Background & New Developments	11
Annex—GDP by Industry main tables	

Economic Activity, as measured by gross domestic product (GDP) grew 3.2% in the **September 2015 quarter**. This follows revised growth rates of 0.4% and 0.1% in the June and March 2015 quarters respectively. In the period under review, value added at constant prices amounted to \$463.4 million making it the highest quarterly value added ever achieved by the economy. The favorable performance in the period was a result of more market opportunities for Samoa's products, improved infrastructure and tourism attractions, increased government spending and the number of major events being hosted by the country (the All Blacks vs Samoa historical rugby match and the Commonwealth Youth Games) which were held in the period under review. These have fuelled growth in the period despite the good performance in the same period of last year as a result of the UN-SIDS conference which was also hosted by the country.

GDP Growth:

Gross Domestic Product for the **September 2015 Quarter** at constant prices was \$463.4 million, recording an economic growth rate of 3.2%.

Chart 1: Total GDP at constant prices & economic growth rates, Sept 2011—Sept 2015.

Chart 1 shows the fluctuating trend in quarterly value added at constant 2009 prices and economic growth rates from the September 2011 quarter to the September 2015 quarter as measured by the percentage change in constant 2009 prices. As shown, value added in the period under review was the highest level ever achieved by the economy, making it the fifth consecutive quarter of positive growth; this was translated into an average growth rate of 1.7% (Sept 2014 quarter—Sept 2015 quarter). When compared to the June 2015 quarter (q-o-q), value added further went up by 10.8%.

Chart 2: Percentage-point contributions to GDP growth by industry; Sept 2015 Quarter

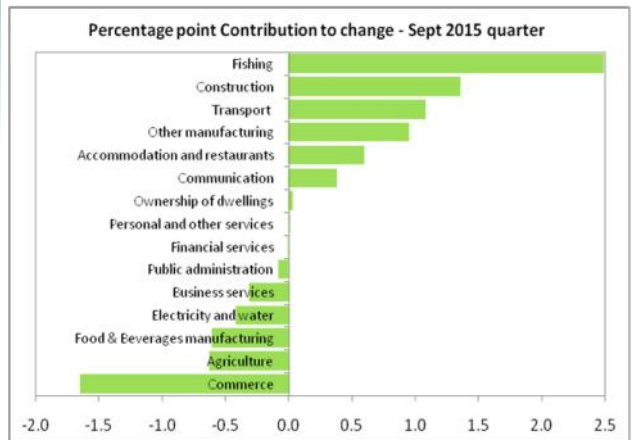

Chart 2 shows the percentage-point contribution of each industry to the overall growth of 3.2% for the current quarter. Fishing was the biggest positive contributor to overall growth recording a contribution of 2.5 percentage points. Construction became the second biggest contributor with a contribution of 1.4 percentage points. Other positive contributors were Transport (1.1 percentage points), Other Manufacturing (0.9 percentage points), Accommodation & restaurant (0.6 percentage points) and Communication (0.4

Overview cont'd

percentage points). Personal & Other services recorded a positive contribution of less than 0.1 percentage points.

Fishing industry continues its positive trend growth registering another positive growth of 95.7% over the September 2014 quarter. This was the sixth consecutive quarter of positive growth for the industry. When compared to June 2015, the industry also went up by 60.6%. The industry continues to grow in order to meet the high demand for fish export from international markets such as American Samoa and the U.S.A.

Construction industry rebounded in the period under review recording a positive growth of 13.2% following four consecutive quarters of negative year-on-year (y-o-y) growths. Value added at constant prices stood at \$52.1 million, the highest quarterly output achieved by the industry since the \$53.7 million produced in the December 2013 quarter, due to the rehabilitation and re-construction for cyclone Evan affected areas. The performance in the period was a result of more infrastructural developments and the construction works been undertaken as part of the preparations for the All Blacks vs Samoa rugby game and the Commonwealth Youth games.

