Brill Open

Brill offers its authors the option to make their work freely available online in Open Access upon publication. The Brill Open publishing option enables authors to comply with new funding body and institutional requirements. The Brill Open option is available for all journals and books published under the imprints Brill and Brill Nijhoff. More details can be found at brill.com/brillopen

Rights and Permissions

Brill offers a journal article permission service using the Rightslink licensing solution. Go to the special page on the Brill website brill.com/rights – journal articles for more information.

Brill's Developing Countries Program

Brill seeks to contribute to sustainable development by participating in various Developing Countries Programs, including Research4Life, Publishers for Development and AuthorAID. Every year Brill also adopts a library as part of its Brill's Adopt a Library Program. More details can be found at brill.com/brills-developing-countries-program

Clio Medica

Perspectives in Medical Humanities

Edited by **Brian Dolan** et al.

Giving the Art and Science of Healthcare a New Look

We are pleased to announce a new era for the successful *Clio Medica* series, now titled *Clio Medica: Perspectives in Medical Humanities*. The new series is published by Rodopi and the University of California Medical Humanities Consortium, under the guidance of an international editorial board and a strict peer-reviewing process.

The series invites scholars from the humanities and health care professions to share narratives and analysis on health, healing, and the contexts of our beliefs and practices that impact biomedical inquiry. Scholarship in history of medicine, literature and medicine, medical anthropology or sociology, and creative writing are welcome.

Scottish Medicine and Literary Culture, 1726-1832

Edited by **Megan J. Coyer** and **David E. Shuttleton**

Scottish Medicine and Literary Culture, 1726–1832 examines the ramifications of Scottish medicine for literary culture within Scotland, throughout Britain, and across the transatlantic world. The contributors take an informed historicist approach in examining the cultural, geographical, political, and other circumstances enabling the dissemination of distinctively Scottish medico-literary discourses.

After Darwin: Animals, Emotions, and the Mind

Edited by **Angelique Richardson**

‘What is emotion?’ pondered the young Charles Darwin in his notebooks. How were the emotions to be placed in an evolutionary framework? And what light might they shed on human-animal continuities? These were among the questions Darwin explored in his research, assisted both by an acute sense of observation and an extraordinary capacity for fellow feeling, not only with humans but with all animal life. The book explores questions of mind, emotion and the moral sense which Darwin opened up through his research on the physical expression of emotions and the human–animal relation.

Representing Argentinian Mothers

Medicine, Ideas and Culture in the Modern Era, 1900-1946

Yolanda Eraso

Motherhood holds a special place in Argentinian culture. *Representing Argentinian Mothers* examines the historical intersections of medicine and culture that have underpinned the representations of motherhood during the first half of the twentieth century. From the emergence of a medicalised maternal figure at the beginning of the century to the appearance of a new, politicised mother-figure by the time of Eva Perón, the contentious representations of motherhood constitute a privileged viewpoint to explore the tensions and conflicts underlying the country's modernisation process.

Divine Doctors and Dreadful Distempers

How Practicing Medicine Became a Respectable Profession

Christi Sumich

Divine Doctors and Dreadful Distempers examines the discourse of seventeenth-century English physicians to demonstrate that physicians utilized cultural attitudes and beliefs to create medical theory. They meshed moralism with medicine to self-fashion an image of themselves as knowledgeable health experts whose education assured good judgment and sage advice, and whose interest in the health of their patients surpassed the peddling of a single nostrum to everyone.

Life Writing and Schizophrenia

Encounters at the Edge of Meaning

Mary Elene Wood

This book examines work in several genres of life writing—autobiography, memoir, case history, autobiographical fiction—focused either on what it means to live with schizophrenia or what it means to understand and ‘treat’ people who have received that diagnosis. Challenging the romanticized connection between literature and madness, The book explores how writers who hear voices and experience delusions write their identities into narrative, despite popular and medical representations of schizophrenia as chaos, violence, and incoherence.

