWEB Greenpower

**Local. Renewable.**

Join thousands of neighbors and many local businesses in support of clean, renewable energy.

EUGENE WATER & ELECTRIC BOARD

Eugene Water & Electric Board  
 500 East 4th Avenue  
 Eugene OR 97401  
 541-685-7000  
[eweb.org/greenpower](http://eweb.org/greenpower)

*Rely on us.*

*Kids at Adams Elementary School received a \$100,000 grant to install solar photovoltaic and hot water panels.*

**The EWEB Greenpower program offers customers a unique opportunity to support local renewable energy projects, including solar installations and our annual grant program for nonprofits.**

Greenpower is voluntary and your support will be listed on your monthly electric bill as a separate item. You can support Greenpower for as little as \$1.50 a month—or choose a higher level of support to increase your impact.

### **Three great reasons to support EWEB Greenpower:**

- 1. Protect the environment** and reduce regional air pollution from fossil fuels.
- 2. Support local solar energy projects.** Greenpower funds incentives for EWEB customers who install solar panels on their homes and businesses.
- 3. Vote on which local nonprofits receive annual Greenpower grants** up to \$50,000 each for projects involving renewable energy. For info on recent grant recipients, visit [eweb.org/greenpower/grants](http://eweb.org/greenpower/grants).

### **Options for residential and business customers:**

- 1. Assign 100% of your electricity use** to Greenpower with an extra one cent per kilowatt-hour premium. The average household would pay an extra \$16 per month. 100% Greenpower businesses get promotional recognition.
- 2. Choose 1,000 kilowatt-hour blocks** of Greenpower at \$10 each.
- 3. Residential customers also may choose 100 kilowatt-hour blocks** at \$1.50 each.

It's easy to join: **Visit [eweb.org/greenpower](http://eweb.org/greenpower) or give us a call at 541-685-7000.**