Transport recorded a total value added of \$22.7 million at constant prices increasing by 27.2% on a y-o-y basis. This was the highest value added produced by the industry since March 2010, making it the sixth consecutive quarter of positive y-o-y growth for the industry. Other manufacturing once again recorded another positive y-o-y performance when it went up by 16.5% over the September 2014 quarter. Value added at constant prices was \$30 million, the highest ever recorded since September 2013. This was mainly due to the 45% increase in exports of insulated wire, cable and other electric conductors compared to September 2014. Accommodation and Restaurant recorded a value added at constant prices of \$11.1 million, increasing by 31.7% over the corresponding period of 2014. This was the highest output reached by the industry since the 2007/2008 pre-economic crisis level. When compared to the June 2015 quarter, the industry further went up by 55.1%. The good performance by the industry was consistent with the increase in the number of tourists visited the country mainly in the sports category for the Commonwealth Youth Games and the NZ vs Samoa rugby game. Communication went up by 9.9% making it the fourth consecutive quarter of positive y-o-y growth for the industry. Despite this increase, value added was still 9.2% lower than its output in June 2015.

On the other hand, industries that contributed negatively to overall growth were Commerce (-1.6 percentage points), Agri-

culture (-0.6 percentage points), Food & Beverage manufacturing (-0.6 percentage points), Electricity & Water (-0.4 percentage points), Public Administration (-0.1 percentage points) and Financial services (less than 0.1 percentage points). This makes it the third consecutive quarter of negative y-o-y growth for the Commerce industry when it declined by 5%. However, value added in the period was the highest for the industry since September 2014 which was mainly fuelled by the activities related to the preparation and hosting of the UN-SIDS conference. When compared to the June 2015 quarter, Commerce went up by 10.8%. Agriculture sector was 7.9% lower than its output in September 2014. This makes it the sixth consecutive quarter of negative y-o-y growth for the sector. This was evidence of the decline in the majority of major produce supplied to the markets around the country during the current period. However, sector's output went up by 8.8% compared to June 2015.

Food & Beverage manufacturing recorded a negative y-o-y growth rate of 17.5% making it the fourth quarter of negative growth. However, value added by the industry was 9.4% higher than its level in June 2015. Electricity & Water recorded another negative y-o-y growth declining by 9.7% over September 2014 but went up by 3.7% compared to June 2015. Business services declined by 9.3% on a y-o-y basis but went by 8.7% on a q-o-q basis. Public Administration registered another negative growth in the period, slightly down by 1.1% over the September 2014 quarter. It further declined by 4.1% compared to the previous period.

GDP at Current Prices (Nominal):

GDP at Current Prices (Nominal) for the September 2015 quarter amounted to \$525.4 million, the highest quarterly nominal level reached by the economy. It went up by 4.4% on a y-o-y basis; the economy has now registered eleven consecutive quarters of positive change at current prices. The major contributors to overall change were Construction, Transport, Other Manufacturing and Communication with contributions of 1.3, 1.2, 0.9 and 0.8 percentage points respectively. Public Administration and Financial Services also contributed 0.7 percentage points each. Construction activities went up by 13.4% over the September 2015 quarter and came on top to be the biggest contributor to overall nominal change followed by Transport with 29.9%. Other Manufacturing and Communication both declined by 14.9% and 20.4% respectively.

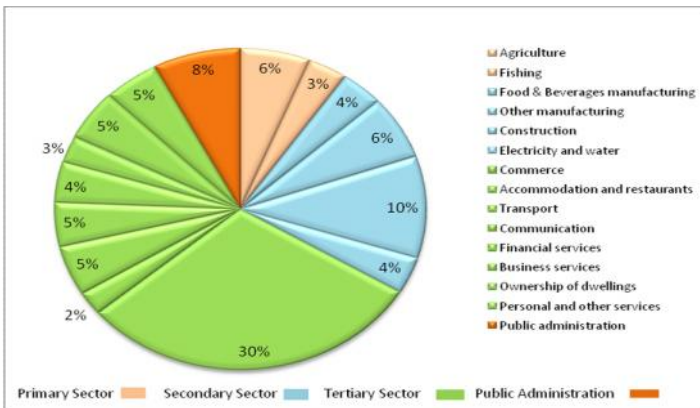

When compared to the June 2015 quarter, nominal GDP for September 2015 increased by 11.4%.