Genomics and Democracy

Towards a 'Lingua Democratica' for the Public Debate on Genomics

Edited by **Peter Derkx** and **Harry Kunneman**

This book addresses the ethical and political questions flowing from the vastly increased possibilities to manipulate the genetic properties of organisms, including human beings. Due to the great complexity of the scientific fields involved, these questions are framed and answered mostly by scientific experts. But the new technological possibilities and social practices connected with genetic manipulation intrude into domains that for a long time have been the provenance of religious and secular worldviews and touch upon deep-seated convictions and emotions.

Looking Beneath the Surface

Medical Ethics from Islamic and Western Perspectives

Edited by **Hendrik M. Vroom**, **Petra Verdonk**, **Marzouk Abdulah** and **Martina C. Cornel**

Looking Beneath the Surface explores Arab-Islamic and Western perspectives on medical ethical issues: genetic research and treatment, abortion, organ donation, and palliative sedation and euthanasia. The contributions in this volume discuss the state of the (medical) art, the role of laws, counseling, and spiritual counseling in the decision-making process. The different approaches to the ethical issues, ways of moral reasoning, become clear in these contributions, especially the role of tradition for Islam and the importance of autonomy for the West.

Contemporary Psychoanalytic Studies

Edited by **Jon Mills**

Contemporary Psychoanalytic Studies (CPS) is an international scholarly book series devoted to all aspects of psychoanalytic inquiry in theoretical, philosophical, applied, and clinical psychoanalysis. Its aims are broadly academic, interdisciplinary, and pluralistic, emphasizing secularism and tolerance across the psychoanalytic domain. CPS aims to promote open and inclusive dialogue among the humanities and the social-behavioral sciences including such disciplines as philosophy, anthropology, history, literature, religion, cultural studies, sociology, feminism, gender studies, political thought, moral psychology, art, drama, and film, biography, law, economics, biology, and cognitive-neuroscience.

A Question of Time *Freud in the Light of Heidegger's Temporality*

Joel Pearl

In *A Question of Time*, Joel Pearl offers a new reading of the foundations of psychoanalytic thought, indicating the presence of an essential lacuna that has been integral to psychoanalysis since its inception. Pearl returns to the moment in which psychoanalysis was born, demonstrating how Freud had overlooked one of the most principal issues pertinent to his method: the question of time. The book shows that it is no coincidence that Freud had never methodically and thoroughly discussed time and that the metaphysical assumption of linear time lies at the very heart of Freudian psychoanalysis.

Psychiatry as a Human Science *Phenomenological, Hermeneutical and Lacanian Perspectives*

Antoine Mooij

Psychiatry or psychopathology finds itself in a state of imbalance. The reason: the impossibility to unite biological and psychological factors. This book demonstrates that phenomenology, hermeneutics and Lacanian psychoanalysis support this view, whilst also drawing on Cassirer's theory of symbolization. It is of interest to psychiatrists, psychologists, psychoanalysts and philosophers alike.

Erudition and the Republic of Letters

Editor-in-Chief: **Mordechai Feingold**, California Institute of Technology

Erudition and the Republic of Letters is a peer-reviewed journal devoted primarily to the history of scholarship, intellectual history, and to the *res publica literaria* broadly conceived. It encapsulates multifarious aspects of higher learning as well as the manner in which such knowledge transcends confessional and geopolitical boundaries.

This seems to be a propitious time for such an enterprise, as there exists a lively, and mostly young, community of scholars who carry out excellent and exciting work. *Erudition and the Republic of Letters* will establish itself quickly as the premier venue of its kind, and cater to the needs and aspirations of this community, while exhibiting the viability of

the subject matter to students. The journal's policy would be to not impose arbitrary word limit, but allow the content of the essay to determine length. Also, it would encourage publication of scholarly articles as well as editions of texts, reviews etc— from the late Middle Ages to the end Nineteenth Century.

Erudition and the Republic of Letters may occasionally publish a primary source but it is devoted primarily to interpretative essays and reviews. By publishing such works, it aims to expand the available scholarly resources, and further invigorate the scholarly community.

