FOIA 13-00160-K	My company is submitting a request to have information concerning the legal determinations and decision by the DOE to acquire goods via a commercial acquisition source, this being a company named FedBid.com Background: FedBid.com currently enjoys an exclusive relationship with several U.S. Government entities including the DOE. FedBid.com, on behalf of the DOE, manages an on-line reverse auction system to acquire goods on behalf of the DOE> The acquisitions do not have Government oversight or the normal appellant/protest solutions available to commercial organizations selling to the DOE. FedBid.com currently spends significant income selling its services and approval to the vendor community. A significant part of the vendor community believes that FedBid.com does not act in a manner that, in all cases, is fair and open to the small business community and that the DOE's desire to save money must also include fair and open competition with a guarantee of transparency to the Government. The normal acquisition for the DOE would include announcement on some Government platform such as FBO (Federal Business Opportunities).	Ford, John	Closed	7/26/2013

FOIA 13-00220-E	I am a research assistant writing on behalf of Stuart Kasdin, an assistant professor at George Washington University in the Trachtenberg School of Public Policy and Public Administration. He is doing a project on government agency culture and would like to use the annual Government Performance and Results Act (GPRA) performance measures as a tool for understanding what the agency does and how its tasks relate to each other. Prof. Kasdin is interested in getting the historical records of the performance measures for the programs in your agency. In particular, he needs the annual performance data for the different program line item accounts. If possible, he also would like the agency level performance measures. His goal is to get the annual results for each of the performance measures dating to the point of inception of the use of performance measures until the current or budget year. To the extent that the performance measures have changed over time, with measures being altered and new measures added, getting those earlier additional measures would be very important as well.