Overview cont'd

GDP Composition (in Current Prices):

The industry composition at current market prices for September 2015 is shown in Chart 3. As illustrated on the Chart, the Tertiary sector remains the largest industry with a share of 58.2% of total GDP dropping its share by 0.8% over the September 2014 quarter. The decrease was mainly driven by the 8% decrease in the Commerce industry's share. It further declined by 1.1% when compared to the June 2015 quarter. The secondary sector recorded the second largest contribution to aggregate GDP of 24.4%, increasing its share by 0.6%. The increase in the sector's share was mainly due to the upturn in the share of the Other Manufacturing and Construction both recorded increases of 12.9% and 9.7% respectively despite the declining performances by Food & beverage manufacturing and Electricity & Water. The Primary Sector's share to total GDP was 8.9%, it slightly went down by 0.5% compared to September 2014. The increase in the Agriculture sector's share in the period was not sufficient enough to offset the decrease in the Fishing's share. Public Administration contributed 7.7%, this was an increase of 5.1% over September 2014, but down by 8.3% compared to June 2015.

Chart 3: Composition of GDP; September 2015 Quarter

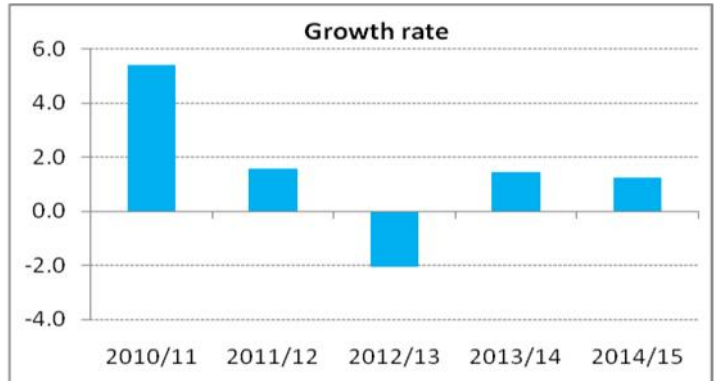

Twelve Months Review (October 14 - September 15)

GDP for the year ended September 2015 (October 14—September 2015) at current market prices stood at \$1,970.8 million, an increase of 4.3% over the year ended September 2014. At constant 2009 prices, value added was \$1,728.9 million for the year ended September 2015, increasing by 1.4% over the year ended September 2014.

As shown by chart 4, the economy has now recorded two consecutive years of positive growths, 1.9% in 2013/14 (Oct13-Sept14) and 1.4% in 2014/15 (Oct14-Sept15) following the

negative performance in the year ended September 2013. The favorable performances in the recent years were boosted by the activities related to the preparations and hosting of the UN-SIDS conference in 2014, the All Blacks vs Samoa rugby game and the Commonwealth Youth Games in 2015.

Chart 4: Percentage change in value added at constant prices over previous years, 2010/11 - 2014/15

The positive performance in the year ended September 2015 was due to positive contributions by most of the industries except for a few industries such as Commerce, Agriculture, Construction and Food & Beverages manufacturing which recorded decreases of 3.5%, 11.1%, 5.6% and 13.1% respectively. Fishing was the biggest positive contributor to growth with a contribution of 1.3 percentage points, increasing by 66.9% compared to the year ended September 2014. Other major contributors were Transport, Communication and Personal & Other services all contributed 1.3, 0.8 and 0.4 percentage points to overall growth of 1.4%.