Cultural Dynamics of Science

Editors: **Lissa Roberts**, Science, Technology and Policy Studies (STePS), University of Twente, the Netherlands, **Agustí Nieto-Galan**, Centre d'Història de la Ciència (CEHIC) & Facultat de Ciències, Universitat Autònoma de Barcelona, Spain, **Oliver Hochadel**, Consejo Superior de Investigaciones Científicas, Institutió Milà i Fontanals, Barcelona, Spain

The new series *Cultural Dynamics of Science* (CDS) at Brill aims to contribute to ongoing efforts in the history of science to understand the relations between the production, communication, consumption and use of knowledge without having recourse to the traditional equation of popularization with notions such as 'diffusion' and 'simplification'. The same goes for the distinctions they imply between expert knowledge and practices, on one side, and lay communities and understanding on the other. Focused on the period from the Enlightenment to the present, CDS intends instead to consider the various ways in which tensions and exchanges among the different actors involved have historically fed the productive circulation of knowledge. Sensitivity to specific contexts, epistemologies, spaces and networks, in which material production merges with knowledge production, is therefore paramount.

History of Modern Science

Edited by **Kostas Gavroglu**, Athens University, **Massimiliano Badino** Max Planck Institute for the History of Science, Berlin and **Jürgen Renn**, Max Planck Institute for the History of Science, Berlin

The nineteenth century has witnessed the unprecedented development of classical physics, the multifarious use of physics and chemistry in industry, the rise of evolutionary theories in biology and geology, and a number of groundbreaking developments. Though most of these trends continued into the twentieth century, the theories of relativity and quantum mechanics transformed radically the classical view of physics and research in the life sciences revealed a number of astonishing results. Furthermore, during the second half of the twentieth century, "Big Science" has come to characterize the dramatic institutional metamorphoses of science. Historians and sociologists of science, in ever increasing numbers, have been offering many new and insightful accounts into the sciences of these two centuries while at the same time, a number of historical and historiographic issues have been the subject of lively discussions among them. Aiming at contributing to this growing scholarly interest, Brill Publishers have decided to start a peer-reviewed series in the History of Modern Science with emphasis in the nineteenth and twentieth centuries.

Nuncius Series

Studies and Sources in the Material and Visual History of Science

Edited by **Marco Beretta**, University of Bologna, and **Sven Dupré**, Max Planck Institute for the History of Science

Nuncius Series explores the material sources of scientific endeavor, such as scientific instruments and collections, the specific settings of experimental practice, and the interactions between sciences and arts. The materiality of science is a fundamental source for the understanding of its history, and the visual representation of its concepts and objects is equally crucial. *Nuncius Series* focuses on the exploration of increasingly-varied modes of visual description of observed reality.

Making the New World Their Own

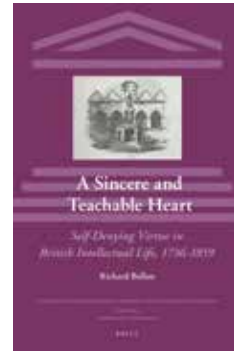

Chinese Encounters with Jesuit Science in the Age of Discovery

Qiong Zhang, Wake Forest University, North Carolina, USA

Making the New World Their Own offers a systematic study of how Chinese scholars came to understand that the earth is shaped as a globe. This notion arose from their encounters with the Jesuit missionaries in the seventeenth century.

READERSHIP: All interested in the history of science, Jesuit mission, Ming and Qing Chinese intellectual, cultural and maritime history, global early modernity, the dynamics of cross-cultural encounters, and translation studies.

University Jubilees and University History Writing

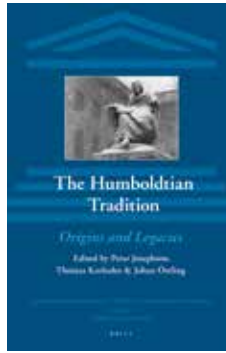

A Challenging Relationship

Edited by **Pieter Dhondt**,
University of Eastern Finland

Through various case studies, this book shows the continuity of the close relationship between jubilees and university historiography and the impact of this interaction on the jubilee publications and academic heritage. Yet it also goes beyond the jubilee by presenting three other ways of writing university history.

