| Epidemiology | | | | | | | | |
| Epidemiological comments | | | | | | | | |
| On 15th November 2016, one death case of Cygnus atratus (black swan) was found in the zoo and its sample was tested by antigen-capture kit with positive result for influenza A virus. On 17th November 2016, another death case of Cygnus atratus was found in the same facility and | | | | | | | | |
| positive result was gained by antigen-capture kit. | | | | | | | | |
| On 21st November 2016, the two dead cases were confirmed to be positive for H5N6 subtype influenza A virus. | | | | | | | | |