Chart 5: Percentage-point contributions to change in real GDP by industry, for the year ended September 2015

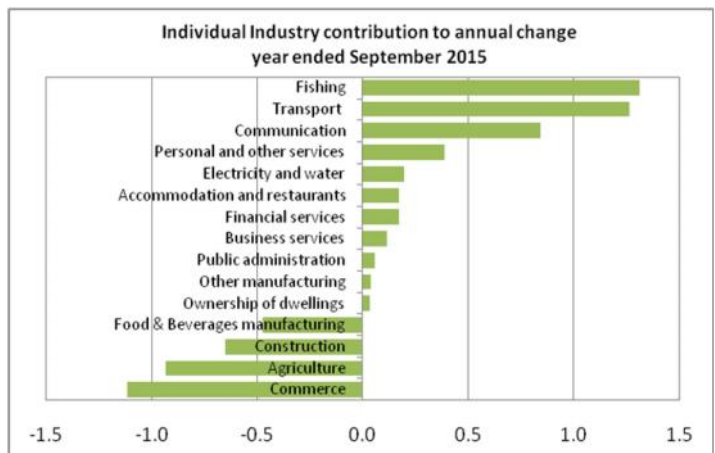

Chart 5 shows the contributions of each industry to overall increase of 1.4% in the year ended September 2015.

Individual Industry Quarterly Performance

AGRICULTURE	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	29,944	30,512	32,490	6.5	8.5
Value added (constant 2009 prices) WST (thousands)	35,481	30,041	32,673	8.8	-7.9
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	-0.8	-0.5	-0.6	Chart 6: Percentage change in Agriculture value added; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	6.0	6.5	6.2		

The value-added for the Agriculture sector stood at \$32.7 million at constant 2009 prices in the September 2015 quarter, recording a negative growth of 7.9%. This was translated into a contribution of negative 0.6 percentage points to overall GDP growth. The sector continues to weaken due to the continuous changes in the weather patterns. This was consistent with a decrease in fresh produce supplied to the local markets by farmers across the country. Major food crops such as Taro, Banana, Taamu, Coconut, Tomatoes, Chinese Cabbages and Cucumber all recorded negative changes of 24.7%, 50.1%, 83.7%, 27.6%, 40.7%, 2.6% and 6.4% in the respective order.

However, when compared to the June 2015 quarter, value added was up by 8.8%.

FISHING	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	18,870	15,535	18,221	17.3	-3.4
Value added (constant 2009 prices)	11,679	14,234	22,856	60.6	95.7
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.5	1.1	2.5	Chart 7: Percentage change in Fishing value added; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	3.7	3.3	3.5		

Total value added in real terms for the Fishing industry amounted to \$22.9 million, a notable increase of 95.7% when compared to the corresponding period of 2014. This makes it the sixth consecutive quarter of positive growth for the industry. The favorable performance in the period under review was due to an increase in the export of fresh fish in the current period which was more than 4 times the quantity supplied in the September quarter of last year. Value added by the industry was 60.6% higher when compared to the previous quarter, an evident of the 94% increase in the quantity of fish exported when compared to the June 2015 quarter.

The industry contributed a 2.5 percentage points to overall growth in the period under review and a share of 3.5% to total GDP.

Individual Industry Quarterly Performance

FOOD & BEVERAGE MANUFACTURING	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	19,587	15,495	19,849	28.1	1.3
Value added (constant 2009 prices) WST (thousands)	15,578	11,752	12,859	9.4	-17.5
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.2	-0.9	-0.6	Chart 8: Food & Beverage Manufacturing quarterly value added & % change over the same period of the previous year; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	3.9	3.3	3.8		

Food and Manufacturing industry registered a decline in real value-added of 17.5% making it the fourth consecutive quarter of negative growth on a year-on-year basis. The weaker performance by the industry correlates with the 7.2% and 100% decreases in the exports of Beer and Soft Drinks respectively in the period compared to the corresponding period of 2014. This was also expected considering the higher value added recorded in the September 2014 quarter when local production of soft drinks and beer went up significantly in the related period due to demand for the products during the UN-SIDS conference which was hosted by the country last year in September.

However, value-added generated by the industry went up by 9.4% when compared to the June 2015 quarter.

OTHER MANUFACTURING	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	29,622	31,479	34,028	8.1	14.9
Value added (constant 2009 prices) WST (thousands)	25,731	27,266	29,984	10.0	16.5
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	-1.0	0.3	0.9	Chart 9: Contribution to change in Other Manufacturing; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	5.9	6.7	6.5		

In real terms, Other Manufacturing recorded a value added of \$30 million in the period under review. This was the highest quarterly value added recorded by the industry since the \$30 million produced in the September 2013 quarter. Compared to the Sept 2014 quarter, the industry recorded an increase of 16.5%. This was the second consecutive quarter of positive performances by the industry on a y-o-y basis. This was consistent with the 45% increase in exports of insulated wire, cable and other electric conductors. The industry managed to contribute a positive 0.9 percentage points to the overall growth and a 6.5% share to total GDP.