READERSHIP: All interested in university history, history of education, intellectual and cultural history, as well as anyone involved in academic heritage or in the public relations of universities.

Medieval and Early Modern Science

Edited by **J.M.M.H. Thijssen**, Radboud University, Nijmegen, **C.H. Lüthy**, Radboud University, Nijmegen, and **P.J.J.M. Bakker**, Radboud University, Nijmegen

Medieval and Early Modern Science is the first book series to be dedicated totally to the investigation of scientific thought between 1200 and 1700, the period that saw the birth of modern scientific method and the origins of the scientific world view. It covers not only the Aristotelian paradigm of scholastic natural philosophy, but also rivalling Renaissance and seventeenth-century conceptions of physics.

Scientific Instruments and Collections

Edited by **Giorgio Strano**,
Istituto e Museo di Storia della
Scienza (IMSS), Florence

Scientific Instruments and Collections is a peer-reviewed book series devoted to scientific collections, scientific instruments, instrument manufacturing and trade from antiquity to present day. The series is published under the auspices of the Scientific Instrument Commission, and will publish a peer-reviewed, edited selection of the Commission's annual conferences. The series welcomes proposals for monographs, edited volumes and completed manuscripts for consideration for the series.

Objects of Chemical Inquiry

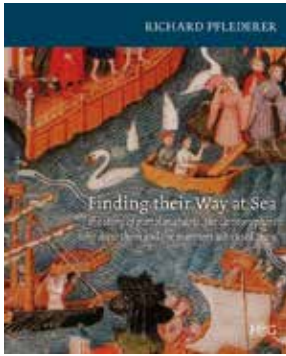

Edited by **Ursula Klein** Max Planck Institute for the History of Science and University of Konstanz, and **Carsten Reinhardt** President and CEO, Chemical Heritage Foundation, Philadelphia

Leading historians of chemistry present fascinating case studies illuminating a broad array of objects of inquiry in modern chemistry, from the eighteenth century until today. These include every day items such as glass as well as invisible networks of experimentation and theory.

This collection of essays is based on two workshops that took place at the Max Planck Institute for the History of Science in Berlin and the CHF in Philadelphia.

Dutch Scholarship in the Age of Empire and Beyond
KITLV - The Royal Netherlands Institute of Southeast Asian and Caribbean Studies, 1851-2011

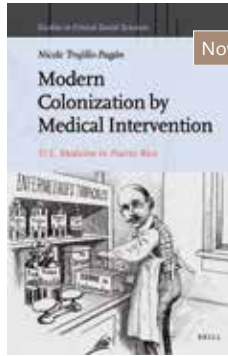

Maarten Kuitenbrouwer
 Translated by **Lorri Granger**
 Edited by **Harry A. Poeze**

How was it possible for the Koninklijk Instituut voor Taal-, Land- en Volkenkunde (KITLV) to grow from a learned society with fewer than a hundred members and only one partly salaried employee in 1851 into a modern professional institute with 1800 members and a staff of over fifty in 2001? This book provides the answer to this question.

READERSHIP: All interested in the history of academic research related to the former Dutch colonies.

Modern Colonization by Medical Intervention
U.S. Medicine in Puerto Rico

Nicole Trujillo-Pagán,
 Wayne State University

This volume explores the establishment of US colonial rule over Puerto Rico through the appropriation and usurpation of the status of local physicians, the undermining of their political legitimacy, and its role in the development of capitalism in the colony.

READERSHIP: Students and scholars interested in a) the history of medicine and/or Puerto Rico, b) comparative-historical methods, c) the sociology of the profession, d) political sociology and/or colonialism/neocolonialism/postcolonialism.

Print, Profit, and Perception

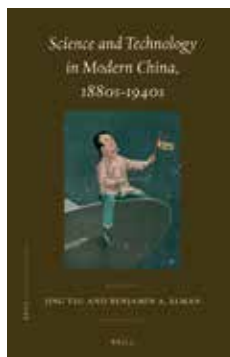

*Ideas, Information and
Knowledge in Chinese
Societies, 1895-1949*

Edited by **Pei-yin Lin**, University
of Hong Kong, **Weipin Tsai**,
University of London

Print, Profit, and Perception examines the dramatic knowledge expansion and dynamic cross-cultural exchanges occurring in China and Taiwan from 1895 to 1949. The nine chapters, heavily case-studied, collectively address the co-existence of globalization and localization processes in the period.

READERSHIP: All interested in modernization in China and Taiwan; East Asian Studies; print history and culture including newspapers, journals and textbooks; Chinese/Taiwanese literature; communications.

Saving Lives in Wartime China

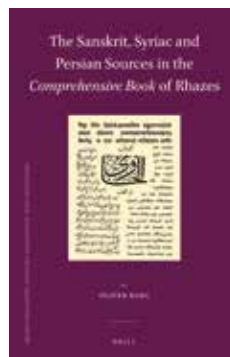

How Medical Reformers Built Modern Healthcare Systems Amid War and Epidemics, 1928-1945

John R. Watt, ABMAC Foundation

This study shows how a small number of medical reformers introduced modern healthcare services between 1928-1945 in China when Chinese people were suffering by the millions from infectious disease, maternal child mortality, and battlefield casualties.

READERSHIP: All those interested in modern medical and public health history, modern Chinese history and war, revolution and social change.

Al-Rāzī, On the Treatment of Small Children
(*De curis puerorum*)

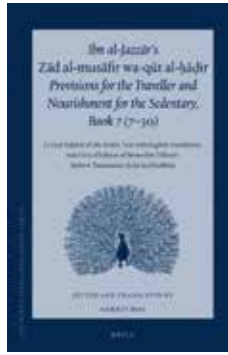

The Latin and Hebrew Translations

Edited and translated by
Gerrit Bos, University of Cologne and
Michael McVaugh, University of North Carolina

Exceptional as a medieval pediatric handbook, *De curis puerorum* is edited here in Latin and Hebrew translations of al-Rāzī's lost Arabic original; an English version and commentary reveal contemporary beliefs about the causes, symptoms, and treatments of many children's diseases.

READERSHIP: Academic libraries and institutes, historians and other students of childhood, historians of classical Islam and the European Middle Ages, historians of medicine, practicing physicians.

Antiquarianism, Language, and Medical Philology

From Early Modern to Modern Sino-Japanese Medical Discourses

Edited by **Benjamin A. Elman**, Princeton University

This volume rethinks the role of the Sino-Japanese medical classics during the early modern period in light of antiquarianism, languages, and medical philology. Philology in particular allows the authors to address the changing meaning of the same term, which often reflected well-known metaphors in the source language that were transposed to the target language.

READERSHIP: All interested in the history of classical medicine and the medical classics in light of modern East Asian intellectual and cultural history.

- January 2015
- ISBN 978 90 04 28544 6

A Turkic Medical Treatise from Islamic Central Asia

A Critical Edition of a Seventeenth-Century Chagatay Work by Subhān Qulī Khan

Edited, translated and annotated by **László Károly**, University of Mainz

This is the first serious study on seventeenth-century Central Asian medicine that provides a major resource for the linguistic and cultural history of Central Asia. The richly annotated English translation from the Chagatay original makes the edition useful for readers without special knowledge on medical history and Turkic studies.

READERSHIP: All interested in Turkic studies, Islamic studies, or history of medicine and culture in Central Asia.

Intersections

Interdisciplinary Studies in Early Modern Culture

Edited by **K.A.E. Enenkel**,
Münster University

Intersections is a peer-reviewed series on interdisciplinary topics in early modern studies. Contributions may come from any of the disciplines within the humanities, such as history, art history, literary history, book history, church history, social history, cultural history, and history of ideas. Each volume focuses on a single theme and consists of essays that explore new perspectives on the subject of study. The series aims to open up new areas of research on early modern culture and to address issues of interest to a wide range of disciplines.