Individual Industry Quarterly Performance

CONSTRUCTION	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	48,259	47,012	54,736	16.4	13.4
Value added (constant 2009 prices) WST (thousands)	46,004	45,500	52,096	14.5	13.2
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	-1.5	-0.2	1.4	Chart 10: Construction quarterly value added & % change over the same period of the previous year; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	9.6	10.0	10.4		

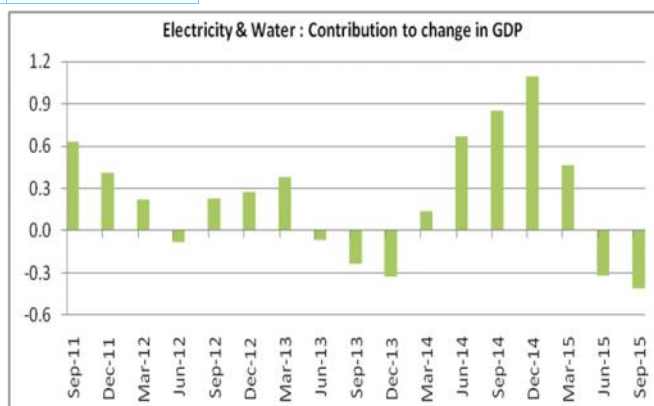

Construction has recovered remarkably in the Sept 2015 quarter following four consecutive quarters of negative growth, recording a notable increase of 13.2% over the Sept 2014 quarter. The industry produced a total value added at constant prices of \$52.1 million, an equivalent quarterly level to be reached as recorded for the Sept 2013 quarter. Construction has a share of 10.4% to total GDP and contributed 1.4 percentage points to overall growth. The favorable performance by the industry was consistent with the 14.8% increase in imported construction materials. An evident of the various major construction activities being carried out in the period, like the Apia park and other construction works in preparation for the All Blacks vs Samoa game and the Commonwealth Youth games last year, continuous infrastructural developments by the government (roads and buildings) and the increasing number of churches and private residents being built in the period.

ELECTRICITY AND WATER	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	24,677	20,157	19,666	-2.4	-20.3
Value added (constant 2009 prices) WST (thousands)	19,095	16,627	17,249	3.7	-9.7
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.8	-0.3	-0.4	Chart 11: Contribution to change in GDP at constant 2009 prices, Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	4.9	4.3	3.7		

In real terms, value added for the industry stood at \$17.3 million for the quarter under review dropping by 9.7% on a y-o-y basis contributing a negative 0.4 percentage points to overall growth in the period. This reflects the 9.9% decrease in diesel generated electricity that made up more than 60% of total electricity produced in the period. The decreased production for water and electricity was expected considering the high demand for both utilities during the UN-SIDS Conference in the September 2014 quarter. But when compared to June 2014, value added was up by 3.7%.

In current prices, value added declined notably by 20.3%, this was consistent with the 18.4% price reduction in the unit cost of electricity in the September 2015 quarter compared to the same quarter of 2014.

Individual Industry Quarterly Performance

COMMERCE	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	165,832	142,712	160,737	12.6	-3.1
Value added (constant 2009 prices) WST (thousands)	146,788	125,804	139,410	10.8	-5.0
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	2.6	-1.6	-1.6	Chart 12: Commerce quarterly value added & % change over the same period of the previous year; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	33.0	30.3	30.6		

Commerce recorded a total value added at constant 2009 prices for the period under review of \$139.4 million. This was a decrease of 5% over Sept 2014. Commerce was one of the industries that contributed negatively to overall change on a y-o-y basis with a -1.6 percentage points contribution to overall growth and a share to total GDP of 30.6%.

The performance in the period was expected considering the high spending in retailing and wholesaling activities experienced in the September 2014 quarter as a result of the activities emerging from the hosting of the UN-SIDS conference.

However when compared to June 2015, the industry recorded an increase of 10.8%.

ACCOMMODATION AND RESTAURANTS	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	9,139	8,173	12,616	54.4	38.0
Value added (constant 2009 prices) WST (thousands)	8,646	7,186	11,143	55.1	31.7
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.6	0.1	0.6	Chart 13: Accommodation & Restaurants percentage change over the same period of the previous year; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	1.8	1.7	2.4		

Accommodation and Restaurant registered a real value added of \$11.1 million in the reviewed period, this was an increase of 31.7% on a year-on-year basis and further went up by 55.1% on a quarter-on-quarter basis. The good performance by the industry coincided with the events that occurred in the period like the historical rugby game between the All Blacks and Samoa in July as well as the Commonwealth Youth games which was held in Apia in the period under review. Statistics on visitor arrivals to Samoa shows that the majority of these visitors were in the Sports category which was more than two (2) times the number of tourists that visited Samoa in September 2014, along with visitors on Holiday during the period which increased by 14.6% over the September 2014 quarter.

Individual Industry Quarterly Performance

TRANSPORT	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	20,537	19,912	26,674	34.0	29.9
Value added (constant 2009 prices) WST (thousands)	17,885	17,255	22,743	31.8	27.2
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.8	0.7	1.1	Chart 14: Transport quarterly growth rates with total value added at constant 2009 prices, Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	4.1	4.2	5.1		

The Transport industry has now recorded six consecutive quarters of positive performances, recording a total value added of \$22.7 million in real terms for the period under review. The industry performed exceptionally both on a quarter-on-quarter and on a year-on-year basis recording respective increases of 31.8% and 27.2%. The favorable performance by the industry was in line with an increase in the import of machinery and transport equipments in the reviewed period by 34.5% compared to its import in the September 2014 quarter.

COMMUNICATION	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	19,704	24,484	23,718	-3.1	20.4
Value added (constant 2009 prices) WST (thousands)	17,211	20,832	18,913	-9.2	9.9
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	-0.1	1.4	0.4	Chart 15: Communication percentage change from the same quarter of the previous year, Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	3.9	5.2	4.5		

Communication generated a total value added of \$18.9 million at constant prices for the September 2015 quarter. The value added produced in the current period was up by 9.9% compared to the corresponding period in 2014. The industry contributed a 0.4 percentage points to overall GDP growth. The positive y-o-y performance by the industry was due to the increasing demand for communication products and services during the period especially the live broadcasting of the rugby match between the All Blacks and Samoa in July as well as the Commonwealth Youth games in September to both local and overseas viewers. But when compared to the June 2015 quarter, value added was down by 9.2%.

Individual Industry Quarterly Performance

PUBLIC ADMINISTRATION	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	36,955	39,734	40,557	2.1	9.7
Value added (constant 2009 prices) WST (thousands)	32,346	33,381	32,002	-4.1	-1.1
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.1	0.1	-0.1	Chart 16: Contribution to % change in Public Administration from the same quarter of the previous year, Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	7.3	8.4	7.7		

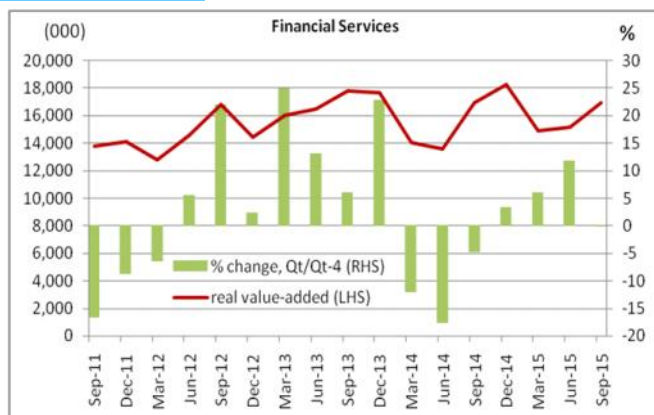

In nominal terms, the industry was up by 9.7% compared to the September 2015 quarter registering a nominal value added of \$40.6 million in the current reviewed period.