Conflicting Values of Inquiry *Ideologies of Epistemology in Early Modern Europe* Edited by **Tamás Demeter, Kathryn Murphy and Claus Zittel**

Conflicting Values of Inquiry explores how certain non-epistemic values had been turned into epistemic ones, how they had an effect on epistemic content, and how they became ideologies of knowledge playing various roles in inquiry and application throughout early modern Europe.

READERSHIP: All interested in the history of early modern philosophy and science, intellectual history, and historical philosophy of science.

- November 2014
- ISBN 978 90 04 28170 7
- Hardback (xviii, 410 pp.)
- List price EUR 140.- / US\$ 181.-

The Making of Copernicus *Early Modern Transformations of a Scientist and his Science* Edited by **Wolfgang Neuber, Thomas Rahn and Claus Zittel**

The volume articles examine exemplarily how some of the Copernicus myths came about and if they could hold their ground. They investigate methodological, institutional, textual and visual transformations of the Copernican doctrine and the topical, rhetorical and literary transformations of the historical person of Copernicus respectively.

READERSHIP: All concerned with the preservation or conservation of Islamic manuscripts, and anyone interested in the materiality of Islamic manuscripts and in codicological aspects of the Islamic book.

The Anthropomorphic Lens

Anthropomorphism, Microcosmism and Analogy in Early Modern Thought and Visual Arts

Edited by **Walter S. Melion, Bret Rothstein and Michel Weemans**

Anthropomorphism closely relates to early modern notions of analogy and microcosm. Exploring the tension inherent in such notions, the essays in this volume address the contradictions and tensions, between magical and rational, speculative and practical thought, that anthropomorphism entails.

READERSHIP: All those interested in the cultural history of images, microcosmism, analogy, and problems of figuration in early modern Europe.

- November 2014
- ISBN 978 90 04 26170 9
- Hardback (xxviii, 524 pp.)

Zoology in Early Modern Culture

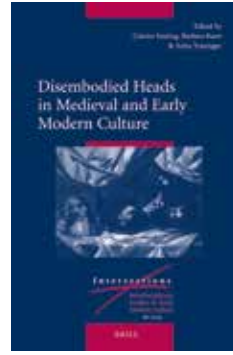

Intersections of Science, Theology, Philology, and Political and Religious Education

Edited by **Karl A.E. Enenkel and Paul J. Smith**

This volume tries to map out the intriguing amalgam of different, partly conflicting approaches that shaped early modern zoology. It demonstrates that theology and philology played a pivotal role in the complex formation of this new science.

READERSHIP: History of Science and Scholarship (esp. Zoology), Art History, Book Illustration and Word-Image Relationships, Renaissance Humanism, History of Classical Philology, History of Ideas, History of Theology, Historical Bible exegesis.

- October 2014
- ISBN 978 90 04 26823 4

Disembodied Heads in Medieval and Early Modern Culture

Edited by **Catrien Santing, Barbara Baert and Anita Traninger**

Discussing medieval and early modern 'disembodied heads' this collection questions the why and how of the primacy of the head in the bodily hierarchy during the premodern period. On the basis of beliefs, mythologies and traditions concerning the head, they come to an 'cultural anatomy' of the head.

READERSHIP: All those interested in cultural history and art history of the Pre-Modern Period, the history of the Church, of religion, of philosophy, and of hagiography, as well as Biblical scholars and historian of medicine and the body.

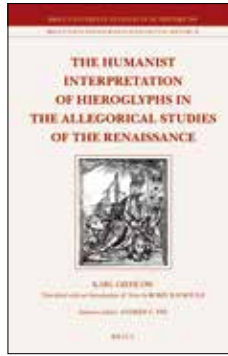

- July 2013

Brill's Studies in Intellectual History

Edited by **Han van Ruler**,
Erasmus University Rotterdam

Brill's Studies in Intellectual History is a peer-reviewed book series that publishes new approaches to history, the history of philosophy and theology, and the history of ideas. Special attention is given to the use of interdisciplinary methods and insights, such as those of cultural anthropology, semiotics and linguistic analysis. Occasionally volumes will contain papers of eminent scholars and proceedings of conferences, which would otherwise be difficult to obtain.