In real terms, the industry was down by 1.1% on a year on year basis. As it stood, value added at constant 2009 prices was \$32 million. Public Administration managed to take out 7.7% share to total GDP. The slight decrease of 1.1% was due to the high value added in September 2014 due to a number of part-time employees hired by some government departments to ensure the safety of participants attending the UN-SIDS conference.

FINANCIAL SERVICES	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	18,145	17,492	21,802	24.6	20.2
Value added (constant 2009 prices) WST (thousands)	16,961	15,150	16,938	11.8	-0.1
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	-0.2	0.4	0.0	Chart 17: Financial Services value added & % change over the same period of the previous year; Sept 2011 – Sept 2015	
Contribution to aggregate GDP: <i>percent</i>	3.6	3.7	4.1		

Financial Services value added at constant prices stood at \$17 million for the period under review. This was slightly down by 0.1% compared to the value added it generated in September 2014 quarter. This was the first negative y-o-y performance from the industry following three consecutive quarters of positive growths. However, when compared to the June 2015 quarter, value added increased by 11.8%. The industry's share to total GDP was 4.1%.

Individual Industry Quarterly Performance

BUSINESS SERVICES	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	16,096	12,838	14,204	10.6	-11.8
Value added (constant 2009 prices) WST (thousands)	14,901	12,435	13,512	8.7	-9.3
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.3	0.0	-0.3		
Contribution to aggregate GDP: <i>percent</i>	3.3	2.7	2.7		

Chart 18: Business Services total value-added at constant 2009 prices from Sept 2011 – Sept 2015

In real terms, Business Services value added stood at \$13.5 million for the quarter under review. The industry's performance was up by 8.7% on a q-o-q basis but declined by 9.3% compared to the same period of the previous year. The industry contributed a negative 0.3 percentage points to overall growth, and took out a share of 3% of total GDP.

PERSONAL & OTHER SERVICES	GDP Sept 2014 Quarter	GDP June 2015 Quarter	GDP Sept 2015 Quarter	% change from June 2015 quarter (q-o-q)	% change from Sept 2014 quarter (y-o-y)
Value Added (current prices) WST (thousands)	25,171	24,850	25,823	3.9	2.6
Value added (constant 2009 prices) WST (thousands)	22,464	21,903	22,506	2.8	0.2
Contribution to aggregate (y-o-y) real growth rate: <i>percentage points</i>	0.9	0.0	0.0		
Contribution to aggregate GDP: <i>percent</i>	5.0	5.3	4.9		

Chart 19: Personal & Other Services quarterly value added & % change over the same period of the previous year; Sept 2011 – Sept 2015

At constant 2009 prices, Personal and other services recorded an increase in value added of 2.8% over the June 2015 quarter and up slightly by 0.2% against the Sept 2014 quarter. The industry contributed 4.9% to total GDP and a less than 0.1 percentage points to overall growth in the period. As shown by the chart, the value added in the September 2015 quarter was the highest produced by the industry since the \$22.9 million recorded in the June 2012 quarter.

NATIONAL ACCOUNTS REVISIONS & NEW DEVELOPMENTS

Introduction

The compilation of national accounts statistics is a dynamic process, and therefore needs to adapt to reflect a variety of measures and indicators consistent with developments and structural changes in the economy over a period of time. It is therefore expected that revisions and updates are made to the historical series on a quarterly or annual basis as new data sources are brought into the model and as various benchmarks and assumptions are validated and updated.

This quarterly report is the twenty-ninth published by the Samoa Bureau of Statistics and the eighth release of the new quarterly series of GDP estimates at constant 2009 prices. This report is an ongoing publication and can also be downloaded from our website www.sbs.gov.ws.

Revisions

This update incorporates revisions to all industries for the March quarter and June quarter of 2015 as the VAGST data for the related periods has been reviewed and become available to revise estimates on some of the moving indicators.

SBS Vision:
**“To strengthen Statistical services
for the development of
Samoa”**
